The courses, programs and arrangements for delivery of programs including specified academic staff as set out in this Handbook are indicative only. The University may discontinue or vary arrangements, programs and courses at any time without notice and at its discretion. While the University will try to avoid or minimise any inconvenience, changes may also be made to programs, courses and staff after enrolment. The University may set limits on the number of students in a course. Students or prospective students may obtain the most recent information from the School or Faculty if required.

Handbook User Guide

The University has consolidated the publication of information relating to faculties, program and course offerings into an Undergraduate Handbook and a Postgraduate Handbook. The Handbooks also provide information on some of the most important administrative rules and procedures and introduce students to many of the services available to them. It is hoped that these publications will provide students with a range of detailed information and will become an important reference source while they are studying at UNSW.

While this Handbook has been designed as a detailed source of information regarding University rules and requirements, it should be used in conjunction with other University publications, especially the UNSW Student Guide, an A-Z guide which can also be accessed on web at my.unsw.edu.au

The Handbooks contain detailed information about all the programs (degrees), plans (majors, co-majors) and courses (subjects) offered at UNSW.

Within this Handbook, program outlines are presented by faculty and you should refer to the relevant faculty section for a guide to the programs offered by the faculty and their requirements. Descriptions of the individual courses (subjects) offered in these programs, including course content, staff contacts, session and prerequisite details, are listed in the back of this Handbook under ‘Course Descriptions’.

As changes may be made to information provided in this Handbook, students should consult the University and faculty web pages, faculty or departmental notice-boards, the official notice-boards of the University and, in particular, the Online Handbook at: www.handbook.unsw.edu.au.

It is important that students read the ‘General University Rules & Student Information’ section in the Handbook and the opening sections relating to the appropriate faculty, together with the summary of programs and courses. All faculty sections contain specific information relating to undergraduate degrees with which students should be familiar.

Key to Abbreviations Used in this Book:

<table>
<thead>
<tr>

### 2005 Fee Schedule

#### Identification of Courses and Course Fees 2005

The fees listed are applicable to students who commenced study from Summer Session 2005 onwards.

A course is defined by the Academic Board as ‘a unit of instruction approved by the University as being a discrete part of the requirements for a program offered by the University’.

Each approved course of the University is identified by a sequence of eight characters, consisting of a four character alphabetical prefix which identifies the subject area, and a four digit numeric suffix which identifies the course. Each course has a unit of credit value defined.

Course identifiers are approved by the Registrar and the system of allocation is based on the following guidelines:

1. A four character alphabetical prefix is used to indicate the subject areas. This usually correlates with the authority offering the course (normally a School of the University), but in some cases identifies subject specialisations or cross-disciplinary subject areas.

2. Each course identifier is unique and is not used for more than one course title.

Courses taught are listed in full in the Undergraduate and Postgraduate Handbooks and in the Online Handbook. The subject areas and organisational units for each identifying alphabetical prefix are also described in the Handbooks and the specialisation pages in the Online Handbook.

#### Course Prefixes and Associated Fees Per Unit of Credit

A standard session academic load is 24 units of credit. (48 UOC per annum)

Fees for courses are charged by unit of credit according to the classification of the course (that is undergraduate, postgraduate, research) and then the classification of the student.

To calculate the charge for a course - refer to the course prefix, appropriate course classification and student classification to determine the fee per unit of credit.

Non Award courses will also be charged according to the classification of the course as above.

**For Example:** An International student is enrolling in a Faculty of Commerce and Economics course, ACCT3563, which has a value of 6 units of credit and the course is classified as undergraduate.

The fee for this course will be \( 6 \times $390 = $2340.00 \)

NewSouth Q (Student Enquiries)

NewSouth Q (student enquiries) is the public face of the University’s student administration. It provides advice and assistance in relation to admission procedures and queries of an academic or administrative nature.

NewSouth Q is located on the lower ground floor of the Chancellery Building, open 8.30am – 5.30pm Monday – Thursday, 8.30am – 5.00pm on Fridays.

Information regarding fees, online enrolment, policies and procedures is also available on the web at: https://my.unsw.edu.au

Admission Requirements and Procedures

Admission Enquiries

The Student Recruitment Office (Kensington Campus) is the initial referral point for local students for information on undergraduate and graduate programs, and admission requirements. This office is located in Rm LG20, The Chancellery Building and is open from 9am-5pm, Monday to Friday.

Tel: (02) 9385 1844/1866
Email: studentrecruitment@unsw.edu.au

Program and course information for prospective students can be found at www.handbook.unsw.edu.au

UNSW International is the initial referral point for international students for information on undergraduate and graduate programs and admission requirements. This office is located at the Red Centre Building.

Tel: (02) 9385 6996
Email: internationaloffice@unsw.edu.au

Program information for prospective international students can also be found at www.international.unsw.edu.au

College of Fine Arts: The Student Centre is located on the ground floor of B Block. It is open from 9am to 5pm Monday-Friday.

University College, Australian Defence Force Academy: The Student Centre is located on the Top Floor in the Administration Building, telephone (02) 6268 6000. It is open from 8.30am to 5pm Monday – Thursday and 8.30am – 4pm Friday.

Admission Requirements

You will be considered for admission to undergraduate courses at UNSW on the basis of your performance in:

- Australian Year 12 studies and/or
- Tertiary or post-secondary studies and/or
- Overseas qualifications considered equivalent to Australian studies and/or
- One of the alternative entry schemes listed below.

Some courses also have additional selection criteria such as audition, interview, admissions test, and/or questionnaire.

For some degree programs and first year courses, it is also assumed that students, through their high school studies (or other equivalent study), will have achieved a level of knowledge of the subject area that is considered desirable for successful university level study. (See ‘Assumed Knowledge’ below).

Assumed Knowledge

For some degree programs and first year courses, it is assumed that students, through their high school studies (or other equivalent study), will have achieved a level of knowledge of the subject area that is considered desirable for successful university level study. (See ‘Assumed Knowledge’ below).

Admission Procedures

The procedures for applying to UNSW will vary depending on whether you are a local or international applicant:

- **Local applicants** are Australian citizens, Australian permanent residents or New Zealand citizens.
- **International applicants** are citizens of a country other than Australia or New Zealand.

All **local applicants** must apply through the Universities Admissions Centre (UAC) by the end of September. (Late applications are accepted until early February on payment of a late fee). Students are notified by UAC of the result of their applications and provided with information regarding procedures to be followed to accept an offer of a place at UNSW. The UAC Guide, available in August, outlines admission and application requirements and procedures for all UNSW undergraduate programs. Please refer to the UAC website at www.uac.edu.au or telephone (02) 9752 0200

If you are an **international applicant** completing Year 12 in Australia in 2004 you must apply through the Universities Admissions Centre (UAC). Contact details are as above.

All other **international applicants** (i.e. those international applicants who have completed or are completing qualifications OTHER than current Australian Year 12 or are completing an Australian Year 12 outside Australia) need to apply for admission directly to UNSW. Please refer to UNSW International’s website at www.international.unsw.edu.au for further information, entry requirements and application procedures or telephone (+61 2) 9385 6996. Alternatively, you can submit an **online application at**: www.apply.unsw.edu.au. You will need to provide certified copies of your original documents, including your academic transcripts from high school and any post-secondary study as well as evidence of English proficiency (see ‘English proficiency’ below).

Mid-Year Admission: UNSW accepts applications for admission to Session 2 each year for a limited number of undergraduate programs. Local students will need to apply through the Universities Admissions Centre and should contact the Student Recruitment Office for further information (telephone (02) 9385 1866, email studentrecruitment@unsw.edu.au). International students should contact UNSW International above.

Assumed Knowledge

For some degree programs and first year courses, it is assumed that students, through their high school studies (or other equivalent study), will have achieved a level of knowledge of the subject area that is considered desirable for successful university-level study. The table below sets out the level of achievement assumed in terms of the NSW Higher School Certificate.

Students who do not have the level of assumed knowledge are not prevented from enrolling but may be placed at a considerable disadvantage. Any students who have not achieved the recommended level of assumed knowledge are strongly advised that it is in their best interest to undertake a bridging course or other appropriate preparation before enrolling. There is a charge for these programs. Information on available bridging courses is available from the UAC Admissions Office at NewSouth Q, telephone 1300 36 UNSW (1300 36 8679). UNSW also offers introductory level courses which can be taken in the first year of study. Undertaking an introductory course may extend the total time for completion of the degree.

It is also assumed that students are competent at communicating in written and spoken English when they enrol in programs at UNSW. Many courses require you to make presentations, do assignments or write essays, and without a high level of written and spoken English, you will find it difficult to perform well in these courses. See ‘English Proficiency’, below.

Where Mathematics is listed as assumed knowledge, you are expected to have achieved performance at Band 4. If you have undertaken General Mathematics you will not have achieved the recommended level of assumed knowledge.

For all other HSC subjects listed above, you are expected to have achieved a level of performance at Band 4.

If you have undertaken Senior Science, you will not have achieved the recommended level of assumed knowledge for university level physics or chemistry.

**English Proficiency**

All applicants for admission to UNSW undergraduate or postgraduate programs either in Australia or overseas whose first language is not English must provide evidence that their English language ability meets the requirements for admission.

The required evidence may take the form of results from an acceptable English language test undertaken no more than two years prior to the commencement of the program at UNSW. Only original test certificates are acceptable. The University does not accept certified copies of English language results.

Alternatively, applicants whose first language is not English but who have undertaken at least one year full-time study at a university or other post-secondary educational institution where the sole language of instruction was English will not be required to undertake a language test if they can provide a statement or certificate issued by the Registrar’s office of that institution confirming this. This study must have been undertaken no more than two years prior to the commencement of the program at UNSW.

**International Applicants Only**

Candidates who provide an English test score which fails to meet the minimum standard required by UNSW or who fail to provide any evidence of English language proficiency, will be assessed for eligibility for admission and, if successful, will be issued with a conditional offer of admission. A full offer of admission will be issued only when the English language proficiency has been met.

For information regarding accepted tests of English competence refer to the website at www.international.unsw.edu.au/prospective/entry_english.shtml or contact the Direct Admissions Office on (+61 2) 9385 3656.

**Admission Based on Equivalent Qualifications**

Most applicants seeking admission to UNSW have completed the NSW Higher School Certificate or interstate equivalent. However, UNSW also accepts other qualifications, including:

1. **Overseas Secondary and/or Tertiary Qualifications**
   May be assessed by the University as meeting the equivalent level for admission to a particular program.

2. **NSW TAFE Associate Diploma, Diploma, Advanced Diploma or Certificate IV**
   Applicants holding completed approved TAFE qualifications are eligible to be considered for admission. Trade certificates are not acceptable for admission purposes.

3. **Previous Tertiary Studies**
   A person who has successfully completed the equivalent of at least one full-time year of a degree course at any recognised tertiary institution.

4. **Open Learning**
   Applicants who have successfully completed four one-unit Open Learning degree level courses are eligible to be considered for admission. However, due to high demand for places in most programs, successful applicants generally will have completed at least eight one-unit courses with credit average results.

5. **Foundation Year Program**
   Students may qualify for admission to undergraduate programs by successfully completing the Foundation Year Program or a recognised equivalent program. The Foundation Year Program is conducted at eight locations, the Kensington campus of the University, St Paul’s International College Moss Vale, Pittwater House International Sydney, Swan College Perth, Australian International School Singapore, Uniprep Jakarta Indonesia, Kolej Damansara Utama Malaysia and the University of Otago Dunedin New Zealand. Please refer to the website at www.ufy.unsw.edu.au or telephone (+61 2) 9385 5396 for further information.

**Alternative Entry to the University**

Some avenues of alternative entry are available for (i) older students, (ii) Australian Aboriginal and Torres Strait Islander students and (iii) educationally disadvantaged students. These avenues of alternative entry are for local applicants only and are described below.

**Older Students**

There are three avenues of entry available for older students.

1. Applicants who are 20 years of age or older may qualify for entry to the University by completing the Certificate in Tertiary Preparation conducted by TAFE. For further information on the TPC, contact the TAFE Information Centre telephone 131 601.
The ACCESS Scheme is designed primarily to assist new to higher education applicants who can demonstrate financial hardship. Applications forms are available from the website www.unsw.edu.au/upp or telephone 1300 36 8679.

**Points to Note:**
- Entry to the Medicine or Optometry programs is not possible via the TAFE Certificate in Tertiary Preparation, Certificate of Matriculation, or the University Preparation Program.
- In addition, the UPP is not accepted for entry to the Bachelor of Psychology program.
- Completion of the Certificate of Matriculation, the TPC or UPP does not ensure entry. Selection into all programs is based on academic merit in competition with other applicants. Some programs require applicants to attend an audition or interview.
- Certain programs have assumed knowledge. Refer to the section on assumed knowledge.
- Any application for admission based on results in the Certificate of Matriculation, the TPC or UPP must be made through the Universities Admissions Centre www.uac.edu.au.
- Any enquiries concerning the above should be directed to the UAC Admissions Office at NewSouth Q (Student Enquiries), telephone: 1300 36 8679.

Aboriginal and Torres Strait Islander Admissions

The University provides an alternative entry scheme for Australian Aboriginal and Torres Strait Islander applicants. It is not necessary for applicants to have attempted the HSC or equivalent in order to apply for admission under this scheme although applicants must demonstrate general preparedness for tertiary study and the capacity to succeed in tertiary study.

Points to Note:
- Applicants who are 21 years of age or older may qualify for entry to the University by undertaking 5 units of Category A courses, including English at the NSW Higher School Certificate examination and obtaining a Limited UAI. Applicants must undertake no more than nine units. The Certificate of Matriculation is undertaken at a college of TAFE.
- Local applicants who are 21 years of age or older may also apply for admission to certain programs on successful completion of the University Preparation Program (UPP). The UPP is designed to help students develop the skills and strategies needed to successfully manage the demands of tertiary study.

Further information about the ACCESS Scheme may be obtained from the Admissions Office, telephone 1300 36 8679. The UPP is available in Session 1 as a 14 week or 28 week course and in Session 2 as a 14 week course. Applications open in December for the Session 1 course and in May for the Session 2 course. The cost of the program is $550 (Humanities Stream) or $800 (Science Stream) which is paid at the time of application. A limited number of reduced fee places are available for applicants in receipt of Centrelink allowances or pensions or who can otherwise demonstrate financial hardship. Applications forms are available from the website www.unsw.edu.au/upp or telephone 1300 36 8679.

**Points to Note:**
- Entry to the Medicine or Optometry programs is not possible via the TAFE Certificate in Tertiary Preparation, Certificate of Matriculation, or the University Preparation Program.
- In addition, the UPP is not accepted for entry to the Bachelor of Psychology program.
- Completion of the Certificate of Matriculation, the TPC or UPP does not ensure entry. Selection into all programs is based on academic merit in competition with other applicants. Some programs require applicants to attend an audition or interview.
- Certain programs have assumed knowledge. Refer to the section on assumed knowledge.
- Any application for admission based on results in the Certificate of Matriculation, the TPC or UPP must be made through the Universities Admissions Centre www.uac.edu.au.
- Any enquiries concerning the above should be directed to the UAC Admissions Office at NewSouth Q (Student Enquiries), telephone: 1300 36 8679.

Aboriginal and Torres Strait Islander Admissions

The University provides an alternative entry scheme for Australian Aboriginal and Torres Strait Islander applicants. It is not necessary for applicants to have attempted the HSC or equivalent in order to apply for admission under this scheme although applicants must demonstrate general preparedness for tertiary study and the capacity to succeed in their chosen area of study. Preparation programs are available in Built Environment, Commerce and Economics, Law, Medicine and Social Work.

All enquiries relating to this scheme should be directed to the Nura Gili (Indigenous Programs), telephone (02) 9385 3805.

**ACCESS Scheme**

The ACCESS scheme is designed primarily to assist new to higher education applicants of high academic potential whose education has been disadvantaged by circumstances beyond their control over a substantial period of time. It is available for admission to all undergraduate programs at the University and is open to local students only. The range of circumstances that may have contributed to educational disadvantage could include: disability, prolonged illness or medical condition, financial hardship, English language difficulties, rural isolation, serious family illness.

Applicants who are eligible under the scheme will be considered for places in programs below the standard program cut-offs. Those admitted under the ACCESS Scheme will receive special assistance during their first year at University.

Further information about the ACCESS Scheme may be obtained from the Admissions Office, telephone 1300 36 8679.

**Admission with Advanced Standing and Credit Transfer**

The following rules apply to credit granted in undergraduate degrees or awards.

1. Any credit granted must be consistent with the rules governing progression within the program which are operative at the time the application is determined.
2. Students who transfer from another program shall not in general be granted standing which is superior to what they had in the program from which they are transferring.
3. Students who are admitted to the University after completing or partly completing the requirements of another degree or award of another tertiary institution must complete a program of study deemed to be no less than that required of students in full-time attendance in the final year of the program concerned.
4. Where Faculty/Board of Studies rules permit, students who have been awarded the degree of Bachelor at pass level may be permitted to enrol for the award of the degree at Honours level with credit for all courses completed if, during their studies for the pass degree, they have satisfied the prerequisites for entry to the Honours level laid down by the schools concerned or the equivalent of those prerequisites.

Applicants should also note that eligibility for credit in a UNSW program does not guarantee admission to that program.

**General Education Requirements**

UNSW requires that undergraduate students undertake a structured program in General Education as an integral part of studies for their degree. General Education requirements are set out in detail in the General Education section of this Handbook.

**Student Fees**

**1. Student Activity Fees**

**1.1 Student Activity Fees**

These are charged and payable each session. Due dates are the same as for student contributions and tuition fees. Subscriptions are adjusted annually by a system of indexation. Please note that, as explained below, GST has been included in these fees.

**Kensington Campus:**

- University Union per session subscription: full-time students: $134.20 part-time students: $100.65
- Sports Association per session subscription: full-time students: $42.90 part-time students: $31.90
- Student Guild per session subscription: full-time students: $35.20 part-time students: $27.50

**College of Fine Arts:**

- College of Fine Arts Students’ Association per session subscription: full-time students: $133.10 part-time students: $83.60

**GST (Good and Services Tax)**

The Australian Government has determined that a Goods and Services Tax (GST) of 10% applies to most goods and services and anything else consumed in Australia. Certain exceptions include most education courses provided by the University. If you are enrolled in an award program you will not be liable for the GST.

However subscriptions for membership of the Students’ Union, Guild and Sports Association are not part of the academic award program and these fees are therefore subject to GST.

**b) Miscellaneous Activity Fee:**

This fee is used to finance expenses generally of a capital nature relating to student activities and includes an allocation for insurance cover for students. Funds are allocated for projects approved by the University Council.

Kensington: $39.00 per session

College of Fine Arts: $39.00 per session

**1.2 Exemption from Student Activity Fees**

Students often seek exemption from Student Activity Fees for reasons other than those set out below. It is stressed that the fees charged are a contribution by students towards services and amenities for the University community both now and in the future and exemption from them cannot be claimed because a student is unable or unwilling to make use of some of those services or amenities.

1. Life members of the University Union and the Sports Association are exempt from Subscriptions.
Students who consider themselves eligible for life membership of the University Union or the Sports Association should make enquiries at the offices of those organisations. Once life membership has been approved, contact the Treasury with your life membership details.

(2) Students enrolled in programs classified as external or who are enrolling in programs where for a session or sessions the formal academic requirements are undertaken at a part of the University away from their campus such as a teaching hospital or field station or at another tertiary institution or elsewhere, are exempt from all Session Subscriptions but not the Miscellaneous Activity Fee. Students who consider themselves eligible for a Session Subscription fee concession on the basis of external study should contact their Program Authority in the first instance.

(3) Students enrolled in programs at the University College, Australian Defence Force Academy, are exempt from the Student Activity Fees, but shall pay such other fees and charges as the Council may from time to time determine.

(4) Students who while enrolled at and attending another tertiary institution in a degree or diploma course are given approval to enrol at the University in courses to be credited towards the degree or diploma for which they are enrolled elsewhere are exempt from all subscription Student Activity Fees. Students should provide proof of payment of such fees at another tertiary institution to the Student Financials Section at NewSouth Q.

(5) Graduate students who have completed all the experimental and research work for their degree at the commencement of session, except for the submission of their thesis or project report, may be exempted from the payment of all Student Activity Fees by the Registrar on production of an appropriate statement from the student's supervisor or Head of School certifying that the student is no longer using University facilities.

(6) Graduate students required to resubmit their thesis or project report where resubmission requires no further experimental or research work may be exempted from payment of all Student Activity Fees by the Registrar on production of an appropriate statement from the supervisor or Head of School.

(7) The Registrar is empowered to grant exemption from membership of the University Union, Student Guild and/or the Sports Association to students who have a genuine conscientious objection to such membership, subject to payment of all prescribed fees to the Miscellaneous Activity Fee.

1.3 Refund of Student Activity Fees Paid

(1) If notice of discontinuation of a program is received on or before 31 March a full refund of Session 1 Subscriptions and the Miscellaneous Activity Fee paid will be made; if notice is given on or before 31 August a refund of Session 2 Subscriptions and the Miscellaneous Activity Fee paid will be made; thereafter no refund will be made except that provided for in (2) below.

(2) The refunds mentioned above may be granted to a student unable to notify the Registrar in writing by the dates required provided evidence is supplied that the student had ceased attendance by those dates. Students who consider themselves eligible for a refund should contact the Treasury.

(3) The refunds mentioned in (1) above also apply to graduate students who submit a thesis or project report for examination or whose enrolment is discontinued by the dates given.

2. Student Contributions

In 2002, the Commonwealth Government conducted a review of Australia’s higher education system which resulted in changes to the Higher Education Contribution Scheme (HECS) and the Postgraduate Education Loan Scheme (PELS) that will come into effect on 1 January 2005.

How has HECS changed for Pre-2005 Students and Commencing Students in 2005?

New Student Contribution Ranges

What were known as HECS places are now called Commonwealth supported places. Higher education providers determine student contribution amounts for these places within ranges set by the Australian government. (Refer to Student Contribution Rate Table for Pre and Post 2005 contributions)

New Student Learning Entitlement

The Commonwealth government has introduced the Student Learning Entitlement (SLE). The SLE gives all Australian citizens, New Zealand citizens and holders of a permanent visa access to a Commonwealth supported place for 7 years of equivalent full-time study.

Eligibility for Loans and Discounts

The deferred payment arrangements and discount for up-front payments under HECS are now grouped together as HECS-HELP assistance. Australian citizens and holders of a permanent humanitarian visa are eligible for HECS-HELP. The discount for full up-front payments or up-front payments of $500 or more has changed to 20%.

THE COMMONWEALTH GOVERNMENT REQUIRES STUDENTS WHO REQUIRE HECS-HELP ASSISTANCE TO SUPPLY A VALID TAX FILE NUMBER (TFN) FOR 2005 WHETHER OR NOT A TFN HAS BEEN SUPPLIED PREVIOUSLY.

Students who continue their program after 2005 as a Commonwealth supported student, must complete a Request for Commonwealth Support and HECS-HELP –Pre-2005 form on or before the relevant census date. Failure to do so will result in cancellation of enrolment as a Commonwealth supported student.

Before signing the form, students must read the Information for Commonwealth Supported Students 2005 in order to be aware of their obligations as the recipient of assistance from the Commonwealth.

Students who Commenced Studies before 2005

Pre-2005 HECS students will be affected by most of the changes outlined in the previous section. That is:

- they will become a Commonwealth supported student;
- commence using SLE; and
- if eligible, access HECS-HELP assistance, including the new discount rate of 20% for up-front payments of $500 or more.

Pre-2005 HECS students will also be subject to new thresholds for the repayment of HECS debt and the new bonus for voluntary repayments.

The only changes that affect students differently as a pre-2005 HECS student are the:

- changes to the student contribution amounts; and
- new eligibility criteria for HECS-HELP.

The arrangements that apply are described below. From the end of 2008, however, all students will be subject to the new arrangements, regardless of whether they have completed their program.

Student Contribution Amounts

UNSW has set the following Student Contribution amounts for pre-2005 HECS students and students commencing in 2005. For pre-2005 HECS students who began their program before 1 January 1997, the Student Contribution for 2005 is $2,889. The pre-1997 rate is indexed each year.

### Student Contribution Rate Table

</table>
Calculating Student Contribution Amounts and EFTSL
Equivalent full-time student load (EFTSL) is a measure of the study load, for a year, of a student undertaking a program on a full-time basis. The amount of the Student Contribution depends on the EFTSL value of the course.

Calculating EFTSL for a course
At UNSW, a normal full-time enrolment for one year is defined as 48 units of credit (24 units per session). A course (unit of study, e.g. MATH1011) has the same unit of credit value and generates the same load (EFTSL) irrespective of the program (e.g. Bsc) or the stage in which it is offered. Most courses at UNSW have a value of 6 units of credit (6 UOC).

To calculate the EFTSL of a course, you will need to note its units of credit (UOC) value. The unit of credit for a course is displayed in this Handbook or in the Online Handbook at www.handbook.unsw.edu.au.

Eligibility for HECS-HELP assistance
For students commencing in 2005, HECS-HELP assistance is available only to Australian citizens or holders of a permanent humanitarian visa.

HECS-HELP assistance eligibility for New Zealand citizens or holders of a permanent visa (other than a permanent humanitarian visa) who are pre-2005 HECS students, will be determined under the old HECS rules until the end of 2008.

FEE-HELP
• FEE-HELP is a new loan program that assists eligible fee-paying students to pay their tuition fees at eligible higher education providers. Australian citizens and holders of a permanent humanitarian visa are eligible for FEE-HELP assistance.
• Under FEE-HELP, students can borrow up to a maximum of $50,000 (indexed each year) over their lifetime.
• Undergraduate FEE-HELP loans are subject to a 20% loan fee.

OS-HELP
• OS-HELP is a new loan program that assists eligible undergraduate students who wish to study overseas for one or two study periods. It assists these students with payment of their tuition fees at eligible higher education providers. Australian citizens and holders of a permanent humanitarian visa are eligible for OS-HELP assistance.
• Under OS-HELP, students can borrow up to $5,000 per study period for one or two study periods overseas study.
• OS-HELP loans are subject to a 20% loan fee.

How These Changes Affect Students With An Existing HECS or PELS Debt
HECS or PELS Debts
From 1 June 2006, an accumulated HECS or PELS debt will become known as an accumulated HELP debt. Any HECS-HELP or FEE-HELP debts you incur from 1 January 2005 will be added together with your HECS or PELS debt to become one accumulated HELP debt on 1 June 2006.

New Repayment Thresholds
The Commonwealth Government has increased the minimum repayment threshold for compulsory repayment of a HECS or PELS debt from $25,348 in 2003-04 to $35,000 in 2004-05, and $36,184 in 2005-06 for a HELP debt.

New Bonus for Voluntary Repayments
The bonus for voluntary repayments of a HECS, PELS or HELP debt will change to 10% from 1 January 2005.

Bankruptcy Rules
From 1 January 2005, HELP debts and accumulated HELP debts are not provable under the Bankruptcy Act 1966 and you will have to pay them as if you had not been declared bankrupt. Your HECS or PELS debt will remain provable until it becomes part of your accumulated HELP debt on 1 June 2006. Further information is available from: my.unsw.edu.au or www.goingtouni.gov.au.

3. UNSW Fee Policy: International Students
This policy applies to all international students. An international student is a student who is not a citizen or permanent resident of Australia, or a New Zealand citizen. All enrolled international students (or their sponsors), whether in attendance at a campus of UNSW or offshore are liable for payment of tuition fees and Student Activity Fees.

Acceptance of an Offer of Admission
Tuition Fee Deposit: International students wishing to accept an offer of admission to a program must pay a deposit fee to secure their place. Places in programs will be allocated in order of receipt of the deposit. The balance of tuition fees for the first session of the program is payable according to the payment guidelines on the fees statement issued after enrolment. External or offshore students and some government-sponsored students have different deposit requirements, as detailed in the offer letter.

Student Visa: On receipt of the deposit and, if appropriate, the health insurance payment, the University will issue an Electronic Confirmation of Enrolment for Overseas Students (e-COE) form which a student requires in order to apply for a student visa for travel to, and temporary residence in, Australia.

Deferral: Requests to defer initial enrolment from one year to the next, or one session to the next, must be made in writing or online by the deadline stipulated in the offer letter. Not all programs permit deferral. Students not permitted to defer must lodge a new application for admission at the time appropriate for their intended commencement of the program. A student who defers will be liable for the tuition fees applicable in the year in which he/she will enrol.

Fee Charges and Payments
Fees Payable
(1) Tuition Fees:
Tuition fees are reviewed annually and may increase. A complete schedule of tuition fees is available on the UNSW website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

(2) Student Activity Fees:
All students enrolling in fee-paying programs, including non-award enrolments, are liable to pay Student Activity Fees each session at the published rates (see ‘Student Activity Fees’, item 1 for itemisation of fees charged). Student Activity Fees are additional to tuition fees and are separately identified on fee statements. Student Activity Fees are subject to annual review and may increase from one year to the next. These fees (with the exception of the Miscellaneous Activity Fee component) are subject to the Australian Government’s Goods and Services Tax (GST), which is levied at 10%. Students enrolling in distance education programs are required to pay the Miscellaneous Activity Fee component only.

(3) Health Insurance:
It is a requirement of the Australian Government that student visa holders are covered by medical insurance (Overseas Student Health Cover, OSHC) for the duration of their study in Australia. Students must ensure that they have made arrangements for their OSHC when accepting their offer of a place, OSHC can initially be paid for a minimum period of 12 months or for the duration of the student’s program. Students who pay for a minimum of 12 months are responsible for renewing their health cover directly with Medibank Private (the University’s current provider for medical insurance for international students), or other approved provider, when their initial cover expires. Medibank Private regularly reviews the OSHC charges and those quoted on the offer letter are subject to change. Students should be aware that the duration of cover might be shorter than anticipated, should an increase in the charge occur after the offer letter has been sent. Students on external/distance education programs not resident in Australia are not required to pay OSHC.

(4) Calculation of Tuition Fees:
Tuition fees are calculated on a student’s enrolment in specific courses. UNSW students enrolled in most programs have some flexibility in the courses they choose and, at times, these courses will be from outside their own faculty. Tuition fees are derived from the relative cost of providing each type of course and will be calculated on the basis of that year’s current fee. Information on the tuition fees is provided in the offer letter. However further information can be found on the UNSW website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

(5) Full-Time Program Study Requirement:
Students holding a student visa are required to undertake their studies on a full-time basis. UNSW defines a standard normal full-time enrolment as 24 units of credit (UOC) per session. A minimum load of 18 UOC will satisfy the full time requirement. However, if you enrol in the minimum full-time load, you will need to take additional courses in a future session to complete your program within the time frame specified on your visa. The University expects that students will undertake their studies on a full-time basis and complete the program in the minimum time.
Refund of Fees Paid

(1) Withdrawal Prior to Enrolment (Refund of all fees paid less administrative charge of $500):

Applicants who notify the University in writing before they enrol in the program for the first time that they wish to withdraw, will receive a refund of all tuition fees paid less an administrative charge of $500. The full amount may be refunded in cases where the applicant has not been granted a student visa or is unable to attend because of documented illness or misadventure. Any refund so made will be at the discretion of the Registrar. A student may receive a full refund if it can be shown that, following discussions with program authorities, it is not possible for that student to enrol in an appropriate program. Refunds of tuition fees will normally be made within four weeks from the date of request or the date of clearance of the original payment, whichever is the later. OSHC will be refunded if the University has not yet sent the money to Medibank Private. If the money has been sent to Medibank Private, the student will be responsible for contacting Medibank Private directly to apply for their OSHC refund. Students must provide Medibank Private with the following information when applying for a refund: full name, date of birth, AIBJ number (provided to you by the Admissions office), together with the reason for refund and other evidence of transferring to another university, or the date of departure from Australia.

(2) Commencing Students - Withdrawal By Census Date (Refund of all fees paid less administrative charge of $1000): Students who withdraw from the program prior to the census date in their commencing session will receive a refund of all fees paid less an administrative charge of $1,000.

(3) Commencing Students - Withdrawal After Census Date (No refund): Students who withdraw after the census date in their commencing session will not receive a refund for fees paid unless they have also paid fees for a full year, in which case, fees paid for the second session will be refunded in full.

(4) Re-enrolling Students - Withdrawal By Census Date (Refund of all fees paid): Students who withdraw from the program prior to the census date of that session will receive a refund of all fees paid for the session.

(5) Re-enrolling Students - Withdrawal After Census Date (No Refund): Students who withdraw from the program after the census date will not receive a refund of fees paid unless they have also paid fees for a full year, in which case, fees paid for the second session will be refunded in full.

(6) Illness and Misadventure:

Students who have to withdraw at any time because of documented ill health or misadventure may apply for a refund of fees paid. However, pro-rata refunds will be considered only in exceptional circumstances. Any refund so made will be at the discretion of the Registrar.

(7) Students Not Permitted to Continue:

Students not permitted to continue in their program because of a determination made by the University in relation to unsatisfactory progress, or any other reason, at the end of Session 1, will receive a refund of any fees paid for Session 2.

(8) Refunds for Tuition Fees Paid:

Refunds will be processed and normally paid within 4 weeks of receiving a written request, and all required documentation from the student. Refunds will only be made in Australian dollars, following clearance of the original payment, and are usually in the form of a bank draft, mailed to the student. If a telegraphic transfer is required to a bank account, please ensure you include all bank details on the refund request. This method of refund is not recommended because of banking difficulties in some countries.

(9) Difficulties with Payment:

Students who are unable to pay their fees by the agreed dates should apply in writing to the Student Financials Section, UNSW Student Services, through NewSouth Q, Lower Ground Floor of the Chancellery Building. In exceptional circumstances special payment arrangements may be made for students, taking into account their financial and other circumstances. Students should not assume that extensions will be granted automatically and are reminded that non-payment of fees may result in cancellation of enrolment.

Fees are calculated and payable on a session basis. Tuition fees and Student Activity Fees are payable per session in advance. Students must access their statements online. Students will be able to view their fee statement and payment options (Statement of Student Debt/Notice of Liability) online approximately 2 to 3 weeks before classes commence. Students should refer to this online statement (available at my.unsw.edu.au) for payment deadlines and payment options. Students who have an agreement with the University that their fees will be paid by a recognised sponsor (i.e. home government/institution) will be able to view a fees statement online indicating if any fees are required (i.e. fees which are not covered by their sponsor). If a student is not liable for any fees, the online statement simply serves as a confirmation of their enrolment. A separate invoice for fees will be sent to the sponsor after the census date of each session. Unless stipulated in the offer letter, all fee payments must be made in Australian dollars, and finalised by the University payment due date for each session.

(7) Non-Payment of Fees:

Failure to pay tuition fees and Student Activity Fees according to the payment guidelines may result in a student’s enrolment being cancelled. If, with notice, a student’s enrolment is cancelled for non-payment of fees and that student is subsequently permitted to have his/her enrolment reinstated, a $250.00 reinstatement fee will be levied. A student whose enrolment is cancelled, will retain her/his fee liability, so that re-enrolment in a subsequent year or session will not be permitted until such a time as the debt is either paid in full or agreement reached between the student and the Registrar on the method of repayment. Students indebted to the University will not be issued with academic transcripts or any other official credentials and will not be permitted to graduate.

Fee Variations (including Change of Residency)

Permanent Resident Status:

If a student obtains Australian permanent residence before enrolling in the program, or prior to the census date of the session of first enrolment in that program, the offer of a place (or the enrolment) as an international student will lapse. The student will then be considered for admission as a local student.

Students who are granted Australian permanent resident status after the census date of their first session of enrolment or after the census date of any subsequent session will be seen as having entered into a contract with the University to pay international fees for that session. Students undertaking summer session course/s will be liable for international tuition fees unless granted permanent residency prior to commencement of the course/s, if the course is of less than six weeks duration. If the course is of more than six weeks duration, permanent residency must have been granted within fourteen days of commencement of the course/s, otherwise the international tuition fee will be payable.

Please note that because of government controls on the number of local students that can be enrolled, students who obtain permanent residency may not qualify for a Commonwealth Supported place (HECS).

Repeated Courses:

Students who are required to repeat courses will be charged the full cost to re-enroll in the course, based on the units of credit for that course at the time it is repeated.

Non-Award Course Enrolment:

In certain cases, students may be permitted by a Faculty to enrol in additional courses that cannot be counted towards award requirements. It permitted to do so, the student will need to apply for and be enrolled in a separate non-award program and charged at the international student rate according to the band fee for the course enrolled in.

Graduate Students Completing a Thesis or Project Report:

Graduate students who have completed all work (i.e. all research, laboratory, computational and field work) before the commencement of a session, except for the preparation and submission of the thesis or project report, will be exempted from the fees for that session if the thesis or project report is submitted before the census dates. After these dates fees will be charged at the rate of 50% for the session in which the thesis or project report is submitted, provided the student has exceeded the minimum period of enrolment specified in the degree conditions. Graduate students who are permitted to resubmit a thesis or project report and required to undertake a further period of study are liable for the full cost of the further study period.
4. UNSW Fee Policy: Local Students

Australian citizens, New Zealand citizens and Australian permanent residents are categorised as local students. Fee-paying programs include postgraduate, undergraduate and non-award programs. These rules apply only to students enrolled as fee-paying students. They do not apply to Commonwealth Supported Students (HECS).

Acceptance of an Offer of Admission

There is no tuition fee deposit required, however your reply must be received within 4 weeks of date of offer, or as otherwise advised, to secure your place. Tuition fees for the first session of the program are payable by the end of the first week of the session, as indicated on the fees statement available at my.unsw.edu.au.

Fees Payable

Tuition Fees:
Fees are reviewed annually and may increase. A complete schedule of tuition fees is available on the UNSW website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

Non-Award, Cross- Institutional and Voluntary Course Fees:
Fees are charged for all non-award enrolment in a course, and for enrolment in a cross-institutional course. Fees are charged according to the classification of the course (Undergraduate, Postgraduate, Research). For a list of fees please refer to the UNSW website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

Student Activity Fees:
All students enrolling in fee-paying programs, including non-award enrolments, are liable to pay Student Activity Fees each session at the published rates (see ‘Student Activity Fees’, item 1 for itemisation of fees charged). Student Activity Fees are additional to tuition fees and are subject to annual review and may increase from one year to the next. These fees (with the exception of the Miscellaneous Activity Fee component) include the Australian Government’s Goods and Services Tax (GST), which is levied at 10%. Students enrolling in distance education programs are required to pay the Miscellaneous Activity Fee component only.

Calculation of tuition fees:
Tuition fees are calculated on a student’s enrolment in specific courses. UNSW students enrolled in most programs have some flexibility in the courses they choose and, at times, these courses will be from outside their own Faculty. Tuition fees are derived from the relative cost of providing each type of course and will be calculated on the basis of that year’s current fee. Information on tuition fees is provided in the offer letter. Further information is also available on the following website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

Repeated Courses – Students who are required to repeat courses will be charged the full cost to re-enrol in the course, based on the units of credit for that course at the time it is repeated.

Payment of fees:
Fees are charged and payable on a session basis. Tuition fees and Student Activity Fees are payable by session in advance. Students must access their statements online. Students will be able to view their fee statement and payment options (Statement of Student Debt/Notice of Liability) online approximately 2 – 3 weeks before classes commence. Students should refer to this online statement (available at www.my.unsw.edu.au) for payment deadlines and payment options.

Non-Payment of Fees:
Failure to pay fees according to the payment guidelines may result in a student’s enrolment being cancelled. If, with notice, a student’s enrolment is cancelled for non-payment of fees and that student is subsequently permitted to have his/her enrolment reinstated, a $250.00 reinstatement fee will be levied. A student whose enrolment is cancelled will retain her/his fee liability, so that re-enrolment in a subsequent year, semester or session will not be permitted until such a time as the debt is either paid in full or agreement reached between the student and the Registrar.

Refund of Fees Paid

(1) Refund of Deposit:
Where a student is required to make an initial deposit to confirm her/his place in a program, the deposit is non-refundable.

(2) Refund of Program Fees – New Students:
If a student in her/his commencing session lodges a notice of discontinuation of a course after enrolment and before the census date for that session, all tuition fees will be refunded less $500.00. The student will incur and retain a liability for payment of $500.00 regardless of whether or not fees have been paid.

(3) Refund of Program Fees Paid – Re-Enrolling Students:
For re-enrolling students, if notice of discontinuation of a course is received on or after the census date of a new academic session, no refund of tuition fees paid for that session will be made. In such instances, the student will incur and retain a liability for that session’s fees regardless of whether or not fees have been paid.

(4) Refund of Program Fees - Non-Award Enrolment:
If notice of discontinuation of a course is lodged on or before the census date for that session, a full refund of the fee for the course will be made. A student will incur and retain liability for the course fee, regardless of whether the fee has been paid, if notice of discontinuation is not lodged before the census date for that session.

In the case of a course(s) conducted outside the normal session format, such as those conducted in summer or winter sessions, a refund will only be made if notice of discontinuation is lodged before the commencement of the course.

(5) Refund of Program Fees Paid – Special Cases:
A refund may be granted to a student unable to notify the Registrar in writing by the dates required, provided evidence is supplied that the student had ceased attendance by the census date, and was unable to notify the Registrar or reasons beyond her/his control. A refund may be granted in cases where the applicant is unable to commence or continue in the program because of documented illness or misadventure.

A postgraduate student who submits a project report or thesis for examination by the census date for that session will not be liable for fees in that session.

Relevant Dates
A complete schedule of session and census dates is available on the UNSW website: www.my.unsw.edu.au/student/resources/KeyDates.html

Disclaimer
Students should note that courses, programs and any arrangements for programs, including staff allocated, as stated in any University publication, are an expression of intent only, and are not to be taken as a firm offer or undertaking. Students wishing to take particular elective courses should ensure that these will be available prior to arrival in Australia.

This fee policy does not remove the right to take further action under Australia’s consumer protection laws (Education Services for Overseas Students Act 2000 Section 43.1).

Penalty Fees
(1) Failure to lodge enrolment or pay fees* according to enrolment procedure: $100
(2) Late enrolment penalty for re-enrolling students: enrolment in Week 1 of Session 1 or later: $250
(3) Reinstatement of enrolment fee: $250

Other Charges
Special Examination Fees
Examinations conducted in special circumstances for each course: $85

Disclaimer

Students wishing to take particular elective courses should ensure that these will be available prior to accepting the offer.
(4) A penalty fee of $250 will be incurred by a student when a result is returned for a course which is not included in the student's enrolment program.

Penalties (1) and (2) may accumulate.

* Fees include Student Activity Fees, fees levied for voluntary enrolment, non-award enrolment, international student fees, tuition fees for postgraduate and undergraduate programs, and up-front Student Contribution liability.

6. Sponsored or Assisted Students

Scholarship holders and sponsored students must present an enrolment voucher or appropriate letter of authority from their sponsor at the time they attend to enrol.

7. Debts

Any student who is indebted to the University and who fails either to make a satisfactory settlement of indebtedness upon receipt of due notice or to receive a special exemption will be disenrolled and will cease to be entitled to membership and privileges of the University. Such a student is not permitted to attend classes or examinations, or to be granted any official credentials. Re-enrolment in a subsequent session or year will not be permitted until such time as the debt is either paid in full, together with any enrolment reinstatement penalty fee (if appropriate) or agreement is reached between the student and the Registrar on the method of repayment.

In exceptional cases the Registrar may grant exemption from the provisions referred to in the preceding paragraph upon receipt of a written statement from the student setting out all relevant circumstances.

Enrolment and Progression Rules and Procedures

1. Disclosure of Enrolment Information and Release of Information to Third Parties

Information about a student's enrolment and attendance at the University is not disclosed to any person or organisation outside the University in a form that allows the student to be identified unless:

- the student provides written consent for the release of the information;
- or
- the disclosure is required by law; or
- the University discovers that information supplied by the student at the time of admission to the University or subsequently is untrue or misleading in any respect, in which case the University may take such action as it believes necessary including the disclosure of the information to any person or body the University considers has a legitimate interest in receiving it.

The University treats results of assessment and information it receives from a student as confidential and will not reveal such information to third parties without the permission of the student except at the discretion of senior officers in circumstances considered of benefit to the student and when it is either impossible or impractical to gain the student's prior permission. This happens rarely. Adhering to this policy is considered so important that it often involves officers of the University in very difficult situations, for example, when they must refuse to reveal the address of a student to parents or other relatives.

All students should be aware that students' addresses are eagerly sought by various commercial agents and that subterfuges of various kinds can be used to obtain them. From time to time, for example, people claiming to be from the University telephone students or their families and ask for information (usually another student's address) which is often given unsuspectingly. There is evidence that this is a technique used by some commercial agents.

It would be generally helpful if students, their families and friends were cautious in revealing information, making it a practice to ask the name, position, and telephone extension of any caller claiming to be from the University and, if suspicious, returning the call to the extension given.

2. Enrolment and Variations in Enrolment

All students must re-enrol each year for the full academic year. Students who fail to enrol in accordance with advertised procedures or who enrol after the nominated date will incur a penalty fee. By enrolling, students incur Student Activity Fees, tuition fee charges or liability under the Student Contribution Scheme. Refer to my.unsw.edu.au for full details of enrolment procedures and fee information including Student Activity Fees. For details of fees, also see previous section ‘Student Fees’ in this Handbook.

All students are required to confirm their enrolment details e.g. check that they are enrolled in the correct course(s) by accessing their online Fee Statement/Confirmation of Enrolment at my.unsw.edu.au before the semester census date.

Any enrolment issues must be referred immediately to the Program Authority in writing.

2.1 New Undergraduate Enrolments

Students applying for entry into the University must lodge an application for admission with the Universities Admissions Centre (website: www.uac.edu.au, telephone: (02) 9752 0200). Successful applicants will be required to complete enrolment at a specified time before the start of session.

Application procedures may be obtained from the Admissions Office, telephone 1300 36 8679.

2.2 Re-enrolling Coursework Students

Re-enrolling undergraduate and postgraduate coursework students are required to re-enrol on the web via myUNSW, and complete any other procedures required by their program office. Different enrolment procedures may apply for some programs, particularly some distance or alternative mode programs. In these instances, students should follow the instructions emailed or sent to them by their program office. Detailed information regarding enrolment is available on myUNSW and students should check this site regularly for updated information: my.unsw.edu.au.

2.3 Re-enrolment Deadlines and Penalties

Students must enrol in accordance with the enrolment procedures for their program. The University has established enrolment deadlines and penalties for late enrolment or failure to enrol in accordance with program office requirements as follows.

Students who have an outstanding debt to the University will not be able to process any enrolment changes until the outstanding debt is finalised.

Students will be able to view their statement and payment options online. Students should refer to this online statement (available at my.unsw.edu.au) for payment deadlines and payment options.

(1) On the recommendation of the program authority, the Registrar may impose a penalty fee of $100 on students who fail to enrol in accordance with their program office’s instructions. Circumstances under which the penalty may be imposed include:

- failure to re-enrol by the deadline set by the University or the student's program office;
- failure to attend the program office to enrol on or by the published date where this is a requirement of enrolment for the program.

(2) Lodgement of a proposed enrolment, and acceptance of a student's enrolment, in Week 1 of session and subsequently, will incur a late enrolment penalty fee of $250.

(3) Students who do not pay all the fees assessed on their fees statement (including upfront Student Contributions where relevant) by the end of the first week of teaching may have their enrolment cancelled.

2.4 Summer Session Enrolments

Students will be required to complete formal enrolment procedures prior to the commencement of their Summer Session of study. Enrolment at this time will be for a student’s approved Summer Session program. Students must access their fee statement online.

2.5 Restrictions on Re-enrolling

Students whose progress is deemed to be unsatisfactory should follow the written instructions they have received from the Registrar.

2.6 Non-Award Enrolment

Non-Award enrolment refers to all enrolments in courses or a sequence of courses which do not lead to or count towards a formal award of the University. Non-Award enrolment falls into two categories - Voluntary and Cross-Institutional.

Enrolments by non-award students are governed by the following rules:

(1) Enrolment in a particular course or courses as a non-award student may be permitted provided that the student has appropriate educational qualifications and in every case the Head of the School offering the course considers that the student will benefit from the enrolment, that
accommodation is available, and that the enrolment does not prevent a place in that course being available to a student proceeding to a an award.

(2) The Registrar may limit the number of non-award courses in which a student may enrol, regardless of the permission to enroll that the student may have received from the Head(s) of School(s) offering the course(s). In general, students will not be permitted to enrol in more than four half-year courses in any one academic year.

(3) A student who is under suspension or exclusion from any course in the University may not enrol in that course.

(4) A student who is under suspension or exclusion from any program in the University may not enrol in any course that forms a compulsory component of the program from which the student is excluded.

(5) A student who is subsequently admitted to a program of the University, for which courses completed as a non-award student form a part, may be granted advanced standing for those courses.

(6) As a general rule the University does not permit non-award students to enrol in first year undergraduate courses. In addition, the University may decline permission to enrol in a course if the student has not completed pre-requisites for that course.

2.6.1 Voluntary Enrolment

Voluntary course enrolment is where the student enrols in a course either out of interest, or to develop professional competence in an area of specialisation. Students enrolled in award programs sometimes simultaneously enrol voluntarily in courses additional to their award requirements.

All voluntary non-award enrolments are charged Tuition Fees according to the classification of the course (Undergraduate, Postgraduate, Research). For a list of Tuition Fees please refer to the UNSW website http://my.unsw.edu.au/student/fees/FeesMainPage.html

2.6.2 Cross-Institutional Enrolment

Cross-Institutional enrolment is where a student enrols in a course at the University for credit towards an award at another Australian tertiary institution in which the student is concurrently enrolled. Cross-Institutional enrolments are charged Tuition Fees according to the classification of the course (Undergraduate, Postgraduate, Research), except when the student is enrolled in a Commonwealth supported place at their home institution and is eligible for Commonwealth support at the host institution. Cross-institutional students must complete Commonwealth Assistance forms for enrolment at UNSW prior to the census date.

2.7 Final Dates for Enrolling in Courses

No enrolments for Session 1 courses will be accepted from students after the end of the second week of Session 1 except with the express approval of the Registrar and the Head(s) of the School(s) concerned. No enrolments for courses in Session 2 will be accepted after the end of the second week of Session 2 except with the express approval of the Registrar and the Head(s) of the School(s) concerned.

2.8 Variations in Enrolment (Including Discontinuation of a Program)

(1) Undergraduate students wishing to vary their enrolment program will be able to do so on the web at specified times throughout the year. Where a student is unable to satisfy their enrolment online, or they are in doubt as to whether the courses they wish to enrol in will count towards their program requirements, they should contact their program office or appointed academic advisor for further advice. It is a student’s responsibility to ensure that they enrol in accordance with the University’s rules, and that the courses they enrol in will count towards their program requirements. Students should take care to enrol only in classes that are defined as core units or electives for their academic program. If they enrol in classes that cannot be counted, they may have to enrol in extra classes, or for an extra session. They may also incur additional fees.

(2) Discontinuation of a program

Students discontinuing programs are required to notify the Registrar in writing or to complete the discontinuation form available from NewSouth Q. Such students may be entitled to a fee refund for fees paid (see ‘StudGen Fees’ entry in this Handbook). Discontinuation of a program is acknowledged in writing by the Registrar.

(3) Discontinuation of courses

Discontinuation of courses prior to the census date for a session can generally be processed by a student on the web. Students can discontinue a course online without academic and financial penalty until the census date.

Students should be aware that they will be financially liable for all courses in which they are enrolled as at the census dates.

Written applications to discontinue courses after the census dates may be lodged with the course authority but will result in students being regarded as having failed the courses concerned, except in special circumstances. All variations to course enrolments can be confirmed by students on the web.

(4) Variation to Summer Session enrolment

Students may vary their Summer Session enrolment program on the web. Students should check with the relevant course authority for the last day to discontinue a course without failure, and for the census date for the course.

(5) Discontinuation of First Year Undergraduate Students

First year students who enrol and subsequently discontinue without failure their whole program will be permitted to re-enrol the following year providing they do not enrol in another tertiary program. They must confirm their intention to re-enrol by lodging an application with the Universities Admissions Centre.

2.9 Deadlines for Payment of Fees, Charges and Student Contributions

The University has set deadlines for the payment of all fees that are set out below. Students who do not pay all fees by the due date may be disenrolled. Students who are permitted to be reinstated following disenrollment will be required to pay a penalty fee of $250 plus all outstanding fees before reinstatement.

Under government legislation, a student who has elected not to provide their Tax File Number and has not made the required Student Contribution payment by the date set by the University, must have their enrolment cancelled. Such students will not be permitted to undertake studies in their program in that session as a Commonwealth Supported student.

Session 1

Session 1 Student Activity Fees, Student Contributions, and Tuition fees:
Friday 4 March 2005

Session 2

Session 2 Student Activity Fees, Student Contributions, and Tuition fees:
Friday 29 July 2005

2.10 Multiple Enrolment

(1) No person shall be permitted to enrol in a degree, diploma or certificate course at the University of New South Wales at the same time as he/she is enrolled for any other degree, diploma or certificate in the University or at any other tertiary institution, except with the approval of the faculty or faculties concerned.

(2) The Registrar may suspend from enrolment any student who is found to be enrolled, without approval, in more than one degree, diploma or certificate course.

3. Attendance at Classes

Students are expected to be regular and punctual in attendance at all classes in the courses in which they are enrolled. All applications for exemption from attendance at classes of any kind must be made in writing to the Registrar.

In the case of illness or of absence for some other unavoidable cause students may be excused by the Registrar for non-attendance at classes for a period of not more than one month or, on the recommendation of the Dean of the appropriate faculty, for a longer period.

Absence from Classes

Explanations of absences from classes, or requests for permission to be absent from forthcoming classes, should be addressed to the Registrar and, where applicable, should be accompanied by a medical certificate. If examinations or other forms of assessment have been missed, this should be stated in the application. If students attend less than eighty per cent of their possible classes they may be refused final assessment.

4. Discontinuation and Program Leave

Leave from a program of study may be granted to undergraduate or postgraduate students. Leave is generally restricted to a total of two sessions; applications for leave in excess of two sessions will be approved only in exceptional circumstances at the discretion of the program authority.

Undergraduate students may be granted leave before commencement of the program. This type of leave, usually referred to as deferment of enrolment, will normally be granted once only and for a maximum of 2 sessions.
Undergraduate Students

A new undergraduate student in Stage 1 of a program who discontinues that program without failure prior to the census date must reapply through UAC and is guaranteed re-admission to the same program the following year. A student who does not resume study in the following year must compete for a place, if and when re-admission is sought.

A new undergraduate student in Stage 1 of a program who discontinues after the census date may apply for leave for Session 2 prior to the Session 2 census date. It should be noted that discontinuation after the census date for a session may result in failures being recorded.

All Students

(1) A request for leave should be made in writing to the Registrar either by letter or by using the Discontinuation/Leave form available from program offices and the Student Centres at each campus.

(2) Leave must be sought prior to the census date: For census dates, please refer to: http://my.unsw.edu.au/student/resources/KeyDates.html

(3) A student who discontinues a program with or without failure after the census date for a session retains an enrolment record for that session and is subject to the rules on student progression. A student who discontinues after the Session 1 census date may apply for leave for Session 2.

(4) A student whose application for leave is rejected or who does not resume study at the end of the approved leave period must formally apply, in the usual manner, for re-admission to the program.

(5) Enquiries about re-admission to a program should be directed to the Admissions Office.

Resumption of Programs

Students who have had leave for twelve months and wish to resume their program should follow the instructions about re-enrolling given in the letter granting leave of absence. If these instructions are not fully understood or have been lost, students should contact NewSouth Q in the Chancellery before November in the year preceding the one in which they wish to resume their program.

If students have not obtained leave of absence from their program and have not been enrolled in the program over the past twelve months or more, they should apply for re-admission to the program through the Universities Admissions Centre before the end of September in the year preceding that in which they wish to resume studies or to the Admissions Office by the appropriate closing date.

5. Undergraduate Program Transfers

Students in the Faculty of Arts and Social Sciences who wish to transfer between the Bachelor of Arts, Bachelor of Social Science or Bachelor of Arts/Bachelor of Education should apply to the Faculty Office in December.

Students in the Faculty of Commerce and Economics who wish to combine either the Bachelor of Commerce with Arts, Science or Social Science, or the Bachelor of Economics with Arts or Social Science, should apply to the Faculty Office in December.

Students in the Faculty of Engineering who wish to combine their undergraduate engineering program with MEng, or MEngSc should apply to the relevant Engineering School Office in December.

Students in the Faculty of Law who wish to change their non-law program (e.g. Commerce/Law to Arts/Law) or major in their non-law degree (e.g. Accounting to Finance) should apply to the Law Faculty Office in December. Students who wish to transfer from a combined Law program to the single non-law program should apply to the Faculty Office of the program in which they wish to continue. Graduate Law students wishing to change from full-time to part-time study or vice versa should also apply to the Faculty Office in December.

Students wishing to change their plan within their current degree should apply to their Faculty Office.

All other students wishing to transfer to an undergraduate program must apply through the Universities Admissions Centre (UAC) by the end of September if late applications are accepted until early February on payment of a late fee or in May for mid-year transfers. Further information is available from the Admissions Office, telephone 1300 36 8679.

6. Assessment and Examinations (See also ‘Assessment Policy’ under ‘University Policies & Procedures’)

Examinations are held in June/July and in November/December.

Timetables

A provisional timetable indicating the dates and times of examinations is available in May and October. A final timetable indicating the dates, times, locations and authorised materials is available two weeks before the end of each session. Students must advise NewSouth Q of any clash in examinations as soon as the provisional timetable is released. Both the provisional and final timetable are posted on University noticeboards and on the web. It is inadvisable for students to make any vacation travel arrangements within the examination period until dates for all assessment requirements have been finalised.

Assessment of Progress

In the assessment of a student’s progress in a program, consideration may be given to work in laboratory and class exercises and to any term or other tests given throughout the year, as well as to the results of written examinations.

Results of Assessment

Assessment result advices include the final composite marks students achieve in courses taken that session.

Grades are graded as follows:

- High Distinction: an outstanding performance
- Distinction: a superior performance
- Credit: a good performance
- Pass: an acceptable level of performance
- Satisfactory: satisfactory completion of a course for which graded passes are not available
- Pass Conceded: this may be granted if the overall performance is considered to warrant such a concession.

- Academic Standing

At the end of every standard 14 week session each undergraduate or coursework postgraduate student’s Academic Standing in his or her program of study is determined by the University. The purpose of specifying a student’s Academic Standing is to alert the student and his or her program authority as early as possible to any problem that may prevent the student graduating in minimum time, or (in more extreme cases) that may prevent the student graduating at all. With early intervention by a University academic advisor, the more serious consequences of a student’s continued poor performance may be prevented. How Academic Standing is determined is different for undergraduate and postgraduate students, as is detailed in the following two sections.

Academic Standing for Undergraduate Students

A student’s Academic Standing is determined by two factors: his or her academic standing at the end of the previous standard 14 week session and his or her academic achievement in the current 14 week session. In normal circumstances, academic achievement is classified as satisfactory if the number of units of credit in all courses passed is at least half the total number of units attempted. If it is not satisfactory, academic achievement is classified either as poor if some units are passed (but fewer than half the total number attempted), or nil if no units at all are passed. If 6 or fewer units of credit are attempted, then academic achievement is classified as indeterminate if any of these units are passed, or as poor if no units at all are passed.
In June 2000, the University’s Academic Board adopted the following Undergraduate and Postgraduate Students Academic Standing – Re-Enrolment Appeal Procedures for

- A Postgraduate Re-enrolment Appeal Committee of the Academic Board will be constituted for the purpose of hearing such appeals.

The usual effect is modified in certain situations:

- it is not possible to skip Suspension, a student whose previous standing was Probation 2 must pass at least half of the attempted units to avoid Suspension. A similar rule applies to Probation 4 in respect to Exclusion.
- after Suspension, a student is assigned Probation 3. The student may then be assigned to Probation 1, if he or she passes half of the attempted units in the first session after returning (i.e. during Probation 3) from Suspension. Thus, two successive satisfactory sessions are required for Good Standing to be regained. If poor progress is recorded the student moves to Probation 4. If nil progress is recorded the student moves to Exclusion.
- in exceptional circumstances a student’s academic advisor, in consultation with the program authority, may alter the student’s Standing. The usual action in this case is to retain the previous standing or to move the standing one step instead of two.

**Academic Standing – Re-Enrolment Appeal Procedures for Undergraduate and Postgraduate Students**

In June 2000, the University’s Academic Board adopted the following rules governing appeals against suspension or exclusion:

1. Students who are suspended or excluded from a program have the right of appeal. An Undergraduate Re-enrolment Appeal Committee and a Postgraduate Re-enrolment Appeal Committee of the Academic Board will be constituted for the purpose of hearing such appeals.

2. Each Committee will have a membership of five members of academic staff (with a quorum of three) and will be chaired by a member of the Academic Board nominated by the President. The remaining members of the Committee need not be members of the Academic Board but will be nominated by the President taking into account their relevant experience and expertise. Members will not currently be involved in managing student progress and will disqualify themselves if they have previously been involved in the case of a particular student.

3. The decision of the Committee shall be final.

4. The notification to students that they have been suspended or excluded shall indicate that they may appeal that decision to the relevant Re-enrolment Appeal Committee. The appeal must be lodged with the Registrar within fourteen days of the date of notification; in special circumstances a late appeal may be accepted at the discretion of the chairperson of the Appeal Committee.

5. In lodging such an appeal with the Registrar, students should provide a complete statement of all grounds on which the appeal is based.

6. The Appeal Committee shall determine appeals after consideration of each appellant’s academic record and stated grounds of appeal. Students may elect to appear before the Committee and/or be represented.

**Admission to Degree or Diploma**

The University’s policy is to graduate at the next series of ceremonies all students who have completed requirements for their degree or diploma in the previous academic session. Graduands who are indebted to the University will not be permitted to graduate until the debt has been cleared.

**Table 2 The implications of undergraduate Academic Standing categories:**
The University usually holds graduation ceremonies in the following periods:
- **April/May** – All Degrees and Diplomas
- **June** – Overseas graduation ceremonies in Hong Kong and Singapore/Kuala Lumpur (no ceremony will be held in Singapore in 2005).
- **October** – All Degrees and Diplomas
- **November** – Overseas graduation ceremony in Beijing, China.
- **December** – University College, Australian Defence Force Academy.

Undergraduate and Research Degrees within the Faculty of Medicine. Updated graduation information is posted on the myUNSW website each session before results for that session are released. All graduands and potential graduands are expected to read the detailed graduation information on the myUNSW, and to check their graduation details. In particular, graduands and potential graduands should check that their name, address and degree details are correct. The website is located at: https://my.unsw.edu.au/student/academiclife/graduations.html

Tickets and ceremony information about arrangements for graduation ceremonies will be mailed to graduands approximately three weeks before the date of the ceremony.

Queries regarding graduations can be directed to the Graduations Section, Student Information and Systems Office on (02) 9385 3092/8069 or graduations@unsw.edu.au.

**Special Consideration – Illness and Misadventure**

On some occasions, sickness, misadventure, or other circumstances beyond students’ control may prevent them from completing a course requirement or attending or submitting assessable work for a course. Such assessable requirements may include formal end of session examination, class test, laboratory test, seminar presentation, etc. It is also possible that such situations may significantly affect your performance in an assessable task. The University has procedures that allow students to apply for consideration for the affected assessments. Depending on the circumstances, the University may take action to allow students to overcome the disadvantage; e.g. offer an additional assessment or extend a deadline.

Students should note that merely submitting a request for Consideration does not automatically mean they will be granted additional assessment, nor that they will be awarded an amended result. For example, if a student has a poor record of attendance or performance throughout a session/year in a course, the student may be failed regardless of illness or other reason affecting a final examination in that course.

The University has a centralised procedure for Consideration applications. Many course authorities and faculties have “local” procedures that students will also need to follow. It sometimes happens that a student may encounter a situation that is so significant or personal they do not want to use the Special Consideration procedures. In a case like this you may prefer to contact the University Health Service, the Counselling Service, an academic advisor in your program or the Assistant Registrar in the Student Information and Systems Office. Remember that it is always important to let the University know if there is anything that may affect your ability to continue your studies.

**How to Apply for Consideration**

A student must make formal application for Consideration for the course/ task involving only three consecutive days or a total of five days within the teaching period of a session is not considered sufficient grounds for an application.

1. Where academic work has been hampered to a substantial degree by illness or other cause. Except in unusual circumstances a problem involving only three consecutive days or a total of five days within the teaching period of a session is not considered sufficient grounds for an application.

2. The circumstances have to be unexpected and beyond your control. Students are expected to give priority to their University study commitments and any absence must clearly be for circumstances beyond your control. Work commitments are not considered a justification.

3. An absence from an examination should be supported by a medical certificate or other document that clearly indicates you were unable to be present.

4. A student absent from an examination or who attends an examination and wants to request special consideration is normally required to provide a medical certificate dated the same day as the examination.

5. An application for special consideration has to be provided within three working days of the assessment to which it refers. In exceptional circumstances an application may be accepted outside the three-day limit.

To give the University sufficient and appropriate information on which to base its decision about your request, you must support your application with certified official documentation that normally contains at least the following key information:

1. the assessment task/s for which you are seeking consideration
2. the dates/deadlines associated with these tasks
3. the basis of your request i.e. the nature of your misadventure, illness, etc.
4. the date/s on which you were seen by the professional/authority providing your official documentation
5. the date of the illness or misadventure or the dates of the period of time of the illness or misadventure
6. the professional/authority’s assessment of the severity of your illness or misadventure and opinion of the likely effect on your capacity to undertake the assessment task/s concerned.

Items 4. to 6. need to be certified by the provider. For example, by your medical practitioner or other health professional (for illness or injury) or counsellor (for personal or family problems), so you will need to make the provider aware of the University’s requirements. For causes other than sickness, (e.g. road accident, court hearing, or death of a relative) written evidence (e.g. a police report, a court summons, or a death certificate) instead of the documentation required in 6 above is acceptable (i.e. Section B of the Consideration form need not be completed).

To assist you the ‘Request for Consideration’ form has a sheet attached explaining the procedures and the information required. The form and information sheet must be taken with you when you obtain the certification so as to ensure all the key information is provided.

The forms are widely available on all of the University’s campuses — from NewSouth Q, faculty and program offices, the University Health Service, the Counselling Service, and many course authorities. You should note that Consideration requests normally will not be considered:

- unless the application is made on the appropriate form;
- unless all the key information is provided;
- if more than 3 days have elapsed since the assessment for which Consideration is sought;
- if the assessment task is worth less than 20% of the total course assessment, unless the student can provide a Medical Certificate that covers three consecutive days.

In exceptional circumstances the University may waive these requirements, for example, if an accident or sudden illness occurs which requires your immediate hospitalisation.

You also need to follow any local procedures of the relevant course or program authority. You will have been informed of these procedures by the course authority or faculty representative in the course brochure/information sheet made available to you upon commencement of the course or program. For example, as well as submitting your application through NewSouth Q, the course authority may require you to contact them.

If you need advice about any of the policies or procedures relating to Consideration contact NewSouth Q.

**What happens after you make the application**

If your application meets the University’s criteria for acceptance, it is stamped, a copy is taken and the original is returned to you. Only documentation that meets the requirements listed above will be accepted.

No consideration will be given when the condition or event is not related to performance or is considered not to be serious.

Details, including the summary information provided by you, are made available to the relevant course authority/faculty. The University’s procedures ensure that confidentiality of this information is maintained.

Note that many course authorities require you to take action within a specified period of time to determine the outcome; for example to consult...
the course authority’s notice board, to contact the authority in person or by phone, etc. Details of the arrangements will have been made available to you in the course information sheet. Failure to take this action will normally result in forfeiture of any additional assessment granted to you. On the basis of the information provided in your application, a decision is made regarding the appropriate response in your particular case. The following may be taken into account:

1. Your performance in other items of assessment in the course.
2. The severity of the event.
3. Academic standing in other courses and in the program.
4. History of previous applications for special consideration.

For enquiries relating to your application, please contact the relevant course authority or head lecturer of the course.

**What outcomes you can expect**

If an application for illness or misadventure is accepted, the following may ensue:

1. No action.
2. Additional assessment or a supplementary examination. Additional assessment may take a different form from the original assessment. If you are granted additional assessment, the original assessment may be ignored at the discretion of the course authority. Consequently, a revised mark based on additional assessment may be greater or less than the original mark.
3. Marks obtained for completed assessment tasks may be aggregated or averaged to achieve a percentage.
4. The deadline for assessment may be extended.
5. Discontinuation from the course. This is unlikely to occur after an examination or final assessment has taken place.

The following examples are included to give an indication of the outcomes you can expect in the most common circumstances. (Many course authorities include similar examples for the special types of assessment used by them in their course information sheets.)

**Formal end of session examinations**

- If you miss such an examination through an illness, other circumstance beyond your control, etc., which is certified as being severe enough to have prevented your attendance, in general, you will be granted additional assessment. This is usually in the form of a supplementary examination.

- If you attend an examination but have an illness on the day, which is either certified as not having a significant effect on your performance (such as a minor head cold), or for which you were examined after the illness had subsided, you will not be granted additional assessment.

**Note:** In either of these cases if you have attained a Pass in the course concerned from assessment tasks completed during session, it may not be regarded as necessary to grant you additional assessment.

- If you attend an examination but have an illness on the day, which is either certified as not having a significant effect on your performance (such as a minor head cold); or for which you were examined after the illness had subsided, you will not be granted additional assessment.

**Class tests, laboratory examinations, vivas**

The same types of outcomes as outlined above for formal end of session examinations normally will apply in the circumstances listed.

**Essays, reports, mini-theses, models, creative work, etc.**

If an illness or other circumstance beyond your control occurs which, because of its duration or severity, is certified as having a significant effect on your ability to submit the work by the deadline given, you will generally be granted an extension of the deadline. You should not, however, expect the deadline to be extended for a time in excess of the period for which the certification was given.

**Field work, practical placements, etc.**

Each course authority conducting field work etc. has in place appropriate mechanisms for dealing with consideration for these types of assessments. Details are provided in the relevant course information sheets.

**Additional assessment**

The time at which any additional assessment granted to you is held, is determined by the course authority concerned. Consult the course information sheet for detailed information about the times and arrangements for the various additional assessment tasks in that course.

Most course authorities conduct supplementary examinations in the period immediately after the formal end of session examination period. For example, for the end of Session 2, supplementary examinations are often held in the three-week period just prior to Christmas. In general, course authorities will provide only one opportunity for you to sit a supplementary examination except in exceptional circumstances. You need to ensure you will be available during this period to take any supplementary examination granted to you.

You should expect any additional assessment granted to you to be of the same degree of difficulty as the original assessment task which it replaces.

---

**Academic Misconduct and Student Misconduct**

1. **Introduction**

Students and staff are governed by the normal laws that regulate our daily lives. However, the University has its own code of rules and conduct. This is because good conduct and academic honesty are fundamental to the mission of the University as an institution devoted to the pursuit of excellence in scholarship and research, and to the service of society. These principles apply not only to students but also to the whole University community, including staff engaged in research. They have been developed over many years and are widely supported by staff and students. Staff and students are committed to good conduct and academic honesty and are keen to see that these values and principles are upheld.

The University Council has defined student misconduct as follows (29 August 1994): “Student misconduct includes student academic misconduct and also encompasses conduct which impairs the reasonable freedom of other persons to pursue their studies or research or to participate in the life of the University.”

Section 2 provides an overview of the University’s rules regarding student academic misconduct, and of what kinds of activity constitute student academic misconduct according to current academic usage. Section 3 relates to further kinds of student misconduct, namely those that impair the reasonable freedom of others at the University.

It is very important that all students are familiar with the rules under which they attend the University, use University facilities, and are assessed. This is because students are responsible for managing their own conduct and for knowing what the University’s rules concerning good conduct are. Ignorance of the rules is not an acceptable defence against charges of misconduct.

If you have any concerns about what constitutes misconduct either in general or specific situations, make sure you discuss them with the relevant University authority. In academic matters this will usually be the lecturer in charge of a particular course. You can also seek general advice from the Registrar through the UNSW Student Service.

2. **Academic Misconduct**

These notes describe the University’s policy on academic misconduct and define actions and behaviour which constitute misconduct. They include a description of procedures followed by the University where misconduct is alleged and penalties which the University may impose on students guilty of misconduct.

2.1 **What is academic misconduct?**

The University Council has defined academic misconduct as follows (29 August 1994):

**Student academic misconduct means:**

1. (a) breach of such rules or guidelines relating to student academic conduct as may be prescribed by faculties, schools or the Vice-Chancellor;
2. (b) misconduct relating to assessment or examinations; and
3. (c) any other conduct (the general nature of which has been made known to students) regarded as student academic misconduct according to current academic usage.

2.2 **Types of academic misconduct**

It is important that students realise just how broad the definition of academic misconduct may be. It certainly covers practices such as cheating or copying or using another person’s work. Furthermore, practices that may be acceptable in other situations are considered to be misconduct according to current academic usage within a University.

The following are important examples of the actions that have resulted in students being found guilty of academic misconduct in recent years:
Misconduct concerning examinations
- taking unauthorised materials into an examination;
- impersonation in examinations;
- permitting another student to copy answers in an examination;
- exchanging notes between students in an examination;
- improperly obtaining prior knowledge of an examination paper and using that knowledge in the examination;
- removing an examination paper from an examination room when it is specified that the paper is not to be retained by the student;

Misconduct concerning academic works
- failing to acknowledge the source of material in an assignment;
- quoting without the use of quotation marks even if the source is acknowledged;
- plagiarism;
- submitting work for assessment knowing it to be the work of another person;

Misconduct through misrepresentation
- submitting a falsified medical certificate;
- submitting a falsified academic transcript.

Two instances of academic misconduct – plagiarism and cheating in exams – are discussed in further detail below in Sections 2.3.1 and 2.3.2.

2.3 Specific examples of academic misconduct

2.3.1 Plagiarism and failure to acknowledge sources
Plagiarism involves using the work of another person and presenting it as one’s own. Acts of plagiarism include copying parts of a document without acknowledging and providing the source for each quotation or piece of borrowed material. These rules against plagiarism apply whatever the source of the work relied upon may be, whether printed, stored on a compact disc or other medium, found on the World Wide Web or Internet. Similarly, using or extracting another person’s concepts, experimental results or conclusions, summarising another person’s work or, where there is collaborative preparatory work, submitting substantially the same final version of any material as another student constitutes plagiarism.

It is your responsibility to make sure you acknowledge within your writing where you have "sourced" the information, ideas and facts etc. The basic principles are that you should not attempt to pass off the work of another person as your own. Acts of plagiarism include copying parts of a document without acknowledging and providing the source for each quotation or piece of borrowed material. These rules against plagiarism apply whatever the source of the work relied upon may be, whether printed, stored on a compact disc or other medium, found on the World Wide Web or Internet. Similarly, using or extracting another person’s concepts, experimental results or conclusions, summarising another person’s work or, where there is collaborative preparatory work, submitting substantially the same final version of any material as another student constitutes plagiarism.

The following are some examples of breaches of these principles:
(a) Quotation without the use of quotation marks. It is a serious breach of these rules to quote another’s work without using quotation marks, even if one then refers to the quoted source. The fact that it is quoted must be acknowledged in your work.
(b) Significant paraphrasing, e.g. several sentences, or one very important sentence, which in wording are very similar to the source. This applies even if the source is mentioned, unless there is also due acknowledgment of the fact that the source has been paraphrased.
(c) Unacknowledged use of information or ideas, unless such information or ideas are commonplace.
(d) Citing sources (e.g. texts) which you have not read, without acknowledging the ‘secondary’ source from which knowledge of them has been obtained.

These principles apply to both the text and footnotes of sources. They also apply to sources such as teaching materials, and to any work by any student (including the student submitting the work) which has been or will be otherwise submitted for assessment. You must obtain the prior approval of your lecturer if you wish to submit to that lecturer an essay substantially similar to one which has already been, or will be, submitted to another lecturer.

Using the principles mentioned above about proper acknowledgment, you should also proceed on the general assumption that any work to be submitted for assessment should in fact be your own work. It ought not to be the result of collaboration with others unless your lecturer gives clear indication that, for that assignment, joint work or collaborative work is acceptable. In this latter situation, you should specify the nature and extent of the collaboration and the identity of your co-workers.

2.3.2 Unauthorised materials in exams
The possession of unauthorised materials in exams is another common example of academic misconduct. The University’s rules for the conduct relating to examinations state that no materials are to be brought into the examination room other than those specified in the examination timetable.

The following are examples of materials which would be regarded as unauthorised (and if not specified as being permitted in the examination):
(a) A bag, writing paper, blotting paper, manuscript or book, other than the specified material;
(b) A mobile telephone brought into the examination room must be switched off and placed under the candidate’s seat for the duration of the examination;
(c) Written or printed notes of any kind or size;
(d) Writing on the hand or any other part of the body;
(e) Writing on a ruler or any other instrument;
(f) A calculator or hand-held computer where these are not permitted or where calculators are supplied by the University for the examination.

It does not matter whether or not the notes or writing are relevant to the exam. It does not matter that the notes are inside your pocket or a closed pencil case. It also does not matter that writing on the body is illegible. It is academic misconduct simply to be in possession of such notes and writing, or to have writing on your body, in the first place.

There are simple steps that you can take to ensure they do not infringe the University’s rules for examinations:
- Read the examination timetable carefully and make sure you fully understand what materials are permitted in the exam;
- Place all bags and belongings outside or at the front of the room before the exam commences;
- Check your pockets and inside any pencil cases or calculators to ensure that you haven’t accidentally left notes in them;
- Listen carefully to the instructions given to you by the examination supervisor. Ask for assistance if you have any questions about the rules and arrangements for the examination;
- Surrender any unauthorised notes or other materials before the exam begins: if you are found with these after the exam commences you will have broken the examination rules.

2.4 Penalties
Students found guilty of academic misconduct are usually excluded from the University for two years. Because of the circumstances in individual cases the period of exclusion can range from one session to permanent exclusion from the University.

2.5 Academic Misconduct Procedures
The University has detailed procedures for dealing with allegations or complaints of academic misconduct. The full text of the Council resolution on academic misconduct, which contains details of these procedures, can be obtained from NewSouth Q or https://my.unsw.edu.au/student/academiclife/assessment/AcademicMisconduct/StudentMisconduct.html

3. Student Misconduct

3.1 University Rules and Codes of Conduct
While the University has not formulated a formal general code of conduct, it has defined rules and good practice for many activities. That is, a number of areas within the University have specified rules and codes of conduct for particular activities for the use of facilities. For example, there are rules for the conduct of examinations, rules for borrowing privileges and the use of other University Library resources, and behaviour in the Library. The Division of Information Services has also formulated rules for the use of computers and computer laboratories, and for behaviour in laboratories. These rules are publicised to all users of these facilities.

There are, in addition, University rules governing general student conduct. These are described below.

3.2 What is student misconduct?
Student misconduct of a kind that impairs the reasonable freedom of other persons to pursue their studies or research or to participate in the life of the University includes such activity as:

https://my.unsw.edu.au/student/academiclife/assessment/AcademicMisconduct/StudentMisconduct.html
Student ID Card – Conditions of Use

All students enrolling at the University are issued with a student identification card. The number used in the University’s records. This number should be quoted in all correspondence.

(1) The card must be carried at the University and shown on request. It must be presented when borrowing from the University libraries, when using library facilities and when applying for concessions. The card is encoded by University Security to allow building access.

(2) The card is not transferable.

(3) The student to whom the card has been issued must notify the University Security (e-spot@unsw located in the Red Centre) of its loss or theft. Failure to do so may result in the cardholder being held responsible for items issued on the card after its loss or theft.

(4) The card is valid only for the period of enrolment each year.

(5) The cardholder accepts responsibility for all library books issued on his/her card and agrees to return books by the due date.

(6) If the card is damaged or becomes otherwise unusable, it is the cardholder’s responsibility to seek replacement.

(7) The card always remains the property of the University and must be returned to it when the holder leaves the University.

Note: Students may be required to provide photo identification such as a driver’s licence or passport in special circumstances where their student ID card does not satisfactorily verify their identity.

Computing at UNSW

The University is committed to using technology to support teaching and learning. The central UNSW web site (www.unsw.edu.au) forms an important resource, providing access to information on every aspect of the University. This site also links to other important web resources on campus like library, faculty and school sites, UNSW computing and more. The UNSW campus is served by an optical fibre network which supports TCP/IP and IPX.

The Division of Information Services (DIS) at UNSW encompasses information technology and the UNSW Library. The DISÆ‐Connect Help Desk provides information technology support and assistance for students and staff using services provided by the UNSW Communications Unit.

Email facilities (UniMail) are available to all enrolled students. For remote access, the University provides a good value dial-up service (UDUS) to students. Enquiries for both these facilities should be directed to DISÆ‐Connect. Wireless applications are also supported for laptops in some areas of the library, however students will first need to contact DISÆ‐Connect to get a wireless card installed.

Please note that students undertaking computing studies in any program are responsible for ensuring that they have appropriate back-ups of their work. Furthermore, work should not be stored on University computers as its security cannot be guaranteed by the University. Students who alter or delete another person’s work may be committing a criminal offence. Students should also note that it is against UNSW policy to knowingly spread computer viruses. See below for further rules relating to the use of computing and electronic communication facilities by students.

Email Policy

Each student is given an email address as part of their enrolment at UNSW. It is essential to check your email regularly since this is the main mode fo formal communication between students and the University.

All students have a central email address of the form z1234567@unistudents.unsw.edu.au, where ‘1234567’ is the student number. It is a requirement that all students read email that is sent to this address, as it may contain vital administrative or teaching material not provided any other way. If a student uses an email account other than the centrally provided UniMail account, the student must arrange to forward UniMail to an account that they do use.

For the complete policy on electronic mail, please see: http://www.its.unsw.edu.au/policies/policies_home.html

IT Requirements for UNSW Students

Please refer to the following website for home computer guidelines: http://www.its.unsw.edu.au/policies/policies_home.html

Rules for the Use of Computing and Electronic Communications Facilities for Students

UNSW policy is to facilitate the use of information resources by the provision of appropriate and timely technology solutions and technical assistance, and a key strategy of the UNSW Corporate plan is to use information technology in support of the educational, research and administrative activities of the University. Making information technology more readily available contributes significantly to improving academic quality and student access.

While at UNSW, students are responsible for ensuring that their use of computing and communications facilities is ethical and lawful. They are responsible for ensuring that their actions are not detrimental to the property of the University and the rights of others. The following rules, which have been made by Council under the University’s Student Misconduct Rules, apply across all UNSW facilities. In certain local systems, additional restrictions may apply. The manager of those local resources will advise these additional restrictions. These rules apply to all student use of University computing or communications facilities.

(a) breach of any rule relating to student conduct in the University;
(b) conduct which unduly disrupts or interferes with a class, a meeting or any other official activity within the University;
(c) conduct detrimental to University property, such as stealing, destroying or deliberately damaging laboratory equipment;
(d) stealing, destroying, impairing the accessibility of, or defacing any part of the University Library collection;
(e) using University computing or communications facilities in a manner which is illegal or which will be detrimental to the rights and properties of others;
(f) acting so as to cause students or staff or other persons within the University to fear for their personal safety;
(g) refusing or failing to identify oneself truthfully when so required by a member of the academic staff or other officer of the University.

3.3 Penalties

The following penalties may apply:

(a) A student who commits a breach of the University parking rules or damages University property (including, but not limited to fittings, fixtures, equipment, facilities, trees, plants, shrubs, and lawns) shall be guilty of a breach of discipline and shall be liable for the payment to the University of a fine not exceeding $1,000 and/or the cancellation of her or his parking permit.

(b) A student who misuses Library, or computing or communications facilities, shall be guilty of a breach of discipline and shall be liable for the payment to the University of a fine not exceeding $1,000 and/or restriction or withdrawal of borrowing or access privileges.

(c) Fines and other penalties may only be imposed under these rules by the Registrar, the Director of Information Services and Deputy Principal, or a person who holds a written delegation from either officer so authorising her or him.

(d) It shall not be necessary for the University to prove in any case that it has suffered financial or actual loss.

(e) The University may withhold any benefit (including any degree, diploma or result) from a student until any penalty imposed under these rules has been discharged.

(f) Students adversely affected by determinations made and penalties imposed under this rule may appeal to the Vice-Chancellor. The appeal must be in writing and lodged within fourteen days of the student receiving notification of the adverse determination. Such notification shall include notice of the student’s right of appeal. In all other respects, action under this rule is final.

In addition, in situations where it is considered that students present a threat of destruction to University property and/or disruption of academic instruction, assessment, examinations, and the proper functioning of the University, they may be temporarily suspended from part or all of the University.

3.4 Student Misconduct Procedures

The University has detailed procedures for dealing with allegations or complaints of student misconduct. The full text of the Council resolution on student misconduct, which contains details of these procedures, can be obtained from NewSouth Q (Student Enquiries) or at https://my.unsw.edu.au/student/academiclife/assessment/StudentMisconductRules.html.
By using any of these facilities, the student is acknowledging that they have read and will abide by these rules. Breach of any of these rules may be considered student misconduct.

1. Definitions

1.1 “account” refers to any computing or electronic communication resource allocated for sole or shared usage by a student and protected from general usage by a security system. Such a resource might include, but is not limited to, storage space; access to a computer terminal, processor time; printed output or dial-up access time. A security system might include, but is not limited to, password protection.

1.2 “communications” refers to the use of any of the University’s computing and/or electronic communications facilities, including, but not limited to, the University Wide Network, the modern pool, telecommunications, PABX and facsimile equipment to access or transmit information.

1.3 “computing facilities” refers to:

   - (1) all networked services and computer hardware and software, owned, leased or used under licence by the University including the University’s academic and administrative systems;
   - (2) computing facilities maintained by other bodies but available for use through an agreement or agreements with UNSW; and
   - (3) all other computing facilities, wherever situated, where access is by means of UNSW-provided services.

1.4 “University” means the University of New South Wales.

1.5 “user” means any person or persons utilising, accessing or attempting to gain access to the computing or communications facilities at UNSW. Any reference to the singular includes a reference to the plural and vice-versa in these rules.

2. Legal framework

Users of computing and communications facilities must be aware that use of these facilities is subject to the full range of State and Federal laws that apply to communications and to the use of computers, as well as any other relevant laws. This includes copyright, breach of confidence, defamation, privacy, contempt of court, harassment, vilification and anti-discrimination legislation, the creation of contractual obligations, and criminal laws.

3. Access

3.1 Access to the University’s computing and communications facilities is available to students for teaching, research and administrative purposes, and for other specifically authorised activities.

3.2 Students are entirely responsible for their own accounts and any actions or materials resulting from any use of their accounts.

3.3 The University reserves the right to withdraw the availability of any computing or communications facility without notice.

3.4 Students may use only those facilities to which they have been given specific access by the University or which have been advertised for general student usage, and to the extent and in the manner that they are authorised to use them.

3.5 Students are not to assist persons who do not normally have access to a resource to obtain such access.

4. Non-permitted uses

The following uses and/or activities are not permitted:

4.1 Any use not related to University teaching, learning and research, unless specifically authorised by the University. If a student is unclear of his/her access for purposes unrelated to University teaching, learning and research, clarification should be sought from the relevant University system manager or student supervisor.

4.2 Any commercial purpose.

4.3 UNSW facilities are not to be used for:

   - (1) the deliberate or negligent preparing, storing, displaying of racist, pornographic or other offensive material,
   - (2) the deliberate receiving or transmitting of racist, pornographic or other offensive material unless it is a requisite component of a program of study and has the approval of the relevant lecturer or supervisor.

4.4 Use of the facilities to harass any person (whether within or outside the University) or interfere with their work. Examples of breaches to this rule could include the sending of obscene, abusive, fraudulent, threatening or repetitive messages, as well as unsolicited non-University work-related email.

4.5 Tampering with other users’ accounts in any way, including attempting to thwart the system security, setting password traps, and any other behaviour designed to interfere with other users’ access to the facilities.

4.6 Use of other users’ accounts, a false identity or another person’s identity to gain access to any aspect of the facilities.

4.7 Allowing or assisting another person to obtain access to resources or information not authorised.

4.8 Smoking, eating or drinking in computer laboratories or while using computing facilities at the University.

4.9 Behaviour that impacts adversely on other users in shared spaces, such as making unreasonable noise.

4.10 Deliberately or negligently interfering with the operation or performance of a system by:

   - generating excessive load, use of storage capacity, network traffic, etc.;
   - physically damaging or adjusting the equipment. Any such tampering, vandalism, theft or wilful and/or reckless damage may be referred to the police;
   - introducing viruses or other software components designed to interfere with the normal operation of a system;
   - deleting, adding or modifying information relevant to the system’s operation;
   - obtaining extra resources without authorisation;
   - excessive printing;
   - creating excessive network links.

4.11 Circumventing, or attempting to circumvent security or obtaining or attempting to obtain information that would allow security to be circumvented.

4.12 Using a resource not allocated or accessing material not permitted, whether by breaching security, using another’s account or taking advantage of another person’s negligence. This includes the use of resources in amounts or to a degree other than authorised.

4.13 Copying, disclosure of, transferring, deleting, examining, renaming, changing or adding to software, data or information belonging to UNSW or another person unless permission has been granted or the software, data or information is clearly intended to be public.

4.14 Activities that impact adversely on the University’s reputation.

5. Copyright and licences

Students will not copy, disclose or transfer any computer software on the computing and communications facilities provided by the University in such a way as to breach any right of any person (including copyright) without the express written permission of the appropriate University officer or head of school/unit/centre.

6. Security

6.1 The University wishes to maintain a secure, efficient computing and communications environment. It has the right to examine all computer files and to monitor computer usage to ensure compliance with these rules.

6.2 If necessary, computer processes that are actively causing a problem will be terminated, or access to any files related to a breach of the rules removed.

7. Related Documents

These rules operate together with other relevant policies, rules and guidelines of the University on the use of its facilities and resources. These include:

   - Student Misconduct Rules
   - Breach of Discipline and Misconduct in Assessment
   - Email Policy.

8. Breaches

Students found in breach of these rules are liable to disciplinary action under these rules and the Student Misconduct Rules. Disciplinary action could result in a warning, a reprimand, suspension of access to computing facilities, a fine or exclusion from the University for a period.

9. Schedule of Fines

The Chief Information Officer may impose fines of up to $1,000.
Student Contact Details

It is essential that students maintain current email and postal addresses. The University cannot accept responsibility if official communications fail to reach students who have not amended their postal and/or email address as soon as possible after any change of postal and/or email address.

Email is the main mode of formal communication between students and the University. All students have a central email address of the form studentID@unsw.edu.au where studentID is the student number. It is a **requirement** that all students read email that is sent to this address, as it may contain vital administrative or teaching material **not provided any other way**.

If a student uses an email account other than the centrally provided UniMail account, the student **must** arrange to forward UniMail to an account that they do use.

Prizes

The University has over 400 prizes available that are presented to students for meritorious academic achievement. Prizes are in the form of medals, books, book vouchers, cash amounts and certificates and are awarded annually on the recommendation of the Head of School.

Scholarships

The University administers a number of scholarships for full-time study. Many of these have been made available by the generous donations and bequests of private donors and organisations.

Further details and the latest scholarship listings can be obtained by visiting the Scholarships@UNSW website (www.scholarships.unsw.edu.au) or by contacting the Scholarships, Loans and Research Office; Tel: +61 2 9385 1708, Fax: +61 2 9385 3732, or email: scholarships@unsw.edu.au

New scholarships are advertised on the Scholarships website, in the University publication “Focus” and on notice boards in schools and outside NewSouth Q. To receive newsletters on the latest scholarships information, subscribe to our mailing list by visiting the Scholarships@UNSW website (www.scholarships.unsw.edu.au).

Student Representatives

Each year a number of student members are elected to each faculty to represent all enrolled students in the faculty. These students have voting rights at faculty meetings and committees and hence a direct input in decisions affecting students. Further information can be obtained from www.elections.unsw.edu.au

Textbooks

Text and reference book information is available on the Internet at: www.bookshop.unsw.edu.au/textlist.html

University Policies and Procedures

Access to Assessment Information and Freedom of Information

The University of New South Wales is committed to a policy of openness regarding exchange of information in matters involving the assessment of students. To this end:

1. Course authorities are responsible for ensuring that a clear written statement of expectations is provided for each course which should include a statement of the objectives of the course; its assessment plan, including weights allocated to each significant assessable component and related submission dates; the kind of evidence required for consideration to be given to late submissions; attendance, timetable and other requirements, to be presented at the first class of each session/term, recognising always the ability to negotiate changes with the students concerned within the first week.

2. All items of assessment completed during session should be marked promptly and returned to students with a mark or grade and, where appropriate, comments. Course authorities where appropriate should provide information on the distribution of results in all items of assessment so that students can gauge their own performance against that of the other members of the class.

3. Final composite marks in courses as determined by Faculty Assessment Review Groups should continue to be provided to students.

4. Final examination scripts (other than those returned to students) are to be retained in the School for six months. Students should have access to their own scripts and be able to consult the examiner or the course authority on their performance. Faculties and Boards of Studies may determine the conditions under which access may be granted.

5. Where examination question papers or other forms of assessment need to be kept confidential (e.g. multiple choice question papers where questions are reused in later examinations) arrangements should be made for students to receive advice on their performance with reference to their own examination script but in a way which does not prejudice the examination mode.

6. In the case of the examination of theses and project reports, the examiners’ report should be released to the student, following determination of the student’s results. The names of examiners, while remaining undisclosed prior to assessment, should be released subsequently unless a particular examiner requests that this information be not released.

Information about how to make a Freedom of Information application and the charges involved may be obtained from NewSouth Q (Student Enquiries), the UNSW Freedom of Information Officer (02) 9385 2860 or the web at www.infonet.unsw.edu.au/admin/pmu/foi.htm

Assessment Policy

This is an excerpt from the UNSW Assessment Policy. The full policy can be found online at: https://my.unsw.edu.au/student/academiclife/assessment/AssessmentPolicyIndex.html

1. Introduction

1.1 Principles underlying assessment

The University’s teaching programs are designed to provide a rich diversity of formal and informal learning opportunities for students. University students learn for many reasons: to acquire knowledge for its own sake; to prepare themselves for professional work and careers; and to develop discipline-specific as well as generic skills, for example, the skill to learn independently of a teacher.

A University award (as documented on a testamur) certifies that a student has demonstrated his or her understanding of what has been learned at a standard commensurate with that expected of the holder of the qualification for which the student has been enrolled. Assessment is integral to this certification procedure.

Some assessment is formative. That is, it is specifically intended to assist students to identify weaknesses in their understanding, so that they may improve their understanding and enhance their learning. Other assessment is summative; its objective is primarily to pass judgment on the quality of a student’s learning, generally in terms of assigned marks and grades. Furthermore, critical reflection on the outcomes of course assessments, both formative and summative, can inform teachers and students, not only about the quality of student learning but also about the effectiveness of teaching. In the design and administration of assessments and the reporting of summative assessment results, the University has a commitment to promoting open, equitable and accountable procedures. The University is also committed to providing valid and reliable assessment information, in accord with standards in which students, potential employers and accrediting bodies can have confidence.

1.2 Assessment in relation to course development and teaching methods

While teachers can contribute profoundly to students’ understanding of a discipline, students are ultimately responsible for their own learning. This responsibility extends beyond the assimilation of topics within the course. Students should ensure that they have the necessary assumed knowledge for the course, that they have an adequate grasp of academic English, that they satisfy attendance requirements, that they familiarise themselves with the course assessment requirements, and that they prepare properly for those assessments by the due dates.

English language standards are located at www.unsw.edu.au/futureStudents/undergrad/sad/engregpolicy.html or refer to the ‘Admission Requirements and Procedures’ entry in this Handbook.
For information on assumed knowledge see: www.unsw.edu.au/futureStudents/undergrad/sad/assumedknowledge.html or refer to the ‘Admission Requirements and Procedures’ entry in this Handbook.

2. Timing and Weight of Assessments
Students are expected to reach the objectives of a course progressively throughout a session. They should be set tasks during the session that allow their progress to be evaluated against established criteria. Such in-session tasks should contribute to the final assessment in a course.

Assessment tasks should be designed carefully, first, to keep in proportion student time commitment and the weight of the assessment task in the overall assessment, and second, to reflect, as far as possible, the importance of each task in determining the effectiveness of students' having met the course objectives. This might mean that an important task, such as a final examination, is weighted heavily.

The Academic Board has determined that the normal workload expectations of a student are 25-30 hours per session for each unit of credit, including class contact hours, preparation and time spent on all assessable work.

Care should also be taken to avoid the imposition of a heavy imbalance of assessment load toward the second half of the session. In disciplines where comprehensive assessment is possible only when students have completed a significant proportion of the session's work, milestone tasks should be set to enable students to build towards the submission of a more substantial assessment task closer to the end of the course. While assessment regimes will vary across the disciplines of the University, the following guidelines represent accepted norms.

2.1 Except in highly unusual circumstances, one or more tasks should be set, submitted, marked and returned to students by the mid-point of a course, or no later than the end of Week 8 of a 14-week session. This is particularly important when students are considering discontinuing a course (See 8. Discontinuation and Effective Feedback).

2.2 Although students need regular feedback on their progress, set assessment tasks should be kept to the minimum that is sufficient to enable students to make judgements about their progress.

2.3 Deadlines for assessment tasks should be well separated in time so as to give students periods of time for reflective learning that are free from the pressure engendered by a looming deadline.

2.4 In some disciplines, students are expected to practise skill development continuously. To evaluate students' ability to perform such on-going tasks, consideration should be given to strategies for self-assessment. In this way, students can obtain evidence concerning their level of understanding of the work, while avoiding the stress of frequent formal assessment by an examiner.

2.5 No examination worth 20% or more of the assessment in a course should be scheduled during the final week of a standard session, and no assessment tasks should be set in the period between the end of session and start of the formal examination period. Study for these tasks inevitably impacts on other work undertaken during this period, including the preparation for formal examinations.

2.6 Students should not normally be required to sit 3 exams in 2 consecutive days.

2.7 Apart from examination scripts, all assessed work should be returned to the student, preferably in a class context where the student has the right to query the assessment for resolution either then or at a later time. Examination scripts may be returned at the discretion of the course convenor.

2.8 Course handouts should advise students at the beginning of session how all assessment results are to be combined to produce an overall mark for the course. In particular, the handout should make expressly clear:

- the weight of each task in contributing to the overall mark;
- the formulas or rules used to determine the overall mark;
- minimum standards that are applied to specific assessment tasks, and the consequences if such standards are not met (including failure to submit particular tasks);
- rules regarding penalties applied to late submissions; and
- precise details of what is expected in terms of presentation of work for assessment. Emphasis should be placed on appropriate referencing conventions and requirements, on the degree of cooperation permitted between students, and on what constitutes plagiarism and the consequences of committing it.

3. Assessing Students’ Progress
The University is committed to evaluating students’ progress towards the completion of their degree requirements and in relation to the objectives of each course in a way that is meaningful to graduates and to employers. Thus, the University implements several procedures for the preparation for and fair conduct of examinations, and also strategies for the finalisation and communication of assessment results to ensure that there is consistent interpretation of progress indicators across the institution.

3.1 Conduct of examinations and of other forms of assessment
Examinations are conducted by the Examinations Section and by schools. It is important that all examinations are conducted under the same conditions and that those conditions are strictly adhered to. Students should consult the Guidelines for the conduct of examinations, which are located at: https://my.unsw.edu.au/student/academiclife/assessment/examinations/examinationrules.html

Assessment should be anonymous where this is consistent with the learning outcomes of the course. Schools should develop and inform students of their policy in regard to anonymous assessment. The policy should indicate conditions under which anonymous assessment will normally be applied. In anonymous assessment, the student’s ID number only should appear on the work submitted for marking. The number is subsequently paired with the name of the student when the mark is recorded. In other cases, for example class presentations, individual viva voce assessment and small size classes, anonymous marking will not be possible.

Students with disabilities, in certain circumstances, may be eligible for alternative provisions for assessments or examinations. Provisions for school or faculty-based assessments should be arranged with the relevant academic staff member or school administrative officer, in conjunction with the Equity Officer, Disability. Provisions for the end of session examinations should be arranged with the Equity Officer, Disability, who will liaise with the Examinations Section. Information on equity issues at UNSW is located at www.equity.unsw.edu.au

Course authorities should ensure that course convenors follow the guidelines issued by the Registrar for the ‘Preparation and Printing of Examination Papers’. Course convenors are responsible for the accuracy of the examination papers in the courses for which they have authority.

3.1.1 Scheduling assessment and examinations
The University recognises that there are students whose religious faith prohibits them from sitting for examinations or attempting assessment during certain periods or on particular holy days. The University tries, where possible, to accommodate students so that they may fulfil both their religious and University obligations. Course convenors and other academic staff are requested to observe this policy and where possible to consult with students so that alternative arrangements may be discussed.

3.1.2 Group-based assessment
Wherever students’ grades derive from an assignment that has been completed in a group, the students should know from the outset how the marks are to be determined. In particular, students should be informed if individual or group-based grades are to be awarded. As in all assessment tasks, the students should be told the criteria against which the group's assignment or presentation will be evaluated. It is also recommended that students be asked to complete self and peer evaluations of contributions to the group’s final product, and that students be provided with a handout that informs them about this when the group-based assignment is given to them.

3.1.3 Viva voce assessments
Wherever students are required to complete an oral assessment task, more than one examiner should normally be present. Each examiner must record, independently, their comments and recommended mark. Any assessment task that involves some kind of performance (for example, dance or musical recital) should, in addition, be video or audiotope recorded. Clinical assessments are excluded from these requirements.

3.1.4 Class participation
The criteria to be used for evaluating class participation marks should be set out in the course handout that is distributed at the beginning of the course. Wherever possible, students should be informed of their result before the end of the session, and provided with the opportunity to discuss their result with the lecturer involved, should they wish to do so. The assigning of marks for class participation should not unfairly disadvantage any group of students, and the proportion of marks assigned to class participation should take the following issues into account:

Examinations are conducted by the Examinations Section and by schools. It is important that all examinations are conducted under the same conditions and that those conditions are strictly adhered to. The assigning of marks for class participation should not unfairly disadvantage any group of students, and the proportion of marks assigned to class participation should take the following issues into account:
3.2 Finalisation of results of assessment

At the end of each assessment period, each course authority must provide the Registrar with a single result for each student enrolled in the course for which he or she is responsible. The final result in most courses is expected to take the form of an integer mark, ranging from 0 to 100 (inclusive). A symbol may be used along with the mark, but only in cases where the grade is not determined from the mark itself can a symbol be used instead of a mark.

Except where program-specific rules for weighting have been approved, the Registrar then determines for each undergraduate and postgraduate student a weighted average mark (or WAM) that quantifies a student's overall performance throughout his or her program of study. The WAM is calculated first, by weighting each result by the units of credit associated with the course, and second, by dividing the weighted sum by the total number of units of credit.

3.2.1 Stages in the finalisation of results

There are two stages in the finalisation of the results that are provided to the Registrar.

In the first stage, course authorities are expected to calculate for each student enrolled in each course for which they are responsible a composite mark. It is appropriate that composite marks be calculated only when, on the basis of the work completed, a reasonable assessment can be made of the student's standard of knowledge and understanding of, and skills in, the course. The recommended mark should normally fall between 0 and 100. The minimum pass is recorded as 50 and marks above 50 reflect the level of performance, according to the categories identified in sub-section 3.2.2 below. If necessary, the provisional composite marks should be scaled so as to achieve this objective. It is expected that only minor adjustments should be required to establish suitable standards. Excessive scaling would normally indicate that the level of assessment tasks or marking standards has been set inappropriately.

The course authority is then required to submit a provisional composite mark to the Faculty Assessment Review Group (FARG), or, in cases where it is inappropriate to calculate a provisional composite mark, a recommendation about any action that is to be taken.

The full range of marks and symbols used by UNSW is set out below. Some symbols represent decisions that can be made only by the FARG. Course authorities should not include these on their return of results.

Some symbols represent decisions that can be made only by the FARG. Course authorities should not include these on their return of results.

To indicate the withholding of a student's result, one of two symbols, a WD or a WC, is used, depending on the reasons for not finalising the result. In each case, a mark is returned.

In special circumstances, when it is inappropriate to return a composite mark, the grades HD (High Distinction), DN (Distinction), CR (Credit), PS (Pass) and FL (Fail) may be used. Course authorities should be aware that a notional mark is generally assigned to the grade in computing weighted averages (or WAMs). The notional mark used is High Distinction 90, Distinction 80, Credit 70, Pass 55 and Fail 25.

Where graded passes are not awarded in a course, the grade SY (Satisfactory) is used to indicate that the student has attained the required standard of knowledge and understanding of, and skills in, the course. The grade FL (Fail) should be used to indicate that the student's performance is below the minimum level of competence in the course.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

Faculty Assessment Review Groups may invite course authorities who are not members of the relevant Faculty Board to attend assessment meetings at which composite marks for courses within their responsibility are considered. If the course authorities or their nominees are unable to attend any meeting of the FARG, notes on the student cases to be considered should be provided for the presiding member prior to the meeting. The course authorities or their nominees do not attend, the committee shall have full authority to make decisions on the standing of those courses for which the course authorities are responsible. Provided that the general statements in this document are not contravened, additional procedures and guidelines for the FARG may be laid down by its Faculty Board. If, when the composite marks for the course are being finalised, course authorities and/or Faculty Assessment Review Groups propose to vary the marks returned by the course convenor, they should advise the convenor on the action taken and the reasons.

3.2.2 Graded passes

When a composite mark falls in the range 50-100, the grade is determined in accordance with the following categories:

- 85-100 High Distinction (HD) Outstanding performance
- 75-84 Distinction (DN) Superior performance
- 65-74 Credit (CR) Good performance
- 50-64 Pass (PS) Acceptable performance

3.2.3 Unsatisfactory failure

The symbol UF (Unsatisfactory Fail) may also be used with a composite mark in the range 40-100 where a student has not performed satisfactorily in an essential item of assessment. UF should not be used to indicate that a student has failed to reach an acceptable standard in a major assessment task such as a final examination unless it is an essential item of assessment. Normally, the assessment weights or formulas should be adjusted so that failure in a major piece of assessment is reflected in an overall mark less than 50. UF should also not be used by a Faculty Assessment Review Group to circumvent the award of a conceded pass.

3.2.4 Ungraded pass/fail

Where graded passes are not awarded in a course, the grade SY (Satisfactory) is used to indicate that the student has attained the required standard of knowledge and understanding of, and skills in, the course. The grade FL (Fail) should be used to indicate that the student's performance is below the minimum level of competence in the course.

3.2.5 Grade only

In special circumstances, when it is inappropriate to return a composite mark, the grades HD (High Distinction), DN (Distinction), CR (Credit), PS (Pass) and FL (Fail) may be used. Course authorities should be aware that a notional mark is generally assigned to the grade in computing weighted averages (or WAMs). The notional mark used is High Distinction 90, Distinction 80, Credit 70, Pass 55 and Fail 25.

3.2.6 Composite marks below 50

When the composite mark falls below 50, the Faculty Assessment Review Group will determine which of the following grades applies.

3.2.7 Pass Conceded

A Pass Conceded (PC) may be awarded by a Faculty Assessment Review Group, provided a student's overall performance is considered to warrant such a concession. A Pass Conceded allows a student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

A Pass Conceded (PC) may be awarded by a Faculty Assessment Review Group, provided a student's overall performance is considered to warrant such a concession. A Pass Conceded allows a student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

An undergraduate student will be considered for the award of a PC if it is impossible for the student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.
WD: This symbol should be used to indicate that it is not yet possible or desirable to finalise a composite mark based on the work completed, or that the mark is not to be released until the student consults the course authority. WD is not appropriate when students have completed all assessment tasks but marking is not complete. In this case, LE (late entry) should be returned.

WC: This symbol refers to results that are withheld for special circumstances, or where further assessment is recommended for a student who through illness or some other acceptable misadventure has been prevented from taking one or more of the assessments or has been disadvantaged during the assessment.

Further assessment should not be granted when the composite mark, whether more or less than 50, accurately reflects the student's level of achievement in the course.

Withheld results cause significant inconvenience. They should, therefore, be used sparingly.

3.2.10 Finalising withheld results
Each school should designate a specified period, as close as possible to the date on which results are released, during which supplementary assessment will be held, and inform the students of this in the course handbook at the beginning of the session. Students should be advised that they are required to be available for supplementary assessment, if required.

Students whose results have been withheld (indicated by a WD or a WC) are advised by the Registrar to contact the course authority within the specified time that has been communicated in the course handbook, but in any case no more than 5 days after the release of the results on the web, because it might be necessary to arrange for further assessment.

The deadlines for finalising withheld results are:
- Session 1: the first Friday in August
- Session 2: the second Friday in February
- Summer Session: the third Friday in February
- Winter Session: the third Friday in August

If a student fails to contact the course authority within the specified time, a failure in the course may be recorded. All results not finalised by the relevant date will be converted to:
- a mark and grade based on the mark held in the examinations module, or to
- a grade of NC, which signifies that assessment in the course was not completed.

3.2.11 Other symbols
- LE Late Entry (or assessment not finalised) indicates that a result was not submitted on time by the course authority. It is the responsibility of the course authority to provide a composite mark at the meeting of the Faculty Assessment Review Group.
- EC Enrolment Continuing indicates that the course is taken over more than one academic session and the assessment will be finalised in a later session.
- RD Result Deferred is used for project courses to indicate that the student is unable to complete in the current session. The student must re-enrol to obtain a result.
- GP The mark falls in the range 46 to 49, and a decision whether or not to award a PC is pending. This is used to indicate to a Faculty Assessment Review Group that withheld results currently prevent the determination of a PC recommendation. All late results in the range 46 to 49 returned by a course authority should be entered as GP unless UF applies. Regularly, the UNSW concession algorithm is administratively applied to GP grades that are to be converted to PC or to FL, if all other results are finalised.
- NF The student has been permitted, because of special circumstances, to withdraw from the course without failure. No result is recorded on the official transcript.
- NC This symbol is used when a result has been withheld for an extended period of time, and there is no prospect of its being resolved.

3.2.12 Distribution of marks
The two principal approaches to the award of grades are referred to as the standards-referencing approach (in which students' achievements are evaluated against some pre-determined criteria) and the norm-referencing approach (that assesses students in comparison with their peers in a relevant cohort). Over a period of years, the distribution of marks in large classes has shown a consistency across all courses. Patterns of distribution for the current session and for previous sessions are available from the Registrar. In small classes, and in courses and programs with high entrance qualifications, an increased percentage of higher marks may occur. A similar shift in the distribution of marks typically occurs in later years of most degree programs. Course authorities and course convenors are advised not to pass or fail any given percentage of students, but should be prepared to give reasons for a distribution pattern that differs from that which is consistently found in the particular course.

3.2.13 Time for marking
Assessment of students' work is a normal component of the duties of academic staff. The Head of School is expected to ensure that markers are not overloaded. While workload estimates vary across disciplines, one rule of thumb relates the amount of time spent by a marker to that spent by the student on the assessment task. For the grading of examination scripts, some schools use a ratio of roughly one-sixth to one-twelfth, depending on the complexity of the task and the level of objectivity used in determining a fair mark. For example, in an seven-hour day an experienced marker might be expected to assess between 14 and 26 entire three-hour examination scripts. In practice, marking may be distributed among several markers, each of whom assesses the corresponding part of each examination paper.

3.2.14 Submission of results
The Registrar is responsible for the provision of the means by which provisional results for each student in a course can be recorded centrally. Such means might include the transfer of marks and grades in electronic form from systems maintained by the course authority. Course authorities must ensure that their systems conform fully to the Registrar's specifications, that student lists are current at the time of submission, and that procedures are followed to check provisional results for accuracy prior to submission. Course authorities may elect to enter the results on-line. Care must be taken to ensure that any transcription that is required is checked manually.

Where the results of assessment are displayed, this should be done in a way that no student can identify another student's results. This means that student IDs cannot be used because privacy of these cannot be assumed.

3.2.15 Students not formally enrolled in a course
If a student is not identified on a list of those formally enrolled in a course that is provided by the Registrar, normal electronic submission or online entry of a provisional result for the student in the course is not possible. Instead, the provisional result is to be forwarded to the Registrar using a form provided for the purpose (the form may be on paper or other medium at the Registrar's discretion). Students will be enrolled in the course on a non-award basis and will be liable for the applicable tuition fee. The course may then be counted towards the student's program at the discretion of the Registrar.

3.2.16 Confidentiality
Assessment is a confidential matter. No person involved in the process shall divulge to any unauthorised person any information about composite marks or standards in any course.

3.2.17 Student access to examination scripts
Examination scripts (other than those returned to students) are to be retained in the school for six months. Students should have access to their own scripts and be able to consult the examiner or the course authority on their performance. Faculties may determine the conditions under which access may be granted.

Where examination question papers or other forms of assessment need to be kept confidential (e.g. multiple choice question papers where questions are reused in later examinations) arrangements should be made for students to receive advice on their performance, with reference to their examination script, but in a way which does not prejudice the examination mode.

3.2.18 Release of results
Final composite marks are released to students on the web and at the Registrar's discretion may be released in other formats.

3.2.19 Review of results
Students who believe that there has been an error in the calculation of their final mark may apply for a review of their result. The review may take the form of:
3.2.20 Additional assessment for potential graduates
The status of students who have completed all the requirements for the degree in which they are enrolled, except for a potential failure in one course, will be reviewed by the Faculty Assessment Review Group. Further assessment may be granted, notwithstanding a student’s failure to otherwise qualify for such concession (see also 3.2.7).

3.2.21 Supplementary assessment
Additional or supplementary assessment should be granted only when warranted by the circumstances. Final supplementary examinations should not be granted if a student’s performance in previous assessment has been of a standard that he or she would be unlikely to pass the course. Consideration should be given to the severity of the impact of any special circumstances on the student before allowing additional assessment. (See also Section 6 concerning Special Consideration.)

3.2.22 Discontinuation of courses
Faculty Assessment Review Groups may, in special circumstances, give approval for students to discontinue a course or courses without failure.

3.2.23 Degrees with Merit/Distinction
Undergraduate Pass degrees may be awarded with Distinction when a Distinction level of performance based on a Weighted Average Mark (WAM) of 75% or more has been achieved in all courses that only in since enrolment at UNSW which are credited to the relevant award. This applies only to undergraduate Pass degrees where an award with Honours is not available, for example the three year BCom where a student would have to complete a fourth year to be eligible for the BCom with Honours.

Proposals that Pass degrees be awarded with Distinction must be made through Faculty committees for approval by the Academic Board. For details see www.studentadmin.unsw.edu.au/academiclife/pass_with_distinction.shtml

3.2.24 Award of Honours
Program authorities who are responsible for programs that lead to a Bachelor’s degree make recommendations concerning graduation with Honours for determination by the Faculty Assessment Review Group. The recommendations should be made by completing the appropriate form that is then distributed to the members of the Faculty Assessment Review Group before the meeting, in accordance with conditions for the award of Honours that are determined by the Faculty Board.

3.2.25 Award of the University Medal
The award of the University Medal is determined twice a year by the University Medal Committee following the Session 1 and Session 2 series of Faculty Assessment Review Group meetings. The membership of the University Medal Committee is the Vice-Chancellor or nominee (Chair), the President of the Academic Board, a Deputy President of the Academic Board, and the Registrar or nominee.

Recommendations for the award of a University Medal are forwarded directly from the Faculty Assessment Review Groups for the approval of the University Medal Committee as the final authority for the awarding of the University Medal. The award of a University Medal indicates that, taking the whole of the academic record into account, a student in an undergraduate program has shown a high level of distinction and, where Honours are awarded, has performed at a level significantly above the minimum required for Honours Class 1. If there are specialisations within a program that involve sufficiently distinct areas of study, a Medal may be awarded for each such specialisation. Given that the award of a Medal involves a very high level of academic performance, it is expected that only in exceptional circumstances would there be more than one recommendation for a Medal for a particular specialisation. If the Medal Committee is of a mind not to award a Medal that has been recommended by a Faculty Assessment Review Group, it will discuss the matter with the appropriate presiding member and head of school, before making a final decision.

3.3 Academic Standing
Please refer to the entry ‘Academic Standing’ in this Handbook.

4. Special Consideration
Please refer to the entry ‘Special Consideration’ in this Handbook.

5. Ethical Use of Scholarly Materials
UNSW policies and procedures in this area are currently being reviewed and expanded to ensure the highest standard of ethical use of scholarly material.

The University is committed to assisting students to understand the conventions which govern academic communication and thereby to avoid action which may result in academic misconduct. The following statement on the ethical use of scholarly materials by students writing theses, essays and assignments should be brought to the attention of all students.

The University seeks to enable students to acquire theoretical and practical knowledge that is both trustworthy and verifiable. The writing of research-based theses, essays and assignments is one way in which students approach this goal. These writings, in part, report on the creation of new insights and knowledge. In short, they represent scholarly work.

To maintain standards in scholarship requires a commitment to scholarly values. Among such values is the adherence to ethical behaviour. Many aspects of ethical behaviour come together in the process of research and, in particular, in the use of scholarly materials. In the interests of maintaining high standards in scholarship and research, the University reminds students that when they are writing essays, theses, and assignments, they are ethically bound:

5.1 to cite the published (including, where relevant, the electronically published) source, to acknowledge the originator of substantial ideas upon which they are building their work, and to acknowledge quotations by the use of quotation marks;

5.2 to refer to or use unpublished scholarly materials only with the consent of their originator, and to acknowledge the source of the materials if that consent is given;

5.3 to refrain from plagiarism with its multiple facets as defined in the Student Guide and in the section ‘Academic Misconduct and Student Misconduct’ earlier in this Handbook.

5.4 to ensure that their use of scholarly materials does not result in obstructing access by others, in particular, where such materials are held within the University by a library or research centre;

5.5 to represent faithfully the views of authors cited and not to misrepresent authors’ views either by partial or censored quotation, or by quotation out of context, or by misleading commentary;

5.6 to seek access only to scholarly materials to which they know they are entitled or authorised, and not to attempt to access such material to which they know they are not entitled or authorised (for example, by computer hacking);

5.7 to respect the rights of other authors and to refrain from tampering with digital records (whether in text, image, sound, or other format) over which the originator has copyright and/or has asserted the moral rights of ownership; and

5.8 to refrain from manipulating digital records (whether in text, image, sound, or other format) with their original context or in a different context, so as to mislead their audience.

Academic misconduct falls into three main categories:

• misconduct concerning examinations;

• misconduct through misrepresentation such as falsifying documentation, and

• misconduct concerning academic works.

While the University has extensive information on the MyUNSW on all aspects of academic misconduct, course convenors have a particular responsibility to inform students in the course handout what is expected of them in terms of appropriate referencing conventions and what may constitute legitimate collaboration within the assessment goals of the course.

Information on plagiarism should emphasise that it is the action of taking and using as one’s own the thoughts or writings of another without acknowledgement including:

• where paragraphs, sentences, a single sentence or significant part of a sentence which are copied directly, are not enclosed in quotation marks and appropriately footnoted;

• where direct quotations are not used, but ideas or arguments are paraphrased or summarised, and the source of the material is not acknowledged either by footnoting or other reference within the text of the paper; and
Students have a right to:

7.1 Responsibilities of the University
that apply to them, and to report any anomalies or problems. that they are aware of, and comply with, the assessment requirements across the University (through the Vice-Chancellor and the Academic Board), the faculties, the schools, course convenors and individual academic staff. Though some responsibilities for assessment are shared, others are specific to a particular domain. Students have their part to play in the assessment process; they have rights that correlate with the University’s responsibilities. Students also have responsibilities to ensure that they are aware of, and comply with, the assessment requirements that apply to them, and to report any anomalies or problems.

7. Rights and Responsibilities
In order that assessment policy might be implemented effectively, formal responsibility for specific aspects of policy and practice is distributed across the University (through the Vice-Chancellor and the Academic Board), the faculties, the schools, course convenors and individual academic staff. Though some responsibilities for assessment are shared, others are specific to a particular domain. Students have their part to play in the assessment process; they have rights that correlate with the University’s responsibilities. Students also have responsibilities to ensure that they are aware of, and comply with, the assessment requirements that apply to them, and to report any anomalies or problems.

7.1 Responsibilities of the University
The University, through the Vice-Chancellor and the Academic Board, has a responsibility to ensure that:

- assessment practices are explicit, fair and consistent across the institution;
- assessment procedures are monitored at the level of schools and faculties so that they meet the criteria set out in this document;
- resources are available to provide staff with access to information and expertise on the theory and practice of assessment;
- policies regarding special consideration following sickness or other misadventure, and for students with disabilities, are explicit and consistently applied;
- policies on plagiarism and cheating, including penalties for breaches, are explicit and consistently applied; and that
- appropriate appeal processes are available and publicised.

7.2 Rights and responsibilities of students
Students have a right to:

- be treated fairly and consistently in all aspects of assessment policy and practice;
- be informed of all aspects of assessment policies and practices in each course, including the criteria to be met and penalties for breaches, and in a format appropriate to students with a disability;
- the timely return of the results of assessments with appropriate and effective feedback;
- information which allows them to calibrate their own performance against the criteria for each course and the performance of other students;
- review their examination scripts and other forms of summative assessment (except those saved for reuse in subsequent testing) for the duration of the script retention period;
- have access to their student file; and to
- be informed of appeal processes, and time limits, and appeal against academic decisions made on the basis of flawed processes. Students have a responsibility to:

- ensure that they are properly enrolled, otherwise they may be refused assessment;
- behave ethically and appropriately, avoiding any action or behaviour which would unfairly disadvantage or advantage either themselves or another student;
- be aware that a major objective of assessment is the promotion of learning rather than the achievement of grades;
- use assessments to help them develop strategies for self-assessment;
- be aware of the rules of progression and the requirements for the award of the degree, diploma or certificate;
- inform themselves about assessment policies and practices, including the University policies about academic honesty, legitimate cooperation, plagiarism and cheating, and the timely submission of work;
- be aware of the means for seeking assistance and advice on assessment within the school and the University;
- ensure that they understand the requirements for examinations and other assessment tasks;
- ensure that submitted assessment tasks are their own work except when they acknowledge shared ownership of a group project;
- notify staff as early as possible if difficulties arise with the timing or other requirements of assessment tasks;
- advise schools or faculties as appropriate of any substantial absence from classes;
- seek feedback on the assessment of their work and advice on how to remedy weaknesses in learning skills and examination technique if necessary;
- comply with requirements in relation to attendance, completion of work, and utilisation of support facilities. It is important to note that if students attend less than 80 percent of their possible classes, they may be refused final assessment;
- seek feedback on the assessment of their work and advice on how to remedy weaknesses in learning skills and examination technique if necessary;
- seek early resolution, through the Head of School or nominee, over any problem in their working relationship with a staff member;
- inform themselves of appropriate appeal processes; and to
- inform the EO Disability and/or the school/faculty in a timely manner if they require alternative examination or assessment arrangements.

8. Discontinuation and Effective Feedback
The discontinuation without failure date for students withdrawing from courses is half the session plus one week. The discontinuation without failure date for whole year courses is the session 2 census date. Students are financially liable for all courses in which they are enrolled as at the relevant census date. Students who are thinking of discontinuing should be provided with effective feedback by the end of week 8. This may take one of the following forms:

1. an assessment task to be completed by the end of week 7 and marked and available for collection by week 8;
Guidelines and Procedures for the Resolution of Academic Grievances and Disputes

The University of New South Wales recognises that all decisions which affect a student’s standing or progress in a program or course must be made fairly and must be based on appropriate academic criteria.

Guidelines

The University is committed to providing a harmonious work and study environment, and will seriously listen to complaints and resolve them quickly if possible. The resolution procedures ensure that students are able to air legitimate complaints, knowing that ad hoc, vindictive or arbitrary action will not be taken against them or the staff complained about. By providing a clear set of procedures, it is hoped that grievances can be dealt with satisfactorily and expeditiously, and will prevent a minor grievance from becoming a major problem.

These procedures apply to all enrolled students and to any decisions which may affect a student’s standing in a course or program. Many of these decisions concern assessment, but they may relate to other matters which could adversely affect a student’s standing such as the granting of advanced standing, discontinuation, supervision arrangements, access to facilities, the award of scholarships and prizes, and decisions regarding fees. Research students may have a grievance concerning a thesis topic, access to facilities or supervision.

As there are many different decision-making processes in the University potentially affecting academic standing, not all of them can be covered specifically in one set of procedures. It is however the University’s intention that a student’s right to resolution of a grievance or dispute is not limited by this statement of procedures. Existing appeal procedures established under the Managing Student Progress policy or the Misconduct policy are not affected by these procedures. Information on these procedures is available in the University Calendar, in the Student Guide, from NewSouth Q in the Chancellery or on the web.

A student is required to make his/her own grievance known within a reasonable time frame, normally within a month of the decision being communicated. The University expects that student grievances and claims of unfair treatment should in most instances be able to be resolved through informal discussion and consultation without recourse to formal appeal. However, where resolution is not possible, the University is committed to listen seriously to complaints and resolve them quickly if possible, by the following procedures:

Procedures

Step 1
The student should attempt to resolve the grievance with the staff member(s) concerned within a reasonable time frame.

Step 2
If the grievance is still unresolved, it should be directed to the Head of School (or other responsible officer nominated by the faculty) who will attempt to resolve the grievance informally. Reasons should be provided by the Head of School (or nominated officer) for any recommendation or decision in respect of the matter.

Step 3
If the matter is not satisfactorily resolved at this stage, the student should refer the grievance to the Registrar. Except when insufficient or unfounded reasons have been given by the student to support the complaint, the Registrar will take the complaint in writing, inform the respondent officially, commence an investigation, including reference to the Dean or Presiding Member of the faculty, and give an answer (including reasons) normally within 7 days.

Step 4
If the student is still dissatisfied, an appeal may be lodged in writing with the Presiding Member of the Undergraduate Studies Committee (USC), the Postgraduate Coursework Committee (PCC) or the Committee on Research (COR) within 14 days of receiving the Registrar’s notification. The Presiding Member may decline to take action in cases where insufficient or unfounded reasons have been given by the student and shall inform the student accordingly.

If the matter has not already been considered by the USC, PCC or COR, this appeal will be heard by an Appeal Sub-Committee, empanelled for the purpose by the Presiding Member of the corresponding Committee. The Presiding Member will appoint as Chair of the Appeal Sub-Committee a member of the corresponding Studies Committee.

If the matter has already been considered by the USC, PCC or COR, this appeal will be heard by an Appeal Sub-Committee of the Academic Board, empanelled for the purpose by the President of the Board. The President will appoint as Chair of the Appeal Sub-Committee a member of the Academic Board.

The Appeal Sub-Committee will consist of at least three members, one of whom will be a student. The student member will be drawn from the Academic Board or from the current list of student members of faculties.

No member of the Appeal Sub-Committee will have been associated with either the original decision or any earlier step in the appeal process. Within two months the Appeal Sub-Committee will make a decision on the matter. Decisions made by the Appeal Sub-Committees will be reported annually to the Academic Board. There will be no further right of appeal.

Each stage is to be handled expeditiously.

Student Discrimination and Harassment

Grievance Policy and Procedures

In addition to the above procedures for the resolution of student grievances and disputes, the University has a policy and procedures relating specifically to grievances on the grounds of unlawful discrimination and/or harassment. The University has a policy and procedures relating specifically to grievances on the grounds of unlawful discrimination and/or harassment. A grievance may involve unlawful discrimination if it contains allegations of unfair and inequitable treatment on the basis of a person’s race, ethnic and ethno-religious origin or nationality; sex or sexual preference (including transgender); marital status; status as carer; pregnancy or potential pregnancy; age; disability; religious, trade union or political affiliation. Vilification on the grounds of race, homosexuality and HIV/AIDS status is also unlawful. Unlawful harassment is unwelcome and offensive or intimidating behaviour, comments or images based on any of these grounds. The most common forms of harassment are racial and sexual harassment.

A copy of the Student Discrimination and Harassment Grievance Policy and Procedures can be found on the UNSW website at www.equity.unsw.edu.au/policies.html. For further advice, please contact the Equity and Diversity Unit, telephone (02) 9385 4734, email equity-diversity@unsw.edu.au.

Charging Fees for Compulsory Course Materials

In 1997, the then DEETYA issued guidelines on the charging of fees for ancillary or additional services: the Ancillary Guidelines.

Under these Guidelines Student Contribution liable and non-fee-paying Student Contribution exempt students must be able to complete their program without facing course-related charges or fees imposed by the institution. This precludes charges for compulsory or essential components of a course or program, including its assessment and award. Higher education institutions may charge students for goods or services, the purchase of which is voluntary and is not a requirement of a program of study for an award of the institution.

Under the Disability Discrimination Act 1992, higher education institutions must not discriminate against students with disabilities by charging fees for goods or services which are provided as ‘reasonable accommodation’ to the needs of such students.

The text of the advice received from DEETYA follows:

Circumstances in which higher education institutions must not levy charges

Higher education institutions must not charge students for goods or services which are required for a program of study unless those goods or
services or alternatives to them are also available to students at no additional charge. Cases include:

- materials such as course outlines, reading lists, tutorial or seminar topics and problems, assignment and essay questions and requirements and guidelines for the presentation of work;
- access to library books, periodicals and manuals;
- clinic, laboratory or workshop materials such as anaesthetics, chemicals, filters, fuel, fertilisers, animal feed or crops used in practical sessions or research;
- access to computers or other on-line resources;
- equipment and manuals which a professional in the field would not be required to own such as fixtures in a clinic, laboratory or workshop or large items of equipment and relevant workshop manuals required for their use;
- examinations services;
- examinations or assessments including practical assessment, for example, which requires the services of musical accompanists and re-assessment of results where a student has failed an assessment and thereby failed a subject or unit.

Charges which may be levied by higher education institutions

The following are cases in which higher education institutions may charge students for goods or services which are ancillary or additional to their program of study.

1. Higher education institutions may charge students for additional materials or services which are not essential components of a course:
   - for example, access to Internet or word processing services (except where these are required as part of a course); printing of notes from the web or disks; and graduation ceremonies provided that the student does not need to attend the ceremony to graduate.

2. If goods or services that are an essential component of a course are made readily available at no additional charge by higher education institutions, then institutions may charge students for:
   - alternative forms of those materials or services – for example, lecture notes or tapes, provided that the lectures are available to students at no charge; and the electronic provision of essential information if the information is also readily available at no charge in another form; and
   - alternative access to those materials or services – for example, reading material such as anthologies of required readings provided that these texts are also available at no charge; and courses in non-standard sessions which allow accelerated completion of programs or which are offered for remedial purposes, provided that such courses are also available within normal session periods on a Student Contribution liable basis.

3. In certain circumstances, higher education institutions may charge students for goods or services which are a component of a course if students have the choice of acquiring the goods or services from suppliers other than the institutions:
   - goods or services which are necessary to produce items which become the physical property of students;
   - food, transport and accommodation associated with field trips; and
   - equipment regarded as a ‘tool of the trade’ which students would take with them at the completion of their program and which working professionals would normally own, for example, musical instruments, protective clothing or footwear, stethoscopes, dancing shoes and reference texts.

4. Institutions may levy charges as fines or penalties provided that such charges are levied principally as a disincentive and not in order to raise revenue or cover administrative costs:
   - for example, fines or penalties for late enrolments, late variations to enrolments or late withdrawals from a course.

Heads of School are responsible for ensuring that these guidelines are followed within the courses under their control.

Any enquiries on the application of these guidelines can be directed to Kathy Keane, Assistant Registrar, Student Information and Systems Office on (02) 9385 3154.

Copyright

Copyright is the intellectual property of authors, composers, photographers or artists which gives them the exclusive right to copy, publish, perform, broadcast or to make an adaptation of their work. Copyright in an original work is automatic and subsists as soon as the work is created. Under Australian law a copyright work is protected whether or not the work has been marked with the copyright symbol ©. Works published in any form, whether on the Internet, in hard copy or in any other medium, are protected by copyright.

The University does not claim ownership of the copyright of any original work contained in a higher degree thesis or project report submitted as a requirement for the award of a degree.

Under the provisions of the Copyright Act 1968 (as amended), students are permitted to make single copies of literary, dramatic, musical or artistic works provided they are required for research or study purposes and provided they do not comprise more than a reasonable portion of the work. As a guide, a reasonable portion is regarded as:

- not more than 10% of a literary work of not less than 10 pages, or one chapter;
- one article from a periodical or two or more articles if they relate to the same subject matter.

In certain circumstances the Act allows for one full copy of a work to be made for research or study purposes if it is not separately published or available commercially.

The University is also permitted under a special provision in the Act to make multiple copies of written works for teaching purposes, subject to a number of conditions including copying limits and payment of remuneration to copyright owners. This provision does not relate to individual students.

Students enrolled at UNSW may refer to the UNSW Copyright website at www.copyright.unsw.edu.au for further information.

Equity and Diversity Policy Statement

The University of New South Wales is committed to the goals of equal opportunity and affirmative action in education and employment. It aims to provide a study and work environment for staff and students that fosters fairness, equity, and respect for social and cultural diversity, and that is free from unlawful discrimination, harassment and vilification as determined by legislation and by University Council.

In fulfilling this commitment, the University will:

- foster a University culture which values and responds to the rich diversity of its staff and students;
- provide equal opportunity by removing barriers to participation and progression in employment and education so that all staff and students have the opportunity to fully contribute to University life;
- offer programs which aim to overcome past disadvantage for members of staff and student equity groups;
- promote clear and accountable educational and management policies and practices to engender trust between managers, staff and students;
- enhance the quality of students’ learning through the provision of culturally, socially and gender inclusive education in areas such as curricula, teaching methods, assessment and review provisions, written and audiovisual material and support services;
- ensure that its staff and students are aware of their rights and their responsibilities as University members.

To achieve these goals, the University depends on the continued cooperation of all members of the University community.

The Vice-Chancellor as Chief Executive Officer and Director of Affirmative Action is responsible for compliance with all relevant legislation. He is assisted by the Executive and the Director, Equity and Diversity.

Explanatory Notes

1. Currently the grounds of unlawful discrimination and harassment are:
   - age;
   - compulsory retirement from employment;
   - disability (physical, intellectual, psychiatric, sensory, neurological or learning disability, physical disfigurement, the presence in the body of an organism capable of causing disease, and current, past, future or imputed disability);
   - homosexuality (male or female, actual or presumed);
   - marital status (single; or, with reference to a person of the opposite sex, married, separated, divorced, widowed or in a de facto relationship);
   - political affiliation, views or beliefs;
   - pregnancy or potential pregnancy;
• race (including colour; descent; ethnic, ethno-religious or national origin, nationality; and immigration);
• religious affiliation, views or beliefs;
• responsibilities as a carer;
• sex; sexual harassment;
• transgender or transsexuality (anyone who lives, has lived, or wants to live as a member of the opposite gender to their birth gender including people who are assumed to be transgender);
• actual or imputed characteristics of any of the attributes listed above; and
• association with a person identified by reference to any of the attributes listed above.

It is also unlawful to terminate employment on any of the grounds listed above, and also on the grounds of temporary absence from work because of injury or illness, membership or non-membership of a union, participation in union activities, and absence from work during maternity or other parental leave.

The grounds of unlawful vilification are:
• HIV/AIDS;
• homosexuality;
• race; and
• transgender (transsexuality).

The University is complying with the following statutory requirements with regard to unlawful discrimination and vilification: The NSW Anti-Discrimination Act, and The University of New South Wales Act; and The Federal Disability Discrimination Act, Racial Discrimination Act, Sex Discrimination Act and Workplace Relations Act.

Note (i): University College at the Australian Defence Force Academy in the ACT is subject also to the ACT Discrimination Act. Staff working at, or visiting, University College need to be aware of the following grounds of unlawful discrimination in addition to those listed above:
• bisexuality;
• breastfeeding;
• membership or non-membership of an association or organisation of employers or employees;
• profession, trade, occupation or calling; and
• association (whether as a relative or otherwise) with a person identified by reference to one of the above attributes. Note (ii): Under the Federal Disability Discrimination Act and the Australian Government. The grounds do not apply where the discrimination is necessary because of the inherent requirements of a particular job. The only avenue of redress for a complaint under this Act is conciliation.

For staff, in compliance with Part IXA of the Work Relations Act, and the grounds do not apply where the discrimination is necessary because of the inherent requirements of a particular job. The only avenue of redress for a complaint under this Act is conciliation.

You are welcome to contact the Unit at any time to talk confidentially about any issues relating to equity and diversity in your study. The Equity and Diversity Unit is located at Level 9, Applied Science Building, telephone (02) 9385 4734, email equity-diversity@unsw.edu.au.

UNSW provides services to assist the successful completion of studies by students from equity groups through such means as:
• the Aboriginal Education Program;
• Disability Services Program (via the Equity and Diversity Unit);
• The Equity and Diversity Unit;
• The Learning Centre; and
• The Counselling Service.

Program Content, Curriculum Design, Teaching and Assessment, and Printed Material

Schools and faculties will monitor program and course content (including titles), teaching methods, assessment procedures, written material (including study guides, Handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

UNSW's Occupational Health and Safety Policy requires each person to work safely and responsibly, in order to avoid personal injury and to protect the safety of others. This requirement is particularly pertinent for both undergraduate and postgraduate students undertaking arts and science-based projects because of the experimental and research nature of work carried out in laboratories and workshops.

OHS Guidelines

• Students should discuss the safety implications of any project or experiment that they are planning with their supervisor or demonstrator and complete risk assessments before commencing the work. Be aware of recommendations for the safe use, transport, storage, and disposal of the materials being used. Students should have access to, and read thoroughly, the Material Safety Data Sheets for any chemicals they may use and operating instructions for plant and equipment. Special requirements and training apply to students undertaking work with radioactive substances, ionising radiation apparatus, lasers or genetically manipulated organisms. Students need to read the AS/NZS 2243 series on Safety in Laboratories and comply with their requirements. Students performing high risk activities as defined by Appendix D of AS 2243.1 should not work alone. Additional requirements may apply to students working with animals, microorganisms and or human tissue particularly concerning immunisations prior to hospital placements or laboratory work.

• OHS Policy guidelines are available on the Risk Management Unit website: www.riskman.unsw.edu.au

• Students need to be aware of the OHS Policy guidelines that relate to their area of study including policies on OHS accountability, hazardous substances, bio-safety, carcinogens gene technology, fieldwork, plant safety and radiation safety.
**Student Services and Resources**

**The University Library**
The Library offers resources and services to assist UNSW students and staff with their research and study. Many of these resources and services are available 24 hours a day via the Library homepage: [http://www.info.library.edu.au](http://www.info.library.edu.au).

Situated within the Library you will find computers and printing facilities, photocopying, books, and journals. An interlibrary loans service is available for postgraduate students and staff.

The collections within the Library are divided into disciplines, Social Sciences and Humanities (enquiries, Library Level 3); Physical Sciences (enquiries, Library Level 7); Law (enquiries, Library Level 8); Biomedical Sciences (Mathews Annex, enquiries ground floor); and Fine Arts (COFA Library, Paddington).

The Library is able to assist you with information literacy resources and programs. For students, this means classes and online tutorials demonstrating how to locate information for your assignments; see ‘skills classes’ on the Library homepage. For staff, this means resources and assistance that will help you integrate information literacy into your courses. Additional information is available from library staff in your discipline area.

Free IT help and training for students and staff, is located in the main Library on the Library Lawn entry level. There are drop-in assistance, classes, and online tutorials aimed at helping you develop your computer skills. See the ICT Assist web site [http://www.ict.unsw.edu.au/](http://www.ict.unsw.edu.au/).

Library opening hours vary during the academic year. See ‘opening hours’ on the Library homepage.

Other library facilities providing services to the students and staff of particular faculties, are located at: Water Research Laboratory, Manly Vale, the Australian Graduate School of Management (AGSM), Kensington and the Australian Defence Force Academy (ADFA), Canberra [http://www.lib.adfa.edu.au/webvoy.htm](http://www.lib.adfa.edu.au/webvoy.htm).

**The Learning Centre**
The Learning Centre provides a wide range of academic support services to students enrolled at the University. Assistance is available through workshops in academic skills, individual consultations and academic English programs. All programs are free and individual consultations are confidential. Dates and times of workshops are available at the Learning Centre and on the website.

Academic Skills Workshops assist students to adjust to academic culture. Workshop topics include time management, reading and note taking, essay and report writing, critical thinking, seminar presentations and using PowerPoint for presentations.

Academic English Workshops assist students for whom English is a second language and topics include grammar, academic English vocabulary, pronunciation, listening skills and academic writing.

Students can also make an appointment with a Writing Assistant to help improve their academic writing and will be given feedback on what they have written.

The Learning Centre produces a number of handouts on topics such as academic referencing; writing an essay; writing a report; doing a seminar presentation; avoiding plagiarism and studying for exams.

The Independent Learning Centre is a self-access resource for students. It has a well-stocked library with study skills and language and communication materials; dictionaries; audio and videotapes and computer-based learning resources.

The Learning Centre is located on Level 2, Library Tower, telephone (02) 9385 3890, website [www.lc.unsw.edu.au](http://www.lc.unsw.edu.au).

The Independent Learning Centre is located at Hut G23, Upper Campus, telephone (02) 9385 2060, website [www.lc.unsw.edu.au/IlC.html](http://www.lc.unsw.edu.au/IlC.html).

**University Counselling Service and Compas Programs**
The Counselling Service, Compass Programs, provides personal development resources, enhancement programs and confidential counselling to enrolled students of UNSW. Students are encouraged to access the Counselling Service in relation to any issue that might adversely affect their personal and academic progress. The service

---

**Special Government Policies**

The NSW Health Department and the NSW Department of Education and Training have special requirements and policies of which students of health-related and education programs should be aware. The requirements relate to:

- clinical/internship placements which must be undertaken as part of your program; and
- procedures for employment after you have completed the program.

**Health-related programs**

**Criminal record checks**

The NSW Department of Health has a policy to carry out criminal record checks on all students undertaking clinical placements or who require access in any capacity to facilities operated by the Department. (This includes all the Teaching Hospitals used by UNSW in its Medicine program.) It undertakes these checks, as it has a duty of care to all patients and clients receiving services from the Department. The check is conducted by the NSW Police Service and is coordinated by the Department of Health and the University. Further details can be obtained from your program authority.

**Infectious diseases**

Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health relating to immunisation, infection and blood-borne viruses. Further details can be obtained from your program authority.

**Education programs**

**Criminal record checks**

It is a requirement that a check of police records be conducted for all teachers education students applying for an unsupervised internship placement in a NSW government school. Contact your program coordinator for further details.

**Working with children**

Under the Commission for Children and Young People Act 1998 and the Child Protection (Prohibited Employment) Act 1998, students who as part of their enrolment are required to work with children must declare whether they are a ‘prohibited person’, that is they have been convicted of a serious sex offence. It is an offence for a ‘prohibited person’ to work with children.

---

**NSW Health Department**

- The NSW Department of Health has a policy to carry out criminal record checks on all students undertaking clinical placements or who require access in any capacity to facilities operated by the Department.
- Students are required to work with children must declare whether they are a ‘prohibited person’, that is they have been convicted of a serious sex offence.
- It is an offence for a ‘prohibited person’ to work with children.

---

**Special Government Policies**

- The NSW Health Department and the NSW Department of Education and Training have special requirements and policies of which students of health-related and education programs should be aware. The requirements relate to:
  - clinical/internship placements which must be undertaken as part of your program; and
  - procedures for employment after you have completed the program.

---

**Health-related programs**

- **Criminal record checks**
  - The NSW Department of Health has a policy to carry out criminal record checks on all students undertaking clinical placements or who require access in any capacity to facilities operated by the Department. (This includes all the Teaching Hospitals used by UNSW in its Medicine program.) It undertakes these checks, as it has a duty of care to all patients and clients receiving services from the Department. The check is conducted by the NSW Police Service and is coordinated by the Department of Health and the University. Further details can be obtained from your program authority.
  - **Infectious diseases**
    - Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health relating to immunisation, infection and blood-borne viruses. Further details can be obtained from your program authority.

---

**Education programs**

- **Criminal record checks**
  - It is a requirement that a check of police records be conducted for all teachers education students applying for an unsupervised internship placement in a NSW government school. Contact your program coordinator for further details.
  - **Working with children**
    - Under the Commission for Children and Young People Act 1998 and the Child Protection (Prohibited Employment) Act 1998, students who as part of their enrolment are required to work with children must declare whether they are a ‘prohibited person’, that is they have been convicted of a serious sex offence. It is an offence for a ‘prohibited person’ to work with children.
employs psychologists who are able to assist students with concerns such as: transition and adjustment to university life and academic expectations; support with sorting out academic or administrative issues; motivation and other difficulties which affect study; interpersonal problems or relationship conflicts; and personal concerns such as stress, anxiety, depression or loneliness. Students can access the service via the “Drop In” option (no appointment necessary) available from 11am (sign up at 10.45am) each day or make an appointment in advance.

The Counselling Service’s website contains an introduction to the service and useful resources for students and staff: www.counselling.unsw.edu.au

Appointments on the Kensington campus are available between 9am and 5pm. The Counselling Service is located on the 2nd Floor, East Wing Quadrangle Building. Appointments can be made by visiting the service or telephoning (02) 9385 5418. Telephone counselling appointments before/after hours appointments can be negotiated.

Careers and Employment

Careers and Employment offers the following services:

- Careers and Employment Online for job vacancies (graduate, vacation and part-time), employment related information (including sample resumes, cover letters, interview and job search tips) and information on all Careers and Employment activities;
- International Employment Program;
- Workshops including job search, career planning, resume writing, and interview skills. These can be tailored to meet specific faculty needs (see website for schedule);
- Guest Presenter Workshops in which representatives from organisations speak about graduate employment issues;
- Individual assistance for resume checking and help with career management issues;
- Career guidance programs;
- Fortnightly e-list of job vacancies;
- Careers library with resources on career development;
- Computer access for careers research;
- Direct mail and email service for employers to forward information on opportunities to students;
- Careers Expo (March) where final year students can meet employers;
- Graduate Careers Forum for Arts and Social Sciences, College of Fine Arts and Science students August).

Contact Careers and Employment, Level 2, East Wing, Quadrangle Building. Opening hours Monday to Friday 9am-5pm. Telephone (02) 9385 5429, fax (02) 9385 6145, email careers@unsw.edu.au, website www.careers.unsw.edu.au.

Disability Services

Students with disabilities who require any services should contact Laurie Alsop, Equity Officer (Disability), at the Equity and Diversity Unit on telephone (02) 9385 4770, email lalsop@unsw.edu.au, location Level 9 Applied Science Building.

Services include the provision of notetakers, readers, sign-interpreters, examination provisions, assistive technology, texts in alternative formats, liaison with academic staff, an electronic mailing list, and access to the Disability Resource Centre.

Whenever possible, students requiring services should contact Laurie Alsop prior to the commencement of classes, to facilitate the organisation of those services. More information can be found at: http://www.equity.unsw.edu.au/disabil.html

Services for ACCESS Students

Students who enrolled via the ACCESS entry scheme can receive support and referral from the Equity Officer (ACCESS), at the Equity and Diversity Unit on telephone (02) 9385 5434, email equity-diversity@unsw.edu.au, location Level 9 Applied Science Building. More information can be found at: http://www.equity.unsw.edu.au/help.html#infstud.

Introduction

Why General Education?
Since its foundation, the University of New South Wales has been committed to the provision of a General Education Program for its undergraduate students. The University believes that a general education complements the more specialised learning undertaken in a student’s chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they highly value graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. In addition, over many years graduates of this University have reported that they greatly valued their general education studies, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden and deepen students’ understanding of the environment in which they live and work and to enhance their skills of critical analysis. Above all, the program presents students with interesting, challenging and enjoyable opportunities to pursue their own intellectual curiosity.

Objectives

Objectives of the General Education Program
The following objectives were approved by the Council of the University in December 1994.
1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.
2. To enable students to evaluate arguments and information.
3. To empower students to systematically challenge received traditions of knowledge, beliefs and values.
4. To enable students to acquire skills and competencies, including appropriate written and spoken communication skills.
5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.
6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.
7. To provide structured opportunities for students from disparate disciplines to interact cooperatively within a learning situation.
8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist courses offered in those other areas.
9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross and interdisciplinary connections, and cross-cultural contexts.
10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education Requirements
The University’s basic requirements are the same for students in all single degree programs. Students must:
   (a) satisfactorily complete a minimum of 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption – see below). Combined undergraduate degrees offered with another faculty and leading to the award of two degrees satisfy the first requirement (12 units of credit in General Education) within the program.
   (b) undertake additionally 56 hours of study which examines the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. The extent to which individual programs meet this requirement varies from program to program. In the Faculty of Arts and Social Sciences, for example, this requirement is satisfied in the BA degree through an ARTS3000 course. In some other degrees of the Faculty of Arts, it is distributed throughout the program. Most programs in the Faculty of the Built Environment fulfil the latter requirement as part of the normal program curriculum. However, in the case of both the BBCM and BSc(Arch) programs, students are required to take BENV1382, Social Responsibility and Professional Ethics.

Restrictions and students’ choices
In order to ensure that students have the maximum amount of choice possible in the courses that can be taken to fulfil the General Education requirement, all programs have agreed to allow students to select either:
   • courses that were developed especially for the General Education Program (these courses are listed at the back of this Handbook and have a course identifier that begins GEN-);
   • a limited number of ‘mainstream’ courses that are offered in the degree programs of other faculties.
However, certain restrictions apply to students’ choices:
Students may undertake a maximum of three units of credit from approved General Education courses within the faculty which is the program authority for the program in which that student is enrolled. Further General Education courses may be drawn from any other faculties with a maximum of six units of credit to be drawn from any one faculty, other than the faculty that has the authority for the program in which the student is enrolled.

* The Faculty of Commerce and Economics has not approved GE courses offered by FCE to be available to students enrolled in FCE degree programs.

The following rules will apply:
   (a) Where students have been granted advanced standing in any program, any remaining General Education requirements in those programs must be met from courses offered in a faculty other than the faculty which is the program authority for the program in which the student is enrolled.
   (b) In programs that have a partial exemption from General Education, the remaining General Education courses must be taken in faculties other than the faculty that is the program authority for the program in which the student is enrolled.
Faculties must identify any of their mainstream courses which overlap substantially with the General Education courses offered within that faculty and must stipulate that students who have completed or are completing these mainstream overlapping courses are excluded from enrollment in the related General Education course. Additionally:

- the program requirements for each faculty which relate to the undergraduate degree programs offered by that faculty, may in some cases limit the number or type of ‘mainstream’ courses a student may include in the total number of courses necessary to complete their General Education requirement (in any case ‘mainstream’ courses may substitute for a maximum of 50% of the General Education requirement for a course), and
- students’ first choices cannot be guaranteed, as students in later program stages will be given preference over those in earlier stages; quotas may be set for different faculties and courses. Courses with insufficient enrolments will be cancelled by 31 January (for Session 1 courses) and 27 June (for Session 2 courses). Staff leave means that not all courses are necessarily offered each session or year.

Students who commenced their programs prior to 1996

These students were governed by the pre-1996 GE rules. The general principle that will be applied is that no such student is to be disadvantaged by the change. This principle is interpreted by the faculty as follows:

- Such students must satisfy the rules which applied in 1995 regarding the number of units of credit of General Education to be undertaken.
- Previously, these requirements had to be split between General Education ‘Categories’ in prescribed ways. This is no longer the case, and such students will be permitted to choose any General Education courses for which they possess the prerequisites and from which they are not excluded. Courses taken prior to 1996 will be aggregated with those taken subsequently, with hours converted to units of credit at the rate of 28 hours = 3 units of credit.

Exemption from Part or All of the General Education Program

There will be no general exemptions for students enrolled in single degree programs.

Students enrolling in combined programs

As a general rule, students enrolled in combined undergraduate programs leading to the award of two degrees, each in a different faculty, meet their General Education requirements.

Variation to the General Education requirement in some combined programs may have been approved. Students enrolled in combined programs should check their General Education requirements with their faculty or program office.

Special student exemptions

Students transferring from one faculty to another at UNSW, or from another higher education/tertiary institution, who believe that their prior learning and/or qualification satisfies the University’s General Education objectives are eligible to seek exemption from all, or part of the UNSW General Education requirements (4 courses or 12 units of credit). Applicants for exemption must supply full written justification for their request, plus appropriate documentation, showing how they have satisfied the GE objectives (see above). Applications will be considered on a case-by-case basis by the faculty, which will make a determination and notify the student accordingly. The faculty’s yardsticks will be:

- the extent to which the courses nominated for exemption satisfy sufficient GE objectives (i.e. cooperative interaction with students in other disciplines, most importantly: skills/competencies complementary to the major discipline area; social and ethical responsibility and development; empowerment to challenge traditional knowledge/paradigms);
- the extent to which the previous program is different in paradigm and content to that in which the student is presently enrolled;
- the length of previous study undertaken, where, in principle, 1 year might qualify for exemption from one GE course (3 units of credit), 2 years for 6 UOC, 3 years for 9 UOC and 4 years for 12 UOC.

In all cases, the onus is on the student to present a written justification.

Note: Life experience and/or mature age entry are not grounds for exemption.

Practical experience/industry placement is not grounds for exemption.

Substitution

Students may apply to their faculty for approval to substitute any course(s) from other faculties for General Education courses up to a total maximum of 6 units of credit (or 50%) of General Education. Substitution requests must be submitted in writing and approved prior to enrolment and state how the proposed courses will satisfy the GE objectives in their program, together with the remainder of the student’s GE program. The faculty will approve the request if satisfied that the substitution(s) will indeed allow this to occur.

Students may substitute the study of Language Other Than English (IOTE) within their General Education program. English (and other languages) as offered by the Institute of Languages or Learning Centre are excluded. Only languages offered by academic units are acceptable; a maximum of 50% of General Education can be substituted with language courses.

- Irrespective of the amount of units of credit associated with a mainstream course, students can only count 6 UOC towards the General Education requirement.
- Students should ensure that the substitute course has a seminar component. It is unlikely that the Faculty will accept it otherwise.

Co-requisites and exclusions

The Committee on Education will determine co-requisites and exclusions as and when necessary.

Faculty General Education Requirements

Each faculty has the responsibility for deciding what courses are not able to be counted towards the General Education requirement for their students. This may mean that courses offered by the faculty in which a student is enrolled, or courses which are a required part of a program even though offered by another faculty, are not able to be counted toward the General Education requirement.

Information concerning the substitution of other university courses or exemption from some General Education courses on the basis of previous formal study at tertiary level is available from the faculty or program office.

Student Involvement in the General Education Program

An important feature of the General Education Program is that student representation on committees that make decisions about General Education is assured. There are two student members on the Academic Board’s Committee on Education. All General Education courses are required to be regularly evaluated by students and the results of the evaluations made known to the members of all faculties whose students are taking those courses.

Administrative Arrangements

The enrolment process

Students enrol in General Education courses through myUNSW (http://my.unsw.edu.au) the web interface to the University’s student information system, in the same way that they enrol in other courses.

Before nominating the General Education courses they wish to take, students should ensure that they are familiar with:

- the relevant faculty and program policy and procedures for General Education including approval requirements, as set out in this Handbook and additional faculty program policy and enrolment information.
- the General Education course timetable, which includes lecture and tutorial times and the campus on which the course is taught.
- how many General Education courses (or General Education units of credit) they have completed, and how many they are still required to complete.
- their own timetable for 2005, including times which they have available to take General Education courses.
- where a course is offered in more than one class (that is, the course is streamed and students must register for a particular stream), students must ensure that they enrol into the correct class using myUNSW.
Students will be able to vary their enrolment in General Education courses, subject to places in other courses being available. Course enrolment variations will be conducted through myUNSW.

Students who are unable to enrol through myUNSW should contact their faculty or program office regarding alternative enrolment arrangements.

**Quotas and preferences**

General Education courses may have enrolment quotas set for both overall course enrolments and for each faculty. Although these quotas are flexible, students may be unable to enrol in a particular course because it is already full. In these cases, students may attempt to enrol in the class at a later time, as places may become available.

To increase the chances of enrolment in first preference courses, the University will generally try to allocate enrolment appointment times to students who have progressed furthest in their degree program, before students in earlier stages of their program. This means that if a student misses out on admission to a course in one year, they are more likely to be successful in subsequent years, as they gain more senior status in their program.

**Alternative mode courses**

Most General Education courses (with GEN prefix) will be offered in the format of one lecture and one tutorial per week. However, in developing courses for the General Education program a number of faculties have put forward courses that can be completed in a more intensive mode – either over a summer session, or in some other non-standard arrangement. Some approved courses will be offered in an open learning or distance learning format, supported by electronic delivery techniques. It is hoped that the choice of delivery mode will increase in response to student preferences and the course evaluation process.

**Campus at which courses are taught**

General Education courses are taught at Kensington as well as the Paddington (Faculty of the College of Fine Arts) campus. Students may enrol in courses offered on either campus provided the courses have been approved as part of their General Education requirement.

Separate arrangements are in place for students of the Australian Defence Force Academy and of the Australian Taxation Studies Program. Students in these programs should consult their faculty for information on courses and venues.

**Units of Credit, Fees & Charges and General Education**

The University’s academic structure is based on ‘units of credit’. A fulltime enrolment for one year is defined as 48 units of credit (24 per session). A course will have the same unit of credit value and generate the same load for Student Contribution rates and fees irrespective of the program or stage in which it is taken. All courses are measured in whole units of credit. The normal workload expectations are 25–30 hours per session for each unit of credit, including class contact hours, preparation and time spent on all assessable work.

Every course in the University has a unit of credit value, with program requirements defined, in part, in terms of the completion of a specified number of units of credit. The most important thing to remember about units of credit and General Education is that, because the General Education Program is an integral component of each undergraduate degree program at UNSW, units of credit earned for General Education are not additional to program requirements, but rather are a required part of each program. For the same reason, students do not pay extra for undertaking General Education courses.

Student Contribution rates and tuition fees are based on the student’s total study load, taking into account the discipline grouping of the unit of study. Student load is calculated on the sum of the units of credit of all courses undertaken (including General Education courses) as a proportion of the specific full-time total (48 units of credit) for the particular stage of the program.

All General Education courses form part of the discipline group which includes Arts, Humanities, Social Studies/Behavioural Science, Visual/Performing Arts and Education and which attracts the lowest level of charges.

Where approval is given to undertake mainstream courses instead of General Education courses, these courses will be charged according to the discipline grouping of the unit of study.

**The Heinz Harant Challenge Prize**

A prize of $1,000, awarded twice yearly, has been established especially for work done by students in the UNSW General Education Program.

The prize commemorates one of the University’s earliest alumni and most devoted supporters, the late Heinz Harant. It is called ‘The Heinz Harant Challenge Prize’ because challenging orthodoxy was the driving spirit of Heinz Harant’s life and the prize attempts to recognise this belief.

The prize recognises challenging and original thinking in work submitted for assessment in a General Education course. Academics in charge of General Education courses will be asked to select items of work of high standard and which they judge to be in keeping with the spirit of this prize.

Students may also submit their own work of high standard if they feel that it meets the spirit of the prize. Entry forms are available from NewSouth Q and work must be submitted within one month of the close of the session in which the course is offered. At the end of Session 1 for courses completed in Session 1 or the Summer Session, and again at the end of Session 2 for courses completed in Session 2, a small number of items are selected for submission to a judging panel, subject to the author’s consent.
General Education Courses

Descriptions of courses offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at [www.handbook.unsw.edu.au](http://www.handbook.unsw.edu.au).

A warm welcome to the Faculty of Arts and Social Sciences at the University of New South Wales. I am sure you will find your studies with us exciting, challenging and rewarding.

The Faculty has 320 staff and 3893 undergraduate students. Over recent years competition to enter the Faculty’s programs has become very vigorous, as our distinctive profile and provision of excellent teaching and learning experiences become more widely recognised. Our staff are highly qualified and experienced researchers as well as being dedicated teachers. The benefits to students which flow from the combination of research with teaching are widely recognised in the world’s top universities.

Employers in today’s world increasingly value the skills gained by students who have studied in the Arts and Social Sciences fields. These include the ability to write accurately and concisely, to express and critique a point of view, to analyse thoroughly and objectively, and to speak in public readily and with confidence. No matter what specific areas of interest our students follow, they will graduate with a high level of skill and experience in using computers, databases and research tools, the ability to document sources carefully, to manage time, and work in cross-cultural contexts. Many will have studied one or more languages in addition to their mother tongue, and in some areas of study they will have obtained high level skills in research design and statistical analysis.

Degrees can be tailored to meet students’ own aims and goals, by combining different disciplines and areas of specialised study. Graduates are highly valued in many occupations: in commerce and business, policy studies, governmental organisations, international bodies, the diplomatic service, corporate affairs and human resources, and will be found also in vocations and occupations such as education and social work, public health and community service, advertising, media and public relations. Many of our graduates are now renowned writers and film-makers, not to mention our distinguished History graduate, the current premier of NSW, Mr Bob Carr.

We encourage all our students who are qualified to do so to undertake a fourth year Honours program. This enhances the skill-base by permitting a student to undertake a sustained and significant piece of research under the supervision of a staff member. Employers are particularly impressed by a good Honours degree.

The Faculty fosters friendly and co-operative relations between staff and students. Advice can readily be obtained from the Faculty office, thence for more specialised assistance from your lecturers and tutors, and other administrative staff. You can also undertake a period of internship for credit, which will be arranged by our Internship Officer, and periods of international exchange are available for all students, usually in the second year, where you can be located for one semester’s study in a highly recognised university in a country of your choice. All arrangements for exchanges are managed by the University. Many other unique opportunities are open for students in the Faculty. I believe your period of study here will be highly rewarding both personally and professionally and welcome you as one of our most important assets, our fine students.

Annette Hamilton
Dean
Arts and Social Sciences
Some People Who Can Help You

This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Arts and Social Sciences.

Enquiries about degree requirements, enrolment, progression within programs, program transfers or any other general Faculty matters should be made to the staff in the Faculty of Arts and Social Sciences Office, G1, Morven Brown Building, Telephone: (02) 9385 2289, Fax: (02) 9385 1492, Email: artsunsw@unsw.edu.au. Advanced standing, exemption and leave forms are available from the Office. The Office is normally open for enquiries from 9.00 am – 12.30 pm and 1.30 pm – 4.30 pm Monday to Friday.

Enquiries about course content and class locations should be directed to School offices.

Faculty of Arts and Social Sciences Website

The Faculty of Arts and Social Sciences maintains its own web server at www.arts.unsw.edu.au which provides information to prospective students as well as timetable and course information for current students.

Course Descriptions

Descriptions of courses offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Advanced Standing

Students admitted with advanced standing are given credit towards the degree for all appropriate courses up to a maximum of two thirds of the total units of credit required for each degree. Specified credit will be given for courses closely related to courses offered within our degree programs; unspecified credit may be given for other “Arts-type” courses, if they are of appropriate standard and range.

ARTS2000 Faculty Internship

ARTS2000 offers selected second and third year Arts and Social Sciences students an internship experience in a range of organisations outside UNSW. This practical work-place experience is accompanied by a reading program. The reading component examines different approaches to the study of organisations, their structures, functions and policies, and links these issues to the internship experience. The internship component provides work experience in a host organisation for a minimum of one day a week throughout one session or an equivalent block of time. The internship may be undertaken at any time during the year but is subject to the availability of a suitable host organisation. The course may be included as part of a major sequence with the prior permission of the relevant Head of School. For more information, contact Zarni Jaugietis, telephone (02) 9385 1443, email zarni@unsw.edu.au
ARTS3000 Courses

Objective 5 of the University's General Education program requires all faculties “to ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.” In some programs administered by the Faculty of Arts and Social Sciences this objective is met entirely by the content of compulsory core courses, while in others it is met partly by the structure of the degree and partly by ARTS3000 level courses specifically designed for this purpose.

Degrees in which at least one ARTS3000 course must be included are the Bachelor of Arts and the Bachelor of International Studies. Bachelor of Music and Bachelor of Music/Bachelor of Arts students must complete either an ARTS3000 course or MUSC3101. ARTS3000 courses are also available as elective courses for students in other degrees. These courses should normally be taken in a student’s third year of study.

Faculty Computing Facilities

The Faculty of Arts and Social Sciences provides general purpose Macintosh computer laboratories in the Morven Brown and Mathews buildings. Special purpose laboratories are located in the Robert Webster Building. Self-access to the general purpose laboratories is available 24 hours 7 days per week. Printing charges apply. Access to email and the Internet is available. Further information can be obtained from the Technical Resources Centre, Room 105, Morven Brown Building. Room G69 in the Morven Brown Building is available to students in the Faculty for re-enrolment purposes.

Faculty Timetable

The Faculty Timetable is published in a separate booklet and will be distributed to new students on final enrolment. Students are able to access the information on the web at www.arts.unsw.edu.au in November. Students in Years 2, 3 and 4 are reminded that alterations to the published timetable are occasionally made before the beginning of session. A check should be made with the appropriate school/department in late February for times of Upper Level courses.

General Education Requirements

Where a General Education requirement is prescribed, students must complete the equivalent of 12 units of credit from the University's General Education program. Arts and Social Science students should choose their courses in accordance with the requirements set out in the General Education section of this Handbook. No more than three units of credit can be chosen from courses with a GENT prefix.

Information concerning the substitution of other university courses or exemptions from some General Education courses on the basis of previous study is available from the Faculty Office.

Re-enrolment Procedures

All students of the Faculty will be expected to re-enrol via the web in 2005, apart from those who intend to enrol in an Honours program in 2005. Honours pre-enrolment forms will be available from school offices in December and will need to be returned to the Faculty Office by the second last week of December. Failure to re-enrol a week before the beginning of session may incur a late fee.

Societies and Clubs

For information about societies and clubs in the Faculty of Arts and Social Sciences, refer to the web at www.arts.unsw.edu.au/about/societies.shtml or contact the individual schools/departments.

Faculty Rules

Standard enrolment

1. (a) In any year of study, students must enrol in a minimum of 24 units of credit, unless they require less than that number to complete the requirements for the degree. (b) In their first year of study, full-time students will normally complete 48 units of credit; in subsequent semesters, they will normally complete 24 units, but may be permitted to enrol in an additional 6 units.

Prerequisite and corequisite requirements

2. A student enrolling in a course must satisfy the prerequisite and corequisite requirements for that course.

Progression

3. In order to obtain units of credit for a course, a student must in that course:
   (a) satisfy attendance requirements
   (b) complete satisfactorily any assignments prescribed
   (c) pass any prescribed examination.

4. Students are not permitted to enrol in Upper Level courses until they have completed at least 36 Level 1 units of credit.

5. Students who fail to complete at least 24 units of credit in any year may be required to 'show cause' as to why they should be permitted to proceed with their studies.

6. Students whose progress is satisfactory may apply for leave of absence from their studies for no more than two semesters.

Concurrent study

7. No student may enrol in any course to be counted towards degrees offered by the Faculty of Arts and Social Sciences at the same time as he/she is enrolled in any other degree or diploma program, except in the case of approved concurrent programs.

Study at another university

8. With the prior approval of Faculty, up to 48 units may be completed at another university, unless equivalent courses are available at the University of New South Wales. Faculty will not approve courses offered by external study.

9. Students must have completed at least 48 units of credit in courses offered by the Faculty before a period of study overseas will be approved.

Advanced standing

10. Students seeking advanced standing must submit documentary evidence of courses completed elsewhere and specify the courses they wish to complete within the Faculty. Faculty will then determine the number of units of credit to be granted. Advanced standing will not be granted for courses completed more than 10 years previously.

Transfers

11. (a) The Faculty will grant the maximum credit possible to facilitate a student’s transfer from one degree to another. The credit will vary depending on the degrees concerned. (b) A student enrolled in the combined Arts/Law program who does not wish to proceed to the combined degree BA LLB may apply to transfer to the BA degree with credit for all courses completed in the program.

Special admission to Honours

12. Students who have been awarded a degree at Pass level from the University of New South Wales or a comparable degree from another university may be admitted by Faculty to candidature for the award of a honours degree if they have satisfied the prerequisites for entry to the Honours level program or completed an equivalent program of study. Permission will not be granted if more than three years have elapsed since the completion of the Pass degree.

Modification of requirements

13. Faculty may modify the requirements of any of these rules in special circumstances.

ARTS AND SOCIAL SCIENCES 51
How to Structure your Program

1. 3400 Bachelor of Arts Program

The basic requirements for the degree are:

1. a total of 144 units of credit. Each course offered by the Faculty has a unit of credit rating, depending on the number of hours taught and the type of course.

2. 48 units of credit obtained in Level 1 courses i.e. courses designed for students in their first year of study. Of these, no more than 12 can be in any one school or department. 24 units of credit must be obtained from courses offered specifically by the Faculty.

---

**BA – Sample Program – Example Only**

**YEAR ONE – 48 units of credit**

<table>

<td></td>
</tr>
</tbody>
</table>

**Total required for BA – 144 units of credit**

Major Sequence, 42 units of credit

Second Major Sequence, 42 units of credit
3. A major sequence (List A) in one of the following:

- AUST: Australian Studies
- CHIN: Chinese Studies
- COMD: Development Studies
- EDST: Education
- ENGL: English
- ENV: Environmental Studies
- EURO: European Studies
- FILM/PFST/THFI/THST: Media, Film and Theatre
- FREN: French
- GERS: German Studies
- GREK: Greek, Modern
- HIST: History
- HPSC: History and Philosophy of Science
- INDO: Indonesian Studies
- JAPN: Japanese Studies
- KORE: Korean Studies
- LING: Linguistics
- MUSC: Music
- PECO: Political Economy
- PHIL: Philosophy
- POLS: Politics and International Relations
- RUS: Russian Studies
- SLSP: Policy Studies
- SOCA: Sociology and Anthropology
- SPAN: Spanish and Latin American Studies
- WOMS: Women’s and Gender Studies

A major sequence is an approved progression of courses in a school, department or program: you will find details under the relevant entry.

4. At least 66 units of credit must be gained in courses offered by schools, departments or programs within the Faculty.

5. At least 66 units of credit gained in schools, departments or programs outside the school/department in which you are majoring, so that your program does not become too one-sided.

7. During their second and third years of study, students are also required to complete 12 units of credit from the University’s General Education program.

8. 6 units of credit in an Upper Level ARTS course detailed in the Handbook.

**How to Choose Your First Year Program**

You should include the first year requirements for at least two major sequences in schools or departments within the Faculty of Arts and Social Sciences, as you must complete at least one to qualify for the degree.

Find the courses you need from the corresponding entries in Course Descriptions: this will normally account for 24 units of credit of your first year program. In deciding what other courses to enrol in, you should consider which courses best complement the ones you have chosen. These may not necessarily be ‘close relations’; for instance, a foreign language may be extremely useful for a history major, and vice versa. Unless you are a part-time student, you should enrol in courses carrying 48 units of credit.

**Upper Level and Honours Entry**

In structuring your program for second and third year Upper Level, it is essential that you fulfill the requirements for a major sequence in the school(s) or department(s) in which you are specialising. If you have any doubts about them, make sure you consult a member of staff before enrolling in second year. Students should try to complement their majors with courses which provide them with skills and perspectives which will contribute to a broader and more critical approach to their special areas of interest. Major sequences offered by programs such as AUST Australian Studies are designed to provide this kind of context. They offer an interdisciplinary alternative to a school-based major, or simply a way of giving more coherence to your other courses. Comparisons and connections are often the best way of bringing the particular problems of an area of study into clearer focus. Members of staff may be able to recommend particular courses in other schools, which will help students in the direction they wish to take.

**Total required for BA (Media and Communications) – 144 units of credit**
While it is desirable that all Upper Level students seek advice on their program from their home school, it is essential for intending Honours students. Students wanting to proceed to fourth year Honours Level in one or two schools/programs, should work out a program which fulfills the requirements for Honours Level entry with the Head of School or program Coordinator concerned as early as possible in second year; with Combined Honours (Honours in two schools/programs). This can avoid many later problems such as missing prerequisites. Details of requirements for Honours entry can be found under the relevant entries.

2. 3402 Bachelor of Arts (Media and Communications) Program

The basic requirements for the degree are:
1. a total of 144 units of credit. Each course offered within the degree has a unit of credit rating, depending on the number of hours taught and the type of course.
2. 48 units of credit in the Media and Communications (MDCM) core program:
   - First Year
     - MDCM1000
     - MDCM1001
   - Second Year
     - MDCM2000
     - MDCM2002
     - MDCM2003
   - Third Year
     - MDCM3000
     - MDCM3002
     - MDCM3003
3. 2 MDCM electives (12 Upper Level units of credit).
4. 1 elective (6 Upper Level units of credit) from the offerings of the Faculty of Arts and Social Sciences.
5. a major sequence (List A) in one of the following:
   - AUST Australian Studies
   - CHIN Chinese Studies
   - COMD Development Studies
   - EDST Education
   - ENGL English
   - EURO European Studies
   - FILM/PFST/THFI/THST Media, Film and Theatre
   - FREN French
   - GERS German Studies
   - GREK Greek, Modern History
   - HPSC History and Philosophy of Science
   - INDO Indonesian Studies
   - JAPN Japanese Studies
   - KORE Korean Studies
   - LING Linguistics
   - MUSC Music
   - PECO Political Economy
   - PHIL Philosophy
   - POLS Politics and International Relations
   - RUSM Russian Studies
   - SLSM Policy Studies
   - SOCA Sociology and Anthropology
   - SPAN Spanish and Latin American Studies
   - WOMS Women's and Gender Studies
6. 48 units of credit obtained in Level 1 (first year) courses, including MDCM1000 and MDCM1001, and any first year courses in your major sequence. No more than 12 units of credit can be obtained in first year courses from any one school, department, unit or program.
7. during their second and third years of study, students are also required to complete courses from the University’s General Education program carrying the equivalent of 12 units of credit.

How to Choose Your First Year Program

Enrol in the core courses MDCM1000 and MDCM1001 (see 2. above); then choose one or more areas from 5. above in which you might like to major, and enrol in the appropriate first year (Level 1) courses. Then select additional first year courses to make up a total of 48 units of credit. 24 Level 1 units of credit must be selected from courses offered by the Faculty of Arts and Social Sciences.

Upper Level

In your second and third year, enrol in the prescribed core courses (see 2. above) and the necessary courses for your major sequence. The additional units of credit should be taken in other Upper Level courses, including two MDCM electives, and in courses from the University’s General Education program. Try to spread your workload evenly over the four sessions of study.

NB: Please refer to the previous page for the sample diagram for the Bachelor of Arts (Media and Communications) program.
3. 3408 Bachelor of Arts (Dance) Bachelor of Education Program

The School of Media, Film & Theatre offers a four year full-time double degree for intending specialist dance educators leading to the award of Bachelor of Arts (Dance) Bachelor of Education. The BA(Dance) BEd is a professional double degree which qualifies successful graduates to be recognised as high school teachers with the NSW Department of Education & Training. The double degree also serves as an ideal basis from which to enter a range of dance and dance education professions.

Entry to the BA(Dance) BEd program is by audition, satisfactory physiotherapy report and satisfactory University academic entry requirements.

To qualify for the award of the degree, students must complete courses to the value of at least 192 units of credit, including:

1. the relevant sequences in Dance Theory, Dance Practice, Dance Education and Education as prescribed by the School of Theatre, Film and Dance for the BA(Dance) BEd degree
2. at least 42 units of credit drawn from the following major sequences (List E) offered within the BA degree:
   - Chinese, Drama (Theatre), Economics/Business Studies, English, French, Geography, German, History, Indonesian, Japanese, Literacy/English as a Second Language (ESL), Spanish
3. 12 units of credit in courses approved by the Faculty in the University’s General Education program.

Second Teaching Area

The 42 units of credit drawn from the above major sequences function as the students’ second teaching area. Students are strongly advised to familiarise themselves with the NSW Department of Education & Training’s current pattern of employment prospects when choosing both their second teaching area and the elective courses within that program.

Honours Level

Students seeking admission to Dance Honours (Research) must have completed 192 units of credit as detailed above and achieved a minimum average grade of Credit in dance courses. Those intending to enrol in the Honours program must seek the permission of the Dance Program Coordinator during their second or third year of study so that an appropriate course of study can be planned.

4. 3420 Bachelor of Social Science Program

The basic requirements for the degree are:

1. a total of 144 units of credit.
2. 48 units of credit in the core courses of the BSocSc degree program*, each of which carries 6 units of credit:

   **First Year**
   - SLSP1001 Social Science and Policy S1
   - SLSP2000 Social Science and Policy Project
   - SLSP3000 Social Theory and Policy Analysis
   - SLSP4001 Applied Social Research 2
   - SLSP5002 Social Science and Policy Project

   **Second Year**
   - SLSP1000 Social Science and Policy S1
   - SLSP2001 Applied Social Research 1
   - SLSP2002 Policy Analysis Case Studies
   - SLSP3000 Social Theory and Policy Analysis
   - SLSP4001 Applied Social Research 2

   **Third Year**
   - SLSP3000 Social Theory and Policy Analysis
   - SLSP4001 Applied Social Research 2
   - SLSP5002 Social Science and Policy Project

* The Social Science and Policy core program satisfies the University’s requirement for 56 hours of study relating to the purposes and consequences of university education, professional and ethical action, and social responsibility.

3. a major sequence (List F) in one of the following:
   - AUST Australian Studies
   - COMD Development Studies
   - ECON Economics/Economic History
   - ENV Environmental Studies
   - FILM/PFST/THFI/THST Film and Theatre*
   - GEOH/GEOS Geography/Geology
   - HIST History
   - HPSH History and Philosophy of Science
   - HPSC History and Philosophy of Science

---

### Bachelor of Social Science – Sample Program

#### YEAR ONE

**48 units of credit**

| S1 | Philosophy (6) | Social Science and Policy (6) | History & Philosophy of Science (6) | Sociology (6) |
| S2 | Philosophy (6) | Research and Information Management (6) | History & Philosophy of Science (6) | Sociology (6) |

#### YEAR TWO

**48 units of credit**

| S1 | Philosophy (6) | Economy and Society (6) | History & Philosophy of Science (6) | Sociology (6) |
| S2 | General Education (3) | Policy Analysis Case Studies (6) | History & Philosophy of Science (6) | Sociology (6) |

#### YEAR THREE

**48 units of credit**

| S1 | Economic History (6) | Social Theory & Policy Analysis (6) | History & Philosophy of Science (6) |
| S2 | General Education (3) | Applied Social Research 2 (6) | History & Philosophy of Science (6) |

Total required for BSocSc Pass Degree – 144 units of credit

BSocSc Core Program, 48 units of credit

Major Sequence, 42 units of credit
The BSocSc Honours Degree may be taken in two ways:

1. Combined BSocSc/approved area Honours. This program is undertaken in cooperation with a school offering a Combined BSocSc program: you will find details under the relevant entry.

2. The BSocSc Honours program. Undergraduate students who have completed a minimum of 80 units of credit in a discipline listed in 3. above, A major sequence is an approved progression of courses in a school or program: you will find details under the relevant entry.

4. 48 units of credit gained in Level 1 (first year) courses, including the two core courses, the first year courses of your major sequence and two other electives.

5. During their second and third years of study, students are also required to complete courses from the University’s General Education program carrying the equivalent of 12 units of credit.

How to Choose Your First Year Program

Enrol in the core courses SLSP1001 and either SLSP1000 or SLSP1002 (see 2. above); then choose one area from 3. above you would like to major in, and enrol in the appropriate first year (Level 1) courses. Then select additional courses to make up a total of 48 units of credit. 24 Level 1 units of credit must be selected from courses offered by the Faculty.

Upper Level and Honours Entry

In second and third year, enrol in the prescribed core courses (see 2. above) and the necessary courses for your major sequence. The additional units of credit should be taken either in the area you chose as a possible second major or in other Upper Level courses. You must also enrol in the prescribed courses from the University’s General Education program. Try to spread your workload evenly over the four sessions of study. In addition, students who intend to apply for entry to the Honours year should enrol in SLSP3911 in the third year of study.

For entry to Honours in the BSocSc degree program, you must have demonstrated over the three years of the program that you have reached a sufficient standard, and apply to the Head of School for admission. If you wish to go on to Honours, you should ask staff in the program for advice on planning your program and defining your research interests at an early stage, perhaps during second year.

The BSocSc Honours Degree may be taken in two ways:

1. BSocSc Honours, with a Major in an approved area;
2. Combined BSocSc/approved area Honours. This program is undertaken in cooperation with a school offering a Combined Honours program.

5. 3422 Bachelor of Social Science in Criminology Program

Criminology, broadly defined as the study of crime and crime control institutions, is a multidisciplinary area involving contributions from the social and behavioural sciences, the humanities and law. The Bachelor of Social Science in Criminology combines the core program of the Bachelor of Social Science degree with specialist training in criminology. Graduates are prepared for careers in policy analysis or research in criminal justice agencies, quantitative and qualitative social research, project design and management in private, government and non-government sectors.

The basic requirements of the degree are:

1. a total of 144 units of credit.
2. 48 units of credit in the BSocSc core program* and 24 units of credit in core courses in Criminology:

4. 48 units of credit obtained in Level 1 (first year) courses, including
SLSP1000, SLSP1001, CRIM1000 and CRIM1001. No more than 12 units of
credit can be obtained in first year course from any one school,
department, unit or program.

5. 12 units of credit from the University’s General Education program,
normally during the second and third year of study.

How to Choose Your First Year Program
Enrol in the core courses CRIM1000, CRIM1001, SLSP1000 and
SLSP1001; then select additional courses to make up a total of 48 units of
credit. 24 Level 1 units of credit must be selected from courses offered
by the Faculty.

Upper Level and Honours Entry
In second and third year, enrol in the prescribed core courses (see 2.
above) and the 24 units of credit in the approved list of criminology-
related electives. The additional units of credit should be taken in other
Upper Level courses. You must also enrol in the prescribed courses from
the University’s General Education program. Try to spread your workload
evenly over the four sessions of study.

In addition, students who intend to apply for entry to the Honours year
should enrol in SLSP911 in the third year of study.

For entry to Honours in the BSoSc degree program, you must have
demonstrated over the three years of the program that you have reached
a sufficient standard, and apply to the Head of School for admission. If
you wish to go on to Honours, you should ask staff in the program for
advice on planning your program and defining your research interests at
an early stage, perhaps during second year.

6. 3424 Bachelor of International Studies Program

Degree Convenor: Professor Roger Bell, International Studies Program
International Studies provides the knowledge and skills essential for
understanding and working in the rapidly changing global environment.
It examines the interactions of nations, economies, institutions, peoples,
cultures, technologies and ideas against a background of increasing
international integration and changing modernity. The program provides
specialised sequences of courses in four area streams which are designed
to give students a thorough preparation for further study and employment
in areas vital to Australia’s increasing participation in the international
arena. The degree incorporates a period of overseas study during
the third and fourth year for students who have made satisfactory progress
towards the degree in their first and second years of study. The Faculty
provides a contribution to the expenses of this study.

In summary, the Bachelor of International Studies is a four-year full-time
program offered in the following four area-study concentrations: Asian
Studies Plan, European Studies Plan, Global Studies Plan, Language
Studies Plan. Features of the program include:
• a core sequence of courses in International Studies;
• a choice of one area of concentration from four distinct and integrated
programs of study;
• language study;
• access to 12 months study at one of a select group of the best
international universities;
• full credit towards UNSW degree for courses completed overseas;
• financial assistance towards a 12-month period of overseas study.

The four year program leads to a degree at Pass level. To qualify for the
award of the degree, a student must obtain, normally over four years of
study, a minimum of 192 units of credit in approved courses.

A fifth, Honours, year is available under all Plans. To qualify for the
award of the degree at Honours level a student must have obtained 192
units of credit in approved courses, satisfied the appropriate prerequisites
for entry into the Honours level program, and have obtained a further
48 units of credit in an approved Honours program.

ASIA13424 Asian Studies Plan
Coordinator: David Reeve, School of Modern Language Studies
The Bachelor of International Studies specialising in Asian Studies is an
integrated program combining language study, a core program of study in
International Studies, and a core program in Asia-related study, together
with an approved overseas program to be undertaken during the third
and fourth years of study.

The study of Asian societies and Asian languages is increasingly important
for Australia. Australia is located in the Asian region, most of its trade is
with Asia and Asian countries are becoming important sources of
investment in Australia. They are also becoming important areas of
investment by Australian companies. Australia’s future lies in increasing
social, economic and political interaction with Asian countries.

Graduates who combine proficiency in an Asian language and knowledge
of study in one or more Asian countries with a professional qualification will be
in increasing demand by both private and public employers.

The basic requirements for the degree are:

1. a total of 192 units of credit.
2. 48 units of credit at Level 1, including no more than 12 in any one
area of study.
3. a major sequence of 42 units of credit from the core program in
International Studies.
4. a sequence of 36 units of credit in one of the following Asian languages:
CHIN Chinese, INDO Indonesian, JAPN Japanese, KORE Korean.
5. at least 36 units of credit in Asia-related courses, including ASIA1001
and ASIA1002 at Level 1:

EUROA13424 European Studies Plan

Coordinator: John Milfull, Centre for European Studies

Studying Europe is an essential part of defining Australia’s role as a predominantly ‘European’ country located in the Asia-Pacific. Any attempt to define Australian identity must be based not only on a new relationship with our neighbours, but on a critical understanding of our European heritage and the continuing dialogue with European thought and practice. The momentous changes, which are taking place in Eastern and Western Europe, will have an extraordinary impact on world developments over the next years, and on the part Australia will play in them.

The Bachelor of International Studies specialising in European Studies requires completion of a core European Studies program, three years’ study of a European language, and completion of a core program of courses in International Studies, together with an approved overseas program to be undertaken during the third and fourth years of study. EURO courses are designed to provide an interdisciplinary European context which addresses basic issues and problems in the study of European culture and society, seen from the perspective of current attempts to establish a new role for a united Europe.

They focus both on the enormous contribution of the European Enlightenment to our concepts of freedom, humanity and citizenship, and its troubled relationship to the realities of European world domination and power politics. The “New Europe” has become an economic power second only to the United States; will it be able to resolve these dilemmas, and regain some kind of moral and political leadership in world affairs as well? We can learn much from both Europe’s failures and its achievements, especially the astonishing success of European integration in overcoming centuries-old hostilities, and its development of new political structures more appropriate to representing cultural diversity within a rapidly globalising economy.

EURO1000 The New Europe A
EURO1001 The New Europe B
EURO2000 Concepts of Europe
EURO2001 Gender, Race, Nature and Reason
EURO2300 The German-Jewish Experience
EURO2301 The Attractions of Fascism
EURO2302 The Messiah Complex

or approved courses in CHIN, INDO, JAPN and KORE.

6. 48 units of credit at an approved overseas university over two sessions (INST3101 and INST3102).
7. 6 units of credit in an Upper Level ARTS course.
8. 12 units of credit from the University's General Education program at Upper Level.

Enquiries can be directed to the Modern Languages Reception Desk on the second floor of the Morven Brown Building or to the Coordinator as listed above.
Globalisation has emerged as a defining trend of the early twenty-first century. This program addresses the main themes and debates that relate to globalisation. It locates this process in relation to world history, international relations, international political economy, global development and large-scale social change. Questions about the rising levels of inequality world-wide, the environment, the changing role of nation-states and the nation-state system, the relationship between globalisation and transnational corporations (TNCs), the growing power of international institutions and organisations, and the significance of technological change will be examined. The relationship between globalisation and national identity will also be explored as will the wider social and cultural significance of recent international changes.

The Bachelor of International Studies specialising in Global Studies requires the completion of a sequence of courses in Global Studies and a core sequence of courses in International Studies, together with an approved overseas program to be undertaken during the third or fourth year of study. There is scope in the degree for students to study a language in depth. Courses in the Bachelor of International Studies in Globalisation are offered at all levels; they are taught in English and require no previous knowledge of other languages.

The basic requirements for the degree are:

1. a total of 192 units of credit.
2. 48 units of credit at level 1, including no more than 12 in any one area of study.
3. a major sequence of 42 units of credit from the core program in International Studies (see Asian Studies section for diagram).
4. a sequence of 36 units of credit in Global Studies (GLST) including at Level 1 GLST1100 and at Level 4 GLST3000:
   - GLST1100 Introduction to Globalisation
   - GLST1200 Women, Gender and World History
   - PECO1001 Australia in the Global Economy
   - GLST2101 (Un)Making the Third World: History and Global Development B
   - GLST2102 (Un)Making the Third World: History and Global Development A

GLST3302 States, Nations and Ethnic Identities
5. 48 units of credit at an approved overseas university over two sessions (INST3101 and INST3102).
6. a sequence of language study (normally of 24 units of credit).
7. 6 units of credit in an Upper Level ARTS course.
8. 12 units of credit from the University's General Education program at Upper Level.

Enquiries can be directed to the Modern Languages Reception Desk in the Morven Brown Building.

7.3425 Bachelor of Music Program

The School of Music and Music Education offers a Bachelor of Music (BMus) degree and also a major sequence in music within the Bachelor of Arts (BA) degree. The BMus provides additional specialisation in music and opportunities for professional development throughout the degree in the areas of musicology, ethnomusicology, performance, composition, music technology and jazz studies. Both the BMus and BA are available as an Honours degree.

Entry to the BMus is by audition and UAI or equivalent. The three major sequences in the BMus are in Musicology (30 units of credit), Musicianship (30 units of credit) and Professional Practices (36 units of credit).
1. Musicology and Musicianship (66 units of credit): MUSC1101 and credit. The Contextual Studies component requires the completion of courses totalling 36 units of credit from courses offered by the Faculty of Arts and Social Sciences, and includes an Upper Level ARTS3000 course if MUSC3101 is not included within the Musicology strand. The General Education component requires courses totalling 12 units of credit from the General Education program approved for students in the Faculty of Arts and Social Sciences.

The BMus (Pass) degree requires a total of 144 units of credit and the Honours degree a total of 192 units of credit.

Honours Level
Pre-requisite: Completion of all requirements for the Pass degree with an average of at least credit level in music courses.

MUSC4000 Bachelor of Music Honours

8. 3426 Bachelor of Music Bachelor of Education Program

The School of Music and Music Education offers a four-year full-time double degree for intending specialist music educators leading to the award of Bachelor of Music Bachelor of Education (BMus BEd). The BMus BEd is a professional double degree which develops skills in six distinct areas of competence. Consolidation of the professional responsibility of music educators plays a central role throughout the distinct areas of competence. Consolidation of the professional competence plays a central role throughout the music education sequence, and is consolidated in periods of practice teaching in each year of the program.

Entry to the BMus BEd is by audition and UAI or equivalent. To qualify for the BMus BEd at Pass level, a student must obtain at least 192 units of credit normally taken from the six major components listed following:

1. Musicology and Musicianship (66 units of credit): MUSC1101 and four other Musicology options; MUSC1302, MUSC2301, MUSC2302, MUSC3311 and two electives in Musicianship.

3. Performance Studies (36 units of credit): MUSC1501, MUSC1502, MUSC2501, MUSC2502, MUSC3501, MUSC3502.

4. Education Studies (24 units of credit): Four courses (each of 6 units of credit) selected from core and elective courses offered by the School of Education. The core courses EDST1101 Education Psychology 1, EDST1102 Social Foundations of Education or EDST1103 Educational Psychology 2 are prerequisites for an additional two Upper Level electives (of 6 units of credit each) offered by the School of Education. The Year 4 core courses, EDST4093 Special Education and EDST4095 Gifted and Talented Students: Recognition and Responses are required for registration by the NSW Department of Education & Training. At the discretion of the Program Coordinator for Music Education, students may be permitted to substitute MUSC3612 Principles and Processes of Music Education for one of the two School of Education electives.

5. Contextual Studies (18 units of credit): A choice of courses available from the Faculty of Arts and Social Sciences programs.

6. General Education (12 units of credit): Courses totalling 12 units of credit from those approved for students in the Faculty of Arts and Social Sciences.

Honours Level
Pre-requisite: Completion of all requirements for the Pass degree with an average of at least Credit level in Music (in the case of Honours in Music) or Music Education (in the case of Honours in Music Education) courses.

MUSC4002 Music Education Honours

9. 3427 Bachelor of Music Bachelor of Arts Program

The School of Music and Music Education offers a four year double degree leading to the award of Bachelor of Music Bachelor of Arts. The BMus BA provides an opportunity for students to undertake all of the courses required for the Bachelor of Music degree, including the Music Performance stream, as well as 84 units of credit from the Bachelor of Arts degree, including an approved major of 42 units of credit. The BMus BA develops a full range of music skills in the areas of musicology, ethnomusicology, performance, composition, music technology and jazz studies as well as skills and perspectives provided by more extensive studies in other Schools of the Faculty.

Graduates of this program will have appropriate music and musicianship skills as a basis for professional work in music organisation, direction and performance, arts administration, broadcasting, recording, and journalism.

The program is as follows:

Year 1
MUSC1101 and MUSC1401
MUSC1302 and MUSC1402
First Year BA courses (24 units of credit)

Year 2
MUSC2301 and MUSC2401 and Musicology Option
MUSC2302 and MUSC2402 and Musicology Option
Upper Level BA courses (12 units of credit)

Year 3
MUSC3311 and MUSC3401
Musicology Option and MUSC3402
Upper Level BA courses (18 units of credit)
General Education (6 units of credit)

Year 4
MUSC3101 and Musicanship Option
Musicology Option
Upper Level BA courses (24 units of credit)
General Education (6 units of credit)

The BA courses must include one major sequence for the BA degree in addition to the Music major. Students are also expected to take part in at least two music performance groups offered by the School.

Honours Level

Prerequisite for Honours in Music: Completion of all requirements for the Pass degrees with an average of at least credit level in music courses.

MUSC4000 Bachelor of Music Honours

10. 4031 Bachelor of Social Work Program

The Bachelor of Social Work program requires four years of full-time study. It is designed to prepare students for the professional practice of social work including work in the wider field of welfare. The essence of social work is working with people – individuals, couples, families, groups, organisations or communities – and this will span people of any age, from any walk of life, or from any ethnic or racial background.

From Years 1-4, the sequences of Practice courses must all be followed according to the curriculum listed later in this Handbook under Social Work. The Social Work Selected Studies Elective 1 and 2 courses offer students a range of specialist types of practice.

The Contextual Studies courses ‘Research Methods’, ‘Philosophy’ and ‘Socio-Legal Practice’ are compulsory. To enable students to pursue an area of interest, the first year elective courses can be selected from among any of the Level 1 courses available in the Faculty of Arts and Social Sciences.

12 units of credit must be selected from the approved General Education courses for students in the Faculty of Arts and Social Sciences.

Field Education

An integral aspect of the program is organised learning in the field and this is a basic requirement for the professional recognition of the degree. In the field education courses, a field educator, usually in a social welfare agency, is responsible for a student learning to apply the principles of professional practice in an actual practice setting. From Year 3, a total of 140 seven-hour days are taken up in this way. Forty of these days are scheduled during academic recess periods. A student’s two field education placements are in more than one type of practice setting. The settings vary and can include medical, psychiatric, local government, community health, community, family and child welfare, services to groups with disabilities, services to the aged, services to migrants, income security, and corrective services. Non-government social welfare agencies and all levels of government are utilised. For some students, their second field education placement may be located outside the Sydney metropolitan area.

Criminal Record Checks

It is a requirement that students who are undertaking placements in certain government departments and related organisations undergo a criminal record check.

Honours Level

Students may graduate with Honours by enrolling in the Honours program in the third year of the degree. Students must complete SOCW3005...
Research Honours in Year 3 and SOCW4006 Social Policy Honours in Year 4. Students are then required to enrol for an additional fifth year for one session to complete an Honours Thesis (SOCW4800) of 12,000 – 15,000 words.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

11. 4035 Bachelor of Social Work Bachelor of Arts Program

The School of Social Work offers a five year combined degree leading to the award of Bachelor of Social Work Bachelor of Arts. The BSW BA provides an opportunity for students to undertake all the courses required for the Bachelor of Social Work program, as well as 60 units of credit from the Bachelor of Arts program, including an approved major sequence of 42 units of credit (see List A of the BA rules). The BSW is designed to prepare students for the professional practice of social work including work in the wider field of welfare. The essence of social work is working with people: individuals, couples, families, groups, organisations or communities and this will span people of any age, from any walk of life, or from any ethnic or racial background.

12 units of credit must be selected from the approved General Education courses for students in the Faculty of Arts and Social Sciences.

12. 4036 Bachelor of Social Work Bachelor of Social Science Program

The School of Social Work offers a five year combined degree leading to the award of the Bachelor of Social Work Bachelor of Social Science. The BSW BSocSc provides an opportunity for students to undertake all the courses required for the Bachelor of Social Work program, as well as a prescribed 48 units of credit from the School of Social Science and Policy (see diagram). The BSW is designed to prepare students for the professional practice of social work while providing extended study in social science, policy analysis and social research.

12 units of credit must be selected from the approved General Education courses for students in the Faculty of Arts and Social Sciences.
13. 4055 Bachelor of Arts Bachelor of Education Program

The combined degree of BA BEd at Pass level is a four year full-time program for intending secondary school teachers. Students combine academic studies in two approved teaching disciplines with both theoretical and practical aspects of education. In the final two years of the BA BEd program students develop skills in classroom competence and spend 50 days on supervised teaching practice in allocated secondary schools.

To qualify for the BA BEd at Pass level it is necessary to complete at least 192 units of credit (UOC).

1. Education courses

Students must complete two Level 1 courses (12 UOC) and may select from EDST1101, EDST1102 or EDST1103. EDST3090 (6 UOC) and EDST4093 (3 UOC) are compulsory Year 3 courses. EDST4095, EDST4081, EDST4094 and EDST4092 (27 UOC) are compulsory Year 4 courses.

A further 18 UOC must be selected from Education Upper Level elective courses for Years 2, 3 or 4.

2. Teaching Method courses

Students must complete 12 UOC in approved teaching method courses from two single method courses over Years 3 and 4.

3. Arts Courses as Preparation for Teaching

Major sequences of at least 42 units of credit must be completed in two schools/departments to provide suitable background for teaching the following school subjects:

- Chinese, Drama (Theatre), Economics/Business Studies, English, French, Geography, German, History, Indonesian, Japanese, Literacy/English as a Second Language (ESL), Spanish.

Students should be aware that certain combinations of teaching courses may not lead to satisfactory employment opportunities and may result in timetable difficulties in Year 4. For more details, consult the School of Education.

4. Other Arts courses

The remaining Arts courses in Years 1 and 2 (12 Level 1 UOC, 6 Upper Level UOC) should be selected from those available in the Faculty of Arts and Social Sciences.

5. General Education courses

12 units of credit must be selected from those approved for students in the Faculty of Arts and Social Sciences.

6. English Proficiency

Proficiency in English is essential in all Education courses. Prospective teachers must be able to communicate effectively with school students and staff members.

Honours Level

Students may elect to undertake an Honours program in either their fourth or fifth year of study (i.e. before the intensive teacher preparation year or afterwards). The Honours program may be undertaken in either Education or in an Arts discipline. Students with a good credit average in Year 1 are normally invited to undertake additional study in the relevant discipline over Years 2 and 3.

14. 3417 Diploma in Languages Program

This Diploma requires a program of 42 units of credit in a language and related courses as approved by the School of Modern Language Studies. It may be taken concurrently with another degree program, and offers an ideal opportunity to acquire an additional language for professional purposes.

15. 3418 Diploma in Music Program

This Diploma requires a program of 42 units of credit in Music, corresponding to a major in the Bachelor of Arts. It may be taken concurrently with another degree program.

16. Combined Degrees

The Faculty strongly encourages combined program study. The following programs are available to students from other faculties:

| Bachelor of Architecture/Bachelor of Arts (3262) |
| BArch BA (Faculty of Built Environment) |
| Bachelor of Architecture/Bachelor of Social Science (3263) |
| BArch BSoSc (Faculty of Built Environment) |
| Bachelor of Art Theory/Bachelor of Arts (4806) |

Subject Areas

Art History and Theory

Head of School: Toni Ross
Tel: (02) 9385 0777
Email: arth@unsw.edu.au
Website: www.coa.unsw.edu.au/schools/arthistorytheory/

Courses in Art History and Theory are offered by the School of Art History and Theory at the College of Fine Arts and taught on the Paddington Campus. These may be a limit on the number of places available to Arts students.

Art History and Theory offers an interdisciplinary approach to the study of visual arts and culture. These courses, taken individually or as a plan, will provide an intriguing and useful ‘toolbox’ of strategies for understanding art objects, images and visual culture.

Courses offered within the Art History and Theory program include such topics as notions of Western art history, forms of visibility, the relationships of Western to non-Western art, and distinctions between the mass culture of television, films, the popular press, advertising and the culture of museums. Other issues include the relationship of culture to society, the linkage between vision and science, looking and sexuality, and the issues of trauma, memory and art. Students may choose courses which lay foundations for professional practice in art writing and arts-related work. (The School also offers a wide range of electives and General Education courses, which complement the list below.)

Major Sequence

A major sequence consists of 36 units of credit in Art Theory courses offered by the College of Fine Arts (12 Level 1 and 24 Upper Level units of credit).

Level 1

SAHT1211 Theories of the Image
SAHT1212 Theories of Art History and Culture
SAHT1214 Methods of Research and Writing on Art
SAHT1221 Contexts of Art
SAHT1222 The Production of Art

Upper Level

SAHT2103 Aesthetics for Contemporary Practice
SAHT2211 Eurocentred Visions: Grand Narratives in Western Art
SAHT2212 Art and Cultural Difference
SAHT2214 Approaches to Australian Art
SAHT2221 Writing for Art and Design
SAHT2222 Memory and Self
SAHT3211 Art after Postmodernism
SAHT3212 Art and Everyday Life
SAHT3213 Museum Studies: Exhibitions, Collections and Material Culture

ARTS Faculty Courses

Upper Level

ARTS2000 is an elective course which offers second and third year Arts and Social Sciences students a 14 day internship experience in a range of organisations. For further details, contact Zarni Jaugielsi, email: zarni@unsw.edu.au

Degrees in which at least one ARTS3000 course must be included are the Bachelor of Arts and the Bachelor of International Studies. Bachelor of Music and Bachelor of Music: Bachelor of Arts students must complete either an ARTS3000 course or MUSC3101. ARTS3000 courses are also available as elective courses for students in other degrees.

ARTS2000 Arts and Social Sciences Internship S1 & S2
ARTS3001 Censorship and Responsibility in the Performing Arts, Film, Literature and Media S2
ARTS3002 Making Histories and Historians: Ethics, Scholarship and Public Roles S1 & S2
ARTS3005 Arts and Social Sciences Graduates in the Workplace: Ethical & Social Responsibility S1
ARTS3006 Corruption and Integrity in Public Life S2
ARTS3007 East Asian Values and Identities X1
ARTS3010 Feminist Thought and Action X1

Asian Studies

Coordinator: A/Prof David Reeve, Department of Chinese and Indonesian Studies
Office: Room 238, Morven Brown
Tel: (02) 9385 1019
Email: d.reeve@unsw.edu.au

The following first year courses are compulsory for students enrolled in the Bachelor of International Studies program 3424 or 4765. For details of the approved Asia-related courses, refer to the preceding section How to Structure your Program in this Handbook.

Level 1

ASIA1001 Introduction to Contemporary Asia S2
ASIA1002 Introducing Southeast Asia S1

Australian Studies

Coordinators: Dr Brigitta Olubas and Dr Elizabeth McMahon, School of English
Office: Room 145, Morven Brown
Tel: (02) 9385 2298
Website: www.arts.unsw.edu.au/australianstudies/

Australian Studies provides an interdisciplinary exploration of Australian culture and society. Its concerns are wide-ranging. Aboriginal issues, the environment, gender identity and politics, and the shaping of cultural icons and institutions are central to its themes.

The Level 1 core courses offer students an introduction to important issues and debates in Australian Studies. Upper Level courses are taught and administered through different schools in the Faculty and offer a range of interdisciplinary and disciplinary approaches. Courses may be studied individually and are all designed to be self-contained. They are available to all students within the Faculty and many from outside. As well as providing the basis for a major sequence, Australian Studies courses also form excellent ‘extensions’ to majors in English, Geography, History, History and Philosophy of Science, Politics and International Relations, Sociology and Anthropology and Film and Theatre.

Major Sequence

Australian Studies may be taken as a major sequence. This requires the completion of 42 units of credit in Australian Studies’ approved courses (listed below). Students must complete the program’s two introductory core courses at Level 1 (AUST1001 and AUST1003) as well as at least one Upper Level Aboriginal course (AUST2004;2005;2012). The remaining 24 units of credit (or four courses) may be selected either from other A-list core offerings (with AUST numbers) or from the B-list of Upper Level electives. For details of the approved Asia-related courses, refer to the preceding section How to Structure your Program in this Handbook.

List A: First Year Core Courses

AUST1001 Australia: Representations, Identities and Difference S2
AUST1003 Paradise Lost? Australian Environmental History S1

List A: Upper Level Core Courses

AUST2004 Aboriginal Australia: The Pre-Colonial and Colonial Experience S1
AUST2005 Aboriginal Australia: The Post-Colonial Experience S2
AUST2006 Australian Playwriting S1
AUST2007 Institutions and Policy: Re-evaluating Australian Politics* S2

List A: Upper Level Core Courses

AUST2008 In the Firing Line: Australians at War S2
AUST2009 Australian Urban Environments S2
AUST2010 Society & Environmental Process: Botany Bay S2
AUST2011 Australian Migration Issues X1

Website:

Office:
Website:
AUST2012 Indigenous Australia: Gendered Identities S2
AUST2013 Australian Children's Literature and Literacy* S1
AUST2014 Twentieth-century Australian Literature S1
AUST2015 Contemporary Australian Women Writers S2
AUST2016 The Australian Cultural Text* S2
AUST2017 Labour History S2
AUST2018 Australian Sport: History and Culture* S1
AUST2019 A Commonwealth for a Continent: Australia 1901-1949 S1
AUST2020 Australia Since World War II S2
AUST2021 Urban Legends: The History of Sydney S1
AUST2023 Regional Australia: Geographies of Uneven Development X2
AUST2024 Public Policy Making S2
AUST2025 Sex, Human Rights and Justice* S1
AUST2026 Music of Aboriginal Australians S1
AUST2027 Staging Australia* S1
AUST2028 Australian Cinema and Television S1
AUST2029 Cities: Experiencing Sydney S1
AUST2030 Approaches to Australian Art S1
AUST2031 Transport, Land Use and Environment S1
AUST2032 Environmental Impact Assessment S1
AUST2033 Australian Masculinities: Reading Gender, Sex and Culture* S1
AUST2034 Women and Men: Gender in Australia S1
AUST2108 Gender and Frontier* S1
AUST2109 Values and Beliefs in Australian Culture* S1

List B: Upper Level Electives

GEOH2611 Geographies of the Asia-Pacific S1
GEOS2711 Australian Climate and Vegetation S2
GEOS3711 Biogeography and Human Impact in Australia* S1
HIST2047 Winners and Losers: Poverty, Welfare, Justice in Australia S1
HIST3902 Australian History and its Constructions* S1
HIST3904 Going Public: Public History and the Historian S1
IROB2702 Industrial Law S1
IROB2704 Social Organisation of Work S2
IROB3705 Management and Employment Relations S1
SOCA3208 Colonisation and Indigenous Identity Formation S1
SOCA3210 Whiteness – Beyond Colour: Identity and Difference S1

Honours Entry
At present only the Combined Honours program is available in Australian Studies. Students must have obtained:
1. Combined Honours prerequisites in a discipline.
2. 42 units of credit at Credit level or better in prescribed Australian Studies and Australia related courses, including 12 units of credit in Level 1 AUST courses, and at least one of the Australian Studies Aboriginal courses.
AUST4500 Combined Australian Studies Honours (Research) Full-Time
AUST4550 Combined Australian Studies Honours (Research) Part-Time

Biological Science
Advisor: A/Prof Paul Adam, School of BEES
Tel: (02) 9385 2076
Email: p.adam@unsw.edu.au

Biological Science encompasses all aspects of plants and animals including their relationship to each other and to the environment. Areas of study in Biological Science include cell biology, plant and animal physiology, ecology, genetics, taxonomy, marine biology, and evolutionary studies. Knowledge of the Biological Sciences is particularly relevant in the fields of wildlife and vegetation management, agriculture, forestry, conservation and other related environmental sciences.

Major Sequence
A major sequence consists of 12 units of credit at Level 1 (BIOS1101 and BIOS1201) plus 30 units of credit at Upper Level. Note that many Level III courses assume knowledge acquired in Level II courses.

Level 1
BIOS1201 Molecules, Cells and Genes S1
BIOS1101 Evolutionary and Functional Biology S2

Upper Level
BEE2041 Data Analysis for Life and Earth Sciences S1
BIOS2011 Evolutionary and Physiological Ecology S1
BIOS2031 Biology of Invertebrates S2
BIOS2051 Flowering Plants S2
BIOS2061 Vertebrate Zoology S1
BIOS3011 Animal Behaviour S2
BIOS3021 Comparative Animal Physiology S1
BIOS3061 Plant Ecosystem Processes S1
BIOS3071 Conservation Biology and Biodiversity S1
BIOS3811 Ocean Biology and Fisheries S1
BIOS3991 Marine and Aquatic Ecology S2
BIOS3111 Population and Community Ecology S2
BIOS3601 Advanced Field Biology S1

Chemistry

Office: Room 133, Heffron Building
No more than two Level 1 courses (12 units of credit) and three Upper Level courses (18 units of credit) may be counted towards the degree of Bachelor of Arts or related programs.

Level 1
CHEM1011 Fundamentals of Chemistry 1A
CHEM1021 Fundamentals of Chemistry 1B
CHEM1031 Higher Chemistry 1C
CHEM1041 Higher Chemistry 1D

Upper Level
Chemistry offers a number of Upper Level courses in the four main discipline areas. Consult the School of Chemistry as to the appropriate choice to make. The following courses are available:

CHEM2011 Physical Chemistry
CHEM2021 Organic Chemistry
CHEM2031 Inorganic Chemistry and Structure
CHEM2041 Chemical and Spectroscopic Analysis
CHEM2839 Inorganic Chemistry

Chinese Studies

Head of Department: Associate Professor Hans Hendrichske
Administrative Assistant: Rosanna Cheung
Office: Room 240, Morven Brown
Tel: (02) 9385 2416
Email: rosanna.cheung@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/chinese/chinese.html

The Department offers a flexible language and academic program for students with different interests and different Chinese language backgrounds. Students can enter Chinese language courses at different levels, depending on their knowledge of Chinese characters. Within each year, students are allocated to different groups, depending on their speaking ability.

In order to count Chinese Studies as a major sequence, students must complete 42 units of credit in Chinese language and Chinese Studies courses, including two Level 3 or two Level 4 courses.

Major Sequences (42 units of credit)

Beginners' entry level

Year 1 CHIN1006/7 12
Year 2 CHIN2006/7 12
Year 3 CHIN3006/7 12
1 Chinese Studies/Professional Elective course 6

Intermediate entry level

Year 1 CHIN2006/7 12
Year 2 CHIN3006/7 12
Year 3 1 Professional Elective course plus 2 Chinese Studies/Professional Elective courses 18

Advanced entry level

Year 1 CHIN3006/7 12
Year 2 1 Professional Elective course plus 1 Chinese Studies/Professional Elective course 6
Year 3 3 Chinese Studies/Professional Elective courses 18

Professional Studies entry level

Year 1 2 Professional Elective courses 12
Year 2 2 Chinese Studies/Professional Elective courses 12
Year 3 3 Chinese Studies/Professional Elective courses 18
Honours

Prerequisite: 54 units of credit in Chinese Studies, including CHIN3900 and CHIN3901 and a grade average of at least 70% in Chinese Studies courses. Honours candidates have to enrol in the two pre-Honours courses worth 6 units of credit in Year 2 and/or Year 3. Intending Honours students are recommended to contact the Head of Department at an early stage in their undergraduate studies to discuss their selection of courses and their proposal for the Honours research project.

Chinese Language Courses

Level 1 (Introductory)
- CHIN1006 Introductory Chinese 1 $1
- CHIN1007 Introductory Chinese 2 $2

Level 2 (Intermediate)
- CHIN2006 Intermediate Chinese 1 $1
- CHIN2007 Intermediate Chinese 2 $2

Level 3 (Advanced)
- CHIN3004 Advanced Chinese (In-Country) X1
- CHIN3006 Advanced Chinese Language 1 $1
- CHIN3007 Advanced Chinese Language 2 $2

Level 4 (Professional Electives)
- CHIN2210 Chinese English Translation $1 & $2
- CHIN2211 Interpreting between Chinese and English $1 & $2
- CHIN2220 Contemporary Chinese Literature $1
- CHIN2221 Classical Chinese Literature $2
- CHIN2222 The Chinese Lyric Journey: Classical Poetry and Painting $1
- CHIN2500 Advanced Chinese Business Language $1
- CHIN2502 Commercial Chinese $2
- CHIN2800 Cantonese Phonology $1
- CHIN2801 Cantonese Morphology $2

Chinese Studies Courses

- CHIN2301 Chinese Social and Cultural Change through Visual Art $1
- CHIN2302 Chinese Cinema $1
- CHIN2303 Gender in Contemporary Chinese Culture and Society $2
- CHIN2310 Along the Silk Road: Conquerors, Traders and Explorers X1
- CHIN2312 Chinese Seminar Option $1 & $2
- CHIN2313 Introduction to Chinese Performing Arts $1
- CHIN2314 Introduction to Chinese Musical Culture $2
- CHIN2315 Transnational Chinese Media $2
- CHIN2400 China Imagined and Perceived* $1
- CHIN2501 Chinese Business Enterprise $1
- CHIN3900 Advanced Chinese Studies $1
- CHIN3901 Research Methods in Chinese Studies $2

* Offered every second year; not offered in 2005.

Honours Level

- CHIN4000 Chinese Honours (Research) Full-Time $1 & $2
- CHIN4050 Chinese Honours (Research) Part-Time $1 & $2
- CHIN4500 Combined Chinese Honours (Research) Full-Time $1 & $2
- CHIN4550 Combined Chinese Honours (Research) Part-Time $1 & $2

Cognitive Science

Coordinator: Dr Anthony Corones, School of History and Philosophy of Science
Office: Room LG24, Morven Brown
Tel: (02) 9385 2357
Email: a.corones@unsw.edu.au

In the last twenty years, Cognitive Science has emerged as an exciting and fruitful domain of enquiry in which there is a convergence of interests in a number of disciplines which deal with mind, language, knowledge and intelligence. The Cognitive Science movement is based on a broad consensus that the problems and issues do not belong exclusively to any one discipline, but fall collectively to all of them.

The Cognitive Science program is designed to complement a school-based major sequence by grouping courses within the fields of Philosophy, Psychology, Linguistics, and Computer Science, which have special relevance to Cognitive Science. It provides the opportunity for students who undertake one or more of the Level 1 courses in the relevant disciplines to become acquainted with the broader enterprise of Cognitive Science through participation in the core course ‘HPSC2610 Computers, Brains and Minds’, and to build upon that acquaintance in selecting further courses from the program. Students should take the core course in their second year of study.

Major Sequence

Entry to the program requires 12 units of credit from the Level 1 prerequisite courses listed below. A major in Cognitive Science requires not less than 24 units of credit from the Upper Level courses listed in the program, including the core course. If you wish to major in Cognitive Science, these Upper Level courses may not be counted toward a major sequence in a School or Department. In planning your program for the degree, you should make sure that you meet the prerequisite requirements of individual courses, unless granted exemption by the course authority.

Level 1

Prerequisite: 12 units of credit obtained in any of the following courses:
- HPSC1200 Science, Good, Bad and Bogus
- LING1000 The Structure of Language
- PHIL1010 Thinking about Reasoning
- PHIL1011 Minds, Bodies and Persons*

Upper Level

Core course:
- HPSC2610 Computers, Brains and Minds

plus at least 18 units of credit obtained in any of the following courses:
- COMP3411 Artificial Intelligence
- HPSC2620 Body, Mind and Soul: The History and Philosophy of Psychology*
- LING2500 Theoretical and Descriptive Linguistics
- LING2520 Generative Grammar
- LING2570 Psycholinguistics*
- LING2680 Language Universals and Linguistic Typology
- PHIL2206 Philosophy of Mind
- PHIL2207 Philosophy of Psychology*
- PHIL2218 Philosophical Foundations of Artificial Intelligence
- PSYC2071 Perception and Cognition
- PSYC2081 Learning and Physiological Psychology

* Not offered in 2005.
COMP3120 Introduction to Algorithms
COMP3121 Algorithms and Programming Techniques
COMP3131 Parsing and Translation
COMP3141 Software System Design and Implementation
COMP3151 Foundations of Concurrency
COMP3211 Computer Architecture
COMP3231 Operating Systems
COMP3311 Database Systems
COMP3331 Computer Networks and Applications
COMP3411 Artificial Intelligence
COMP3421 Computer Graphics
COMP3511 Human Computer Interaction

Criminology
Coordinator: Professor Janet Chan, School of Social Science and Policy
School Office: Room G30, Morven Brown
Tel: (02) 9385 2292
Email: slsp@unsw.edu.au
Website: http://slsp.arts.unsw.edu.au

From its original narrow inquiry into the causes of crime and punishment of offenders, criminology has developed into a multidisciplinary area of study involving contributions from sociology, political science, law, psychology, history and other disciplines. The Bachelor of Social Science in Criminology has a research and policy analysis orientation. It builds on the core curriculum in Bachelor of Social Science, which provides solid training in quantitative and qualitative research methods, social and economic theory, and policy analysis. The Criminology core courses provide students with substantive knowledge about criminal law and procedures, criminal justice institutions, theoretical debates in criminology and issues in criminal justice research and policy. A range of elective courses on criminological topics are available from the Faculty of Arts and Social Sciences and the Faculty of Law.

Core Program
First Year
CRIM1000 Criminal Law and Justice 1
CRIM1001 Criminal Law and Justice 2
SLSP1001 Research and Information Management
SLSP1000 Social Science and Policy

Second Year
CRIM2000 Criminological Theories
SLSP2000 Economy and Society
SLSP2001 Applied Social Research 1
SLSP2002 Policy Analysis Case Studies

Third Year
CRIM3000 Researching Crime and Justice
SLSP3000 Social Theory and Policy Analysis
SLSP3001 Applied Social Research 2
SLSP3002 Social Science and Policy Project

Electives
24 units of credit in the approved list of criminology-related electives (an indicative list):
SLSP2820 Crime and Punishment in Historical Perspective
CRIM2010 Community Corrections
CRIM2011 Crime and Society
CRIM2012 Crime Prevention Policy
CRIM2013 Juvenile Justice
CRIM2014 Issues in Policing
CRIM2015 Sentencing
CRIM2016 The Criminal Justice System
CRIM2017 The ‘New’ Prosecutors
CRIM3010 Comparative Criminal Justice: From Investigation to Trial
ENGL4460 Crime Fiction, Film and Theatre
HIST2428 History from Crime
POL2020 Sex, Human Rights and Justice
PSYC3301 Psychology and Law
SOCA2208 Deviant Fieldwork, Data Collection and Analysis
SOCA3103 Professions: Discipline, Knowledge, Power
SOCA3408 Crime in Australian Society
SOCA3409 Crime, Gender and Sexuality
SOCA3410 Deviance
SOCA3411 Forensic Sociology: Evidence, Implications and Responsibility
SOCA3701 Discipline of the Law
SOCA3710 Moral Panics
SOCA3802 Fear and Hatred in Everyday Life
SOCA3810 The Space of Terror
THFI2011 Theatres of Cruelty

Honours Level
Students must have obtained 144 units of credit in accordance with the requirements for the BScSc in Criminology degree including the pre-Honours course SLSP3911. Students need to have attained an average of 65% or higher in their SLSP and CRIM core and related courses, and must gain permission from the Head of School.

Level 1
CRIM1000 Criminal Law and Justice 1 S1
CRIM1001 Criminal Law and Justice 2 S2
SLSP1001 Research and Information Management S2
SLSP1000 Social Science and Policy S1

Upper Level
CRIM2000 Criminological Theories S1
CRIM3000 Researching Crime and Justice S1
CRIM4000 Criminology Honours S1 & S2
SLSP2000 Economy and Society S1
SLSP2001 Applied Social Research 1 S1
SLSP2002 Policy Analysis Case Studies S2
SLSP3000 Social Theory and Policy Analysis S1
SLSP3001 Applied Social Research 2 S1
SLSP3002 Social Science and Policy Project S2

Development Studies
Coordinator: A/Prof Michael Johnson, School of Social Science and Policy
Office: Room G29, Morven Brown
Email: michael.johnson@unsw.edu.au

The Development Studies program is an interdisciplinary program that introduces students to the issues that concern the developing world such as poverty and inequality and the theories, policies and practical measures introduced to address these issues. Central issues and themes that are examined include the history, sociology and political economy of development; the causes of poverty and global inequality; the relationship between the environment and development; the debates about globalisation and the relationships of international institutions to developing countries. A range of electives grouped by their focus on development practice, historical development, political economy, regional and cultural studies including human rights are offered.

Development Studies may be taken as a major sequence (42 units of credit) together with any other major from the approved sequences listed in the BA Rules. Students are advised that the Development Studies program is designed to complement, most particularly, related majors in Politics and International Relations, Sociology and Anthropology, Economics, Economic History, Geography, History, History and Philosophy of Science, Policy Studies, Political Economy, Politics and Spanish and Latin American Studies. Bachelor of Social Science students majoring in Development Studies as part of the Bachelor of Social Science will complete the normal core courses for Development Studies (Note that SLSP2000 excludes PECO2000).

To complete a major sequence you must take at least two compulsory COMD courses (from COMD1001 or, COMD1002 or, SOCA1006 or, GEOH1601 and COMD2000) and two from the list of core elective COMD courses listed below, totalling 24 units of credit, and a further 18 units of credit from the other approved elective courses listed below. The Upper Level courses selected must include at least 12 units of credit at the 3000 level. With the approval of the Coordinator of the Development Studies program, enrolment from other schools may be substituted for up to 12 of the optional units of credit. Many of these courses will have their own prerequisites, and you must also fulfill Faculty of Arts and Social Sciences requirements concerning your distribution of courses. Please check school entries for availability, and consult the Coordinator about the best combinations of courses.

Major Sequence
Level 1
Compulsory courses
From 6 to a maximum of 12 units of credit in the core program selected from:
COMD1001 Development Studies: The Emergence of Underdevelopment S1
or
COMD1002 Development Studies: Poor World, Rich World S2
Upper Level Courses

At least two courses (12 units of credit) including the compulsory course (COMD2000) selected from the Upper Level Core courses and three elective courses (18 units of credit) if only one six credit point course completed at Level 1:

**Compulsory course**

COMD2000 The Theory and Practice of Development $S1$

**And at least one of the following:**

COMD2010 (Un)making the Third World: History and Global Development B $S2$

COMD2050 Sustainable Development, Globalisation and the Third World $S1$

ECON3110 Development Economics $S2$

POLS2023 Globalisation and Uneven Development $S2$

**Electives**

Students majoring in Development Studies must select a minimum of an additional 18 units of credit made up of additional courses taken from the core electives list or selected from the following electives listed by focus of study. The additional requirement of 6 units of credit for students intending to enrol in Combined Honours is detailed below. Students should carefully check any prerequisite requirements are met.

**Development Practice**

GEOH2001 Field Research $S2$

GEOH3641 Regional Australia; Geographies of Uneven Development $S2$

GEOH3651 Geographies of Migration and Settlement $S2$

SOCA2204 Pacific Island Research Fieldwork $S2$

**Political Economy**

ECON3109 Economic Growth, Technology and Structural Change $S1$

PECO2000 Political Economy and the State (excludes SLSP2000) $S1$

PECO3000 Political Economy (excludes ECON3119) $S2$

POLS2049 Asia in the International Political Economy* $S2$

POLS3054 Theorising International Political Economy $S1$

**Globalisation**

COMD2020 Making/Unmaking the Third World: History and Global Development A (excludes HIST2061, INST2000) $S1$

POLS3054 Theorising the International Political Economy $S1$

SOCA2103 Globalisation and Fragmentation $S2$

**Historical Development**

HIST2013 Prophets and Millenarian Movements in World History* $S2$

HIST2039 Environmental History* $S2$

HIST2043 Modern China: The Last Emperors and the Birth of Modern China* $S2$

SPAN2401 Colonising the Americas: The Spanish and Portuguese Empires $S2$

**Regional, Cultural Studies and Human Rights**

GEOH2611 Geographies of the Asia-Pacific $S1$

GEOH3621 Place, Identity and Difference $S2$

HIST2050 Women in Southeast Asian Societies $S2$

HIST2300 Between Dictatorship and Democracy: Contemporary Southeast Asia $S2$

POLS2036 Political Development in Northeast Asia* $S2$

POLS2048 International Security $S2$

SOCA3106 Anthropology and Tourism $S2$

SOCA3204 Modernity and Development in the Pacific Islands $S2$

SOCA3211 Development and Modernity* $S2$

SOCA3212 Environment, Society and Culture* $S2$

SOCA3810 The Space of Terror $S1$

SPAN2418 Amazonia* $S1$

* Not offered in 2005

**Honours Level**

Students who have completed 48 units of credit in Development Studies, including all compulsory courses, at a good Credit average may be admitted to enrol in a Combined Honours program. They must have also met the requirements for a single Honours in one of the Schools or Departments teaching in the Bachelor of Arts program. If these requirements are met, and with the approval of the relevant School or Department, students can complete an Honours thesis on an interdisciplinary topic.

COMD4500 Combined Honours (Research) in Comparative Development Full-Time

COMD4550 Combined Honours (Research) in Comparative Development Part-Time

**Economic History**

See under Economics.

**Economics**

**Coordinator:** School of Economics  
**Tel:** (02) 9385 3335  
**Email:** economics@unsw.edu.au  
**Website:** www.economics.unsw.edu.au

The School of Economics offers three major sequences that may be undertaken within the Faculty of Arts and Social Sciences. The Major Sequence Professional Level offers the opportunity for students to obtain a professional degree suitable for a career in Economics, business or the public sector. The Intermediate Level Major Sequence is similar, but requires less specialisation in Economics courses. Students completing the Professional Level Sequence may also apply for admission to an Honours degree in Economics. Conditions for entry into the Honours program are given below.

The School of Economics also offers a major sequence in Economic History. Economic History, as a discipline, seeks to provide an understanding of the present through the study of economic and social developments in the past. Students majoring in other disciplines and those concerned with area studies will find Economics courses that complement their major sequence. In certain circumstances, Economic History courses may also be counted towards a major sequence from another school in the Faculty of Arts and Social Sciences. Entry into an Honours program in Economic History is also possible.

Assessment in the School of Economics is by essays, tutorial participation and examination. The relative weight of each of these varies from course to course and is announced in each course at the beginning of each session.

**Major Sequence Intermediate Level in Economics**

For a major sequence in Economics at the Intermediate Level, all students must complete at least 42 units of credit in Economics courses, including: ECON2103 and ECON2104. Economics courses must be chosen from Options (i) or Options (ii). At least one option must be selected from Options (ii).

**Options (i):**

- ECON2101 Microeconomics 2
- ECON2102 Macroeconomics 2
- ECON2103 Business and Government
- ECON2104 Applied Macroeconomics
- ECON2105 Economics of Corporations
- ECON2107 Economics of Information and Technology
- ECON2109 Economics of Natural Resources
- ECON2111 Globalisation
- ECON2112 Game Theory and Business Strategy
- ECON2113 Economics of E-Commerce
- ECON2116 Economics of Japanese Business & Government
- ECON2117 Economics of Tourism
- ECON2127 Environmental Economics
- ECON2291 Quantitative Methods A
- ECON2292 Quantitative Methods B
- ECON2305 Modern Asian Economic History
- ECON2313 Economics of E-Commerce
- ECON2319 Economic and Social Policy in Australia
- ECON2321 Growth and Development of International Business
- ECON2322 European Integration
- ECON3119 Political Economy
- ECON3290 Introductory Econometrics

All other Economics courses have prerequisites which are associated with other major sequences.
Options (ii):
ECON3291 Econometric Methods
ECON3101 Markets and Public Choice
ECON3104 International Macroeconomics
ECON3105 Economic Analysis of Productivity
ECON3106 Public Finance
ECON3107 Economics of Finance
ECON3109 Economic Growth, Technology and Structural Change
ECON3110 Development Economics
ECON3112 The Newly Industrialising Economies of East Asia
ECON3113 Economic Development in ASEAN Countries
ECON3114 Superannuation and Retirement Benefits
ECON3116 International Economics
ECON3120 Economic Reasoning
ECON3121 Managerial Economics

Major Sequence Professional Level in Economics
For a major sequence in Economics at the Professional Level, all students must complete at least 42 units of credit in Economics courses, including:
ECON1101 and ECON1102
ECON2101 and ECON2102
ECON3121 Managerial Economics
ECON3120 Economic Reasoning
ECON3121 Managerial Economics

Options (i):
ECON2101 Microeconomics 2
ECON2102 Macroeconomics 2
ECON2103 Business and Government
ECON2104 Applied Macroeconomics
ECON2105 Economics of Corporations
ECON2107 Economics of Information and Technology
ECON2109 Economics of Natural Resources
ECON2111 Globalisation
ECON2112 Game Theory and Business Strategy
ECON2113 Economics of E-Commerce
ECON2116 Economics of Japanese Business & Government
ECON2117 Economics of Tourism
ECON2127 Environmental Economics
ECON2291 Quantitative Methods A
ECON2292 Quantitative Methods B
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2319 Economic and Social Policy in Australia
ECON2321 Growth and Development of International Business
ECON2322 European Integration
ECON3119 Political Economy
ECON3290 Introductory Econometrics
ECON3291 Econometric Methods

All other Economics courses have prerequisites which are associated with other major sequences.

Options (ii):
ECON3101 Markets and Public Choice
ECON3104 International Macroeconomics
ECON3105 Economic Analysis of Productivity
ECON3106 Public Finance
ECON3107 Economics of Finance
ECON3109 Economic Growth, Technology and Structural Change
ECON3110 Development Economics
ECON3114 Superannuation and Retirement Benefits
ECON3116 International Economics
ECON3120 Economic Reasoning
ECON3121 Managerial Economics

Students may count up to 60 units of credit in ECON courses within the total required by the BA degree.

Major Sequence in Economic History
Students may undertake either a Level 1 major or an Upper Level major in Economic History. A major sequence consists of at least 36 units of credit in courses offered in Economic History, of which no more than 12 units of credit may be from Level 1 courses. In order to enrol in a 6 units of credit Upper Level course in Economic History a candidate must have passed 36 Level 1 units of credit in Arts and completed any specific prerequisite course or courses listed.

Level 1 Courses
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1

ECON1301 Australia in the Global Economy
ECON1302 Australia and the Asia-Pacific Economies

Upper Level Courses
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2319 Economic and Social Policy in Australia
ECON3231 Growth and Development of International Business
ECON3232 European Integration

Honours in Economics (Arts)
Students intending to do Honours in Economics should be completing ECON1101, ECON1102, ECON2101, ECON2102, ECON2291, ECON2292, ECON3290, ECON3291 and obtain at least an average of Credit or better in Upper Level courses. They then take ECON4120 Economics Honours (Arts) in their fourth year.

Honours in Economic History (Arts)
In order to enter Year 4 Honours, a candidate must have completed 36 units of credit in Economic History plus ECON1101 and ECON1102:
1. ECON1101 + ECON1102 - 12 units of credit.
2. Five Upper Level courses in Economic History - 30 units of credit.
3. 1 other Upper Level course from the School of Economics - 6 units of credit.

Students take ECON4321 Economic History 4 Honours.

Level 1
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1
ECON1301 Australia in the Global Economy
ECON1302 Australia and the Asia-Pacific Economies

Upper Level

As an area of study, Education crosses the boundaries between a number of disciplines including aspects of philosophy, sociology and psychology, and addresses their interaction with the learning and teaching process. The School of Education offers a range of courses to all students in the Faculty. While some Education courses are compulsory for students in the combined Education programs (BA Bed, BMus Bed, BA(Dance) Bed, BSc Bed) they are also available to students with an interest in education who are not undertaking teaching programs. For further details or special permission to have prerequisites waived, consult the School of Education.

Major Sequence

The following information refers only to single degree programs. Students in the combined Education programs listed above should follow the sequence of core and elective courses specified for their particular award.

A major sequence in Education comprises:

42 units of credit including:

12 Level 1 units of credit and:

30 units of credit chosen from: EDST2020, EDST2041, EDST2044, EDST2045, EDST2052, EDST2053, EDST2054, EDST2055, EDST2060, EDST2062, EDST2070, EDST2090, EDST4081, EDST4093, EDST4095 and PHIL2421.

English

Head of School: A/Prof Bill Ashcroft
School Office: Room 145, Morven Brown
Tel: (02) 9385 2298 Fax: (02) 9385 1047
Email: english@unsw.edu.au
Website: http://english.arts.unsw.edu.au

English is a discipline for students with a special interest in English literature and language. The study of English is not compulsory within the Faculty of Arts and Social Sciences. Therefore, courses within the School of English are planned for students who have a genuine interest in English and want to develop a special ability in it, including the ability to read perceptive and to write good English, including the ability to write creatively.

Students who have successfully completed English at Level 1 (6 Level 1 units of credit) may enrol in Upper Level English courses without necessarily pursuing a major in English. (Arts and Social Science students are only allowed to count 12 English Level 1 units of credit towards their degree.)

The usual prerequisite for enrolment in an Upper Level English course is a Pass in one Level 1 English course. The choices of courses in Level 1 for 2005 are: ENGL1001 Ways of Writing: An Introduction to Literary Genres, ENGL1006 Imagining the City, ENGL1007 The Canon of English Literature and ENGL1009 Literature of Revolution. A student who has not completed 6 Level 1 units of credit but is interested in one or more of our Upper Level courses may seek the special permission of the Head of School to have the prerequisite waived. In considering such requests, the School gives strong preference to a candidate with a Credit or higher result in a related discipline.

Major Sequence

Any student who wishes to gain a major sequence in English must complete 6 Level 1 and 36 Upper Level (or 12 Level 1 and 30 Upper Level) units of credit in English. However, provided 6 Level 1 units of credit have been completed in English, ARTS1100 will be accepted as part of an English major. Students undertaking a major sequence are permitted to enrol in other courses offered by the School which are additional to the requirements of their basic major sequence.

Honours Entry

Students may choose one of two available Honours programs.
1. Honours in English (Research)

The normal entry requirement for a student seeking admission to the Honours Program in English is a minimum of 54 units of credit in English which must include 6 or 12 Level 1 units of credit and 48 or 42 Upper Level units of credit. The School also requires students to have an average of 70% or better in all previous ENGL courses. Intending Honours students are also encouraged to include ENGL3902 Contemporary Critical and Cultural Theory and ENGL3900 Narrative in their major sequence.

With the permission of the Head of School, a student who is studying a combined Arts degree (e.g. BA LLB, BA BEd) may substitute one related 6 unit course from another discipline.

2. Combined Honours (Research)

The Combined Honours Program allows a student to undertake the Honours year in both English and another discipline. The normal School of English entry requirement for a student seeking admission to a Combined Honours Program is 48 units of credit in English including at least 6 Level 1 units of credit and an average of 70% or higher. Intending Honours students are also encouraged to include ENGL3902 Contemporary Critical and Cultural Theory and ENGL3900 Narrative in their major sequence.

Entry into the Combined Honours program is subject to the approval of both the Head of the School of English and the Head of the other School concerned.

Assessment

In all English courses, assessment is by a combination of the following: essays, class tests, tutorial participation, tutorial presentation, and examinations. Further details of assessment will be available at the first class in each course.

Level 1

ENGL1001 Ways of Writing: An Introduction to Literary Genres S2
ENGL1006 Imagining the City S1
ENGL1007 The Canon of English Literature S1
ENGL1009 Literature of Revolution S2

Upper Level

ENGL2102 Shakespeare, Stage and Text S2
ENGL2103 Jane Austen in Context S2
ENGL2104 Poetry, Virtue, Corruption: Milton to Burns S1
ENGL2108 Realism, Pornography and the Novel: Defoe to De Sade S2
ENGL2109 Writing Bodies S1
ENGL2203 The Twentieth Century: Modernism and Modernity S1
ENGL2204 The Twentieth Century: Postmodernism and Postmodernity S2
ENGL2206 Nineteenth Century Prose: Romantic and Victorian Fiction and Non-Fiction 1789-1914 S1
ENGL2207 Nineteenth Century English Poetry S2
ENGL2300 Twentieth Century Australian Literature S1
ENGL2301 Refiguring Dreams: Twentieth Century American Literature S2
ENGL2504 Children's Literature: A Critical Introduction S1
ENGL2506 Children's Language: Learning Culture S2
ENGL3302 Myths of Self and Society: Irish Writing and its Relevance for Australian Society S1
ENGL3401 Contemporary Australian Women's Writing S2
ENGL3471 Contemporary Irish Literature S2
ENGL3502 Professional Writing S2
ENGL3504 Visual Communication S2
ENGL3753 Creative Writing A S1
ENGL3754 Creative Writing B S2

Advanced Upper Level

ENGL3900 Narrative S1

Honours Level

ENGL4000 English Literature Honours (Research) Full-Time
ENGL4050 English Literature Honours (Research) Part-Time
ENGL4500 Combined English Literature Honours (Research) Full-Time
ENGL4550 Combined English Literature Honours (Research) Part-Time

Environmental Studies

Coordinators:
Dr Paul Brown, School of History & Philosophy of Science
Office: Room LG16, Morven Brown
Tel: (02) 9385 1497
Email: paul.brown@unsw.edu.au
Dr Stephen Healy, School of History & Philosophy of Science
Office: Room LG11, Morven Brown
Tel: (02) 9385 1597
Email: s.healy@unsw.edu.au

The Environmental Studies program is designed for students who wish to undertake a major sequence within the BA degree concentrating on the historical, theoretical, and policy implications of the human construction and transformation of the environment. Honours and Combined Honours in Environmental Studies are also available (see below).

Major Sequence

The interdisciplinary program in Environmental Studies constitutes a stand alone major, with the following requirements:

Level 1

24 Level 1 units of credit in Arts. There are no compulsory Level 1 courses. However, a typical program would include:

HPSC1400 Science, Technology, Society and Environment S1
HPSC1500 Understanding Environmental Controversy S2

The attention of students is also drawn to other Level 1 courses that may be of particular relevance to this major sequence, as follows:

AUST1003 Paradise Lost: Australian Environmental History S1
POLS1014 Global Politics and the Environment S2

and courses offered under the Geography program in the Faculty of the Built Environment.

Upper Level

For a pass degree you must have a total of 42 units of credit at Upper Level, from the courses listed below. Note that the core course is compulsory and that you must also take at least one of the fundamental knowledge courses. Apart from the core course, you must also include at least one other course numbered with a ‘3000’ code.

Core Course (compulsory and normally taken in the third year of study):

HPSC3500 Society and Environmental Process: Botany Bay S2
HPSC2500 Environment, Technology and Politics S1
HPSC2550 Sustainable Development, Globalisation, and the Third World S1

Fundamental Knowledge Courses (you must take at least one)

HPSC2500 Environment, Technology and Politics S1
HPSC2550 Sustainable Development, Globalisation, and the Third World S1

Electives

ARTS2000 Arts and Social Sciences Internship X1 S1 X2 S2
HIST2039 Environmental History S2
HPSC2750 Energy and its Politics S2
HPSC2800 The Challenge of the New Biotechnologies* S2
HPSC2881 Cultural Heritage Management S2
HPSC3150 Life Science in the Twentieth Century S2
HPSC3920 Reading Option X1 S1 X2 S2

(must be an Environmental topic)

PHIL2418 Bioethics S1
PHIL2420 Environmental Ethics S1
PHIL2422 Biopolitics and Biotechnology S2
SLSP2002 Policy Analysis Case Studies S2
SOCIA2104 Technology, Work, Culture S1
SOCIA2204 Pacific Islands Research Fieldwork S2
SOCIA3212 Environment, Society and Culture* S2
SOCIA3704 Social Movements and Society: Current Debates S2
SPAN2418 Amazonia S2

Please check school/department entries to confirm availability.

* These courses run in alternate years and will not be offered in 2005.

* Includable subject to agreement of Environmental Studies Coordinator that the course has appropriate environmental content.
Honours Level

Prerequisite: 1. At least 54 units of credit from the above list of nominated courses for the interdisciplinary major in Environmental Studies, with an average of Credit or better. This must include the core course HPS3500, at least one other ‘3000’ course, and at least one fundamental knowledge course, and may include only two of the Level 1 courses recommended above. 2. Permission of the Environmental Studies Honours Coordinator.

Normal requirements are a thesis (50%), seminar (25%) and an additional component (25%) which could be a second seminar, an internship or a project. Environmental Studies Honours is coordinated by the School of History and Philosophy of Science.

HPS4510 Honours (Research) in Environmental Studies Full-Time
HPS4520 Honours (Research) in Environmental Studies Part-Time

Honours in Environmental Studies may also be combined with Honours study in a school or department. Typical combinations are with History and Philosophy of Science, Sociology and Anthropology, History, Geography, Politics and International Relations or Philosophy. For Combined Honours the above assessment scheme may vary depending on the requirements of the participating school or department.

Prerequisite for Combined Honours: 1. Combined Honours prerequisites in a discipline. 2. At least 48 units of credit from the interdisciplinary major in Environmental Studies, with an average of Credit or better. This must include the core course HPS3500, at least one other ‘3000’ course, and at least one fundamental knowledge course, and may include only two of the Level 1 courses recommended above. 3. Permission of the Environmental Studies Honours Coordinator.

HPS4500 Combined Honours (Research) in Environmental Studies Full-Time
HPS4550 Combined Honours (Research) in Environmental Studies Part-Time

European Studies

Coordinator: Prof John Milfull, Centre for European Studies
Office: Room G64, Morven Brown
Tel: (02) 9385 3051
Email: j.milfull@unsw.edu.au
Website: www.arts.unsw.edu.au/euro/

Studying Europe is not a ‘cultural cringe’; it is an essential part of defining Australia’s role as a predominantly “European” country located in the Asia-Pacific. Any attempt to define Australian identity must be based not only on a new relationship with our neighbours, but on a critical understanding of our European heritage and the continuing dialogue with European thought and practice. The momentous changes which are taking place in Eastern and Western Europe will have an extraordinary impact on world developments over the next years, and on the part Australia will play in them.

EURO courses are designed to provide an interdisciplinary European context which addresses basic issues and problems in the study of European culture and society, seen from the perspective of current attempts to establish a new role for a united Europe. They focus both on the enormous contribution of the European Enlightenment to our concepts of freedom, humanity and citizenship, and its troubled relationship to the realities of European world domination and political power. The ‘New Europe’ has become an economic power second only to the United States; will it be able to resolve these dilemmas, and regain some kind of moral and political leadership in world affairs as well? We can learn much from both Europe’s failures and its achievements, especially the astonishing success of European integration in overcoming centuries-old hostilities, and its development of new political structures more appropriate to representing cultural diversity within a rapidly globalising economy.

EURO courses are an ideal complement to majors in history, philosophy, politics and sociology with a European ‘focus’, or in English or European languages. Courses are offered at both Level 1 and Upper Level; they are taught in English, require no previous knowledge of other languages, and are available to all students enrolled in the Faculty.

The program also offers a major sequence. It requires the completion of seven EURO courses (42 units of credit). You may, however, request the Coordinator to approve the substitution of other appropriate courses focusing on Europe up to a total of 18 units of credit. A major sequence in European Studies is a requirement for the Bachelor of International Studies degree in European Studies (Program 3424), which is described in the introductory section of this faculty entry.

Students who wish to specialise in European Studies are encouraged to learn a relevant European language.

The European Studies notice-board is located opposite the Centre for European Studies (MB G64).

Major Sequence

A minimum of 42 units of credit in European Studies, including at least 30 units of credit in Upper Level courses.

Honours Level

Combined Honours (recommended): Students must satisfy the single Honours prerequisite for the School concerned and have completed a major in EURO with an average of 70%. They are required to present a thesis on a cross-disciplinary topic approved by the Coordinator and the relevant Head of School.

Single Honours: This program is primarily intended for students enrolled in combined degrees who are unable to meet the requirements for Combined Honours. The prerequisite is a WAM of 70% in the EURO major and related courses. Students must complete a thesis on a cross-disciplinary topic and a program of course work negotiated between the program authority and the appropriate School(s).

Level 1

EURO1000 The New Europe A S1
EURO1001 The New Europe B S2

Upper Level

EURO2300 The German-Jewish Experience S1
EURO2301 The Attractions of Fascism S1
EURO2302 The Messiah Complex S2
EURO2331 Understanding Nazi Germany S2
EURO2410 Nineteenth Century Europe S2
EURO2411 Spain: From Loss of Empire to European Integration S1
EURO2433 The Russian Revolution S1
EURO2600 European Integration S2
EURO2700 What is Postcommunism? S1
EURO2800 Discovering Europe S2
EURO3000 Evidence and Interpretation S1

Honours Level

EURO4000 Honours (Research) in European Studies F/T
EURO4050 Honours (Research) in European Studies P/T
EURO4500 Combined Honours (Research) in European Studies F/T
EURO4550 Combined Honours (Research) in European Studies P/T

French

Head of Department: Dr Maurice Blackman
Office: Room 258, Morven Brown
Tel: (02) 9385 2321
Email: m.blackman@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/french/french.html

French is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. The program includes courses in Language and Linguistics, Literature and Thought, French Culture and Society and Francophone studies. French is the language of instruction in most courses.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students with prior knowledge of French sit for a placement test in order to gain entry to an appropriate language course.

Major sequence

Major sequences in French require 42 units of credit in FREN courses including at least 12 units of credit from Upper Level French electives.

One approved course with MODL, EURO or LING prefix may be credited towards a French major. Students completing the French language core with FREN3104 will be recognised as having completed the French Advanced Program.

Honours Level

Prerequisite: At least 54 units of credit, including FREN3102 or higher language core, and FREN3910 at an average grade of Distinction or above.
With permission of the Head of Department, Honours students who started from FREN1101 may arrange to write their Honours thesis in English rather than French. Combined Honours requires 48 units of credit in French including FREN3910.

### Honours (Research) Entry

Students must satisfy Faculty of Arts and Social Sciences requirements for entry to Honours programs. They must have obtained at least 6 Level 1 units of credit in GEOH or GEOS, and have completed SLS1P001. Students must complete another 42 Upper Level units of credit in GEOH or GEOS or related courses, three of which must include SLP2P01, GEOH2001 and GEOH3111. (Substitute courses may be approved by the Head of the Geography program.) A minimum cumulative average at Credit grade is required for all Upper Level GEOH or GEOS courses taken.

### Combined Honours (Research) Entry

At least 6 Level 1 units of credit plus another 36 Upper Level units of credit in GEOH or GEOS or related courses, including SLP2P01, GEOH2001 and GEOH3111. (Substitute courses may be approved by the Head of the Geography program.) A minimum cumulative average at Credit grade is required for all Upper Level GEOH or GEOS courses taken.

### Level 1

- GEOH1601 Australian and Global Geographies S2
- GEOS1701 Environmental Systems and Process S1

### Upper Level

- GEOH2001 Field Research S1
- GEOH2611 Geographies of the Asia-Pacific S1
- GEOH2641 Australian Urban Environments S2
- GEOH2800 Geographical Information Systems for Built Environment S2
- GEOH3111 Advanced Qualitative Methods for Geography S1
- GEOH3411 Special Topic S1 & S2
- GEOH3621 Place, Identity and Difference S1
- GEOH3641 Regional Australia: Geographies of Uneven Development S2
- GEOH3651 Geographies of Migration & Settlement S2
- GEOH3661 Cities and Urbanism S2
- GEOH3671 Transport, Land Use and Environment S1
- GEOH3911 Environmental Impact Assessment S1
- GEOH3921 Coastal Resource Management S2
- GEOS2711 Australian Climate and Vegetation S2
- GEOS2721 Australian Surface Environments and Landforms S1
- GEOS2811 Remote Sensing Applications S1
- GEOS2821 Geographic Information Systems S2
- GEOS3731 Catchment and Coastal Geomorphology S2
- GEOS3761 Environmental Change S2
- GEOS3811 Advanced Techniques in Remote Sensing S2
- GEOS3821 Remote Sensing & GIS Applications S2
- GEOS4521 Soil Degradation & Conservation S1

### Honours Level

Students who are to be supervised by staff in the Geography program, Faculty of the Built Environment, enrol in the following 48 unit of credit thesis course:

- GEOH4418 Geography Honours (Research) Full-Time S1 & S2
- GEOH4424 Combined Honours (Research) in Geography Full-Time S1 & S2

Students who are to be supervised by staff in the School of Biological, Earth and Environmental Sciences (BEES) enrol in the following:

- GEOS4418 Physical Geography Honours S1 & S2
- BEES4511 Professional Skills S1

And either:

- BEES4521 Literature Review S1

and 12 units of credit of electives approved by the BEES Honours committee or 18 units of credit of electives approved by the BEES Honours committee.

### Geology

**Coordinator:** Dr Paul Lennox, School of BEES  
**Tel:** (02) 9385 8084  
**Email:** p.lennox@unsw.edu.au

Geology is the study of the nature and evolution of our Earth. It spans many areas, including the relationship between humans and the physical environment. Geology is an important complement to other disciplines in Arts and Social Studies for those wishing to pursue careers in various areas of public and corporate policy, including resource assessment, environmental regulation, environmental management and urban planning.

Field tutorials are an essential part of some of these courses, and may be held during weekends and/or recesses. Dates and costs are available during the first week of the course. Attendance is compulsory.

### Major Sequence

A major sequence in Geology comprises:

- 12 Level 1 units of credit and 30 Upper Level units of credit, including at least one and not more than two Level 3 courses. MSC6300 is considered to be a Level 3 course. Course selection must be made in consultation with the Geology program advisor.

### Level 1

- GEOS1111 Fundamentals of Geology S1
- GEOS1211 Environmental Earth Science S2

### Upper Level

- GEOS2071 Life Through Time S1
- GEOS2101 Sedimentary Environments S1
German Studies

Coordinator: Dr Bettina Boss
Tel: (02) 9385 3649
Email: german@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/german/german.html

German Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. Language study and the study of literature and linguistics are integrated in the German Studies program. Seminars in German literature and civilisation support the development of language proficiency and communicative competence. Practical language work involving topics and issues of German sociocultural history contributes to an increased awareness and understanding of the forces that have shaped the development of modern German speaking societies.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students are advised to consult the German Studies staff to plan their entry point in the language sequence.

Note: Students with any proficiency in German must consult the staff in German Studies prior to enrolment, unless they have taken German in the previous session at UNSW. Please see: http://languages.arts.unsw.edu.au/main/placetest.html

Major Sequence

Major sequences in German Studies require 42 units of credit in GERS courses. Students completing the German language core with GERS3701 will be recognised as having completed the German Studies Advanced Program.

Honours Level

Entry into the Honours program requires 54 units of credit in German Studies, including GERS3900 and GERS3901, with an average grade of Distinction or better.

Combined Honours requires 48 units of credit in German Studies, including GERS3900, with an average grade of Distinction or better.

Language Core

GERS1400 Introductory German 1 $1
GERS1401 Introductory German 2 $2
GERS2400 Intermediate German 1 $1
GERS2401 Intermediate German 2 $2
GERS3410 Advanced German 1 $1
GERS3411 Advanced German 2 $2
GERS3700 Professional German 1 $1
GERS3701 Professional German 2 $2

Advanced Upper Level Courses

These courses are compulsory for students intending to proceed to Honours.

GERS3900 German Option 1 $1
GERS3901 German Option 2 $2

Honours Level

GERS4000 German Honours (Research) Full-Time
GERS4050 German Honours (Research) Part-Time
GERS4500 Combined German Honours (Research) Full-Time
GERS4550 Combined German Honours (Research) Part-Time

Greek (Modern)

Coordinator: Dr Eleni Amvrazi
Office: Room 231, Morven Brown
Tel: (02) 9385 3649
Email: greek@unsw.edu.au
Website: http://languages.arts.unsw.edu.au

Greek Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. Greek Studies provide students with proficiency in spoken and written Greek through practical language work and an understanding of the way Greek society has developed through the study of Greek literature and history and culture.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students are advised to consult the Greek Studies staff to plan their entry point in the language sequence.

Modern Greek programs are also offered by correspondence. The correspondence program offers an opportunity for students who have full-time work commitments or timetable clashes to study Modern Greek.

Note: Students with any proficiency in Greek must consult the staff in the Department of Modern Greek Studies prior to enrolment, unless they have taken Greek in the previous session at UNSW. Please see: http://languages.arts.unsw.edu.au/main/placetest.html

Major Sequence

Major sequences in Greek Studies require 42 units of credit in GREK courses including at least four consecutive language courses and GREK3506. Students completing the Greek language core with GREK3402 will be recognised as having completed the Greek Studies Advanced Program.

Honours Level

Intending Honours students are recommended to contact the Greek Studies staff at an early stage in their undergraduate studies to discuss their selection of programs and their proposal for the Honours research project. For entry to the Greek Honours program, the completion of 54 units of Greek courses, including GREK3900 and GREK3901, with an average of 70% is required. The entry to Combined Honours is the completion of 48 units of credit, including GREK3900 and GREK3901, with an average of 70%.

Language Core

GREK1301 Introductory Modern Greek 1A $1
GREK1302 Introductory Modern Greek 1B $2
GREK2301 Intermediate Modern Greek 2A $1
GREK2302 Intermediate Modern Greek 2B $2
GREK3301 Advanced Modern Greek 3A $1
GREK3302 Advanced Modern Greek 3B $2
GREK3401 Advanced Modern Greek 4A $1
GREK3402 Advanced Modern Greek 4B $2

History and Culture Courses

GREK3506 The Modern Greek World (1453-present day) $1
GREK3508 Greek Traditional Culture $2
GREK3509 Pandora's Box: Gender Issues in Greek Mythology and Tragedy $1
GREK3520 Greek Women Writers $2
GREK3530 The Modern Greek Experience $1
GREK3541 Greek Music: From Homer to Haroula $2
GREK3505 Born to Purple: The Byzantine World (330-1453) $1

Electives

GREK3500 Greek Traditional Culture $2
GREK3501 Pandora’s Box: Gender Issues in Greek Mythology and Tragedy $1
GREK3502 Greek Women Writers $2
GREK3503 The Modern Greek Experience $1
GREK3504 Greek Music: From Homer to Haroula $2
GREK3505 Born to Purple: The Byzantine World (330-1453) $1

Advanced Upper Level Courses

GREK3900 Culture, Ethnicity & Identity in Greek Australian Literature $1
GREK3901 The History and Development of the Greek Language $2

Honours Level

GREK4000 Modern Greek Studies Honours (Research) Full-Time
GREK4050 Modern Greek Studies Honours (Research) Part-Time

History

Head of School: Associate Professor Rae Frances
School Office: Room 351, Morven Brown
Tel: (02) 9385 2343
Email: history@unsw.edu.au
Website: http://history.arts.unsw.edu.au/

The School of History offers a variety of Level 1 and Upper Level courses, giving students a wide range of options at all levels. Courses are mainly concerned with aspects of modern history and related to periods and themes in Australian, Asian, European, Middle Eastern and American
history. Ancient History is taught, both as part of the World History courses and in a few specialist courses. General theories and problems of historical explanation are also studied, as well as techniques of researching and writing history.

Class contact in most courses offered is three hours per week. Level 1 courses offered in each of the following fields – Australian, European or world history – can be taken separately or as a complementary pair of courses over two sessions. (Details and timetables of lectures are available from the School of History.)

Most of a history student's working time, however, is spent in the University library or in private study, preparing papers for tutorials and seminars, and writing the required essays.

Assessment in each course usually involves one essay and a written tutorial contribution. Most courses also use end of session tests as a form of assessment. For details of assessment in particular courses, consult the School of History Handbook or individual course guides.

Details of a major in History, and of the requirements for entry into Honours (4th year), are listed below. Under Faculty rules: (i) a student may complete only two Level 1 History courses (12 Level 1 units of credit), and (ii) for entry into Upper Level courses in History, students should have completed 36 units of credit. It should be noted that ARTST1100 may be substituted for 6 first year units of credit in History.

The study of history develops important skills in research, interpretation, evaluation of evidence, reasoning and writing. Study at Honours or postgraduate level further refines these skills and permits students to demonstrate an ability to undertake independent and original research and to communicate the results of this research clearly and persuasively.

Major Sequence

A major sequence in History consists of at least 42 units of credit in courses offered by the School of History. Students enrolling in the Faculty of Arts and Social Sciences from 2005 and wishing to complete a major in History must include at least two 3000 Advanced Upper Level courses. In order to enrol in one of these 3000 level courses you need to have completed at least 12 History units of credit in 2000 level courses (or other courses approved by the Head of School). Pre-Honours courses, which are distinguished by the prefix HIST39+, may be included in this major requirement. However, these courses are restricted to students with a credit average (or better) in History.

Honours Entry

Students must satisfy Faculty of Arts and Social Sciences requirements for entry to Honours programs, and must have obtained, at Credit level or better, at least 54 units of credit in the School of History, including 6 units of credit from the Pre-Honours HIST3900 courses. For entry to a Combined Honours program, students must have obtained at Credit level or better, at least 48 units of credit in the School of History including 6 units of credit from the HIST3900 courses.

Level 1

HIST1003 The Fatal Shore: Aborigines, Immigrants and Convict Society S1
HIST1004 Making Australia1850-1901: Land, People & Culture S1
HIST1010 Introducing Southeast Asia S1
HIST1011 The Emergence of Modern Europe (A) S1
HIST1012 The Emergence of Modern Europe (B) S1
HIST1015 The 60s: Australia and the United States S2
HIST1016 World History; The Big Picture S1
HIST1020 Women, Gender and World History S1

History and Philosophy of Science

Coordinator: Dr John Schuster, School of History & Philosophy of Science
School Office: Room LG19, Morven Brown
Tel: (02) 9385 2356
Email: j.a.schuster@unsw.edu.au

History and Philosophy of Science (HPS) is the field that deals with the nature, history, social shaping and social impacts of science, technology and medicine. Courses in the School of HPS therefore cover a number of related themes: the historical origins and philosophical foundations of modern science; the social, political and economic dimensions of technological change; the history and politics of medicine and health, as well as contemporary environmental studies, environmental policy and management. Courses in HPS make ideal complements to courses in intellectual and social history, philosophy, sociology, politics and international relations, psychology and public policy.

While not everyone is trained in science or engineering, everybody is affected by science and technology in their private and working lives. Issues concerning the impact and risks of technological and scientific change are inescapable. HPS courses provide critical and contextual understanding of these issues, both for students of humanities and social sciences, as well as natural sciences, medicine and engineering.

No previous study of mathematics or science is required. Entry to most Upper Level courses is possible without having studied Level 1 HPSC courses.
**Indonesian Studies**

**Coordinator:** A/Prof David Reeve  
**Administrative Assistant:** Rosanna Cheung  
**Office:** Room 238, Morven Brown  
**Tel:** (02) 9385 1019  
**Email:** d.reeve@unsw.edu.au

Courses in Indonesian Studies are offered both for students with no prior knowledge of the language (Beginners’ level entry) and for those with HSC Indonesian (Intermediate or Advanced level entry). There are also courses available for native speakers (Professional level entry). In order to count Indonesian Studies as a major sequence, students must complete 42 units of credit in Indonesian language and Indonesian Studies courses. Those interested in doing Honours must in addition complete two qualifying one semester courses worth 6 units of credit each in Year 2 and/or Year 3.

### Major Sequences

1. **Beginner's Entry level – 42 units of credit**

   **Year 1**  
   - INDO1001  
   - UOC  
   - 6

   **Year 2**  
   - INDO2001  
   - UOC  
   - 6

2. **Intermediate Entry Level – 42 units of credit**

   **Year 1**  
   - INDO3001  
   - UOC  
   - 6

   **Year 2**  
   - INDO3002  
   - UOC  
   - 6

   **Year 3**  
   - Three Indonesian Studies courses  
   - 18

3. **Advanced Entry Level – 42 units of credit**

   **Year 1**  
   - INDO3001  
   - UOC  
   - 6

   **Year 2**  
   - INDO3035  
   - UOC  
   - 6

   **Year 3**  
   - Three Indonesian Studies courses  
   - 18

   **Note:** INDO2001 is the entry level for background speakers with limited language proficiency, including some HSC level Indonesian. INDO3001 is the entry level for background speakers with advanced language proficiency, including higher scores in HSC Indonesian.

4. **Professional Entry Level – 42 units of credit**

   **Year 1**  
   - INDO3035  
   - UOC  
   - 6

   **Year 2**  
   - Two Indonesian Studies courses  
   - 12

   **Year 3**  
   - Two Indonesian Studies courses  
   - plus one elective  
   - 18

5. **Honours Level**

   Students interested in gaining additional academic qualifications and a deeper knowledge of Indonesian can do a Year 4 Honours program by research. They should complete the two Pre-Honours courses INDO3900 and INDO3901 in addition to a major sequence at Credit level or better. Students thinking of studying for Honours in Indonesian Studies should consult the Department as early as possible in the course of their studies.
Indonesian Language Courses

INDO1001 Introduction to Indonesian 1  
INDO1002 Introduction to Indonesian 2  
INDO2001 Intermediate Indonesian 1  
INDO2002 Intermediate Indonesian 2  
INDO3001 Advanced Indonesian 1  
INDO3002 Advanced Indonesian 2  

Indonesian Studies Courses

INDO3035 Indonesian Popular Culture (taught in Indonesian) S1  
INDO3500 Contemporary Indonesian Society (taught in Indonesian) S2  
INDO3502 Islam in Indonesia S1  
INDO3503 Indonesian Political Culture S2  
INDO3900 Introduction to Indonesian Studies (Pre-Honours course) S1  
INDO3901 Indonesian Studies Research Methods (Pre-Honours course) S2  

Electives

HIST2053 Understanding Indonesia: Identity, Civil Rights and Jihad S2  
HIST2081 Traditions, Colonialisms & Revolutions: Southeast Asian Histories S1  

Honours Level

INDO4000 Indonesian Honours (Research) Full-Time  
INDO4050 Indonesian Honours (Research) Part-Time  
INDO4500 Combined Indonesian Honours (Research) Full-Time  
INDO4550 Combined Indonesian Honours (Research) Part-Time  

International Studies

Coordinator: Prof Roger Bell, International Studies Program  
Office: Room G66, Morven Brown  
Tel: (02) 9385 2431  
Email: rbell@unsw.edu.au  

The Bachelor of International Studies is a four-year full-time program offered in the following four area-study concentrations: Asian Studies Plan, European Studies Plan, Global Studies Plan, Language Studies Plan. Students must complete the core sequence of courses (42 units of credit - 12 Level 1 and 30 Upper Level units of credit) as listed below:

**Level 1**

**Level 1 Core Courses**

INST1100 World History A S1  
INST1200 World History B S2  
or  
INST1300 International Relations in the Twentieth Century S1  
INST1400 International Relations: Continuity and Change S2  

**Upper Level**

INST2200 Globalisation & Fragmentation (core) S1  
INST2300 International Law S2  
or  
INST2301 Global Governance S2  
INST2400 The Theory and Practice of Development S1  
or  
INST2401 Sustainable Development, Globalisation and the Third World S1  
INST3300 Theorising International Political Economy S1  
or  
INST3301 Economic Growth, Technology and Structural Change S1  
INST3900 International Studies Advanced Seminar (core) S2  

**International Studies - Global Studies**

Coordinator: Mark T. Berger, School of Modern Language Studies  
Office: Room 226, Morven Brown  
Tel: (02) 9385 1857  
Email: mberger@unsw.edu.au  

The Bachelor of International Studies in Global Studies requires the completion of a sequence of 36 units of credit in Global Studies (GLST) including GLST1100 (Year 1) and GLST3000 (at Level 4). A maximum of 12 Level 1 units of credit can be completed.

**Level 1**

GLST1100 Introduction to Globalisation (core) S1  
GLST1200 Women, Gender and World History S1  
PECO1001 Australia in the Global Economy S2  

**Upper Level**

GLST2101 (Un)Making the Third World: History and Global Development B S2  
GLST2102/ (Un)Making the Third World: History and Global Development A S1  
INST2000 and Global Development A S1  
GLST2103 The United States and Changing Global Orders S1  
GLST2104 Globalisation and Uneven Development S2  
GLST2105 Theories and Concepts of International Relations* S1  
GLST2106 International Security S2  
GLST3000/ Global Studies and Global (core) S2  
GLST3301 Theories of Nationalism* S2  
GLST3302 States, Nations and Ethnic Identities S1  

* Not offered in 2005.

**Irish Studies**

Coordinator: Dr Peter Kuch, School of English  
Tel: (02) 9385 2298/2364  
Email: p.kuch@unsw.edu.au or irish@unsw.edu.au  
Website: www.irishstudies.arts.unsw.edu.au  

The major in Irish Studies provides an interdisciplinary exploration of Irish history, culture and society over the past two hundred years that takes particular account of Ireland's relationships with Australia and with Europe. While attention is paid to issues such as identity, ethnicity, and 'nation-building', and the history of their contestation in Ireland, the principal focus is on how these can be situated within readings of the cultural, social and political forces that shaped Ireland's interaction with Australia and Europe. From being subject to the British Empire and thus a major source-country for the European settlement of Australia, Ireland has become a wealthy, technologically advanced, highly educated and culturally sophisticated European nation.

The Level 1 core courses offer students an understanding of the Irish contribution to the history of Australia and an understanding of contemporary Europe, of which Ireland is now part. Given the literary component of the major, students are strongly advised to enrol in either ENGL1001 and/or ENGL1006 and/or ENGL1007 and/or ENGL1009 in their first year.

Upper Level courses are taught by different schools in the Faculty and consequently the major enables students to enjoy a range of disciplinary and interdisciplinary approaches. Courses may be studied individually and, though all complement one another, all are designed to be self-contained.

**Major Sequence in Irish Studies**

The major in Irish Studies comprises 12 units of credit at Level 1 and 24 Upper Level units of credit.

**Level 1 Core Courses**

EURO1000 The New Europe A S1  
EURO1001 The New Europe B S2  
or  
HIST1011 The Emergence of Modern Europe (A) S1  
HIST1012 The Emergence of Modern Europe (B) S2  
or  
HIST1003 The Fatal Shore: Aborigines, Immigrants and Convict Society S1  
HIST1004 Making Australia1850-1901: Land, People & Culture S2  

**Upper Level Courses**

IRSH2001 Irish History from 1800* S2  
IRSH2002 Identity, Culture and Politics: Ireland and Australia S2  
IRSH2012 Contemporary Irish Literature S2  
IRSH2013 Myths of Self and Society Irish Writing and its Relevance for Australian Society S1  
IRSH2021 Contemporary Theatre S2  
IRSH2104 Poetry, Virtue, Corruption: Milton to Burns S1  
IRSH3472 Modernism: Joyce* S2

* Not offered in 2005.
**Italian**

**Coordinator:** Dr Diana Palaversich, Department of Spanish & Latin American Studies  
**Tel:** (02) 9385 1188/1681  
**Email:** italian@unsw.edu.au  
**Website:** http://languages.arts.unsw.edu.au/italian/italian.html

Italian is currently offered at beginners’ level only within the School. Students wishing to continue their studies in Italian may be able to do so by enrolling in courses offered by the University of Sydney. Students with prior Italian language knowledge may be able to commence study at a course higher than ITAL1001 at the University of Sydney.  

**Level 1**

ITAL1001 Introductory Italian 1  
ITAL1002 Introductory Italian 2  

**Japanese Studies**

**Head of Department:** Dr William Armour  
**Office:** Room 202, Morven Brown  
**Tel:** 9385 3773  
**Email:** w.armour@unsw.edu.au  
**Website:** www.languages.arts.unsw.edu.au/japan/japan.html

Japanese Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. The program offers a range of Japanese language and non-language based courses to students including courses in Japanese cultural studies, and professional language.  

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students with prior knowledge of Japanese sit for a placement test in order to gain entry to an appropriate language course.  

**Major Sequence**

A major sequence in Japanese Studies comprises 42 units of credit and requires (1) 24 units or more from Japanese language core or JAPN3700 series; (2) either JAPN2500 or JAPN3900; and (3) the remaining units from Culture and Professional Language courses. Students completing the Japanese Studies major including two or more courses from the JAPN3700 series will be recognised as having completed the Japanese Studies Advanced Program.  

**LOTE**

Those pursuing a LOTE qualification in the BA BEd program should take 36 UOC from Language core or JAPN3700 series as well as JAPN2500 or JAPN3900.  

**Honours Level**

**Prerequisite:** The completion of 54 units of credit, including JAPN3901 and JAPN3902 in Japanese Studies, a WAM of 65 or above in all courses, Distinction or higher in all JAPN courses, and the major with a minimum language level of JAPN3001.  

Entry to the Combined Honours program requires the completion of 48 units of credit, including JAPN3901 and JAPN3902, a WAM of 65 or above in all courses, Distinction or higher in all JAPN courses, and the major with a minimum language level of JAPN3001.

**Jewish Studies**

**Coordinator:** Dr Geoffrey Brahme Levey, School of Politics & International Relations  
**Office:** Room 321, Morven Brown  
**Email:** g.levey@unsw.edu.au  
**Website:** www.arts.unsw.edu.au/jewishstudies/

Jewish Studies is an interdisciplinary program focusing on the modern Jewish experience. It brings together various perspectives and approaches from History, Politics, Sociology, Literature, and Law to explore the subject of the Jews – their religion, culture and politics and their interrelations with non-Jews and the wider society – with an emphasis on the past two centuries.  

**Major Sequence**

Students may take a major sequence in Jewish Studies as their second major, together with a major in a school-based discipline within the Faculty of Arts and Social Sciences. A major sequence consists of 36 units of credit in the Jewish Studies program, including at least 24 units of credit in Upper Level courses. With the approval of the Coordinator, up to 12 units of credit in other courses related to Jewish Studies may be counted towards the major.

**Korean Studies**

**Head of Department:** Dr William Armour  
**Office:** Room 202, Morven Brown  
**Tel:** 9385 3773  
**Email:** w.armour@unsw.edu.au  
**Website:** www.languages.arts.unsw.edu.au/korean/korea.html

Korean Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. The program offers a range of Korean language and non-language based courses to students, including courses in Korean cultural studies, and professional language.
The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students with prior knowledge of Korean or background speakers sit for a placement test in order to gain entry to an appropriate language course.  

**Major Sequence**  
A major sequence in Korean Studies comprises 42 units of credit. A major sequence in Korean Studies requires: (1) the completion of at least 4 consecutive language courses; (2) the completion of KORE3501 or higher; (3) the completion of at least one course from Korean Culture Studies. In exceptional cases, a student may take Culture courses instead of Language courses with the Department's permission. Students who complete the language core with KORE3501 or higher will be recognised as having completed the Korean Studies Advanced Program.  

**Honours**  
Prerequisite: The completion of 54 units of credit, including KORE3900 and KORE3901 in Korean Studies, a WAM of 65 or above in all courses, Distinction or higher in all KORE courses, and the major with a minimum language level of KORE3501.  

**Language Core**  
- KORE1000 Korean Communication 1A  
- KORE1001 Korean Communication 1B  
- KORE2000 Korean Communication 2A  
- KORE2001 Korean Communication 2B  
- KORE3000 Korean Communication 3A  
- KORE3001 Korean Communication 3B  
- KORE3400 Advanced Korean A  
- KORE3401 Advanced Korean B  
- KORE3500 Professional Korean A  
- KORE3501 Professional Korean B  
- KORE3600 Korean Translation A  
- KORE3601 Korean Translation B  

**Culture Electives**  
- KORE2500 Korean Civilisation and Culture  
- KORE2600 Modern Korean Society  
- KORE2601 Gender/Politics in Korean Literature  
- KORE2602 Korean Literature: A Survey in English  
- KORE2603 Korean Encounters  
- KORE3900 Introduction to Korean Studies (Advanced)*  
- KORE3901 Special Topics in Korean Studies (Advanced)*  
- JAPN2510 Japan & Korea: Cultures in Conflict  

*Advanced Upper Level courses  

**Honours Level**  
- KORE4000 Korean Studies Honours (Research) Full-Time  
- KORE4050 Korean Studies Honours (Research) Part-Time  

**Latin**  
**Coordinator:** School of Modern Language Studies  
**Office:** Room 274, Morven Brown  
**Tel:** (02) 9385 2421  
**Email:** latin@unsw.edu.au  
**Website:** http://languages.arts.unsw.edu.au  
A knowledge of Latin gives students direct access to some of the greatest works of Western literature, philosophy, scientific theory and legal oratory. It can also offer significant advantages to students pursuing other areas of language study, such as linguistics, English or other modern European languages.  

**Level 1**  
- LATN1000 Introductory Latin A  
- LATN1001 Introductory Latin B  

**Upper Level**  
- LATN1010 Science and Philosophy in Roman Poetry  
- LATN1012 Women, the Law and Society in Ancient Rome  

**Linguistics**  
**Coordinator:** A/Prof Peter Collins  
**Office:** Room 231, Morven Brown  
**Tel:** (02) 9385 3649  
**Email:** linguistics@unsw.edu.au  
**Website:** www.arts.unsw.edu.au/languages/linguistics  
Linguistics is the study of human language. Its practitioners address questions such as: How do people use language in various situations? What is the biological basis for language? Is language unique to the human species? How and why do languages change? How do children learn language? What is the meaning of ‘meaning’? Can machines talk? As well, linguistics provides a basis for a variety of practical applications, including the teaching and learning of foreign languages, translating and interpreting, facilitating cross-cultural communication, diagnosing and treating language disorders, providing linguistic support for such professions as law and medicine, developing language curricula in schools, improving literacy skills, generating speech by computer, producing ‘plain English’ documents, and so on.  

Students who have successfully completed either or both of the Level 1 Linguistics courses may enrol in Upper Level Linguistics courses. A student who has not fulfilled this prerequisite but is interested in a particular Upper Level course may request the permission of the Head to have the prerequisite waived. In considering such requests, the Head will give preference to a candidate with a successful year’s work in another language, or in English, or a Credit or better in another related discipline.  

**Major Sequence**  
A major sequence in Linguistics requires 12 units of credit in Linguistics at Level 1 and 30 units of credit in Upper Level courses, including at least 3 units of credit at 3000 level. Students may count up to 6 units of credit in approved Upper Level courses taught outside the Linguistics Department towards a major sequence in Linguistics. Approved courses are MODL2000 Cross-Cultural Communication, MODL2002 Introduction to Professional Interpreting, JAPN3301 Discover Japanese Grammar A, JAPN3301 Discover Japanese Grammar B and SPAN3040 Spanish Linguistics. Students who wish to count any other course from outside the Linguistics Department towards a major sequence in Linguistics should consult the Department.  

**Level 1**  
- LING1000 The Structure of Language  
- LING1500 The Use of Language  

**Upper Level**  
- LING2510 Analysing Talk  
- LING2520 Generative Grammar  
- LING2530 Visual Communication  
- LING2540 Semantics and Pragmatics  
- LING2551 Contemporary English Grammar  
- LING2590 The English Language  
- LING2680 Language Universals and Linguistic Typology  
- LING2700 Language Learning and Teaching  
- LING2900 The Linguistics of Signed Languages  
- LING3001 Current Issues in English Grammar  

**Honours Entry**  
Students need to have completed at least 54 units of credit (48 units of credit for Combined Linguistics Honours) at Credit level or better in Linguistics courses, including two 3000 level courses, for entry to Honours.  

**Note:** Students are strongly advised to consult the Head on their eligibility to enter Honours programs.  
- LING4000 Linguistics Honours (Research) Full-Time  
- LING4050 Linguistics Honours (Research) Part-Time  
- LING4500 Combined Linguistics Honours Full-Time  
- LING4550 Combined Linguistics Honours Part-Time  

**Mathematics**  
**Coordinator:** Dr Dennis Trenerry  
**Office:** Room 3063, Red Centre  
**Tel:** (02) 9385 7010  
**Email:** d.trenerry@unsw.edu.au  
**Website:** www.maths.unsw.edu.au  
While Mathematics as a major study is usually taken in one of the Science, Advanced Science/Science/Arts programs, it may also be taken within an Arts program. Students wishing to do an Honours degree in Mathematics or to specialise in one of the disciplines of Applied Mathematics, Pure Mathematics or Statistics must transfer from the Arts program to one of the Science, Advanced Science or Science/Arts programs. This should normally be done prior to commencing Year 2, but may be possible at the end of Year 2 depending on the courses selected.
First Year Mathematics
MATH1131 and MATH1231 are the standard courses and are generally selected by students who intend to pursue further studies in Mathematics. There is an assumed knowledge for these courses of HSC Mathematics Extension 1.

MATH1141 and MATH1241 are aimed at the more mathematically able students. They cover all the material in MATH1131 and MATH1231 at greater depth and sophistication. There is an assumed knowledge for these courses of HSC Mathematics Extension 2.

MATH1011, MATH1021, MATH1031 and MATH1041 are courses available for students who do not intend studying Mathematics beyond Level I, but whose studies require some knowledge of basic mathematical ideas and techniques. Only a very limited number of Upper Level Mathematics courses are available to students who have done these courses. There is an assumed knowledge for these courses of HSC Mathematics (this does not include HSC General Mathematics).

Higher Level Mathematics
Many courses in the School are offered at two levels. The Higher level caters for students with superior mathematical ability. Where a prerequisite is mentioned at the ordinary level, the corresponding Higher level course may be substituted.

Students with Low Mathematical Qualifications
The University organises a bridging course in Mathematics which is available for those students intending to enrol in MATH1131 who have inadequate mathematical background. The bridging course covers the gap between HSC Mathematics and Mathematics Extension 1 and is a very useful refresher course generally. The course is held at the University during February each year. Students who do not have a background equivalent to at least HSC Mathematics should not take Mathematics at UNSW.

Major Sequences in Mathematics
A major sequence in Mathematics consists of 42 units of credit, subject to the following rules.

Level I
12 units of credit (MATH1131 or MATH1141, MATH1231 or MATH1241)

Upper Level
30 units of credit in which:
(a) at least 12 units of credit are at Level II
(b) at least 12 units of credit are at Level III
(c) MATH2501 and MATH2011 are compulsory
(d) additional courses recommended at Level II are: MATH2120 and MATH2520, or MATH2801 and MATH2810

Students should also consult the School concerning their choice of Upper Level courses before enrolling in Year 2.

Level I
MATH1011 General Mathematics 1B
MATH1021 General Mathematics 1C
MATH1031 Mathematics for Life Sciences
MATH1041 Statistics for Life and Social Sciences
MATH1131 Mathematics 1A
MATH1141 Higher Mathematics 1A
MATH1231 Mathematics 1B
MATH1241 Higher Mathematics 1B

Upper Level
Mathematics Level II
MATH2011 Several Variable Calculus
MATH2111 Higher Several Variable Calculus

Applied Mathematics Level II
MATH2120 Mathematical Methods for Differential Equations
MATH2130 Higher Mathematical Methods for Differential Equations
MATH2140 Operations Research: Methods and Applications
MATH2240 Introduction to Oceanography and Meteorology
MATH2260 Dynamical Systems
MATH2280 Biomathematics
MATH2301 Mathematical Computing

Pure Mathematics Level II
MATH2400 Finite Mathematics
MATH2501 Linear Algebra
MATH2510 Real Analysis
MATH2520 Complex Analysis
MATH2601 Higher Linear Algebra
MATH2620 Higher Complex Analysis

Statistics Level II
Note: The course MATH2841 Statistics SS is available for students who wish to take only 6 units of credit of Level II Statistics. It cannot be followed by any Level III statistics courses.

MATH2801 Theory of Statistics
MATH2810 Statistical Computing for Categorical Data
MATH2831 Linear Models
MATH2841 Statistics SS
MATH2901 Higher Theory of Statistics
MATH2910 Higher Statistical Computing for Categorical Data
MATH2931 Higher Linear Models

Mathematics Level III
MATH3041 Mathematical Modelling for Real World Systems

Applied Mathematics Level III
Before attempting any Level III Applied Mathematics course a student must have completed at least 12 units of credit of Level II Mathematics courses including the prerequisites specified for individual courses.

MATH3101 Computer Methods for Differential Equations
MATH3121 Mathematical Methods
MATH3161 Optimisation Methods
MATH3181 Optimal Control
MATH3201 Dynamical Systems and Chaos
MATH3241 Fluid Dynamics
MATH3261 Atmosphere-Ocean Dynamics
MATH3301 Advanced Mathematical Computing

Pure Mathematics Level III
Before attempting any Level III Pure Mathematics courses, except MATH3411 or MATH3421, students must normally have completed at least 12 units of credit of Level II Mathematics including the prerequisites specified for individual courses. For higher courses the average performance in these courses should be at distinction level. Subject to the approval of the Head of the Department, this may be relaxed. Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enroling.

The courses MATH3511, MATH3680 and MATH3740 are normally offered only in even numbered years and the courses MATH3531, MATH3780 and MATH3790 only in odd numbered years.

MATH3411 Information, Codes and Ciphers
MATH3421 Logic and Computability
MATH3511 Transformations, Groups and Geometry
MATH3521 Algebraic Techniques in Number Theory
MATH3531 Topology and Differential Geometry
MATH3541 Differential Equations
MATH3560 History of Mathematics
MATH3570 Foundations of Calculus
MATH3610 Higher Analysis 1: Real Analysis
MATH3620 Higher Analysis 2: Functional Analysis
MATH3630 Higher Analysis 3: Integration
MATH3680 Higher Algebraic Topology
MATH3690 Higher Algebraic Topology
MATH3700 Higher Differential Equations
MATH3710 Higher Algebra 1: Group Theory
MATH3720 Higher Algebra 2: Rings and Fields
MATH3730 Higher Number Theory
MATH3740 Higher Geometry
MATH3750 Higher Computational Combinatorics

Statistics Level III
Note: Not all Level III Statistics courses are offered every year. Contact the Department of Statistics for details.

MATH3801 Probability and Stochastic Processes
MATH3811 Statistical Inference
MATH3821 Statistical Modelling and Computing
MATH3830 Design and Analysis of Experiments
MATH3841 Statistical Analysis of Dependent Data
MATH3880 Advanced Probability
MATH3890 Special Topics in Statistics
MATH3901 Higher Probability and Stochastic Processes
MATH3911 Higher Statistical Inference
Core Courses
complete a major in the humanities or social sciences, to permit them in the context of the mass information and entertainment production experience to equip students with a thorough knowledge of communication technologies.

Bachelor of Arts (Media and Communications)
The Media and Communications core program gives students a sophisticated understanding of the history, scope and socio-cultural impact of new media technologies, and of the debates that have accompanied their development and use. Important features of this core program are its emphasis on new computer-based multimedia and its focus on Australian media industries in relation to globalisation. The degree is vocationally relevant in its orientation and all students are given significant practical experience in new computer-based multimedia communication technologies.

The program emphasises analytical skills combined with extensive production experience to equip students with a thorough knowledge of the rapidly changing fields of media and communications. This grounding enables them to interpret, create and apply the products of new media not only in the context of the mass information and entertainment industries but also in a variety of other public and private sectors such as education, on-the-job training and specialised information services.

In addition to the Media and Communications core program, students complete a major in the humanities or social sciences, to permit them to study a related field in depth or to pursue their interests in other areas.

Core Courses
The core program is only available to students enrolled in the BA (Media and Communications) (program 3402), BSc (Media and Communications) (program 3994), and BA (Media) LLB (program 4764).

Level 1
MDCM1000 New Media Technologies A
MDCM1001 New Media Technologies B

Level 2
MDCM2000 Researching and Writing for New Media
MDCM2002 Media Production
MDCM2003 Multimedia Production

Level 3
MDCM3000 Media Forms
MDCM3002 Advanced Media Production
MDCM3003 Multimedia Production in Industry Contexts

Honours Level
For entry to Honours in Media and Communications, students must have normally completed 54 units of credit in MDCM courses with a grade average of at least 70%.

MDCM4000 Media and Communications Honours Full-time
MDCM4050 Media and Communications Honours Part-time

Elective Courses
These courses are available to all Faculty of Arts and Social Sciences students at Upper Level.

MDCM2101 Media, Tastes and Values
MDCM2102 Media Contexts: Political and Cultural
MDCM3100 Introduction to Legal Issues for Media and the Arts
MDCM3101 Media Culture, Policy
MDCM3102 Art, the Senses and Everyday Life in the Digital Age

Major Sequences in Film, Theatre and Performance Studies
Students may take a major sequence, which will consist of no fewer than 42 units of credit and normally involve two years of Upper Level study, in 1. Film, or 2. Theatre and Performance Studies or 3. Film/Theatre and Performance Studies (a joint sequence which will consist of 60 units of credit). The School also offers a Bachelor of Arts (Dance) Bachelor of Education program. For details, see ‘How to Structure Your Program’ at the beginning of the Faculty section of this Handbook.

Before proceeding to a major sequence at Upper Level, all students must take 6 or 12 units of credit at Level 1 from any of the following courses:

Level 1
FILM1101 Introduction to Film
FILM1105 Working with Image and Sound
THFI1002 Reading Performance
THST1101 Introduction to Theatre and Performance Studies

Upper Level
1. Film

The major in Film provides students with a sophisticated understanding of the history and contemporary significance of film as a medium and cinema as an institution. The study of film is set in a broader context of screen cultures and audio-visual industries – including television, video and emerging new media – both in Australia and globally. The major will consist of no fewer than 42 units of credit.

After completion of the core course FILM1101 Introduction to Film at Level 1, the major must include the following:

At Level 2, at least 12 units of credit from:
FILM2001 Contemporary Approaches to the Cinema
FILM2002 Australian Cinema and Television
FILM2007 Movie World: National Cinemas
FILM2021 The Hollywood System

At Level 3, at least 12 units of credit from:
FILM3001 Video Exercise
FILM3002 Aspects of Film History
FILM3003 Explorations in Contemporary Film Theory
FILM3004 Film Genres and Styles
FILM3005 Special Program in Film Studies
FILM3006 Cinemas and Cultures

2. Theatre and Performance Studies

The major in Theatre and Performance Studies concentrates on the history, theory and practice of performance. It will consist of no fewer than 42 units of credit, including:

6 or 12 units of credit at Level 1 and
36 or 30 units of credit at Level 2, which must include THST2202 Critical Perspectives on Theatre and Performance and at least 30 or 24 units of credit from any course with a PFST, THFI or THST prefix.

3. Film/Theatre and Performance Studies

The major in Film/Theatre and Performance Studies will consist of 60 units of credit, including:

6 or 12 units of credit at Level 1 and at Level 2
THST2202 Critical Perspectives on Theatre and Performance

and at least 12 units of credit from:
FILM2001 Contemporary Approaches to the Cinema
FILM2002 Australian Cinema and Television
FILM2007 Movie World: National Cinemas
FILM2021 The Hollywood System

and at Level 3, at least 12 units of credit from:
FILM3001 Video Exercise
FILM3002 Aspects of Film History
FILM3003 Explorations in Contemporary Film Theory
FILM3004 Film Genres and Styles
FILM3006 Cinemas and Cultures

and at least 18 units of credit from Upper Level courses with a PFST, THFI or THST prefix.
Bachelor of Arts (Dance) Bachelor of Education

The BA(Dance) BEd (program 3408) is a specialist double degree in Dance and Dance Education. Although a wide variety of dance careers is open to graduates, the primary focus of the double degree program is to equip graduates to serve as dance teachers in schools and in the community. The program offers extended study in four major areas (plus the General Education program). Dance Practice offers dance styles designed to improve and consolidate students’ dance skills. Dance Theory is a sequence of mainly theoretical courses which provide an intellectual rationale for understanding the course. Dance Education and Education both give dance a pedagogic context as well as introduce students to educational theories. A major sequence in a second course area from within the Faculty provides students with their second teaching subject.

The program carries 192 units of credit and consists of:

**Level 1**
- DANC1001 Dance Styles 1 S1
- DANC1002 Dance Styles 2 S2
- DANC1101 Anatomical Foundations of Dance Education S1
- DANC1102 Teaching Safe Dance S2
- EDST1101 Educational Psychology 1 S1

**Upper Level**
- DANC2000 Dance Analysis and Composition 1 S1
- DANC2002 Theatre Production S2
- DANC2005 Dance Analysis and Composition 2 S2
- DANC2007 History of Dance S1
- DANC2103 Dance Styles 3 S1
- DANC2104 Dance Styles 4 S2
- DANC2105 Dance Styles 5 S1
- DANC2106 Dance Styles 6 S2
- DANC2107 Dance Styles 7 S1
- DANC2201 The Teaching-Learning Process in Dance S2
- DANC2203 Dance Teaching Practice S2
- DANC2209 Dance Method A S1
- DANC2211 Dance Method B S2
- EDST4080 Special Education S1
- EDST4081 Professional Issues in Teaching S1
- EDST4093 Gifted and Talented Students: Recognition and Response S1

plus 30 units of credit from Upper Level courses in the approved major sequences

plus 6 units of credit in the requisite Second Teaching Method course offered by the School of Education

and

12 units of credit in courses approved by the Faculty in the General Education program.

**Outside Credits**

In special circumstances students may be given permission to include towards a major sequence in the School up to a maximum of 6 units of credit in a related course or courses offered by another school/department. It is imperative, however, that they seek the written authorisation of the Head of School prior to making their enrolment.

**Honours Entry**

Qualifications for entry to Year 4 are determined by the School. The minimum requirements, however, for students proposing to undertake in 2005 a single Honours degree in Film, Theatre and Performance Studies, or Film/Theatre and Performance Studies, are that they must have obtained 54 units of credit in the School, or 48 units of credit for combined Honours, and have passed all courses in the School at an average of a good Credit grade (70%) or better. This total must include not only those courses required for one of the three major sequences, but also any additional prerequisites.

BA students proposing to undertake a single or combined Honours degree in either Film, or Theatre and Performance Studies, or Film/Theatre and Performance Studies should consult the School prior to making their enrolment.

BA/Dance BEd students seeking to undertake Dance Honours must have completed the 192 units of credit as prescribed and achieved a minimum average grade of Credit in Dance courses. These students must consult the Dance Program Coordinator during their second or third year in order to plan an appropriate program of study.

**Honours in Film**

All students undertaking an Honours degree in Film must have completed 54 units of credit within the School. Within the major in Film, they must complete at least 12 units of credit in FILM courses at Level 3 at Credit grade or better.

**Honours in Theatre and Performance Studies**

All students undertaking an Honours degree in Theatre and Performance Studies must have completed 54 units of credit within the School. Within the major in Theatre and Performance Studies, they must complete at least 12 units of credit from any Upper Level course with a PFST, THFI or THST prefix at Credit grade or better.

**Honours in Film/Theatre and Performance Studies**

All students undertaking an Honours degree in Film/Theatre and Performance Studies must have completed at least 60 units of credit within the School. Within the major in Film/Theatre and Performance Studies, they must complete at least 12 units of credit from any Upper Level course with a PFST, THFI or THST prefix at Credit grade or better plus 12 units of credit in FILM courses at Level 3 at Credit grade or better.

**Level 1**
- FILM1101 Introduction to Film S1
- FILM1105 Working with Image and Sound S2
- THFI1102 Reading Performance S2
- THST1101 Introduction to Theatre S1

**Upper Level Studies in Dance**

The following courses are available only to BA(Dance) BEd students:
- DANC2000 Dance Analysis and Composition 1 S1
- DANC2002 Theatre Production S2
- DANC2005 Dance Analysis and Composition 2 S2
- DANC2007 History of Dance S1
- DANC2103 Dance Styles 3 S1
- DANC2104 Dance Styles 4 S2
- DANC2105 Dance Styles 5 S1
- DANC2106 Dance Styles 6 S2
- DANC2107 Dance Styles 7 S1
- DANC2201 The Teaching-Learning Process in Dance S2
- DANC2203 Dance Teaching Practice S2
- DANC2209 Dance Method A S1
- DANC2211 Dance Method B S2
- EDST4080 Special Education S1
- EDST4081 Professional Issues in Teaching S1
- EDST4093 Gifted and Talented Students: Recognition and Response S1

plus 30 units of credit from Upper Level courses in the approved major sequences

plus 6 units of credit in the requisite Second Teaching Method course offered by the School of Education

and

12 units of credit in courses approved by the Faculty in the General Education program.

**Outside Credits**

In special circumstances students may be given permission to include towards a major sequence in the School up to a maximum of 6 units of credit in a related course or courses offered by another school/department. It is imperative, however, that they seek the written authorisation of the Head of School prior to making their enrolment.

**Honours Entry**

Qualifications for entry to Year 4 are determined by the School. The minimum requirements, however, for students proposing to undertake in 2005 a single Honours degree in Film, Theatre and Performance Studies, or Film/Theatre and Performance Studies, are that they must have obtained 54 units of credit in the School, or 48 units of credit for combined Honours, and have passed all courses in the School at an average of a good Credit grade (70%) or better. This total must include not only those courses required for one of the three major sequences, but also any additional prerequisites.

BA students proposing to undertake a single or combined Honours degree in either Film, or Theatre and Performance Studies, or Film/Theatre and Performance Studies should consult the School prior to making their enrolment.

BA/Dance BEd students seeking to undertake Dance Honours must have completed the 192 units of credit as prescribed and achieved a minimum average grade of Credit in Dance courses. These students must consult the Dance Program Coordinator during their second or third year in order to plan an appropriate program of study.
Modern Language Studies

School Office: Reception Room 258, Morven Brown
Email: languages@unsw.edu.au

The School of Modern Language Studies teaches majors in Chinese and Indonesian Studies, French, German and Russian Studies, Japanese and Korean Studies, Linguistics, Modern Greek and Spanish and Latin American Studies. Some courses are also available in Italian and Latin. The courses listed below are taught in English and are available to all students who meet the prerequisites. They are team-taught by staff members from different cultural backgrounds and will emphasise cross-cultural analysis.

Upper Level
MODL2000 Cross-Cultural Communication S1
MODL2002 Introduction to Professional Interpreting S2

Music and Music Education

Head of School: Dr Christine Logan
School Office: Room G19, Robert Webster Building
Tel: (02) 9385 4871
Email: music@unsw.edu.au
Website: http://music.arts.unsw.edu.au/

The School of Music and Music Education offers the following undergraduate degrees and courses of study:
1. A major sequence and an Honours program within the Bachelor of Arts (BA) or some other Bachelor programs
2. The Bachelor of Music degree (BMus)
3. The combined Bachelor of Music Bachelor of Education degree (BMus BEd)
4. The combined Bachelor of Music Bachelor of Arts degree (BMus BA)
5. Fundamentals of Music, which serves as an introductory course in musicianship and musical techniques
6. A Diploma in Music which may be undertaken concurrently with another program of study or by students who already hold a Bachelor Degree in another discipline other than music

1. The Bachelor of Arts (BA) with a major in music is a three year degree designed to develop musicianship and performing skills in association with an exploration of musicology: music history, style, musical perception and analysis, music technology, and the study of music in its cultural contexts (ethnomusicology). There are two possible major sequences. The first is:

Year 1
MUSC1101 Music Reinvented
MUSC1312 BA Musicianship A

Year 2
MUSC2311 BA Musicianship B
MUSC2312 and Option in Musicology

Year 3
MUSC3311 or Option in Musicology or Musicianship Option in Musicology or Musicianship

Performance in one of the performance ensembles offered by the School is part of each of the BA Musicianship A, B, C courses. At least 6UOC at 3000 level must be completed in Year 3.

The second possible major sequence (for students with less formal training in music) is:

Year 1
MUSC1001 Music Fundamentals
MUSC1312 BA Musicianship A

Year 2
MUSC2111 and MUSC2311 Introduction to Musicology and BA Musicianship B
MUSC2312 BA Musicianship C

Year 3
Option in Musicology or Musicianship Option in Musicology or Musicianship

Performance in one of the performance ensembles offered by the School is part of each of the Music Fundamentals and BA Musicianship A, B, C courses. At least 6UOC at 3000 level must be completed in Year 3.

The Bachelor of Arts (BA) permits the combination of music with a wide range of other options in the Faculty of Arts and Social Sciences and in other faculties, including choices such as theatre, film and dance, languages, history, philosophy and psychology. Through double degrees such as the BA LLB or the BSc BA, it may be possible to combine serious music studies with law, science and other degree courses.

BA students who have completed HSC Music 1 or who have AMEB or equivalent grades below 7th grade performance and 5th grade musicianship are encouraged to complete MUSC1001 (Music Fundamentals). Completion of this course at a required level provides the means of proceeding to a BA with a major in Music, and may also provide, if combined with a satisfactory audition, a means for subsequent enrolment in the BMus, the BMus BEd, or the BMus BA.

Consistently good work in the BA with a major in Music and completion of additional courses in second and third years may lead to a fourth (Honours) year of study completing a BA (Hons).

2. The Bachelor of Music (BMus) is a three year specialist music degree which enables students to develop skills and knowledge in music as preparation for professional work in areas as diverse as music performance, private teaching, broadcasting, recording, arts administration, concert planning, music and arts journalism, arranging and composition. Students undertake studies in professional practices, musicology and ethnomusicology – including music history, style, musical perception and analysis, music in its cultural contexts – and musical technology, performance, jazz studies and composition. At the same time students have enough flexibility in their course to enable them to combine music studies with some work in a related discipline like theatre and film, or in languages, English literature and language, history, philosophy, amongst others.

Admission to the program is subject to a satisfactory audition/interview and an acceptable level of attainment in year 12 studies or equivalent. Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

BMus students must take part in at least two of the performance ensembles offered by the School, one of which must be a major performing ensemble (refer to School handbook for details).

Consistently good work in the BMus may lead to a fourth (Honours) year of study, completing a BMus(Hons).

3. The Bachelor of Music Bachelor of Education (BMus BEd) is a four year professional double degree which offers graduates a wide range of opportunities in music teaching and other music related careers. The BMus BEd offers an integrated training in six major areas: Musicology, Musicianship, Music Education Studies, Performance Studies, Education Studies and Contextual Studies. As well as developing many skills in teaching classroom music from early primary to final secondary grades (K-12), the BMus BEd provides a specialist sequence of courses designed to train conducting and classroom teachers of instrumental and vocal music. A special feature of the BMus BEd is the attention given to music history, aural training and musicianship courses as core units in the first three years of the program. In addition to the thorough grounding provided in Western art music, specialist courses dealing with music in its cultural contexts (ethnomusicology), musical technology and contemporary pop/ jazz styles broaden and enrich the academic and professional capacities of all graduates. Graduates are qualified to teach classroom and instrumental/vocal music from kindergarten to year 12, and are accredited to teach in all Australian states. The student's training involves practice teaching sessions in Years 1, 2 and 3 and 4 in a variety of different schools.

Admission to the program is subject to a satisfactory audition/interview and acceptable level of attainment in Year 12 studies or equivalent.

Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

At the end of Year 4, students may be permitted to enter an Honours Year in either Music or Music Education. Students who satisfy the requirements for Honours as well as those for the award of the BMus BEd double degree will graduate with the award BMus BEd (Hons).

4. The Bachelor of Music Bachelor of Arts (BMus BA) is a four year double degree which combines the full professional training of the BMus with an extensive range of other options within the Faculty of Arts and Social Sciences. The music degree develops musicianship and musical skills in general through courses in musicology and ethnomusicology – including music history, style, musical perception and analysis, music in its cultural contexts – and musical technology, performance, jazz studies and composition. The Arts degree offers a wide range of options...
for specialist studies in two or three other areas within the Faculty. The whole range of professional work open to BMus graduates in performance, private teaching, broadcasting, recording, arts administration, concert planning, music and general arts journalism, arranging and composition will be open to the BMus BA graduates. In addition, the BA will qualify them for public and private sector administrative and policy positions.

Admission to the program is subject to satisfactory audition/interview and an acceptable level of attainment in year 12 studies or equivalent. Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

3. Music Fundamentals serves as an introductory course in musicianship and musical techniques. It is open to all undergraduates and does not have a musical prerequisite.

6. The Diploma in Music (program 3418) may be taken either concurrently with a non-music Bachelor program (with approval from a student's program authority) or as a three year, part-time program for students who already hold a Bachelor degree (with approval from the Faculty of Arts and Social Sciences). The structure of the Diploma follows that of the Bachelor of Arts major in music (item 1 above).

University Performance Ensembles – Music studies in the Faculty concentrate on the texts and contexts of music, involve the active development of the student's musicianship and develop practical abilities. Performance groups run by the School include: The Collegium Musicum Choir, the UNSW Orchestra, the Pipers Wind Band (Concert Band), a vocal chamber group the Burgundian Consort, chamber music ensembles, Traditional Music Group, Handbell Ensemble, Jazz Groups. The Collegium Musicum Choir of UNSW is open to all students and staff of the University interested in choral singing. The choir rehearses each Wednesday evening from 4.30–7.30 pm and gives several public concerts each year, often with the Collegium Musicum Orchestra who are based on the Australia Ensemble and resident at UNSW. For audition and further details, please contact the School of Music and Music Education.

The University of New South Wales Orchestra and Concert Band are open to UNSW students and staff with the necessary instrumental performance standards. The orchestra rehearses each Tuesday evening from 6.30–8.30 pm and the Concert Band rehearses each Tuesday from 4:00–6:00 pm during session. Both give several public performances each year. For further details, please contact the School Office.

Core Courses

MUSC1001 Music Fundamentals
MUSC1101 Music Reinvented
MUSC1302 Musicianship 1A
MUSC1312 BA Musicianship A
MUSC1401 Professional Practices A
MUSC1402 Professional Practices B
MUSC1501 Music Performance 1A
MUSC1502 Music Performance 1B
MUSC1601 Introduction to Music Education
MUSC2111 Introduction to Musicology
MUSC2301 Musicianship B
MUSC2302 Musicianship C
MUSC2311 BA Musicianship B
MUSC2312 BA Musicianship C
MUSC2401 Professional Practices C
MUSC2402 Professional Practices D
MUSC2501 Music Performance 2A
MUSC2502 Music Performance 2B
MUSC2601 Introduction to Secondary Music Education
MUSC3101 Professional and Ethical Practices in Music
MUSC3401 Advanced Professional Practices A
MUSC3402 Advanced Professional Practices B
MUSC3501 Advanced Music Performance 3A
MUSC3502 Advanced Music Performance 3B
MUSC3601 Specialist Studies in Music Education
MUSC3602 Creativity and Special Topics in Music Education
MUSC3612 Principles & Processes of Music Education
MUSC4601 Advanced Studies in Music Education
MUSC4602 Music Teaching Experience
MUSC4650 Conducting

Musicology Options

MUSC2101 Music of the Baroque
MUSC2111 Introduction to Musicology
MUSC2112 Music of the 18th/19th Centuries

MUSC2132 Music of the Middle Ages and Renaissance
MUSC2201 Music of Aboriginal Australians
MUSC3101 Professional and Ethical Practices in Music
MUSC3112 Seminar in Musicology
MUSC3131 Jazz and Popular Music Studies
MUSC3162 Twentieth Century Music
MUSC3212 Music of India

Musicanship Options

MUSC3301 Music Analysis
MUSC3302 Orchestration and Arrangement
MUSC3311 Electronic Music
MUSC3331 Advanced Electronic Music
MUSC4650 Conducting

Honours Level

MUSC4000 Bachelor of Music Honours
MUSC4001 Music Honours (BA)
MUSC4002 Music Education Honours

Organisation and Management

Head of School: A/Prof Lucy Taksa
School Office: Room 4096, Rupert Myers Building
Email: ltaksa@unsw.edu.au
Tel: (02) 9385 7152
Website: www.ibob.unsw.edu.au/

The School of Organisation and Management was formed on 1 July 2004 by the merger of the School of Industrial Relations and Organisational Behaviour and the School of International Business. Consequently course codes previously starting with IROB and IBUS are now listed in this handbook under MGMT. The School is located in the Faculty of Commerce and Economics and offers three distinct disciplinary streams: Human Resource Management; Industrial Relations; and International Business to students within the Faculty of Arts and Social Sciences. Students within the Faculty of Arts and Social Sciences may undertake a major in Human Resource Management, Industrial Relations or International Business. It is not possible to major in more than one of these streams.

The specialisation in Human Resource Management provides a strong practical and theoretical grounding in the policies and processes involved in the management of people at work. In a climate of rapid economic change, effective labour management is being seen as a critical component of the operation and strategic planning of both private firms and public sector organisations.

International Business is a rapidly growing field of study dealing with the development, strategy, and management of multinational enterprises. Business is becoming increasingly international and the most effective leaders and professionals of the future will be those who know both to deal with the problems of doing business and managing organisations in a complex and uncertain global business environment.

Doing business and making decisions internationally involves greater complexity and is much more challenging compared to decision making restricted to the domestic context. Specialist knowledge and skills are required to be successful at international business. For example, strategic decisions have to be made about which countries to operate in and whether or not to export or license, whether to set up a new facility, establish a joint venture or acquire an existing business, and how to sustain competitiveness internationally. Cultural differences also have to be understood to conduct effective business negotiations and to manage people in a cross-border context.

The School’s program of study in Industrial Relations focuses on the institutions, practices and processes associated with contemporary employment relations. It is designed on a multidisciplinary social science basis to foster an appreciation of the many important questions relating to the role of individuals, trade unions, employers and government bodies in the world of work.

Major Sequence in Industrial Relations

A total of 42 units of credit obtained in the following Required and Option courses:

Required Courses (18 units of credit)

MGMT1701 Industrial Relations
MGMT1702 Labour Organisation
MGMT2702 Industrial Law
Option List A (Minimum 12 units of credit)
MGMT2704 Social Organisation of Work
MGMT2715 Labour History
MGMT2705 Management and Employment Relations
MGMT3706 Industrial Relations Policies and Processes (not offered 2005)

Option List B (Minimum 6 units of credit)
MGMT2703 International Employment Relations
MGMT2718 Human Resource Management
MGMT2724 Health and Safety at Work
MGMT3702 International Human Resource Management Practice
MGMT3708 Research Methods in Employment and Management
MGMT3721 Negotiation Skills
MGMT3724 Strategic Human Resource Management
MGMT3728 Managing Pay and Performance
MGMT3729 Managing Workplace Training

Honours Entry
To progress to Year 4 Honours in Industrial Relations a student must:
1. Complete the specified number of Required and Options courses, plus MGMT3708*
2. Pass all these courses and obtain average grades of 71% or better in these courses
3. Obtain the permission of the Honours Coordinator to undertake the Honours year

* MGMT3708 is a prerequisite for Honours & should normally be taken as an Option in the session preceding the Honours year.

Honours Level
Students need to complete the following:
1. A thesis of 20,000 words
2. Honours Seminar (both sessions)
3. Two approved MGMT courses, one per session. (Details of approved courses may be obtained from the Head of School.)

Students undertaking Honours in Industrial Relations should enrol in one of the following course numbers in each session:
MGMT4736 Industrial Relations 4 Honours Full-Time
MGMT4737 Industrial Relations 4 Honours Part-Time

Major Sequence in Human Resource Management
A total of 42 units of credit obtained in the following Required and Option courses:

Required Courses (18 units of credit)
MGMT1701 Industrial Relations
MGMT1712 Management of Organisations
MGMT2718 Human Resource Management

Option List A (minimum 12 units of credit)
MGMT3702 International Human Resource Management Practice
MGMT3724 Strategic Human Resource Management
MGMT3728 Managing Pay and Performance
MGMT3729 Managing Workplace Training

Option List B (minimum 6 units of credit)
MGMT2702 Industrial Law
MGMT2703 International Employment Relations
MGMT2704 Social Organisation of Work
MGMT2715 Labour History
MGMT2724 Health and Safety at Work
MGMT3705 Management and Employment Relations
MGMT3706 Industrial Relations Policies and Processes (not offered in 2005)
MGMT3708 Research Methods in Employment and Management*
MGMT3721 Negotiation Skills

Honours Entry
To progress to Year 4 Honours in Human Resource Management a student must:
1. Complete the specified number of Required and Options courses, plus MGMT3708*
2. Pass all these courses and obtain average grades of 71% or better in these courses
3. Obtain the permission of the Honours Coordinator to undertake the Honours year

* MGMT3708 is a prerequisite for Honours & should normally be taken as an Option in the session preceding the Honours year.

Honours Level
1. A thesis of 20,000 words
2. Honours Seminar (both sessions)
3. Two approved MGMT courses, one per session. (Details of approved courses may be obtained from the Head of School.)

Students undertaking Honours in Human Resource Management should enrol in one of the following course numbers in each session:
MGMT4740 Human Resource Management 4 Honours Full-Time
MGMT4741 Human Resource Management 4 Honours Part-Time

Major Sequence in International Business
A total of 42 units of credit obtained in the following required and option courses.

Required Courses
Level 1 (12 units of credit)
MGMT1101 Global Business Environment
MGMT1102 Managing Across Cultures

Upper Level (18 units of credit)
MGMT2101 International Business and Multinational Operations
MGMT3101 International Business Strategy
MGMT3102 Asia-Pacific Business

Options (12 units of credit)
MGMT2105 Chinese Business Enterprise
MGMT2106 Comparative Management Systems in East Asia
MGMT2110 Alliance Management and International Co-operation
MGMT3103 Global Stakeholder Management

Other courses in Arts and Social Sciences may be substituted for the above options with the approval of the Head, School of Organisation and Management.

Honours Entry
To progress to Year 4 Honours in International Business a student must:
1. Complete 48 units of credit in International Business satisfying the requirements of a major sequence*
2. Pass all these courses and obtain average grades of 71% or better in these courses
3. Obtain the permission of the Honours Coordinator to undertake the Honours year

* Students are highly encouraged to take MGMT3708 as a Free Option in the session preceding the Honours year.

Honours Level
1. A thesis of 20,000 words
2. Honours Seminar (both sessions)
3. Two approved MGMT courses, one per session. (Details of approved courses may be obtained from the Head of School.)

Students undertaking Honours in International Business should enrol in one of the following course numbers in each session:
MGMT4000 International Business Honours Full-Time
MGMT4050 International Business Honours Part-Time
MGMT4200 Combined International Business Honours Full-Time
MGMT4250 Combined International Business Honours Part-Time

Philosophy
Administrative Officer: Soon Ng
Tel: (02) 9385 2371
Email: philosophy@unsw.edu.au
Website: http://philosophy.arts.unsw.edu.au

Studying Philosophy provides intellectual skills which can help you to think critically, to better organise your thoughts and to present them logically and persuasively. Philosophy also addresses fundamental questions about the nature of reality, language, meaning, human knowledge and values. It provides a useful complement to studies in many disciplines but especially those in which logical thinking and clear expression is important. The range of Upper Level courses makes it possible for students majoring in other disciplines to select courses complementing their interests.

Level 1
There are four Level 1 courses. Students can gain Upper Level status by completing one but it is suggested that two be completed if you wish to complete a major sequence in Philosophy.
Upper Level

Students must be in at least Year 2 of study in the Faculty in order to take Upper Level courses in Philosophy. Each course is designed to be self-contained, but particular groupings of courses will enable students to pursue sustained treatments of particular areas or historical developments in the treatment of issues. The School recommends that students intending to continue upper level courses enrol in one or more PHIL2000 gateway courses. In certain circumstances the prerequisites specified for courses may be waived. Students who feel they have a case for a concession of this kind should consult the School.

Major Sequence

A major sequence in Philosophy is a sequence of courses offered by the School carrying at least 42 units of credit including no more than 12 units of credit at Level 1 and at least 18 units of credit in PHIL2100 courses or above. Subject to the approval of the School, a student may be permitted to count up to 6 units of credit offered outside the School toward a major sequence in Philosophy. Some Philosophy courses may be counted towards a major sequence in the School of History and Philosophy of Science and in the School of Education.

Honours Entry

For entry to Philosophy Honours (Research), students must normally have completed 54 units of credit in Philosophy, consisting of 6 or 12 units of credit at Level 1 and the remainder at Upper Level. Upper Level courses must include at least 24 units of credit in PHIL2100 courses or above, including PHIL3910 Advanced Philosophy Seminar. Students must also normally have a grade average of at least 70 per cent in their Philosophy courses, including at least one Distinction result.

For Combined Honours (Research), the requirement is normally 48 units of credit in Philosophy, consisting of 6 or 12 units of credit at Level 1 and the remainder at Upper Level. Upper Level courses must include no more than 12 units of credit at the PHIL2000 level, at least 24 units of credit in PHIL2100 courses or above, including PHIL3910 Advanced Philosophy Seminar. Students must also normally have a grade average of at least 70 per cent in their Philosophy courses, including at least one Distinction result. The School recognises that the particular overall programs of some students enrolling in Combined Honours (Research) might be such as to make it desirable to vary the Philosophy course requirements for admission. Students are invited to consult the School about this matter with regard to their particular situations.

Subject to approval of the School, which considers the individual courses nominated by a student and the student’s overall program in Philosophy, a student may be permitted to count up to 6 units of credit offered outside the School toward satisfying the Honours entry requirements.

Level 1

PHIL1007 Knowledge and Reality S2
PHIL1008 Ethics and Society S2
PHIL1010 Thinking about Reasoning S1
PHIL1014 Introduction to European Philosophy S1

Upper Level

PHIL2001 Logic S1
PHIL2002 Ways of Reasoning S1
PHIL2004 20th Century Analytical Philosophy S1
PHIL2005 20th Century European Philosophy S2
PHIL2006 Classical Political Philosophy S2
PHIL2117 Philosophical Logic S2
PHIL2118 Philosophy and Biology S2
PHIL2206 Philosophy of Mind S1
PHIL2208 Contemporary Epistemology S2
PHIL2209 Contemporary Metaphysics S1
PHIL2218 Foundations of Artificial Intelligence S2
PHIL2418 Bioethics S1
PHIL2419 Existential Phenomenology S1
PHIL2421 Philosophy, Education and Society S1
PHIL2422 Biopolitics and Biotechnology S2
PHIL2505 Kant S1
PHIL2511 Political Theory and the Rights of Indigenous Peoples S2
PHIL2515 Existence, Alienation and freedom S2
PHIL3910 Advanced Philosophy Seminar S2

Honours Level

PHIL4000 Philosophy Honours (Research) Full-Time
PHIL4050 Philosophy Honours (Research) Part-Time
PHIL4500 Combined Philosophy Honours (Research) Full-Time
PHIL4550 Combined Philosophy Honours (Research) Part-Time

Philosophy of Science

Coordinator: Anthony Corones, School of History & Philosophy of Science
Office: Room LG24, Morven Brown
Tel: (02) 9385 2357
Email: a.corones@unsw.edu.au

The Philosophy of Science program is jointly taught by the School of Philosophy and the School of History and Philosophy of Science. It is designed to provide a coherent sequence of courses both for students who wish to prepare themselves for undertaking advanced study within the areas of logic, methodology and philosophy of science, and those who merely wish to deepen their comprehension of the course matter of a major in another field. While a second major may be taken in any discipline available, the program is designed in such a way that students can pursue a second major in either Philosophy or History and Philosophy of Science.

A major sequence is made up of not less than 36 units of credit. Students should note, however, that they may not ‘double-count’ courses towards a second major and they must satisfy general Faculty regulations. Students may also need to meet certain prerequisite requirements within the program. The program given below may be varied by the Coordinator.

Level 1

6 units of credit obtained from one of the following courses:

HPSC1100 Cosmos and Culture
HPSC1200 Science, Good, Bad and Bogus
PHIL1007 Knowledge and Reality
PHIL1008 Ethics and Society
PHIL1010 Thinking about Reasoning
PHIL1011 Minds, Bodies and Persons

Upper Level

18 units of credit obtained in the following courses:

HPSC2200 Philosophy of Science
PHIL2106 Logic and either
HPSC3200 Topics in the Philosophy of Science or
PHIL2107 Advanced Philosophy of Science or
PHIL2117 Philosophical Logic

12 units of credit obtained in the following:

HPSC2100 The Scientific Revolution
HPSC2600 Galileo, Science and Religion
HPSC2610 Computers, Brains and Minds
HPSC3200 Topics in the Philosophy of Science
PHIL2107 Advanced Philosophy of Science or
PHIL2116 Scientific Method
PHIL2117 Philosophical Logic
PHIL2118 Philosophy and Biology
PHIL2206 Philosophy of Mind
PHIL2207 Philosophy of Psychology or
PHIL2208 Contemporary Epistemology
PHIL2218 Philosophical Foundations of Artificial Intelligence

*Students may not count the same course toward satisfaction of both the 12 units of credit requirement and the 18 units of credit requirement from the above list.

# Not offered in 2005.

Physics

Undergraduate Director: A/Prof C Hamer
Tel: (02) 9385 4553
Email: info@phys.unsw.edu.au
Website: www.phys.unsw.edu.au

The School of Physics is in the Faculty of Science. The 1st Year Office is in Room 67, Old Main Building. Enquiries about Upper Level courses are dealt with by the Physics Friend, School Office, Room 62, Old Main Building.

Level 1

PHYS1111 Fundamentals of Physics
PHYS1121 Physics 1A
PHYS1221 Physics 1B

Upper Level

PHYS2101 Mechanics
PHYS2102 Computational Physics
PHYS2103 Laboratory A
PHYS2040 Quantum Physics  
PHYS2050 Electromagnetism  
PHYS2060 Thermal Physics  
PHYS2160 Astronomy  
PHYS2170 The Search for Life Elsewhere in the Universe  
PHYS2410 Biophysics 1  
PHYS2630 Electronics  
PHYS2801 Atmospheric Science  
PHYS2810 Atmospheric Physics  
PHYS3020 Statistical Physics  
PHYS3040 Experimental Physics A1  
PHYS3050 Nuclear Physics  
PHYS3060 Advanced Optics  
PHYS3070 Experimental Physics A2  
PHYS3080 Solid State Physics  
PHYS3160 Astrophysics

PHYS3780 Photonics Laboratory

Political Economy

Coordinator: Dr George Argyrous, School of Social Science and Policy  
Office: G23, Morven Brown  
Email: g.argyrous@unsw.edu.au

The major in Political Economy consists of seven courses, each of 6 units of credit, for a total of 42 units of undergraduate credits. At least 12 credits must be at the 3000 level and the major must include the following three courses:

First year  
PESCO1000 Introduction to Political Economy S1  
PESCO1001 Australia in the Global Economy S2  

Upper Level  
PESCO3000 Political Economy S2

Bachelor of Arts

BA students majoring in Political Economy must also complete the following course, which is a prerequisite for PESCO3000:  
PESCO2000 Political Economy and the State (currently SLSP2000) to be excluded, S1). They must also complete any three courses from the list of electives below, which must include at least one 3000 level course.

Bachelor of Social Science

Students majoring in Political Economy as part of the Bachelor of Social Science will complete the normal core courses for the Bachelor of Political Economy. Note that SLSP2000 excludes PESCO2000.

Students must also select 4 courses from the list of electives below, which must include at least one 3000 level course.

Electives

COMD2000 The Theory and Practice of Development (SLSP2701)  
COMD2050 Sustainable Development, Globalisation and the Third World (HPSC2550)  
ECON3109 Economic Growth, Technology and Structural Change  
ECON3110 Development Economics  
ECON3120 Economic Reasoning  
EURG2600 European Integration  
HIST2047 Winners and Losers: Poverty, Welfare, Justice in Australia  
POLS2023 Globalisation and Uneven Development  
POLS2040 Politics and Business  
POLS2049 Asia and the International Political Economy  
POLS3047 Theories of the Market and its Critics  
POLS3054 Theorising International Political Economy  
SOC2103 Globalisation and Fragmentation  
SOC2104 Technology, Work, Culture  
SOC3604 Gender, Work and Employment

Honours

Students who have completed 48 units of credit in Political Economy, including all compulsory courses, at a good Credit average, may be admitted to a Combined Honours program. They must also have met the requirements for a single Honours program in one of the Schools or Departments teaching in the Bachelor of Arts program. For Combined Honours, students are required to present a thesis as approved by the Heads of the participating Schools or Departments.

POLSC0500 Combined Political Economy Honours (Research Full-time)  
POLSC0550 Combined Political Economy Honours (Research Part-time)

Politics and International Relations

Head of School: Professor Gavin Kitching  
Administration: Pat Hall-Ingrey & Samantha Prats  
Tel: 93853786  
Email: p.hall-ingrey@unsw.edu.au or s.prats@unsw.edu.au

The School of Politics and International Relations is concerned with the study of political action, ideas, institutions and actors, from the local to the global. It deals with governments and how policies are made on a wide range of issues, such as the economy, the environment, and social issues. It explores ideas and the important thinkers who have helped shape political beliefs. It analyses different political systems, cultures and societies. It also covers the study of International Relations, in theory and practice, the global economy, international law, regionalism and institutions such as the United Nations. Our objective is to describe, analyse and understand the politics of our own country, of other countries and of the global community, as well as to evaluate ideas about politics.

Major Sequence

Any student who wishes to gain a major sequence in Politics and International Relations must obtain 6 Level 1 and 36 Upper Level (or 12 Level 1 and 30 Upper Level) units of credit in Politics and International Relations. However, provided that 6 Level 1 units in Politics and International Relations have been obtained, ARTS1100 will be accepted as part of the School major.

Level 1

Normally students take only one Level 1 course in each session. Students cannot count more than 12 units of credit from Level 1 Politics and International Relations courses towards their degree.

POLSC1002 Power and Democracy in Australia S1  
POLSC1003 Australian Political Practice S2  
POLSC1005 Politics and Crisis: An Introduction to Western Political Theory S2  
POLSC1008 Politics of Post-Communist Systems S2  
POLSC1017 International Relations in the 20th Century S1  
POLSC1018 Politics, Power, Principle: An Introduction to Modern Political Theory S1  
POLSC1020 International Relations: Continuity and Change S2

Upper Level

Courses commencing with the numbers POLS30## have as their minimum prerequisite 36 units of credit; those commencing with the numbers POLS39## are advanced Upper Level lecture courses and require 36 units of credit including 6 units of Politics and International Relations at Credit level; while those commencing with the numbers POLS530## and POLS531# are Upper Level seminar courses and require at least a 65% average in 18 units of Politics and International Relations.

Upper Level Lecture Courses

POLSC2003 The Political Development of Contemporary China S2  
POLSC2008 Power and Policy in Australian Politics S2  
POLSC2015 Political Language S1  
POLSC2023 Globalisation and Uneven Development S2  
POLSC2033 Jews in the Modern Society S2  
POLSC2035 Multiculturalism in Law and Political Theory S2  
POLSC2037 International Law: Power, Politics and Ideology S1  
POLSC2040 Politics and Business S1  
POLSC2041 Sexuality and Power: The Social Relations of Sex and the Sexes S1  
POLSC2043 Free Speech S1  
POLSC2046 Political Rhetoric S2  
POLSC2047 Human Rights and Wrongs in Australia S1  
POLSC2048 International Security S2  
POLSC2051 Gender, Power and Politics in Australia S2  
POLSC2052 Activism and Public Policy S1

Advanced Upper Level Lecture Course

POLSC3001 States, Nations and Ethnic Identities S1
Upper Level Seminar Courses

POLS3024 Australian Foreign Policy $2
POLS3028 Perspectives on US Politics: The American President $2
POLS3034 Conflict and Continuity: Issues in Australian Politics $1
POLS3040 Early Political Texts $2
POLS3043 US Hegemony and International Law $2
POLS3050 Theories of Nationalism $2
POLS3054 Theorising the International Political Economy $1
POLS3055 Prime Ministers and Leadership $2

Advanced Upper Level Seminar Courses

POLS3910 The Art of Political Science $1

Honours Level

Coordinator: Prof Gavin Kitching
Email: g.kitching@unsw.edu.au
POLS4000 Politics and International Relations Honours (Research) Full-Time

For entry to the Politics and International Relations Honours Program (Research) students must normally have completed 54 units of credit (9 courses) at 70% average, including at least 6 Level 1 units of credit and 12 units of credit at Credit level from Advanced Upper Level POLS39. courses of which at least 6 units of credit must come from an Advanced Upper Level POLS391 seminar course. With the permission of the Head of School, a student may include up to 12 units of credit from related courses in other schools.

In other words, your 9 courses in POLS must include two Advanced Upper Level (AUL) courses, at least one of which must be a seminar course.

Combined Honours

The Combined Honours Program allows a student to undertake an Honours year in both Politics and International Relations and another discipline. The normal School of Politics and International Relations entry requirement for a student seeking admission to a Combined Honours Program is 48 units of credit with a grade average of 70% in Politics and International Relations, including at least 6 Level 1 units of credit and 12 units of credit at Credit level from Advanced Upper Level POLS39. courses of which at least 6 units of credit must come from an Advanced Upper Level POLS391 seminar course.

Psychology

The School of Psychology is in the Faculty of Science.

Head of School: A/Prof Peter Lovibond
Office: Room 1011, Mathews Building
Tel: (02) 9385 3041
Website: www.psy.unsw.edu.au

Psychology is the scientific study of human behaviour. It is a diverse discipline that includes study of the processes of perceiving, learning and memory; the assessment of abilities and attitudes; the origins of personality and emotional states; the nature and effects of social interactions with other people; brain-behaviour relationships; and the causes of abnormal behaviour. Study in the scientific discipline of psychology provides the background necessary for further training in the application of psychology in a variety of professional contexts (see below for details about the requirements for registration as a professional psychologist).

Psychologists work in clinical, correctional, counselling, legal, educational and organisational settings. People with training in psychology also pursue careers in diverse areas including academic and health research; rehabilitation; occupational health and safety; advertising and marketing; and personnel selection, training and management.

Students enrolled in the Bachelor of Arts or the Bachelor of Social Science degrees can study psychology for one or two years in order to learn about themselves and other people, develop analytic skills and enhance their employability. Psychology can also be taken as a major sequence within these degrees and is an ideal complement to majors in other domains when an understanding of the nature and causes of human behaviour is relevant to your chosen profession.

Students should be aware that a Psychology major sequence in the Bachelor of Arts or Bachelor of Social Science degrees does not satisfy the requirements for an “accredited three-year sequence in Psychology” as described below. To satisfy these requirements, students must complete three courses in addition to the major sequence.

It is not possible to satisfy the requirements for entry to Honours in Psychology within the Bachelor of Arts or Bachelor of Social Science degrees, but students with this goal can apply to transfer to the Bachelor of Psychology at the end of Stage 2. Students with this aim should consult with the School of Psychology for advice about program selection.

What is required to become a professional psychologist?

To become a member of the professional body, the Australian Psychological Society, and for registration as a psychologist in NSW, students first need a university Bachelor degree which includes an accredited three-year sequence in psychology as approved by the Australian Psychological Society, plus an approved fourth year. Students must also follow this by completing an accredited 5th and 6th year academic program such as one of the Master of Psychology degrees (Clinical, Forensic or Organisational) or a combined Doctor of Philosophy/Master of Psychology degree as offered by this University. An alternative of two years of supervised experience in professional practice may be undertaken for registration as a psychologist in NSW.

English Proficiency

A high proficiency in English is necessary to pass Psychology courses.

Major Sequence

A major in Psychology is obtained by the completion of 42 units of credit (7 courses) which consist of PSYC1001 and PSYC1011, PSYC2001, and four other Psychology Upper Level II or Level III courses (either one Level II and three Level III, or two Level II and two Level III).

An accredited three-year sequence in Psychology is obtained by the completion of 60 units of credit (10 courses) which consist of PSYC1001 and PSYC1011, PSYC2001 and three other Psychology Upper Level II courses, and PSYC3001 and three other Psychology Upper Level III courses including one course from at least two of the following three elective groups: Advanced Perceptual/Cognitive – PSYC3151, PSYC3211, PSYC3221, PSYC3311, PSYC3321; Advanced Biological – PSYC3051, PSYC3241, PSYC3251, PSYC3261; Advanced Social – PSYC3121, PSYC3271, PSYC3281.

Level I

PSYC1001 Psychology 1A $1
PSYC1011 Psychology 1B $2

Upper Level II

PSYC2001 Research Methods 2 $1
PSYC2061 Social and Developmental Psychology $1
PSYC2071 Perception and Cognition $2
PSYC2081 Learning and Physiological Psychology $1
PSYC2101 Assessment and Personality $2

Upper Level III

PSYC3001 Research Methods 3A $1
PSYC3011 Research Methods 3B $2
PSYC3051 Physiological Psychology $2
PSYC3121 Social Psychological Science $1
PSYC3141 Behaviour in Organisations $1
PSYC3120 Psychopathology $2
PSYC3121 Cognitive Science $2
PSYC3221 Vision and Brain $1
PSYC3241 Psychobiology of Memory and Motivation $1
PSYC3271 Personality and Individual Differences $1
PSYC3301 Psychology and Law $1
PSYC3311 The Psychology of Language $1
PSYC3331 Health Psychology $2
PSYC3341 Developmental Psychology $2

Russian Studies

Coordinator: Dr Ludmila Stern
Tel: (02) 9385 3649
Email: russian@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/russian/russian.html

Russian Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. Russian Studies offers a range of courses designed to develop an informed understanding of Russia and the former Soviet Union through the study of Russian language, literature, civilisation and history. Russian language courses cater both for complete beginners and also for advanced or native speakers. Although language study is required for a major sequence in Russian Studies, several of the Upper Level courses require no knowledge of the
Russian language and can be taken by students from other schools interested in learning about Russian literature, society and history.

Note: Students with any proficiency in Russian must consult the Staff in Russian Studies prior to enrolment, unless they have taken Russian in the previous session at UNSW. Please see: http://languages.arts.unsw.edu.au/main/placetest.html

Major Sequence

Major sequences require 42 units of credit in Russian Studies. It requires (1) 12 units or more from the language core; (2) the completion of RUSS2112 or higher (3) the completion of 18 units or more from upper level electives. Students are advised to consult with the Russian Studies staff to plan their program.

Honours Level

Entry into the Honours program requires 54 units of credit in an approved sequence, with an average grade of credit or better in Russian courses or 48 units of credit in an approved sequence with an average of Credit or better for entry to the Combined Honours program.

Social Science and Policy

Head of School: Prof Janet Chan

School Office: Room G30, Morven Brown Building

Tel: (02) 9385 2292

Email: slsp@unsw.edu.au

Website: http://slsp.arts.unsw.edu.au

The School of Social Science and Policy offers programs in social science and policy studies. These include the core program in the Bachelor of Social Science degree, Bachelor of Social Science in Criminology and a major sequence in policy studies in the Bachelor of Arts degree. Combined undergraduate degree programs are also offered that combine the Bachelor of Social Science with the Bachelors of Social Work, Commerce, Economics, Science, Art Theory and Law. Similar combinations of combined degrees are available within the Bachelor of Arts with a major sequence in Policy Studies.

The programs offered are interdisciplinary, drawing from all the social sciences to achieve an integrated social scientific approach to many of the key issues and problems facing societies today. They encourage and cultivate creativity and a critical perspective and develop skills in conducting research and in the application of social science to the policy process.

Special emphasis is placed on familiarising students with the ways in which social science is put into practice by using case studies drawn from current projects being undertaken or commissioned by governments, non-government and private sector organisations. The School aims to equip graduates with the skills and knowledge necessary to plan and conduct social research projects and to hold responsible positions in policy analysis and social research in either the public or private sectors. The Bachelor of Social Science combines a core program of study in social science, policy analysis and research methods with a major study in a particular social science discipline.

The core program aims to provide students with skills in undertaking social research particularly in an applied policy setting. These include written communication skills with particular emphasis on reports, submissions, position papers and proposals; the ability to undertake research and data analysis, both quantitative and qualitative; analysis and critical evaluation of research, arguments and policies; and the use of computers in social research and information processing.

The major study aims to equip students with a knowledge base in one of the social sciences.

In addition, students undertake elective courses, totalling at least 42 units of credit, from the courses offered in the Faculty of Arts and Social Sciences and courses carrying the equivalent of 12 units of credit chosen from the University's General Education program.

The degree may be taken at Pass or Honours level. The Pass degree is a three year full-time program requiring the completion of 44 units of credit including the required general education courses. Honours students complete, in addition to the Pass degree program, an extra year of full-time study or an extra eighteen months of part-time study. To be eligible to enter the Honours year students must perform at a credit or better average in both the Social Science and Policy core as well as in their major study.

The Core Program in the Bachelor of Social Science

The core program is a 48 units of credit sequence consisting of eight courses taken over three years.

Major Sequence in Policy Studies in the Bachelor of Arts

This sequence is designed for students enrolled in the Bachelor of Arts degree who wish to major in Policy Studies without completing the full Social Science and Policy core program including all the research methods courses. It would be suitable for students seeking employment in policy work which does not involve a substantial research component.

The major sequence in Policy Studies consists of at least 42 units of credit in courses offered by the School of Social Science and Policy of which no less than 6 and no more than 12 units of credit must be from Level 1 courses and no more than 6 units of credit from approved courses offered by other schools. Students should consult the School for a list of these approved courses.

Honours Level

The BSocSc Honours degree may be taken in two ways. All programs require completion of fourth year seminars and a substantial research project:

1. Social Science and Policy Honours, with a Major in an approved area

Prerequisite: Completion of the minimum requirements for a BSocSc Pass degree including the 48 units of credit BSocSc core program, SLS3911, and a Major concentration in an approved area, both with a good Credit average.

2. Combined Social Science and Policy Honours (Research)

Prerequisite: Completion of the minimum requirements for a BSocSc Pass degree including the 48 units of credit BSocSc core program, SLS3911 or equivalent in the relevant school, and the prerequisites for Combined Honours in the school/department in which the student has taken an approved Major concentration, both at a level of performance determined by the relevant course authorities.

For details concerning requirements, see Program and Course Information, and the appropriate entries of schools/Departments offering Combined Honours.

Honours in Policy Studies in the Bachelor of Arts

Entry to Honours in Policy Studies requires completion of 54 units of credit with at least a credit level average in courses offered by the School of Social Science and Policy, including at least 6 Level 1 units. The 54 units of credit may include up to 12 units of credit taken from approved courses offered by other schools and must include the following:
Students in their Honours year will enrol either in SLSP4100 or in SLSP4150.

**Level 1**

- **SLSP1000** Social Science & Policy  S1
- **SLSP1001** Research & Information Management  S2
- **SLSP1002** Introduction to Policy Analysis  S2

**Upper Level**

- **SLSP2000** Economy and Society  S1
- **SLSP2001** Applied Social Research  S1
- **SLSP2002** Policy Analysis Case Studies  S2
- **SLSP2201** Knowledge and Policy  S2
- **SLSP2601** Social Policy  S2
- **SLSP2701** The Theory and Practice of Development  S1
- **SLSP2800** Researching the Media  S2
- **SLSP2820** Crime and Punishment in Historical Perspective  S2
- **SLSP3000** Social Theory and Policy Analysis  S1
- **SLSP3001** Applied Social Research  2 S1
- **SLSP3002** Social Science and Policy Project  S2

**Advanced Upper Level Course**

- **SLSP3911** Inquiry and Interpretation in the Social Sciences  S2

**Honours Level**

- **SLSP4000** Social Science and Policy Honours (Research) Full-Time
- **SLSP4050** Social Science and Policy Honours (Research) Part-Time
- **SLSP4100** Policy Studies Honours (Research) Full-Time
- **SLSP4150** Policy Studies Honours (Research) Part-Time
- **SLSP4500** Combined Social Science and Policy Honours (Research) Full-Time
- **SLSP4550** Combined Social Science and Policy Honours (Research) Part-Time

**Social Work**

**Head of School:** Prof Richard Hugman

**School Office:** Room 1519, Mathews Building

**Administrative Assistant:** Maggie O'Keeffe

**Administrative Officer:** Christina Mangos

**Email:** Social.Work@unsw.edu.au

**Website:** http://socialwork.arts.unsw.edu.au

At the undergraduate level, the School of Social Work offers programs leading to the award of the degree of Bachelor of Social Work, and the combined degrees of Bachelor of Social Work/Bachelor of Laws, Bachelor of Social Work/Bachelor of Arts and Bachelor of Social Work/Bachelor of Science.

**Bachelor of Social Work**

The BSW degree (program 4031) is designed to prepare students for the professional practice of social work. It is expected to be undertaken as a four year full-time program, although part-time enrolment can be negotiated. The Honours program is available to students who have achieved appropriate results.

The aim is to produce a social worker who has a general foundation for continuing professional learning, and can undertake independent professional practice at a basic level of competence, utilising relevant knowledge and skills in accordance with the profession's values. Some courses are subject to prerequisite and corequisite requirements.

**Year 1 - Level 1**

**Session 1**

- **SOCW1001** Introduction to Social Work*  6
- **Psychology Elective**  6
- **Sociology Elective**  6
- **Elective**  6

**Session 2**

- **SOCW2003** Social Work Practice – Casework  6
- **General Education Elective**  3
- **General Education Elective**  3
- **SOCW2007** Social Work Practice – Bridge **  3

**Session 3**

- **SOCW3002** Social Work Practice – Groupwork  6
- **SOCW3001** Social Work Practice – Third Year Practicum  12
- **General Education Elective**  3
- **General Education Elective**  3

**Session 4**

- **SOCW3004** Social Policy 1*  6
- **SOCW3008** Social Work Practice – Selected Studies 1  6
- **SOCW3006** Socio-Legal Practice*  6
- **Research Elective**  6

**SOCW3005** Research Honours  6

**Year 4 - Upper Level**

**Session 1**

- **SOCW4002** Social Work Practice in Organisations  6
- **SOCW4003** Social Work Practice – Selected Studies 2  6
- **SOCW4004** Social Philosophy*  6
- **SOCW4006** Social Policy 2*  6

**Session 2**

- **SOCW4005** Social Policy Honours 6

**Year 5 - Honours**

**Session 1**

- **SOCW4800** Honours Thesis  24

**Bachelor of Social Work Bachelor of Arts**

The School also offers a combined Bachelor of Social Work/Bachelor of Arts. This is a five year program leading to the award of the two degrees of Bachelor of Social Work and Bachelor of Arts. An Honours program is available to students who have achieved appropriate results.

For details regarding the Bachelor of Social Work/Bachelor of Arts program, refer to the section ‘How to Structure your Program’.

**Bachelor of Social Work Bachelor of Social Science**

The School also offers a combined Bachelor of Social Work/Bachelor of Social Science. This is a five year program leading to the award of the two degrees of Bachelor of Social Work and Bachelor of Social Science. An Honours program is available to students who have achieved appropriate results.

For details regarding a Bachelor of Social Work/Bachelor of Social Science program, refer to ‘How to Structure your Program’.

**Sociology and Anthropology**

**Head of School:** A/Prof Michael Humphrey

**School Office:** Room 157/159, Morven Brown

**Tel:** (02) 9385 2399/1807

**Email:** sociology@arts.unsw.edu.au

**Website:** http://sociology.arts.unsw.edu.au

Sociology is a discipline for students with a special interest in human relationship and the multiplicity of interactive cooperation, conflict and communication which constitutes any society. The School of Sociology and Anthropology offers a diverse program where students may choose courses in sociology, social anthropology, cultural theory, cultural studies, sociological approaches to communication and the public media, political sociology and policy-related studies.

**Level 1**

First year sociology offers a broad introduction to sociology as a profound and productive way of describing, analysing and understanding society.
Students commencing their first year in 2005 of studying sociology and anthropology can choose between five introductory courses. Those students intending to take a major must do two first year courses. As the course descriptions indicate, Level 1 courses may focus on different societies and cultures, but each is an introduction for university students beginning their study of the discipline and is preliminary and prerequisite for more advanced study in later years of the degree.

SOCA1001 Cultural Identities S2
SOCA1002 Australian Society S2
SOCA1004 Relationships: Sociology and Everyday Life S1
SOCA1005 Australia's Media: Sociological Perspectives S2
SOCA1006 Introduction to Globalisation S1

**Major Sequence**

Students must complete 42 units of credit in order to gain a major in Sociology, including 12 units of credit in Level 1 courses and at least 12 units at Level 3. Provided six units of credit have been completed in Level 1 Sociology, ARTS1100 can be completed as part of a major in Sociology.

While a major in sociology consists of 42 units of credit, students may extend their study further and take one or two more sociology courses as part of their program.

**Part-time (_evening) study**

Part-time and evening students are advised that the School teaches as part of their program.

**Upper level courses**

- SOC2101 Encountering Modernity S2
- SOC2103 Globalisation and Fragmentation S2
- SOC2104 Technology, Work, Culture S1
- SOC2106 Cities: Experiencing Sydney S1
- SOC2108 Social Anthropology: Diversity, Difference, Identity S1
- SOC2110 Anthropology: Identity and the Cinema S2
- SOC2204 Pacific Island Research Fieldwork S2
- SOC2205 Society and Desire S2
- SOC2206 Embodiment S2
- SOC2210 Anthropology of Human Rights S2
- SOC3104 Global Migration, Global Refugees S1
- SOC3106 Anthropology and Tourism S2
- SOC3203 Oceanic Societies: Pacific Island Living S1
- SOC3204 Modernity and Development in the Pacific Islands S2
- SOC3206 Anthropology of Celebration S2
- SOC3208 Colonisation and Indigenous Identity Formation S1
- SOC3209 Indigenous Australia: Gendered Identities S2
- SOC3210 Whiteness – Beyond Colour: Identity and Difference S1
- SOC3407 Australian Migration Issues X1
- SOC3409 Crime, Gender and Sexuality X1
- SOC3410 Deviance X2
- SOC3411 Forensic Sociology S1
- SOC3607 Sociology of Ageing S1
- SOC3701 Discipline of the Law X2
- SOC3703 Nationalism, Citizenship and Cultural Identity S2
- SOC3801 Healing S2
- SOC3804 Living and Dying S2
- SOC3806 Medicine, the Body and Culture S1
- SOC3810 The Space of Terror S1
- SOC3912 Risk and Trust in Modern Society S2

**Honours program**

Honours in Sociology requires a further year of study after completing the requirements for a Pass degree including a more concentrated study of sociology in second and third year. Students who are achieving good grades are encouraged to plan a four-year program leading to an Honours degree in Sociology.

The last year of studying for an Honours degree is directed to students' development of research and writing skills which will prepare them for entering a career or proceeding to postgraduate research studies. The experience will provide skills in thinking, research and writing that will be invaluable in future pursuits, whether academic or otherwise.

**Honours entry**

Prior to enrolment in the Honours year, students must have:

- completed up to 54 units of credit in Sociology, including no more than two Level 1 Sociology courses
- have achieved an average of 70%

- students who are interested in Honours, must also complete two pre-Honours courses from the SOCA3810-SOCA3915 range. Students who enrolled in their degree before 1999, who are interested in Honours, are strongly advised to enrol in these courses as well.

All students should consult with any of their lecturers during the second year of enrolment about the Honours year and the courses to be taken in preparation for that enrolment.

**Combined Honours entry**

Students may also undertake a combined Honours program in Sociology and another approved discipline. Prior to enrolment in the Honours year, students must have:

- completed up to 48 units of credit in Sociology, including no more than two Level 1 Sociology courses
- have achieved an average of 70%
- completed the requisite number of units of credit at a standard set by the other School in the combined Honours program.

**Honours level**

SOCA4000 Sociology Honours (Research) Full-Time
SOCA4050 Sociology Honours (Research) Part-Time
SOCA4500 Combined Sociology Honours (Research) Full-Time
SOCA4550 Combined Sociology Honours (Research) Part-Time

**Spanish and Latin American studies**

**Head of Department:** A/Prof John Brotherton

**Tel:** (02) 9385 2421

**Email:** j.brotherton@unsw.edu.au

**Website:** http://languages.arts.unsw.edu.au/spanish/spanish.html

Courses in Spanish and Latin American Studies are available in language, literature and history. Major sequences may be followed in language and literature or history. In the case of language, entry to one of two streams depends on the level of knowledge a student has of the Spanish language. Intensive oral and written language work is an essential element for the elementary and intermediate streams and classes for both are conducted wherever possible in Spanish. A major in Spanish and Latin American History may be completed with no knowledge of Spanish but a reading knowledge of the language is a prerequisite for entry to the Honours year.

**Major sequences**

Students with no prior knowledge:

**Year 1**

+ 18 Upper Level units of credit from history, and/or literature options (entry to literature options dependent on level of fluency of Spanish) to total 42 units of credit.
Level 1

SPAN1001 Introductory Spanish 1A  S1
SPAN1002 Introductory Spanish 1B  S2
SPAN1021 Introductory Spanish 1C  S1
SPAN1022 Introductory Spanish 1D  S2

Upper Level

1. Language

SPAN2003 Intermediate Spanish A  S1
SPAN2004 Intermediate Spanish B  S2
SPAN2023 Intermediate Spanish C  S1
SPAN2024 Intermediate Spanish D  S2
SPAN3003 Advanced Spanish A  S1
SPAN3004 Advanced Spanish B  S2
SPAN3040 Spanish Linguistics  S1

2. Literature

SPAN3339 Magical Realism in Latin America  S1
SPAN3602 Hispanic Fiction into Film  S2

3. History

SPAN2401 Colonising the Americas: The Spanish and Portuguese Empires  S1
SPAN2406 Spain: From Loss of Empire to European Integration  S1
SPAN2421 Special Topic in Latin American History 1  S1
SPAN2422 Special Topic in Latin American History 2  S2
SPAN2425 Pre-Columbian Empires: Aztecs and Incas  S2
SPAN2428 (Un)making the Third World: History and Global Development  S2
SPAN2429 (Un)making the Third World: History and Global Development A  S1
SPAN2431 The United States and Changing Global Orders  S1

Advanced Upper Level Course

SPAN3900 Special Topic in Hispanic Studies (Advanced)  S2

Honours Entry

Students from the elementary stream complete the normal major sequence as well as 12 additional Upper Level units of credit in literature or history including SPAN2401, SPAN2428 and SPAN3900 completed at Credit level or better to total 54 units of credit. Students are reminded that they must have a proven reading competence in Spanish before they can be admitted to an Honours program.

Students with prior knowledge complete the normal major sequence as well as 12 additional Upper Level units of credit in literature, language and/or history including SPAN2401, SPAN2428 and SPAN3900 completed at Credit level or better to total 54 units of credit.

Students majoring in non-language and literature major complete the normal major sequence as well as 12 additional Upper Level units of credit in history options completed at Credit level or better and reading knowledge of Spanish to total 54 units of credit.

Combined Honours Entry

Students wishing to undertake study at Honours Level in Spanish and Latin American Studies and another discipline should enrol in SPAN4500 Combined Honours (Research). Students should seek the advice and approval of the Head of Department prior to enrolling in the third year of study.

Honours Level

SPAN4000 Spanish and Latin American Studies Honours Full-Time
SPAN4050 Spanish and Latin American Studies Honours Part-Time
SPAN4500 Combined Spanish and Latin American Studies Honours Full-Time

Surveying and Spatial Information Systems

Head of School: Professor Chris Rizos
School Office: Room 426, Electrical Engineering
Email: L.Daras@unsw.edu.au
Tel: (02) 9385 4182
Website: www.gmat.unsw.edu.au

The School of Surveying and Spatial Information Systems offers two Upper Level courses in the Faculty of Arts and Social Sciences. The courses (listed below) are of particular interest to students majoring in Environmental Studies or other majors where knowledge of mapping, geographic information and its analysis is increasingly required. Many decisions made on future developments in the community will affect the environment. To be able to manage these developments, knowledge of the relative positions of objects and features on the terrain will be required.

GMAT3500 covers the acquisition and analysis of images from air and space for determining details of features and terrain cover types and GMAT0753 deals with the management and analysis of spatial data. Excellent facilities are available in the School for these courses. Further details can be obtained from the School.

The courses involve an integrated approach to the acquisition, analysis, storage, distribution, management and application of spatially-referenced data. The School also offers other courses that embrace the traditional area of surveying and mapping, as well as the comparatively new fields of remote sensing and spatial information systems.

Fields of specialisation within Surveying and Spatial Information Systems, also known as Geomatics, include: Satellite Surveying (position determination techniques using satellite signals); Geodesy (determining the mathematical model of the Earth, and its gravity field, and the practice of control network surveying); Engineering Surveying (precise surveying for engineering projects); Cadastral Surveying (knowledge of the laws and practices for survey of property boundaries); Land Management and Development (environmental and design for resource management and change of land use); Land Information Management (the use of computer-based information systems of spatially related data for planning and administration purposes); Geographic Information Systems (computer-based information systems for environmental assessment and monitoring); Photogrammetry and Remote Sensing (the use of airborne and spaceborne remotely sense images for mapping, monitoring and resource surveys).

Upper Level

GMAT0753 Introduction to Spatial Information Systems
GMAT3500 Photogrammetry & Remote Sensing

Women’s and Gender Studies

Coordinators: Dr Brigitta Olubas and Dr Elizabeth McMahon, School of English
Office: Room 145, Morven Brown
Tel: (02) 9385 2298
Email: english@unsw.edu.au
Website: www.arts.unsw.edu.au/womenstudies/

The undergraduate program in Women’s and Gender Studies enables students to construct an interdisciplinary major focusing on feminist scholarship, debates and issues and the study of women, gender and sexualities.

The Level 1 core course WOMS1001: Introduction to Feminism, convened by the Coordinator/s is designed to introduce students to theory, ideas, issues and activism in feminism, past and present, and in different parts of the world. Other Level 1 and Upper Level courses are taught and administered through different Schools in the Faculty and offer a range of disciplinary and interdisciplinary approaches.

Major Sequence

Women’s and Gender Studies may be taken as a major sequence. This requires the completion of a total of 42 units of credit in Women’s and Gender Studies approved courses (listed below). Students must complete the program’s introductory core course at Level 1, WOMS1001, as well as two further core courses. The remaining 24 units of credit (or 4 courses) may be selected either from other core offerings or from the list of electives.

List A

Level 1 Core Courses

WOMS1001 Introduction to Feminism  S2
WOMS1003 Women, Gender and World History  S1

Upper Level Core Courses

WOMS2001 Twentieth Century Women Writers*  S2
WOMS2002 Gender, Race, Nature and Reason*  S2
WOMS2003 A History of Sexualities  S2
WOMS2004 Sex, Human Rights and Justice*  S2
WOMS2005 Society and Desire  S2
WOMS2006 Sexuality and Power: The Social Relations of Sexuality and the Sexes  S2
WOMS3005 Australian Masculinities: Reading Gender, Sex and Culture*  S2
WOMS3006 Crime, Gender and Sexuality  X1
Unsatisfactory performance in an approved Honours Program may lead to the reverse of the proposed program and lead to the requirements for the degree. Students who fail to obtain one of these classes must be credited towards the degree.

**Honours Entry**

Students who have met the requirements for a major in Women's and Gender Studies may apply to be admitted to a Combined Honours Program in Women's and Gender Studies together with an approved discipline (from the A, B or C lists). The normal requirement for a student seeking admission to a Combined Honours Program is 48 units of credit in approved WGS courses (including WOMS1001 and 2 Upper Level core courses) at 70% average or better. Students may request to substitute up to 6 units of credit of the Women's and Gender Studies component with other courses particularly relevant to their proposed topic areas. When a student undertakes Combined Honours, arrangements are made between the relevant Schools or programs to determine, in conjunction with the student, the topic, the Honours courses undertaken and the supervisors. In the case of WGS, students would be expected to do either one 2 hour per week seminar or a reading program for one session (see WOMS4500 or WOMS4550) in addition to a thesis on an approved topic, with joint supervision, if appropriate.

**Honours Level**

WOMS4500 Combined Women's and Gender Studies Honours (Research) Full-Time

WOMS4550 Combined Women's and Gender Studies Honours (Research) Part-Time

**Rules for the Award of Degrees**

**3400 Bachelor of Arts Program**

**Pass Degree**

To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:

1. a total of 48 Level 1 units of credit;
2. no more than 12 Level 1 units of credit in any one sequence of study from Lists A, B, and C below;
3. a major sequence of 42 units of credit from List A below;
4. at least 66 units of credit, including a minimum of 24 at Level 1, from sequences in Lists A and B;
5. at least 66 units of credit from courses offered outside the major sequence specified in 3. above, which may include major sequence(s) from Lists A, B or C;
6. 12 units of credit from the General Education program, normally taken in the second and third year of study;
7. 6 units of credit from a third year ARTS elective.

*Major sequence not offered.

8. The Pass degree of Bachelor of Arts may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

**Honours Degree**

To qualify for the award of the degree at Honours level in one or two Schools/specialisations, a student must:

9. have obtained 144 units of credit in accordance with 1.–7. above and satisfied the appropriate prerequisites for entry to the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

**3402 Bachelor of Arts (Media and Communications) Program**

**Pass Degree**

To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:

1. the core program (48 units) in MDMC Media and Communications;
2. a major sequence from List A of the BA Rules;
3. a total of 48 Level 1 units of credit, including no more than 12 in any one sequence of study, from Lists A, B and C of the BA Rules;
4. two upper level MDMC electives outside the core program.
5. 12 units of credit from the General Education program, normally taken in the second and third year of study.
6. The Pass degree of Bachelor of Arts (Media and Communications) may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

**Honours Degree**

To qualify for the award of the degree at Honours level in one or two Schools/specialisations, a student must:

7. have obtained 144 units of credit in accordance with 1.–5. above and satisfied the appropriate prerequisites for entry to the Honours level program;
8. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

**3408 Bachelor of Arts (Dance) Bachelor of Education Program**

**Pass Degree**

To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. the approved sequences in Dance, Dance Practice, Dance Education and Education;
2. a sequence of 42 units of credit from List E below, including no more than 12 Level 1;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study.

*A major sequence in ENGL English is the most appropriate background for Literacy/ESL teaching.

4. The Pass degree of Bachelor of Arts (Dance) Bachelor of Education may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

**Honours Degree**
To qualify for the award of the degree at Honours level, a student must:
1. have obtained 192 units of credit in accordance with 1.–3. above and satisfied the appropriate prerequisites for entry to the Honours level program;
2. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may apply to graduate with the Pass degree.

**3420 Bachelor of Social Science Program**

**Pass Degree**
To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:
1. the core program (48 units) in SLSP Social Science and Policy;
2. a major sequence from List F below;
3. a total of 48 Level 1 units of credit, including no more than 12 in any one sequence of study, from Lists A, B and C of the BA Rules;
4. at least 24 Level 1 units of credit, including 12 in SLSP, from Lists A and B of the BA Rules;
5. 12 units of credit from the General Education program, normally taken in the second and third year of study.

**List F**

- SOCA Sociology and Anthropology
- SPAN Spanish
- Latin American Studies (history stream)
- WOMS Women’s and Gender Studies

* Students majoring in Film and Theatre must complete at least 24 units of credit in other sequences from List F.

6. The Pass degree of Bachelor of Social Science may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

**Honours Degree**
To qualify for the award of the degree at Honours level, a student must:
1. have obtained 192 units of credit in accordance with 1.–5. above and satisfied the appropriate prerequisites for entry to the Honours level program;
2. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

**3424 Bachelor of International Studies**

**Asian Studies Plan (ASIAA13424)**
To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. 48 units of credit at Level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. a sequence of 36 units of credit in one of the following Asian languages: CHIN Chinese, INDO Indonesian, JAPN Japanese, KORE Korean;
4. at least 36 units of credit in Asia-related courses, including ASIA1001 and ASIA1002 at Level 1;
5. 48 units of credit at an approved overseas university over two sessions (INST3101 and INST3102);
6. 6 units of credit in an Upper Level ARTS course;
7. 12 units of credit from the University’s General Education program at Upper Level;
8. The Pass degree of Bachelor of International Studies may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

**Honours Degree**
To qualify for the award of the degree at Honours level, a student must:
9. have obtained 192 units of credit in approved courses and satisfied the appropriate prerequisites for entry into the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions, and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

**European Studies Plan (EUROA13424)**
To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. 48 units of credit at Level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. a sequence of 36 units of credit in European Studies (EURO), including EURO 1000 and EURO 1001 at Level 1;
4. a sequence of at least 36 units of credit in one of the following European languages: FREN French, GERS German, GREK Greek (Modern), ITAL Italian, RUSS Russian, SPAN Spanish;
5. 6 units of credit in an Upper Level ARTS course;
6. 48 units of credit at an approved overseas university over two sessions (INST3101 and INST3102);
7. 12 units of credit from the University’s General Education program at Upper Level;
8. The Pass degree of Bachelor of International Studies may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level, a student must:
9. have obtained 192 units of credit in approved courses and satisfied the appropriate prerequisites for entry into the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions, and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

Global Studies Plan (GLSTA13424)
To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. 48 units of credit at Level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. a sequence of 36 units of credit in Global Studies (GLST) including GLST1100 and GLST3000;
4. 48 units of credit at an approved overseas university over two sessions (INST1301 and INST3102);
5. A sequence of language study (normally of 24 units of credit);
6. 6 units of credit in an Upper Level ARTS course;
7. 12 units of credit from the University's General Education program at Upper Level;
8. The Pass degree of Bachelor of International Studies may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level, a student must:
9. have obtained 192 units of credit in approved courses and satisfied the appropriate prerequisites for entry into the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions, and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

Language Studies Plan (MODLA13424)
To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. 48 units of credit at Level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. two sequences of language study in each of at least 36 units of credit from the following: CHIN Chinese, FREN French, GERS German, GREK Greek (Modern), INDO Indonesian, ITAL Italian, JAPN Japanese, KORE Korean, RUSS Russian, SPAN Spanish;
4. 48 units of credit at an approved overseas university over two sessions (INST1301 and INST3102);
5. 6 units of credit in an Upper Level ARTS course;
6. 12 units of credit from the University's General Education program at Upper Level;
7. The Pass degree of Bachelor of International Studies may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level, a student must:
8. have obtained 192 units of credit in approved courses and satisfied the appropriate prerequisites for entry into the Honours level program;
9. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions, and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

3425 Bachelor of Music Program
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:
1. 96 units of credit in the relevant sequences in Musicology, Musicianship and Professional Practices;
2. an additional 24 Level 1 and 6 Upper Level units of credit from Lists A, B and C of the BA Rules, including no more than 12 Level 1 in any one sequence;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study;
4. 6 units of credit from a third year ARTS elective or equivalent course.
5. The Pass degree of Bachelor of Music may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in one or two Schools/specialisations, a student must:
6. have obtained 144 units of credit in accordance with 1.–4. above and satisfied the appropriate prerequisites for entry to the Honours level program;
7. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

3426 Bachelor of Music Bachelor of Education Program
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. the relevant sequences in Music, Music Education, Education and Performance Studies;
2. an additional 6 Level 1 and 12 Upper Level units of credit from Lists A, B and C of the BA Rules;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study.
4. The Pass degree of Bachelor of Music Bachelor of Education may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in one or two Schools/specialisations, a student must:
5. have obtained 192 units of credit in accordance with 1.–3. above and satisfied the appropriate prerequisites for entry to the Honours level program;
6. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

3427 Bachelor of Music Bachelor of Arts Program
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. a total of 48 Level 1 units of credit;
2. no more than 12 Level 1 units of credit in any one sequence of study from Lists A and C of the BA Rules, other than MUSC courses;
3. 102 units of credit in the relevant sequences in Musicology, Musicianship and Professional Practices;
4. a major sequence (other than Music) of 42 units of credit from List A of the BA Rules;
5. 36 units of credit outside the major sequence in 4. above from Lists A, B and C of the BA Rules;
Divisions and Class 3). Students who fail to obtain one of these classes

The Honours degree is awarded in three classes (Class 1, Class 2 in two

program;

To qualify for the award of the degree at Honours level in one or two

Schools/specialisations, a student must:

9. have obtained 192 units of credit in accordance with 1.–7. above and
satisfied the appropriate prerequisites for entry to the Honours level
program;

10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two
Divisions and Class 3). Students who fail to obtain one of these classes
may proceed to graduate with the Pass degree.

4031 Bachelor of Social Work Program

Pass Degree

To qualify for the award of the degree at Pass level, a student must obtain,
normally over four years of study, a minimum of 192 units of credit in
approved courses including:

1. the prescribed sequences in Social Work courses and electives;
2. a total of 18 Level 1 units of credit, including no more than 12 in any
one sequence of study, from Lists A, B and C of the BA Rules;
3. 12 units of credit from the General Education program.

4. The Pass degree of Bachelor of Social Work may be awarded with
Distinction where a candidate has achieved a weighted average mark
(WAM) of at least 75% in all courses completed since enrolment at
UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level, a student must:

5. have obtained 192 units of credit in accordance with 1.–3. above and
satisfied the appropriate prerequisites for entry to the Honours level
program;

6. obtain a further 24 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two
Divisions and Class 3). Students who fail to obtain one of these classes
may proceed to graduate with the Pass degree.

4035 Bachelor of Social Work Bachelor of Arts Program

Pass Degree

To qualify for the award of the degree at Pass level, a student must obtain,
normally over five years of study, a minimum of 240 units of credit in
approved courses including:

1. the prescribed sequence of 156 units of credit for the Bachelor of Social Work;
2. the prescribed core sequence of 48 units of credit in courses from the
Bachelor of Social Science;
3. a total of 48 Level 1 units of credit;
4. 24 units of credit from Lists A, B and C (excepting SOCW and SLSP)
of the BA Rules;
5. 12 units of credit from the General Education program.

6. The Pass degree of Bachelor of Social Work Bachelor of Social Science
may be awarded with Distinction where a candidate has achieved a
weighted average mark (WAM) of at least 75% in all courses completed
since enrolment at UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level in the Bachelor
of Social Work or Bachelor of Social Science, a student must have
satisfactorily completed a prescribed period of extra study.
The Honours degree is awarded in three classes (Class 1, Class 2 in two
Divisions and Class 3). Students who fail to obtain one of these classes
may proceed to graduate with the Pass degree.

4055 Bachelor of Arts Bachelor of Education Program

Pass Degree

To qualify for the award of the degree at Pass level, a student must obtain,
normally over four years of study, a minimum of 192 units of credit in
approved courses including:

1. a total of 48 Level 1 units of credit;
2. no more than 12 Level 1 units of credit in any one sequence of study
from Lists A and C of the BA Rules;
3. 78 units of credit in EDST Education including compulsory core courses
in Years 1, 3 and 4;
4. two sequences of 42 units of credit from List E below;
5. an additional 6 Upper Level units of credit from Lists A, B and C of the
BA Rules;
6. 12 units of credit from the General Education program, normally
taken in the second, third or fourth year of study.

List E

CHIN Chinese, ENGL English*, ECON Economics, FREN French,
GEOH/GEOS Geography, GERS German, HIST History, INDO
Indonesian, JAPN Japanese, LING Linguistics, SPAN Spanish, THST Theatre
*A major sequence in ENGL English is the most appropriate background for Literacy/
ESL teaching.

7. The Pass degree of Bachelor of Arts Bachelor of Education may be
awarded with Distinction where a candidate has achieved a weighted
average mark (WAM) of at least 75% in all courses completed since
enrolment at UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level in one or two
Schools/specialisations, a student must:

8. have obtained 192 units of credit in accordance with 1.–6. above and
satisfied the appropriate prerequisites for entry to the Honours level
program;

9. obtain a further 48 units of credit in an approved Honours program.
The Honours degree is awarded in three classes (Class 1, Class 2 in two
Divisions and Class 3). Students who fail to obtain one of these classes
may proceed to graduate with the Pass degree.

3417 Diploma in Languages

1. To qualify for the award of the Diploma in Languages, students must
complete, over a period of at least two semesters of study, 42 units of
credit in language or related courses offered within the Bachelor of Arts
(program 3400) as approved by the School of Modern Language Studies.
Graduates must have achieved a minimum level of competence in the
relevant language equivalent to that attained by students who have
completed six semesters of study in a language commencing at
Introductory Level.

2. A candidate for the Diploma shall:
(i) have been awarded the Bachelor from the University of New South
Wales or another tertiary institution, or
(ii) with the approval of the program authorities concerned, be enrolled concurrently within the University of New South Wales in an undergraduate program of the University of New South Wales which does not offer a major sequence in the language concerned.

3418 Diploma in Music

1. To qualify for the award of the Diploma in Music, students must complete a sequence of courses totalling 42 units of credit and constituting the prescribed major sequence in Music of the Bachelor of Arts (program 3400). The program should include at least 6 units of credit in Music at 3000 level.

2. A candidate for the Diploma shall:

(i) have been awarded the Bachelor from the University of New South Wales or another tertiary institution, or

(ii) with the approval of the program authorities concerned, be enrolled concurrently within the University of New South Wales in an undergraduate program of the University of New South Wales which does not offer a major sequence in Music.
A Message from the Dean

Welcome to the Faculty of Built Environment (FBE) at UNSW. I hope you find the information in this Handbook helpful in understanding the programs offered in our Faculty. The structure of FBE is unique in Australia in the range of disciplines it offers including Architecture, Building, Industrial Design, Interior Architecture, Landscape Architecture, Planning & Urban Development and Human Geography and the interface to Sustainable Resources Management.

FBE has an academic structure aimed at encouraging synergy among the disciplines in the Faculty as well as providing flexibility for students in the range of courses they can take. Students have the opportunity to gain both expertise in their chosen disciplines and to become familiar with the concepts and ideas of the other disciplines in the Faculty. In reading this Handbook you will discover the wide range of courses on offer.

The undergraduate and postgraduate programs offered by the Faculty are well established and well regarded by employers. Each program integrates the academic discipline as well as the practical skills required for professional practice. Undergraduate students also have the option of selecting from a number of combined degrees offered in conjunction with other faculties.

Around 20 per cent of our students are international students. FBE has a reputation for the excellence of its staff and students and is professionally recognised nationally and internationally. The Faculty receives strong industry support and extensive international academic links provide opportunities for exchange and collaboration in learning and research.

If you have further questions after reading through this Handbook, please do not hesitate to obtain advice from your lecturers and from the Faculty administrative staff at all stages of your study. You may also wish to visit FBE’s website at: www.fbe.unsw.edu.au

Peter A Murphy
Dean
Faculty of the Built Environment
The Faculty of the Built Environment Website

Please refer to the Faculty website for further information. The website provides detailed information on the Faculty’s programs, staff, research and events as well as exhibits of student work and an extensive online learning resource. Here you will find ready information on almost any matter that affects your life within the FBE: www.fbe.unsw.edu.au

The Faculty

The Faculty of the Built Environment offers the following undergraduate degree programs: BArch, BSc(Arch), BIA, BBCM, BIndDes, BArch and BPlan. These programs provide professional education in the fields of architecture, industrial design, building, quantity surveying, interior architecture, landscape architecture and planning. Put more generally, these programs provide education and training in the arts and sciences involved in the design and construction of buildings, in the development of cities, in landscape design and the development of manufactured products. In addition to professional and vocational training, the programs include general education courses to provide graduates with a broad understanding of the humanities and the social sciences. In addition, the Faculty offers a range of combined degrees with other faculties such as Arts and Social Sciences, Law and the Institute of Environmental Studies.

Course Descriptions

Descriptions of courses offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Computing Information

The Faculty has five major computing laboratories containing 80 personal computers available for general use by students in the Faculty. These laboratories are used for teaching formal classes, as well as providing general network and computing access for students 24 hours a day. The computers are higher end PC workstations configured to support a wide range of applications including: CAD, modelling, rendering, visualisation, multimedia presentations, GIS, analysis, general office applications and much more. The Faculty’s Resource Centre and Postgraduate labs add a further 40 computers to this mix which is complemented by the student accessible wireless networking in and around the Faculty.

These laboratory resources are supported by a range of devices and services from standard printers, plotters and scanners to notebooks, digital cameras and projectors for presentations. The Faculty offers a printing service providing large format colour printing, photo-quality output and laminating. This will allow student presentations to exceed professional quality. The labs provide an environment where the computing technology can be utilised throughout the wide range of courses offered across the Built Environment’s disciplines.

All these computers are connected to the Campus Wide Network, providing secure online file storage, access for students to the information resources supported by the Faculty and the University generally, as well as the international resources of the Internet.

Student Ownership of Personal Computers

The Faculty encourages all students to consider the purchase of a personal computer to support their studies. The prevailing policy is that the Faculty endeavours to provide for the high-end computing needs of students in the belief that many students are able to meet their own needs for more basic applications. To that end, the Faculty publishes a document which is available on the website, providing advice to students regarding the purchase of personal computers, software and network connectivity.

Enrolment Procedures

All students re-enrolling in the Faculty will re-enrol online via myUNSW. Instructions can be found on the FBE website.

Faculty Electives

The Faculty offers a broad range of over 100 elective courses that may be selected as part of any of the undergraduate programs. They are also generally available to all students in the University, subject to appropriate prerequisite knowledge. These may be identified in the course descriptions at the end of this Handbook as they all have course codes in the form BENVxxxx. These courses are generally offered in only one semester and students are advised to check availability and timetabling for these electives on the Faculty website.

In addition, students may take many of the core courses associated with the other programs in the Faculty as electives. Details of these options are explained on the website.

General Education Requirements

The University’s basic requirements are the same for students in all single degree programs.

(a) Students must satisfactorily complete a minimum of 12 units of credit in General Education courses or their equivalent (unless entitled to exemption as prescribed in the University rules). Combined degrees offered with another Faculty are deemed to satisfy this requirement within the prescribed program.

(b) Students must undertake 56 hours of study which examine the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. Most programs in the Faculty of the Built Environment fulfill this requirement as part of the normal program curriculum. However, in the case of both the BBCM and BSc(Arch) programs, students are required to take BENV1382 Social Responsibility and Professional Ethics in part fulfillment of this requirement.

Student Exchange

The University has established an extensive and growing number of Student Exchange programs with universities around the world. The Faculty strongly encourages all students to consider participating in one of the programs for one or two semesters. Contact International Student Services for detailed information on course options and scholarships or refer to the website: www.international.unsw.edu.au

Societies and Clubs

The Faculty of the Built Environment has a number of student clubs including BIAS (Bachelor of Interior Architecture Students), TAC (The Architecture Club), BUGS (Building Undergraduate Society), IDSOC (Industrial Design Society), SOLA (Society of Landscape Architects) and OOPS (Organisation of Planning Students). Some of these student clubs have websites which can be found at www.fbe.unsw.edu.au/students/useful.shtml

Faculty of the Built Environment Resource Centre

The Resource Centre is located on the ground floor of the Red Centre Building and serves the day-to-day needs of the staff and students in the Faculty. It provides information services based on both print and electronic resources. The reference collection, which has no lending facilities, consists of textbooks and recommended reading, background information to programs, serials and standards (these being duplicated in the Physical Sciences Library). Unique materials held consist of donations, undergraduate theses, trade catalogues and an open reserve collection of specific materials left by lecturers to supplement program work.
The Resource Centre computers provide access to library catalogues and other online databases, email facilities and the Internet and six of the computers have word processing facilities. Photocopying facilities are also provided.

Assistance is provided by the librarian in using the Centre's resources and development of information retrieval skills. In addition, a printed guide on how to use the Resource Centre is issued to each student. During Session 1 & 2, the Resource Centre is open from 8.30am to 6.00pm Monday to Thursday, 8.30am to 4.00pm on Friday. Out of session, the Resource Centre is open from 8.30am to 4.00pm Monday to Friday, closed all January, weekends and public holidays.

Faculty Regulations for Undergraduate Study

1. Open Elective courses may be selected from any program offered at the University of New South Wales, provided such course has not been taken to fulfill any other requirement of the Degree Rules. There is a wide range of electives offered within the Faculty. Open electives selected outside the Faculty of the Built Environment are subject to the approval of the Faculty. Open Electives may also be selected from courses offered by other institutions, but only with the approval of the Program Head and at an agreed unit value approved by the Program Head.

2. As a general guide, expected normal student workload is 2 hours per week per unit of credit, including both class contact time as well as individual study, completion of assigned work and exam preparation where appropriate. Students are strongly advised not to over commit themselves to paid work or voluntary activities that will impinge on that level of time commitment to their studies. Such external commitments will not be taken into consideration in relation to matters such as extensions of time for submission of project work or failure to attend classes or examinations.

3. Where reference is made to the requirement that a student complete units of credit by taking one or more courses, that requirement shall be construed as meaning that the student shall:
   - attend at least 80% of all lectures, studies, tutorials or other classes, including site visits or other activities as may be prescribed in that course, always maintaining a satisfactory standard of preparation for and participation in such classes and activities.
   - perform satisfactorily in such exercises, essays, theses, and other work (whether written, oral or practical) as may be prescribed in that course, and undertake any prescribed reading related to that subject.
   - achieve a satisfactory standard in all examinations and other assessable tasks assigned for that course.

4. In general, students admitted with advanced standing into programs within the Faculty are given units of credit towards the degree for all appropriate courses completed at UNSW or other approved institutions. This is in the form of full session exemptions and/or specified exemptions in particular courses. Such credit will not normally be given for study undertaken more than 7 years before the date of admission to the program, except with the approval of the Program Head.

5. Notwithstanding any advanced standing that may have been granted upon entry to a program, students may seek exemptions in specific courses on the basis of appropriate study or experience. Where such an exemption is granted for study at an approved institution, students are normally awarded the appropriate units of credit, unless such credit has already been allowed as part of admission with advanced standing. Where the exemption is granted on the basis of knowledge or skills gained through experience, students would normally be required to complete the equivalent units of credit as open electives.

6. In general, progression in all programs offered by the Faculty is managed by individual course prerequisites. Except with the permission of the Program Head, students are required to complete all stated prerequisites before enrolling in any course, and must always repeat any failed course on the next occasion that it is offered.

7. Except with the permission of the Program Head, where two courses are shown as corequisite, they must be taken concurrently on the first occasion any one is attempted.

8. Students wishing to take courses additional to those required for the award should be aware that the relevant courses will attract an additional fee, payable up front.

9. Students may not enrol in two design studios as core courses in any one session.

Architecture Program

Program Head: Graham Bell

Architecture today is an art, a technology and a business. In the modern building industry, the architect is the one person who considers the building as a whole end product: serving a purpose, built of materials using technology, to a cost, for a client, providing an environment of space, light and climate, changing its context by its location and form and conveying artistic and social meaning.

For small buildings, the architect can lead and manage the whole process. As projects become larger and more complex, the architect becomes a member of a team and sometimes captain of the team, but always seeing the end product as a whole. From a comprehensive study of the requirements for a building, the architect prepares a design concept which is continually adjusted and refined over the life of the project. The architect's role is one of continual creativity.

The BArch program provides graduates with an understanding of the forces that shape buildings and with the skills to guide those forces to a desired end product.

3260 Bachelor of Architecture

BArch

The Bachelor of Architecture degree provides academic education and practical experience leading to professional qualifications in architecture. It requires full-time attendance for five years plus six months work experience that must be completed prior to the Graduation Project. Work experience may be undertaken within the five year period, if the 24 weeks is undertaken over University vacation periods in minimum blocks of 8 weeks. There are two central goals. The primary goal is to equip students with the theoretical and practical knowledge, the skills and techniques needed for the design, documentation and administration of building construction. A more general goal is to provide students with an all-round general problem-solving education. Lectures and practical sessions cover theoretical knowledge in the following areas:

1. Architectural Design
2. Architectural Communications
3. Architectural History and Theory
4. Architectural Technology
5. Architectural Research and Practice

Progression through the program is by years, each comprising two semester-long design studios and their corresponding corequisites. In most years these design studios and corequisites may be taken in either order to facilitate midyear entry to the program where required. However courses must be taken in the session they are offered at the first available opportunity. Admission to each year is subject to the successful completion of the preceding design stages and a majority of their corequisite courses, except where approval has been given by the Program Head.

Registration/Professional Recognition

The degree of Bachelor of Architecture from the University of New South Wales is accredited by the Board of Architects of New South Wales for the purpose of registration. In addition, the candidate must satisfy the following requirements to become registered:

1. Produce evidence of two years approved work experience, at least one of which has been subsequent to the completion of the program; and
2. Pass an examination in Architectural Practice administered by the NSW Board of Architects.

The degree of Bachelor of Architecture is recognised by the Royal Australian Institute of Architects (RAIA).

Graduates are eligible for Graduate Membership of the Royal Australian Institute of Architects. Students enrolled in the BArch program (3260) or the BSc(Arch) program (3265) or any of the combined BArch programs are eligible to become Student Members of the Royal Australian Institute of Architects. SONA (Student Organised Network for Architecture Australia) is the national student organisation affiliated with RAIA.

Institute of Architects. Students enrolled in the BArch program (3260) or

### Degree Rules

1. The degree of Bachelor of Architecture is awarded at either Pass or Honours level after the successful completion of a minimum of 264 units of credit.
2. To fulfill these requirements, students must complete:
   - 171 units of core courses, being all those prescribed in the faculty regulations for this program.
   - 24 units of work experience completed after Year 1 and before Year 5 as prescribed in the faculty regulations for this program.
   - 18 units of FBE electives, selected in accordance with the faculty regulations for this program.
   - 39 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 12 units of General Education in accordance with University requirements.
3. The standard duration of the program is 5.5 years consisting of 10 semesters of full-time study (24 units of credit per semester) plus 1 semester of required work experience.
4. General Education courses may not be taken before a student enters Year 2 of the program.
5. Students are not able to enrol in two design studios concurrently.

### Faculty Regulations for the BArch

#### Core Courses

The core courses prescribed for the program are all those named in Table 3260–1 Program Schedule.

#### FBE Electives

Faculty of the Built Environment (FBE) electives must be selected from those offered by the FBE. General Education Electives may not be substituted for either FBE or Open Electives.

#### Honours

The Bachelor of Architecture degree may be awarded with Honours based on the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

In order to be considered for the University Medal, students must have completed at least 3 years of study towards their BArch degree at the University of New South Wales.

#### Work Experience

Each student is required to undertake 24 weeks of off-campus activity in the pursuit of architectural work experience. Ideally, this is undertaken as a single block of time working in an architectural design office. Where this is the case and it overlaps a normal academic session, students enrolled in ARCH1583 are not permitted to enrol in any other courses concurrently.

Work experience may also be carried out in several smaller components during summer breaks, provided that no such component is less than eight weeks in duration. Where this is the case, students must enrol in ARCH1583 for the summer session in which they are completing their work experience requirements.

If students wish to propose an alternative experience to that carried out in a registered architect’s office, approval must be given by the Program Head. In all events, assessment is only within the terms of the course ARCH1583 Work Experience in the Bachelor of Architecture degree program. The Architecture program takes no responsibility for any assessment or consideration for registration with the Board of Architects of New South Wales or membership of the Royal Australian Institute of Architects.

#### Composite Courses

Where a composite course is failed, all component parts must be repeated. This includes the courses in the technology core. To achieve a pass result in technology core courses at least two components must be passed.
Science (Architecture) Program

Program Head: Graham Bell
Program Coordinator: Stephen Peter

This program provides an opportunity for students to undertake studies within the discipline of architecture, generally within a well-defined area of specialisation. At present, a formal specialisation is offered in the area of architectural computing, but the opportunity exists for any major to be identified through consultation with the Program Coordinator. Where at least 24 units of electives and both research projects have been completed within the area of specialisation, then that major will be identified on the degree transcript. The program can also be undertaken with no identified major, in which case it is referred to as the generalist stream and no major is identified on the transcript at graduation.

3265 Bachelor of Science (Architecture)

This program is normally completed in three years of full-time study. Year 1 is taken in common with BArch students. In Year 2, students undertake courses in their area of specialisation. During Year 3 of the program, students undertake two research projects that provide an opportunity to explore areas of specialised interest in considerable depth.

The program allows students to select courses based on their interests. These could include: technology, history, theory and communications. The computing major educates students in architectural computing and allows students to specialise in an area of computing such as computer-aided design (CAD), building modelling, rendering, animation, multimedia and IT management.

It is UNSW policy that all students must complete up to 56 hours of study that fosters acceptance of professional and ethical action as well as social and environmental responsibility. The BSc(Arch) program satisfies half of that requirement within the courses that are taken in common with the BArch program. Taking the course BENV1382 Social Responsibility and Professional Ethics in the third year of study satisfies the remaining 28 hours.

### Degree Rules

1. The degree of Bachelor of Science (Architecture) is awarded at Pass level after the successful completion of a minimum of 144 units of credit.
2. The degree of Bachelor of Science (Architecture) is awarded at Honours level after the successful completion of a minimum of 192 units of credit including 48 units in an approved Honours program.
3. To fulfill these requirements, students must complete:
   - 75 units of core courses, being all those prescribed in the faculty regulations for this program.
   - 18 units of FBE electives, selected in accordance with the faculty regulations for this program.
   - 39 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 12 units of General Education in accordance with University requirements.
A student may undertake a major by completing a minimum of 24 units in an approved disciplinary stream (in lieu of an equivalent unit value of open electives) plus undertaking approved topics related to that disciplinary stream for both the core Research Project courses (ARCH1398 and ARCH1399).

The standard duration of the program is 3 years consisting of 6 semesters of full-time study (24 units of credit per semester). This is extended by 1 year (or 2 semesters) if the Honours program is attempted.

General Education courses may not be taken before a student enters Year 2 of the program.

### Faculty Regulations for the BSc(Arch)

#### Core Courses
The core courses prescribed for the program are all those named in Table 3265–1 Program Schedule.

#### Honours
The Bachelor of Science (Architecture) degree may be awarded with Honours after the successful completion of a two semester Honours program following the completion of the BSc(Arch) program, and in accordance with current Faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Students must qualify by achieving a minimum Credit average during the first three years of study before being admitted to the Honours year.

### Interior Architecture Program

**Program Head:** Judith O’Callaghan

Interior Architecture is the specialist area of architecture concerned predominantly with interior environments. The professional practice of the discipline demands, simultaneously, broad theoretical knowledge as well as a focused practical education in both the art and the science of architecture and design. The interior designer must have a professional understanding and concern for client and community in a seamless integration of the work with all elements of the built environment. (It should be noted that, unlike elsewhere in the world, use of the title “Interior Architect” in Australia is not permitted under current Australian legislation).

#### 3255 Bachelor of Interior Architecture

**BIA**
The Bachelor of Interior Architecture is a four year full-time program consisting of core and elective courses with design as the central concern. The Design Studio is the focus for the application of the theoretical material delivered in the program, as well as developing and presenting its own material.

**Student Exchange**

Students in the BIA program may go on exchange any time after the completion of Year 2.

**Registration/Professional Recognition**
The degree of Bachelor of Interior Architecture from UNSW is recognised by the Design Institute of Australia (DIA), the professional body representing Interior Architecture/Interior Design in Australia) and the International Federation of Interior Architects (IFI). Students enrolled in the program are eligible to apply for student membership of the DIA and Associate membership upon graduation. Full membership requires two years of approved professional experience after graduation. The BIA program at UNSW is also a member of IDEA (Interior Design/Interior Architecture Educators Association) representing all 4 year university degree programs in the discipline in the region.

### Degree Rules

1. The degree of Bachelor of Interior Architecture is awarded at either Pass or Honours level after the successful completion of a minimum of 192 units of credit.

2. To fulfill these requirements, students must complete:
   - 144 units of core courses, being all those prescribed in the faculty regulations for this program;
   - 18 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment;
   - 18 units of FBE electives, selected in accordance with the faculty regulations for this program.

3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester).

4. General Education courses may not be taken before a student enters Year 2 of the program.
Faculty Regulations for the BIA

Core Courses
The core courses prescribed for the program are all those listed in Table 3255–1 Program Schedule.

Honours
The Bachelor of Interior Architecture degree may be awarded with Honours based upon the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Building Construction Management Program

Program Head: George Earl
This program prepares students for professional and executive employment within one of Australia’s largest industries, the construction industry. Careers in a wide variety of areas, in both private enterprise and in the public sector, are available to building construction management graduates. More specifically, these include positions as project manager, master builder, construction consultant, building estimator, quantity surveyor, building economist, property manager and building scientist.

3331 Bachelor of Building Construction Management

BBCM
The Bachelor of Building Construction Management is a four year full-time program which allows students to specialise for careers in Construction and Project Management, Quantity Surveying, Property Development and Property Management.

The program is offered over a period of 4 years of full-time study, or a minimum of eight sessions, leading to the award of the degree of Bachelor of Building Construction Management (BBCM). The program is structured as follows:

- Years 1–3 consist of a fixed program of compulsory courses
- Year 4 consists of electives and a compulsory thesis

Assumed Knowledge
Before entry to the BBCM program, it is strongly recommended that students complete studies in at least HSC Mathematics (previously known as 2 unit Mathematics) and HSC English (previously 2 unit General English) or their equivalent. Students who have not achieved a mark of 65% or better in Mathematics (or equivalent) are advised to complete a bridging course in Mathematics prior to commencing the program.

Registration/Professional Recognition
The award of the degree Bachelor of Building Construction Management is recognised for admission to membership by:

1. The Australian Institute of Building
2. The Australian Institute of Quantity Surveyors, subject to completion of all compulsory courses and elective courses nominated by the Australian Institute of Quantity Surveyors plus
BLDG9998 Quantity Surveying Industry Program.
3. The Board of Quantity Surveyors Malaysia, subject to completion of all compulsory courses and elective courses nominated by the Board of Quantity Surveyors Malaysia plus
BLDG9998 Quantity Surveying Industry Program
4. The Australian Property Institute, subject to the completion of the following electives in addition to all compulsory courses and selection of a thesis topic in the area of Land Economics.

Degree Rules

1. The degree of Bachelor of Building Construction Management is awarded at either Pass or Honours level after the successful completion of a minimum of 204 units of credit.
2. To fulfill these requirements, students must complete:
   - 147 units of core courses, being all those prescribed in the faculty regulations for this program.
• 12 units of work experience prior to entry into Year 4 as prescribed in the faculty regulations for this program.
• 30 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
• 12 units of General Education in accordance with University requirements.

3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester) plus the required work experience.

4. General Education courses may not be taken before a student enters Year 2 of the program.

Faculty Regulations for the BBCM

Core Courses
The core courses prescribed for the program are all those named in Table 3331–1 Program Schedule.

Honours
The award of Honours is based on performance throughout the whole program, without requiring an additional Honours program. Honours are determined on the basis of a score which is calculated by weighting more heavily the courses taken in the later years of the program.

Work Experience
Prior to commencing their final year, all students are required to have gained a minimum of 80 days work experience by appropriate employment in the building industry. Notwithstanding the above, for registration with the Australian Institute of Quantity Surveyors or the Board of Quantity Surveyors Malaysia or the Royal Institution of Chartered Surveyors, students must undertake 6 months approved work experience to be completed before the start of the final year of the program. A proposal for employment must be submitted to the Program Head for approval prior to starting work. Students will be required to produce documented evidence of their work experience. In order to complete this requirement, students must enrol in BLDG9999 Building Industry Program or in BLDG9998 Quantity Surveying Industry Program.

Program Guidelines

Electives
Students’ attention is drawn to the list of suggested electives given in Table 3331–2 BBCM Electives. These courses are offered specifically to meet the requirements for membership of professional bodies as defined earlier in this Handbook.

Table 3331–2 BBCM Electives

Progression
In the event of failure in one or more courses, students may carry the failed course(s) provided that:

• prerequisite courses have been completed to the satisfaction of the program head.
• the total number of courses taken at any time does not exceed 6 including General Education.
• the total contact hours do not exceed 20 per week.

Industrial Design Program

Program Head: Steve Ward

Industrial design involves the research and design of the whole range of consumer and capital products used by people. These are as diverse as telephones and transportation, kitchen appliances and exhibition systems. Ideally, the industrial designer works as part of a team involving engineering, production and marketing. The industrial designer initially concentrates on establishing the concept as a marketable, producible, usable and socially responsible product; and subsequently details the human factors (ergonomics), appearance (style) and mode of operation. Frequently the designer becomes involved in the corporate image of companies and their products as well as the graphics of the product’s packaging and the associated retail support systems.

The program prepares students for professional and executive employment in areas involving the research, design and development of new manufactured products. Whilst it is anticipated that most graduates will be initially employed in an industrial design capacity either in manufacturing companies or consultancies, it is likely that some graduates may subsequently choose to specialise in aspects of marketing, engineering, product management or design management.

3385 Bachelor of Industrial Design

BIndDes

The Bachelor of Industrial Design program provides academic education and practical experience leading to professional qualifications in industrial design. It requires full-time attendance for four years culminating in the Major Project. There are two central goals. The primary goal is to equip students with the theoretical and practical knowledge, skills and techniques needed for the design, documentation and administration of design and product development. A more general goal is to provide students with an all-round general problem-solving education. Lectures and practical sessions cover theoretical knowledge in the following areas:

1. Industrial Design Studio
2. Visual Communication of Design (Computer aided and manual methods)
3. Marketing
4. Technology (Engineering materials and manufacture)
5. History and Theory

Student Exchange
Students in the Industrial Design program can go on exchange any time from the middle of Year 3 (as indicated in the Program Schedule).

Registration/Professional Recognition

The degree of Bachelor of Industrial Design from UNSW is recognised by the Design Institute of Australia.

At UNSW, students are strongly encouraged to consider the study of landscape architecture as both a powerful way of thinking and as education for a specific vocation. On graduating from the program, students should have developed a critical awareness of social and environmental issues, a creative approach to landscape design and landscape planning, and a sound foundation in the technical and professional requirements of landscape architecture practice. In addition, the program aims to instill an ethical commitment to care of the environment and a strongly responsible attitude to the wider community.

**3380 Bachelor of Landscape Architecture**

**BArch**

The Bachelor of Landscape Architecture program is of four years duration and requires full-time attendance throughout. Students are introduced to the theory and practice of landscape architecture through an exploration of design principles, graphic techniques, ecological processes and studies of human modification of the environment. As students progress through the program, increasing emphasis is laid upon creative design with particular application to Australian conditions. Projects are related to the subject matter of concurrent lectures and culminate in landscape studies of regional and national significance.

The majority of courses are taught specifically within the Landscape Architecture program. However, contact with the students and staff of other programs is ensured by the inclusion of courses from other programs in the Faculty of the Built Environment, the University’s General Education program and the program of elective courses. In the final two years of the program, students are able to undertake a significant component of elective courses from the Landscape Architecture program, other programs within the Faculty or from other faculties, which effectively allows them to develop a major specialisation.

The program seeks the synthesis of knowledge and skills through project based learning in a sequence of eight Design Studios. Support courses are grouped into strands: environment, history and theory, communication, technology and practice.

**Registration/Professional Recognition**

The program is accredited by the Australian Institute of Landscape Architects and graduates holding the BLArch degree may qualify for corporate membership of the Institute.

**Landscape Architecture Program**

**Program Head:** Catherine Evans

Landscape architecture is a design discipline that is concerned with the environment as a whole; its design, development, planning and management. It aims to create and sustain habitats for people and other living things in ways which conserve and celebrate ecological relationships, cultural values and symbolic associations.

The principal focus of landscape architecture is the theory and practice of landscape design with a strong emphasis on landscape planning, cultural studies and conservation of the environment.

**Degree Rules**

1. The degree of Bachelor of Industrial Design is awarded at either Pass or Honours level after the successful completion of a minimum of 192 units of credit.

2. To fulfil these requirements, students must complete:
   - 156 units of core courses, being all those prescribed in the faculty regulations for this program.
   - 24 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 12 units of General Education in accordance with University requirements.

3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester).

4. General Education courses may not be taken before a student enters Year 2 of the program.

**Faculty Regulations for the BIndDes**

**Core Courses**

The core courses prescribed for the program are all those named in Table 3385–1 Program Schedule.

**Honours**

The Bachelor of Industrial Design degree may be awarded with Honours based upon the quality of performance in the program, and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Degree Rules

1. The degree of Bachelor of Landscape Architecture is awarded at either Pass or Honours level after the successful completion of a minimum of 216 units of credit.

2. To fulfill these requirements, students must complete:
   - 156 units of core courses, being all those prescribed in the faculty regulations for this program.
   - 24 units of work experience prior to Year 4 as prescribed in the faculty regulations for this program.
   - 24 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 12 units of General Education in accordance with University requirements.

3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester) plus the required work experience.

4. General Education courses may not be taken before a student enters Year 2 of the program.

5. Students who achieve a final mark above 65 in the prerequisite course, LAND1321 Research Methods, will be directed to the Landscape Thesis, and those who pass LAND1321 but whose final mark is 65 or less will be directed to the Advanced Research Project in Landscape Architecture. Students during the Research Project will also be required to enrol in the co-requisite, Landscape Design 9: Integrated Studio.

6. A Progress Portfolio will be submitted at the end of second year as part of the assessment for LAND1202 and to determine progression into the third year of design. Similarly, another Progress Portfolio will be submitted at the end of third year which will determine progression into the final year of design.

7. Design studios are considered to be a linear sequence, which requires that each design studio must be passed before a student can advance to the next level.

Faculty Regulations for the BLArch

Core Courses

The core courses presented for the program are all those named in Table 3380 – 1 Program Schedule.

Honours

The Bachelor of Landscape Architecture degree may be awarded with Honours based upon the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Work Experience

Students of the undergraduate program must obtain a total of 90 days work experience prior to graduation, of which a minimum of 40 days must be in landscape industry work and a minimum of 40 days in a landscape design office. This normally takes the form of employment during the long student vacations supervised by a landscape architect, landscape contractor or nursery. Each student undertaking work experience must obtain prior approval of the Work Experience Coordinator. Each student must obtain from the employer a statement of experience gained, maintain an accurate record in logbook form and submit a written report describing the work undertaken during the various work experience components. Details of these arrangements are available on the Faculty website.

Planning and Urban Development Program

Program Head: Susan Thompson

Planners are interested in the design and conservation of the environment. They work with the processes that shape land-use patterns and development outcomes. Planners must be multidisciplinary in their approach, combining expert research skills, strategic vision and strong communication techniques with an understanding of policy formulation, land-use allocation, design and environmental context. Successful planners learn to write well, communicate clearly with clients, politicians and the general public, and apply strong analytical, design and decision-making skills in a variety of roles in the private and public sectors.

3360 Bachelor of Planning

BPplan

The Bachelor of Planning program provides academic education and applied learning leading to professional qualifications in planning. The program is of four years full-time duration with an additional mandatory year of work experience, normally taken after completing Session 1 of Year 3.

Planning has as its focus the management and development of urban and rural areas; ranging from small local precincts to metropolitan areas and regions. The planner’s task is often to integrate and coordinate the aims and actions of a large number of government and private organisations and individuals to provide an equitable and efficient distribution of resources. Working at the interface of development and the environment, this involves collecting and analysing information; identifying needs and options; making forecasts; preparing policies, plans and programs for implementation; exercising development control; investigating development proposals; and evaluating results, communicating outcomes and consultation.

The objectives of the program are to create an awareness of the context in which planning operates, impart knowledge of how planning can influence the community and the physical environment, equip students with the competence to apply this knowledge at different levels in a wide range of situations, create an understanding of the contribution other disciplines can make to planning and vice versa, and develop skills in policy formulation, land-use allocation and control, design and communication. The program is structured to allow students to study a secondary specialisation in a particular area or to sample a wide range of educational experiences from across the University.

Registration/Professional Recognition

The Bachelor of Planning degree is recognised by the Planning Institute of Australia as an academic qualification for Corporate Membership after at least one additional year of practical experience following graduation. Corporate Membership of the Planning Institute of Australia centers reciprocal recognition in many countries.

### Degree Rules

1. The degree of Bachelor of Planning is awarded at either Pass or Honours level after the successful completion of a minimum of 240 units of credit.
2. To fulfill these requirements, students must complete:
   - 147 units of core courses, being all those prescribed in the faculty regulations for this program.
   - 48 units of work experience normally undertaken in 2nd session of Year 3 and 1st session of Year 4 as prescribed in the faculty regulations of this program.
   - 33 units of open electives selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 12 units of General Education in accordance with University requirements.
3. The standard duration of the program is 5 years, consisting of 8 sessions of full-time study plus 2 sessions of required work experience, with each session worth 24 units of credit.
4. General Education courses may not be taken before a student enters Year 2 of the program.

### Faculty Regulations for the BPlan

#### Core Courses

The core courses prescribed for the program are all those named in Table 3360–1 Program Schedule.

#### Honours

Honours are awarded in the Bachelor of Planning on the basis of quality of performance throughout the whole degree and in accordance with current faculty policy. For the purpose of calculating Honours at graduation, the Honours value of each course is indicated by the units of credit associated with that course. Units of credit generally reflect the workload required of students in courses in which grades are awarded. Honours grades are Class 1, Class 2 Division 1, or Class 2 Division 2.

#### Work Experience

During the program, students must undertake 48 weeks of approved employment related to planning. The program assists with placements in state government agencies, planning consultants, private firms, and local councils. This is normally undertaken in the twelve months following Session 1 of Year 3 as indicated in the Program Schedule. Work experience requirements must be completed prior to graduation. The type of employment proposed must be submitted to the Program Head for approval.

#### Progression

Courses are taken in the year sequence listed in Table 3360–1, except with the permission of the Head of the Planning and Urban Development Program.

#### Program Guidelines

**Program Minor**

Students are strongly encouraged to use the elective courses to develop a specialisation in addition to their core planning studies.

---

**Combined Architecture and Arts Program**

**Program Head:** Graham Bell

This combined degree allows students to add their choice of an Arts program to the standard, professionally accredited Architecture program offered by the Faculty of the Built Environment. It provides flexibility in the choice of courses with the full Arts program and enables students to gain a broad education in Arts as well as the specialised studies of Architecture. Since both the Architecture and Arts programs can have common subject areas, and the Architecture program contains a percentage of open electives, the combined program requires only one additional session of study on top of the standard BArch program to gain the additional qualification of Bachelor of Arts. In general, the BA courses are taken concurrently with the BArch program so that both can be completed in eleven sessions.

The award of this combined degree demands an amalgamation of the conditions governing both the BArch degree and the BA degree with changes to the requirements for participation in General Education programs and total units of credit.

---

**3262 Bachelor of Architecture Bachelor of Arts**

BArch BA

The BArch BA program is administered by the Architecture program in the Faculty of the Built Environment. The program requires students to obtain the approval of the Faculty of Arts and Social Sciences for the BA component of their program. The final program and timetable must be approved by the Architecture Program Head in the Faculty of the Built Environment.

The program is open to all students who satisfy both the Architecture and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the Architecture program after the completion of at least one year if they have a Credit or higher average or the permission of the Architecture Program Head. Transfer after the second year may result in the student taking more than minimum time to complete the combined degree.
Students should start discussing their program with representatives of the Architecture Program and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Arts program that they wish to undertake. The Arts and Social Sciences section in this Handbook describes the options. There are rules that prescribe what may be taken in each year and students should be aware of the Architecture requirements prior to choosing Arts preferences.

Students will also need to refer to the Faculty of Arts and Social Sciences section in this Handbook for complete program and course details.

Registration/Professional Recognition

Please refer to the BArch professional recognition section for complete details.

**Degree Rules**

1. The degrees of Bachelor of Architecture and Bachelor of Arts are awarded at either Pass or Honours level (BArch only) after successful completion of a minimum of 210 units of credit from the Architecture program and 78 units of credit from the Arts programs. The combined total units of credit is 288. To gain Honours in Arts, students are required to carry out an extra year of study (48 units of credit) with a major in an approved area.

2. To fulfill these requirements, students must complete:
   - 171 units of core courses in Architecture, being all those prescribed in the faculty regulations for this program.
   - 24 units of work experience completed after Year 1 and before Year 5 as prescribed in the faculty regulations for this program.
   - 15 units of FBE electives in the Faculty of the Built Environment, selected in accordance with faculty regulations for this program.
   - 78 units of credit from the range of Arts majors in accordance with the Faculty of Arts and Social Sciences Rules. Students in the combined degree should undertake no more than 24 units of credit in Level 1 courses.

3. The standard duration of the program is 6 years consisting of 11 semesters of full-time study (24 units of credit per semester) plus 1 semester of required work experience.

4. Arts courses may not be taken until after the student has completed 96 units of credit from the BArch program.

5. To fulfill the requirements of the BA component of the program, students must undertake a major by completing 42 units of credit in one of the approved disciplinary streams identified in the faculty regulations for this program.

**Faculty Regulations for the BArch BA**

**Core Courses in Architecture**

The core courses prescribed for the program are all those named in Table 3262–1 Program Schedule.

**FBE Electives**

Faculty of the Built Environment (FBE) electives must be selected from those offered by the FBE.

**Arts Major**

For the Arts majors and course selection restriction please see the Faculty of Arts and Social Sciences.

**Course Selection Restrictions**

No course included for credit in the BArch program can be included in the 78 units of credit required in Rule 1 for the BA program.

**Honours**

Students may be awarded a BA(Honours) degree through successfully completing an Honours year. It should be noted that entry into a particular BA (Honours) program may require completion of courses additional to those specified in the Degree Rules and Faculty Regulations. The Honours year would be outside the suggested time for the combined degree. The Bachelor of Architecture degree may be awarded with Honours based on the quality of performance in the program and in accordance with
current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2. In order to be considered for the University Medal, students must have completed at least 3 years of study towards their BArch degree at the University of New South Wales. Where appropriate, BArch(Hons) is conferred at graduation for the combined degree unless students carry out the additional BA Honours program.

Work Experience/Composite Courses/Progression Rules see BArch Regulations.

Combined Architecture and Social Science Program

Program Head: Graham Bell

This combined degree allows students to add their choice of a Social Science program to the standard, professionally accredited Architecture program offered by the Faculty of the Built Environment. It provides flexibility in the choice of courses within the full Social Science program and enables students to gain a broad education in Social Science as well as the specialised studies of Architecture. Because Architecture and Social Science programs can have common subject areas and the Architecture program contains a percentage of open electives, the program requires only one additional session of study to gain the additional qualification of Bachelor of Social Science. In general, the BSocSc courses are taken concurrently with the BArch program so that both can be completed in eleven sessions.

The award of this combined degree demands an amalgamation of the conditions governing both the BArch degree and the BSocSc degree with changes to the requirements for participation in General Education programs and total units of credit.

3263 Bachelor of Architecture Bachelor of Social Science

BArch BSocSc

The BArch BSocSc program is administered by the Architecture Program of the Faculty of the Built Environment. The program requires the student to obtain approval of the Faculty of Arts and Social Sciences for the BSocSc components of their program. The final program and timetable must be approved by the Architecture Program Head in the Faculty of the Built Environment.

Students should start discussing their program with representatives of the Architecture Program and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Social Science Major that they wish to undertake. The Faculty of Arts and Social Sciences section in this Handbook describes the options available and students will need to refer to this section for complete program and course details. There are rules that prescribe what may be taken in each year and students should be aware of the Architecture requirements prior to choosing Social Science preferences.

Registration/Professional Recognition

Please refer to the BArch professional recognition section for complete details.

Degree Rules

1. The degrees of Bachelor of Architecture and Bachelor of Social Science are awarded at either Pass or Honours level (BArch only) after successful completion of a minimum of 210 units of credit from the Architecture program and 78 units of credit from the Social Science program. The combined total units of credit is 288. To gain Honours in Social Science students are required to carry out an extra year of study (48 units of credit) with a major in an approved area.

2. To fulfill these requirements, students must complete:
   - 171 units of core courses in Architecture, being all those prescribed in the faculty regulations for this program.
• 24 units of work experience completed after Year 1 and before Year 5 as prescribed in the faculty regulations for this program.
• 15 units of FBE electives in the Faculty of the Built Environment, selected in accordance with faculty regulations for this program.
• 78 units of credit from the Social Science Policy core and a major in accordance with Faculty of the Arts and Social Sciences Rules. Students in the combined degree should undertake no more than 24 units of credit in Level 1 courses.

3. The standard duration of the program is 6 years consisting of 11 semesters of full-time study (24 units of credit per semester) plus 1 semester of required work experience.

4. Social Science courses may not be taken until after the student has completed 96 units of credit points from the BArch program.

5. To fulfill the requirements of the BSocSc component of the program, students must complete a Social Science and Policy core and a major (30 units of credit) in one of the approved disciplinary streams identified in the faculty regulations for this program.

Faculty Regulations for the BArch BSocSc

Core Courses in Architecture

The core courses prescribed for the program are all those named in Table 3263–1 Program Schedule.

FBE Electives

Faculty of the Built Environment (FBE) electives must be selected from those offered by the FBE.

Social Science Major

For Social Science majors, please see the Faculty of Arts and Social Sciences section in this Handbook.

Course Selection Restrictions

No course included for credit in the BArch program can be included in the 78 units of credit required in Rule 1 for the BSocSc program.

Honours

Students may be awarded Honours in the BSocSc by successful completion of an Honours year. It should be noted that entry into a particular BSocSc Honours program may require completion of courses additional to those specified in the Degree Rules and Faculty Regulations. The Honours year would be outside the suggested time for the combined degree. The Bachelor of Architecture degree may be awarded with Honours based on the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2. In order to be considered for the University Medal, students must have completed at least 3 years of study towards their BArch degree at the University of New South Wales. Where appropriate, BArch Honours is conferred at graduation for the combined degree unless students carry out the additional BSocSc Honours program.

Work Experience/Composite Courses/Progression Rules – see BArch Regulations

Combined Architecture and Laws Program

Program Head: Graham Bell

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Architecture program offered by the Faculty of the Built Environment. The Law courses, while fewer in number than the Jurisprudence/Law program, satisfy the requirements for the award of the professional LLB degree. Because the Architecture program contains a percentage of open electives which can be replaced by Law courses, the combined program requires only three additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BArch program and both can be completed in thirteen sessions, although students are considered to have a significant workload throughout these thirteen sessions.

4705 Bachelor of Architecture Bachelor of Laws

BArch LLB

The BArch LLB course is administered by the Faculty of Law, however the final program and timetable is also subject to the approval of the Head of the Architecture Program in the Faculty of the Built Environment.

Students will need to refer to both the Faculty of Built Environment and Faculty of Law sections of this Handbook.

Registration/Professional Recognition

Please refer to the BArch and LLB professional recognition section for details.

Combined Planning and Laws Program

Program Head: Susan Thompson

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Planning program offered by the Faculty of the Built Environment. The Law courses satisfy the requirements for the award of the professional LLB degree. Because the Planning program contains a percentage of open electives that can be replaced by Law courses, the combined program requires only four additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BPlan program and both can be completed in a minimum of seven years, consisting of twelve academic sessions (six years), plus two sessions of compulsory work experience. This compares with the five year BPlan program, which consists of eight academic sessions and two sessions (12 months) of compulsory work experience.

4707 Bachelor of Planning Bachelor of Laws

BPlan LLB

The BPlan LLB course is administered by the Faculty of Law. However, students are required to obtain approval from the Head of the Planning and Urban Development Program in the Faculty of the Built Environment for the Planning components of their program.

Registration/Professional Recognition

Please refer to the BPlan professional recognition section for complete details.

### Degree Rules

1. The degrees of Bachelor of Planning and Bachelor of Laws are awarded at Pass level after successful completion of a minimum of 192 units of credit from the Planning program and 144 units of credit from the Laws program. The Bachelor of Planning may be awarded at Honours level in accordance with the faculty regulations for this program.

2. To fulfill these requirements, students must complete:
   - 144 units core courses in Planning, being all those prescribed in the faculty regulations for this program.
   - 48 units of work experience as prescribed in the faculty regulations for this program.
   - 92 units of core courses in Law, being all those prescribed in the faculty regulations for this program.
   - 52 units of program electives in Law, selected in accordance with the faculty regulations for this program.

3. The standard duration of the program is 7 years, consisting of 12 semesters of full-time study (24 units of credit per semester) plus 2 semesters of required work experience.

4. Law units may not be taken until after the student has successfully completed 48 units of credit of the Planning program.

### Faculty Regulations for the BPlan LLB

#### Core Courses
The core courses prescribed for the combined program are all those named in Table 4707–1 Program Schedule.

#### Transfer Arrangements
Students may enter directly in Year 1 or may apply to transfer from the Planning program after the completion of one year if they have achieved a Distinction or higher average. All applications for transfer must be registered with the University Admissions Centre. Transfer after the second year may result in the student taking more than the minimum time to complete the combined degree.

Transfer from the combined BPlan LLB program into either the BPlan or LLB programs may occur at the discretion of the respective Head of Program. All applications for transfer must be lodged through the University Admissions Centre.

### Honours

The Bachelor of Planning degree may be awarded with Honours based on the quality of performance in the program of study undertaken to fulfill the requirements of that degree (being 240 units of credit including 144 units of prescribed core and the first 48 units of Law courses undertaken for the combined program), and in accordance with current faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

### Work Experience

Students must undertake 48 units of work experience in a planning or planning related area (which could be with a professional practice specializing in environmental law). Although work experience is normally undertaken after the completion of five academic sessions, BPlan LLB students may elect to undertake the one year (two sessions) of compulsory work experience required for the award of the single BPlan degree after the completion of their BPlan and LLB coursework. In addition, students may undertake the compulsory work experience in flexible ways (subject to the approval of the Head of the Planning and Urban Development program), thereby reducing the overall length of the BPlan LLB program.

### Program and Master of Environmental Management

**Program Head:** Susan Thompson

This program provides an opportunity to obtain two professional degrees. It allows students to add the Masters in Environmental Management Program offered by the Institute of Environmental Studies to the professionally accredited Bachelor of Planning program offered by the Faculty of the Built Environment. Because the Planning program contains a percentage of open electives which can be replaced by MEM courses, the linked program requires only two additional sessions of study to gain both qualifications. Both degrees can be completed in a minimum of twelve sessions. As an alternative, the final 48 units of credit in the MEM program may also be taken part-time or by distance learning.

Students may transfer to this program following three years of study in the Bachelor of Planning program having achieved a weighted average of 65 or higher in all graded courses undertaken.

Students in the BPlan MEM program will not be eligible for the award of the Graduate Certificate in Environmental Management nor the Graduate Diploma in Environmental Management.

**3360 Bachelor of Planning Master of Environmental Management – PLANG23360**

**BPlan MEM**

The BPlan MEM course is administered by both the Faculty of the Built Environment (Years 1–5) and the Institute of Environmental Studies (Year 6). The final program and timetable for Years 1–5 must be approved by the Head of the Planning and Urban Development Program in the Faculty of the Built Environment and for Year 6 by the Director of the Institute for Environmental Studies.

**Registration/Professional Recognition**

Please refer to the BPlan professional recognition section for complete details.

**Table 3360–4 Program Schedule**

</tbody>
</table>
**Degree Rules**

1. The degree of Bachelor of Planning will be awarded at either Pass or Honours level after the successful completion of a minimum of 240 units of credit including 24 units of credit from the MEM program. The degree of Master of Environmental Management will be awarded at Pass level after the successful completion of 72 units of credit from the MEM program, 24 of which are carried out during the final two years of the BPlan program.

2. To fulfill these requirements, students must complete:
   - 147 units of core courses in Planning, being all those prescribed in the faculty regulations for this program.
   - 48 units of work experience as prescribed in the faculty regulations for this program.
   - 9 units of open electives selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 42 units of core courses in Environmental Management, being all those prescribed in the regulations for the MEM program.
   - 12 units of General Education in accordance with University requirements.
   - 30 units of program electives in Environmental Management selected in accordance with the regulations for the MEM program.

3. The standard duration of the program is 5 years consisting of 10 semesters of full-time study (24 units of credit per semester) plus 1 year of required work experience.

4. The student must complete 144 units of credit in the Bachelor of Planning program before attempting any courses from the MEM Program.

**Faculty Regulations for the BPlan MEM**

**Core Courses in Planning**

The core courses prescribed for the BPlan program are all those named in Table 3360–4 Program Schedule up to and including the end of Year 5 and excluding the four courses named in Table 3360–5 MEM Core Courses.

**Transfer Arrangements**

Students may transfer to this program following the successful completion of at least 144 units of credit in the Bachelor of Planning program provided they have achieved a weighted average mark across all graded courses of 65 or higher.

Students in the BPlan MEM program may transfer back to the BPlan program. They will receive credit toward their BPlan degree of up to 24 units of credit for MEM courses completed while undertaking the program. Students in the BPlan MEM program who do not complete the BPlan degree including 24 units of credit from MEM courses cannot transfer directly to the MEM program, but may subsequently apply for admission to the MEM upon completion of the BPlan and may request credit for MEM courses completed while they were undertaking the joint program.

**Course Selection Restrictions**

During the final three sessions of the BPlan program students must complete the four MEM courses listed in Table 3360–5 below.

**Table 3360–5 MEM Core Courses**

</tbody>
</table>

**Honours**

The Bachelor of Planning degree may be awarded with Honours based on the quality of performance in the program of study undertaken to fulfill the requirements of that degree, and in accordance with current faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

**Work Experience**

During the degree, students must undertake 48 weeks of approved planning-related employment. The Planning and Urban Development Program assists with placements in state government agencies, planning consultants, private firms, and local councils. This is normally undertaken in the twelve months following Session 1 of Year 3 as indicated in the Program Schedule. Work experience requirements must be completed prior to graduation. The type of employment proposed must be submitted to the Head of the Planning and Urban Development Program for approval.

Note that Sessions 1 and 2 of Year 6 may also be undertaken part-time or by distance learning.
A Message from the Dean

The College of Fine Arts is one of the ten dynamic faculties of the University of New South Wales. Studying at COFA is characterised by rigorous studio activities, high levels of scholarship and research, exposure to the best and most exciting art and design practice Sydney can offer, and participation in collaborative international art projects. Located in Paddington, the centre of Sydney's gallery and museum district, COFA offers a comprehensive range of undergraduate, postgraduate and research degrees through its five professional schools (School of Art, School of Art Education, School of Art History and Theory, School of Design Studies and School of Media Arts). The College is unique amongst Australian art and design institutions in that it provides studio practice as well as professional studies in theory, history, education and management.

Staff and students at the College are engaged in scholarship and research across a wide range of visual arts and design disciplines including painting, drawing, printmaking, sculpture/performance/installation, photography, film/video, mixed media, digital media, ceramics, textiles, jewellery, graphics/media, applied/ object and environments/spatial. Specialist degrees are offered in the areas of art education, design education, art and design history and theory, and arts administration. Cross-disciplinary courses that link COFA and other UNSW teaching and research expertise are also available, combining, for example, arts administration with law or commerce.

The teaching and research of both studio and theoretical activities is based on three principles. Firstly, the increased cross-disciplinary nature of the visual arts and design is recognised. Secondly, the acquisition of traditional skills and the application of new technologies (often regarded as mutually exclusive) are integral to all aspects of teaching and learning. Thirdly, students are offered a college and a wider university experience that enhances their capacity to respond in a significant way to the personal, artistic, cultural and political issues of our time.

COFA has a commitment to the international engagement of its students, staff, curriculum and research activities. Within an overall enrolment of approximately 2200, 210 are international students who come from more than 25 countries across Asia and the Pacific, Europe and the Americas. The College has cooperative agreements with specialist art and design institutions throughout the world. For example, the International Drawing Research Institute (located at the College) places COFA staff and students in key learning roles alongside colleagues in Beijing and Glasgow.

COFA has the expertise, resources and experience to offer specialised yet flexible cross-disciplinary degree programs in visual arts and design. The extensive holdings of the Clement Semmler Library, the vibrant and challenging exhibition programs of the COFA student gallery and internationally renowned Ivan Dougherty Gallery, the excellent materials handling and fabrication workshops, A/V support and computer facilities that are essential learning and research tools within art and design make a major contribution to the student experience at COFA. The research activities of students and staff are supported by individual staff and student initiatives, specialist conferences, centres and institutes.

It gives me great pleasure to welcome you into the community of artists, designers, theorists and educators that make up the Faculty of the College of Fine Arts, UNSW.

Professor Ian Howard

Faculty Information and Assistance

The College of Fine Arts

Research and scholarship in the disciplines of art and design is organised and administered through five schools. Undergraduate degree programs allow specialised studies, combined and interdisciplinary student plans. The College includes the Clement Semmler Library, a specialist art and design research library; the Ivan Dougherty Gallery, the COFA Exhibition/Performance Spaces, and Three Foot Square; and three research centres: the International Drawing Research Institute, the iCINEMA Centre for Interactive Cinema Research and the Centre for Contemporary Art and Politics.

Some People Who Can Help You

If you require advice about enrolment, degree requirements, progression within programs or any other general matters, contact the Student Centre, ground floor, B Block, phone 9385 0684. Faculty timetables and official University forms are also available from the Student Centre.

The location of the College of Fine Arts is:
Cnr. Oxford Street and Greens Road
Paddington NSW 2021 Australia

All enquiries should be addressed to:
The Student Centre
College of Fine Arts,
The University of New South Wales
PO Box 259
Paddington NSW 2021
Tel: (02) 9385 0684
Fax: (02) 9385 0706
email: cofa@unsw.edu.au

The College of Fine Arts Website
Please refer to the College of Fine Arts’ website for further information:
www.cofa.unsw.edu.au

The School of Media Arts
Web address: www.cofa.unsw.edu.au/media

Course Descriptions

Course descriptions for 2005 can be found in alphabetical order by course code at the back of this Handbook. Many non-core courses are offered on a rotating two or three year schedule, and the full list is available in the Online Handbook at www.handbook.unsw.edu.au

Units of Credit

The University has introduced a university wide units of credit system for all courses offered to both undergraduate and postgraduate students. The system means that a course will have the same units of credit value irrespective of which faculty’s program it is counting towards. Students are able to determine the value of courses taken from other faculties when planning their programs of study. The student load for a course is calculated by dividing the units of credit value of a course by the total units of credit required for that year of the program. Student load is used to determine both Student Contribution and Tuition fees. Students who take more or less than the standard load for that year of a program will be charged accordingly.

Prerequisite and Corequisite Requirements

A student enrolling in a course must satisfy the prerequisite and corequisite requirements for that course.

General Education Requirements

College of Fine Arts students are required to undertake their General Education in other faculties of the University. The objectives of General Education and details of the courses offered across the University are available at the front of this Handbook.

The following courses are not available as General Education for students in the following degrees:

Bachelor of Art Education
Bachelor of Design Bachelor of Art Education

GENB4001 Psychology of the Individual and the Group
GENT1502 Student Learning, Thinking and Problem Solving
GENT1503 Introduction to Educational Psychology
GENT1504 Ethics and Education
GENT1506 Social Foundations of Education
GENT1507 Learning Process and Instructional Procedures

Applications for exemptions from General Education courses on the basis of prior studies, or approval to undertake “mainstream” courses offered in other degree programs as GE courses (General Education section of the Handbook), should be made in writing to the Associate Dean, Academic, College of Fine Arts.

Advanced Standing

Credit can be gained for relevant equivalent courses completed at another recognised institution within the previous ten years. The maximum advanced standing available is 50% of the program.

Attendance

Except where leave is granted:
• students must attend all classes for courses in which they are enrolled;
• where absences in excess of 3 classes occur, students may be given a fail grade (UF).

Computing Information

For general details of computing services, see ‘General University Rules and Student Information’ in this Handbook.

Computing resources at the College include 4 main teaching labs, a general access lab, smaller specialist labs, specialist audio and video studios, workstations and control rooms. In total, COFA provides over 150 general and specialist workstations equipped with hardware and software complementary to course requirements. All workstations are connected to the University Wide Network, which in turn is connected to the Internet via the ARNNet2 network.
The General Access Laboratory provides COFA students with word processing, email, Internet access and basic imaging needs including OCR and image scanning. The teaching labs provide access to multimedia, web authoring, DVD authoring, modelling, animation, CAD, desktop publishing and high end scanning. The Digital Studio and Moving Image Labs provide access to digital audio and video production. Decks patched into these workstations include DAT, VHS, Mini DV and DVCAM. The Research Imaging Laboratory includes a number of computers with a range of 2D and 3D digital imaging applications.

In addition to the College computing facilities, COFA also encourages students to consider the purchase of a personal computer as recommended by UNSW Division of Information Services (DIS) to support their studies. The COFA Computing Code of Conduct handbook provides further information on purchasing a computer, computing policy, facilities and services can be found at www.cofa.unsw.edu.au/units/csu

Advice is available from school offices on the requirements for computing equipment and software for each program offered. Students undertaking computing studies in any program are responsible for ensuring that they have appropriate backups of their work. Work should not be left on College computers as it may be removed at the discretion of the Facilities Zone Manager and accept the College Traffic and Parking Rules

Students who fail to comply with these rules may be required to show the right to regulate the entry of individuals and vehicles and their equipment, including DAT recorders, mini DV cameras, digital still cameras, and portable data projectors. For more information, see www.cofa.unsw.edu.au/units/resource/

A range of video and audio editing equipment and studios is also available at the College. Other services at the College include Digital Print and Copy Service (DP&CS) which provides various output services to the students and staff of COFA, UNSW and external clients. Services include: large format printing on a range of media; digital to colour copier; photographic continuous tone; CD burning; digital to film and high quality film scanning.

Clement Semmler Library

The Clement Semmler Library supports teaching, learning and research in art and design at the College of Fine Arts. For information regarding resources and opening hours, please refer to the website at http://info.library.unsw.edu.au/cofa/about/cofa.html

Ivan Dougherty Gallery

UNSW Ivan Dougherty Gallery provides an educational and cultural resource for the University, the broader national and international art community and the general public. The Gallery presents around ten to twelve group or thematic exhibitions per year of Australian and international recent and contemporary art in all media and disciplines: painting, sculpture, prints, drawings, design and installation work. There is a faculty and postgraduate exhibition held each year.

Public programs such as forums, symposia and floor talks accompany exhibitions. These are attended by UNSW students and the general public. In addition, a publication is produced for each exhibition, generally in the form of an illustrated catalogue containing curatorial essays, artist texts and background information. The Gallery keeps a research archive of all published material and photographic images of each exhibition.

Ivan Dougherty Gallery was established in 1977 by the Alexander Mackie College of Advanced Education at 200 Cumberland Street, The Rocks and was named after Major General Sir Ivan Dougherty, Chairman of the first College Council. It moved to its current premises in 1981.

UNSW Ivan Dougherty Gallery hours: Mon-Sat 10am – 5pm (closed public holidays).
Website: www.cofa.unsw.edu.au/idg

UNSW College of Fine Arts also houses the COFA Exhibition and Performance Space (COFA Gallery), primarily for the benefit of student work. It oversees a dynamic program of week-long exhibitions featuring the work of COFA students, students from international art institutions, recurrent events such as ARTEXPRESS and various student award exhibitions.

COFA Gallery hours: Monday to Friday 10am – 5pm

Support for Students

The Counselling Service, Compass Programs, provides personal development resources, enhancement programs and confidential counselling to enrolled students of UNSW. Students are encouraged to access the Counselling Service in relation to any issue that might adversely affect their personal and academic progress. The service employs psychologists who are able to assist students with concerns such as: transition and adjustment to university life and academic expectations; support with sorting out academic or administrative issues; motivation and other difficulties which affect study; interpersonal problems or relationship conflicts; and personal concerns such as stress, anxiety, depression or loneliness.

Appointments at the College of Fine Arts can be made by telephoning (02) 9385 0733 or visiting the COFA service at ground floor, G Block, Room 05. Appointments on the Kensington campus are available between 9am and 5pm and can be made by dropping in or telephoning (02) 9385 5418 for the Counselling Service which is located on the 2nd Floor, East Wing, Quadrangle Building. Telephone counselling appointments and before/after hours appointments can be negotiated.

The Counselling Service website contains an introduction to the service and useful resources for students and staff: www.counselling.unsw.edu.au

Indebtedness to the University

A student becomes indebted to the University by non-payment of any fee or charge and by non-return of any College property. A student who is indebted to the University and who fails to make a satisfactory settlement of the indebtedness upon receipt of due notice will be penalised.

Students who fail to pay charges and late charges levied by the University will not be permitted to attend classes, undertake assessments or be granted any course grades.

Students who fail to return material borrowed from the Clement Semmler Library by the due date may be refused further borrowing privileges at the discretion of the College Librarian or delegate.

Students who fail to return on time materials borrowed from College Resource units may be refused further borrowing privileges, at the discretion of the Dean or delegate.

Students unable to return Library or other Resource items borrowed from the College are required to pay the cost of their replacement. The minimum charge per item will be determined by the College.

Students who fail to return any materials borrowed from the College, or who fail to satisfy any financial obligation to the University may incur one or more of the following penalties:

1. refusal of further borrowing privileges;
2. withdrawal of authority to attend classes;
3. refusal of permission to enrol;
4. withholding of the testamur for an award.

Such penalty will remain in force until materials are returned, compensation made, or other such obligations satisfied.

Building Rules

Students are required to abide by the building closing times determined for the campus. Opening and closing times will be determined by an authorised College officer from time to time and will be shown on official notice boards. Building and other campus premises or grounds are to be vacated at any time when required by an authorised officer of the College.

In the interests of safety and student welfare, persons under the age of 16 years are not permitted on campus unless expressly authorised by the Dean.

In the interests of general comfort and safety, students, staff and visitors are required to obey the campus rules regarding smoking, eating and drinking.

Students seeking to serve alcoholic drinks at social functions are required to have the prior permission of the Dean or delegate.

Animals are not permitted on any part of the campus, except with the permission of an authorised College officer.

Students who fail to comply with these rules may be required to show cause why they should not lose their entitlement to membership and privileges of the College and, subsequently, may be subject to such penalty as may be determined by the Dean.

Traffic and Parking Rules

The College grounds are private property and the University reserves the right to regulate the entry of individuals and vehicles and their behaviour and operation within the grounds. Students may not bring vehicles onto College grounds unless they have the express permission of the Facilities Zone Manager and accept the College Traffic and Parking Rules and the penalties for the infringement of those rules.
Any vehicle brought onto the grounds is required to be driven, parked and managed in compliance with the College rules and in the observance of the directions of authorised University/College officers. The College does not accept responsibility for any damage caused to vehicles while travelling, standing or parked in the grounds, nor for any damage to, or loss of, accessories and/or contents.

The bringing or driving of vehicles or cycles on paths, grassed areas, or elsewhere on the grounds, except for roadways and car parks, is prohibited except with the permission of an authorised University/College officer.

Where a breach of the Traffic and Parking Rules occurs, the following penalties will apply:

- for the first infringement or offence, an authorised officer will record the vehicle registration number and issue a written “first parking warning notice”;
- for the second and subsequent infringements or offences, an authorised officer will record the vehicle registration number and issue a “second parking warning notice”. The driver shall be required to pay a minimum fine of $50.

Students may appeal in writing to the Dean against imposition of any penalty for infringement of the Traffic and Parking Rules.

**Program and Course Information**

**4800 Bachelor of Fine Arts (BFA)**

**The Program**

The program aims:

- to provide an opportunity for students to undertake rigorous and demanding studies at tertiary level from a wide range of approaches and disciplines within the visual arts;
- to provide the opportunity for students to explore aspects of the visual arts through critical examination of the possibilities they offer and by use of available technological resources;
- to encourage students to develop an increased self-motivation and commitment to their studies;
- to provide an environment in which students may develop as far as possible the following characteristics and abilities both during and subsequent to their involvement in the course:
  - an understanding of concepts relevant to aesthetics and the visual arts;
  - an understanding of various media through practice and experimentation with such media;
  - a confidence and competence in decision making, together with an appreciative and informed awareness of viewpoints in the visual arts other than their own;
  - an understanding of the historical and theoretical underpinning of contemporary fine art practice;
- to encourage students to realise their own intellectual and creative potential;
- to increase students’ awareness of, and sensitivity to, their environment.

If students are unsure of their program structure and requirements they should contact the Student Centre in the Faculty Office.

**Program Structure: 4800 Bachelor of Fine Arts**

The Bachelor of Fine Arts is the equivalent of three years full-time study. It is intended to provide an introduction for those who wish to involve themselves as practitioners in the visual arts or related fields.

To qualify for the award of Bachelor of Fine Arts a student must accrue a total of 144 units of credit.

**Selection of Major Studies**

Following the completion of Introductory Studies, placement of students in a major sequence will be based on the results for Session 1 courses, student preferences and the availability of places.

Students will be allocated to the highest preference that their aggregate of marks determines.

Students may undertake either a major sequence of 60 units of credit OR a major of 42 units of credit and a minor in another discipline of 18 units of credit.

**Electives**

Electives allow students to plan their studies to specific needs, interests and career aspirations. Some students may choose electives to focus and deepen their studies, others will choose electives from a broad range of art, art education, design, digital media, art history and theory courses. Electives may be taken as courses offered by other faculties of the university. Further information can be found under ‘Elective Courses for Undergraduate Programs’ at the end of the College of Fine Arts section.

**Honours**

BFA Honours is a program of higher-level study available to BFA students who wish to undertake research in Fine Arts, extending into an Honours fourth year. BFA students, in consultation with lecturers, should apply for entry to the program by the end of Session 4 but no later than Session 6. For entry to Honours, students must have achieved a Distinction average in 48 units of credit in Fine Arts core courses from Years 2 and 3, and have completed, or be enrolled in, a course in research practices.

In the Honours year, students undertake a research program in their area of Fine Arts specialisation. Each student is allocated a supervisor. Honours students are expected to perform at a satisfactory (SY) level throughout the program. The course is full-time. The body of work undertaken will be presented and assessed in exhibition form, accompanied by the presentation of a research paper relating to the student’s studio practice. Students are required to undertake formal activities in conjunction with SART4030 and SART4044.

**Program Rules**

1. For the Pass degree, a student must complete and pass 144 units of credit.
2. Students must complete 18 units of credit in approved Fine Arts Introductory Studies courses or their equivalent.
3. A degree must contain a major sequence of study or a combination of a major and a minor.
4. Students must complete 30 units of credit in courses approved as Fine Arts Contextual Studies [see Fine Arts Table B].
5. Students must complete 12 units of credit of General Education.
6. Students must complete 24 units of credit in electives.
7. A major sequence is defined as 60 units of credit in a single discipline. A major sequence may also be taken as 42 units of credit in one discipline with an 18 units of credit minor in another discipline. Major sequences are defined in Fine Arts Table A.
8. A minor sequence is defined as 18 units of credit (see rule 6 above) in a single discipline which is available within but not taken as part of a major defined in Fine Arts Table A, or a sequence as defined in other undergraduate College of Fine Arts programs.
9. Not more than 60 units of credit in Level 1 courses will be counted towards the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.

**Honours**

To be eligible to graduate with Honours students must complete all requirements of the Pass degree (see above) and complete an additional 48 units of credit over the equivalent of 1 year full-time.

1. To be eligible for entry to Honours, a student must have achieved a Distinction average in 48 units of credit in Fine Arts core courses in Years 2 and 3. Students will normally nominate at the end of Year 2 but must nominate no later than the end of Year 3, and must complete a course in research practices in art and design prior to entry to the Honours program. Students with a degree of Bachelor at Pass level may be permitted to enrol for the award of the degree at Honours level with credit for all courses completed, if during their studies for the Pass degree, they have satisfied the prerequisites for entry to the Honours level or the equivalent of those prerequisites.
2. The Honours year consists of:
   a. an Honours Paper outlining studio research practice;
   b. Honours Studio Practice, which shall lead to the exhibition of work; and
   c. attendance at such seminars, lectures and classes shall be required.

Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the following weightings: Honours Studio Practice 75%, Honours Paper 25%.

4812 Bachelor of Fine Arts Bachelor of Arts (BFA BA)

The Program

The BFA BA degree program is the equivalent of four years full-time study. It enables students to combine the broad range of offerings available in the BA with the focused study of the visual arts and visual culture provided by the BFA. The major study in the BFA develops students’ career-related skills and experiences for the art and cultural industries or as arts practitioners as well as a depth of knowledge in historical and social studies. Graduates will be prepared for employment in the arts and cultural industries.

Program Structure: 4812 Bachelor of Fine Arts Bachelor of Arts

Students undertaking this combined degree program complete the core requirements of both the Bachelor of Fine Arts and the Bachelor of Arts.

Program Rules

1. Students must complete a program of study of 192 units of credit, of which
   (a) at least 90 units of credit must be obtained in courses offered by the College of Fine Arts;
   (b) at least 84 units of credit must be obtained in courses approved for the Bachelor of Arts degree (excluding those offered by the College of Fine Arts); and
   (c) 18 units of credit in electives.

2. The BFA component of the combined degree must include:
   (a) a major sequence (at least 42 units of credit) in an approved Fine Arts discipline;
   (b) 12 units of credit in Fine Arts Introductory Studies;
   (c) SAHT1101 and SAHT1102; and
   (d) 24 units of credit from COFA electives.

3. Of the units of credit obtained in courses approved for the BA degree (excluding those offered by the College of Fine Arts):
   (a) between 24 and 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit in any one school, department, unit or interdisciplinary program.
   (b) no more than 54 units of credit in total may be from any one school, department, unit or interdisciplinary program;
   (c) at least 18 units must be obtained in Upper Level courses other than those taught by the school, department, unit or interdisciplinary program in which a major is being taken; and
   (d) at least 42 units of credit must be obtained in one of the following major sequences within the Faculty of Arts and Social Sciences;

   - AUST Australian Studies
   - CHIN Chinese Studies
   - COMD Development Studies
   - EDST Education
   - ENGL English
   - EURO European Studies
   - FILM/PFST/THFI/THST Film and Theatre
   - FREN French
   - GERS German Studies
   - GREK Greek (Modern)

4. No student may commence Upper Level courses until 24 Level 1 units of credit have been successfully completed.

5. Students may be eligible for entry to Honours in either the BFA or the BA by completing an additional year of study (48 units of credit). For entry to the BFA Honours program, a student must have achieved a Distinction average in 48 units of credit of COFA courses from Years 2, 3 and 4.

4801 Bachelor of Art Education (BArtEd)

The Program
The Bachelor of Art Education is the equivalent of four years full-time study in art education and specialist fine arts studies. The art education program incorporates flexibility in structure in order that students may develop their individual potential as future art educators in a variety of roles.

Professional experience placements are undertaken in primary and secondary schools, and other educational, community, cultural and industry based settings, including a full session Professional Experience Internship. Students studying a combined degree also complete a design industry placement.

Secondary art teachers are required to fulfil many and varied responsibilities. This program prepares students to function as a visual arts and design teacher in secondary schools, primary schools, community organisations, museums and galleries, as a curriculum development officer, designer, artist, art and design historian/theorist/critic. The opportunity exists within the course for students to focus on any of these roles.

Program Structure: 4801 Bachelor of Art Education
The Bachelor of Art Education comprises an art education major, professional experience in art education, courses in fine arts, including art history and theory, electives and General Education courses.

The Foundation Year
All students complete foundation courses in art education (including school field experiences), fine arts and art history and theory. These courses provide a core, foundational experience. In subsequent years students develop plans emphasising their interests in the practices of art education and fine arts and design, contextualised through courses in their art education major including professional experience.

Art Education
Courses in art education provide students with investigations and applications of the theoretical and practical knowledge of the art educator. These compulsory courses include fieldwork and professional experience in a range of educational, cultural, community and industry contexts and the Professional Experience Internship.

Art Education Honours
The Bachelor of Art Education may be completed with Honours.

Fine Arts
Courses in Fine Arts include: ceramics, drawing, jewellery, painting, photomedia, printmaking, sculpture, performance and installation, textiles and time based art. Students may plan sequences of courses in the Fine Arts as a major (at least 24 units of credit). In completing a Fine Arts major, students may choose courses offered as electives and the core in the Bachelor of Fine Arts.

Art History and Theory
Students complete SAHT1101 Mapping the Modern and SAHT1102 Mapping the Postmodern in their foundation year, and may take other courses as part of their electives.

Electives
Electives allow students to plan their studies to develop specific needs, interests and career aspirations. Students are encouraged to take at least one art education elective. Some students may choose electives to focus and deepen their studies, others will choose electives across a broad range of art education, design, digital media, art history and theory courses. Electives may be taken as courses offered by other faculties of the university. Further information can be found under “Elective Courses for Undergraduate Programs” at the end of the College of Fine Arts section.

Program Rules
To complete the requirements for the award of the degree of Bachelor of Art Education:
1. For the Pass degree, a student must complete and pass 192 units of credit which shall include:
   a) 69 units of credit in Core Studies in Art Education;
   b) 33 units of credit Professional Experience in Art Education;
   c) a Fine Arts Major, consisting of 12 units of credit in Fine Arts Introductory courses, SAHT1101 and SAHT1102, and at least 24 units of credit from Fine Arts courses;
   d) 12 units of credit in approved General Education courses;
   e) 24 units of credit in open electives; and
   f) 6 units of credit in Art Education electives.
2. No more than 60 units of credit in Level 1 courses will be counted towards the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.
3. Honours will be awarded to students with a Distinction average in at least 42 units of credit in Upper Level Core Studies in Art Education, who have successfully completed SAED4051 Practices of Research in Art, Design and Education and SAED4055 Honours Research Project in Art and Design Education Studies. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SAED4051 and SAED4055 and in accordance with School and Faculty policies.

4808 Bachelor of Design Bachelor of Art Education (BDes BArtEd)

The Program
Students are prepared as design educators and design professionals working in graphic and media design, film and television production and post-production, festivals, theatre exhibition and display, furnishings and interiors, ceramic, textile and jewellery product design. Students are able to teach Technology and Applied Studies, particularly design and technology, in secondary schools, primary schools, community organisations, museums and galleries and to work as curriculum development officers.

Program Structure: 4808 Bachelor of Design Bachelor of Art Education
The Bachelor of Design Bachelor of Art Education comprises an art and design education double major, courses in design, including design, history theory and aesthetics, electives and General Education courses.

The Foundation Year
All students complete foundation courses in art education (including school field experiences), design and design history theory and aesthetics. These courses provide a core, foundational experience. In subsequent years students develop plans emphasising their interests in the practices of art education and design, contextualised through courses in their art education major including professional experience.

Art and Design Education
Courses in art and design education provide students with investigations and applications of the theoretical and practical knowledge of the art and design educator. These compulsory courses include fieldwork and professional experience in a range of educational, cultural, community and industry contexts and the Professional Experience Internship.

Design
Studio disciplines in design include: applied, ceramics, environments, graphics, jewellery and textiles. Students may plan sequences of courses

*Art and Design Honours take SDES4104 Honours Project*
in design studio disciplines as a major (at least 30 units of credit) or a minor (at least 12 units of credit). The Design Studio component culminates in the Design Internship and Design Studio Project. Students also undertake a sequence of Design and Computer courses.

**Design History, Theory and Aesthetics**

Students complete 18 units of credit in design history, theory and aesthetics. Additional courses may be chosen as a design history, theory and aesthetics minor, comprising at least 18 units of credit.

**Electives**

Electives allow students to plan their studies to develop specific needs, interests and career aspirations. Some students may choose electives to focus and deepen their studies, others will choose electives across a broad range of art education, design, digital media, art history and theory courses. Electives may be taken as courses offered by other faculties of the university. Further information can be found under ‘Elective Courses for Undergraduate Programs’ at the end of the College of Fine Arts section.

**General Education**

Students are required to complete 6 units of credit in General Education. General Education contributes to the broad educational objectives of university study, and courses are usually taken at the Kensington campus.

**Honours**

The Bachelor of Design Bachelor of Art Education may be completed with Honours in either Design or Art Education. Students must apply for entry into the Honours pathway by the beginning of Session 9.

Honours in Design will be awarded to students with a Distinction average in at least 42 units of credit in Core Studies in Design taken at Upper Level who have successfully completed SDES4104. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SDES4104 and in accordance with School and Faculty policies.

Honours in Art Education will be awarded to students with a Distinction average in at least 42 units of credit in Upper Level Core Studies in Art Education, who have successfully completed SAED4051 Practices of Research in Art and Design Education and SAED4055 Honours Research Project in Art and Design Education Studies. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SAED4051 and SAED4055 and in accordance with School and Faculty policies.

**Program Rules**

1. A student must complete 240 units of credit, made up of:
   a) 75 units of credit in Core Studies in Art Education
   b) 33 units of credit Professional Experience in Art Education;
   c) 90 units of credit in Core Studies in Design, which shall include a major in a Design Studio discipline of at least 30 units of credit;
   d) 18 units of credit in History Theory;
   e) 18 units of credit in Elective Studies; and
   f) 6 units of credit in General Education.

2. Students may complete no more than 60 units of credit at Level 1 with a minimum of 24 units of credit of Level 1 courses being successfully completed prior to undertaking Upper Level courses.

3. Honours in Design or Art Education will be awarded to students with a Distinction average in at least 42 units of credit in Core Studies in Design or Art Education taken at Upper Level who have successfully completed certain prescribed courses. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in those prescribed courses and in accordance with School and Faculty policies.

**4802 Bachelor of Design (BDes)**

The Program

The Bachelor of Design is the equivalent of four years full-time study with the opportunity to undertake Honours study in the fourth year. This program provides an education to students who wish to enter a range of different areas of the design profession, including: graphic design, media design, film, television production and post-production, illustration, publications, interiors, theatre, exhibitions, display, festivals and furnishings, ceramics, textiles, jewellery and product design.

In Year 1, students will be involved in a comprehensive and intensive range of 2D, 3D and 4D (time-based) experiences as well as the acquisition of historical, theoretical and technological skills and understandings. These include studying human individuals, society, the environment, and the application of computer skills to design.

In Years 2 and 3, students will extend their work on projects with the opportunity to integrate the following: graphics/media design, applied object design, environments/spatial design, ceramics design, textile design and jewellery design. Historical, theoretical and technological contexts will also be studied.

In Year 4, Design Studio Project leads into a graduation project/exhibition and is designed to parallel professional practice while integrating theoretical design studies. Year 4 students also undertake a period of work experience via an approved professional placement.

This program recognises the College of Fine Arts’ particular strengths, resources and requirements to provide an undergraduate program which places emphasis on an integrated approach rather than on narrow vocational specialisations. These strengths are its technology and its relationship with industry, its courses in visual arts, art education and art theory, and the ability to offer design from a creative and cross disciplinary base.

**Program Structure: 4802 Bachelor of Design**

The degree of Bachelor of Design is awarded as a Pass degree at the completion of four years full-time study or a degree with Honours where eligible students have completed the Honours pathway in the program.

**General Education**

Students are required as part of their studies to complete 12 units of credit in General Education courses.

**Elective Courses**

Students are required to undertake 18 units of credit of elective courses (refer to schema on Structure of the Bachelor of Design). These courses may be chosen from the selection listed under ‘Elective Courses for Undergraduate Programs’ at the end of the College of Fine Arts section, or from other faculties within the University.

**Honours**

The degree of Bachelor of Design is awarded as a degree with Honours where eligible students have achieved superior grades in their design studies and completed SDES4104 Honours Project and SAED4051 Practices of Research in Art and Design Education.

**Program Rules**

1. A student must complete 192 units of credit, which shall include:
   a) 24 units of credit in Introductory Design Studio courses;
   b) 48 units of credit in Design Studio courses composed of 2 approved disciplinary streams;
   c) 12 units of credit in Design Studio courses in an additional disciplinary stream;
   d) 24 units of credit in approved Design computing courses;
   e) 30 units of credit in courses approved for Design Contextual Studies;
   f) 12 units of credit in General Education; and
   g) 18 units of credit in electives.

2. No more than 60 units of credit of Level 1 courses may be undertaken, with a minimum of 24 units of credit of Level 1 courses being successfully completed prior to undertaking Upper Level courses.

3. Honours will be awarded to students with a Distinction average in at least 48 units of credit in Upper Level Core Studies in Design, who have successfully completed SDES4051 Practices of Research in Art, Design and Education and SDES4104 Honours Project. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SDES4051 and SDES4104 and in accordance with School and Faculty policies.

**Disciplinary Streams**

**Applied/Object Design**

- Ceramic Design
- Environments/Spacial Design
- Graphics/Media Design
- Jewellery Design
- Textile Design

1. For Honours students in lieu of 12 UOC electives.
4803 Bachelor of Art Theory (BArtTh)
4808 Bachelor of Art Theory/9302 Master of Art Administration (Fast-track Program)
4806 Bachelor of Art Theory Bachelor of Arts (BArtTh BA)
4807 Bachelor of Art Theory Bachelor of Social Science (BArtTh BSoSc)
4703 Bachelor of Art Theory Bachelor of Laws (BArtTh LLB)

The Programs
The Bachelor of Art Theory offers an intensive study of the visual arts, design and culture. The degree program encourages students to take full advantage of its location within one of Australia’s largest art and design schools and a leading university. The degree offers students in-depth study of art and design history and theory and prepares students for research careers or professional employment in the arts or design industries. Examples of likely careers include art administration, design management, curatorship, art and design criticism and writing, public programming and policy formation, and arts project management.

Program Structure: 4803 Bachelor of Art Theory
The Bachelor of Art Theory comprises a theory major and a co-major, open electives and General Education courses. Students take a total of 48 units of credit per year; the program totals 144 units of credit. The duration of the program is three years full-time equivalent.

Theory Major
Students take courses in the Art and Design Theory major to gain an understanding of the methodological tools and concerns in Art and Design History. These courses provide a framework for other studies in the program.

Contextual Studies
In addition, students take a sequence of contextual studies courses, normally in Art and Design contexts. Students may take a different sequence, subject to the approval of the course authority.

Art Industry Contexts
Courses explore the institutional contexts in which art is exhibited, catalogued, collected, interpreted, evaluated and promoted. Although careers within the arts-related professions frequently require further study, these courses provide ‘hands-on’ experience in writing and publishing, curating, and the avenues for funding.

Art and Design Contexts
Includes courses which allow students to place the broader understandings of art and design history and theory explored in the major into the context of a close investigation of histories.

Studio Contexts
Includes practical courses in the art and design studio that explore the workings of either the design industry or art practice.

Open Electives
These courses allow students to tailor their studies to their specific interests and career aspirations. Students are encouraged to take at least one elective from studio courses offered by the Schools of Art, Art Education, Media Arts or Design Studies. Courses may be chosen from any of those offered by Schools of the College of Fine Arts, or by other faculties of UNSW, subject to prerequisite requirements.

Program Rules
1. Students must complete and pass 144 units of credit. This comprises:
   2. a major in Art and Design Theory, made up of: 78 units of credit in approved courses [see Art Theory Table A], which must include the following Level 1 courses: SAHT1101, SAHT1102, SAHT1211 and SAHT1221;
   3. 30 units of credit in courses approved as Art Theory Contextual Studies [see Art Theory Table B], which must include SAHT1221;
   4. 12 units of credit in approved General Education courses;
   5. 24 units of credit in electives; and
   6. No more than 60 units of credit in Level 1 courses will be counted towards the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.

Honours Level
To be eligible for entry to Honours, a student must have achieved a distinction average in 48 units of credit in Art Theory core courses in Years 2 and 3. Students with a degree of Bachelor at Pass level may be permitted to enrol for the award of the degree at Honours level with credit for all courses completed, if during their studies for the Pass degree, they have satisfied the prerequisites for entry to the Honours level or the equivalent of these prerequisites. To be eligible for the award of BArtTh(Hons) students must complete all requirements of the Pass degree (see above) and complete an additional 48 units of credit over the equivalent of 1 year full-time. The additional Honours study consists of:
1. SAHT4211 Thesis A and SAHT4213 Thesis B;
2. SAHT4212 Honours Seminar [which may be substituted by an Upper Level or postgraduate course, subject to approval by the Program Authority]; and
3. 6 units of credit from an Upper Level or postgraduate course, subject to approval by the Program Authority.

Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the following weightings: Thesis 70%, Honours Seminar 15%, Elective course 15%.

Table A: Approved Courses for the Major in Art and Design Theory

| Level 1 | SAHT1101 | Mapping the Modern |
| SAHT1102 | Mapping the Postmodern |
| SAHT1211 | Theories of the Image |
| SAHT1212 | Theories of Art History and Culture |
| SAHT1301 | Design History, Theory and Aesthetics 1 – Early Modern Period to Postmodernism |

and/or Level 1 courses for which there are no pre-requisites, subject to approval by Program Authority.

Upper Level

Critical Theory and Museum Studies
SAHT2641 Modern Aesthetics: From the Enlightenment to the 21st Century
SAHT3212 Art and Everyday Life
SAHT3213 Museum Studies: Exhibitions, Collections and Material Culture

European, Australian and Other Histories
SAHT2211 Eurocentred Visions: Grand Narratives in Western Art
SAHT2214 Approaches to Australian Art
SAHT3105 Art since 1990

Subjectivity and the Body
SAHT2213 Memory and Self
SAHT2642 Art, Gender, Sexuality and the Body
SAHT2644 Psychoanalysis and Art

Colonial/Postcolonial Studies
SAHT2212 Art and Cultural Difference
SAHT2632 The Arts of the Pacific: Image, Myth and History
SAHT2633 Peripheral Visions: Perspectives of Colonial and Post Colonial Art
SAHT3634 Peripheral Visions 2: Perspectives of Colonial and ‘Peripheral’ Art Practiced in Asia, India SE Asia

Digital and Design Histories
SAHT2301 Design History, Theory and Aesthetics 2: Design and Consumption
SAHT3301 Design History, Theory and Aesthetics 3: Theoretical Frameworks for Design
SAHT3613 Digital Theory and Aesthetics
SAHT3614 Screen Culture
SAHT3214 Research Project (approval by Head of School required)

Program Structure: 4803 Bachelor of Art Theory/9302 Master of Art Administration Fast-Track Program

This ‘fast-track’ progression recognises that students who have completed the Bachelor of Art Theory (BArtTh) have undertaken undergraduate studies which prepare them specifically for the Master of Art Administration (MArtAdmn) and will allow those students to benefit from specialisation at undergraduate level. The ‘fast-track’ progression enables students to take four courses of the Master of Art Administration in the third year of the Bachelor of Art Theory. This effectively reduces the total number of courses and the time taken to complete both programs by a full session. The program can be completed in 4 years full-time equivalent study.

Program Rules

1. Admission in the first instance is to the Bachelor of Art Theory (4803). At the end of Year 2, candidates will be permitted to transfer to the Fast Track Program, subject to the approval of the Head of School of Art History and Theory. Approval will normally require an average of 65% in courses studied.

2. Within the fast-track program, 144 units of credit are credited to the undergraduate component of the degree and 72 units of credit are credited to the postgraduate component of the degree.

3. The undergraduate component of the degree must include:
   a. a major comprising 72 units of credit in Art and Design Theory, including 12 units of credit of MArtAdmin core courses other than SAHT9115 and SAHT9116;
   b. Contextual Studies [36 units of credit] in Art and Design Contexts, including 12 units of credit of MArtAdmin core options. The co-major shall not include SAHT3222 Industry Placement;
   c. 24 units of credit of electives; and
   d. 12 units of credit in General Education.

4. The postgraduate component of the degree must include:
   a. 24 units of credit of core courses from the Master of Art Administration, including SAHT9115 Internship and SAHT9116 Research Paper. Students who have completed SAHT2221 Genres of Art Writing are excluded from SAHT9112 Writing for Different Cultures and Audiences; and
   b. 48 units of credit of Master of Art Administration core options. Subject to approval, students may substitute for core options, other postgraduate courses offered by UNSW.

5. For entry to BArtTh Honours a student must complete the Theory major and have achieved an average of 75% across Theory major courses in Stages 2 and 3. Students would normally complete an Honours year at the completion of the Fast Track Program.

6. Where a student does not go on to complete the fast track final year, he or she may graduate with a BArtTh provided normal program rules are met. Up to 24 units of credit of postgraduate courses completed may be credited towards the BArtTh.

7. Students taking the Fast-track Bachelor of Art Theory and Master of Art Administration are not permitted to take out the Graduate Certificate in Art Administration. ‘Fast-track’ students, however, are permitted to exit with the Bachelor of Art Theory and Graduate Diploma of Art Administration (3.5 years full-time equivalent study). In this case students must complete:
   SAHT9111 Management and Organisation
   SAHT9113 Cultural Property, Ethics and the Law
   SAHT9114 Exhibition Management and Curatorial Studies
   SAHT9126 Organisational Psychology
   Plus 4 postgraduate core option/elective courses from the Master of Art Administration.

Combined Programs

Program Structure: 4806 Bachelor of Art Theory Bachelor of Arts

The Program

The BArtTh BA degree is the equivalent of four years full-time study. It enables students to combine the broad range of offerings available in the BA with the focused study of the visual arts and visual culture provided by the BArtTh. The co-major in Contextual Studies in the BArtTh develops students’ careers-related skills and experiences and the Art and Design Theory major provides depth of knowledge about art and design, both in historical and contemporary contexts. The BA component of the degree offers a wide range of complementary humanities and social science studies. Graduates will be prepared for employment in the arts and cultural industries.

Students undertaking this combined degree program complete the core requirements of both the Bachelor of Art Theory and the Bachelor of Arts, together with approved electives.

Program Rules

1. Students must complete a program of study of 192 units of credit, of which
   a. at least 90 units of credit must be obtained in courses offered by the College of Fine Arts;
   b. at least 84 units of credit must be obtained in courses approved for the Bachelor of Arts degree (excluding those offered by the College of Fine Arts); and
   c. 18 units of credit in electives.

2. The BArtTh component of the combined degree must include:
   a. a major in art and design theory, consisting of 60 units of credit in approved courses [see Art Theory Table A]. The major in Art and Design Theory must include the following Level 1 courses: SAHT1101 Mapping the Modern, SAHT1102 Mapping the Postmodern, SAHT1211 Theories of the Image and SAHT1212 Theories of Art History and Culture; and
   b. a student must complete 30 units of credit in courses approved as Art Theory Contextual Studies [see Art Theory Table B], which must include SAHT1221 Contexts for Art.

3. Of the units of credit obtained in courses approved for the BA degree (excluding those offered by the College of Fine Arts):
   a. between 24 and 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit in any one school, department, unit or interdisciplinary program;
   b. no more than 34 units of credit in total may be from any one school, department, unit or interdisciplinary program;
   c. at least 18 units of credit must be obtained in Upper Level courses other than those taught by the school, department, unit or interdisciplinary program in which a major is being taken; and
   d. 42 units of credit must be obtained in one of the following major sequences within the Faculty of Arts and Social Sciences:

   AUST Australian Studies
   CHIN Chinese Studies
   COMD Development Studies
   EDST Education
   ENGL English
   Environmental Studies
EURO European Studies

FILM/PFST/ THFI/THST Film and Theatre

4. No student may commence Upper Level subjects until 24 Level 1 units of credit have been successfully completed.

5. Students who satisfy the normal prerequisites for the BArtTh(Hons) or the BA(Hons) may qualify for Honours in either of these programs by completing an additional year of study (48 units of credit).

6. For eligibility for entry to the BArtTh(Hons), students must have achieved an average of 75% in 36 units of credit in the Art Theory major outside Stage 1.

Program Structure:

4807 Bachelor of Art Theory Bachelor of Social Science

The Program

The BArtTh BSocSc degree is the equivalent of four years full-time study. It enables students to combine the social science and policy studies available in the BSocSc with the study of the visual arts and culture, and art administration provided in the BArtTh. Graduates will be prepared for careers or postgraduate research studies in policy and administrative areas within the rapidly developing arts and culture industries. The professional contexts courses of the BArtTh and BSocSc will enable students to develop career-related skills and experiences, while the theoretical/historical contexts subjects in the BArtTh and the social science courses in the BSocSc will provide depth of knowledge about the arts and society.

Students undertaking this combined degree program complete the core requirements of both the Bachelor of Art Theory and the Bachelor of Social Science degrees, together with an approved major sequence and General Education courses.

Program Rules

1. Students must complete a program of study carrying 192 units of credit of which:

(a) at least 90 units of credit must be obtained in courses offered by the College of Fine Arts;

(b) at least 90 units of credit must be obtained in courses offered by the Faculty of Arts and Social Sciences.

2. The BArtTh component of the combined degree must include:

(a) a major (60 units of credit) in Art & Design Theory, which must include the following Level 1 courses: SAHT1101 Mapping the Modern, SAHT1102 Mapping the Postmodern, SAHT1211 Theories of the Image and SAHT1212 Theories of Art History and Culture; and

(b) Contextual Studies (30 units of credit).

3. The BSocSc component of the combined degree must include:

(a) the following core courses of 48 units of credit in the BSocSc program:

   (SLSP1000) Social Science and Policy, OR

   (SLSP1002) Introduction to Policy Analysis

   (SLSP1001) Research and Information Management

   (SLSP2000) Economy and Society

   (SLSP2001) Applied Social Research 1

   (SLSP2002) Policy Analysis Case Studies

   (SLSP3000) Social Theory and Policy Analysis

   (SLSP3001) Applied Social Research 2

   (SLSP3002) Social Science and Policy Project

   (b) a major sequence in one of the following areas:

      AUSTRALIAN Studies

      COMD Development Studies

      ECON Economics/Economic History

      FILM/PFST/ THFI/THST Film and Theatre

      GEOH/S Geography/Geology

      HIST History

      HPSC History and Philosophy of Science

      IROB Industrial Relations/Human Resource Management

      PECO Political Economy

      PHIL Philosophy

      POLS Politics and International Relations

      PSYC Psychology

      SOCA Sociology and Anthropology

      SPAN Spanish and Latin American Studies (History Stream)

      WOMS Women's and Gender Studies

4. Students who satisfy the normal prerequisites for the BArtTh(Hons) or the BSocSc(Hons) may qualify for Honours in either of these programs by completing an additional year of study (48 units of credit).

Program Structure:

4703 Bachelor of Art Theory Bachelor of Laws

The Program

The course is a five year full-time degree leading to the award of the two degrees of Bachelor of Art Theory and Bachelor of Laws (BArtTh LLB). The Program Authority for this combined program is the Faculty of Law.

Program Rules – Art Theory

1. The BArtTh component of the combined degree must include:

(a) a major (at least 60 units of credit) in Art & Design Theory;

(b) Contextual Studies courses worth 30 units of credit; and

(c) approved COFA courses should total 90 units of credit.

2. There are no general faculty prerequisites to courses offered by the Faculty of Law, but students must study law courses in a sequence approved by the Faculty of Law.

3. Honours: Students who wish to take the BArtTh degree program at Honours level must consult with the Head of School of Art History and Theory at the end of Stage 2.

4. A student who does not wish to proceed to the combined degree BArtTh LLB may apply to transfer to the BArtTh program with credit for all courses completed. The transferring student will need to complete the General Education requirements of the BArtTh.

5. In limited circumstances, students may apply to graduate with the BArtTh degree prior to the completion of their law program. This may require the completion of additional courses to fully meet course requirements.

Program Rules – Law

1. Students will complete the following core law courses:

- LAWS1052 Foundations of Law
- LAWS1061 Torts
- LAWS1001 Criminal Law 1
- LAWS1011 Criminal Law 2
- LAWS1071 Contracts 1
- LAWS1072 Contracts 2
- LAWS2140 Public Law
- LAWS1081 Property, Equity and Trusts
- LAWS1082 Property and Equity 2
- LAWS2160 Administrative Law
- LAWS6210 Law, Lawyers and Society
- LAWS2150 Federal Constitutional Law
- LAWS2311 Litigation 1
- LAWS2321 Litigation 2
- LAWS4010 Business Associations 1
- LAWS7420 Advanced Legal Research
- LAWS8320 Legal Theory, or
- LAWS8820 Law and Social Theory

2. Students will complete 58 units of credit in non-core LAWS courses.

UOC
4810 Bachelor of Digital Media (BDM)

The Program

The Bachelor of Digital Media (BDM) is the equivalent of three years full-time study, designed to meet industry demand for creative practitioners and content developers who possess multiple skills and breadth of knowledge in interactive design, sound, web design, digital imaging, 3D modelling, animation, critical and creative thinking within the domain of digital media. The BDM offers students strong fundamentals combined with creative development and flexibility in the later stages of the program to shape the nature of their core studies.

This program gives students who are interested in the pursuit of careers in the arts, digital media and entertainment industries the opportunity to combine specialist knowledge and practice drawn from digital technology, theory, art and design.

The degree offers a fourth year Honours program for students who excel and wish to pursue research careers.

The Bachelor of Digital Media aims to produce creative content developers with sound technical skills and the ability to work creatively and collaboratively across diverse media.

Graduates will be key players in the arts, digital media, entertainment and internet-based media with strengths in creative design and technical innovation.

Program Structure: 4810 Bachelor of Digital Media

The degree of Bachelor of Digital Media is awarded as a Pass degree at the completion of three years full-time study. An Honours degree is available through the completion of an additional year of study in the Honours program.

Honours

BDM Honours is a program of higher level study available to BDM students who wish to undertake research in Digital Media, extending into an Honours fourth year. BDM students, after consultation with lecturers, should apply for entry to the program by the end of Session 4 but no later than Session 6. For entry to Honours, students must have achieved a Distinction average in 48 units of credit of core courses from years two and three.

In the Honours year, students undertake a research program in Digital Media. Each student is allocated a supervisor. Honours students are expected to perform at a satisfactory (SY) level throughout the program. The course is full-time. The body of work undertaken will be presented and assessed in exhibition form, accompanied by the presentation of a research paper relating to the student's studio practice.

Program Rules

1. For the Pass degree, a student must complete and pass 144 units of credit.
2. A degree must contain a major in Digital Media defined as 78 units of credit in approved courses [see Digital Media Table A].
3. A student must complete 30 units of credit in courses approved as Digital Media Contextual Studies [see Digital Media Table B].
4. A student must complete 12 units of credit of General Education.
5. A student must complete 24 units of credit in electives.
6. No more than 60 units of credit in Level 1 courses will be counted toward the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.
7. To be eligible to graduate with Honours, a student must complete all requirements of the Pass degree (see above) and complete an additional 48 units of credit over the equivalent of 1 year full-time.

To be eligible for entry to Honours, a student must have achieved a Distinction average in 48 units of credit of core courses from years 2 and 3. Students will normally nominate at the end of year 2 but must nominate no later than the end of year 3, and must complete a course in research practices prior to entry to the Honours program. Students with a degree of Bachelor at Pass level may be permitted to enrol for the award of the degree at Honours level with credit for all courses completed, if during their studies for the Pass degree, they have satisfied the prerequisites for entry to the Honours level or the equivalent of those prerequisites.

8. The Honours year consists of:
   a) an Honours Paper outlining studio research practice;
   b) Honours Studio Practice, which shall lead to an exhibition of work; and
   c) attendance at such seminars, lectures and classes as shall be required.

Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the following weightings: Honours Studio Practice 70%, Honours Paper 30%.

Elective Courses for Undergraduate Programs

Students may choose electives from the courses listed below that are offered by the College of Fine Arts. It is also possible to choose electives from other faculties of the University. All other courses (i.e. core courses of degrees) offered at the College of Fine Arts may be available to be undertaken as electives as well. Advice should be sought from the relevant Program Authority if you wish to take courses that are not listed in this section of the Handbook as electives.

Timetable constraints and availability of staff do not allow all courses to be offered every year, although endeavours are made to offer the full range over a 3 year period.

Please note that same courses have prerequisites and/or need to be completed in sequential order (i.e. SOMA3615 Sound Media 2 must be completed before SOMA3551 Sound Media 3).

Elective studies will deal in-depth with issues of a theoretical nature concerning the craft arts in historical, contemporary and future-oriented social perspectives and in the application of theory to practice. Studio-oriented electives will include a theoretical examination of the nature of practice and critical inquiry that will extend knowledge, skill and understanding.

History and Theory Electives

The Western Tradition

**SAHT1211** Theories of the Image
**SAHT2211** Eurocentred Visions: Grand Narratives in Western Art
**SAHT2224** Breeding the Body Beautiful: Art and Biogenetics
**SAHT2601** The Art of Ancient Cultures
**SAHT2606** The Painting of Modern Life: French and British Painting in Focus

**SAHT3211** Art After Postmodernism
**SAHT2612** Art and Its Others: Interdisciplinarity in Contemporary Art

Australian Art History

**SAHT2214** Approaches to Australian Art

Cross Cultural Studies

**SAHT2212** Art and Cultural Difference
**SAHT2633** Peripheral Visions: Perspectives of Colonial & Post Colonial Art

A Message from the Dean

Welcome to the Faculty of Commerce and Economics at the University of New South Wales – one of Australia’s great universities.

After fifty years of dynamic growth, UNSW has a reputation for excellence, sustained innovation, scholarship, research and practical application. The Faculty of Commerce and Economics plays an important role in maintaining this reputation.

The Faculty attracts high-achieving students from across the region, with strength, depth and quality across nine teaching and research units. Through excellence in scholarship, we aim to enhance the capability of our students and staff to add value to the organisations, professions and communities in which they aspire to leadership roles.

The Faculty values its close relationship with industry and the professions, ensuring a high demand for our graduates, many of whom are now leaders in industry, government, politics and academia.

The Faculty is committed to supporting our students throughout the learning experience. We have a wide range of support services, including an Academic Advisor, an Educational Development Unit, a Faculty Student Centre to assist with administrative matters and undergraduate and postgraduate advisors in each school. Together we aim to offer you a rewarding and stimulating environment in which to pursue your studies. I wish you every success.

Greg Whittred
Dean

Faculty Information and Assistance

Some People Who Can Help You
This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Commerce and Economics.

If you require advice about enrolment, degree requirements, progression within programs or any other general matters, contact the Faculty of Commerce and Economics Student Centre, Ground Floor, John Goodsell Building; telephone (02) 9385 3189, fax (02) 9313 7767, email ugccse@unsw.edu.au. The Student Centre is staffed during teaching weeks between 9am and 6.15pm from Monday to Thursday and between 9am and 5pm on Fridays. During non-teaching weeks the Student Centre is staffed Monday to Friday between 9am and 5pm.
For information and advice about course content and requirements, contact the appropriate schools/teaching units.

The Faculty of Commerce and Economics Website
Please refer to the Faculty website for further information: www.fce.unsw.edu.au

Course Descriptions
Descriptions of courses offered in 2005 can be found in an alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Computer Information
The Faculty has a number of laboratories located in the Quadrangle and John Goodsell Buildings, all of which are equipped with Pentium machines. More detailed information is available in the Faculty ‘Student IT Resource Handbook’ or on the Faculty website.

Education Development Unit
In pursuit of the FCE’s vision to be the leading business faculty in the Asian region, the Education Development Unit (EDU) provides support, development and leadership for both staff and students in the area of education quality and innovation.
The EDU supports all FCE students in the development and enhancement of their academic skills, by providing a range of strategies including:

• Transition program - Prior to commencement of studies, a one-day program is offered to all FCE undergraduate students to prepare them for the first important weeks at university by developing knowledge of individual learning styles and deeper learning approaches to academic subjects.
• Orientation programs – Offered for both undergraduate and postgraduate programs, orientation introduces students to teaching and learning approaches, learning expectations, strategies for successful study in the Faculty and provides opportunities to meet faculty staff and students.
• Discipline-specific resources and activities – The EDU works with academic staff from different disciplines to develop workshops and resources relevant to specific disciplines.
• Academic skills workshops – Provided throughout each session, these workshops are free and specifically for FCE students. Topics include referencing, reading critically, essay and report writing, case analysis, presentation skills, working in groups, and exam preparation.
• Resources and handouts – Available both in print and on-line, resources include handouts on academic skills and a range of other topics for FCE students.
• Consultations – Confidential individual or small group consultations regarding any learning issues are offered to all FCE students.
FCE students visiting the EDU may wish to talk to staff about their learning, their language needs and improving their academic performance. Students can collect or borrow appropriate support materials, find out about workshops or make appointments for a one-hour consultation.
For further information, visit the EDU website at http://education.fce.unsw.edu.au, drop in at the EDU Learning Assistance Centre, Room 2039, level 2, South Wing, Quadrangle Building or phone: (02) 9385 5584.

Assumed Knowledge
The Bachelor of Commerce, Bachelor of Commerce in Marketing, Tourism and Hospitality Management, Bachelor of Economics, Bachelor of Science in Information Systems, Bachelor of Science in Business Information Technology and all combined programs offered by the Faculty assume students to have achieved a prescribed standard in Mathematics at the Higher School Certificate or equivalent. More details are available from the Admissions Office.

Course Timetables
Undergraduate course timetables are available to re-enrolling students via the Faculty website before the end of the current year of study. New undergraduate students are allocated individual course timetables for their first session enrolment at the time of enrolling.

Enrolment Procedures
Interested applicants to the Faculty of Commerce and Economics should contact the Faculty of Commerce and Economics Student Centre or the Admissions Office.
New students are informed of enrolment procedures after they have received an offer.
All re-enrolling students are emailed information with regards to enrolment appointments to enable them to enrol online using myUNSW.

Examinations
Additional information on examinations and assessment, rules and restrictions, is included in the front of this Handbook.
For courses under the control of the various schools in FCE, the published grade will be determined on the basis of a composite mark which will include, on a weighted basis, the results of the final examination, other prescribed examinations, essays and assignments. The exact method of weighting the components of the composite mark may differ from course to course, but students are advised of the weighting at the commencement of each session.

Supplementary Examinations
Students may be required to sit for an oral and/or written supplementary examination, which will normally be held in the two weeks preceding the commencement of Session 2 or in December/January. In general, this opportunity will only be offered to a student who has been prevented from taking an end of session examination or who has been placed at a serious disadvantage during the examination and whose circumstances have improved considerably in the period since the examination was held.
Students are advised not to undertake programs with which they cannot cope adequately and re-enrolling students are encouraged to seek the advice of enrolling officers in the faculty on this matter.

Use of Calculators
The Faculty of Commerce and Economics has resolved to advise all students to equip themselves with a portable electronic calculator, preferably one which possesses, in addition to the four basic arithmetic functions, those involving discounting and present value calculations. These calculators should be a valuable study aid in expediting the routine aspects of assigned practical exercises throughout the year in many courses. Such calculators may also be permitted, subject to the discretion of individual examiners, in examinations for courses taught in the faculty.

Information on Schools and Disciplines

School of Accounting
Head of School: Professor Wai Fong Chua
Administrative Officer: Colin Withers
Accounting is concerned with the provision of information for the management of economic resources and activities by means of measurement, communication and interpretation of financial data; with
the development of information systems; and with the financial accountability and management of business and public enterprises. By economic resources, we mean both tangible and intangible resources. Accounting information is increasingly used to manage intangible resources such as an organisation’s knowledge base, its supplier/customer relationships, its brands etc.

Accounting lies at the head of economic exchange, whether conducted in physical or electronic markets. It enables students to comprehend many of the fundamental principles, processes and outcomes of business, thereby equipping students for a wide range of careers in businesses (from chartered accounting, management consulting, provision of financial services to general management). Graduates are employed not only as accountants, but also as entrepreneurs, entertainment promoters, treasurers, chief financial officers, etc.

The School of Accounting offers undergraduate programs leading to a Bachelor of Commerce with either a single major in Accounting (8 accounting courses) or a double major (7 accounting courses). The most popular double majors are with Finance, Information Systems, Business Law and Taxation.

The School of Accounting at UNSW is internationally renowned for its innovative and high-quality teaching at both undergraduate and graduate levels. Our teachers have won national teaching awards as well as Vice-Chancellor Teaching Awards. Classes involve students in an interactive and thought-provoking learning environment. We also increasingly use the web as a learning tool and our courses are constantly revised to meet new challenges in a globalised and digitised world. We expose our students to e-business, encourage them to understand the links between business strategy and processes, offer advanced courses in assurance and business risk, and help them appreciate global influences on financial reporting and management.

**Actuarial Studies**

**Head:** Professor Michael Sherris  
**Administrative Assistant:** Bindya Subba

Actuarial Studies involve the application of quantitative, economic and financial models and analyses to long-term financial management particularly in life insurance, general insurance, health insurance and superannuation, as well as in other financial services. The actuarial courses cover the models used to quantify and manage risks such as survival, birth, marriage, sickness, retirement, accident, fire, flood, asset default and asset value fluctuations and to study their financial effect on the obligations of insurance companies, benefit plans and other financial security systems. The courses provide the foundations for actuarial practice in the pricing, reserving, investment, and financial management of life insurance, general insurance superannuation and pension funds. The actuarial program of study also aims to develop the use of judgement and to provide the necessary combination of mathematical, statistical, accounting, economic, financial, demographic, analytical and modelling skills for a rewarding career in the financial services industry.

The Bachelor of Commerce allows students to combine a major in Actuarial Studies with a major or minor in a broad range of other disciplines including business economics, business statistics, business strategy and economic management, economic history, financial economics, human resource management, management, taxation, modern languages, accounting, finance, international business, business law, information systems, marketing, and industrial relations. The Actuarial Studies program also provides students who meet the required standard with the opportunity to apply for exemptions from some or all of the Part I examinations of the Institute of Actuaries of Australia and entry into the actuarial profession. The Actuarial Studies Co-op Scholarship Program provides industry experience integrated with the academic requirements for the Bachelor of Commerce.

The courses are quantitative and intellectually demanding. They require a very strong ability and interest in mathematics and statistics and their applications to business. Success as a professional actuary also requires problem solving skills, reasoning, well-rounded business skills and an ability to communicate complex ideas in simple terms.

Actuaries are employed by insurance companies, superannuation funds, banks, and governments and also practise as consulting actuaries. The financial rewards from an actuarial career compare very well with other professions and employment prospects are very good. To qualify as an actuary in Australia requires the completion of, or exemption from, subjects in Parts I, II and III of the professional syllabus of the Institute of Actuaries of Australia.

Part II is studied after graduating or possibly in an Honours year and is made up of the Actuarial Control Cycle subjects. Part III consists of two subjects completed by distance education through the Institute of Actuaries of Australia usually on a part-time basis after completing the Part I and Part II subjects. Students select these two Part III subjects from the five practice areas of Investment Management, Life Insurance, General Insurance, Superannuation and Finance.

Please refer to the section ‘Professional Recognition of Programs’ for a sample program.

**School of Banking and Finance**

**Head of School:** Professor Terry Walter  
**Administrative Officers:** Clarissa Niland, Shirley Webster and Kathleen White

Finance is the study of financial and capital markets. It is concerned with decision making within those markets, and how values or prices of financial assets are determined. It is also concerned with investment decisions (for example portfolio selection), financing decisions of a firm (dividend policy, debt and equity structures, and lease purchase decisions), and the development of risk-hedging strategies so as to minimise the damaging effects of adverse movements in share prices, interest rates, exchange rates, and other uncertainties.

Global financial market integration has led to the emergence of multinational corporations. Financial management of multinational corporations and the study of these corporations’ financial and investment strategies in the international market, particularly in the Asia-Pacific region, are the focus of the program in finance. Furthermore, the increasing expansion of insurance services and funds management in Australia and this region are other important issues in finance.

The growth of interest towards the financial sector has been accredited to greater public awareness of the financial market as an investment opportunity. The public at large have taken to purchasing stocks and bonds as a means of securing higher returns, and with it a greater degree of consumer awareness towards financial matters. One major growth area in the world of finance is the advent and expansion of funds management. Funds managers pool investor money together to form specific portfolios to suit different investor needs. For example, some investors prefer high capital gains over short time horizons whilst others prefer not to take as much risk and hope for a steady stream of income over a longer period of time. Funds managers must understand the needs of the customer, design portfolios consisting of different assets to suit those needs, and ensure the returns from the funds are what is expected of them. The funds management, international finance, corporate finance and banking courses offered in the School of Banking and Finance provide the basis for a graduate to enter this growing and complex market, with the necessary skills and knowledge to advance rapidly within the industry.

A student may specialise in finance or combine finance with other disciplines of the faculty, or combine finance with mathematics or law. Depending on the program selected, finance provides training for a wide range of vocations including: multinational financial managers, multinational bank and insurance managers, multinational funds managers, venture capital and private equity specialists, corporate financial managers or treasurers, portfolio managers for trust funds, superannuation funds and insurance companies, investment analysts and financial researchers in stockbroking firms, merchant banks, trading banks and government departments, management consultants and takeover specialists in corporate advisory divisions of merchant banks, public accounting firms, and management consulting firms.

**Co-op Scholarships**

The NSW Co-op Program offers four-year scholarship programs in Finance Honours. The Finance Honours program includes a total of fifteen months industrial training. Entry is gained through the Co-op selection process. For further details on Co-op scholarships, see your high school careers advisor or contact the UNSW Co-op Program Office, telephone (02) 9385 5116, website: http://www.co-op.unsw.edu.au/

**School of Business Law and Taxation**

**Head of School:** Professor Andrew Terry  
**Administrative Assistant:** Bibi Moore

Law and commerce are inextricably intertwined. The entire fabric of commerce is woven from a complex legal regime, judicial and statutory, which regulates all commercial activity. The study of commerce has always included an examination of the laws which govern its operation and it is the role of the School of Business Law and Taxation to provide
School of Economics

Head of School: Professor Denzil Fiebig
Administrative Officers: Clea Bye, Nadine Caisley, Dominique Matteux and Catriona Reid

The School of Economics offers full-time and part-time courses leading to the degrees of Bachelor of Commerce and Bachelor of Economics with specialisations in economics, econometrics, economic history, financial economics, business strategy & economic management, business statistics and business economics.

The School undertakes the majority of teaching in the Bachelor of Economics program and an important part of the Bachelor of Commerce core. The study of economics, as part of the BCom degree, has built up a reputation of combining an excellent academic standard with practicality and flexibility. Our offerings in the BCom give students the utmost amount of choice so they can select options that complement their career paths. Students can proceed with a minor or single major in business strategy & economic management, financial economics, business economics, business statistics or economic history, or they may combine two of these as a double major or any one with other disciplines of the faculty as a double major.

The Bachelor of Economics program gives a solid grounding in economic analysis and quantitative techniques. It allows students to do a single major in economics, econometrics, economic history or financial economics or any of these may be combined with each other or other disciplines of the faculty as a double major.

The core requirements of the Bachelor of Economics program comprise three years of training in modern economic analysis, instruction in quantitative methods in economics, econometrics, economic history, financial economics, business strategy & economic management, business statistics and business economics.

Marketing is a dynamic management discipline concerned with exchange processes in competitive markets. It is of critical importance in all sectors of the economy, including local and international businesses, and profit-making and non-profit making organisations. The business function of marketing seeks to identify the needs and wants of customers, determine potential target markets, design appropriate products and services, communicate this offering to customers and distribute it to the marketplace. A wider goal of marketing is to create an organisation-wide ethos that is responsive to customer needs, aware of competitive forces, and builds on core strengths of the organisation.

School of Information Systems, Technology and Management

Head of School: Professor Graham Low
Administrative Officers: Tricia Hartley and Cathy Sharpley

Information Systems (IS) involves the planning, analysis, design and maintenance of computerised systems used to process information in commerce, industry, government and research organisations. Information Technology (IT) is the underlying mechanism that controls these systems. Information Systems and Information Technology are indispensable to the operations of most modern organisations. In an information systems course, you will study how information systems are planned, analysed, designed, operated and managed. Throughout the program you will develop conceptual and practical skills of the way in which computer systems are used within organisations.

Graduates often follow careers as programmers, analysts, business analysts, information technology specialists, data administrators, EDP auditors, e-commerce specialists and web managers.

Degrees offered by the School of Information Systems, Technology and Management:

1. Bachelor of Commerce majoring in Information Systems. This degree is tailored for those more interested in IS and management aspects of the discipline. With this degree you can combine IS and another commerce discipline such as accounting, marketing, actuarial studies or finance. Note that transfers, at the school's discretion, are possible to/from the Co-op scholarship program (BIS) as defined below.

2. Bachelor of Science in Information Systems. This program is designed for those more interested in the use and application of IS and IT in a commercial environment. The program is structured and includes courses from many disciplines including Information Systems, Information Technology and Management, Computer Science, Mathematics, as well as Commerce and Economics courses. Note that transfers, at the school's discretion, are possible to/from the Co-op scholarship program (BIT) as defined below.

Co-op Scholarships

The UNSW Co-op Program offers four year scholarship programs in Information Systems and Information Technology. These programs include three six-month industrial training periods. Entry is gained through the scholarship selection process.

3. Bachelor of Commerce majoring in Information Systems and Management. ISM is a generalist business degree that concentrates on the application of IS to business management and decision-making. In addition to completing a major study in the discipline of Information Systems, a minor may be chosen from a number of offerings in the Faculty of Commerce and Economics.

4. Bachelor of Science majoring in Business Information Technology. BIT focuses on technical knowledge and theory for the application of IT and IS in a commercial environment. The program is structured and includes courses from many disciplines including Information Systems, Information Technology and Management, Computer Science, Mathematics, as well as Commerce and Economics courses.

For further details on Co-op scholarships see your high school careers advisor or contact the UNSW Co-op Program Office, telephone (02) 9385 5116, website: http://co-op.web.unsw.edu.au/

School of Marketing

Head of School: Professor Mark Uncles
Administrative Officer: Nadia Withers

Marketing is a dynamic management discipline concerned with exchange processes in competitive markets. It is of critical importance in all sectors of the economy, including local and international businesses, and profit-making and non-profit making organisations. The business function of marketing seeks to identify the needs and wants of customers, determine potential target markets, design appropriate products and services, communicate this offering to customers and distribute it to the marketplace. A wider goal of marketing is to create an organisation-wide ethos that is responsive to customer needs, aware of competitive forces, and builds on core strengths of the organisation.

Graduates find careers in product management, customer services, new product planning, international marketing, logistics and distribution, sales and purchasing, advertising, direct marketing and public relations, marketing research, management consultancy and e-business. General management training programs are also a popular option. Graduates find their skills are in heavy demand across both public and private sectors, nationally and internationally. Professional accreditation has been given to graduates of our programs by the Australian Market and Social Research Society. There are also affiliations with professional organisations such as the Advertising Federation of Australia, the Australian Marketing Institute, the Australian Direct Marketing Association and the Australian Customer Service Association.

Undergraduate Marketing: The School of Marketing offers undergraduate programs leading to the award of the degree of Bachelor of Commerce and Bachelor of Economics. An intellectually rigorous approach is combined with a desire for practical relevance. This entails drawing not only on the general field of marketing but also the related disciplines of economics, finance, psychology, sociology, business law, mathematics...
and statistics. Relevance is achieved through case studies, applied exercises and the business experience of teaching staff. The Honours year deals with more advanced themes in marketing and students are required to submit a well-researched thesis.

**Undergraduate Marketing, Tourism and Hospitality Management:** A specialist four year undergraduate degree program in Marketing, Tourism and Hospitality Management is available within the School. This program adds tourism and hospitality management courses to the full range of marketing courses. These additional courses include tourism policy and planning, human resource management, tourism and hospitality law, together with hospitality management for hotels, resorts and restaurants. Students receive practical training at an approved training college and are required to complete at least 750 hours of industry work experience as part of the program, adding to the richness of the degree. Graduates will find careers in major hotels, resorts, airlines and tourism, both in general management as well as in marketing.

A limited number of Co-op Scholarships are available.

**The Centre for Applied Marketing (CAM):** The Centre for Applied Marketing is a joint research centre between the School of Marketing, Faculty of Commerce and Economics and the Marketing cluster at the Australian Graduate School of Management. The Centre was established to act as a bridge with Australian industry. The Centre promotes and undertakes both pure and applied research in a range of marketing spheres. The Centre also provides customised in-house marketing training programs to leading Australian companies.

**The Cooperative Research Centre for Sustainable Tourism (CRCST):** The focus of this Centre is on tourism, economics, policy and marketing. The Centre has strong links with Federal and State Government organisations, and the tourism industry. The Centre coordinates UNSW membership of CRCST, which is a source of funding for tourism related research.

**School of Organisation and Management**

**Head of School:** Associate Professor Lucy Taksa

**Administrative Officer:** Terry O’Callaghan

The School of Organisation and Management was formed on 1 July 2004 by the merger of the School of Industrial Relations and Organisational Behaviour and the School of International Business. Consequently course codes which previously started with IRROB and IBUS are now under the MGMT prefix.

The school offers three distinct disciplinary streams to Honours level: Human Resource Management, International Business and Industrial Relations. It also offers a disciplinary stream in Management.

The specialisation in Human Resource Management provides a strong applied and theoretical grounding in all aspects of the management of people in paid employment. The School’s programs are designed to provide both the breadth required for successful career mobility in the ‘HR’ field and the opportunity to acquire advanced, applied knowledge in specialised human resource functions, including staff planning, recruitment, selection and development, training, gender equity, employee motivation and performance management, remuneration management, superannuation, employment law, workplace negotiation, international and cross-cultural human resource management, and occupational health and safety. These areas are increasingly being influenced by wider corporate strategy and business plans and are often seen as the key to enhancing organisational performance. Accordingly, the School’s programs place a strong emphasis on the strategic aspects and importance of human resource planning, policy and practice. The program in Human Resource Management provides a solid career basis for those involved in, or contemplating becoming involved in, managing people in paid employment.

The Industrial Relations program focuses on the processes, relationships, institutions and public policies associated with paid employment in contemporary society. As well as equipping students with a solid working knowledge of all key institutional players, namely trade unions, management, employer organisations and industrial tribunals and government, IR courses are designed to furnish a detailed and practical understanding of current employment relations issues, developments and practices. The specialisation in Industrial Relations provides knowledge and skills suitable for a wide range of careers in employment relations areas, such as industrial advocacy or research with trade unions and employer organisations, as well as careers as industrial relations or labour policy specialists with government bodies and international labour organisations. Recent changes to industrial relations policies, including a growing focus on the ‘micro’ or workplace issues, have increased the demand for industrial relations expertise at all levels of corporate management.

**International Business** is a rapidly growing field of study dealing with the development, strategy, and management of multinational enterprises in the global context of complex and dynamic business environments. Besides the study of multinational enterprises, the field necessarily includes business context studies and culture and communications, including language studies. Doing business and making decisions internationally involves greater complexity and is much more challenging compared to decision making restricted to the domestic context. Special knowledge and skills are required to be successful at international business. Strategic decisions have to be made about which countries to operate in and whether or not to export or license, whether to set up a new facility, establish a joint venture or acquire an existing business and how to sustain competitiveness internationally. Critical issues requiring analysis and judgement at the international level include global strategy, country risk, business negotiations, cultural difference, and performance measurement and evaluation.

The Management specialisation examines the processes, conceptual expertise and work functions involved in managing people and organisations effectively. Broadly, management is concerned with building and developing relationships between people and organisations, formulating goals, designing organisational structures, fostering innovation, controlling resources and facilitating productive activities. Rather than focusing purely on the tasks, roles or functions of managers, this specialisation examines the complex relations between power, people and resources that are the key challenges to effective management. Theories and predictions concerning new organisational forms, future business trends, international strategy, and more effective management practices are studied in addition to established knowledge in the discipline. The overall objective is to equip future managers to apply knowledge and skill effectively to the complex problems facing organisations in today’s dynamic global environment.

**Professional Recognition of Programs**

The degree programs offered by the Faculty of Commerce and Economics are recognised by professional organisations in accordance with the details set out below. If you are unable to fit these courses in as part of your degree requirements, you may have to enrol in additional classes on a non-award basis.

**Australian Computer Society (ACS) Accreditation**

The School of Information Systems, Technology and Management programs are accredited by the Australian Computer Society.

Programs accredited to the level of Professional by the Australian Computer Society:
- Bachelor of Commerce (Information Systems) including Honours and combined degrees
- Bachelor of Commerce (Information Systems and Management) including Honours and combined degrees
- Bachelor of Science (Information Systems) including Honours and combined degrees
- Bachelor of Science (Business Information Technology) including Honours and combined degrees

**Bachelor of Commerce (Information Systems)**

The basis of accreditation is:

Satisfactory completion of the following core courses:

- INF51602 Computer Information Systems
- INF51603 Business Data Management
- INF52603 Systems Analysis and Design
- INF52607 Business Data Networks

And:

- Satisfactory completion of at least another 24 units of credit in Level 2 or 3 courses in Information Systems with a minimum of 12 units of credit at Level 3.

Satisfying the full requirements for completion of the program.
Bachelor of Commerce (Information Systems and Management)
The basis of accreditation is:
Satisfactory completion of the following core courses:
- INFS1602 Computer Information Systems
- INFS1603 Business Data Management
- INFS2603 Systems Analysis and Design
- INFS2607 Business Data Networks
- INFS2791 Industrial Training A
- INFS3792 Industrial Training B
- INFS4793 Industrial Training C
- INFS3604 Information Technology Management

And:
Satisfactory completion of at least another 12 units of credit in Information Systems courses at Honours level.
Satisfactory completion of at least another 18 units of credit in Level 3 or 4 courses in Information Systems.
Satisfying the full requirements for completion of the program.

Bachelor of Science (Information Systems)
The basis of accreditation is:
Satisfactory completion of the following core courses:
- INFS1602 Computer Information Systems
- INFS1603 Business Data Management
- INFS2603 Systems Analysis and Design
- INFS2607 Business Data Networks
- INFS2609 Software Implementation
- INFS3605 Implementation Workshop
- INFS3606 Telecommunications for Electronic Commerce
- INFS3608 Advanced Database Systems

And:
Satisfactory completion of at least another 12 units of credit courses in Information Systems with a minimum of 6 units of credit at Level 3.
Satisfactory completion of all other requirements of the program.

Bachelor of Science (Business Information Technology)
The basis of accreditation is:
Satisfactory completion of the following core courses:
- INFS1602 Computer Information Systems
- INFS1603 Business Data Management
- INFS2603 Systems Analysis and Design
- INFS2607 Business Data Networks
- INFS2609 Software Implementation
- INFS2691 Industrial Training 1
- INFS3605 Implementation Workshop
- INFS3606 Telecommunications for Electronic Commerce
- INFS3608 Advanced Database Systems
- INFS4693 Industrial Training 3

And:
Satisfactory completion of at least another 12 units of credit in Level 3 or 4 courses in Information Systems.
Satisfactory completion of at least another 42 units of credit in INFS courses with a minimum of 6 units of credit at Honours level.
Satisfactory completion of all other requirements of the program.

Conditions of accreditation
The course is accredited as a whole course and the accreditation may not be extended to students who are granted advanced standing, credit(s) or exemption(s) by the institution. A course undertaken by a student granted advanced standing, credit(s) or exemption(s) will only be regarded as the accredited course where, in the opinion of the Society, credit(s) or exemption(s) are given for equivalent subjects (particularly in terms of Information Technology content) taken at an equivalent educational level and at an institution of equivalent academic standing.

The Institute of Actuaries of Australia
The UNSW actuarial program is fully accredited by the Institute of Actuaries of Australia and recognised for exemptions by the Institute of Actuaries (London) for the Core Technical subjects. The following courses at UNSW correspond to the Part I and Part II subjects of the IAAust professional examinations:

<table>
<thead>
<tr>
<th>UNSW Course</th>
<th>Professional Subject</th>

</tbody>
</table>

Students wishing to apply for exemption from the Part I professional examinations must achieve above average performance in the relevant courses.

It is recommended that students who intend to complete all of the Part I professional actuarial subjects enrol in MATH1151 Mathematics for Actuarial Studies and Finance 1A and MATH1251 Mathematics for Actuarial Studies and Finance 1B in Year 1.

ECON1101 Microeconomics 1 and ECON2102 Macroeconomics 2 may satisfy exemption requirements for Subject 107.

For students completing a combined BSc BCom, MATH2801 Theory of Statistics and MATH2831 Linear Models may also satisfy exemption requirements for Subject 101.

Qualification as an Associate of the Institute of Actuaries of Australia (AIAA) is attained on completion of the courses in Parts I and II. Qualification as a Fellow of the Institute of Actuaries of Australia (FIAA) requires the completion of subjects in Parts I, II and III of the professional actuarial examinations.

The syllabus of the Part I courses is covered in the undergraduate Bachelor of Commerce program as listed above.

A sample program, including options designed to cover all of the professional Part I Courses of the Institute of Actuaries of Australia, is as follows:

**Year 1**

**Session 1**
- ACCT1501 Accounting and Financial Management 1A
- ECON1101 Microeconomics 1
- MATH1151 Mathematics for Actuarial Studies & Finance 1A

**Option* |
- MATH2801 & CT3
- ECON2101 or MATH1251 Mathematics for Actuarial Studies & Finance 1B
- ACTL1003 Actuarial Studies and Commerce

**Year 2**

**Session 1**
- ACTL2001 Financial Mathematics
- ACTL2002 Probability and Statistics for Actuaries
- ECON2101 Microeconomics 2

**Option**
- ACTL2003 Stochastic Models for Actuarial Applications
- ACCT2542 Corporate Financial Reporting and Analysis
- FINS1613 Business Finance

**Option**
- ACTL3001 Actuarial Statistics
- ACTL3002 Life Insurance and Superannuation Models

*This option should normally be a course towards the co-major or minor or a computing course.

**Session 2**
- ACCT1511 Accounting and Financial Management 1B
- ECON1102 Microeconomics 1
- MATH1251 Mathematics for Actuarial Studies & Finance 1B
- ACTL1003 Actuarial Studies and Commerce

**Year 3**

**Session 1**
- ACTL3001 Actuarial Statistics
- ACTL3002 Life Insurance and Superannuation Models

**Option**
Associate membership of CPA Australia requires an accredited course for the purpose of its membership qualifications. CPA Australia has accepted UNSW as an approved tertiary institution for the following requirements:

LAWS1092 Business Associations 2
LAWS4010 Business Associations 1
LAWS2140 Public Law

Students are also advised to contact the Institute in writing for current requirements. Students undertaking the combined Bachelor of Commerce Bachelor of Laws programs should substitute the following seven courses for the last four courses listed above.

ACCT2522 Management Accounting: Process Improvement and Innovation
ACCT2542 Corporate Financial Reporting and Analysis
ACCT3563 Issues in Financial Reporting and Analysis
ACCT3573 Issues in Financial Reporting and Analysis (Honours)
ACCT3583 Stakeholder Value Management
ACCT3593 Stakeholder Value Management (Honours)
ACCT3708 Auditing and Assurance Services
ACCT3718 Auditing and Assurance Services (Honours)*
FINS1613 Business Finance
INF51602 Computer Information Systems
LEGT1711 Legal Environment of Commerce
LEGT2721 Business Transactions
LEG2741 Business Entities
LEGT2751 Business Taxation*

*It is no longer mandatory to include ACCT3708 (or ACCT3718) and LEGT2751 but it is desirable to do so.

Students seeking professional recognition are advised to confirm membership requirements with CPA Australia. Please refer to their website at: www.cpaaustralia.com.au

The Securities Institute of Australia (CSA)

The Securities Institute of Australia grants exemptions from certain courses leading to association membership of the Institute to graduates who have completed finance courses offered in the BCom or BSc degree programs. Applications for registration, exemption or admission should be made direct to the Institute: www.securities.edu.au

The Australian Institute of Banking and Finance (AIBF)

The educational requirements for Associate membership will be satisfied on completion of a University degree program specialising in Banking and Finance which includes a management, a marketing and four banking and finance courses.

The educational requirements for Senior Associate membership will be satisfied on completion of a University degree program specialising in Banking and Finance which includes a management, a marketing and four banking and finance courses and employment in the Australia/New Zealand banking and finance industry for at least two years.

Graduates who have met the academic, but not the work experience, requirements for Senior Associate, qualify for Associate membership. Students are advised to contact the AIBF for current requirements: www.aibf.com.au

Australian Market and Social Research Society (AMSRS)

Undergraduate marketing students at UNSW are able to obtain the Certificate of Market Research if they have successfully completed a number of approved courses. The Certificate of the AMSRS is widely recognised by government and industry as a measure of competence in market research.

To qualify for the Certificate, undergraduate students must complete and pass the following courses:

MARK1012 Marketing Fundamentals
MARK2051 Consumer Behaviour
MARK2052 Marketing Research
MARK2054 Market Analysis
Students who have successfully completed the required courses at UNSW must complete the application form which is available from the School of Marketing Office or contact The Australian Market and Social Research Society (AMRSS), telephone (02) 9566 3102, fax (02) 9371 5944, website www.amrs.com.au Further information is also available from the Professional Associations section in the Marketing Careers website: www.marketing.unsw.edu.au

Program and Course Information

Rules Governing the Award of the Degrees of Bachelor of Commerce and Bachelor of Economics

For rules relating to programs which are no longer offered to new students, please refer to earlier Faculty Handbooks. Copies of these rules are also available from the Faculty of Commerce and Economics Student Centre.

Rule 1 – Pass and Honours Degrees

The degrees of Bachelor of Commerce or Bachelor of Economics may be conferred as a Pass degree or as an Honours degree. There shall be three classes of Honours, namely Class 1, Class 2 in two Divisions and Class 3. In cases of superior academic performance throughout the program, the Pass degree will be conferred with Distinction.

Rule 2 – Disciplinary Minors

Students not completing the requirements of two majors in the Bachelor of Commerce degree must choose options so that they complete a ‘disciplinary minor’ in a discipline other than their major. All students satisfying the requirements of the Bachelor of Economics degree automatically satisfy ‘disciplinary minor’ requirements. A ‘disciplinary minor’ is defined as four approved session courses, or equivalent value for courses taught outside the Faculty, of which no more than 12 units of credit may be first year courses.

Rule 3 – Transfer Between Degrees

Candidates are admitted to the Bachelor of Commerce, the Bachelor of Commerce in Marketing, Tourism and Hospitality Management, the Bachelor of Commerce/Bachelor of Science or the Bachelor of Economics program. There is no automatic transfer between these programs. Candidates may seek to transfer between programs and decisions will be made by the Faculty Admissions Committee.

Rule 4 – Assessable Hours

Normal workload expectations for each degree are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

Rule 5 – Passing in a Course

Where, in the following rules, reference is made to the requirement that a candidate shall pass a course, the requirement shall be construed as meaning that the candidate shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of the School concerned.

Rule 6 – Normal Program

The programs leading to the award of the degrees of Bachelor of Commerce or Bachelor of Economics normally consist of 144 units of credit to be completed over a period of three academic years or six 14-week sessions, with the exception of programs with an Industrial Training component which consist of 192 units of credit over four academic years or eight 14-week sessions. Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session and will not be permitted to enrol in more than 24 units.

Rule 7 – Minimum Time for Completion

(a) The minimum time for completing the requirements for the degrees of Bachelor of Commerce or Bachelor of Economics at Pass level is normally six sessions full-time or 12 sessions part-time, unless the student is enrolled in a Co-op program in which case the minimum time for completion is eight sessions full-time.

(b) For the Bachelor of Commerce in Marketing, Tourism and Hospitality Management program at Pass level, the minimum time for completion is eight sessions full-time.

Rule 8 – Nomination of Plan

A student must nominate on the enrolment form the specialisation intended when enrolling for the first year. A candidate may change from one plan to another but not more than once per year. The change requires the approval of the program authority and unless it is a transfer between a Pass and an Honours program, the change must be completed before enrolment is finalised for the particular year.

Rule 9 – Academic Program Requirements

Bachelor of Commerce 3502

To complete the requirements for the award of the degree of Bachelor of Commerce:

1. For the Pass degree, a student must complete and pass 144 units of credit, which shall include:

   1.1 36 units of common Level 1 core courses as follows:

   * Students in Actuarial Studies programs substitute approved Mathematics courses for professional recognition for ECON1202 and ECON1203

   1.2 (a) satisfactory completion of 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption). Combined undergraduate degrees offered with another faculty and leading to the award of two degrees satisfy this requirement (12 units of credit in General Education) within the program.

   (b) undertake an additional 56 hours of study which examines the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. The Bachelor of Commerce and Bachelor of Economics fulfill this requirement as part of the normal program curriculum.

   1.3 either a major of at least 48 units in an approved disciplinary stream and a minor of 24 units of approved session courses of which no more than 12 units may be Level 1 courses (excluding Industrial Training components when included in program requirements); or

   1.4 a double major of 84 units, consisting of 42 units from each of two approved disciplinary streams (excluding Industrial Training components when included in program requirements).

2. A student cannot:

   2.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances:

   2.2 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements.

   2.3 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

   3. A student enrolled in a Co-op program must in addition satisfactorily complete the industrial training components specified in the program requirements.

   4. For the Honours degree, a student must complete a further 48 units in an approved disciplinary stream.

   4.1 Honours may be taken in one disciplinary stream only

   4.2 The additional units, comprising specified courses from the relevant disciplinary stream and a thesis, must be completed in two sessions following the completion of the Pass degree component.

   4.3 Honours degree will not be awarded if academic performance is below the prescribed level.

   4.4 Except when recommended to the contrary by the relevant Head of School, a student intending to enter the Honours year must:

   4.4.1 satisfy the Pass degree requirements and obtain a minimum average of 70% in Level 2 and Level 3 courses of the relevant disciplinary stream in the Pass degree component,

   4.4.2 pass all courses in the Pass degree component at first attempt.

   4.5 Except with the special permission of the program authority on the recommendation of the relevant Heads of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidacy for the Honours degree of Bachelor of Commerce.

Bachelor of Economics 3543

To complete the requirements for the degree of Bachelor of Economics:

1. For the Pass degree, a student must complete and pass 144 units of credit, which shall include:

   2.3 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

   3. A student enrolled in a Co-op program must in addition satisfactorily complete the industrial training components specified in the program requirements.

   4. For the Honours degree, a student must complete a further 48 units in an approved disciplinary stream.

   4.1 Honours may be taken in one disciplinary stream only

   4.2 The additional units, comprising specified courses from the relevant disciplinary stream and a thesis, must be completed in two sessions following the completion of the Pass degree component.

   4.3 Honours degree will not be awarded if academic performance is below the prescribed level.

   4.4 Except when recommended to the contrary by the relevant Head of School, a student intending to enter the Honours year must:

   4.4.1 satisfy the Pass degree requirements and obtain a minimum average of 70% in Level 2 and Level 3 courses of the relevant disciplinary stream in the Pass degree component,

   4.4.2 pass all courses in the Pass degree component at first attempt.

   4.5 Except with the special permission of the program authority on the recommendation of the relevant Heads of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidacy for the Honours degree of Bachelor of Commerce.
3. (a) satisfactory completion of 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption). Combined undergraduate degrees offered with another faculty and leading to the award of two degrees satisfy this requirement (12 units of credit in General Education) within the program.

(b) undertake an additional 56 hours of study which examines the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. The Bachelor of Commerce and Bachelor of Economics fulfill this requirement as part of the normal program curriculum.

4. A student cannot count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances.

5. Each student must include the following in their degree program:

   5.1 either a major of at least 60 units in the Economics, Econometrics, Financial Economics or Economic History disciplinary streams (including units taken as core studies where applicable);

   5.2 or a double major of 90 units, with at least 48 units in one of the Economics, Econometrics, Financial Economics or Economic History disciplinary streams, and at least 42 units in another approved disciplinary stream.

6. In addition to the Pass degree requirements the award of a degree with Honours requires:

   6.1 the completion of at least 60 units (single major) or 48 units (double major) in the Economics, Econometrics, Financial Economics or Economic History disciplinary streams specified as necessary preparation for fourth year studies, and

   6.2 the completion of four specified courses in fourth year and a thesis for fourth year studies, and

   6.3 or a double major of 90 units, with at least 48 units in one of the Economics, Econometrics, Financial Economics or Economic History disciplinary streams, and at least 42 units in another approved disciplinary stream.

7. Approved disciplinary streams are listed hereafter:

   **Approved Disciplinary Streams (Pass)**
   - Accounting
   - Asian Studies
   - Business Law *
   - Economics
   - Econometrics
   - Economics/Econometrics
   - Economic History
   - Financial Economics
   - Human Resource Management
   - Industrial Relations
   - Information Systems
   - International Business
   - Management
   - Marketing
   - Modern Languages *
   - Taxation *

   *Available only as a co-major integrated program with Economics
   †Not available as a single major, but as a co-major only

   **Approved Disciplinary Streams (Honours)**

   - Economics
   - Econometrics
   - Economics/Econometrics
   - Economic History

   **Rule 10 – Honours Degree**

   Upon completion of three years of a full-time program or the corresponding stages of a part-time program, a candidate may make a written application to the Head of School concerned for permission to enrol for an Honours degree.

   A person on whom the Pass degree of Bachelor of Commerce or Bachelor of Economics has been conferred shall not be admitted to candidature for the Honours degree of Bachelor of Commerce or Bachelor of Economics, except with special permission on the recommendation of the Head of the School.

   **Rule 11 – Credit for Courses Passed at Another University**

   Subject to the University rules governing admission with advanced standing, courses passed at another university may be counted towards fulfilling the requirements of the degree but, in general, not more than four courses studied for a year or equivalent which are already counted for another degree may be counted towards the requirements for the Bachelor of Commerce or Bachelor of Economics. Advanced standing will not normally be granted for courses completed more than 7 years before the date of admission of the applicant, except with the approval of the Head of the School.

Rule 12 – Options
Subject to the requirements of the individual programs, students may choose options from any approved course taught in the University. The approval for courses (other than General Education electives) to count as options is given by the program authority. Heads of the Schools may, in exceptional circumstances, vary courses in prescribed programs. Apart from service courses for other faculties, all courses offered by the Faculty of Commerce and Economics will be automatically approved as options save that no course can be counted both as an option and as a prescribed course.

Rule 13 – Order of Progression of Courses
It is expected students shall undertake core courses in the equivalent of their first year. It is expected failed courses will be repeated in the first session in which they are next offered.

Rule 14 – Prerequisite and Corequisite Requirements
Except in exceptional circumstances, a candidate shall not enrol in any course without having satisfied the prescribed prerequisite or corequisite requirements.

Rules Governing the Award of the Degree of Bachelor of Commerce (Actuarial Studies Co-op)

Rule 1 – Pass Degree
The degree of Bachelor of Commerce (Actuarial Studies Co-op) may be conferred as a Pass degree. In cases of superior academic performance throughout the course, the Pass degree will be conferred with Distinction.

Rule 2 – Disciplinary Minors
Students not completing the requirements of a double major in the program must choose options so that they complete a ‘disciplinary minor’ in a discipline other than Actuarial Studies. A ‘disciplinary minor’ is defined as four approved session courses to the value of 24 units of credit, or equivalent value for courses taught outside the faculty, of which no more than 12 units may be first year courses.

Rule 3 – Entry and Continuation Conditions
3.1 Entry to the program is conditional upon:
   a. meeting the entry requirements for the Bachelor of Commerce
   b. the selection process for Co-op Scholarships
3.2 Except in exceptional circumstances, continuation in the program is conditional upon meeting the performance standards required to maintain the Co-op Scholarship.

Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce generalist degree program.

Rule 4 – Assessable Hours
4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.
4.2 Industrial Training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based for the duration of the course.

Rule 5 – Passing in a Course
Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of School concerned.

Rule 6 – Normal Program
This program leading to the award of the degree of Bachelor of Commerce (Actuarial Studies Co-op) comprises 192 units of credit to be completed over a period of four academic years. Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session and will not be permitted to enrol for more than 24 units other than in the first session of Year 2 when Industrial Training 1 is completed along with 24 units of credit during the session. Except in exceptional circumstances, students are required to undertake the Industrial Training Courses (having met all prerequisites) at the following times:
- Industrial Training 1 at the commencement of the first half of their second year
- Industrial Training 2 in the second half of their third year
- Industrial Training 3 in the first half of their fourth year

Rule 7 – Minimum Time for Completion
The minimum time for completing the requirements for the degree is normally eight sessions full-time.

Rule 8 – Academic Program Requirements
To complete the requirements for the award of the degree a student must complete and pass 192 units of credit which shall include:

* Professional Requirements – These must include the following courses ACCT2542, ECON2101/ECON2102 and FIN1613.
** Completed in 12 weeks during Summer Session, Year 2.
8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics.
8.3 Either:
8.3.1 a major of at least 48 units in Actuarial Studies, in addition to Industrial Training units, and a minor in another approved disciplinary stream;
or
8.3.2 a major of at least 42 units in Actuarial Studies, in addition to Industrial Training and a second major of 42 units in another approved disciplinary stream.
8.4 A student cannot:
8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;
8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;
8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
8.4.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.
Rules Governing the Award of the Degree of Bachelor of Commerce (Finance Co-op)
Rule 1 - Pass and Honours Degrees
1.1 The degree of Bachelor of Commerce in Finance Co-op is a four year degree program for which Honours will normally be granted. There shall be three classes of Honours, namely Class 1, Class 2 in two Divisions and Class 3.
1.2 With the approval of the Head of School, students who fail to meet the performance requirements for Honours may substitute approved Banking and Finance and other courses for Level 4 courses and be awarded a Co-op Pass degree.
Rule 2 - Disciplinary Minors
It is not possible for students to complete the requirements of two majors in the Bachelor of Commerce (Hons) Finance Co-op degree and they must therefore choose options so that they complete equivalent to a "disciplinary minor" in a discipline other than their finance major. A "disciplinary minor" is defined as four approved session courses, or equivalent value for courses taught outside the Faculty, of which no more than 12 units of credit may be first year courses.
Rule 3 – Entry and Continuation Conditions
3.1 Entry to the program is conditional upon:
a. meeting the entry requirements for the Bachelor of Commerce degree
b. the selection process for Finance Co-op Scholarships
3.2 Except in exceptional circumstances, continuation in the program is conditional on meeting the performance standards required to maintain the Co-op Scholarship. Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce degree program and the relevant requirements.
3.3 Students must achieve a minimum average mark of 70% in Banking and Finance courses to remain in the program.
Rule 4 - Assessable Hours
4.1 On Campus Courses: Normal workload expectations for courses run in "on campus" mode are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.
4.2 Industrial Training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based during the duration of the course, and program requirements as determined for placement.
Rule 5 – Passing in a Course
Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be constructed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of the School concerned.
Rule 6 - Normal Program

* To be completed in summer session.
certain circumstances, a student must enrol in a minimum of 12 units per session and will not be permitted to enrol in more than 24 units. Except in exceptional circumstances, students are required to undertake the Industrial Training Courses at the following times during the degree program:
- Industrial Training 1 in the summer between first and second year
- Industrial Training 2 in the first half of their third year
- Industrial Training 3 in the second half of their third year

Rule 7 - Minimum Time for Completion
The minimum time for completing the requirements for the degree of Bachelor of Commerce (Hons) Finance Co-op is eight sessions full-time and Industrial Training.

Rule 8 - Academic Program Requirements: BCom 3502
To complete the requirements for the award of the degree of Bachelor of Commerce (Hons) Finance Co-op a student must complete and pass 192 units of credit which shall include:
8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics.
8.3 A major of at least 48 units in Finance (which must be passed at an average distinction level) in Level 1-3 courses, in addition to Industrial Training units, and a minor in another approved disciplinary stream.
8.4 A student cannot:
   8.4.1 count more than 60 units of Level 1 core and elective courses towards their degree unless in exceptional circumstances;
   8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;
   8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
   8.4.4 count a mainstream course offered by faculties other than the Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

Rule 9 - Honours Degree
9.1 Honours may be taken in Banking and Finance only.

9.1.1 Students who achieve the performance standard for the Co-op Finance Honours Degree program at the conclusion of Stage 3, must complete the Level 4 requirements in Stage 4, or transfer to the standard BCom pass degree.

9.2 Honours degrees will not be awarded if academic performance is below the prescribed level.

9.3 Except in exceptional circumstances and with the approval of the Head of School to continue in the Honours program students must:
   9.3.1 achieve a minimum average mark of 75% in Banking and Finance courses taken in years 1, 2 and 3 of the program, and
   9.3.2 pass all components of the program at the first attempt.

9.4 Students who fail to meet the performance requirements for Honours:
   9.4.1 may substitute approved Banking and Finance or other courses within the Faculty of Commerce and Economics (students wishing to undertake a major in accounting must have the approval of the Head of School of Accounting) for Level 4 courses and be awarded a Co-op Pass degree, and
   9.4.2 shall not be permitted to enrol in Financial Decision Making Under Uncertainty, Advanced Topics in Asset Pricing, Research Methods in Finance 2, Advanced Topics in Corporate Finance, Recent Developments in Banking Research, Special Topics in Finance and Thesis (Finance).

Rules Governing the Award of the Degree of Bachelor of Commerce (Information Systems and Management Co-op)

Rule 1 – Pass and Honours Degrees
1.1 The degree of Bachelor of Commerce in Information Systems and Management is an Honours degree program. There shall be three classes of Honours, namely Class 1, Class 2 in two Divisions and Class 3.
1.2 With the approval of the Head of School students who fail to meet the performance requirements for Honours may substitute approved Information Systems courses for Level 4 courses and be awarded a Pass degree (see also Rule 9.4)

Rule 2 – Disciplinary Minors
As this is a single major, students must choose options so that they complete a ‘disciplinary minor’ in a discipline other than Information Systems. A ‘disciplinary minor’ is defined as four approved session courses to the value of 24 units of credit, or equivalent value for courses taught outside the faculty, of which no more than 12 units may be first year courses.

Note: X1 is summer session, X2 is winter session.

* Students electing not to undertake the Honours component must substitute 30 UOC with a program of study to be approved by the Director, BIT/ISM programs.
Rule 3 – Entry and Continuation Conditions
3.1 Entry to the program is conditional upon:
   a. meeting the entry requirements for the Bachelor of Commerce
   b. the selection process for Co-op Scholarships
3.2 Except in exceptional circumstances, continuation in the program is conditional upon meeting the performance standards required to maintain the Co-op Scholarship.

Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce generalist degree program.

Rule 4 – Assessable Hours
4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.
4.2 Industrial Training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based for the duration of the course.

Rule 5 – Passing in a Course
Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of School concerned.

Program Structure: Information Systems and Management Co-op Program
Rule 6 – Normal Program
This program leading to the award of the degree of Bachelor of Commerce in Information Systems and Management comprises 192 units of credit to be completed over a period of four academic years.
Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session, and will not be permitted to enrol for more than 24 units.
Except in exceptional circumstances, students are required to undertake the Industrial Training Courses (having met all prerequisites) at the following times:
- Industrial Training A in the first half of their second year
- Industrial Training B in the second half of their third year
- Industrial Training C in the first half of their fourth year

Rule 7 – Minimum Time for Completion
The minimum time for completing the requirements for the degree is normally eight sessions full-time.

Rule 8 – Academic Program Requirements
To complete the requirements for the award of the degree a student must complete and pass 192 units of credit which shall include:
8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics.
8.3 A major of at least 48 units in Information Systems in Level 1–3 courses, in addition to Industrial Training units, and a minor in another approved disciplinary stream.
8.4 A student cannot:
- 8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;
- 8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;
- 8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
- 8.4.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

Rule 9 – Honours
9.1 Honours may be taken in Information Systems and Management only.
9.2 Honours degree will not be awarded if academic performance is below the prescribed level.
9.3 Except in exceptional circumstances and with the approval of the Head of School to continue in the Honours program students must:
- 9.3.1 achieve a minimum average of 70% in Information Systems courses taken in years 2 and 3 of the program, and
- 9.3.2 pass all components in the program at the first attempt.
9.4 Students who fail to meet the performance requirements for Honours:
- 9.4.1 may substitute approved Information Systems courses for level 4 courses and be awarded a Pass degree and,
- 9.4.2 shall not be permitted to enrol in Thesis A, Thesis B, Research Topics in Information Systems 2 and further Honours options.

Rules Governing the Award of the Degree of Bachelor of Commerce (Marketing Co-op)
Rule 1 – Pass Degree
The degree of Bachelor of Commerce (Marketing Co-op) may be conferred as a Pass degree. In cases of superior academic performance throughout the course, the Pass degree will be conferred with Distinction.

Rule 2 – Disciplinary Minors
Students not completing the requirements of a double major in the program must choose options so that they complete a ‘disciplinary minor’ in a discipline other than Marketing. A ‘disciplinary minor’ is defined as four approved session courses to the value of 24 units of credit, or equivalent for courses taught outside the faculty, of which no more than 10 units may be first year courses.

Rule 3 – Entry and Continuation Conditions
3.1 Entry to the program is conditional upon:
   a. meeting the entry requirements for the Bachelor of Commerce
   b. the selection process for Co-op Scholarships
3.2 Except in exceptional circumstances, continuation in the program is conditional upon meeting the performance standards required to maintain the Co-op Scholarship. Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce generalist degree program.

Rule 4 – Assessable Hours
4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per/session per unit of credit, including class contact hours, preparation and time spent on all assessable work.
4.2 Industrial training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based for the duration of the course.

Rule 5 – Passing in a Course
Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of School concerned.

Program Structure: Marketing Co-op Program
Rule 6 – Normal Program
This program leading to the award of the degree of Bachelor of Commerce (Marketing Co-op) comprises 192 units of credit to be complete over a period of four academic years.
Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session, and will not be permitted to enrol for more than 24 units.
Except in exceptional circumstances, students are required to undertake the Industrial Training Courses (having met all prerequisites) at the following times:
- Industrial Training 1 in the second half of their second year
- Industrial Training 2 in the second half of their third year
- Industrial Training 3 in the first half of their fourth year

Rule 7 – Minimum Time for Completion
The minimum time for completing the requirements for the degree is normally eight sessions full-time.

Rule 8 – Academic Program Requirements
To complete the requirements for the award of the degree a student must complete and pass 192 units of credit which shall include:
8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics.
8.3 A major of at least 48 units in Information Systems in Level 1–3 courses, in addition to Industrial Training units, and a minor in another approved disciplinary stream.
8.4 A student cannot:
- 8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;
- 8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;

Rule 9 – Honours
9.1 Honours may be taken in Information Systems and Management only.
9.2 Honours degree will not be awarded if academic performance is below the prescribed level.
9.3 Except in exceptional circumstances and with the approval of the Head of School to continue in the Honours program students must:
- 9.3.1 achieve a minimum average of 70% in Information Systems courses taken in years 2 and 3 of the program, and
- 9.3.2 pass all components in the program at the first attempt.
9.4 Students who fail to meet the performance requirements for Honours:
- 9.4.1 may substitute approved Information Systems courses for level 4 courses and be awarded a Pass degree and,
- 9.4.2 shall not be permitted to enrol in Thesis A, Thesis B, Research Topics in Information Systems 2 and further Honours options.

Rules Governing the Award of the Degree of Bachelor of Commerce (Marketing Co-op)
8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics
8.3 Either:
8.3.1 a major of at least 48 units in Marketing, in addition to Industrial Training units, and a minor in another approved disciplinary stream; or
8.3.2 a major of at least 42 units in Marketing, in addition to Industrial training units and a second major of 42 units in another approved disciplinary stream.
8.4 A student cannot:
8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;
8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;
8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
8.4.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

Rule 9 – Honours
9.1 For the Honours degree, a student must complete a further 48 units in Marketing.
9.2 Honours may be taken in Marketing only.
9.3 The additional units, comprising specified courses from the Marketing Honours program and a thesis, must be completed in two sessions following the completion of the Pass degree component.
9.4 The Honours degree will not be awarded if academic performance is below the prescribed level.
9.5 Except in exceptional circumstances, and with the approval of the Head of School to continue in the Honours program, students must:
(a) satisfy the Pass degree requirements and achieve a minimum average of 70% in Marketing courses taken in level 2 and level 3 courses of the program, and
(b) pass all components in the program at the first attempt.

9.6 Except with the special permission of the program authority on the recommendation of the Head of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidature for the Honours degree.

Rules Governing the Award of the Degree of Bachelor of Commerce in Marketing, Tourism and Hospitality Management
To complete the requirements for the award of the degree of Bachelor of Commerce in Marketing, Tourism and Hospitality Management:

Rule 1
1. For the Pass degree, a student must complete and pass 192 units of credit, which shall include:
1.1 36 units of common Level 1 core courses as follows:
   - ACCT1501 Accounting and Financial Management 1A
   - ACCT1511 Accounting and Financial Management 1B
   - ECON1101 Microeconomics 1
   - ECON1102 Macroeconomics 1
   - ECON1202 Quantitative Methods A
   - ECON1203 Quantitative Methods B
1.2 12 units approved General Education courses offered by faculties other than the Faculty of Commerce and Economics;
1.3 a double major of 96 units, consisting of 42 units from the Marketing disciplinary stream and 54 units from the Tourism and Hospitality Management disciplinary stream;
1.4 6 units of Economics of Tourism;
1.5 12 units of options from the Faculty of Commerce and Economics;
1.6 12 units of approved tourism and hospitality operational training;
1.7 18 units of approved industry training, based on a minimum of 750 hours of employment.

Rule 2
2. A student cannot:
2.1 count more than 48 units of Level 1 core and electives courses towards their degree except in exceptional circumstances;
2.2 attempt General Education courses until they have attempted 36 units of mainstream courses;

2.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
2.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

**Rule 3**
3. For the Honours degree, a student must complete a further 48 units in a disciplinary stream that the student has chosen as a co-major in the Pass degree component.
3.1 Honours may be taken in one disciplinary stream only.
3.2 The additional units, comprising specified courses from the relevant disciplinary stream and a thesis, must be completed in two sessions following the completion of the Pass degree component.
3.3 The Honours degree will not be awarded if academic performance is below the prescribed level.
3.4 Except when recommended to the contrary by the relevant Head of School, a student intending to enter the Honours year must:
   3.4.1 satisfy the Pass degree requirements and obtain a minimum average of 70% in Level 2 and Level 3 courses of the relevant disciplinary stream in the Pass degree component and
   3.4.2 pass all courses in the Pass degree component at first attempt.
3.5 Except with the special permission of the course authority on the recommendation of the relevant Heads of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidature for the Honours degree of Bachelor of Commerce.

**Note:** The above courses are all 6 units of credit each. 12 units of credit from the Options in Stage 2 (Session 2) and Stage 3 (Session 1) should be approved General Education courses.

**Rules Governing the Award of Combined Degree Programs:**

**Bachelor of Commerce Bachelor of Arts and Bachelor of Economics Bachelor of Arts**

The Faculty of Commerce and Economics in conjunction with the Faculty of Arts and Social Sciences offers the combined Bachelor of Commerce Bachelor of Arts and the Bachelor of Economics Bachelor of Arts. These are five year programs combining the strengths and flexibility of each single degree program. It is expected that these combined degree programs will appeal to students wanting, in particular, a strong, focused and highly regarded business program that is complemented by a humanities discipline – chosen out of personal interest or with a particular career objective in mind.

With approval, students with an excellent academic record may also enrol in an additional Honours year in the Bachelor of Commerce or Bachelor of Economics degree.

Students graduating with a Bachelor of Commerce and a Bachelor of Arts degree or Bachelor of Economics and Bachelor of Arts degree are likely to be employed wherever employers seek Commerce or Economics graduates with, for example, additional language skills in languages offered by the Faculty of Arts and Social Sciences or with a perspective of the world not restricted to business disciplines only.

**Rules Relating to the Bachelor of Commerce Bachelor of Arts Program and Bachelor of Economics Bachelor of Arts Program**

Rules relating to the award of the degree of Bachelor of Commerce and Bachelor of Economics shall apply wherever relevant to students enrolled in the combined Bachelor of Commerce Bachelor of Arts or Bachelor of Economics Bachelor of Arts.

These are five year (240 units of credit) degree programs. Both the Bachelor of Commerce Bachelor of Arts and Bachelor of Economics Bachelor of Arts programs consist of 22 Commerce and Economics courses (132 units of credit) and 18 Arts and Social Sciences courses (108 units of credit). Students will typically enrol in 48 units of credit per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

2 Level 1 Arts and Social Sciences courses (12 units of credit)

**Years 2–5**

In Years 2, 3, 4 and 5 students take a total of 4 Commerce and Economics courses (24 units of credit), 4 Arts and Social Sciences courses (24 units of credit) each year.

**Rules Relating to the Bachelor of Commerce Component**

1. Each student must include the following in their degree program:
   1.1 either a major of at least 48 units of credit in an approved disciplinary stream (see below) and a minor of at least 24 units of credit from a different discipline; or
   1.2 a double major of 84 units of credit consisting of 42 units of credit from two approved disciplinary streams.

The remaining Commerce and Economics course or credit requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.

2. **Approved Disciplinary Streams (Pass):**
   - Accounting
   - Actuarial Studies
   - Business Economics
   - Business Statistics
   - Business Strategy & Economic Management
   - Business Law*
   - Economic History
   - Financial Economics
   - Finance
   - Human Resource Management
   - Industrial Relations
   - Information Systems
   - International Business
   - Management
   - Marketing
   - Taxation*

*Not available as a single major, but as a co-major only
3. Candidates for Honours must complete one year of study additional to the minimum of five years required for the BCom BA at Pass level. Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:

3.1 the completion of at least 48 units of credit (single major) or 42 units of credit (double major) in a disciplinary stream specified as necessary preparation for Honours year studies, and

3.2 the completion of four specified courses (24 units of credit) in Year 4 in one of these disciplines, and a thesis (48 units of credit).

4. Approved Disciplinary Streams (Honours):
To the end of sixth year:
- Accounting
- Finance
- Human Resource Management
- Industrial Relations
- Information Systems
- Marketing

Rules Relating to the Bachelor of Arts Component
1. Of the 108 units of credit in Arts and Social Sciences required for the combined degree:
   (a) none may be from courses offered by the Faculty of Commerce and Economics;
   (b) at least 24 and no more than 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit offered by any one School, Department, Unit or Interdisciplinary Program; and
   (c) no more than 54 units of credit in total may be from any one School, Department, Unit or Interdisciplinary Program within the Faculty of Arts and Social Sciences.

2. Each student must complete a major sequence (42 units of credit) in one of the following areas within the Faculty of Arts and Social Sciences:
- Australian Studies
- Chinese Studies
- Development Studies
- Education
- English
- Environmental Studies
- European Studies
- Film and Theatre
- French
- German Studies
- Greek, Modern
- History
- History and Philosophy of Science
- Indonesian Studies
- Japanese Studies
- Korean Studies
- Linguistics
- Music
- Philosophy
- Policy Studies
- Politics and International Relations
- Russian Studies
- Sociology & Anthropology
- Spanish and Latin American Studies
- Women’s and Gender Studies

3526 Bachelor of Economics Bachelor of Arts
BEC BA

Year 1 (48 units of credit)
- ACCT1501 Accounting and Financial Management 1A
- ACCT1511 Accounting and Financial Management 1B
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1
- ECON1202 Quantitative Methods A
- ECON1203 Quantitative Methods B
- 2 Level 1 Arts and Social Sciences courses (12 units of credit)

Years 2–5
In Years 2, 3, 4 and 5 students take a total of 4 Commerce and Economics courses (24 units of credit) and 4 Arts and Social Sciences courses (24 units of credit) each year.

Rules Relating to the Bachelor of Economics Component
1. Each student must include the following in their degree program:
   1.1 either a major of at least ten courses (60 units of credit) in Economics, Econometrics or Economic History disciplinary stream (including courses taken as core studies); or
   1.2 a double major of fifteen courses (90 units of credit), with at least eight courses (48 units of credit) in one of the Economics, Econometrics or Economic History disciplinary streams and at least seven courses (42 units of credit) in another approved disciplinary stream.

The remaining Commerce and Economics course or credit requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.

2. Approved Disciplinary Streams (Pass):
- Accounting
- Asian Studies*
- Business Law*
- Economics
- Economics/Econometrics
- Econometrics
- Economic History
- Finance
- Financial Economics
- Human Resource Management
- Industrial Relations
- Information Systems
- International Business
- Management
- Marketing
- Taxation*

*Available as a co-major integrated program with Economics only

3. Candidates for Honours must complete one year of study additional to the minimum of five years required for the BEc BA at Pass level. Students wishing to take the Bachelor of Economics at Honours level must consult the Head of School and/or Head of Department in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:

3.1 the completion of at least 60 units of credit (single major) or 48 units of credit (double major) in Economics, Econometrics or Economic History disciplinary streams specified as necessary preparation for Honours year studies, and

3.2 the completion of four specified courses in the Honours year (24 units of credit), and a thesis that is the equivalent of 24 units of credit.

Honours studies may proceed in more than one disciplinary stream prior to the Honours year. In the Honours year, Honours may be taken in the Economics, Econometrics or Economic History disciplinary streams, or a combined Honours program in Economics and Econometrics may be taken.

4. Approved Disciplinary Streams (Honours):
To the end of sixth year:
- Economics
- Econometrics
- Economics/Econometrics
- Economic History

For Rules Relating to the Bachelor of Arts Component (see program 3525 Bachelor of Commerce Bachelor of Arts)

Rules Governing the Award of Combined Degree Programs:
Bachelor of Commerce Bachelor of Social Science and Bachelor of Economics Bachelor of Social Science
The Faculty of Commerce and Economics in conjunction with the Faculty of Arts and Social Sciences offers the combined Bachelor of Commerce Bachelor of Social Science and the Bachelor of Economics Bachelor of Social Science.

These are five year programs combining the strengths and flexibility of each single degree program. It is expected that these combined programs will appeal to students wanting, in particular, a strong, focused and highly regarded business course that is complemented by a program of study in social research and policy analysis.
With approval, students with an excellent academic record may also enrol in an additional Honours year in the Bachelor of Commerce, Bachelor of Economics or Bachelor of Social Science degree.

Students graduating with a combined Bachelor of Commerce Bachelor of Social Science degree or Bachelor of Economics Bachelor of Social Science degree are likely to be employed wherever employers seek Commerce or Economics graduates with additional skills in applied policy analysis, or with a perspective of the world not restricted to business disciplines only.

**Rules Relating to the Bachelor of Commerce Bachelor of Social Science program and Bachelor of Economics Bachelor of Social Science program**

Rules relating to the award of the degree of Bachelor of Commerce and Bachelor of Economics, shall apply wherever relevant to candidates for the course of Bachelor of Commerce Bachelor of Social Science and Bachelor of Economics Bachelor of Social Science.

These are five year degree programs (240 units of credit). Both the Bachelor of Commerce Bachelor of Social Science and Bachelor of Economics Bachelor of Social Science degrees consist of 22 Commerce and Economics courses (132 units of credit), which include the core Year 1 Commerce and Economics courses, 18 Arts and Social Sciences courses (108 units of credit) including 6 which must be in Social Science and Policy. Students will typically enrol in 48 units of credit of courses per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

**3527 Bachelor of Commerce Bachelor of Social Science**

- SLSP1001 Introduction to Research and Information Management

**Years 2–5**

In Years 2, 3, 4 and 5 students take a total of 4 Commerce and Economics courses (24 units of credit), 4 Arts and Social Sciences courses (24 units of credit) each year, including (in total) at least 36 units of credit from Social Science and Policy in the approved sequence as outlined in rules 11 and 12 for the Bachelor of Social Science degree.

**Rules Relating to the Bachelor of Economics Component**

1. Each student must include the following in their degree program:
   1.1 either a major of at least 60 units of credit in either Economics, Econometrics, Economic History or Financial Economics (including courses taken as core studies); or
   1.2 a double major of 90 units of credit consisting of at least 48 units of credit in one of Economics, Econometrics, Economic History or Financial Economics disciplinary streams, and at least 42 units of credit in another disciplinary stream.

The remaining Commerce and Economics course or credit point requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.
2. Approved Disciplinary Streams (Pass):

Accounting  
Asian Studies*  
Business Law*  
Economics  
Econometrics  
Economic History  
Financial Economics  
Finance  
Human Resource Management  
Industrial Relations  
Information Systems  
International Business  
Management  
Marketing  
Taxation*

*Not available as a single major, but as a co-major only

3. Candidates for Honours must complete one year of study additional to the minimum of five years required for the BCom/BScSc at Pass level. In addition to the Pass degree requirements the award with a degree of Honours requires:

1. the completion of at least 60 units of credit (single major) or 48 units of credit (double major) in Economics, Econometrics, Economic History or Financial Economics disciplinary streams specified as necessary preparation for Honours year studies, and
2. the completion of four specified courses in the Honours year in one of these disciplines, and a thesis that is the equivalent of two courses.

4. Approved Disciplinary Streams (Honours):

To the end of sixth year:

Economics  
Econometrics  
Economics/Econometrics  
Economic History  

Rules Relating to the Bachelor of Social Science Component

1. Of the 108 units of credit in Arts and Social Sciences required for the combined degree:
   (a) none may be from courses offered by the Faculty of Commerce and Economics;
   (b) at least 24 and no more than 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 credit points offered by any one School, Department, Unit or Interdisciplinary Program;
   (c) level 1 courses must include SLSP1000 and SLSP1001 (12 units of credit) offered by the School of Social Science and Policy; and
   (d) no more than 54 units of credit in total may be from any one School, Department, Unit or Interdisciplinary Program within the Faculty of Arts and Social Sciences;
   (e) 48 units of credit must be taken as the approved stream as specified in List F for the Bachelor of Social Science degree, excluding those streams offered by the Faculty of Commerce and Economics

2. Candidates for Honours in Social Science must complete one year of study additional to the minimum of five years required for the BCom/BScSc at Pass level. Students wishing to take the Bachelor of Social Science at Honours level must consult the Head of School of Social Science and Policy.

Rules Governing the Award of the Combined Degree Program: Bachelor of Commerce Bachelor of Science

The University offers a four year combined program leading to the award of the degrees of Bachelor of Commerce and Bachelor of Science. This combined degree program will appeal to students wanting a strong, focused and highly regarded business course to complement a program of study in natural or physical sciences or mathematics. Students will complete a major stream in both a selected area of Science and an approved disciplinary stream in Commerce and Economics. Students are unable to take a modern language as a major stream. With approval, students with an appropriate academic record may also enrol in an additional Honours year in Commerce and Economics or in Science. Students may choose Information Systems as a major in the BCom component only. In selecting their combination of majors, students should note that while there is a wide range of choice, not every combination can be completed in four years of full-time study.

3529 Bachelor of Commerce Bachelor of Science

BCom BSc

Rules Relating to the Bachelor of Commerce Bachelor of Science Program

Entry to the course will be by quota with the admission requirements being not less than those for the degree with the highest requirements (currently the Bachelor of Commerce degree) and also with the HSC admission requirements for the Bachelor of Science (3970). There is no automatic transfer between Bachelor of Science and Bachelor of Commerce/Bachelor of Science programs. Students may apply to transfer between these Programs through UAC. For the award of the degrees of BCom BSc, the following requirements must be satisfied:

- Completion of 192 units of credit including:
  - At least 84 units of credit from the courses taught by the Faculty of Commerce and Economics and 84 units of credit from courses by the Faculty of Science.
  - Completion of the required courses for a single major in one of the approved areas of study in the Faculty of Commerce and Economics, as listed in this Handbook. Students are unable to take a modern language as a major stream.
  - Completion of the required courses for a major in one approved Science discipline. Available majors for the science component are listed in Table A in the Science section of this Handbook. A Computer Science major may only be undertaken with the permission of the School of Computer Science and Engineering.
  - The remaining 24 units of credit must be from Schools within the Faculty of Commerce and Economics or Schools within the Faculty of Science as listed in Table A of the Science section of this Handbook.
  - At the discretion of the program authority, variations to course requirements within individual programs may be approved.

Core courses

All students must complete the following courses:

<table>
<thead>

</table>

6 units of credit of first year mathematics courses as specified for the appropriate Science program

and

at least 6 units of credit of statistics courses selected from:

ACTL2002, ECON1203, MATH1041, MATH2801, MATH2901, MATH2841, BIOS2041, PSYC2001 or alternative statistics courses approved by the program advisor.

All students in the combined degree program must complete at least 12 units of credit of courses from Commerce and at least 12 units of credit of courses from an approved Science program within the first 2 sessions of full-time enrolment (or within the first 48 units of credit of courses completed). This may vary however depending on the major undertaken in Science.

Within the first 4 sessions of full-time study (or the first 96 units of credit completed), all students must complete 36 units of credit of courses from an approved Science program and 36 units of credit of courses taught by the Faculty of Commerce and Economics, including compulsory courses listed above.

Rules Relating to the Bachelor of Commerce Component

1. Each student must complete the core courses listed above and the requirements listed for a single major in an approved Disciplinary Stream under Rule 9 for the BCom degree. The remaining units of credit required to satisfy the Commerce component may be chosen from any other undergraduate courses taught by the Faculty of Commerce and Economics.

2. Candidates for Honours must complete one year of study additional to the minimum required for the BCom BSc at Pass Level. Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. In addition to the Pass degree requirements, the award with a degree of Honours requires:

   2.1 the completion of a major of at least 48 units of credit in a disciplinary stream specified as necessary preparation for Honours year studies, and
   2.2 the completion of a program prescribed for an approved disciplinary stream in the Honours year. Approved disciplinary streams (Honours) are listed under Rule 9 for BCom in the Faculty of Commerce and Economics section of this Handbook.
Rules Relating to the Bachelor of Science Component

3. Of the minimum 84 units of credit in courses related to an approved program of study in Science for the combined degree:
3.1 None may be from courses offered by the Faculty of Commerce and Economics (ie Information Systems).
3.2 Students must complete a minimum of 24 units of credit and a maximum of 36 units of credit of level 1 courses offered by Science schools. No more than 18 units of credits of level 1 can be from any one course area.
3.3 Students must complete the prescribed courses for an approved major as listed in Table A of the Science Handbook or with approval, Computer Science. Remaining courses to make up the minimum 84 units of credit in Science courses should be selected from the relevant optional courses as listed for each eligible Science program in Table A.

4. Candidates for Honours in the Science component of the combined degree program will need to undertake an additional year of study as prescribed by the relevant School, and to fulfill prerequisite conditions for undertaking Honours as listed for each approved major. Students who wish to undertake Honours in Science should consult the Head of the School in which they wish to undertake Honours prior to their third year of study.

Rules Governing the Award of the Degree of Bachelor of Science in Information Systems (3979)

Information Systems is concerned with information systems analysis and design, data management, computer processing, EDP audit, management information systems and applied expert systems within business and government organisations. There is a growing maturity in the discipline as the underlying theory and associated principles become better understood and as advanced information processing techniques emerge. In many respects the development of the knowledge base, which forms the discipline, parallels developments in computing technology as new opportunities become apparent for the solution of information processing problems. Hence, information systems is concerned with the way in which computer systems are used within organisations – mainly business and government. The program is intended to develop conceptual and practical skills. After an introductory first Stage, students study systems design, database, communications and commercial programming in parallel with computer science, mathematics and management accounting courses. In the Honours year, well-qualified students may specialise in advanced information systems and data management topics.

Program Structure: Bachelor of Science in Information Systems 3979

INF54853 Information Systems Management
INF54857 Information and Decision Technology
INF54891 Decision Support Systems

Pass degree requirements

Conditions for the Award of the Degree:
1. A student must complete 144 units of credit including 12 units of General Education.
2. The degree must contain a major sequence of study as set out in the program above.
3. A student cannot count more than 60 units in Level I core and elective courses towards their degree except in exceptional circumstances.
4. No student may commence Level II courses until 24 Level I units have been successfully completed.
5. For entry to Honours, a student must complete at least 24 units at Level III in the relevant Major sequence and have the permission of the Head of School.

Rules Governing the Award of the Degree of Bachelor of Science in Business Information Technology (3971)

This is a four year full-time degree program for which Honours may be granted. It is an industry linked education course leading to the award of the qualification Bachelor of Science in Business Information Technology. The course draws on three core disciplinary areas: Information Systems, Accounting, and Computer Science.

The course has been designed in conjunction with the information systems industry to provide for the needs of Australian businesses. The course combines the normal requirements for the award of the degree with coordinated industrial experience in the sponsoring organisations. A scholarship is payable from a fund donated by the sponsoring organisations. Entry to this course is limited to students awarded a scholarship through the BIT selection procedure.

Consideration for entry to the course may proceed only on the basis of an application directly to Co-op Program Office at UNSW and application through UAC.

Students who are academically acceptable for the 1971 course but who are not offered a scholarship should consider registering for entry into the 3979 program. If scholarships become available at the end of Year 1, students undertaking the 3979 program may be offered transfer to the 3971 course.

Objectives of the Program

This four year program teaches information systems theory and practice and provides industrial training linked to that teaching. The three industrial training periods in the course are each of approximately six months duration, running from January of Years 2 and 4, and July of Year 3 of the program. Please see below for the structure of the program.

Rules Relating to Honours Degree: Undergraduate Thesis

Students enrolled for a degree at Honours level in the Faculty must present a thesis in their final year of study. The thesis is to be on a topic selected by the student and approved by the Head of the Teaching Unit concerned. The thesis must be written under the supervision of a member of staff nominated by the appropriate Head of Teaching Unit. The length of the thesis for the Honours degree should not exceed 10,000 words.

For the Honours courses, the topic selected must normally be submitted for approval no later than the end of the second session in the second last year of the course.

The thesis for any course leading to the award of a degree at Honours level must be presented not later than 30 November of the year in which the thesis is to be presented.

In writing theses, students are expected to pay particular attention to matters of presentation. The thesis must include a bibliography and an acknowledgment of all source material and it must be accompanied by an abstract of approximately 200 words. Two copies of the thesis must be submitted in double-spaced typescript on paper size A4 with a 30 mm margin and suitably bound or stapled.

In exceptional circumstances the Head of the Teaching Unit may grant an extension of time for compliance with the requirements of the three immediately preceding paragraphs.

Disciplinary Streams

Select sufficient courses to make up minor, co-major or single major requirements, or select single courses as options, as appropriate. Refer to the preceding section which lists the rules governing the award of degrees for details. Refer to the ‘Course Descriptions’ section of this Handbook for further details e.g. course prerequisites.

Accounting

Course ID Course Name
ACCT1501 Accounting & Financial Management 1A
ACCT1511 Accounting & Financial Management 1B
ACCT2522 Management Accounting: Process Improvement and Innovation
ACCT2542 Corporate Financial Reporting and Analysis
ACCT3563 Issues in Financial Reporting and Analysis
ACCT3573 Issues in Financial Reporting and Analysis (Honours)
ACCT3583 Stakeholder Value Management
ACCT3585 E-Business: Strategy and Processes
ACCT3593 Stakeholder Value Management (Honours)

ACCT3708 Auditing and Assurance Services
ACCT3718 Auditing and Assurance Services (Honours)
ACCT4820 Management Accounting Issues and International Best Practice
FIN3626 International Corporate Governance

Accounting Honours

This program is available to the end of Year 3 only for BCom students and to the end of fourth year for BCom students only.

Required Prior to Year 4
ACCT3573 Issues in Financial Reporting and Analysis (Honours)
ACCT3593 Stakeholder Value Management (Honours)
ACCT3718 Auditing and Assurance Services (Honours)

Year 4
ACCT4794 Thesis (Accounting)
ACCT4809 Current Developments in Auditing Research
ACCT4851 Current Developments in Accounting Research – Financial
ACCT4852 Current Developments in Accounting Research – Managerial
ACCT4897 Seminar in Research Methodology

Accounting Co-op Program

This program is available as a single major or combined with Finance or Business Economics in the BCom degree only.

Entry to the program is at first year only and through the scholarship selection procedures administered by the Co-op Program Office. This is a four year degree program.

Required
ACCT8691 Industrial Training 1
ACCT8692 Industrial Training 2
ACCT8693 Industrial Training 3

Students may not enrol in any courses concurrently with any of these required courses without the permission of the School of Accounting Co-op Program Coordinator.

Course List
ACCT1501 Accounting and Financial Management 1A
ACCT1511 Accounting & Financial Management 1B
ACCT2522 Management Accounting: Process Improvement and Innovation
ACCT2542 Corporate Financial Reporting and Analysis
ACCT3563 Issues in Financial Reporting and Analysis
ACCT3573 Issues in Financial Reporting and Analysis (Honours)
ACCT3583 Stakeholder Value Management

ACCT3718 Auditing and Assurance Services (Honours)
ACCT4820 Management Accounting Issues and International Best Practice
FINS3626 International Corporate Governance

**Actuarial Studies**

**Core required:**
The actuarial major requires students to substitute approved Mathematics courses in place of ECON1202 and ECON1203 as 1st year core courses. Students will normally be required to complete: MATH1151 Mathematics for Actuarial Studies and Finance 1A MATH1251 Mathematics for Actuarial Studies and Finance 1B unless approval from the Head of Actuarial Studies is obtained.

**Required**
ACTL1001 Actuarial Studies and Commerce
ACTL2001 Financial Mathematics
ACTL2002 Probability and Statistics for Actuaries
ACTL2003 Stochastic Models for Actuarial Applications

To satisfy minimum requirements for an actuarial studies minor, all courses from the required list must be completed.

**Options**
ACTL3001 Actuarial Statistics
ACTL3002 Life Insurance and Superannuation Models
ACTL3003 Risk Models
ACTL3004 Financial Economics for Insurance and Superannuation
ACTL3005 Superannuation and Retirement Benefits

To obtain maximum actuarial professional examination exemptions, the first four options should be completed along with ACCT2542, ECON2101 and FINS1613.

**Actuarial Studies Honours**

**BCom Honours Actuarial Studies**
ACTL4000 Actuarial Studies Thesis (full year) 24 UOC
ACTL4003 Research Topics in Actuarial Science (Session 1) 6 UOC
ACTL4001 Actuarial Theory and Practice A (Session 1) 6 UOC
ACTL4002 Actuarial Theory and Practice B (Session 2) 6 UOC

Option approved by the Head of Actuarial Studies 6 UOC

**Actuarial Studies Co-op Program**
This program is available only to students admitted through the scholarship selection procedures administered by the Co-op Program office. Entry to the program is at first year only.

This is a four year degree program combining the requirements of the BCom with coordinated industrial experience. Industrial experience extends outside university sessions.

**Required**
ACTL1001 Actuarial Studies and Commerce
ACTL2001 Financial Mathematics
ACTL2002 Probability and Statistics for Actuaries
ACTL2003 Stochastic Models for Actuarial Applications
ACTL2100 Industrial Training 1 (Year 2–12 wks)
ACTL3100 Industrial Training 2 (Year 3–26 wks)
ACTL4100 Industrial Training 3 (Year 4–26 wks)

**Options**
To satisfy minimum requirements of the Actuarial Studies Co-op Program, the following courses must be completed.

**List A**
ACTL3001 Actuarial Statistics
ACTL3002 Life Insurance and Superannuation Models
ACTL3003 Risk Models
ACTL3004 Financial Economics for Insurance and Superannuation
ACCT2542 Corporate Financial Reporting and Analysis
ECON2101 Microeconomics 2
or
ECON2110 Macroeconomics 2
FINS1613 Business Finance

**Asian Studies (BCom students only)**
This major is available only as a co-major integrated with the program in Economics.

**Required**
(i) Students must enrol in and pass enough language units to reach a standard equivalent to intermediate level. If a student has satisfactory HSC competence in the language this will require two courses, if not four. In the case of the Japanese language, students entering without HSC competence should enrol in four consecutive core units of Japanese beginning with JAPN1000 Japanese Communication 1A. Students entering the Japanese language program with HSC, or above, competence will be admitted to a suitable level, subject to a placement test.
(ii) Students must enrol in and pass at least six units relating to a particular country or group of countries as approved by the Head of School. These may include language courses and must include at least two economics courses, one of which may be ECON2305 Modern Asian Economic History.

**Business Economics (BCom students only)**

**Required**
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1

**Options** (may be selected from List A or List B)
To satisfy either single or double major requirements, at least two Options must be chosen from List B.

**List A**
ECON2101 Microeconomics 2
ECON2102 Macroeconomics 2
ECON2103 Business and Government
ECON2104 Applied Macroeconomics
ECON2105 Economics of Corporations
ECON2107 The Economics of Information and Technology
ECON2109 Economics of Natural Resources
ECON2111 Globalisation
ECON2112 Game Theory and Business Strategy
ECON2113 Economics of e-Commerce
ECON2116 Economics of Japanese Business & Government
ECON2117 Economics of Tourism
ECON2127 Environmental Economics
ECON2206 Introductory Econometrics
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2322 European Integration

**List B**
ECON2207 Econometric Methods
ECON3101 Markets and Public Choice
ECON3104 International Macroeconomics
ECON3106 Public Finance
ECON3107 Economics of Finance
ECON3109 Economic Growth, Technology and Structural Change
ECON3110 Development Economics
ECON3112 The Newly Industrialising Economies of East Asia
ECON3113 Economic Development in ASEAN Countries
ECON3114 Superannuation and Retirement Benefits
ECON3116 International Economics
ECON3119 Political Economy
ECON3120 Economic Reasoning
ECON3121 Managerial Economics
ECON3202 Mathematical Economics
ECON3203 Econometric Theory
ECON3204 Econometric Model Building
ECON3206 Financial Econometrics

**Business Economics Honours**

**(BCom students only)**

**Year 4**

**Required**
ECON4100 Advanced Economic Analysis
ECON4127 Economics Thesis

Plus three further courses from:
ECON4101 International Trade
ECON4102 Industrial Organisation
ECON4103 Business Cycles And Growth
ECON4104 Economics of Labour Markets
ECON4105 Seminar in Research Methods
ECON4201 Applied Econometrics
In certain circumstances and with the permission of the Head of School, one course from List B of the Economics disciplinary stream, or a 4th year course from any school in FCE may be substituted for one of the Fourth Year Honours options.

For each course the UOC is 6, except ECON4127 for which the UOC is 24.

**Business Law**

This stream is not available as a single major, but as a co-major only. This stream is not available with the co-major in Taxation.

**Required**
- LEGT1711 Legal Environment of Commerce
- LEGT2721 Business Transactions
- LEGT2741 Business Entities

**Options:**
Four courses from the following list:
- LEGT2791 International Business Law
- LEGT2712 Business, Ethics and the Law
- LEGT2731 Marketing and Distribution Law
- LEGT2732 Franchising
- LEGT2751 Business Taxation
- LEGT2761 Law of Banking and Finance
- LEGT2771 Information Technology Law
- LEGT2781 Regulation of Government Agencies
- LEGT2756 International Business Taxation
- LEGT3757 Corporate Law, Tax and Strategy
- LEGT3744 Corporate Fraud and Crime
- LEGT4721 Special Topic in Business Law

**Note:** Other courses offered by the School of Business Law and Taxation may be substituted for the optional courses listed above with approval of the Head of School.

**Business Statistics (BCom students only)**

**Required**
- ECON1202 Quantitative Methods A
- ECON1203 Quantitative Methods B

**Options** (may be selected from List A or List B)

To satisfy either single or double major requirements, at least two Options must be chosen from List B.

**List A**
- ECON2206 Introductory Econometrics
- ECON2208 Operations Research
- ECON2209 Business Forecasting

**List B**
- ECON2207 Econometric Methods
- ECON2215 Statistics for Econometrics
- ECON3202 Mathematical Economics
- ECON3203 Econometric Theory
- ECON3206 Financial Econometrics

**Business Strategy & Economic Management (BCom students only)**

**Required**
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1
- ECON2101 Microeconomics 2
- ECON2105 Economics of Corporations
- ECON2112 Game Theory and Business Strategy
- ECON3121 Managerial Economics

**Options**
- ECON2202 Macroeconomics 2
- ECON2203 Business and Government
- ECON2204 Applied Macroeconomics
- ECON2207 The Economics of Information and Technology
- ECON2213 Economics of E-Commerce
- ECON2216 Economics of Japanese Business & Government
- ECON2206 Introductory Econometrics
- ECON2207 Econometric Methods
- ECON2208 Operations Research
- ECON2209 Business Forecasting
- ECON3101 Markets and Public Choice
- ECON3106 Public Finance

**ACCT2522** Management Accounting: Process Improvement and Innovation

**MGMT2101** International Business and Multinational Enterprises

**MGMT3101** International Business Strategy

**INFS3603** Business Intelligence Systems

**INFS3685** Electronic Commerce Management

**MGMT3724** Strategic Human Resource 1 Management

**MARK3071** International and Global Marketing

**MARK3082** Strategic Marketing Management

**Business Strategy and Economic Management Honours (BCom students only)**

**Year 4**

**Required**
- ECON4127 Economics Thesis
- ECON4102 Industrial Organisation

Plus three further courses from:
- ECON4100 Advanced Economic Analysis
- ECON4101 International Trade
- ECON4103 Business Cycles and Growth
- ECON4201 Applied Econometrics
- ECON4104 Economics of Labour Markets
- ECON4105 Seminar in Research Methods

In certain circumstances and with the permission of the Head of School, one third year option course from the option list for the Business Strategy and Economic Management disciplinary stream, or a 4th year course from any school in the FCE, may be substituted for one of the Fourth Year Honours options.

For each course the UOC is 6, except ECON4127 for which the UOC is 24.

**Financial Economics (BCom and BEc students)**

**Required**
- ECON2101 Microeconomics 2
- ECON3107 Economics of Finance
- ECON2206 Introductory Econometrics
- ECON2209 Business Forecasting
- ECON3206 Financial Econometrics
- FINS1612 Capital Markets & Institutions

**Options**
- ECON2102 Macroeconomics 2
- ECON2104 Applied Macroeconomics
- ECON2112 Game Theory and Business Strategy
- ECON2207 Econometric Methods
- ECON2208 Operations Research
- ECON2215 Statistics for Econometrics
- ECON3101 Markets and Public Choice
- ECON3102 Macroeconomics 1
- ECON3105 Economics of Corporations
- ECON3121 Managerial Economics
- ECON4107 Macroeconomics
- ECON4108 Macroeconomic Theory
- ECON4109 Econometric Methods

**Financial Economics Honours (BCom students only)**

**Year 4**

**Required**
- ECON4127 Economic Thesis

Plus four further courses from:
- ECON4100 Advanced Economic Analysis
- ECON4101 International Trade
- ECON4102 Industrial Organisation
- ECON4103 Business Cycles and Growth
- ECON4104 Economics of Labour Markets

**Economics (BEc students only)**

**Required**
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1
- ECON2101 Microeconomics 2
- ECON2102 Macroeconomics 2
- ECON2206 Introductory Econometrics
- ECON2207 Econometric Methods
Options (may be selected from List A or List B)
To satisfy single major requirements, students must do three Options from List B.
To satisfy double major requirements, at least two Options must be chosen from List B.

List A
ECON2103 Business and Government
ECON2104 Applied Macroeconomics
ECON2105 Economics of Corporations
ECON2107 The Economics of Information and Technology
ECON2109 Economics of Natural Resources
ECON2111 Globalisation
ECON2112 Game Theory and Business Strategy
ECON2113 Economics of e-Commerce
ECON2116 Economics of Japanese Business & Government
ECON2117 Economics of Tourism
ECON2127 Environmental Economics
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2322 European Integration
ECON3106 Public Finance
ECON3112 The Newly Industrialising Economies of East Asia
ECON3113 Economic Development in ASEAN Countries
ECON3119 Political Economy

List B
ECON3101 Markets and Public Choice

Economics Honours (BSc students only)

Year 4
Required
ECON4100 Advanced Economic Analysis
ECON4127 Economics Thesis

Plus three further courses from:
ECON4101 International Trade
ECON4102 Industrial Organisation
ECON4103 Business Cycles and Growth
ECON4104 Economics of Labour Markets
ECON4201 Applied Econometrics

Options
ECON3102 Macroeconomics 2
ECON2206 Introductory Econometrics
ECON2207 Econometric Methods
ECON2215 Statistics for Econometrics
ECON3203 Econometric Theory

Econometrics Honours (BSc students only)

Year 4
Required
ECON4100 Advanced Economic Analysis
ECON4201 Applied Econometrics
ECON4202 Advanced Econometric Theory
ECON4227 Thesis (Econometrics)

Plus one option from the Economics Fourth Year Honours options list.

Economics/Econometrics (BSc students only)

Required
ECON2102 Macroeconomics 2
ECON2206 Introductory Econometrics
ECON2207 Econometric Methods
ECON2215 Statistics for Econometrics
ECON3203 Econometric Theory

Economics/Econometrics Honours (BSc students only)

Year 4
Required
ECON4100 Advanced Economic Analysis
ECON4201 Applied Econometrics
ECON4202 Advanced Econometric Theory
ECON4227 Thesis (Econometrics)

Plus one option from the Economics Fourth Year Honours options list.

Economic History (BCom students only)

Required
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1

Options
ECON1301 Australia in the Global Economy
ECON1302 Australia and the Asia-Pacific Economies
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2319 Economic & Social Policy in Australia since Federation
ECON2321 Growth and Development of International Business
ECON2322 European Integration

Economic History (BSc students only)

Required
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1
ECON2102 Microeconomics 2
ECON2206 Introductory Econometrics

Options
ECON1301 Australia in the Global Economy
ECON1302 Australia and the Asia-Pacific Economies
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2319 Economic & Social Policy in Australia since Federation
ECON2321 Growth and Development of International Business
ECON2322 European Integration
Economic History Honours (BEC students only)

Year 4
Required
ECON4321 Economic History for Honours
ECON4327 Thesis (Economic History)

Finance
Required
FINS1612 Capital Markets and Institutions
FINS1613 Business Finance
FINS2624 Portfolio Management
FINS3616 International Business Finance

Students specialising in Finance only or Finance and another discipline should take the above four compulsory Finance courses in the first two years (first year and first semester of the second year) so that they can complete as many Finance courses as possible in the area of Banking, Corporate Finance, Investment Management, International Finance, Risk Management and Financial Analysis during their second and third years. To meet minor requirements, students must complete FINS1613 and 3 other required or optional courses.

Year 1
FINS1612 Capital Markets and Institutions
FINS1613 Business Finance

Year 2
FINS2624 Portfolio Management
FINS3616 International Business Finance

And optional Finance courses from the list below, in the areas of:
- Banking
- Corporate Finance
- Investment Management
- International Finance
- Risk Management
- Financial Analysis

Year 3
Optional Finance courses from the list below, in the areas of:
- Banking
- Corporate Finance
- Investment Management
- International Finance
- Risk Management
- Financial Analysis

To satisfy single major requirements, at least three options must be chosen from the following options. To satisfy double major requirements, at least two options must be chosen from the following list.

Options
FINS2622 Emerging Capital Markets
FINS3623 Small Business Finance
FINS3625 Applied Corporate Finance
FINS3626 International Corporate Governance
FINS3630 Bank Financial Management
FINS3631 Risk and Insurance
FINS3633 Real Estate Finance
FINS3634 Credit Analysis and Lending
FINS3635 Options, Futures and Risk Management
FINS3636 Interest Rate Risk Management
FINS3640 Investment Management Modelling
FINS3641 Security Analysis and Valuation
FINS3642 Strategies for Investment Management
FINS3650 International Banking
FINS3651 International Financial Services
FINS3775 Research Methods in Finance

Finance Honours
This program is available to the end of Year 3 only for BEc students and to the end of fourth year for BCom students only.

Required
Prior to Year 4
FINS1612 Capital Markets and Institutions
FINS1613 Business Finance
FINS2624 Portfolio Management

FINS3616 International Business Finance
FINS3775 Research Methods in Finance

Year 4
Session 1
Three compulsory courses:
FINS4774 Financial Decision Making Under Uncertainty
FINS4776 Advanced Topics in Asset Pricing
FINS4779 Research Methods in Finance 2

Plus one elective from:
FINS4777 Advanced Topics in Corporate Finance
FINS4778 Recent Developments in Banking Research
FINS4781 Special Topics in Finance

Session 2
FINS4795 Thesis (Finance)

Finance (Honours) Co-op Program
This program is available only to students admitted through the scholarship selection procedures administered by the Co-op Program Office. Entry to the program is at first year only.
This is a four year Honours degree program combining the requirements of the BCom with 15 months of coordinated industrial experience.* Industrial training extends outside university sessions.

Year 1
Session 1
ACCT1501 Accounting and Financial Management 1A
ECON1101 Microeconomics 1
ECON1202 Quantitative Methods A
FINS1612 Capital Markets and Institutions

Session 2
ACCT1511 Accounting and Financial Management 1B
ECON1102 Macroeconomics 1
ECON1203 Quantitative Methods B
FINS1613 Business Finance

Year 2
Summer Session
FINS2100 Industrial Training 1 (12 weeks)

Session 1
FINS2624 Portfolio Management
FINS Option

Session 2
FINS3616 International Business Finance
FINS Option
Option
General Education

Year 3
Session 1
FINS3100 Industrial Training 2 (24 weeks)
Option
FINS3775 Research Methods in Finance 1

Session 2
FINS3200 Industrial Training 3 (24 weeks)
General Education
FINS Option

Year 4
Session 1
FINS4774 Financial Decision Making Under Uncertainty
FINS4776 Advanced Topics in Asset Pricing
FINS4779 Research Methods in Finance 2
Finance Honours Elective Course

Session 2
FINS4795 Thesis

* With the approval of the Head of School, students who fail to meet the performance requirements for Honours may substitute an approved selection of Finance courses for Level 4 courses and will be awarded a Pass degree [see Rule 9 (9.4)].

Human Resource Management
The minimum requirements for a major in Human Resource Management are the required courses, two courses from List A, and one course from List B and one course from either List A or List B.
To meet the requirements for a minor students must complete the three required courses and one option.

**Required**
- MGMT1701 Industrial Relations
- MGMT1712 Management of Organisations
- MGMT2718 Human Resource Management

**Options**
**List A**
- MGMT3702 International Human Resource Management Practice
- MGMT3724 Strategic Human Resource Management
- MGMT3728 Managing Pay and Performance
- MGMT3729 Managing Workplace Training

**List B**
- MGMT1702 Labour Organisation
- MGMT2702 Industrial Law
- MGMT2703 International Employment Relations
- MGMT2704 Social Organisation of Work
- MGMT2715 Labour History
- MGMT2724 Health and Safety at Work
- MGMT3705 Management and Employment Relations
- MGMT3706 Industrial Relations Policies and Processes
- MGMT3721 Negotiation, Bargaining and Advocacy

**Human Resource Management Honours**
*(BCom students only)*

The minimum requirements for a major at Honours level in Human Resource Management are the required courses listed below, one course from List A above, one course from List B above, plus the Year 4 required courses listed below.

**Required**
- MGMT1701 Industrial Relations
- MGMT1712 Management of Organisations
- MGMT2718 Human Resource Management
- MGMT3708 Philosophy and Research Methods in Employment and Management*

*MGMT3708 is a prerequisite for Year 4 Honours and should normally be taken in the session preceding the Honours year.

**Year 4**

**Required**
- MGMT4731 Case Studies A
- MGMT4732 Case Studies B
- MGMT4733 Honours Seminar
- MGMT4738 Thesis (Human Resource Management)

**Industrial Relations**

The minimum requirements for a major in Industrial Relations are the required courses, two courses from List A, and one course from List B and one course from either List A or List B.

To meet minor requirements students must complete the three required courses and one option.

**Required**
- MGMT1701 Industrial Relations
- MGMT1702 Labour Organisation
- MGMT2702 Industrial Law

**Options**
**List A**
- MGMT2704 Social Organisation of Work
- MGMT2715 Labour History
- MGMT3705 Management and Employment Relations
- MGMT3706 Industrial Relations Policies and Processes

**List B**
- MGMT1712 Management of Organisations
- MGMT2703 International Employment Relations
- MGMT2718 Human Resource Management
- MGMT2724 Health and Safety at Work
- MGMT3702 International Human Resource Management Practice
- MGMT3704 Analysing Work and Organisations
- MGMT3707 History and Philosophy of Industrial Relations Research
- MGMT3721 Negotiation, Bargaining and Advocacy
- MGMT3724 Strategic Human Resource Management

**Industrial Relations Honours**

This program is available to the end of Year 3 only for BEc students and to the end of Year 4 for BCom students only.

The minimum requirements for a major at Honours level in Industrial Relations are the required courses listed below, one course from List A above, one course from List B above, plus the Year 4 required courses listed below.

**Required**
- MGMT1701 Industrial Relations
- MGMT1702 Labour Organisation
- MGMT2702 Industrial Law
- MGMT3708 Philosophy and Research Methods in Employment and Management*

*MGMT3708 is a prerequisite for Year 4 Honours and should normally be taken in the session preceding the Honours year.

**Year 4**

**Required**
- MGMT4731 Case Studies A
- MGMT4732 Case Studies B
- MGMT4733 Honours Seminar
- MGMT4734 Thesis (Industrial Relations)

**Information Systems**

**Required**
- INFS1602 Computer Information Systems
- INFS1603 Business Data Management
- INFS2603 Systems Analysis and Design
- INFS2607 Business Data Networks

**Options**
- INFS2609 Software Implementation
- INFS2611 Requirements Elicitation
- INFS3603 Business Intelligence Systems
- INFS3604 Information Technology Management
- INFS3605 Implementation Workshop
- INFS3606 Telecommunications for Electronic Commerce
- INFS3608 Advanced Database Systems
- INFS3611 Design Workshop
- INFS3621 Alternative System Design Methodologies
- INFS3622 Distributed Application Design and Implementation
- INFS3623 Multimedia Systems Design
- INFS3685 Electronic Commerce Management

**Year 4**

**Required**
- INFS4795 Thesis Part A (Information Systems)
- INFS4796 Thesis Part B (Information Systems)
- INFS4886 Research Topics in 1 Information Systems
- INFS4887 Research Topics in 2 Information Systems

**Options**
Two options must be chosen from:
- INFS4774 Information Systems Security
- INFS4805 Information Systems Auditing
- INFS4810 Advanced Data Management
- INFS4811 Knowledge Management Systems and Technology
- INFS4812 Software Engineering Management
- INFS4848 Information Systems Project Management
- INFS4853 Information Systems Management
- INFS4857 Information and Decision Technology
- INFS4891 Decision Support Systems
- INFS4893 Special Topic in Information Systems and Management

**Information Systems and Management Co-op Program**

This program is available only to students admitted through the scholarship selection procedures administered by the Co-op Program Office. Entry to the program is at first year only.

This is a four year Honours degree program combining the requirements of the BCom with 18 months of coordinated industrial experience.* Industrial training extends outside university sessions.
Required
INFS1602 Computer Information Systems
INFS1603 Business Data Management
INFS2603 Systems Analysis and Design
INFS2607 Business Data Networks
INFS3604 Information Technology Management
INFS4886 Research Topics in Information Systems 1
INFS4887 Research Topics in Information Systems 2
INFS4795 Thesis A
INFS4796 Thesis B
INFS2791 Industrial Training A
INFS3792 Industrial Training B
INFS4793 Industrial Training C
Options
INFS2609 Software Implementation
INFS2611 Requirements Elicitation
INFS3603 Business Intelligence Systems
INFS3605 Implementation Workshop
INFS3606 Telecommunications for Electronic Commerce
INFS3608 Advanced Database Systems
INFS3611 Design Workshop
INFS3621 Alternative System Design Methodologies
INFS3622 Distributed Application Design and Implementation
INFS3623 Multimedia Systems Design
INFS3685 Electronic Commerce Management
Honours Options
Two options must be chosen from:
INFS4774 Information Systems Security
INFS4805 Information Systems Auditing
INFS4810 Advanced Data Management
INFS4811 Knowledge Management Systems and Technology
INFS4812 Software Engineering Management
INFS4848 Information Systems Project Management
INFS4853 Information Systems Management
INFS4857 Information and Decision Technology
INFS4891 Decision Support Systems
INFS4893 Special Topic in Information Systems and Management

*With the approval of the Head of School, students who fail to meet the performance requirements for Honours may substitute an approved selection of Information Systems courses for Level 4 courses and will be awarded a Pass degree.

International Business
This program is available as a single major and co-major in the BCom (Pass) and as a co-major in the BEc (Pass) degrees. To satisfy minimum requirements for an International Business minor, students must take MGMT1101 & MGMT1102 plus 2 MGMT Options (excluding language options).

Required
MGMT1101 Global Business Environment
MGMT1102 Managing Across Cultures
MGMT2101 International Business and Multinational Operations
MGMT3101 International Business Strategy
MGMT3102 Asia-Pacific Business

Options
At least one option must be chosen from List A
List A
MGMT2106 Comparative Management Systems in East Asia
MGMT2110 Alliance Management and International Co-operation
MGMT3103 Global Stakeholder Management
List B
MGMT1001 Communicating in Business
MGMT2105 Chinese Business Enterprise
ECON2105 Economics of Corporations
ECON2111 Globalisation
ECON2322 European Integration
FINS1612 Capital Markets and Institutions
FINS2622 Emerging Capital Markets
LEGT1732 Franchising
LEGT2791 International Business Law
MGMT2703 International Employment Relations
JAPN1000 Japanese Communication 1A

Note: 1. Other modern languages may be taken as List B options: please see Modern Languages stream.

Note: 2. Students may count relevant courses offered in the Faculty of Arts and Sciences as List B options with the approval of the Head of School.

International Business Honours
Session 1
MGMT4101 Applied Research Methods in International Business
MGMT4102 Advances in International Business Theory
MGMT4103 Research Seminar in International Business
MGMT4501 Research Thesis Part A
Session 2
MGMT4502 Research Thesis Part B (18 UOC)

Management
To meet minor requirements students must complete MGMT1001, MGMT1102, one course from List A and one from List B

Required
MGMT1001 Fundamentals of Management
MGMT1102 Managing Organisational Behaviour
MGMT2001 Managing Innovation and Organisational Change
MGMT2002 Managing Business Communication
MGMT3001 Managing Business Strategy

Options
At least one option must be chosen from List A
List A
ACCT2522 Management Accounting: Process Improvement & Innovation
ACCT3583 Stakeholder Value Management
ECON2112 Game Theory & Business Strategy
MGMT1102 Managing Across Cultures
MGMT2703 International Employment Relations
MGMT2718 Human Resource Management
MARK1012 Marketing Fundamentals
List B
ACCT3585 E-Business: Strategy and Processes
ECON2105 Economics of Corporations
ECON3121 Managerial Economics
FINS1612 Capital Markets and Institutions
FINS1613 Business Finance
INFS1602 Computer Information Systems
LEGT1711 Legal Environment of Commerce
LEGT2712 Business, Ethics & the Law

Marketing
Required
MARK1012 Marketing Fundamentals
MARK2051 Consumer Behaviour
MARK2052 Marketing Research
MARK2053 Marketing Communications & Promotions Management
MARK2054 Market Analysis
MARK3081 Distribution Strategy and Retail Channels
MARK3082 Strategic Marketing Management

Options
MARK1014 Customer Relationship Management
MARK3071 International & Global Marketing
MARK3072 Advanced Consumer Behaviour
MARK3091 New Product & New Service Development
MARK3092 Brand Management

Marketing Honours
This program is available to the end of Year 4 for BCom students only.

Year 4
Required
MARK7204 Thesis (Marketing) Part A
MARK7210 Business Research Methods in Marketing
MARK7211 Research Seminar in Marketing
MARK7212 Advanced Quantitative Methods in Marketing
MARK7213 Contemporary Research Methods in Marketing
MARK7205 Thesis (Marketing) Part B
Marketing Co-op Program

Entry to the program is at first year only and through the scholarship selection procedures administered by the Co-op Program Office. This is a four year degree program.

Year 1
Session 1
ACCT1501 Accounting and Financial Management 1A (core)
ECON1101 Microeconomics (core)
ECON1202 Quantitative Methods A (core)
MARK1012 Marketing Fundamentals (core)

Session 2
ACCT1511 Accounting and Financial Management 1B (core)
ECON1102 Macroeconomics (core)
ECON1203 Quantitative Methods B (core)
ELECTIVE 1

Year 2
Session 1
MARK2999 Industrial Training 1 (core)
MARK2051 Consumer Behaviour (core)
MARK2052 Market Research (core)

Session 2
MARK2053 Marketing Communications & Promotions Management (core)
MARK2054 Market Analysis (core)
ELECTIVE 2
6 UOC of General Education

Year 3
Session 1
MARK3081 Distribution Strategy & Retail Channels (core)
ELECTIVE 3
ELECTIVE 4
ELECTIVE 5

Session 2
MARK3999 Industrial Training 2 (core)
ELECTIVE 6

Year 4
Session 1
MARK4999 Industrial Training 3 (core)
6 UOC of General Education

Session 2
MARK3082 Strategic Marketing Management (core)
ELECTIVE 7
ELECTIVE 8
ELECTIVE 9

Taxation

This program is not available as a single major, but as a co-major only. This program is not available with the co-major in Business Law.

Required Course

LEG1711 Legal Environment of Commerce
LEG2721 Business Transactions
LEG2741 Business Entities
LEG2751 Business Taxation

Options

Three courses from the following list:

LEG1755 Taxation of Business Entities
LEG1752 Capital Gains Tax
LEG1753 Goods and Services Tax
LEG1754 Tax Policy and Administration
LEG2756 International Business Taxation
LEG1757 Corporate Law, Tax and Strategy
LEG4722 Special Topic in Taxation

Note: Other courses offered by the School of Business Law and Taxation may be substituted for the optional courses listed above with approval of the Head of School.

Modern Languages

Language programs available: Chinese, French, German, Greek (Modern), Indonesian, Italian, Japanese, Korean, Russian, Spanish.

Programs in Modern Languages are not available as a single major, but as a co-major only. However, language programs are not available as a co-major with Asian Studies, Business Law & Taxation, Japanese Studies, Korean Studies, another language or language studies.

To obtain a major, students must complete 42 units of credit in one language program offered by the Faculty of Arts and Social Sciences.

Modern Languages is not available as a minor.

Tourism and Hospitality Management

(BCom students only)

This program is available only as a co-major integrated program with Marketing and only to those students admitted to the Bachelor of Commerce in Marketing, Tourism and Hospitality Management degree (program code 3571).

Required

TAHM1666 Tourism & Hospitality 1 Operational Studies
TAHM1777 Tourism & Hospitality 2 Operational Studies
TAHM2001 Tourism Policy & Planning 1
TAHM2002 Tourism Marketing
TAHM2888 Applied Tourism & Hospitality Management
TAHM3001 Legal Aspects of Tourism
TAHM3002 Tourism & Hospitality Operations Management
TAHM3003 Tourism Policy & Planning 2
TAHM3004 Managing People in the Tourism & Hospitality Industry
TAHM3888 Applied Tourism & Hospitality Management 2
TAHM4001 Customer Experience Management
TAHM4002 Project Report in Tourism & Hospitality
TAHM4003 Strategic Management in Tourism & Hospitality
TAHM4888 Applied Tourisim & Hospitality Management 3

During the first two sessions candidates will undertake a Diploma in Hospitality and Tourism Operations at Kenvale College, usually one day per week for each session. A course fee is payable.

Sample program for Marketing, Tourism and Hospitality Management students:

Program Structure*

Stage 1
Session 1
Session 2
ACCT1501
ECON1102
ECON1101
ECON1203
ECON1202
MARK1012
TAHM1666
TAHM1777

Stage 2
Session 1
Session 2
ACCT1511
MARK2053
MARK2051
TAHM2002
TAHM 2001
TAHM2888
OPTION

Stage 3
Session 1
Session 2
MARK2052
MARK2054
TAHM3001
TAHM3003
TAHM3002
TAHM3004
OPTION

Stage 4
Session 1
Session 2
MARK3081
MARK3082
TAHM4001
TAHM4003
THAM4002
THAM4888
OPTION

12 units from the Options in Stage 2 (Session 2) and Stage 3 (Session 1) should be approved General Education courses. Remaining options should be from the Faculty of Commerce and Economics.

*Available only as a co-major integrated program with Marketing.
Faculty of Engineering

A Message from the Dean

This handbook describes the many undergraduate programs available in the Faculty of Engineering at UNSW. There is a very wide choice of programs, plans and electives and we therefore suggest you spend some time reading the handbook carefully.

Whatever program you consider, it will be managed by one of our ten schools. Each school will have an advisor who can help you plan your program.

In addition to the individual programs you can broaden your University experience by taking one of the wide range of combined programs which combine the BE with BSc, BA, LLB and BCom degrees. A Master of Biomedical Engineering may be studied concurrently with several of the BE programs.

The Faculty of Engineering is dedicated to scholarship and research and to the facilitation of student learning. The academic staff are engaged in research and engineering practice, most of which is in collaboration with industry. This engagement with the frontiers of engineering and the related sciences ensures that students are familiar with the latest developments. In later years many students are able to participate in the work of the research teams in the Faculty.

The Faculty is a major part of the international dimension of UNSW, we welcome many international students and also encourage local students to take part of their program at an overseas university. We have strong links with major research universities throughout the world.

Students are encouraged to play an active role in all the University has to offer. There are many student led projects and other activities which can enhance your experience as a student at UNSW.

Brendon Parker
Dean
Faculty of Engineering
School of Computer Science and Engineering

Faculty Information and Assistance

The entry for the Faculty of Engineering is divided into separate sections for each school/unit. Before reading ‘Rules for Progression and the Award of Degrees’, you must read the general information at the front of this Faculty entry. You should then read the opening sections for each of the schools within the Faculty. These sections cover all degrees and diplomas offered by the Faculty. Detailed information on each course then appears under Course Descriptions at the end of this book, which includes pre/corequisite details, class hours, units of credit, etc.

You will find that almost any program of study you wish to undertake has courses from other schools, and even other faculties. This means that in your engineering program, courses are listed from other schools in the Faculty of Engineering, each with its own identifying code, as well as from the school in which you are planning to study. If, for example, this is Mechanical and Manufacturing Engineering (MECH), all the courses for Mechanical and Manufacturing Engineering are described in the section for that school. As Mechanical and Manufacturing Engineering also includes Aerospace Engineering (AERO), Manufacturing Engineering and Management (MANF), Mechatronic Engineering (MTRN) and Naval Architecture (NAVL), these courses are also included with the school.

For a full list of courses offered by the University refer to the Online Handbook at www.handbook.unsw.edu.au or visit the Faculty website and refer to the relevant school.

Some People Who Can Help You

This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Engineering.

If you require advice about enrolment, degree requirements, progression within programs, course content and requirements, contact the appropriate school representative listed below:

**Faculty of Engineering, Dean’s Office**
Ms Donna Bailey, Room 605, Building K17
Tel: (02) 9385 6437

**School of Chemical Engineering and Industrial Chemistry**
Ms Vanessa Werfel, Room 314, Applied Science Building
Tel: (02) 9385 4777

**School of Civil and Environmental Engineering**
Ms Karenne Irvine, Room 406, Civil Engineering Building
Tel: (02) 9385 5061

**School of Computer Science and Engineering**
Student Office, Ground Floor, K17 Building
Tel: (02) 9385 4329 or (02) 9385 4926

**School of Electrical Engineering and Telecommunications**
Ms Gladys Fong, School Office, Electrical Engineering Building
Tel: (02) 9385 4000

School of Mechanical and Manufacturing Engineering
Associate Professor P Mathew, Room 107, Mechanical and Manufacturing Engineering Building
Tel: (02) 9385 4154

School of Mining Engineering
Dr P Hagan, Room 158, Old Main Building
Tel: (02) 9385 4514

School of Petroleum Engineering
Ms Jennifer Lippiatt, Room LG11, Petroleum Engineering Building
Tel: (02) 9385 4144

School of Surveying and Spatial Information Systems
Mr Leon Daras, School Office, Room 426, Electrical Engineering Building
Tel: (02) 9385 4182

Graduate School of Biomedical Engineering
Ms Dorothy Wilmhurst, 5th Floor, Samuels Building
Tel: (02) 9385 3917

Centre for Photovoltaic Engineering
Ms Trichelle Burns, Room LG11, Electrical Engineering Building
Tel: (02) 9385 6155

Important: As changes may be made to information provided in this Handbook, students should frequently consult the official noticeboards of the schools, the University and the Online Handbook at: http://www.handbook.unsw.edu.au.

The Faculty of Engineering Website
Please refer to the Faculty website for further information: www.eng.unsw.edu.au

Entrance Requirements

Students will be considered for admission based on performance in their Australian Year 12 studies and/or tertiary or post-secondary qualifications and/or overseas qualifications equivalent to Australian studies.

General Education Requirements

For a more detailed explanation of the requirements and objectives of General Education and a guide to the choice of specific courses, students should refer to the General Education section in this Handbook or the Online Handbook at www.handbook.unsw.edu.au.

Each Faculty has responsibility for deciding what courses can be counted towards the General Education requirement for their students. The Faculty of Engineering is committed to providing the widest range of choice of general education electives for its students. It strongly encourages students to make the best use of this flexibility. Please contact your School Office for further information on General Education electives available to you.

Re-enrolment Procedures

All current students are able to re-enrol via the web using myUNSW. This means that, in most cases, students will be able to enrol and drop classes without the need to fill in forms or attend their program office.

Further information, including details on how and when to enrol for 2005 using myUNSW will be carried on the enrolled students’ web page: https://my.unsw.edu.au

It is the responsibility of students to enrol in a program consistent with the rules governing re-enrolment and admission to the degree.

Faculty Centres

Centre for Excellence in Advanced Silicon Photovoltaics and Photonics

Director: Scientia Professor Stuart Wenham

In 2003, the Centre of Excellence in Advanced Silicon Photovoltaics and Photonics was established by the Australian Research Council. This new Centre of Excellence was established to coordinate previously independent world-leading programs conducted under the Key Centre for Photovoltaic Engineering, the PV Special Research Centre, and the Special Research Centre for Third Generation Photovoltaics including all collaborating organisations. This re-organisation aims at increasing the coordination, cross-fertilisation and concentration of effort of the previously separate Centres, as well as launching new initiatives in the commercial application of recent contributions to silicon photonics. The proposed program of research for the Centre falls into the following strands:
Professional Institutions

1. Institution of Engineers Australia

The professional body for engineering in Australia is Institution of Engineers Australia, which has as its first objective the promotion of the science and practice of engineering in all its branches. Institution of Engineers Australia has its national headquarters in Canberra and functions through a series of divisions, the local one being the Sydney Division. Within each division are branches representing the main interests within the profession, e.g. civil, mechanical, electrical, engineering management and environmental engineering.

Students of an approved school of engineering may join the Institution as a student member. Student members receive the monthly publications Engineers Australia and Student News and have access to other publications at preferential rates.

Student members are invited to participate in the Excellence Award for Work Experience, the National Young Engineer of the Year Award and to avail themselves of other Engineers Australia services including the Mentor Scheme and industrial experience guidance.

For more information and membership application forms, contact Institution of Engineers Australia, Sydney Division, 1st Floor, 118 Alfred Street, Milsons Point 2061, telephone (02) 8923 7100, website www.ieaust.org.au

2. The Institution of Surveyors, Australia and the Spatial Sciences Institute, Australia

During their undergraduate years, students in the Surveying and Spatial Information Systems program are encouraged to take the first steps in joining in the activities of the professional bodies which represent them: the Institution of Surveyors and the Spatial Sciences Institute. The aims of the bodies are to promote scientific, technical and educational aspects of Surveying and Spatial Information Systems and to maintain high professional standards of practice and conduct. Student members receive the journals of the Instituteur and Azimuth, which is published by the NSW Division of the Institution. Membership also entitles the student to attend all meetings of the Institution and to attend the annual SSI Congress at a special concessional rate. Membership application forms are available at the office of the School of Surveying and Spatial Information Systems and from the Institution Office, Third Floor, Guild House, 363 Pitt Street, Sydney 2000. Websites www.isaust.org.au and www.spatialsciences.org.au

3. The Association of Professional Engineers, Scientists and Managers, Australia

APESMA is a professional organisation that represents the industrial interests of its members with a major focus on providing advice and assistance on employment related matters, including individual representation and improving salaries and conditions for professional engineers, scientists and managers.

Students are invited to become affiliate members (free of charge) of the Association while they are studying. This membership gives students access to information and advice on industrial experience, salary rates for graduates and contracts of employment. Student members receive The Student Update, a publication designed specifically for students, three times a year. This gives students some practical insight into aspects of the workplace to which they may not have given much thought, in particular the employment issues that affect them as professional engineers. More information and student membership application forms can be obtained from APESMA, Level 1, 491 Kent Street, Sydney 2000, telephone: 9263 6500, website www.apesma.asn.au

Program and Course Information

Summary of Programs

Full-time Programs

The Faculty of Engineering offers the following full-time undergraduate programs:

Bachelor of Engineering BE

in:

- Aerospace Engineering 3710
- Bioinformatics 3647
- Chemical Engineering 3040
- Civil Engineering 3620
- Computer Engineering 3645
- Electrical Engineering 3640
- Environmental Engineering 3625
- Industrial Chemistry 3100
- Manufacturing Engineering and Management 3710
- Mechanical Engineering 3710
- Mechatronic Engineering 3710
- Mining Engineering 3140
- Naval Architecture 3710
- Petroleum Engineering 3045
- Photonics Engineering 3644
- Photovoltaics & Solar Energy 3642
- Renewable Energy Engineering 3657
- Software Engineering 3648
- Surveying and Spatial Information Systems 3741
- Telecommunications 3643

Bachelor of Science BSc

Computer Science 3978
Food Science and Technology 3060
Food Science and Technology (Honours) 3065

Bachelor of Science (Technology) BSc(Tech)

Chemical Engineering 3050
Food Science and Technology 3070
Industrial Chemistry 3110

Combined Degree Programs

Full-time programs are available for the award of the following degrees:

Bachelor of Engineering Bachelor of Science BE BSc

(5 years duration) in:

- Aerospace Engineering 3711
- Bioinformatics 3755
- Chemical Engineering 3042
- Civil Engineering 3730
- Computer Engineering 3726
- Electrical Engineering 3725
- Environmental Engineering 3735
- Industrial Chemistry 3102
- Manufacturing Engineering and Management 3711
- Mechanical Engineering 3711
- Mechatronic Engineering 3711
- Mining Engineering 3142
- Naval Architecture 3711
- Photovoltaics and Solar Energy 3655
- Software Engineering 3651
- Surveying and Spatial Information Systems 3746
- Telecommunications 3641

Bachelor of Engineering Bachelor of Arts BE BA

(5 years duration) in:

- Aerospace Engineering 3712
- Bioinformatics 3756
- Chemical Engineering 3043
- Civil Engineering 3621
- Computer Engineering 3722
- Electrical Engineering 3720
- Environmental Engineering 3626
- Industrial Chemistry 3103
- Manufacturing Engineering and Management 3712
- Mechanical Engineering 3712
- Mechatronic Engineering 3712
- Mining Engineering 3144
- Naval Architecture 3712
Students wishing to enrol in this combined degree program should apply for the associated BE program, and will be permitted to enrol in the combined degree if they meet the required entry standard. The required entry standard will be the UAI (or equivalent rank) of either the associated undergraduate Engineering program, or the undergraduate Commerce program, whichever is the greater.

Combined Degree Structure:
- 5.5 years full-time or 5 years for Software Engineering as above.
- Engineering - 168 units of credit.
- Commerce & Economics – 96 units of credit.
- Exempt General Education (12 units of credit)
- Commerce – Commerce program is started in Year 1 or Year 2, including an approved major.
- Honours – Engineering is an Honours program. Commerce Honours requires an additional year.

Please visit the Faculty website for up to date information on this program:

www.eng.unsw.edu.au

### Bachelor of Engineering Bachelor of Laws BE LLB
(6 years duration) in:
- Civil Engineering 4775
- Environmental Engineering 4777

### Bachelor of Engineering Bachelor of Engineering BE BE
(5 years duration) in:
- Civil Engineering and Mining Engineering 3146
- Civil Engineering and Environmental Engineering 3631

### Bachelor of Science Bachelor of Science BSc BSc
(4 years duration) in:
- Computer Science 3983

### Bachelor of Engineering Master of Engineering (BE ME) or Master of Science (BE MSc)

**Admission Guidelines:** An applicant for the BE ME or BE MSc program should, at the time of application, be enrolled in the 4.5 years fast-track Faculty of Engineering BE MEngSc program and have just completed the requirements for the BE component at a minimum of Honours Class 2 or equivalent. Applications to transfer to the ME or MSc degree should be made to the Registrar.

**Period of Candidature for ME/ MSc Degree:** The normal period is three academic sessions (full-time). In special cases, this can be reduced by up to two academic sessions. The maximum period of registration is six academic sessions (full-time). It is expected that such candidates complete the entire BE ME or BE MSc program in 5 years (which includes a Summer Session in their 5th year), and that they would be enrolled on a full-time basis.

**Coursework:** Candidates who have completed the BE component of the BE MEngSc program (and who have hence successfully completed 12 units of credit of postgraduate coursework in their 4th year of study) are considered to have fully satisfied the Faculty of Engineering requirement for ME or MSc coursework.

**Award of ME MSc Degree:** As for the standard research ME or MSc program. That is, the award of the ME or MSc degree is on the basis of a thesis which embodies the result of an investigation, or design, or engineering development.

### Fast-Track Programs

**Bachelor of Engineering Master of Engineering Science BE MEngSc**

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the awards of a Bachelor of Engineering and a Master of Engineering Science in an approved discipline (see below) of the Faculty of Engineering.

The purpose of the program is to offer an accelerated completion of a postgraduate coursework program in engineering to high achieving students. The program will be fully accredited and will provide students with in-depth specialist training to facilitate employment in discipline specific consulting practices and other specialist areas of the profession. The fast-track program structure will thus encourage completion of a first postgraduate coursework program, and lay the groundwork for lifelong learning.

(4 1/2 years duration) in:
- Bioinformatics 3647
- Chemical Engineering 3040
- Civil Engineering 3620
- Computer Engineering 3645
- Environmental Engineering 3625
- Electrical Engineering 3640
- Industrial Chemistry 3100
- Manufacturing Engineering & Management 3710
- Mechanical Engineering 3710
- Mechatronic Engineering 3710
- Mining Engineering 3140
- Photovoltaics and Solar Energy 3642
- Surveying and Spatial Information Systems 3741
- Telecommunications 3643
- Software Engineering 3648

**Fast-Track Programs Bachelor of Engineering Master of Commerce**

These programs are no longer offered to commencing students. Students who enrolled prior to 2004 only are eligible to do these programs. Please contact your School office if you require further information.

### Concurrent Degree Programs

Full-time programs are available for the award of the following degrees:

**Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE**

Students may undertake a five year full-time program leading to the awards of a Bachelor of Engineering (in an approved discipline) and a Master of Biomedical Engineering.

The purpose of a program is to offer accelerated completion of a postgraduate coursework program to high-achieving students. Students are required to maintain a Credit average in the first three years in order to continue enrolment in the postgraduate component of the program.

(5 years duration) in:
- Bioinformatics 3757
- Chemical Engineering 3048
- Computer Engineering 3728
- Electrical Engineering 3727
- Materials Science 3138
- Mechanical Engineering 3683
- Mechatronic Engineering 3688
- Telecommunications 3723
- Software Engineering 3749

### UNSW Co-op Program

The UNSW Co-op Program is a scholarship program set up by industry and the University of New South Wales, which provides money and industry training for selected undergraduate students in disciplines in Commerce, Science and Engineering.

Applicants should have achieved a particular academic standard (UAi 95.7 or equivalent), however, if you are expecting a UAi of at least 93.8, it would still be worth applying. Students are selected as Co-op Scholars largely on the basis of their personal skills, leadership potential and motivation, as well as their non-academic achievements.

Applications close the end of September each year with interviews held at UNSW at the beginning of December. For more details see your School Careers Adviser or contact the UNSW Co-op Program office on (02) 9385 1116 or visit www.co-op.unsw.edu.au

Transfer Programs

Students transferring to UNSW after successful completion of part of an engineering degree program at an Australian university would normally be admitted with advanced standing into the degree programs offered by the Faculty of Engineering.

Students who have completed part of an undergraduate program in one school may apply for a transfer to a program in another school of the Faculty with credit for relevant courses completed. However, as there are significant differences in the various programs, students are not necessarily granted exemption from the same number of courses as they have completed in the program to which the transfer is made. Enrolment quotas apply to undergraduate programs and the number of places available for transfer is limited and offers will be made on a competitive basis.

Transfer Programs

BE in Aerospace Engineering

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four year degree program at any Australasian tertiary institution may be admitted to Years 3 and 4 of the program leading to the Bachelor of Engineering degree in Aerospace Engineering. The proviso is that Head of the School is satisfied that the courses studied at the other institution are equivalent, and he gives his recommendation.

BE in Naval Architecture

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four year degree program at any Australasian tertiary institution may be admitted to Years 3 and 4 of the program leading to the Bachelor of Engineering degree in Naval Architecture. The proviso is that Head of the School is satisfied that the courses studied at the other institution are equivalent, and he gives his recommendation.

Rules for Progression and the Award of Degrees

Access to Exam Information

Students in the Faculty of Engineering may request access to their own final examination scripts and may request consultation with the examiner on their performance provided that a written application is made to the program authority no later than fifteen working days after the date of official release of results.

Bachelor of Engineering Program Rules

1. The Bachelor of Engineering is awarded following the completion of a minimum of 192 units of credit.
2. The specific requirements for the Bachelor of Engineering in the various disciplines are set out in the relevant sections in this Handbook.
3. The degree may be awarded with Honours, based upon the overall performance in the program and in accordance with Faculty and School policies. Honours are awarded in the following classes – Class 1, Class 2 Division 1, Class 2 Division 2.
4. The standard duration of the program is four years, or eight sessions, of full-time study each comprising 24 units of credit. Students may undertake the program over a longer period on the basis of part-time study.
5. Each student is required to complete a minimum of 60 days of approved experience in industry prior to graduation.
6. General Education electives may only be attempted after the student has attempted at least 24 units of credit.

Bachelor of Engineering Master of Engineering Science Program Rules

1. The minimum duration of the program is 4.5 years (including a summer semester at the end of the 4th year) leading to the award of the two degrees Bachelor of Engineering (BE) and Master of Engineering Science (MEngSc).
2. Students must study all courses in the sequence approved by the Faculty of Engineering and are not permitted to enrol in any graduate course until the first six semesters of the program are successfully completed.
3. A minimum average of 65% in the first 3 years of the BE program is required for consideration for entry to the combined degree program.
4. Honours grading for the BE degree will be based on performance in the first 4 years of study, with course weightings in accordance with School guidelines. The 12 units of credit of graduate coursework undertaken in Year 4 are thus counted for both degrees.
5. Normal Student Contributions/fees apply to the first 8 semesters of the program (including the 12 units of credit of MEngSc courses completed in Year 4) consistent with other undergraduate programs within the Faculty. Fees for the remaining 36 units of credit of the MEngSc program will be 75% of the current fee for the standard 48 units of credit MEngSc.

Faculty Rules for Progression

Progression in all undergraduate programs in the Faculty of Engineering is permitted by course. However:
1. Programs will continue to be stated and timetabled by year or stage and it cannot be guaranteed that non-standard programs can be completed in the minimum number of years. Students are not permitted to enrol in courses with clashing timetables.
2. Students must satisfy the relevant prerequisite and corequisite requirements. This will usually necessitate students completing or attempting all courses of a particular year or stage before proceeding to a course in the next part of a program. Further details are available from the School.
3. A prerequisite course is one which must be completed prior to enrolment in the course for which it is prescribed.
4. A corequisite course is one which must either be completed successfully before or be studied concurrently with the course for which it is prescribed.
5. Only in exceptional circumstances will students be allowed to enrol in a program containing courses from more than two consecutive years of the program or totalling more than 27 units of credit. Students repeating courses will be expected to choose a program that includes previously failed courses and limits their units of credit. Details of these limits are available from School offices and may only be exceeded with the express permission of the Head of School. A failed elective may be replaced by another elective.
6. Notwithstanding the above, before students can enrol in any non-standard programs, such program must meet with the approval of the Head of School. A non-standard program is one which involves enrolment in courses from more than one year or stage, or comprises courses which are not normally included in the program for a particular year.

Honours

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Industrial Experience Requirements

All students must complete at least 60 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of
their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

Program Revision
Following any program revision, students whose progression is normal are entitled to complete under the version of the program they applied when they first enrolled. Alternatively, they may transfer to the revised program with credit for all courses completed at the time the revised program is introduced.

School of Chemical Engineering and Industrial Chemistry
Head of School: Associate Professor Michael Brungs  
Administrative Officer: Vivienne Brennan  
Director, Teaching and Learning: Associate Professor Vicki Chen

The School offers a Bachelor of Engineering in both Chemical Engineering and Industrial Chemistry, together with a Bachelor of Science in Food Science and Technology. The duration of these degree programs is four years full-time. Six year part-time programs in Chemical Engineering and Industrial Chemistry are also available, leading to a Bachelor of Science (Technology). The School also offers a Bachelor of Science (Honours) in Food Science and Technology and a 3 year Bachelor of Science (Food Science and Nutrition major) program.

The Bachelor of Engineering degrees are accredited by the Institution of Engineers Australia and the Royal Chemical Institute. The Bachelor of Engineering in Chemical Engineering is also accredited by the Institution of Chemical Engineers (UK). Graduates of both Food Science and Technology programs qualify for membership of the Australian Institute of Food Science and Technology, the US Institute of Food Technologists and may qualify for membership of the Royal Australian Chemical Institute.

Combined degree programs are also available for suitably qualified students. These are the Bachelor of Engineering/Bachelor of Science and the Bachelor of Engineering/Bachelor of Arts. Also available are Bachelor of Science/Bachelor of Commerce and Bachelor of Science/Bachelor of Commerce in Food Science and Technology. A concurrent Bachelor of Engineering/Master of Biomedical Engineering is also available in Chemical Engineering. The School offers a fast-track program over 4.5 years full-time, the Bachelor of Engineering and Master of Engineering Science (BE MEngSc), which allows flexibility of choice between formal coursework and project work and also a 5 year BE ME or MSc (Chem Eng).

Chemical Engineering is the application of the principles of the physical sciences, together with the principles of economics and human relations, to fields in which matter undergoes a change in state, energy content or composition. The chemical engineer is generally responsible for the design, construction and operation of plant and equipment used in the chemical processing industries. Chemical Engineers are employed in a very wide range of industries including the chemical, minerals, pharmaceutical, food and energy industries. Many chemical engineers work in environmental management, research and development business, management and computer applications.

Industrial chemists have a strong foundation in the basic sciences, particularly chemistry, in addition to their engineering skills. Their roles range from solving problems in forefront research areas, to the successful operation of Australia’s manufacturing industry. Industrial Chemists characterise and select raw materials, develop environmentally responsible routes for the production of commodity materials and chemicals, control chemical plant and processes and verify the quality of the product. Industrial chemists are capable of fulfilling a multiplicity of roles as research scientists, development chemists, technical representatives and as plant/company managers.

Food Science and Technology involves an understanding of the basic sciences and the application of this knowledge to food manufacture from the point of production, through handling, processing, preservation, distribution and marketing, up to consumption and utilisation by consumers. It is concerned with food processes, commodities, composition and quality (including sensory properties, safety and nutritional value). The study of Food Science and Technology integrates many scientific disciplines. Its bases are in chemistry, physics, biochemistry, microbiology, and molecular biology. The challenges are to increase the availability, variety, quality and quantity of foods economically and in line with the needs of the world population. The Australian industry has a major role to play in supplying high quality foods to overseas markets and there is a national and international demand for professionally trained people prepared to accept responsibility for the production, quality and safety of this food. The programs provide basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources, and communication and in areas such as dietetics after further training.

For the award of Honours, students need to have distinguished themselves in the formal work, in other assignments as directed by the Head of the School, and in the final year project, for which a thesis is required. It is compulsory that, before completion of the program, students in both the Chemical Engineering and Industrial Chemistry full-time programs must obtain a minimum of twelve weeks professionally oriented or industrial experience. Students in the part-time programs in Chemical Engineering and Industrial Chemistry must complete an approved program of industrial experience of not less than twelve months prior to the award of the degree.

Program Outlines
Students are expected to possess a calculator having exponential capabilities, however, more advanced calculators and personal computers will be found useful. In examinations, students may be required to use calculators supplied by the University, so that no student will have an unfair advantage over another. Further information may be obtained from the Head of School.

Students of both Chemical Engineering and Industrial Chemistry are advised to have a copy of J.H Perry (ed.), Chemical Engineers Handbook (6th Ed.), McGraw-Hill. This book is used extensively for most courses and units. Certain courses and units do not have specified textbooks and in these cases reference books are used or printed notes supplied.

If you are required to completed a varied program of physics or maths in your first year (i.e. General Maths or Fundamentals of Physics), then students are not permitted to undertake studies in higher options of other courses.

3040 Chemical Engineering – Full-time Program
Bachelor of Engineering BE

This program extends over four years and students study full-time during the day for 28 weeks of each year (excluding examination and recess periods).

Successful completion of the BE program is accepted by the Institution of Chemical Engineers, the Institution of Engineers, Australia, and Royal Australian Chemical Institute as sufficient academic qualification for corporate membership.

The Director of Teaching and Learning may approve various program patterns involving full-time or part-time study.

This program can form part of the following combined degree programs: BE (Chem Eng)/BSc, BE (Chem Eng)/BBiomedEd, BE (Chem Eng)/BA and also BE/MEngSc. See below for more details or contact Director, Teaching and Learning.

**Biomedical Electives**

**Preferred electives**

- BIOM9311 Mass Transfer in Medicine - 3 6
- BIOM9321 Physiological Fluid Mechanics - 3 6
- BIOM9332 Biocompatibility - 3 6
- BIOM9613 Medical Instrumentation - 3 6
- BIOM9440 Biomedical Practical Measurement - 3 6

**Other electives**

- BIOM9027 Medical Imaging - 3 6
- BIOM9060 Biomedical Systems Analysis - 3 6
- BIOM9450 Clinical Information Systems - 3 6
- BIOM9601 Biomed Applic of Microcomputers 1 - 3 6
- BIOM9602 Biomed Applic of Microcomputers 2 - 3 6
- BIOM9541 Mechanics of the Human Body - 3 6
- BIOM9621 Biological Signal Analysis - 3 6
- BIOM9551 Biomechanics of Physical Rehabilitation - 3 6
- BIOM9701 Dynamics of Cardiovascular System - 3 6
- ANAT2511 Fundamentals of Anatomy - 6 6

**3040 Chemical Engineering/Master of Engineering Science – Full-time Program – Plan CEICLI3040**

**Bachelor of Engineering Master of Engineering Science BE MEngSc**

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the awards of a Bachelor of Engineering and a Master of Engineering in Chemical Engineering.

Students undertake the first three years (6 semesters) of the BE program in Chemical Engineering. Subject to satisfying a minimum performance over these three years (see ‘Rules for Progression and the Award of Degrees’), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) undertake 12 units of credit of project/thesis work over the Summer (9th) semester; and (c) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

Students need to apply, at the end of Year 3, to the Director of Teaching and Learning for entry into the program. The School of Chemical Engineering and Industrial Chemistry administers the program.

**Stage 1 to Stage 3**

Same as program 3040

**Total Units of Credit: 48 each Stage**

Students may undertake 3040 Bachelor of Engineering Master of Engineering Science BE MEngSc.
### 3060 Food Science and Technology Full-time Program

**Bachelor of Science (Food Science and Technology) BSc**

This program is designed to provide depth and breadth in the relevant physical and biological sciences on which Food Science and Technology is based. It is strongly recommended that students obtain, before the completion of the program and during recess periods, as much professionally oriented or industrial experience as possible. The BSc program in Food Science and Technology (3060) is awarded at Pass or Honours level, determined by academic performance in Stages 2-4.

### 3065 Honours in Food Science Full-time Program

**Bachelor of Science (Honours) BSc(Hons)**

This program is designed to provide extensive research training in some aspects of Food Science and Technology at undergraduate level. The research orientation of the program, compared to the Graduate Diploma, facilitates entry into a research higher degree (MSc/PhD) upon completion of Honours at a satisfactory level.

Entry to the program requires satisfactory completion of a Bachelor degree, or equivalent, in an area considered relevant to Food Science and Technology. Students who have completed a four year Bachelor program, in which Honours has already been awarded, are specifically excluded.

The major component of the program is an extensive research project, conducted throughout one year of full-time study. Candidates also take 6 units of credit of courses within the School, or such other courses as approved by the program coordinator. Honours is awarded on the basis of performance in the research project and satisfactory completion of coursework.

#### Compulsory Courses

</tr>
</thead>
<tbody>
<tr>
<td>FOOD9410</td>
<td>Honours Research Project</td>
<td></td>
</tr>
<tr>
<td>FOODDXXX*</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Courses offered in Food Science and Technology or as approved by the program coordinator and dependent upon the background of the candidate. Units of credit for coursework courses may be concentrated in one session.*

### 3100 Industrial Chemistry – Full-time Program

**Bachelor of Engineering BE**

Industrial Chemistry is a four-year professional (prescribed) program that is concerned with the application of science and technology to the chemical industry.

Successful completion of the program is accepted by the Royal Australian Chemical Institute and the Institution of Engineers, Australia as sufficient academic qualification for full corporate membership.

The Director of Teaching and Learning may approve various program patterns involving full-time and part-time study.

This program can form part of the combined degree programs BE (Ind Chem)/BSc (Comp Sci), BE (Ind Chem)/BA. See below for more details or contact the Director, Teaching and Learning.
### 3102 Industrial Chemistry/Bachelor of Science – Full-time Program

**Bachelor of Engineering Bachelor of Science BE BSc**

This combined program of five years full-time study enables a student in the school to qualify for the award of the two degrees Bachelor of Engineering and Bachelor of Science. The School of Chemical Engineering and Industrial Chemistry administers the program.

Successful completion of the BE in Industrial Chemistry program is accepted by Engineers Australia and the Royal Australian Chemical Institute as sufficient academic qualification for corporate membership.

### 3100 Industrial Chemistry/Master of Engineering Science – Full-time Program – Plan CEIC11300

**Bachelor of Engineering Master of Engineering Science BE MEngSc**

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the awards of a Bachelor of Engineering and a Master of Engineering in Industrial Chemistry.

Students undertake the first three years (6 semesters) of the BE program in Industrial Chemistry. Subject to satisfying a minimum performance over these three years (see ‘Rules for Progression and the Award of Degrees’), they (a) substitute 12 units of credit of the standard 4-year BE degree program with a School approved 12 units of credit of graduate coursework in the 10th semester (first half of their 5th year); (b) undertake 12 units of credit of project/thesis work over the summer (9th) semester; and (c) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

### 3102 Industrial Chemistry/Bachelor of Science – Full-time Program

**Bachelor of Engineering Bachelor of Science BE BSc**

This combined program of five years full-time study enables a student in the school to qualify for the award of the two degrees Bachelor of Engineering and Bachelor of Science. The School of Chemical Engineering and Industrial Chemistry administers the program.

Successful completion of the BE in Industrial Chemistry program is accepted by Engineers Australia and the Royal Australian Chemical Institute as sufficient academic qualification for corporate membership.

**30103 Industrial Chemistry/Bachelor of Arts – Full-time Program**

**Bachelor of Engineering Bachelor of Arts BE BA**

These combined programs of five years full-time study enable students in the School to qualify for the award of the degrees of Bachelor of Engineering and Bachelor of Arts. With these programs students can add their choice of an Arts major to the standard professionally accredited Chemical Engineering or Industrial Chemistry program. It provides flexibility in course choice within the full Arts program and enables students to obtain the broader education offered by the Arts and Social Sciences. Since Engineering and Arts programs can have a common content, such as mathematics and physics, approximately two additional sessions of study are required to gain the additional qualifications of Bachelor of Arts. In general, this additional study is taken concurrently with the BE program and both can be completed within 10 sessions.

The programs are open to all students who satisfy both the Chemical Engineering/Industrial Chemistry and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a Credit or higher average or permission from the Head of School.

The BE BA programs are administered by the School of Chemical Engineering and Industrial Chemistry. The School requires the student to obtain the approval of the Faculty of Arts and Social Sciences for the BA components of their program. The School of Chemical Engineering and Industrial Chemistry must approve the final program timetable.

1. Students must complete 60 units of credit in the BA program with no more than 24 units of credit obtained at Level 1 (i.e. courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school of department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - European Studies
   - Environmental Studies*
   - French
   - German Studies
   - Modern Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Film and Theatre
   - Music
   - Political Economy
   - Philosophy
   - Policy Studies
   - Politics and International Relations
   - Russian Studies
   - Sociology & Anthropology
   - Spanish & Latin American Studies
   - Women's and Gender Studies

* Students completing an Environmental Studies major sequence must complete, in addition to the 10 Upper-Level units of credit specified, a Level 1 units of credit in an approved course. Students must also complete a minor sequence of 24 units of credit in one of the other areas listed above.

3. Except for courses completed as part of the Environmental Studies major sequence, no more than 12 units of credit may be obtained from courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE programs can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of the program 3040 BE or in Chemical Engineering, or 3100 BE in Industrial Chemistry except that they are exempt from the General Education requirement of the BE BSc program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE BA program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of an Honours year. It should be noted that entry into a particular BA Honours program will require completion of courses additional to those specified under rules 1–4.

8. The total units of credit in the combined program is 5 x 48 = 240.

**Part-time programs**

**3070 Food Science and Technology Part-time Program**

**Bachelor of Science (Technology) BSc(Tech)**

This program is designed for students who are employed in the food processing industries. It extends over six part-time years of study, and leads to the award of the degree of Bachelor of Science (Technology). Students are required to complete an approved program of industrial training of not less than twelve months prior to the award of the degree. Industrial training should normally be undertaken concurrently with attendance in the program, but with the approval of the program coordinator may be completed after completion of the prescribed program of study.

The program covers the same subject matter as the first three years of the full-time program (3060). For the first two years, students follow a common program in which general biology is taken and thereafter specialise in the biological sciences, which are fundamental to the study of Food Science and Technology. The courses of Stages 4, 5 and 6 may be available only in day-time classes and substantial day-time release from industry may be required. Students who have completed the requirements of this program and have qualified for the award of the degree of Bachelor of Science (Technology) may proceed to the award of the degree of Bachelor of Science by attending for one full-time year and completing the courses listed in Year 4 of the full-time program (3060). Students desiring to proceed to the award of a BSc degree must apply to the Program Coordinator not later than 31 December of the year in which the sixth stage is completed.

3050 Chemical Engineering and 3110 Industrial Chemistry – Part-time Programs

Bachelor of Science (Technology) BSc(Tech)
Six year part-time programs leading to the award of the degree of Bachelor of Science (Technology) in Chemical Engineering or Industrial Chemistry are intended for students who are employed in relevant industries and who wish to prepare for a degree mainly by part-time attendance. They consist of the first 3 years of the respective full-time program, but undertaken over a six year period.

As part of the requirements for the award of the BSc(Tech) degree, students are required to complete an approved program of industrial training of not less than one year prior to the award of the degree. Industrial training should normally be completed concurrently with attendance in the part-time program, but with the approval of the Head of School, may be completed after completion of the prescribed program of study.

Students who qualify for the award of the BSc(Tech) degree and who wish to proceed to the award of a BSc or BE degree will normally be required to complete further work which will involve at least one year of full-time attendance.

Holders of the degree of BSc(Tech) or BSc(Eng) will be eligible to proceed to the award of the degree of Master of Science or Master of Engineering, please refer to course regulations relating to these degrees.

Transfer is also possible from full-time programs to the part-time BSc Tech program, but a period of approved industrial experience must be gained before graduation. This requirement will apply to students transferring from BSc and BE degree programs within the Faculty.

Further details of part-time programs can be obtained from the Director of Teaching and Learning.

School of Civil and Environmental Engineering

Head of School: Professor RI Gilbert
Senior Administrative Officer: Ms KM Irvine
Executive Assistant: Vacant

The School undertakes teaching and research in the specialist disciplines of engineering construction and management, geotechnical engineering, structural engineering, transport engineering, water engineering and environmental engineering. The School comprises specialist staff with a broad spectrum of expertise across the disciplines of Civil and Environmental Engineering.

The Centre for Water and Waste Technology is located within the School. In addition to extensive laboratory facilities on the Kensington campus, the School operates the Heavy Structures Laboratory at Govett Street, Randwick, and the Water Research Laboratory at King Street, Manly Vale. The latter complex houses the School’s Water Reference Library. The School offers programs 3620 and 3625 leading to the award of degrees of Bachelor of Engineering in Civil Engineering (BE) and Bachelor of Engineering in Environmental Engineering (BE), at Pass or Honours level. In the Civil Engineering program, students may elect to major in structural engineering, geotechnical engineering, transport engineering, water engineering or engineering construction and management. These programs can be taken on a four year full-time basis, on a part-time basis or on a combined full-time/part-time basis subject to the approval of the Head of School. Intending part-time students are advised that all courses are offered only in the day-time. Part-time students will normally take two years for each equivalent full-time year. Alternatively, the programs may be taken in a sandwich form in which a student, after completing the first year of the program on a full-time basis, gains industrial experience during one or more periods of employment by taking leave of absence for an entire academic year.

The School also offers a range of combined degree programs which combine the Bachelor of Engineering degrees in Civil or Environmental Engineering with a range of other undergraduate degree programs and postgraduate degrees in engineering and other disciplines. These combined degree programs provide students with the opportunity to broaden their education and to complete two degrees with a significant saving in time. The combined degree programs include:

• Five year full-time programs 3146 leading to the award of the degrees of Bachelor of Engineering in Civil Engineering and Bachelor of Engineering in Mining Engineering (BE BE), and 3631 leading to the degrees of Bachelor of Engineering in Civil Engineering and Bachelor of Engineering in Environmental Engineering (BE BE).
• Five year full-time programs 3730 and 3735 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, and Bachelor of Science (BE BSc).
• Five year full-time programs 3621 and 3626 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, and Bachelor of Arts (BE BA).
• Four and one half year full-time programs 3620 and 3625 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, with 8612 Master of Engineering Science.
• Six year full-time programs 4775 and 4777 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, and Bachelor of Laws (BE LLB).

The broad objective of the School’s undergraduate programs is to develop well-educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers. The desired skills are those that enable graduates to be problem solvers; critical thinkers; life long learners; good communicators; team players; independent investigators; effective managers; self-motivated; and economically, environmentally and socially aware.

It is intended that these attributes are developed in students at the same time that they gain knowledge in a broad range of disciplines. In addition, an objective of the programs is to provide the skills and knowledge in a social context. Integrating courses in each year of each program (the Engineering Practice courses) have been introduced to achieve this objective.

Honours
Honours is awarded to students who have achieved above average results and who undertake an Honours thesis in their final year. A weighted average is calculated for each student. A different weighting factor for each year of the program is applied to the marks in each course by units of credit as follows:

• Year 1 x 1
• General Education x 2
• Year 2 x 2
• Year 3 x 4
• Year 4 x 5

Although Industrial training is now part of course CVEN4126 it is assigned a further nominal value of 3 units of credit in Year 4 in the Honours calculation. For combined degree programs, only the marks obtained in
the standard Civil or Environmental Engineering courses are used in the calculation. A weighted average mark in the range of 65–69 will result in a recommendation for Honours 2/2. A weighted average mark in the range of 70–74 will result in a recommendation for Honours 2/1. A weighted average mark of 75 and above will result in a recommendation for Honours 1.

Recognition
Both the BE in Civil Engineering and the BE in Environmental Engineering are fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

Industrial Experience
Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least 60 days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study.

Computing Requirements
Information regarding recommended computing equipment for the programs offered by the School is available on the website www.civeng.unsw.edu.au/currentstudents/general/computing/

Program Outlines
3620 Civil Engineering – Full-time Program – Plan CVENA13620
Civil Engineering offers opportunities to become involved in projects that enhance the overall quality of life. Civil engineers design, construct, manage, operate and maintain the infrastructure that supports modern society including buildings, bridges, roads and highways, tunnels, airfields, dams, ports and harbours, railways, new mines, water supply and sewerage schemes, irrigation systems and flood mitigation works. The profession is very broad and affords opportunities for involvement in many specialist activities.

**Year 4 – Session 2**

All students not undertaking the Honours thesis are required to select two majors. Students undertaking the Honours thesis are required to undertake one major plus at least 8 units of credit of electives taken from one other discipline area. To complete a major, all three 4 units of credit elective courses (listed for each discipline below) must be undertaken.

The School offers a range of specialist plans in the Civil Engineering program, which are available to high achieving students. Basically students complete most of the requirements of the standard plan CVEN13620 with specialist replacements for some courses in Years 2, 3 and especially Year 4 of the program. Students achieving a School weighted average mark of less than 65 (calculated from all courses in Years 1 to 3 of the BE program) are ineligible to continue in the plan and must transfer into and complete the standard Year 4 of the academic plan CVENA13620.

**CVENJS3620 Civil and Structural Engineering Plan**

**Year 2**
replace CVEN2022 with CVEN2032 Civil/Structural Engg Practice 2

**Year 3**
replace CVEN3023 with CVEN3032 Civil/Structural Engg Practice 3A
replace CVEN3024 with CVEN3033 Civil/Structural Engg Practice 3B

**Year 4**
replace CVEN4526 with CVEN4324 Structural Engineering Case Study
CVEN4339, CVEN4349 and CVEN4359 are compulsory

**CVENKS3620 Civil and Geotechnical Engineering Plan**

**Year 2**
replace CVEN2022 with CVEN2062 Civil/Geotechnical Engg Practice 2

**Year 3**
replace CVEN3023 with CVEN3062 Civil/Geotechnical Engg Practice 3A
replace CVEN3024 with CVEN3063 Civil/Geotechnical Engg Practice 3B

**Year 4**
replace CVEN4526 with CVEN4226 Engineering Geology and Geotechnical Models
CVEN4279, CVEN4289 and CVEN4289 are compulsory

replace CVEN3438 with CVEN3127 Management of Projects

**Year 4**
replace CVEN4526 with CVEN4127 Planning and Control of Projects
CVEN4139, CVEN4149 and CVEN4159 are compulsory

**CVENNS3620 Civil, Water and Coastal Engineering Plan**

**Year 2**
replace CVEN2022 with CVEN2052 Civil/Water Engg Practice 2

**Year 3**
replace CVEN3023 with CVEN3052 Civil/Water Engineering Practice 3A
replace CVEN3024 with CVEN3053 Civil/Water Engineering Practice 3B
replace CVEN3125 with CVEN3528 Sustainable Catchment and Coastal Systems

**Year 4**
replace CVEN4126 with CVEN4533 Transport and Fate of Pollutants
CVEN4539, CVEN4549 and CVEN4559 are compulsory

### 3625 Environmental Engineering – Full-time Program – Plan CVENB13625

Environmental engineers are concerned with the environmental impact of engineering activities. They apply their broad knowledge of engineering and environmental processes in identifying environmental problems and in developing effective solutions to them. They also coordinate the activities of specialist groups such as biologists, ecologists and geologists within major projects. The discipline of environmental engineering embraces parts of civil engineering, with emphasis on management, systems design, water, geotechnical and transport engineering, together with aspects of chemical engineering, applied and biological sciences and environmental studies.

Year 3

- replace CEIC0050 with CVEN3528 Sustainable Catchment and Coastal Systems
- replace CVEN3723 with CVEN3753 Environmental/Water Engg Practice 3A
- replace CVEN3724 with CVEN3754 Environmental/Water Engg Practice 3B

Year 4

- replace CVEN4126 with CVEN4528 Surf, Water and Groundwater Environments
- CVEN4539, CVEN4549 and CVEN4569 are compulsory

Combined Programs

3621 Civil Engineering/Bachelor of Arts – Full-time Program – CVENA13621 and Arts Plan

Bachelor of Engineering Bachelor of Arts BE BA

3626 Environmental Engineering/Bachelor of Arts – Full-time Program – CVENB13626 and Arts Plan

Bachelor of Engineering Bachelor of Arts BE BA

With these combined degree programs, students can add their choice of an Arts program to the standard, professionally accredited Civil Engineering (3621) or Environmental Engineering (3626) programs offered by the School of Civil and Environmental Engineering. They provide flexibility in the choice of courses within the full Arts program and enable students to gain a broad education in Arts and Social Sciences, as well as specialised studies in Civil Engineering or Environmental Engineering.

Eligibility

The program is open to all students who satisfy either the Civil Engineering (3620) or Environmental Engineering (3625) and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a Credit or higher average or the permission of the Head of School. Transfer after the second year may result in students taking more than minimum time to complete the combined program.

Organisation

The BE BA program is administered by the School of Civil and Environmental Engineering. The School will consult with the Faculty of
Students should start discussing their program with representatives of the School and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Arts program that they wish to undertake. The Arts and Social Sciences section in this Handbook describes the options. There are no special rules on what courses should be included in each year. Students should schedule the Arts and Engineering components to suit their preferences, while meeting the constraints of timetables and prerequisites.

Rules

1. Students must complete 60 units of credit in the BA program, with no more than 24 units of credit obtained at Level 1 (i.e. in courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school or department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - European Studies
   - French
   - German Studies
   - Modern Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Film and Theatre
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology and Anthropology
   - Spanish & Latin American Studies
   - Women’s and Gender Studies

3. Except for courses completed as part of the Environmental Studies or major sequence, no more than 12 units of credit may be obtained from courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE program can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of program 3620 BE in Civil Engineering or program 3625 in Environmental Engineering except that they are exempt from the General Education requirements of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA program have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of Honours year. It should be noted that entry into a particular BA Honours program might require completion of courses additional to those specified under Rules 1–4.

8. The total units of credit in the program is 5 x 48 = 240.

3730 Civil Engineering/Bachelor of Science – Full-time Program – CVENA13730 and Science Plan

Bachelor of Engineering Bachelor of Science BE BSc

Students may seek to undertake a five-year full-time combined program leading to the award of the degrees of Bachelor of Engineering in Civil Engineering and Bachelor of Science (BE BSc). The School of Civil and Environmental Engineering administer the program. Students should seek advice from the School Office.

With the combined degree program, students can add their choice of a Science, Mathematics or Computer Science program to the standard, professionally-accredited Civil Engineering program offered by the School of Civil and Environmental Engineering. The School of Civil and Environmental Engineering is the academic unit responsible for the program. The School will consult with the Faculty of Science in approving the BSc component of the program.

Students must satisfy admission requirements for both the BE in Civil Engineering and BSc programs or may transfer from the BE in Civil Engineering program after completion of at least one year, if they have a Credit or higher average or the permission of the Head of the School of Civil and Environmental Engineering.

Course credits can accrue simultaneously for both component degrees where there is an overlap of courses from the Civil Engineering program and Science program.

Rules

1. The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Engineering and Bachelor of Science (BE BSc).

2. The five years of the program include at least 108 units of credit in the Science program (3970) and a minimum of 240 units of credit in total.

3. The 108 Science program units of credit must include a minimum of 36 and a maximum of 48 Level 1 units of credit and all courses prescribed in a specific program as outlined in the Science section in this Handbook must be completed. A major sequence (42 units of credit of Level 2 and 3 courses with at least 18 units of credit of Level 3 courses) in a Science discipline is also a requirement of the Science program.

4. Students must satisfy the normal prerequisites for entry to the Bachelor of Science program and to individual courses therein. Also, students must satisfy the normal prerequisites for entry to Civil Engineering and to individual courses therein.

5. Students desiring to enrol in the BSc degree course at Honours level are not able to complete the program in five years and must obtain approval from the School of Civil and Environmental Engineering and the Faculty of Science for their programs. With the approval of the relevant school and of the Head of the School of Civil and Environmental Engineering, a student may follow a standard Honours program in the Science program which can be completed by an additional year of study.

6. The degrees of Bachelor of Engineering and Bachelor of Science are not awarded until the completion of the full five year program.

7. Students contemplating enrolling in this program should consult fully with the Faculty of Science and with the School of Civil and Environmental Engineering before enrolment.

8. There will be a testamur for each degree in the combined program.

9. Students must complete the full requirements of the BE in Civil Engineering (code 3620) except that:
   a) CVEN3023 and CVEN3024 are exempted;
   b) The General Education requirement is exempted; and
   c) A final year Engineering major (12 units of credit) is exempted.

10. Group A and Group B courses listed in Rule 12 below will count towards satisfying requirements of both rules 2 and 9 above. The courses in Group B may not satisfy requirements for progression within science programs.

11. Students may apply for exemption from the requirements of Rule 9 for the courses listed in Rule 12 below in Group B on the basis of courses/requirements in parentheses.

12. Exemptions will be granted for the courses in Group C below with respect to Rule 9 on the basis of the requirements within parentheses.

Group A

MATH1131 or MATH1141, MATH1231 or MATH1241, CHEM1011 or CHEM1031, PHYS1279

Group B

PHYS1279 (PHYS1121), CHEM1011 (CHEM1021), MATH2019 (at least 12 units of credit of non-statistics Level II Mathematics), CVEN2025 (at least 3 units of credit of Level II Statistics).

Group C

CVEN3025 (at least 3 units of credit of Level III Applied Mathematics).

13. Students wishing to major in Physics must consult with the School of Physics in regard to choice of courses.
14. A typical structure of a combined Engineering/Science program is set out below. Subject to timetable restrictions, the full range of Science programs is available to Civil Engineering students.

Year 1
All the Year 1 courses in the Civil Engineering program.

Year 2
The Year 2 courses in the Civil Engineering program except that 12 units of credit of Science courses are substituted for CVEN2222, CVEN2022 and General Education.

Year 3
Science courses to total at least 36 units of credit and CVEN2222, CVEN2022, CVEN3025, CVEN3125

Year 4
Science courses to total at least 18 units of credit and CVEN3126, CVEN3222, CVEN3223, CVEN3322, CVEN3324, CVEN3438, CVEN3448, CVEN3526, CVEN3527.

Year 5
Science courses to total at least 6 units of credit in S1 in lieu of one of CVEN4027, CVEN4028 or CVEN4029 and Science courses to total at least 12 units of credit in S2 in lieu of one civil engineering major (12 units of credit). Otherwise standard Year 4 program in Civil Engineering.

The degrees of Bachelor of Engineering and Bachelor of Science may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class 1 and Class 2 in two divisions. The award and grade of Honours in the BE are made in recognition of superior performance throughout the program with a greater weighting on courses in the later years. The BSc can be awarded Honours on the successful completion of an Honours year. It should be noted that entry into a particular Honours program might require completion of additional courses.

15. The total units of credit in the program is $5 \times 48 = 240$

3735 Environmental Engineering/Bachelor of Science – Full-time Program – CVENB13735 and Science Plan

Bachelor of Engineering Bachelor of Science BE BSc

Students may seek to undertake a five year full-time combined program leading to the award of the degree of Bachelor of Engineering in Environmental Engineering and Bachelor of Science (BE BSc). The School of Civil and Environmental Engineering administers the program. Students should seek advice from the School Office.

With the combined degree program, students can add their choice of a Science, Mathematics or Computer Science program to the standard, professionally accredited Environmental Engineering program offered by the School of Civil and Environmental Engineering.

The School of Civil and Environmental Engineering is the academic unit responsible for the program. The School will consult with the Faculty of Science in approving the BSc component of the program.

Students must satisfy admission requirements for both the BE in Environmental Engineering and BSc programs or may transfer from the BE in Environmental Engineering program after completion of at least one year if they have a Credit or higher average or the permission of the Head of School of Civil and Environmental Engineering.

Course credits can accrue simultaneously for both component degrees where there is an overlap of courses from the Environmental Engineering program and Science and Mathematics programs.

Rules

1. The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Engineering and Bachelor of Science (BE BSc).
2. The five years of the program include at least 108 units of credit in the Science program (3970) and a minimum of 240 units of credit in total.
3. The 108 Science program units of credit must include a minimum of 36 and a maximum of 48 Level 1 units of credit and all courses prescribed in a specific program as outlined in the Science section in this Handbook must be completed.
4. Students must satisfy the normal prerequisites for entry to Bachelor of Science Program and to individual courses therein. Also, students must satisfy the normal prerequisites for entry to Environmental Engineering and to individual courses therein.

5. Students desiring to enrol in the BSc degree program at Honours level are not able to complete the program in five years and must obtain approval from the School of Civil and Environmental Engineering and the Faculty of Science for their programs. With the approval of the relevant school and of the Head of the School of Civil and Environmental Engineering, a student may follow a standard Honours program in the Science program which can be completed by an additional year of study.
6. The degrees of Bachelors of Engineering and Bachelor of Science are not awarded until the completion of the full five year program.
7. Students contemplating enrolling in this program should consult fully with the Faculty of Science and with the School of Civil and Environmental Engineering before enrolment.
8. There will be a testamur for each degree in the combined program.
9. Students must complete the full requirements of the BE in Environmental Engineering (code 3625) except that:
   a) CVEN3723 and CVEN3724 are exempted;
   b) The General Education requirement is exempted;
   c) A final year engineering major (12 units of credit) is exempted; and
   d) Final year Engineering electives are to be selected from the Geotechnical, Transport, Water and Chemical Engineering majors.
10. Group A and Group B courses below will count towards satisfying requirements of both rules 2 and 9 above. The courses in Group B may not satisfy requirements for progression within Science programs.
11. Students may apply for exemption from the requirements of Rule 9 for the courses listed in Rule 12 below Group B on the basis of courses/requirements in parentheses.
12. Exemptions will be granted for the courses in Group C below with respect to Rule 9 on the basis of the requirements within parentheses.

Group A
CHEM1011, CHEM1031, MATH1131 or MATH1141, MATH1231 or MATH1241, BIOS1101

Group B
CVEN1531 (CHEM1021), MATH2019 (at least 12 units of credit of non-statistics Level II Mathematics), CVEN2025 (at least 3 units of credit of Level II Statistics), GEOIS1711 (GEOIS1721), BIOS3301 (BIOS3111).

Group C
CVEN3025 (at least 3 units of credit of Level III Applied Mathematics).

13. Students wishing to major in Physics must consult with the School of Physics and the School of Civil & Environmental Engineering in regard to choice of courses.
14. A typical structure of a combined Engineering/Science program is set out below. Subject to timetable restrictions, the full range of Science programs is available to Environmental Engineering students.

Year 1
All the Year 1 courses in the Environmental Engineering course

Year 2
The Year 2 courses in the Environmental Engineering program, except that 12 units of credit of Science courses are substituted for CVEN2222, CVEN2722 and General Education.

Year 3
Science courses to total at least 36 units of credit and CVEN2222, CVEN2722, CVEN3025, CVEN3126.

Year 4
Science courses to total at least 24 units of credit and BIOS3301, CEC0050, CVEN3222, CVEN3223, CVEN3526, CVEN3527, CVEN3531 and CVEN 3726.

Year 5
Science courses to total at least 12 units of credit in S2 in lieu of one environmental engineering major (12 units of credit) and CVEN3438 and CVEN3725 in lieu of one of CVEN4727, CVEN4728 or CVEN4729 in S1. Otherwise the standard Year 4 program in Environmental Engineering.

The degrees of Bachelor of Engineering and Bachelor of Science may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class 1 and Class 2 in two divisions. The award and grade of Honours in the BE are made in recognition of superior performance
3631 Civil Engineering/Environmental Engineering – Full-time Program – Plans CVENAD3631 and CVENBD3631

Bachelor of Engineering Bachelor of Engineering BE BE

This program provides students with professional qualifications in areas of great importance to the community and will be attractive to students who have in mind a career involving environmental issues and infrastructure development. The School of Civil and Environmental Engineering administers the program.

Rules
1. Students must satisfy the normal program and course prerequisites for Environmental Engineering and Civil Engineering.
2. Program Outline

Year 1
Standard Year 1 of program 3620

Year 2
CHEM1021 Fundamentals of Chemistry B 6
CVEN2023 Mechanics of Solids 3
CVEN2025 Engineering Computations 1 3
CVEN2026 Engineering Materials 2 3
CVEN2126 Engineering Construction 1 3
CVEN2322 Structural Engineering 1 6
CVEN2525 Introduction to Water Engineering 3
GMA0442 Surveying for Civil Engineers 3
GMAT0491 Surveying Camp 3
GEO5171 Planet Earth: Environment in Crisis 3
MATH2019 Engineering Mathematics 2CE 6
General Education 6

Total units of credit 48

Year 3
BIO51301 Evolutionary and Functional Biology 6
CEEC0010 Mass Transfer & Materials Balance 3
CVEN2022 Geotechnical Engineering 1 3
CVEN2022 Civil Engineering Practice 2 or CVEN2722 Environmental Engineering Practice 2 3
CVEN2125 Systems Engineering 3
CVEN3322 Structural Engineering 2 6
CVEN3324 Structural Engineering 3 3
CVEN3438 Transport Planning & Environment 3
CVEN3448 Transport Engineering 3
CVEN3526 Water Resources Engineering 3
CVEN3527 Water Engineering 3
CVEN3726 Environmental Policy, Law & Economics 3
GMA0753 Introduction to Spatial Information Systems 3
INDE4120 Chemistry of the Industrial Environment 3

Total units of credit 48

Year 4
BIO53301 Population & Community Ecology for Environmental Engineers 3
CEEC0050 Atmospheric & Process Chemistry 3
CVEN3023 Civil Engineering Practice 3A or CVEN3723 Environmental Engineering Practice 3A 3
CVEN3024 Civil Engineering Practice 3B or CVEN3024 Environmental Engineering Practice 3B 3
CVEN3025 Engineering Computations 2 3
CVEN3125 Engineering Construction 2 3
CVEN3126 Engineering Management 1 3
CVEN3223 Geotechnical Engineering 3 3
CVEN3531 Principles & Applications of Aquatic Chemistry 3
CVEN3725 Waste Management 3
CVEN4323 Structural Engineering 4 3
6 Units of Credit Geography Elective 6
General Education 6

Total units of credit 48

Year 5 – Session 1
Students achieving a School weighted average mark exceeding 62 (calculated from all courses in Years 1 to 4 of the BE program) are eligible to undertake an Honours thesis in Year 4 (CVEN4000 in S1 and CVEN4001 in S2).

CVEN4126 Engineering Management 2 3
CVEN4225 Geotechnical Engineering 4 3
CVEN4526 Water & Wastewater Treatment 3
CVEN4533 Transport & Fate of Pollutants 3

Plus two of the following electives
CVEN4000 Honours Thesis – Part A 6
CVEN4027 Civil Engineering Practice 4A 6
CVEN4028 Civil Engineering Practice 4B 6
CVEN4029 Civil Engineering Practice 4C 6
CVEN4727 Environmental Engineering Practice 4A 6
CVEN4728 Environmental Engineering Practice 4B 6
CVEN4729 Environmental Engineering Practice 4C 6

Total HPW Session 1 20
Total units of credit 24

Year 5 – Session 2
All students not undertaking the Honours thesis are required to select two majors. Students undertaking the Honours thesis are required to undertake one major plus at least 4 units of credit of electives taken from one other discipline area. To complete a major, all three 4 units of credit elective subjects (listed for each discipline below) must be undertaken.

CVEN4001 Honours Thesis Part B 4

Construction and Management Major
CVEN4139 Advanced Construction & Project Management 4
CVEN4149 Professional Level Project Management Tools & Skills 4
CVEN4159 Advanced Construction Technology & Engineering 4

Geotechnical Major
Any 3 of the following 4 courses:
CVEN4269 Environmental Geomechanics 4
CVEN4279 Rock and Slope Engineering 4
CVEN4289 Site Investigation and Dam Engg 4
CVEN4299 Advanced Topics in Geotechnical Engg 4

Structures Major
CVEN4339 Design of Bridges 4
CVEN4349 Special Topics in Concrete, Steel & Composite Structures 4
CVEN4359 Structural Analysis & Finite Elements 4

Transport Major
CVEN4449 Transport Operations & Systems Design 4
CVEN4449 Traffic Management & Control 4
CVEN4459 Transport & Environment 4

Water Major
Any 3 of the following 4 courses:
CVEN4539 Advanced Water Quality & Treatment 4
CVEN4549 Advanced Catchment & Coastal Processes 4
CVEN4559 Advanced Water Engineering 4
CVEN4569 Advanced Environmental Systems 4

Total units of credit 24

Please note that each major strand is divided into at least three units each of 4 units of credit. A major consists of undertaking 12 units of credit in a given strand. Students may also take elective components of 4 units of credit each offered from different strands.

3. The degrees of Bachelor of Engineering may be conferred as Pass or Honours degrees. There are two classes of Honours, Class 1, and Class 2, in two divisions. The award and grade of Honours are made in recognition of superior performance throughout the program with greater weighting on courses in the later years. The course can lead to the award of the University Medal in either Civil or Environmental Engineering.
4. There will be a testamur for each degree in the combined program.
5. Students must satisfy admission requirements for both the BE in Civil and Environmental Engineering for direct admission or may transfer from either the Civil or the Environmental BE program after completion of the first year with a weighted average mark of 65 or greater or with the permission of the Head of School of Civil and Environmental Engineering.
6. The total units of credit in the program is $5 \times 48 = 240$.

**3146 Civil Engineering/Mining Engineering – Full-time Program – Plans CVENAD3146 and MINEFD3146**

Bachelor of Engineering Bachelor of Engineering BE BE

Students enrol in the Bachelor of Engineering in Civil Engineering (program 3620) which is administered by the School of Civil and Environmental Engineering. The first three years of the combined degree program are therefore identical to program 3620. After completing 6 sessions of this program, students may apply to enter the Bachelor of Engineering in Mining Engineering (3146), which is administered by the School of Mining Engineering, and aim to complete the mining requirements in four additional sessions. Students considering this option should discuss the above arrangements with the relevant program authorities.

**4775 Civil Engineering/Law – Full-time Program – CVENA14775 and Laws Plan**

Bachelor of Engineering Bachelor of Laws BE LLB

This program provides students with professional qualifications in areas of very great importance to the community. The program is attractive to students who have in mind a career involving construction or general engineering and the law. Most large developments raise a formidable range of legal issues and there is a need for highly qualified personnel who are able to understand both the engineering and the legal dimensions of development, both in Australia and overseas.

The Faculty of Law administers this program. For full details, see the entry under the Faculty of Law in this Handbook.

**4777 Environmental Engineering/Law – Full-time Program – CVENB14777 and Laws Plan**

Bachelor of Engineering Bachelor of Laws BE LLB

This program provides students with professional qualifications in areas of very great importance to the community. The program is attractive to students who have in mind a career involving environmental issues, engineering and the law. Most large developments raise a formidable range of legal issues, and there is a need for highly qualified personnel who are able to understand both the engineering and the legal dimensions of development, both in Australia and overseas.

The Faculty of Law administers this program. For full details, see the entry under the Faculty of Law in this Handbook.

**Fast-Track Programs**

**3620 Civil Engineering/Master of Engineering Science – Full-time Program – Plan CVENG13620**

Bachelor of Engineering Master of Engineering Science BE MEngSc

**3625 Environmental Engineering/Master of Engineering Science – Full-time Program – Plan CVENH13625**

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 year full-time fast-track program leading to the awards of either Bachelor of Engineering in Civil Engineering or Environmental Engineering and Master of Engineering Science.

Program of Study

Students undertake the first three years of the standard BE program in either Civil or Environmental Engineering, Subject to satisfying a minimum performance over these three years they (a) complete standard S1 program of Year 4 without Honours thesis (b) substitute 12 units of credit of the standard Year 4 BE degree program with a School approved 12 units of credit of graduate coursework in their Year 4; (c) undertake a 12 units of credit of project/thesis work over the Summer 9th Semester; and (d) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year) in the following areas:

It may not be possible to complete a specialisation in all sub disciplines in this fast-track mode, but courses are available.

**School of Computer Science and Engineering**

**Head of School:** Professor PJ Compton
**Associate Head of School:** Associate Professor WH Wilson
**Student Office Manager:** Miss CJ Nock
**Undergraduate Coordinator:** Ms R Bautarua
**Undergraduate Program Directors:** Dr A Mahidadia (Computer Engineering)
Associate Professor S Parameswaran (Computer Engineering)
Associate Professor K Robinson (Software Engineering)
Associate Professor A Hoffmann (Computer Science)
Dr TD Lambert (Computer Science & Computer Science Honours)
Dr B Gaeta (Bioinformatics)

The School of Computer Science and Engineering and the School of Electrical Engineering and Telecommunications have joint responsibility for the curriculum of the Computer Engineering program.

The staff of the School of Computer Science and Engineering is grouped into research groups of Architecture, Artificial Intelligence, Computer Networks, Computer Systems, Database and Software Engineering. Courses in these areas are offered to students taking major studies in Computer Science or Computer Engineering, while introductory-level computing courses are available more generally to students studying Science, Arts or Engineering. Computer Science has links with discrete mathematics, which furnishes the theory behind the algorithms that computer software implements, and electrical engineering, which supplies the present technology underlying physical computing devices.

The School of Computer Science and Engineering, together with the School of Electrical Engineering and Telecommunications, jointly administers the BE Computer Engineering 3645. The BE Software Engineering 3648 is jointly managed with the School of Information Systems. The BE MBiomedE programs 3728, 3749, and 3757 are managed in conjunction with the Graduate School of Biomedical Engineering. The Bachelor of Engineering Bioinformatics 3647 is offered in collaboration with the Faculty of Science.

The School of Computer Science and Engineering also offers the program Bachelor of Science Computer Science 3978. Computer Science is also offered as a major in the combined BE BSc programs, combined BSc BA, combined BSc BSc, and combined BSc LLB and is offered as a minor in the program, BSc (Science and Mathematics) 3970. The School also offers a major sequence in computing within the BA 3400 and BSoSc 3420.

For a description of the combined BE BSc programs, see the entries in this Handbook for the Schools conducting the Engineering major. Majors in the program 3978 are also offered in Computer Science and Psychology, Computer Science and Geography, and Computer Science and Philosophy. For the BA degree program, see the Arts and Social Sciences sections in this Handbook and for the BSc LLB program, see the Law section in this Handbook. For the BSc BA and BSc BSc, see the Science entry in this Handbook. For the BSc BCom, see the Commerce entry in this Handbook.

### Computing Requirements

Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

### General Education Courses

It may not be possible for computing students to enrol in General Education courses which are similar in content to the courses offered in their respective degree program. For a comprehensive list, see: [www.cse.unsw.edu.au/school/teaching/courses/gened.html](http://www.cse.unsw.edu.au/school/teaching/courses/gened.html)

### Program Outlines

**3645 Computer Engineering – Full-time Program – Plan COMPB13645**

**Bachelor of Engineering BE**

Whilst this program is jointly administered by the School of Computer Science and Engineering and the School of Electrical Engineering and Telecommunications, for convenience, day-to-day administration is conducted through the Computer Science and Engineering Student Office, to which enquiries should be directed.

**E elective Courses**

1. The Program Director or Undergraduate Coordinator must approve the program selected by each student. Not all electives are offered in each session. Students are advised each year of the timetable of available electives. It may be possible to substitute other electives run by the participating schools, apart from those listed below, but this is not permitted if it unduly restricts the range of courses studied overall.

2. Electives for Stages 3 and 4 total 36 units of credit (6 courses of 6 units of credit, or equivalent) and are selected from **Group N, S, CE3, CE4, and D** (see below), with these restrictions:

   i) At least 6 units of credit must be taken from **Group N**.
   ii) At least 12 units of credit must be taken from **Group CE4**.
   iii) At least 12 units of credit may be counted from **Group S**.
   iv) At most 6 units of credit may be counted from **Group D**.

### 3647 Biotechnology – Full-time Program – Plan COMPB13647

#### Bachelor of Engineering BE

Whilst jointly administered by the Schools of Computer Science and Engineering and the Faculty of Science, for convenience, day-to-day administration of the program is conducted through the Computer Science and Engineering Student Office, to which enquiries should be directed.

---

**Bachelor of Computer Science – Plan COMPB13647**

The Bachelor of Computer Science is a comprehensive program designed to provide students with a strong foundation in computer science principles and applications, as well as an understanding of the broader context in which computing systems operate. The program is designed to be flexible, allowing students to tailor their studies to their interests and career goals. Students are encouraged to explore areas such as software engineering, computer security, and data analytics. The program emphasizes both theoretical knowledge and practical skills, preparing graduates for a wide range of careers in the IT sector. Students engage in hands-on projects and collaborations, which reflect the collaborative nature of modern computing environments. The curriculum is informed by industry needs, ensuring that students are equipped with the skills and knowledge required to succeed in the rapidly evolving field of computer science.
Elettes for Stages 3 and 4 total 42 units of credit and are selected from the lists below:

### 3648 Software Engineering – Full-time Program – Plan SENGAI3648

**Bachelor of Engineering BE**

The Software Engineering program is jointly administered by the School of Computer Science and Engineering and the School of Information Systems, Technology and Management. Day-to-day administration is conducted through the Computer Science and Engineering Student Office, to which enquiries should be directed.

The stages of the program are shown below. It should be noted that it is possible to adopt the program by moving courses, subject to prerequisite requirements. Approval should be obtained for changes.

<table>

### Electives

1. The 8 electives (48 UOC) for stages 3 and 4 may include any third and fourth stage COMP, INFS and 3rd year MATHS courses. Electives and more information can be found at [www.cse.unsw.edu.au/seng](http://www.cse.unsw.edu.au/seng)

*Notes for BE:

1. A HSC Maths mark of 145-150 is required in Maths Extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI> 97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1021 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.
4. All students in the BE in Computer Engineering, Bioinformatics and Software Engineering programs must complete at least 60 days of approved Industrial Training before the end of Year 4.

**Award of Honours for BE:**

Honours will be awarded to students who have achieved superior grades in courses over the whole program including the successful completion of a thesis at a sufficient standard. Weighted average marks required for Honours grades are given below. The School of Computer Science and Engineering uses an internal method for calculating this average, the information provided on myUNSW is not used for this purpose.

- **Honours Class 1:** WA > 75
- **Honours Class 2:** Division 1: 70 WA < 75, Division 2: 65 WA < 70

### 3978 Computer Science – Full-time Program – Plan COMPA13978

**Bachelor of Science BSc**

Entry to this program is restricted to students who have been offered a place directly via UAC (UAC code 425019).

Computer Science involves the study of the design, construction and uses of computer systems. It is concerned with the representation of data and data structures in computer systems and the design of algorithms for automatic manipulation of this information by programming languages.
and machine systems. It is very much concerned with the design and development of hardware and software tools by which computer applications may be developed, but not so much with the applications themselves. It is, however, noted that non-computing elements (such as human interface or psychological aspects) can often dictate the level of success of computing systems. At UNSW, particular emphasis is given to comprehension of the basic principles behind computing tools, operating systems, compilers and translators, and computer hardware. Students in other programs may take some Level 1 and Level 2 Computer Science courses. Level 3 studies in Computer Science are only available in other specified combined programs. Appropriate disciplines are Physics and Computing, Mathematics and Computer Science.

Minors – that is, recognised sequences of related courses in disciplines other than Computer Science – are available in the Computer Science program. For details, see the entry for Science program 3970 in this Handbook.

With the approval of the Program Director or nominee, students in this program wishing to fulfill the requirements for a major in a second discipline, as well as the Computer Science requirements, may substitute, a course from the other discipline for one of the Level 3/4 Computer Science courses. Students may also select electives from other COMP4XX and COMP9XX courses having met the required requisites.

*Notes for BSc (Computer Science):

1. A HSC Maths mark of 145-150 is required in Maths Extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI> 97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.
4. Students may take COMP3111 Software Engineering in either semester.
5. Electives, COMP electives and General Education courses may be allocated between first and second semesters according to the student’s preference, but the total units of credit per semester should be 24. COMP3111 is offered in both semesters.

Year 4 Honours (Optional) COMP4978

Computer Science Honours takes one year full-time or two years of part-time study.

Normally, students are expected to have attained an average mark of 65 (according to myUNSW calculations) to qualify for entry to the Honours year. Students who do not meet this expectation may be admitted in special circumstances. Students who have graduated with a three-year computer science degree from UNSW or another university can apply for admission to Honours. Application forms are available from the Student Office of Computer Science and Engineering in K17 G01. Detailed information about the program is available on the Honours website at: www.cse.unsw.edu.au/~cs4914/.

Computing Electives:

Level 3/4 Computer Science Courses

(subject to approval)

Level 4 Computer Science Courses

(subject to the approval of the Program Director)

Total units of credit

48

Computer Science Honours students must at least complete 18 UOC Level 4 elective courses. Students may substitute Level 4 courses from other schools with the permission of the Program Director.

Combined Degree Programs

Computer Engineering

Students in Computer Engineering who maintain a high average performance may qualify for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged. The degrees referred to here are the Bachelor of Engineering (Computer Engineering)/Bachelor of Arts BE BA and the Bachelor of Engineering (Computer Engineering)/Bachelor of Science BE BSc. Students wishing to gain a degree at Honours level in Arts or Science as part of their combined degree program shall meet all the relevant requirements of the Faculty concerned and of the appropriate schools.

Students wishing to enrol in, transfer into, or continue in a combined program shall have complied with all the requirements for prerequisite study, sequencing and academic attainment (a Credit average, i.e. 65%) of both the program authorities concerned.
Students who commence a combined program, but subsequently do not wish to proceed with both areas of study, or who fail to maintain a Credit average performance, should revert to a single degree program with appropriate credit for courses completed.

Students in a combined degree program are exempt from all General Education requirements. However, if the student reverts to the single degree program, the usual General Education requirements for that program apply.

There will be a testamur for each part of the combined degree program. Students who complete the BE program first may proceed to graduation with the degree of Bachelor of Engineering in the usual way.

### 3722 Computer Engineering/Bachelor of Arts - Plan COMPB13722

**Bachelor of Engineering Bachelor of Arts BE BA**

Anyone who meets the entry requirements for both Computer Engineering and Arts is eligible for the combined program. Students may enter directly in first year or may apply to transfer from the normal Engineering program later, although with late transfer it might not be possible to complete the program in minimum time.

The BE in Computer Engineering/BA combined program requires the completion of 240 UOC, including at least 60 UOC of Arts courses, and must contain a major sequence of 42 UOC at Stages 2 and 3 in a single Arts discipline. Students in this combined program are exempt from the General Education requirement.

The major Arts discipline may not be Computing.

The Faculty of Arts and Social Sciences must approve the Arts component while the School of Computer Science & Engineering will approve the final program and schedule.

In the Faculty of Engineering, Honours are awarded for superior performance in the standard program. In the Faculty of Arts, the award of Honours requires a separate program involving at least one further year of study.

### 3726 Computer Engineering/Bachelor of Science - Plan COMPB13726

**Bachelor of combined degree program students can add a Science program to the standard, professionally accredited Engineering program BE in Computer Engineering offered by the School of Computer Science & Engineering. All Science majors within program 3970 are available. Students who achieve a creditable performance, 65 Credit average after one or two years of their Computer Engineering program, may apply to transfer to the combined BE in Computer Engineering/Science program. There are no special rules on what to include in each year. Students should schedule the Science and Engineering components to suit their preferences while meeting the constraints of timetables and prerequisites. The Faculty of Science section in this Handbook describes the options and the School of Computer Science and Engineering Student Office can supply sample programs showing what previous students have arranged. In addition to the BE program, students must complete a minimum of 60 units of credit in Science courses, including a major sequence in an approved area. The Science office must approve the Science component while the School of Computer Science & Engineering will approve the final program and schedule. In the Faculty of Engineering, Honours are awarded for superior performance in the standard program. In the Faculty of Science, the award of Honours requires a separate program involving at least one further year of study.**

**Bioinformatics**

### 3756 Bioinformatics/Bachelor of Arts - Plan BINF813756

**Bachelor of Engineering Bachelor of Arts BE BA**

Students qualify for the award of the two degrees of Bachelor of Engineering in Bioinformatics and Bachelor of Arts. This cross-disciplinary program allows students to add their choice of Arts major to the standard Bioinformatics program and obtain the broader education offered by Arts and Social Sciences.

Students must meet the entry requirements for the BE in Bioinformatics program and the Bachelor of Arts program, and must complete the courses and electives required by the Bioinformatics program (3647) as well as 60 additional units of credit in Arts courses, including an approved major sequence of 42 UOC in Years 2 and 3. Approved majors are given in List A of the Bachelor of Arts (3400) program. Combined programs are exempt from the General Education requirement.

The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and overall program requirements. The School of Computer Science and Engineering Student Office can supply examples of specific programs.

Overall electives in stages 3 and 4 must include at least one computer science elective and one life science elective.
3755 Bioinformatics/Bachelor of Science - Plan
BINFB13755

Bachelor of Engineering Bachelor of Science BE BSc

The combined Bachelor of Engineering in Bioinformatics/Bachelor of Science program allows students to study additional Science courses in their Bioinformatics program to gain a broader understanding of the various scientific disciplines that contribute to Bioinformatics (such as mathematics, statistics and chemistry) or constitute major application areas of Bioinformatics (for example, medical sciences or biotechnology).

Students must meet the entry requirements for the BE in Bioinformatics program and the Bachelor of Science program, and must complete the courses and all but one elective required by the Bioinformatics program (3647) as well as 60 additional units of credit in Science courses, including an approved major sequence of 42 UOC in Years 2 and 3. Students must also complete 6 UOC of General Education. Approved majors are listed in Table A of the BSc program (3970) in the Faculty of Science section of this Handbook.

The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and overall program requirements. The School of Computer Science and Engineering Student Office can supply examples of specific combined programs.
BIOT3061 Biopharmaceuticals 6
COMP2021 Digital Systems Structures 6
COMP311 Software Engineering 6
COMP3331 Computer Networks & Applications 6
COMP3411 Artificial Intelligence 6
COMP3431* Intelligent Agent Architectures 6
MICR3021 Microbial Genetics 6

Year 5 Electives
BIOT3071 Commercial Biotechnology 6
COMP3151 Foundations of Concurrency 6
COMP3221 Microprocessors and Embedded Systems 6
COMP3511 Human Computer Interaction 6
COMP3916 eCommerce Systems Implementation 6
COMP3918* Data Mining & Data Warehousing 6
COMP3933 Advanced Computer Networks 6
COMP4917 Machine Learning & Data Mining 6
COMP4944 Neural Networks 6
MICR3011 Microbial Physiology: A Molecular Approach 6
MATH33821 Statistical Modelling and Computing 6
Level 3 MATH electives and other COMP/ENG electives may also be considered. Electives must include at least one life science and at least one COMP course.

Software Engineering

3651 Software Engineering/Bachelor of Science - Plan SENG13651

Bachelor of Engineering Bachelor of Science BE BSc
This combined program requires the completion of 240 UOC, including at least 84 UOC of Science courses, and must contain a major sequence of 42 UOC in Stages 2 and 3, with at least 18 UOC in Year 3 in a single Science discipline. To satisfy the requirement of the combined program, the free electives and the General Education electives of the standard Software Engineering program are assigned to Science electives. The Science content of the generic combined program consists of:

- 18 UOC of Mathematics in Stages 1 and 2;
- 6 UOC of Science electives in Stage 1;
- 12 UOC of Science electives in Stage 2;
- 6 UOC of Science electives in Stage 3;
- an extra Stage of 48 UOC of Science courses.
This yields a possible total of 90 UOC of Science. Combined programs are exempt from the General Education requirement.

The major Science discipline may not be Computer Science. Students who are enrolled in a combined program are expected to maintain a Credit (65% or higher) average across courses taken from each of the composite programs. Students who fail to meet this condition will be counselled about their suitability to remain in the combined program.

The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and the overall requirements given above.

# 3653 Software Engineering/Bachelor of Commerce-Plan SENGA13653

**Bachelor of Engineering Bachelor of Commerce BE BCom**

The Bachelor of Engineering in Software Engineering Bachelor of Commerce combined program requires the following:

- At least 96 units of credit from the courses offered by the Faculty of Commerce and Economics (FCE) including:
  - ACCT 1501, ACCT1511, ECON1101, ECON1102, and
  - completion of a major of at least 48 units of credit in an FCE approved disciplinary stream and a minor of 24 units of credit in INFS courses of which no more than 12 units of credit may be Level 1 courses.

- No more than 60 units of credit from Level 1 FCE courses;

- 6 units of credit from first year mathematics courses as required for the Software Engineering program, and at least 6 units of credit in statistics and mathematics chosen from ECON1203, MATH1041, MATH1141, MATH1081, MATH2400, MATH2859, MATH2801, MATH2901, MATH2841, or alternative statistics and mathematics courses approved by the program advisor.

Students who are enrolled in a combined program are expected to maintain a Credit (65% or higher) average across courses taken from each of the composite programs. Students who fail to meet this condition will be counselled about their suitability to remain in the combined program.

The stages of a generic combined program are shown below. In general, it will be necessary to adapt the program by undertaking courses to meet the requirements of particular Commerce majors. This generic program accommodates 96 UOC of courses from FCE.

The BCom program should be approved by the Faculty of Commerce and Economics.

1. The chosen Arts courses must include a major sequence of 42 UOC.
2. To satisfy prerequisites it may be necessary to use a different arrangement of courses than shown above.
3. To accommodate particular sequences of Arts electives it may be necessary to change the distribution of SE electives between stages 3, 4 and 5.

---

**Computer Science Combined Programs**

Students in Computer Science who maintain a high average performance may qualify for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged. The degrees referred to here are the Bachelor of Science Bachelor of Arts (BSc BA), Bachelor of Science Bachelor of Commerce (BSc BCom), Bachelor of Science Bachelor of Law (BSc LLB) and the Bachelor of Science Bachelor of Social Science (BSc BsocSc). Students wishing to enrol in, transfer into, or continue in a combined program shall have complied with all the requirements for prerequisite study, sequencing and academic attainment (a Credit average, i.e. 65%) of both the program authorities concerned.
Students wishing to gain a degree at Honours level as part of their combined degree program shall meet all the relevant requirements of the faculty concerned and of the appropriate schools. Such students may enrol for the Honours year only on the recommendation of both the program authorities concerned.

3983 Computer Science/Bachelor of Science
Plan COMPA13983

Bachelor of Science Bachelor of Science (Computer Science) BSc BSc

With this combined degree program, students can add a Science program to the standard, professionally accredited BSc in Computer Science program offered by the School of Computer Science and Engineering. All Science majors within program 3970 are available.

Students who meet the entry requirements for the BSc in Computer Science program 3978 and for the Bachelor of Science program 3970 may apply to enter the combined Bachelor of Science Bachelor of Science (Computer Science) program.

Students should schedule the Science and Computer Science components to suit their preferences while meeting constraints of timetables and prerequisites. The Science Faculty section in this Handbook describes the Science options and the School of Computer Science and Engineering. Student Office can supply sample programs indicating what previous students have arranged.

In addition to the BSc in Computer Science program 3978, students must complete a minimum of 84 units of credit in Science courses, including a major sequence in an approved area. The Science office must approve the Science component while the School of Computer Science and Engineering will approve the final program and schedule.

The award of Honours in either the Science or the Computer Science program requires at least one further year of study.

* External courses which may be included here and count towards the 84 UOC Computer Science electives, include: MATH2301, MATH3411/3301, TLE1011, PHYS1601 & 2601, and any of ELEC1011, 2031, 2032, 2042, 3004, 3006, 3014, 3016, 3017, 3041, 4042, 4412, 4413, 4503, 4522 and 4532.

3968 Computer Science/Bachelor of Arts
Plan COMPA13968

Bachelor of Science Computer Science Bachelor of Arts BSc BA

The double degree of BSc (Computer Science) BA normally requires an additional Stage of study, and enables students to complete the requirements of the BSc (Computer Science) and in a school, department, or program of the Faculty of Arts and Social Sciences.

For admission to the program, students must satisfy the entry requirements for both the BSc (Computer Science) and the Faculty of Arts and Social Sciences. Students in this program must complete 192 units of credit of study. Students are required to undertake courses totalling 84 units of credit from the Science component and also 84 units of credit from the Arts component of which 42 units of credit would be from an approved major sequence (refer to Lists A and B in the rules for program 3400 Bachelor of Arts, in the Faculty of Arts and Social Science section of this Handbook). The remaining 24 units of credit may be taken from either area.

Students should enrol in at least 24 Level 1 units of credit and no more than 36 Level 1 within the Arts component of the program. Of these, no more than 12 units of credit can be taken in any one school or department.

The award of Honours in either the Arts and Social Sciences or the Computer Science component requires at least a further year of study, and the Honours year is subject to the admission requirements of the corresponding Arts and Social Sciences program or the Honours program in Computer Science.

This degree is administered by the School of Computer Science and Engineering.

The specific requirements for the BSc Computer Science are described in the Engineering section of the Handbook, under program code 3978 BSc Computer Science.

The Computer Science requirements are:

Fast-Track Programs

3645 Computer Engineering/Master of Engineering Science – Plan COMPL13645

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake 4.5 years (10 semesters) full-time combined program leading to the award of a Bachelor of Engineering and a Master of Engineering Science in Computer Engineering.

Students undertake the first three years (6 semesters) of the BE program in Computer Engineering. Subject to satisfying 75% over Years 2 and 3 (see Rules for Progression and the Award of Degrees), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) they undertake a 12 units of credit of project/workshop in year 4; and (c) they undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).
3647 Bioinformatics/Master of Engineering Science – Plan BINFL13647

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering Science in Bioinformatics.

Students undertake the first three years (6 semesters) of the BE program in Bioinformatics. Subject to satisfying a minimum performance over these three years (see Rules for Progression and the Award of Degrees), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) they undertake a 12 units of credit of project/thesis work over the summer (9th) semester; and (c) they undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

3648 Software Engineering/Master of Engineering Science – Plan SENGL13648

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering Science in Software Engineering.

Students undertake the first three years (6 semesters) of the BE program in Software Engineering. Subject to satisfying 75% over years 2 and 3 (see ‘Rules for Progression and the Award of Degrees’), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) they undertake a 12 units of credit of project/thesis work over the summer (9th) semester; and (c) they undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

Concurrent Programs

3728 Computer Engineering/Master of Biomedical Engineering – Plan COMPB13728

Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE

The BE (Computer Engineering)/Master of Biomedical Engineering concurrent degree program is offered jointly through the School of Computer Science and Engineering and the Graduate School of Biomedical Engineering.

Bachelor of Engineering Master of Biomedical Engineering

The BE (Software Engineering)/Master of Biomedical Engineering concurrent degree program is offered jointly through the School of Computer Science and Engineering and the Graduate School of Biomedical Engineering. Students who are enrolled in a joint program are expected to maintain a Credit (= 65%) average across courses taken from each of the composite programs.

*Level 3 MATH electives and other level 3/4/9 COMP electives may also be considered. Electives must include at least two life science electives and at least two COMP or MATH electives.

+ BIOM 900X can be substituted for a level 9 COMP elective, preferably from the Stage 4 Bioinformatics elective list.

School of Electrical Engineering and Telecommunications

Head of School: Professor BG Celler
Director of Academic Studies: Associate Professor E Ambikairajah
Administrative Officers: Ms. G. Fong

The School comprises several discipline areas indicating shared research interests and teaching commitments: Telecommunications; Signal Processing; Energy Systems; Microelectronics; Photonics; Systems and Control. Electrical Engineering and Telecommunications has close links with the pure sciences and mathematics. Its technology is changing rapidly and the School’s teaching and research programs are constantly being updated to meet the challenges of present and future needs.

The School offers undergraduate and graduate training in all branches of the professions of electrical engineering and telecommunications. Our degree programs are accredited by the Institution of Engineers, Australia, as meeting the requirements for admission to graduate membership. The School is also associated with the Australian Photonics Co-operative Research Centre which conducts research into optical fibre communication devices and technology. A very vibrant Co-op program is offered for Electrical Engineering and Telecommunications students. Co-operative scholarships are funded by Australia’s premier industries.

Summary of Undergraduate Programs

Normal full-time

Single Degree Programs
3640 BE in Electrical Engineering 4 years
3643 BE in Telecommunications 4 years
3644 BE in Photonic Engineering 4 years

Combined Degree Programs
3646 BE BA in Telecommunications 5 years
3720 BE BA in Electrical Engineering 5 years
3725 BE BSc in Electrical Engineering 5 years
3641 BE BSc in Telecommunications 5 years

Fast-Track Programs
3640 BE MEngSc in Electrical Engineering 4.5 years
3643 BE MEngSc in Telecommunications 4.5 years

Concurrent Degree Programs
3723 BE MBiomedE in Telecommunications 5 years
3727 BE MBiomedE in Electrical Engineering 5 years

The undergraduate curricula are progressively revised to provide flexible training to suit the future needs of students. Individual student needs can be further met by substitution provisions within the programs.
Combined Degree Programs

Combined degree programs lead to the award of the Bachelor of Engineering in either Electrical Engineering or Telecommunications, combined with a Bachelor degree in Arts or Science (usually Computer Science, Mathematics or Physics). There is a fast-track degree available which leads to the awards of Bachelor of Engineering in either Electrical Engineering or Telecommunications and Master of Engineering Science. With the Graduate School of Biomedical Engineering, there is also available a concurrent degree program leading to the award of Bachelor of Engineering/Master of Biomedical Engineering. Students who are in combined degree programs must maintain a Credit average performance (i.e. 65% weighted average mark) in order to stay in the program.

Guidelines for Substitution of Courses

To suit the special abilities or needs of individual students, a limited number of course substitutions is permitted within each program. Any such substitution must have prior approval of the Head of School.

1. The substituted course is of at least the same length and level as the prescribed course.
2. Core courses are normally substituted with courses covering similar material.
3. Students may substitute for two of the Professional Electives, courses of suitable level and difficulty from areas relevant to the profession of Electrical Engineering. One of these substitutions may be a Year 3 elective from within the School. Substitution of one postgraduate course within the School is permitted, provided that the student has passed Year 3 Electrical Engineering and Telecommunications courses at an adequate level and a similar course is not offered at the undergraduate level.
4. Substitution is not permitted if it unduly restricts the range of courses studied to only one area of electrical engineering or computer systems.
5. Substitution is normally not permitted in Year 1 or Year 2.

Guide to Industrial Training Requirement

Each student is personally responsible for ensuring the completion of the full 60 days compulsory industrial training prescribed as part of the requirements for the award of the degree. Industrial training should be concurrent with enrolment and is best accumulated in the summer recesses at the end of Years 2 and 3, but must be completed by the end of Year 4.

Students should be involved in general work with professional engineers and take an active part in their work in the design of simple equipment, solving of engineering problems, or any other work which is relevant to the profession of engineering.

At the end of each period of employment every student must submit a report, typically 2000-3000 words, summarising the work done, the training received and including a description of the organisation of the company.

Industrial training will be assessed as a compulsory part of the course ELEC4011 Ethics and Electrical Engineering Practice. Students must complete the industrial training requirement in order to receive a completed assessment for this course.

Notes: The Thesis may only be taken by students with an Honours-level weighted average at the end of Year 3. Other students enrol in the Group Thesis (ELEC4914 and ELEC4915). Students who intend to major in particular disciplines should note that certain Year 3 elective courses may be prerequisites for the Professional Electives they choose in Year 4. COMP2011 may be taken at the higher level (COMP2711).

### 3644 Photonic Engineering – Full-time Program

**Bachelor of Engineering BE**

**Year 1 Session 1**

**PHTN1010 Introduction to Photonic Engineering**  3  3
**ELEC1011 Electrical Engineering 1**  6  6
**MATH1090 Discrete Mathematics**  3  3
**MATH1141 Higher Mathematics 1A**  6  6
**PHYS1311 Higher Physics 1A**  6  6

**Total 24 24**

**Year 1 Session 2**

**COMP1011 Computing 1A**  6  6
**ELEC1041 Digital Circuits**  6  4
**MATH1241 Higher Mathematics 1B**  6  6
**PHYS1231 Higher Physics 1B**  6  6

**Total 24 24**

**Note:** MATH1141 and MATH1241 may be taken at the ordinary level (MATH1131 and MATH1231).

**Year 2 Session 1**

**COMP1021 Computing 1B**  6  6
**ELEC2031 Circuits and Systems**  3  3
**MATH2859 Probability, Statistics & Information**  3  3
**MATH2111 Higher Several Variable Calculus**  6  5

**Total 24 22**

**Year 2 Session 2**

**ELEC2032 Electronics and Systems**  3  3
**PHYS2050 Electromagnetism**  3  2
**ELEC2042 Real Time Instrumentation**  3  3
**MATH2620 Higher Complex Analysis**  3  3
**MATH2130 Higher Mathematical Methods for Differential Equations**  3  2.5
**MATH2509 Linear Algebra for Engineers**  3  3

**Total 24 20.5**

**Note:** MATH2111, MATH2620 and MATH2130 may be taken at the ordinary level (MATH2011, MATH2520 and MATH2120). COMP1011 and COMP1021 may be taken at the higher level (COMP1711 and COMP1721).

**Year 3 Session 1**

**ELEC3004 Signal Processing & Transform Methods**  6  6
**PHYS3030 Electromagnetism (Advanced)**  3  2
**PHYS3770 Laser & Spectroscopy Lab**  3  4
**ELEC3006 Electronics A**  6  5
**General Education**  3  2

**Total 24 20**

**Year 3 Session 2**

**ELEC3017 Electrical Engineering Design**  6  5
**PHYS3060 Advanced Optics**  3  2
**PHYS3310 Physics of Solid State Devices**  3  2
**TELE3013 Telecommunication Systems 1**  6  4
**6 UOC from:**
**ELEC2041 Microprocessors and Interfacing**  6  5
**ELEC3014 Systems and Control 1**  6  5
**TELE3018 Data Networks 1**  6  5
**COMP2011 Data Organisation**  6  5
**PHYS3010 Quantum Mechanics (Advanced)**  3  2
**PHYS3080 Solid State Physics**  3  2

**Total 24 20**

**Note:** The elective courses ELEC2041, PHYS3010 and PHYS3080 are scheduled in Session 1 only. In this case, the General Education elective can be moved to Session 2. PHYS3030 may be taken at the ordinary level PHYS3230.

**Year 4 Session 1**

**ELEC4010 Introduction to Management for Electrical Engineers**  3  3
**ELEC4910 Thesis – Part A**  3  4
**PHYS4979 Photonic Devices & Effects**  6  4
**TELE4313 Optical Fibres**  6  4
**1 Professional Electives**  6  4

**Total 24 19**

---
Year 4  Session 2  UOC  HPW
ELEC4011  Ethics and Electrical Engineering Practice  3  2
ELEC4911  Thesis – Part B  9  10
  2 Professional electives  12  8
 Total  24  20

Notes: The Thesis may only be taken by students with an Honours-level weighted average at the end of Year 3. Other students enrol in the Group Thesis (ELEC4914 and ELEC4915).

Students who intend to major in particular disciplines should note that certain Year 3 elective subjects may be prerequisites for the Professional Electives they choose in Year 4.

3640, 3643 and 3644 BE in Electrical Engineering, Telecommunications and Photonic Engineering - Part-time Programs

Bachelor of Engineering BE

After completing Year 1 full-time, it is possible for students to progress with a program which has a part-time load (less than 18 units of credit in any session). Very few undergraduate courses are offered in the evenings and students need to be able to attend classes as the timetable demands. Formal part-time programs, that provide courses at times suited to part-time students, are not offered.

Professional Electives for 3640 & 3643

Microelectronics  UOC HPWS1/S2
ELEC4503  Electronics C  6  4  1
ELEC4522  Microelectronics Design and Technology  6  4  1
ELEC4532  Integrated Digital Systems  6  4  2

Systems & Control
ELEC4412  Systems and Control 2  6  4  1
ELEC4413  Systems and Control 3  6  4  2

Energy Systems*
ELEC4205  Electrical Energy Systems  6  4  1
ELEC4216  Electrical Drive Systems  6  4  2
ELEC4240  Power Electronics  6  4  1
SOLA3540  Applied Photovoltaics  6  4  1

Signal Processing
ELEC4042  Signal Processing 2  6  4  1
ELEC4483  Biomedical Instrumentation, Measurement and Design  6  4  2

Telecommunications
TELE4313  Optical Communications  6  4  1
TELE4323  Digital Modulation and Coding  6  4  1
TELE4363  Telecommunications Systems 2**  6  4  1
TELE4333  Wireless Data Communication Systems  6  4  2
TELE4343  Source Coding and Compression  6  4  2
TELE4352  Data Networks 2**  6  4  1
TELE4353  Mobile and Satellite Communication Systems  6  4  2
TELE4354  Network Management**  6  4  1

Computer Systems
COMP3111  Software Engineering  6  4  1/2
COMP3211  Computer Organisation and Design  6  4  1/2
COMP3231  Operating Systems  6  4  2
COMP3311  Database Systems  6  4
COMP3411  Artificial Intelligence  6  4  2
MATH3411  Information, Codes and Ciphers  6  4  2

Business Administration
ELEC4444  New Business Creation  6  4  2

Notes: *Not available for BE in Telecommunications students.
**Core for BE in Telecommunications students.

Professional Elective courses in the Computer Systems area require either COMP2011 or COMP2021 as a prerequisite.

Because of timetable clashes, not all combinations of courses are possible.

The program selected by each student must be approved by the Head of School. Not all electives are offered each session, nor is the full range available to part-time students. Students are advised each year of the timetable of available electives.

Professional Electives for 3644

Microelectronics  UOC HPWS1/S2
ELEC4503  Electronics C  6  4  1
ELEC4522  Microelectronics Design and Technology  6  4  1

Systems & Control
ELEC4412  Systems and Control 2  6  4  1
ELEC4413  Systems and Control 3  6  4  2

Signal Processing
PHTN4310  Optical Signal Processing  6  4  2
ELEC4042  Signal Processing 2  6  4  1
ELEC4483  Biomedical Instrumentation, Measurement and Design  6  4  2

Energy Systems
ELEC4240  Power Electronics  6  4  1

Telecommunications
TELE4314  Optical Communications Systems  6  4  2
TELE4323  Digital Modulation and Coding  6  4
TELE4363  Telecommunications Systems 2  6  4  1
TELE4333  Wireless Data Communication Systems  6  4  2
TELE4343  Source Coding and Compression  6  4  2
TELE4352  Data Networks 2  6  4  1
TELE4353  Mobile and Satellite Communication Systems  6  4  2

Computer Systems
COMP3111  Software Engineering  6  4  1/2
COMP3311  Database Systems  6  4  2
COMP3411  Artificial Intelligence  6  4  2
MATH3411  Information, Codes and Ciphers  6  4  2

Business Administration
ELEC4444  New Business Creation  6  4  2

Physics  UOC HPWS1/S2
PHYS4949  Advanced Topics in Physics  6  4  2

Notes: Professional Elective courses in the Computer Systems area require either COMP2011 or COMP2021 as a prerequisite.

Because of timetable clashes, not all combinations of courses are possible.

The program selected by each student must be approved by the Head of School. Not all electives are offered each session, nor is the full range available to part-time students. Students are advised each year of the timetable of available electives.

Combined and Concurrent Degree Programs

Students may apply for entry into one of the Faculty's combined or concurrent degree programs. The available programs are BE BA (Engineering and Arts), BE BSc (Engineering and Science, usually Computer Science, Mathematics or Physics), and BE MBiomedE (Bachelor of Engineering Master of Biomedical Engineering). These programs qualify candidates for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged.

Fast-Track Degree Programs

BE MEngSc (Bachelor of Engineering Master of Engineering Science) offers an accelerated completion of a postgraduate coursework program in Engineering to high achieving students over 4.5 years full-time.

Students already in a BE program who maintain a Credit average performance may qualify for transfer to one of the combined degree programs. Students wishing to enrol in a combined program may do so only on the recommendation of the Head of School, with the approval of the Faculty of Engineering and either the Faculty of Arts, or the Faculty of Science. Students wishing to enrol in the concurrent degree program (BE MBiomedE) require approval of the Graduate School of Biomedical Engineering. Students who wish to enrol in, transfer into, or continue in a combined or concurrent degree program shall have complied with all the requirements for prerequisite study, sequencing and academic attainment (a Credit average performance, i.e. 65% average) of both the program authorities concerned.
Students who commence a program but subsequently do not wish to proceed with both areas of study, or who fail to maintain a Credit average performance, can revert to a single degree program with appropriate credit given for courses completed. Students may transfer into a combined program after partially completing the requirements for either degree provided suitable courses have been studied. However, later choice of courses and the time taken to complete the program may be affected by earlier course selection. Thus, students considering combined degree programs should contact the School of Electrical Engineering and Telecommunications as early as possible in their academic career. Application for transfer to a combined program must be made in writing to the School Office for the approval of the Head of School.

All combined degree programs are administered by the School of Electrical Engineering and Telecommunications. The School offers the following combined, concurrent and fast-track degree programs:

**Electrical Engineering**  **Telecommunications**

</tbody>
</table>

**Rules for all Combined Degree programs**

For Science and Arts, in addition to the BE program of study, students must complete 60 units of credit offered by the relevant faculty, comprising a major sequence within Science or Arts.

General Education is not required for a combined degree program, with the exception of the BE MBiomedE program.

A Mathematics major is not normally permitted for the BA. The BE BSc combined degree program is more appropriate for this.

There will be a testamur for each part of a combined degree program.

Testamurs for the BE BA, the BE BSc and the BE MBiomedE are awarded at a single graduation ceremony.

**3725 and 3720 Electrical Engineering/Bachelor of Science or Bachelor of Arts**

**Bachelor of Engineering Bachelor of Science or Bachelor of Arts**

**BE BSc or BE BA**

| **Head of School:** Professor H Kaebernick  
**Executive Assistant to Head of School:** Associate Professor P Matthew Kiewski  
**Administrative Officer:** Mrs G Jance |

The School offers a Bachelor of Engineering program with plans in Aerospace Engineering, Manufacturing Engineering and Management, Mechanical Engineering, Mechatronic Engineering and Naval Architecture. Also offered are combined degree programs with Science or Arts, and Bachelor/Master degree programs with Biomedical Engineering or Engineering Science.

No formal part-time programs are offered by the School. However, it is possible for students to undertake studies with a reduced load of courses.

Students intending to take a reduced load are advised that very few undergraduate courses are offered in the evening.

### Program Outlines

#### Summary of Programs and Plans

The plans under program 3710, which lead to the award of the degree of Bachelor of Engineering (BE), are designed to provide the appropriate academic training for the professional engineer in the fields of Aerospace Engineering, Manufacturing Engineering and Management, Mechanical Engineering, Mechatronic Engineering and Naval Architecture. The first two years of these plans are identical, whilst the third and fourth years of the plans contain a number of common courses. Elective courses provide for a limited degree of specialisation in the fourth year of the Mechanical Engineering and Mechatronic Engineering plans. The Aerospace Engineering, Manufacturing Engineering and Management, and Naval Architecture plans do not have elective components. Each student is required to submit a thesis at the end of the final year and to present a seminar on the topic of the thesis.

The School also offers combined programs with Science (3711) or Arts (3712) leading to the award of the degrees of Bachelor of Engineering and Bachelor of Science (BE BSc) and Bachelor of Engineering and Bachelor of Arts (BE BA) respectively. These combined programs enable students to major in the areas of Computer Science, Materials Science, Mathematics, Physics, Statistics or another relevant field, in addition to studying their chosen Engineering plan.

Bachelor/Masters programs are also available. After five years of study, Mechanical and Mechatronic Engineering students may obtain an Associate Degree in Management, Engineering and Mechatronic Engineering students may obtain a Bachelor of Engineering/Master of Biomedical Engineering (BE MBioMedE) degree. After four and a half years of study, Manufacturing Engineering and Management, Mechanical Engineering and Mechatronic Engineering students may obtain a Bachelor of Engineering/Master of Engineering Science (BE MEngSci) degree.
Industrial Experience

Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete a total of 60 working days of industrial experience. A written report describing this experience is a requirement to passing the common, fourth year course MECH4001, Communications for Professional Engineers.

Recognition

The Institution of Engineers, Australia, recognises the degree of BE in any of the undergraduate programs offered by the School as meeting the examination requirements for admission to graduate and corporate membership. Substantial or complete recognition is accorded to the BE degree programs by overseas engineering institutions.

The award of the BE degree in Aerospace Engineering is recognised by the Royal Aeronautical Society as giving exemption from the formal examination requirements for corporate membership. Advancement from graduate membership to associate membership grade is awarded on a case by case basis after a further period of some years of professional experience.

The award of the BE degree in Naval Architecture is recognised by the Royal Institution of Naval Architects (RINA), London, as the academic qualification for corporate membership of that body.

Program Progression Guidelines

The student's attention is directed to the “Faculty Rules for Progression” contained in this Handbook. As well, the following points should be noted.

- A student who is facing with compiling a timetable comprising courses from two academic years must give preference to courses from the lower year.

General Education

- For students taking the Manufacturing Engineering and Management plan, the accounting courses GENC1001, GENC1002 or GENC1003 should not be chosen as they partially duplicate core course ACCT9003.

Thesis Arrangements

- The course MECH4001 Communications for Professional Engineers must only be taken in conjunction with either MECH4003 Thesis A or MECH4004 Thesis B.
- MECH4003 and MECH4004 must be undertaken in two consecutive sessions which are the final two sessions of candidature.
- A student must not be enrolled in more than 24 units of credit in any session involving MECH4003 and MECH4004.
- A single thesis project is commenced in MECH4003 and completed in MECH4004. MECH4004 carries the mark for the thesis project.
- MECH4003 is graded satisfactory (SY)/ failure (FN). If a student receives a failure (FN) in MECH4003, a student cannot proceed with MECH4004.
- If the project is abandoned during MECH4004, or if MECH4004 is failed, then the satisfactory (SY) for MECH4003 is changed to failure (FN). To complete the degree, a completely new topic must be chosen and the student must enrol again in both MECH4003 and MECH4004.

Programs and Plans

UNSW terminology uses the concept of “plans” within “programs”. Most students are in one plan within a program. For example, a BE mechanical engineering student in program 3710 is in plan MECHA13710. The fifth character “A” indicates the “standard” plan. Other examples are:

- BE Aerospace Engineering AEROA13710
- BE Mechatronic Engineering MTRNA13710.

Combined degree BE BA and BE BSc students and BE MBiomedE students are in two plans simultaneously throughout their five years; one engineering and the other arts, science or biomedical engineering respectively. For example:

- BE Manufacturing Engineering/BA French major MANFA13712 and FREN13712
- BE Naval Architecture/BSc Physics major NAVLA13711 and PHYS1A3711
- BE Mechatronic Engineering/MBiomedE MTRNA13688 and BIOMA13688.

The BE degree is only completed after five years.

BE MEngSc students are in the standard single degree plan and program for the first three years. In fourth year they transfer to a special plan within the same program. For example:

- BE Mechatronic Engineering/MEngSc MTRNA13710 (Years 1–3), MTRNL13710 (Year 4).

The BE degree is completed after four years. In fifth year they transfer to the appropriate postgraduate program described in the Postgraduate Handbook.

Aerospace Engineering (plan AEROA13710)

Years 3 and 4

The Aerospace Engineering plan covers the analysis, design and operation of aircraft and spacecraft. Graduates work mainly on the design and manufacture of flight vehicles, their operation with major or satellite airlines and research for civil and military aerospace organisations. Owing to the international nature of the aerospace industry, the topics studied cover a similar area and, in general, to the same depth of understanding as professional training programs in aerospace in other industrial countries. The aerospace industry is one of Australia’s major exporters of high value added manufactured goods.

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four year degree program at any Australasian tertiary institution may be admitted to Years 3 and 4 of the plan leading to the Bachelor of Engineering degree in Aerospace Engineering. The provision is that the Head of the School is satisfied that the courses studied at the other institution are equivalent and gives their recommendation.

Year 3         HPW   UOC

MECH4001 Communications for Professional Engineers - 3 3
MECH4003 Thesis A 0 - 6
MECH4004 Thesis B - 0 9

Manufacturing Engineering and Management (plan MANFA13710)

Years 3 and 4
The Manufacturing Engineering and Management plan is designed for students with engineering ability whose interests lie in the planning, development and control of manufacturing or service operations. In the Manufacturing Engineering and Management courses, the problems associated with the practical economics of manufacturing operations are stressed. The aim is to provide students with the education necessary to carry out an industrial job and to examine it critically in the light of economic efficiency. Traditional engineering programs do not embrace the problems which are characteristic of Manufacturing Engineering and Management. These problems include the analysis of a product to ensure satisfactory functioning with regard to methods and sequence of manufacturing operations; the disposition of buildings and of equipment within them to permit efficient handling of materials; the avoidance of bottlenecks; the related problems of quality and cost control, testing and inspection; labour and personnel relations; and, finally, the problem of distribution and sales.

The financial and economic aspects are studied as the problem in manufacturing has not been solved until the final translation of the product into money has been accomplished successfully. While it is not intended to develop an expert in accounting practice or economics, it is intended to produce an engineer with an appreciation of the problems of cost and one who can apply considerations of ultimate economy to all industrial problems. The techniques of operations research may be applied here, where mathematical models of real-life situations are constructed and manipulated to yield optimal solutions as guides to management.

An engineer trained in Manufacturing Engineering and Management may Initially be employed in any of the following major areas of industrial activity: industrial economic analysis; planning and control of production; product and process design; methods engineering; operations research.

Mechanical Engineering (plan MECHA13710)

Years 3 and 4
The Mechanical Engineering plan provides a versatile, comprehensive coverage of areas involving the conception and design of machinery and mechanical plant; the supervision of its construction, operation and maintenance, the planning and supervision of large engineering projects, and general engineering management. Due to its wide range, a number of options are provided as Technical Elective courses in the final year. These are preferentially linked to provide a direction appropriate to the needs of Australian industry and to the specific interests of students, although some flexibility is available if required. Typical fields which may be encompassed by the plan include building services, computer-aided design, power generation, energy and environmental systems, gas and liquid handling, bio-mechanics, materials handling, control systems, and transport. An emphasis is placed on the application of engineering science, development and management in these fields.

Technical Electives - 6 12
General Education Elective - 2 3
General Education Elective - 2 3
General Education Elective - 2 3

Mechanical Engineering Technical Electives
24 units of credit of Technical Elective courses are required. They may be selected from the postgraduate list of courses of the School or from Years 3 and 4 courses from other plans run by the School. Prerequisite and corequisite requirements must be satisfied. Approval is required for the selection of any course from outside the School. Due to staff availability and to demand, it is likely that not all of the Technical Electives will be always on offer. Students are advised to check the Technical Electives are offered in the following year.

Mechatronic Engineering (plan MTRNA13710)

Years 3 and 4
The Mechatronic Engineering plan provides the student with the ability to acquire a hybrid range of skills based on mechanics, electronics and
computing. Whilst there is a comprehensive coverage of mechanical engineering and design areas, the plan enables a deeper understanding of the principles supporting the conception, design, construction, maintenance, integration and repair of intelligent machines. Typical examples of these machines are robots, white goods, cameras, automated test equipment and transport vehicles.

Typical fields which may be encompassed by the plan include building services, computer controlled plant, manufacturing, robotics and materials handling. An emphasis is placed on the application of engineering science, development and management in these fields.

### Naval Architecture (plan NAVLA13710)

#### Years 3 and 4

Naval Architecture is the branch of engineering which is concerned with the design, building and utilisation of all types of ships and marine vehicles. Naval architects must be conversant with a wide variety of skills, including most forms of engineering and architecture. This is because a ship or a boat must be a completely self-sufficient vehicle containing a number of systems and able to withstand the loads from the sea. Yachts, fishing boats, frigates, ferries, catamarans and pleasure craft are just a few of the types of vessels that are studied during the program.

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four year degree program at any Australasian tertiary institution may be admitted to Years 3 and 4 of the program leading to the Bachelor of Engineering degree in Naval Architecture. The proviso is that the Head of the School is satisfied that the courses studied at the other institution are equivalent and gives their recommendation.

### Combined Degree Programs

#### 3711 Bachelor of Engineering/Bachelor of Science

- **BE BSc**
  - Aerospace Engineering (plan AEROA13711 + Science plan)
  - Manufacturing Engineering and Management (plan MANFA13711 + Science plan)
  - Mechanical Engineering (plan MECHA13711 + Science plan)
  - Naval Architecture (plan NAVLA13711 + Science plan)

The combined degree program 3711 requires five years full-time study and enables a student to qualify for the degrees of Bachelor of Engineering and Bachelor of Science (BE BSc). Each session of the program contains the standard 24 units of credit of courses and hence the workload should not be greater than in a single degree program. The combined degree program is administered by the School of Mechanical and Manufacturing Engineering.

For the Bachelor of Science, the student selects a Science plan based on the approved major sequence of courses. A major sequence is defined to comprise 42 units of credit of courses at Levels 2 and 3 with at least 18 units of credit being at Level 3. Overall, in the combined degree program, at least 84 units of credit must be taught by Science. In some BSc majors, science courses specific to engineering degrees, e.g. PHYS1169 Physics 1CME, MATH2029 Engineering Mathematics 2A, will be exchanged for courses within that major.

The general layout for the combined degree is given below. Detailed outlines for each combination of engineering and science are available from the School.

Students who commence the program and do not complete the Engineering component may take out a BSc degree on completion of all Science requirements. Similarly, students not wishing to complete the BSc degree, may transfer to a single degree Engineering program and be given appropriate credit for courses satisfactorily completed.
gain the additional qualification of Bachelor of Arts. Because the Engineering and Arts plans have common content, such as mathematics and physics, only one more year of study is required to add to their chosen Engineering plan. The Faculty of Arts and Social Sciences section in this Handbook describes the options and the School of Mechanical and Manufacturing Engineering can supply sample plans showing what previous students have arranged. Although the Faculty of Arts and Social Sciences section in this Handbook lists courses from the faculties of Engineering and Science, it is not permissible for BE BA students to include these courses.

There are no special rules on what to include in each year. Students should schedule the Arts and Engineering components to suit their preferences while meeting the constraints of timetables and prerequisites. The sample plans can help here too.

The Arts component must be approved by the Faculty of Arts and Social Sciences.

The final program and schedule must be approved by the School.

Rules
1. In addition to their chosen Engineering plan, students must complete an approved Arts plan which totals at least 60 units of credit of Arts courses and includes a major Arts sequence.

Mathematics majors are not usually permitted. BE BSc combined degrees are more appropriate for this.

2. There will be a testamur for each degree of the combined degree program.

3. Students who complete the BE program first may proceed to graduation with the degree of Bachelor of Engineering in the usual way provided they have also completed 12 units of credit in General Education.

**Fast-Track Program**

3710 Bachelor of Engineering/8710 Master of Engineering Science

**BE MEngSc**
A Bachelor of Engineering degree in Manufacturing Engineering and Management, in Mechanical Engineering, or in Mechatronic Engineering, and a Master of Engineering Science degree (BE MEngSc) can both be completed in four and a half years of study.

Students undertake the first three years (6 sessions) of the standard BE plan in Manufacturing Engineering and Management, in Mechanical Engineering, or in Mechatronic Engineering. Subject to satisfying a minimum performance requirement over these three years (see below), they (a) substitute 12 units of credit of the standard Year 4 BE degree plan with 12 units of credit of approved postgraduate coursework in their fourth year, (b) they undertake 12 units of credit of project/thesis work over the Summer (9th) Session, and (c) they undertake 24 units of credit of postgraduate coursework in the 10th session (first half of their fifth year).

There will be a testamur for each degree. The degree of Bachelor of Engineering will be awarded on the satisfactory completion of the first eight sessions.

**Admission Requirements**
Admission to the BE MEngSc will require a Credit grade average by the end of Year 3.

3710 Manufacturing Engineering and Management

**Years 1, 2 and 3**
Students in Years 1 and 2 are enrolled in the standard single degree Manufacturing Engineering and Management plan MANFA13710 within program 3710.

**Year 4**
In Year 4, students transfer to the special plan MANFL13710 within program 3710. Compared to the standard plan for Session 1 of Year 4, the postgraduate course MANF9471 Manufacturing Strategy is substituted for MANF4440 Strategic Manufacturing Management and for MANF4500 Computers in Manufacturing. In Session 2, the postgraduate course MANF9340 Factory Automation is substituted for MANF4300 Design of Manufacturing Facilities 2.

**Organisation**
The BE BA program is administered by the School of Mechanical and Manufacturing Engineering.

Students should start discussing their program with representatives of the School and the Faculty of Arts and Social Sciences as soon as possible, preferably well before enrolment.

Students should work out for themselves the Arts plan they would like to add to their chosen Engineering plan. The Faculty of Arts and Social Sciences section in this Handbook describes the options and the School of Mechanical and Manufacturing Engineering can supply sample plans showing what previous students have arranged. Although the Faculty of Arts and Social Sciences section in this Handbook lists courses from the faculties of Engineering and Science, it is not permissible for BE BA students to include these courses.

### 3712 Bachelor of Engineering/Bachelor of Arts

**BE BA**

Aerospace Engineering (plan AEROA13712 + Arts plan)
Manufacturing Engineering and Management (plan MANFA13712 + Arts plan)
Mechanical Engineering (plan MECHA13712 + Arts plan)
Mechatronic Engineering (plan MTRNA13712 + Arts plan)
Naval Architecture (plan NAVLA13712 + Arts plan)

With this combined degree program, students can add their choice of an Arts plan to a professionally accredited engineering plan in Aerospace Engineering, Manufacturing Engineering, and Management, Mechanical Engineering, Mechatronic Engineering, or Naval Architecture. The basic BE BA engineering plans are the same as the BE BSc plans described immediately above. Thus every session of the combined degree program contains only the standard 24 units of credit of courses and hence the workload should not be greater than in a single degree program. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program later, although with late transfer it might not be possible to complete the program in minimum time. In this case the student will have to prescribe their own engineering plan following discussion with the School. The full range of Arts plans is available.

Because the Engineering and Arts plans have common content, such as mathematics and physics, only one more year of study is required to gain the additional qualification of Bachelor of Arts.
Mechatronic specialisation plans outlined in the Postgraduate Handbook.

It is suggested that consideration be given to the courses making up the 24 UOC of courses are selected from the School's postgraduate courses.

Year 5
Students undertake a 12 UOC project, MANF9010.

Summer Session between Year 4 and Year 5
Students undertake a 12 UOC project, MANF9010.

Year 5
24 UOC of courses are selected from the School's postgraduate courses. It is suggested that consideration be given to the courses making up the Manufacturing Engineering and Management specialisation plans outlined in the Postgraduate Handbook. Attribution of a specialisation in Manufacturing Engineering and Management testamur may not be possible if project MANF9010 has been taken instead of certain courses. Consult the School for direction on this matter.

3710 Mechanical Engineering
Years 1, 2 and 3 (plan MECHA13710)
Students in Years 1 and 2 are enrolled in the standard single degree Mechanical Engineering plan MECHA13710 within program 3710.

Year 4 (plan MECHL13710)
In Year 4, students transfer to the special plan MECHL13710 within program 3710. This plan requires that a minimum of 12 units of credit of postgraduate courses must be selected as part of the 24 units of credit Technical Electives requirement. Typically this means that a minimum of 12 units of credit of MECH9*** courses are selected.

8710 Mechanical Engineering
After Year 4, students, having completed their engineering program, change to MEngSc program 8710.

Summer Session between Year 4 and Year 5
Students undertake a 12 UOC project, MTRN9010.

Year 5
24 UOC of courses are selected from the School's postgraduate courses. It is suggested that consideration be given to the courses making up the Mechatronic specialisation plans outlined in the Postgraduate Handbook.

3710 Mechatronic Engineering
Years 1, 2 and 3 (plan MTRNA13710)
Students in Years 1 and 2 are enrolled in the standard single degree Mechatronic Engineering plan MTRNA13710 within program 3710.

Year 4 (plan MTRNL13710)
In Year 4, students transfer to the special plan MTRNL13710 within program 3710. This plan requires that a minimum of 12 units of credit of postgraduate courses must be selected as part of the 18 units of credit Technical Electives requirement. Typically this means that a minimum of 12 units of credit of MTRN9*** courses are selected.

8710 Mechatronic Engineering
After Year 4, students, having completed their engineering program, change to MEngSc program 8710.

Summer Session between Year 4 and Year 5
Students undertake a 12 UOC project, MTRN9010.

Year 5
24 UOC of courses are selected from the School's postgraduate courses. It is suggested that consideration be given to the courses making up the Mechatronic specialisation plans outlined in the Postgraduate Handbook.

Concurrent Degree Programs
Bachelor of Engineering/Master of Biomedical Engineering
BE MBiomedE

3683 Mechanical Engineering (plan MECHA13683)/Master of Biomedical Engineering (plan BIOMA13683)
A Bachelor of Engineering degree in Mechanical Engineering and a Master of Biomedical Engineering degree (BE MBiomedE) can both be completed in five years of concurrent study.

Year 1
BIOM1001 Professional Biomedical Studies 2 - 3
BIOM2010 Biomedical Engineering Practice 2 - 3
CHEM1817 Chemistry 1ME 3 - 3
MANF1130 Introduction to Manufacturing 7 - 6

### School of Mining Engineering

**Head of School:** Professor BK Hebblewhite  
**Director - Undergraduate Studies:** Dr Paul Hagan  
**Administrative Assistants:** Mrs Carol Bell, Mrs Kim Russell

Mining Engineering offers a diverse range of career path options, high salary levels and excellent opportunities for career progression. This is because it is a global profession that encompasses a wide range of activities involving people, technology, equipment, financial resources, community and government.

Mining Engineering is concerned with the safe, economic and environmentally sustainable recovery, processing and marketing of mineral resources from the earth. The Mining Engineering degree program includes elements from other disciplines including geology, metallurgy, commerce, economics and management. This means that graduates possessing knowledge of mining processes within this framework are very versatile and can progress rapidly both within the mining industry and in those sectors affiliated to the industry.

Career opportunities exist in areas such as operations and project management, and technical design at mine sites; corporate management within mining organisations; engineering design, geotechnical engineering, environmental engineering, risk management and technology developments with consultants, research organisations and equipment manufacturers; specialist mining software design and development with IT organisations; mine planning and design, financial evaluation and feasibility studies with merchant banks, stock brokers, mining organisations and consultants; policy formulation, administration and regulation with government; as well as opportunities in quarrying, tunneling for infrastructure development in urban areas, education and training.

Further details can be found at our website at [www.mining.unsw.edu.au](http://www.mining.unsw.edu.au)

### Program Outlines

The School offers a four year full-time program in Mining Engineering leading to the award of the degree of Bachelor of Engineering at Pass or Honours level. A five year combined degree program is also available with Civil Engineering, Science or Arts.

After graduation, mining engineers who choose to develop careers in operations management gain further practical experience to obtain a Mine Manager’s Certificate of Competency, in either Coal or Metalliferous Mining.

Formal arrangements are in place with the University of Newcastle and the University of Tasmania for students who have completed a specified program to be admitted with advanced standing to Year 3 of the program at UNSW. Recognition of students from other institutions or graduates of other disciplines may also be considered for advanced standing to the program.

#### 3140 Mining Engineering – Full-time Program

**Bachelor of Engineering BE**

Year 1 of the program includes courses that cover the sciences to provide the foundation for many of the engineering courses offered in Year 2. Year 3 is largely devoted to fundamental courses in mining engineering, while Year 4 provides advanced instruction in aspects essential for all mining engineers. In addition, the fourth year offers a range of electives that allow students to supplement their studies with a minor specialisation. A number of General Education courses are also prescribed in the program. In keeping with the international career opportunities, students are encouraged to undertake a foreign culture/language course as a General Education elective.

An important requirement in the fourth year is for students to undertake personal research or a study project in mining or minerals engineering for which they are required to submit a dissertation for examination.
High achieving students who have maintained a Distinction average grade can also choose to undertake a research project in Years 2 and 3 of the program.

For the award of Honours at the conclusion of the program, students will need to have distinguished themselves in the formal course work, in other assignments as directed by the Head of School and in the final year research project.

Some courses in the program require students to attend field trips as part of the learning process. This provides an opportunity for students to gain immediate practical insight into the application of the theoretical concepts presented in courses.

In the undergraduate program, it is compulsory for students to gain practical experience in the mining industry during successive long recesses. A minimum of 80 days needs to be completed on which a student must submit a report and give a presentation on the experience before graduation. The School assists students as much as possible in securing suitable vacation employment.

### Security

Students may enrol in one 6 UOC course from the following graduate courses offered by the Institute of Environmental Studies (IES), subject to approval of the Head of School and availability and approval of the IES in lieu of one Mining elective (3 UOC) and MINE4500 (3 UOC).

- BIOS9001 Fundamental Knowledge in Environmental Management: Ecology
- ECONS125 Fundamental Knowledge in Environmental Management: Economics
- IEST5001 Frameworks for Environmental Management
- IEST5002 Tools for Environmental Management
- LAWS3439 Fundamental Knowledge in Environmental Management: Law
- SCTS5317 Fundamental Knowledge in Environmental Management: Social Science

2. With the approval of the Head of School and subject to the student having achieved at least a Credit average in their previous studies, students may undertake MINE8780 Environmental Management in Mining in lieu of MINE4500 and one 3 UOC Mining elective.

### Course Selection

#### 3142 Mining Engineering/Bachelor of Science

**Bachelor of Engineering Bachelor of Science BE Bsc**

This option is available to students wishing to supplement their Mining Engineering program with courses from the Faculty of Science. The minimum time to complete this combined program is five years. The selection of specialisations in the Science component is quite flexible. It is important, however, that students discuss their interests with the relevant program authorities as programs may need to be individually tailored to suit each student. Also, students must undertake the Bsc in accordance with the requirements for the award of a BSc degree. There may be restrictions on course availability due to timetabling constraints.

A more structured program is available in the BE(Mining)/BSc(Computer Science) program. This combination is an excellent choice for students who have a strong computing interest. Details of this program are available from the School of Mining Engineering.

Please note that there may be a minimum UAI requirement for entry to the combined BE/BSc degree. Contact the School of Mining Engineering for more information.

#### 3144 Mining Engineering/Bachelor of Arts

**Bachelor of Engineering Bachelor of Arts BE BA**

A wide range of options is available in this five year combined degree program. The Bachelor of Arts degree must be completed in accordance with the requirements for the award of a BA. Students interested in this combined degree program must discuss their planned program with the individual program authorities. There may be restrictions on course availability due to timetabling constraints.

Please note that there may be a minimum UAI requirement for entry to the combined BE/BA degree. Contact the School of Mining Engineering for more information.

#### 3146 Civil Engineering and Mining Engineering

**Bachelor of Engineering Bachelor of Engineering BE BE**

Students initially enrol in courses in the Bachelor of Engineering (Civil Engineering) program 3620 which is administered by the School of Civil Engineering. The first three and one half years of the combined degree program are therefore identical to the 3620 program. After completing six sessions in the 3620 program, students may apply to enter the Bachelor of Engineering in Mining Engineering program 3146 which is administered by the School of Mining Engineering and aim to complete the mining requirements in four additional sessions.

Students considering this option should discuss the above arrangements with the relevant program authorities.

#### 3140 Mining Engineering/Master of Engineering Science

**Plan MINEP13140**

**Bachelor of Engineering Master of Engineering Science BE MEngSc**

Students may undertake a four and one half years (10 semesters) full-time combined program leading to the awards of a Bachelor of Engineering and a Master of Engineering in Mining Engineering. Students undertake the first three years (six semesters) of the BE program in Mining Engineering. Subject to satisfying a minimum performance over these three years (see “Rules for Progression and the Award of
Degrees”), they must (a) substitute 12 UOC in the standard Yr4 BE degree program with a School approved 12 UOC of graduate coursework in their 4th year; (b) undertake a 12 UOC project/thesis work over the Summer (9th) Semester; and (c) undertake 24 UOC of graduate coursework in the tenth semester (first half of their 5th year).

School of Petroleum Engineering

Director: Professor WV Pinczewski

Petroleum Engineering is a specialised engineering discipline which prepares graduates for careers in the oil and gas industries. Its related operations apply physical, mathematical and engineering principles to identify and solve problems associated with exploration, exploitation, drilling, production and all the related economic and management problems associated with the recovery of hydrocarbons and alternative sources of energy from deep beneath the earth’s surface.

The School of Petroleum Engineering offers both undergraduate and postgraduate programs as well as open learning programs on the Internet leading to the award of Graduate Diploma, Graduate Certificate and Master of Engineering Science degrees in Petroleum Engineering.

The undergraduate program for the award of a Bachelor of Engineering in Petroleum Engineering requires four years of full-time study. This degree is fully accredited and recognised internationally.

Entry is normally into Year 1 of the program. Students who satisfy the requirements of other full-time engineering degree programs at UNSW or any other Australian tertiary institution may be admitted into Year 2 or Year 3 of the undergraduate Petroleum Engineering program. These students will need to complete an appropriately modified Year 2 or Year 3 of the program as the case demands. The same requirements apply to students from accredited tertiary institutions in other countries. The award of Honours in the Petroleum Engineering program requires students to have distinguished themselves in the formal work, as well as in related assignments and industrial training periods as advised by the Director of Undergraduate Studies of the School.

Program Outlines

3045 Petroleum Engineering – Full-time (Hons)

Bachelor of Engineering BE

This program extends over four years and students study full-time during the day for 28 weeks of each year (excluding examinations and recess periods).

Successful completion of the BE degree program is accepted by the Institution of Engineers Australia, and the Institution of Chemical Engineers as sufficient academic qualification for corporate membership.

The Director of Undergraduate Studies may approve various program patterns involving full-time or part-time studies.

Students must take 6 UOC of ‘electives’ in Stage 3.
The program is designed for those wishing to broaden their career options. The degree of BE in Surveying and SIS is recognised by the Board of Surveyors of NSW as meeting the requirements for entry as a candidate to become a Registered Surveyor. The degree is also recognised by the Institution of Surveyors, Australia, and the Institution of Engineers Australia, for admission as corporate members.

**3741 Bachelor of Engineering in Surveying & SIS**

The BE in Surveying and SIS is a four year full-time degree program. This program aims to prepare a graduate for a broad range of career opportunities in the various branches of surveying and the numerous SIS disciplines. To this end, the program covers general scientific and IT principles, as well as specialised surveying and SIS topics. This specialisation is provided for through the provision of a wide range of elective courses offered in the third and fourth year of the program.

The degree of BE in Surveying and SIS is recognised by the Board of Surveyors of NSW as meeting the requirements for entry as a candidate to become a Registered Surveyor. The degree is also recognised by the Institution of Surveyors, Australia, and the Institution of Engineers Australia, for admission as corporate members.

**3746 Bachelor of Engineering in Surveying & SIS / Bachelor of Science**

This combined degree program of five years full-time study enables a student to qualify for the award of the two degrees of Bachelor of Science and Bachelor of Engineering in Surveying & SIS. This program is open to all students who satisfy both the Surveying & SIS and Science entry conditions. The program provides flexibility in the choice of courses within the full Arts program, and enables students to gain a broad education in Arts and Social Sciences, as well as undertake specialised studies in Surveying and SIS.

**3747 Bachelor of Engineering in Surveying & SIS / Bachelor of Arts**

With this combined five year degree program, students can add their choice of an Arts major to the standard, professionally accredited engineering program offered by the School of Surveying and Spatial Information Systems. The program is open to all students who satisfy both the Engineering and Arts entry conditions. The program provides flexibility in the choice of courses within the full Arts program, and enables students to gain a broad education in Arts and Social Sciences, as well as undertake specialised studies in Surveying and SIS.

The final program and schedule must be approved by the School of Surveying and Spatial Information Systems.

The Arts component must be approved by the Faculty of Arts and Social Sciences.

The Arts component must be approved by the Faculty of Arts and Social Sciences.

The Arts component must be approved by the Faculty of Arts and Social Sciences.

The Arts component must be approved by the Faculty of Arts and Social Sciences.

The final program and schedule must be approved by the School of Surveying and Spatial Information Systems.

Rules

1. In addition to the BE program, students must complete 60 units of credit in the BA program, with no more than 24 units of credit obtained at Level 1 (i.e. in programs designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one School or Department.

2. Students must complete a major sequence (42) units of credit in one of the areas of:

- Australian Studies*
- Chinese Studies*
- Development Studies*
- Education*
- English*
- Environmental Studies*
- European Studies*
- French*
- German Studies*
- Greek (Modern)*
- History*
- History & Philosophy of Science*
- Indonesian Studies*
- Japanese Studies*
- Linguistics*
- Media, Film and Theatre*
- Music*
- Philosophy*
- Policy Studies*
- Political Economy*
- Politics and International Relations*
- Russian Studies*
- Sociology and Anthropology*
- Spanish and Latin American Studies*
- Women’s and Gender Studies*

3. Students completing an Environmental Studies major sequence must complete, in addition to the 30 Upper Level units of credit specified, 6 Level 1 units of credit in an approved program. Students must also complete a minor sequence of 24 units of credit in one of the other areas listed in Rule 2, above.

* Students completing an Environmental Studies major sequence must complete, in addition to the 30 Upper Level units of credit specified, 6 Level 1 units of credit in an approved program. Students must also complete a minor sequence of 24 units of credit in one of the other areas listed in Rule 2, above.

3. Except for courses completed as part of the Environmental Studies major sequence, no more than 12 units of credit may be obtained from
courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE program can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students are exempt from the General Education requirement of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of the Honours year. It should be noted that entry into a particular BA Honours program requires completion of courses additional to those specified under Rules 1–4.

1) There will be a separate testamur for each part of the combined degree program.

3741 Surveying and Spatial Information Systems/Master of Engineering Science Fast Track Program – Plan GMATL13741

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering in Surveying and Spatial Information Systems. Students undertake the first three years (6 semesters) of the BE program in Surveying and Spatial Information Systems. Subject to satisfying a minimum performance over these three years (see “Rules for Progression and the Award of Degrees”), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) undertake a 12 units of credit of project/thesis work over the Summer (9th) Semester; and (c) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

Graduate School of Biomedical Engineering

Head of School: Professor BK Milthorpe

The Graduate School of Biomedical Engineering is an interdisciplinary unit which promotes and coordinates biomedical engineering studies and research being conducted by various schools and departments within the University and its teaching hospitals. Biomedical Engineering is the application of engineering techniques and analysis to problem solving in medicine and the biological sciences. The engineering disciplines embraced within the scope of Biomedical Engineering include: Electrical Engineering, Mechanical Engineering, Computer Engineering, Materials Science, Chemical Engineering, and Bioinformatics. Biomedical Engineering provides a direct input to enhancing the quality and scope of health care through the application of engineering analysis to biological systems and introducing engineering principles to medical and surgical interventions.

The Graduate School of Biomedical Engineering, in conjunction with the Schools of Mechanical and Manufacturing Engineering, Electrical Engineering and Telecommunications, Computer Science and Engineering, Material Science and Engineering, and Chemical Engineering and Industrial Chemistry, offers concurrent degree programs which allow the completion of a Bachelor of Engineering and a Master of Biomedical Engineering within a 5 year period.

Formal graduate courses in Biomedical Engineering are offered. These are: the Master of Biomedical Engineering, the Master of Engineering Science in Biomedical Engineering, and the Graduate Diploma in Biomedical Engineering. Opportunities are provided for graduate research leading to the award of the degrees of Master of Science, Master of Engineering and Doctor of Philosophy.

Concurrent Degree Programs

The concurrent degree programs are specifically designed for undergraduate students wishing to pursue a career in Biomedical Engineering. These programs allow students to enter an integrated course which provides both the prerequisite engineering education and the specialist Biomedical Engineering training.

Biomedical Engineering is available in concurrent degrees with Mechanical Engineering, Mechatronic Engineering, Electrical Engineering, Computer Engineering, Software Engineering, Chemical Engineering, Materials Science, Telecommunications Engineering, and Bioinformatics.

Students are expected to perform at a Credit average (65%) or better in their first three years to be permitted to progress to the Masters component of a concurrent degree program. Students who at the end of Year 3, do not satisfy the requirements for progression to the Masters component may complete the Bachelor of Engineering. At the completion of the Bachelor of Engineering, students may enroll in the Graduate Diploma in Biomedical Engineering with advanced standing for biomedical subjects previously completed.

Students may elect at any time to revert to the BE program. If, once entering a concurrent degree program, students wish to revert to the normal BE programs they will need to satisfy the requirements for the BE as set out in the relevant sections of this Handbook. Since the concurrent degree programs introduce subjects additional to those in the BE, the student reverting to the normal BE program may require up to an additional year to achieve a BE after completing years 3 or 4 of the concurrent degree program.

Professional Recognition

The Institution of Engineers, Australia, recognises the Bachelor of Engineering components of the BE/MBiomedE courses as meeting the examination requirements for admission to graduate and corporate membership. In addition, examination requirements are met for membership of the Institution's College of Biomedical Engineering. The degrees are accorded substantial or complete recognition by overseas engineering institutions.

Bachelor of Engineering Master of Biomedical Engineering

BE MBiomed E

Please contact Biomedical Engineering or go to the Biomedical Engineering website www.gsbme.unsw.edu.au for specific information on the concurrent degrees.

3757 Bachelor of Engineering (Bioinformatics)/Master of Biomedical Engineering

3048 Bachelor of Engineering (Chemical Engineering)/Master of Biomedical Engineering

3728 Bachelor of Engineering (Computer Engineering)/Master of Biomedical Engineering

3727 Bachelor of Engineering (Electrical Engineering)/Master of Biomedical Engineering

3138 Bachelor of Engineering (Materials Science)/Master of Biomedical Engineering

3683 Bachelor of Engineering (Mechanical Engineering)/Master of Biomedical Engineering

3688 Bachelor of Engineering (Mechatronic Engineering)/Master of Biomedical Engineering

3749 Bachelor of Engineering (Software Engineering)/Master of Biomedical Engineering

3723 Bachelor of Engineering (Telecommunications Engineering)/Master of Biomedical Engineering

Courses offered in each program can be found listed under the relevant undergraduate teaching school.

Further Study

Postgraduate coursework programs in Biomedical Engineering are also offered. These are the Master of Biomedical Engineering, the Master of Engineering Science in Biomedical Engineering, and the Graduate Diploma in Biomedical Engineering. Biomedical Engineering research programs offerings are the Master of Science, Master of Engineering and PhD. Research areas can be found listed in the Postgraduate Handbook or on the school website: www.gsbme.unsw.edu.au
Centre for Photovoltaic Engineering

Head of Centre: Dr R.P. Corkish
Director of Academic Studies: Scientia Professor S.R. Wenham
Director of Research: Scientia Professor M.A. Green
Undergraduate Coordinator: Dr J.E. Cotter
Postgraduate Coordinator: Dr A.B. Sproul
Research Coordinator: A/Prof A. G. Aberle
Administrative Office Manager: Ms. T. Burns

The Centre for Photovoltaic Engineering was formerly part of the School of Electrical Engineering, it originally comprised three centres established by the Australian Research Council: the Photovoltaics Special Research Centre, the Key Centre for Teaching and Research in Photovoltaic Engineering and the Special Research Centre for Third Generation Photovoltaics. However, a new centre was established in 2003 merging the three centres into the UNSW Centre of Excellence for Advanced Silicon Photovoltaics and Photonics. The need for the centre and its educational programs has arisen due to rapid growth and evolution in the photovoltaic industry in recent years, with considerable demand by industry for UNSW developed technologies and appropriately trained engineers across the entire photovoltaic and renewable energy sectors.

The Centre for Photovoltaic Engineering offers undergraduate and postgraduate training encompassing all aspects of the photovoltaic and renewable energy sectors. Innovative teaching techniques have been developed to enhance the learning environment. UNSW academics in the photovoltaic field have been consistently ranked amongst the leaders worldwide through international peer review. This team has held the world record for silicon solar cell efficiencies for almost 15 years and has been responsible for developing the most successfully commercialised new photovoltaic technology internationally throughout the same period.

Program Outlines

3642 Photovoltaics and Solar Energy – Full-time – Plan SOLAA13642

Bachelor of Engineering BE

Introduction

The undergraduate engineering degree in Photovoltaics (PV) and Solar Energy was established in 2000 and is a four-year full-time program. It is the first of its kind internationally and was established in response to rapid growth in the industry in recent years in both manufacturing capacity and job creation.

The program includes training in technology development, manufacturing, quality control, reliability and lifecycle analysis, cell interconnection and encapsulation, the full range of solar cell applications, system design, maintenance and fault diagnosis, marketing, policy development and the use of other major renewable energy technologies. Considerable emphasis is placed on gaining hands-on experience of working with PV devices, modules and systems.

Second Area of Specialisation

The cross-disciplinary nature of photovoltaics and renewable energy applications necessitates many PV engineers possessing broad engineering backgrounds or else working in teams with other engineers.

A good example is the UNSW solar car project involving PV engineers with skills suitting most areas of the project; mechanical engineers for the aerodynamics and mechanical design, chemical engineers in relation to battery technology, power engineers for motor technology, biomedical engineers for monitoring driver performance and fatigue, computer engineers, communications engineers, electronics engineers, control engineers etc.

A unique feature of this program is that, in Year 2, students have the opportunity to select a strand to complement their education in photovoltaics and solar energy. Each strand comprises 18 units of credit with the opportunity to subsequently select additional electives in the corresponding area in the final two years, subject to the approval of the Head of the Centre. The strands available are listed below and cover areas such as computing, electronics, mathematics, mechanical engineering, civil engineering, physics, chemical engineering and architecture. Students may also formulate their own strands subject to the approval of the Undergraduate Coordinator.

Years 2 & 3 Strand Options

Please note: the strands listed here are subject to change. Students should consult the School Office for the most current list of approved strands.

**Strand 1 Computing**

- COMP1011 Computing 1A, or
- COMP1711 Higher Computing 1A* 
  6 - 6
- COMP1021 Computing 1B, or
- COMP1721 Higher Computing 1B* 
  - 6 - 6

And choice from the following to complete the strand:

- COMP2011 Data Organisation, or
- COMP2711 Higher Data Organisation* 
  5 - 6
- COMP3111 Software Engineering 
  5 - 6
- ELEC2041 Microprocessors and Interfacing 
  4 - 6

*Students must choose whether to take the course at the ordinary or higher level.

**Strand 2 Electronics**

- ELEC2032 Electronics and Systems 
  - 3 3
- ELEC2042 Real Time Instrumentation 
  3 - 3
- ELEC3006 Electronics A 
  5 - 6

And choice from the following to complete the strand:

- ELEC4240 Power Electronics 
  4 - 6
- ELEC4503 Electronics C 
  4 - 6
- ELEC4522 Microelectronics Design and Technology 
  4 - 6
- ELEC3017 Electrical Engineering Design 
  - 5 6

**Strand 3 Electric Energy**

- ELEC2015 Electromagnetic Applications 
  - 3 3
- ELEC3005 Electrical Energy 1 
  5 - 6
- MATH2011 Several Variable Calculus 
  5 - 6
- PHYS2939 Physics 2 (Electrical Engineering) 
  3 - 3

**Strand 4 Communications and Control**

- ELEC2032 Electronics and Systems 
  3 - 3
- ELEC2042 Real Time Instrumentation 
  - 3 3
- MATH2011 Several Variable Calculus 
  5 - 6

And choice from the following to complete the strand:

- ELEC3004 Signal Processing and Transform Methods 
  5 - 6
- ELEC3014 Systems and Control 1 
  - 5 6
- TELE3013 Telecommunication Systems 
  4 - 6

**Strand 5 Mathematics**

- MATH2011 Several Variable Calculus 
  5 - 6
- MATH2520 Complex Analysis 
  - 2 3
- MATH2509 Linear Algebra for Engineers 
  - 3 3

And choice from the following to complete the strand:

- MATH3041 Mathematical Modelling for Real World Systems 
  4 - 6
- MATH3121 Mathematical Methods 
  4 - 6
- MATH3241 Fluid Dynamics 
  4 - 6
- MATH3261 Atmosphere-Ocean Dynamics 
  - 4 6

**Strand 6 Mechanical Engineering**

- MECH2611 Fluid Mechanics A 
  2 - 3
- MECH2612 Fluid Mechanics B 
  - 2 3
- MECH2711 Thermodynamics A 
  2 - 3
- MECH2712 Thermodynamics B 
  - 2 3

And choice from the following to complete the strand:

- MECH3601 Thermodfluid System Design 
  3 - 3
- MECH3602 Advanced Thermodynamics 
  - 3 3
- MECH9720 Solar Thermal Energy Design 
  - 3 6
- MECH9740 Power Plant Engineering 
  - 3 6

**Strand 7 Civil Engineering**

- CVEN1023 Statics 
  3 - 4
- CVEN1026 Engineering Materials 1 
  - 3 4
- CVEN1021 Civil Engineering Practice 1A 
  2 - 4
- CVEN2023 Mechanics of Solids 
  3 - 3
- CVEN2026 Engineering Materials 2 
  3 - 3

**Strand 8 Chemical Engineering**

- CEIC1020 Intro to Chemical Engineering 
  - 6 6
- CEIC2120 Fluid Flow 
  3 - 3
- CEIC2110 Material and Energy Balances 
  3 - 3
- CEIC2130 Heat Transfer 
  - 3 3
- CEIC3110 Thermodynamics 
  3 - 3

**Strand 9 Physics**

- MATH2011 Several Variable Calculus 
  5 - 6
- PHYS2040 Quantum Physics 
  2 - 3
- PHYS2060 Thermal Physics 
  - 2 3

And choice from the following to complete the strand:

- PHYS3010 Quantum Mechanics (Advanced) 
  2 - 3
- PHYS3020 Statistical Physics 
  - 2 3
- PHYS3080* Solid State Physics 
  2 - 3
- PHYS3210 Quantum Mechanics 
  2 - 3
- PHYS3310* Physics of Solid State Devices 
  - 2 3
- PHYS3770 Laser and Spectroscopy Laboratory 
  4 - 3

*PHYS3080 has PHYS3010 or PHYS3210 and PHYS3020 as co-requisites.

*PHYS3310 has PHYS3080 as a prerequisite.

**Strand 10 Faculty of the Built Environment**

- BENV1072* Design for Energy Efficiency 
  - 3 6

And choice from the following to complete the strand:

- BLDG1050 Structures 1 
  - 4 6
- BLDG1211 Construction Technology 1A (Domestic Construction) 
  4 - 6
- BLDG1212* Construction Technology 1B (Low Rise Residential) 
  - 4 6
- BENV1242* Computer-Aided Design 
  - 3 3
- BENV1341* Design Modeling and Visualisation 
  3 - 3
- BENV2103 Environmental Planning 
  - 2 3
- BENV2720 Intro to Lighting and Acoustics 
  2 - 4
- BENV2901 City Planning Today 
  2 - 3

*Please note:
  - BENV1072 requires a WAIVER from prerequisite ARCH1271 – Architectural Technology 3
  - BLDG1212 requires COMPLETION of BLDG1211 – Construction Technology 1A
  - BENV1242 requires a WAIVER from prerequisite BENV1141 – Computer & Information Technology
  - BENV1341 requires COMPLETION of BENV1242 – Computer-Aided Design

**Professional Electives for Years 3 & 4**

Because of timetable clashes not all combinations of subjects are possible.

- SOLA5011 Solar Cells: Operating Principles 
  - 4 6
- SOLA5050 Renewable Energy Policy and International Programs 
  - 3 6
- SOLA5051 Life Cycle Assessment 
  - 4 6
- SOLA5052 Biomass 
  - 4 6
- SOLA5053 Wind Energy Converters 
  - 4 6
- SOLA5054 Photovoltaic Stand-Alone System Design and Installation 
  - 4 6
- SOLA5056 Sustainable Energy in Developing Countries 
  - 4 6
- SOLA5058 Special Topic in Photovoltaics 
  4 or 6 6
- SOLA5059 Industrial Elective 
  6
- SOLA5060 Industrial Elective 
  3
- SOLA5061 Industrial Elective 
  4
- SOLA9005 Advanced Semiconductors Devices* 
  - 3 6
- MECH9720 Solar Energy 
  - 3 6
- MECH9740 Thermal Power Plant Engineering 
  - 3 6

*This postgraduate course may be substituted for an undergraduate professional elective with permission from the Head of the Centre.

Electives can also be chosen from the courses listed as electives for Electrical Engineering, Mechanical Engineering, Civil Engineering, Environmental Engineering, Computer Science and Engineering and Chemical Engineering for which appropriate prerequisite requirements have been satisfied and which conform to the credit point requirements.

The program selected by each student must be approved by the Head of Centre. Not all electives are available each session or each year, nor is the full range available to part-time students. Students are advised each year of the timetable of available electives. Substitution is not permitted if it unduly restricts the range of subjects studied to only one area of Photovoltaic Engineering.
3657 Renewable Energy Engineering – Full-time – Plan SOLAA13657

Bachelor of Engineering BE

This program commenced in 2003 and is a four year full-time program.

During development of the program, discussions on course content were held with Australian manufacturers, major end-users, the NSW Sustainable Energy Development Authority, the former Australian CRC for Renewable Energy and the former industry representative association, Solar Energy Industries Association of Australia, now incorporated into the Australian Business Council for Sustainable Energy. These organisations have representatives on the Advisory Committee established for the Centre for Photovoltaic Engineering.

Consultation has also taken place with other schools within UNSW. In particular, the program has been developed in collaboration with the School of Mechanical Engineering, the School of Electrical Engineering and Telecommunications and the Faculty of the Built Environment. All of these units offer courses within the program.

Approximately half the material for this degree program is in common with the Photovoltaics and Solar Energy program. However, Renewable Energy Engineering encompasses a broader range of renewable energy technologies and their use. These include electricity generation from solar thermal systems, photovoltaics, wind generators, biomass, tidal energy, fuel cells, geothermal systems, and also includes the important areas of solar architecture and the design of energy efficient housing.

year of study is normally required to gain the additional qualification of Bachelor of Science.

Students should start discussing their program with representatives of the Faculty of Science as soon as possible, preferably well before enrolment in Year 2. Enquiries should be directed to the Science Student Centre.

Students should work out for themselves the Science program they would like to add to their chosen Engineering program. The Faculty of Science section in this Handbook describes the options.

There are no special rules on what to include in each year. Students should schedule the Science and Engineering components to suit their preferences while meeting the constraints of timetables and prerequisites. The Science component must be approved by the Science Student Centre. The final program and schedule must be approved by the Centre for Photovoltaic Engineering.

3656 Photovoltaics and Solar Energy/Bachelor of Arts – SOLAA13656

Bachelor of Engineering Bachelor of Arts BE BA

With this combined degree program, students can add their choice of Arts program to the standard Engineering program offered by the Centre for Photovoltaic Engineering. The full range of Arts courses is available. Because the Engineering and Arts programs have many common objectives and content, such as mathematics and physics, only one more year of study is normally required to gain the additional qualification of Bachelor of Arts.

Students should start discussing their program with representatives of the Faculty of Arts and Social Sciences as soon as possible, preferably well before enrolment in Year 2. Enquiries should be directed to the Director of Academic Studies and the Manager, Student Administration, the Faculty of Arts and Social Sciences.

Students should work out for themselves the Arts program they would like to add to their chosen Engineering program. The Faculty of Arts and Social Sciences section in this Handbook describes the options. There are no special rules on what to include in each year. Students should schedule the Arts and Engineering components to suit their preferences while meeting the constraints of timetables and prerequisites. The Arts component must be approved by the Faculty of Arts and Social Sciences. The final program and schedule must be approved by the Centre for Photovoltaic Engineering.

Fast-Track Programs

3642 Photovoltaics and Solar Energy/Master of Engineering Science

Bachelor of Engineering Master of Engineering Science BE MEngSc

This fast-track program allows students to complete a Bachelor of Engineering and a Master of Engineering Science in four and a half years of full-time study. Students:

a. undertake the first three years of their standard BE program,

b. substitute 12 units of credit of professional electives for postgraduate courses in their 4th year,

c. complete a 12 unit of credit project in the summer session following completion of the BE, and

d. complete the remaining 24 units of credit the following session.

To be eligible for this program, students must have a minimum weighted average of a Credit in the first three years of their undergraduate engineering degree program. Application is made in writing to the School Office at the end of a student’s 3rd year of studies.
A Message from the Dean

Welcome to the UNSW Law Faculty. It is a pleasure to know that you are interested in our educational philosophy, teaching programs and rich intellectual and professional traditions. The UNSW Law Faculty is committed to teaching and scholarly excellence within a setting of social responsibility. We are also dedicated to preserving the highest levels of student satisfaction in their legal and taxation education.

A Distinctive Faculty

The UNSW Law Faculty has a number of important distinguishing features. The Faculty believes that intellectual and social development is best honed when student views are recognised, appreciated and shared.

The Law School, from its inception, began a new tradition of teaching in Australia: interactive teaching and learning in small groups. This mode has since become a model in other law faculties as well. We believe that teaching in small groups of around 40 students stimulates the educational process. The result is a more robust and sharpened learning environment that helps students to develop superior powers of legal analysis.

Our Tax School, Atax, offers a unique distance education program in taxation that is consistent with small group teaching. Our specialised legal centres provide hands-on small group interaction in which students can learn about human rights, indigenous legal rights, constitutional and comparative law, and financial, consumer and youth law. Our library staff further complement small group teaching with their own strong backgrounds in research and service. Last, but not least, our law student representatives actively engage in Law Faculty governance on key committees and in day-to-day administration of Faculty affairs.

An Educational and Professional Environment

Legal education at UNSW reflects two parallel traditions. It combines the tradition of a university education with the professional education of lawyers and those engaged in the taxation profession. While these two traditions are sometimes viewed as disparate, the UNSW Law Faculty treats them as complementary, indeed as mutually reinforcing. We stress the virtue of exploring and applying ideas both as a matter of intellectual inquiry and in applying legal principles to diverse social contexts.

We also hold that a legal education is intended to expose students to social responsibility in its diverse manifestations. We recognise such social responsibility variously, such as by requiring students to participate in the work of the Kingsford Legal Centre (the Faculty’s community legal centre).

We believe, too, that social and legal institutions are mirrored in diversity, not in the pre-emptive interests of any one social group to the exclusion of all others. The UNSW Law Faculty provides education in human rights and consumer law. It also does so in corporate and commercial law. Legal education is a tapestry of difference, not of monolithic uniformity.

We invite you to join us at the UNSW Law Faculty. We challenge you to question tried and tested ideas. We encourage you to study through discourse and to learn by example. Legal education at UNSW is concerned, not only with higher values, but also with applying them in an ethical, coherent and ultimately, sustainable manner.

Leon Trakman, SJD (Harvard)
Dean and Professor of Law

School of Law
Information and Assistance

Some People Who Can Help You
If you require advice about enrolment, degree requirements, progression within programs or information about course content and requirements, contact the School of Law Student Administration Office, Level 10, Library Tower.
Please refer to the School of Law homepage for timetables and general information: www.law.unsw.edu.au
For enquiries relating to Atax, please contact the Atax Student Services Office, telephone (02) 9385 9333.

Advanced Standing
The policy of the School of Law is to grant credit for courses which have been successfully completed in another School of Law where those courses, in the opinion of the School, are equivalent in content and depth to comparable courses at UNSW. Applicants who have completed a full law degree in another country are normally granted credit equivalent to one third of the UNSW degree. All matters regarding credit are at the discretion of the School.

Computing Information
The School of Law manages a multimedia computer laboratory equipped with 26 PCs for instructional purposes. In addition, law students have access to two multimedia computer workspaces which contain 15 networked computers and smart-card controlled laser printers. Research students have access to two dedicated computer workspaces equipped with 21 multimedia computers and printing facilities. The School maintains a World Wide Web server, a CD-ROM server and a document scanning and Character Recognition facility. All students have access to a range of research tools from the computer desktops including email, online and CD-ROM based national and international legal databases, library catalogues and World Wide Web access. For more information, please refer to the booklet ‘IT Resources for Students’ or visit the website at www.law.unsw.edu.au

Course Descriptions
Descriptions of courses offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Enrolment Procedures
Continuing Students
Continuing students should follow the procedures publicised at the end of the year.

New Students
New students are informed of enrolment procedures at the time of offer.

Full-time Status
The majority of Law programs are full-time and require attendance at classes four days per week. Students are reminded that a full-time program is intended for students who devote the principal part of their available time to their program. Any additional commitment, in the form of paid work, training for sport at a significant level of achievement or voluntary work in community organisations, is bound to have an effect on a student’s work. Past experience shows that additional commitments beyond 10–15 hours per week almost invariably have an adverse effect on student performance and in some cases have led directly to failure. Students are strongly advised that, if an outside commitment of this order is likely to be maintained consistently over a session, the commitment should be discussed in advance with the Associate Dean (Undergraduate). It should be noted, however, that it is the individual teachers who determine whether outside commitments should constitute grounds for consideration in meeting the requirements of particular courses.
Part-time Status

Students undertaking the part-time program for Bachelor of Laws are expected to attend classes on two afternoons per week during the academic year, usually between 2pm and 8pm on Day 1 and 2pm and 6pm on Day 2.

General Education Requirements

Law students enrolled in the Bachelor of Jurisprudence Bachelor of Laws program must complete General Education requirements. All other law students are deemed to have satisfied the General Education requirement. Detailed information about General Education courses is available in the General Education section of this Handbook.

Guidelines for Maximum Workload

The sequence of study for each program is set out under ‘Program Outlines’ in this section of the Handbook. Any student wishing to vary their program (law or non-law) by enrolling in a reduced program or in courses which do not conform to the normal sequence, must seek approval from the Associate Dean (Undergraduate).

Undergraduate students wishing to take extra courses must submit an ‘Overload Request’ form at the Level 10 Enquiry Counter. Permission can only be given on the basis of a written application in advance of the relevant session.

Rules for Progression

The School of Law uses a range of assessment methods to assess students. These vary from course to course and include formal examinations, take-home examinations, research projects, class participation, essays and moots (mock trials).

Progression in programs is generally dependent on the successful completion of prerequisites and corequisites for courses as listed in the schedules of courses for each program. Students are required to have completed 84 units of credit of core Law courses before enrolling in any elective course.

Where the academic record of students is not of a satisfactory standard, the Associate Dean (Undergraduate) may recommend a restricted program. This applies to all undergraduate programs offered by the Faculty.

Cross-Institutional Studies and Exchange Programs

Students enrolled at UNSW may be permitted to undertake some studies at overseas (exchange) or interstate institutions (cross-institutional studies) provided that they are equivalent in content and depth to comparable courses at UNSW.

Courses which have been successfully completed at another law school (either in Australia or overseas) may be credited to the student’s degree up to a maximum of 48 UOC.

The School participates in several overseas exchange programs, and encourages students to take advantage of these. Information regarding these programs can be obtained from the administrative staff.

Students should discuss their plans for cross-institutional studies with the appropriate student advisor in order to determine both their eligibility to undertake such studies and the ‘credibility’ of the courses under consideration.

Financial Assistance to Students

Full-time and part-time students within the School of Law in need of temporary financial assistance, at any time during their studies, should be aware of the existence of certain grants and loans sponsored by some Sydney law firms. Students who feel they may need assistance of this type are invited to discuss their requirements on a strictly confidential basis with the Dean.

Professional Associates

In addition to full-time teaching staff in the School of Law, each year there are a small number of distinguished members of the legal profession in NSW who work in close association with full-time teachers. They participate in all aspects of the presentation of programs covered by their professional specialisation.

Student Representatives

Each year in October up to nine students are elected to membership of the Faculty for the following year. All students enrolled in the Faculty are eligible to stand for election and to vote. Student Members attend School meetings and sit on various Faculty and School Committees.

The Law Society

The Law Society is the students’ body which you automatically join on enrolling as a law student. The administration of the Society consists of the Executive and various committees. Members of the Executive and the committees are your representatives within the School of Law. As such they are there to help with problems that may arise such as assessment. They are also there to ensure that an effective student voice is presented to the School.

The Law Society organises social events, careers events, student publications, competitions and various other activities. The social events include first year law camp, Law Ball, harbour cruise, sports events, intervarsity trivia quiz and regular drinks nights and barbecues. The Law Society publishes a magazine with contributions from students, called Poetic Justice; a weekly newsletter within the faculty known as Innominata; the Law Annual; the Alternative Law Handbook and careers guides. The Law Society also runs the internal mooting, witness examination, client counselling and negotiation competitions. A speakers’ forum with guest speakers from the judiciary, legal practitioners and public figures is held every couple of weeks. The Law Society and the Law Faculty also hold an annual Valedictory Dinner. The Society has officers representing the concerns of international and graduate law students and is involved in the Australasian Law Students’ Association. All students are welcome to be involved.

The Law Society office is Room 1112, telephone (02) 9385 2271, email lawsoc@unsw.edu.au, website www.unswlawsoc.org

Program and Course Information

The following programs are available:

Law Programs
1. Bachelor of Laws (three years full-time), this program is available only to graduates or graduands.
2. Bachelor of Laws (six years part-time), this program is only available to graduates and people over 21 years of age who have completed the University Preparation Program to the requisite standard.

Jurisprudence Program
3. Bachelor of Jurisprudence (three years full-time), this program is only available as part of the combined Juris/Law program. Students unable to complete the requirements for the combined degree may apply to graduate with a BJuris.

Combined Programs
4. Bachelor of Architecture and Bachelor of Laws (seven years full-time)
5. Bachelor of Art Theory and Bachelor of Laws (five years full-time)
6. Bachelor of Arts and Bachelor of Laws (five years full-time)
7. Bachelor of Arts (Asian Studies) and Bachelor of Laws*
8. Bachelor of Arts (Media and Communications) and Bachelor of Laws (five years full-time)
9. Bachelor of Commerce and Bachelor of Laws (five years full-time)
10. Bachelor of Economics and Bachelor of Laws (five years full-time)
11. Bachelor of Engineering and Bachelor of Laws (six years full-time)
12. Bachelor of International Studies and Bachelor of Laws (six years full-time)
13. Bachelor of Jurisprudence and Bachelor of Laws (five years full-time)
14. Bachelor of Planning and Bachelor of Laws (seven years full-time)
15. Bachelor of Science and Bachelor of Laws (five years full-time)
16. Bachelor of Social Science and Bachelor of Laws (five years full-time)
17. Bachelor of Social Work and Bachelor of Laws (six years full-time)

* The last admission to this program was in 2002.

Admission to Combined Programs

Students who satisfy the entry requirements may enter the combined programs directly in Year 1. Alternatively, students may apply to transfer into a combined law degree after the completion of one year of study (48 units of credit). Admission is based on a combination of UAI score and tertiary results.
Program Transfers: Students enrolled in combined law programs who discover they have made a wrong choice of program should consult a student advisor in the School of Law as soon as possible. It is sometimes possible to effect changes without seriously affecting progress in the new program; the earlier the change can be made, the easier the transition.

Program Outlines

Bachelor of Laws Degree Program (Full-time) for Graduates or Graduands

4790 Bachelor of Laws

LLB 3 Years Full-Time

This program enables students who have already completed another degree to obtain the Bachelor of Laws degree. The main features of the program are as follows:

1. Duration/Award: The program is a three year full-time program leading to the award of Bachelor of Laws (LLB).

2. Entry Requirement: The program is available to graduates or graduands of another faculty of UNSW or another approved university.

3. Attendance Requirement: This program is full-time and requires attendance at classes for four days per week. A part-time version of this program is available for those students who are unable to study full-time (see program 4791).

4. Approved Sequence: There is no assumed knowledge requirement for entry to Faculty of Law courses but students must study law courses in an approved sequence. An approved sequence of courses for the program is set out below; other sequences may be approved in special circumstances.

Bachelor of Laws Degree Program (Part-time)

4791 Bachelor of Laws

LLB 6 Years Part-Time

1. Duration/Award: The program is a six year part-time program leading to the award of Bachelor of Laws and satisfies academic requirements for admission to practice.

2. Entry Requirement: The program is only available to graduates and people over 21 years of age who have completed the University Preparation Program. The program is not available to people who proceed directly from the Higher School Certificate.

3. Attendance Requirement: The program involves attendance at classes on two afternoons a week.

4. Electives: The courses of the LLB degree program are set out in Rule 5 appearing later under ‘Rules for Award of Degrees’. However, it will not be possible to provide the full range of electives at times convenient to part-time students.

5. Approved Sequence of Study: Students must study law courses in an approved sequence. An approved sequence of courses for the program is set out below; other sequences may be approved in special circumstances.

6. Transfer to the Full-Time Program: Students enrolled in program 4791 (Part-Time) are eligible to apply to transfer to 4790 (Full-time) after completing 48 units of credit in the part-time program.

Combined Jurisprudence/Law Program

4780 Bachelor of Jurisprudence Bachelor of Laws

Bjuris LLB 5 Years Full-Time

This program combines the professional Bachelor of Law (LLB) program with the Bachelor of Jurisprudence (Bjuris).

The Bjuris degree is available either as part of the combined Jurisprudence/Law program or an “exit degree” for students who decide after admission not to proceed with the LLB degree. It is not available as a separate pass degree for admission purposes. Students wishing to graduate with a Bjuris must satisfy the requirements as listed in Rule 10 of the ‘Rules for the Award of Degrees’. The Bachelor of Jurisprudence, unlike the LLB degree, is not designed to provide a qualification for the professional practice of law. It provides a basic knowledge of law, an opportunity to study selected legal courses of special interest, and significant study in other faculties. Various
combinations of non-law courses are possible and the program may be moulded to meet various vocational ends, e.g. for industrial officers or advocates, public servants, business executives or law librarians.

Teaching methods in Law courses are the same as in the LLB program.

1. **Duration/Awards**: The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Jurisprudence and Bachelor of Laws (BJuris LLB).

2. **Assumed Knowledge**: Students must satisfy any assumed knowledge requirements but not general Faculty assumed knowledge requirements for courses studied in other faculties.

3. **Non-Law Courses**: The non-law courses shall include, unless otherwise approved, a major sequence of 42 units of credit approved by the Faculty offering the major sequence. There is an additional requirement of 12 units of credit of non-law courses.

Students are required to obtain the approval of the School of Law for their proposed program of non-law courses and the order in which they are to be studied. In approving such courses, the School shall have regard to the contribution the study of such courses may reasonably be expected to make to the development of his or her capacity as a lawyer and understanding of the law.

4. **BJuris**: Candidates may be awarded the degree of Bachelor of Jurisprudence subject to satisfying the requirements as listed in Rule 10 of the Rules for the Award of Degrees, including satisfaction of General Education requirements for the single pass degree (12 units of credit).

5. **General Education**: Candidates for the BJuris LLB must complete 6 units of credit of general education. BJuris LLB is the only combined law program which has a general education requirement.

6. **Approved Sequence of Study**: Students must study non-law courses in a sequence approved by the non-law faculty and the Faculty of Law, and law courses in a sequence approved by the Faculty of Law. Approved sequences for each combined program are given below; other sequences may be approved under special circumstances.

**Faculty of Arts & Social Sciences and Faculty of Law**

**4760 Bachelor of Arts Bachelor of Laws**

**BA LLB 5 Years Full-Time**

This program combines the professional Bachelor of Law program with a Bachelor of Arts and provides maximum flexibility to follow individual interests in the humanities. Disciplines for the Bachelor of Arts include: Australian Studies, Chinese Studies, Cognitive Science, Development Studies, Education, English, Environmental Studies, European Studies, Film and Theatre, French, German Studies, Greek (Modern), History, History and Philosophy of Science, Indonesian Studies, Italian, Japanese Studies, Jewish Studies, Korean Studies, Linguistics, Music, Philosophy, Political Economy, Politics and International Relations, Russian Studies, Policy Studies, Sociology and Anthropology, Spanish and Latin American Studies, Women’s and Gender Studies.

**Career Prospects**

In a world where people increasingly have a number of career shifts in their life-time, humanities and social science graduates possess a unique combination of intellectual and analytical skills which can be readily transferred from one occupation to another. Someone planning a career in policy making, diplomacy, international relations or legal practice will find the BA LLB an excellent preparation.

1. **Duration/Award**: The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Arts and Bachelor of Laws (BA LLB).

2. **Honours**: Students wishing to take the BA degree program at Honours level must obtain prior approval from the relevant school in the Faculty of Arts and Social Sciences. At least one and possibly two additional years of study are required.

The LLB degree program is not available with Honours.

3. **Completion Requirements**: Both degrees must be studied concurrently with the expectation that students complete the full five year program prior to graduating with the two degrees. It is not permissible for students enrolled in combined Law programs to graduate from the LLB degree until they have completed requirements for the non-Law degree.

4. **Transfer Arrangements**: Students who find in Years 1 to 2 that they are unable to complete the combined degree may apply to transfer to the single BA program.

5. **Arts & Social Science Courses**: Students must complete a total of 84 units of credit of approved Arts & Social Sciences courses from at least three schools or programs. The 84 UOC must include:

   (i) a major sequence from one school or program. Details of approved major sequences can be found in Lists A and B of the Rules for the Award of Degrees, 3-400 BA program. The standard major is made up of 42 units of credit (7 courses x 6 UOC);

   (ii) at least 12 Upper Level units of credit from other schools or programs.

6. **Approved Sequence of Study**: Students must study Arts courses in a sequence approved by the Faculty of Arts and Social Sciences and Law courses in a sequence approved by the School of Law. An approved sequence is given below; other sequences may be approved under special circumstances.

LAWS1052 Computation and legal issues is completed in their fourth year of law studies, which is the final year of the combined degree program.

Career Information
This degree combination would be of interest to students interested in becoming media lawyers, or in the fields of broadcast media (video-based), multimedia production and post-production; research, administration and policy analysis for private corporations, telecommunications companies and government departments.

Program Outline
In addition to studying 8 courses in the Media and Communications core program, students complete 6 courses from List A of the Faculty of Arts and Social Science, to permit them to study a second field in depth.* Years 1 and 2 cover multimedia writing and production and contextual media studies. Year 3 consolidates the program's emphasis on production and analytical skills. This grounding enables students to interpret, create and apply the products of new media not only in the context of the mass information and entertainment industries, but also in a variety of other public and private sector areas such as education, on-the-job training and specialised information services.

How to Choose Your First Year Program
For Session 1, enrol in the core courses LAWS1052 (coursework and research component) and MDCM1000, then choose one of the areas from List A that you would like to specialise in, and select two Level 1 courses.

For Session 2, enrol in LAWS1061 and MDCM1001, then choose two Level 1 courses from your List A selection.

Conditions Governing the Award of the Degrees
1. Duration/Award: The program is a five year full-time combined program leading to the award of two degrees. Graduates will receive two testamurs, Bachelor of Arts (Media and Communications) (BA (Media) and Bachelor of Laws (LLB).

2. Honours: The BA (Media) component of the combined degree is available with Honours which requires an additional year of study. For entry to the Honours year, students must have normally completed 8 MDCM courses (48 units of credit) with a grade average of at least 65%. Interested applicants must obtain prior approval from the School of Media and Communications.

The LLB degree program is not available with Honours.

3. Completion Requirements: Both degrees must be studied concurrently with the expectation that students complete the full five year program prior to graduating with the two degrees. It is not permissible for students enrolled in combined law programs to graduate from the LLB degree until they have completed requirements for the non-law degree.

4. Transfer Arrangements: Students who find in Years 1 to 2 that they are unable to complete the combined degree may apply to transfer to the single BA degree. It is not permissible for combined Law students to transfer to the single LLB degree.

5. Arts & Social Science Courses 84 UOC
(i) 8 prescribed courses from the Media and Communications (MDCM) core program:

(ii) 6 approved courses from List A of the BA rules (comprising 4 courses at Level 1, and 2 Upper Level courses):

(iii) 6 approved courses from List A of the Faculty of Arts and Social Sciences.

*If a major is selected which requires less than 42 units of credit students will be expected to make up the shortfall by completing another elective approved by the Faculty of Arts & Social Sciences.

4764 Bachelor of Arts (Media and Communications)

BA (Media) LLB 5 Years Full-Time

This program combines the professional Bachelor of Law program with the Bachelor of Arts (Media and Communications).

The Bachelor of Arts (Media and Communications) emphasises new computer-based multimedia skills and focuses on Australian media industries in relation to globalisation. The degree is vocationally relevant in its orientation and all students are given significant practical experience in new computer-based multimedia communication technologies. It aims to develop in students a sophisticated understanding of the history, scope and socio-cultural impact of new media technologies, and of the debates that have accompanied their development and use. Second, it offers extensive experience in the production of new media content appropriate for employment in the contemporary media.

Career Information
This degree combination would be of interest to students interested in becoming media lawyers, or in the fields of broadcast media (video-based), multimedia production and post-production; research, administration and policy analysis for private corporations, telecommunications companies and government departments.
6. Law Courses 156 UOC

(i) Prescribed sequence of core courses (17 courses totalling 92 units of credit).
(ii) 8 Law electives (8 courses totalling 64 units of credit).

7. Program Structure and Approved Sequence of Study:
The program is structured to allow concurrent study in the two degrees in the first three years with the last two years dedicated to completing the Law component of the LLB.

Students must study Arts courses in a sequence approved by the Faculty of Arts and Social Sciences and Law courses in a sequence approved by the Faculty of Law. Prior to enrolling in electives students are expected to have completed the majority of the core courses.

The approved sequence of study is given below. Other sequences may be approved under special circumstances.

4766 Bachelor of International Studies (Asian Studies) Bachelor of Laws

4767 Bachelor of International Studies (European Studies) Bachelor of Laws

4768 Bachelor of International Studies (Globalisation) Bachelor of Laws

4769 Bachelor of International Studies (Languages) Bachelor of Laws

These programs are no longer available to commencing students. Students currently enrolled in these programs should refer to the Handbook for their year of commencement, or consult the relevant Faculty.

Effective from 2005 the four programs listed above have been replaced by the degree program 4765 Bachelor of International Studies Bachelor of Laws. Full details are given below.

4765 Bachelor of International Studies Bachelor of Laws

BInSt LLB 6 Years Full-Time

Asian Studies, Plan ASIAA14765
European Studies, Plan EUROA14765
Global Studies, Plan GLSTA14765
Language Studies, Plan MODLA14765

The BInSt LLB degree provides an opportunity to obtain two degrees of professional importance to the public sector, community service, business and law practice. The International Studies component provides the knowledge and skills essential for understanding and working in the rapidly changing global environment. The Law component satisfies the requirements for the award of the professional LLB degree. The degree incorporates a period of overseas study during the third and fourth year for students who have made satisfactory progress towards the degree in their first and second years of study. The Faculty of Arts and Social Sciences provides a contribution to the expenses of this study.

The BInSt LLB degree may be taken in one of four areas of specialisation – Asian Studies, European Studies, Global Studies or Language Studies. Features of the degree program include:

- a core sequence of courses in International Studies;
- a choice of one area of concentration from four distinct and integrated programs of study;
- language study;
- access to 12 months study at one of a select group of the best international universities;
- full credit towards the BInSt degree for courses completed overseas;
- financial assistance towards a 12-month period of overseas study.
1. **Duration/Award:** A minimum of six years full-time study leading to the award of the two degrees of Bachelor of International Studies and Bachelor of Laws (BInSt LLB).

2. **Honours:** The BInSt component is available at Honours level. To qualify for the award of the degree at Honours level a student must have obtained 138 units of credit in approved courses, satisfied the appropriate prerequisites for entry into the Honours level program, and have obtained a further 48 units of credit in an approved Honours program. The Honours degree is awarded in three classes (Class I, Class II in two Divisions, and Class III). Students who fail to obtain one of these classes may proceed to graduate with a Pass degree. The LLB component is available at Pass level only.

3. **Distinction:** The BInSt component may be awarded with Distinction where a student has achieved a weighted average mark (WAM) of at least 75% in the UNSW courses completed as part of the degree.

4. **Completion Requirements:** Both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. It is not permissible for students to graduate from the LLB degree until all requirements for the non-Law degree have been completed.

5. **Transfer Arrangements:** Students who find in Years 1 to 2 that they are unable to complete the combined degree can apply to transfer to the Bachelor of International Studies or Bachelor of Arts degree program. It is not permissible to transfer to the single LLB degree.

6. **Law Courses:** A total of 150 units of credit comprising 92 units of credit in compulsory Law courses, a 2 UOC Research Project (LAW2421) and 36 units of credit in electives.

7. **International Studies Courses:** A total of 138 units of credit of approved International Studies courses offered by the Faculty of Arts and Social Sciences, including two semesters of study at an approved overseas institution. These courses are completed within one of the four program specialisations offered in the International Studies degree: the Asian Studies plan or European Studies plan or Global Studies plan or Language Studies plan.

8. **Overseas Study Program:** As part of the BInSt, students must complete two semesters of study (48 units of credit) of a 150 approved overseas program at an overseas institution. This is normally taken during the third and fourth years of study. Full details can be found in the Bachelor of International Studies (3424) entry of this Handbook.

9. **Sequence of Study:** Students must study International Studies courses in a sequence approved by the Faculty of Arts & Social Sciences, and Law courses in a sequence approved by the Faculty of Law. Specifically all, or the majority of the Law core courses must be completed prior to enrolling in Law electives.

The approved sequence of study for each plan is detailed below:

4761 本科社会科学与法律学位

BSoSc LLB 5 年全职

这个项目结合了法律学位与一个在社会研究和政策分析。该计划在社会科学和政策设计提供了一个整合和科学的方法，解决社会和他们对当今生活相关的问题。

就业前景

作为该计划的毕业生，你将被配备在与你计划和执行社会研究项目和执行政策分析。未来的就业机会可能包括政府和监管机构的法治实践，咨询工作，为企业或研究领域在不同学科的职业生涯。

1. 周期/颁发：该计划要求五年的全日制学习，以授予两个学位：社会科学与法律 (BSoSc LLB)。

2. 奖励：学生希望取得 BSoSc 学位，应与 BSoSc 学位课程联系，尤其在开始第 4 年的合并课程。法律学位是可选的，只有在通过考试后才可授予。

3. 完成要求：两个学位必须同时修满，同时完成课程。它不允许学生在获得 LLB 学位后才完成课程。
4. Transfer Arrangements: Students who find in Years 1 to 2 that they cannot complete the combined degree program may apply to transfer to the single non-Law degree. Transfer to the single Law degree is not permissible.

5. BSocSc Core Courses: The first three years of the program includes the Bachelor of Social Science core program totalling 48 units of credit.

6. Arts & Social Science Major:

6.1 Students must also complete an approved major sequence in the Faculty of Arts and Social Sciences. The major sequence may be taken from one of the following areas: Australian Studies, Development Studies, Economics/Economic History, Environmental Studies, Film and Theatre, Geography, Geology, History, History and Philosophy of Science, Human Resource Management, Industrial Relations, International Business, Philosophy, Political Economy, Politics & International Relations, Psychology, Sociology & Anthropology, Spanish and Latin American Studies (History), Women’s and Gender Studies.

6.2 Most major sequences are made up of 42 units of credit; however some require only 36 units of credit. If a 36 unit of credit major is selected, students will be expected to make up the 6 unit of credit shortfall by completing either an additional elective approved by the Faculty of Arts & Social Sciences or by completing an additional law elective. (This will bring the total units of credit of law electives to 64 or 8 x 8 UOC)

7. Approved Sequence of Study: Students must study Social Science courses in a sequence approved by the Faculty of Arts and Social Sciences and Law courses in a sequence approved by the School of Law. An approved sequence is given below; other sequences may be approved under special circumstances.

4785 Bachelor of Social Work Bachelor of Laws

BSW LLB 6 Years Full-Time

This six year full-time program qualifies students for the professional practice of both social work and law.

Career Prospects

Graduates will be equipped with the knowledge and skills to work in a variety of emerging areas which require an understanding of law, social work theory and practice, and a commitment to social justice. Such areas include consumer protection, tenancy obligations and entitlements, land rights, child custody and family property disputes, social security and welfare rights.

1. Duration/Award: The program is a six year full-time combined program leading to the award of the two degrees of Bachelor of Social Work and Bachelor of Laws (BSW LLB).

2. Completion Requirements: Both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. It is not permissible for students enrolled in combined Law degrees to graduate from the LLB degree until they have completed requirements for the non-Law degree.

3. Transfer Arrangements: Students who find in Years 1 to 2 that they cannot complete the combined degree program can apply to transfer to the single BSW degree. Transfer to the single LLB degree is not permissible.

4. Approved Sequence of Study: Students must study social work courses in a sequence approved by the Faculty of Arts & Social Sciences and law courses in a sequence approved by the School of Law. An approved sequence is given below; other sequences may be approved under special circumstances.

Faculty of the Built Environment and Faculty of Law

**4705 Bachelor of Architecture Bachelor of Laws**

**BArch LLB 7 Years Full-Time**

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Architecture program offered by the Faculty of the Built Environment. Because the Architecture program contains a percentage of open electives which can be replaced by Law courses, the combined program requires only three additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BArch program and both can be completed in thirteen sessions. It is considered to have a significant workload throughout these thirteen sessions.

**Career Prospects**

Graduates will be able to choose from a wide variety of career options. Employers may include law firms specialising in construction law, related government departments and regulatory bodies or architectural practices. Legal consultancy work for example with a construction firm may also be an option.

1. **Duration/Award:** The program is a seven year full-time combined program leading to the award of the two degrees of Bachelor of Architecture and Bachelor of Laws (BArch LLB). Students may complete the program in 6.5 years or 13 sessions of study if they carry out Work Experience over the summer breaks. This would mean that the enrolment for one session would be 48 units of credit which includes the 24 units of credit for work experience.

2. **Eligibility:** The combined program is open to students who satisfy both the Architecture and Law entry conditions. Students may enter directly in Year 1 or may apply to transfer from the Architecture program after the completion of one year if they have achieved a distinction or higher average. All applications for transfer must be registered with the University Admissions Centre. Transfer after the second year may result in the student taking more than the minimum time to complete the combined degree.

3. **Organisation:** The BArch LLB program is administered by the School of Law. The School requires the student to obtain approval of the Faculty of the Built Environment, Architecture program, for the Architecture courses. The final program and timetable must be approved by the Head of the Architecture program in the Faculty of the Built Environment.

4. **Honours:** The degree of Bachelor of Architecture is awarded at either Pass or Honours level after successful completion of a minimum of 192 units of credit from the Architecture program and 72 units of credit from the Law program. These core law courses are considered in the same manner as Faculty electives for the purposes of the Honours calculation. The combined total units of credit are taken from student performance over 264 units of credit for the purpose of calculating Honours in Architecture.

5. **Completion Requirements:** From Year 2, both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. It is not permissible for students enrolled in the combined Law degree program to graduate from the LLB degree until they have completed requirements for the non-Law degree.

6. **Transfer Arrangements:** Students who find in Years 1 to 3 that they cannot complete the combined degree program can apply to transfer to the single non-law degree. Transfer to the single LLB degree is not permissible.

7. **Approved Sequence of Study:** Students must complete Year 1 (48 units of credit) of the Architecture program before attempting any courses from the Law program. In subsequent years, students must study Architecture courses in a sequence approved by the Faculty of the Built Environment and Law courses in a sequence approved by the School of Law. An approved sequence is given below; other sequences may be approved under special circumstances.

</table>
**1. Duration/Award:** The program is a seven year full-time combined program leading to the award of the two degrees of Bachelor of Planning and Bachelor of Laws (BPlan LLB). Because the Planning program contains a percentage of open electives which can be replaced by Law courses, the combined program requires only four additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BPlan program and both can be completed in a minimum of seven years, consisting of twelve academic sessions (six years), plus two sessions of compulsory Work Experience. This compares with the five year BPlan program, which consists of eight academic sessions and two sessions (12 months) of compulsory Work Experience. Although Work Experience is normally undertaken after the completion of five academic sessions, BPlan LLB students may elect to undertake the one year (two sessions) of compulsory Work Experience required for the award of the single BPlan degree after the completion of their BPlan and LLB coursework. In addition, students may undertake the compulsory Work Experience in flexible ways (subject to the approval of the Planning and Urban Development program), thereby reducing the overall length of the BPlan LLB program.

**2. Eligibility:** The combined program is open to students who satisfy both the Planning and Law entry conditions. Students may enter directly in Year 1 or may apply to transfer from the Planning program after the completion of one year. Entry on this basis is competitive and is based on a combination of UAI and tertiary results. Transfer after the second year may result in the student taking more than the minimum time to complete the combined program.

**3. Organisation:** The BPlan LLB program is administered by the School of Law. Students must obtain approval of the Planning and Urban Development program in the School of the Built Environment for the Planning components of their program. The final program and timetable must be approved by the Head of the Planning and Urban Development program.

**4. Honours:** The degree of Bachelor of Planning is awarded either at Pass or Honours level after successful completion of a minimum of 144 units of credit from the Planning program and 48 units of credit from the Law program. These Law courses are considered in the same manner as Faculty of the Built Environment electives for the purposes of the Honours calculation. The combined total units of credit are taken from student performance over 192 units of credit for the purpose of calculating Honours in Planning.

**5. Completion Requirements:** From Year 2 onwards both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. It is not permissible for students enrolled in combined Law degrees to graduate from the LLB degree until they have completed requirements for the non-Law degree.

**6. Transfer Arrangements:** Students who find in Years 1 to 3 that they cannot complete the combined degree can apply to transfer to the single non-Law degree. Transfer to the single LLB degree is not permissible.

**7. Approved Sequence of Study:** Students must complete Year 1 (48 units of credit) of the Planning program before attempting any courses from the Law program. In subsequent years students must study Planning courses in the sequence approved by the Faculty of the Built Environment and Law courses in a sequence approved by the School of Law. The approved sequence of study is detailed below.

**4707 Bachelor of Planning Bachelor of Laws**

**BPlan LLB 7 Years Full-Time**

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Planning program offered by the Faculty of the Built Environment.

**Career Prospects**

Employers could include law firms specialising in planning law, related government departments and regulatory bodies, local councils and town planning consultancies.
The University offers combined programs leading to the award of the degrees of Bachelor of Commerce and Bachelor of Laws and Bachelor of Economics and Bachelor of Laws.

In the modern world of business and administration there is a need in many fields for the combined professional skills of accounting and law. The most obvious of these is the broad field of taxation practice, already drawing on both accounting and legal specialists for such matters as estate planning and taxation aspects of business organisations. With the growing complexity of commerce, including international business activities and large scale corporate organisation, there is a new and urgent need for graduates who are well versed in a wide range of legal courses as well as in accounting and commerce generally. These graduates may enter large companies as full-time advisers or undertake specialised professional practice. In the public sector also the increasing scale and complexity of government undertakings opens up a significant range of opportunities leading to senior administrative positions. Apart from specific career considerations, there is no doubt that accounting and law are complementary studies which provide a demanding but worthwhile course for the able student.

In the financial markets, there is considerable demand for graduates with training in finance and law. The complexity of securities, takeover and company legislation has necessitated the employment of such graduates in merchant banks, trading banks, brokerage houses and regulatory bodies. The combination of economics and law is ideally suited for those wishing to work in one of the major accounting or law firms on competition policy and indirect taxation.

There is a small but increasing demand for specialists in information systems and law. Apart from the usual contractual implication arising from the acquisition of strategic business resources, there are challenges in areas such as copyright, intellectual property, privacy and the impact of technology on inter-business relationships such as Electronic Data Interchange.

The growing complexity of industrial relations in Australia highlights the need for people wishing to become industrial advocates to have a solid grounding in economics, psychology, sociology and industrial relations, as well as in law. The combined program of Bachelor of Commerce in Industrial Relations and Bachelor of Laws is therefore recommended for people who hope to practise law in the industrial jurisdiction.

The combination of international business and law is relevant to career opportunities in a wide range of companies and organisations with international activities and ambitions. These include international legal, business and financial consultants, exporters, multinational manufacturing and service enterprises, and international organisations such as the UN and OECD.

Recent developments in Federal and State legislation, in the field of trade practices and consumerism in particular, have created an urgent need for managers and administrators skilled in both law and marketing. The combined Marketing/Law program seeks to meet this need by combining a detailed study of marketing systems in general, and marketing management in particular with the study of law. Graduates will find opportunities in both private and public sectors of the economy.
1. Duration/Awards: The programs are of five years full-time study leading to the award of the two degrees of Bachelor of Commerce and Bachelor of Laws (BCom LLB) or Bachelor of Economics and Bachelor of Laws (BEc LLB).

2. Distinction: The BCom and BEc degrees may be awarded with Distinction where a student has achieved a weighted average mark (WAM) of at least 75% in the UNSW courses completed as part of that degree.

3. Honours: The BCom and BEc degrees are available with Honours. This normally requires an extra year of study between Years 3 and 4. Students interested in undertaking Honours should consult with the relevant School Office at the end of Year 1. Full details can be found in the Faculty of Commerce and Economics section of the Handbook.

4. Transferring Majors (Plans): Students must nominate a commerce/economics major (plan code) at enrolment. Subsequent transfers to another major may be possible subject to the approval of both faculties.

5. Completion Requirements: Both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. In special circumstances candidates may be awarded the degree of BCom or BEc after the completion of the first three years of the combined program and 12 units of credit of General Education courses. Full details are given in the ‘Rules for the Award of Degrees’. It is not permissible for students to graduate from the LLB degree until they have completed requirements for the non-law degree.

6. Transfer Arrangements: Students who find in Years 1 to 2 that they cannot complete the combined degree program can apply to transfer to the single non-Law degree. Transfer to the single Law degree is not permissible.

7. Commerce & Economics Courses: Unless specified as from which discipline they must be chosen, Commerce and Economics options may be chosen from any offered by the Faculty of Commerce and Economics except for:
   (i) LEGT courses
   (ii) service courses for other faculties. Prerequisites apply.
   No course can be counted both as an option and as a prescribed course.

8. Approved Sequence of Study: Students must study commerce and economics courses in a sequence approved by the Faculty of Commerce and Economics and law courses in a sequence approved by the School of Law. Specifically, all or the majority of Law core courses must be completed prior to enrolling in law electives. Approved sequences for each combined program are given below; other sequences may be approved under special circumstances.

4733 Bachelor of Commerce Bachelor of Laws
BCom LLB 5 Years Full Time
This program includes the first year study program for the majority of BCom LLB and BEc LLB degree programs.

There are slight variations for those enrolling in Actuarial Studies, Human Resource Management, Industrial Relations, Information Systems and Marketing. Details for these majors are listed separately.

4733 Bachelor of Commerce in Accounting Bachelor of Laws
BCom LLB 5 Years Full-Time
This program includes the first year study program for the majority of BCom LLB and BEc LLB degree programs.

The choice of commerce/economics electives in Years 2 and 3 will vary depending on the major selected. Summary details are given below.

2. LEGT: Students enrolled in either the BCom LLB or the BEc LLB are not permitted to enrol in courses from the School of Business Law and Taxation (LEGT).

| Year 3 | |
| Commerce/Economics Elective 5* | 6 |
| Commerce/Economics Elective 6* | 6 |
| Commerce/Economics Elective 7* | 6 |
| Commerce/Economics Elective 8* | 6 |
| LAWS1081 | Property, Equity & Trusts 1 | 6 |
| LAWS1082 | Property & Equity 2 | 6 |
| LAWS2160 | Administrative Law | 6 |
| LAWS6210 | Law, Lawyers & Society | 6 |
| Total | 48 |

| Year 4 | |
| LAWS2150 | Federal Constitutional Law | 6 |
| LAWS2311 | Litigation 1 | 6 |
| LAWS2321 | Litigation 2 | 6 |
| LAWS3010 | Business Associations 1 | 6 |
| LAWS3112 | Advanced Legal Research 2 | 2 |
| LAWS8820 | Law & Social Theory, or | 6 |
| LAWS8320 | Legal Theory | 16 |
| Electives | 8 x 8 UOC | 64 |
| Total | 240 |

| Notes: |
| 1. The choice of commerce/economics electives in Years 2 and 3 will vary depending on the major selected. Summary details are given below. |
| 2. LEGT: Students enrolled in either the BCom LLB or the BEc LLB are not permitted to enrol in courses from the School of Business Law and Taxation (LEGT). |

*The requirement for a major in the BCom is 48 UOC, while in the BEc it is 60 UOC. Students enrolling in a BEc LLB would complete 60 UOC towards a major and 24 UOC of other approved commerce/economics courses.

</table>

Year 5

| Electives | 8 x 8 UOC | 64 |

| Total | 240 |

Notes:

*Full details can be found in the Accounting plan structure in the Faculty of Commerce and Economics section of this Handbook.

#These electives can be taken from any courses taught by the Faculty of Commerce and Economics (except LEGT) providing the requirements have been met. Details can be found in the Course Descriptions section of this Handbook.
**Professional Recognition:** Students wishing to obtain CPA/CA accreditation should refer to the required courses listed in ‘Professional Recognition of Programs’ in the Faculty of Commerce and Economics section of this Handbook.

Faculty of Engineering and Faculty of Law

4775 Bachelor of Engineering in Civil Engineering Bachelor of Laws

BE LLB 6 Years Full-Time

This program will provide students with professional qualifications in areas of great importance to the community.

Career Prospects

This program will prove attractive to students who have in mind a career involving constructive developments. Most large construction projects raise a formidable range of legal issues, and there is a need for highly qualified personnel who are able to understand both the engineering and the legal dimensions of such projects, both in Australia and overseas. Typically, you would find employment with national and multinational engineering and construction operations.

1. Duration/Award: The program is a six year full-time combined program leading to the award of the two degrees of Bachelor of Engineering and Bachelor of Laws (BE LLB). There will be a testamur for each degree in the combined program with both degrees being conferred at the completion of the full six-year program.

2. Assumed Knowledge: A prescribed standard in mathematics is recommended for entry to the Faculty of Engineering and to individual courses in that faculty. Further details are available in the UAC Guide.

3. Honours: The degree Bachelor of Engineering may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class I, and Class II in two divisions. The award and grade of Honours are made in recognition of superior performance throughout the program with greater weighting on courses in the later years.

Students must complete a Civil Engineering thesis to be considered for Honours in Engineering.

4. Completion Requirements: Both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. It is not permissible for students to graduate from the LLB degree until all requirements for the non-Law degree have been completed.

5. Transfer Arrangements: Students who decide not to continue in the LLB may complete the BE but must contact the Head of School of Civil and Environmental Engineering for any credit towards advanced standing in the BE of completed law courses.

6. Approved Sequence of Study: Students must study engineering courses in a sequence approved by the Faculty of Engineering and law courses in a sequence approved by the School of Law. An approved sequence is given below: other sequences may be approved under special circumstances.

One of the following:
CVEN4000, CVEN4027, CVEN4028, CVEN4029 Honours
Thesis A, Civil Engineering Practice 4A, Civil Engineering Practice 4B, Civil Engineering Practice 4C
CVEN1025 Computing
CVEN1721 Environmental Practice 1A

Career Prospects
This program will be particularly attractive to students interested in pursuing a career involving environmental issues or engineering. Employment might be with a law firm specialising in environmental law or a regulatory body such as the Environmental Protection Authority.

Program Requirements
The rules applying to the Bachelor of Engineering in Civil Engineering Bachelor of Laws are also applicable to the Bachelor of Engineering in Environmental Engineering Bachelor of Laws program.

The courses listed below are required to complete the program. These are set out in a typical yearly program.

Year 1
Session 1
LAWS1052 Foundations of Law 6
CHEM1011 Fundamentals of Chemistry A or
CHEM1033 Higher Chemistry C 6
CVEN1023 Statistics 4
CVEN1025 Computing 4

Session 2
LAWS1061 Torts 6
CVEN1024 Dynamics 4

CVEN3126 Engineering Management 1 3
CVEN3223 Geotechnical Engineering 3 3
CVEN3527 Water Engineering 3
CVEN3531 Principles and Applications of Aquatic Chemistry 3
CVEN3726 Environmental Policy, Law and Economics 3
MATH2019 Engineering Mathematics 2CE 6
LAWS1001 Criminal Law 1 6
LAWS6210 Law, Lawyers & Society 6
Total 48

Year 4
One of CVEN4000, CVEN4727, CVEN 4728, CVEN4729 Honours
Thesis A, Civil Engineering Practice 4A, Environmental Engineering Practice 4B, Environmental Engineering Practice 4C
CVEN3025 Engineering Computations 2 3
CVEN3725 Waste Management 3
CVEN4126 Engineering Management 2 3
CVEN4225 Geotechnical Engineering 4 3
CVEN4526 Water and Wastewater Treatment 3
CVEN4533 Transport and Fate of Pollutants 3

Notes:
*All students not undertaking an Honours thesis are required to select at least one major or 12 units of credit of engineering electives. Please refer to program 3620, Year 4 for choice of electives. Students undertaking the Honours thesis are required to undertake at least 8 units of credit of engineering electives. Students must complete a thesis to be considered for Honours in engineering.

Notes: *All students not undertaking an Honours thesis are required to select at least one major or 12 units of credit of Engineering electives. Students undertaking the Honours thesis are required to undertake at least 8 units of credit of engineering electives. Students must complete a thesis to be considered for Honours in Engineering. Refer to Program 3625, Year 4.

Unit of Credit Distribution - as for Civil Engineering/Law

Faculty of Science and Faculty of Law

4770 Bachelor of Science Bachelor of Laws
BSc LLB 5 Years Full-Time
This program combines the professional LLB program with the large number of majors offered within the Faculty of Science.

Career Prospects
The Science programs provide opportunities for students to prepare themselves for careers in research, technology, science, mathematics and education, or areas of management or public policy which involve the use of science or mathematics. The whole gamut of legal careers is open to graduates in Science/Law, and additional opportunities exist to become a patent attorney, contribute to policy formulation at the national level, or possibly become in-house counsel for a resources company. With this combination, you will be well prepared to deal with the complex legal issues that have a scientific/technology aspect, surrounding for example inventions and biotechnology.

Major Sequence
(i) Students may select any major from those offered by the Faculty of Science, or a major in Computer Science which is administered by the School of Computer Science and Engineering, or Information Systems which is administered by the Faculty of Commerce and Economics. (See separate entry).

(ii) Students should discuss their choice of major with the Science Student Centre prior to enrolment.
(iii) For the majority of majors students are required to complete only 2 Law courses in Year 1. For the Psychology major students are required to complete 5. (See separate entry)

1. Duration/Award: The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Science and Bachelor of Laws (BSc LLB).

2. Honours: Students wishing to complete the BSc degree program at Honours level must obtain prior approval from both program authorities. A standard Honours program in Science requires an additional year of study.

3. Completion Requirements: Both degrees must be studied concurrently with the expectation that students complete the full program prior to graduating with the two degrees. It is not permissible for students to graduate from the LLB degree until all requirements for the non-law degree have been completed.

4 Transfer Arrangements: Students unable to complete the full program may apply for advanced standing in the Bachelor of Science degree.

5. Science Courses: Students must complete a minimum of 84 units of credit, including the requirements of one of the majors outlined in Table A, in the Science section of this Handbook or a major in Computer Science. In all cases students must include 24 to 36 units of credit of Level 1 courses.

6. Law or Science Electives: In addition to the prescribed units of credit of law courses and science courses there is the option to complete 8 units of credit of either Law or Science electives. Students can satisfy this requirement by completing either a Law elective (8 units of credit) or an elective approved by the Faculty of Science (6 units of credit) plus a Law Research Project (2 units of credit).

7. Approved Sequence of Study: Students must study Science courses in a sequence approved by the Faculty of Science and Law courses in a sequence approved by the School of Law. A typical sequence of study is set out below. The sequence for Computer Science and Psychology is detailed separately.

Year 1 Session 1
LAW1052 Foundations of Law 6
Science courses – Level 1 (2 x 6 UOC) 12
Other approved Science course – Level 1 6
Total 48

Year 2

COMP1011 Computing 1A, or
null
Rules for the Award of Degrees

Rules Relating to the Bachelor of Laws Program and the Bachelor of Jurisprudence Program

1. (1) The Bachelor of Laws degree may be conferred on the completion of any of the following programs:

(a) Bachelor of Laws
(b) Bachelor of Architecture and Bachelor of Laws
(c) Bachelor of Arts and Bachelor of Laws
(d) Bachelor of Arts (Asian Studies) and Bachelor of Laws*
(e) Bachelor of Arts (Media and Communications) and Bachelor of Laws
(f) Bachelor of Art Theory and Bachelor of Laws
(g) Bachelor of Commerce and Bachelor of Laws
(h) Bachelor of Economics and Bachelor of Laws
(i) Bachelor of Engineering and Bachelor of Laws
(j) Bachelor of International Studies and Bachelor of Laws
(k) Bachelor of Jurisprudence and Bachelor of Laws
(l) Bachelor of Science and Bachelor of Laws
(m) Bachelor of Social Science and Bachelor of Laws
(n) Bachelor of Social Work and Bachelor of Laws
(o) Bachelor of Planning and Bachelor of Laws

*The last intake for this program was in 2002.

(2) The programs set out in paragraphs (b) to (o) of sub rule (1) hereof are referred to in these Rules as 'combined programs', and shall be programs of full-time study of not less than five years' duration.

(3) The program leading to the award of the degree of Bachelor of Laws (otherwise than as part of a combined program) shall be either:

(a) a program of part-time study which (unless otherwise approved by the Faculty for special reasons) shall be of not less than six years' duration; or

(b) a program of full-time study of not less than three years' duration, but no student shall be eligible to enrol in such a program unless he or she is a graduate or graduand of any faculty of the University or another university approved by the Faculty, or has other qualifications or experience deemed acceptable by the Faculty.

2. No person shall be permitted to enrol in any program in the Faculty of Law at the same time as he or she is enrolled for any other degree or diploma in the University or elsewhere, except as may be necessary to complete the requirements of a combined program, or with the approval of the Faculty.

3. Where, in these Rules, reference is made to the requirement that a candidate shall complete a program, the requirement shall be construed as meaning that the candidate shall:

(1) attend such lectures, seminars, tutorials or other classes, and such court sessions, offices or institutions as may be prescribed in that program, and maintain a satisfactory standard of preparation for and participation in such classes and activities;

(2) perform satisfactorily in such exercises, essays, theses and other work (whether written, oral or practical) as may be prescribed in that program and undertake any prescribed reading related to that program; and

(3) attain a satisfactory standard in the examination or examinations, and such other means of assessment of a candidate's results in that program as the Faculty may prescribe.

4. The Faculty of Law shall specify a number of units of credit in respect of each Law course for which credit is given in the award of the degree of Bachelor of Jurisprudence or the degree of Bachelor of Laws (whether taken separately or as part of a combined program). On completion of the course, a candidate shall be credited with the specified number of points.

5. (1) In the case of the Bachelor of Laws degree program, credit shall be given for the courses set out in the following table, each of which shall, unless otherwise determined by the Faculty, carry the number of units of credit (if any) specified.

5. (2) Compulsory Course Changes:
In 1993, the Faculty made changes to Contracts and introduced a new compulsory course – Public Law. These changes do not affect students who entered the School of Law prior to 1994.
In 1995, the Faculty added LAWS4010 Business Associations 1 to the compulsory core courses in order to meet the uniform national admission requirements. This change does not affect students who entered the School of Law prior to 1996.
In 2003, the Faculty replaced LAWS1051 Legal System and LAWS7410 Legal Research and Writing with LAWS1052 Foundations of Law. This change does not affect students who entered the School of Law prior to 2003.

5. (3) Elective Courses:
The following is a list of approved electives. Approximately 25-30 electives are made available each session. The number of students that may take an elective may be limited.

and any other course specified by the Faculty.**

5. (4) Postgraduate Electives Available to Undergraduates
The Faculty has determined that, with the permission of the Associate Dean and the course teacher, undergraduate students may enrol in one or more courses offered in the Master of Laws by Coursework degree. The units of credit so earned shall be the same as are specified in the Course Descriptions for the Master of Laws.

General guidelines: Students may apply to enrol in an LLM course provided they:
- have completed all compulsory courses;
- have completed any prerequisites;
- are within the last two years of their program;
- have no failures in the last two years.

Such courses shall be taken in a sequence approved by the Faculty.

6. Bachelor of Laws: A candidate for the award of the degree of Bachelor of Laws (whether taken as part of a combined program or as a separate degree) shall complete:
(1) of the courses prescribed in Rule 5 under the heading ‘Compulsory Courses’, totalling 92 units of credit, (2) selected courses from the courses prescribed in Rule 5 under the heading ‘Elective Courses’ so as to comply with Rule 7, (3) such Legal Research and Writing Programs, Prescribed Readings in Law, Moot Court Work and other work as the Faculty may require.

7. (1) Total Units of Credit: A candidate for the award of the degree of Bachelor of Laws shall complete Elective Courses prescribed in Rule 6 to the extent necessary to bring his or her total units of credit for Compulsory and Elective Law Courses to:

(a) Core: 92 UOC, Electives: 52 UOC  Total: 144 UOC
   Bachelor of Architecture Bachelor of Laws
   Bachelor of Engineering (Civil) Bachelor of Laws
   Bachelor of Engineering (Environmental) Bachelor of Laws
   Bachelor of Planning Bachelor of Laws
   Bachelor of Laws
(b) Core: 92 UOC, Electives: 52 – 58 UOC  Total: 144 – 150 UOC
   Bachelor of Social Work Bachelor of Laws
(c) Core: 92 UOC, Electives: 58 UOC  Total: 150 UOC
   Bachelor of Social Science Bachelor of Laws
(d) Core: 92 UOC, Electives: 64 UOC  Total: 156 UOC
   Bachelor of Arts Bachelor of Laws
   Bachelor of Arts (Media & Communications) Bachelor of Laws
   Bachelor of Commerce Bachelor of Laws
   Bachelor of Economics Bachelor of Laws
(e) Core: 92 UOC, Electives: 56 – 64 UOC  Total: 148 – 156 UOC
   Bachelor of Art Theory Bachelor of Laws
   Bachelor of Science Bachelor of Laws
(f) Core: 92 UOC, Electives: 64 – 82 UOC  Total: 156 – 174 UOC
   Bachelor of Jurisprudence Bachelor of Laws

(2) Approval: A candidate’s choice of Elective Courses shall require the approval of the Faculty.

8. Combined Program: A candidate for the award of the degree of Bachelor of Laws as part of a combined program shall not be eligible to be awarded that degree until he or she has completed the additional requirements applicable to the other degree.

9. Bachelor of Jurisprudence/Bachelor of Laws:
   In the case of the combined program leading to the award of the degrees of Bachelor of Jurisprudence and Bachelor of Laws, the requirement for the award of the Bachelor of Jurisprudence degree shall be:
   (i) Completion of all requirements of the Bachelor of Laws degree program (including Law courses totalling not less than 156 units of credit).
   (ii) Completion of a minimum of 54 units of credit of courses in another faculty or faculties comprising (unless specially approved by the Faculty) a major sequence of three years’ study comprising 42 units of credit, plus an additional first year course comprising 12 units of credit. Unless s/he obtains special permission from the relevant Head of School, a student shall be bound by any requirements as to course prerequisites normally applicable to a course in another faculty.
   (iii) Completion of electives totalling 24 units of credit of electives selected from either the Faculty of Law or another faculty.
   (iv) Completion of General Education courses totalling 6 units of credit.
   (v) A candidate shall obtain the approval of the Faculty of Law for the selection, and sequence of study, of courses in other faculties. In approving such courses, the Faculty shall have regard to the contribution the study of such courses may reasonably be expected to make to the development of the candidate’s capacity as a lawyer and understanding of the law.

10. Bachelor of Jurisprudence: The requirement for the award of the Bachelor of Jurisprudence degree shall be:
   (i) completion of a program of full-time study of not less than three years’ duration comprising law courses totalling not less than 78 units of credit and including the following compulsory courses totalling 54 units of credit:

(ii) Completion of a minimum of 54 units of credit of courses in another faculty or faculties comprising (unless specially approved by the Faculty) a major sequence of three years’ study comprising 42 units of credit, plus an additional first year course comprising 12 units of credit. The candidate shall be bound by any requirements as to course prerequisites normally applicable to a course in another faculty.

(iii) Completion of General Education courses totalling 12 units of credit.

(iv) A candidate shall obtain the approval of the Faculty for the selection, and sequence of study, of courses in other faculties. In approving such courses, the Faculty shall have regard to the contribution the study of such courses may reasonably be expected to make to the development of the candidate’s capacity as a lawyer and understanding of the law.

11. Part-Time Study: A student shall not be enrolled as a part-time student unless he or she satisfies the Faculty that his or her special circumstances preclude full-time study, and that his or her previous experience and/or study make it appropriate to admit him or her to part-time study for the award of the degree of Bachelor of Laws as a separate degree.

12. Faculty: In these Rules, unless the contrary is indicated, ‘the Faculty’ means the Faculty of Law.

**Rules Relating to the Bachelor of Commerce Bachelor of Laws Program and the Bachelor of Economics Bachelor of Law Program**

13. Rules relating to the award of the degree of Bachelor of Commerce and Bachelor of Economics: The rules as set out in other sections of this Handbook, shall apply wherever relevant to candidates for the program of Bachelor of Commerce/Bachelor of Laws and Bachelor of Economics/Bachelor of Laws.

14. BCom and BEc: Candidates for the combined Commerce/Law or Economics/Law degree program may be awarded the degree of BCom or BEc either when they have successfully completed the entire combined program or, for students enrolling from 1996, when they have completed the requirements for the award of the first three years of the combined Bachelor of Commerce or Bachelor of Economics/Bachelor of Laws program – as set out in the program outline – and subject to satisfaction of General Education requirements for the single pass degree.

Concessions apply in deciding when students enrolled prior to 1995 who have not completed the requirements of the combined degree have nevertheless completed the requirements of the BCom or BEc. Please consult earlier faculty handbooks for the appropriate ‘Rules relating to the award of the degree of Bachelor of Commerce or Bachelor of Economics prior to the completion of the Combined Degree’.

15. Honours: Notwithstanding the above regulations, students undertaking the combined Bachelor of Commerce or Bachelor of Economics at Honours level/Bachelor of Laws program may be awarded the degree of Bachelor of Commerce or Bachelor of Economics at Honours level once they have completed the Honours year and the requirements of the first three years of the combined Bachelor of Commerce or Bachelor of Economics at Honours level/Bachelor of Laws program.

Candidates for Honours in the Commerce or Economics degree course must complete one year additional to the minimum of five years required for the Commerce/Law program at Pass level.

The requirements relating to Honours in the BCom and BEc degree courses are noted at the end of the program for each specialisation. Students ordinarily will interpolate an Honours year between Years 3 and 4 of the combined course.

16. Commerce and Economics Options: Options may be chosen from any offered by the Faculty of Commerce and Economics except for (i) LEGT courses, (ii) service courses for other faculties. Prerequisites apply. No course can be counted both as an option and as a prescribed course.
Atax (Australian Taxation Studies Program)

Information and Assistance
Atax delivers tax education across Australia and overseas. It aims to educate tax professionals from all sectors of the tax profession – accounting and legal majors, in the tax groups of large and medium sized corporations, in smaller accounting and law firms and in the Australian Taxation Office, State Government Treasury Departments and Revenue Offices. The programs have been developed through intensive consultation with a wide range of experts with interest in both the accounting and legal professions and within UNSW.

Some People Who Can Help You
General correspondence and telephone enquiries relating to student and program administration should be directed to:
Atax Student Services Office
Telephone: (02) 9385 9333
Email: atax@unsw.edu.au
Fax: (02) 9385 9380
Postal Address: Atax UNSW SYDNEY NSW 2052 AUSTRALIA
Contact details for Academic and General Staff can be found in the Atax Student Guide or on the Atax website: www.atax.unsw.edu.au/contact/

Academic Support
A range of different academic support services is provided by Atax through the Academic Support Coordinator. These include support packages on general study skills and basic grammar and writing skills. Atax recognises students come to the program with a broad range of backgrounds. We are responsive to the diverse needs of students. Atax provides both formal and informal academic support options.

Two audio conferences are conducted each semester. These are intended for new students, although continuing students are also welcome to participate. These audio conferences provide an opportunity for students to discuss general study skills and examination preparation issues in a relatively informal environment. Students are also encouraged to refer to the UNSW Learning Centre (www lc.unsw.edu.au) and Atax Student Guide.

The Academic Support Coordinator is regularly available for informal consultation and can direct students to appropriate resources and services. Additional support services are provided through the UNSW Learning Centre and other units. The Atax Academic Support Coordinator is the primary contact person for students seeking access to such services. The Student Services Office is able to provide contact details.

Enrolment Procedures
Enrolment procedures for Atax programs vary slightly from conventional mode programs. Closing dates are usually much earlier and students should refer to information distributed by the Atax Student Services and Atax website prior to the commencement of each semester.

Sources of Information
It is important that students familiarise themselves with various documents and sources of information available.
These include:
- the Atax Website (www.atax.unsw.edu.au)
- the Atax Student Guide

Atax Website
You can access the Atax website at www.atax.unsw.edu.au. In addition to general information about Atax, program and course information is available. The website also includes details of conferences and special events, links to individual lecturers’ web pages, relevant research links and Atax Library Online.

Atax Student Guide
The Atax Student Guide provides ready access to the basics of Atax administration and contains other study resource materials. This guide provides an essential reference point for the Atax student, with contact lists, enrolment information, calendar of events, assessment procedures and a Library Guide.

Orientation
Orientation sessions for new students are usually held in most Australian cities prior to the commencement of each semester. Your Study Materials will be dispatched to you prior to Orientation. Orientation serves both academic and administrative purposes, as well as giving students the opportunity to meet lecturers and fellow students.
It is expected that all new students will attend their local Orientation.

Flexible Delivery
Students can study from anywhere in Australia or overseas without attending campus lectures. All Atax students are supported with comprehensive, high-quality written Study Materials. Atax has Learning Centres in 22 locations across Australia and its distance education framework incorporates a variety of modes of teaching to effectively deliver the Atax programs.

Students may find the learning environment differs significantly from traditional campus-based study. Students should refer to the Atax Student Guide (provided with Study Materials) or visit www.atax.unsw.edu.au for full information regarding the facilities available:
- Learning Centres
- Study Materials
- Audio Conferences
- Web Course Tools (WebCT)
- Regional Classes
- Informal Study Groups

Library Services
Information may be found in the Atax Student Guide in the ‘Library Guide’ section. Refer also to Atax Library Online at www.atax.unsw.edu.au or contact the Atax Library staff directly: Librarian, telephone (02) 9385 9327 or Library Assistant, telephone (02) 9385 9312.

Course Unit Values
Except for some General Education courses offered by other UNSW groups, all courses offered through Atax programs are 6 units of credit. Course descriptions offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook.
Program Outlines

4620 Bachelor of Taxation

BTax 3 Years Full-Time

The Bachelor of Taxation Degree commenced in 1991 and was the first university undergraduate tax degree offered in Australia. The Bachelor of Taxation can only be studied over three years full-time with four courses (or equivalent units of credit) per semester, or six years part-time with two courses (or equivalent) per semester. It is based on the equivalent of 24 courses, of 6 units of credit per course, including 16 core and 8 electives. Some UNSW General Education courses carry only half the credits (3 units of credit) and workload of mainstream courses. Enrolment in such courses could increase the total number of courses to 26.

Students who wish to meet professional accounting entry requirements must study the accounting courses indicated by the Institute of Chartered Accountants in Australia (ICAA) and CPA Australia. (See 'Particular Requirements for Students Seeking Accounting Professional Entry'.)

Program Objectives

The objectives of the Bachelor of Taxation are to provide students with:

- a broad-based education in all areas relevant to taxation (including law, accounting, economics and computing) as well as a vocationally specific education;
- knowledge of the basic structures of the Australian tax system, of the essential concepts that underpin taxation, and of the Income Tax Assessment Act and related Acts;
- knowledge of accounting and reporting information, processes and systems, and the integration of such knowledge with the tax system;
- knowledge of legal concepts and principles involved in areas such as contract law, commercial law, administrative law, litigation, company law, banking and finance, property, trusts and equity, and the integration of such knowledge with the tax system;
- skills of statutory interpretation and case analysis;
- skills in organising and solving complex problems by the collection, analysis and application of relevant laws, rules, standards or other information;
- skills of oral and written communication, of negotiation and of advocacy;
- the ability to apply the processes of critical reasoning in evaluating the broad institutional and economic outcomes of tax decisions, including an application of major economic, organisational and information processing concepts;
- the ability to judge appropriate standards of ethical behaviour in their dealings with clients, customers and tax administrators in the tax profession; and
- an awareness of the role of liberal studies as part of a general university education through, in part, the critical analysis of their own professional culture and by exposure in all courses to the broad traditions of critical enquiry.

Student Workload

Part-time students will normally complete two courses per semester. Full-time students will normally complete four courses per semester. ‘Full-time’ students are defined as having a load of 0.75 or more (0.375 per semester). Contact will vary from course to course. As a rough guide, students can expect to spend at least 12 hours per week studying each course.

It is possible to take a lighter workload, studying one course per semester. Where the number of courses

Admission Requirements

Entry to the program is competitive. In assessing applications, the Admissions Committee takes into account the following factors:

- educational achievement
- work experience
- evidence of the ability to handle complex technical issues
- evidence of commitment and motivation
- referees’ reports if provided.

The normal minimum qualification for admission to the program is NSW matriculation (HSC) or equivalent Year 12 qualifications or completion and award of Certificate IV or Associate Diploma or Advanced Diploma in Accounting, or equivalent from a TAFE. Consideration will be given to mature age students with extensive technical experience.

Occupational Destination of Graduates

Atax graduates are leading fulfilling careers in all parts of private and public practice. They are employed by accounting and legal majors, in the tax groups of large and medium sized corporations, in smaller accounting and law firms and in the Federal Treasury, Australian Taxation Office, State Government Treasury Departments and Revenue Offices.

The accounting stream of the Bachelor of Taxation Degree has been considered as satisfying the prescribed qualifications criterion of Income Tax Regulation 156 for registration with the Tax Agents’ Board.

Professional Accreditation

The Bachelor of Taxation program has been granted accreditation by CPA Australia and the Institute of Chartered Accountants in Australia (ICAA). This means the Bachelor of Taxation satisfies the educational requirements for associate level of membership, provided the student has studied elective courses in the accounting stream of the Bachelor of Taxation. These course choices and study sequences are explained later in this Handbook under ‘Particular Requirements for Students Seeking Accounting Professional Entry’.

Assessment Policy

The Board of Studies in Taxation has resolved that, in order to pass a course, candidates for the Bachelor of Taxation should obtain:

1. 50% or more of the total marks available in the course and
2. a minimum of 40% of the marks available for the final examination in the course.

Bachelor of Taxation Degree with Distinction

The Assessment Committee of the Board of Studies in Taxation may award the Bachelor of Taxation degree with Distinction when a student satisfies the condition of a 75% weighted average mark (WAM) attained over the student’s degree.

Bachelor of Taxation Degree with Merit

For students who entered the Bachelor of Taxation program prior to 2003, the Assessment Committee of the Board of Studies in Taxation may award the Bachelor of Taxation Degree with Merit when a student satisfies the following conditions:

1. a 70% average is attained over the student’s best prescribed merit award number of courses presented for the Degree; and
2. the student does not have more than two failures throughout the program.

Provided that where, in the opinion of the Examiners at the Assessment Committee, ‘exceptional circumstances’ exist the Assessment Committee may award the Degree with Merit even though a student has not attained a 70% average and/or has three failures throughout the program.

The table below lists the prescribed merit award number of courses for the purposes of condition 1:

<table>
<thead>
<tr>

Students enrolled in BTax prior to 2003 and therefore eligible for award of either the BTax with Merit or the BTax with Distinction have the option of taking out one or the other award.
Exemption Policy/Advanced Standing

Students accepted for enrolment into the Bachelor of Taxation Degree may apply for advanced standing (exemptions from study of particular courses) by completing the form “Course Exemption/Advanced Standing”. This is available for download from www.atax.unsw.edu.au. Maximum exemption for the BTax is for eight courses of 6 units of credit. The policy on advanced standing for BTax can be accessed at www.atax.unsw.edu.au

Program Structure for the Bachelor of Taxation Degree

List of Courses

Courses on offer may be revised throughout the year.

ATAX0001 Basic Tax Law and Process
ATAX0002 Computer Information Systems
ATAX0003 Microeconomics and the Australian Tax System
ATAX0004 Framework of Commercial Law
ATAX0005 Accounting 1

ATAX0018 Tax Litigation
ATAX0008 Principles of Capital Gains Taxation (or equivalent) for:
ATAX0005 Taxation of Property Transactions
ATAX0009 Law of Companies, Trusts and Partnerships for:
ATAX0013 Taxation of Companies, Trusts and Partnerships
ATAX0020 Introduction to Australian International Taxation
ATAX0010 Accounting 2 for:
ATAX0015 Intermediate Financial Accounting
ATAX0057 Business Finance
ATAX0059 Management Accounting
ATAX0015 Intermediate Financial Accounting for:
ATAX0053 Accounting for Complex Structures and Instruments

ATAX0060 Auditing and Assurance Services
ATAX0023 Principles of Goods and Services Tax Law (or equivalent) for:
ATAX0055 Taxation of Property Transactions

Selection of Courses

Overview of General Requirements for all Bachelor of Taxation Students

To complete the Bachelor of Taxation, students are required to do a total of 24–26 courses (or 25–27 if commenced prior to 1999):

- 16 (17 if prior to 1999) compulsory courses
- 2 special category courses
- 4 elective courses
- 2–4 General Education courses to a total of 12 units of credit.

The following sixteen courses are compulsory:

ATAX0001 Basic Tax Law and Process
ATAX0002 Computer Information Systems
ATAX0003 Microeconomics and the Australian Tax System
ATAX0004 Framework of Commercial Law
ATAX0005 Accounting 1
ATAX0006 Tax Administration
ATAX0008 Principles of Capital Gains Taxation
ATAX0009 Law of Companies, Trusts and Partnerships
ATAX0010 Accounting 2
ATAX0011 Macroeconomics, Government and the Economy
ATAX0013 Taxation of Companies, Trusts and Partnerships
ATAX0014 Tax Policy Framework
ATAX0015 Intermediate Financial Accounting
ATAX0016 Critical Perspectives and Ethics
ATAX0017 Tax Accounting Systems
ATAX0018 Tax Litigation

Two of the following special category courses must be completed:

ATAX0020 Introduction to Australian International Taxation
ATAX0022 Goods and Services Tax: Design and Structure
ATAX0023 Principles of Goods and Services Tax Law
ATAX0053 Accounting for Complex Structures and Instruments

Twelve units of credit of General Education must be successfully completed. General Education requirements may, with the prior approval of the BTax convener, be fulfilled by completion (including past completion) of courses offered in other groups within UNSW or at other universities. Some of these courses have lower credit value and workload than ATax courses.

Finally, four of the following elective courses must be studied:

ATAX0022 Goods and Services Tax: Design and Structure
ATAX0023 Principles of Goods and Services Tax Law
ATAX0035 Taxation of Property Transactions
ATAX0057 Business Finance
ATAX0058 Quantitative Analysis
ATAX0059 Management Accounting
ATAX0060 Auditing and Assurance Services
ATAX0065 Taxation of Trusts
ATAX0067 Taxation of Corporate Finance
ATAX0069 Taxation of Superannuation
ATAX0070 Selected Problems in Stamp Duty
ATAX0071 Taxation of Industry and Technology
ATAX0072 Taxation of Employee Remuneration
ATAX0076 Tax and Investment Regulation in China

Courses designated ATAX06** are postgraduate courses offered at the undergraduate level. They are only available at an advanced stage of the program and only to students who satisfy the relevant course authority they are capable of coping with the demands of the course.

Particular Requirements for Students Seeking Accounting Professional Entry

Students wanting to gain accounting admission must study the following:

ATAX0053 Accounting for Complex Structures and Instruments

Also one of the following three other special category courses must be chosen:

ATAX0020 Introduction to Australian International Taxation
ATAX0022 Goods and Services Tax: Design and Structure
ATAX0023 Principles of Goods and Services Tax Law
Finally, three of the four general electives chosen must be accounting courses. The following three elective courses must be chosen:

- ATAX0057 Business Finance
- ATAX0059 Management Accounting
- ATAX0060 Auditing and Assurance Services

Hence in practice the only decision to be made for students seeking professional accounting entry is between ATAX0020, ATAX0022 and ATAX0023 which are general electives and in the General Education area.

However, Atax recommends that ATAX0058 be studied as the extra general elective before attempting ATAX0057. As requirements change from time to time, students should check any updates or changes to requirements later in their degree program.

7280 Associate Diploma in Taxation
AssocDipTax 2.5 Years Full-Time

The Associate Diploma in Taxation is not available to students commencing undergraduate study in 2002 or later. For information on this program please refer to www.atax.unsw.edu.au

Non-Award (Single Course), Cross-Institutional and Cross-Group (Faculty) Enrolments
Introduction and Overview

Non-Award enrolments are enrolments in courses or a sequence of courses, which do not lead to, nor (normally) count towards, a formal award of UNSW.

Non-Award study with Atax may count towards Continuing Professional Education (CPE), Continuing Professional Development (CPD) and Continuing Legal Education (CLE) requirements for Chartered Accountants, Certified Practicing Accountants and lawyers respectively.

There are several categories of Non-Award enrolment:

1. **Voluntary course enrolment** – where the student is taking the course either out of interest or to develop professional competence in an area of specialisation.

2. **Cross-Institutional enrolment** – where the student enrols in a UNSW course for credit towards an award at another tertiary institution, at which the student is concurrently enrolled.

3. **Cross-Group enrolment** – where a student from another group (faculty) of UNSW applies to study an Atax course. Written confirmation is required from the other group stating that the course will be credited towards the award.

4. Where an Atax student wishes to enrol in a course at another institution for credit towards their UNSW award, any such courses must be of similar content and level to the corresponding Atax course and specific reasons for the request are required. Atax will normally approve this type of enrolment in special circumstances only. Students are required to complete the normal enrolment procedure at UNSW in order to have the course credited towards their degree.

Cross-Institutional Enrolment Procedures

Procedures for an Atax student entering into a cross-institutional scheme are as follows:

1. Forward full details of the course, including unit of credit value, assessment and content, to the Atax Student Services Office. Outline why you consider the circumstances to be special and indicate the Atax course for which it would be substituted.

2. Your application will then be considered and you will receive written advice regarding its success or otherwise.

3. Make an application to the host institution, presenting approval from Atax (check with the host institution for appropriate procedures).

4. Notify Atax of acceptance by the host institution.

5. Forward a certified copy of the official result (mark and grade) from the course studied at the host institution to Atax once the course assessment has been finalised.

Cross-Group Enrolment Procedures

Students intending to:

- add/vary Atax courses to/in a program of study from another Group or School within UNSW; or
- add/vary courses from another Group or School within UNSW, to an Atax program;

are strongly advised to contact the Atax Student Services Office so transitional arrangements can be effected smoothly. You must ascertain the availability of particular courses and the semesters in which they will be offered. You should arrange for your program authority to provide written approval that the Cross-Group course will be credited to your award program. Also arrangements for delivery/collection of study materials and associated support need to be communicated.

Students based in the Law School in UNSW are regarded as falling within these arrangements.
A Message from the Dean

It is my pleasure to welcome you to the Faculty of Medicine at the University of New South Wales. My colleagues from the Faculty and I are delighted that you have chosen to begin your professional career with us and we congratulate you upon gaining entry into our Faculty.

You are joining a University community which has depth and breadth in academic enterprise and social opportunity. The University of New South Wales is a robust institution with traditions of educational and investigative excellence coupled with the vitality of an energetic faculty and administration. I encourage you to explore fully the opportunities available to you as you enter our scholarly community. You are joining us at a time of unprecedented change in higher education, scientific discovery and health care delivery across many disciplines. Despite considerable turmoil in the financing of both tertiary education and health care delivery throughout the world, the need for excellence in clinical education, biomedical research and teaching remains a clarion call for institutions of higher learning across the globe – a call to prevail in their quest to succeed in preparing the next generation of professionals. At the University of New South Wales, we look forward to working with you during your time with us as, together, we confront the challenges ahead and turn them into opportunities.

This Faculty takes pride in the values through which we operate:

- We build on the strong foundation laid over the decades since the founding of this Faculty.
- We strive to discover that which is true not simply what is most likely.
- We seek what is best not simply what is possible.
- We aim for durability not expediency.
- We will be worthy of the trust which society places in us to lead in education, research, clinical care and advocacy.

Your educational journey with us will be a series of counterpoints – outward exhilaration and reflective contemplation, energy and fatigue, didactic learning and enquiry-driven self study. All these and many more experiences await you. A talented faculty and dedicated administrative staff stand ready to assist you.

The Faculty also provides a diverse array of opportunities for science students and postgraduate students. Postgraduate programs are offered by both coursework and research. There are many excellent opportunities in these areas throughout the Faculty.

I bid you welcome again and look forward to the many crossings of our paths as you begin your journey with us at the University of New South Wales.

S. Bruce Dowton
Dean

Faculty Information and Assistance

Some People Who Can Help You
This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Medicine.

If you require advice about enrolment, degree requirements, progression within Programs or with any other general Faculty matter, contact one of the following people located in the Office of the Dean (map reference B27), Faculty of Medicine:

Undergraduate
Justin Joynes
Administrative Officer
Faculty of Medicine
Tel: (02) 9385 2459
Email: j.joynes@unsw.edu.au

General and Admission Enquiries
Office of the Dean
Faculty of Medicine
Tel: (02) 9385 8765
Fax: (02) 9385 1874
Email: info@notes.med.unsw.edu.au.

Elective term/Clerkships
Peter Herring
Administrative Assistant
Faculty of Medicine
Tel: (02) 9385 2452
Email: p.herring@unsw.edu.au

Faculty of Medicine Website
The Faculty of Medicine's website address is www.med.unsw.edu.au
This website provides information about programs, courses, research interests, news and current events. The website also contains links to all the schools, units, centres and the affiliated research institutes of the Faculty, as well as staff, student and alumni information resources. The Faculty maintains many PC and Macintosh computer laboratories for student access, both on campus and in the Faculty's teaching hospitals. Students can access the web, email, MS Office and educational applications from these computers.

Course Descriptions
Descriptions of courses offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

The Faculty
The Faculty of Medicine was established when the NSW Government accepted a proposal of the Murray Committee of Inquiry into the Future of Australian Universities and announced in December, 1957, that a second medical school in NSW would be established within the re-named University of New South Wales.

The Faculty’s first students enrolled in 1961 and 25 of these graduated from the six year program in 1966. A five year undergraduate curriculum was introduced in 1974. Although this was a highly successful curriculum, a number of changes in both the hospital and health systems indicated the need for the Faculty to extend the program to a six year curriculum in 1988. 2004 sees the beginning of a new six year Medicine program. The amounts quoted are subject to some variation.

Assumed Knowledge
There are no prerequisites for entry into the new Medicine program. However there is assumed knowledge of English. Assumed knowledge is a level of achievement at the HSC (or equivalent) considered desirable for successful study in a program or first year course. Students who do not have the assumed level of knowledge are not prevented from enrolling, but may be placed at a considerable disadvantage. It is assumed that upon enrolment students have an adequate command of English language and communication skills.

Application Procedures
Details on application for entry into UNSW medicine programs for both local students and international students can be found on the Faculty’s website at www.med.unsw.edu.au

Selection into the Medicine Program
The Faculty of Medicine implemented new admissions criteria for entry into the UNSW medicine programs from 2003 for both local and international students. Students are selected on the basis of academic merit, results of the Undergraduate Medicine and Health Sciences Admission Test (UMAT) and performance at an interview. Some international applicants are exempt from sitting UMAT due to their place of residence. Further details of the selection process can be found on the Faculty’s website at www.med.unsw.edu.au

International Students
International applicants may only compete for entry as either fee paying students or as holders of a scholarship awarded by the Australian Government. Enquiries regarding admission of international students should be directed either to UNSW International (tel: +61 2 9385 6996 email: internationaloffice@unsw.edu.au, website: www.international.unsw.edu.au) or the Admissions Officer, Faculty of Medicine, both at the University of New South Wales, Sydney NSW 2052, Australia. Enquiries regarding Australian Government scholarships should be directed to the local Australian Diplomatic Mission or see www.ausaid.gov.au

Admission of Indigenous Students
The Faculty may admit suitably qualified Aboriginal and Torres Strait Islander people. A pre-Medicine program, run for one month, is part of the preparation and selection processes for indigenous students applying for the Medicine program. Further information regarding the admission criteria may be obtained from the Faculty’s Indigenous Health Unit on (02) 9385 3677.

Admission of Disadvantaged Students (ACCESS Scheme)
The Faculty may admit, within quota, a number of students whose education has been disadvantaged over a two year period and circumstances beyond their control. Further information may be obtained from the Admissions Office on (02) 9385 3089.

Rural Student Entry Scheme
The Faculty sets aside places in its Medicine program intake each year for students of rural origin who are able to demonstrate to the Faculty that they meet a number of selection criteria. The scheme is designed for high school, undergraduate and graduate students. It is expected that students who gain entry via the Rural Student Entry Scheme will be allocated to a rural hospital and undertake the majority of their final three years in rural hospitals. Further information may be obtained from the Faculty’s Rural Health Unit on (02) 9385 3250 or the website http://rural.med.unsw.edu.au

Assumed Knowledge
There are no prerequisites for entry into the new Medicine program. However there is assumed knowledge of English. Assumed knowledge is a level of achievement at the HSC (or equivalent) considered desirable for successful study in a program or first year course. Students who do not have the assumed level of knowledge are not prevented from enroling, but may be placed at a considerable disadvantage. It is assumed that upon enrolment students have an adequate command of English language and communication skills.

Costs in Addition to Fees
In all UNSW medicine programs, there are costs in addition to fees. The following is an estimate, based on students’ experience, of the expenditure which is likely to be incurred over the full length of the program. The amounts quoted are subject to some variation.

<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Textbooks</td>
<td>$1,650</td>
</tr>
<tr>
<td>Two coats (1 laboratory, 1 hospital)*</td>
<td>$65</td>
</tr>
<tr>
<td>Stethoscope</td>
<td>$80–300</td>
</tr>
<tr>
<td>Ophthalmoscope</td>
<td>$180–250</td>
</tr>
<tr>
<td>Laboratory Manuals</td>
<td>$150</td>
</tr>
<tr>
<td>Miscellaneous (papers, pens, kits, diagnostic equipment and aids, etc)</td>
<td>$300</td>
</tr>
</tbody>
</table>

*One long white coat is required for use in practical classes and one short coat for use in the hospitals.
Advice to Students on Computing Requirements and Email Policy
For details on computer recommendations and specifications see the IT Requirements for UNSW Students policy at: http://www.dis.unsw.edu.au/policies/docs/Student_IT_Requirements_04.pdf
All official email from the Faculty of Medicine will be sent to students’ UNSW email account. It is expected that all UNSW students will either routinely check their UNSW email account or have their UNSW email account forwarded to another email address. Information about managing your UNSW email account can be obtained from: www.disconnect.unsw.edu.au

Attendance at, and Residence in, Hospitals
From Year 1, students attend hospitals for clinical teaching. For Years 1 to 3, students are allocated to a large teaching hospital in Sydney known as their “home hospital”. During the final three years, students are required to undertake some terms in hospitals other than their home hospital. These terms are in other hospitals in Sydney and also in selected larger country hospitals. It is expected that students who gain entry via the Rural Student Entry Scheme will be allocated to a rural hospital and undertake 18 months of their final two years in rural hospitals. Other local students may have the option or be required to undertake 18 months of studies in rural hospitals. International students are not usually given this option of undertaking an extended placement in rural hospitals. However all students should expect at least 8 weeks in a rural rotation. The Faculty will always consider the personal preferences of students in their allocation to home hospitals and to other hospitals on rotation. However, the Faculty reserves the right to allocate students to hospitals that are not their first preference. Students considering applying for entry into a UNSW medicine program must take this into consideration and be willing to accept the consequences of their training in a range of hospitals and health care facilities. The Faculty’s policy on ‘Allocation of Students to Clinical Locations’ can be found on the website at www.med.unsw.edu.au

Intern Placement and Registration
Each medical graduate seeking registration as a medical practitioner in NSW must complete a period as an intern in a hospital or institution approved by the NSW Medical Board. Before taking up an intern appointment, a graduate must obtain a certificate of conditional registration from the Medical Board.
Intern placement is the responsibility of the Postgraduate Medical Council of the NSW Department of Health. Information concerning intern placement and conditional registration is issued to each student by the Office of the Dean during the final year. Information may also be obtained from:
Internship: The Postgraduate Medical Council, Gladstone Hospital Campus, Victoria Road, Gladstone NSW 2111, Tel: 9817 0551 or see www.pmc.nsw.org.au
Registration: The Registrar, Medical Board of New South Wales, Gladstone Hospital Campus, off Punt Road, Gladstone, Tel: 9879 6799 or see www.nswmb.org.au

Part-time Training and Deferment of Internship
The NSW Medical Board has no objection, in principle, to interns undertaking up to one-half of their internship on a reduced daily hours basis, or deferring internship in limited circumstances. Interns considering these options should contact the Board for further details.

Criminal Record Check
The NSW Department of Health has a policy that all students undertaking clinical placements or who require access in any capacity to facilities operated by the Department (this includes all the Teaching Hospitals used by UNSW in its Medicine programs) must undergo a criminal record check prior to employment or placement in any capacity in the NSW Health System. The check is conducted by the NSW Police Service and is coordinated by the Department of Health and the University. Further details are available on the Faculty’s website at www.med.unsw.edu.au
Clinical placement in the NSW Health System is a substantial and essential element in all UNSW medicine programs. Students who fail to satisfy the requirements of this check at any point during their enrolment in a UNSW medicine program will be excluded from the program. Depending upon the circumstances at the time, students may be eligible to transfer to another program of the University.

Working with Children
Under the Commission for Children and Young People Act 1998 and the Child Protection (Prohibited Employment) Act 1998, students who as part of their enrolment are required to have direct contact with children must declare whether they are a ‘prohibited person’, that is whether they have been convicted of a serious sex offence. It is an offence for a ‘prohibited person’ to work with children.

Clinical placement in Paediatrics is an essential element in all UNSW medicine programs. Any student who is a ‘Prohibited Person’ at any point during their enrolment in a UNSW medicine program will be excluded from the program. Depending upon the circumstances at the time, students may be eligible to transfer to another program of the University.

Students with Blood-borne Viruses and Immunisation for Students
In order to be enrolled in all UNSW medicine programs, students must agree to comply with the Faculty’s Immunisation and Blood-borne Viruses Policy, which aims to minimise the risk of medical students contracting or spreading an infectious disease or blood-borne virus, such as HIV, and Hepatitis B or C. Students must also be registered with the NSW Medical Board. Registrants with the Board (including student registrants) who undertake, or could reasonably be expected to undertake, exposure-prone procedures have a professional responsibility to take appropriate steps to know their infective status in relation to blood-borne viruses. All students in all UNSW medicine programs could ordinarily be expected to undertake exposure-prone procedures and all students in the programs must know their infective status. A registrant (student) who is aware or she has a blood-borne virus infection must not undertake exposure-prone procedures.
Any infective student who knowingly undertakes an exposure-prone procedure or any student who in any other way endangers the health of patients will be reported to the Medical Board’s Impaired Practitioner Program. This may result in registration being withdrawn, which will result in expulsion from the UNSW Medicine and new Medicine programs. Such a student would also be subject to the University’s Student Misconduct procedures and may further be liable to criminal prosecution if a blood-borne virus is knowingly transmitted.
The Immunisation and Blood-borne Viruses Policy of the Faculty of Medicine is found on the website at www.med.unsw.edu.au. Students are required to sign a statement indicating that they have read and agree to comply with this policy at the time of enrolment.

Registration with the NSW Medical Board
Under the Medical Practice Act, all medical students in NSW must be registered with the Board as a prerequisite to undertaking a course of medical study at a medical school in the State. Applications for registration are completed on initial enrolment and upgraded annually. Further details are available on the Board’s website at www.nswmb.org.au/registr2.htm

Special Consideration
In order to ensure that students experiencing difficulties which may in turn affect the successful completion of their course assessment are seen and assisted by the Student Affairs Coordinator, a set of guidelines has been established to provide the framework within which the process and operation of a preliminary consideration regime will operate. These guidelines are publicised in relevant student literature including the Handbook, ensuring that all students in the MBBS program are aware of the availability of assistance and of the details of the process.

Please note: This process does not prevent or discourage a student from discussing their circumstances with the Course Coordinator. Further, these guidelines are intended to be preliminary to the operation of the UNSW Special Consideration Policy. Students may at any time prefer to rely on the provisions of that policy.

Guidelines:
A. Students with a temporary or reversible medical problem or social situation which has impaired their capacity to prepare for or sit for an assessment. Students should approach the Student Affairs Coordinator to explain their situation as soon as possible.
1. The Student Affairs Coordinator may require a medical certificate or other documentation to support the claim.
2. The Student Affairs Coordinator will advise the student whether s/he will support their application for special consideration to the Assessment Review Group should it need to be considered.
3. If special consideration is granted and the student chooses to sit the assessment, the assessment would be marked in the usual way.
4. If the student passes the assessment, then the matter will be taken no further.
5. If the student fails the assessment, the Student Affairs Coordinator will attend the relevant Assessment Review Group meeting and present the case for special consideration.
6. If the Assessment Review Group supports the Student Affairs Coordinator's view that special consideration should be granted, the student will be allowed to re-sit the assessment without penalty, but as though the next assessment was the first time that the student had attempted the assessment.
7. No upward grading of a mark will occur – if a student passes the assessment at which s/he was eligible for special consideration the mark received will stand and will not be up-graded.

Please note that for special consideration to be granted in this category, there needs to be a belief that the problem leading to the granting of special consideration will have resolved significantly by the time of further assessment.

B. Where a problem occurs during an assessment.

1. Where this occurs, the Student Affairs Coordinator should be notified at the earliest possible time and within 48 hours of the assessment, unless there are exceptional circumstances.
2. If the opinion of the Student Affairs Coordinator is that the student was moderately or significantly impaired during the assessment, the Student Affairs Coordinator will represent this opinion at the meeting of the Assessment Review Group.
3. If the student was able to complete a significant proportion of the examination prior to the acute event occurring, it may be possible to base the student mark on the proportion of the examination completed prior to the problem.
4. In other situations the total mark obtained by the student may be the only mark that it is possible to derive.
5. If the student obtains a passing performance, then that could be regarded as the student's mark.
6. If the student failed that assessment s/he would be allowed to re-sit a subsequent assessment as though this were their first attempt.

Student Photographs and Identification Badges

In Year 1 of all UNSW medicine programs, each student is required to be photographed during the first session. These photographs are required for School and Faculty purposes and are also used to produce identification badges, which must be worn in the hospitals.

Special Note on Working as a Doctor

Working as a doctor is both physically and emotionally demanding. They are exposed to stress and disease. If intending applicants have any concerns about these issues or if they are aware of any reason (such as a chronic illness, a disability or a criminal conviction) or any impairment that might make it difficult to gain medical student registration with the NSW Medical Board or to practise as a doctor after graduating from UNSW, they are urged to speak about these important matters in confidence with one of our independent Faculty advisers. To arrange this, telephone the Faculty's Student Affairs Coordinator on (02) 9385 3447.

Faculty Student Organisations

The University of New South Wales Medical Society (Medsoc)
The University of New South Wales Medical Society (Medsoc) is the representative body of the medical students of the University. Further information can be found on the website at: www.medsoc.org.au

Rural Allied Health & Medical Society (RAHMS)
The Rural Allied Health and Medical Society (RAHMS) is a club for allied health and medical students at UNSW from rural, urban and international backgrounds with an interest in rural, indigenous, and international health issues. For further information, contact the Rural Health Unit on (02) 9385 3250 or visit their website on http://rural.med.unsw.edu.au/ruh.nsf/website/clubs.RAHMS

Clinical Learning Environments

South East Health – South Eastern Sydney Area Health Service
Tel: (02) 9947 9898, Fax: (02) 9947 9891

The South Eastern Sydney Area Health Service provides a range of hospital and community health care services for some 763,000 residents and the many people who transit the area each day.

Three principal teaching hospitals, three specialty referral hospitals and a number of associated teaching hospitals are located in the area. There is predominantly an ageing population. Approximately 32% of residents are born overseas and 67% of those are from non-English speaking countries.

The Prince Henry/The Prince of Wales Hospitals
Barker Street, Randwick 2031
Tel: (02) 9382 2222, Fax: (02) 9382 2233

The Prince Henry and The Prince of Wales Hospitals were joined under a common management in 1961 to form the principal teaching hospitals for the Medical School of the University of NSW.

The Prince of Wales Hospital has recently undergone a period of major redevelopment to enable all acute services to be accommodated on the Randwick Campus, which it shares with the Sydney Children’s Hospital, the Royal Hospital for Women and the Prince of Wales Private Hospital.

The Prince Henry and Prince of Wales Hospitals currently cover all specialties and sub-specialties. In addition, statewide services provided include: Hyperbaric Medicine Unit, Spinal Injuries, Lithotripsy, HIV Special Unit and the Albion Street Centre.

Sydney Children’s Hospital
High Street, Randwick 2031
Tel: (02) 9382 1111, Fax: (02) 9382 1777

This is a paediatric tertiary referral hospital serving the whole of the state, one of three such children's hospitals in NSW and is located at the Randwick campus. It has close links through specialist and resident staff with other teaching and associated hospitals. It provides a complete range of paediatric services and has strong links with complementary adult services at Prince Henry and Prince of Wales Hospitals. There are also strong links with community based child health services and local private practitioners.

The Royal Hospital for Women
Barker Street, Randwick 2031
Tel: (02) 9382 6111, Fax: (02) 9382 6513

The Royal Hospital for Women is the University’s principal teaching hospital in obstetrics and gynaecology. There are approximately 4,000 births annually and over 6,500 gynaecological procedures. It is a specialist hospital for obstetrics and gynaecology and includes a department of neonatal paediatrics. The Hospital has established the Department of Endo-Gynaecology and the Natural Therapies Unit, where natural products are actively researched.

The first baby health clinic in NSW, the forerunner of today’s Early Childhood Health Centres, was established here in 1906. The State’s first Antenatal Clinic was also started at the Royal Hospital for Women in 1912.

The Hospital’s Department of Medical Imaging has an international reputation for research and development of ultrasound technique and equipment in obstetrics as does the Gynaecological Oncology Centre, for its work on ovarian cancer and gynaecological malignancy.

The St George Hospital & Community Health Service
Gray Street, Kogarah 2217
Tel: (02) 9350 1111, Fax: (02) 9350 3999

The St George Hospital & Community Health Service is one of Sydney’s busiest principal referral hospitals. Designated as a major Trauma Service, the hospital accepts referrals from outside its immediate area as well as serving a local district population of approximately 225,000 (of whom more than 25% were born overseas). It has the busiest Emergency Department in metropolitan Sydney. It is a state-of-the-art hospital which covers all general areas of medicine (excluding heart and liver transplants). A Private Hospital is located adjacent to the campus.

The St Vincent’s Hospital
Victoria Street, Darlinghurst 2010
Tel: (02) 8382 1111, Fax: (02) 8382 4142

St Vincent’s Hospital is a principal referral hospital operated by the Sisters of Charity. It is an acute general hospital with highly developed specialist units in adult medicine and surgery and diagnostic services. The Hospital provides referral services for NSW and Australia and services for the local community. Specialty services at the Hospital include cardiac transplantation, bone marrow transplantation, a Cancer Care Centre which provides an integrated approach to the management of
malignancy, a comprehensive AIDS service and a specialist Palliative Care Institute (Sacred Heart Hospice). Extensive primary and secondary services are also provided to meet the needs of the local community and these include medical, surgical, geriatric and drug and alcohol services.

Research is undertaken in the Garvan Institute of Medical Research, Professorial Departments, the Department of Clinical Pharmacology and the Anxiety Disorders Unit. St Vincent’s is part of the integrated campus of the Sisters of Charity which comprises St Vincent’s Private Hospital, the Garvan Institute of Medical Research, the Victor Chang Cardiac Research Institute, St Vincent’s Clinic and the Centre for Immunology.

**Calvary Hospital Kogarah Inc**
91 Rocky Point Road, Kogarah 2217
PO Box 261 Kogarah 1465
Tel: (02) 9587 8333, Fax: (02) 9587 1421

Calvary Hospital Kogarah Inc is an Affiliated Health Organisation conducted by the Sisters of the Little Company of Mary. The Hospital was opened in 1966 and provides multidisciplinary palliative care services for 80 inpatients and day-only admissions. The Hospital has a 20-bed Geriatric Rehabilitation Unit, full multidisciplinary team and therapy gymnasium.

There is a Community Palliative Care Team offering holistic, family-oriented care to people with terminal illnesses within the South Eastern Sydney Area Health Service who choose to live at home. An Outpatient Pain Clinic is available at Calvary for these and other patients. Calvary staff offer a consultative service to nursing homes and private hospitals.

**The Langton Centre**
Corner Nobbs and South Dowling Streets, Surry Hills 2010
Tel: (02) 9332 8777, Fax: (02) 9332 28700

The Langton Centre is a specialist agency for the treatment of addictions. The Centre provides medicated detoxification, group and individual counselling, and medical and psychological interventions for dependent drug users. The Centre operates a methadone maintenance clinic and a needle and syringe exchange program.

**St Luke’s Hospital Complex**
18 Roslyn Street, Potts Point 2011
Tel: (02) 9356 0200, Fax: (02) 9357 2334

St Luke’s Hospital Complex, provides acute hospital, nursing home and aged care services. St Luke’s (Private) Hospital is a 108 bed acute General Hospital providing comprehensive surgical, medical and rehabilitation care. Facilities include operating theatres, an intensive care unit, a day surgery/procedures unit, endoscopy unit, telemetry/sleep studies unit, rehabilitation unit including hydrotherapy pool and diagnostic radiology service, including CT Scan. Services provided include Colo-rectal Surgery, Ear Nose & Throat Surgery, Gastroenterology, General Surgery, Gynaecology, Specialty Hand Surgery, Neurosurgery, Oral and Maxillofacial Surgery, Plastic Surgery, Urology, General Medicine and Rehabilitation. It also has a purpose built Day Rehabilitation and Injury Management Centre.

**Sutherland Hospital Caringbah**
Kingsway, Caringbah 2229
Tel: (02) 9540 7111, Fax: (02) 9540 7197

The Sutherland Hospital Caringbah, was founded in 1958. It is a general medical, surgical and obstetric hospital, with various sub-specialties. There are also psychiatric and rehabilitation, oncology and day surgery units, a paediatric ward, and a busy emergency department. Based in the rapidly expanding South Eastern suburbs, the hospital serves an approximate population of 200,000.

**Sydney Hospital and Sydney Eye Hospital**
Macquarie Street, Sydney 2000
Tel: (02) 9382 7111, Fax: (02) 9382 7320

Sydney Hospital and Sydney Eye Hospital has a Accident and Emergency Service. It provides inpatient and outpatient services in general medicine, general surgery, orthopaedics, ENT, hand surgery, and ophthalmology (including the Lions Eye Bank and Save Sight Institute), Sydney Artificial Eyes, Sydney Sexual Health Centre, Kirkeaton Road Centre in Kings Cross and the Langton Centre in Surry Hills.

**War Memorial Hospital Waverley**
125 Birrell Street, Waverley 2024
Tel: (02) 9369 0100, Fax: (02) 9387 7018

War Memorial Hospital, Waverley, is under the governance of the Uniting Church. The hospital runs a geriatric rehabilitation and assessment unit, a rehabilitation outpatients service, a short stay residential respite unit, a day care unit - which provides services for both frail and dementia clients and non-English speaking background groups - and podiatry outpatient services. A hydrotherapy pool supports the inpatient rehabilitation services. The War Memorial Hospital also supports an aged care assessment team, a number of specialist clinics and services, and provides office accommodation for the Waverley Community Team.

**The South Western Sydney Area Health Service**
The South Western Sydney Clinical School (SWSCS) was established in 1990. It embraces multiple campuses, allowing access to a broad and diverse range of health care services delivered to a large (approximately 800,000 people) and diverse population. The Clinical School offers rotation through various sites for small group learning in the fields of medicine, surgery, obstetrics and gynaecology, paediatrics, pathology, microbiology, anaesthetics, intensive care, adolescent health, mental health, population health, community medicine, health promotion, general practice, rehabilitation, aged care, drug and alcohol services, epidemiology and nursing research. The sites include Liverpool, Bankstown, Fairfield, Campbelltown, Camden and Bowral Hospitals.

**Liverpool Hospital**
Elizabeth St, Liverpool, 2170
Tel: (02) 9282 3000, Fax: (02) 6318

The SWSCS is centred at Liverpool Hospital (600 beds), a principal tertiary referral hospital for the South Western Sydney Area Health Service (SWSAHS). It provides services in all the sub-specialties of internal medicine, general surgery including orthopaedics and plastic surgery, pathology and imaging. It has a Brain Injury Centre and a Cancer Therapy Centre which includes rehabilitation and palliative care.

**Bankstown-Lidcombe Hospital**
Eldridge Rd, Bankstown, 2200
Tel: (02) 9722 8000, Fax: (02) 9722 8570

This is a major metropolitan acute general hospital providing 454 beds and caters for approximately 30,000 inpatient separations per year. The hospital offers services such as general medicine and surgery, obstetrics, paediatrics, emergency, intensive care, day surgery, endoscopy, psychiatry, neonatology, pathology and imaging.

**Corrections Health Service**
Long Bay Correctional Centre
Anzac Parade, Little Bay, 2036
Tel: (02) 9289 2977, Fax: (02) 9311 3005

CHS provides and coordinates a comprehensive range of health services for people in custody within the NSW Correctional System. Major clinical programs include General Practice and Primary Health Care, General Medicine/Surgery, Mental Health Programs, Drug and Alcohol Services, Population Health, Indigenous People’s Health Services, Dental and Imaging Services.

**The Illawarra Area Health Service**
Tel: (02) 4275 5111, Fax: (02) 4276 1447

The Illawarra Area Health Service covers an area immediately to the south of the Sydney metropolitan area, and comprises the local government areas of Wollongong, Shellharbour, Kiama and Shoalhaven. The estimated total population of the Illawarra is 327,000, which comprises 5.4% of the total NSW population. The Illawarra Area Health Service is a network of integrated community and hospital services which provide both public and personal health care.

The Illawarra Area Health Service also provides a comprehensive psychiatry service for both inpatients and the community. General practitioners throughout the Division of General Practice also have an active role in the integration of community and hospital services and provide excellent training opportunities in general practice.

Psychiatric care is consolidated at Shellharbour Hospital which has 34 acute inpatient beds. Lakeview House, the psychiatric rehabilitation facility for the Area, also located at Shellharbour Hospital, has 20 inpatient beds and provides care for 20 day patients.

In addition, the Illawarra Area Health Service provides health services through community health facilities, dental, alcohol and HIV/AIDS services, the Illawarra Public Health Unit, mental health services, rehabilitation and aged care services and the Wollongong Diabetes Centre.

**Wollongong Hospital**
Wollongong Hospital is the major teaching and referral hospital for the Illawarra Area. It provides emergency care, specialist medical and surgical
services, intensive care and major diagnostic, maternal and paediatric services for patients referred from throughout the Illawarra. The Wollongong and Port Kembla Hospitals provide complementary services with all acute services located at the Wollongong Hospital. The Port Kembla Hospital comprises 52 beds for Rehabilitation and Psychiatry Services, and the Wollongong Hospital with 240 beds provides a full range of tertiary services.

**Shellharbour Hospital**

The Shellharbour Hospital has 150 beds and provides emergency, medical, surgical, obstetric and psychiatric services. The Critical and Surgical Care Centre, and the Mental and General Well-being Centre.

**Shoalhaven Hospital**

Shoalhaven Hospital is a 143 bed, level 4, district hospital for the Shoalhaven region, providing emergency, elective orthopaedic and plastic surgery, medical, ICU, obstetric, gynaecologic, paediatric, neonatal care as well as rehabilitation services.

**The Greater Murray Area Health Service**

**Wagga Wagga Base Hospital**

PO Box 159, Wagga Wagga NSW 2650
Tel: (02) 6938 6666, Fax: (02) 6921 8243

Wagga Wagga Base Hospital is a 220 bed acute regional hospital and has specialists in most major disciplines (medicine, paediatrics, surgery, orthopaedics, anaesthesia, obstetrics and gynaecology, ENT, ophthalmology, geriatrics, rehabilitation, psychiatry and emergency medicine). The Base Hospital is a significant teaching hospital hosting registrars in medicine, surgery, orthopaedics, anaesthesia, obstetrics and gynaecology and is a primary allocation centre.

**Albury Base Hospital**

PO Box 326, Albury NSW 2640
Tel: (02) 6058 4444, Fax: (02) 6058 4504

Albury Base Hospital is a modern 155 bed facility providing specialist services to the Albury–Wodonga and the surrounding parts of southwestern NSW and northeastern Victoria. The hospital is the designated regional trauma centre for the region, with a catchment population of approximately 150,000 people. The hospital has a suitably appointed and staffed intensive care unit and emergency department, both of which are accredited for training by many of the Specialist Medical Colleges.

**Wodonga Regional Health**

P.O. Box 156, Wodonga, VIC 3689
Tel: (02) 6051 7111, Fax: (02) 6051 7477

The Wodonga Regional Health Service is located in the rural city of Wodonga. Together with the border city of Albury, the Albury–Wodonga district is home to over 90,000 people. The Health Service provides a range of hospital and community health care services including Obstetrics, General Medicine, General Surgery, Acute Care, Paediatrics, Emergency, Mental Health, Medical Imaging and Aged, Rehabilitation and Allied Health care.

**Griffith Base Hospital**

PO Box 1013, Griffith NSW 2680
Tel: (02) 6962 8333 Fax: (02) 6964 1587

Griffith Base Hospital is a 92 bed Base Hospital providing a range of acute specialist services including Emergency Medicine, General Medicine, General Surgery, Paediatric Medicine, Rehabilitation Medicine, ENT, Urology, Paediatric Surgery, Oncology, Obstetrics, Intensive Care, Respiratory Medicine and Rheumatology.

**The Mid North Coast Area Health Service**

**Coffs Harbour Health Campus**

Pacific Highway, Coffs Harbour, 2450.
Tel: (02) 6656 7000, Fax: (02) 6656 7010

The new Coffs Harbour Health Campus was opened in November 2001 with capacity for 202 beds and a floor area of approximately 25,800 square metres. Services in the new facility are clustered around the needs of defined groups of patients and clients in four distinct Care Centres, namely the Family Care Centre, the Medical and Therapeutic Care Centre, the Critical and Surgical Care Centre, and the Mental and General Well-being Centre.

**Port Macquarie Base Hospital**

Wrights Road, Port Macquarie 2444
Tel: (02) 6581 2000, Fax: (02) 6580 1110

Port Macquarie Base Hospital was the first privately operated and owned hospital in Australia. This 161 bed hospital opened its doors to the public in November 1994 and is a comprehensive referral hospital for both public and private patients of Port Macquarie and surrounding areas. The hospital provides a 24 hour accident and emergency service; general surgery; orthopaedic surgery; vascular surgery; gynaecology; obstetrics; urology; ear, nose and throat surgery; renal medicine; oncology; cardiology; thoracic medicine; general medicine; paediatric and neonatal medicine; psychiatry and emergency medicine. The hospital has been accredited by the Medical Association-Colleges of Physicians, Surgeons, Obstetrics and Gynaecology, Orthopaedics and Psychiatry.

**Kempsey District Hospital**

River Street Kempsey. Tel: (02) 6652 6155, Fax: (02) 6563 1557
Kempsey Campus Coordinator – Dr Leo Smith – Tel: (02) 6652 6188.

This 106 bed acute general hospital provides emergency services, medicine, surgery, psychiatry, rehabilitation and obstetrics. Durri Aboriginal Medical Service, located in the Kempsey CBD, is a new state of the art facility providing primary health care for indigenous people.

---

**Faculty Units, Centres and Affiliated Institutes**

**The Bioanalytical Mass Spectrometry Facility**

The Bioanalytical Mass Spectrometry Facility (BMSF) is a UNSW beach-head facility providing research support to investigators on this campus and affiliated teaching hospitals. The BMSF is a major facility for molecular characterisation for the Faculties of Medicine, Science and Engineering at UNSW. The facility is equipped to world class standards enabling all types of mass spectrometry to help answer questions posed by researchers and clinicians. The BMSF is both a research and research-support facility engaged in several areas of study. There are three main overlapping areas of research: large molecule analysis including proteomics, small molecule biomarker research including the monitoring of damage, repair and the cellular changes associated with aging and inflammatory disease, and development of instrumentation and technology for mass spectrometry. The facility offers an analytical service and delivers courses on mass spectrometry and allied topics. The BMSF is in partnership with the Australian Proteome Analysis Facility (Macquarie University) which is funded under the Major National Research Facility Scheme. More information on the BMSF can be obtained at www.bmsf.unsw.edu.au

**Centre for Health Informatics**

The Centre for Health Informatics (CHI) engages in research, development and commercialisation of advanced information and communication technologies for health care delivery. The Centre is a collaborative venture between the Faculties of Medicine and Engineering at the University of NSW and works with partners drawn from the public and private health sector industry, government and other academic organisations. Further information can be obtained at: www.chi.unsw.edu.au

The Centre conducts research and development in 4 broad areas:

- Evidence-based Decision Support - Developing technologies to provide on-line access to clinically relevant information to support decision making by clinicians and consumers.
- Clinical Communications - Understanding how communication fundamentally supports the processing of health care delivery, its role in producing errors, and how new technologies can be used to improve communication.
- Home Telecare - uses information, communications, measurement and monitoring technologies to evaluate health status and deliver health care services to the home from a distance to improve clinical outcomes and allow the elderly and the chronically ill to stay at home longer.
- Evaluation - Assessing the effectiveness of new information and communication technologies in improving health outcomes and delivery.

Postgraduate courses in Health Informatics are offered within Masters degrees in the School of Public Health & Community Medicine.

**Centre for Clinical Governance Research in Health**

Since 1991, the Centre for Clinical Governance Research in Health has undertaken research and evaluation projects on health sector issues. Its core interest is to investigate issues of policy, governance and leadership.
in the health sector. The Centre is involved in conducting original research into clinical governance issues, providing a scholarly capability by which to evaluate health sector policies, programs, and projects, and contributing to national, undergraduate medical, postgraduate health services management, and public health and doctoral education. Further information is available at www.med.unsw.edu.au/clingov

Centre for Culture and Health
The Centre for Culture and Health (CCH), affiliated with the School of Public Health and Community Medicine, focuses on the impact of culture on the health of individuals and communities. The Centre strives to assist in the development of appropriate health services, policies, practices and systems at an individual, local, regional and global level. The focus of the Centre’s research is on (a) multicultural communication, in the patient–practitioner relationship, and within health systems; (b) cultural competence in health care; and (c) a holistic perspective on body, mind and spirit.

Centre for Vascular Research
The Centre for Vascular Research is a multidisciplinary organisation focused on the causation and treatment of occlusive vascular disease and other pathologies with vascular components. This includes projects on angiogenesis in tumour growth and inflammation. The Centre has laboratories in the John Curtin School of Medical Research at the ANU and the Department of Biochemistry and Molecular Biology, Monash University in addition to UNSW on campus and at Prince of Wales Hospital and St George Clinical School. Details of the Centre, structure, group leaders, research directions and opportunities for undergraduate and postgraduate students are available at www.cvr.net.au

Children’s Cancer Institute Australia for Medical Research
Children’s Cancer Institute Australia for Medical Research is an independent institute affiliated with the Faculty of Medicine, UNSW. The Institute was established in 1976 and occupies a 5 storey complex at the southern end of the Sydney Children’s Hospital as well as a number of labs and offices in a nearby building. With staff numbers exceeding 100, including Honours and postgraduate scholars of the University, the Institute undertakes laboratory research on malignant disease in children. Research work is organised into seven programs: experimental therapeutics, molecular diagnostics, molecular carcinogenesis, leukaemia biology, stem cell biology, iron metabolism and chelation and Australian Cancer Research Foundation Drug Discovery Program. The Institute is the only independent medical research institute in the country focusing solely on research into the nature, origin, cause and treatment of childhood cancers (particularly leukaemia and neuroblastoma).

Garvan Institute of Medical Research
The Garvan Institute of Medical Research has a staff of 280 including 45 PhD and MD scholars. The Institute is structured into six major research programs: arthritis and asthma, bone and mineral, cancer, neurobiology, metabolism and diabetes and pituitary disorders - which are funded through program and Project grants from the National Health and Medical Research Council. Located on the St Vincent’s Hospital Campus, the Garvan Institute focuses on the molecular basis of health and disease, integrating a range of basic laboratory based research approaches together with extensive clinical research.

National Centre in HIV Epidemiology and Clinical Research
The National Centre in HIV Epidemiology and Clinical Research (NCHER) is recognised worldwide as a leader in HIV/AIDS research. The NCHER undertakes research into HIV/AIDS that focuses on epidemiology, clinical research and clinical trials, in collaboration with other research centres, government departments, the pharmaceutical industry, community groups, health clinics and general practitioners. The priorities of the NCHER include surveillance and monitoring of HIV infection and AIDS, epidemiological studies of transmission and disease progression, identification of social and behavioural factors affecting HIV disease and the establishment of Australia as a primary site for clinical trials of HIV therapy. As an extension of its role in HIV/AIDS, the Centre also carries out epidemiological and clinical research into other blood borne viruses, particularly Hepatitis C and sexually transmitted infections. Another significant area is the NCHER’s contribution to international clinical research and provision of research expertise and training to countries of the Asia-Pacific region. Recently the Centre has increased its role in the development and testing of novel vaccines for HIV. More information can be obtained from the Centre’s website: www.med.unsw.edu.au/ncherc

National Perinatal Statistics Unit (Australian Institute of Health and Welfare)
The National Perinatal Statistics Unit (NPSU) is a collaborating unit of the Australian Institute of Health and Welfare based at the University of NSW. The NPSU is located on the Randwick Hospital Campus within the School of Women’s and Children’s Health. The NPSU maintains national perinatal and reproductive health data collections based upon data supplied by the States and Territories. An assisted conception data collection is also held based upon data supplied by IVF and Gift Units from Australia and New Zealand. The NPSU in collaboration with States and Territories and various professional, government, non government and consumer groups are involved in the continuing development of national reproductive and perinatal health data systems. The NPSU’s objectives are to monitor and interpret national reproductive and perinatal health data, to conduct teaching and research in perinatal and reproductive health and research in perinatal and reproductive health.

National Drug and Alcohol Research Centre
The National Drug and Alcohol Research Centre (NDARC) was established at UNSW in May, 1986 and officially opened in November, 1987. It is funded by the Commonwealth Government as part of the National Drug Strategy (formerly, the National Campaign Against Drug Abuse). NDARC is situated on the UNSW Randwick campus in the eastern suburbs of Sydney. The centre is multidisciplinary and collaborates with medical, psychology, social science and other schools of the University, and with other institutions and individuals in Australia and overseas. The overall mission of NDARC is: by research and related activities to contribute to the minimisation of the harmful consequences of alcohol and other drugs used in Australia by increasing the effectiveness of the Australian treatment response to drug-related problems.

Prince of Wales Medical Research Institute
The Prince of Wales Medical Research Institute is an independent institute affiliated with the University. Since its opening in 1993, it has grown to become one of the largest aggregates of research nationally on the functions and disorders of the brain and nervous system. It has a staff of more than 100. In 2003, it established the Mayne Clinical Research Imaging Centre based on a 3T machine. Major lines of research include human sensation and motor cortex function, balance and movement; autonomic nervous system; nervous system morphology (brain “atlases”); Alzheimer’s, Parkinson’s and other neurodegenerative diseases; macular degeneration and blindness; clinical neurophysiology; nerve and spinal cord injury; child injury; chronic pain; and role of steroids in maintaining or altering functions of the nervous system. For further information visit the Institute’s website at: www.powmri.edu.au

Simpson Centre for Health Services Research
The Simpson Centre is a NSW Government funded Research Centre with a strong history of applied research and health service innovation. The genesis of the Simpson Centre was in response to increasing pressure for practical solutions to improve acute services. This has now expanded to include research across traditional boundaries linking acute medical and community based health care delivery. The principal objectives of the Simpson Centre are to: innovate, evaluate research and develop health service systems; disseminate research results and facilitate implementation of validated service innovation. This approach also incorporates examination of cultural and psychosocial factors influencing service delivery and utilisation.

Skin and Cancer Foundation Australia
The Skin and Cancer Foundation was established in 1978 and is affiliated with St. Vincent's Hospital. A broad range of clinics is devoted to the diagnosis and treatment of skin cancer, psoriasis, contact dermatitis, vitiligo and pigmented skin lesions. There is a large dermatopathology service. Clinical trials as well as research in occupational dermatoses and histopathology are pursued. The Foundation provides sunscreen testing and irritancy testing for new products. The Foundation has a Westmead branch which provides sunscreen testing and irritancy testing for new products as well as being the main centre for dermatological surgery.

MEDICINE 253
Victor Chang Cardiac Research Institute
The VCCRI was established in 1994 to honour the vision and memory of the late Dr Victor Chang. It is a member of the St Vincent’s Hospital Campus. It aims to conduct the highest quality fundamental research into cardiovascular diseases, with a major emphasis on the prevention, diagnosis and treatment of heart muscle diseases. It currently has active research programs in molecular cardiology relating to the mechanisms of cardiac hypertrophy and signal transduction; developmental biology, gene regulation and enzyme research; the genetics of cardiovascular diseases; cardiac arrhythmias and mechanics; transplantation biology; vascular bioengineering, and the pathophysiology of cardiac ischaemia and coronary restenosis.

Rural Health Unit
The Rural Health Unit was established in 1995 to help address the chronic shortage of doctors in rural areas. Since this time the Unit has seen a rapid growth in personnel and student activities.

The principal areas of responsibility of the Rural Health Unit are:
- Administration of special entry schemes, such as the Rural Students Entry Scheme (RES);
- Promoting Medicine and allied health to rural high school students;
- Administration and support of RAHMS, the Rural Allied Health & Medical Society;
- Supporting rural students in Medicine;
- Encouraging and supporting students who are interested in pursuing a career in rural health;
- Promoting rural health through various avenues, eg, the media and lobbying to the government; scholarships, cadetships, bursaries;
- Promoting rural health as a viable alternative to urban based medical practice;
- Providing a forum for communication between metropolitan and rural health professionals, eg, workshops;
- Conducting research into rural health issues and rural curriculum in the Medicine program; and
- Supporting current students of the School of Rural Health and promoting the School to pre-clinical UNSW based students which will increase the opportunities for rural clinical learning.

For more information please visit the Rural Health Unit website http://rural.med.unsw.edu.au

Indigenous Health Unit
The Indigenous Health Unit works in close collaboration with the Rural Health Unit to:
- Promote Medicine to school-age and mature Indigenous students;
- Administer the Indigenous Entry into Medicine scheme, including the Pre-Medicine program, a preparation to the medical course;
- Select students;
- Support students throughout their course;
- Develop appropriate curricula (in consultation with Indigenous communities);
- Develop partnerships with Indigenous communities;
- Coordinate teaching in Indigenous Health to all students within Medicine;
- Conduct research into Indigenous Health and assist in building the capacity of others to undertake such research.

Program Information
The Faculty of Medicine introduced an innovative six-year undergraduate Medicine program (3802 New Medicine program) that commenced for Year 1 students in 2004. Information below is provided both for this new program and for the existing 3801 Medicine program.

3802 New Medicine Program
MB BS
This six-year program leads to the award of the degrees of Bachelor of Medicine and Bachelor of Surgery – MB BS. This double degree, which is in effect a single degree, may be awarded with Honours Class I, Honours Class II, Division I; Honours Class II, Division II; or at Pass level. The award of Honours is determined on the basis of a student's performance throughout the six-year program, obtained by using the weighted mark for specified assessments in the three phases of the program.

Students who have achieved a high standard in their studies may undertake a one-year program of supervised research leading to the award of the BSc (Med) Honours. For details see the program description for 3831.

Objectives of the New Medicine Program (3802)
The objectives of the new Medicine program are:
- To establish an integrated, interconnected and organised medical knowledge base as a platform for a professional and personal life of learning through experience.
- To develop effective interactions with oneself through reflection; interaction with others through communication; and interaction with information and learning resources through information literacy and critical analysis.
- To develop a set of personal attributes and skills appropriate to the professional practice of Medicine.

These objectives have been translated into a set of educational outcomes; these being eight desired capabilities in graduates of the new Medicine program, grouped as follows –

Applied Knowledge and Skills:
1. Using basic and clinical sciences in medical practice.
2. Understanding the social determinants of health and disease.
3. Patient assessment and management.

Interactional Abilities:
4. Effective communication.
5. Working as a member of a team.

Personal Attributes:
6. Self-directed learning and critical evaluation skills.
7. Understanding and acting in an ethical and socially responsible manner.
8. Development as a reflective practitioner.

Program Structure (3802)
The duration of the new Medicine program is normally 6 years. It has a modular structure comprising a series of fully integrated courses studied over 27 teaching periods, each of 8 weeks duration. There are 4 teaching periods in every year (Teaching Periods 1-4) and an additional fifth teaching period (Summer Teaching Period) in years 4-6. The commencement dates of Teaching Periods 1 and 3 correspond to the beginning dates of the standard UNSW Sessions 1 and 2 respectively, and the Summer Teaching Period generally commences on the first Monday in January.

Teaching is integrated across discipline areas. Courses usually correspond to an 8-week module, rather than the sessional arrangement applicable to most UNSW courses. However, in general the standard UNSW program load of 48 units of credit (UOC) per year will apply, with most 8-week courses being treated as 10 UOC. As part of the program, students are required to complete 12 UOC of General Education courses (unless exempt under UNSW rules), which may be available as sessional courses or in block mode. Students are also required to undertake 12 UOC of elective courses in a faculty or faculties other than Medicine.

The program is organised into three phases. Phase 1 includes an initial Foundations course, followed by 8 x 8-week courses focusing on basic medical sciences in relation to the human life cycle; social, ethical and legal issues related to health care; and early experience in clinical or other health-related environments. During this phase, students will undertake a variety of learning activities involving students from different stages of the program working collaboratively in small groups. Phase 2 consists of a minimum of 4 x 8-week courses, with increased clinical content and an emphasis on correlation between prior and current learning. Phase 3 consists of a minimum of 9 x 8-week courses with a clinical focus, but still includes relevant content from the basic medical sciences and the social sciences. The sequence of courses in Phase 1 is fixed, but in later phases students will have increasing flexibility to tailor the sequence and content of the courses they undertake to match their interests and needs.
In all phases of the program, students will be required to travel to various clinical environments associated with UNSW, which will be the predominant locations for learning in Phases 2 and 3. These locations include Clinical Schools associated with St. Vincent's Hospital, Darlinghurst; St. George Hospital, Kogarah; the Randwick Campus Hospitals; various locations in the South Western Sydney Clinical School based around Liverpool; and the School of Rural Health, which has campuses in the Greater Murray and mid-North Coast areas. Throughout the program, students may be attached to multiple sites, which will typically include at least 8 weeks in a non-metropolitan setting.

After completing Phase 1, and typically in Phase 2, students will undertake an Independent Learning Project, equivalent to 3 courses, which, unless otherwise negotiated, will be taken consecutively over 4 teaching periods, during which students should also complete 12 UOC of elective courses in a faculty or faculties other than medicine. This project will offer scope for in-depth study in a variety of possible settings, ranging from laboratory-based work in the biomedical sciences, audits of clinical practice, to for example, projects dealing with cross-cultural issues or health economics, which may be undertaken outside the Faculty of Medicine.

Students wishing to undertake a full year of research will be able to enrol in the BSc (Med) Honours program 3831. These students will be exempt from undertaking the Independent Learning Project and will thus complete the combined program over 28 teaching periods in 6.5 years. Exemption from the Independent Learning Project will also be granted to students who have previously completed a research Honours program or higher research degree, or a Master degree with a significant research component, or who can otherwise demonstrate acceptable evidence of independent study or research at a tertiary level. These students will complete the Medicine program over 24 teaching periods.

**Rules of Progression 3802**

Assessment in this program is capability based, requiring students to demonstrate their ongoing development with respect to the eight areas of capability. Progression will not be based solely on satisfactory completion of individual courses, nor will it correspond solely to annual stages. Full details are available on the Faculty of Medicine website at www.med.unsw.edu.au

**3841 New Arts/Medicine Program**

**BA MB BS**

The new Arts/Medicine program is an alternative program of study in which, over a seven year period, a student may complete the degree of Bachelor of Arts, together with the degrees of Bachelor of Medicine and Bachelor of Surgery. The new Arts/Medicine program is intended for those students who wish to continue their interest and studies in the Arts and Social Sciences during their medical studies.

A limited number of places are available in this program and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Office of the Dean as soon as possible after receiving their offer of a place in the new Medicine program. Selection of students for the new Arts/Medicine program is made approximately two weeks before commencement of Session 1, although students may apply to transfer from the new Medicine program (3802) to the new Arts/Medicine program (3841) at the end of Year 1.

Over a period of seven years, students will be required to fulfil the requirements of the MB BS degree program as well as 66 units of credit in courses offered by the Schools/Departments/Programs within the Faculty of Arts & Social Sciences, including an approved major sequence. A major sequence equals 42 units of credit (usually 12 at Level 1 and 30 at upper level).

Students in the BA MB BS program will not be required to complete General Education courses or other courses outside the Faculty of Medicine. They will usually complete the requirements for the BA after 4 years. Upon joining the Medicine program, they will undertake a short clinical skills refresher course. Students wishing to undertake a full year of research in Arts will be able to enrol in the BA Honours program. Subject to the sequence of courses taken during Phase 2, these students may be exempt from undertaking the Independent Learning Project and could complete the combined program in approximately 7.5 years.

Students who have completed the new combined Arts/Medicine program are eligible for the award of Honours in the MB BS degree program, based on the weighted mark for specified assessments in the three phases of the MB BS program, together with the marks obtained in the best 24 UOC undertaken in the Faculty of Arts & Social Sciences.

**Award of Honours (3802 and 3841)**

This will be calculated on the basis of a weighted mark for specified assessments in the three phases of the program, together with the marks obtained in General Education courses and courses undertaken outside the Faculty of Medicine.

Please note that:

To be eligible for Honours, students must achieve a grade of Credit or better in the Independent Learning Project, unless they have been exempted from undertaking the project. The Faculty Assessment Review Group considers the ranked list of students and their marks and decides the cut-off marks for the award of Honours at the various levels. Neither the percentage of the students obtaining Honours at the various levels nor the cut-off marks are predetermined, and the Faculty Assessment Review Group makes its own assessment of the level of academic attainment indicated by the overall program mark.

**Relative weighting within phases**

**Phase 1**

1. End-of-Block Examinations (cumulative) 1
2. End-of-Phase Examination 1
3. Portfolio Assessment 2
4. Clinical & Communication Skills Examination 1

**Phase 2**

1. Clinical Examination 3
2. Portfolio Assessment 3
3. Project Marks (best 4 if more than 4) 2

**Phase 3**

1. Clinical Module Assessments (best 8) 1
2. Portfolio Assessment 1
3. Clinical and Correlation Examination 2

**Relative weighting of phases and other components - 3802**

**3801 Medicine Program**

**BSc(Med) MB BS**

This program is no longer available to commencing students. Prospective students should refer instead to the new Medicine program (3802).

This six year program leads to the award of the degrees of Bachelor of Science (Medicine), Bachelor of Medicine, Bachelor of Surgery – BSc (Med) MB BS.

These degrees, which are in effect a single degree, may be awarded with Honours Class 1; Honours Class II, Division I; Honours Class II, Division II; or at Pass level. The award of Honours is determined on the basis of a student's performance throughout the six year program, and is usually obtained by using the weighted average mark for each year, calculated by weighting the courses according to units of credit. On completion of Year 3 of the six year program, students also qualify for the degree of Bachelor of Science (Medicine). Students would not ordinarily be awarded the BSc(Med) until the completion of the requirements for the award of the MB BS. However, students who have completed the requirements for the award of the BSc(Med) and are leaving the Medicine program 3801 (BSc(Med)MB BS), either through their own decision to withdraw or upon exclusion by the University, are eligible to be awarded the BSc(Med) degree at that stage.

Students who have achieved a high standard in their studies may undertake an additional one year program of supervised research leading to the award of the BSc(Med) Honours. For details see the program description for 3831.
Objectives of the Medicine Program (3801)

The objectives of the Medicine program are:

1. To produce a graduate with knowledge of medical and behavioural sciences sufficient to understand the scientific basis of medicine and to go forward with medicine as it develops further.
2. To provide a graduate with the flexibility of outlook and training necessary to progress to any field of endeavour in medicine or related disciplines.
3. To provide education in clinical methods and patient care in the main branches of medicine and surgery so that the graduate could undertake patient care under supervision at the level of an intern.
4. To help the graduate understand professional and ethical principles and to be at all times mindful of the individual’s obligations to patients, colleagues and the community.

Supplementary Assessment (3801)

Details of assessment requirements are contained in the sections on particular years and courses in the program. The following regulations relate to supplementary assessment, which apply to all years of the Medicine program (3801).

Course examiners may, in the time between the sitting of an assessment and the meeting of the Assessment Review Group, require students to present themselves for further assessment to resolve any doubts as to a student’s performance. After the Assessment Committee meets further assessment may be given to allow the Assessment Review Group to resolve a doubt. In Years 3, 4 and 6 such additional assessment is usually undertaken in December and in Year 2 in the following January and February. Such further assessment may be given when students, through illness or some other acceptable circumstances, have been prevented from taking one or more of the assessments or have been disadvantaged during the assessment.

In Year 5, course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Review Group, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5:4. Students are warned that they may be required to undertake such additional assessment and should take this into account when making travel arrangements for the period after the end of Term 5:4. Further assessment may not be granted when the composite mark accurately reflects failure to achieve the required standard of knowledge and understanding of the course.

Program Details (3801)

Year 1 – not offered in 2005
Year 2 – not offered in 2005
Year 3 – offered for final time in 2005

Year 3 is conducted in two academic sessions. The principal campus-based courses of the year are Medical Pharmacology, Medical Physiology, Microbiology for Medical Students and Pathology. Clinical Studies 3 continues the clinical program commenced in first year. Students also take the course Medical Ethics and Health Law, which builds on material presented in first year ICBS and second year Human Behaviour. An understanding of Immunology is also required to enable students to deal with the pathogenesis of specific diseases. To facilitate this understanding, a series of introductory lectures in Immunology provide an outline of the structure and function of the immune system, covering the cells and mediators involved in the immune response. The Immunology Program is integrated with the Microbiology course on the response to infectious diseases, and with the Pathology course and is presented in an interdisciplinary fashion, providing a basis for subsequent instruction in the diagnostic and therapeutic aspects of clinical immunology in the later years of the curriculum.

Assessment

In addition to the end of year assessment, mid-year progress assessments are programmed in some courses.

Rules of Progression

Students who pass all courses in Year 3 are eligible to progress to Year 4. Students who do not pass a course are required to repeat the whole course. They are not required to repeat any course in which they have attained a pass. The exception is that they are required to repeat Clinical Studies 3 while they are repeating a Year 3 course or courses, regardless of whether or not they have passed Clinical Studies 3.

Allocation to Hospitals in Year 4

During Year 3, students are asked to list their preferences regarding allocation to a Sydney or rural teaching hospital. For further information, refer to the earlier paragraph ‘Attendance at, and Residence in, Hospitals’.

Year 4

Year 4 of the program is primarily based in the teaching hospitals and comprises 6 terms totalling 39 weeks. Of these weeks, 36 will be spent in hospitals and 3 will be spent on campus. For their time in hospitals, students will work as part of a healthcare delivery team. The students’ responsibilities as part of that team will be increased gradually as new skills are acquired. The philosophy inherent in education by attachment to a hospital team is important. Learning ‘on the job’ exposes students to real clinical situations incorporating both the medical and social implications of disease and allows the continued development of counselling skills. Thus, students will learn that hospital care should be linked to continuing care in the community, and that there is much emphasis in modern medicine on rehabilitation to maximise patients’ chances of resuming their normal role in society. Reading about pathological processes, combined with team discussion of patient care, provides the ideal environment for the retention of new knowledge.

The teaching of Community Medicine is integrated with clinical studies in the teaching hospitals and is a part of the campus teaching program. The Pathology course comprises a component of didactic teaching within the framework of the common campus program and a major hospital-based component taught through a tutorial program.

The course of Clinical Pharmacology (Therapeutics) is introduced during the common campus program and reinforced during discussions of patient management as part of student attachments to clinical units.

At the commencement of fourth year, each student will receive a syllabus containing details of the integrated program for Clinical Studies, Pathology, Clinical Pharmacology and Community Medicine.

Rules of Progression

Students will be required to pass each of following segments of the assessment: the Population and Community Health assessment, the Pathology assessment, the Short Case clinical examination and a pass in the written papers (as a combined mark).

Students who have not completed the General Education components of the Medicine program and who otherwise are eligible to progress to Year 5 are not allowed to progress until they have satisfied such requirements.

Year 5

Year 5 is conducted in four terms, each of nine weeks. In Terms 5:1 to 5:4 students rotate through blocks of teaching in obstetrics and gynaecology, paediatrics, psychiatry, geriatrics, general practice and subspecialties, rather than studying the courses concurrently. For this purpose students are allocated to a particular group (A, B, C, or D) and will follow the program of that group for the year.

The courses studied in Year 5 are:

- MAFCS001 Geriatrics/General Practice/Subspecialties
- OBST5001 Obstetrics and Gynaecology
- PÆD5101 Paediatrics
- PSYM5001 Psychiatry

Sequence of Blocks

**Group A:**

Term 5:1 (9 weeks) Paediatrics
Term 5:2 (9 weeks) Obstetrics and Gynaecology
Term 5:3 (9 weeks) Psychiatry
Term 5:4 (9 weeks) Geriatrics/General Practice/Subspecialties

**Group B:**

Term 5:1 (9 weeks) Obstetrics and Gynaecology
Term 5:2 (9 weeks) Paediatrics
Term 5:3 (9 weeks) Geriatrics/General Practice/Subspecialties
Term 5:4 (9 weeks) Psychiatry
Clinical Studies 6 (MDSG6001) and Final Year Elective Term (MFAC6001) by a focused clinical case examination, a viva voce examination and a

In Integrated Clinical Studies 6 (MDSG6001) of which 30 weeks is based especially those wishing to undertake attachments overseas. See course

Preparation for Year 6 Elective Term

Assessment and Rules of Progression

The work of each rotating block is assessed during or towards the end of the block. Students will be required to pass in all four term examinations before progressing to Year 6. Course examiners may, in the time between the sitting of term assessments and the meeting of the Faculty Assessment Review Group, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5:4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5:4. A student who fails two terms or more may be required to repeat all Year 5 courses.

Preparation for Year 6 Elective Term

Arrangements for Elective attachments in Year 6 must be made by the students. Students should commence these arrangements in Year 4, especially those wishing to undertake attachments overseas. See course description for MFAC6001.

Year 6

The first term in Year 6 is an Elective term (MFAC6001) of 8 weeks. The remaining five terms totaling 32 weeks are devoted to the course Integrated Clinical Studies 6 (MDSG6001) of which 30 weeks is based in the teaching hospitals and 2 weeks will be spent on campus.

Assessment and Rules of Progression

In Integrated Clinical Studies 6 (MDSG6001) students will be assessed by a focused clinical case examination, a viva voce examination and a multiple choice examination. All three components must be passed. In order to be eligible for graduation, students must pass both Integrated Clinical Studies 6 (MDSG6001) and Final Year Elective Term (MFAC6001).

3821 Combined Science and Medicine Program

(BSc MBBS)

This program is no longer available to commencing students.

3840 Combined Arts and Medicine Program

BA BSc(Med) MB BS

This program is no longer available to commencing students. Prospective students should refer to the new Arts/Medicine program 3841.

The Arts/Medicine program is an alternative program of study in which, over seven years, a student may complete the degree of Bachelor of Arts, with the degrees Bachelor of Science/Medicine), Bachelor of Medicine and Bachelor of Surgery. The Arts/Medicine program is intended for those students who wish to continue their interest and studies in the Arts during their medical studies.

Over a period of seven years, students will be required to fulfill the requirements of the BSc(Med) MB BS degree program as well as 60 units of credit in courses offered by the Schools/Departments/Programs within the Faculty of Arts (including an approved major sequence).

Students who have completed the combined Arts/Medicine degree program are eligible for the award of Honours in the BSc(Med) MB BS degree program, based on weighted performance in courses (excluding those courses not in the normal Medicine program) throughout the combined program. The award of Honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the program in accordance with the rules applying to the Medicine program 3801.

Program Details 3840

Students are required to undertake all BSc(Med) MB BS courses plus 60 units of credit from the Faculty of Arts (including a major sequence) during Years 1 to 4. A major sequence equals 42 units of credit (usually 12 at Level 1 and 30 at upper level). Details of all Faculty of Arts courses are given in the Arts section of this Handbook.

Year 1, 2005 – not offered

Year 2, 2005 – not offered

Year 3, 2005

CMED3101 Medical Ethics and Health Law
MDSG3001 Clinical Studies 3
MICM3228 Microbiology for Medical Students
PATM3101 Pathology
PHPM3014 Medical Physiology 2
PHPM3055 Medical Pharmacology

Year 4, 2006

Upper level Arts major sequence plus additional Arts courses (48 UOC)

Year 5, 2007

Students join Year 4 of the Medicine program 3802.

Ranking for the Award of Honours (3801, 3821 & 3840)

Students are ranked on the basis of their performance throughout the undergraduate Medicine program. An overall program mark is calculated for each student using the following procedure:

1. A weighted average mark for each year of the program is determined. This year mark is obtained by weighting each of the courses in the year, according to the units of credit. The course weights for each of the years of the program are shown in Table 1 below.

2. The overall program mark is determined by applying the year weightings listed in Table 2 to the weighted year marks.

3. If a student were required to sit for a supplementary assessment (other than for medical reasons or other exceptional circumstances) the course mark used is that awarded for the original assessment.

4. If a student were required to repeat a year (other than for medical reasons or other exceptional circumstances), the weighted year mark used is that obtained at the first attempt.

5. In the calculation of the average weighted program mark for BSc MB BS students, the aggregate mark for the Science component is calculated as a weighted aggregate of all courses counted towards the Science degree. The course weights are as follows:

   Level I courses weighted by a factor equal to 0.0625 per course, except
   General Mathematics, Fundamental of Physics and Life Science Physics
   (0.05 per course) and Higher Chemistry and Higher Mathematics (0.07
   per course).

   Level II courses weighted by 0.1875 per course.

   Level III courses weighted by 0.25 per course.

   Level IV courses (Honours) not counted.

   The three years of BSc component of the BSc MB BS program are treated as equivalent to the first two years of the MB BS program and therefore have a total year weight of 6 relative to the MB BS year weightings. There is a limit set of 50 for the best possible score in the first year of the BSc component to put all students, whether or not they undertake Higher Mathematics or Physics, on the same footing. Only the best 144 units of credit in the BSc component are considered in calculating the ranked score.

6. Honours calculation for students undertaking the BA BSc(Med) MB BS program is the same as for the BSc(Med) MB BS program, i.e. the courses in the BA component are not counted.

7. Provision is made for students admitted with advanced standing and/or exemptions in certain courses not to be penalised in the calculation of rankings.

Award of Honours

1. The Faculty Year 6 Assessment Committee considers the ranked list of students and their marks and decides the cut-off marks for the award of Honours at the various levels.

2. Neither the percentage of the students obtaining Honours at the various levels nor the cut-off marks are predetermined, and the Committee makes its own assessment of the level of academic attainment indicated by the overall program mark.

3. As a guide, the distribution of the awards of Honours in 2003 was:

   Class I Honours
   Program Mark: 73.15% - 83.60%
   Number of Awards: 20
   Percent of graduaants: 10.8%
Class II Div. I
Program Mark: 70.22% - 72.99%
Number of Awards: 28
Percent of graduands: 15.1%

Class II Div. II
Program Mark: 68.95% - 70.13%
Number of Awards: 25
Percent of graduands: 13.5%

3831 Bachelor of Science (Medicine) Honours
BSc(Med)Hons
This is a one year research program offered to students in the six year Medicine program who have achieved a high standard in their studies. Those who complete the research program in conjunction with the six year curriculum, will be eligible for the award of the degree BSc(Med)Hons.

In general, the aims of the year, normally spent in supervised research, are to enable the student to research in the appropriate discipline and shall consist of such formal and special work and any examinations prescribed by the BSc(Med)Hons Committee.

Assessment Guidelines
1. The BSc(Med)Hons Committee determines the assessments for the program on the advice of the supervisors and two assessors who are external to the school and at least one being external to the School of enrolment.
2. The compulsory components of the assessment include a thesis, an essay or literature review, two seminar presentations and a supervisor’s report.
3. Candidates must take part in the activities of the program by participating in seminars, by the presenting of essays or literature reviews and other prescribed activities.
4. A thesis is compulsory and forms a major part of the assessment. The thesis must be typed and suitable for subsequent binding if required. The typescript length of the thesis is normally no more than 20,000 words.
5. Candidates are required to present their research projects in the two seminar presentations organised by the BSc(Med)Hons Committee. For students studying overseas, a computer-generated presentation will be requested in lieu of the mid-year seminar and the members of the BSc(Med)Hons Committee will have the right to ask questions of the student by phone or email after viewing the presentation.
6. It is desirable that candidates take part in the activities of the school by participation in seminars and other prescribed activities.
7. The degree of BSc(Med)Hons may be awarded in the following grades: Honours Class I; Honours Class II, Division I; Honours Class II, Division II or no award made.

This program in Health and Sports Science offers a comprehensive education in the area of health and sports science. Four years of full-time study, or the part-time equivalent, leads to the award of a Bachelor of Science (in Health and Sports Science). The Faculty Assessment Review Group may award Honours to students who perform throughout the program with merit. The level of performance required for such award will be determined by the Assessment Review Group. Part-time students undertake a reduced program, subject to the availability of courses. A total of 192 units of credit must be successfully completed for the award of this degree.

Stage 1 introduces students to the core science that will serve as a solid foundation for the following years. Courses in this include chemistry, statistics, biology and psychology. Students will be introduced to the profession of exercise science through two introductory courses during this stage. Stage 2 of the program begins to focus on human physiology and biochemistry, biomechanics, sport psychology and nutrition while building on the scientific principles acquired in Stage 1. Stage 3 of this multidisciplinary program moves the student towards a holistic understanding of health and exercise as it offers increasing complexity of course material: exercise physiology, musculoskeletal physiology and physiology of endurance-based activity, functional anatomy, biomechanics, and motor control and dysfunction. Stage 4 continues to develop multidisciplinary expertise through use of specialised courses and electives. Extensive coordinated and structured industry experience is a key component of this final year. Students choose from a selection of courses in their fourth year to aid their graduate employment strategies. Understanding of scientific method is a key component of this course and all students will take a research methods course in Stage 4. General Education is a requirement of all undergraduate courses at this university and may be taken in Stages 2 and 3.

**Program Details**

**Stage 1**

**Session 1**

- CHEM1011 Fundamentals of Chemistry A or CHEM1031 Higher Chemistry C 6
- PHPH1501 Introduction to Health & Sports Science A 6
- PSYC1001 Psychology 1A 6
- BIOS1201 Molecules, Cells and Genes 6

**Session 2**

- CHEM1021 Fundamentals of Chemistry B or CHEM1041 Higher Chemistry D 6
- ANAT2111 Introductory Anatomy 6
- PSYC1011 Psychology 1B 6
- PHPH1502 Introduction to Health & Sports Science B 6

**Stage 2**

**Session 1**

- BIOC2181 Fundamentals of Biochemistry or BIOC2101 Principles of Biochemistry (Advanced) 6
- PHPH2501 Physiology for Health & Sport Science A 6
- SESC2451 Biomechanics for Sports Scientists 6
- GENxxxx General Education Courses 6

**Session 2**

- PHPH2502 Physiology for Health & Sport Science B 6
- FOOD3330 Nutrition for Sports Science 6
- PHPH2503 Exercise Physiology 6
- PSYC2126 Sport Psychology 6

**Stage 3**

**Session 1**

- ANAT3131 Functional Anatomy 1 6
- SESC3451 Human Movement Measurement Methods 6
- PHPH3502 Skeletal Muscle in Health and Exercise 6
- PHPH3507 Physical Activity and Health 3
- GENxxxx General Education Course 3

**Session 2**

- ANAT3141 Functional Anatomy 2 6
- PHPH3505 Motor Control and Dysfunction 6
- PHPH3506 Principles of Exercise Prescription 3
- GENxxxx General Education Course 3

Plus a further 6 credit points from:

- PHPH3503 Physiology of Endurance Activity or PATH2201 Processes in Disease 6

**Stage 4**

**Session 1**

- PHPH4501 Introductory Research Methods 3
- PHPH4503 Practicum A 6
- PHPH4513 Physical Activity in Special Populations 3

**Session 2**

- PHPH4504 Practicum B 6
- GENxxxx General Education Courses 3
- PATH2201 Processes in Disease* 6

**Stage 4 Electives**

Students must choose from the available electives so as to provide a total of 48 units of credit in Stage 4. The offering of electives is dependent on student numbers.

**Session 1**

- PHPH4502 Principles of Pharmacology 3
- PHPH4509 Movement Rehabilitation 6
- PHPH4508 Brain Mechanisms in Sensory Motor Integration 3
- PHPH4511 Sports Management 3
- BIOM9541 Mechanics of the Human Body 6
- SESC9400 Ergonomics 1 3
- FOOD3440 Advanced Nutrition 6
- PAED4560 Paediatric Exercise Science 3

**Session 2**

- PATH3207 Musculoskeletal Diseases 6
- PHPH4505 Research Project 6
- PHPH4512 Circadian Rhythms: Sleep Physiology and Pathophysiology 3
- CMED9516 Introduction to Public Health 4
- ELEC9405 Human Movement Control Topics 6
- PHPH4506 Drugs in Sport (Effects & Interaction) 3
- SESC9410 Ergonomics II 3

*This course must be taken Session 2, Stage 4, if not completed in Stage 3

**Unit of Credit Distribution**

Stage 1, 48; Stage 2, 48; Stage 3, 48; Stage 4, 48. Total Units of Credit for the Program = 192.

Full-time Program Load Equivalence (EFTSU) = 1.

3860 Bachelor of Science in Prosthetics and Orthotics

**Full-time or Part-time Distance Learning**

www.pando.unsw.edu.au

**Program Details**

This program is not available in 2005.

The Bachelor of Science in Prosthetics and Orthotics is a recently introduced four year degree program that teaches the theoretical, technical and clinical skills required by prosthetic and orthotic practitioners. Students will learn to assess patients in clinical settings, with amputations and motor disabilities and learn to design, fabricate, fit and care for artificial limbs (prostheses) and body braces and supports (orthoses).

The orthotist and prosthetist must understand the anatomy, physiology and pathology of the human body and the forces that are applied to joints during movements. They must develop an understanding of the properties of the materials and components from which the devices are fabricated, in order to ensure their safe and effective use in clinical practice. Prosthetists and orthotists also need the clinical skills to assess patients’ needs and design appropriate devices to meet their requirements.

The program is predominantly offered in a distance-learning mode, delivered using the Internet and multimedia (web-based) learning materials. Some courses are also available in on-campus mode at our Kensington and Randwick campuses. This format provides greater flexibility for full-time (4 years) or part-time (8 years) study. Lecturer-student and student-student interaction is promoted through discussion boards, the telephone and email. Students get a further opportunity to interact with lecturers and classmates and gain hands-on experience during the face-to-face practical sessions, which form an essential component of each stage of the program.
First year subjects ensure that students have a solid biomedical and scientific foundation on which technical and clinical skills and knowledge can be built. Students also receive their first introduction to prosthetics and orthotics at this stage.

In the second and third year, students begin to focus on more specialised areas such as biomechanics and pathology. They also enhance their understanding and skills in the design and construction of specific prosthetic and orthotic devices and their role in patient rehabilitation.

In the fourth year of the program, students are placed in clinical or industrial settings to gain a more practical understanding of the principles learnt in the earlier years.

**Conditions for the Award of the Bachelor of Science in Prosthetics and Orthotics degree**

A student must have completed 192 units of credit including 12 units of General Education courses.

Honours is available to suitably qualified students.

The degree must contain a sequence of study as specified in the program description for the distance education subjects. On-site attendance at the face-to-face/practical component of each course is compulsory. Students cannot pass these courses and move onto the next stage, without participation in this component of the course.

A Message from the Dean

We live in amazing times. Science and technology have extended the reach of our senses way beyond the edge of the map of human experience. We can now hear a single electron change orbit inside an atom. We can see into the outer reaches of the universe; feel movements deep inside the Earth’s crust; reach back far into the ancient past; and eavesdrop on events inside a living cell. And we can meet and interact with other people in virtual communities that exist in virtual worlds.

When you study science with us at UNSW, you will be at the leading edge of this exciting revolution. You will learn how to learn, how to follow your curiosity about the world and the way it ticks, and you will acquire a tool-kit of knowledge and skills to equip you to step out into what we hope will be a lifetime of satisfying work.

This section of the Handbook covers the courses and programs available for study in science and provides a framework of the rules and regulations. Staff in the schools of the Faculty and the Science Student Centre are available to help you with administrative matters, course selection and career directions, and with any difficulties you may encounter in your studies.

We encourage you to explore the full diversity of opportunities on offer, to specialise on the one hand and yet gain an appreciation of scholarship in other areas. It is important that you learn to think creatively and critically, and to work with others in order to resolve complex problems.

We wish you every success at UNSW. We hope that the time that you spend with us, as valued members of our community, will be happy, stimulating and productive and that in future years you will look back on “the UNSW experience” as one which set you on the path to fulfilling your career and lifestyle aspirations. We believe that tomorrow’s leaders will be drawn more and more from the ranks of science. We invite you to join us and let us help to make sense of this amazing world and prepare you to play your important part in a future that promises to be more amazing still.

Professor Michael Archer
Dean

Faculty Information and Assistance

General Information
Science programs are built from the wide range of science and technology-based courses available across UNSW.
These programs are divided into two types: the general ‘Science’ and ‘Advanced Science’ programs, and a range of ‘Vocational Science Programs’ oriented more toward professional or industry based careers.
These programs, and the courses which they are composed of, are described in more detail under ‘Specialist Degrees’. However, the information that follows in this section applies equally to both types of program.
Educational and academic activities at UNSW are organised and administered in faculties. The Faculty of Science is focused towards providing teaching and research in the sciences. Other faculties, including Engineering, Medicine, Arts and Social Sciences, and Commerce and Economics, also make a major contribution to activities in the sciences.
The basic educational building blocks in the sciences are the courses which students take. These courses are drawn together into majors, minors, and study plans providing coherent development of specific disciplines, and these programs are in turn drawn together to form degrees or programs. These majors, minors, and study plans are listed in the contents pages and are described in detail in this section of the Handbook.

Some People Who Can Help You
This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Science.
If you require advice about enrolment, degree requirements, progression within programs or any other general matters, contact the Science Student Centre, Robert Webster Building; tel: (02) 9385 6125, fax: (02) 9385 6127 or email: SSO@unsw.edu.au
The office is staffed between 9am and 5pm from Monday to Friday, but this may vary during non-session times.
For information and advice about course content and requirements, contact the appropriate schools/teaching units as indicated in the course descriptions.

The Faculty of Science Website
Please refer to the Faculty of Science website for further information: www.science.unsw.edu.au

Course Descriptions
Descriptions of courses offered in 2005 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at: www.handbook.unsw.edu.au

Computing Information
Within the Faculty of Science, each of the schools manages or has access to undergraduate computing laboratories equipped with a combination of X-terminals, PCs and Macintoshes. These are connected through the campus-wide network, and are used extensively in undergraduate teaching and in providing email access to all students. This is provided through local and often specialised facilities and through access to regional and national centres. The systems accessible range from PCs to supercomputers together with the associated peripherals and support personnel. Further information on computing, please contact the school office.

Enrolment Procedures
New students will receive enrolment information with their offer of a place in their chosen program.
All students re-enrolling in 2005 should enrol via myUNSW during appropriate appointment periods. Information regarding enrolling online is available from NewSouthQ, Science Student Centre or via the web: www.my.unsw.edu.au
The course timetable for second and later years, for the Science and the Advanced Science programs is available in late October/early November from the Science Student Centre, in the Robert Webster Building. All re-enrolling students should collect one of these timetables. Students who expect to complete the requirements for their degree in 2005 or are proceeding to Honours will also need to collect form: SM2005. This form is to be completed and returned to the Science Student Centre by early January, after students receive their results.
Students not enrolling before the first day of Session 1 have no guarantee that a place is available in the courses offered in that year. This is particularly important for courses where laboratory space is limited. Students should be aware that some courses may require a field trip which may involve personal costs to the student. Consult individual course authorities for details. Quotas may apply to certain programs and courses and students should consult with program and course authorities for details.

Admission
For applicants applying for admission to UNSW through the Universities Admissions Centre (UAC), this section lists the UAC codes which correspond to the Science programs offered by UNSW.
For admission requirements for Science programs please refer to the appropriate entry in the current UAC Guide or refer to the UAC website: www.uac.edu.au
429000 Science
This is applicable to study in a wide range of Science areas in the Bachelor of Science program 3970, as indicated by the majors outlined in Table A.
429003 Science (Communications)
This is applicable to study in a wide range of Science areas in conjunction with a Science Communications stream in the Bachelor of Science (Communications) program 3993. The majors available are the same as for 3970, with the exception of Philosophy and History and Philosophy of Science.
429004 Science (Media and Communication)
This is applicable to study in a wide range of Science areas, in conjunction with a Media and Communications stream, in the Bachelor of Science (Media and Communications) program 3994. The majors available are the same as for 3970, with the exception of Philosophy and History and Philosophy of Science.
429007 Medical Science
This is applicable to study in the Bachelor of Medical Science program 3991, as outlined in the “Program Descriptions” section.
429008 Environmental Science
This is applicable to study in the Bachelor of Environmental Science program 3988, as outlined in the “Program Descriptions” section.
429013 Advanced Science
This is applicable to study in areas of biological science, behavioural science, chemistry, mathematics and physics in the program 3972 as outlined in the Study Plan descriptions under “Study Plans in Advanced Science”.
This is also applicable to study in programs 3973 (Medical Physics) and 3986 (Mathematics and Finance) as outlined in the Study Plan descriptions.
The number of places available each year in the Advanced Science programs is limited and this is reflected in a higher UAI. The minimum UAI for these programs is 90.
429016/429017 This is applicable to study Aviation (Flying or Management) in programs 3980/3981.
429018 This is applicable to study Biotechnology in program 3052.
429025 This is applicable to study Optometry in programs 3950.
429026 This is applicable to study Psychology in program 3432, leading to a Bachelor of Psychology.
429011 This is applicable to study Nanotechnology in program 3617.
425001 This is applicable to study a number of Materials Science and Engineering plans in physical and process metallurgy, ceramic and materials engineering.

</table>

**Note:** Certain majors listed above are also appropriate for programs 3930 (Science/Arts), 3931 (Advanced Science/Arts), 3932 (Environmental Science/Arts), 3451 (Science/Innovation Management), 3529 (Science/Commerce), 3711 (Science/Aeronautical Engineering), 3711 (Science/Mechanical Engineering), 3725 (Science/Electrical Engineering), 3730 (Science/Civil Engineering), 3951 (Science/Optometry), 4075 (Science/Education), 4770 (Science/Law). Students in these courses should consult their program advisor for details.

### General Rules and Requirements

#### 1. General Education Requirements

The University requires all students to complete a selection of General Education courses. The General Education Program is an integral part of all UNSW undergraduate programs and gives students the opportunity to address some of the key questions they will face as individuals, citizens and professionals.

Students in the Science programs must complete General Education courses totaling 12 units of credit plus an additional 56 hours of study which fosters acceptance of professional and ethical action and social responsibility. See the ‘General Education’ section within this Handbook for a description of General Education course categories.

1.1 Mainstream courses may be substituted for General Education, but only with the approval of the Associate Dean (Student Affairs). Only 6 units of credit from mainstream courses may be substituted for General Education. Students may also only count a maximum of 6 units of credit for General Education courses from a single faculty.*

1.2 Students have the freedom to choose their General Education courses, according to the General Education requirements and restrictions detailed in the General Education section at the beginning of this Handbook.

1.3 Students enrolled in combined degrees are normally exempt from the General Education requirement.

* Please refer to the General Education section of this Handbook for further information on substitution.

#### 2. Prerequisites, Corequisites and Excluded Courses

All programs are governed by basic conditions or rules that specify what a student needs to complete in order to qualify for a degree. Normally a student will study a mixture of compulsory and elective courses.

**Compulsory courses** are ones that must be studied, usually at the stage specified in the program. Often one compulsory course is a prerequisite for another that comes later.

**Elective courses** are ones that a student chooses in accordance with his or her own interests, subject to meeting prerequisites and corequisites, and capacity in the course. Some electives may have to be taken from a specified list.

Where a choice of courses is available in a program, students must take care to satisfy prerequisites and corequisites and not complete excluded courses.

**Prerequisites** are courses that must be satisfactorily completed before a student can progress to a later course. Prerequisites are specified in the course descriptions later in this Handbook and students without a necessary prerequisite for a course will be blocked from enrolment in that course.

**Corequisites** are courses that must either be completed successfully before, or studied concurrently with, the course for which it is prescribed.

**Excluded courses** are ones that cannot be counted towards the degree qualification.

#### 3. Credit Transfer

In addition to University rules governing admission with credit for previous studies or attainments, the following provisions apply.

Students admitted to the Science or Advanced Science programs may be granted credit for previous studies and attainments provided that:

3.1 Where students transfer from another tertiary institution, they shall not in general be granted credit superior to that attained at the other institution.

3.2 Students admitted to the Science program who hold a completed or partly completed degree or another award, may be given credit for previous studies and attainments, but in order to qualify for the award of the BSc will be required as a minimum to complete courses equivalent to the requirements for Stage 3 of the program.
3.3 Students admitted to the Honours Year who hold a completed degree, may be given credit for previous studies and attainments, but in order to qualify for the Honours program, they will be required as a minimum to complete a sequence of courses or other requirements equivalent to the requirements for Stage 4 of the program.

4. Study Load

Students may not undertake a study load of more than 24 units of credit in any session (including General Education). This can be exceeded only in exceptional circumstances by students with an excellent academic record and requires the permission of the Associate Dean (Student Affairs). Students with external commitments, such as part-time employment in excess of ten hours per week, should take fewer courses each session. External commitments will not be taken into consideration in relation to such matters as extensions of time for submission of written work or failure to attend examinations (which may, for some courses, be scheduled on Saturday mornings). Students not on good academic standing will be notified in writing and may be required to show why they should be allowed to continue in the program or may be given a restricted program.

Students wishing to take courses additional to those required for the award should be aware that the relevant courses may attract an additional fee, payable up-front, as non award courses.

5. Academic Standing

A level of academic standing will be assigned to students at the end of each main session. These levels are defined as: Good Standing (the student’s current progress is deemed satisfactory), Referral, Probation 1, Probation 2, Suspension, Probation 3 and Exclusion. Movement between levels is based on progress, measured by proportion of load passed. The Program Authority assigns an advisor to each student not in good standing. Continued poor progress can lead to suspension (one year with automatic readmission) or exclusion (two years without automatic readmission). For further information please see ‘General University Rules & Student Information’ earlier in this Handbook.

Progression through Advanced Science, Environmental Science and Medical Science programs is subject to academic performance. Students enrolled in these programs are required to attain an average of 65 or higher each session of their program.

6. Program and Course Quotas

Quotas are imposed on some programs and courses (usually because of class size constraints related to space). Where quotas are imposed, students’ eligibility to enrol will be assessed on academic merit or on the basis of the requirements of the program of study in which the student is enrolled.

Program Descriptions

Science Program: 3970
Advanced Science Programs: 3972; 3973; 3986
Environmental Science Program: 3988
Media and Communications Programs: 3993, 3994
Medical Science Program: 3991

Overview of Programs

The main aims of these Science programs may be summarised as providing opportunities for students to prepare themselves for careers in research, technology, science, mathematics and education, or areas of management or public policy which involve the use of science or mathematics.

The Science programs (3970; 3991; 3993; 3994) lead to the award of the degree of Bachelor of Science (BSc) at Pass level on the completion of a three stage program, taking three years of full-time study. A student who completes the program with a high standard of achievement may be permitted to continue to a fourth year in order to take an Honours degree.

The Advanced Science programs (3972; 3973; 3986) and the Bachelor of Environmental Science (3988) lead to the award of Bachelor of Science (BSc) on the completion of a four stage program, at Honours or Pass level (level of award and Honours is based on academic performance), taking four years of full-time study. Depending on their program of study, students in their fourth year undertake either a research Honours program or a program of coursework and research.

The time specified (three or four years) is the minimum time required for completion of each program. Students may complete program requirements over a longer period of time or as part-time candidates. Students contemplating part-time study should note that with few exceptions classes are offered in the day only. This applies even at first year level and means that it is not possible to complete studies by evening classes alone.

Program Design

Science Program (3970)
The three year Science program has been designed for students who seek a ‘generalist’ degree in which there is a large element of choice. A student can combine courses from two or more Science disciplines, or take courses from outside the Science disciplines.

The basic rules for the program are set out in the following section under ‘Program Descriptions’. The main thing that students in the Science program need to ensure is that they complete at least one major and either a second major or a minor sequence. At least 84 units of credit (out of a total of 144) must be taken from Science. The remainder may be in another faculty. Subject to certain conditions, a student may be permitted to continue into a fourth year to complete an Honours degree.

Advanced Science Programs (3972; 3973; 3986)
A feature of the design of the Advanced Science programs is the requirement that all students enroll in and complete requirements for a specified study plan. Each study plan is designed to link courses in such a way that a coherent pattern of study is achieved in a specific discipline or specialisation. A wide choice of study plans, designed to meet specific aims and objectives, is available. Most study plans are identified with a particular school or discipline (e.g. Anatomy, Chemistry), but some are multidisciplinary (e.g. Mathematics and Computer Science). Some courses are only available in the Advanced Science programs. See the relevant study plan for details.

Students are required to fulfill all of the requirements of their particular study plan as specified in the Handbook in the year in which they first enrolled.

Environmental Science Program (3988)
This is a four year degree leading to a Bachelor of Environmental Science. A student must complete the core in Environmental Science plus a specialisation in one of the approved disciplines.

Bachelor of Science (Communications) Program (3993)
Bachelor of Science (Media and Communications) Program (3994)
These are three year Science programs in which students must complete courses in a Communications or Media Studies stream and either a major or two minors in Science. Subject to certain conditions, a student may be permitted to continue into a fourth year to complete an Honours degree.

Medical Science Program (3991)
This is a three year degree based on structured study plans leading to a Bachelor of Medical Science. Subject to certain conditions, a student may be permitted to continue into a fourth year to complete an Honours degree.

Combined Degree Programs

In these programs, Science is combined with studies in another faculty (e.g. Engineering, Law, Arts and Social Sciences etc). The basic requirement from Science is that a student should complete at least 84 units of credit in Science including a major selected from Table A.

Courses

Typically, each program requires study of a number of prescribed courses and elective courses at specified stages or levels to ensure a sound basis in the discipline. Each course is assigned a ‘Level’, which corresponds to the defined stages for each program. There are limits on the number of Level I courses that can be studied in a program (please refer to individual program descriptions). Students are not normally allowed to enrol in courses at a given level before reaching the corresponding stage of the program. Levels are:

Level I Stage 1
Level II Stage 2
Level II/III Stage 2 or 3
Level III Stage 3 (also Stage 4 in some Advanced Science programs)
Level IV Stage 4 (or Honours year)
Program Objectives
The Science and the Advanced Science programs have been designed to:
1. develop and sustain an interest in and knowledge of science.
2. develop a working knowledge of scientific methods of investigation.
3. encourage curiosity and creative imagination and an appreciation of the role of speculation in the selection and solution of problems, the construction of hypotheses, and the design of experiments.
4. develop an appreciation of scientific criteria and a concern for objectivity and precision.
5. develop confidence and skill in formulating problems and in treating both qualitative and quantitative data.
6. develop the ability and disposition to think logically, to communicate clearly by written and oral means, and to read critically and with understanding.
7. develop the habit of seeking and recognising relationships between phenomena, principles, theories, conceptual frameworks and problems.
8. promote understanding of the significance of science, technology, economics and social factors in modern society, and of the contributions they can make in improving material conditions.
9. provide opportunities for the development of students' motivations and social maturity, and an awareness of their capabilities in relation to a choice of career which will be fruitful to themselves and to society.
10. provide opportunity to study science in combination with other disciplines.

Science Program (3970)
Pass Program (3 years)

Conditions for the Award of the Degree
1. A student must complete 144 units of credit including 12 units of General Education.
2. The degree must contain a major sequence of study and either a second major or a minor sequence.
3. A student must complete at least 36 units and no more than 60 units in Level I courses from at least three schools.
4. A student must complete at least 24 units at Level I from Science Schools*.
5. No student may commence Level II courses until 24 Level I units have been successfully completed.
6. No more than 18 Level I units of credit in any one subject area may be counted towards the award of degree.
7. A student must complete a minimum of 84 units of credit from Science Schools*.
8. For entry to Honours, a student must complete at least 24 units at Level III in the relevant major sequence and have the permission of the Head of School.
9. A major sequence is defined as: at least 42 units at Level II and III in a single discipline or area of study, including at least 18 units at Level II. Major sequences are defined in Table A.
10. A minor sequence is defined as: 24 units of credit at Level II or III. The minor may either consist of courses available within but not taken as part of a major defined in Table A, or may be a sequence as defined in Table B.
11. Where a student does majors in two cognate areas that have courses in common, a student may be permitted to have up to 12 units at Level II and 6 units at Level III be counted towards each major sequence.

*Defined as Schools in the Faculty of Science plus those in other faculties that currently provide programs under the authority of the Faculty of Science.

Elective Courses
Students enrolled in any Science degree may normally only take as electives any courses (subject to satisfying prerequisites) which are specified as electives for their degree, or available within a major or minor in program 3970.

Graduation and Majors
In order to graduate, students must satisfy requirements for the award by passing all the courses and requirements specified for their program. Students who complete requirements will be awarded the degree of Bachelor of Science at Pass or Honours level with a major in the area of specialisation (usually indicated by the name of the major). The award will appear on the testamur as:
Bachelor of Science in (name of major) or
Bachelor of Science with Honours in (name of Honours specialisation)

Table A: Majors Offered in the 3 Year BSc Program (3970) and Combined BSc Programs

How to Read this Table

New Students
When you have decided which major(s) you want to study, you should enrol in the courses listed for Stage 1. In some majors there is only a small number of specified Stage 1 courses and you should choose additional courses to enrol in, such that you have a full program (24 units of credit per session). These additional courses (electives) may come from any available Level I courses from the subject areas within Table A or Table B.

Students who are unsure which major to choose may enrol in an ‘undeclared plan’. The purpose of an undeclared plan is to cover a combination of Level I courses to enable a student to enter a variety of majors. Students are advised to choose a major before commencing Stage 2.

Continuing Students
Students who have completed Stage 1 should select specified courses listed for their major(s) in Stage 2 and Stage 3. Note that these are the minimum requirements for majors and students may take additional courses in the same area provided they also complete a minor and General Education requirements.

Notes:
1. Some of the courses listed in the later stages of a major may have prerequisites in an earlier stage or corequisites to be taken at the same time. It is important to check the course descriptions found in the rear of this Handbook for details.
2. Courses listed for Stage 1 are recommended courses. It is important to note that many of these courses may be required as prerequisites for courses required for later years.
3. Mathematics Courses:
   (a) Many courses in Mathematics are offered at two levels. The higher level courses cater for students with greater mathematical ability and/or a higher level of prior knowledge. Courses listed in Table A are all at the ordinary level. Students with suitable qualifications are encouraged to enrol in the corresponding higher level courses which are listed in the rear of this Handbook (see MATH### courses). In cases where there is a higher course, students should note that the proportion of Distinction and High Distinction grades is lower in the corresponding ordinary level course.
   (b) MATH2060 may be omitted from the Mathematics major if the professional education requirement is being met in the other discipline of a double major or double degree.
   (c) Students majoring in Mathematics are strongly recommended to take MATH2301 or an equivalent course in practical numerical computing.
4. Chemistry at Level I is offered at two levels. The higher level courses cater for students with greater chemical ability and/or a higher level of prior knowledge. Students with the required background are strongly encouraged to enrol in the higher level courses (CHEM1031 Higher Chemistry 1C and CHEM1041 Higher Chemistry 1D).
5. Students are advised that Mathematics or Physics courses totalling 6 units of credit are recommended for all programs.
6. BIOC2181 and BIOC2291 may be substituted for BIOC2101 and BIOC2201 respectively but only with the permission of the Head of School. A minimum grade of Credit (65%) in BIOC2181 and BIOC2291 will normally be required for entry into Level III Biochemistry courses.
7. Students wishing to do Honours will need to consult with the appropriate school at the end of Stage 2 of their program.

</table>

In addition to the Minors listed below, 24 units of credit taken at Level II or III in any Major listed in Table A will also satisfy the requirements of a Minor.

**Note:** No more than 12 units of credit of Level I courses may be taken from any one school or department.
Advanced Science Programs (3972; 3973; 3986) & Honours in Advanced Science (4 years)

Conditions for the Completion of the Advanced Science Program

- A student must complete 144 units of credit including 12 units of General Education in Stages 1-3 and a 48 unit Honours sequence at Stage 4.
- The degree must contain a study plan as specified for each Advanced Science program in this section of the Handbook.
- A student must complete at least 36 units of credit and no more than 48 units of credit in Level 1 courses except where specified in a particular program.
- A student must complete before the end of Stage 3 at least two 3 units of credit courses taken from ‘Table X’, given below.
- No student may normally commence Level II courses until 24 Level I units have been successfully completed unless approved by the Head of School.
- Progression to Stages 3 and 4 is subject to academic performance. A student will be required to have attained an average of 65 or higher in courses relevant to the major area and cognate subjects in each prior stage.

Study Plans Available in Advanced Science

- Anatomy
- Applied Mathematics
- Biochemistry
- Biological Science
- Biotechnology
- Chemistry
- Ecology
- Food Science and Technology
- Genetics
- Geosciences
- Marine and Coastal Studies
- Materials Science
- Mathematics and Computer Science
- Mathematics and Finance
- Medical Chemistry
- Medical Microbiology and Immunology
- Medical Physics
- Microbiology
- Molecular Biology
- Neuroscience
- Pharmacology
- Physical Oceanography/Meteorology
- Physics
- Physics and Astronomy
- Physics and Computing
- Physiology
- Pharmacology
- Psychology
- Pure Mathematics
- Statistics

Rules on Progression and Transfer in the Advanced Science Programs

1. Transferring Study Plans

Students must apply in writing to transfer between study plans within each of the Advanced Science programs. Applications are assessed on academic performance and approval is subject to places being available in the nominated study plan.

2. Accelerated Progression in Advanced Science Programs

There is provision for exceptionally talented students to take higher level courses in Stage 1. Contact the Science Student Centre for details.

3. Progression to Stage 4 Honours in Advanced Science

Progression to Stage 4 is subject to academic performance. Students seeking to enrol in a Stage 4 Honours are required to have the approval of the Head of School and normally will be required:

- to have completed all requirements for Stages 1, 2 and 3 of the specific study plan and to have satisfied prerequisite requirements as specified in that study plan. All General Education also must have been completed;
- to have attained an average of 65 or higher in each stage of the program.

Students should also seek the guidance of the appropriate Head of School at an early stage of study to ensure that the study plan being followed is best suited to lead to the Year 4 Honours.

In addition, admission to a particular Stage 4 Honours is subject to appropriate research and supervision resources being available. Quotas may be imposed for entry in any year, in which case admission will be determined on academic merit.

Students who do not attain an average of 65 or higher in Stage 3 of their program are normally required to transfer to the Science program (3970) and take out the BSc award at Pass level.

4. Transfers from Advanced Science to the Science Program

Students enrolled in the Advanced Science programs (program codes 3972; 3973; 3986) who wish to take out the BSc award at Pass level and without proceeding to Stage 4 are required to transfer to the Science program (3970). Applications to transfer should be lodged no later than the HECS census date in the session in which the student expects to satisfy requirements. Students applying after that date may not be able to graduate in the next round of graduation ceremonies. The application should state the 3970 major in which the student wishes to be enrolled. Students must satisfy all requirements for the designated Science (3970) major in order to qualify for the award of the BSc. Further information regarding the transfer from the Advanced Science program to majors that are available in the Science program is available through the Science Student Centre.

Students entering Year 3 or Year 4 of a combined degree program will need to consult with the Science Student Centre.

5. Elective Courses

Students enrolled in any Science program may normally only take as electives any courses (subject to satisfying prerequisites) which are specified as electives for their degree, or available within a major or minor in program 3970.

6. Graduation and Study Plans

In order to graduate, students must satisfy requirements for the award by passing all courses and the requirements specified for their program. Students who complete requirements will be awarded the degree of Bachelor of Science at Honours or Pass level with a major in the area of specialisation (usually indicated by the name of the major or study plan, except that for some Honours candidates the name of the Honours specialisation will appear).

Students who successfully complete Stage 4 of their program will be considered for the award of Honours. The following scale generally applies to Honours gradings and, depending on the structure of the program, is based either on performance in the Stage 4 Honours or on performance over the whole 4 stages of the program:

- Honours Class 1: mark or weighted average of 85 or greater
- Honours Class 2 Division 1: mark or weighted average from 75 to 84
- Honours Class 2 Division 2: mark or weighted average from 65 to 74
- Honours Class 3 or Pass: mark or weighted average below 65

The award will appear on the testamur as:

Bachelor of Science with Honours in (name of specialisation)
Study Plans in Advanced Science

Anatomy

Anatomy is the study of the structure of the human body. The word ‘anatomy’ is derived from the Greek, and means ‘cutting up’ or ‘dissection’. However, anatomy today is much more than the descriptive study of the dissected body, although dissected specimens are still used for research and instruction. The study of anatomy now embraces separate but strongly related disciplines. Gross Anatomy deals with the description of form, arrangement and function of the bones, joints, muscles and internal organs, together with their blood and nerve supply. Histology deals with the microscopic structure of tissues and cells. Embryology is concerned with the normal development of the embryo and fetus from conception to birth and with the mechanisms of development and malformations. Neuroanatomy deals with the internal organisation and functions of the brain and spinal cord. Biological Anthropology involves applying biological principles and approaches to the study of humans and non-human primates. In all courses in anatomy, strong emphasis is given to the functional significance of the structures in health and in disease. Advanced anatomy courses may include affiliation with a research project and a project evaluation report and, in some courses, an assessable dissection program.

A major in Anatomy may be combined with elective courses in Biochemistry, Physiology, Microbiology, Pathology or Psychology.

Anatomy

Stage 1

BIOS1101, BIOS1201
CHEM1011 or CHEM1031
CHEM1021 or CHEM1041
Choose at least 6 units of credit from Level I Mathematics courses.
Elective courses totalling 12 units of credit
LIFE1001
One General Education course totalling 3 units of credit

Stage 2

Level II Anatomy courses totalling at least 18 units of credit from:
- ANAT2111
- Choose 12 units of credit from ANAT2210, ANAT2200, ANAT2300, ANAT2310, ANAT2601, ANAT2611, ANAT2600, ANAT2610
Elective courses totalling 24 units of credit
Recommended: Biological Science, Biochemistry, Physiology, Microbiology, Pharmacology, Microbiology, Pathology, Psychology, LIFE2001
One General Education course totalling 3 units of credit

Stage 3

Level III Anatomy courses totalling at least 18 units of credit from:
- ANAT3121, ANAT3131, ANA3141, ANAT3231, ANAT3411, ANAT3421, ANAT3601, ANAT3611
General Education courses totalling 6 units of credit
Further Level III courses from Biological Science, Biochemistry, Microbiology, Pathology, Physiology, Pharmacology to give a total of 48 units of credit.
Students proposing to proceed to Stage 4 (Honours) must complete Level III courses totalling 36 units of credit.

Stage 4 (Honours)

ANAT4508

Biochemistry

The Biochemistry plan is closely allied to the Genetics plan and the Molecular Biology plan (see later) all of which are concerned with understanding life processes at the level of molecular structure, function and interaction. The Biochemistry plan therefore provides a knowledge base and a broad range of specialised techniques, which are relevant to all biology. The major impact of this discipline is largely at the molecular level and is ideal for those students whose interests are in understanding and appreciating biological processes at the molecular rather than the descriptive level. Integration of these molecular approaches at the cellular, tissue and whole organism level is an increasingly important part of biochemistry. This discipline also is the foundation of medical science and is playing an increasingly important role in many aspects of modern medicine. The Biochemistry plan (see below) provides opportunities to combine biochemistry with other related discipline areas through careful choice of elective courses in Stages 2 and 3 of the plan.

Biochemistry*

Stage 1

BIOS1101, BIOS1201
CHEM1011 or CHEM1031
CHEM1021 or CHEM1041
Choose at least 6 units of credit from:
MATH1031, MATH1041*
Elective courses totalling 12 units of credit
(Recommended: Physics)
LIFE1001
One General Education course totalling 3 units of credit

Stage 2

BIOC2101* and BIOC2201*
LIFE2001
Choose 6 units of credit from:
BIOS2021 or BIOS2621, CHEM2021, CHEM2041, MICR2011
Elective courses totalling 24 units of credit
One General Education course totalling 3 units of credit

Stage 3

Choose 12 or 18 units of credit from:
BIOC3111, BIOC3261, BIOC3271
Choose 0 – 12 units of credit from:
BIOC3121, BIOC3281
Choose 0 – 6 units of credit from:
ANAT1231, BIOC3301, BIOT3061, CHEM3021, CHEM3041, MICR3041, MICR3641, PHPH3211, PHPH3221
Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)

BIOC4318

*At least two of the Stage 2 and two of the Stage 3 courses contributing to the major in Biochemistry must be taken at the advanced level.
**Other higher level study plan Mathematics courses may be substituted.

Biological Science

Biological Science encompasses all aspects of plants and animals including their relationship to each other and to the environment. The areas of study leading to the award of a science degree in Biological Science include cell biology, plant and animal physiology, ecology, genetics, taxonomy, marine biology and evolutionary studies. These studies are particularly relevant in the fields of agriculture, forestry, wildlife management, conservation and related environmental sciences. Within Advanced Science there are two plans available: Biological Science and Ecology.

Biological Science

Stage 1

BIOS1101, BIOS1201
CHEM1011
MATH1041
Effective courses totalling 18 units of credit
LIFE1001
One General Education course totalling 3 units of credit

Stage 2

BIOS2021, BIOS2621, BEES2041, CHEM2021, CHEM2041, MICR2011
Effective courses totalling 24 units of credit
One General Education course totalling 3 units of credit

Stage 3

Stage 3 Biological Science courses totalling 36 units of credit, including advanced courses where available.
General Education courses totalling 6 units of credit
Effective courses totalling 6 units of credit.

Stage 4 (Honours)

Required course material comprises:
BEES4521 Literature Review

and
24 UOC project courses from the list below:
- BIOS4514 Biological Science Honours B
- BIOS4515 Biological Science Honours B
- BIOS4516 Biological Science Honours B
- BIOS4518 Biological Science Honours B
  or
- BIOS4524 Botany Honours B
- BIOS4525 Botany Honours B
- BIOS4526 Botany Honours B
- BIOS4528 Botany Honours B
  or
- BIOS4534 Zoology Honours B
- BIOS4535 Zoology Honours B
- BIOS4536 Zoology Honours B
- BIOS4538 Zoology Honours B
  and
12 UOC Biology courses at Stage 3 (not completed previously) or other Science courses approved by the Honours Coordinator.

Staff Contact: Associate Professor I Suthers

Ecology

Stage 1
- BIOS1101, BIOS1201
- CHEM1011
- MATH1041
- LIFE1001

One General Education course totalling 3 units of credit
Elective courses totalling 18 units of credit

Stage 2
- BIOS2011, BEE52041
- LIFE2001

Choose 6 units of credit from:
- BIOS2031, BIOS2051, BIOS2061
One General Education course totalling 3 units of credit
Elective courses totalling 24 units of credit.
(Recommended: BIOS2031, BIOS2051, BIOS2061 and BIOS2621)

Stage 3
Choose courses totalling 36 units of credit from:
- BIOS3601, BIOS3011, BIOS3061, BIOS3071, BIOS3081, BIOS3091, BIOS3111, BIOS3681
Where ordinary and advanced options exist for the same course, students are advised to take the advanced option.
Elective courses totalling 6 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
Entry requires the completion of Stages 1–3 of the Advance Science plan in Ecology or Biological Science.

Required course material comprises:
- BEE5421 Literature Review

and
24 UOC project courses from the list below:
- BIOS4544 Ecology Honours B
- BIOS4545 Ecology Honours B
- BIOS4546 Ecology Honours B
- BIOS4548 Ecology Honours B
  and
12 UOC Biology courses at Stage 3 (not completed previously) or other Science courses approved by the Honours Coordinator.

Staff Contact: Associate Professor I Suthers

Biotechnology

Biotechnology can be defined as the use of various biological processes to make products and perform services. The essential feature of biotechnology therefore is the use of biological processes based on living cells and biochemical macromolecules such as proteins, DNA and RNA in a rapidly expanding range of activities of benefit to mankind. As such, biotechnology makes practical use of the recent scientific advances in areas such as molecular genetics.

The development of recombinant-DNA (r-DNA) technology has resulted in the ability to produce large quantities of any potentially useful product.

Based on this technology, a new generation of biopharmaceuticals, including hormones, vaccines, anti-hypertensive and anti-inflammatory agents, are being developed which have the potential to revolutionise medicine. Microorganisms and viruses are being modified for use in controlling plant and animal diseases and pests. Diagnostic kits are being developed for use in forensic science and in product identification and quality control. In addition, genetic improvements in agriculture, plants and animals are becoming a reality, as is the control of inborn genetic disorders in humans.

Some aspects of biotechnology are traditional, having been used for centuries. The first makers of bread, cheese and fermented beverages over six thousand years ago were applying biotechnological principles in processing these goods. Without understanding the processes they were operating, they were in fact making use of catalysis mediated by microbial cells. Such processes are still in use today and scientific advances now allow for much greater control of the processes with resultant improvements in quality and economics of production. The number of such biological processes has expanded also and enzymes and/or microorganisms are used in the production of a wide range of fermented foods (such as cheese, wine, beer, soy sauce, sauerkraut, yoghurt, tofu, kefir) and in the production of flavouring, colouring and sweetening agents.

Bioprocesses are also used in the extraction of minerals from low-grade ores, and modified and novel bioprocesses are being developed for the treatment of waste and degradation of recalcitrant molecules, an area of vital importance in our increasingly polluted planet.

The future for expansion in all the above areas is immense and an ability to cope with the problems of the 21st century will be heavily dependent on these advances.

Biotechnology*

Stage 1
- BIOT1011, BIOS1201
- CHEM1011, CHEM1021
- LIFE1001

One General Education course totalling 3 units of credit
Choose at least 6 units of credit from:
- MATH1031, MATH1041
Choose electives to make a total of 48 units of credit for Stage 1
(Recommended: PHYS1111)

Stage 2
- BIOTC2101*, BIOTC2201*
- MICR2201
- LIFE2001

One General Education course totalling 3 units of credit
Choose elective courses totalling 24 units of credit.
(Recommended: BIOS2021 or BIOS2621, MICR2011)

Stage 3
Choose at least 18 units of credit from:
- BIOT3011, BIOT3061, BIOT3021, BIOT3081
Choose elective courses totalling 24 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)

Stage 2 (Honours)

Stage 4 (Honours)

Stage 4 (Honours)

Chemistry

Within Advanced Science there are two plans available: Chemistry, and Medical Chemistry. Both plans provide a broad scientific education and a professional training in the chemical sciences. Fundamental, applied, environmental and industrial aspects of chemistry may be included by the appropriate choice of courses.

Chemistry

The Chemistry plan is designed for students who wish to specialise in the chemical sciences and undertake the maximum number of chemistry courses. It is designed to provide education and training in all contemporary fields of chemistry and should be selected by students who wish to devote the majority of their studies at Stage 3 to chemistry. Within this plan there are sufficient electives available to complete the equivalent of a minor in another discipline. The School of Chemical Sciences recommends the following discipline areas: biochemistry,
biotechnology, computing, food science and nutrition, geoscience, materials science, mathematics, physics. Other areas are available both within and outside the Faculty of Science. These possibilities should be discussed with an advisor from the School.

Inclusion of advanced level studies, from more than one field of specialisation, result in a broadly based degree in the chemical sciences. For example, a combination of chemistry and biochemistry leads to further work in areas such as toxicology and neurochemistry. Combining Level III chemistry with mathematics or computing provides a valuable basis for the many applications of computers in chemistry. Chemistry with physics or materials science allows entry into the rapidly developing field of advanced materials.

Stage 1

CHEM1011, CHEM1041*
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Choose 6 units of credit from Level I Physics
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001
One General Education course totalling 3 units of credit
Elective courses totalling 12 units of credit

Stage 2**

CHEM2011, CHEM2021, CHEM2031, CHEM2041
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
Elective courses totalling 12 units of credit
General Education courses totalling 9 units of credit

Stage 3

CHEM3011, CHEM3021, CHEM3031, CHEM3041
Choose further Level III Chemistry courses totalling 12 units of credit
Elective courses totalling 12 units of credit

Stage 4 (Honours)

CHEM4003

* Students without the assumed knowledge for these courses may substitute CHEM1011 and CHEM1021
** CHEM2031 may be substituted for CHEM3031

Medical Chemistry

This program combines a strong knowledge of synthetic and analytical chemistry and aspects of biochemistry or pharmacology. The program is designed to produce graduates whose background in both chemical and biological areas is appropriate to the requirements of employers in Australia.

Stage 1

CHEM1031, CHEM1041*
BIOS1101, BIOS1201
MATH1101 or MATH1131 or MATH1141
MATH1021 or MATH1231 or MATH1241
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001
One General Education course totalling 3 units of credit
Elective courses totalling 6 units of credit

Stage 2**

CHEM2011, CHEM2021, CHEM2031, CHEM2041
BIOC2101 or BIOC2181
Choose further specialisation in either physiology, pharmacology, biochemistry, molecular biology
BIOC2201 or BIOC2291
Plus elective courses totalling 6 units of credit
or
PHPH2102 and PHPH2201
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3

CHEM3021, CHEM3041
Further specialisation in either physiology, pharmacology, biochemistry, molecular biology, as follows:
12UOC from Level III Physiology or Level III Pharmacology according to choice of Level II prerequisites
or
Courses totalling 12 units of credit from Level III Biochemistry and
MIRC3041

Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

Stage 4

CHEM4003

Joint supervision of Honours projects between the School of Chemical Sciences and either the Department of Physiology & Pharmacology or the School of Biotechnology & Biomolecular Sciences is strongly encouraged.

* Students without the assumed knowledge for these courses may substitute CHEM1011 and CHEM1021
** CHEM2031 may be substituted for CHEM3031

Food Science and Technology

Food Science and Technology involves the understanding of basic sciences and the application of this knowledge to foods from the point of production, through handling, processing, preservation, distribution and marketing, up to consumption and utilisation by consumers. It is concerned with food processes, food commodities, food composition and food quality (including sensory properties, safety and nutritional value).

The study of Food Science and Technology integrates many scientific disciplines. Its bases are in chemistry, physics, biochemistry and microbiology. Its borders merge with those of agriculture, engineering, human nutrition, public health, commerce, psychology and law. Biotechnology has a role of increasing importance in food science and technology.

The food scientist and food technologist are concerned with food supplies and requirements, community wants and needs, and equitable distribution of foods to ensure human nutritional needs are met.

New knowledge is acquired in the laboratory, the pilot plant and the community, and then applied to the development of safe, nutritious and palatable foods, beverages and food ingredients by optimisation of processes and equipment. Foods are studied in terms of their basic constituents and structures and the changes they undergo when subjected to handling, processing and distribution.

The food scientist and food technologist are equally concerned with the development and selection of raw materials from agricultural, horticultural, animal and marine sources.

A safe, adequate, palatable and nutritious food supply is essential to human health. The food and beverage industry is of major economic importance and is the largest sector of manufacturing industry in Australia. Internationally, food production, processing and service are among the largest and most stable industries. The challenges are to increase the availability, variety, quality and quantity of foods economically and in line with the needs of the world population. Australian industry has a major role to play in supplying high quality foods to overseas markets and there is a national and international demand for professionally trained people prepared to accept responsibility for the quality and safety of food.

These programs provide basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources and food wastes, and communication, and in areas such as dietetics after further training.

Undergraduate training in the Food Science and Technology plan is administered through the Science Student Centre. The BSc program is three stages for a Pass degree during which students can study aspects of food science and technology in combination with other courses in a relevant discipline, preferably biochemistry, microbiology, biotechnology or chemistry. The fourth Honours Stage of the BSc program involves an extensive research project.

Food Science and Technology

Stage 1

BIOS1201
CHEM1031, CHEM1041*
FOOD1130 or BIOS1101**
MATH1031, MATH1041 or one of MATH1131, MATH1141
and one of MATH1231, MATH1241
LIFE1001
One General Education course totalling 3 units of credit
PHYS1111 or PHYS1201

FOOD1130 or BIOS1101**

** MATH2839 may be substituted for CHEM2031.

Stage 2**

CHEM2011, CHEM2021, CHEM2031, CHEM2041
BIOC2101 or BIOC2181
Choose further specialisation in either physiology, pharmacology, biochemistry, molecular biology
BIOC2201 or BIOC2291
Plus elective courses totalling 6 units of credit
or
PHPH2102 and PHPH2201
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3

CHEM3021, CHEM3041
Further specialisation in either physiology, pharmacology, biochemistry, molecular biology, as follows:
12UOC from Level III Physiology or Level III Pharmacology according to choice of Level II prerequisites
or
Courses totalling 12 units of credit from Level III Biochemistry and
MIRC3041
Stage 2
BIOC2101 or BIOC2181
BIOC2201 or BIOC2291
CHEM2921
LIFE2001
MICR2201
General Education courses totalling 9 units of credit
Elective courses totalling 12 units of credit
(Recommended: FOOD1230, FOOD2320, FOOD3220)

Stage 3
FOOD1360, FOOD1370, FOOD1390
Elective courses totalling 30 units of credit
(Recommended: FOOD1380, FOOD1490, FOOD2330, FOOD2340, FOOD2350, FOOD2480, FOOD3440, FOOD4450)

Stage 4 (Honours)
FOOD9420
*Students without the assumed knowledge for these courses may substitute CHEM1011 and CHEM1021
**Students planning to take BIOC2101 must choose BIOS1101 at Stage 1.

Genetics
The Genetics plan is broadly based and offers a general introduction to the discipline during the first two years of study. The plan allows students in Stage 3 to diversify into the more specialised areas of genetics, including molecular genetics, human genetics, plant and microbial molecular biology, conservation biology, etc. The flexibility of this plan therefore allows students the scope to combine genetics with a number of other courses offered by the different schools within the Faculty of Science so that Stage 4 (Honours) may be completed in any of these schools provided that suitable Genetics Honours projects are offered.

Genetics*
Stage 1
BIOS1101, BIOS1201
CHEM1011 or CHEM1031
CHEM1021 or CHEM1041
Choose at least 6 units of credit from:
MATH1031**, MATH1041**
Elective courses totalling 12 units of credit
(Recommended: Physics)
LIFE1001
One General Education course totalling 3 units of credit

Stage 2
BIOS2621
LIFE2001
Choose 12 units of credit from:
BIOC2101, BIOC2201, BEEES2041, MICR2011
Elective courses totalling 24 units of credit
One General Education course totalling 3 units of credit

Note: BEEES2041 may be replaced with MATH2841 or another MATH or COMP course as approved by the study plan coordinators.

Stage 3
BIOC3291, BIOC3151
Choose 0 or 6 units of credit from:
BIOC3121 or BIOC3621, MICR3021 or MICR3621
Choose 0 or 6 units of credit from:
BIOC3301, BIOS3071, BIOF3061
Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
BIOC4103
*At least two of the Stage 2 and two of the Stage 3 courses contributing to the Genetics Study Plan must be taken at the advanced level.
**Other higher level I Mathematics courses may be substituted.

Geoscience
The School of Biological, Earth and Environmental Sciences offers the following study plan within Advanced Science.

Geoscience
Stage 1
GEOS1701 and GEOS1801 or GEOS1111 and GEOS1211
MATH1041
CHEM1011 and PHYS1111
Elective courses totalling 12 UOC
3 UOC from Table X*
3 UOC General Education courses

Stage 2
BEEES2041
24 UOC from Level II GEOS courses
12 UOC of elective courses
3 UOC from Table X*
3 UOC General Education courses

Stage 3
36 UOC from Level III GEOS courses
6 UOC elective courses
6 UOC General Education courses

Stage 4
BEEES Honours program in Geology or Physical Geography
BEEES4511 Professional Skills and either
24 UOC project from GEO4204, 4205, 4206, 4207 plus elective courses totalling 18 UOC from BEEES4521, Level III Courses in Geology (GEOS) or other Science courses at Levels II to IV (not completed previously) and approved by the Honours coordinator.
or
24 UOC from GEOS4418, 4417, 4416, 4415 plus elective courses totalling 8 UOC from BEEES4521, Level III courses in Physical Geography (GEOS) or other Science courses at Levels II to IV (not completed previously) and approved by the Honours coordinator.

* Refer to the beginning of the ‘Advanced Science Programs’ section.

Marine and Coastal Studies
The Marine and Coastal Studies Study Plan allows specialisation in selected areas of marine science, yet also includes adequate exposure to other pertinent disciplines.

Marine and Coastal Studies
Stage 1
BIOS1101, BIOS1201
GEOS1111, GEOS1211
MATH1041
LIFE1001, MATH1000
One General Education course totalling 3 units of credit
Elective courses totalling 12 units of credit
(Recommended: MATH1031, GEOH1601, GEOS1701, CHEM1011, PHYS1201)

Stage 2
MSCI2001, MSCI6200
BIOS2031, GEOS2101
General Education courses totalling 6 units of credit
Elective courses totalling 18 units of credit
(Recommended: BIOS2011, BEEES2041, GEOS2721, GEOS2711, GEOS2811, GEOS2821, GEOS2181, GEOS2291, MICR2201, MSCI2051)

Stage 3
MSCI3001, MSCI6300
BIOS3681, BEEES3091
General Education courses totalling 6 units of credit
Elective courses totalling 18 units of credit
(Recommended: BIOS3671, BEEES3111, GEOS3761, GEOS3731, GEOS3811, GEOH3911, GEOH3921, GEOS3281, MICR3071)

Stage 4 (Honours)
MSCI4003 (Full-Time)
MSCI4009 (Part-Time)

Materials Science
The School of Materials Science and Engineering offer the following Study Plan.

Materials Science
Stage 1
MATS1111, MATS1021
MECH0440
CHEM1011, CHEM1021
Choosing electives
The following information is provided to assist students in choosing their elective courses. Students who intend to proceed to Stage 4 (Honours) should consult with the relevant department in the School of Mathematics before making a final choice of Level III courses.

Pure Mathematics
Pure Mathematics courses relevant to the mathematical aspects of Computer Science are MATH2400 and MATH2430 in Stage 2, and MATH3411 and MATH3421 in Stage 3.

Pure Mathematics courses relevant to mathematics teaching are MATH3511, MATH3521, MATH3531, MATH3560 and MATH3570 in Stage 3, or their higher equivalents.

Pure Mathematics courses relevant to the applications of mathematics in physics or engineering are MATH3531, MATH3541 and MATH3570 in Stage 3, or their higher equivalents.

Applied Mathematics
It is recommended that students in the Applied Mathematics plan should include the following among their electives.
Level II: At least two of: MATH2140, MATH2240, MATH2260, MATH2280
Level III: At least three of: MATH3101, MATH3121, MATH3161, MATH3181, MATH3201, MATH3241, MATH3261, MATH3301.

In addition, the following recommendations are made for Stage 1 of the Applied Mathematics plan.
For students interested in physical sciences or theoretical oceanography, meteorology or fluid dynamics: PHYS1121 and PHYS1221.
For students interested in social or biological sciences, at least 12 units of credit from the following: BIOS1101 and BIOS1201; PSYC1001 and PSYC3101; PHYS1121 and PHYS1221; CHEM1011 and CHEM1021.
For students interested in computational methods or computer science: COMP1011 and COMP2011.

Applied Mathematics

Mathematics
The School is divided into Departments of Pure Mathematics, Applied Mathematics, and Statistics. It offers an Advanced Science Study Plan in each of these areas and also plans in Physical Oceanography/Meteorology, in Mathematics and Computer Science (in conjunction with the School of Computer Science) and in Mathematics and Finance (in conjunction with the Faculty of Commerce).

Note: In all Advanced Science Study Plans in Mathematics, all courses are at the higher level where that is available. Any student wishing to take these higher courses at the ordinary level will need to make a formal application to vary their program.

In all these plans, except Mathematics and Finance, Stage 4 is a special Honours year. For entry to the Honours year, students will normally be required to have a Credit average in their Level III Mathematics courses. They will also need to have permission from the Head of the appropriate Department or from the Head of School. In order to receive this permission, students will normally be expected to have included a significant number of higher level courses among the courses they study in the earlier stages of the plan. To ensure that they will be eligible for entry to the Honours year, students should discuss their choice of Level III courses with the Head of the appropriate Department.

The Mathematics and Finance plan is a four year plan in which Honours may be awarded on the basis of a weighted average of all courses studied in the plan.

Pure Mathematics is the study of the essential structures of mathematics. Work by pure mathematicians underpins most of the technological advances of this century. Pure Mathematics is concerned with problems and techniques which transcend specific applications. Research, focussing on the development of existing theories or the creation of new ones, may be driven by applications or by the internal demands of the discipline. Pure Mathematics courses provide the insights and understanding required by those using mathematics, leading to mastery of the fundamental processes of mathematical science and the capacity for innovative applications in any area.

Applied Mathematics concerns the development of mathematics and models for understanding scientific phenomena, for the solution of technical and industrial problems, and for use in the social, economic and management sciences. Courses are designed to provide basic mathematical and computational skills needed for a wide range of applications, to develop the capability to construct, analyse and interpret mathematical models, and to encourage enthusiasm for the role of the mathematician in a variety of contexts.

Statistics is the science and art of using factual material for modelling and inference. Its mathematical foundations are in the theory of probability and it deals with how to estimate and make decisions using knowledge which is uncertain or observational material which is subject to error. There is a rich interplay of ideas between the theory of statistics and fields such as engineering, medicine and biological and behavioural sciences where statistical problems constantly arise.

Elective courses totalling 18 units of credit
One course from: MATH1141, MATH1241, MATH1000, MATH1081

Stage 2
MATH2060, MATH2111, MATH2130, MATH2601, MATH2620, MATH2901
Elective courses totalling 9 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
Level III Applied Mathematics courses totalling 24 units of credit
Further Mathematics courses totalling 12 units of credit
Elective courses totalling 6 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
MATH4103 or MATH4104

Mathematics and Computer Science

Stage 1
COMP1011, COMP1021, MATH1141, MATH1241, MATH1000, MATH1081, MATH2400
Elective courses totalling 9 units of credit
One General Education course totalling 3 units of credit

Stage 2
MATH2111, MATH2601, COMP2011, COMP2021, COMP2041
Further Level II Mathematics courses totalling 6 units of credit.
Level III Computer Science courses totalling 6 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
MATH3301 or MATH3101
MATH3411
Further Level III Mathematics courses totalling 6 units of credit
Level III or IV Computer Science courses totalling 18 units of credit
Plus either
Further Level III Mathematics courses totalling 6 units of credit (if proceeding to MATH4003)
or
Further Level III or IV Computer Science courses totalling 6 units of credit (if proceeding to Honours Computer Science
General Education courses totalling 6 units of credit

Stage 4 (Honours)
MATH4003 or Honours Computer Science

Statistics
Stage 1
MATH1141
MATH1241
MATH1000
MATH1081
Courses totalling 6 units of credit from Science Schools other than Mathematics
Elective courses totalling 18 units of credit
One General Education course totalling 3 units of credit

Stage 2
MATH2060
MATH2111
MATH2130
MATH2601
MATH2620
MATH2901
MATH2910
MATH2931
Elective courses totalling 6 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
MATH3901
MATH3911
MATH3821
Level III Statistics courses totalling 6 units of credit
Further Mathematics courses totalling 12 units of credit
Elective courses totalling 6 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
MATH4003 or MATH4904

Mathematics and Finance
Stage 1
ACCT1501
COMP1091
ECON1101, ECON1102
MATH1000
MATH1151
MATH1251
MATH1081
PHYS1121 or PHYS1131, PHYS1221 or PHYS1231
Elective courses totalling 18 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 2
MATH2060
MATH2111
MATH2130
MATH2601
MATH2620
MATH2901
MATH2910
MATH2931
ACCT1511
FINS1612
Elective courses totalling 6 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
MATH3121, MATH3241
MATH3261
MATH3301
MSCI3001
Elective courses totalling 12 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
MATH4103 or MATH4104

Pure Mathematics
Stage 1
MATH1141
MATH1241
MATH1000
MATH1081
Courses totalling 6 units of credit from Science Schools other than Mathematics
Elective courses totalling 18 units of credit
One General Education course totalling 3 units of credit

Stage 2
MATH2060
MATH2111
MATH2130
MATH2601
MATH2620
MATH2901
FINS1613
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
MATH2060
MATH3111
Further level III Mathematics courses totalling 6 units of credit*
A further level II or III Mathematics course totalling 3 units of credit*
FINS2624, FINS3616
Further level III Finance courses totalling 6 units of credit
Elective courses totalling 6 units of credit
General Education courses totalling 6 units of credit

Stage 4
MATH4102
Further level III Mathematics courses totalling 12 units of credit*
FINS3635
Further level III Finance courses totalling 6 units of credit
Elective courses totalling 12 units of credit
*It is recommended that the choice of Mathematics courses in Stages 3 and 4 include at least 6 units of credit from each of the following 3 groups:
1. (Computing) MATH3101, MATH3041, MATH3821
2. (Modelling) MATH2140, MATH2260, MATH3161, MATH3181, MATH3201, MATH3641, MATH3901, MATH3941, MATH3980
3. (Statistics) Level III Statistics

Physical Oceanography/Meteorology
Stage 1
MATH1141
MATH1241
MATH1000
MATH1081
PHYS1121 or PHYS1131, PHYS1221 or PHYS1231
Elective courses totalling 12 units of credit
One General Education course totalling 3 units of credit

Stage 2
MATH2060
MATH2111
MATH2130
MATH2620
MATH2901
MATH2910
PHYS2810
GEOS2811
Elective courses totalling 3 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
MATH3121, MATH3241
MATH3261
MATH3301
MSCI3001
Elective courses totalling 12 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
MATH4103 or MATH4104

Pure Mathematics
Stage 1
MATH1141
MATH1241
MATH1000
MATH1081
Courses totalling 6 units of credit from Science Schools other than Mathematics
Elective courses totalling 18 units of credit
One General Education course totalling 3 units of credit

Stage 2
MATH2060
MATH2111
MATH2130
MATH2601
MATH2620
MATH2901
MATH2931
ACCT1511
FINS1612
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit
One course from: PHYS1000, CHEM1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

**Stage 3**
Level III Pure Mathematics courses totalling 24 units of credit
Further Mathematics courses totalling 12 units of credit
Elective courses totalling 6 units of credit
General Education courses totalling 6 units of credit

**Stage 4 (Honours)**
MATH4603 or MATH4604

**Medical Physics**
Medical Physics is the application of physics to diagnosis, treatment and prevention of human disease and disability. There is a continuing demand for professional physicists in this area as new physical techniques are rapidly translated into new medical instruments. There is an increasing demand for health physicists in industry and the public service to monitor environmental and occupational sources of radiation and other hazards.

This program gives an essential strong background in conventional physics including electronics and computing, a general background in the biological sciences and some specialised knowledge in biophysics and medical physics.

Honours may be awarded. The basis is a suitably weighted performance over the last three stages of this four year Advanced Science program.

**Medical Physics**

**Stage 1**
BIOS1201, BIOS1101
CHEM1011 or CHEM1011
CHEM1041 or CHEM1021
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1131, PHYS1231 or PHYS1241

**Stage 2**
BIOC2101
MATH2011, MATH2120
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
PHYS2010, PHYS2020, PHYS2030, PHYS2040, PHYS2050, PHYS2060, PHYS2410, PHYS2630
General Education courses totalling 6 units of credit

**Stage 3**
PHPH2101
PHYS1601, PHYS1610, PHYS1620, PHYS4410
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
General Education courses totalling 6 units of credit
Plus electives chosen to make a total of 48 units of credit. Those in the supplementary table below are especially recommended.

**Year 4**
PHYS2020, PHYS2030 or PHYS2300, PHYS4411, PHYS4413
SESC4140
Supplementary electives to make a total of 48 units of credit. Those in the supplementary table below are especially recommended.

**Supplementary Table**
ANAT2511 or ANAT2111, PHYS2601, PHYS3010, PHYS3050, PHYS3060, PHYS3210, PHYS3310, PHYS3610, PHYS3630, PHYS3710, PHYS3720, PHYS3770, PHYS3780

**Medical Microbiology and Immunology**

Microbiology is the scientific study of the smallest forms of life namely, bacteria, viruses, archaea, fungi and protozoa. These fascinating organisms impact on our lives in many ways. On the negative side, they cause disease in humans, animals and plants and spoil our food. However, microorganisms are also of great benefit. Indeed, microorganisms are the key participants for the turnover of nutrients and elements and are the main producers of carbon and biomass. They turn the biological wheels on this globe and are responsible for sustainability of life. They also contribute to a better environment via recycling of organic wastes, maintenance of soil fertility and biodegradation of pollutants. Many foodstuffs, beverages, pharmaceuticals and other products of biotechnology are products of microbial action. The genetic engineering of microorganisms is a fundamental aspect of molecular biology and the way of the future.

Immunology, the study of the immune system, has contributed significantly to modern medicine in areas such as blood transfusion, organ transplantation, treatments of allergic reactions and development of vaccines, and immunity to disease. In cell biology, Immunology has advanced our understanding of differentiation, cell cooperation and the triggering of proliferation and differentiation by cell surface receptors. Both Microbiology and Immunology also provide an excellent training in the scientific method and scientific communication. We aim to provide an undergraduate training that serves as a starting point for many careers within our disciplines and beyond. An energetic Honours program provides experience of scientific research and aims to further develop a wide range of skills.

**Microbiology**

**Stage 1**
BIOS1101, BIOS1201
CHEM1011, CHEM1021
MATH1041
Elective courses totalling 12 units of credit
LIFE1001
One General Education course totalling 3 units of credit

**Stage 2**
MICR2201, MICR2301
LIFE2001
Choose 6 units of credit from:
MICR3011, MICR3021, MICR3061, MICR3081, MICR3071, MICR3091, MICR3101, BIOT3081, CHEM4011, CHEM4021
Elective courses totalling 24 units of credit
One General Education course totalling 3 units of credit

**Stage 3**
MICR3611, MICR3021 or MICR3621, MICR3071
Choose 6 units of credit from:
MICR3031, MICR3061, MICR3081, BIOT3081, BIOS3071, BIOT3011, CHEM3901, GEOH3911, FOOD2490
Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

**Stage 4 (Honours)**
MICR4031 or MICR4023

*At least two of the Stage 2 and two of the Stage 3 courses contributing to the Medical Microbiology and Immunology Study Plan must be taken at the advanced level.

**Medical Microbiology and Immunology**

**Stage 1**
BIOS1101, BIOS1201
CHEM1011, CHEM1021
MATH1041
Elective courses totalling 12 units of credit
LIFE1001
One General Education course totalling 3 units of credit

**Stage 2**
MICR2201, MICR2301
LIFE2001
Choose 6 units of credit from:
MICR3011, MICR3021, MICR3061, MICR3081, MICR3071, MICR3091, MICR3101, BIOT3081, CHEM4011, CHEM4021
Elective courses totalling 24 units of credit
One General Education course totalling 3 units of credit

**Stage 3**
MICR3611, MICR3021 or MICR3621, MICR3071
Choose 6 units of credit from:
MICR3031, MICR3061, MICR3081, BIOT3081, BIOS3071, BIOT3011, CHEM3901, GEOH3911, FOOD2490
Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

**Stage 4 (Honours)**
MICR4031 or MICR4023

*At least two of the Stage 2 and two of the Stage 3 courses contributing to the Medical Microbiology and Immunology Study Plan must be taken at the advanced level.
Molecular Biology
Recent advances in molecular biology, especially the continuing development of recombinant DNA technology, have revolutionised our understanding of the structure, function and regulation of individual genes. These advances have opened up the exciting field of molecular biology, one of the most rapid growth areas in biology. This marriage of Biochemistry, Microbiology, Cell Biology and Genetics provides an exciting new approach for the study of all living organisms, including the human. Molecular Biology therefore represents fundamental components of biological and medical science and they will have increasingly important roles to play in many aspects of modern medicine, genetics, evolutionary biology, bioinformatics, biotechnology and genomics.

Molecular Biology*
Stage 1
BIOS1101, BIOS1201
CHEM1011 or CHEM1031
CHEM1021 or CHEM1041
Choose 6 units of credit from:
MATH1031**, MATH1041**
Elective courses totalling 12 units of credit
(Recommended: Physics)
LIFE1001
One General Education course totalling 3 units of credit

Stage 2
BIOC2101*, BIOC2201*
BIOS2021 or BIOS2621*
MICR2201, MICR2201
LIFE2001
Elective courses totalling 12 units of credit
One General Education course totalling 3 units of credit

Stage 3
BIOC3121 or BIOC3621*, BIOC3281, MICR3021 or MICR3621*
Choose 6 units of credit from:
BIOC3111, BIOC3271, BIOC3301, BIOT3061, MICR3011
Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
BIOC4428 or MICR4013 or BIOT4073
*At least two of the two of the Stage 2 and two of the Stage 3 courses contributing to the Molecular Biology study plan must be taken at the advanced level.
**Other higher level I Mathematics courses may be substituted.

Neuroscience
This Study Plan introduces students to the biological and behavioural aspects of the nervous system. The program is based around the neuroscience courses offered by the Departments of Anatomy, Physiology and Pharmacology, and School of Psychology.

Neuroscience
Stage 1
BIOS1101, BIOS1201
CHEM1011, CHEM1021
PSYC1001, PSYC1011
Choose 6 units of credit from the Level I Mathematics options
LIFE1001
One General Education course totalling 3 units of credit

Stage 2
ANAT2111 or ANAT2511 *
BIOC2101 and BIOC2201, or
BIOC2181 and BIOC2291
PHPH2101, PHPH2201
PSYC2071, PSYC2081
LIFE2001
One General Education course totalling 3 units of credit
*A Credit grade is required in ANAT2511 to enrol in Level 3 Anatomy courses.

Stage 3
ANAT3411, ANAT3421
PHPH3121, PHPH3131
Level III Psychology courses totalling 12 units of credit with one course selected from Advanced Perceptual/Cognitive (PSYC3151, PSYC3211, PSYC3221, PSYC3311, PSYC3321) and one course from Advanced Biological (PSYC3051, PSYC3241, PSYC3251).
An additional course totalling 6 units of credit at Level II or III to complete 48 units of credit. This course might be chosen from those offered by the School in which Honours study is contemplated. In the case of Psychology, this course must be PSYC3001.
General Education courses totalling 6 units of credit.

Stage 4
Subject to satisfactory progress throughout the course (normally a Credit average), students may proceed to the Honours Stage. Before the commencement of Stage 2 students should consult with the appropriate schools and the Neuroscience program coordinating committee consisting of representatives from the Departments of Anatomy, Physiology and Pharmacology and School of Psychology, about the courses required for a particular Honours program. Students should also note general guidelines for Advanced Science Stage 4.

Physics
The Majors offered by the School of Physics reflect the importance of Physics in science and technology at both the fundamental and at the applied levels.

Physics
Stage 1
MATH1131 or MATH1141*
MATH1231 or MATH1241*
PHYS1131
PHYS1231 or PHYS1241
Elective courses totalling 18 units of credit**
One course from: PHYS1000, CHEM1000, MATH1001, LIFE1001
One General Education course totalling 3 units of credit

Stage 2
MATH2011, MATH2120, MATH2520*
PHYS2010, PHYS2020, PHYS2030, PHYS2040, PHYS2050, PHYS2060, PHYS2630
One course from: CHEM1000, PHYS1000, MATH1001, LIFE1001, LIFE2001
Elective courses totalling 9 units of credit****
One General Education course totalling 3 units of credit

Stage 3
PHYS3010 or PHYS3210, PHYS3020, PHYS3030 or PHYS3230, PHYS3050***, PHYS3060***, PHYS3080
Two of PHYS3040, PHYS3070, PHYS3110, PHYS3120
Level III elective courses totalling 18 units of credit****
General Education courses totalling 6 units of credit

Stage 4 (Honours)
Choose one of PHYS4103, BSSM4013
*Students are encouraged to select Higher Level Mathematics courses where applicable.
**Appropriate Level I electives include COMP3001, PHYS1601, CHEM1011 and CHEM1021.
***Students interested in Biophysics may replace PHYS3050 (or PHYS3060) with PHYS3410 provided CHEM1011, CHEM1021, BIOS101 and BIOS1201 are completed in Stage 1 and BIOC2201 and BIOC2202 are taken in Stage 2.
****Excluded PHYS2170 and PHYS2520. For students specialising in Theoretical Physics, additional mathematics courses are specified. In Stage 2 students should include MATH2501 (or MATH2601) and in Stage 3 MATH3312 and Theoretical Physics courses.

Physics and Astronomy
This Study Plan provides the basic physics essential for a career in astronomy. It will not prevent specialisation in some other field of physics if students’ interests change during their studies. There is astronomy content in each stage of the plan. There are special lectures and projects in PHYS1241. The other astronomy courses are PHYS1240, PHYS3160 or PHYS3170, and lecture course and projects in the Honours stage.

Stage 1
MATH1131 or MATH1141*
MATH1231 or MATH1241*
PHYS1131
PHYS1231 or PHYS1241
Elective courses totalling 18 units of credit**
One course from: PHYS1000, CHEM1000, MATH1000, LIFE1001
One General Education course totalling 3 units of credit
Stage 2
MATH2011, MATH2120, MATH2520
PHYS2010, PHYS2020, PHYS2030, PHYS2040, PHYS2050, PHYS2060, PHYS2160, PHYS2630
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
Elective courses totalling 6 units of credit****
One General Education course totalling 3 units of credit

Stage 3
PHYS3010 or PHYS3210, PHYS3020, PHYS3030 or PHYS3230
PHYS3050, PHYS3060, PHYS3080, PHYS3160 or PHYS3170
Two of PHYS3040, PHYS3070, PHYS3110, PHYS3120
Level III elective courses totalling 15 units of credit****
General Education courses totalling 6 units of credit

Stage 4 (Honours)
PHYS4103
*Students are encouraged to select Higher Level Mathematics courses where applicable.
**Appropriate level I electives include COMP1001, PHYS1601, CHEM1011 and CHEM1021.
****Excluded PHYS2170 and PHYS2520.

Physics and Computing
This Study Plan provides a strong background in physics together with the computing skills necessary to fully utilise computers in research and industrial laboratories.

Stage 1
COMP1011, COMP1021
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1131, PHYS1231 or PHYS1241, PHYS1601,
One course from: PHYS1000, CHEM1000, MATH1000, LIFE1001
One General Education course totalling 3 units of credit

Stage 2
COMP2011, COMP2021
MATH2011, MATH2120, MATH2520
PHYS2010, PHYS2020, PHYS2030, PHYS2040, PHYS2050, PHYS2060, PHYS2630
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
PHYS2010, PHYS3010 or PHYS3210, PHYS3020, PHYS3030 or PHYS3230, PHYS3080
Further Level III Physics courses totalling 15 units of credit
Further Level III Computer Science courses or PHYS2601 totalling 12 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)
PHYS4103

Engineering Physics
This Study Plan is not available to commencing students.
This Study Plan combines a thorough knowledge of experimental physics, electronics, computing and instrumentation, optoelectronics and communications with elements of engineering practice and management. It is designed to produce graduates with skills and knowledge appropriate to the requirements of Australian industry. An industrial project of one session's duration with an industrial sponsor is included in Stage 4.
The program prepares graduates for membership of the Institution of Engineers, Australia, within two years of initial employment in an engineering field. Graduates will be accepted for membership of the Australian Institute of Physics.
Honours may be awarded. The basis is a suitably weighted performance over the last three Stages.

Stage 1
CHEM1817
COMP1011
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1131, PHYS1231 or PHYS1241, PHYS1601, PHYS2630,
One course from: PHYS1000, CHEM1000, MATH1000, LIFE1001
One General Education course totalling 3 units of credit

Stage 2
ELEC2031
MATH2011, MATH2520, MATH2120
PHYS2010, PHYS2020, PHYS2030, PHYS2040, PHYS2050, PHYS2060, PHYS2601, PHYS3770 or PHYS3780
One course from: CHEM1000, PHYS1000, MATH1000, LIFE1001, LIFE2001
One General Education course totalling 3 units of credit

Stage 3
ELEC4004, ELEC3016
MATH2839 or MATH2859
PHYS3020, PHYS3060, PHYS3080, PHYS3310, PHYS3610, PHYS3630, PHYS3710
COMP3221 or COMP3311 or COMP9316
General Education courses totalling 6 units of credit

Stage 4
COMP3331 or COMP4011
ELEC4010
PHYS3010 or PHYS3210, PHYS3030 or PHYS3230, PHYS3040, PHYS3110, PHYS3720, PHYS4764

Physiology and Pharmacology
Physiology, the study of the processes and mechanisms which serve and control the various functions of the body, begins at Level II.
Students majoring in Physiology should note the prerequisites for Level III Physiology. There are four Level III Physiology courses, each six units of credit:
PYPH3121 Membrane and Cellular Physiology
PYPH3131 Neurophysiology
PYPH3211 Cardiorespiratory and Exercise Physiology
PYPH3221 Endocrine, Reproductive and Developmental Physiology
For a major in Physiology, students must complete at least three of these courses (18 units of credit) together with at least 6 units of credit from allied disciplines specified in the study plan below.
Students majoring in Pharmacology should note that there are prerequisites for Level III Pharmacology. There are two Level III Pharmacology courses, each six units of credit:
PYPH3151 Pharmacology and Toxicology
PYPH3231 Clinical and Experimental Pharmacology
For a major in Pharmacology, students must complete both of these courses (12 units of credit) together with at least 12 units of credit from allied disciplines specified in the study plan below.
Note should also be taken of the prerequisites and corequisites for the courses taken with Physiology and Pharmacology courses.

Physiology

Stage 1
BIOS1101, BIOS1201
CHEM1011 or CHEM1031
CHEM1021 or CHEM1041
Choose at least 6 units of credit from: One of MATH1031, MATH1041, MATH1131, MATH1141
Elective courses totalling 24 units of credit
LIFE1001
One General Education course totalling 3 units of credit

Stage 2
PYPH2101, PYPH2201
LIFE2001
Elective courses totalling 30 units of credit
BIOC2101 and BIOC2201, or BIOC2181 and BIOC2291 are highly recommended
One General Education course totalling 3 units of credit

Stage 3
Choose 18 units of credit from:
PYPH3121, PYPH3131, PYPH3211, PYPH3221
Choose 6 units of credit from:
Level III Physiology, Level III Anatomy, PYPH3151, PYPH3251,
BIOC3261, BIOC3271, BIOC3111, BIOC3121, MICR3041 or MICR3641, MICR3051, PATH3205, PATH3206, PATH3207

Elective courses totalling 18 units of credit
General Education courses totalling 6 units of credit

Stage 4 (Honours)

PHPH4218

Subject to satisfactory progress throughout the program (normally a Credit average), students may proceed to the Honours stage. Students should consult with the Department of Physiology and Pharmacology, and note general guidelines for Advanced Science Stage 4.

Pharmacology

Stage 1

6 UOC from Level 1 Biology (BIOS1201 preferred)
12 UOC from Level 1 Chemistry
6 UOC from Level 1 Mathematics (not including MATH1041)
Elective courses totalling 18 UOC
LIFE1001

One General Education course totalling 3 UOC

Stage 2

PHPH2011, PHPH2101, PHPH2201
BIOC2101 or BIOC2201
or
BIOC2181 or BIOC2291
LIFE2001

Elective courses totalling 12 UOC (CHEM2021 is recommended)
One General Education course totalling 3 UOC

Stage 3

PHPH3251, PHPH3101
Choose 12 UOC from PHPH3121, PHPH3131, PHPH3211, PHPH3221, BIOC3261, BIOS3111, BIOC3121
or
CHEM 3021, CHEM3901
Elective courses totalling 18 UOC
General Education courses totalling 6 UOC

Stage 4 (Honours)

PHPH4258

Subject to satisfactory progress throughout the program (normally a Credit average), students may proceed to the Honours stage. Students should consult with the Department of Physiology and Pharmacology, and note general guidelines for Advanced Science Stage 4.

Psychology

Psychology is the scientific study of human behaviour. It is a diverse discipline that includes study of the processes of perceiving, learning and memory; the assessment of abilities and attitudes; the origins of personality and emotional states; the nature and effects of social interactions with other people; brain-behaviour relationships; and the causes of abnormal behaviour. Study in the scientific discipline of psychology provides the background necessary for further training in the application of psychology in a variety of professional contexts.

Psychologists work in clinical, correctional, counselling, legal, educational and organisational settings. People with training in psychology also pursue careers in diverse areas including academic and health research; rehabilitation; occupational health and safety; advertising and marketing; and personnel selection, training and management.

Registration as a Psychologist

In order to become a member of the professional body, the Australian Psychological Society (APS), and for registration as a psychologist in NSW, students first need a university Bachelor degree which includes four years of approved training in psychology. Psychology in the Advanced Science program provides four years of approved training in Psychology. Students must also follow this by completing an accredited 5th and 6th year academic degree such as one of the Master of Psychology degrees (Clinical, Forensic or Organisational) or a combined Doctor of Philosophy/Master of Psychology degree as offered by this University. An alternative of two years of supervised experience in professional practice may be undertaken for registration as a psychologist in NSW.

English Proficiency

A high proficiency in English is needed to pass Psychology courses.

Psychology

Stage 1

LIFE1001
PSYC1001 and PSYC1011

Level I courses from Science Schools totalling 12 units of credit
Elective courses totalling 18 units of credit*
One General Education course totalling 3 units of credit

Stage 2

LIFE 2001

PSYC2001, PSYC2061, PSYC2071, PSYC2081 and PSYC2101
Elective courses totalling 12 units of credit*
One General Education course totalling 3 units of credit

Stage 3

PSYC3001 and PSYC3011

Four Level III Psychology electives*
Elective courses totalling 6 units of credit*
One General Education course totalling 6 units of credit

Stage 4 (Honours)

PSYC4053 and PSYC4063

*Level III Psychology electives must include one course from at least two of the following three elective groups:
Advanced Perceptual/Cognitive – PSYC3151, PSYC3211, PSYC3221, PSYC3311, PSYC3321
Advanced Biological – PSYC3051, PSYC3241, PSYC3251, PSYC3261
Advanced Social – PSYC3211, PSYC3271, PSYC3281

Note: Not all Level III Psychology elective courses are necessarily offered in each year.

*Suitable electives include courses from areas such as: Anatomy, Biological Science, Mathematics, Physiology, History and Philosophy of Science, and Philosophy.

Environmental Science

3988 Bachelor of Environmental Science

BEnSc Full-time

The Environmental Science program contains a core sequence of compulsory courses and a choice of disciplinary specialisations. The specialisations include: Biology, Chemistry, Geography, Earth Science, Marine Biology, Microbiology and Oceanography. Students will need to select a specialisation early in their programs.

The aim of the program is to provide a strong education in the skills and knowledge necessary to work or carry out research as an environmental scientist. In their final year, students carry out a major independent research project and may also do advanced coursework.

The BEnSc is designed as a 4 year (full-time) program, There is also an opportunity for students to combine the BEnSc with a Bachelor of Arts by taking a 5 year program. Students who are unable to take the complete BEnSc may transfer to the 3 year Bachelor of Science and graduate with a BSc with a major in one of the environmental areas.

Conditions for the Award of the Environmental Science Degree

- A student must complete 144 units of credit including 12 units of General Education in Stages 1-3 and 48 unit Honours sequence at Stage 4.
- The degree must contain the core in Environmental Science plus a specialisation in one discipline as specified in this Handbook.
- A student must complete at least 36 units of credit and no more than 60 units of credit in Level 1 courses.
- No student may normally commence Level 2 courses until 24 Level 1 units of credit have been successfully completed, unless approved by the program advisor or Associate Dean.
- Progression to Stages 3 and 4 is subject to academic performance. A student will be required to have attained an average of 65 or higher in courses relevant to the major area and cognate subjects in each prior stage.

Environmental Science Program

Stage 1

ENVN1011
BIOS1101, CHEM1001, GEOS1701
GEOS1211
MATH1041*

Plus 12 units of credit in one or more of the discipline specialisations
**Stage 2**
ENVS2030, ENVS2801, ECON1107
BEEs2041 or MATH2841 or MATH2301
6 units of credit of General Education
18 units of credit in Level 2 courses of the discipline specialisation

**Stage 3**
BIOS3071, CHEM3901, GEOH3911
6 units of credit of General Education
24 units of credit in Level 3 courses of the discipline specialisation

**Stage 4**

*Either*
Environmental Honours A:
48 units of credit Research Project and methodology

*or*
Environmental Honours B:
24 units of credit Research Project and 24 units of credit of Level 2

or Level 3 coursework

Please refer to the ENVS course descriptions in the rear of this Handbook for further details.

**Disciplinary Specialisations**

**Biology**
Level 1  BIOS1201
Level 2  BIOS2031, BEEs2041, plus at least 6 units of credit from:
         BIOS2031, BIOS2051, BIOS2061
Level 3  BIOS3061, BIOS3071, BIOS3111 plus 6 units of credit of Level 3 Biology

**Chemistry**
Level 1  CHEM1021 or CHEM1041, MATH1031
Level 2  CHEM2041, plus 12 units of credit of CHEM2011, CHEM2031
Level 3  CHEM3041, CHEM3311, plus 6 units of credit of CHEM3011, CHEM3021, CHEM3301
         plus 6 UOC of Level 2 Chemistry

**Note:** Students who do CHEM3311 will be exempt from CHEM3901

**Earth Science (formerly Geology)**
Level 1  GEO6111
Level 2  18 units of credit from GEOS2101, GEOS2131, GEOS2171, GEOS2181, GEOS2291, GEOS2071
Level 3  GEOS3111, GEOS3281

**Geography**
Level 1  GEOH1601
Level 2  GEOS2711, GEOS2721 plus a further 6 units of credit of Geography
Level 3  GEOS3761 plus a further 12 units of credit of Geography

**Marine Biology**
Level 1  BIOS1201
Level 2  BIOS2011, BIOS2031, BEEs2041, MSC2001
Level 3  BIOS3071, BIOS3081, BIOS3091 plus 6 units of credit of Level 3 Marine Science

**Microbiology**
Level 1  BIOS1201, CHEM1021
Level 2  BIOC2201, BIOS2011, MICR2011, MICR2201
Level 3  BIOT3081, MICR3071 plus 6 units of credit of Level 3 Microbiology

**Oceanography**
Level 1  MATH1231*, PHYS1121, PHYS1221
Level 2  MATH2841, MATH2011, MATH2120, MATH2240, PHYS2810
Level 3  MATH2301, MATH3121, MATH3241, MATH3261

**Note:** In all specialisations students may take more advanced versions of courses where these exist.

---

*Students who choose the Oceanography specialisation do not need to take MATH1041.*

---

**Media and Communications**

**3993 Bachelor of Science (Communications)**

**BSc(Communications)**
The Bachelor of Science (Communications) is a new program designed to serve students interested in a career in the human and social aspects of science, from entrepreneurship in biotechnology to science journalism and from advising on environmental policy to teaching science to the public. The program leads to a 3 year Pass or a 4 year Honours degree. It provides students with a strong grounding in science together with conceptual insights and practical skills in communication. Students address large scale issues, like the role of science in society, as they impact on small scale interactions, such as a conversation between a patient and her doctor. This scope of concerns makes the degree a highly interdisciplinary undertaking for the student who likes to marry theory with practice.

**Conditions Governing the Award of the Degree**

1. A student must complete 144 units of credit including 12 units of credit of General Education.
2. The degree must contain a Communications major sequence and either a second major drawn from those approved with the BSc, (excluding those from the Schools of Philosophy and History and Philosophy of Science) or two approved minor sequences.
3. A student must complete at least 36 and no more than 60 units of credit in Level I courses from at least three Schools.
4. A student must complete at least 24 units of credit at Level I from Science Schools (as defined in the rules attached to the conditions for the award of the BSc excluding the Schools of Philosophy and History and Philosophy of Science).
5. No student may commence Level II courses until 24 Level I units of credit have been successfully completed.
6. A student must complete a minimum of 84 units of credit from Science schools in addition to the Science Communication core courses (see above).
7. For entry to Honours a student must complete at least 24 units of credit at Level III in the relevant major sequence and have the permission of the Head of School.

**Outline of program**
The Communications major is still evolving. For further information please consult the Science Communication Program Office (Biological Sciences Bldg, Rm G05). For details in major and minor sequences in Science, see Table A under the Science program 3970.

**Stage 1**
SCOM1011 Science, Technology and Society
SCOM2014 Introduction to Science Communication
24 units of credit from two Science Schools
Electives totalling 12 units of credit

**Stage 2**
HPSC2400 Knowledge and Power
HPSC2500 Environment, Technology and Politics
HPSC2850 Information Technology, Politics and the Media.
SCOM2021 Professional Science Communication
Electives in Communication totalling 6 units of credit*
18–24 units of credit in a Science major or 2 minors (as required by major or minors)
Further electives to give a total of 42 units of credit for Stage 2
Plus 6 units of credit of General Education

**Stage 3**
SCOM3011 Communicating Science – Theory and Practice
SCOM3021 Science Communication Internship
Electives in Communication totalling 6 units of credit*
24 units of credit in a Science major or minors (continued from Stage 2)
Plus 6 units of credit of General Education
Stage 4 (Honours)

For details consult the relevant School

Note: SCOM electives normally include: ENGL3502, FILM2010, EDST2041, GEOH3111, HIST2095, HIST2036, LING2540, MARK2052, MDCM2101, PSYC3311, SOCA3101, THST2145, GEOS2821, GEOH2601, PSYC3121, or SCOM or HPSC courses. Alternatives may be taken with permission of the Science Communication Program office.

3994 Bachelor of Science (Media and Communications)

BSc(Media)

The Bachelor of Science (Media and Communications) program leads to a 3 year Pass or 4 year Honours degree aimed at producing students who have a strong grounding in science together with conceptual and practical skills in media and communication studies. Students gain creative, practical experience with digital media in the production of audiovisual and multimedia works in an advanced multimedia laboratory, together with an understanding of the history and social impacts of media technologies. This focus is combined with a major or two minors in Science.

Conditions Governing the Award of the Degree

1. A student must complete 144 units of credit including 12 units of credit of General Education.
2. The degree must contain a Media and Communications major sequence and either a second major drawn from those approved within the BSc (excluding those from the Schools of Philosophy and History and Philosophy of Science) or two approved minor sequences.
3. A student must complete at least 36 units of credit and no more than 60 units of credit in Level I courses from at least three Schools.
4. A student must complete at least 24 units of credit at Level I from Science schools (as defined in the conditions for the award of the BSc excluding the Schools of Philosophy and History and Philosophy of Science).
5. No student may commence Level II courses until 24 Level I units of credit have been successfully completed.
6. A student must complete a minimum of 84 units of credit from Science schools (see 4 above).
7. For entry to Honours, a student must complete at least 24 units of credit at Level III in the relevant major sequence and have the permission of the Head of School.

Outline of program

For details of major and minor sequences in Science, see Table A listed under the Science program 3970. Students are advised to consult the School of Media and Communications in the Faculty of Arts and Social Sciences for information on the core courses of this degree.

Stage 1

MDCM1000 New Media Technologies A
MDCM1001 New Media Technologies B
24 units of credit from two Science Schools
Electives totalling 12 units of credit

Stage 2

MDCM2000 Media, Technology and Creativity
MDCM2002 Media Production
MDCM2003 Multimedia Production
18–24 units of credit in a Science major or 2 minors (as required by major or minors)
Further electives to give a total of 42 units of credit for Stage 2
Plus 6 units of credit of General Education

Stage 3

MDCM3000 Media Forms
MDCM3002 Advanced Media Production
MDCM3003 Advanced Multimedia in Industry Contexts
24 units of credit in a Science major or minors (continued from Stage 2)
Plus 6 units of credit of General Education

Stage 4 (Honours)

For details consult the relevant School

Medical Science

3991 Bachelor of Medical Science

BMedSc Full-time

This three year degree program will provide the basis for a career in biomedical research and is an appropriate first degree for students planning to enter graduate medical or paramedical programs. Medical science is the area of science which underpins the practice of medicine. It incorporates study of the structure and function of the human body (anatomy and physiology) as well as the way in which our form and function is inherited (genetics) and then develops from the fertilised ovum (embryology). It deals with the chemistry of living organisms (biochemistry) with particular reference to man, the role of bacteria, viruses and other microorganisms in disease (microbiology), as well as drugs which are used to cure human diseases (pharmacology), the natural defenses of the body (immunology), and the general process leading to disease (pathology).

Students enrolled in this program will have the opportunity to gain a broad perspective of the biomedical sciences, as well as to specialise in one or more of the above disciplines. They may have the opportunity to undertake a fourth year that involves a research program leading to an Honours degree.

Conditions for the Award of the Medical Science Degree

• A student must complete 144 units of credit including 12 units of General Education in Stages 1–3.
• Honours is available to suitably qualified students and consists of a 48 unit of credit Honours sequence at Stage 4.
• The degree must contain a sequence of study as specified in the program description.
• A student must complete at least 36 units of credit and no more than 48 units of credit in Level 1 courses.
• A student must complete before the end of Stage 3 the two 3 unit of credit courses BSSM1110 and BSSM2220.
• No student may normally commence Level 2 courses until 24 Level 1 units of credit have been successfully completed unless approved by the Head of School.
• Progression to Stages 3 and 4 is subject to academic performance. A student will be required to have attained an average of 65 or higher in courses relevant to the major area and cognate subjects in each prior stage.

Stage 1

BIOS1101, BIOS1201, CHEM1031 and CHEM1021 or CHEM1041
6 units of credit from: MATH1031, MATH1041, MATH1131, MATH1141;
BSSM1110
One General Education course totalling 3 units of credit
Elective courses totalling 12 units of credit offered by the following Schools: Computer Science, Mathematics, Physics, History and Philosophy of Science, Psychology

Stage 2

BSSM2220
Courses totalling at least 36 units of credit from the following: ANAT2111, ANAT2241, ANAT2341, ANAT2601, ANAT2611, BIOC2181 or BIOC2101**, BIOC2291 or BIOC2201**, MIRC2011*, MIRC2201, PHPH2101, PHPH2201, PHPH201, PATH2201, BIOS2021 or BIOS2621
One General Education course totalling 3 units of credit
Elective courses totalling up to 6 units of credit from the above courses or from the following areas: Biological Science, Chemistry, Computing, Mathematics, Physics, Psychology, History and Philosophy of Science.

Students anticipating doing 4th year Honours program should contact the relevant Head of School for advice.

*Students taking MIRC2011 are encouraged to enrol in BIOS2021 (or BIOS2621). The prerequisite course, MIRC2201 may be waived with the permission of the course authority.

**Students are encouraged to enrol in the more advanced biochemistry courses, and should note that BIOC2201 and BIOC2202 are prerequisites in many Stage 3 courses.
Stage 3
Courses totalling 42 units of credit from the following subject areas: Anatomy, Biochemistry and Molecular Genetics, Microbiology and Immunology, Pathology, Physiology and Pharmacology, Psychology, Biotechnology.
Students must nominate a discipline by taking at least 18 units of credit in one of these subject areas and fulfilling other course requirements specified for that discipline.
General Education courses totalling 6 units of credit

Stage 4
Honours may be taken in the discipline chosen in Stage 3, subject to progress at Credit level through the program. Intending Honours students should consult the Head or Honours Coordinator of the appropriate School. Students who successfully complete Stage 4 of their program will be considered for the award of Honours.

Specialist Degrees
Aviation
3980/3981 Aviation Full-time Program
Bachelor of Aviation BAv
The degree of Bachelor of Aviation is offered by the Faculty of Science with input from the Faculty of Engineering. The aim of the program is to provide an opportunity for students to prepare for a career in the aviation industry in the flying or managerial sectors, and so there are two distinct streams within the Bachelor of Aviation: Flying and Management. Each consists of a core course together with a range of options and electives. The Flying program additionally includes flight training to a minimum level of Commercial Pilots Licence (CPL) with additional flight training options available dependent upon student progress and requirements. The Management program offers a selection of courses designed to provide students with a broad base of knowledge in managing the operational aspects of the aviation industry. It should be noted that due to the block training nature of the flight training program, teaching periods might not correspond to standard academic sessions.
A total of 144 units of credit including 12 units of credit of General Education are required for the completion of the Bachelor of Aviation.

3980 Flying Stream
Stage 1
AVEN1310, AVEN1910
AVIA1002, AVIA1321, AVIA1700, AVIA1900
MATH1031
PHYS1149, PHYS1249
SESC1580
Stage 2
AVEN2920
AVIA2003, AVIA2210
MATH1041
General Education courses totalling 6 units of credit
Choose 12 units of credit from:
AVEN2220, AVEN2990, AVIA2800, AVIA3300, SESC2580
Further electives totalling 6 units of credit
Stage 3
AVEN3220
AVIA3004 or AVIA3101 and AVIA3201 and AVIA3710
General Education courses totalling 6 units of credit
Choose additional units of credit for a Stage 3 total of 48 from:
AVEN3230, AVEN3420, AVEN3610, AVEN3710, AVIA3300, AVIA3800, AVIA3851, PHYS2810
Electives up to 6 units of credit
Stage 4 (Honours)
AVIA4001 or AVIA4002

3981 Management Stream
Stage 1
AVEN1310, AVEN1910
AVIA1321, AVIA1810, AVIA1850, AVIA1900
MATH1031, MATH1041
PHYS1149
SESC1580
Choose 6 units of credit from PHYS1149, PHYS1211, ECON1101
Stage 2
AVEN2920
AVIA1700, AVIA2110, AVIA2210, AVIA2400
General Education courses totalling 6 units of credit
Choose 27 units of credit from:
AVEN2220, AVEN2990, AVIA2500, AVIA2800, AVIA3600, IROB2721, PHYS2850, SESC2580
Elective courses totalling 6 units of credit
Stage 3
AVEN3220
AVIA3101, AVIA3201, AVIA3710
General Education courses totalling 6 units of credit
Choose 24 units of credit from:
AVEN3230, AVEN3420, AVEN3610, AVEN3710, AVEN3930, AVIA3300, AVIA3400, AVIA3800, AVIA3851
PHYS2810
Elective courses totalling up to 6 units of credit
Stage 4 (Honours)
AVIA4001 or AVIA4002

Biotechnology
3052 Biotechnology Full-time Program
Bachelor of Science BSc
Biotechnology can be defined as the use of various biological processes to make products and perform services. The essential feature of biotechnology therefore is the use of biological processes based on living cells and biochemical macromolecules such as proteins, DNA and RNA in a rapidly expanding range of activities of benefit to mankind. As such, biotechnology makes practical use of the recent scientific advances in areas such as molecular genetics.
The development of recombinant-DNA (r-DNA) technology has resulted in the ability to produce large quantities of any potentially useful protein. Based on this technology, a new generation of biopharmaceuticals, including hormones, vaccines, anti-hypertensive, anti-inflammatory agents and new therapies to treat cancer, are being developed which have the potential to revolutionise medicine. Microorganisms and viruses are being modified for use in controlling plant and animal diseases and pests. Diagnostic kits are being developed for use in forensic science and in product identification and quality control. In addition, genetic improvements in agriculture, plants and animals are becoming a reality, as is the control of inborn genetic disorders in humans.
Bioprocesses are also used in the extraction of minerals from low-grade ores, and modified and novel bioprocesses are being developed for the treatment of waste and degradation of recalcitrant molecules, an area of vital importance in our increasingly polluted planet. The future for expansion in all the above areas is immense and an ability to cope with the problems of the 21st century will be heavily dependent on these advances. Graduates in Biotechnology will be able to find employment in industries and other organisations involved with biopharmaceutical production and food processing, as well as in agricultural and environmental biotechnology.

Program Outline
The BSc (Biotechnology) program offers a comprehensive education in all aspects of modern applied biology. The program leads to the award of a Bachelor of Science degree over four years full-time study and is awarded with Honours for students who have distinguished themselves in coursework and in the final year project.

Degree Requirements
General Education Requirement
The University requires all students to complete a coherent sequence of General Education courses. The General Education Program is an integral part of the BSc Biotechnology course and gives students the opportunity to address some of the key questions they will face as individuals, citizens and professionals.
Progression and Exclusion

Students whose performance is unsatisfactory will be notified in writing and asked to show at the end of the academic year why they should remain in their course of study. Any student who fails a course twice, or is deemed to be making unsatisfactory progress, will be considered as having poor academic standing.

Unsatisfactory progress may include:

- failure to achieve an average of 65 or higher in courses attempted in an academic year;
- failing to pass courses totalling at least 24 units of credit in one year;
- failing to complete the requirements for Stage 1 of the program in the first two years of study.

Students not on good academic standing will be notified by the University or Faculty in writing. Notified students will be assessed in accordance with the University’s procedures. Failure to respond accordingly can result in exclusion from the course, or transfer to the Science and Mathematics course (3970), provided that the progression requirements in that course have been met. See also ‘General University Rules and Student Information’ at the front of this Handbook.

Progression to Stage 4 Honours Program

Progression to Stage 4 is subject to academic performance. Students seeking to enrol in a Stage 4 Honours program are required to have the approval of the Head of School and normally will be required:

- to have completed the requirements for Stages 1, 2 and 3 of the course and to have completed all General Education courses
- to have attained an average of 65 or higher in each Stage of the program.

Students who do not attain an average or 65 or higher in Stage 3 of the program are normally required to transfer to the Science and Mathematics course (3970) and take out the BSc Biotechnology award at Pass level.

Program Structure

Stage 1

BIOT1011 Introductory Biotechnology
BIOS1201 Molecules, Cells and Genes
CHEM1011 Fundamentals of Chemistry 1A, and
CHEM1021 Fundamentals of Chemistry 1B
MATH1031 Mathematics for Life Sciences, and
MATH1041 Statistics for Life and Social Sciences or one of
MATH1131 General Mathematics 1B
MATH1131 Mathematics 1A
MATH1141 Higher Mathematics 1A and one of:
MATH1021 General Mathematics 1C
MATH1231 Mathematics 1B
MATH1241 Higher Mathematics 1B

Plus elective courses totalling 12 units of credit recommended. (Please contact the School office for a full list of elective courses.)

Stage 2

BIOC2101 Principles of Biochemistry
BIOC2201 Principles of Molecular Biology
BIOS2021 Introductory Genetics or
BIOS2621 Genetics (Advanced Level)
MICR2011 Microbiology 1
MICR2201 Fundamentals of Microbiology and Immunology
General Education Course(s) totalling 6 units of credit

Plus 12 units of credit from:
BIOS2011 Evolutionary and Physiological Ecology
CHEM2021 Organic Chemistry or
CHEM2041 Chemical & Spectroscopic Analysis
PHHP2101 Physiology 1A

Stage 3

BIOT3011 Biotechnology A
BIOT3021 Biotechnology B
BIOT3061 Biopharmaceuticals
BIOC3121 Molecular Biology of Nucleic Acids
MICR3041 Immunology 1 or
MICR3641 Immunology 1 (Advanced)
General Education Course(s) totalling 6 units of credit

Plus an additional 12 units of credit to be selected from the following:
BIOC3111 Molecular Biology of Proteins
BIOC3271 Molecular Cell Biology
BIOC3281 Recombinant-DNA Techniques and Eukaryotic Molecular Biology
BIOT3081 Environmental Biotechnology
MICR3051 Immunology 2
MICR3071 Environmental Microbiology
MICR3021 Microbial Genetic or
MICR3621 Microbial Genetics (Advanced)

Stage 4

BIOT3071 Commercial Biotechnology
BIOT3091 Professional Issues in Biotechnology
BIOT4053 Research Project

Geography

3010 Geography Full-time Program

Bachelor of Science BSc

This program is no longer available to commencing students.

Prospective students interested in the study of geography should refer to the following programs: Bachelor of Science (3970) with a major/minor in Geography (Physical) or Geography (Human); relevant combined degree programs.

Students who are currently enrolled in this program should contact the School of Biological, Earth and Environmental Sciences for further details regarding progression and program structure.

Geology

3000 Applied Geology Full-time Program

Bachelor of Science BSc

This program is no longer available to commencing students.

Prospective students interested in the study of geology should refer to the following programs: Bachelor of Science (3970) with a major/minor in Geology or Environmental Earth Science; Advanced Science (3972) with a Study Plan in Geoscience or Marine and Coastal Studies; the Bachelor of Environmental Science (3988) with a disciplinary specialisation in Earth Science; relevant combined degree programs.

Students who are currently enrolled in this program should contact the School of Biological, Earth and Environmental Sciences for further details regarding progression and program structure.

Materials Science and Engineering Program

The field of Materials Science and Engineering offers unlimited possibilities for innovation and development. Attention is being focused on developing and processing metals, ceramics, polymers and composites with improved properties.

The activities of the materials engineer range from materials production, including their extraction from ores and their refining, to the design, development, processing and recycling of materials for use in aerospace, transportation, electronics, energy conversion and biomedical systems.

Advanced materials can provide a major competitive advantage in virtually every part of a country’s manufacturing industry. Because Australia is a country rich in minerals, materials science has been designated as a priority area for research and development. Examples of recent and significant developments include the emergence of environmentally friendly and economical metal processing methods, advanced surface coatings, biomedical materials, electrical ceramics, engineering polymers, nanomaterials and advanced composites.

The School of Materials Science and Engineering provides education and training for students to prepare them for significant and important careers in the materials and other industries.

The School of Materials Science and Engineering is in a good position to provide the increased numbers of graduates necessary for development of these new initiatives in materials. It is the only School in Australia that offers professional courses in ceramic engineering, metallurgical engineering and materials engineering as well as providing postgraduate specialisation in these fields.

The School is extremely well equipped with a wide range of advanced computing, thermal analysis, mechanical testing, X-ray and optical and electron microscopy facilities.
The School offers a four year full-time Bachelor of Engineering program (3135) with four different plans, and related five year full-time programs leading to BE/BiomedE (3138). In addition, six year part-time Bachelor of Science (Technology) programs are also offered in Ceramics (3030) and Metallurgy (3130).

**Bachelor of Engineering Full-time Programs and Plans**

Plans under program 3135, all of which lead to the award of Bachelor of Engineering (BE), provide appropriate preparation for a professional Physical Metallurgical Engineer (plan MATSE13135), Process Metallurgical Engineer (plan MATSG13135), Materials Engineer (plan MATSH13135) and Ceramic Engineer (plan MATSJ13135). The first two years of all plans are identical and the third and fourth years contain a number of common courses. Students can change their selection among the study plans up to the end of Session 1 of the third year.

Each study plan provides a range of electives in the particular study specialisation concerned. In addition, a limited number of electives can be chosen from other plans.

Bachelor of Engineering/Masters concurrent programs are also available in Biomedical Engineering (3138). For program 3138, students study an academic plan within the Bachelor of Engineering program 3135 and then, in the 5th year, study under the Master of Biomedical Engineering program 3749 to obtain the award of Bachelor of Engineering/Master of Biomedical Engineering (BE/BiomedE).

**Industrial Experience**

All students are required to have gained at least 12 weeks of approved industrial experience before graduation and to have submitted satisfactory reports on such work. Industrial experience is usually obtained during a long vacation at the end of years 2 and 3.

**3135 Bachelor of Engineering Degree Program**

**Physical Metallurgy Plan**

Plan MATSE13135

BE in Physical Metallurgy

The Physical Metallurgy plan is designed to produce graduates with training appropriate to both the metal and product manufacturing industries. The profession is very broad and includes careers in metal manufacturing companies, product manufacturing companies (e.g. white goods, automotive, aircraft), utilities, airline overhaul and maintenance operations, consulting companies and research organisations. Graduates may be employed in production, technical control and development, quality assurance, technical marketing and management. Physical Metallurgy is introduced comprehensively in Stages 3 and 4 by a number of professional electives. Students also undertake a materials design project and a substantial thesis project. Students may complete the first one or two years of their degree at their local university engineering school and then transfer with advanced standing to UNSW.

**Process Metallurgy Plan**

Plan MATSG13135

BE in Process Metallurgy

The Process Metallurgy plan is designed to produce graduates with training appropriate to the primary metallurgy industry. The profession is very broad and affords opportunities for involvement in many specialist activities in production, technical control or development, in metal or mineral producing industries. Process Metallurgical Engineering is introduced in Stages 3 and 4 by a number of professional electives and a thesis project. During the program, visits are made to various metallurgical works and students are required to submit reports on some of these. Students may complete the first one or two years of their degree at their local university engineering school and then transfer with advanced standing to UNSW.

Materials Engineering Plan

Plan MATSH13135
BE in Materials Engineering

The Materials Engineering plan provides a versatile, comprehensive coverage of areas involving: a) the conception and application of properties of materials for use in engineering, structural and specialty needs necessary in the design and development of specific components, b) supervision of manufacturing, c) evaluation and certification of specifications and characteristics, d) production of new, novel and value-added products, e) research, and f) general engineering and project management. The range of Professional Electives and selection of Technical Electives in Years 3 and 4 provide a direction appropriate to the needs of the Australian industry, and to the specific interests of students, together with a degree of flexibility if required. Typical fields which may be encompassed by the plan include steel and non-ferrous metals/alloys production, polymers and composites industry, building materials, civil engineering applications, transport, electrical/electronic industry, biomaterials/biodevices, Australian defence needs: Army, Navy, Airforce, plus the national research laboratories. Due emphasis is placed on collaborating with other appropriate fields of engineering and science disciplines.

Materials Engineering Professional Electives: UOC
MAT53564 Polymer Engineering 1 3
MAT54133 Deformation and strengthening Mechanisms 3
MAT54213 Fractographic Analysis 3
MAT54333 Fracture Mechanics 3

Ceramic Engineering Plan
Plan MATSJ13135
BE in Ceramic Engineering

UNSW offers the only degree specialisation in Ceramic Engineering in Australia. The Ceramic Engineering plan is designed to produce graduates with expertise appropriate to the ceramic manufacturing industries, which include structural ceramics, advanced engineering ceramics, electrical ceramics, whiskers, glass manufacturing and refractories. Graduates are employed in a diverse range of areas including production, research and technical development, quality assurance, technical marketing, consulting and management. In addition to recognition of the degree by the Institution of Engineers Australia, graduates in Ceramic Engineering are also eligible for membership of the Institute of Ceramics of Great Britain, the Royal Australian Chemical Institute and the National Institute of Ceramic Engineers USA.

Ceramic Engineering is introduced comprehensively in Stages 3 and 4 of the program by a number of professional electives which include visits to various ceramic manufacturing plants, a design project and a thesis research project. Students may complete the first one or two years of their degree at their local university engineering school and then transfer with advanced standing to UNSW.

Ceramic Engineering Professional Electives: UOC
FUEL0040 Fuel Engineering for Materials Processing 3
MAT51163 Chemistry of the Solid State 3
MAT52153 Ceramic Processing Laboratory 3
MAT52183 Refractories 3
MAT52363 Ceramic Processing and Design 3
MAT54333 Fracture Mechanics 3

Bachelor of Science (Technology) Part-time Programs

Bsc(Tech)

Programs 3030 and 3130 are designed for students who are employed in the ceramic or metallurgical industries respectively. They extend over six part-time years of study. The courses in Stages 3, 4, 5 and 6 normally are available only at daytime classes and one day or more of release from industry per week may be required.

The Bsc(Tech) programs cover the same courses as the first three years of the corresponding full-time plans in BE program 3135. Programs 3030 and 3130 are identical in the first four years of study and correspond to the first two years of program 3135. Stages 5 and 6 of 3030 ceramics program are the same as the third year of the 3135 program ceramic engineering plan, while stages 5 and 6 of the 3130 program are the same as either the physical metallurgy plan or the process metallurgy plan in program 3135.

Students are required to complete an approved program of industrial training of not less than twelve months prior to the award of the degree. Industrial training normally should be completed concurrently with attendance of the program, but with approval of the Head of School may be completed after completion of the prescribed course of study.

3030 Ceramics Part-time Program

Stage 1
MATH1131 Mathematics 1A
MATH1231 Mathematics 1B
PHYS1121 Physics 1A
PHYS1221 Physics 1B
Total (24 UOC)

Stage 2
CHEM1011 Fundamentals of Chemistry 1A
CHEM1021 Fundamentals of Chemistry 1B
MAT51111 Materials Science 1
MAT51021 Computing in Materials Science
MECH0130 Engineering Drawing & Solid Modelling
MECH0440 Engineering Statics
Total (24 UOC)

Stage 3
CHEM2718 Physical Chemistry for Materials Science and Engineering
MAT82049 Mathematics and Statistics for Materials Science A
MAT82059 Mathematics for Materials Science B
MAT51092 Materials and Design 1
MAT51172 Physical Properties of Materials
MAT51182 Thermodynamics and Phase Equilibria
General Education (3 UOC)
Total (24 UOC)

Stage 4
MAT51152 Materials Engineering 1B
MAT51232 Materials Engineering 1A
MAT51242 Crystallographic and Microstructural Characterisation
MAT51262 Mechanical Properties of Materials
General Education (3 UOC)
Total (24 UOC)

Stage 5
MAT51013 Diffusion and Kinetics
MAT51093 Thermodynamics of Materials 2
MAT52013 Ceramic Materials
MAT53443 Polymer Science and Engineering
Professional Electives (9 UOC)*
General Education (3 UOC)
Total (24 UOC)

Stage 6
MAT54013 Physical Metallurgy
MAT55013 Materials Processing
MAT55323 Modelling in Materials Engineering 1
Professional Electives (9 UOC)*
General Education (3 UOC)
Total (24 UOC)

* Professional electives as listed for program 3135 Ceramic Engineering plan

3130 Metallurgy Part-time Program

Stages 1 to 4

The same as Stages 1 to 4 of program 3030 in Ceramics.

Stage 5
MAT51013 Diffusion and Kinetics
MAT51093 Thermodynamics of Materials 2
MAT52013 Ceramic Materials
MAT53443 Polymer Science and Engineering
Professional Electives (9 UOC)**
General Education (3 UOC)
Total (24 UOC)

Stage 6
MAT54013 Physical Metallurgy
MAT55013 Materials Processing
**3138 Bachelor of Engineering Master of Biomedical Engineering Program**

**BE MBiomedE**

An increasing number of materials engineers in Australia and overseas are involved in the development, processing, and application of materials used in many areas of biomedical engineering including orthopaedics, dental and maxillofacial implants, artificial vascular materials, controlled drug delivery, prosthetics and orthotics, and device housings. In many areas of medical technology, a concurrent study of materials and biomedical engineering form a logical and useful training. The objectives of the concurrent degree program will prepare materials engineers to work in these areas of biomedical technology like many of their overseas counterparts.

The five year concurrent degree program consisting of a Bachelor of Engineering (in Process Metallurgy, Physical Metallurgy, Ceramic Engineering or Materials Science) and a Master of Biomedical Engineering (BE/MBiomedE) is specifically designed to cater for students wishing to pursue a career in biomedical engineering through the technical base of materials science and engineering. The concurrent BE/MBiomedE program is 240 units of credit (5 years full-time) by allowing 18 units of credit of graduate level MBiomedE courses to substitute for elective courses in the BE and one undergraduate BE elective to substitute for a MBiomedE elective. This overlap arrangement is only available to students who complete the BE/MBiomedE program. Students who discontinue the BE/MBiomedE program to complete the BE program only will have to complete the normal 192 units of credit BE program, but may be given credit for some of the BIOM courses completed.

All students are required to have gained at least 12 weeks of approved industrial experience before graduation and to have submitted satisfactory reports on such work. Industrial experience is usually obtained during a long vacation at the end of Years 2 and 3.

The Institution of Engineers, Australia recognises the Bachelor of Engineering components of the BE/MBiomedE programs as meeting the examination requirements for admission to graduate and corporate membership. Furthermore, examination requirements are met for the membership of the Institution’s College of Biomedical Engineering. The degree is accorded substantial or complete recognition by overseas engineering institutions.

**Program Outline**

The BE component of the program consists of one of the following four plans: Process Metallurgy, Physical Metallurgy, Ceramic Engineering, or Materials Engineering. Each study plan provides a range of electives in the particular study specialisation concerned. In addition, a limited number of electives can be chosen from other plans. The first two years of all plans are identical and the third, fourth, and fifth years contain a number of common courses. Students can change their selection among the study plans up to the end of Session 1 of the third year. Courses pertaining to the MBiomedE component of the program are done in each of the 5 stages of the program.

**Stage 1 of all plans**

- BIOM1001 Professional Biomedical Studies
- BIOM9010 Biomedical Engineering Practice
- CHEM1011 Fundamentals of Chemistry 1A or Chemistry 1C
- CHEM1021 Fundamentals of Chemistry 1B or Chemistry 1D
- MATH1131 Mathematics 1A, or Mathematics 1A
- MATH1141 Higher Mathematics 1A
- MATH1231 Mathematics 1B, or Mathematics 2A
- MATH1241 Higher Mathematics 1B
- MATH1261 Higher Mathematics 1B
- MATH1281 Computing in Materials Science
- MATH1111 Materials Science 1
- PHYS1121 Physics 1A or Physics 1A
- PHYS1131 Higher Physics 1A
- PHYS1221 Physics 1B or Physics 1B
- PHYS1231 Higher Physics 1B

**Total (48 UOC)**

**Stage 2 of all plans**

- BIOM9420 Clinical Laboratory Science
- CHEM2718 Physical Chemistry for Materials Science and Engineering
- MATH2049 Mathematics and Statistics for Materials Science
- MATH2059 Mathematics for Materials Science
- MATH1112 Phase Equilibria
- MATH1142 Crystallography and X-Ray Diffraction
- MATH1152 Materials Engineering 1B
- MATH1232 Materials Engineering 1A
- MATS1262 Mechanical Properties of Materials
- MATS1282 Thermodynamics of Materials
- MECH0130 Engineering Drawing & Solid Modelling
- MECH0440 Engineering Statics

**Total (48 UOC)**

**Stage 3 of all plans**

- ANAT2511 Fundamentals of Anatomy
- MATS1002 Microstructural Analysis
- MATS1013 Diffusion and Kinetics
- MATS1092 Materials and Design I
- MATS1172 Physical Properties of Materials
- MATS1223 Corrosion Control
- MATS2013 Ceramic Materials
- MATS3443 Polymer Science and Engineering
- MATS4013 Physical Metallurgy
- MATS5013 Materials Processing
- MATS5113 Materials Engineering Laboratory
- MATS5323 Modelling in Materials Engineering 1

**Total (48 UOC)**

**Stage 4 of all plans**

- MATS3524 Project, or
- BIOM5910 Thesis A (6 UOC, S1) and
- BIOM5911 Thesis B (6 UOC, S2)
- PHPH2121 Principles of Physiology A
- PHPH2221 Principles of Physiology B
- MATS4023 Phase Transformations
- MATS1244 Materials Industry Management A
- MATS1464 Professional Communication and Presentation
- BIOM9913 Masters Project
- BIOM9410 Regulatory Requirements for Biomedical Technology
- BIOM9913 Masters Project
- MATS1343 Materials Industry Management B
- MATS1354 Design Project Biomedical Engineering Electives (18 UOC)

**Total (48 UOC)**

**Stage 5 of all plans**

- BIOM9332 Biocompatibility
- BIOM9410 Regulatory Requirements for Biomedical Technology
- BIOM9913 Masters Project
- MATS1343 Materials Industry Management A
- MATS1354 Design Project
- MATS1464 Professional Communication and Presentation
- MATS3524 Materials Engineering Project

**Academic Plans of the BE/MBiomedE Program**

The professional electives that define the Physical Metallurgy, Process Metallurgy, Materials Engineering and Ceramic Engineering academic plans in the BE/MBiomedE program are the same as those specified for the corresponding academic plans in BE program 3135.

**Nanotechnology**

**3617 Nanotechnology Full-time Program**

**BSc Nanotechnology**

This program in nanotechnology offers a comprehensive education in this emerging field, which represents an important development in the evolution of scientific understanding, with profound implications for the new economy. Nanotechnology provides the potential to create new manufacturing sectors from our ability to observe, characterise and manipulate the atomic and molecular structure of materials which form the basis of the bio-, communications, information and environmental
technologies. This program will lead to the award of a Bachelor of Science in Nanotechnology over four years of full-time study, with Honours for students who perform with merit. At present, the principal entry point into this degree will be at first year level. Students will normally be expected to complete each stage before proceeding to the next stage. A total of 192 units of credit must be completed for the award of this degree.

Graduates may expect to find employment in new, high-technology companies which seek to harness the remarkable properties of materials in a nanostructural form. However, the multidisciplinary nature of this degree will provide graduates with very marketable skills in more traditional science-based industries. Graduates would also be well qualified to take higher research degrees.

*Students may leave the program after successful completion of Stage 3. These students will be awarded a BSc with a major in Nanotechnology. Only students enrolled in program 3617 will be eligible to obtain a major in Nanotechnology.

Stage 1
CHEM1011 Fundamentals of Chemistry 1A or
CHEM1031 Higher Chemistry 1C
CHEM1021 Fundamentals of Chemistry 1B or
CHEM1041 Higher Chemistry 1D
MATH1131 Mathematics 1A or
MATH1141 Higher Mathematics 1A
MATH1231 Mathematics 1B or
MATH1241 Higher Mathematics 1B
PHYS1121 Physics 1A or
PHYS1131 Higher Physics 1A
PHYS1221 Physics 1B or
PHYS1231 Higher Physics 1B
MATS3520 Nanotechnology 1
MATS1201 Molecular, Cells and Genes

Stage 2
PHYS2020 Computational Physics
CHEM2628 Organic and Inorganic Chemistry
CHEM2041 Chemical and Spectroscopic Analysis
NANO2002 Nanotechnology 2
PHYS2030 Laboratory A
PHYS2040 Quantum Physics
PHYS3310 Physics of Solid State Devices
PHYS2410 Biophysics 1
MAT5112 Phase Equilibria
MAT5142 Crystallography and X-ray Diffraction
BIOC2201 Principles of Molecular Biology (Advanced) or
BIOC2291 Fundamentals of Molecular Biology
6 units of credit of General Education

Stage 3
NANO3410 Chemistry of Surfaces
NANO3303 Nanotechnology 3
PHYS3080 Solid State Physics
NANO3420 Fabrication of Nanostructured Devices
BIOC3121 Molecular Biology of Nucleic Acids
Electives totalling 24 units of credit*
6 units of credit of General Education

Stage 4
MATS4164 Professional Communication
NANO4040 Nanotechnology Project
Electives totalling 9 units of credit*

*Recommended Electives, BIOC3111, CHEM3011, CHEM3101, CHEM3041, MATS3002, MATS3013, MATH262, MATH3143, MATH4023, MATH4333, MATH4313, MIRC2201, NANO3440, PHYS2630, PHYS3040, PHYS3320, PHYS3410, POLY3011, POLY3012.

Optometry
3950 Optometry Full-time Program
Bachelor of Optometry BOptom
The School of Optometry and Vision Science provides a four stage full-time program in Optometry leading to the award of the degree of Bachelor of Optometry at either the Pass or Honours level. Professional training including clinical optometry is interwoven with basic studies of visual and ocular science over the four stages of the program. The only entry point into Optometry will be at Stage 1 level.

Stage 1
BIOS1401 Biology (Optometry)
CHEM1819 Biological Chemistry for Optometry Students A
CHEM1829 Biological Chemistry for Optometry Students B
OPTM1035 Optics and the Eye 1
OPTM1201 Ocular and Visual Science 1
OPTM1202 Clinical Optometry 1
OPTM1205 Optics and the Eye 2
OPTM1207 Foundations of Hygiene and Infectious Disease in Optometric Practice
PHYS1199 Physics 1(Optometry)

Stage 2
OPTM2101 Ocular and Visual Science 2A
OPTM2102 Clinical Optometry 2A
OPTM2105 Optics and the Eye 3
OPTM2201 Ocular and Visual Science 2B
OPTM2202 Clinical Optometry 2B
OPTM2206 Pathology for Optometry
PHPH2121 Principles of Physiology A
PHPH2221 Principles of Physiology B
General Education courses totalling 6 units of credit

Stage 3
OPTM3102 Clinical Optometry 3A
OPTM3108 Ocular Disease
OPTM3203 Clinical Optometry 3B
OPTM3204 Clinical Optometry 3C
OPTM3209 Environmental Optometry
PHPH3302 Pharmacology for Optometry
PSYC3516 Psychology for Optometry
General Education courses totalling 6 units of credit

Stage 4
MEDM8001 Principles of Medicine for Optometry Students
OPTM4114 Optometry and the Professional Environment A
OPTM4210 Research Project
OPTM4214 Optometry and the Professional Environment B
OPTM4311 Clinical Optometry 4A
OPTM4312 Clinical Optometry 4B
OPTM4313 Clinical Optometry 4C

Psychology
3432 Psychology Full-time Program
Bachelor of Psychology BPsychol
Psychology is a discipline of both scientific research and applied practice. As a science, psychology is concerned with the study of behaviour and its underlying mental and neural processes. Topics of study include learning, memory, cognition, perception, motivation, life-span development, personality, social interactions and abnormal psychology. Psychology has many areas of application, especially in clinical, correctional, counselling, educational and organisational settings. In addition, people with training in psychology pursue careers in academic research, health research, developmental disabilities and rehabilitation, ergonomics, occupational health and safety, personnel selection, training, and management, vocational guidance, and marketing.

The four stage full-time program leads to the degree of Bachelor of Psychology. The degree is designed to provide the student with (1) a sound understanding of psychological theory, research skills, and psychological techniques (2) psychology elective studies in areas of individual interest, (3) supporting studies in science disciplines and (4) the opportunity to study courses in other faculties including Arts and Social Sciences and Commerce and Economics.

Registration as a Psychologist
In order to become a member of the professional body, the Australian Psychological Society (APS), and for registration as a psychologist in NSW, students first need a university Bachelor degree which includes four years of approved training in psychology. The BPsychol degree provides four years of approved training in psychology. Students must also follow this by completing an accredited 5th and 6th year academic degree such as one of the Master of Psychology Degrees (Clinical, Forensic, Organisational) or a combined Doctor of Philosophy/Master of Psychology Degree as offered by this University. An alternative of two
years of supervised experience in professional practice may be undertaken for registration as a psychologist in NSW.

Program Structure

Stage 1
PSYC1001, PSYC1011 and PSYC1021
Courses from Science schools totalling 12 units of credit
18 elective units of credit selected from:
- Arts and Social Sciences, Commerce and Economics, and Science or other approved.

Stage 2
PSYC2001, PSYC2061, PSYC2071, PSYC2081, and PSYC2101
12 Level II units of credit following on from one of the Level I non-psychology courses
6 units of credit of General Education

Stage 3
PSYC3001, and PSYC3011
Select one course from each of the following three elective groups and two other Level III Psychology courses:
- Advanced Perceptual/Cognitive – PSYC3151, PSYC3211, PSYC3221, PSYC3311, PSYC3321;
- Advanced Biological – PSYC3101, PSYC3241, PSYC3251, PSYC3261;
- Advanced Social – PSYC3121, PSYC3271, PSYC3281;
6 units of credit of General Education

Stage 4
PSYC4053 and PSYC4063
*Note: Not all level III Psychology elective courses are necessarily offered each year.

General Education Requirement
Students must complete 12 units of credit of General Education courses plus an additional 56 hours of study which fosters acceptance of professional and ethical action and social responsibility. Of the 12 units of credit for General Education
1. 6 units of credit from the mainstream courses may be substituted for General Education with approval of the Head of School of Psychology, and
2. A maximum of 6 units of credit of General Education may be counted from any faculty except the Faculty of Science, where only 3 units of credit may be counted.

Students should also consult the section on General Education of this Handbook for further information.

Study Load
This is a four-stage full-time program. In any one year students must enrol in the full load specified for a particular stage. Only in exceptional circumstances will students be allowed to enrol in a reduced program for a stage and this requires the permission of the Head of School of Psychology.

Progression and Exclusion
Students will be required to maintain a high level of performance for progression. Any student who fails to achieve an average of 65 percent or higher in psychology courses taken in any stage (based on the first attempt result for each course) will be deemed to be falling below that level of performance. This will be drawn to the attention of the student and they may be interviewed by the Head of School (or nominee) to discuss the reasons for poor performance. This interview may lead to a recommendation to undertake special studies to assist learning. Students whose performance remains below the required level at the end of Stage 1, 2 or 3, or remains on poor academic standing, may be required to transfer to the Bachelor of Science or another degree and/or to show cause why such transfer should not be required.

Student should also consult the section on academic standing in the front section of this Handbook for further information.

Award of the Degree
In order to graduate, students must satisfy requirements for the award by passing all courses specified for the degree.

The final grading for the degree is based on performance in all Psychology courses excluding PSYC1001, PSYC1011 and PSYC1021 taken over the four Stages. The degree may be awarded at either Pass level or with Honours.

Combined Degree Programs

Combined Programs including Science
Students seeking to complete the Science component of a combined degree would normally be expected to complete a minimum of 84 units of credit in Science courses at Levels I–II, including a major as specified for program 3970. It may be difficult to undertake some plans as part of combined degree structures due to timetable constraints.

Combined Programs including Advanced Science
Students seeking to complete the Science component of a combined degree program at Advanced level would normally be expected to complete the full Honours program for the Science study plan in which they are enrolled, in addition to a minimum of 96 units of credit in relevant Science courses at Levels I–III. In practice, it may be difficult to undertake some plans as part of combined degree structures. Subject to timetable constraints, students may undertake the science component of most approved combined degree program involving science, at Advanced level. In general, students will be restricted in the number of science courses that they can undertake in such combined degrees. Where these are insufficient to allow the student to complete the recommended study plan as outlined in the Advanced Science section of this Handbook, students may not be allowed to enrol in the study plan.

Combined Programs with Arts and Social Sciences

3930 Combined Science and Arts
3931 Combined Advanced Science and Arts

BSc BA Program 3930

The combined degree of BSc BA, program 3930, enables students to complete a major sequence from those available in Table A for Science (see program 3970 – Philosophy and History and Philosophy of Science may be included), in addition to a major sequence in a school, department, or program of the Faculty of Arts and Social Sciences. The duration of the degree program is normally four years full-time.

The total units of credit required for this program is 192. Students are required to undertake courses totalling 84 units of credit from both the Science and the Arts components of this combined degree. The remaining 24 units of credit may be from either area. The Arts component must include an approved major sequence of 42 units of credit (refer to Lists A and B of the Faculty of Arts and Social Sciences rules in the Arts Faculty section of the Handbook).

Students should enrol in at least 24 Level I units of credit and no more than 36 Level I units of credit within either Science or the Arts component of the program. For the Arts component, no more than 12 units of credit can be taken in any one school or department.

For admission to the program, students must satisfy the entry requirements to Science, as well as to the Faculty of Arts and Social Sciences. This degree is administered by the Faculty of Science.

Program 3931

The combined Advanced Science/Arts program, 3931, enables students to complete a Study Plan in Advanced Science (see program 3972) in addition to a major sequence in a school, department, or program of the Faculty of Arts and Social Sciences. The duration of the degree program is normally five years full-time.

The total units of credit required for this program is 240. Students are required to undertake 96 units of credit for the Advanced Science component of this degree program and 84 units of credit for the Arts component, including an approved Arts major sequence of 42 units of credit (refer to Lists A and B of the Faculty of Arts and Social Sciences rules in the Arts Faculty section of the Handbook). The remaining 12 units of credit may be from either area. A further 48 units of credit constitutes the Stage 4 Honours sequence of the Advanced Science study plan.

Students should enrol in at least 24 Level I units of credit and no more than 36 Level I units of credit within either the Advanced Science or the Arts component of the program. For the Arts component, no more than 12 units of credit can be taken in any one school or department.

For admission to the program, students must satisfy the entry requirements to Advanced Science as well as to the Faculty of Arts and Social Sciences. This degree is administered by the Faculty of Science.
3935 Combined Science and Social Science  
3936 Combined Advanced Science and Social Science  
**BSc BsocSc**

In addition to the minimum requirements of the BSc program (84 units of credit), or the BSc(Advanced) program (96 units of credit), students must complete a minimum of 84 units of credit in the Faculty of Arts and Social Sciences.

This includes the Social Science core program of 48 units of credit:

- **UOC**
- SLP1000 Social Science and Policy 6
- or SLP1002 Introduction to Policy Analysis 6
- and SLP1001 Research and Information Management 6
- SLP2000 Economy and Society 6
- SLP2002 Policy Analysis Case Studies 6
- SLP3000 Social Theory and Policy Analysis 6
- SLP3001 Applied Social Research 1 6
- SLP3001 Applied Social Research 2 6
- SLP3002 Social Science and Policy Project 6

and an additional 36 units of credit from an approved sequence in a particular social science discipline (List F of the Faculty of Arts and Social Sciences rules in the Arts Faculty section of the Handbook).

Students may complete a major (42 units of credit) in a social science discipline from List F in the Arts and Social Sciences Faculty by completing an additional elective course as part of the remaining 24 units of credit required for the program.

This degree is administered by the Faculty of Science.

### 3932 Combined Environmental Science and Arts

**Bachelor of Environmental Science and Bachelor of Arts BEnvSc BA**

This combined degree requires a minimum of 5 years to complete. To satisfy requirements for Environmental Science, a student must complete the coursework in the ENVS core and a discipline specialisation, as well as a 24 UOC independent research project. Refer to Environmental Science Program 3908 for further details on core courses and specialisations.

Students must complete a minimum of 84 units of credit in courses offered by schools, departments or programs within the Faculty of Arts and Social Sciences, including an approved major sequence of 42 units of credit (refer to Lists A and B of the Faculty of Arts and Social Sciences rules in the Arts Faculty section of the Handbook). Students should enrol in at least 24 Level I units of credit and no more than 36 Level I units of credit within the Arts component of the program. Of these, no more than 12 units of credit can be taken in any one school or department.

This degree is administered by the Faculty of Science.

### 4075 Science Education Program

**Bachelor of Science Bachelor of Education BScBEd**

This four year double degree requires the completion of a BSc degree with a major and minor in two HSC teaching subjects, plus at least one semester of first year level courses in another two teaching disciplines. Additionally Education Theory courses are commenced in the first year (two courses), with an additional theory course in second year. In third year, practice teaching is done along with a teaching method course. In fourth year, a full complement of teaching methods, practice teaching, professional courses and two educational theory courses are completed.

A) Students intending to become science teachers, or wishing to graduate in the natural sciences (excluding mathematics), will be required to complete:

i) A major in one of the teaching disciplines – Physics, Chemistry, Biological Sciences, Earth and Environmental Sciences). A major sequence is defined as: at least 42 units at Level II and Level III in a single discipline or area of study, including at least 18 units at Level III. Major sequences are defined in Table A.

ii) A minor in one of the teaching disciplines – Physics, Chemistry, Biological Sciences, Earth and Environmental Sciences (at least 24 units of credit at Level II and III). The minor sequence excludes the upper level General Education courses offered in the disciplines.

iii) At least 6 units of credit at Level 1 in each of the main teaching disciplines – Physics, Chemistry, Biological Sciences, Earth and Environmental Sciences – and at least 12 units of credit at Level 1 in either Chemistry or Physics. That is a total of 12 units of credit beyond those first year units completed in the major and minor disciplines.

iv) Completion of 78 units of credit in education. The normal pattern is two courses in first year (12 units of credit); one course in second year (6 units of credit); and three courses in third year (18 units of credit which include: one theory elective, introductory teaching methods and teaching experience; and 42 units of credit in fourth year which include educational theory, practice teaching, teaching method and professional courses.

v) Completion of 6 or 12 (depending on choice of major) other units of credit from any university discipline, at Levels I, II or III.

**Note:** (a) Upper level Physics and Chemistry courses require completion of at least 12 units of credit of first year Mathematics. Some Level III Physics courses require a further 6 units of credit of Level II mathematics.

For students doing a major or minor in Physics or Chemistry, the Mathematics prerequisites will need to come out of these 12 or 18 ‘other’ units of credit.

(b) Students majoring in Physics complete only 72 units of credit in Education, standardly they would do no Education course in second year.

(c) For entry to Honours (fourth year) in one of the Science disciplines, at least 24 units of credit need to be taken at Level III in the discipline, and approval needs to be obtained from the head of the relevant science school.

(d) In fourth year, there is the opportunity to do Computer Studies Method if 12 units of credit of computing have been completed.

**B) Students wishing to become mathematics teachers, or graduate in mathematics,** will be required to:

i) Complete 60 units of credit in Mathematics. These Mathematics courses must be chosen so as to fulfil the requirements for a Mathematics major in the Science degree program 3970, and include the courses MATH3560 History of Mathematics, and MATH3570 Foundations of Calculus.

ii) Completion of at least 6 units of credit of computing courses, which can be taken from a variety of different schools in the university.

iii) Completion of 78 units of credit in Education. The normal pattern is two courses in the first year (12 units of credit); one course in second year (6 units of credit); and two courses- teaching method (6 units of credit); and introductory teaching experience (6 units of credit) in third year; and 48 units of credit in fourth year, which include educational theory, practice teaching, teaching method, and professional courses.

iv) Completion of the balance of 192 units of credit by taking courses from any school that offers either a major or minor in Science.

**Note:** (a) All prospective Mathematics teachers need to do the BScBEd combined degree. They can no longer (from 2000) do the BAbEd degree.

(b) In fourth year, there is the opportunity to do Computer Studies Method if 12 units of credit of computing have been completed.

**Combined Programs with Engineering**

**Bachelor of Engineering Bachelor of Science BE BSc**

For details of the Combined Science and Engineering programs, please refer to the appropriate schools in the Faculty of Engineering section of this Handbook.

- 3711 Combined Science/Aerospace Engineering
- 3042 Combined Science/Chemical Engineering
- 3730 Combined Science/Civil Engineering
- 3726 Combined Science/Computer Engineering
- 3725 Combined Science/Electrical Engineering
- 3735 Combined Science/Environmental Engineering
- 3102 Combined Science/Industrial Chemistry
- 3711 Combined Science/Manufacturing Engineering and Management
- 3711 Combined Science/Mechanical Engineering
- 3711 Combined Science/Mechanotronic Engineering
- 3142 Combined Science/Mining Engineering
- 3711 Combined Science/Naval Architecture
- 3655 Combined Science/Photovoltaics and Solar Energy
- 3651 Combined Science/Software Engineering
- 3746 Combined Science/Surveying and Spatial Information Systems
- 3641 Combined Science/Telecommunications

**Combined Programs with Commerce and Economics**

- 3529 Combined Science and Commerce

**Bachelor of Commerce Bachelor of Science BCom BSc**

For details of the Combined Science and Commerce Programs, please refer to the Faculty of Commerce and Economics section of this Handbook.

- 3711 Combined Science/Aerospace Engineering
- 3042 Combined Science/Chemical Engineering
- 3730 Combined Science/Civil Engineering
- 3726 Combined Science/Computer Engineering
- 3725 Combined Science/Electrical Engineering
- 3735 Combined Science/Environmental Engineering
- 3102 Combined Science/Industrial Chemistry
- 3711 Combined Science/Manufacturing Engineering and Management
- 3711 Combined Science/Mechanical Engineering
- 3711 Combined Science/Mechanotronic Engineering
- 3142 Combined Science/Mining Engineering
- 3711 Combined Science/Naval Architecture
- 3655 Combined Science/Photovoltaics and Solar Energy
- 3651 Combined Science/Software Engineering
- 3746 Combined Science/Surveying and Spatial Information Systems
- 3641 Combined Science/Telecommunications

**Combined Programs with Commerce and Economics**

- 3529 Combined Science and Commerce

**Bachelor of Commerce Bachelor of Science BCom BSc**

For details of the Combined Science and Commerce Programs, please refer to the Faculty of Commerce and Economics section of this Handbook.
Combined Programs with Law

4770 Combined Science and Law
Bachelor of Science Bachelor of Laws BSc LLB
For details of the combined Science and Laws program, refer to the Faculty of Law section of this Handbook.

Combined Programs with Innovation Management

3451 Combined Science and Innovation Management
Bachelor of Science Diploma in Innovation Management BSc DipInnovMan
The Diploma in Innovation Management program is open to all students commencing second year of a four year science based degree or a combined degree program. Students are assessed for admission based on their past leadership and entrepreneurial activities, enthusiasm and academic achievement. The diploma aims to encourage an entrepreneurial mind-set and provide students with the knowledge and skills needed for developing business opportunities based on scientific innovation. The Diploma is taught concurrently over the student's final three years of study and involves 36 units of credit divided into seven formal courses and an industry work placement. To avoid study overload, three of the program's core courses (INOV2100, INOV3100, INOV4001) are delivered in winter or summer sessions. At the completion of 4 to 4.5 years of study, students become eligible for the award of a combined Bachelor of Science and the Diploma in Innovation Management. The industry workplace component is normally undertaken following the completion of the student's Honours program or 4th year of study.

Course material covers areas such as creativity in enterprises, lateral thinking, business principles, basic business planning and planning for new ventures, funding, management and commercialisation of intellectual property, and valuation and assessment of high technology businesses. Students engage in an exercise to set up and run a business venture (in conjunction with Young Achievement Australia) and will participate in case studies with Australian and international entrepreneurs.

The lectures, workshops, case studies and tutorials in each of the program's courses are delivered by a well-balanced mixture of university academics and expert industry professionals.

The Diploma is primarily directed at empowering future R&D scientists with an entrepreneurial education that will allow them to recognise, evaluate, develop, finance and exploit commercial opportunities in their work. Graduates with the combined qualification will also be more competitive for all employment opportunities whether they are in academia, research or administration and will have a wide range of career options. Combinations of business and technical skills are required in careers that involve: intellectual property; high technology finance (venture capital) and investment (business analysis); R&D management; corporate management in the technology sector; government regulation and administration; and technology sales and marketing.

Note: For the award of the Diploma in Innovation Management, students must complete all courses in the study plan. Students that take BIOT3071 and BIOT3091 courses as part of their BSc program must complete Innovation in Practice courses at a sufficient UOC level to meet the total 36 UOC requirement for the award of the Diploma.
Undergraduate Course Descriptions

ACCT1501
Accounting and Financial Management 1A
School of Accounting
UOC6 HPW3.5

This is the first course in a sequence of courses dealing with the profession and practice of accounting. It illustrates the analysis and design of a financial accounting system which processes financial data and produces financial reports geared to the information needs of interested parties. It introduces students to the design of accounting systems based on double-entry book-keeping and incorporating other internal controls; also, to the problems of accounting for cash, debtors, inventories and property plant and equipment. It also provides a critical introduction to the ideas underlying accounting practice and to issues associated with the uses and limitations of traditional financial reports.

ACCT1511
Accounting and Financial Management 1B
School of Accounting
UOC6 HPW3.5
Prerequisite/s: ACCT1501

This is the second course in a sequence of accounting courses and includes financial accounting topics such as an examination of the regulatory environment of financial reporting; the definition and recognition of assets, liabilities, revenues and expenses; and accounting for corporations. Aspects of managerial and investor decision-making are covered including financial statement and cash flow analysis, and examination of cost/volume/profit relationships in a single product firms, and short term budgeting.

ACCT2522
Management Accounting: Process Improvement and Innovation
School of Accounting
UOC6 HPW3
Prerequisite/s: ACCT1511
Excluded: ACCT2532

This course examines management accounting, directed towards the effective use of organisational resources. Organisations create value through the use of resources, and can enhance such value by focusing and reconfiguring their internal processes in various ways; that is, by changing the ways in which they conduct business and perform work. It is argued that, in world class organisations, the management of time, flexibility, quality, integration, variability and interdependencies is critical to sustained value generation. This course explains how management accounting supports such value generation, within changing organisational processes.

ACCT2542
Corporate Financial Reporting and Analysis
School of Accounting
UOC6 HPW3.5
Prerequisite/s: ACCT1511
Excluded: ACCT2532

This intermediate financial accounting course is intended for students who will be involved in the preparation or use of corporate financial reports whether as accountants, financial executives, auditors, financial analysts, actuaries or legal advisors. This course builds on the foundation laid in ACCT1501 and ACCT1511 and covers financial reporting on, and analysis of, more complex business transactions, events and structures. Topics include tax effect accounting and the preparation of consolidated financial statements as well as accounting for specific industries, such as insurance and superannuation.

ACCT3563
Issues in Financial Reporting and Analysis
School of Accounting
UOC6 HPW3.5
Prerequisite/s: ACCT2542
Excluded: ACCT3573

This is the final course in financial accounting. Building on the foundation laid in ACCT2542, it covers more advanced topics including accounting and analysis in respect of associates, joint ventures, foreign currency transactions, offshore operations, diversified operations and derivative financial instruments. The course also covers topical issues related to the scope and quality of financial reports. Examples of such topics from past years include environmental reporting, ethical reporting dilemmas, and the information that should be reported on cultural and heritage assets.

ACCT3573
Issues in Financial Reporting and Analysis (Honours)
School of Accounting
Enrolment requires school approval
UOC6 HPW4
Prerequisite/s: ACCT2552
Excluded: ACCT3563

The content of this course includes that of ACCT3563 Issues in Financial Reporting and Analysis as well as additional and more advanced work in financial reporting and accounting theory.

ACCT3583
Stakeholder Value Management
School of Accounting
UOC6 HPW3
Prerequisite/s: ACCT2522
Excluded: ACCT3593

This course is concerned with the ways in which tangible and intangible resources are combined and leveraged in order to deliver stakeholder value in contemporary organisational contexts. The ways in which these resources are managed affects the ability of organisations to deliver value to various stakeholders, such as shareholders, customers, employees, suppliers, the community and the natural environment, both in the short and long-terms. A strategic challenge for organisations is to achieve a balance between these different forms of stakeholder value in the present and the future. This course examines the ways in which a set of practices that bears the label of ‘management accounting’ constrains and enables processes of stakeholder value management. The course will draw upon a variety of readings and cases to explore these issues.

ACCT3585
E-Business: Strategy & Processes
School of Accounting
UOC6 HPW3
Prerequisite/s: ACCT2522 or ACCT2532

Organisations engaging in electronic forms of business are seeking to create and sustain value by radically altering conventional business models whilst focusing and reconfiguring their internal processes. Emergent electronic business models such as information, brokerage, electronic auction, virtual community, third party market place (or portal) and value chain integrator, are challenging the conventional ways by which business is conducted and work is performed. It is argued that, for such organisations, the strategic management of time, cost, flexibility, quality and integration is critical to sustain value generation. This course will build on existing second and third year courses in accounting. It has the following aims. First, it seeks to highlight and evaluate the new business strategies and models adopted by e-Businesses. Second, it seeks to explore how these models have differential effects on business processes. Third, it examines the implications of reorienting existing organisational structures, processes and culture to e-Business strategy. Fourth, it discusses the relevance of new performance metrics (shareholder value analysis, economic value added, etc) in the management of intangible assets. The course draws upon research, professional literatures and case studies to explore the issue of creating value through electronic forms of business.

ACCT3593
Stakeholder Value Management (Honours)
School of Accounting
Enrolment requires school approval
UOC6 HPW3.5
Prerequisite/s: ACCT2532
Excluded: ACCT3583
The content of this course includes that of ACCT3583 Stakeholder Value Management, as well as more advanced work dealing with theoretical and research issues in management accounting.

ACCT3601 Global Financial Reporting and Analysis
School of Accounting
UOC6 HPW3
Prerequisite/s: ACCT2542 or ACCT2552

With the increasing globalisation of business and capital markets, there is a more extensive use of cross-border financial information. This course considers the key issues in international financial reporting and analysis. Topics include: the types of differences in national financial reporting practices; the reasons for the differences; the progress of the International Accounting Standards Board in reducing the diversity; foreign exchange risk and foreign currency accounting issues; reporting and disclosure in developed countries including the USA, Japan and the members of the European Union; the role of accounting in developing countries and Eastern Europe; financial reporting in emerging capital markets including those in the Asia-Pacific region; and analysis of country-specific financial statements in the cultural, business and legal context of each country. Numerical examples and cases are used to highlight important concepts and issues.

ACCT3610 Financial Statement Analysis
School of Accounting
UOC6
Prerequisite/s: ACCT2542 or ACCT2552, FINS1613

This course is about the analysis of financial information arising primarily from the financial reports of entities. Fundamental analysis techniques are examined in detail with particular emphasis on the application of these techniques in equity (share) valuation decisions. Some attention is also given to credit assessment and debt valuation decisions. The techniques are applied in cases and projects involving listed companies. Topics considered include fundamental ratio analysis using reported and ‘off-balance sheet’ information, an analysis of accrual accounting and cash flows, the analysis of profitability, growth and valuation generation in a firm, determining the quality of financial reports, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, analysis of risk, and a comparison of alternative valuation models.

ACCT3708 Auditing and Assurance Services
School of Accounting
UOC6 HPW3
Prerequisite/s: ACCT2542 or ACCT2552 or approval from the School
Excluded: ACCT3718

This course examines the practice of auditing and the underlying concepts, auditor’s responsibilities and the audit environment. Although the focus of attention is on audits carried out under the provisions of the Corporations Law, reference is also made to other forms of audit. The course is intended to provide an overview of the audit process as it exists in Australia. Both CIs and computer-assisted audit techniques are an integral part of this course.

ACCT3718 Auditing and Assurance Services (Honours)
School of Accounting
Enrolment requires school approval
UOC6 HPW3.5
Prerequisite/s: ACCT2542 or ACCT2552 or approval from the School
Excluded: ACCT3708

The content of this course includes that of ACCT3708 Auditing and Assurance Services, as well as introducing students to major research areas in current auditing research, critically examining research methods used and considering possible future developments in audit theory and research. Topics covered may include demand and supply of the audit function, audit fee research, behavioural audit research and audit expertise studies.

ACCT4794 Thesis (Accounting)
School of Accounting
Enrolment requires school approval
UOC12
Prerequisite/s: Admission to BCom degree at Honours level majoring in Accounting.

ACCT4809 Current Developments in Auditing Research
School of Accounting
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: Admission to BCom degree at Honours level majoring in Accounting.

An examination of current areas of research in auditing and substantive studies in each area. The following topics will be considered: theory about auditing; overview of audit research; nature of audit work; agency theory and the existence of the audit function; human information processing in auditing; audit teams and the review process; experience and expertise; independence; audit fees and other service fees; effect of the audit report; and future development in audit theory and research.

ACCT4818 Advanced Assurance and Auditing
School of Accounting
UOC6 HPW3
Prerequisite/s: ACCT3708 or ACCT3718

Topics covered in this course include: risk analysis; analytical review; internal control evaluation; internal audit and operational auditing; CAATS; use of computer as an audit tool; going concern prediction; performance indicators and analytical review as an audit tool; auditing in a small business environment; compliance audits in the public sector; and investigating accountants reports.

ACCT4851 Current Developments in Accounting Research - Financial
School of Accounting
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: Admission to BCom degree at Honours level majoring in Accounting.

Review of alternative approaches to the development of theories in external reporting, Explication and evaluation of substantive theories and associated research studies. Examination of research findings related to the accounting and reporting environment, agency cost and financial contracting, the properties of reported accounting numbers, predictive value of accounting information, the use of information in capital markets, and the use of accounting reports by individual decision makers.

ACCT4852 Current Developments in Accounting Research - Managerial
School of Accounting
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: Admission to BCom degree at Honours level majoring in Accounting.

The aim of this course is to equip students with a comprehensive understanding of contemporary management accounting research, which emanates from different philosophical perspectives and employs different theories and research methods. Research is divided into two broad streams: work that seeks (a) to explain and design, and (b) to understand and interpret the practice of management accounting in organisational societies. Topics covered include design approaches using behavioural decision theory, contingency theory, institutional theory, and others and interpretive approaches using symbolic interactionism and theories of culture. There is also brief coverage of national differences in management accounting practice and of critical analyses of the development and operation of management accounting systems.
ACCT4867
Special Topic in Accounting
School of Accounting
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: ACCT4897

To assist BCom Hons students in completion of research project requirement. May consist of an examinable readings program defined to meet the needs of a particular student or a formal program undertaken by a group of students whose research projects are in a common area.

ACCT4897
Seminar in Research Methodology
School of Accounting
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: Admission to BCom degree at Honours level majoring in Accounting.

To assist BCom Hons students in completion of research project requirement. May consist of an examinable readings program defined to meet the needs of a particular student or a formal program undertaken by a group of students whose research projects are in a common area.

ACCT4898
Project Seminar
School of Accounting
Enrolment requires school approval
UOC6  HPW3

ACCT8691
Industrial Training 1
School of Accounting
UOC12

ACCT8692
Industrial Training 2
School of Accounting
UOC18

ACCT8693
Industrial Training 3
School of Accounting
UOC18

ACCT8694
Business Internship (Type A)
School of Accounting
Enrolment requires school approval
UOC6
Excluded: ACCT8695

Type A Interns enrol for 18 week session including the examination period. Placement attendance is an average 2 days per week. In addition to academic requirements students are required to complete a norm of 180-200 hours on work placement. The internship is considered to be equal to one course.

Note/s: Available only to Study Abroad students.

ACCT8695
Business Internship (Type C)
School of Accounting
Enrolment requires school approval
UOC12
Excluded: ACCT8964

Type C Interns enrol for an 18 week session including the examination period. Placement attendance is an average of 3 days per week. In addition to academic requirements, students are required to complete a norm of 220-240 hours on work placement.

Note/s: Available only to Study Abroad students.

ACCT9003
Introduction to Accounting Principles
School of Accounting
UOC3  HPW2
Excluded: ACCT1501, ACCT9001, ACCT9002, ACCT9062

This course will provide students with a basic understanding of the key financial statements and how transactions they are likely to be involved with will affect those financial statements. Students will learn about some of the internal controls and why they exist in organisations. They will learn to analyse financial statements and make decisions using those statements. The basics of management accounting will be introduced including cost behaviour, cost-volume-profit analysis, costing and budgeting.

ACTL1001
Actuarial Studies and Commerce
Actuarial Studies Unit
UOC6  HPW3

This course is designed to provide an introduction to actuarial studies. It covers the basic principles underlying the actuarial analysis and management of insurance, superannuation and other financial contracts. It also aims to demonstrate the importance of statistics, mathematics, demography, economics, accounting, finance, business law and computing to actuarial studies.

ACTL2001
Financial Mathematics
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ECON1202 or MATH1131 or MATH1141 or MATH1151

This course develops the financial mathematics required for the analysis of financial and insurance transactions. Topics covered include: mathematics of compound interest; discounted cash flow techniques; valuation of cash flows of simple insurance contracts; analysis and valuation of annuities, bonds, loans and other securities; yield curves and immunisation; introduction to stochastic interest rate models and actuarial applications.

ACTL2002
Probability and Statistics for Actuaries
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ECON1203 or MATH1231 or MATH1241 or MATH1251

This course covers probability and statistics topics relevant to actuarial studies. Topics covered include probability generating functions, moment generating functions, marginal and conditional distributions, independence and convolution, conditional expectation and compound distributions, sampling distributions, estimation methods, hypothesis tests, regression, analysis of variance. Examples relevant to actuarial studies are used to illustrate the application of the topics covered.

ACTL2003
Stochastic Models for Actuarial Applications
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ACTL2002 or MATH2801, MATH2831 or MATH2901, MATH2931

This course provides an introduction to the stochastic models used by actuaries to model both liabilities and assets and illustrates their applications in actuarial work. Topics covered include the terminology of stochastic processes; main features of a Markov chain and application to experience rating; Markov process models and application to survival, sickness and marriage models; simple time series models including random walk and auto-regressive models and their application to investment variables; properties of Brownian motion and applications to investment variables; methods for simulation of a stochastic process. Students will be required to implement models using spreadsheets and programs in a numerical computer package.

ACTL2100
Industrial Training 1 (Co-op)
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ACTL1001

Students consider the practical application of the fundamental principles of actuarial studies in an industry environment.
This course covers survival models, their estimation and application to mortality and other decrements. Specific topics include: the concept of a survival model and actuarial notation; estimation of lifetime distributions; multiple state models; maximum likelihood estimation of transition intensities; construction of multiple decrement tables; the binomial model of mortality and its estimation; models with transition intensities depending on age and duration; the census approximation and formulae; statistical comparison of crude rates with standard table; graduation of crude estimates and tests of fidelity and smoothness; analysis of mortality/morbidity and the main forms of selection; models for projection of populations. The analysis of data using a numerical computer package will form a part of the course assessment.

ACTL3002
Life Insurance and Superannuation Models
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ACTL1001, ACTL2003

This course covers the actuarial mathematics and models for use in the analysis and actuarial management of life insurance and superannuation contracts. Topics covered include: the main forms of life insurance and annuity contracts, disability and long term care contracts and superannuation fund benefits; actuarial notation and the life table; moments of the value of the benefit payments; Thiele’s differential equation for policy values; stochastic modelling of claims and benefit payments; gross premiums, net premiums, policy values and reserves; allowing for expenses and inflation; use of discounted emerging costs and profit tests; asset shares in life insurance; termination and alteration values; cost of guarantees; joint life functions; valuation of disability insurance contracts.

ACTL3003
Insurance Risk Models
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ACTL1001, ACTL2003

This course covers the actuarial mathematics, statistics and models used in non-life insurance actuarial practice. Topics covered include: basic concepts of decision theory and Bayesian statistics; loss distributions and reinsurance; risk models including compound Poisson; estimation of aggregate claims distribution; probability of ruin; premium rating and credibility; experience rating systems; claims reserving for loss run-off data and generalised linear models.

ACTL3004
Financial Economics for Insurance and Superannuation
Actuarial Studies Unit
UOC6  HPW3
Prerequisite/s: ACTL2001

The aim of this course is to introduce the mathematical and economic models of financial economics and highlight their application to asset-liability management for insurance, superannuation and funds management. Topics covered include: risk and utility; risk measures; mean variance models; factor models; asset liability models using portfolio selection models; equilibrium and arbitrage-free valuation; valuation of derivatives; term structure models; actuarial stochastic investment models and their application. The topics will be illustrated with applications to the valuation and risk management of insurance and superannuation contracts especially those with embedded options and financial guarantees.

ACTL3005
Superannuation and Retirement Benefits
Actuarial Studies Unit
UOC6  HPW3

This course provides a comprehensive analysis of superannuation and retirement benefits, primarily in Australia. Topics include: alternative superannuation arrangements, taxation and regulation of superannuation, risk management and investment strategies for superannuation, design of retirement benefits, the retirement decision, policy developments and controversies and international comparisons.

ACTL3100
Industrial Training 2 (Co-op)
Actuarial Studies Unit
UOC15  HPW3
Prerequisite/s: ACTL2100

Students study, in depth, the application of actuarial principles in an industry environment.

ACTL4000
Thesis (Actuarial Studies)
Actuarial Studies Unit
Enrolment requires school approval
UOC24  HPW6
Prerequisite/s: Admission to BCom Hons in Actuarial Studies

Honours students complete a thesis under the direction of a supervisor. The thesis requires the reporting of research in an approved topic area in actuarial studies including a literature review, analysis of a research problem along with presentation of research methods and data analysis.

ACTL4001
Actuarial Theory and Practice A
Actuarial Studies Unit
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: Admission to BCom Hons in Actuarial Studies

This course develops the theory and practice underlying the actuarial management of risk-based and other products offered by financial institutions. The course draws examples from actuarial practice and discusses implications for life insurance, general insurance, superannuation, asset-liability management and other areas where actuaries are involved in product design, pricing, reserving, investment and surplus management. The course emphasises recent developments in actuarial theory. This course, along with ACTL4002, corresponds to the Part II courses of the professional examinations of The Institute of Actuaries of Australia.

ACTL4002
Actuarial Theory & Practice B
Actuarial Studies Unit
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: Admission to BCom Hons in Actuarial Studies

This course, along with ACTL4001 Actuarial Theory and Practice A, develops the theory and practice underlying the actuarial management of risk-based and other products offered by financial institutions. The course draws examples from actuarial practice and discusses implications for life insurance, general insurance, superannuation, asset-liability management and other areas where actuaries are involved in product design, pricing, reserving, investment and surplus management. The course emphasises recent developments in actuarial theory. This course, along with ACTL4001, corresponds to the Part II courses of the professional examinations of The Institute of Actuaries of Australia.

ACTL4003
Research Topics in Actuarial Studies
Actuarial Studies Unit
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: Admission to BCom Hons in Actuarial Studies

This course is an advanced course in actuarial science covering selected topics in the areas of actuarial modelling in insurance risk, life insurance, superannuation and financial economics. The course will involve the study and discussion of current research papers and advanced texts of interest to research students. As part of the course, students will learn to develop a research topic, apply the methodology of scientific research and gain exposure to the presentation of research in actuarial journals.
AEO3400

Analysis of Aerospace Structures 1
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: MECH2412

Aerospace applications of plane frames and space structures. Open and closed section thin walled beams. Stresses due to torsion and shear in multiscell tubes. Wing and fuselage structures, ribs and bulkheads. Deflections. Structural instability, buckling of perfect and imperfect columns, bending and buckling of thin flat plates. Introduction to composite materials, sandwich panels.

AEO3610

Aerodynamics and Propulsion
School of Mechanical and Manufacturing Engineering
UOC6 HPW6
Prerequisite/s: MECH2612, MECH2712

Inviscid conservation relations. Potential flow source, sink, doublet and point vortex; superposition with uniform flow. Airfoil formation and Kutta condition. Two dimensional incompressible flows around thin airfoils. Incompressible flow about wings of finite span. Experimental techniques. Introduction to propulsion systems; history, types, basic thrust, efficiency equations, propellers, rotors and fans.
Space dynamics, exo-atmospheric vehicles, three body problem, orbit selection and prediction, tracking, maneuvering and rendezvous. Dynamics of space launchers, single stage and multi stage rockets, optimization and control. Dynamic stability and control of atmospheric and exo-atmospheric vehicles; dynamic response to the mission. Avionics and advanced aircraft systems; flight control, computer-aided vehicle management.

ANAT2111
Introductory Anatomy
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: BIOS1101, BIOS1201 or PHPH1502

Introduction to gross anatomy of the whole body, based on a study of prosected specimens. General topographical and systematic anatomy, musculoskeletal, cardiovascular, respiratory, gastrointestinal, genitourinary and nervous systems. This course is designed for students who wish to proceed to Level III studies, or a major, in Anatomy.

ANAT2210
Systems Histology
School of Medical Sciences
Enrolment requires school approval
UOC3 HPW3
Prerequisite/s: ANAT2200 or ANAT2511

The course includes the histological examination of the major body systems: cardiovascular, respiratory, lymphatic, integumentary, digestive, endocrine, urinary, reproductive, and nervous systems. Emphasis is on integrating the microscopic structure of organs with their function and with abnormalities, which occur in common disease processes.

Note/s: Enrolment in this course requires permission of the Head of the Department of Anatomy. This course will be discontinued in 2006.

ANAT2241
Histology: Basic and Systematic
School of Medical Sciences
UOC6 HPW6

The first half of this course provides an overview of the structure of mammalian cells and their organization into tissues. Topics include the use of the light microscope, the preparation of tissues and morphological examination of epithelium, glands, connective tissue (e.g. cartilage, bone, and blood), muscular, and nervous tissues. An emphasis will be placed on the recognition of cell types and the correlation of structure and function. The second half of the course deals with a histological examination of the major body systems namely cardiovascular, respiratory, lymphatic, integumentary, digestive, endocrine, urinary, reproductive, and special senses. Emphasis will be placed on integrating structure of a system with function. This whole course provides an excellent basis for the future study of pathological disorders.

ANAT2300
Vertebrate Development B
School of Medical Sciences
Enrolment requires school approval
UOC3 HPW3
Prerequisite/s: ANAT2300
Excluded: ANAT2341

The course will cover fetal development through to birth, including the developmental anatomy of the organ systems. The course will examine the common principles and differences that underlie normal and abnormal development of vertebrates; specifically, the roles of cell differentiation, proliferation and migration, target recognition, interaction in the nervous system, axial polarity, cell adhesion, cell fate and signalling. Emerging technologies such as genomic analysis and the use of transgenic and dysfunctional mouse mutants in research will be covered.

Note/s: Enrolment in this course requires the permission of the Head of the Department of Anatomy. This course will be discontinued in 2006.

ANAT2341
Embryology: Early and Systematic Development
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: ANAT2241
Excluded: ANAT2300, ANAT2310

The first half of this course introduces the morphological and molecular mechanisms of segmentation and patterning responsible for organizing the body plan in the embryo. Topics will include the molecular, genetic and cellular approaches to the study of human embryology using four main vertebrate systems: frog, fish, chick and mouse. The second half of this course will cover human fetal development through to birth, including the developmental anatomy of the organ systems. The course will examine the common principles and differences that underlie normal and abnormal development of vertebrates: specifically, the roles of cell differentiation, proliferation and migration, target recognition, interaction in the nervous system, axial polarity, cell adhesion, cell fate and signalling. Emerging technologies such as genomic analysis and the use of transgenic and dysfunctional mouse mutants in research will be covered.

ANAT2511
Fundamentals of Anatomy
School of Medical Sciences
UOC6 HPW6
Excluded: ANAT2111, ANAT2211, ANAT2200

This course provides an introduction to the fundamental principles of human structure. It includes an introduction to the histology of basic tissues; an overview of the functional anatomy of the major body systems; human development, growth and aging; human evolution; body imaging. This course is designed for students who do not plan to major in Anatomy. Students who achieve a credit level pass or better can use this course as a prerequisite for ANAT3411 Neuroanatomy or ANAT3121 Visceral Anatomy.

ANAT2600
Biological Anthropology A: The Primates
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: BIOS1101, BIOS1201
Excluded: ANAT2600

This course introduces the study of primate biology within an anthropological framework. It overviews the distinguishing features of the Order Primates, its anatomy, ecology and genetics. Primate diversity is considered through various approaches: by studying biological classifications and reconstructed evolutionary relationships, studies of primates at all taxonomic levels, via the complimentary lenses of evolutionary biology and palaeoanthropology, and by considering adaptations in anatomy and behaviour between and within major primate groups and their relationship to ecological variables. Primate behavioural, community and evolutionary ecology and conservation biology is examined. The place of humans within the order primates is an important component.

ANAT2611
Biological Anthropology B: Human Evolution
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: BIOS1101, BIOS1201
Excluded: ANAT2600

This course introduces the field of human evolution or palaeoanthropology from our earliest ancestors to the emergence of modern humans. It draws on evidence from anatomy, palaeoanthropology
and palaeontology, archaeology, genetics, ecology, evolutionary biology, and geology in reviewing evidence for our biological origins. Specific topics include the emergence of the human lineage, human physical and ecological adaptations, morphological and taxonomic diversity within the human lineage and controversies surrounding the classification of extinct humans, origins of human tool use, speech and language, stone tool industries as evidence for culture and cognition, possible drivers of human evolution and the emergence of our own species.

ANAT3121
Visceral Anatomy
School of Medical Sciences
UOC6 HPW5
Prerequisite/s: ANAT2111, excluded ANAT2151
A detailed study of the visceral system, including autonomic nervous system, head and neck regions, and the cardiovascular, respiratory, gastrointestinal, and genitourinary systems. Laboratory classes include clinical cases and surface and radiological anatomy.

ANAT3131
Functional Anatomy 1
School of Medical Sciences
UOC6 HPW4
Prerequisite/s: ANAT2111, excluded ANAT2151
Functional anatomy of the musculoskeletal system in the head, neck and upper limb, includes biomechanics of connective tissue; in particular bone, cartilage and tendon. Laboratory classes involve study of prospected specimens, X-rays and surface anatomy.

ANAT3141
Functional Anatomy 2
School of Medical Sciences
UOC6 HPW4
Prerequisite/s: ANAT3131
Functional anatomy of the musculoskeletal system in the trunk and lower limb. Includes functional aspects of muscle and a discussion of the mechanics and energetics of walking and running. Laboratory classes involve study of prospected specimens, X-rays and surface anatomy.

ANAT3231
Cell Biology
School of Medical Sciences
UOC6 HPW4
Prerequisite/s: ANAT2200
To develop an understanding of the anatomy and biology of the cell. Cell biology combines traditional anatomical methods with recent and molecular biology techniques. Key concepts will include developmental differentiation of the cell, its polarity, motility, cytoskeleton, signal transduction mechanisms, and outcomes. An introduction to concepts of cell and extracellular matrix interactions will also be covered. Session in which course will run to be determined.

ANAT3411
Neuroanatomy
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: ANAT2111 or a minimum of a credit in ANAT2511.
Provides an overview of the anatomical organisation of the central nervous system. Topics covered include: cytoarchitecture of brain and spinal cord; functional anatomy of sensory and motor systems and higher cerebral functions such as language and emotions; blood supply of the central nervous system; cerebrospinal fluid and meninges.

ANAT3421
Neuroscience Research Seminars
School of Medical Sciences
UOC6 HPW3
Prerequisite/s: ANAT3411 or PHPH3131
Focuses on selected areas of contemporary neuroscience research interest. Includes: brain development and axon guidance, peripheral nerve regeneration, spinal cord injury, pain pathways, central control of cardiovascular function, cortical plasticity, brain imaging, mechanisms of learning and memory, motor systems and the neuropathology of degenerative disorders. The course is organised in seminar format with discussion of original research papers. It is ideal for students considering to do Honours as it provides a background to current research problems and the opportunity to undertake a small project.

ANAT3601
Biological Anthropology C: Modern Humans
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: BIOS1101, BIOS1201
Excluded: ANAT2610
This course focuses on the study of biological aspects of living and recent prehistoric humans within an anthropological framework. It covers topics in recent human evolution and culture change, and human variation, especially in blood groups, stature, body proportions, pigmentation and hair form, the nature/nurture problem and the concept of race. Human growth, development and physique and their relationship to function, disease and behaviour in the present and past are examined. Human ecology and adaptability are studied by considering human biological responses to the physical environment, nutritional stress and infectious disease among living and prehistoric peoples and the present challenges of modernisation. The possible future course of human evolution is considered.

ANAT3611
Biological Anthropology D: Advanced topics and Research Skills
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: ANAT2600 and ANAT2610 or ANAT2601 and ANAT2611
This course explores in detail some of the major themes of biological anthropology introduced in ANAT2601 and ANAT2611. Topics focus on current issues in primatology and palaeoanthropology and may include primate sociology, evolutionary ecology and conservation biology, taxonomic diversity among living and fossil primates, especially in light of developments in molecular systematics, human and chimpanzee genome comparisons, defining the human genus and debates about the origins of modern humans. Students will also gain skills in scientific writing and research by undertaking a minor original research project. This course is compulsory for students planning to undertake Honours in the major Biological Anthropology.

ANAT4508
Anatomy 4
School of Medical Sciences
Enrolment requires school approval
UOC24
An Honours program consisting of the preparation of a research thesis and participation in School seminars.

ARCH1102
Architectural Design Workshop 1
Architecture Program
UOC8 HPW6
Exploration of the implications of precedents for design practice. Focus on the development of integrated design strategies and approaches responding to human needs, the natural environment and technical aspects of architecture. There will be an emphasis on the development of foundational knowledge and skills of research, critical analysis, conceptualisation, speculation and communication. Development and application of basic design principles. Critical reflections on students own design approaches and strategies. Detailed consideration of architectural elements, components, construction assemblies and environmental systems. Design of small-scale spaces and buildings, with simple programmatic requirements, to a basic level of integration. Predominantly individual work supported by peer-group activities. A series of studio-based design projects and assignments will be defined within tight programmatic limits, and resourced across selected aspects of the History and Theory, Technology and Communication streams to maximise possibilities of integration.

ARCH1121
Architectural History and Theory 1
Architecture Program
UOC4 HPW3
A general introduction emphasizing major thresholds in Western architectural history, with brief cross-cultural explorations of Asian architectural history. The key issues examined will include: geometric and iconographic order; the status and role of architectural designers and writers, methods of representation and reproduction involved in constructing and propagating architectural ideas, and 20th-century architecture in the context of developments in the visual arts generally. Assignments include exercises in writing short analytical texts and in typographic design.

ARCH1122 Architectural History and Theory 2
Architecture Program
UOC4 HPW3

A series of close examinations of key buildings and writings in 20th-century architecture of Western Europe, North America, Australia and Japan. A substantial proportion of the selected buildings will be small and medium-scale projects. They will be examined in terms of key concepts and issues, including: plan libre and rueamplan, designing in section, public and private, architecture and the media, architecture and the city, architecture and landscape, and cross-cultural interaction. Assignments include exercises in writing short analytical texts and in freehand drawing and typographic design.

ARCH1142 Communications 1
Architecture Program
UOC4 HPW3

This is a foundation course in developing capabilities in a broad range of architectural manual graphic communication skills, particularly architectural drawing and model making. Students are introduced to the various architectural drawing conventions, to freehand architectural drawing styles and media and to creative drawing as a means of analyzing and exploring architectural and design ideas. The course also teaches model making as a means of exploring the 3D resolution of spatial concepts and theories, and verbal skills through in-class presentations that teach the ability to intelligently talk about architectural ideas. Assessment is a mixture of exams, assignments and continuous assessment with a particular stress on in-class participation. Marks are based on each student's engagement with the problems, the development of specific skills, their creative engagement with the course content and willingness to push their envelope of knowledge. Project tasks are designed to be relevant to, complement and parallel other subject areas taught in first year, and to integrate the manual skills necessary to develop and communicate architectural ideas and designs intelligently, clearly and creatively.

ARCH1171 Architectural Technologies 1
Architecture Program
UOC9 HPW5

Specialists in environment, structures and construction describe the basic concepts of their fields. An introduction to concepts of social responsibility, environmental accountability and ecological sustainability. Implications for the urban/built and natural environments. Fundamentals of building physics, as they relate to the concepts of comfort and environmental control. Foundation is basically quantitative but assumes only basic numeracy skills. Introduction to basic structural behaviour and its relationship to construction, material and environmental aspects of design. Introduction to different ways of thinking about construction in relation to design practice. Investigation of the artificial nature and materiality of buildings. Outline of construction principles and their implications for the development of construction strategies in architectural design. Introduction to building material science; sustainable resource management and life cycle energy assessment.

ARCH1172 Architectural Technologies 2
Architecture Program
UOC8 HPW5

Environment: Thermal comfort and building climatology: perception and comfort; the body's responses; bioclimatic classification and traditional buildings. Solar geometry and control of sunlight. The building envelope: thermal performance; principles of heat transfer; solar radiation effects; absorptivity, reflectivity, conduction, thermal gradients; condensation and thermal insulation; degree day concept and prediction of heating requirements. Structures: Analysis of structural precedents in relation to human need and design practice. Outline of key structural behaviour concepts: loading - including load transfer, forces at supports and connections; resistance to loads - including stability, strength and stiffness; stress - including axial, shear, bending and deformation. Focus on basic linear structural elements and systems - including cable and arch, strut and column, beam, truss, frame. Concept and techniques of modelling, predicting and incorporating structural behaviour in design. Basic structural modelling techniques and problem solving tools - physical, graphical, numerical, computer-assisted. Introduction to basic statics, properties and strength of materials. Introduction to basic building physics. Implications for structural, constructional and environmental issues in design. Construction: Introduction to masonry and timber in design and construction with an emphasis on small to medium scale buildings. The basic physical properties, manufacturing processes, use and performance of masonry and timber. An introduction to construction documentation standards. Lecture material will be supported through associated projects in the Design Workshop program.

ARCH1201 Architectural Design Workshop 2
Architecture Program
UOC8 HPW6

Exploration of theoretical, tectonic and technological factors influencing design thinking and practice. An emphasis on critical and strategic skills of research and architectural speculation, directed to the development of useful implications for design practice. Detailed design of small to medium-scale spaces and architectural elements, components and construction assemblies, to a moderate level of integration. Individual and collaborative group-based work. A series of studio-based design projects and assignments will be defined within tight programmatic limits, and resourced across selected aspects of the History and Theory, Technology and Communications streams to maximise possibilities of integration. See ARCH1221, ARCH1271, ARCH1241.

ARCH1202 Architectural Design Workshop 3
Architecture Program
UOC8 HPW6
Prerequisite/s: BENV1101, ARCH1110; Corequisite/s: ARCH1222, ARCH1272, BENV1242.

Critical research and elaboration of strategic architectural design approaches responding to behavioural, technological and environmental issues. A focus on the implications of design contexts and environmental sustainability for the development of ethical and sustainable design practices and outcomes. Detailed design of medium-scale buildings, with simple programmatic requirements, to a moderate level of integration. Consideration and incorporation of construction assemblies and integrated environmental systems of medium complexity. Individual and collaborative group-based work. A series of studio-based design projects and assignments will be defined within tight thematic and technological limits, and resourced across selected aspects of the History and Theory, Technology and Communications streams to maximise possibilities of integration.

ARCH1221 Architectural History and Theory 3
Architecture Program
UOC4 HPW3

History: Nineteenth-Century architecture and the present. By interpreting certain nineteenth- and early twentieth-century issues and debates, this Module makes it possible to clarify and question contemporary beliefs and achievements, such as technological progress, imperial expansion and the division of labour (which has prevented the exploration of more substantial relationships between the human body and architecture). Lectures will also look to history to reconsider issues which demand contemporary attention, including ornament, decorum, anthropomorphism, empathy and memory. Rather than presenting a survey of nineteenth-century architecture, each lecture will focus on a single issue and explore it through the works of particular architects and writers. The relevance to our current debates will be spelt out. Material is presented as one- and/or two-hour lectures supplemented with readings and analyses of selected texts in architectural history and architectural theory.
ARCH1222
Architectural History and Theory 4
Architecture Program
UOC3  HPW2
Prerequisite/s: BENV1101, ARCH1121, ARCH1122, ARCH1222;
Corequisite/s: ARCH1202.

An introduction to the architecture of Asia with primary focus on India, China and Japan. Aspects of indigenous traditions as well as developments in the 20th century will be examined. Some attention will be given to materials relating to other countries of the region. The approach of the course is thematic. A range of key concepts, significant buildings and cities will be studied; for instance: the role of geometry, the rise of the modern profession of architecture, cross-cultural exchanges, colonialism, conservation and regionalism.

ARCH1241
Communications 2
Architecture Program
UOC3  HPW3
Prerequisite/s: ARCH1142, BENV1101.

Through the application of basic drawing, compositional, modelling and rendering practices developed in Communications 1, students will extend their ability in techniques of architectural representation. Opportunities will be provided for students to develop skills in model making, using materials such as cardboard, plastics and wood, and in rendering techniques, using a selection of media. Students will be encouraged to explore different compositional, modeling and media techniques and critique the implications of their application. Students will develop basic capabilities in professional drawing production and will be required to demonstrate their understanding of architectural drawing conventions and their application in rendering and presentation techniques. A series of well-defined group and individual projects will provide opportunities for students, in tutorial settings, to demonstrate their extended skill and technique development as well as their ability to critique different modes of architectural representation. Integral to the assessment process is the requirement that students provide written evaluation and feedback about their own and their peers completed tasks.

ARCH1271
Architectural Technologies 3
Architecture Program
UOC6  HPW4
Prerequisite/s: ARCH1171.

ARCH1272
Architectural Technologies 4
Architecture Program
UOC4  HPW3
Prerequisite/s: ARCH1172.

ARCH1282
Research Practice
Architecture Program
UOC3  HPW2

A core course which introduces students to basic empirical and interpretative research methods, and referencing requirements. Classes are by lecture and seminar. Assignments are designed to lead students through both theoretical and research in-the-field processes. Critical evaluations of the appropriateness of methodologies used and the value/meaningfulness of conclusions drawn are expected. This course is a prerequisite for Investigation Workshop (final year).

ARCH1301
Architectural Design Studio 1
Architecture Program
UOC8  HPW6
Prerequisite/s: ARCH1201, ARCH1202;
Corequisite/s: ARCH1321, ARCH1371, BENV1341.

Exploration of the implications of theoretical, historical, technological and environmental factors influencing design thinking, practices, outcomes and modes of representation. An emphasis on the integration of critical research, visualisation, modelling and the development of appropriate design strategies. Detailed design of medium-scale buildings, and medium to large-scale architectural spaces, to an intermediate level of integration. Consideration and incorporation of selected components, construction assemblies and integrated environmental systems of increasing complexity. Predominantly group-based work.

ARCH1302
Architectural Design Studio 2
Architecture Program
UOC9  HPW6
Prerequisite/s: ARCH1301.

Exploration of architectural design strategies responding to socio-cultural, tectonic, technological and environmental issues. Incorporation of legal and procedural parameters and constraints such as statutory planning and building codes. Detailed design of medium-scale buildings, with complex site and programmatic requirements, to an intermediate level of integration. Design of complex medium to large-scale architectural spaces, components, construction assemblies and integrated environmental systems. Predominantly individual work articulated in relation to collaborative group-based objectives. A selection of a series of studio-based design projects and assignments will be defined within tight theoretical, pragmatic and technological limits, and sourced across relevant stream areas to maximise possibilities of integration. Students may apply to carry out exchange studies with universities which have an agreement with UNSW. Any application should be made to the university and is at the discretion of the Head of Program (Architecture).

ARCH1321, ARCH1371, BENV1341.

Module 1: Theory: Design and human behaviour. This Module provides an understanding of behaviour-environment theory and its relevance to environmental design and raises questions concerning contemporary values and understandings in architecture. Lectures are presented on elementary behavioural theory, behavioural settings, personal space, territoriality, crowding, privacy, way-finding, place and place-making (genius loci), all of which are examined for their impact on architecture and planning. Aesthetic and functionalist ideas in architecture are cross-related with contemporary notions of meaning, community, identity and polity. Major architectural ideas and design approaches are subjected to scrutiny in light of behaviour-environment research techniques and findings. Material is presented as two-hour lectures supplemented with readings and analyses of selected texts in sociology, psychology, anthropology, environment-behaviour research and architectural theory. Module 2: Theory: Urban theory and practice. This Module deals with architecture and the city, especially as it relates to the nature of the design task. The objective is to bring students attention to our current understanding of urban design and the various roles architects have in shaping the city. Explicit in this analysis will be a redefinition of functionalism in architectural and urban design. Implicit in all designs, if not explicit, is some positive construct of the people imagined as users or participants in the work designed. Questions arise about the adequacy of our definitions and people-constructs, about the degree to which the facts can assist our projections for the future, and on whether
our modelling and imaging of life is sufficiently real. Critically evaluating the models we use enhances our creativity because it opens up possibilities that generally fall beyond the scope of our thoughts. Material is presented as two-hour lectures and supplemented by readings in urban theory, town-planning, architectural theory, and people-environment research.

ARCH1371
Architectural Technologies 5
Architecture Program
UOC4 HPW3
Prerequisite/s: ARCH1171, ARCH1172, ARCH1271.

ARCH1381
Professional Practice 1
Architecture Program
UOC3 HPW2

ARCH1382
Practicum
Architecture Program
UOC3 HPW2

This course is concerned with student preparation of a professional portfolio and the development of capabilities necessary for professional practice employment and academic study overseas. Topics in this component include writing letters of application, preparing resumes, interview and oral presentation techniques, working in teams, developing an understanding of your capabilities and strengths, practice ethics, working in cross cultural environments, negotiating, workplace issues and personal management skills. Students will receive instruction in documenting practice placement diaries and journals. A series of guest lectures and workshop activities will complement the assessable task, which is to complete a well-presented portfolio of student work. The second component of the course is concerned with an introduction to law and ethics relevant to architectural practice - including the architect-client agreement; agency and employment law; appointment of and liaison with consultants; professional codes of conduct; the Architects Act; land use controls; the Building Code of Australia; Local Government Act; Environmental Planning and Assessment Act and the Heritage Act.

ARCH1398
Research Project 1
Architecture Program
UOC6
Prerequisite/s: ARCH1282.

Introductory project on a topic area selected by the student in accordance with his or her field of specialization. This project provides the opportunity to practice research methods, planning, organising and conducting and documenting study in the chosen field. The topic must be approved by the Program Coordinator and the research supervised by an appropriate member of staff.

ARCH1399
Research Project 2
Architecture Program
UOC9
Prerequisite/s: ARCH1398.

Advanced project on a topic area selected by the student in accordance with his or her field of specialization. This project represents the culmination and integration of knowledge and skill gained in the student’s field of specialization, and should include social, environmental and ethical aspects. The research project report is to be presented in a thesis format and be supervised by an appropriate member of staff.

ARCH1401
Architectural Design Studio 3
Architecture Program
UOC9 HPW6
Prerequisite/s: ARCH1301, ARCH1302.

The design of medium to large-scale buildings and/or developments, with complex site and programmatic requirements, to a high level of integration. Emphasis on advanced integration of social, pragmatic, technological, urban and environmental aspects. Elaboration and management of implied conflicting issues and needs - including site constraints, planning controls and building regulations, cultural, behavioural, functional and technical issues. Conservation and heritage values pertaining to adaptive re-use. Individual and group project, articulated in relation to collaborative group-based objectives. A range of studio project options will be offered each session, each with a different focus. Projects will be further defined and resourced by each student through elective specializations selected from a range of advanced electives offered in the History and Theory, Communications and Technology Streams. Students may apply to carry out exchange studies with universities which have an agreement with the University of New South Wales. Any application should be made to the university and is at the discretion of the Head of Program (Architecture) UNSW.

ARCH1402
Architectural Design Studio 4
Architecture Program
UOC9 HPW6
Prerequisite/s: ARCH1301, ARCH1302, ARCH1401.

The design of medium to large-scale buildings and/or developments, with complex site and programmatic requirements, to a high level of integration. Emphasis on theoretical, technological and environmental aspects of the project. Elaboration and management of implied conflicting issues - including theoretical, technological and representational aspects. Individual and group work, articulated in relation to collaborative group-based objectives. A range of studio project options will be offered each session, each with a different focus. Projects will be further defined and resourced by each student through elective specializations selected from a range of advanced electives offered in the History and Theory, Communications and Technology Streams. Students may apply to carry out exchange studies with universities which have an agreement with the University of New South Wales. Any application should be made to the university and is at the discretion of the Head of Program (Architecture) UNSW.

ARCH1470
Building Services 1 & 2
Architecture Program
UOC6 HPW4
Prerequisite/s: ARCH1271, ARCH1272, ARCH1371.

Sources and distribution of water, wastes and energy supplies, application of electrical power, hydraulics, vertical transport, fire protection in buildings, security, telecommunications. Air conditioning, heating and ventilating of buildings. Equipment selection and space allocations for these services. Students will be able to undertake preliminary selection and sizing of systems, and to translate them into space and planning requirements for complex buildings. Assignments include tutorial projects and/or field investigations, and open book examination. The course requires students to have WebCT access.

ARCH1498
Honours Project 1
Architecture Program
Enrolment requires school approval
UOC24
Prerequisite/s: ARCH1399.

This project represents a major research-based investigation into a subject related to the student’s area of specialization. It should represent an original contribution to work in that area which demonstrates a high
level of scholarship and an understanding of good research methods. It can appropriately be seen as stage one of a two-part project linked to the second Honours project, but must be complete in and of itself. The work is to be closely supervised by a member of the academic staff. In rare occasions, permission may be sought from the Program Coordinators to have this project supervised by someone outside the University, but there must always be an internal co-supervisor in that event. The intended topic must be lodged as a fully-worked research proposal, and must be approved by the Program Coordinator prior to its commencement. The submitted work must be properly bound and will be assessed internally by at least two readers.

ARCH1499
Honours Project 2
Architecture Program
UOC24
Prerequisite/s: ARCH1498.

This project represents a major research-based investigation into a subject related to the student's area of specialization. It should represent an original contribution to work in that area which demonstrates a high level of scholarship and an understanding of good research methods. It can appropriately be seen as stage two of a two-part project linked to the first Honours project, but must be complete in and of itself. The work is to be closely supervised by a member of the academic staff. On rare occasions, permission may be sought from the Program Coordinator to have this project supervised by someone outside the University, but there must always be an internal co-supervisor in that event. The intended topic must be lodged as a fully-worked research proposal, and must be approved by the Program Coordinator prior to its commencement. The submitted work must be properly bound and will be assessed internally by at least two readers.

Note/s: Students must seek approval from Program Coordinator to enrol in this course.

ARCH1501
Investigation Workshop
Architecture Program
UOC9
Prerequisite/s: ARCH1282, ARCH1302, ARCH1371, ARCH1401, ARCH1402, ARCH1583.

Critical research, exploration and speculation, leading to the detailed definition of a proposal for an individual design project. An emphasis on the ethical and political dimensions of architectural practice as a public act. A focus on the integration of theoretical, socio-cultural, programmatic, technological and professional issues. Individual submissions developed within a collaborative and supportive peer-group environment. Proposals will be initiated, researched and elaborated by each student through elective specializations selected from a range of advanced electives offered in the History and Theory, Technology and Communications streams. Preparation of an investigative study and detailed conceptual and functional design brief, articulating the parameters, values, objectives, components and implications of the project. Communication of the proposal through seminars, concept drawings/models and investigative reports.

ARCH1502
Graduation Project
Architecture Program
UOC9
Prerequisite/s: ARCH1371, ARCH1501, ARCH1583.

Design development of the project defined in Investigation Workshop. Further elaboration of the project framework, content, criteria and parameters through elective specialization. Detailed resolution and presentation of the design to an advanced level of integration across all dimensions of the project: theoretical, historical, ethical, technological, environmental and professional. Individual submissions developed within a collaborative and supportive peer-group environment. Presentation of the project to peers, eminent critics and practitioners through various seminars, forums, and a high profile end of session graduate exhibition.

ARCH1582
Professional Practice 2
Architecture Program
UOC6
HPW4
Prerequisite/s: ARCH1371

Legal implications of architectural practice. Liabilities of architects. The architect/client agreement. Types of building contract and methods of building procurement. Tendering and negotiating. Contract administration procedures. Professional defensive measures and crisis management. Introduction to management theory. The structure and organization of an architectural office. Aspects of company and partnership law and insurance. Business principles and management procedures relevant to an architectural practice. The course will examine the production of architecture as a social event, it will analyse a series of explanations of the relationships between society and space and will look at both Asian and Western cultures as examples. The focus of this analysis will include issues such as: the role of economics and politics, urban administration, cultural difference, social theory etc, to architecture. This will be carried out by examining questions such as what is the relationship between architecture and urban politics? What part does architecture play in the political economy of cities? How does architecture as a commodity reflect commodity producing society as a whole? What basic social theories inform what we might call a social theory of architectural production? How do investors, developers, industrialists and others view architecture and building? What is the administrative environment for the production of architecture? (Government policy at national, regional and local levels, development planning, planning legislation, structure and local plans). How does architecture relate to the reproduction of culture - what theories of cultural production exist, and how do they interface with urban politics? What part does architecture play in the sustainability of cities and urban environments as a whole?

ARCH1583
Work Experience
Architecture Program
UOC24
Prerequisite/s: BENV1101, ARCH1102.

This course provides an opportunity for students to gain off-campus experience in the discipline and profession of Architecture. Each student is required to undertake twenty four weeks of activity with the minimum single period of approved activity being eight weeks. The preferred activity is to work under the supervision of a registered Chartered Architect for the twenty four week period. This period of activity must be undertaken outside the formal academic session. Students undertaking this activity during the academic session shall not be enrolled in any other courses. This course must be completed before commencing ARCH1501 - Investigation Workshop. For students to achieve a satisfactory assessment they must provide documented evidence of undertaking the preferred activity. Students have two options in providing evidence. Firstly, by using the accepted form of log-book provided by the Architects Accreditation Council of Australia or other professional bodies. Secondly, submitting a signed letter from their supervising registered Chartered Architect outlining the dates and period of time they were employed, their responsibilities and the activities / projects they have been engaged in. On completion of the course requirements students are required to submit the selected documentation to the Faculty Student Centre. Where students wish to undertake other activities such as an architectural study tour, employment on construction projects or other related architectural activity, a proposal must be submitted to the course authority for approval. Students are required to document these activities in accordance with guidelines issued by the Head of Program. The Faculty reserves the right to disallow any activities as meeting the requirements for this course, for which prior approval has not been sought and obtained in writing.

ARTS2000
Arts and Social Sciences Internship
School of Social Science and Policy
Enrolment requires school approval
UOC6
HPW3
Prerequisite/s: 36 units of credit

This practical workplace experience is accompanied by a reading program. The reading component examines different approaches to the study of organisations, their structures, functions and policies, and links these issues to the internship experience.

Note/s: Students must have achieved a credit level or better average across the courses in their degree.

ARTS3001
Censorship and Responsibility in the Performing Arts, Film, Literature and Media
School of English
UOC6
HPW3
Prerequisite/s: 48 units of credit; Excluded: THFI2020.
Investigates ethical issues in the production and reception of cultural works, including live performance, film and television programs, literature, popular music, advertising and the internet. Particular topics to be addressed include the moral responsibilities of production companies and media organisations, and the function and impact of regulation and legislation.

Note/s: Offered jointly by the Schools of English and Media, Film and Theatre.

ARTS3002
Making Histories and Historians: Ethics, Scholarship and Public Roles
School of History
UOC6 HPW3
Prerequisite/s: 48 units of credit

Introduces students to the social role, impact and responsibilities of historians. Seminars deal in a practical way with professional ethics; scholarly standards concerning bias, interpretation and plagiarism; the impact on these standards of new ideas of modernism; new methods and evidence in history and the ethical dilemmas these methods and procedures may raise; the use and abuse of history in public discourse and in education.

Note/s: Offered jointly by the School of History and the School of History and Philosophy of Science.

ARTS3005
Arts and Social Sciences Graduates in the Workplace: Ethical and Social Responsibility
School of Social Work
UOC6 HPW3
Prerequisite/s: 48 units of credit

Arts and Social Sciences graduates are employed in an enormous range of capacities throughout the workforce, where they are routinely called upon to exercise their ethical and social responsibilities. Combines orientational lectures from Faculty academic staff with presentations by graduates who discuss the nature and consequences of their university education, and issues of ethical and social responsibility from the perspective of their own workplace experience. Weekly seminars allow students to pursue in depth the issues raised by graduates' presentations and to relate these issues to the purposes and consequences of their educational experience at UNSW.

Note/s: Offered by the School of Social Work.

ARTS3007
East Asian Values and Identities
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: 48 units of credit

Introduces the recent stages in a discussion of values, which has accompanied East Asian awareness of an identity crisis for well over a century. This discussion has produced a new notion of East Asian business and work ethics and contributed to the formation of a new complex and controversial East Asian identity. The Confucian focus on self-discipline, family coherence, hierarchical order and social status will be contrasted with the traditional focus on health, preservation of life and energy, individual identity and integrity, and personal spontaneity. Analysis will be from an East Asian perspective.

Note/s: Offered jointly by the School of Modern Language Studies, the School of Philosophy and the School of Politics and International Relations.

ARTS3010
Feminist Thought and Action
Faculty of Arts and Social Sciences
UOC6 HPW3
Prerequisite/s: 48 units of credit

Addresses both general concerns and principles of Australian feminism and their application to a sample of specific issues involving personal and public life. Sets current feminist demands within the social context of past failures and achievements. Feminist questions provide the opportunity to examine the basis of conventional ethics and social responsibility. The feminist influence on academic discourse is also examined. Changes in subject content and tools of analysis will be explored. Students will be encouraged to examine their own educational experiences from a feminist perspective in order to extend their critical analysis skills.

Note/s: Offered jointly by the School of Sociology and the School of Social Work.

ASIA1001
Introduction to Contemporary Asia
Department of Chinese & Indonesian Studies
UOC6 HPW3

Deals historically with the great civilisations of Asia, and the transformations which produced modern Asian states. Topics include: religion, society, politics, economic and social conditions in contemporary China, Indonesia, Japan and Korea. Students will be encouraged to complete one major task on their country specialisation and one outside the specialisation.

ASIA1002
Introducing Southeast Asia
School of History
UOC6 HPW3
Prerequisite/s: Enrolment in Program 3424 or 4765;
Excluded: HIST1010

Introduces students to the history of the Southeast Asian region through a survey of the major eras from the classical civilisation of Angkor, Pagan and Borobodur up until the early twentieth century. Beginning with the religious and cultural traditions of Southeast Asia, kingship and power, pre-colonial society, colonial society and nationalist visions are explored. Analyses the ideas of nationalist figures like Jose Rizal and Sukarno, as well as peasant rebellions against colonialism and capitalism. The Philippines, Indonesia, Cambodia, Burma and Thailand receive particular attention.

ATAX0001
Basic Tax Law and Process
Board of Studies in Taxation
UOC6

This course provides insight into the Australian taxation system by exploring legal process. Early modules provide an introduction to the legal system illustrated mainly by reference to taxation. Later comes more intensive study of important income and deductions cases, which are thoroughly analysed to impart excellent case and statutory interpretation skills, as a foundation in all law studies. In addition, students gain substantive knowledge of the subject area. The final module places these substantive and legal process issues in the context of the policy of taxation. The course also covers the principles of good legal writing and effective legal research.

ATAX0002
Computer Information Systems
Board of Studies in Taxation
UOC6

This course aims to provide the student with an understanding of the content of information systems, the types of systems and their position in society and at an organisational level. It emphasises the growing interdependence between business strategy, rules and procedures on the one hand and information systems software, hardware, data and telecommunications on the other. This course addresses the importance of data and the structuring of data and seeks to provide an introduction to the systems development life cycle, design concepts, data analysis and models and data communications. In addition, this course presents the student with an overview of information systems in order to enable each student to fully understand the concepts involved in general systems development.

ATAX0003
Microeconomics and the Australian Tax System
Board of Studies in Taxation
UOC6

This course provides an introduction to basic microeconomic concepts and skills, and demonstrates their use in order to gain a clear understanding of economic problems and policy issues relevant to the Australian economy. It introduces students to the economic behaviour of small decision-making units such as households, firms and government agencies, with particular reference to the effects of taxation on markets.
Emphasis is placed on analytical skills and key concepts which are relevant to tax professionals including, for example, opportunity cost, market equilibrium, elasticity, substitution and income effects, tax incidence and efficiency costs of taxation.

**ATAX0004 Framework of Commercial Law**
Board of Studies in Taxation  
UOC6

This course deals with the basic principles of contract law, agency, misleading and deceptive conduct, cheques and bills of exchange. The course is a building block in the understanding of basic concepts of the enforceability of promises; it deals with the basic principles of misrepresentation, illegality and termination of contracts, and provides an introduction to statutory and equitable remedies applicable where contractual obligations have been broken.

**ATAX0005 Accounting 1**
Board of Studies in Taxation  
UOC6

This is the first course in a sequence of courses dealing with the profession and the practice of accounting and the literature associated with it. Students will be introduced to: the design of accounting information systems (classifications and chart of accounts, cash or accrual systems, concept and measurement selection, continuous or periodic recording); systems of accounting record (the accounting equation, document flows, accounts and ledgers, the double-entry systems, journals and subsidiary ledgers internal and accounting control); recording merchandising operations (sales, purchases, returns, allowances, receipts, payments, inventory effects); accounting for receivables and payables; inventories; and accounting for non-current assets.

**ATAX0006 Tax Administration**
Board of Studies in Taxation  
UOC6

This course examines the operation of tax institutions in Australia’s mass decision making process. It includes self-assessment and decision making in the bureaucracy, statutory review in the AAT and courts, the basics of administrative law and the Ombudsman’s role. It deals with rulings, information collection powers, powers to collect tax owing and impose penalties. It includes taxpayer protections like the Charter of Taxpayer Rights and Freedom of Information. The course emphasises a coherent, critical understanding of the decision making system and its practical administration.

**ATAX0008 Principles of Capital Gains Taxation**
Board of Studies in Taxation  
UOC6  
Prerequisite/s: ATAX0001

This course deals with Australia’s capital gains tax regime. The course begins with a study of the theory behind taxing capital gains and its place in the income tax base. This is followed by an examination of the background leading to the introduction of Australia’s first system for taxing capital gains and why that system was altered to our present system. The main features of the current legislation are then examined in detail, including its structure, main concepts and principal operative provisions. The course concludes with a look at the main concessions and exemptions available to individuals and small business.

**ATAX0009 Law of Companies, Trusts and Partnerships**
Board of Studies in Taxation  
UOC6  
Prerequisite/s: ATAX0001

This course deals with the law relating to these particular entities, with an emphasis on the principles that are important to their operation and organisation. In company law, the course covers such issues as legal personality, share and capital structure, company debt, directors’ duties, the enforceability of contracts with a company, insolvency and winding up. Trust law deals with the nature of a trust, the obligations and duties of trustees and the nature of a beneficiary’s interest in a trust, while partnership law covers the nature of a partnership and the rights and obligations of partners.

**ATAX0010 Accounting 2**
Board of Studies in Taxation  
UOC6  
Prerequisite/s: ATAX0005

This course is complementary to ATAX0005 Accounting 1, and completes the preparation of the financial reports using the Australian regulatory requirements. It examines the shareholders’ equity and liability section of the statement of financial position and the preparation of the statement of cash flows. Against this background, students prepare and analyse the general purpose financial reports prepared for the external users and examine the information and reports prepared for management decision making.

**ATAX0011 Macroeconomics, Government and the Economy**
Board of Studies in Taxation  
UOC6

Macroeconomics is the study of the entire economy and typically deals with policy issues of unemployment, business cycle, inflation/deflation, current account deficit, foreign debt and government deficits. These areas of study have been greatly influenced by the Keynesian revolution in the 1930s and subsequent developments in macroeconomic thought. This course provides students with an introduction to macroeconomic concepts and theory, with particular reference to the current macroeconomic issues and the role of the government in the Australian economy. In particular, it concentrates on the interaction of the taxing and spending of government with the wider economy.

**ATAX0013 Taxation of Companies, Trusts and Partnerships**
Board of Studies in Taxation  
UOC6  
Prerequisite/s: ATAX0009

This course deals with the taxation of companies, partnerships and trusts, the key structures for business and investment in Australia. This comparative treatment emphasises a coherent understanding of the tax structures and a critical appreciation of the reasons for them. The Ralph proposals for a unified entities regime highlight the divergences. The course deals with practical problems arising from concepts of legal personality (or the lack of it), dual tax at the entity and member level, including the various distribution rules and operations of company franking mechanisms. Students should have completed or be enrolled in ATAX0009 Law of Companies, Trusts and Partnerships.

**ATAX0014 Tax Policy Framework**
Board of Studies in Taxation  
UOC6  
Prerequisite/s: ATAX0003

This course is an introduction to tax policy making in Australia. The emphasis is on economic models. It covers relevant aspects of public finance and welfare economics. It examines choices between the public and private provision of goods, issues of fiscal federalism, constitutional constraints on the division of taxing powers and an evaluation of modes of decision making. A critical understanding of major issues is injected. This covers the justification for the public sector, the financing of the public sector, mainly by taxation, the consequences for the economy at the micro and macro levels arising from taxation and some specific tax reform issues.

**ATAX0015 Intermediate Financial Accounting**
Board of Studies in Taxation  
UOC6  
Prerequisite/s: ATAX0005, ATAX0010

This course is concerned with external financial reporting and, in particular, the accounting and reporting practices of listed companies. It is an issues based course where more complicated business transactions
and events are considered, as well as accounting problems in certain specific areas. The regulatory requirements for preparation of a set of company financial statements together with the continuous disclosure requirements and voluntary disclosures made by companies are examined. Alternative accounting practices and issues, and the choice of technique by different preparers of accounts are also examined. Emphasis is placed on the understanding of the theory of accounting and its development.

**ATAX0016**
**Critical Perspectives and Ethics**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0001

This course requires students to evaluate critically key aspects of Australia’s tax system especially relating to tax evasion and avoidance. It asks students to evaluate the ethical behaviour of participants in the tax system. It ensures that students understand the ethical rules of Australia’s leading professional accounting and legal bodies. It explores legal controls on professional actions and civil liability. It reviews why rules are obeyed and explores whether formal sanctions at the legal or professional level lead to ethical conduct. It concludes with an in-depth analysis of Australia’s specific and general anti-avoidance provisions.

**ATAX0017**
**Tax Accounting Systems**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0001, ATAX0005

The primary focus of the course is upon issues of timing. Earlier courses have concerned themselves with the question of what constitutes taxable income. Tax Accounting Systems moves the analysis to issues that are concerned with when. When should income be brought to account? When are deductions to be taken? In other words, the emphasis shifts to the basic question of how we achieve a fair reflex of the gain for a particular period. This course is intended to provide a practical analysis of the area of tax accounting in its broadest sense, and therefore also covers trading stock, depreciation and the Simplified Tax System.

**ATAX0018**
**Tax Litigation**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0001, ATAX0006

This course introduces the principles of civil procedure and evidence for taxation dispute resolution. It covers the commencement of proceedings, pre-trial procedures, the course of the trial, and the rules of evidence, in the particular context of Federal Court and Administrative Appeals Tribunal proceedings. This course also includes a skills component called Moot Court and Oral Communication. Students are required to present formal oral argument on a typical tax problem before a judicial style Tribunal. Student assessment is formal, based upon presentation and participation.

**ATAX0020**
**Introduction to Australian International Taxation**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0001, ATAX0009

This course is designed to provide a broad overview and understanding of the most important elements of Australian tax law as it affects international transactions. It includes analysis of: Australian residency for tax purposes; Australian source rules; the taxation of residents in respect of their foreign sourced income (including an overview of controlled foreign companies legislation); the taxation of non-residents in respect of their Australian sourced income; the operation of Australia’s double tax agreements; and the competing policy factors inherent in the design of an international tax regime.

**ATAX0022**
**Goods and Services Tax: Design and Structure**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0001

This course explores the conceptual and theoretical issues which have influenced how a GST/VAT finds implementation in practice around the world. Attention is given to how different goods and services are treated under the tax and how the tax is administered in practice. Issues such as the importance of planning by government and business for the successful operation of a GST and its compliance and administration costs are considered. Importantly, it explores conceptual issues arising during the transition from a tax like a Wholesale Sales Tax to a GST along with the management of the economic impact of introducing a GST.

**ATAX0023**
**Principles of Goods and Services Tax Law**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0001

The course works through all aspects of the GST law and looks briefly at the underlying policy implications of each area of the law. The object of this course is to provide conceptual and analytical knowledge of GST appropriate for the practical requirements of business, legal and accounting advisers working with GST on a regular basis. The course explores complex legislative and policy structures so that we acquire expert knowledge of what the law is meant to do, what it actually does and where problems arise. Recommended prior knowledge: Completion of ATAX0022 Goods and Services Tax: Design and Structure.

**ATAX0053**
**Accounting for Complex Structures and Instruments**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0015

This course is concerned with the accounting issues posed by complex financial transactions and organisational structures. It looks at the issues concerning the accounting for various extended entities, such as corporate groups, associated entities and joint venture arrangements. Other relevant accounting and reporting issues for large corporations are addressed such as segment reporting. Finally, complex issues such as accounting and reporting requirements for foreign currency transactions, off-shore operations, and financial instruments are addressed. Careful treatment of these issues is essential to fairly determine the income and financial position of particular business entities.

**ATAX0055**
**Taxation of Property Transactions**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0008, ATAX0023

Property transactions are one of the most common and significant dealings within most tax bases. This course examines all income tax, CGT, GST, land tax and stamp duty consequences of acquiring, holding, developing, building on, leasing, disposing of or otherwise dealing with land and buildings, including investment options such as property trusts and their structuring. Income tax considerations dealt with include property sale or development, financing, income recognition, rent, home offices, lease incentives and deductions. CGT, GST, land tax and stamp duty as applied to freehold, leasehold, residential and commercial property are considered, including their many special rules and concessions.

**ATAX0057**
**Business Finance**
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0003, ATAX0010, ATAX0058

Business Finance is an introductory course in financial management designed to meet the professional requirements of Australian accounting bodies and other objectives. It stresses the modern fundamentals of corporate financial decision making with special reference to investment, financing and dividend distribution decisions. Specific topics to be covered include: financial mathematics, security valuation, techniques for capital investment decisions, financial decision making under uncertainty, corporate capital structure, cost of capital, and dividend decision and policy. As students undertaking this course already will have acquired substantial tax knowledge, the course allows a student to
analyse the tax effects more deeply than a traditional undergraduate Business Finance course would dare. This tax analysis makes this a more practical than a normal introductory finance course. While the course can be taken as a terminating unit, its contents form the foundation for advanced studies in banking and finance such as funds management, international finance, banking, risk and insurance, electronic security trading, investment banking, electronic commerce, options and futures and derivatives. As the field of banking and finance is rapidly expanding, the foundation knowledge gained from this course opens up opportunities for further studies and/or employment in the domestic and global financial markets.

ATAX0058 Quantitative Analysis
Board of Studies in Taxation
UOC6
Quantitative Analysis is an introductory course in mathematical and statistical concepts and techniques with applications in commerce and taxation. This course will train students in essential quantitative skills and show how these skills can be used in formulating and solving a wide variety of problems in economics, accountancy, finance and taxation. In this course the application of mathematical and statistical methods are more than mere illustrations; they constitute an integral part of the course material. Quantitative Analysis is intended to be as comprehensive and self-sufficient as practicable. It introduces and develops ideas and techniques from the basic principles, assuming very little knowledge on students' part.

ATAX0059 Management Accounting
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0010
Management accounting systems are designed to provide managers in all types of organisations with information to assist them in decision making, planning and control. This course addresses how management accounting provides information to meet the organisation's and manager's compliance, control and competitive support needs. The goals of this course are to acquaint students with the fundamentals of management accounting, and to permit students to analyse the impact of choices that are made in the design, implementation and operation of management accounting systems.

ATAX0060 Auditing and Assurance Services
Board of Studies in Taxation
UOC6
Prerequisite/s: ATAX0015
This course examines the practice of auditing and the concepts which underlie the practice within the assurance framework. Although a large part of the course does cover the financial report audit, the other forms of audit are discussed. The course is intended to provide an overview of the audit process as it exists in Australia. The aims of the course are to develop students' understanding of the audit function; familiarise students with the professional, legal, commercial and regulatory constraints within which audits are carried out; and examine techniques used by auditors including risk analysis, evidence collection and evaluation, and audit reporting.

ATAX0065 Taxation of Trusts
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65
This course thoroughly explores issues relating to private trusts and describes those applicable to public trusts. It explains the nature of a trust and the differences between types of trusts. It critically examines the taxation of income of a trust. Thereafter it considers taxation of capital gains derived in the context of trusts, and the potential application of the special and general anti-avoidance provisions to trusts where they are used for purposes of income-splitting or income-diversion. Finally, there is discussion of the reforms to the taxation of trusts and their implications.

ATAX0607 Taxation of Corporate Finance
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65
The course deals with the fundamental building blocks, both theoretical and technical legal, of taxation of corporate finance. It focuses on debt finance but also covers aspects of equity financing. It provides thorough grounding in basic concepts like the time value of money, the deductibility of interest, and the debt/equity distinction. The course deals in depth with temporal apportionment, with taxation of discounted and deferred interest securities and with leasing finance. It introduces hybrid instruments and derivatives, which are explored in more depth in ATAX0321/0421 Taxation of Innovative Financial Products. This course complements ATAX0303/0403 Taxation of Corporations.

ATAX0610 Taxation of Superannuation
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65
The aim of this course is to provide students with a thorough understanding of the current taxation principles applicable to superannuation. There are taxation consequences involved in every aspect of superannuation. Thus, the course examines the taxation consequences for persons making contributions to superannuation funds. It then examines the taxation of superannuation funds themselves (both complying and non-complying funds) and, finally, it examines the taxation of benefits (both lump sums and pensions) paid by superannuation funds to their members. The course also examines the operation of the Superannuation Guarantee (Administration) Act 1992, which imposes a superannuation guarantee charge (a form of tax) on those employers who do not make the minimum superannuation contributions specified in that Act. Finally, the course provides an introduction to the provisions of the Superannuation Industry (Supervision) Act 1993.

ATAX0614 Selected Problems in Stamp Duty
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65
This course provides a general knowledge of Australian stamp duty, identifying the common themes and important areas of divergence across the various states. Students get time to focus on aspects of importance within their own jurisdiction. The course critically analyses the concepts behind stamp duties in Australia, covering the main rules and problem areas. The course examines stamp duty on conveyances, transfers of dutiable property, leases, transfers, dutiable transactions and trusts. Although the course has broad focus, stamp duty rules in New South Wales, Victoria, Western Australia and Queensland are specifically covered.

ATAX0615 Taxation of Industry and Technology
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65
The tax system is used to support industry through special incentives. Some target specific industries (primary production, mining and energy, films), some target sectors of the economy (small business), while others apply to industry generally (research and development, intellectual property). Modern modes of doing business, most notably the advent of e-commerce, also present problems in the traditional application of tax laws. This course covers special tax rules and incentives that apply to persons or entities operating in specific industries or sectors of the economy, including small business, as well as more general incentives to encourage inventiveness and increase competitiveness. Concentration is on productive sectors of the economy (as opposed to financial services).
and extends to taxation of ecommerce. Coverage includes a critical analysis of why special rules exist and the desirability and effectiveness of using the tax system to achieve government industry policy.

ATAX0625
Taxation of Employee Remuneration
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65

This course provides a comprehensive coverage of the taxation issues relating to the taxation of employee remuneration. The course commences by examining the employer/employee relationship, contrasting it with the principal/independent contractor relationship. Fringe benefits tax and tax collection obligations imposed on employers, including under PAYG and the payroll tax system, are considered in detail. Employers’ obligations and employees’ rights under the superannuation guarantee system are examined, as are the rules on the deductibility of superannuation contributions and the taxation of payments made on termination of employment. The course concludes with an examination of the rationale and tax consequences of salary packaging, and the ATO’s response to arrangements aimed at avoiding tax on payments for services performed.

ATAX0626
Taxation and Investment Regulation in China
Board of Studies in Taxation
UOC6
Prerequisite/s: 48 units of credit completed and a cumulative weighted average of at least 65

This course provides comprehensive coverage of the tax system and investment regulation in China. Students completing the course will obtain a thorough working knowledge of the practical operation of China’s tax and investment regulatory system in the context of common business, investment and employment activities. Topics covered include: The enterprise and individual income tax, private enterprise regulation, foreign investment regulation, the value added tax, the business tax, Chinese business vehicles including companies, double taxation agreements, incentives and special zones.

ATAX0921
Fieldwork Research Project
Board of Studies in Taxation
UOC6

This course must be completed within the session for which the student enrolls in that course and within two (2) calendar years of the end of the year in which the candidate completes the last program requirement for the Associate Diploma in Taxation other than ATAX0921 Fieldwork Research Project. (The Associate Diploma in Taxation is not available to students entering ATAX Programs in 2002 or later.)

ATS11002
Australia: Representations, Identities and Difference
Nura Gili (Indigenous Programs)
UOC6, HPW3
Excluded: AUST1001

A multidisciplinary study of Australian popular culture focusing on the nature of Australian identity. Examines film, television, newspapers, including fictional and non-fictional material (documentaries, biographies, autobiographies). Draws particularly but not exclusively on the way images of Aboriginals and of Australian women (both black and white) have been created.

ATS12001
Aboriginal Australia: The Pre-Colonial and Colonial Experience
Nura Gili (Indigenous Programs)
UOC6, HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2002, AUST2004, GEN5421, GEN5527

Examines pre-colonial and colonial Aboriginal Australia in areas such as social organisation, Indigenous knowledge and connections to country. The effects of European colonisation from policies of ‘protection’ through to those of ‘assimilation’ are explored. Also critically examines the legacy of colonisation and the continuing consequences of this history for contemporary society through the study of film, Indigenous languages, education and the archival record.

ATS12002
Aboriginal Australia: The Post-Colonial Experience
Nura Gili (Indigenous Programs)
UOC6, HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2003, AUST2005, GEN5421, GEN5526

Examines political and social constructs of contemporary Aboriginal Australia and the processes which have shaped them. Contemporary issues which affect Indigenous Australians, such as health, education, racism, land rights and law will be examined. The structural position of Aboriginal people within Australian society will be contextualised within the theory that colonialism is an ongoing experience for Aboriginal Australians. Considers the implications for the future of Aboriginal self-determination and reconciliation in relation to contemporary government initiatives.

ATS13001
Colonisation and Indigenous Identity Formation
Nura Gili (Indigenous Programs)
UOC6, HPW3
Prerequisite/s: 36 units of credit;
Excluded: SOCA3208, SOCC3701

Investigates the formation of contemporary Indigenous identities in the context of the ongoing colonisation of Australia. Explores the interplay between culture and identity and analyses the various historic and academic constructions of Aboriginality. The history of imposed colonial notions of Aboriginal identity and their consequences for both Aboriginal people and non-indigenous Australians are identified and examined. The use of contemporary media such as film, television, literature and art are examined as case studies in the analysis of contested identities.

ATS12002
Indigenous Australia: Gendered Identities
Nura Gili (Indigenous Programs)
UOC6, HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2012, SOCA3209, SOCC3717

Encourages students to engage in a critical analysis of the way in which gender influences and structures the experiences of Aboriginal women and men in the past and the present. A wide range of issues involving gender roles will be covered including land, art, activism, feminism, violence, race, and literature. Particular attention will be paid to colonial constructs of gender roles within Aboriginal communities. Aboriginal women’s and men’s roles in subverting the colonisation of their identities will be explored.

ATS13003
Cultural Heritage Management
Nura Gili (Indigenous Programs)
UOC6, HPW3
Prerequisite/s: 36 units of credit;
Excluded: HPS02881, SCTS3120

Over 40,000 years of human habitation has helped to shape Australia’s environment. Examines the policies and processes of managing both Aboriginal and non-Aboriginal (historical/European) ‘cultural heritage’. It will define the notion of ‘cultural heritage’ and examine to what extent the Australian environment may be defined as ‘natural’. Identities and examines the values attributed to cultural heritage items, sites and places by a variety of interest groups, and critically examines the legal, ethical and policy requirements which dictate management processes.

Note/s: Taught by Nura Gili (Indigenous Programs)

ATS13004
Aboriginal People and Social Work
Nura Gili (Indigenous Programs)
UOC6, HPW3
Prerequisite/s: 36 units of credit;
Excluded: SOCW2100
Examines the history and current legacy of colonisation and government policies for Indigenous Australians and their position in contemporary Australian society. Social movements and actions relevant to Indigenous Australians’ social experience will be discussed. Addresses in particular the skills social workers need to work with Indigenous clients and what role social work can play in progressing equity and social justice for Indigenous Australians.

ATSI1005
Whiteness Beyond Colour: Identity and Difference
Nura Gili (Indigenous Programs)
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: SOCA3210

Whiteness is generally assumed to be the norm in classifying difference. It is also assumed to be neutral. Delves into whiteness as a mode of identification and whether it can be assumed to be the norm as well as neutral. Topics include whiteness as Other, whiteness as a non-Indigenous identity, and whiteness in coloniser societies. Explorations of whiteness as a representation of oppression and as transformation will be addressed.

AUST1001
Australia: Representations, Identities and Difference
Nura Gili (Indigenous Programs)
UOC6 - HPW3
Excluded: ATSI1002

A multidisciplinary study of Australian popular culture focusing on the nature of Australian identity. Examines film, television, newspapers, including fictional and non-fictional material (documentaries, biographies, autobiographies). Draws particularly but not exclusively on the way images of Aborigines and of Australian women (both black and white) have been created.

AUST1003
Paradise Lost? Australian Environmental History
School of History
UOC6 - HPW3

How has the landscape shaped the definition of what it means to be Australian? Why was the bush so often seen as a place of the weird and the monstrous? Have white Australians learned from Aboriginal relationships with the natural environment? Looks at the climatic, cultural, political and economic forces which have shaped the Australian landscape from the period before known human settlement until the present, taking a dynamic approach to the relationship between humans and their environment. Draws on a broad range of disciplines, including literature, geography, history, politics, sociology and cultural studies.

AUST2004
Aboriginal Australia: The Pre-Colonial and Colonial Experience
Nura Gili (Indigenous Programs)
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: ATSI2001, AUST2002, GEN54521, GEN55527

Examines pre-colonial and colonial Aboriginal Australia in areas such as social organisation, Indigenous knowledge and connections to country. The effects of European colonisation from policies of ‘protection’ through to those of ‘assimilation’ are explored. Also critically examines the legacy of colonisation and the continuing consequences of this history for contemporary society through the study of film, Indigenous languages, education and the archival record.

AUST2005
Aboriginal Australia: The Post-Colonial Experience
Nura Gili (Indigenous Programs)
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: ATSI2002, AUST2003, GEN54521, GEN55526

Examines political and social constructs of contemporary Aboriginal Australia and the processes which have shaped them. Contemporary issues which affect Indigenous Australians, such as health, education, racism, land rights and law will be examined. The structural position of Aboriginal people within Australian society will be contextualised within the theory that colonialism is an ongoing experience for Aboriginal Australians. Considers the implications for the future of Aboriginal self-determination and reconciliation in relation to contemporary government initiatives.

AUST2006
Australian Playwriting
School of Theatre, Film and Dance
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: THST2164

A special study of the work of two or three contemporary Australian stage writers, taking into account critical and autobiographical material and specific production of key plays.

AUST2008
Firing Line: Australians at War
School of History
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: HIST2078

Examines the importance of the experience of war in shaping Australia; its contribution to definitions of nationality, ethnicity, citizenship, masculinity and femininity; the extent to which it has defined and/or redirected Australia’s relationships with her allies from the colonial period to Vietnam. Focuses on the battle zones and looks at the way that participants understood and represented the experience of war, drawing on literature and film, personal letters and diaries, reminiscences and oral interviews as well as official records. Includes an optional field trip to the Australian War Memorial in Canberra.

AUST2009
Australian Urban Environments
School of English
UOC6 - HPW4
Prerequisite/s: 36 units of credit;
Excluded: ENVS2020, GEOG2641

Examines human environments in Australia. Theoretical frameworks include political ecology, economic and poststructuralist geography. Begins by exploring ideologies of human-nature relations. Urban and natural landscapes, the built environment and planning principles are all considered as cultural constructions - as concepts linked to ideologies of human-nature relations. Considers environmental impacts of urbanisation, population growth and economic production that stem from different articulations of human-nature relations, and discusses forms of resistance, theories of environmental justice and participatory decision-making that seek to transform human-nature relations. Practical classes include field exercises and introductory Geographical Informations Systems (GIS) workshops.

AUST2010
Society and Environmental Process: Botany Bay
School of History and Philosophy of Science
UOC6 - HPW3
Prerequisite/s: HPS32500 or HPS32550 or SCTS2118 or SCTS3106;
Excluded: HPS32500, SCTS3013, SCTS3020, SCTS3126

Interprets the concept of the social construction of the environment in the specific context of Botany Bay and its region. Environmental issues are identified and examined in the light of historical, sociological, economic and political developments at the regional, national and global levels. Prospects and processes for intervention. In addition to other work, each student completes a substantial research project.

AUST2011
Australian Migration Issues
School of Sociology and Anthropology
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: SOCA3407, SOCI3614, GENT1209

An examination of racial, ethnic and social issues surrounding migration to Australia. Topics will be drawn from: an ecologically sustainable population; globalisation and international migration flows; brain drain
to and from Australia; multiculturalism; criteria in determining migration policy; settlement issues; skilled migrants; refugees, international aid and social justice; identity, ethnicity and community.

**AUST2012**  
Indigenous Australia: Gendered Identities  
School of History  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: ATS3002, SOCA3209, SOCC3717  

Encourages students to engage in a critical analysis of the way in which gender influences and structures the experiences of Aboriginal women and men in the past and present. A wide range of issues involving gender roles will be covered including land, art, activism, feminism, violence, race and literature. Particular attention will be paid to colonial constructs of gender roles within Aboriginal communities. Aboriginal women's and men's roles in subverting the colonisation of their identities will be explored.

**AUST2014**  
Twentieth-century Australian Literature  
School of English  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: ENGL2300  

An examination of some major post-colonial issues in Australian writing of the twentieth century.

**AUST2015**  
Contemporary Australian Women Writers  
School of English  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: ENGL3401  

Examines the particular concerns of a selection of contemporary Australian women novelists, poets and a short story writer. In the process asks whether women write from a different perspective, or have different concerns from their male counterparts in a culture that is generally considered to be male-dominated. Also considers the special question of women writing about the land.

**AUST2019**  
A Commonwealth for a Continent: Australia 1901-1949  
School of History  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HIST2027  

Major developments in Australian History in the period from Federation to the beginning of the Cold War. Themes include: Federation, White Australia policy, defence, foreign affairs, entertainment, federal-state relations, labour, World War I and its impact on society, women's rights, the experience of the Great Depression, the impact of World War II, Aboriginal people, work and politics.

**AUST2020**  
Australia since World War II  
School of History  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HIST2028  

Major developments in Australian Society since World War II. Topics include: immigration, religion, culture, government, education, comparative welfare history, external relations, women's experiences, media studies, Aboriginal culture and politics; the impact of the Vietnam war, tough times and the 1980s, Australia and America, sporting culture and Olympism, television and the media, Australia and Asia, and the emergence of the new commercial and communication systems of ‘the Information Age’.

**AUST2022**  
Urban Legends: The History of Sydney  
School of History  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HIST2100  

Explores Sydney’s dramatic transformation from a tiny preindustrial penal settlement to a sprawling city of over four million people by examining the interplay of natural, cultural and spatial histories in the broader context of urban history and historiography. Themes include Sydney’s environmental, Aboriginal, immigrant and gendered histories, ‘slums’ and suburbs, communities and sub-cultures, heritage and modernity, sex and food, the creation and impact of urban images.

**AUST2023**  
Regional Australia: Geographies of Uneven Development  
School of History  
UOC6 HPW4  
Prerequisite/s: 36 units of credit;  
Excluded: GEOH3641  

Key concepts and theories in regional economic geography. Theories of location and regional development, spatial interaction, uneven development, and structural change. Economic and regional problems in Australia. Field work, workshops and practical skills in regional and spatial analysis. Will be taught in Winter Session.

**AUST2024**  
Power and Policy in Australian Politics  
School of Politics and International Relations  
UOC6 HPW3  
Prerequisite/s: 36 units of credit  
Excluded: POLS2008  

The problems of administering government and the problems of decision-making in the modern State. Models of organisations are discussed, as are problems of participation and implementation. The role of the State and the impact of economic rationalism and managerialism are examined. Students may choose to participate in a parliamentary internship as a component of this course.

**AUST2026**  
Music of Aboriginal Australians  
School of Music and Music Education  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: GENT0501, all MUSC and MUSI courses  

A study of traditional and contemporary Aboriginal music in its social, historical and cultural contexts.

**AUST2028**  
Australian Cinema & Television  
School of Theatre, Film and Dance  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: FILM2002  

Traces the emergence and significance of Australian screen cultures. Studies the development of the Australian film industry, including analysis of the economic, social and political factors and the myths which have shaped the industry. Studies the role of television in shaping the experience of modern Australia and its place in the world. Looks at a number of of non-mainstream forms of audio-visual production in Australia.

**AUST2029**  
Cities: Experiencing Sydney  
School of Sociology and Anthropology  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SOCA2106, SOCC2703  

Focuses on experiences and representations of cities. It is concerned with how the city has become the archetypal site and sign of modernity, and with how spatiality is now central to how cities are lived and imagined. Looks at the city as the site of social transformation in the twentieth century and the tensions between order and disorder. Explores images of the city as the site of liberal and radical utopian dreams as well as the promise and disaster of cities. The changing landscapes of the city are investigated through examples such as streets, crowds, light/darkness, gardens, museums and shopping malls.
AUST2030
Approaches to Australian Art
School of English
UOC6 HPW3
Excluded: SAHT1213, SAHT2214

Introduces some of the preoccupations of Australian Art in the years since colonisation. Issues include: the notion of the artist as a recorder in the 19th century and a tourist in the 20th; the search for a ‘Great’ Australian artist; national identity and art; links between art and commerce; the idea of ‘modern’ in an Australian context; and attempts to place Australian art in an international context.

AUST2031
Transport, Land Use & Environment
School of English
UOC6 HPW6
Prerequisite/s: 36 units of credit;
Excluded: GEOG2071, GEOG3181, GEOG3671, GEOH3671

Introduction to the complex interactions between transport, land use and the environment in urban areas. Special focus on the long term environmental consequence of transport decisions. Introduction to the various methods used to analyse and predict the consequences of policy changes. Australian cities as case studies.

AUST2032
Environmental Impact Assessment
School of English
UOC6 HPW4
Prerequisite/s: 36 units of credit;
Excluded: GEOG3911, GEOH3911

AUST2034
Women and Men: Gender in Australia
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2108, HIST2034, HIST2035, HIST2104

Considers how gender relations shaped Australian society, culture and politics. Situates gender in relation to race, class, age, place and religion over 220 years of Australian history. Topics may include: frontier mythologies, Aboriginal experience and gender, gender and the Pacific frontier, gender and law, gender and the arts, gender and domestic ideology, gender and religion, gender and work, feminisms.

AUST4500
Combined Australian Studies Honours (Research) Full-Time
School of English
Enrolment requires school approval
UOC12
Prerequisite/s: 8 units of credit in AUST approved courses with an average of 65%, including AUST2004 or AUST2005.

Students must complete a seminar course chosen in consultation with the Coordinator of Australian Studies, a seminar in the student's major discipline and a thesis of 15,000 to 20,000 words supervised jointly between the Australian Studies program and the chosen discipline.

AUST4550
Combined Australian Studies Honours (Research) Part-Time
School of English
Enrolment requires school approval
UOC6
Prerequisite/s: 8 units of credit in AUST approved courses with an average of 65%, including AUST2004 or AUST2005.

Students must complete a seminar course chosen in consultation with the Coordinator of Australian Studies, a seminar in the student's major discipline and a thesis of 15,000 to 20,000 words supervised jointly between the Australian Studies program and the chosen discipline.

AVEN1310
Basic Mechanics
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

The course explains the basic concepts in statics and strength of materials including Newton's Laws, SI system of units, two dimensional force systems, moments and couples, equilibrium in two dimensions, stress, strain, stiffness and flexibility, analysis of bars, bending stress and measurement of strain, material properties, theories of failure and composite materials.

AVEN1910
Introduction to Aircraft Engineering
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

An explanation of how aircraft fly and how engineering technologies relate to the vehicle. Concepts and nomenclature relating to flight vehicles and the significance of aircraft configurations and flight systems.

AVEN2220
Aviation Engineering Experimentation 1
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

Exposure to the practical skills associated with aircraft maintenance conducted at the Aeroskills Centre at Padstow College of TAFE. Introduction to a workshop environment and practices including health and safety aspects. Development of respect for the skills of aircraft maintenance craftsmen.

AVEN2910
Aviation Technologies 1
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

AVEN2920
Aviation Technologies 2
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

Aircraft Propulsion - Elements of internal-combustion (piston) engine cycles, performance and operations, piston engine fuel systems, performance augmentation and engine condition monitoring, elements of propellers, basic propeller thrust equations, variable pitch propellers. Aircraft Performance - Flight environment, aircraft classifications, operational requirements, range, accelerated and unaccelerated flight manoeuvring and flight envelopes, energy height, power and wing loading.

AVEN2930
Aviation Technologies 3
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

AVEN3220
Aviation Engineering Experimentation 2
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

A selection of experiments from airframe analysis, flight mechanics, aircraft propulsion, aircraft systems and aerodynamics. Experiments will make use of the wind-tunnels, systems laboratories, engines laboratories and structural testing facilities in the Engineering Faculty.
This course provides a foundation for the range of courses provided from the BAv, and includes a general description of the aviation industry. Topics will be chosen from the main organisations and the regulatory environment; introductory aviation economics and management practices for airlines and airports, basic aeronautical knowledge including aircraft performance and operation, navigation; international and organisational cultures, human factors and aviation safety. This course will be taught in an interactive context, developing library research skills and written, oral and presentation communication skills.

AVIA1700
Aviation Safety Management 1
Department of Aviation
UOC3  HPW2
Excluded: AVIA2700, PROF2001

This course covers the use of quick access recorders for fleet performance monitoring, corporate structures for safety departments and accident/incident analysis. Safety auditing, emergency planning and in-flight security will also be studied.

AVIA1810
Aviation Security
Department of Aviation
UOC3  HPW4
Excluded: AVIA3703, AVIA3810

Misbehaviour, crime and terrorism provide a range of threats to aviation operations. This course covers the essential topics of threat assessment and management of those risks associated with the threats. Other topics include Regulatory responsibilities of sovereign states and the International Civil Aviation Organisation, and their impact on the practice of security in the various aviation sectors, including ground and air operations.

AVIA1850
Airport Management 1
Department of Aviation
UOC3  HPW4

This course provides an introduction to issues concerning management of an airport, including definitions of an airport's functions and facilities, describing the overall regulatory requirements, managing the airport as a business, managing the operations, both landside and airside, managing the development of an airport and consideration of community relations.

AVIA1900
Aviation Economics
Department of Aviation
UOC3  HPW4
Excluded: PROF2003

This course covers the economics of an airline and how the management of economic problems are analysed. Demand analysis and its relation with price and economic conditions covers revenue issues. Costs and supply are studied with reference to available airline costing information. The interaction of demand and supply are then studied and how airlines manage this aspect.

AVIA2003
Flying Training 2
Department of Aviation
UOC18  HPW12
Prerequisite/s: AVIA2003;

Ground training and associated theory for Stage 2 of the Bachelor of Aviation (Flying). Covering theory requirements for the issue of a Commercial Pilot Licence (CPL), Night Visual rating (NVFR) and multi-engine endorsement. This course encompasses ground training phases 6, 7 and 8 as detailed in the UNSW Manual of Flight Training, and the Civil Aviation Safety Authority's Day VFR syllabus (Aeroplane). Practical flight training to CPL is a highly recommended adjunct to this course.

Note/s: Restricted to Program 3980 Flying Stream.

AVIA3230
Aviation Systems and Avionics
School of Mechanical and Manufacturing Engineering
UOC3  HPW2

AVIA3420
Aircraft Maintenance
School of Mechanical and Manufacturing Engineering
UOC3  HPW2

AVIA3610
Aerodynamics, Stability and Control
School of Mechanical and Manufacturing Engineering
UOC3  HPW2

AVIA3710
Aircraft Propulsion
School of Mechanical and Manufacturing Engineering
UOC3  HPW2

AVIA3930
Aircraft Evaluation and Design Appraisal
School of Mechanical and Manufacturing Engineering
UOC3  HPW2

Evaluation of fitness for purpose, route matching, range load graphs, environmental constraints, indirect and direct and operating costs, maintenance requirements, fleet capacity, crew requirements, safety and reliability.

AVIA1002
Flying Training 1
Department of Aviation
UOC12  HPW8
Excluded: AVIA1000

Ground training and associated theory for Stage 1 of the Bachelor of Aviation (Flying). Covering theory requirements for the issue of a Private Pilot Licence (PPL) including pre-command theory, basic aeronautical knowledge, PPL theory and an introduction to Commercial Pilot Licence theory. This course encompasses ground training phases 1, 2, 3, 4 and 5 as detailed in the UNSW Manual of Flight Training, and the Civil Aviation Safety Authority's Day VFR syllabus (Aeroplane). Practical flight training to PPL is a highly recommended adjunct to this course.

Note/s: Restricted to Program 3980 Flying Stream.

AVIA1321
Foundations of Aviation
Department of Aviation
UOC6  HPW4
Excluded: AVIA1300
AVIA2110  
Aviation Human Factors 1  
Department of Aviation  
UOC3 HPW2  
Excluded: AVIA1100, PROF0102

This course deals with the effective use of all resources in the aviation decision making process with focus on the mechanism of communication within the hierarchy of the cockpit and the cabin. Evaluation of communication will focus on the impact of modern technology, changes in methods of communication, and the reduction in crew numbers.

AVIA2210  
Aviation Human Factors 2  
Department of Aviation  
UOC3 HPW2  
Prerequisite/s: AVIA1100 or AVIA2110 or AVIA2003  
Excluded: AVIA2100

The interrelationships between Captain and crew will be used to illustrate the principle of the hierarchy of command. Effective teamwork will be developed through negotiation of the principles of communications and effective decision management. This course will build on the principles illustrated in Aviation Human Factors 1.

AVIA2400  
Aviation Regulations 1  
Department of Aviation  
UOC3 HPW2  
Excluded: AVIA2403

Aviation Regulations 1 introduces the Laws and regulations under which an aviation operation functions. Beginning with regulatory authority and source, this course develops an understanding and awareness of both the direct operational aspects of regulations and the commercial considerations that they demand. The emphasis is that of routine implications of the Civil Aviation Act, Civil Aviation regulations and orders.

AVIA2500  
Airline Marketing  
Department of Aviation  
UOC3 HPW2

This course uses the classic approach to marketing management strategies but is mostly entirely focussed on how this is achieved in the industry. The approach is of a practical nature. The course studies airline market research, marketing strategy development, product development, pricing strategies and yield management, distribution and promotion strategies. The course encourages and emphasises current airline marketing behaviour as examples of the theory.

AVIA2700  
Aviation Safety Management 1  
Department of Aviation  
UOC3 HPW2  
Excluded: PROF2001

Topics covered include the use of quick access recorders for fleet performance monitoring, corporate structures for safety departments and accident/incident analysis. Safety auditing, emergency planning and in-flight security will be studied.

AVIA2800  
Management of General Aviation  
Department of Aviation  
UOC3 HPW2

This course covers a broad range of the management decisions faced by the airlines. This course introduces the aviation environment within which the airline management functions and makes economic decisions. Revenue issues are studied with demand analysis, and an airline's ability to manage price and to predict loads. The key elements of supply and cost are analysed by reference to available airline data. The final aspect studied is the combination of the demand and supply issues.

AVIA3004  
Advanced Flying Training  
Department of Aviation  
UOC24 HPW16  
Prerequisite/s: AVIA2003;  
Excluded: AVIA3000.

Ground training and associated theory for Stage 3 of the Bachelor of Aviation (Flying). Covering theory requirements for the issue of a Command Instrument Rating (CIR), Grade 3 Instructor Rating (QFI), an Air Transport Pilot Licence (ATPL), and multi-crew operations. This course encompasses ground training phases 9, 10, 11 and 12 as detailed in the UNSW Manual of Flight Training, and Civil Aviation Safety Authority's ATPL syllabus (Aeroplane). Practical flight training for CIR and QFI is a highly recommended adjunct to this course; students may also select from options of airline entry training or advanced aircraft endorsement in place of the QFI rating.

Note/s: Restricted to program 3980 Flying Stream.

AVIA3101  
Airline Management  
Department of Aviation  
UOC6 HPW4  
Prerequisite/s: AVIA1900, AVIA2003 or AVIA2400;  
Corequisite/s: AVIA2700;  
Excluded: AVIA3002.

This course considers the main facets of corporate airline management, and begins with airline organisational practice, management’s visions and objective setting. It proceeds with the main corporate processes of business planning, schedule planning, fleet planning and external relationships such as outsourcing. Financial aspects and global alliance matters are introduced.

AVIA3201  
Airline Resource Management  
Department of Aviation  
UOC6 HPW4  
Prerequisite/s: AVIA3101;  
Excluded: AVIA3002.

This course follows AVIA3101 and introduces management of airline activities at an operational level. Issues include engineering and maintenance, crew planning and scheduling, airport planning for airlines, operations control issues, emergency procedure management, and freight and punctuality management.

AVIA3300  
Air Traffic Management  
Department of Aviation  
UOC6 HPW4  
Excluded: AVIA1150, AVIA1110

This course is concerned with the history, development and practical application of Air Traffic Services and their relationship to the commercial and regulatory aspects of commercial aviation. The topics are focussed on both operational and administrative structures within the industry. Emphasis is placed on the role of ATS from the perspective of a service provider. Topics include ATC history, structure, legal aspects and implications. Other significant aspects include communications, safety, noise abatement and the development of future systems.

AVIA3400  
Aviation Regulations 2  
Department of Aviation  
UOC3 HPW2  
Prerequisite/s: AVIA2400;  
Excluded: AVIA2413.

Aviation Regulations 2 builds on the fundamental concepts introduced in Aviation Regulations 1. The emphasis of this course is the legal ramification for pilots and operations managers imposed by the Civil Aviation Act and associated regulations. Specific case studies will form a large part of this course.

AVIA3600  
Simulations Applications  
Department of Aviation  
UOC3 HPW2  
Excluded: AVIA2603

Note/s: Restricted to program 3980 Flying Stream.
This course addresses the broad application of simulation to the aviation industry. While the emphasis will be on aircraft simulations, aspects of operations systems simulations will also be covered. The perspective of this course will be that of end user application, particularly from management and training of human resource basis.

AVIA3710
Aviation Safety Management 2
Department of Aviation
UOC6  HPW4
Prerequisite/s: AVIA2700;
Excluded: PROF3001, AVIA3700.

The course develops the knowledge of aviation safety, which has been gained by students in both Aviation Safety Management 1, and Aviation Human Factors lectures. It will emphasise the development of analytical research skills for the investigation of aviation safety occurrences and problems. The course will cover the development of research and report writing skills in the context of air transport safety, and contemporary aviation safety issues with specific reference to technical, human and organisational factors. Each student will be required to undertake a structured, supervised research project on an aviation safety issue to be agreed with the lecturer-in-charge.

AVIA3800
Management of Regional Airlines
Department of Aviation
UOC3  HPW2

A further development to AVIA2800, this course will provide students with the information pertinent to business and corporate operations with the regional airlines sectors of the industry. Aspects covered include requirements for low capacity airlines AOCs and current state and national requirements for such operations.

AVIA3851
Airport Management 2
Department of Aviation
UOC6  HPW4
Prerequisite/s: AVIA1850

This course follows AVIA1850 and provides an in-depth coverage of the key elements outlined in Airport Management 1. Issues include the regulatory environment, including licensing and obligations, an evaluation of various ownership models, the economics of running the airport as a business, including costs, revenues, subsidies and performance indicators, client relations and services, and general airport administration. Airside operations include practical operational requirements as well as necessary documentation. Other planning issues include managing terminal and landside operations, emergency and crisis management, infrastructure development, socio-economic impacts on the community, and environmental impacts.

AVIA4001
Aviation Honours - Full Time
Department of Aviation
Enrolment requires school approval
UOC24

This course introduces students to major research areas through a course of advanced lectures and a major research thesis of 20,000 words. Through the taught component of this course, students will critically examine academic and industry developments within aviation with particular emphasis towards the chosen area of their thesis. The research thesis will examine an area of research significance as approved by the Head of Department.

AVIA4002
Aviation Honours - Part Time
Department of Aviation
Enrolment requires school approval
UOC48

Undertaken over two years, this course introduces students to major research areas through a course of advanced lectures and a major research thesis of 20,000 words. Through the taught component of this course, students will critically examine academic and industry developments within aviation with particular emphasis towards the chosen area of their thesis. The research thesis will examine an area of research significance as approved by the Head of School.

BEESS0005
BEES Internship Study Abroad Program
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6
Note/s: Individually designed project course available only to overseas students

BEESS0006
Special Program in Biological, Earth and Environmental Sciences - Undergraduate 6 units of credit
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6
Note/s: Individually designed project course generally available only to overseas students.

BEESS0007
Special Program in BEES 12UOC
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12
Note/s: Individually designed project courses generally available only to overseas students.

BEESS0008
Special Program UG in BEES 18UOC
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC18
Note/s: Individually designed project courses generally available only to overseas students.

BEESS2041
Data Analysis for Life and Earth Sciences
School of Biological, Earth & Environ Sciences
UOC6  HPW5
Excluded: BIOS2041, SLSP2001, GEOG2101, MATH2801, MATH2829, MATH2831, MATH2839, MATH2841, MATH2859, MATH2899, MATH2901, MATH2931, ECON2241

BEESS4511
Professional Skills
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6  HPW4

The course provides training in skills needed for the Honours project and any subsequent degree as well as in outside employment. Principal topics covered include occupation health and safety, presentation skills (written, oral and audiovisual including computer-aided presentations), professional ethics and issues of scientific fraud, database and library usage, information retrieval, overview of quantitative skills, as well as more specific research or professional skills which may be tailored to particular interest groups.
This course develops an understanding of solar efficient architecture and builds on this to develop skills in energy performance simulation. House energy performance rating is fast becoming an essential requirement for building applications and this requires specific skills. It targets core areas of efficiency in space heating and cooling and lighting design. Material is presented as lectures and seminars, supplemented with readings.

**BENV1073**

**Sustainable Design and Practice**
Faculty of the Built Environment
UOC6 HPW3
Prerequisite/s: ARCH1371

This course develops a greater focus on holistic and sustainable approaches to design. Issues such as demand and supply of energy and water, and the generation of waste, will be covered. Principles of Reduce, Reuse and Recycle will be reiterated. Predominant emphasis will be on practical strategies directly applicable in design. Material is presented as lectures and seminars.

**BENV1074**

**Conceptual Structural Design**
Architecture Program
UOC6 HPW3
Prerequisite/s: ARCH1371

Conceptual structural design of wide-span single storey structures. Conceptual design process selectively applied to bridges, halls for assembly, industry, exhibition and sports. Emphasis on complex lightweight systems - including surface, spatial and hybrid structures with cables, membranes, grid shells and transparent enclosures. Integration of constructional and structural issues related to design, manufacture and building processes. Material is presented as lectures and seminars, supplemented with readings in architectural history and theory.

**BENV1075**

**Structural Systems: Advanced**
Architecture Program
UOC6 HPW3
Prerequisite/s: ARCH1371

This course builds on prerequisite courses by considering in more detail the conception, analysis, design, and construction of more sophisticated structural systems, like shells and grid shells, space frames, cables, membranes, tall buildings and towers, prestressed structures, as well as more refined aspects of conventional material, systems and loading environments. It also considers the wider question of the role of structural engineering in architecture and its integration with other engineering disciplines, mainly through case studies. Material is presented as lectures and seminars, supplemented with readings in architectural history and theory.

**BENV1101**

**Design Fundamentals: Studio 1**
Faculty of the Built Environment
UOC8 HPW7

Introduction to design as fundamental to coherent thought and action in your discipline. Exploration of the influences on design thinking and practice, including the philosophical, historical, social and environmental precedent studies. Critical thinking and expression in different forms. Studio projects and assignments to develop skills and understanding of design elements and principles. Introduction to a basic vocabulary of representation techniques used by designers to facilitate the development and communication of design ideas including; colour, freehand drawing, sketching, painting, construction, mixed media, desktop publishing, photomontage techniques, technical drawing and drafting.

*Note/s:* BArch and BScArch students must take this course concurrently with ARCH1121, BENV1141 and ARCH1171.

**BENV1141**

**Computers and Information Technology**
Faculty of the Built Environment
UOC3 HPW3

This course explores the use of industry-standard multimedia authoring tool to develop design presentations. Students will develop skills in the integration of media objects including; edited scanned images, rendered images (produced using CAD technology), line drawings, animations (produced using CAD), video (captured off VHS) and sound. Students will be expected to apply these skills in a preliminary learning task and then in the production of one major design presentation.

**BENV1072**

**Design for Energy Efficiency**
Architecture Program
UOC6 HPW3
An introduction to the technology of computing and information technology as it pertains to the disciplines of the built environment. The computer is presented as a tool for storing and manipulating information by means of application programs which model the real world needs and activities of professionals in these disciplines. Topics include basic operation of a computer, information handling, networks and communications, computer graphics, CAD technology and computational processes. Students engage in weekly hands-on computer exercises to provide knowledge and experience in the use of applications commonly used in their own discipline. Assessment is based on participation in the hands-on work, some written assignments and tests.

BENV1242
Computer-Aided Design
Faculty of the Built Environment
UOC3  HPW3

An exploration of the variety of CAD and graphic tools available for modelling, understanding and presenting design proposals. This course has dual objectives to build skills and confidence in the operation of CAD and related graphic systems, while developing a deep understanding of the unique opportunities offered by computer-based modelling technologies. Applications explored include 2D and 3D CAD, simple visualisation, image editing and composition, and the crossovers possible between these various techniques. Conceptual modelling techniques and their relevance to the design disciplines will be discussed. Weekly one-hour lectures are supported by discipline-focused laboratory classes where students gain hands-on experience in the use of a variety graphic applications. Assessment is based on satisfactory participation and the completion of staged CAD-based tasks.

BENV1341
Design Modelling and Visualisation
Faculty of the Built Environment
UOC3  HPW3

An exploration of computer graphic techniques for visualising design proposals. Information can be found on the Internet Web Page: http://www.fbe.unsw.edu.au/courses/benv/1341/ The lectures cover the principles and techniques of 3D visualisation including lighting, reflection, transparency, surface shading, texture mapping and depth cues. Laboratory-based exercises explore these different techniques, along with a variety of presentation techniques such as rendered images, image editing, animation, Quicktime VR and VRML. Assessment is based on the earlier staged learning exercises and one major design presentation project.

BENV1382
Social Responsibility and Professional Ethics
Building Construction Management Program
UOC3  HPW2

Issues of social responsibility and professional ethics explored via the analysis of case studies, seminars, discussion and debate.

BENV1404
Workshop Construction
Faculty of the Built Environment
UOC6  HPW4
Prerequisite/s: ARCH1302.

Introduction to woodworking and metalworking workshops, processes, techniques and safety. Design development, detailing and preparation of working and shop drawings. Experience with hand tools, portable tools, wood and metal working equipment, in a supervised workshop environment at the UNSW Randwick campus. Weekly 4 hour workshop sessions, followed by 3 full days during the mid year recess.

BENV2101
Adaptive Re-Use
Interior Architecture Program
UOC3  HPW2

An examination of the trend to find new uses for existing buildings rather than demolish and rebuild. Issues of conservation, preservation and heritage value of buildings; the role of other interested parties (media, community groups) in determining options for re-use. The course will address such issues as: surveying and assessing buildings for their suitability for adaptive re-use; measuring adaptive re-use in terms of environmentally sustainable design (ESD); assessing building forms and finding suitable compatible new functions; working within the Burra Charter; building conservation techniques; writing a “Heritage Conservation Report”. Case studies selected from recent local examples of adaptive re-use. A design exercise involving adaptive re-use.

BENV2103
Environmental Planning
Landscape Architecture Program
UOC3  HPW2

Students will be introduced to broad concepts and issues related to environmental planning at the local, state and national levels, through readings, lectures and case studies. They will become familiar with basic methods and techniques of resource data collection and analysis, leading to sound decision making for sustainability.

BENV2106
Landscape Design 9: Integrated Studio
Landscape Architecture Program
UOC6  HPW6
Prerequisite/s: LAND1302

Investigation of the relationship between design and contemporary landscape theory through a series of critical design projects at site planning scale. After the first half of the session, students in programs other than landscape architecture choose to complete this course by joining either LAND1201 or LAND1301.

BENV2107
Landscape Design 10: Elective Studio
Landscape Architecture Program
UOC9  HPW6
Prerequisite/s: LAND1302 or ARCH1202 or IDES2162

This elective will develop an understanding of traditional building materials such as stone, copper, zinc, iron, steel, slate, timber, glass and concrete. Students will visit a stoneyard, a blacksmith’s workshop, a copper workshop and learn techniques from traditional craftspeople. Skills in paint analysis and traditional painting methods will be taught. Students will prepare a study of a traditional building material, examining its history, manufacture, current use and conservation.

BENV2112
Landscape Design for Well Being
Landscape Architecture Program
UOC6

This course will explore restorative and therapeutic landscapes for a variety of settings and client groups, eg hospitals, hospices and special care facilities. A design project for a specific site and client will be carried out following lectures and site visits with visiting practitioners.

BENV2114
International Design Study Experience
Industrial Design Program
UOC3

This elective aims to introduce students to the international design world through a project that will culminate in participation in a major European design exhibition. Students will discover the complexities of mounting and operating a substantial exhibition including construction, transport, publicity and administration. They will gain experience in managing and working within a team as well as having to consult with industry. Some students will have the opportunity to represent the team at the
exhibition. After completion of this course students will have a greater knowledge and understanding of design companies and manufacturers who are successfully producing and selling internationally. Entry to this course will be by selection - expressions of interest will be invited when the course is offered.

BENV2117 Visual Resource Analysis & Management
Landscape Architecture Program
UOC3

Understanding the issues related to visual or scenic quality to develop a means to assign them value in the planning and design process. This elective course will be taught in an intensive five-day format combining lectures, discussions, presentations of case studies and site visits with practical exercises. Topics to be covered will include: the aesthetic experience of landscape; inventory and assessment of visual resources; aesthetic consideration in the planning/design process; theoretical foundations in visual resource management and visualisation techniques.

BENV2121 Introduction to Classical Design Principles
Faculty of the Built Environment
UOC6 HPW3

Prerequisite/s: ARCH1201 or ARCH1202

This course provides an appreciation of the classical foundations of western architectural tradition connected to practical skills and knowledge in manipulating classical principles to produce an original design. Lectures cover classicism from ancient Greece to the present and seminars include freehand sketching, a field excursion to a classical building and the design of a hypothetical classical project. Assessment by projects.

BENV2122 Modelling Sustainable Design
Faculty of the Built Environment
UOC6 HPW3

The degree to which a building is ‘sustainable’ is the subject of much debate. This course contributes to understanding how to best approach issues of sustainability in architectural design. One approach is to set a range of agreed ecological indicators and to assess the design against these and other similar buildings. Conducting such an assessment is increasingly being demanded of architects by local, state and national regulatory authorities and clients prior to development approval and construction. Architects are required to provide an accurate and quantifiable assessment of the environmental credentials of their design proposals. This assessment should be inclusive of the aesthetic intentions of the design without resorting to generic ESD solutions. This course is concerned with exploring opportunities provided by the environmentally sustainable credentials of a design proposal to generate architectural ideas that inform design thinking and practices. This course will allow students to assess a previous studio design proposal in terms of thermal performance, energy used in manufacturing of materials, the ability of the building to be self sufficient for its resource requirements and waste reduction. Design assessment will be conducted using spreadsheets, the Ecotect simulation program, Aiair, Radiance and/or LCAid, life cycle assessment software. Interaction between the design modifications made as a result of the assessment process and the original design will be explored and documented using CAD. Course material will be presented as lectures (in the computing lab) and on line technical tutorials. Students are expected to undertake the tutorials independently so that allocated lab hours can be used effectively. There will be 3 assessment tasks requiring students to undertake individual and groupwork. This course is open to Architecture students who wish to explore the nexus between environmental sustainability and informed architectural design.

BENV2125 Photovoltaics in the Built Environment
Architecture Program
UOC6 HPW3

The use of PV as an integral part of a building structure is one of the fastest growing PV markets world-wide. This course will examine the architectural and engineering aspects of using PV as a building material. It will include building performance requisites, active and passive solar design principles, planning requirements, co-ordination between electrical and building trades, system maintenance and monitoring. In particular, the course will cover techniques for integration of PV in design (shape, size, orientation, colour), mechanical systems (especially multi-functional elements), electrical systems (grid connection and/or direct use) and building operation, control and maintenance. Students will receive practical experience through field trips and laboratory experiments. The course is run jointly with the Photovoltaics Research Centre.

BENV2126 Re-thinking Rome
Architecture Program
UOC6

This course will involve analysis of the urban fabric of Rome through sketching and measured drawing, and design for the adaptive re-use of some historical monuments, or modernist buildings in the centre of the city. This course will take place in Rome. Students will need to self fund their travel arrangements in co-ordination with the Head of the Architecture Program.

BENV2201 Twentieth-century Australian Architecture
Architecture Program
UOC3 HPW2

Detailed study of the theories and work of selected Australian architects. Issues of nationality and nationalism will be addressed as well as those of criticism in the architectural presses. Readings will be selected related to various twentieth century architects. They will include works of criticism as well as explanatory texts. One architect will be studied each week and readings will address one particular issue relevant to the architect’s theoretical position. Material is presented as lectures or seminars.

BENV2203 Introduction to 20th - century Japanese Architecture
Architecture Program
UOC6 HPW3

The course examines a cross-section of significant movements and practitioners in contemporary Japanese architecture. Material is considered from the point of view of “interaction”, and the cross-fertilization which takes place in a global setting. The intention of the course is to present this material from a Japanese critical perspective with an eye to gaining an understanding of different modes of cross-cultural encounter. The course offers an introduction to relevant and contemporary work, and promotes critical engagement with the implications of globalization and difference. Architects studied include Ando, Seijima, Yamamoto, Takasaki, Takamatsu and others. Material is presented as electronic seminars.

BENV2205 Classical Architecture
Architecture Program
UOC3 HPW2

Exploring the origins, vocabulary and grammar of the Classical Orders and their application in Greek and Roman architecture, in the Renaissance and the Baroque periods, through Academism and Neo-Classicism to the resurgence of Classical ideals in the twentieth century. Material is presented in both lecture and seminar format.

BENV2206 Theory of Form
Architecture Program
UOC3 HPW2

The ontological basis and the antinomical qualities of form in the causal sense, reflected in nature, art and architecture. Practical investigation of the antinomical qualities of form with special emphasis on the brief and on the built fabric of contemporary architecture, and practical; attempts to identify shortcomings and develop corrective measures. Material is presented mainly as two-hour lectures and occasional tutorials comprising practical projects focusing on selected case studies.
BENV2209
Theorising Architectural Practices
Faculty of the Built Environment
UOC6  HPW3

The notion of theory as a conceptual setting for strategic design practices. Reading theory and architectural design as parallel and critical practices are examined for theorising practice and practicing theory. The implications and efficacy of theoretical contexts and thematics for various aspects of architectural design practice - including design processes and tactics; community, gender, culture and ethics; spatial and temporal articulation; technology, materiality, and assemblage. Studies and readings of selected texts in philosophy, cultural studies and fiction - as well as architectural theories and precedents. Material is presented as lectures and seminars.

BENV2211
Criticism and Evaluation
Architecture Program
UOC6  HPW3

Architectural criticism is as much about a discourse of ideas as it is about the attempt to clarify for the writer and reader the successes and failures of a particular built environment. The purpose of this course is to encourage students to think critically about the nature of criticism, particularly as it is affected by broader cultural criteria. Can criticisms give us useful information about a building's functional and symbolic achievements and its capacity to enhance the environment? What might a built environment and critique of it tell us about our society, about the values endorsed by the critic, and about our own criteria for excellence? How have visual artists engaged in critiques about the built environment? It seems that no two critics agree on the criteria for evaluating the built environment and it is anticipated that in the classroom evaluative criteria will be equally contested. For an informed discussion to take place it is necessary to know the current literature and debates. A bibliography has been prepared from which approximately two items have been selected as recommended reading for each class. All students are expected to have read something for each class and to substantiate their claims by keeping a critical diary of all items read. Material is presented as two-hour seminars in which all students are expected to participate actively. Assessment will include individual and group work.

BENV2212
Architecture and Culture
Architecture Program
UOC6  HPW3
Prerequisite/s: ARCH1221.

Many architects and architectural theorists today are engaged in a critical questioning of widely held yet inadequate beliefs and processes, including unrestrained progress, instrumental reason and social control. These driving social forces have brought about a devaluing of human work and nature that courts ecological disaster and a degrading of our physical environment. Architects may formulate a resistance through careful reflection on: the role of the human faculties of imagination and memory in design and construction; the significance of decorum, of public and private realms and of boundaries in our buildings and cities; and the limits of the architectural profession's intrusion into all dimensions of life. The course will focus on several cultural critics, both writers and architects, assessing the value and limitation of their contributions. Investigation will be guided by a vigorous tradition of thought (extending through the nineteenth century to the present) which has defined the symbolic achievements and its capacity to enhance the environment? What might a built environment and critique of it tell us about our society, about the values endorsed by the critic, and about our own criteria for excellence? How have visual artists engaged in critiques about the built environment? It seems that no two critics agree on the criteria for evaluating the built environment and it is anticipated that in the classroom evaluative criteria will be equally contested. For an informed discussion to take place it is necessary to know the current literature and debates. A bibliography has been prepared from which approximately two items have been selected as recommended reading for each class. All students are expected to have read something for each class and to substantiate their claims by keeping a critical diary of all items read. Material is presented as two-hour seminars in which all students are expected to participate actively. Assessment will include individual and group work.

BENV2213
Critical Perspectives on Twentieth Century Art and Design
Architecture Program
UOC3  HPW2

This course introduces some of the key interpretive strategies used in art history and cultural studies over the last hundred years, with an emphasis on current lively debates. The classes will explore and question some of the layers of interpretation of artists’ works from the time they were made to the present. European, North American and Australian art and design will be examined through various filters such as modernism, postmodernism, internationalism, nationalism, regionalism, gender and identity. In visual and cultural studies there is no single correct interpretation of a particular artwork or movement. This course has been designed to enable you to become aware of the plurality of interpretations and to appreciate if not always to endorse or adopt the arguments for contesting interpretations of objects and events. Material is presented as two-hour lectures. Assessment will include individual and group work.

BENV2216
Interior Theory
Interior Architecture Program
UOC6  HPW3

A detailed exploration of the way we experience space. A study of how and to what extent this experience may be modified manipulated and determined by the application of various spatial, surface and lighting devices. The psychological implications of a range of different ways of designing interior space. Language of line; balance, visual weight, placement of objects; focal points; scale, shape and proportion. A series of lectures and studies/projects using drawings and simple models.

BENV2217
Contemporary Interior Design
Interior Architecture Program
UOC6  HPW3

A review of the history of interior design concentrating upon the period since the second world war. The course will draw upon significant practitioners to highlight trends in design. Students will be asked to select case studies to research the theoretical basis for design. Aspects to be discussed include the evolving nature of the relationship between interior designers and other design fields. Relationship between interior architecture and the media.

BENV2218
The Vernacular Landscape
Landscape Architecture Program
UOC3  HPW2

This course critically examines everyday landscapes of the modern world, with an emphasis on the Australian vernacular landscape. Contemporary theories of place and landscape as text are reviewed. Students are introduced to the theory and practice of cultural landscape assessment and their skills in landscape documentation, critical analysis and essay writing are extended.

BENV2219
History of Australian Landscape Architecture
Landscape Architecture Program
UOC3  HPW2

The history of landscape architecture and garden art in Australia since European settlement is reviewed. Students develop a knowledge of planting design traditions in Australia. The history of plant introductions is analysed and the design qualities of Australian plants as the fundamental elements of landscape architectural expression in Australia. The inter-relationships between Australian landscape architecture, Australian architecture and the urban design of Australian cities are studied. Students are introduced to the theory and practice of heritage conservation for gardens, public parks and public spaces. Skills in historical, essay and report writing are extended.

BENV2220
The Culture of Nature
Landscape Architecture Program
UOC3  HPW2

This course traces the myriad perceptions of nature in the history of western civilization, and provides an understanding of the evolution of ecological thought. Readings and lectures explore the ways in which aspects of culture foster ideas about "Nature". Particular attention is given to representation of ideas toward Nature in the arts and the built environment. The intent is to provide students in landscape architecture and related disciplines with a framework for understanding and articulating the complex relationship between nature and culture, and a foundation for integrating this understanding into their own work as designers. Skills in critical thinking, essay writing and discussion are extended and evaluated. The course is based on a cross-disciplinary approach and considers a wide range of perspectives on the topic.
**BENV2221**

**State of the Art: Contemporary Landscape Design**  
Landscape Architecture Program  
UOC3  HPW2

To develop knowledge in depth of contemporary landscape design through a detailed review of current projects, built works and writings. Students will investigate and test current theories of design in landscape architecture, through the critical analysis of recent work. Current concerns in landscape design will be reviewed against the trajectory of twentieth century modernism. Skills in project review, critical thinking and critical writing are extended.

**BENV2222**  
Architectural Studies 1  
Architecture Program  
UOC2

An elective designed for students wishing to pursue an independent course of study in a field of architecture not falling within the domain of any existing elective. It requires the gathering of data, analysis of that material and reaching a conclusion. Descriptive summaries of published material are not an acceptable alternative to a well argued critical essay. Students are required to present a detailed program of study for approval by the Head of Program by the Friday of the first week of the session in which it is intended to enrol in this elective. For special conditions consult the Head of Program. The work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, and be word processed in A4 format. Submissions will normally be about 2,000 words and be submitted by Friday of Week 13.

**BENV2223**  
Architectural Studies 2  
Architecture Program  
UOC3

The intellectual and procedural requirements for this course are as described in BENV2222. The work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, and be word processed in A4 format. Submissions will normally be about 3,500.

**BENV2224**  
Architectural Studies 3  
Architecture Program  
UOC6

The intellectual and procedural requirements for this course are as described in BENV2222. The work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, and be word processed in A4 format. Submissions will normally be about 7,500.

**BENV2226**  
Chinese Gardens  
Architecture Program  
UOC6  HPW3

Introduction to the study of Chinese gardens focussing on key documents and some extant gardens. Lecture topics include: key notions of design, concepts of space/time, role of designers and visitors, movement and the experience of landscape, the relationship between pictorial space, garden design and literary tradition, and imaginary gardens. There are two key concerns: (1) cross-cultural relevance (what can the study of Chinese gardens offer to a cross-cultural dialogue in architecture and landscape architecture?) and (2) interdisciplinary perspective (how is the study of Chinese gardens related to recent work in some other fields such as geography, cultural studies, philosophy and the visual arts?). The main assignment is an exercise in spatial composition developed from a 17th-century Chinese handscroll.

**BENV2228**  
20th Century Architecture: Modernity to Deconstruction  
Architecture Program  
UOC6  HPW3

This course is a study of key moments in twentieth-century architecture through the examination of selected buildings and the writings of architects. Among sources to be discussed are works by architects such as Le Corbusier, Mies van der Rohe, Walter Gropius, and cultural theorists and philosophers such as Theodor Adorno, Gaston Bachelard, and Gianni Vattimo. Material is presented as electronic seminars.

**BENV2230**  
Principles and Philosophy of Design  
Interior Architecture Program  
UOC3  HPW2

The currently popular pseudo-elitist view of art and design is rejected in favour of the proposition that the artist is not a special kind of person but that every person is a special kind of artist. Design is not something which is practiced by the elite few who call themselves designers but by all of us all of the time. This course looks closely at the principles which underpin design in its broadest meaning and application, from the most simple, seemingly intuitive to the most complex of decision-making processes. These principles are studied within a philosophical framework strongly linked to the ‘perennial philosophy’ which may be found in all cultures and at all times and which has been particularly championed in our age by such writers as A.K. Coomaraswamy, Frithjof Schuon and Rene Guenon, and based heavily upon the work of the late Visiting-Professor Peter Kollar. Students who have completed INTA2101 or INTA2102 cannot enrol in this course.

**BENV2231**  
Process in Architecture and Landscape  
Faculty of the Built Environment  
UOC6  HPW3

This elective deals with ideas of process in architectural and landscape architectural writings. Recent developments on the east coast of the United States and in the Netherlands are the focus of this elective. (E.g. projects by Adriaan Geuze, MVRDV and West 8; writings by James Corner, Stan Allen, and Sanford Kwinter, etc.) The elective will explore the idea that these recent developments have, more than at any other time in this century, opened possibilities for fruitful engagement with Chinese cultural interests. Four weeks of the programme will be devoted to comparative work.

**BENV2232**  
Thinking Through Drawings 1  
Architecture Program  
UOC6  HPW3  
Prerequisite/s: ARCH1202 or (LAND1142, LAND1152).

This elective helps students develop a more focussed reading of architectural drawings and photographs through case studies from the 20th century. Emphasis is placed on reading in detail, reading for discrepancies, reading for temporal specifics, reading images in relation to what is written about them, reading for the students' current design projects. The architects to be studied include: Rem Koolhaas, Ben van Berkel, MVRDV, Enric Miralles, Herzog and de Meuron, Kazuyo Sejima and Tadao Ando.

**BENV2233**  
Architectural Images  
Architecture Program  
UOC6  HPW3

This elective takes as its subject the current fascination in architectural discourse and practice with ‘the image’. Each year the elective will focus on a different aspect of architecture's engagement with the image. Previous topics have included: the relation of the discourse on the image to the discourse on ornament; urban advertising images and urban experience; journal publishing in architecture; the media of cross-cultural interaction in architecture; the interlinking of domesticity and urbanism in the representation of architecture. Students will engage with the techniques of presenting images graphically, as well as framing and resourcing critical discussions of topics through research and writing.

**BENV2237**  
Thinking Through Drawings 2  
Architecture Program  
UOC6  HPW3  
Prerequisite/s: ARCH1202 or (LAND1142, LAND1152).
This elective helps students develop a more focussed reading of architectural drawings and photographs through case studies from the 20th century. Emphasis is placed on reading in detail, reading for discrepancies, reading for temporal specifics, reading images in relation to what is written about them, reading for the students' current design projects. The architects to be studied include: Enric Miralles, Peter Wilson, Rafael Moneo, Alvaro Siza and Peter Zumthor.

BENV2238
Modern Architecture in India & Middle East
Architecture Program
UOC6 HPW3

This course will explore the role and significance of ‘modern’ architecture in the making of nation states. Seminars and selected readings will explore topics such as: Spatial strategies for asserting nationhood such as maps and boundaries, government buildings, monuments, museums, domestic architecture, events in public space, stylistic hegemony, etc; cultural borrowings and architectural exchange between ‘East’ and ‘West’; and the tension and overlaps between the ideals of Internationalisation and the construction of a local identity. While the seminar’s focus on India and Bangladesh will situate the discussion within the politics of post-colonial independence, selected themes will be discussed as they relate to other sites of investigation including the birth of Israel and the post-war re-construction in Lebanon.

BENV2239
Cultural Pluralism in Modern European Architecture
Architecture Program
UOC6 HPW3

This course promotes an understanding of 20th-century architecture interns of cultural pluralism and questions the homogeneous nature of the “International Style”. It highlights the diversity in architectural debates and situates them in the context of different political agendas, multicultural histories and cultural traditions. The class will discuss the modernists’ increasing interest in the “Orient” and its impact on architectural production, as well as the search for modern architecture that would reflect “national” identity. Examples to be studied include Le Corbusier’s Journey to the East (a record of his travels from Vienna, Budapest, Belgrade to Istanbul and Athens), which demonstrates how Le Corbusier’s encounters of the “East” and Islam had a formative influence on some of his most famous works. The architectural and landscape designs of the Slovenian architect Joze Plecnik, including Prague Castle and the urban designs for the Slovenian capitol Ljubljana, will show how his interest in the “roots of Western civilization” and Roman architecture suggested an alternative path in modernism. Architecture in the cities of Sarajevo, Vienna and Istanbul will also be studied. Assessment is based on a textual and visual study of a selected architectural, landscape or design project.

BENV2240
Domestic Architecture in Islam and the Poetics of Space
Architecture Program
UOC6 HPW3

This course investigates the domestic sphere in an Islamic context. Students will become familiar with the history, structure, and social use of residential forms in areas that are now a part of Arabia, North Africa and Egypt, Greater Syria, Iran, Iraq, Turkey and the Ottoman Balkans. They will also be introduced to the ways these spaces have been imagined and imagined in art, novels, memoirs, films, and scholarly texts. By considering residences as they are built and as they are described, students will learn both how architecture is historically specific and how it is invested with public and private meanings. Material is presented as electronic seminars.

BENV2241
The Culture of Materials
Architecture Program
UOC6 HPW3

This course looks at the relation between some of the common materials of building construction as they exist in different cultural regimes and ecologies-in particular, timber, steel, concrete and plastic. The course will then introduce a number of perspectives on these materials that show them to be constantly in the process of being given different meanings, values and applications by both different national and trans-national cultures. The course will also examine topics such as: connections between design and materials, how the material world is viewed, making, cultural change, the past and the future. The last part of this course explores cultures of use and value. Although not employing a materials science approach, some technical detail will be presented.

BENV2242
Suzhou
Architecture Program
UOC6 HPW3

This elective is a study tour focusing on Suzhou. Selected aspects of Shanghai will be explored for comparison. Two studies will be carried out in Suzhou: (1) a study of the principal gardens of Suzhou using photographic and collage techniques, and (2) a study of selected texts about the gardens specially translated from classical Chinese into English for this tour.

BENV2243
Tokyo
Architecture Program
UOC6 HPW3

This elective is a two-week study tour of Tokyo focusing on its metropolitan condition and the architectural responses to it. Participants will engage in a program of structured group activities as well as an individual or small-group investigation upon a relevant question of their own choice. The program of activities will include lectures and interviews with key architects and critics; and tours of significant buildings, neighbourhoods, and landscapes. The individual investigations will involve defining an area and methodology of practical investigation, with a presentation and report forming the basis of assessment. Participants will be encouraged to be exploratory in their use of media and methodology in their individual investigations.

BENV2244
Materials and Their Symbolism
Interior Architecture Program
UOC3 HPW3
Prerequisite/s: INTA2202 or equivalent Year 2 Design Studio; Excluded: INTA1311.

The role of material as medium and message in architecture. The symbolic language of materials. The relationship between material and idea in the works of significant designers and architects. Research project(s) investigating the sources, manufacture, properties, characteristics and uses of a wide variety of materials.

BENV2245
Colour and Light in Environmental Design
Interior Architecture Program
UOC6 HPW3
Prerequisite/s: INTA2102 or equivalent Year 1 Design Studio; Excluded: INTA1342.

A series of lectures and projects examining the history, practice and theories of colour and light. Practical experience to enable students to: precisely identify and exactly recreate any hue; develop an understanding of the subjective nature of colour vision; develop an awareness of the difference between the additive and subtractive systems of light-projected and physical colour.

BENV2247
Design Approaches in Italian Architectural History
Architecture Program
UOC6

This course investigates the architectural and architectural/theoretical work of Italian theorists from Leon Battista Alberti to the early 1600 with reference to Vitruvius’s writings and the work of Italian Architects from Sant’Elia to the present. Architects to be studied will include Francesco di Giorgio, Filarete, Palladio, Scamozzi, Piacentini, Terragni and Libera. The course will focus on the differences in approach to the various interpretations of ancient sources and to the many uses of the Roman architectural prototypes. The course will assist students to recognise how the interpretation of the ancient sources involves the relationship between the city’s urban structure and the design process of the building.
This course involves investigation into the basic technical, aesthetic and conceptual aspects of drawing. The philosophy of the course is that drawing is a skill that is both visual and experiential, which evokes through practice - insights, associations and resonances - indicating each student's individual understanding of both the objective world and the world of their imagination. The course teaches basic drawing skills - how to see, think and respond through drawing to a variety of visual problems. This is a studio-based subject involving intensive, practical, hands-on exercises taught simultaneously with visual theory. Ultimately I seek to expand each student's visual vocabulary, aesthetic consciousness and creativity through an interwoven series of exercises based on important moments in 20th century architectural, design and visual history.

This elective is open to students in the Architecture, Interior Architecture, Landscape Architecture and Industrial Design Programs. The seamless integration of the products of graphic design into commercial and urban spaces, at both the intimate and public scales, is expected of architects and designers. This course aims to give students the skills to attempt a basic level of graphic design and to become familiar with the wide range of graphic techniques and materials available. At the end of the course the student should understand techniques for incorporating images into a range of building materials would be introduced. In addition topics such as: digital reproduction technologies, digital and analogue colour systems, paper engineering and three-dimensional graphic representation will be included. Concepts of corporate imaging and marketing within the context of the retail/hospitality/corporate environment will be dealt with. Discussion in class will include topics such as Venturi’s “Building as Duck”. Students will be expected to undertake a range of activities including exercises in preparing graphic material and the presentation of case studies of successful graphic packaging.

This elective is a studio course investigating the basic technical, aesthetic and conceptual aspects of drawing. The philosophy of the course is that drawing is a skill that is both visual and experiential, which evokes through practice - insights, associations and resonances - indicating each student’s individual understanding of both the objective world and the world of their imagination. The course teaches basic drawing skills - how to see, think and respond through drawing to a variety of visual problems. This is a studio-based subject involving intensive, practical, hands-on exercises taught simultaneously with visual theory. Ultimately I seek to expand each student's visual vocabulary, aesthetic consciousness and creativity through an interwoven series of exercises based on important moments in 20th century architectural, design and visual history.

This course aims to develop a practical knowledge of the theories of colour, its historic antecedents and possible future applications including investigations of light and colour as natural phenomena. A series of studio-based exercises, lectures and discussions create a basic understanding of the nature of personal colour perception and bias. Analysis of the relationships colour create with other colours and the nature of colours within their surrounding architectural and environmental context.

This course involves investigation into the basic technical, aesthetic and conceptual aspects of drawing. The philosophy of the course is that drawing is a skill that is both visual and experiential, which evokes through practice - insights, associations and resonances - indicating each student's individual understanding of both the objective world and the world of their imagination. The course teaches basic drawing skills - how to see, think and respond through drawing to a variety of visual problems. At the end of the course the student should understand techniques for incorporating images into a range of building materials would be introduced. In addition topics such as: digital reproduction technologies, digital and analogue colour systems, paper engineering and three-dimensional graphic representation will be included. Concepts of corporate imaging and marketing within the context of the retail/hospitality/corporate environment will be dealt with. Discussion in class will include topics such as Venturi’s “Building as Duck”. Students will be expected to undertake a range of activities including exercises in preparing graphic material and the presentation of case studies of successful graphic packaging.
Life drawing is an ancient and powerful exercise in increasing our ability to perceive and communicate form. The course provides an opportunity for students to represent and explore the human body, examine concepts of form, structure, skin and cladding and the body's relationship to physical and virtual space. Students will explore digital methods of sculpting the human figure using quick computer modelling techniques as well as the more traditional techniques of drawing the clothed, partially clothed and unclothed human figure. The course involves group-based drawing and computer lab sessions, and independent work. It is open to Faculty students who have successfully completed Year 2 of their program, enjoy drawing from life models, can work and learn independently and who enjoy working with others in the setting of the Studio and Lab.

BENV2312
Model-Making as an Interpretive Practice
Architecture Program
UOC6

This elective provides an opportunity for students to engage with physical model making as an interpretative, conceptual, design practice, one that mediates our understanding of spaces and places in the natural and urban landscape. It encourages students to pursue a purposeful, considered, strategic approach to designing spaces that are informed by personal observation, experiences and reflections of place. Improving and extending student capability in the making and crafting of models is a key aspect of this course. Students will be required to undertake a range of investigations of a space in the landscape. Using a variety of materials, model making and scales students will construct a series of models that are evocative of the particularities of that space, and its place in the landscape. In improving their model making skills and techniques, students will investigate the potential relationships between material choice, site, representation and craft techniques. Involving field and studio work this studio will focus on process development and encourages students to be observant and systematic in undertaking investigations, creative in exploring and experimenting with materials, assemblies and interpretive possibilities, reflective about their decision making, diligent and efficient in their craft technique in the making of the models. Assessment in this course will be based on both process and product work. There will be two assessable tasks. An economic selection of materials and tools will be made available.

BENV2313
Introduction to Architectural Photography
Architecture Program
UOC6

Prerequisite/s: ARCH1201 or ARCH1202

This elective provides an opportunity for students to understand and practice basic principles and techniques of traditional and digital photography when applied to architectural photography. This will assist students in firstly, the photographic recording of artwork, models and building structures, secondly, presentation of those images as a portfolio of work and thirdly, inform their working relationship with professional photographers in the industry. The course involves lectures and workshops. Assessment in this course will be based on process and product work. There will be four assessable tasks. Three involve photographic work (artwork image, project model image and building image) and students will be required to maintain a process journal. Student work will be exhibited at the conclusion of this course.

BENV2314
Photography, Society, and the Built Environment
Interior Architecture Program
UOC3 HPV3

This elective will give students an individual opportunity to use a camera as a visual research tool in the exploration of society and the built environment. The course involves theory and practice. A series of lectures covering different aspects of social documentary: a brief history of this genre, photojournalism, the photo-essay, street photography, oral history, the family album; and an introduction to some contemporary photographers detailing the urban environment through pattern or landscape. In Photography there is an intimate link between the image and the original. Light acting on and transforming emulsion still seems magical, or thousands of pixels transferred digitally to catch a moment in time is extraordinary. The ability to freeze frame movement in space, hold still light in time, document our communities today for tomorrow, record our visual reality is a powerful tool. With this power comes certain responsibility.

BENV2315
Architectural Model-Making
Architecture Program
UOC6

This elective aims to develop students' model making skills, and to develop an understanding of the significant role/function of models within the design process - not just as communication tools, but also as conduits for exploring ideas. Students will gain knowledge of different model types and their uses within the design process, including: conceptual/schematic, sketch/diagram, site/contour/context, design development, block, space, structural, façade, section, detail/connections, interior, presentation, exhibition, urban/city, full-sized prototypes. Model making practices will be explored in terms of craft, but also in terms of their relation to design themes, processes, analysis, decision making and issues informing the real building process. Aspects to be considered include spatial formation and quality, tectonic assembly, abstraction, representation, scale, materials, joints and finishes. Tasks may include keeping a research dossier/journal of measured drawings and details of precedents; exploration of modelling possibilities; defining an individual modelling project; planning the modelling process to select methods and materials; and producing a final model to exhibition standard.

BENV2316
Architectural Sketching and Free-hand Drawing
Faculty of the Built Environment
UOC6

This course will help students develop skills in interpretative architectural sketching and free-hand drawing. It will involve intensive hands-on exercises, supported by intermittent group discussion, review and short lectures. Exercises will be carried out first on pre-selected locales of different kinds, and then on the locales self-selected by students. A series of assessable drawings will be produced by each student, using a range of media - including pencil, ink-pen, charcoal, charcoal-pencil, colour pen and pencil, on white or coloured A3-sized paper.

BENV2318
Landscape Photography
Faculty of the Built Environment
UOC3

This course, offered as an intensive elective over two weeks, will introduce students to the potential for using photography as a tool for analysing, documenting and communicating about landscape. Course content will include: different applications of photography for landscape architecture; composition theory and how information is conveyed through a photography; use of light and contrast; principles of film-based and digital photography; and techniques for preparing photos for exhibition. Students must provide their own camera and cover the course associated with film developing and printing.

BENV2402
Design Modelling - Time Based Visualisation
Architecture Program
UOC6 HPV3

Prerequisite/s: BENV1341 or BENV2401 or IDE55231

This elective will align design techniques with time-based 3D digital environments. It will extend digital visualisation skills by introducing sequencing and storyboards into 3D digital environments. Computer Lab-based exercises will cover 3D composition, time-based form generation and narrative in digital 3D. Development of presentation techniques such as video editing, QuickTime VR, and VRML will be included in the final presentation. Assessment will be based on earlier staged learning exercises and one major design presentation project.

BENV2403
Information Technology in Design and Construction
Faculty of the Built Environment
UOC3 HPV2

Prerequisite/s: BENV1141

This course introduces the issues, problems and solutions relating to the creation and distribution of information within the building industry. It includes topics such as: database systems; interaction with CAD system graphics databases; transmission of data; networking and communication.
technologies; shared technical databases; establishment of product information standards; conceptual modelling techniques; and design information systems. Assessment is by means of projects and student seminars.

BENV2404
CAD Management for Architects
Architecture Program
UOC3 HPW2
This course raises the issues relating to the implementation and management of CAD systems in architectural practices. Topics will include: CAD system selection and installation; cost issues (purchase, maintenance, upgrades); political implications within practices; software customization; resource management; office standards; and training. Assessment is by means of projects and student seminars.

BENV2405
Computer Graphics Programming
Architecture Program
UOC6 HPW3
Prerequisite/s: BENV1141
This course introduces the fundamentals of interactive computer graphics programming within the context of a typical architectural CAD system. Specifically, students will be introduced to the process of developing GDL scripts within ArchiCAD for the purpose of creating what in the industry have become known as ‘smart objects’. This is a process and technology that is being used increasingly in architectural practices where ArchiCAD is used to produce complex 3D component building models. Topics to be covered: concepts of building modelling with ArchiCAD; types of smart objects; parametric library objects; object intelligence; GDL scripting; program planning, design and debugging. Assessment will be project-based involving the development of GDL library parts with a range of complexity.

BENV2406
Design and Computation
Architecture Program
UOC3 HPW2
Prerequisite/s: BENV1141
This course is based on extensive reading and group discussion, exploring a range of theoretical approaches to the use of computation techniques in support of the act and processes of architectural design. Topics include: traditional approaches to architectural computing including space planning, facilities management, building performance analysis, information systems and operations research; knowledge-based systems and knowledge representation techniques; shape grammars; expert systems; and design information systems. Assessment is based on participation in discussion, the preparation of regular reports on readings and one major essay task.

BENV2408
Building Information Systems
Building Construction Management Program
UOC6 HPW3
Prerequisite/s: BLDG3282
The specification, development and use of computer based information systems in the management of building construction projects. Current networking and communication technologies; digital document formats and environments; information system lifecycle; relational database structures; shared information databases through project intranets; computer programs for cost management; and CAD product modelling standards for interoperability with other applications.

BENV2409
Advanced Multimedia
Architecture Program
UOC6 HPW3
Prerequisite/s: BENV1043
Web Page: http://www.fbe.unsw.edu.au/courses/benv/2409/. This course explores a range of advanced multimedia concepts and issues. This will include creating interactive 3D environments, exporting information created on the fly, controlling video and animation, and programming. Students are expected to be adept at the material covered in the prerequisite course.

BENV2410
Advanced Webpage Design
Architecture Program
UOC6 HPW3
Prerequisite/s: BENV1042
Web Page: http://www.fbe.unsw.edu.au/courses/benv/2410/. This course explores a range of issues and technologies relating to the creation and maintenance of websites. Topics will include: an analysis of web Search Engines; Cascading Style Sheets (CSS); Dynamic HTML (DHTML); and Active Server Pages (ASP). Students are expected to be adept at the material covered in the prerequisite course.

BENV2414
Advanced Digital Graphic Communications
Landscape Architecture Program
UOC6
This course will introduce students to digital media and its use as a mode of representation for design ideas. Digital media is becoming the most common form of design communication for landscape architects and other design professions. It is a representation method that can and should be used to inform designs and not only as a presentation tool. The course will educate students in the use and application of digital media. It will equip students with skills in digital photographic enhancement and composition of images that will help to communicate design ideas through graphic representation and montage. The course will be run in a predominately digital format.

BENV2417
Digital Production and Design of Poster Presentations
Interior Architecture Program
UOC6
This course provides an opportunity for students to develop capabilities in the use of image editing techniques for the production of A4 to A1 format poster presentations. The course also addresses graphic design and composition techniques and tactics, as well as the technical issues associated with colour printing of digitally generated presentation work. At the completion of the course students should be confident in using the tools of the software program, ‘photoshop’, be able to compose and design for digital production, effective image/text presentation posters and formats.

BENV2418
Design Presentation Workshop
Interior Architecture Program
UOC6
An intensive 2 week course refining visual presentation techniques; presentation layout and output, photoshop/illustrator techniques for presentation, model making and montage. Tailored particularly to the needs of Interior Architecture and other design students entering 2nd year, this course will act as an introduction to communications techniques explored in Year two. For all others the course will consolidate and extend individual capabilities and techniques of visual presentation.

BENV2603
Lightweight Structural Design
Architecture Program
UOC6 HPW3

BENV2604
Structural Systems: Basic
Architecture Program
UOC6 HPW3
Building upon a typical introductory structures course (such as Technology 1) this course deals in depths with basic systems such as arch, beam, cable, frame, truss, slab/plate, membrane, shell and several of their many variations. The course is a useful basis for further elective study in
structures and for design and construction. The fundamental requirement for any architectural designer embarking upon the structural design of buildings and objects is a basic understanding of structural systems and their structural behaviour under load. Equipped with such understanding the student/designer gains the necessary confidence to distinguish between different structural possibilities for any particular design and choose the appropriate one. Subsequently she/he is able to approach structural material choice and structural detailing of connections on a sound basis of proven structural relevance. The teaching approach to this subject is predominantly visual with only limited numerics. Basic structural systems will be discussed by means of readily understood graphical diagrams and will be illustrated with cases of typical structural applications. Short exercises accompany the lectures with typical solutions presented in class. Student learning occurs during exercise completion combined with study of practical examples and the relevant literature, peer discussion and feedback from the lecturer. Assessment will be by student engagement in class as witnessed by timely and successful completion of exercises, active participation in discussion and by attendance.

**BENV2605**

**Case Studies in Architectural Structures**
Faculty of the Built Environment
UOC6

Prerequisite/s: ARCH1371

Case studies are an essential pre-requisite to any architectural design process. This subject aims to fill a need for a computer-based systemised approach to in-depth study of remarkable buildings, in particular into their technological aspects such as structural form, system and behaviour, their construction, fabric and material. Students choosing to elect the course will be introduced to a proven and well-documented approach to investigation and understanding of structural and constructional aspects of buildings and will apply this approach to selective cases. Data generated will be edited and placed into an international database of case studies where they will become a resource for design which will be accessible to a wider student audience. Thus, your work will benefit others, as well as the work of others will benefit you in your current and future study.

**BENV2701**

**Advanced Building Materials (Ceramics)**
Architecture Program
UOC6 HPW3

Ceramic materials; the nature of cements, concrete, glass and similar products. Building products and techniques using these materials and their implications including construction, maintenance and deterioration. Examination of the environmental impacts and life cycle analyses of these materials. Industrial and site visits.

**BENV2702**

**Advanced Building Materials (Organics)**
Architecture Program
UOC6 HPW3

Organic materials; the nature of wood and synthetic polymers. Building products and techniques using these materials and their implications including construction, maintenance and deterioration. Examination of the environmental impacts and life cycle analyses of these materials. Industrial and site visits.

**BENV2703**

**Advanced Building Materials (Metals)**
Architecture Program
UOC6 HPW3

Metals, ferrous and non-ferrous, their nature and use. Building products and techniques using these materials and their implications including construction, maintenance and deterioration. Examination of the environmental impacts and life cycle analyses of these materials. Industrial and site visits.

**BENV2704**

**Advanced Construction Systems**
Architecture Program
UOC3 HPW2

A review of recent developments, current trends and possible future directions in building design, construction systems, detailing and documentation. Case studies, projects, seminars.

**BENV2705**

**Spatial Construction Studies**
Architecture Program
UOC6 HPW3

This course is a rigorous and disciplined examination of skilfully (ie. artfully) designed works of architecture. The course will require students to investigate the physical (spatial and constructional) orders of two buildings with the aim of interpreting/understanding what these orders are and why they are the way they are. The investigations will be based on drawings and models of the chosen buildings (to be made by the students), on appropriate texts and on lectures given during the session. The selection of buildings will be partly based on the availability of good documentation and critical writings. These are necessary in order to achieve the desired level of rigour. Students will be divided into two groups, each group focusing on one of the buildings. A comparison of the two buildings is an important means of initiating discussion and will be one of the aims of the investigation. Material is presented as a mix of lectures and tutorials.

**BENV2707**

**Advanced Landscape Engineering**
Landscape Architecture Program
UOCP6 HPW2

More complex landscape engineering problems are undertaken, particularly in relation to sustainable landscape engineering solutions, as well as projects that integrate, eg public art, constructed wetlands, specialty paving, water features, specialty lighting.

**BENV2708**

**Interior Detailing**
Interior Architecture Program
UOC6 HPW3

Prerequisite/s: INTA2202 or equivalent Year 2 Design Studio.

Design resolution at a fine scale highlighting issues of quality and the central role of detailing in achieving buildings and interiors which are original and coherent examples of good design. The practice and technology of detailing interiors seeking to enhance the designer9s critical capacity when assessing options and extending their design vocabulary. The discipline of extending design concepts from the overall to the specific and planning strategies for detailing while at an early stage of the design process. Tutorials based upon recent examples of detailing will be supplemented by lectures dealing with techniques of documentation, structuring building contracts to support successful outcomes in building procurement. Lectures will cover material related to building methods and technologies: included will be detailing stainless steel, timber veneer, plastic laminates, timber joinery, specifying finishes such as polyurethane, epoxy, stains and coatings. The program will be centred about guest lecturers presenting examples of their work as case studies of successful detailing.

**BENV2709**

**Construction 6 (Industrialisation and Technological Change)**
Building Construction Management Program
UOCP3 HPW3

**BENV2710**

**International House Practice**
Building Construction Management Program
UOCP3 HPW2

Focuses on procurement and production processes relating to housing development. Factors of interest include: government housing policy, design, development approval process, land subdivision, property titling, construction, financing and marketing. Case studies are used to portray how these factors compete within a market system. Australian and overseas contexts are studied.
BENV2712
Technology for Tropical Architecture
Architecture Program
UOC6

Outline: To study tropical architecture in context. Those undertaking this elective will develop an understanding of influences on tropical architectural practice: including climatic, cultural, environmental and sustainability issues. There will also be an opportunity to study historical contemporary tropical architecture. This elective is open to Architecture students. There will be a field trip cost attached to this course. Any student intending to take this course must contact Graham Bell prior to enrolling.

BENV2713
Furniture Design 1
Interior Architecture Program
UOC3  HPW3

Prerequisite/s: INTA2102 or equivalent Year 1 Design Studio.
Excluded: INTA1311.

Through a series of lectures, tutorials, demonstrations and practical design projects, this course addresses issues of design philosophy, ecology, scale, context, spatial relationships, materials, technologies and resources appropriate to the design of furniture and fittings - the decorative arts for interiors.

BENV2714
Furniture Design 2
Interior Architecture Program
UOC3  HPW3

A guided research-based course concerned with the design and manufacture of furniture and fittings for mainly commercial applications. A research project and practical design assignment will focus on specific case studies.

BENV2715
Textiles in Interior Architecture
Interior Architecture Program
UOC3  HPW3

Prerequisite/s: INTA2102 or equivalent Year 1 Design Studio.
Excluded: INTA1312.

A study of textiles and fabrics and their applications in interior architecture. The course will examine in some detail origins, structures, properties and manufacturing processes dealing with fibres, yarns and materials: woven, non-woven and knitted materials. Patterning, including structural and non-structural ornamentation. Further treatments and applications of materials. Standards of use and durability. New directions, concepts and future implications.

BENV2718
Construction Technology 4 (Industrialisation & Technological Change)
Building Construction Management Program
UOC3  HPW2

BENV2719
Housing Delivery Systems
Building Construction Management Program
UOC3  HPW2

High, medium and low density housing development in terms of the entire procurement production process. Factors directly involved in the process and other issues that impact on it including government housing policy, regulatory instruments, the commercial and social environment, land subdivision, property titling, urban planning, construction, financing and marketing. Current practices and future trends in various countries. International approaches to housing procurement. Quality in housing.

BENV2720
Introduction to Lighting and Acoustics
Architecture Program
UOC4  HPW2

BENV2721
Lightweight Tropical Construction Project
Architecture Program
UOC6

Students will apply their understanding of construction and Occupational Health & Safety Issues in the construction on campus of Simon Scally's Love Shack (Darwin). It is envisaged that under the leadership of a project manager the students will work in agreed teams to assemble and then construct the Love Shack. The construction will take some time and the timetable for which will be determined by the respective teams. It is envisaged therefore that the final erection will be in the last week of the mid year break. The desired outcomes are: an application of construction knowledge, an understanding of the importance of team work in any project, appreciation of common building materials their jointing and fitting and the pleasure in the completion of a Love Shack which is for Sydney and client-based on Simon Scally's in Darwin.

BENV2722
Advanced Construction Systems
Architecture Program
UOC6  HPW2

A review of recent developments, current trends and possible future directions in building design, construction systems, detailing and documentation. Case studies, projects, seminars.

BENV2803
Facility Planning
Interior Architecture Program
UOC6  HPW3

Facility planning is the practice of coordinating the physical workplace with its business objectives. It strategically integrates the principles of business administration, interior architecture and the behavioural and engineering sciences. This course covers material associated with facility, strategic and tactical planning with regard to: accommodation, occupational health and safety and security; environmentally sustainable design in the context of the workplace; space planning systems; integration of services and telecommunications within the office. Contemporary strategies for the design of the modern office.

BENV2804
Construction Planning and Management
Faculty of the Built Environment
UOC3  HPW2

The role of the Architect and Builder in the traditional building procurement process. Construction management and coordination of the building process. New management directions for improved performance and coordination in the building industry. The role of the Developer and Project Manager in the procurement of buildings. Building economics and property evaluation. Principles of scientific management and organization, individual group behaviour, motivation techniques, planning, organising, directing and control.

BENV2805
Project Management and The Design Process
Faculty of the Built Environment
UOC6  HPW3

The nature of projects. Definition of project phases. The impact of procurement process on project outcomes. Project risk analysis and project organizational design. Client needs determination and managing the design process. Scope management.

BENV2806
Organisational Behaviour
Building Construction Management Program
UOC3  HPW3
Organizational design. Types of organizations and fitting organizational structure to environment. Leadership. Reward processes. Expectancy theory. Organizational change.

**BENV2807**  
Management 7 (Marketing)  
Building Construction Management Program  
UOC6  HPW3

Marketing for builders and developers in the Australian and Pacific environment with particular emphasis on the marketing mix, the relationship between a marketing system and its environment, development of marketing, tactics and strategy, market segmentation and the buyer decision process. Listing, selling and the auction process.

**BENV2808**  
Law for Builders 3  
Building Construction Management Program  
UOC3  HPW3  
Prerequisite/s: BLDG3272

Recognition of the significance of different land titles, tenures and interests in land; understand the construction and content of contracts, leases and other forms of agreement required for property dealings and use; develop a familiarity with public and private controls and restrictions on land use and development; appreciate the relationship between planning policies at all levels and the valuation process; a knowledge of the valuation review and determination processes of the Land and Environment Court and similar tribunals; appreciate the requirements for presentation of evidence as an expert witness; acquire a familiarity with major court cases, relevant to a valuer, which establish valuation principles; understand the major objectives of principal New South Wales Acts dealing with real estate or interests therein.

**BENV2812**  
Documentation Techniques for Major Buildings  
Architecture Program  
UOC6  HPW2

Students will learn what is involved in completing a comprehensive set of documents comprising Working Drawings, Details, Specification and Schedules required for tender and successful completion of the construction of major buildings. Students will also learn about construction design details and many aspects of the legal and technical implication in the documentation.

**BENV2813**  
Construction Marketing  
Building Construction Management Program  
UOC3  HPW2

Marketing for builders and developers in the Australian and Pacific environment with particular emphasis on the marketing mix, the relationship between a marketing system and its environment, development of marketing, tactics and strategy, market segmentation and the buyer decision process. Listing, selling and the auction process. Market Research.

**BENV2814**  
Property Law  
Building Construction Management Program  
UOC6  HPW3

Recognition of the significance of different land titles, tenures and interests in land; understand the construction and content of contracts, leases and other forms of agreement required for property dealings and use; develop a familiarity with public and private controls and restrictions on land use and development; appreciate the relationship between planning policies at all levels and the valuation process; a knowledge of the valuation review and determination processes of the Land and Environment Court and similar tribunals; appreciate the requirements for presentation of evidence as an expert witness; acquire a familiarity with major court cases, relevant to the valuer, which establish valuation principles; understand the major objectives of principal New South Wales Acts dealing with real estate or interests therein. Judicial valuation, legal precedent, land titles and rights.

**BENV2815**  
Construction Management 4A (Project Management & Design Process)  
Building Construction Management Program  
UOC6  HPW3

The nature of projects. Definition of project phases. The impact of the procurement process on project outcomes. Project risk analysis and project organisational design. Client needs determination and managing the design process. Scope management.

**BENV2816**  
Construction Organisational Behaviour  
Building Construction Management Program  
UOC6  HPW3

A study of the following topics from a construction industry perspective: Organisational design. Types of organisations and fitting organisational structure to the environment. Leadership. Reward processes. Expectancy theory. Organizational change.

**BENV2901**  
City Planning Today  
Planning and Urban Development  
UOC3  HPW2  
Excluded: Program 3360.

The way our cities look and operate, their cultural and community life are all considered by town planners. The course deals with the fundamentals of urban planning, its language, its rules and regulations; its controversial nature and the way it operates in practice. It looks at how and why urban planning came into being; how the legal and administrative system works; how the political system operates; and how planners deal with issues - from designing the city to balancing the many conflicts which arise over development projects. Lectures are given by staff of the Faculty of the Built Environment as well as planning practitioners. This course will give you the skills, the understanding and the enthusiasm to play an active role in shaping your city.

**BENV2902**  
The City: Sydney  
Landscape Architecture Program  
UOC3  HPW2

This course critically examines the pace, scale and dynamic transformation of Sydney at the beginning of the twenty-first century. The physical form of the city, its environmental qualities and social patterns will be examined in terms of the theoretical literature on the culture of cities and techniques of reading the urban landscape. The study of Sydney’s urban form and urban life will be based on a series of lectures, seminars and city walks.

**BENV2903**  
Urban Design  
Architecture Program  
UOC6  HPW3

Design studies in the integration of buildings and groups of buildings in their urban context, and of spaces between buildings, accommodation of pedestrian and vehicular movement, micro-climate. Material is presented by students every week supported by instructor’s lectures with a final tutorial completing the course requirement.

**BENV2904**  
Public Art  
Architecture Program  
UOC6  HPW3

This course examines recent Australian and overseas art that addresses ideas of place and context and that is situated in the public domain. Public art can be an individualistic exercise but more often it results from professional collaboration between artists, designers of the built environment, and the community. Art in public places provides opportunities for design professionals to grapple with historical, social, cultural, environmental and other issues in the creative process. Increasingly state and local governments are developing policies to encourage public art: in some overseas countries a fixed percentage of the costs of a public building must be spent on providing site/place-
specific art. This elective has two objectives: one is to examine aspects of the current theoretical discourse on public art, and to debate these ideas in student-led seminars; the other objective is to enable students to conduct research into local recent public art and to write a critical appraisal of a particular work. It is hoped that the research will be incorporated (and acknowledged) in a wider Department-based project on public art, architecture and urban design in Sydney. Material is presented as a mix of lectures and seminars.

**BENV2905 Multivariate Analysis for Planning**  
Faculty of the Built Environment  
UOC3 HPW3  
Prerequisite/s: PLAN1052

The use of multivariate techniques to analyse medium to large survey-based data sets. The specific techniques covered in a given year depend in part on the data sets available for analysis, but will focus in any event on multiple regression, including approaches to the analysis of non-linear relationships, and on factor analysis.

**BENV2923 Images of Sydney**  
Planning and Urban Development  
UOC3 HPW2  
Prerequisite/s: PLAN1011 or permission of course authority

This course explores how an understanding of cities and how they are appreciated by those who live in them can be communicated visually. ‘Images of Sydney’ encourages students to capture the flavour and variety of living in Sydney on film. The course includes lectures on aspects of urban design and social documentary photography. Participants are supplied with disposable cameras and images are critiques and reviewed by the class. Students compile course journals covering not only reflections on the student’s particular topic, but also photographic exhibitions visited, lectures attended, and relevant articles and books read during the semester. The major outcome is an end-of-session exhibition. Each student is responsible for presenting a collection of the photos they have taken with suitable captions and commentary conveying how the photographs help interpret the experience of the city.

**BENV2937 Urban and Regional Design: Critique and Innovation**  
Planning and Urban Development  
UOC6  
Prerequisite/s: PLAN3032

This course reviews the principles of urban design and guides students through urban design methodology via a series of small design projects. Teaching is through “enquiry by design” whereby lectures, site visits and case studies assist students’ learning and development through the exploration of design projects of varying scales and contexts (e.g. town centres, concept designs for specific sites, structure plans). Specific aims of the course include developing an awareness of the scope of urban design projects, an appreciation of the physical structure of places, an understanding of shaping built form, a familiarity with a range of building typologies, and an appreciation of current urban design issues and debates. Particular skills to be reviewed include site analysis methodology, establishing robust planning and design principles, mapping and spatial understanding, design review criteria and mechanisms of development control.

**BENV2938 Transport Planning**  
Planning and Urban Development  
UOC6

This course aims to provide an introductory understanding of the role of transport planning as a planning tool that can be used to achieve positive planning outcomes in the urban built form. It provides an introduction to the theoretical, applied and policy aspects of transportation planning with special reference to public transport issues in Sydney. It covers introductory elements of transport planning and forecasting and their place in the planning process, specific elements of transport planning theory, and case studies through lectures, guest lectures and site visits. The course is underpinned by notions of transport-land use planning integration and sustainability. The lecturer-in-charge Matthew Hurst is a UNSW planning graduate and Senior Strategic Planner with SRA Rail Development

**BENV2942 Rural Planning**  
Planning and Urban Development  
UOC6

This course has been designed specifically to give students an appreciation of the issues associated with planning for rural areas, a vital component of land use management in Australia. Rural areas include the agricultural land, natural areas and urban settlements of regional Australia. It introduces students to a range of practical planning documents and instruments, including rural lands studies, rural strategies, Local Environmental Plans and Development Control Plans. Students will also learn about the various policy mechanisms used both in Australia and overseas. The course utilises field-based learning and usually involves a fieldtrip to a rural NSW location during which students will undertake a rural planning exercise with practical application for a local Council.

**BENV2943 Heritage Planning**  
Planning and Urban Development  
UOC6  
Prerequisite/s: PLAN3031

This course for senior students provides an advanced overview of the theoretical, practical and policy aspects of issues concerning the conservation of environmental, heritage, both cultural and natural. The course deals with the objectives and purpose of heritage conservation, the definitions of heritage at international, national, state and local level: methods by which planners work to balance the demand for heritage conservation with the other needs of the urban and natural environment. The course deals with both the conceptual and pragmatic aspects of heritage conservation, dealing with heritage in an inclusive sense: biophysical, indigenous, cultural and built. The aim of the course is to ensure that built environment professionals have a full understanding of the theoretical, legislative and administrative aspects of the conservation of heritage.

**BENV2945 Planning Travel Elective**  
Planning and Urban Development  
UOC6 HPW4

The general aim of the elective is to enhance the experience of students in a small group context through exposure to new and different urban contexts, planning ideas, systems, planning projects and urban management processes. The course will involve an intensive, intensive guided field investigation of planning issues variously in international, interstate or non-metropolitan settlements with a focus on issues such as growth management, heritage, sustainability, urban design, transportation, strategic planning, and contemporary redevelopment and renewal projects. The elective will entail visits to or inputs from government agencies, local authorities, developers and planning consultants. Students will be required to pay costs of transport from and to Sydney, accommodation, meals, and incidental costs. Affordable motel or college-style accommodation would be negotiated. Students would be engaged individually and collectively in a major research and/or design project, the preparation for which would commence in the session preceding the trip with additional post-trip research, writing and presentation. Courses would be run subject to resources and student demand.

**BENV2984 World Case Studies in Urban Design**  
Architecture Program  
UOC6

This course looks at some diverse 20th century cities from an Urban Design perspective. It touches on the socio/political, economical and cultural influences of the built environment, the structure of physical components, strategic policies and recent historic influences. The focus is the fascination of urban design interventions and the ability to affect change as part of the dynamic process of cities. An urban design definition will be debated and the symbolic, memorable aspects of cities discussed. Students’ personal experience of their city locales will form a valuable contribution to the course.

**BENV2985 Land Economics & Valuation**  
Building Construction Management Program  
UOC6
The building process; market research; establishing the client’s needs; site selection and analysis; feasibility studies and financing methods. Introduction to valuation. Time value of money and equivalence. Methods and philosophies of determining market valuations. Valuation techniques; knowledge of efficient property management techniques; identification of a range of unusual property types which require specialised valuation skills and knowledge and the means of developing such skills and knowledge; knowledge to develop novel valuation techniques for application to specific property types; ability to determine the highest and best use for nominated property types; the application of inspection techniques for broad property types; competency in the use of property valuation and inspection aids; familiarity with resource materials and information sources required to undertake specific types of valuation.

BENV2986
Property Management & Development
Building Construction Management Program
UOC6: HPW3

BENV6000
The Dean’s Honours Seminar
Faculty of the Built Environment
UOC6: HPW2

The Seminar draws on advanced students from undergraduate programs to provide an interdisciplinary setting in which to investigate contemporary issues related to globalisation and development, and the built environment. The seminar will encourage, in particular, the study of policy and opportunities for change. To undertake this elective students must have been a member of the Dean’s List (or equivalent) in one or more sessions prior to enrolment, and must be in Stage 3 or later of their degree program.

BINF1001
Bioinformatics 1
School of Computer Science and Engineering
UOC6: HPW5
Prerequisite/s: BIOS1201, COMP1011 or COMP1711

The course surveys the major areas of bioinformatics at an introductory level, exploring the history of bioinformatics in relation to advances in computing hardware and software; the biological problems currently being addressed using bioinformatics; and future applications of bioinformatics. Major topics include genomics; genome sequencing projects; proteomics; structural genomics; phylogeny; population biology; ecological modelling; medical informatics; and commercial applications of bioinformatics. The general nature of the data, computational problems and the approaches employed will be discussed in each case. Role of bioinformatics in the biotechnology industry. Structure of biotechnology industry stressing commercial, regulatory, and intellectual property areas. Diversity of industry sector and commercial case studies including biopharmaceuticals and gene therapy, use of transgenic plants and animals. Lectures are supplemented by practical exposure to public and commercial bioinformatics web sites.

BINF2001
Bioinformatics 2
School of Computer Science and Engineering
UOC6: HPW6
Prerequisite/s: BINF1001

Examines key issues in bioinformatics from a biological perspective - the unique conflux of complexity, uncertainty and unity in biology creates a set of grand challenges for computer scientists. Specific topics include metabolic simulations; inference of genetic control networks; determination and modelling of biomolecular structures; and rational drug design. Practical work will investigate current approaches to these challenges, the state of progress and directions for future expansion.

BINF3001
Bioinformatics 3
School of Computer Science and Engineering
UOC6: HPW5
Prerequisite/s: BINF2001, COMP2041, COMP3121

This hands-on course will focus on advanced algorithms and machine learning techniques for searching, classifying, analysing and modelling DNA, RNA and protein sequence data. It will also introduce techniques for analysing other kinds of genomics information such as data obtained from “gene chips”. Techniques covered will include fast string searching, pairwise alignment, Bayesian learning methods, multiple alignment, simple Markov models, hidden Markov models, neural nets, decision trees, inductive logic programming, and support vector machines. Lab: Programming assignments involving modification and implementation of techniques covered in the lectures.

BINF4920
Professional Issues and Ethics for Bioinformatics
School of Computer Science and Engineering
UOC6: HPW3

his course will develop a framework on which professional and ethical issues for Bioinformatics can be developed. Topics covered will include team and meeting skills, communication skills, interpersonal skills, software quality and process, in addition to ethics. The course will be delivered using lectures, class discussions, written assignments, reading lists, the Internet, presentations, and invited speakers.

BIOC2101
Principles of Biochemistry (Advanced)
School of Biotechnology and Biomolecular Sciences
UOC6: HPW6
Prerequisite/s: BIOS1101 or BIOT1011, BIOS1201, CHEM1011 or CHEM1031, CHEM1021 or CHEM1041; Excluded: BIOC1221, BIOC319, BIOC2181, GENB1002, GEN6012

Introduces modern biochemistry, covers fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics covered include: the nature and function of proteins and enzymes; the metabolic working of cells, tissues and organs; the interrelationships between the pathways of carbohydrate, lipid and amino acid metabolism; the vital role of hormones in metabolic regulation; the energy-trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures and to introduce the principles of biochemical analysis.

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective part of their program.

BIOC2181
Fundamentals of Biochemistry
School of Biotechnology and Biomolecular Sciences
UOC6: HPW6
Prerequisite/s: BIOS1101 or BIOT1011, BIOS1201, CHEM1011 or CHEM1031, CHEM1021 or CHEM1041; Excluded: BIOC1221, BIOC319, BIOC2181, GEN6012, GENB1002

Introduces modern biochemistry, covers fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics covered include: the nature and functions of enzymes; the metabolic working of cells, tissues and organs; the interrelationships between the pathways of carbohydrate, lipid and amino acid metabolism; the vital roles of enzymes and hormones in catalysis and metabolic regulation; the energy trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures and to introduce the principles of biochemical analysis. This course covers essentially the same material as in BIOC2101 Principles of Biochemistry (Advanced), but in less detail and with more emphasis on the function of organisms and less emphasis on some of the underlying chemical mechanisms.

Note/s: This course provides a comprehensive introduction to Biochemistry as an alternative to BIOC2101 for students who do not intend to proceed to Level III Biochemistry. It does not fulfill the prerequisite requirements for Level III Biochemistry but the Head of School may give approval for students with a grade of credit to enrol in Level III courses.
Provides an introduction to modern molecular biology and covers the molecular mechanisms of gene expression and the fundamental aspects of recombinant DNA technology. The major topics covered include: the structure and function of DNA and RNA. The replication and transcription of DNA; translation of the genetic code into an amino acid sequence during protein synthesis; regulation of gene expression. Manipulation of DNA including: fragmentation by restriction enzymes, cloning of DNA fragments into vectors, hybridization analysis and principles of DNA sequencing. Protein structure and function, protein engineering and site-directed mutagenesis. Amplification of DNA by the polymerase chain reaction (PCR). Practical work to complement the lectures.

Notes: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective part of their plan.

Provides an introduction to modern molecular biology and covers the molecular mechanisms of gene expression and the fundamental aspects of recombinant DNA technology. The major topics covered include: the structure and function of DNA and RNA; the replication and transcription of DNA; translation of the genetic code into an amino acid sequence during protein synthesis; regulation of gene expression. Manipulation of DNA including: fragmentation by restriction enzymes; cloning of DNA fragments into vectors; hybridization analysis and principles of DNA sequencing. Protein structure and function, protein engineering and site-directed mutagenesis. Amplification of DNA by the polymerase chain reaction (PCR). Practical work to complement the lectures. This course covers essentially the same material as in BIOC2201 Principles of Molecular Biology (Advanced), but in less detail and with more emphasis on the general applications and less emphasis on some of the underlying mechanisms.

Notes: This course provides a comprehensive introduction to Molecular Biology as an alternative to BIOC2201 for students who do not intend to proceed to Level III Biochemistry. It does not fulfill the prerequisite requirements for Level III Biochemistry but the Head of School may give approval for students with a grade of credit to enrol in Level III courses.

Provides an introduction to the structure, function and interactions of proteins. The course is designed to be accessible to students with little or no background in biology. The course will cover topics such as protein structure, protein function, protein engineering, and protein interaction. Practical work will be carried out to reinforce the lectures and provide experience with modern techniques of protein molecular biology.

Details analysis of gene structure and function including: structure and properties of polynucleotides such as DNA and RNA; structure of chromatin; regulation of gene replication, transcription and translation; recombinant DNA technology, nucleic acid sequencing, DNA-DNA and DNA-RNA hybridisation as important tools of modern molecular biology. Practical work illustrates and complements the lectures and provides experience with contemporary molecular techniques.

This course will develop a student's abilities to use molecular and more traditional data to solve genetic problems that arise in a variety of applications, particularly in the area of human biology. Our genes interact with one another and with the environment to make us what we are. This course will present modern and historical methods for investigating the molecular basis of heritable characteristics from those for appearance to behaviour and disease. Areas of current research and molecular and statistical methods of analysis will be explored. Issues such as race, development, genetics of cancer, quantitative traits, genetic disease, gene mapping ethics, eugenics and forensics will be addressed. Lecturers will be reinforced with discussion groups and computer and other exercises.

Covers the aspects of metabolism that are of particular relevance to the human. The major topics covered will be selected from: nutrition, exercise, neurochemistry, xenobiotics, nucleotide and one-carbon metabolism, genetic diseases and molecular aspects of parasitology. The role of triglyceride, cholesterol and lipoprotein metabolism in human health, and other selected areas of human nutrition. Specialised aspects of endocrinology and neurochemistry including prostaglandins, leukotrienes, enkephalins and endorphins. The interrelation of purines, pyrimidines, folate and cobalamin metabolism in humans. Xenobiotics: the metabolism of foreign compounds by humans. Biochemical aspects of genetic disease including the use of recombinant DNA techniques for prenatal diagnosis and carrier detection. Molecular studies of malaria and other parasites of the human. The biochemistry of diabetes. Molecular aspects of cancer and its treatment. Practical work to amplify the lectures.

Cell biology from a molecular viewpoint. Biochemical aspects of cellular organisation. The arrangement of the component molecules of organelles, their function in integrated cellular metabolism and the molecular interactions between the cells of multicellular organisms. The biochemistry of the cytoskeleton, carriers and intracellular transport systems. The regulation of cellular processes at the molecular endocrine level. Growth, differentiation and development. Aspects of cancer metabolism, the biochemistry of cell to cell communication and the structure and function of the extracellular matrix. Practical work amplifies the lectures.

The organisation of the genomes of higher organisms derived mainly from the application of recombinant DNA technology and related techniques. Methods used for the isolation, identification and characterisation of eukaryotic genomes in terms of the organisation of single copy and repeated sequences and of coding and non-coding sequences and of several gene clusters, eg the alpha and beta globin gene cluster. Mechanisms known to operate in the control of eukaryotic gene expression, both at the DNA level and at the level of RNA processing. Review of several specialised genetic systems in plants and
animals such as mitochondria, chloroplasts and RNA and DNA tumour viruses. Practical work provides training in the use of sterile techniques and in working with polynucleotides under nuclease-free conditions, using basic techniques such as hybridisation and DNA sequencing.

**BIOC3291**  
**Genes, Genomes and Evolution**  
School of Biotechnology and Biomolecular Sciences  
UOC6 HPW6  
**Prerequisite/s:** BIOS2021 or BIOS2621  
Current concepts and theories in genetics concentrating on eukaryotes including humans. The generation of variation examined at the molecular level for fundamental genetic processes of mutation, recombination and repair. The evolution of the genome, maintenance of variation, the effects of mutations and their relevance to disease. Use of comparative genomics to study genome evolution. Genetics of cellular division process and developmental genetics. Genetics of non-Mendelian characteristics - inheritance of mitochondrial types, imprinting, epigenetics. Practical uses of genetics including the use of transposable elements. Ecological genetics - natural and sexual selection, population structure. Genetics of speciation, molecular evolution and phylogenetics. Perspectives on genetics, history and future. Computer exercises and discussion groups to complement the lectures and introduce controversial topics in genetics.

**BIOC3301**  
**Biochemistry Laboratory Project (Advanced)**  
School of Biotechnology and Biomolecular Sciences  
Enrolment requires school approval  
UOC6  
The course involves directed reading, laboratory work and use of World Wide Web resources. Students will work on a research project under the supervision of a member of the academic staff. It is designed to introduce students to research methodology, and to stimulate critical and lateral thinking in the context of problem solving. Enrolment in this course is by invitation and is based on academic performance. Interested students should contact the Head of School.  
**Note/s:** This course is restricted to Advanced Science students enrolled in Biochemistry, Genetics or Molecular Biology Plans.

**BIOC3621**  
**Molecular Biology of Nucleic Acids (Advanced)**  
School of Biotechnology and Biomolecular Sciences  
UOC6 HPW6  
**Prerequisite/s:** BIOC2101, BIOC2201;  
**Excluded:** BIOC3121  
This advanced course is designed to suit students who plan to pursue research careers in molecular biology or related disciplines. The syllabus is an enhanced version of that described above for BIOC3121 and comprises a detailed analysis of gene structure and function which includes: structure and properties of polynucleotides such as DNA and RNA; structure of chromatin; mechanisms and regulation of gene replication, transcription and translation, DNA repair and the molecular biology of cancer induction; recombinant DNA technology; nucleic acid sequencing, DNA-DNA and DNA-RNA hybridisations important tools of modern molecular biology; protein production using recombinant DNA system. Practical work provides extensive experience with contemporary molecular techniques; literature surveys and web-based research will also be used to enhance the theoretical and practical aspects of the syllabus.

**BIOC3671**  
**Molecular Cell Biology (Advanced)**  
School of Biotechnology and Biomolecular Sciences  
UOC6 HPW6  
**Prerequisite/s:** BIOC2101, BIOC2201;  
**Excluded:** BIOC3271  
A molecular approach to understanding the complex, dynamic interactions that comprise cellular function. Concepts drawn from biochemistry, genetics and molecular biology together with classical cell biology will be integrated to produce a contemporary interpretation of cellular life. Topics to be covered include the structure and function of the cell: membranes, organelles and cytoskeleton; communication within and between cells; the regulation of cell cycling and the differentiation of of cells from single cell to whole organism. The theoretical coverage will be extended by the addition of self-paced exercises which will require the students to survey the latest developments in this area. Practical work illustrates and complements the lectures, provides extensive experience with contemporary molecular cell techniques and will be enhanced by the inclusion of leading-edge technologies. This advanced course is designed to suit students who plan to pursue research careers in molecular cell biology or related disciplines.

**BIOC4103**  
**Genetics 4 Honours Full-Time**  
School of Biotechnology and Biomolecular Sciences  
Enrolment requires school approval  
UOC24  
**BIOC4109**  
**Genetics Honours (PT)**  
School of Biotechnology and Biomolecular Sciences  
Enrolment requires school approval  
UOC12  
**BIOC4318**  
**Biochemistry 4 Honours Full-Time**  
School of Biotechnology and Biomolecular Sciences  
Enrolment requires school approval  
UOC24  
Advanced training in selected areas of biochemistry including a supervised research program that places emphasis on the use of specialised techniques relevant to the research area. A written thesis on the research is required. The Honours program includes a formal component of seminars, an essay and participation in discussion groups.

**BIOM1001**  
**Professional Biomedical Studies**  
Graduate School of Biomedical Engineering  
UOC3 HPW1  
Provides an introduction to biomedical engineering; examines the range of professional engineering activities; highlights ethical considerations associated with clinical applications; and develops skill in oral, written and graphical communication.

**BIOM1001**  
**Professional Biomedical Studies**  
Graduate School of Biomedical Engineering  
UOC3 HPW1  
Provides an introduction to biomedical engineering; examines the range of professional engineering activities; highlights ethical considerations associated with clinical applications; and develops skill in oral, written and graphical communication.

**BIOM2010**  
**Biomedical Engineering Practice**  
Graduate School of Biomedical Engineering  
UOC3 HPW2  
Introduction to clinical situations in hospitals. Presentation of guest lectures by eminent people working in the field. Lecture topics include cardiology, neurology, orthopaedics, and rehabilitation.

**BIOM5000**  
**Thesis A**  
Graduate School of Biomedical Engineering  
UOC3 HPW6
For BE(Mech)/MBiomedE students only. To be taken in the year of completing the BE(Mech)/MBiomedE degree course.

**BIOM5001**
**Thesis Part A**
Graduate School of Biomedical Engineering
UOC6
Thesis topic for BE(Mech)/MBiomedE students only.

**BIOM5002**
**Thesis Part B**
Graduate School of Biomedical Engineering
UOC9
Thesis topic for BE(Mech)/MBiomedE students only.

**BIOM5904**
**Thesis Part B**
Graduate School of Biomedical Engineering
UOC12   HPW12
Thesis for students enrolled in BE(Seng)/MBiomedE only.

**BIOM5909**
**Thesis Part A (Comp 3U)**
Graduate School of Biomedical Engineering
UOC3
Thesis topic for BE(Seng)/MBiomedE students only.

**BIOM5910**
**Thesis Part A**
Graduate School of Biomedical Engineering
UOC6   HPW8
Thesis topic for BE(Elec)/MBiomedE students only.

**BIOM5911**
**Thesis Part B**
Graduate School of Biomedical Engineering
UOC6   HPW8
Thesis topic for BE(Elec)/MBiomedE students only.

**BIOM5920**
**Thesis A (Comp UG)**
Graduate School of Biomedical Engineering
UOC3   HPW7
Prerequisite/s: Enrolment in Program 3728; Excluded: BINF4910, COMP4910, SENG4910.
Thesis topic for BE(Comp)/MBiomedE students only.

**BIOM5921**
**Thesis B (Comp UG)**
Graduate School of Biomedical Engineering
UOC15   HPW14
Prerequisite/s: BIOM5920.
Thesis topic for BE(Comp)/MBiomedE students only.

**BIOM5930**
**Research Project A**
Graduate School of Biomedical Engineering
UOC6
Thesis topic for BE(Chem)/MBiomedE students only.

**BIOM5931**
**Research Project B**
Graduate School of Biomedical Engineering
UOC9
Thesis topic for BE(Comp)/MBiomedE students only.

**BIOM9012**
**Biomedical Statistics**
Graduate School of Biomedical Engineering
UOC6   HPW3

**BIOM9021**
**Research Project B**
Graduate School of Biomedical Engineering
UOC6
This is the second part of the research project when taken over two semesters. BIOM5920 being the first part. Projects are undertaken at the Graduate School of Biomedical Engineering or other relevant institutions towards the end of a student’s program. Topics are chosen in collaboration with a supervisor from the Graduate School.

**BIOM9027**
**Medical Imaging**
Graduate School of Biomedical Engineering
UOC6   HPW3
Fundamentals of producing a medical image, image collection techniques, image reconstruction algorithms. Detailed examination of the four main areas of medical imaging: Nuclear Medicine and Positron Emission Tomography, Ultrasound, Diagnostic Radiology, Magnetic Resonance. Clinical application of each area.

**BIOM9040**
**Analogue Electronics for Biomedical Engineers**
Graduate School of Biomedical Engineering
UOC6   HPW3
Basic theory of passive components, simple network analysis, small signal amplifiers, feedback and oscillators, operational amplifiers and their uses, analogue integrated circuits. Safety requirements for medical instruments, circuit diagram analysis and component identification. Laboratory work involves both design and construction of analogue circuits.
*Note/s:* For students with no electronics background.

**BIOM9050**
**Microprocessors and Circuit Design for Biomedical Engineers**
Graduate School of Biomedical Engineering
UOC6   HPW4
Examination of the fundamental digital and analogue circuits commonly found in medical applications. Emphasis is given to project-oriented practical experience involving aspects of biological signal acquisition by microcomputers. Fundamentals of microprocessor hardware and software.
*Note/s:* Students should NOT have a digital electronics background. *Assumed Knowledge:* BIOM9501, BIOM9040 or equivalents.

**BIOM9060**
**Biomedical Systems Analysis**
Graduate School of Biomedical Engineering
UOC6   HPW3
Analysis of compartmental systems in biology and medicine. Applications include pharmacology, physiology and nuclear medicine. Topics include the mathematics of linear compartmental systems, non-linear systems, tracer methods, parameter estimation by fitting models to date, the optimum design of experiments, and methods of control.
*Note/s:* Mathematics background required.

**BIOM9311**
**Mass Transfer in Medicine**
Graduate School of Biomedical Engineering
UOC6   HPW3
BIOM9321  
**Physiological Fluid Mechanics**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
Fluid mechanics of unsteady flow. Fundamentals of biological fluid flow by way of the governing equations. Kinematics and dynamics, viscous and inertial flow, boundary layers, separation, physiological flows (cardiac, vascular, pulmonary, urinary, etc.) and flow in artificial organs. Emphasis on physical rather than mathematical understanding of the relevant phenomena, to allow realistic appraisal of the nature of flow in a given organ.

BIOM9332  
**Biocompatibility**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
Interaction of biological fluids and cells with foreign surfaces, in vitro tests to assess biocompatibility and thrombogenicity, current status of biocompatible materials as applied to extracorporeal systems, surgical implants and prosthetic devices. Students should note that this course will be offered in S1 from 2004.

BIOM9333  
**Cellular and Tissue Engineering**  
Graduate School of Biomedical Engineering  
Enrolment requires school approval  
UOC6  HPW3  
This course outlines concepts underlying development of cell-based products and aims to give students a theoretical and practical understanding of the tools available for producing such “devices” as well as the biological, physical and chemical constraints of these systems. Specific topics that will be covered include introductory cell biology and biochemistry, cellular mechanics, mass transfer in cells and tissue, analysis of cell and tissue functions, regulatory requirements for biological products and tissue engineering applications. Laboratory classes will be used to allow students to gain some practical experience with cell and scaffold manipulations.

BIOM9410  
**Regulatory Requirements of Biomedical Technology**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
The regulatory requirements of medical devices in Australia, Japan, North America and Europe will be reviewed. Data collection and documentation methods are examined, case studies of medical device registration will be presented. Students should note that this course is web-based.

BIOM9420  
**Clinical Laboratory Science**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
The technologies, tests and operation of a variety of clinical laboratory testing systems (biochemistry, haematology, immunology, histology). Engineering solutions to physiological problems, chemical and biochemical assays.

BIOM9430  
**Electromedical Standards**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  

BIOM9432  
**Chemistry and Physics of Synthetic and Biological Polymers**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
This course outlines the chemistry and physics of synthetic and natural polymers. It is an introductory level offering that covers polymerisation, synthesis of branched macromolecules and networks and polymer behaviour in solution and solid state. It also covers biological polymers. This includes synthesis and characterisation of biological polymers using proteins, polysaccharides and DNA as examples.

BIOM9440  
**Biomedical Practical Measures**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
Hands-on practice in the use and testing of medical transducers and electromedical equipment in common use in hospitals and research laboratories to make measurements of biomedical variables of clinical significance.  
**Note/s:** Limited number of places - contact School Office.

BIOM9450  
**Clinical Information Systems**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
An introduction to medical informatics and information systems, evidence-based medicine and clinical decision support. Aspects of database design, normalisation and structured query language (SQL). A previous knowledge of Java is necessary.  
**Note/s:** Limited number of places - contact School Office.

BIOM9501  
**Computing for Biomedical Engineers**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
Algorithm design and documentation; programming in Java and in JBuilder; object oriented program design; event driven programming in a graphical environment.  
**Note/s:** Highly recommended for Strand B students. This course is for students with little or no computing experience or for those students who wish to learn about object oriented programming in a Windows environment.

BIOM9510  
**Introductory Biomechanics**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
The principles of the mechanics of solid bodies, force systems, kinematics and kinetics of rigid bodies, stress-strain relationships, stress analysis of simple elements application to musculoskeletal system.

BIOM9541  
**Mechanics of the Human Body**  
Graduate School of Biomedical Engineering  
UOC6  HPW2  
Statics and dynamics of the musculoskeletal system: mathematical modelling and computer simulation, analysis of pathological situations.

BIOM9551  
**Biomechanics of Physical Rehabilitation**  
Graduate School of Biomedical Engineering  
UOC6  HPW2  
The application of biomechanics principles to the areas of performance testing and assessment, physical therapy, design of rehabilitation equipment, design of internal and external prostheses and orthoses.  
**Note/s:** This course is not offered on a regular basis.  
**Assumed Knowledge:** BIOM9541.

BIOM9561  
**Mechanical Properties of Biomaterials**  
Graduate School of Biomedical Engineering  
UOC6  HPW3  
The physical properties of materials having significance to biomedical engineering: human tissues; skin; soft tissues; bone; metals; polymers and ceramics. The effects of degradation and corrosion.
BIOM9601
Biomedical Applications of Microcomputers 1
Graduate School of Biomedical Engineering
UOC6   HPW3

Microcomputer architecture; physiological data acquisition systems: input/output signals and devices; assembly language programming; interfacing to higher level languages; the numeric coprocessor; interrupts; graphics; practical sessions on use of Debug, Assembler, familiarisation with interrupt vector table and I/O ports. Major assignment on specific biomedical application (eg. bedside ECG monitor).

Note/s: A reasonably advanced background in microprocessors is required. Entry to course is by interview.

Assumed Knowledge: BIOM9040 and BIOM9050 or equivalents.

BIOM9613
Medical Instrumentation
Graduate School of Biomedical Engineering
UOC6

A critical comparative analysis of the theoretical physics and practical applications of medical transducers and electromedical equipment in common use in hospitals and research laboratories. How to choose a measurement device for a given situation.

BIOM9621
Biological Signal Analysis
Graduate School of Biomedical Engineering
UOC6   HPW3

Use of digital computers to extract information from biological signals. Signal processing using filtering, averaging, curve-fitting and related techniques, and analysis using model simulations, correlation, spectral analysis etc.

Note/s: Basic electronics and mathematics background required.

BIOM9701
Dynamics of the Cardiovascular System
Graduate School of Biomedical Engineering
UOC6   HPW3

Structure of the heart; organisation of the mammalian vasculature; mechanical, electrical and metabolic aspects of cardiac pumping; the solid and fluid mechanics of blood vessels; rheology of blood.

Note/s: Some mathematics background desirable.

BIOM9913
Project Report
Graduate School of Biomedical Engineering
UOC12

Projects are undertaken at the Graduate School or other relevant institutions towards the end of the program. Topics are chosen in collaboration with a supervisor from the Graduate School.

BIOM9914
Masters Project
Graduate School of Biomedical Engineering
UOC12

This is a 12 UOC one session research project replacing BIOM 9913. If you wish to do a 12 UOC project extending over two sessions, please enrol in BIOM 9020 and BIOM 9021. Projects are undertaken at the Graduate School of Biomedical Engineering or other relevant institutions towards the end of a student's program. Topics are chosen in collaboration with a supervisor from the Graduate School. Note: Course offered subject to approval.

BIOS1101
Evolutionary and Functional Biology
School of Biological, Earth & Environ Sciences
UOC6   HPW5

The course examines the evolutionary history of life on earth from origins to humans and the relationship between environment, adaptation and function. Animal (particularly human) and plant physiology are covered with an emphasis placed on adaptation in the Australian context.

BIOS1201
Molecules, Cells and Genes
School of Biological, Earth & Environ Sciences
UOC6   HPW5

The course is concerned with the basic characteristics of all life. The chemistry of life is covered with emphasis on the ways in which living things construct and break down macromolecules. The way in which the genetic code controls these processes depends to a great extent on the structure and function of cell components, and cell biology is a major component of the course. The final topic is genetics - the way in which the genetic code is inherited and the ways in which it can be modified.

Assumed Knowledge: HSC Exam Score: Physics 53-100, or Chemistry 53-100, or Earth and Environmental Science 53-100, or Biology 53-100.

Note/s: Assumed knowledge for BIOS1201 is minimal. If you believe that your academic background is not appropriate, but would like to do Biology, please consult the Director. Students are required to enrol in a laboratory class at their earliest convenience after online enrolment and this requires students to attend Room G27, in the Biological Sciences Building. The course guide is available for purchase at the time of laboratory registration. The laboratories commence in Week 1.

BIOS1401
Biology (Optometry)
School of Biological, Earth & Environ Sciences
UOC4   HPW4

The course covers the basic principles of cellular and animal biology. Includes practical work.

Note/s: Available only to students in Optometry programs 3950 and 3951.

BIOS2011
Evolutionary and Physiological Ecology
School of Biological, Earth & Environ Sciences
UOC6   HPW5

Introduction to functional relationships between living organisms and the environments in which they live. Emphasis on interactions within and between populations, ecological energetics, ecophysiology, and the theory of evolution by natural selection. Plants, animals and microbes are covered. Also serves as an introduction to the process of scientific enquiry.

Assumed Knowledge: BIOS1101 and BIOS1201

Note/s: Students should consult the School of Biological, Earth and Environmental Sciences website for laboratory registration details (www.bees.unsw.edu.au).

BIOS2021
Genetics
School of Biological, Earth & Environ Sciences
UOC6   HPW5

Excluded: BIOS2621

BIOS1101 and BIOS1201 or CHEM1011

Note/s: Students should consult the School of Biological, Earth and Environmental Sciences website for laboratory registration details (www.bees.unsw.edu.au).

BIOS2031
Biology of Invertebrates
School of Biological, Earth & Environ Sciences
UOC6   HPW5

A study of invertebrate diversity emphasising their evolution, morphology, behaviour, and relationships to marine, freshwater and terrestrial environments. Invertebrate conservation and applied aspects of invertebrate biology are included. Practical work includes examining living and preserved specimens (including dissections) in the laboratory and the field, and techniques for invertebrate identification.
**Assumed Knowledge:** BIOS1101 and BIOS1201.

**Note/s:** Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective. There is a compulsory field camp during the mid session break and personal expenses will be incurred.

**BIOS2051**  
Flowering Plants  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Basic plant biology including cell structure, plant morphology and anatomy, water and sugar transport, seed structure and germination, plant growth and development, leaves and photosynthesis, roots, microorganisms and nutrition, evolution of land plants and plant taxonomy. A strong emphasis is placed on Australian native flora. Practical work includes light microscopy; plant anatomy and identification.

**Assumed Knowledge:** BIOS1101 and BIOS1201

**BIOS2061**  
Vertebrate Zoology  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Comparative study of the Chordata, with particular reference to the vertebrates, including morphology, systematics, evolution and natural history, with reference to selected aspects of physiology and reproduction. Practical work to supplement lectures.

**Assumed Knowledge:** BIOS1101 and BIOS1201

**Note/s:** Students should consult the school of Biological, Earth and Environmental Science website for laboratory registration details (www.bees.unsw.edu.au). Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective. Field excursions are compulsory and will involve expense to individual students.

**BIOS2621**  
Genetics (Advanced Level)  
School of Biological, Earth & Environ Sciences  
UOC6  HPW6  

Excluded: BIOS2021

**Assumed Knowledge:** BIOS1101, BIOS1201, CHEM1011

**Note/s:** Available to students in 3990 (Advanced Science, Life Sciences) and, subject to availability of places, to other high performing students. Students should consult the School of Biological, Earth and Environmental Sciences website for laboratory registration details (www.bees.unsw.edu.au).

**BIOS3011**  
Animal Behaviour  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Theory and practice in the biological study of animal behaviour: ethology and behavioural ecology. The observation and description of behaviour along with the development, function and evolution of behaviour in an ecological context are examined as important elements in the analysis of behaviour, particularly social behaviour. Topics include sensory control systems, foraging behaviour, communication, home range, territorial behaviour, aggression and dominance, sexual behaviour, mate choice, mating systems, play and social organisation. Examples are drawn from the Australian fauna and both field and laboratory work are included.

**BIOS3021**  
Comparative Animal Physiology  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

The physiology of invertebrates and vertebrates including the special features of Australian mammals. The topics examined include reproduction, hormones, nerves, blood, circulation, respiration and kidneys with emphasis on the control and integration of organ systems and body functions.

**BIOS3061**  
Plant Ecosystem Processes  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

**BIOS3071**  
Conservation Biology and Biodiversity  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Excluded: BIOS3671

Applications of community biology, population ecology and genetics to management of environmental problems in nature and artificial ecosystems, including Australian examples. Nature and importance of global diversity. Management and design of programs for the conservation of species and ecosystems, including reserves, off-site conservation, and computer simulations.

**Assumed Knowledge:** BIOS1101 and BIOS1201

**Note/s:** Field excursions are compulsory and will involve expense to individual students. Students should consult the School of Biological, Earth and Environmental Sciences website for laboratory registration details (www.bees.unsw.edu.au).

**BIOS3081**  
Ocean Biology and Fisheries  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Excluded: BIOS3681

Marine pelagic and estuarine habitats. The practical application of theory to the ocean environment and its effect on the life of marine organisms. Emphasis on the biology of phytoplankton, zooplankton and fish, together with the study of fisheries. Includes management, marine technology, computer simulations, conservation, other marine vertebrates, aquaculture and environmental concerns. Technical skills, taxonomy and sampling design.

**Assumed Knowledge:** BIOS2031 and BEE52041 (BIOS2041)

**Note/s:** A compulsory field trip will be held during the mid-session break. Personal expenses will be incurred.

**BIOS3091**  
Marine and Aquatic Ecology  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Ecology of marine and freshwater systems, emphasising benthic communities. Population and community dynamics of these systems. Evolution of life histories in the light of constraints of aquatic systems. Emphasis on experimental approaches to aquatic ecology. Special topics considered include chemical ecology, plant/herbivore ecology, and applied aspects of the topic such as mariculture. A section on the biology and taxonomy of marine algae (seaweeds) is included. Fieldwork is an important component of the course.

**BIOS3111**  
Population and Community Ecology  
School of Biological, Earth & Environ Sciences  
UOC6  HPW5  

Excluded: BIOS3611

Factors regulating dynamics of interacting populations, renewable resource management, ecosystem stability, cycles and chaos, simulation modelling in ecology, niche theory, competition, habitat selection, community structure, species diversity, island biogeography, ecological gradients. Succession following disturbance (fire, mining, or logging). Practical work is essential and may involve a field component.
BIOS3161
Life in Arid Lands
School of Biological, Earth & Environ Sciences
UOC6, HPW5
Forty-four percent of Australia is desert and a further 37% is semi-arid grassland or shrub communities. These arid lands contribute much to our unique biodiversity. We examine the history of the formation of the Australian arid lands, their characteristics relative to other arid parts of the world, the evolutionary history of the flora and fauna, adaptations of plants and animals to arid environments, the major arid lands ecosystems and conservation of biodiversity. We apply biological knowledge to issues of land degradation, salinisation of soils, dryland farming, feral animal control and wildlife management for a sustainable future. A field trip to Western NSW is an essential part of the course and students will incur expenses.

Assumed Knowledge: BIOS2031 and BIOS2031 or BIOS2061 or equivalent knowledge of the systematics and morphology of animals and plants.

Note/s: A compulsory field trip will be held during the mid-session break and personal expenses will be incurred.

BIOS3301
Population and Community Ecology for Environmental Engineers
School of Biological, Earth & Environ Sciences
UOC3 HPW3
Factors regulating dynamics of interacting populations, renewable resource management, ecosystem stability, cycles and chaos, simulation modelling in ecology, niche theory, competition, habitat selection, community structure, species diversity. Plant and animal succession following disturbances such as fire, mining and logging. Rehabilitation and restoration procedures following disturbance. Appropriate tutorial topics.

Note/s: Restricted to Environmental Engineering Programs.

BIOS3601
Advanced Field Biology
School of Biological, Earth & Environ Sciences
UOC6 HPW4S
An advanced practical training in diversity, systematics, biology and identification of terrestrial animals and plants. The course is run principally as an intensive one (1) week course at Smiths Lake Field Station during the Easter break. Students will receive theoretical and practical training in current methods of trapping, collecting and identifying animals and plants, estimation of population size, biodiversity, the conduct of animal surveys, and data analyses. The course coverage will include both vertebrate and invertebrate animals and plants.

Assumed Knowledge: BEE2041 (BIOS2041) and familiarity with principles of systematics

Note/s: Available to students in Advanced Science, with unfilled places available to students in Environmental Science, Biological Science and Ecology Majors with a Credit average.

BIOS3671
Conservation Biology and Biodiversity (Advanced Level)
School of Biological, Earth & Environ Sciences
UOC6 HPW6
Excluded: BIOS3071
Applications of community biology, population ecology and genetics to management of environmental problems in nature and artificial ecosystems, including Australian examples. Nature and importance of global diversity, management and design of programs for the conservation of species and ecosystems, including reserves, off-site conservation, and computer simulations. Field excursions are compulsory and will involve expense to individual students. Current conservation issues will be addressed in small group projects.

Assumed Knowledge: BIOS101 and BIOS1201

Note/s: Available to students in 3990 (Advanced Science, Life Sciences) and, subject to availability of places, to other high performing students. Students should consult the school of Biological, Earth and Environmental Sciences website for laboratory registration details (www.bees.unsw.edu.au)

BIOS3681
Ocean Biology and Fisheries (Advanced Level)
School of Biological, Earth & Environ Sciences
UOC6 HPW6
Excluded: BIOS3081
Marine pelagic and estuarine habitats. The practical application of theory to the ocean environment and its effect on the life of marine organisms. Emphasis on the biology of phytoplankton, zooplankton and fish, together with the study of fisheries. Includes management, marine technology, computer simulations, conservation, other marine vertebrates, aquaculture and environmental concerns. Technical skills, taxonomy and sampling design. Personal expenses will be incurred. The Advanced Level has fewer laboratories, but includes a tutorial, use of specialised equipment, as well as a seminar series.

Assumed Knowledge: BIOS2031, BEE2041 (BIOS2041)

Note/s: Available to students in Advanced Science; Life Sciences and, subject to the availability of places, to students in BEnSc (Biologic and Marine) and in 3970 (Biological Science Ecology and Biological Oceanography Majors with a Credit average or better in BIOS courses). A compulsory field trip will be held during the mid-session break.

BIOS4514
Biological Science Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24
A 24UOC research project in Biological Science, to be completed within a single session.

Note/s: Plus BIOS4511, BIOS4521 and 12UOC science courses at Stage 3 (that have not been completed previously), or other science courses approved by the Honours Coordinator. Entry requires the completion of Stages 1-3 of the Advanced Science Plan in Ecology or Biological Science, or a Major in Ecology or Biological Science with 36 units of credit in Stage 3 courses at a Credit average or better.

BIOS4515
Biological Science Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC18
A 18UOC research project in Biological Science, to be taken in combination with BIOS4518, to total 24UOC over 2 sessions.

Note/s: Plus BIOS4511, BIOS4521 and 12UOC science courses at Stage 3 (that have not been completed previously), or other science courses approved by the Honours Coordinator. Entry requires the completion of Stages 1-3 of the Advanced Science Plan in Ecology or Biological Science, or a Major in Ecology or Biological Science with 36 units of credit in Stage 3 courses at a Credit average or better.

BIOS4516
Biological Science Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12
A 12UOC research project in Biological Science taken for two sessions to total 24UOC.

Note/s: Plus BIOS4511, BIOS4521 and 12UOC science courses at Stage 3 (that have not been completed previously), or other science courses approved by the Honours Coordinator. Entry requires the completion of Stages 1-3 of the Advanced Science Plan in Ecology or Biological Science, or a Major in Ecology or Biological Science with 36 units of credit in Stage 3 courses at a Credit average or better.

BIOS4518
Biological Science Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6
A 6UOC research project in Biological Science, taken in each of four sessions to total 24UOC, or completed in fewer sessions by combination with BIOS4515 or BIOS4516.

BIOS4524
Botany Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24
A 24UOC research project in Botany, to be completed within a single session.
BIOS4525
Botany Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC18

A 18UOC research project in Botany, to be taken in combination with BIOS4528, to total 24UOC over 2 sessions.

BIOS4526
Botany Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12

A 12UOC research project in Botany taken over two sessions to total 24UOC.

BIOS4528
Botany Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6

A 6UOC research project in Botany taken in each of 4 sessions to total 24UOC, or completed in fewer sessions by combination with BIOS4525 or BIOS4526.

BIOS4534
Zoology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

A 24UOC research project in Zoology, to be completed within a single session.

BIOS4535
Zoology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC18

A 18UOC research project in Zoology, to be taken in combination with BIOS4538, to total 24UOC over 2 sessions.

BIOS4536
Zoology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12

A 12UOC research project in Zoology taken for two sessions to total 24UOC.

BIOS4538
Zoology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6

A 6UOC research project in Zoology taken in each of 4 sessions to total 24UOC, or completed in fewer sessions by combination with BIOS4535 or BIOS4536.

BIOS4544
Ecology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

A 24UOC research project in Ecology, to be completed within a single session.

BIOS4545
Ecology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC18

A 18UOC research project in Ecology, to be taken in combination with BIOS4548, to total 24UOC over 2 sessions.

BIOS4546
Ecology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12

A 12UOC research project in Ecology, taken for two sessions to total 24UOC.

BIOS4548
Ecology Honours B
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6

A 6UOC research project in Ecology, taken in each of 4 sessions to total 24UOC, or completed in fewer sessions by combination with BIOS4545 or BIOS4546.

BIOT1011
Introductory Biotechnology
School of Biotechnology and Biomolecular Sciences
UOC6 HPW4

This course will focus on the overview of the impact of biotechnology in the achievement of contemporary objectives in the field of medicine, plant and animal science, in food, marine and environmental sciences and draw comparisons with conventional technologies. The concepts of bioethics, patenting and other regulatory issues will also be introduced. The course is intended to cover the broad concept of biotechnology, its historical and contemporary relevance.

BIOT3011
Biotechnology A
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: BIOT2101 or LIFE2101, BIOT2201;
Excluded: BIOT3611.

The basic principles involved in the operation of microbial processes on an industrial scale. Includes: the isolation of commercially useful organisms; the selection, maintenance and improvement of microorganisms using conventional and recombinant genetics; the influence of physical and chemical factors on the microbial environment; the control of environmental factors; extremophile biotechnology; the effects of operational patterns on batch and continuous flow cultivation; air and media sterilisation; the harvesting, purification and standardisation of products; the principles involved in microbial processes for chemical, pharmaceutical and food production. The laboratory component includes manipulation of industrially important microorganisms and isolation of novel microorganisms. Industrial and other invited speakers will cover issues related to animal and plant transgenics; the human genome project and medicine; advances in food biotechnology; and commercialization issues.

BIOT3021
Biotechnology B
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: BIOT1011

Application of principles of biotechnology to the analysis and design of microbial processes of industrial relevance (ethanol, single cell protein, fermented foods and beverages, amino acids and vitamins, microbial polysaccharides, microbial enzymes, secondary metabolites including antibiotics, recombinant proteins, products of mammalian cell culture, waste treatment processes, microbial leaching and metal recovery from low grade minerals). Emphasis on quantitative approach: mass and heat balance calculations, kinetic and thermodynamic analysis, equipment selection and specification, process modelling and application of optimisation techniques. The economics of microbial processes are considered as well as a series of case studies on the technical and economic feasibility of modern biotechnology-based processes. Patent and regulatory issues are also reviewed. Laboratory experiments, tutorials and a small design project complement the lecture program.
BIOT3061
Biopharmaceuticals
School of Biotechnology and Biomolecular Sciences
UOC6  HPW6

The human health care industry is entering an exciting new era, with a wide range of biopharmaceuticals now approved for human use. The sequencing of the human genome, the evolution of new methods for the production of recombinant biopharmaceuticals, the ability to produce human antibodies and recent developments in gene therapy have seen biopharmaceutical discovery and production become a major global focus of research activity. The course is designed to give students a detailed insight into techniques in biopharmaceutical discovery, isolation and characterization. The practical work includes production of a model recombinant biopharmaceutical by cell culture, including downstream processing and characterization using modern techniques analytical biotechnology including mass spectrometry. On-line bioinformatics tutorials and assignments associated with model biopharmaceuticals are included in the practical program.

BIOT3071
Commercial Biotechnology
School of Biotechnology and Biomolecular Sciences
UOC6  HPW4

This course covers aspects important to the commercialisation of biotechnology and related industries and includes: the definition, generation and protection of intellectual property (IP), issue and protection of patents in Australia and overseas, trademarks and copyright, role of confidentiality in protecting non-patentable IP; licencing arrangements and trading in IP. Innovation Management, planning and management of R&D programs, preparation and assessment of business plans. Sources of funding for biotechnology R&D, both corporate and government, establishment of business ventures, joint ventures and strategic alliances. Regulatory and legislative aspects of genetically modified organisms (GMOs) and environmental considerations and concerns, policies in Australia, USA and Europe regarding their use in agricultural, food and pharmaceutical industries. Introduction to the concepts of good manufacturing practice (GMP) for therapeutic goods; regulatory procedures for biotechnology derived therapeutics, process validation. Marketing, licencing and business studies.

BIOT3081
Environmental Biotechnology
School of Biotechnology and Biomolecular Sciences
UOC6  HPW5

This course discusses the commercial applications of bioprocesses to environmental problems. The principles of microbial sensing and adaptation to extreme environments, as discussed in Environmental Microbiology (MICR3071), are expanded in the bioremediation of polluted environments and the recovery of important minerals and precious metals. Similarly, the application of microorganisms in other key environmental areas of biodeterioration, biomineralogy, biosensors, biofuels, biodegradable plastics, waste and water treatment and biocatalysis are also discussed in this course.

BIOT3091
Professional Issues in Biotechnology
School of Biotechnology and Biomolecular Sciences
UOC6  HPW4

This course builds on the framework provided in BIOT3071, Commercial Biotechnology, in providing material necessary for the commercialisation of biotechnology products and training students in professional issues important for their careers. The grounding in IP provided in BIOT3071 will be augmented with material and case studies which cover the developments in IP relevant to the biotech industry. Planning and control of R&D projects, project management. Review of the Australian biotech industry including analysis of sources of capital and comparisons with the situation in the USA. Specific treatment of the regulatory approval process for biopharmaceuticals, with specific material on GMP and process validation for r-DNA derived therapeutics and gene therapy products. The practical/tutorial component in the course will involve the students in small group as well as individual assignments, where presentations will be made to the class. Assignments will cover such areas as drafting of provisional and PCT patent applications; business plans for biotech companies; case studies analysing specific companies and products; requirements for regulatory approval. The course will be carried out in association with staff and conjoint appointments in the School as well as visiting lecturers.

BIOT3100
Fundamentals of Biotechnology
School of Biotechnology and Biomolecular Sciences
UOC3  HPW2

This course introduces important fundamental principles of biotechnology including fermentation and biocatalysis, protein synthesis and engineering and recombinant DNA technology. The applications of these principles are then explored in a series of lectures focusing on environmental biotechnology, drug recovery and production, plant biotechnology, biosources and the economics of bioprocesses. The course is designed to provide an understanding of the principles and applications of biotechnology both in its own and as alternatives to chemical synthesis.  

Note/s: Restricted to programs 3055, 3100 and 3040.

BIOT3611
Biotechnology A (Advanced)
School of Biotechnology and Biomolecular Sciences
UOC6  HPW6

Prerequisite/s: BIOC2101, BIOC2201;  
Excluded: BIOT3011

This course is available to Advanced Science students or as an advanced option to students in other appropriate science programs. The advanced course differs from Biotechnology A (BIOT3011) by providing greater opportunities for self-directed learning, separate laboratory practicals, and for research planning under the guidance of mentors from the academic or research staff. The lecture component of the course differs from that in BIOT3011 in the number and content of lecture and laboratory exams. The goal of the course is to build on the fundamentals acquired in previous courses and develop an understanding of the commercial applications of biological systems. The course will consider the principles involved in microbial processes for chemical, pharmaceutical and food production on a commercial scale. The lecture component will address the nature of the genetic tools used to optimise product formation; the influence of environmental factors on microbial productivity; biodiversity issues; bioprocesses; the nature of industrially important cell types from prokaryotic to higher eukaryotic cells; and the commercial and marketing issues inherent in biotechnological processes. Lectures are supplemented by industrial presentations. The laboratory component includes manipulation of industrially important microorganisms. The development of team skills in a critical review of current research areas is a feature of the course. The course is intended for students interested in the commercial and multidisciplinary perspectives of processes using microbial and other cell types.

BIOT3621
Biotechnology B (Advanced)
School of Biotechnology and Biomolecular Sciences
UOC6  HPW6

Prerequisite/s: BIOT3611

The course covers the bioprocessing and economic principles involved in the operation, development and design of large scale biotechnology-based processes. It includes analysis of fermentation kinetics, batch and continuous modes of operation, bioprocess optimisation, principles of fermentor scale up, downstream processing and bioprocess design as well as principles of economic feasibility analysis. Selected bioprocesses will be examined in detail, including ethanol from renewable resources, amino acid production, antibiotics, large scale manufacture of plasmid DNA, production of viral vectors for gene therapy and the manufacture of therapeutic recombinant proteins from bacterial, yeast and mammalian hosts. Laboratory sessions and case studies will supplement lecture material. The advanced course in Biotechnology B will cover the same core material as Biotechnology B (BIOT3021), but will have a more extensive laboratory/research component integrated with a technical/economic feasibility evaluation and business plan for a new recombinant product.
BLOT4053
Research Project - Biotechnology
School of Biotechnology and Biomolecular Sciences
Enrolment requires school approval
UOC 18, HPW 18
Prerequisite/s: 144 units of credit

The experimental investigation of some aspects of biotechnology.
Note/s: Restricted to program 3052.

BLO4073
Biotechnology Honours Full-Time
School of Biotechnology and Biomolecular Sciences
Enrolment requires school approval
UOC 24

Advanced formal training in selected areas of biotechnology and participation in one of the School’s research projects. Students will be required to attend and participate in the Graduate Seminar program. In addition, students may be required to undertake a reading list and/or essay, at the discretion of the school.
Note/s: Restricted to program 3990/3972.

BLDG1050
Structures 1
Building Construction Management Program
UOC 6, HPW 4

An introduction to structural appreciation; external and internal forces; free body diagrams; static force equilibrium for statically determine structures; member forces in pin-jointed trusses; beam section properties; bending moment, shear force and deflection diagrams for beams; beam stresses in bending and shear; design of steel beams for bending, shear and deflection. Case studies to illustrate how structures of various types support vertical and lateral loads.

BLDG1121
Construction Science
Building Construction Management Program
UOC 6, HPW 4

Properties of materials; plasticity, elasticity, density, porosity, hardness. Optical, electrical, thermal and acoustic properties. Deterioration. Properties and manufacture of building materials; wood, wood products, bricks, fibre cement, ceramics, plastics, sealants and mastics, stones. Concrete technology; cement, aggregates, water and admixtures; properties of fresh concrete: strength considerations; durability, shrinkage and creep; special concretes; nondestructive testing; mix design. Metals in buildings: structural ferrous alloys; corrosion and protection; welding; types of failure, brittle fracture, fatigue, creep; impact resistance; tensile properties; hardness; strain hardening. Fire: behaviour of building materials and structures.

BLDG1211
Construction Technology 1A (Domestic Construction)
Building Construction Management Program
UOC 6, HPW 4

Introduction to the use of drawing instruments. Basic architectural drafting skills. Functional requirements and methods of building single storey family dwellings: brick, brick veneer and timber frame; domestic joinery; staircase construction; finishes; plumbing, drainage and electrical services; methods of setting out and supervision, on site observation and a report on house construction.

BLDG1212
Construction Technology 1B (Low Rise Residential)
Building Construction Management Program
UOC 6, HPW 4
Prerequisite/s: BLDG1211.

Small multistorey buildings from the functional and construction operation viewpoints. Quality control and supervision. Basement, ground floor and upper floor construction; methods of roofing, waterproofing; joinery; internal finishes; minor construction plant, formwork. Construction drafting, onsite observation and report on home unit building.

BLDG1260
Construction Management 1 (Management Principles)
Building Construction Management Program
UOC 6, HPW 3

Library usage. Accessing information: reading, summarising, referencing, report writing and oral presentations. Organisation of and participation in meetings, seminars and lectures. Basic management principles, functions of management, scientific management, management objectives. Structure of the construction industry; benchmarking; total quality management; constructability; partnering and strategic alliance; re-engineering. Development process and statutory controls.

BLDG1281
Construction Law 1A
Building Construction Management Program
UOC 3, HPW 2

Law, including a brief outline of sources of law in New South Wales and the system of judicial precedent. General principles of law of contracts. Contractual rights and obligations. Court structures; Sale of goods; a general introduction to the law of bankruptcy. General principles of law of agency. Law of partnership.

BLDG1282
Construction Law 1B
Building Construction Management Program
UOC 3, HPW 2
Prerequisite/s: BLDG1281.

Commercial Law; Corporations; Trade Practices; Consumer Protection; Torts; Remedies; Succession; Local Government; Real Property; Administrative Law.

BLDG1302
Construction Economics
Building Construction Management Program
UOC 6, HPW 3

The economic structure and function of the building and construction industry, illustrated with examples. Macroeconomic policy and its impact on the building and construction industry. The role of the Australian economy in the world.

BLDG2052
Structures 2
Building Construction Management Program
UOC 6, HPW 4

Principles of structural design for strength, stability and serviceability; design of steel and concrete structures using limit state design; load transfer mechanisms and failure modes in beams and columns; design of beams and columns in steel; bolted joints and welded joints in steel frame; design of reinforced concrete beams and slabs for bending, shear and deflection; reinforcement in columns, footings and other elements; reinforcement detailing; concrete bond and anchorage; durability and concrete cover; case studies of structural failures.

BLDG2101
Construction Technology 2A (Stamped Buildings)
Building Construction Management Program
UOC 6, HPW 4
Prerequisite/s: BLDG1212.

Study of framed industrial buildings with emphasis on steel frames: framing systems including connection methods; roof framing systems; cladding systems including precast concrete walling, metal and glass walling, masonry walling; flooring systems; building access and egress; fire requirements; environmental considerations; site establishment; on site observation and report on construction of industrial buildings.

BLDG2212
Construction Technology 2B (Building Services)
Building Construction Management Program
UOC 6, HPW 4
Prerequisite/s: BLDG2101.
Hydraulic services pertaining to small and medium size projects; hot and cold water reticulation; sewer and storm water drainage; sanitary plumbing, introduction to fire fighting equipment and services; regulatory authorities and requirements. Ventilation theory; ventilation systems and equipment; refrigeration theory; air-conditioning equipment; electrical equipment; telephones and security; lifts and escalators; detection and fire protection; garbage and incinerators.

BLDG2280 Construction Management 2A (Occupational Psychology, Health and Safety)
Building Construction Management Program
UOC6 HPW4
Prerequisite/s: BLDG1260.

BLDG2282 Construction Management 2B (People & Process Management)
Building Construction Management Program
UOC6 HPW4
Prerequisite/s: BLDG1260.
Definition of Personnel Management and Human Resources Management. Stages in the development of human resources management. The leadership/management dialectic. Interpersonal skill development. Team building. Performance management and continuous improvement. Construction project management, concept and application. Role and functions of the project manager; management of all phases of construction projects. Construction strategy, planning and control. Project process management to reliably achieve the project goals; quality, safety, and progress management in design and construction including from a TQM perspective. Application of process management tools.

BLDG2332 Measurement & Documentation
Building Construction Management Program
UOC6 HPW4
Prerequisite/s: BLDG1212.
Quantity surveying; historical background; functions of the quantity surveyor; introduction to the Australian Standard Method of Measurement of Building Works, its importance and application; methods of recording dimensions, checking and correlating plans and specifications; principles of measurement and billing; Bill of Quantities format; elementary billing and measurement of basic trades including finishes, brickwork, woodwork, roofing, concrete and groundwork.

BLDG2482 Computer Applications in Construction
Building Construction Management Program
UOC6 HPW3
Prerequisite/s: BENV1141.
This course discusses computer applications for construction project management, and the creation and distribution of information within the building industry. It includes such topics as: networking and communication technologies; digital document formats and environments; spreadsheets; database systems; computer programs for project planning, cost estimating and cost management; shared project information databases; and CAD product modelling standards for interoperability with estimating and planning applications. This course involves practical use of spreadsheet, database, and project planning programs, with a focus on developing good skills with the Excel spreadsheet program.

BLDG3101 Construction Technology 3A (Tall Buildings)
Building Construction Management Program
UOC6 HPW5
Prerequisite/s: BLDG2212
Functional requirements and building techniques of tall buildings: foundation systems; structural systems including structural steel construction and reinforced concrete construction; enclosure systems including metal and glass cladding; ceiling and partition systems; various methods and materials commonly used to solve functional demands; comparison of systems of construction and their interrelationship; material handling and management including selection of cranes, hoists, and concrete pumps; principles of fire protection in tall building; on site observation and report on tall building construction.

BLDG3102 Construction Technology 3B (Techniques)
Building Construction Management Program
UOC6 HPW5
Prerequisite/s: BLDG3101.
Specialised construction techniques employed on major projects including the selection of plant, equipment and various construction systems: excavation; shoring; ground anchorage; underpinning; piling; formwork; cranes; material handling. Pre-stressed and pre-cast concrete construction. Construction methods with minimal impact on the environment; Building Code of Australia and code requirements; integration and coordination of services; demolition; site establishment; advanced construction techniques; basic geological considerations for building foundations; on-site studies and report.

BLDG3281 Construction Management 3A (Contracts)
Building Construction Management Program
UOC6 HPW3
Prerequisite/s: BLDG1282.

BLDG3284 Construction Management 3B (Planning & Control)
Building Construction Management Program
UOC6 HPW3
Operation research techniques and their relevance to building, concept of planning and control, CPM, PERT, Line of Balance, Multi-activity Chart, computer applications of CPM. Principles and application of Work Study. Risk analysis, decision making process. An integrated project that draws together material covered in previous courses of the program. Simulation of construction conditions including technical, management, business and social aspects that have to be considered by the construction professional.

BLDG3301 Advanced Measurement & Documentation
Building Construction Management Program
UOC6 HPW4
Prerequisite/s: BLDG2332.
Advanced billing and measurement of substructure, structure and services and preliminaries in accordance with the Australian Standard Method of Measurement. Introduction to computerised measurement and billing. Introduction to elemental cost planning.

BLDG3332 Construction Cost Estimating
Building Construction Management Program
UOC6 HPW3
Prerequisite/s: BLDG2332.
Introduction to construction cost estimating including terminology, types of estimates and the tendering process. Analysis of material, plant and labour costs, and the estimation of selected unit rates; preliminaries, supplier and subcontract quotations, general and site overheads. Preliminary estimates. Preparation of contract variations.

BLDG3402 Research Skills
Building Construction Management Program
UOC3 HPW2
An introduction to research methods, analytical techniques and presentation. Theories and philosophies of science and research. Research topics; collecting, generating and evaluating information. Structuring the study and presenting results. Probability: sample spaces and probabilities; probability trees; distribution of random variables; expected value and decision analysis. Statistics: mean, mode, median, standard deviation and variance; normal and binomial distributions; linear regression.

**BLDG4275**
Dispute Avoidance and Resolution
Building Construction Management Program
UOC6   HPW3

Nature of claims, remedies, alternative dispute resolution, mediation, expert appraisal, litigation, moot arbitration.

**BLDG4285**
Professional Practice & Procedure
Building Construction Management Program
UOC6   HPW3

Professional Institutes: Roles, Codes of Conduct; Fee Scales; Professional Indemnity Insurance; The Consultant/Client Agreement; Contract Administration: Variation Orders, Interim Payments and Final Accounts; Tax Depreciation Schedules; Office Management.

**BLDG4304**
Forecasting, Bidding & Cost Control
Building Construction Management Program
UOC6   HPW3
Prerequisite/s: BLDG3301, BLDG3332.

Advanced estimating techniques, competitive tendering, contract cost adjustment; computer techniques applied to estimating. Practical exercises in the preparation of construction project tenders.

**BLDG4305**
Design Evaluation
Building Construction Management Program
UOC6   HPW3
Prerequisite/s: BLDG3301, BLDG3332.

Cost Modelling; Accuracy in estimating; Area Rate Estimates; Functional Area Estimates; Cost Planning: typical cost plan, cost planning techniques, cost planning measurement and pricing; Feasibility Studies; Value Management. Cost planning practical exercise.

**BLDG4314**
Building Economics 3
Building Construction Management Program
UOC6   HPW3
Prerequisite/s: ACCT9002

The business environment; business structures; taxation, depreciation; operating costs; economics of building plant and materials handling systems; financial control in the erection, management and demolition of buildings.

**BLDG4315**
Business & Financial Control
Building Construction Management Program
UOC6   HPW3
Prerequisite/s: BLDG1302.

The business environment; business structures; taxation and depreciation; operating costs; economics of building plant and materials handling systems; financial control in the erection, management and demolition of buildings. Investment Analysis: demand for housing, demand for construction.

**BLDG4492**
Property Development and Valuation
Building Construction Management Program
UOC3   HPW3

**BLDG4501**
Thesis Foundation
Building Construction Management Program
UOC6
Prerequisite/s: BLDG3402.

This course is preparation for BLDG4502 Thesis and must be satisfactorily completed before enrolment in that course. Students are required to submit a developed thesis outline on an approved topic, including a full literature review and a justification of the proposed research methodology.

**BLDG4502**
Thesis
Building Construction Management Program
UOC12
Prerequisite/s: BLDG4501.

Using the thesis outline developed in BLDG4501 Thesis Foundation, the preparation of a thesis that exhibits the following properties: a clearly stated aim or purpose, a review of relevant literature, and the adoption of an appropriate research method demonstrating analysis and synthesis with a justifiable conclusion. The thesis to have a clear structure and development and to be properly referenced with suitable bibliography.

**BLDG9998**
Quantitative Surveying Industry Program
Building Construction Management Program
UOC12

Students proposing to apply for membership in the A.I.Q.S., B.Q.S.M. or R.I.C.S. after graduation should enrol in this course rather than BLDG9999. It must be completed before the start of the final year of the program. The Quantity Surveying Industry Program is to be taken as a six months continuous employment with a professional Quantity Surveying firm or with a firm or building company where Quantity Surveying activities are undertaken. Students should be under the direct supervision of a corporate member of the Australian Institute of Quantity Surveyors or, where this is not possible, under the guidance of a mentor appointed by the Institute. Submission requirements are a daily dairy, report and a completed form from the employer.

**BLDG9999**
Building Industry Program
Building Construction Management Program
UOC12

Eighty days of approved building industry experience at any time to the start of the final year of the Program. Submission requirements are a weekly diary, report and a completed form from the employer.

**BSSM1110**
Perspectives in Medical Science 1
Faculty of Science
UOC3   HPW2

In this course we examine the historical background to the advent of scientific medicine in the 19th and 20th centuries, looking particularly at the intellectual climate which made such innovations possible. This course is restricted to students enrolled in programs 3991 Bachelor of Medical Science and 3821 Science/ Medicine. Assessment by written work and participation, open-book class test. For information regarding this course, please contact the School of History and Philosophy of Science.

**BSSM2220**
Perspectives in Medical Science 2
Faculty of Science
UOC3   HPW2
This course is based on a series of colloquia given by visiting specialists on topics of historical, philosophical and contemporary relevance in medical science. It is intended, as a sequel to BSSM1110, to broaden students' understanding of the extent to which science is important throughout society, well beyond laboratory-based conceptions of scientific activity. The course is available only for students enrolled in program 3991 Bachelor of Medical Science and program 3821 Science/Medicine. For further information regarding this course, please contact the School of Medical Sciences.

BSSM4013
Combined Geology Physics Honours Full-Time
Faculty of Science
Enrolment requires school approval
UOC24

Combines Geology and Physics in Program 0100, made by arrangement with the Heads of the two Schools.

CEIC0010
Mass Transfer and Material Balances
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CHEM1011 or CHEM1301, CHEM1201 or CVEN1531

CEIC0050
Atmospheric Process Chemistry
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CHEM1011 or CHEM1301, CHEM1201 or CVEN1531

CEIC1010
Introduction to the Chemical Industry
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3

Introduction to basic Chemical Engineering and Industrial Chemistry concepts, design, flow sheets, safety and environmental issues. The profession, ethics and careers, Laboratory, Pilot Plant and Industry visits. Case studies of the chemical process industry. Introduction to computing and the student computing facilities, including the use of word processing and spreadsheets within the profession.

CEIC1020
Introduction to Chemical Engineering
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6

CEIC1030
Communication & Business Skills
School of Chemical Eng and Industrial Chemistry
UOC6

Experience is gained in business practices including: company types, structure and organisation, company financing and operation, personnel management, accounting, company law, industrial relations and trade union practices, marketing. A Business Plan is written and company liquidation is undertaken. Product development and quality management issues are covered. Oral and written communication skills are developed.

CEIC2011
Instrumental Analysis - Theory
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CEIC2011

CEIC2012
Instrumental Analysis - Practical
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CEIC2011

Development of laboratory skills with a range of analytical instruments which includes: Selective ion electrode, polarography, potentiometric titrations, UV/Visible spectrophotometry, X-Ray Fluorescence and Diffraction, Gas and Ion chromatography.

CEIC2020
Introduction to Numerical Methods
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CEIC1020, MATH1231 or MATH1241, PHYS1169 or PHYS1111.

Computing for scientific and chemical engineering applications using Pascal. Brief review of basic computer concepts. The Pascal language. Applications in chemical engineering and industrial chemistry such as the solution of heat transfer and chemical reaction problems.

CEIC2110
Material & Energy Balances
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CEIC1020

Solution strategies for material and energy balance problems. Material Balances: Component, elemental and differential material balances. Problems involving bypass, recycle, purge and chemical reaction. Energy Balances: Thermodynamic background: first law; general equation for open and closed systems; shaft work and enthalpy; reference states. Application of energy balances: enthalpy data including steam tables and psychometric charts; heat capacity data; phase change; mixing; heat of solution; enthalpy-concentration diagrams; heats of formation, combustion and reaction. Integrated material and energy balance problems.

CEIC2120
Fluid Flow
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CEIC1020, PHYS1169 or PHYS1111.

CEIC2130
Heat Transfer
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Introduction to various modes and mechanisms of heat transfer. Physical origins and rate equations. Conductivity. Diffusional heat transfer based on shell balances approach for one-dimensional steady state and transient transfer with heat generation and chemical reactions. Composite walls, contact resistance and extended surfaces. Introduction to heat exchangers; log-mean temperature difference, effectiveness - NTU methods.

CEIC3010
Reaction Engineering
School of Chemical Eng and Industrial Chemistry
UOC4 HPW3
Prerequisite/s: CEIC2110, (CHEN2061 or INDC2040).

CEIC3070
Process Control
School of Chemical Eng and Industrial Chemistry
UOC4 HPW4
Prerequisite/s: CEIC2011, CEIC2020, MATH2030
Concepts of process control, including: dynamic modelling of processes, linearization, Laplace transforms, transfer functions, open loop response of first and higher order systems, approximation by first order plus dead time models, concept of control for process regulation and safety, feedback control, block diagrams, PID controllers and tuning methods, closed loop response, stability analysis, single input-single output control loop design, cascade control, feed forward control, control valve characteristics and sizing, as well as introduction to some advanced control concepts. Process control laboratory experiments.

CEIC3110
Thermodynamics
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CEIC2110, (CHEN2061 or INDC2040).

CEIC4070
Laboratory Automation Science
School of Chemical Eng and Industrial Chemistry
UOC4 HPW4
Prerequisite/s: CEIC3070

CEIC4095
Special Research Project Practice
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC9
The experimental investigation of some aspect of an elected topic area in Chemical Engineering

CEIC4096
Research Project Theory Extended
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC6
The experimental investigation of some aspect of an elected topic area in Industrial Chemistry/Chemical Engineering.

CEIC4101
Professional Electives Advanced
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: 132 units of credit
To be chosen from offerings in: CEIC6101 Advanced Reaction Engineering; CEIC6102 Advanced Process Control; CEIC6103 Advanced Particle and Separation Processes; CEIC6104 Advanced Polymers. STUDENTS ENROL IN CEIC6*** NOT CEIC4101. Not all courses run at any one time.

CEIC4102
Professional Electives Extended
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: 132 units of credit
To be chosen from offerings in: CEIC6201 Minerals Engineering (Graduates may qualify for membership for of the Australian Institute of Mining and Metallurgy); CEIC6202 Biochemical Processing 1; CEIC6203 Environmental Management 2A; CEIC6204 Business Management in Chemical Engineering A; CEIC6205 Fuel & Energy 1 (Graduates may qualify for membership of the Australian Institute of Energy). STUDENTS ENROL IN SUBJECT CEIC6*** NOT CEIC4102. Not all courses are offered at any one time.

CEIC4103
Professional Electives
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: 132 units of credit
To be chosen from offerings in: CEIC6201 Minerals Engineering (Graduates may qualify for membership for of the Australian Institute of Mining and Metallurgy); CEIC6202 Biochemical Processing 1; CEIC6203 Environmental Management 2A; CEIC6204 Business Management in Chemical Engineering A; CEIC6205 Fuel & Energy 1 (Graduates may qualify for membership of the Australian Institute of Energy). STUDENTS ENROL IN SUBJECT CEIC6*** NOT CEIC4102. Not all courses are offered at any one time.

CEIC4104
Professional Electives
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: 132 units of credit
To be chosen from offerings in: CEIC6201 Minerals Engineering (Graduates may qualify for membership for of the Australian Institute of Mining and Metallurgy); CEIC6202 Biochemical Processing 1; CEIC6203 Environmental Management 2A; CEIC6204 Business Management in Chemical Engineering A; CEIC6205 Fuel & Energy 1 (Graduates may qualify for membership of the Australian Institute of Energy). STUDENTS ENROL IN SUBJECT CEIC6*** NOT CEIC4102. Not all courses are offered at any one time.

CEIC4105
Professional Electives
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: 132 units of credit
To be chosen from offering in: CEIC6101 Advanced Reaction Engineering; CEIC6102 Advanced Process Control; CEIC6104 Advanced Polymers; CEIC6206 Minerals Engineering - Practice; CEIC6207 Environmental Management 2B; CEIC6208 Business Management in Chemical Engineering B. STUDENTS ENROL IN SUBJECT CEIC6*** NOT CEIC4105. Not all subjects are offered at any one time.
**CEIC4106**

**Professional Electives**

School of Chemical Eng and Industrial Chemistry UOC3

**Prerequisite/s:** 132 units of credit

To be chosen from offerings in: CEIC6206 Minerals Engineering - Practice; CEIC6209 Fuel & Energy 2; CEIC6210 Biochemical Processing 2; CEIC6207 Environmental Management 2B; CEIC6208 Business Management in Chemical Engineering B. STUDENTS ENROL IN SUBJECT CEIC4106. Not all courses are offered at any one time.

**CEIC4110**

**Plant Management and Operation (3041 Program Students only)**

School of Chemical Eng and Industrial Chemistry UOC4

**Prerequisite/s:** CEIC3010

A series of lectures designed to introduce the students to appropriate management techniques. Topics will include: business strategies, leadership, total quality management, safety management. Sixty days of approved Industrial Training are part of the requirements for the satisfactory completion of this subject. The objectives of the industrial training are (1) to develop an appreciation of the structure and operation of industrial organisations, (2) to understand the role of the engineer and engineering in industry, (3) to appreciate the importance of good communications and interpersonal skills and to develop these skills, and (4) to appreciate the ethical basis of engineering practice in industry. Students are required to submit to the school evidence from their employers of each period of training, confirming the work performed, together with a report (2000 words) which should summarise the technical work performed, and the extent to which the Industrial training objectives have been fulfilled. The subject also includes SES3310: This is an objective 5 course which covers social issues arising from future scientific and technological developments and the role that the professional scientist can play in influencing future directions. The subject is taught by a combination of group activities, case studies, projects and seminars. The subject will cover four major topic areas: professional ethics, environmental related issues, safety and liability and controls of future technology.

**CEIC4120**

**Management and Plant Operation**

School of Chemical Eng and Industrial Chemistry UOC6

**Prerequisite/s:** CEIC3010

A series of lectures designed to introduce the students to appropriate management techniques. Topics will include: business strategies, leadership, total quality management, safety management. Students will be required to operate a computer controlled chemical plant. Sixty days of approved Industrial Training are part of the requirements for the satisfactory completion of this subject. The objectives of the Industrial Training are (1) to develop an appreciation of the structure and operation of industrial organisations, (2) to understand the role of the engineer and engineering in industry, (3) to appreciate the importance of good communications and interpersonal skills and to develop these skills, and (4) to appreciate the ethical basis of engineering practice in industry. Students are required to submit to the school evidence from their employers of each period of training, confirming the work performed, together with a report (2000 words) which should summarise the technical work performed, and the extent to which the Industrial training objectives have been fulfilled. The course also includes SES3310, an objective 5 course which covers social issues arising from future scientific and technological developments and the role that the professional scientist can play in influencing future directions. The subject is taught by a combination of group activities, case studies, projects and seminars. The subject will cover four major topic areas: professional ethics, environmental related issues, safety and liability and controls of future technology.

**CEIC4200**

**Industrial Experience**

School of Chemical Eng and Industrial Chemistry UOC18

**CEIC4201**

**Industrial Experience**

School of Chemical Eng and Industrial Chemistry UOC18

**CEIC6101**

**Advanced Reaction Engineering**

School of Chemical Eng and Industrial Chemistry UOC3

This course covers in-depth considerations of the analysis and design of non-isothermal reactors, treatment of variable-density systems, non-catalytic gas-solid reactions (application to minerals processing, pharmaceutics and microelectronic processing), kinetics of heterogeneous reactions, diffusion and reaction in porous crystals, design of fixed bed reactors, trickle-bed and slurry bed reactors.

**CEIC6102**

**Advanced Process Control**

School of Chemical Eng and Industrial Chemistry UOC3

Concepts of linear Multi-Input Multi-Output (MIMO) systems, state-space representation of process systems, linear spaces and linear operators, controllability and observability analysis, Lyapunov stability analysis, stability of interconnected systems, linear optimal control, frequency-domain analysis and controller synthesis for MIMO process systems. Introduction to model predictive control, system identification, robust control, decentralised control.

**CEIC6103**

**Advanced Particle & Separation Process**

School of Chemical Eng and Industrial Chemistry UOC3

The course covers lectures and demonstrations on: Particle characterisation and preparation using the latest techniques, flocc characterisation and its relevance in separation techniques. There will also be relevant lectures on other aspects of separation technologies, theory and practice, novel applications to industry and environment management.

**CEIC6104**

**Advanced Polymers**

School of Chemical Eng and Industrial Chemistry UOC3

We will explore exciting macromolecular chemistry in a range of selected cutting edge research fields. The course is given by four experts in their respective fields and has segments on reversible addition fragmentation chain transfer (RAFT) polymerization, atom transfer radical polymerization (ATRP), Ziegler-Natta Polymerization as well as the application of well-defined polymers for drug delivery and biomedical applications. The course is designed as an interactive discourse between

**CEIC4310**

**Plant Operation (BE/MBio Med Program students only)**

School of Chemical Eng and Industrial Chemistry UOC3

**Prerequisite/s:** CEIC3010

Sixty days of approved Industrial Training are part of the requirements for the satisfactory completion of this subject. The objectives of the Industrial Training are (1) to develop an appreciation of the structure and operation of industrial organisations, (2) to understand the role of the engineer and engineering in industry, (3) to appreciate the importance of good communications and interpersonal skills and to develop these skills, and (4) to appreciate the ethical basis of engineering practice in industry. Students are required to submit to the school evidence from their employers of each period of training, confirming the work performed, together with a report (2000 words) which should summarise the technical work performed, and the extent to which the Industrial training objectives have been fulfilled. The subject also includes SES3310, an objective 5 course which covers social issues arising from future scientific and technological developments and the role that the professional scientist can play in influencing future directions. The subject is taught by a combination of group activities, case studies, projects and seminars. The subject will cover four major topic areas: professional ethics, environmental related issues, safety and liability and controls of future technology.
students and lecturer. The students are actively engaged in judging current scientific research papers as well as developing new research strategies. If you are undertaking Honours, Masters or PhD research in the field of polymer science, this course is highly recommended.

CEIC6201
Minerals Engineering
School of Chemical Eng and Industrial Chemistry
UOC3

Principles and applications of physical mineral processing, hydrometallurgy and electrometallurgy covering comminution, flotation, solid/liquid separation, dewatering, leaching, solvent extraction, purification and separation processes, electrowinning/ refining and waste processing. Emphasis is placed on throughput and process calculations for the design of mineral processing plants.

CEIC6202
Biochemical Processing 1
School of Chemical Eng and Industrial Chemistry
UOC3

CEIC6203
Environmental Management 2A
School of Chemical Eng and Industrial Chemistry
UOC3

CEIC6204
Business Management in Chemical Engineering A
School of Chemical Eng and Industrial Chemistry
UOC3

The aims of this course are to introduce issues which affect business decisions encountered by management in the chemical industry. Topics include domestic and export markets, market growth, the lemming effect and product life cycles. The distinction between issues and problems using PVC and the chlorine debate is discussed. Factors affecting plant life: scale up, retrofitting, competing technologies etc. Environmental and compliance issues including green chemistry. The petrochemical industry and in particular the polymer manufacturing industry is used to illustrate the main areas. Industry speakers and site visits are used to maintain relevance and topicality.

CEIC6205
Fuel & Energy 1
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC3

Current energy resources and alternatives for the future. Basic principles of fuel conversion processes: gasification, carbonisation, oil refining etc. Introduction to combustion of solid, liquid and gaseous (fossil) fuels.

CEIC6206
Minerals Engineering - Practical
School of Chemical Eng and Industrial Chemistry
UOC3

Practice - This part of the course involves a metallurgical testwork program where students will be required to conduct tests to determine conditions for optimising processing options. Students are required to process an ore using mineral processing equipment to determine optimum design criteria for processing the raw material given into final products.

CEIC6207
Environmental Management 2B
School of Chemical Eng and Industrial Chemistry
UOC3

CEIC6208
Business Management in CE B
School of Chemical Eng and Industrial Chemistry
UOC3

This course considers the skills required to manage world class manufacturing plants. Topics covered include: features of the world's best manufacturing plants; manufacturing as an integral part of the business; human resource management; reliability management; quality management systems; risk management; information technology management; supply and stock management; customer service; and, bench-marking.

CEIC6209
Fuel & Energy 2
School of Chemical Eng and Industrial Chemistry
UOC3

CEIC6210
Biochemical Processing 2
School of Chemical Eng and Industrial Chemistry
UOC3

This subject will focus on pharmaceutical processing for chemical engineers and industrial chemists. Planned topics include an overview of the pharmaceutical industry, process engineering in the pharmaceutical industry, good manufacturing practices, pharmacokinetics, regulatory aspects, clinical trials, drug delivery systems/formulations, occupational health and safety aspects in the industry, and marketing. This course may be supplemented by site visits and industry speakers.

CEIC6211
Polymer Chemistry for Chem Eng
School of Chemical Eng and Industrial Chemistry
UOC3

This subject is designed for chemical engineering students who wish to gain general understanding of polymerization processes. Particular emphasis is given to free-radical (co)polymerization processes, their reactions, basic kinetics and industrial applications. The course will also address polymer characterization techniques ranging from chromatography to mass spectrometry. In addition, novel living methods of free-radical polymerization will be discussed. The material may be augmented with lab visits, demonstrations, and industry visits.

CHEM1000
Chemistry at the Cutting Edge
School of Chemistry
UOC3 HPW2

Just what are the big issues in contemporary chemistry? This course takes an investigative approach to thinking about some of the challenging issues and frontiers in chemistry such as molecular machines, the chemical basis of memory, green chemistry, smart materials and the chemical origins of life.

Note/s: Restricted to Advanced Science students.

CHEM1011
Fundamentals of Chemistry 1A
School of Chemistry
UOC6 HPW6

Excluded: CHEM1031

CHEM1021
Fundamentals of Chemistry 1B
School of Chemistry
UOC6 HPW6

Prerequisite/s: CHEM1011, CHEM1041

Excluded: CHEM1041

CHEM1031
Higher Chemistry 1C
School of Chemistry
UOC6 HPW6

Excluded: CHEM1011

**CHEM1041**

**Higher Chemistry 1D**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1031, CHEM1011, CHEM1021, CHEM1041  
Excluded: CHEM1817, CHEM1819, CHEM2011, CHEM2818.

**CHEM1817**

**Chemistry 1ME**

School of Chemistry  
UOC3  HPW3  
Excluded: CHEM1011, CHEM1021, CHEM1031, CHEM1041.

**Note/s:** Restricted to Programs 3683, 3688, 3710, 3711, 3712 and 3985. Alternative courses are available to avoid timetable clashes. Please consult with the School.

**CHEM1819**

**Biological Chemistry for Optometry Students A**

School of Chemistry  
UOC6  HPW6  
Excluded: CHEM1817, CHEM2011, CHEM2031, CHEM2818, CHEM2839.

**Note/s:** Restricted to program 3950.

**CHEM1829**

**Biological Chemistry for Optometry Students B**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1819

**Assumed Knowledge:** A basic knowledge of chemistry equivalent to year 11 high school level.  
**Note/s:** Only offered off-campus via web delivery.

**CHEM2011**

**Physical Chemistry**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041, MATH1021 or MATH1031 or MATH1231 or MATH1241.

**Note/s:** Alternative courses are available to avoid timetable clashes. Please consult with the School.

**CHEM2021**

**Organic Chemistry**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041  
Excluded: CHEM1817, CHEM1819, CHEM2011, CHEM2818.

Applications of spectroscopy in structure elucidation. Reactive intermediates, addition and rearrangement reactions, carbonyl group chemistry. Chemistry of aromatic compounds.  
**Note/s:** Alternative courses are available to avoid timetable clashes. Please consult with the School.

**CHEM2041**

**Chemical and Spectroscopic Analysis**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041, MATH1021 or MATH1031 or MATH1231 or MATH1241  
Excluded: CHEM2818.

Principles and applications of chemical and analytical spectroscopy. Statistical treatment of data. Titrimetric and potentiometric analysis. Separation techniques.

**CHEM2718**

**Physical Chemistry for Materials Science and Engineering**

School of Chemistry  
UOC3  
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041, MATH1021 or MATH1031 or MATH1231 or MATH1241  
Excluded: CHEM2011, CHEM2818.

**CHEM2828**

**Organic and Inorganic Chemistry for Nanotechnology**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041, MATH1021 or MATH1031 or MATH1231 or MATH1241  
Excluded: CHEM2011, CHEM2818, CHEM2839.

Reactive intermediates, addition and rearrangement reactions, carbonyl group chemistry. Chemistry of aromatic compounds. Electronic and geometric structure of inorganic compounds. Coordination chemistry. Transition and non-transition metal chemistry.

**CHEM2839**

**Inorganic Chemistry**

School of Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041  
Excluded: CHEM2011, CHEM2818, CHEM2839.

Electronic structure of atoms and molecules in the solid state. Principles of coordination chemistry. Occurrence, preparation, properties and reactions of selected compounds of transition and main group elements.
CHEM2921
Food Chemistry 1
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM1011 or CHEM1031, CHEM1021 or CHEM1041

CHEM3011
Physical Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: 6 units of credit in Level 1 Physics, CHEM2011, CHEM2041, CHEM2031 or CHEM2839.

Elements of symmetry and group theory appropriate to molecular structure and spectroscopy. Quantum chemistry; atomic and molecular spectroscopy - principles and applications.

CHEM3021
Organic Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM2021

CHEM3031
Inorganic Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM2031 or CHEM2839

Descriptive chemistry and bonding, stereochemistry, magnetic and spectroscopic properties, stabilities of complexes of normal and inner transition series elements. Stabilisation of oxidation states. Aspects of the chemistry of p-block elements including the inert pair effect.

CHEM3041
Analytical Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM2041

Instrument design, theory and operating principles for the following instrumental areas: electrochemical, atomic and molecular spectroscopy, chromatography, mass spectrometry, automated analysis.

CHEM3101
Project Laboratory in Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM3011 or CHEM3021 or CHEM3031 or CHEM3041

Group projects in instrumental and synthetic chemistry. Students choose two 7-week projects, one in each area. The course includes familiarisation with literature and database searching, project planning and risk assessment, preparation of oral and written project reports.

CHEM3201
Topics in Contemporary Chemistry A
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM3011 or CHEM3021 or CHEM3031 or CHEM3041

An interdisciplinary course emphasising the latest advances in chemistry. A diverse range of topics will be offered each year from which students will select four. Topics will vary depending on availability and interest. Indicative Topics: supramolecular chemistry and molecular recognition; synthetic strategies in organic chemistry; molecular modelling and drug design; organometallic chemistry; surface chemistry and analysis; solid-state chemistry; polymer structure and characterisation; introduction to chemometrics; mass spectrometry.

Note/s: Re CHEM3201 and CHEM3202 Topics in Contemporary Chemistry: A wide range of topics will be offered each year (8 - 12 depending on availability and interest). Students can select 4 topics (6UOC) or 8 topics (12UOC).

CHEM3202
Topics in Contemporary Chemistry B
School of Chemistry
UOC12, HPW12

Prerequisite/s: CHEM3011 or CHEM3021 or CHEM3031 or CHEM3041

An interdisciplinary course emphasising the latest advances in chemistry. A diverse range of topics will be offered each year from which students will select eight. Topics will vary depending on availability and interest. Indicative Topics: supramolecular chemistry and molecular recognition; synthetic strategies in organic chemistry; molecular modelling and drug design; organometallic chemistry; surface chemistry and analysis; solid-state chemistry; polymer structure and characterisation; introduction to chemometrics; mass spectrometry.

Note/s: Re CHEM3201 and CHEM3202 Topics in Contemporary Chemistry: A wide range of topics will be offered each year (8 - 12 depending on availability and interest). Students can select 4 topics (6UOC) or 8 topics (12UOC).

CHEM3311
Environmental Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM3041

Selected topics in advanced environmental chemistry. Topics will be offered from a list including: heavy metals, detoxification mechanisms and inorganic speciation; sampling and strategies for environmental analytical chemistry; atmospheric chemistry and pollution mechanisms; case studies of organic pollutants and remediation mechanisms. The laboratory component includes environmental project work and an introduction to regulatory requirements.

CHEM3811
Food Chemistry 2
School of Chemistry
UOC6

CHEM3829
Organic Chemistry
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM2021

The spectroscopic identification of organic compounds, free radical chemistry and electroorganic processes, various aspects of the organic industrial processes such as industrial synthesis based on petrochemicals, and organometallic reactions of industrial interest. Selected topics from the dyestuff, pharmaceutical and agricultural industries.

CHEM3901
Environmental Toxicology
School of Chemistry
UOC6, HPW6

Prerequisite/s: CHEM1011 or CHEM1031.

Classification and properties of toxic substances. Biological properties of important classes of chemical compounds. Fate of xenobiotics in the human body, including detoxification and bioactivation. Chemical transformations of pollutants in the environment; air, water and soil pollution. Analysis of environmental pollutants at trace levels.

CHEM3997
Special Project in Chemistry 3
School of Chemistry

Enrolment requires school approval
UOC12, HPW12
Short theoretical or experimental research project, supervised by a member of academic staff. Project planning, literature review, project development, oral and written reporting.

CHEM3998
Special Project in Chemistry 2
School of Chemistry
Enrolment requires school approval
UOC6  HPW6

Short theoretical or experimental research project, supervised by a member of academic staff. Project planning, literature review, project development, oral and written reporting.

CHEM4003
Advanced Chemistry 4 Honours
School of Chemistry
Enrolment requires school approval
UOC24

Designed for those with a higher level of preparedness in Chemistry. A multifaceted course that will give students a high level of basic research skills, especially in critical evaluation of data and communication of results, but with a specialised focus on Chemistry. Consists of a selection of lectures and seminars on advanced topics in Chemistry and a research project.

CHEM4004
Advanced Chemistry 4 Honours (Mid-Year Start)
School of Chemistry
Enrolment requires school approval
UOC24

Designed for those with a higher level of preparedness in Chemistry. A multifaceted course that will give students a high level of basic research skills, especially in critical evaluation of data and communication of results, but with a specialised focus on Chemistry. Consists of a selection of lectures and seminars on advanced topics in Chemistry and a research project.

CHEM4005
Chemical Sciences 4 (Honours)
School of Chemistry
Enrolment requires school approval
UOC24

Designed for those with broad interests in Science but with a wish to specialise in Chemistry. A varied program that will give students a high level of basic research skills, with emphasis on the critical evaluation of data and communication of results. Consists of a limited series of lectures and seminars on advanced topics in Chemistry, a literature review and research project on a major topic outside the review area.

CHEN2050
Chemical Engineering Laboratory 1
School of Chemical Eng and Industrial Chemistry
UOC3  HPW3
Prerequisite/s: CEIC1020

An introduction to laboratory work in chemical engineering including technical report writing, flow sheet preparation, information retrieving and data processing techniques. Experiments in this subject are designed to demonstrate principles of industrial processes. Industrial operations are also analysed via reports from literature or multimedia, including videos.

CHEN2061
Introduction to Process Chemistry 1
School of Chemical Eng and Industrial Chemistry
UOC6  HPW6
Prerequisite/s: CHEM1021 or CHEM1041

CHEN2062
Introduction to Process Chemistry 2
School of Chemical Eng and Industrial Chemistry
UOC3  HPW3
Prerequisite/s: CHEN2061

An introduction to and survey of the organic and inorganic chemistry of industrially important products.

CHEN2140
Mass Transfer
School of Chemical Eng and Industrial Chemistry
UOC3  HPW3

Introduction to various modes and mechanisms mass transfer. Physical origins and rate equations. Diffusivity. Diffusional mass transfer based on shell balances approach for one-dimensional steady state and transient transfer. Analogies between Heat and Mass Transfer Applications.

CHEN3021
Systems Modelling & Analysis
School of Chemical Eng and Industrial Chemistry
UOC3  HPW2
Prerequisite/s: CEIC2020, CEIC2110, CEIC2130, MATH2030

Mathematical tools used in the modelling and analysis of chemical, mineral, and environmental processes. Fundamental modelling of chemical, mineral, and environmental systems, based on physical laws, including modelling of lumped systems, discrete systems, multivariable systems, and distributed parameter processes. Application of mathematical analysis tools including: matrix and vector operators, solution of ordinary and partial differential equations, linearization methods, and functional analysis to the solution of problems in the chemical, mineral and environmental engineering fields. Statistical applications including parameter estimation, empirical modelling.

CHEN3022
Process Modelling & Optimisation
School of Chemical Eng and Industrial Chemistry
UOC3  HPW3
Prerequisite/s: CEIC2020, MATH2030

Techniques to solve models of chemical and mineral processes, and process optimisation with respect to financial and environmental objectives. The concepts of solution to process models covered include solution of single and multi-variable linear and nonlinear equations, numerical solution of ordinary differential equations, and parameter estimation from process data. The concepts of process optimisation covered include single and multi-dimensional nonlinear optimisation, linear programming, and dynamic programming. The methods are taught using examples of common applications of the presented concepts in the chemical and mineral processing industries.

CHEN3031
Advanced Transport Phenomena
School of Chemical Eng and Industrial Chemistry
UOC3  HPW3
Prerequisite/s: CEIC2120, CEIC2130, CHEN2140, MATH2030

Note: This course is an extension of material given in CEIC2120 Fluid Flow, CEIC2130 Heat Transfer and CHEN2140 Mass Transfer.

CHEN3040
Separation Processes 1
School of Chemical Eng and Industrial Chemistry
UOC4

CHEN3050
Particle Mechanics
School of Chemical Eng and Industrial Chemistry
UOC3

CHEN3062
Particles, Separation, Heat Exchangers and Pressure Vessels
School of Chemical Eng and Industrial Chemistry
UOC6

CHEN3065
Plant and Equipment Design
School of Chemical Eng and Industrial Chemistry
UOC4 HPW4

Prerequisite/s: CEIC2110, CEIC2130, MATH2030.

CHEN3067
Process Design & Economics
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3

Prerequisite/s: CEIC2110, CEIC2130, MATH2030.

CHEN3068
Process Design & Safety
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3

Prerequisite/s: CEIC2110, CEIC2130, MATH2030.

Process safety: Techniques for assessing safety and risk of existing and proposed process plants. Systems reliability, HAZOP and HAZAN. Pressure and explosion relief. Laboratory safety.

CHEN3080
Chemical Engineering Practice 2
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3

Prerequisite/s: CEIC2110, CEIC2120, CEIC2130, CHEN2050, CHEN2062, CHEN2140

An integrated chemical engineering laboratory incorporating experiments in fluid flow, heat/mass transfer, thermodynamics and kinetics, mineral processing and fuel technology. The objectives of the experiments are to demonstrate, reinforce and extend the principles of chemical engineering which are used in the investigation of chemical engineering problems and to develop an interest in experimentation and efficiency in writing technical reports and presenting technical seminars.

CHEN4031
Environmental Management 1
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3

This course deals with conventional and advanced separation processes for water and air pollution control, effluent treatment and waste minimisation in the Process Industries. Topic areas covered will be selected from: Gravity Separations, Filtration Processes, Sorption Processes, Extraction Processes, Membrane Technology, Biological Processes, Design, Control and Monitoring, Clean Production Technologies. Management Issues: Sustainability, decision making, environmental management system (ISO14001), life cycle analysis, material and flux analysis.

CHEN4081
Design Project
School of Chemical Eng and Industrial Chemistry
UOC8 HPW6

Prerequisite/s: 132 units of credit

The project covers the engineering of all or part of a process plant. It requires the application of material covered in the entire undergraduate Chemical Engineering Degree program. The minimum requirements of the project are specified by the relevant engineering institutions accreditation standards. The project includes: selection and evaluation of the process flow sheet; design of facilities for processing, transport and storage of materials within the plant; plant sizing; equipment selection and cost estimation including utility requirements; plant layout and location; evaluation of the economic viability of the plant; control scheme development; hazard and risk assessment; preparation of an environmental impact statement; preparation of a piping and instrumentation diagram. All aspects of the design are completed with regard to statutory requirements. Students develop skills in team work, interpersonal relationships, decision making and technical capabilities.

CHEN4091
Research Project Theory
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3

Prerequisite/s: 132 units of credit

The course requires that the student select a topic in Chemical Engineering, undertake a literature survey on that topic and produce a report.

CHEN4092
Research Project Practice
School of Chemical Eng and Industrial Chemistry
UOC12 HPW10

Prerequisite/s: CHEN4091

The experimental investigation of some aspect of an elected topic area in Chemical Engineering.

CHEN4093
Small Research Project Theory
School of Chemical Eng and Industrial Chemistry
UOC4 HPW4

Prerequisite/s: 132 units of credit
The course requires that the student elect a topic in Chemical Engineering, undertake a literature survey on that topic and produce a report.

CHEN4094
Small Research Project Practice
School of Chemical Eng and Industrial Chemistry
UOC8 HPW8
Prerequisite/s: CHEN4093

The experimental investigation of some aspect of an elected topic area in Chemical Engineering.

CHIN1006
Introductory Chinese A1 (Complete Beginners)
Department of Chinese & Indonesian Studies
UOC6 HPW6
Excluded: CHIN1000, CHIN1106, HSC Chinese, native speakers of Mandarin Chinese, GENT0436, GENT0437

This is an integrated Standard Modern Chinese language skills program for beginners without any knowledge of Chinese and for background (dialect) speakers with no previous character knowledge. Students are taught in different groups according to their language background. The program combines listening, speaking and reading. The emphasis is on the development of communicative language competence. It includes an introduction to Chinese culture and civilisation.

CHIN1007
Introductory Chinese A2
Department of Chinese & Indonesian Studies
UOC6 HPW6
Prerequisite/s: CHIN1006 or equivalent;
Excluded: CHIN1000, CHIN1107, HSC Chinese, native speakers of Mandarin Chinese

Further consolidation and development of language skills acquired in CHIN1006.

CHIN2006
Intermediate Chinese Language A1
Department of Chinese & Indonesian Studies
UOC6 HPW5
Prerequisite/s: CHIN1000 or CHIN1007 or CHIN1107 or equivalent;

Designed for students who have acquired a basic level of spoken Chinese and a working knowledge of up to six hundred characters in their first year of study as well as for those students who enter the Chinese language program with an equivalent knowledge of Chinese characters. The language component combines thought provoking conversation topics with a communicative approach and consolidates writing skills. A cultural component and a component for background speakers complement the program.

Note/s: Excluded HSC Chinese. Students are grouped according to their language ability.

CHIN2007
Intermediate Chinese Language A2
Department of Chinese & Indonesian Studies
UOC6 HPW5
Prerequisite/s: CHIN2006 or CHIN2106 or equivalent;

A continuation of CHIN2006. The language component of 4 hours per week is complemented by the cultural component of 1 hour per week.

Note/s: Excluded HSC Chinese.

CHIN2210
Chinese English Translation
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: CHIN1100 or CHIN1207;
Excluded: CHIN2100.

Uses authentic texts to help students acquire advanced skills of translating from Chinese into English and vice versa. Techniques for analysing and rendering texts of different styles and degrees of complexity will also be examined.

CHIN2211
Interpreting Between Chinese and English
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: CHIN1100 or CHIN1207;
Excluded: CHIN3100.

Specialises in two-way interpreting in various contexts including business, law, social welfare, health and public relations. The emphasis is on enhancing linguistic competence and cultural awareness while at the same time conveying professional knowledge and skills.

CHIN2220
Contemporary Chinese Literature
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: CHIN1100 or CHIN1207;
Excluded: CHIN3020.

Offers an overview of contemporary Chinese literature from 1949 to the present. Covers different genres such as short stories, prose and poetry as well as literary criticism.

CHIN2221
Classical Chinese Literature
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: CHIN1100 or CHIN1207

The ability to read classical Chinese or wenyan is essential for a thorough understanding of Chinese language, history and culture because, after all, the main corpus of literature on these topics is written in classical Chinese. Presents an overview of China’s literary tradition focussing, in particular, on literary techniques used in a variety of text types such as poetry, essays, fiction and drama.

CHIN2222
The Chinese Lyric Journey: Classical Poetry and Painting
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: CHIN1100 or CHIN1207 or CHIN3107

Examines the interrelationship between classical Chinese poetry and painting in a broad context of Chinese poetics and aesthetics from an interdisciplinary perspective. A comparative approach will also be adopted to explore the similarities and differences between Chinese and European aesthetics - such as Chinese literati artists and French impressionists - paying particular attention to the philosophical and cultural milieu of their times. In addition to theoretical writings, the class will read and analyse classical Chinese literary and artistic works which will be treated both as artistic creations and objects of aesthetic appreciation.

CHIN3101
Chinese Social and Cultural Change through Visual Art
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: 36 units of credit

Traces and analyses Chinese social and cultural change through visual art. In this course, art is considered a significant sociocultural text and is examined and analysed as such. While mainly following anthropological approaches, this study is, to a large extent, interdisciplinary. Development and transformation of visual art in China are examined with the aim of understanding social and cultural change in contemporary China. Students also gain a knowledge of relevant and current anthropological and cultural theories and their application to the study of Chinese culture and art.

Note/s: The course will be taught in English.

CHIN3202
Chinese Cinema
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: GENT0421

This is an integrated Standard Modern Chinese language skills program with an equivalent knowledge of Chinese characters. The program combines listening, speaking and reading. The emphasis is on the development of communicative language competence. It includes an introduction to Chinese culture and civilisation.
Since the mid-1980s, films from China have received critical acclaim in many circles and substantial scholarly response, both from within and outside Chinese Studies. Analyses significant feature and documentary films from China, beginning with examples of the cinema of the 1930s and 1940s, and highlights from the cinema of the hard-line Communist period. Examines examples from the ideological thaw in the late 1970s, the New Wave films of the 1980s and several avant-garde films from the 1990s.

**CHIN2303**  
**Gender in Contemporary Chinese Culture and Society**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Aims at gaining insights into the situation of gender among China’s Han majority and its many ethnic minorities. Examines gender in various contexts such as politics, religion, economy, the arts, ethnicity, Westernisation and globalisation. Specific topics include ideology of gender relations, sexual division of labour, gender representation in theatre and visual arts, gendered roles in religious practices, marriage customs, and morality and sexuality. Students learn relevant cultural theory and its application to the study of gender in contemporary China. Study materials include relevant academic writings and multimedia sources.

**CHIN2310**  
**Along the Silk Road: Conquerors, Traders and Explorers**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: GENT0420

Introduces students to the many cultural influences, which contributed to the formation of the ancient world along the ‘Silk Road’. The ‘Silk Road’ has been the link between the great civilisations of Europe and Asia. Travelled by conquerors, missionaries, traders and explorers, the ‘Silk Road’ carried ideas, religion, arts, technologies, cuisines and diseases, as well as silk and trade goods of all descriptions.

**CHIN2312**  
**Chinese Seminar Option**  
Department of Chinese & Indonesian Studies  
Enrolment requires school approval  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
A three hour a week seminar on selected topics on the culture and society of China.

**CHIN2313**  
**Introduction to Chinese Performing Arts**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Offers insights into various forms of Chinese performing arts and their origins, historical development, contemporary situation and interactions beyond China. Learning materials include relevant academic writings and multimedia sources. Students learn contemporary cultural theory through examining live cases of Chinese performing arts.

**CHIN2314**  
**Introduction to Chinese Musical Culture**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
A systematic introduction to traditional and contemporary Chinese musical culture. Students learn contemporary theories in ethnomusicology, anthropology and cultural studies and their application in Chinese studies and the study of musical culture. Study materials include relevant academic writings, multimedia sources, and live performance.

**CHIN2315**  
**Transnational Chinese Media**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Examines popular culture in the Chinese-speaking world from a cultural and political perspective, paying particular attention to developments in literature, music, film, art, and digital media from the turn of the twentieth century through to the present day. Emphasises a core understanding of historical and cultural context as well as theoretical approaches to the phenomenology of media in popular culture, postcolonial theory, and diasporic studies.

**CHIN2500**  
**Advanced Chinese Business Language**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: CHIN1207

Introduces students to the language requirements for business and management in China through project work on Chinese language management case studies. Discusses and analyses a number of case studies and students will do project work and prepare presentations based on these cases.

**CHIN2501**  
**Chinese Business Enterprise**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 48 units of credit;  
Excluded: IBUS2105, MGMT2105

An introduction to business and management in the People’s Republic of China. Covers China’s macro-economic and micro-economic environment, including enterprise reform, enterprise finance and stock markets, accounting and taxation, foreign trade and internationalisation, and the management of foreign invested enterprises. The nature of Chinese business enterprises and management practices will be covered in detail, as well as Australian-Chinese business relations, including trade and investment links.

**CHIN2502**  
**Commercial Chinese**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: CHIN1207

Introduces students to the language requirements for business and management in China through project work on Sino-foreign joint venture enterprises and wholly owned foreign enterprises. We will study the application and approval process and the related forms and documents. Students will develop their own projects and prepare Chinese language documentation.

**CHIN2800**  
**Cantonese Phonology**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: CHIN1207

This course introduces Cantonese phonology to Mandarin speakers who have completed the first-year courses.  
*Note*: Excludes Cantonese speakers.

**CHIN2801**  
**Cantonese Morphology**  
Department of Chinese & Indonesian Studies  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Analyses Hong Kong Cantonese morphology in terms of root, stem, affix and loan words. Looks at the comparison of Hong Kong Cantonese morphemes with their semantic equivalents in Mandarin, as well as some aspects of written language.  
*Note*: Excludes Cantonese speakers.

**CHIN3004**  
**Advanced Chinese (In-Country)**  
Department of Chinese & Indonesian Studies  
Enrolment requires school approval  
UOC6  HPW5  
Prerequisite/s: CHIN2000 or CHIN2005 or CHIN2007 or CHIN2107 or equivalent;  
Excluded: CHIN1206, CHIN3000, CHIN3106
Designed to combine in-country cultural experience with intensive language training at an advanced level. This summer course develops students’ communicative competence in a Chinese university setting. Aims to expand knowledge of Chinese characters and general language competence in a variety of areas. Prepares students to enter CHIN3006 at a higher level from where they can proceed to Professional Electives and Chinese Studies courses.

CHIN3006 Advanced Chinese A1
Department of Chinese & Indonesian Studies
UOC6 HPW5
Prerequisite/s: CHIN2000 or CHIN2005 or CHIN2007 or CHIN2107 or equivalent;
Excluded: CHIN1206, CHIN3000, CHIN3106

Aims to further develop students communicative competence in Chinese to a level at which they can discuss contemporary social, cultural and intellectual issues. A wide range of texts and authentic materials from Chinese media are studied. This course is open to native speakers who require remedial teaching before proceeding to the Professional Electives in Chinese language and the Chinese Studies courses.

CHIN3007 Advanced Chinese A2
Department of Chinese & Indonesian Studies
UOC6 HPW5
Prerequisite/s: CHIN3006 or CHIN3106 or equivalent;
Excluded: CHIN1207, CHIN3000, CHIN3107

Further consolidation and development of language skills acquired in CHIN3006.

CHIN3900 Advanced Chinese Studies
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: 36 units of credit including 12 units of Chinese at credit level;
Excluded: CHIN3300.

Examines the major issues and questions that have informed research on China by classical sinologists and contemporary China scholars. Topics include Chinese Literature, Cultural and Gender Studies, Chinese Linguistics, Provincial Studies and Socio-economical issues. Students will become acquainted with the major authors and their contributions to the field. This is one of two courses designed primarily for intending Honours students who want to prepare themselves for the research work involved in an Honours degree in Chinese or Asian Studies.

CHIN3901 Research Methods in Chinese Studies
Department of Chinese & Indonesian Studies
UOC6 HPW3
Prerequisite/s: 36 units of credit including 12 units of Chinese at credit level;
Excluded: CHIN3301

Familiarises students with the research tools and methods available for research in Chinese Studies, including Chinese Literature, Cultural and Gender Studies, Chinese Linguistics, Provincial Studies and Socio-economical issues. This is one of two courses designed primarily for intending Honours students who want to prepare themselves for the research work involved in an Honours degree in Chinese or Asian Studies.

CHIN4000 Chinese Honours Research Full-Time
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in Chinese Studies at an average of 70%, CHIN3900 or CHIN3300, CHIN3901 or CHIN3301.

Students will complete two coursework components and write an Honours research thesis of between 15,000 and 20,000 words.

Note/s: Intending Honours students are recommended to contact the Head of Department at an early stage in their undergraduate studies to discuss their selection of courses and their proposal for the Honours research project.

CHIN4050 Chinese Honours Research Part-Time
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in Chinese Studies at an average of 70%, CHIN3900 or CHIN3300, CHIN3901 or CHIN3301.

Students will complete two coursework components and write an Honours research thesis of between 15,000 and 20,000 words.

Note/s: Intending Honours students are recommended to contact the Head of Department at an early stage in their undergraduate studies to discuss their selection of courses and their proposal for the Honours research project.

CHIN4500 Combined Chinese Honours Research Full-Time
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in Chinese Studies at an average of 70%, CHIN3901 or CHIN3301.

For Combined Honours, students are required to present a thesis as approved by the Heads of the two participating Schools/Departments.

Note/s: Combined Honours programs require coordination between the two schools/departments involved.

CHIN4550 Combined Chinese Honours Research Part-Time
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in Chinese Studies at an average of 70%, CHIN3901 or CHIN3301.

For Combined Honours, students are required to present a thesis as approved by the Heads of the two participating Schools/Departments.

Note/s: Combined Honours programs require coordination between the two schools/departments involved.

CMED3001 Medical Ethics and Health Law
School of Public Health and Community Medicine
UOC4 HPW1.5
Prerequisite/s: MDSG2001

Medical Ethics and Health Law builds on medical ethics presented particularly in second year Human Behaviour, to give students additional preparation for ethical issues which arise in their placements in hospitals, general practice and community settings during years 3 to 6. The subject introduces students to medical practitioners’ responsibilities in law including the duty of care, obligations to maintain privacy and confidentiality, and the legal basis of registration and de-registration of medical practitioners. Principles of ethics and rules of law are considered in relation to specific issues including cloning and genetic engineering, withdrawal of treatment, and the funding of health care. Tutorials are based on material covered in lectures and seek to expand students understanding of ethics and law through discussion, structured debates and tutorial exercises. The overall aim of the subject is that students learn to demonstrate and apply an understanding of ethics and law as a part of their commitment to social responsibility and considerate and appropriate treatment of patients (and others) in the practice of medicine. Assessment: Consists of two tutorial assignments and an essay (which total 50% of the marks) and an end of session examination (contributing a further 50%).

COFA0201 Graphics, Global Communication and Society
College of Fine Arts
UOC6 HPW3

Online Course Graphics, Global Communication and Society (GGCS) concerns meaning-making in graphic design within global and national contexts, and complements theoretical and practical studies in art and design. During the last two decades of the 20th century computers, digitisation and information technology have contributed to significant
changes in graphic design. Parallel to these changes are the cultural, socio-economic and political perspectives on graphics and the representation of national experience. These profound changes affect the way knowledge is produced and consumed just as the invention of printing transformed the dissemination of information in Renaissance Europe. Although the digital revolution has transformed the roles, working methods, project management and production processes for designers and printers, the digitisation of text and pictures has also exerted a compelling influence on the aesthetics and designing of the graphic image in print and electronic media for a global audience. Graphic design is a social activity in which the digital reconfiguration of the image engenders new forms of visual experiences. The course content addresses theoretical and methodological issues in the production and consumption of graphics, in particular cross-cultural significance in contemporary society, including form and function in global communications design; pictorial and narrative structures in visual communication; systems of icons and symbols as a global visual language, and the influence of technology on aesthetics and visual experience. This fully online course comprises a series of lectures, learning activities and assessment tasks delivered via the Internet using an engaging interface that specifically supports textual and visual communication. Your assessment tasks will include individual and team projects to encourage group participation and collaboration, complemented by regular tutor and peer student feedback to enhance your understanding and critical analysis of graphics within global and social contexts.

COFA0202
Art & Design Cultures: Collaboration & Play in Interactive Design
College of Fine Arts
UOC6 HPW3

Art and Design Cultures: Collaboration & Play in Interactive Design (Online Course) Over recent decades we have witnessed a massive influx of interactive environments, many of which form a significant part of our culture and daily lives. These take many forms such as entertainment, communications, business and surveillance devices to name but a few. Many of these new forms are poorly understood, however this poses exciting new opportunities for future designers and artists to explore uncharted territory. Collaboration and play are essential forms of research and production, both facilitated by and responsible for these emerging media forms. This fully online course examines the underlying features of interactivity combining theories of new media and play with collaborative art and design practice. This online course comprises a series of six lectures plus learning activities and assessment tasks that seek to discover and understand the underlying ‘language’ of interactivity and extend into practical approaches to creating interactive experiences within collaborative environments. The content includes the study of interactive media (from non-computer interactions to wireless devices), questions existing conventions of interactivity, explores the notions of play and iterative design (in which new ideas are ‘found’ by generating successive versions of a project) and culminates in the production of interactive works. Assessment tasks will include individual participation and online team projects to encourage group interaction and collaborative processes, which are essential to discovering and defining this new and exciting paradigm. NB: For international students: this 6 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.

COMD1002
Development Studies: Poor World, Rich World
Faculty of Arts and Social Sciences
UOC6 HPW3

Excluded: COMD1000

This elective is an interdisciplinary studio between architecture and landscape architecture with students from the College of Fine Arts. Projects dealing with issues of community arts, sustainable design and collaborative methods in art and design are undertaken by interdisciplinary teams of students. These experiences provide an excellent training in community consultation and community art works.

COFA0203
Art & Design Cultures: Collaboration & Visual Communication in Graphic Design
College of Fine Arts
UOC6 HPW3

Art & Design Cultures: Collaboration & Visual Communication in Graphic Design (Online Course) The activity of designing has witnessed a definitive shift in attitude over the past decade. More and more designers, from a variety of disciplines, are choosing to adopt collaborative working processes when undertaking commercial and experimental projects. Design theorists now acknowledge that designing is fundamentally a collaborative, interdisciplinary, geographically distributed and multimedia activity; thus supporting the notion of an evolution in contemporary design methodology. This significantly challenges the traditional paradigm of designing being a personal activity and contradicts collaboration hinderers, rather than enhances, a designer’s thought process. The traditional design process, seen as an individual’s reflective dialogue with their work, no longer seems solely applicable in contemporary design practice. This online course specifically recognises the emergence of ‘collaborative design’ in contemporary graphic and visual communication. It responds by utilising a specifically designed interface, allowing you to engage in peer collaboration, visual exchange and conceptual dialogue via the Internet. By working in small teams (where your fellow participants are often in different locations) you will take part in a unique and dynamic online design process. You will examine creative and conceptual approaches to graphic design by engaging in theoretical and visual research, abstraction of ideas and resolution of collective design proposals. Both individual and group assessment/feedback will be given throughout the course to enhance your experience of creative collaboration in graphic design.

NB: For international students: this 6 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.

COFA07000
Creative Village
School of Art
UOC6 HPW6

This elective is an interdisciplinary studio between architecture and landscape architecture with students from the College of Fine Arts. Projects dealing with issues of community arts, sustainable design and collaborative methods in art and design are undertaken by interdisciplinary teams of students. These experiences provide an excellent training in community consultation and community art works.

COMD2000
The Theory and Practice of Development
School of Social Science and Policy
UOC6 HPW3

Prerequisite(s): 36 units of credit; Excluded: GLST2104, INST2400, POLS2023, SLSP2701

The theories developed to explain the different rate and pattern of economic and social development within and between countries and regions and the policy consequences of these explanations are analysed and compared. The theories covered include explanations for different rates of development internal and external to nation states based on social, market, technological and other factors. Significant cases studies of policy experience from Latin America and Asia, where a variety of economic and social policy approaches have been adopted are examined. The current status of debates about the nature of underdevelopment and its solutions is reviewed.
COMD2010
(Un)Making the Third World: History and Global Development B
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: GLST2101, HIST2040, HIST2060, SPAN2424, SPAN2428
Explores the history of dictatorship and democracy in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. In geographical terms, the focus is on Latin America with a particular focus on Argentina, Brazil, Chile, Peru, Mexico, Cuba, Guatemala and Colombia. The historical trajectories, current circumstances and future prospects of these nation-states will be examined in relation to themes such as authoritarianism, violence, terror, fear, democracy, liberty, freedom, nationalism, revolution, US hegemony, neo-liberalism and globalisation.

COMD2020
(Un)Making the Third World: History and Global Development A
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: GLST2102, HIST2061, INST2000, SPAN2429
Explores the history of underdevelopment and development in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. Themes include: colonialism, nationalism, decolonisation and post-colonial states; the history and politics of development in the Cold War and post-Cold War era; the state and economic development; the role of international organisations such as the World Bank and the IMF; and the question of globalisation. In geographical terms, the focus is on sub-Saharan Africa, especially the Democratic Republic of the Congo; the Middle East, especially Egypt; South Asia, especially India; Southeast Asia, especially Indonesia; and Northeast Asia, especially South Korea.

COMD2050
Sustainable Development, Globalisation & the Third World
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: HPSG2550, INST2401
This course is about sustainable development along with the technological and social changes that are involved in achieving it, both at a national and global level. It is divided into three parts: (1) the historical causes of the present global environmental and economic crisis; (2) possible solutions to problems of food production, environmental degradation, industrialisation, energy use, and population growth; (3) ideas for a New World Economic Order and the economic and technological changes required to bridge the ever increasing gap between rich and poor nations.

COMD4500
Combined Honours (Research) in Comparative Development F/T
Faculty of Arts and Social Sciences
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in COMD including COMD2000 at an average of 70%.

COMD4550
Combined Honours (Research) in Comparative Development P/T
Faculty of Arts and Social Sciences
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in COMD including COMD2000 at an average of 70%.

COMP1011
Computing 1A
School of Computer Science and Engineering
UOC6  HPW6
Defining problems. Reasoning about and solving problems using Logic, Abstraction, Specification, Algorithms and Data Structures. Exposure to a functional programming language (Haskell) for practical experience with these concepts. Introduction to software engineering and professional ethics. Lab: programming assignments.

COMP1021
Computing 1B
School of Computer Science and Engineering
UOC6  HPW6
Prerequisite/s: COMP1011 or COMP1711;
Excluded: COMP1821, COMP1721.

COMP1081
Harnessing the Power of Information Technology
School of Computer Science and Engineering
UOC6  HPW5
Prerequisite/s: Enrolment in a non-CSE program

COMP1091
Solving Problems with Software and Tools
School of Computer Science and Engineering
UOC6  HPW5.5
Prerequisite/s: Enrolment in a non-CSE program

COMP1711
Higher Computing 1A
School of Computer Science and Engineering
Enrolment requires school approval
UOC6  HPW7
Excluded: COMP1011, COMP1811.

COMP1721
Higher Computing 1B
School of Computer Science and Engineering
UOC6  HPW7
Prerequisite/s: DN in COMP1011 or DN in COMP1711;
Excluded: COMP1021, COMP1821, COMP2811.

As for COMP1011 but in greater depth and at a faster pace. Additional non assessable extension material (just for interest). Assumes no prior computing background but must be enthusiastic. Assumed Knowledge: There is no specific assumed knowledge. We suggest this course be taken by those with HSC Maths 2 and 3 units: (145-150), or 3 & 4 unit Maths (186-200), or UAI > 97.

Note/s: Enrolment requires School approval which is granted automatically on submitting consent form. (Please see http://www.cse.unsw.edu.au/~cs1711/consent-to-do-1711.html)

As for COMP1021 but in greater depth and breadth.
COMP2011
Data Organisation
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP1021 or COMP2811 or COMP1721
Data types and data structures: abstractions and representations; dictionaries, priority queues and graphs; Search trees, heaps. File Structures: storage device characteristics, keys, indexes, hashing. Memory management. Programming assignments, Mid and final session examinations.

COMP2021
Digital System Structures
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP1021 or COMP1721 or COMP2811;
This course aims to provide students with a knowledge of problem solving with digital systems (computer systems and digital circuits). The basic building blocks of combinational and sequential circuits are introduced to develop circuit solutions to problems and to understand the design and operation of hardware models of digital and computer systems. The mapping of high level programming constructs (programs and data structures) through intermediate levels of abstraction to the hardware level of a computer system will be introduced.

COMP2041
Software Construction: Techniques and Tools
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP1021 or COMP1721 or COMP2811.

COMP2110
Software System Specification
School of Computer Science and Engineering
UOC3 HPW2.5
Prerequisite/s: COMP1021 or COMP1721 or COMP2811;
Corequisite/s: SENG2010 and MATH1081.
Formal specification: set theory, logic, schema calculus, case studies, the Z specification notation. The relationship between informal specification methods such as data flow, and Object-Oriented methods, such as OMT, and formal methods like Z. This course will attempt to develop the case for rigorous specification methods. Project work for this course will be done within SENG2010.

COMP2411
Logic and Logic Programming
School of Computer Science and Engineering
UOC6 HPW5
Introduction to logic for computer scientists: an elementary exposition of propositional logic and predicate logic from a computational point of view, including introduction to interpretations, models, proof procedures, soundness, and completeness. Automated deduction: clausal form logic and Horn clause logic, skolemisation, the Herbrand domain, unification, resolution and resolution strategies. Logic Programming: data representation, operational views of unification and backtracking, the notion of logical variable, reversibility, non-logical features, meta-programming, introduction to constraint logic programming and other paradigms. Lab: programming assignments in Prolog. Extensive practical work.

COMP2711
Higher Data Organisation
School of Computer Science and Engineering
UOC6 HPW7
Prerequisite/s: COMP1021 or COMP2811 at 75% or COMP1721;
Excluded: COMP2011.
As for COMP2011 but in greater depth and breadth.

COMP2811
Computing B
School of Computer Science and Engineering
UOC6 HPW6
Prerequisite/s: COMP1011 or COMP1711 or COMP1811;
Excluded: COMP1021, COMP1721,COMP1821.
The objective of this course is for students to develop proficiency in programming in a high level imperative language and to develop a background of relevant knowledge and skills on which to base further study of computing. Topics covered include: fundamental data structures and algorithms, program testing and debugging and the structure of computer systems. Practical experience of these topics is supplied by laboratory programming exercises and assignments.

COMP2920
Professional Issues and Ethics for Computer Science
School of Computer Science and Engineering
UOC3 HPW3
This course will develop a framework on which professional and ethical issues can be developed. Topics covered will include team and meeting skills, communication skills, interpersonal skills, software quality and process, survey of employment in IT, in addition to ethics. The course will be delivered using lectures, class discussions, written assignments, reading lists, the Internet, presentations, and invited speakers.

COMP3111
Software Engineering
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2011 or COMP2711 or MTRN3530;
Excluded: COMP9008.
Informal specification: Data flow diagram methodology, analysis, design, testing, management and documentation of software. formal specification: set theory, logic, schema, calculus, case studies. The Z specification notation. Managing the project life cycle. CASE tools. A major group project is undertaken.

COMP3120
Introduction to Algorithms
School of Computer Science and Engineering
UOC3 HPW2.5
Prerequisite/s: COMP2011 or COMP2711;
Excluded: COMP3121, COMP9101.

COMP3121
Algorithms and Programming Techniques
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2011 or COMP2711;
Excluded: COMP9101, COMP3120.

COMP3141
Software System Design and Implementation
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2110 or COMP3111.
This course will present rigorous and formal methods for the design and implementation phases of software system development. Also considered are testing and reuse of designs. As far as possible, software tools that can assist the process will be used. The material will be presented using case studies, and students will be required to undertake a project.

COMP3211 Computer Architecture
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2021 or ELEC2041;
Excluded: COMP9221.

Combinatorial and sequential circuit design; synchronisation, communication and arbitration; register transfer specification (Modal). Arithmetic Design Strategies. Memory Organisation: physical and virtual address space; operating system and compiler support; memory mapping and caching. Communications Organisation: shared memory, memory mapping; network systems. Processor Design: the instruction pipeline; hardwired and micro-programmed control; instruction sets; RISC and object-based processor organisation. Error Detection/Correction and Fault Tolerance; coding theory. Lab: major design project.

COMP3221 Microprocessors and Embedded Systems
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2021;
Excluded: ELEC2041, ELEC3020, COMP9221.

Principles of microprocessor-based systems are covered, including programmers’ models of general-purpose microprocessors and microcontrollers, assembly language programming, address maps, memory devices and interfacing, bus timing and standards, input, output interfacing, polling and interrupts and DMA interfaces. Examples are mostly taken from the MC68000 family, although aspects of other microprocessors are discussed. A key aspect is the laboratory work involving an MC68HC11-based target system, where both the hardware and the software drivers for additional subsystems are designed, implemented, and tested.

COMP3231 Operating Systems
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2021 or COMP2711, COMP2021 or ELEC2041;
Excluded: COMP9221.

COMP3311 Database Systems
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2021 or COMP2711;
Excluded: COMP9311, INF3608.

COMP3331 Computer Networks and Applications
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2011 or COMP2711 or MTRN3330;
Excluded: COMP9331, TELE4352.

Networking technology overview. Protocol design and validation using the finite state automata in conjunction with time-lines. Overview of the IEEE802 network data link protocol standards. Addressing at the data link and network layers. Network layer services. Introduction to routing algorithms such as Distance Vector and Link State. Congestion control mechanisms. Internetworking issues in connecting networks. The Internet Protocol Suite overview. The Internet protocols IPv4 and IPv6. Address resolution using ARP and RARP. Transport layer: issues, transport protocols TCP and UDP. Application level protocols such as: File Transfer Protocol (FTP), Domain Name System (DNS) and Simple Mail Transfer Protocol (SMTP). There is a substantial network programming component in the assessable material.

COMP3411 Artificial Intelligence
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2011 or COMP2711;
Excluded: COMP9414.

COMP3421 Computer Graphics
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2011 or COMP2711;
Excluded: COMP9415, COMP9701.

COMP3431 An Introduction to Intelligent Agent Architectures
School of Computer Science and Engineering
UOC6 HPW6
Prerequisite/s: COMP2011, COMP2711, COMP9024 or enrolment in MEngSc program 8685.

An introduction to Intelligent agent design. Picking actions using planning, learning or engineered control. Both practical and theoretical components. Practical component: Re-implement parts of a real agent architecture on a robot. Assignment based. Emphasis on engineering a working system. Theoretical component: Introduction to a variety of research agent architectures including classical planning and reinforcement learning. Lecture and lab based.

COMP3441 Cryptography and Distributed Systems Security
School of Computer Science and Engineering
UOC6 HPW5

Topics chosen from: intrusion detection, prevention, and response, ciphers and cryptanalysis, private key and public key systems, secure hash functions, cryptographic protocols, protocol analysis, digital signatures, public key infrastructures, authentication, key agreement, authorization, timestamping, trust management, social and legal issues, Java security model, digital cash, payment protocols, digital rights management, zero knowledge protocols, complexity theoretic foundations, quantum cryptography.
COMP3511
Human Computer Interaction
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: COMP2011 or COMP2711;
Excluded: COMP9511.

Provides an introduction to user-system interactions, both analysis and design. The approach is cognitive, focusing on matching user goals with computer technologies. Topics: the human information processing system, models of interaction, strategies for and process of design and evaluation. Project work is emphasised.

COMP3710
Software Project Management
School of Computer Science and Engineering
UOC3 HPW2.5
Prerequisite/s: MATH2859 or MATH2901 or MATH2801,COMP2011 or COMP2711.

This course introduces various aspects of software project management. Special emphasis is given to planning, size measurement, size estimation, resource estimation, schedule estimation, and earned value tracking. Concepts of size estimation are introduced via a series of five programming assignments from Watts Humphrey's Personal Software Process.

COMP3720
Total Quality Management
School of Computer Science and Engineering
UOC3 HPW3
Prerequisite/s: COMP3710;
Excluded: COMP0001.

This course introduces elements of statistical methods underlying quality management in the context of software development. Special emphasis is placed on economics of software quality, development of a quality strategy, yield management, defect removal strategies and defect prevention strategies. Techniques for review, code review and inspections are also covered in detail. These ideas are introduced via a series of five programming assignments from Watts Humphrey's Personal Software Process.

COMP3901
Special Project A
School of Computer Science and Engineering
Enrolment requires school approval
UOC6

The student will complete a small research project under the supervision of a member of the academic staff of the School. The project will be assessed on the basis of a project written by the student.

COMP3902
Special Project B
School of Computer Science and Engineering
Enrolment requires school approval
UOC12 HPW1

The student will complete a medium-sized research project under the supervision of a member of the academic staff of the School. The project will be assessed on the basis of project written by the student.

COMP4001
Object-Oriented Software Development
School of Computer Science and Engineering
UOC6 HPW4
Prerequisite/s: COMP2011 or COMP2711.

This course will cover object-oriented design and implementation methods for complex software systems. Topics covered include: object-oriented program design techniques, object-oriented programming in C++, software reuse and designing for reuse, design patterns and styles, object persistence and distribution. Examples from a wide range of application areas will be used at all stages to illustrate concepts and techniques.

COMP4133
Advanced Compiler Construction
School of Computer Science and Engineering
UOC6 HPW5
Prerequisite/s: 65% average in COMP3131 or 65% average in COMP9102, or enrolment in MEngSc program 8685.

Compiler Back Ends: (a) program analysis - static single assignment form (SSA), control-flow analysis, data-flow analysis, abstract interpretation, dependence analysis, pointer analysis, type-based analysis; (b) code optimisation; (c) code generation - register allocation, code selection and instruction scheduling, Modern Compiler Techniques: (a) dynamic and staged compilation - profiling, specialisation, run-time code optimisation and generation; (b) run-time support - memory management and garbage collection; (c) compiler techniques for improving memory hierarchy performance - control and data transformations, prefetching; (d) compiler techniques for superscalar and VLIW architectures - prediction, data speculation, control speculation, software pipelining. The lecture materials will be complemented by two or three large programming assignments.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP4151
Algorithmic Verification
School of Computer Science and Engineering
UOC6 HPW4

This course is an Advanced Topics in Concurrency occasional elective; a change of name is expected each year. Topics will be chosen from: semantics models of concurrent and distributed systems (e.g. process algebra, event structures, Petri nets, Chu spaces), linear versus branching time, interleaving versus partial order semantics, true concurrency, semantic equivalences, modal and temporal logic for concurrent systems (proof theory and applicants), algorithmic verification (model checking, automata on infinite structures, synthesis), reasoning about knowledge in distributed systems.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP4211
Advanced Architectures and Algorithms
School of Computer Science and Engineering
UOC6 HPW4

Issues and techniques relevant to the design of single processor machines: instruction sets, cache and memory designs, processor designs, evaluation of processor performance. Pipeline depth, multiple issue, instruction level parallelism, dataflow, and multithreaded designs. Large design project and examination.

COMP4411
Experimental Robotics
School of Computer Science and Engineering
UOC6 HPW5

Prerequisite/s: 12 units of credit from COMP3### courses or 12 units of credit from COMP9### courses and average of 75% or better.

Artificial Intelligence Concepts in Robotics. The approach is experimental, with hands-on experience with a small mobile robot kit. Topics covered will include a selection from: history and philosophy of robotics, hardware components and subsystems, sensors, measurements and perception, robotic architectures, multiple robot systems, localisation problem and solutions, robot learning, navigation and obstacle avoidance, robot planning, robot vision and vision processing.

COMP4412
Introduction to Modal Logic
School of Computer Science and Engineering
Enrolment requires approval
UOC6 HPW4

Prerequisite/s: COMP9101 or COMP3121 or COMP2411 or enrolment in MEngSc program 8685, or permission from instructor.

This course aims to introduce fourth year and beginning graduate students to modal logic. Modal logic is used widely in computer science to model a variety of systems including databases, communication
protocols, software, multi-agency and knowledge systems. This course will address the basic axioms, techniques, model theory of modal logic and some representative applications. This course will be assessed on the basis of student presentations and assignments. Syllabus: Standard modal axioms such as K, T, 4 and S. Kripke's possible world semantics. Soundness and completeness. The canonical model theorem. Logics of belief and knowledge. Logics of time and computation. If time permits, filtrations and the finite model property. 

**Note/s:** MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

### COMP4415 First-order Logic

**School of Computer Science and Engineering**
Enrolment requires school approval
UOC6  HPW4

**Prerequisite/s:** COMP9101 or COMP3121 or COMP2411 or enrolment in MEngSc program BINF4910, or permission from instructor.

This course is a presentation of the kind of logic useful for knowledge representation and reasoning. It begins with the elements of first-order logic using tableau methods and proceeds to soundness and completeness, and compactness. Using compactness it addresses issues like expressibility to show, for instance, why transitive closure is not first-order. The course concludes with an introduction to non-monotonic reasoning as a formalization of common sense reasoning.

### COMP4416 Intelligent Agents

**School of Computer Science and Engineering**
Enrolment requires approval
UOC6

**Prerequisite/s:** 65% in COMP3411 or COMP9414

Agents are computational entities that act autonomously in a dynamically changing environment in order to achieve their goals. This course covers the foundations, engineering and applications of intelligent software agents, with an emphasis on theories and architectures for rational agents and on personal assistant applications. Topics include modelling of intention, BDI (Belief, Desire, Intention) agent architectures, methodologies for engineering multi-agent systems, communication, coordination and negotiation in multi-agent systems, and applications of agents in electronic commerce and interface design. This course will involve in-depth and intensive reading, and assume a high level of mathematical maturity and critical analysis. Assessment is by participation in class discussion and essay.

### COMP4511 User Interface Design and Construction

**School of Computer Science and Engineering**
Enrolment requires approval
UOC6  HPW5

**Prerequisite/s:** 70% in COMP3511 or COMP9511

Corequisite/s: COMP4001

Concentrates on the design and development of user interface software. Provides practical object orientated programming knowledge about the underlying elements of a graphical user interface and associated development process, extending principles introduced in Human Computer Interaction. Based around the Aqua User Interface in Mac OS X. Special topics include: speech, accessibility and mobile devices.

### COMP4903 Industrial Training (B.E.)

**School of Computer Science and Engineering**
Enrolment requires school approval
UOC0

**Excluded:** COMP4904, COMP4905.

Students enrolled in Computer Engineering, Software Engineering and Bioinformatics programs must complete a minimum of 60 days' industrial training. At least some of this should be obtained in Australia. Students are required to submit to the School evidence from their employers confirming completion of the prescribed training and a report, typically 2000 words long, summing the work done and training received. Students will formally enrol in the course in Year 4, although they are strongly encouraged to complete as much industrial experience as possible in the breaks between the early years of the program. Help on finding employers can be found at [http://www.eng.unsw.edu.au/silu/index.cfm](http://www.eng.unsw.edu.au/silu/index.cfm).

### COMP4904 Industrial Placement Program

**School of Computer Science and Engineering**
UOC0

**Excluded:** COMP4903, COMP4905.

COMP4904 is an optional 6-month industrial work experience, available to students in Computer Engineering, Software Engineering, Bioinformatics programs and for Computer Science students who have completed Year 2 (96 units of credit). COMP4904 satisfies the industrial training requirements for students in Computer Engineering, Software Engineering and Bioinformatics programs. Students are required to submit to the School evidence from their employers confirming completion of the work experience and a report, typically 2000 words long, summing the work done and the training received.

### COMP4910 Thesis Part A

**School of Computer Science and Engineering**
UOC3  HPW7

**Prerequisite/s:** 126 units of credit, enrolment in program BINF4910, BINF4911, BIOM5920, SENG4910.

Thesis part A and B are done in the last two semesters of the BE degree program. For full-time students, a nominal three hours per week in the first semester and fifteen hours per week in the second semester are devoted to directed laboratory and research work on an approved course under guidance of members of the academic staff. Usually, the Thesis involves the design and construction of experimental apparatus and/or software, together with appropriate testing and evaluation. For Part A, students are required to present a satisfactory seminar. For Part B, a written thesis must be submitted by the Tuesday of the final week of the semester.

### COMP4911 Thesis Part B

**School of Computer Science and Engineering**
UOC15  HPW14

**Prerequisite/s:** COMP4910;

**Excluded:** BINF4910, BIOM5921, SENG4911.

Thesis part A and B are done in the last two semesters of the BE degree program. For full-time students, a nominal three hours per week in the first semester and fifteen hours per week in the second semester are devoted to directed laboratory and research work on an approved course under guidance of members of the academic staff. Usually, the Thesis involves the design and construction of experimental apparatus and/or software, together with appropriate testing and evaluation. For Part A, students are required to present a satisfactory seminar. For Part B, a written thesis must be submitted by the Tuesday of the final week of the semester.

### COMP4920 Professional Issues and Ethics

**School of Computer Science and Engineering**
UOC3  HPW4

This course will develop a framework on which professional and ethical issues can be developed. Topics covered will include team and meeting skills, communication skills, interpersonal skills, software quality and process, in addition to ethics. The course will be delivered using lectures, class discussions, written assignments, reading lists, the Internet, presentations, and invited speakers.

### COMP9116 Software System Development Using the B-Method and B-Toolkit

**School of Computer Science and Engineering**
UOC6  HPW3

**Prerequisite/s:** COMP2110 or COMP3111 or COMP9008 or enrolment in MEngSc program BINF4910, or permission from instructor.

The B-Method is a rigorous mathematically based method for the development of reliable software. The method covers the complete software cycle from requirement analysis through specification, design, implementation, testing, maintenance, and re-use. The B-Method is
supported by the B-Toolkit: a collection of tools that provide for specification animation, proof obligation generation, theorem proving, configuration management, code generation, and documentation. The B-Method uses similar mathematical notation to Z, but does not use Z. Specifications are given in AMN (Abstract Machine Notation), which is a small abstract programming language. The B-Method is object based in the sense that systems of machines use a number of different forms of inheritance to control visibility and inherit operations. There is no dependence on a particular programming language, but the current code generator generates C. This course will explore the use of the B-Method and the B-Toolkit. The topics covered will include: The Abstract Machine Notation; Machine Composition; Refinement; Implementation; The method of presentation will use case studies to present the method; laboratory exercises to use the tools; a major project to apply all aspects of the method, and use of the tools.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9117
Architecture of Software Systems
School of Computer Science and Engineering
UOC6 HPW3
Prerequisite/s: (COMP3111 or COMP9008 or COMP3141) and (COMP3131 or COMP9102 or SENG3020) and 75 WAM or enrolment in MEngSc program 8685.

Principal architectural issues associated with the design and construction of large scale software systems. Study and evaluation of several well-known and frequently used architectural styles, patterns and frameworks. Study of pipes and filters, layered systems, distributed object-oriented systems, component-based systems, etc. The course will also examine the practical applicability of architecture research, specifically its relationship to the work in software reuse and component interoperability of platforms such as J2EE, Microsoft, .NET and CORBA. Case studies and exercises will be used to illustrate the architectural issues.

Note/s: This course is available to CSE undergraduates, MEngSc, PhD students only. There are a limited number of places. MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9231
Integrated Digital Systems
School of Computer Science and Engineering
UOC6 HPW4
Prerequisite/s: COMP2021 or COMP9022 or enrolment in MEngSc program 8685;
Excluded: ELEC4532.

Integrated circuit logic families with emphasis on MOS technologies, structured chip design, custom and semi-custom approaches, system architecture, computer aided design, layout considerations, timing estimates, circuit failures, faults, fault modelling, testing, design for testability. Lab: design project.

COMP9242
Advanced Operating Systems
School of Computer Science and Engineering
UOC6 HPW4
Prerequisite/s: Average of 65 in COMP9201 or Average of 65 in COMP3231;
Corequisite/s: COMP9211 or COMP3211.

Covers operating systems design and implementation issues at an advanced level, focussing on specific issues such as performance and on current OS research areas. Topics selected from: Microkernels; user-level servers; performance; kernel implementation; device drivers; scheduling for real-time; effects and control of hardware caches; security and protection; persistent systems; security; dealing with large, sparse address spaces; experimental systems. A laboratory running a state-of-the-art microkernel system will be used to provide hands-on experience with low-level implementation of OS components.

COMP9243
Distributed Systems
School of Computer Science and Engineering
UOC6 HPW3
Prerequisite/s: COMP3231 or COMP9201, COMP3331 or COMP9331.

A detailed coverage of distributed systems, with a particular focus on operating systems issues: client-server paradigm, remote-procedure call as OS support for client-server; distributed shared memory, distributed memory coherence; distributed file systems; distributed process management, including load sharing and process migration; concurrency control; fault tolerance; recoverability and distributed transactions; naming; industry standards; case studies.

COMP9314
Next Generation Database Systems
School of Computer Science and Engineering
UOC6 HPW3
Prerequisite/s: (COMP3111 or COMP3141) or INF53608 or INF55926 or INF55992) and (COMP9024 or COMP2011 or COMP2711) or enrolment in MEngSc program 8685.

Detailed examination of current developments and future trends in database, web, and e-commerce technologies. The emphasis will be on the following topics: modeling, querying, and integrating e-catalogs, integration frameworks for B2B EC applications, and web-based databases.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9315
Database Systems Implementation
School of Computer Science and Engineering
UOC6 HPW3
Prerequisite/s: (COMP3111 or COMP3131 or INF53608 or INF55926 or INF55992) and (COMP9024 or COMP2011 or COMP2711) or enrolment in MEngSc program 8685.

Detailed examination of techniques used in the implementation of relational, object-oriented and distributed database systems. Topics are drawn from: query optimisation, transaction management, advanced file access methods, database performance tuning.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9316
eCommerce Systems Implementation
School of Computer Science and Engineering
UOC6 HPW4
Prerequisite/s: (COMP9021 or COMP1021 or COMP1721 or COMP2811) and (COMP3111 or COMP3131 or INF53608 or INF55926 or INF55992) and enrolment in MEngSc program 8685.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9318
Data Warehousing and Data Mining
School of Computer Science and Engineering
UOC6 HPW3

Data Warehouse: (a) Data Model for Data Warehouses. (b) Implementing Data Warehouses: data extraction, cleansing, transformation and loading, data cube computation, materialized view selection, OLAP query processing. Data Mining: (a) Fundamentals, data mining process and system architecture, relationship with data warehouse and OLAP systems, data pre-processing, (b) Mining Techniques and Application: association rules, mining spatial databases, mining multimedia databases, web mining, mining sequence and time-series data, text mining, etc. The lecture materials will be complemented by projects / assignments.

COMP9332
Network Routing and Switching
School of Computer Science and Engineering
UOC6 HPW3
Prerequisite/s: COMP3331 or COMP9331 or enrolment in MEngSc program 8685.
This course will focus on the routing and switching architectures, algorithms and protocols for packet switching networks, both connectionless and connection oriented networks (such as IP and ATM networks). Advanced Internet addressing: CIDR, VPN, NAT. In depth discussion of interior and exterior routing protocols, such BGP, OSPF. IP over ATM solutions: such as LANE, Classical IP over ATM. IP switching and MPLS. Mobile IP. Internet Multicasting. Overview of emerging switching and routing technologies, such as optical routing and QoS routing. There is a substantial network programming component in the assessable material, for which C programming knowledge is assumed. 

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9333
Advanced Computer Networks
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: COMP9332

This course teaches the fundamentals and practical solutions to quality of service (Qos) based networks, with an emphasis on the next generation Internet architectures and protocols. Topics include: scheduling policies (fair queuing, priority queuing etc.), admission avoidance/control schemes (RED, RIO etc.), admission control, multimedia protocols (RTP, RTCP etc.). This course will also cover recent Qos related developments by IETF/IEEE such as: Intserv, Diffserv, RSVP, LAN, Qos. There will be hands on practical labs on network performance measurement and some network programming. The assessment of the course includes a substantial hands on project on building a network system in Linux/FreeBSD environment. C programming knowledge is assumed for labs and the project.

COMP9334
Capacity Planning of Computer Systems and Networks
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: COMP9331 or COMP9331 or enrolment in MEngSc program 8685.

Techniques for performance evaluation of distributed systems. These techniques will then be applied to designing systems to have good performance, and to the analysis of future workloads and the system changes required to cope with them.

Note/s: A strict quota applies to this course. MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9417
Machine Learning and Data Mining
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: COMP9414 or COMP3411 or enrolment in MEngSc program 8685.

Machine learning is the algorithmic approach to learning from data. This course covers the key techniques in data mining technology, gives their theoretical background and shows their application. Topics include: decision tree algorithms (such as C4.5), regression and model tree algorithms, neural network learning, rule learning (such as association rules), lazy learning, version spaces, evaluating the performance of machine learning algorithms, Bayesian learning and model selection, algorithm-independent learning, ensemble learning, kernel methods, unsupervised learning (such as clustering) and inductive logic programming (relational learning)

COMP9444
Neural Networks
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: COMP2011 or COMP2711 or COMP9024) and (12 UOC COMP3 or COMP4 or COMP9 - excluding Group A) or enrolment in MEngSc program 8685.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9518
Pattern Recognition and Computer Vision
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: COMP9517

Principles of pattern recognition and computer vision; review of early processing, Pattern Recognition; classification techniques; structural and syntactic pattern recognition; document image analysis and character recognition; statistical pattern recognition. Computer Vision: 2D and 3D representation; model-based vision and image understanding; motion analysis and active vision; applications in medical imaging, robot vision, satellite imaging, multimedia.

COMP9790
Principles of Global Navigation Satellite System (GNSS) Positioning
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: 18 units of credit COMP3### or COMP9### courses, or enrolment in MEngSc program 8685; Excluded: GMAT-9000.

This course will introduce the student to reference coordinate systems and time systems, satellite orbital motion, signal propagation and satellite tracking observables. The principles of positioning using the current two Global Navigation Satellite Systems (GNSS) will be studied: the U.S. developed Global Positioning System (GPS) and Russia's Global Navigation Satellite System (GLONASS). The mathematical models for pseudo-range and carrier phase-based modes of positioning, for both single receiver (absolute) positioning and relative positioning implementations, will be developed. These principles will be illustrated using the Matlab GNSS toolkit, which allows the student to develop algorithms for real and simulated data processing. Land, marine and airborne positioning applications will be discussed. Physical attendance at the lab class is optional. Students with own copies of MATLAB need not attend, and may do exercises in their own time.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

COMP9791
Modern Navigation & Positioning Technologies
School of Computer Science and Engineering
UOC6  HPW3
Prerequisite/s: 18 units of credit COMP3### or COMP9### courses, or enrolment in MEngSc program 8685; Excluded: GMAT-9010.

This course presents an overview of the various satellite-based and non-satellite navigation technologies and some of their applications. Various user receiver configurations, system augmentations and implementation issues will be analysed. These include: differential GPS schemes and services, real-time systems and their communication links, pseudo-range and carrier phase-based techniques, pseudoeodies, and other satellite-based positioning systems. In addition, the role of other sensors (such as gyros, accelerometers and inertial navigation systems - INS) and ancillary data can play in navigation will be discussed. Particular emphasis will be placed on the role such positioning technologies will play in Transport Telematics and for personal location, in relation to Location-Based Services, etc. Students will gain hands-on experience with a variety of navigation technology.

Note/s: MEngSc students should assess their own pre-requisite knowledge and seek advice if they are uncertain.

CRIM1000
Criminal Law and Justice 1
School of Social Science and Policy
UOC6  HPW4

Introduces students to key processes of criminalisation, criminal law formulation, established concepts of criminal law and the operation of
criminal justice agencies. Considers forces and criteria behind criminalisation, and justifications for and against the use of criminal law as a mode of regulation. Examines key components of criminal law; conduct, circumstance and consequence, how these are operationalised in specific substantive areas of criminal law doctrine such as homicide and criminal defences. Particular attention will be paid to the criminal processes and the workings of the major criminal justice agencies such as the police, the DPP, defence lawyers, and the courts.

CRIM1001
Criminal Law and Justice 2
School of Social Science and Policy
UOC6   HPW4
Prerequisite/s: CRIM1000

Emphasises the operationalisation of criminal justice through the workings of key agencies. Examines particular areas of substantive criminal law doctrine and practice such as assault and sexual assault, public order offences, property offences and drugs offences. Examines sentencing and penalty, including justifications for punishment, sentencing options, the rise of retributivism, victim participation, and penal practices. Fosters a reflexive approach to the operation of criminal law and the criminal process, including consideration of the limits of criminal law as a mode of regulation in the light of technological and policy changes, and the blurring boundaries between criminal and civil law.

CRIM2000
Criminological Theories
School of Social Science and Policy
UOC6   HPW3
Prerequisite/s: CRIM1001

Examines the way in which crime is conceptualised in different theoretical traditions. Introduces students to the historical development of criminology and explores the interconnections between social and political context, criminological theory and crime control policy.

CRIM2011
Crime and Society
School of Social Science and Policy
UOC6   HPW2
Prerequisite/s: CRIM1001; Excluded: LAWS1720

Issues arising from the relationship of crime to society. Crime as a dividing practice in the construction of normality. A critical history of traditional and current accounts of crime and delinquency. Topics include: the dramatisation of evil and the politics of social control; a genealogy of delinquency and its psychological and sociological explanations; theories of conformity and alienation; crime and discipline; women, crime and power.

CRIM2014
Policing
School of Social Science and Policy
UOC6   HPW3
Prerequisite/s: CRIM1001; Excluded: LAWS2789, LAWX1789

Focuses on policing as a set of social and legal practices and institutions as a resource and as a regulator. Policing is placed in its social and historical contexts by assessing conflicting interpretations of its history and of police public relations. Topics include: police use of law, the relevance of law to policing, and the effectiveness of statutory and other rules in influencing and controlling police decisions and activities; drug policing, police culture, the policing of social divisions, police corruption and deviance, the policing of public order, fictional representations of policing, investigative methods, developments in community, private and international policing, and the limits and possibilities of police reform.

CRIM3000
Researching Crime and Justice
School of Social Science and Policy
UOC6   HPW3
Prerequisite/s: CRIM2000, SLS2001

Examines the methodological, ethical and legal issues in relation to criminological research through a critical review of published research studies. Topics to be covered include: the availability and quality of official data, uses and abuses of criminal justice statistics, doing research on sensitive topics and vulnerable populations, problems of access, validity issues, ethical practice, political and legal issues.

CRIM4000
Criminology Honours (Research) F/T
School of Social Science and Policy
Enrolment requires school approval
UOC24   HPW4
Prerequisite/s: 48 units of credit in Criminology Core Program and 48 units of credit in Social Science Core Program and SLS2201 at an average of at least 65% and permission from the Head of School

Students are required to prepare a thesis of between 15,000-20,000 words. Participation in prescribed seminars of at least four hours duration per week is also required.

CVEN0646
Water and Wastewater Engineering
School of Civil and Environmental Engineering
UOC3   HPW3

Basic concepts of hydraulics: Fluid properties, hydrostatics, motion of fluids, conduit flow and open channel flow. Scope and applications of hydrology: Hydrologic measurements, rainfall analysis, storm rainfall-runoff relations, flood estimation, surface and groundwater sources, transmission and distribution. Urban drainage design: Relationship between urban development and each of water supply, wastewater and stormwater drainage. Subdivision layouts.

Note/s: This is a servicing course for other Schools.

CVEN0656
Soil and Pavement Engineering
School of Civil and Environmental Engineering
UOC3   HPW3

Basic properties of soils and soil mechanics; Classification of soils; soil forming processes; seepage of water through soils; shear strengths, bearing capacity, settlement of foundations, stability of slopes and embankments, earth pressures and simple design of retaining walls; Concepts related to land use and transport systems; Pavement design based on engineering classification/site investigation for pavements, sampling and in-situ testing of subgrades, design practice of urban and rural roads, intersections and interchanges; base and sub-base materials; subgrade space improvement.

Note/s: This is a servicing course for other Schools.

CVEN1021
Civil Engineering Practice 1A
School of Civil and Environmental Engineering
UOC4   HPW2

Introduction to the structure, nature and scope of civil and environmental engineering. Topics include: history of engineering; engineering today; organisation of the profession; the engineer in society; environmental, social and legal considerations; civil and environmental engineering failures and engineering responsibilities; communication methods and skills; oral presentations; report writing, presentation and expectations; case studies of major projects.

Assumed Knowledge: 2 unit HSC English

CVEN1022
Civil Engineering Practice 1B
School of Civil and Environmental Engineering
UOC6   HPW4

Following on from CVEN1021, this course introduces student to engineering and its place in society an demonstrates how the various engineering sub-disciplines are integrated in real-world civil engineering projects. The objective is to develop the students' skills in critical thinking, communication, teamwork and research. Topics include: communication methods and skills; oral and written presentations; the conduct of meetings; problem solving; recycling; public participation, including the role of sustainability and the influence of engineering practice, the engineer and the law.

Assumed Knowledge: CVEN1021.
CVEN1023 Statics
School of Civil and Environmental Engineering
UOC4  HPW3
An introductory course in engineering mechanics dealing with conditions of equilibrium of structures and fluids. Topics include: two dimensional concurrent and non-concurrent force systems; resultant of forces; equilibrium of forces; distributed forces; centre of gravity; centroids; internal actions; analysis of beams (shear force and bending moment diagrams); analysis of frames (determinacy, internal hinges); analysis of trusses (methods of joints and sections); cables; fluid statics including hydrostatic pressure, body forces, buoyancy, stability, and manometry; introduction to three dimensional statics.

CVEN1024 Dynamics
School of Civil and Environmental Engineering
UOC4  HPW3
An introductory course dealing with mechanics of bodies and of fluids in motion. Topics include laws governing continuity, energy and momentum; dynamics of particles; planar motion of rigid bodies and of fluids; ideal fluid flow; simple spring mass systems responding to forces of simple form; applications to civil and environmental engineering problems.

Assumed Knowledge: CVEN1023.

CVEN1025 Computing
School of Civil and Environmental Engineering
UOC4  HPW3
A course designed to introduce students to engineering computing, including computer programming; programming using spreadsheets; computer graphics and computer aided drafting (CAD).

Assumed Knowledge: Basic computer literacy including the use of PC operating systems, word processors & text editors.

CVEN1026 Engineering Materials 1
School of Civil and Environmental Engineering
UOC4  HPW3
An introduction to the properties and behaviour of civil engineering materials including concrete, steel, other metals, polymers and ceramics. Topics include: (i) Concrete Technology : Cements, aggregates, admixtures, workability, strength and durability; (ii) Metals Technology: Types of materials, mechanical properties of metals, response of metals to loading, creep and fatigue; (iii) Polymers: Classification of polymers, structure of polymers, creep and relaxation, deterioration of mechanisms and durability; (iv) Ceramics: Types of ceramic materials, mechanical and insulation properties and durability.

Assumed Knowledge: CHEM1011.

CVEN1531 Introduction to Water and Atmospheric Chemistry
School of Civil and Environmental Engineering
UOC4  HPW4

Assumed Knowledge: CHEM1011.

CVEN1721 Environmental Engineering Practice 1A
School of Civil and Environmental Engineering
UOC4  HPW2
Introduction to the structure, nature and scope of civil and environmental engineering. Topics include: history of engineering; engineering today; organisation of the profession; the engineer in society; environmental, social and legal considerations; civil and environmental engineering failures and engineering responsibilities; communication methods and skills; oral presentations; report writing, presentation and expectations; case studies of major projects.

CVEN1722 Environmental Engineering Practice 1B
School of Civil and Environmental Engineering
UOC6  HPW4
Following on from CVEN1721, this course introduces students to engineering and its place in society and demonstrates how the various engineering sub-disciplines are integrated in real-world environmental engineering projects. The objective is to develop the students’ skills in critical thinking, communication, teamwork and research. Topics include: communication methods and skills; oral and written presentations; the conduct of meetings; problem solving; recycling; public participation, including the role of sustainability and the influence of engineering practice, the engineer and the law.

CVEN2022 Civil Engineering Practice 2
School of Civil and Environmental Engineering
UOC3  HPW2

Prerequisite/s: 36 units of credit

The 2nd year integrating course introducing students to the multi-disciplinary nature of real world engineering problems and the relationship of engineering to the wider socio-economic environment. Case studies in formulation, modelling and resolution of engineering problems. A holistic approach to addressing complex engineering problems, engineering methodology, community participation and public involvement, sustainability, equity and distributional effects. Other topics include introduction to EIS and risk-quantification.

Assumed Knowledge: CVEN1021, CVEN1022.

CVEN2023 Mechanics of Solids
School of Civil and Environmental Engineering
UOC3  HPW3

Prerequisite/s: CVEN1023

An introduction to the strengths of materials: properties of sections; concepts of stress and strain; stress-strain relationships; bars under axial force, bending moment, shear force, torsion; deflections due to bending and shear; combined stresses; stresses and strains at a point; principal stresses and strains.

Assumed Knowledge: MATH1231.

CVEN2025 Engineering Computations 1
School of Civil and Environmental Engineering
UOC3  HPW3

Graphical data analysis; curve fitting and interpolation; simple and multi-linear regression; random variables and their properties; normal binomial distributions. Functions of random variables and their simulation using computers; one and two sample interference methods. Risk-quantification; ecological risk assessment. Applied data analysis.

Assumed Knowledge: MATH1231, CVEN1025.

CVEN2026 Engineering Materials 2
School of Civil and Environmental Engineering
UOC3  HPW3

The course builds on the concepts of CVEN1026 with topics in concrete technology, metals technology and fibre reinforced polymer composites. Concrete Technology: Mix design, quality control, long term effects (creep and shrinkage); high performance concrete and fibre reinforced concrete. Metals Technology: Volume change; corrosion; various types of steel including stainless steel. Fibre Reinforced Polymer Composites: Matrix materials, types of fibres, density of composites, absorption characteristics, durability and long term mechanical properties.

Assumed Knowledge: CVEN1026.

CVEN2125 Systems Engineering
School of Civil and Environmental Engineering
UOC3  HPW2

The formulation and solution of engineering problems and their interfaces with other issues. An holistic approach to addressing complicated engineering problems. Basic systems concepts applied to Civil and

**Assumed Knowledge:** CVEN1022, CVEN1025.

CVEN2126
**Engineering Construction 1**
School of Civil and Environmental Engineering
UOC3 HPW3

An introduction to elemental processes used in construction. Characteristics, selection and usage of plant and equipment, temporary works and specialist construction techniques. Researching issues associated with construction processes. Topics selected from: earthmoving; temporary works including scaffolding and formwork; dewatering systems; specialist techniques including drilling, compressed air and fluid power systems; explosives and blasting, ground anchors, grouting methods; aggregate production including quarrying, dredging, building construction including foundations, piles, cranes, steel construction, concrete construction and masonry construction; a selection of particular construction activities including dam construction, coffer dams and caissons, tunnelling, pipelines and road, railway and bridge construction.

**Assumed Knowledge:** CVEN1022.

CVEN2322
**Structural Engineering 1**
School of Civil and Environmental Engineering
UOC6 HPW6
Prerequisite/s: CVEN1023

The course consists of an analysis strand and a design strand. Analysis Strand: Revision of Mechanics of Solids; combined stresses and failure theorems. The principles and requirements of structural analysis of indeterminate trusses and simple frames; structural idealisation; determinacy; principles of virtual work; the force method (flexibility analysis). Design Strand: Introduction to limit states design and codes of practice (design objectives; strength; serviceability and durability limit states); loads and load combinations (dead, live, wind and earthquake loads); structural steel; design of tension and stocky compression members; local buckling; Euler buckling; design of laterally supported frames; an introduction to limit states design and codes of practice. Both strands are supported by case study projects. Students will undertake site visits and visits to water treatment plants, a water engineering consultants’ laboratories and offices.

**Assumed Knowledge:** CVEN1022.

CVEN2525
**Introduction to Water Engineering**
School of Civil and Environmental Engineering
UOC3 HPW3
Prerequisite/s: CVEN1023, CVEN1024.

Review of fluid properties, hydrostatics and manometry; extension of pressure, continuity, energy and momentum concepts introduced in CVEN1023 Dynamics (Bernoulli’s equation, momentum flux and force balances); introduction to Navier Stokes Equations; turbulent and laminar flow; velocity profiles; energy losses and gains; pipe systems; boundary layers, skin friction and form drag; pump behaviour and selection; physical models.

**Assumed Knowledge:** CVEN2023.

CVEN2722
**Environmental Engineering Practice 2**
School of Civil and Environmental Engineering
UOC3 HPW2
Prerequisite/s: 36 units of credit

The 2nd year integrating course introducing students to the multi-disciplinary nature of real world engineering problems and the relationship of engineering to the wider socio-economic environment. Case studies in formulation, modelling and resolution of environmental and water engineering problems. A holistic approach to addressing complex engineering problems, engineering methodology, community participation and public involvement, sustainability, equity and distributional effects. Other topics include: introduction to EIS and risk-quantification. Students will undertake site visits and visits to water engineering consultants’ laboratories and offices.

**Assumed Knowledge:** CVEN1022, CVEN1025.

CVEN2752
**Environmental /Water Engineering Practice 2**
School of Civil and Environmental Engineering
UOC3 HPW2
Prerequisite/s: 36 units of credit

The 2nd year integrating subject introducing students to the multi-disciplinary nature of real world engineering problems and the relationship of engineering to the wider socio-economic environment. Case studies in formulation, modelling and resolution of environmental and water engineering problems. A holistic approach to addressing complex engineering problems, engineering methodology, community participation and public involvement, sustainability, equity and distributional effects. Other topics include introduction to EIS and risk-quantification. Students will undertake site visits and visits to water engineering consultants’ laboratories and offices.

CVEN3023
**Civil Engineering Practice 3A**
School of Civil and Environmental Engineering
UOC3 HPW2
Prerequisite/s: 84 units of credit

A project-based course integrating the material learnt in the various sub-disciplines of civil engineering. Multi-disciplinary projects are undertaken and involve the identification of major issues and the development of solutions for open-ended problems including considerations of the environmental, economic and social impacts of the proposed solutions. The objective is to further develop the students’ research, teamwork, managerial and self-directed learning skills. This course is focal in Year 3 (S1) of the undergraduate civil engineering program reinforcing the material covered in Years 1 and 2 and in the courses being undertaken concurrently.

CVEN3024
**Civil Engineering Practice 3B**
School of Civil and Environmental Engineering
UOC3 HPW2
Prerequisite/s: 84 units of credit

CVEN3024 continues on from CVEN3023. A project based course integrating the material learnt in the various sub-disciplines of civil engineering. This course is focal in Year 3 (S2) of the undergraduate civil engineering program.

CVEN3025
**Engineering Computations 2**
School of Civil and Environmental Engineering
UOC3 HPW3

Topics include: Numerical solution of linear and non-linear equations; numerical integration, finite differences; differential equations, boundary value problems; initial value problems; eigenvalue problems; partial differential equations (civil and environmental engineering applications); an introduction to finite element analysis.

**Assumed Knowledge:** MATH2019, CVEN2025.

CVEN3125
**Engineering Construction 2**
School of Civil and Environmental Engineering
UOC3 HPW3
Prerequisite/s: CVEN2126.

Construction management issues dealing with resources of people, money, equipment and materials. An introduction to the design, planning and management of construction operations. Researching issues associated with construction operations. Topics include: sustainable construction, recycling, waste and environmental issues; construction site organisation of personnel; construction site layout; materials planning and procurement, suppliers, subcontractors; equipment management and maintenance; maintenance; estimating; work physiology; ergonomics; selected construction operations - design, planning and management.

CVEN3126
**Engineering Management 1**
School of Civil and Environmental Engineering
UOC3 HPW3
Basic techniques used in the management of engineering projects and engineering works; purpose and practices of management; management of resources including people, equipment and materials; project, asset and strategic management; management information systems.

**Assumed Knowledge:** CVEN2125.

**CVEN3222**  
**Geotechnical Engineering 2**  
School of Civil and Environmental Engineering  
UOC3 HPW3

An introductory course for fundamental and applied soil mechanics. Topics include: description of soil mechanics, density relationships, confined and unconfined seepage, principle of effective stress, consolidation theory, stress distribution and settlement.

**CVEN3223**  
**Geotechnical Engineering 3**  
School of Civil and Environmental Engineering  
UOC3 HPW3

Prerequisite/s: CVEN3222.

An introductory course to fundamentals of soil mechanics. Topics include: Mohr circle, failure criterion, strength of soils, soil testing, shear stress-strain behaviour of soils, slope stability, site investigation and mechanics of unsaturated soils.

**CVEN3322**  
**Structural Engineering 2**  
School of Civil and Environmental Engineering  
UOC6 HPW6

A course consisting of a structural design strand and a structural analysis strand. Design strand: Reinforced concrete elements; revision of limit states, concrete mechanical properties, reinforcement types and properties; durability requirements; behaviour of cross-sections in bending at both service and ultimate loads; ultimate strength analysis and design of cross-sections in both flexure (singly and doubly reinforced), ductility; serviceability analysis and design of beams (cracked section analysis, deflection and crack control); ultimate strength in shear; bond anchorage and curtailment (simple and continuous beams and one-way slabs); short and slender concrete columns (interaction diagrams). Analysis strand: Stiffness method (displacement method) of analysis for beams and frames; second order behaviour of frames; slenderness effects in frames; elastic stability analysis; software applications; moment distribution applied to continuous beams and non-sway frames; plastic analysis of continuous beams.

**CVEN3324**  
**Structural Engineering 3**  
School of Civil and Environmental Engineering  
UOC3 HPW3

Prerequisite/s: CVEN2322

A structural design course dealing with: laterally unsupported steel beams; steel plate girders; steel-beam columns; steel members subjected to biaxial bending; steel connections and detailing; plastic design of steel beams and frames; and timber engineering (including materials, design of simple elements and members, timber connections; domestic construction).

**CVEN3448**  
**Transport Engineering**  
School of Civil and Environmental Engineering  
UOC3 HPW3

This course develops skills related to highway design and pavement evaluation. Topics include: introduction to road design including elements, history, terminology and driver influence; route location process; design practice of urban and rural roads, intersections and interchanges; computer aided design; road traffic loadings; sub-grade evaluation; base and sub-base materials; surfacings; pavement design including flexible pavements.

**CVEN3526**  
**Water Resources Engineering**  
School of Civil and Environmental Engineering  
UOC3 HPW3

The course introduces the practice of engineering hydrology and its application in water resources management and flood estimation. Topics include: hydrological cycle, climatology, atmospheric circulation, meteorological measurements, precipitation, interpretation of data, streamflow measurement, runoff components, hydrograph analysis, storm runoff and loss rates, rainfall estimation - IDF diagrams and design hyetographs, concepts of flood estimation, deterministic rational method, probabilistic rational method, time-area methods, unit hydrographs concepts.

**CVEN3527**  
**Water Engineering**  
School of Civil and Environmental Engineering  
UOC3 HPW3

Prerequisite/s: CVEN2525.

The course develops and expands knowledge in hydraulics and hydrology and their application in water engineering. Topics include: open channel flow - specific energy, specific momentum and force, Manning and Chezy equations, uniform flow, subcritical and supercritical flow, hydraulic jumps, gradually varied flow profiles, sediment characteristics, Shields diagram, bedform, sediment stability, channel side slopes, suspended sediment, fluvial sediment transport capacity estimators, groundwater, hydraulic conductivity, Darcy’s Law, intrinsic permeability, water potential, hydraulic head, unsaturated zone, aquifers, aquicludes, aquitards, steady state flow, transient flow, effective stress, transmissivity, storativity.

**CVEN3531**  
**Principles and Applications of Aquatic Chemistry**  
School of Civil and Environmental Engineering  
UOC3 HPW3

Prerequisite/s: CVEN2525

Basic thermodynamic and kinetic concepts are extended in this course to enable analysis of complex aqueous systems typical of surface water, ground water and marine environments. The principles of acid-base behaviour, solid dissolution and precipitation, complexation, oxidation and reduction and interactions at solid surfaces are presented such that problems pertaining to natural system behaviour, water quality degradation and water and wastewater treatment can be coherently addressed. A problem solving approach is emphasised.

**CVEN3723**  
**Environmental Engineering Practice 3A**  
School of Civil and Environmental Engineering  
UOC3 HPW2

Prerequisite/s: 84 units of credit

A project-based course integrating the material learnt in the various sub-disciplines of environmental engineering. Multi-disciplinary projects are undertaken and involve the identification of major issues and the development of solutions for open-ended problems including considerations of the environmental, economic and social impacts of the proposed solutions. The objective is to further develop the students’ research, teamwork, managerial and self-directed learning skills. This course is focal in Year 3 (S1) of the undergraduate environmental engineering program reinforcing the material covered in Years 1 and 2 and in the courses being undertaken concurrently.
CVEN3724
Environmental Engineering Practice 3B
School of Civil and Environmental Engineering
UOC3 HPW2
Prerequisite/s: 84 units of credit

CVEN3724 continues on from CVEN3723. A project-based course integrating the material learnt in the various sub-disciplines of environmental engineering. This course is focal in S2 of Year 3 of the undergraduate environmental engineering program reinforcing the material covered in the courses being undertaken concurrently.

CVEN3725
Waste Management
School of Civil and Environmental Engineering
UOC3 HPW3

An introduction to waste management, from generation to treatment and disposal; including waste characterisation, waste minimisation, waste treatment and landfill design. Wastes generated in urban economies are the focus of the course; but mining and contaminated sites may also be included.

CVEN3726
Environmental Policy, Law and Economics
School of Civil and Environmental Engineering
UOC3 HPW3

An introduction to environmental policies at a range of institutional levels, including sustainable development principles; implementation of environmental policies by regulatory action at international, national, state and local levels; introduction to a range of environmental economic analytical tools, and implementation of environmental policies by market mechanisms.

CVEN4000
Honours Thesis Part A
School of Civil and Environmental Engineering
Enrolment requires school approval
UOC6
Prerequisite/s: 132 units of credit completed and WA of 62.

The thesis may describe directed laboratory, investigatory, design, field or research work on an approved subject and will be completed under the guidance and supervision of a member of the academic staff. This subject must be satisfactorily completed by all students wishing to obtain an Honours degree.

CVEN4001
Honours Thesis Part B
School of Civil and Environmental Engineering
UOC4
Prerequisite/s: CVEN4000

Part B of the Honours thesis. Course description as for CVEN4000.

CVEN4027
Civil Engineering Practice 4A
School of Civil and Environmental Engineering
UOC6 HPW4

This final year integrating course involves formulating designs for and solution to real world civil engineering problems in the areas of structural and geotechnical engineering. The problems will be drawn from industry and will be multi-disciplinary involving application of material learnt throughout the undergraduate program. The course will involve either group or individual project work and will involve the preparation of working drawings and project reports similar to those required in industry.

CVEN4028
Civil Engineering Practice 4B
School of Civil and Environmental Engineering
UOC6 HPW4

This final year integrating course involves formulating designs for and solution to real world civil engineering problems in structural engineering, construction and management. The problems will be drawn from industry and will be multi-disciplinary involving application of material learnt throughout the undergraduate program. The course will involve either group or individual project work and will involve the preparation of working drawings and project reports similar to those required in industry.

CVEN4029
Civil Engineering Practice 4C
School of Civil and Environmental Engineering
UOC6 HPW4

This final year integrating course involves formulating designs for and solution to real world civil engineering problems in water, geotechnical and transport engineering. The problems will be drawn from industry and will be multi-disciplinary involving application of material learnt throughout the undergraduate program. The course will involve either group or individual project work and will involve the preparation of working drawings and project reports similar to those required in industry.

CVEN4126
Engineering Management 2
School of Civil and Environmental Engineering
UOC3 HPW3

Tools and knowledge needed by engineering managers. Topics chosen from contracts management and administration; legal matters and professional practice; engineering economics and financial management; management of international projects; marketing; managing professional services. Students are required to complete a minimum of 60 working days of approved industrial training, submit a report on this training before Week 4 of Session 1 Year 4, and to present a seminar during S1 outlining their industrial training experiences.

Assumed Knowledge: CVEN3126.

CVEN4129
Advanced Construction and Project Management
School of Civil and Environmental Engineering
UOC4 HPW3
Prerequisite/s: CVEN3126, CVEN4126

Advanced construction technology topics and topics in the planning, design, organisation, coordination, staffing, administration, control and management of construction and allied projects.

CVEN4149
Professional Level Project Management Tools and Skills
School of Civil and Environmental Engineering
UOC4 HPW3
Prerequisite/s: CVEN3126, CVEN4126

Professional level construction and project management skills and techniques.

CVEN4159
Advanced Construction Technology and Engineering
School of Civil and Environmental Engineering
UOC4 HPW3
Prerequisite/s: CVEN3126, CVEN4126

State-of-the-art work associated with selected advanced topics in construction technology and engineering.

CVEN4225
Geotechnical Engineering 4
School of Civil and Environmental Engineering
UOC3 HPW3
Prerequisite/s: CVEN3222.

Theoretical and presumptive bearing capacity of shallow and deep foundations including pad, raft and piled foundations. Allowable settlement of foundations on soil and rock. Foundation construction including dewatering, temporary support, soil boring and pile driving. Special foundations for expansive soils and rock. Lateral earth pressures and retaining wall design.

CVEN4269
Environmental Geotechnics
School of Civil and Environmental Engineering
UOC4 HPW3
Geotechnical design of landfills; contaminant migration in soils; emendation of contaminated sites. Mine waste management, including tailings disposal and acid mine drainage.

**CVEN4279**
**Rock and Slope Engineering**
School of Civil and Environmental Engineering  
UOC4 HPW3

Description of rock mass and discontinuities; rock strength and failure criteria. Core logging; field data collection, mapping and fracture surveys; data presentation; hemispherical projections; introductory rock slope stability; foundations on rock; excavation or rock; in-situ stress; stresses about underground openings; classification systems and tunnel support requirements; site investigations for landslides and slope stabilisation techniques; use of slope stability analysis programs. The course includes a compulsory 3 day field trip.

**CVEN4289**
**Site Investigations and Dam Engineering**
School of Civil and Environmental Engineering  
UOC4 HPW3

A general review of foundations, dewatering and temporary support systems, and parameters required for design of foundations, slopes and other structures. The influence of geology on geotechnical behaviour of soil and rock; weathering processes and profiles in valleys, site investigation techniques - test pitting, drilling and water pressure testing; in-situ testing methods - SPT, CPT, vane shear, site investigation examples; laboratory shear strength testing and selection of design parameters; peak and residual strengths; triaxial and direct shear test; zoning of embankment dams. Design of seepage control, and design, specification and construction of filters for dams. Stability analysis for embankment dams. Foundation preparation, cleanup, grouting, specification and quality control for embankment dams.

**CVEN4299**
**Advanced Topics in Geotechnical Engineering**
School of Civil and Environmental Engineering  
UOC4 HPW3

Topic 1 plus either of Topics 2 or 3 will be offered in any one year. Topic 1: An introduction to the fundamentals of critical state soil mechanics and soil plasticity. Topic 2: Advanced pavement engineering. Topic 3: Application of computer simulation techniques to geotechnical engineering problems.

**CVEN4223**
**Structural Engineering 4**
School of Civil and Environmental Engineering  
UOC3 HPW3

The course deals with the design and behaviour of the following: one-way and two-way reinforced concrete slabs (including the Direct Design Method and the Equivalent Frame Method of analysis); retaining walls; footings; prestressed concrete beams and one-way slabs; and prestressed concrete anchorage zones.

**CVEN4339**
**Design of Bridges**
School of Civil and Environmental Engineering  
UOC4 HPW3

Fundamentals of bridge engineering (site selection; bridge type selection; standard superstructures and substructures; bridge hydraulics; bridge form); bridge codes; load distribution in bridges; preliminary design considerations for simply supported beam-and-slab and box girder bridges, continuous beam-and-slab bridges, cable-stayed bridges.

**CVEN4349**
**Special Topics in Concrete, Steel and Composite Structures**
School of Civil and Environmental Engineering  
UOC4 HPW3

Topics will be selected from the following. Concrete Structures: The art of detailing; design for torsion; yield line design; strut and tie modelling; time effects; design of continuous prestressed concrete beams. Steel Structures: Plastic analysis and design of steel structures. Composite Steel-Concrete Structures: concrete filled steel tubes; connections, beam-slab systems; longitudinal shear and slip.
Topics will be selected from the area of water quality and treatment. Topics may include water and wastewater treatment; water quality in rivers, lakes, reservoirs, estuaries, and coastal waters; catchment processes and management; water quality modelling.

**CVEN4529**  
**Environmental Engineering Practice 4C**  
School of Civil and Environmental Engineering  
UOC6  HPW3  
Prerequisite/s: CVEN4526.

This final year integrating course involves formulating designs for and solutions to real world environmental engineering problems in water, geotechnical and transport engineering. The problems will be drawn from industry and will be multi-disciplinary involving application of material learnt throughout the undergraduate program. The course will involve either group or individual project work and will involve the preparation of working drawings and project reports similar to those required in industry.

**DANC1001**  
**Dance Styles 1**  
School of Theatre, Film and Dance  
UOC6  HPW7.5  
Prerequisite/s: Enrolment in program 3408

Establishes the basis by which students acquire a technical mastery over their bodies and involves the study of two essential dance styles: Classical Ballet and Modern Dance.

**DANC1002**  
**Dance Styles 2**  
School of Theatre, Film and Dance  
UOC6  HPW7.5  
Prerequisite/s: DANC1001

Extends the student's acquisition of technical mastery over the body begun in Dance Styles 1.

**DANC1101**  
**Anatomical Foundations of Dance Education**  
School of Theatre, Film and Dance  
UOC6  HPW3  
Prerequisite/s: Enrolment in program 3408

Studies the basic principles of anatomy as a foundation for the understanding of human movement and function.

**DANC1102**  
**Teaching Safe Dance**  
School of Theatre, Film and Dance  
UOC6  HPW3  
Prerequisite/s: DANC1101

Provides the knowledge essential to a detailed analysis of dance technique in order to allow safe class construction and instruction. Injury prevention is a primary concern.

**DANC2000**  
**Dance Analysis and Composition 1**  
School of Theatre, Film and Dance  
UOC6  HPW4  
Prerequisite/s: DANC1002 or THST1101 or THFI1002 or DANC1103 or FILM1101 or PFST1103;  
Excluded: THST2140, PFST2000

Studies (a) a range of systems and methods of analysing dance, leading to a comprehensive understanding of the ways in which movement makes meaning and (b) an introduction to dance making and the fundamentals of dance composition.

**DANC2002**  
**Theatre Production**  
School of Theatre, Film and Dance  
UOC6  HPW4  
Prerequisite/s: DANC1002 or THST1101 or THFI1002 or DANC1103 or FILM1101 or PFST1103;  
Excluded: PFST2002

Addresses the question of how theatre and dance are presented and produced, provides the comprehensive theoretical basis involved in staging a production, along with practical experience in selected areas of production.
**DANC2005**
**Dance Analysis and Composition 2**
School of Theatre, Film and Dance
UOC6 HPW4
Prerequisite/s: DANC2000 or PFST2000;
Excluded: PFST2005
A detailed study of the nature and role of composition in dance and the relationship between composition and the process and product of choreography.

**Note/s:** Composition workshops are of a highly practical nature. Students must be prepared to spend time outside of class working with peers on composition tasks.

**DANC2007**
**History of Dance**
School of Theatre, Film and Dance
UOC6 HPW4
Prerequisite/s: Enrolment in program 3408 and DANC2000;
Excluded: PFST2014
Explores the nature and historical background of dance as an art form and as musical theatre. The emphasis is on major events and figures in Western European, American and Australian ballet, modern and jazz dance.

**DANC2014**
**Dance and Technology**
School of Theatre, Film and Dance
UOC6 HPW4
Prerequisite/s: Enrolment in program 3408 and DANC2000;
Excluded: PFST2014
Explores the video camera as a means of both documenting and creating dance. Introduces students to contemporary software packages that allow for computer-generated choreography and considers the role of Labanotation as both a tool for recording dance and a means of creating new works.

**DANC2103**
**Dance Styles 3**
School of Theatre, Film and Dance
UOC6 HPW7.5
Prerequisite/s: DANC1001, DANC1002
Course requires a demonstration of skill and competence in Classical Ballet, Modern Dance and Jazz Dance.

**DANC2104**
**Dance Styles 4**
School of Theatre, Film and Dance
UOC6 HPW7.5
Prerequisite/s: DANC1001, DANC1002
Expands and consolidates the student's mastery of a range of practical dance styles.

**DANC2105**
**Dance Styles 5**
School of Theatre, Film and Dance
UOC6 HPW7.5
Prerequisite/s: DANC1001, DANC1002
Expands and consolidates the student's mastery of a range of practical dance styles.

**DANC2106**
**Dance Styles 6**
School of Theatre, Film and Dance
UOC6 HPW7.5
Prerequisite/s: DANC1001, DANC1002
Expands and consolidates the student's mastery of a range of practical dance styles.

**Note/s:** Students should be aware that this course involves at least 20-30 extra hours of production time. This includes some weekday timeslots, and up to 5 evenings. Please check with the Staff Contact for exact dates and times.

**DANC2107**
**Dance Styles 7**
School of Theatre, Film and Dance
UOC6 HPW7.5
Prerequisite/s: DANC1001, DANC1002
This course is the last in a carefully sequenced and graded series involving a range of styles. Students will be expected to display a high level of technical mastery over their bodies.

**DANC2201**
**The Teaching-Learning Process in Dance**
School of Theatre, Film and Dance
UOC6 HPW4
Prerequisite/s: DANC1001, DANC1002
Introduces students to pedagogy in general and considers how dance may best be taught in the context of the Australian secondary school system.

**DANC2203**
**Dance Teaching Practice**
School of Theatre, Film and Dance
UOC12
Prerequisite/s: DANC2209
Teaching experience consists of 40 days experience in a New South Wales secondary school. Students observe lessons conducted by experienced teachers and plan and deliver lessons for a number of classes, under the direction of supervising teachers. Students also become familiar with organisational aspects of a high school and activities other than those related to subject delivery, for example, school policies and general supervision of school students.

**Note/s:** This course is a formal requirement of the BA(Dance)/BEd program.

**DANC2209**
**Dance Method A**
School of Theatre, Film and Dance
UOC3 HPW2
Prerequisite/s: DANC1001, DANC1002, DANC2201;
Excluded: DANC2210.
Students are given a wide range of practical dance activities that will enable them to implement all levels of the NSW Syllabuses. They will examine the national Curriculum Document and investigate ways of integrating dance with the other major arts areas.

**DANC2211**
**Dance Method B**
School of Theatre, Film and Dance
UOC3 HPW2
Prerequisite/s: DANC2209
This course, which extends and develops the work of Dance Method A, deals with the application of the experiences gained in schools towards the profession of teaching dance.

**DANC4000**
**Dance Honours (Research) Full-Time**
School of Theatre, Film and Dance
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in DANC/FILM/PFST/THFI/THST courses with an average of 65% in DANC.
Students are required to undertake an original piece of research extending throughout the year and to submit a thesis of 20,000 words based upon it and to undertake a seminar in research method and complete a practical project accompanied by a written exegesis.

**DANC4050**
**Dance Honours (Research) P/T**
School of Theatre, Film and Dance
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in DANC/FILM/PFST/THFI/THST courses with an average of 65% in DANC.
Students are required to undertake an original piece of research extending throughout the year and to submit a thesis of 20,000 words based upon it and to undertake a seminar in research method and complete a practical project accompanied by a written exegesis.

**ECON1101**  
**Microeconomics 1**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101  
Introduces economics as a social science: scarcity, resource allocation and opportunity cost; an introductory analysis of consumer behaviour; the economics of firms and markets; production and costs; the classification and analysis of markets; efficiency concepts and market failure; the gains from international trade and the impact of trade restrictions; economic growth and structural change.

**ECON1102**  
**Macroeconomics 1**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101  
Provides an introduction to the analysis of aggregate output, employment and economic growth and their relationship to the policy issues of unemployment, inflation and the balance of payments. Other topics include: social accounting and aggregate income and expenditure analysis; macroeconomic models of income determination; consumption and investment functions; the role of money and financial institutions; interactions between goods and money markets in equilibrium and disequilibrium situations; and an analysis of recent Australian macroeconomic experience.

**ECON1107**  
**Elements of Environmental Economics**  
School of Economics  
UOC6  HPW3  
Excluded: ECON1101  
This course provides an introduction to environmental issues, market failure, conservation and preservation of environment, discounting, present value, annuities; matrix algebra: (operations with matrices, determinants, matrix inverse, rank, solutions to matrix equations); the graphical approach to linear programming; calculus: (univariate differentiation, maxima and minima of a function, functions of several variables, partial derivatives, unconstrained and constrained optimisation) and the applications of the above concepts and techniques in accountancy and economics, including the use of spreadsheet computer programs. Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC Mathematics. Students who have taken General Mathematics will not have achieved the level of knowledge which is assumed for this course.

**ECON1202**  
**Quantitative Methods A**  
School of Economics  
UOC6  HPW3  
Excluded: MATH1011, MATH1011, MATH1021, MATH1131, MATH1231, MATH1141, MATH1241, ECON2291  
This course examines: mathematics of finance: (compound interest, present value, annuities); matrix algebra: (operations with matrices, determinants, matrix inverse, rank, solutions to matrix equations); the graphical approach to linear programming; calculus: (univariate differentiation, maxima and minima of a function, functions of several variables, partial derivatives, unconstrained and constrained optimisation) and the applications of the above concepts and techniques in accountancy and economics, including the use of spreadsheet computer programs. Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC Mathematics. Students who have taken General Mathematics will not have achieved the level of knowledge which is assumed for this course.

**ECON1203**  
**Quantitative Methods B**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1202; Excluded: ECON2292, MATH1041, MATH2801, MATH2841, MATH2901.  
Course topics include: frequency distributions; measures of central tendency; dispersion and skewness; introduction to probability theory; the binomial distribution; the poisson distribution; the normal distribution; point estimation of population parameters and confidence intervals; hypothesis tests; the t and chi square distributions; bivariate regression; estimation; and hypothesis testing.

**ECON1301**  
**Australia in the Global Economy**  
School of Economics  
UOC6  HPW3  
Excluded: ECOH1301  
This course looks at the international economy at the end of the 19th century (trade, factor flows, and payments arrangements); problems of the international economy between the wars; the impact of World War II and the international economy in the post-war era; and Australian economic development and its relationship with the international economy in terms of economic fluctuations, problems of the inter-war period, growth of manufacturing, government policy and action, the importance of the mining industry, economic development and the distribution of income and wealth.

**ECON1302**  
**Australia and the Asia-Pacific Economies**  
School of Economics  
UOC6  HPW3  
Excluded: ECOH1302  
This course focuses on Australia’s economic relations with the countries of Asia and the Western Pacific since the 19th century, with particular emphasis on the period since the Second World War. Topics include: capital and trade flows, labour and immigration issues; the changing political structures; Australian colonial rule and economic development in Papua and New Guinea; the rise to economic power of Japan and its relations with Australia before the Second World War; resurgence of Japan in the 1950s and its dominance of Australia’s trade; future relations with Japan; the emergence of the newly industrialising nations in Asia and their impact on Australia; the ASEAN group’s special relationship with Australia; Sino-Australian economic relations; trans-Tasman economic integration; Australia’s perceptions of Asia and the Pacific and obstacles to greater economic integration.

**ECON2101**  
**Microeconomics 2**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101  
Economists believe that in a perfect world, with perfect information, under certain conditions, markets will allocate goods efficiently. Usually, markets do not function in this way. Firms may have market power, which they will exert in strategic ways to influence their rivals to gain advantage. Imperfect information presents a series of problems for firms, consumers and households, particularly for insurance and labour markets.

**ECON2102**  
**Macroeconomics 2**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1102  
This course covers models of aggregate income determination in open economies; theories of aggregate economic behaviour with respect to consumption and investment expenditures and financial transactions; balance of payments and exchange rate analysis; theories of inflation and unemployment; introductory dynamic analysis; and theories of growth and cycles.

**ECON2103**  
**Business and Government**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101  
This course examines how government affects the business environment at the microeconomic level. The effects on business of government instrumentalities such as the Productivity Commission and the Australian Consumer and Competition Commission are examined. Issues relating to microeconomic reform, economic rationalism, market failure and government business enterprises are explored.

**ECON2104**  
**Applied Macroeconomics**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1102
This course examines the big-picture issues that affect households, businesses and governments. The emphasis is on practical approaches rather than theoretical models. Topics include living standards, economic growth and inflation, the business cycle and economic forecasting, fiscal and monetary policy, the balance of payments, exchange rates, and employment and welfare policy.

ECON2105  
**Economics of Corporations**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101

Examines the economics of internal organisations in firms, corporations and other formal organisations. Addresses questions such as: why do organisations arise in market economies, how are incentives designed in organisations, how do organisations coordinate the decisions of many diverse agents, how does organisational design affect business strategy? Issues of transaction cost economics, informational economics and principal-agent theory are discussed.

ECON2107  
**The Economics of Information and Technology**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101

The course examines the following: Information, market failure and R & D; asymmetric information; localised learning; technological change and intellectual property rights; the economics of innovation; market structure, patents, inventions and R & D; information technology; biotechnology; clusters of innovations and the diffusion of innovations; Land National Technology Strategy.

ECON2109  
**Economics of Natural Resources**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101

Provides an introduction to the exploitation of natural resource systems examined within an economic framework, particularly forestry, fisheries, water, oil and other minerals. Also looks at policies required to ensure improved management without overexploitation of these renewable and non-renewable resources under different property-right regimes.

ECON2111  
**Globalisation**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1102

This course analyses economic issues relating to the global economy and the effects of economic events on nations, with special emphasis on the effects of trade and economic interdependence on growth, welfare and the standard of living. It covers motives for tariff and non-tariff barriers, and the effects of strategic protection of high productivity industries, and the effects of new technologies. It also examines the consequences of increasing global interdependence on wages, with particular attention to different occupations and skill levels in the labour force. Students will also study issues facing the WTO, especially conflicts between international trade and the environment, human rights and labour standards.

ECON2112  
**Game Theory and Business Strategy**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101

Outlines the basic tools and concepts in game theory and explores its applicability to a wide variety of real business situations. Business decision-making is inherently strategic and game theory shows what outcomes occur when agents interact strategically with one another. Applications from auction theory, industrial organisation, labour and environmental economics and public policy are examined.

ECON2113  
**Economics of E-Commerce**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101

Electronic commerce is radically altering economic activities and the social environment. It affects large sectors of the economy, such as communications, finance, retail trade, education, health and government. It affects the way that businesses interact. This course examines the impact of e-commerce, and the way that business should behave strategically in this new environment. The topics covered include, (with case studies), the planning of product lines of information goods, the development of value-maximising pricing strategies, the management of intellectual property rights, the strategic implications of lock-in and switching costs, and strategic choice in relation to government policy and regulation. Implications for international trade patterns and taxation policy are also explored.

ECON2116  
**Economics of Japanese Business and Government**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1102

This course introduces a number of important facts concerning Japanese business and government and analyses them by applying theoretical frameworks and concepts such as game theory and comparative institutional analysis. This approach provides ways for understanding interconnections among a variety of Japanese-style business and labour market practices as well as tools for evaluating the effectiveness of Japanese industrial policy. Topics include: internal labour market; employment practices; work organisations; industrial relations; manufacturer-suppliers relationships; industrial policy (competition vs. collusion; R&D policy; protectionism).

ECON2117  
**Economics of Tourism**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1102

Topics include: macro and micro economic environments; factors affecting international and domestic tourism; tourism forecasting models; economic analysis of projects; cost-benefit and related procedures; and the implications of tourism developments for the community in general.

ECON2117  
**Environmental Economics**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1101

Considers the main elements of environmental economics and cost-benefit analysis as it relates to the assessment of environmental issues. Topics include: pollution and pollution policy; environmental cost-benefit analysis and economic methods for measuring costs and benefits; species extinction and irreversibility; environmental ethics and discounting; the environment and developing countries; and the sustainable economy.

ECON2206  
**Introductory Econometrics**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON1203

This course introduces econometrics and explores the representation of economic relationships by simple and multiple regression models; static and dynamic models; and the statistical complications of autocorrelation, collinearity, and heteroskedasticity. Practical computer applications feature throughout.

ECON2207  
**Econometric Methods**  
School of Economics  
UOC6  HPW3  
Prerequisite/s: ECON2206
This course covers estimation of econometric models using cross-section data, discrete choice models, and instrumental variable estimators. Practical computer applications feature throughout.

**ECON2208**  
**Operations Research**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON1202

Introduces operations research as the systematic application of quantitative methods to the analysis of problems involving decision making in economics and related disciplines. Includes linear programming, quadratic programming and dynamic programming with applications to transportation, inventory and portfolio selection and other economic related fields.

**ECON2209**  
**Business Forecasting**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON1203

This course looks at the use of econometric and statistical techniques relevant to forecasting in a business environment and computer implementation of the methods. Short-term forecasting using time series analysis; long-term forecasting with S-shaped growth curves and trend analysis. The study of applied work is emphasised in this non-specialist course.

**ECON2215**  
**Statistics for Econometrics**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON1203;  
**Excluded:** MATH2801, MATH2901, MATH2841, BEE2041

**ECON2291**  
**Quantitative Methods A (Arts)**  
School of Economics  
UOC6  HPW3  
**Excluded:** ECON1202, MATH1011, MATH1021, MATH1031, MATH1131, MATH1141, MATH2311, MATH241

This course examines: mathematics of finance: (compound interest, present value, annuities); matrix algebra: (operations with matrices, determinants, matrix inverse, rank, solutions to matrix equations); the graphical approach to linear programming; calculus: (univariate differentiation, maxima and minima of a function, functions of several variables, partial derivatives, unconstrained and constrained optimisation) and the applications of the above concepts and techniques in accountancy and economics, including the use of spreadsheet computer programs. Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC Mathematics. Students who have taken General Mathematics will not have achieved the level of knowledge which is assumed in this course.

**ECON2292**  
**Quantitative Methods B (Arts)**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON2291;  
**Excluded:** ECON1203, MATH1041, MATH2801, MATH2841, MATH2901

Course topics include: frequency distributions; measures of central tendency; dispersion and skewness; introduction to probability theory; the binomial distribution; the Poisson distribution; the normal distribution; point estimation of population parameters and confidence intervals; hypothesis tests; the t and chi square distributions; bivariate regression; estimation; and hypothesis testing.

**ECON2305**  
**Modern Asian Economic History**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON1102  
**Excluded:** ECOH2305

This course examines the contrasting histories of Asian economies in the modern period. Four major areas are considered - Japan, China, India and Indonesia. Focus is on the nature of the Asian economies and the impact of the West prior to 1949, and the history of planning in the four nations since the Second World War. Four specific themes are considered: the impact of Japanese development on Asia; economic planning and policy in China; problems of the modern Indian economy; and planning for scientific and technological development in modern Asia.

**ECON2313**  
**Australian Economic Development**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON1102  
**Excluded:** ECOH2313

This course examines the development of the Australian economy from the Long Boom and the Depression of the 1890s to the present day. It looks at Australian economic development and its main features: economic fluctuations and their consequences, especially the Depression of the 1930s; the rise of Australian economic institutions; changes in the philosophy of development and the role of government; migration and the inflow of foreign capital; development strategies of the States; impact of war; growth of manufacturing and industry policy; development of the services sector; problems of the agrarian economy; and changes in the standard of living. Also considered is Australia’s changing economic relations with other countries and the world economy, and economic problems in the later 20th century in a historical perspective.

**ECON2322**  
**European Integration**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON1102  
**Excluded:** ECOH2322, EURO2600

The objective of the course is to impart a knowledge and understanding of the institutions, current policies and likely directions of economic and social change within the European Union. This involves consideration of nations states which, through historical circumstances, have created differing institutional and policy directions (and in the case of Eastern Europe a different socioeconomic system) that now are in the course of being melded. Specific topics considered include the process towards a single market; the problems and implications of monetary integration; the trade distortions arising from the Common Agricultural Policy; the collapse of the Soviet system and the widening of the European Union; the operation of European multinationals; the process of privatisation in Europe; and European integration in relation to Australia and Asia. The course is of relevance not only to those interested in European issues. It also has implications for other regional arrangements (ASEAN and NAFTA) which are at an earlier stage in the integration process.

**ECON3101**  
**Markets and Public Choice**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON2101

Considers the theory of various types of market failure including uncertainty, property rights problems and congestion, and the role of government in measuring, correcting and restructuring markets to remedy these problems.

**ECON3104**  
**International Macroeconomics**  
School of Economics  
UOC6  HPW3  
**Prerequisite/s:** ECON2102
This course considers topics in international macroeconomics, including nominal and real exchange rates, international capital markets and capital mobility, international business cycles, policy coordination and the international monetary system, financial crises and currency unions.

**ECON3105 Economic Analysis of Productivity**  
School of Economics  
UOC6 HPW3  

Provides an economic analysis of the concept of productivity. What is productivity? Why does it matter? How can we measure it? Topics to be covered include: the microeconomic foundations of productivity levels and productivity growth, the measurement of productivity and empirical studies of productivity measurement for Australia and overseas countries.

**ECON3106 Public Finance**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON1101  

Topics covered include: general aspects of public sector expenditure and its financing with special reference to Australia; the role of government in the economy; principles and types of public expenditure; taxation theory, tax sharing and revenue systems; economic and welfare aspects of different types of taxes; inflation and tax indexation; loan finance and the public debt.

**ECON3107 Economics of Finance**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON2101  

Provides a treatment of the microeconomic foundations of modern finance. Many valuation or pricing formulas in modern finance are derived from the requirement that arbitrage profits are non-existent in properly functioning capital markets. The aim of the course is to show that the valuation formulas used in modern finance can also be derived from the microeconomic theory of markets in general equilibrium. Begins with a discussion of how economics agents make decisions when some aspect of the economic environment in which they operate is uncertain. This entails a discussion of expected utility theory and stochastic dominance, which form the cornerstone of modern financial economics. Asset pricing models are developed within the context of general equilibrium portfolio choice problems. The notion that uncertainty in the economic environment can be dealt with by the introduction of state-contingent securities and that these securities lead to efficient market outcomes is fully discussed. The microeconomic theory underlying the determination of firms’ value is developed. This leads to a discussion of the Modigliani-Miller proposition that the capital structure of the firm is irrelevant in determining its value. The course concludes with a discussion of the implications of informational asymmetries for financial theories, with particular emphasis on insurance markets.

**ECON3109 Economic Growth, Technology and Structural Change**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON2101 or ECON2103 or 48UOC in Arts and Social Science  

Excluded: INST3301  

The process of economic development is never smooth. It is associated with profound changes in the fundamental structure of economic society. The rate of growth and development varies substantially between different economies. The course seeks to explain the factors that determine how societies grow and develop, with special emphasis on the role of technology and finance. Various approaches will be examined, and attention will be paid to problems associated with growth, including those relating to equity and human rights issues.

**ECON3110 Development Economics**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON2101 or ECON2103 or 48UOC in Arts and Social Science  

This course provides an in-depth introduction to different theories of underdevelopment and the associated strategies for fostering development, with emphasis on more recent perspectives. It investigates the role of institutions, institutional change, and markets as they relate to development, and discusses accompanying domestic and international economic policy questions. Much of the material is near the interface between economics and the other social sciences.

**ECON3112 The Newly Industrialising Economies of East Asia**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON1102  

This course focuses on the principal economic characteristics of the newly industrialising economies of East Asia; South Korea, Taiwan and Hong Kong, and compares internal and external policies and their contribution to the achievement of socio-economic objectives.

**ECON3113 Economic Development in ASEAN Countries**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON1102  

Analyses principal economic characteristics of the original members of the Association of South East Asian Nations: Indonesia, Malaysia, Philippines, Singapore and Thailand. Looks at causes and consequences of economic development policies, the theoretical issues related to formation of customs unions and free trade areas, and their application to ASEAN.

**ECON3114 Superannuation and Retirement Benefits**  
School of Economics  
UOC6 HPW3  

Excluded: ACTL3005  

This course provides a comprehensive analysis of superannuation and retirement benefits, primarily in Australia. Topics include: alternative superannuation arrangements, taxation and regulation of superannuation, risk management and investment strategies for superannuation, design of retirement benefits, the retirement decision, policy developments and controversies and international comparisons.

**ECON3116 International Economics**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON2101, ECON2102 or ECON2103, ECON2104.  

Primarily a theoretical treatment of international trade and finance. Looks at international trade and finance theory; comparative costs, gains from trade; effects of resource endowment on trade; barriers to trade including tariffs and quotas; strategic trade policy; economic integration; imperfect competition; Australian balance of payments; balance of payments adjustment mechanisms, internal and external balance; foreign exchange markets; international monetary system; foreign investment.

**ECON3119 Political Economy**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON1102  

Course examines alternative paradigms in economics and may include schools of thought such as the Post Keynesians, New Institutionalists, Marxians or Austrians. Particular non-traditional approaches to the theory of the firm and such topics as experimental economics, Cambridge distribution and growth theory, economic sociology, economics of politics and the debate over economic rationalism may be covered. Specific topics will depend on student preferences.

**ECON3120 Economic Reasoning**  
School of Economics  
UOC6 HPW3  

Prerequisite/s: ECON2102 or 48UOC of Arts and Social Science
How do economists reason? How do they know when their theories are useful? This course answers these questions. Within this context, it examines the development of economics and the structure of macro and micro theory. After completing this subject, students will be able to apply economics logically to practical problems.

**ECON3121**  
Managerial Economics  
School of Economics  
UOC6 HPW3  
Prerequisite/s: ECON2101 or ECON2105 or ECON2112

This course aims to equip students with the knowledge and skills necessary to tackle many of the complex strategic decisions facing modern managers. Topics to be covered include: the economics of mergers and acquisitions; strategic competition over prices, quality characteristics and capacity; profitability and entry into new industries; R&D and the strategic importance of innovation; collusion and other methods to reduce competition and the role of networks in modern economies.

**ECON3202**  
Mathematical Economics  
School of Economics  
UOC6 HPW3  
Prerequisite/s: ECON1202

This course gives students a working knowledge of static and dynamic optimisation techniques applied in economics. Topics include classical optimisation, comparative statics, non-linear programming, differential equations and optimal control. All techniques introduced are illustrated with mainstream applications such as consumer theory and the neoclassical theory of optimal growth.

**ECON3203**  
Econometric Theory  
School of Economics  
UOC6 HPW3  
Prerequisite/s: ECON2215

This course covers: a coherent theoretical development of multiple regression analysis; restricted least squares and tests of exact linear restrictions on parameters; theoretical aspects of problems with data; basic approaches to econometric specification in nested and non-nested models; error autocorrelation and heteroskedasticity.

**ECON3204**  
Econometric Model Building  
School of Economics  
UOC6 HPW3  
Prerequisite/s: ECON2207

This course aims to develop students’ knowledge of the theory and practice of building causal econometric models for real-world application. Effective modelling requires a deep understanding of economic data, familiarity with a number of model design principles and an awareness of commonly-met construction problems and how to overcome them. These themes are discussed in sequence, in the context of two diverse applications. The presentation emphasises practicalities, rather than formal rigour.

**ECON3206**  
Financial Econometrics  
School of Economics  
UOC6 HPW3  
Prerequisite/s: ECON2206

This course is concerned with the special statistical characteristics that arise when modelling time series data, such as commodity prices, interest rate exchange rate data, that have been collected at high frequency (such as daily or hourly). Topics include: modelling time varying volatility (ARCH models), generalised method of moments estimators (GMM), and non-normality issues.

**ECON3290**  
Introductory Econometrics (Arts)  
School of Economics  
UOC6 HPW3  
Excluded: ECON2206

This course introduces econometrics and explores the representation of economic relationships by simple and multiple regression models; static and dynamic models; and the statistical complications of autocorrelation, collinearity, and heteroskedasticity. Practical computer applications feature throughout.

**ECON3291**  
Econometric Methods (Arts)  
School of Economics  
UOC6 HPW3  
Excluded: ECON2207

Covers estimation of econometric models using cross-section data, discrete choice models, and instrumental variable estimators. Practical computer applications feature throughout.

**ECON4100**  
Advanced Economic Analysis  
School of Economics  
Enrolment requires school approval  
UOC6 HPW3  
Prerequisite/s: ECON2101, ECON2102 or at discretion of the Head of School

Selected topics in advanced microeconomics and macroeconomics.

**ECON4101**  
International Trade  
School of Economics  
Enrolment requires school approval  
UOC6 HPW3  
Prerequisite/s: ECON2101, ECON2102 or at discretion of the Head of School

The theory and practice of international trade. The course will emphasize both traditional neo-classical trade theory as well as the more modern strategic trade theory. The principles and predictions of these theories will be used to consider the recent developments in Australian trading relations and international trading relations in general.

**ECON4102**  
Industrial Organisation  
School of Economics  
Enrolment requires school approval  
UOC6 HPW3  
Corequisite/s: ECON4100

Topics covered will be from amongst the following: theory of the firm, production costs, monopoly, dominant and fringe firms, cartels, oligopoly and monopolistic competition, differentiated products, regulation, advertising, horizontal and vertical integration, strategic behaviour by firms, and R&D. Both theoretical and empirical results will be covered in the subject.

**ECON4103**  
Business Cycles and Growth  
School of Economics  
Enrolment requires school approval  
UOC6 HPW3  
Corequisite/s: ECON4100

This course combines modern economic theory and quantitative techniques to examine theories of business cycles and economic growth. Measurement of business cycles, theories of real and nominal courses of business cycle fluctuations, endogenous growth theories, and cross-country growth analysis will be considered.

**ECON4104**  
Economics of Labour Markets  
School of Economics  
Enrolment requires school approval  
UOC6 HPW3  
Prerequisite/s: ECON2101, ECON2102 or at discretion of the Head of School

Traditional models of labour supply; participation and hours of work, immigration. Provision of training and skills, human capital theory. The theory of screening, specific and general skills models. Demand for

ECON4105
Seminar in Research Methods
School of Economics
Enrolment requires school approval
UOC6  HPW3

This course provides training in the techniques and methods used in economic analysis and research. Students will be required to attend lectures and undertake a course of independent study as prescribed by the Head of School.

ECON4120
Economics Honours (Arts)
School of Economics
Enrolment requires school approval
UOC48  HPW6

Prerequisite/s: ECON2206, ECON2207 and credit in both ECON2101, ECON2102.

This program consists of four courses and a thesis ECON4127. The courses are ECON4100 and three other courses from a selected list.

ECON4127
Thesis (Economics)
School of Economics
Enrolment requires school approval
UOC12  HPW3

ECON4201
Applied Econometrics
School of Economics
Enrolment requires school approval
UOC6  HPW3

Prerequisite/s: ECON2206, ECON2201 or ECON2103.

This course takes a modern approach to applied econometric work. Various empirical problems are considered and the strengths and weaknesses of available ways of solving them are examined. Attention will be given to such matters as diagnostic tests in an LM framework, various forms of autocorrelation and heteroskedasticity, trending data, and outliers and influential observations. Practical experience is gained both from the study of the empirical literature and from class projects.

ECON4202
Advanced Econometric Theory
School of Economics
Enrolment requires school approval
UOC6  HPW3

Prerequisite/s: ECON3203

This course focuses on some theoretical aspects of economic time series and cross-sectional data analysis. Topics for the time series part include: stationary and non-stationary processes; unit root tests; VAR and cointegrated VAR models; cointegration tests; estimation and testing in the presence of unit roots. Topics for the cross-section data part include: fixed effect models; random effect models, unbalanced panels; dynamic models and estimation in the presence of autocorrelation; heteroskedasticity and unit roots.

ECON4207
Elements of Econometrics
School of Economics
Enrolment requires school approval
UOC6  HPW3

Prerequisite/s: ECON1203

Exclusion: ECON2206

The aim of this course is to provide students with an in-depth understanding of the simple and multivariate regression models. This course deals with numerous economic applications emphasising the practical aspects of model building. Extensions to the multiple regression model are considered in cases where the classical assumptions do not hold. In addition, topics including simultaneous equation models and qualitative choice models are covered using a range of applications from the fields of consumption, demand, investment and production economics.

ECON4227
Thesis (Econometrics)
School of Economics
Enrolment requires school approval
UOC24  HPW3

ECON4321
Economic History 4 Honours
School of Economics
Enrolment requires school approval
UOC48

Prerequisite/s: ECON1102

Excluded: ECOH4321

Consists of a thesis and four courses: Approaches to Economic and Social History; Aspects of Australian Economic Development; Seminar in Research Method; and Comparative Issues in Economic History.

ECON4327
Thesis (Economic History)
School of Economics
Enrolment requires school approval
UOC24  HPW3

Honours students in their final year are required to prepare a thesis of not more than 20,000 words which must be submitted before the final examinations in November.

EDST1101
Educational Psychology 1
School of Education
UOC6  HPW3

An introduction to the study of Educational Psychology which examines some aspects of development and of learning and instruction. Topics include: cognitive development, development of memory, the role of knowledge, problem solving and thinking, an introduction to instructional methods.

EDST1102
Social Foundations of Education
School of Education
UOC6  HPW3

Examines sociological and philosophical aspects of Australian education: interrelations between society, the economy and education; different forms of school system; structure and evolution of NSW schooling; role of government and pressure groups in the determination of curriculum and the distribution of resources; educational testing and inequalities in educational achievement: differing accounts of inequality, sexism in school systems, affirmative action programs and their putative justifications; the educational influence of both schools and families. Philosophical matters: ethics of affirmative action proposals; justice in the distribution of educational resources; justification of curriculum decisions.

EDST1103
Educational Psychology 2
School of Education
UOC6  HPW3

Prerequisite/s: EDST1101;
Excluded: EDST2010, GENT1507

An extension of EDST1101. Focuses on learning and instruction in academic domains. Topics include cognitive processes involved in reading, in writing, in mathematics and science. Related research and implications for instruction are discussed.

EDST2041
Stress and Anxiety in Students and Teachers
School of Education
UOC6  HPW3

Prerequisite/s: EDST1101 or enrolment in Diploma in Education Program;
Excluded: EDST1304, GENT1508
Excludes: EDST1102 or enrolment in Diploma in Education Program; 36 units of credit

Prerequisite/s: UOC6 HPW3

Excludes: EDST1451, EDST3904

Excludes: EDST1205, EDST2050, EDST4095 or enrolment in Diploma in Education Program; 12 units of credit in approved relevant courses offered by other Schools.

Note/s: A Method 1 course in a teaching specialisation is a corequisite.

Prerequisite/s: 42 units of credit in EDST with an average of 65% plus 12 units of credit in approved relevant courses offered by other Schools or programs.

Includes three coursework components and a thesis of approximately 10,000 - 15,000 words. The thesis involves individual research work undertaken with direction from a supervisor. The thesis constitutes 60% of the final Honours mark and the coursework components constitute 40% of the final Honours mark.

Note/s: Intending Honours students are advised to consult the School about their program of study.

Prerequisite/s: 42 units of credit in EDST with an average of 65% plus 12 units of credit in approved relevant courses offered by other Schools or programs.
Includes three coursework components and a thesis of approximately 10,000 - 15,000 words. The thesis involves individual research work undertaken with direction from a supervisor. The thesis constitutes 60% of the final Honours mark and the coursework components constitute 40% of the final Honours mark.

**Note/s:** Intending Honours students are advised to consult the School about their program of study.

### EDST4081
**Professional Issues in Teaching**

*School of Education UOC6 HPW3*

*Prerequisite/s:* EDST1101 and EDST1102; Excluded: EDST1449.

Issues related to the teacher as a professional, and concomitant ethical ramifications including responsibilities to students, superordinates, subordinates, employers, parents and society; the role of the teacher in schooling; critical examination of Government and education system policies, especially those related to equity, education of girls, boys' education, English across the curriculum and child sexual assault. Issues related to private schools and private school systems. Models and means of classroom management.

**Note/s:** May not be counted towards a major sequence in the BA program. Course is compulsory for students enrolled in programs 4055, 4075 and 3408.

### EDST4092
**Computer Skills for Teachers**

*School of Education UOC3 HPW2*

*Prerequisite/s:* 6 units of credit in Method courses; Excluded: EDST1492.

Designed to focus on practical computer skills that teachers will need on a day-to-day basis. This e-learning course centres on the use of the internet and its role in education, including learning how to locate an internet site, how to conduct education-based searches and download teaching and educational resources from the internet.

**Note/s:** Taught in conjunction with Method courses. Designed to meet the NSW DET requirements for new teachers in government schools. Students are required to attend the demonstration lectures from Week 1-5.

### EDST4093
**Special Education**

*School of Education UOC3 HPW2*

*Prerequisite/s:* 36 units of credit; Excluded: EDST4080.

Exceptional children with learning, intellectual, physical, emotional or sensory disabilities. Philosophical and practical issues. Tests and criteria for identifying these students; their special needs, programs of remediation and evaluation of teaching strategies.

### EDST4094
**Teaching Experience**

*School of Education UOC15 HPW35*

*Excluded: EDST4090*

Consists of 40 days experience in a New South Wales secondary school. Observation of lessons conducted by experienced teachers; planning and delivery of lessons, under the direction of supervising teachers. Organisational aspects of a high school and activities other than those related to subject delivery, e.g. school policies and general supervision of school students.

**Note/s:** Requires successful completion of 6 units of credit in Teaching Method courses.

### EDST4095
**Gifted and Talented Students: Recognition and Response**

*School of Education UOC3 HPW2*

*Prerequisite/s:* 36 units of credit; Excluded: EDST2050, GENT1501

Designed to equip prospective teachers with the skills to recognise and respond to the needs of intellectually gifted students, including those from disadvantaged and minority groups. Critically examines theories and definitions of giftedness which currently influence education systems in Australia, and NSW in particular, and focuses on different forms and levels of giftedness. Introduces objective and subjective methods of assessing the abilities and achievements of gifted students. Examines the cognitive and affective development of these students in the light of current research on providing optimal contexts for learning. Introduces systematic approaches to differentiating curriculum for gifted and talented learners.

### EDST4121
**Chinese Method 1**

*School of Education UOC3 HPW4*

*Prerequisite/s:* EDST1469 or EDST4121; Excluded: EDST1429, EDST2429, EDST1470.

Continuation of the topics in EDST4121.

### EDST4125
**Drama Method 1**

*School of Education UOC3 HPW3*

*Prerequisite/s:* EDST1420, EDST2420, EDST1461.

Conceptual structures and practical approaches in the teaching of drama in the secondary school, including consideration of school context, pupil experience and resources. Analysis of the Drama Syllabus; program development; assessment criteria and evaluation procedures. Workshop techniques for teaching theatre arts including consideration of appropriate levels of achievement.

### EDST4126
**English Method 2**

*School of Education UOC3 HPW3*

*Prerequisite/s:* EDST1461 or EDST4125; Excluded: EDST1421, EDST2421, EDST1462.

Continuation of the topics in EDST4125.

**Note/s:** It is recommended that students complete this course in conjunction with EDST4094.

### EDST4127
**English Method 1**

*School of Education UOC3 HPW3*

*Prerequisite/s:* EDST1422, EDST2422, EDST1403, EDST4129, EDST1463

Aims and objectives of English teaching and the principles which underpin selection and application of teaching methods. Various teaching strategies for effective classroom management in the teaching of English in secondary schools. Includes practical tasks such as analysing the English syllabus, planning units of instruction, selecting media of instruction, and designing items for assessment.

### EDST4128
**English Method 2**

*School of Education UOC3 HPW3*

*Prerequisite/s:* EDST1463 or EDST4127; Excluded: EDST1423, EDST2423, EDST1404, EDST4130, EDST1464.

Continuation of the topics in EDST4127.

**Note/s:** It is recommended that students complete this course in conjunction with EDST4094.
EDST4131  
**Literacy / English as a Second Language Method 1**  
School of Education  
UOC3 HPW3  
*Excluded:* EDST1424, EDST2424, EDST1465  
Aspects of language and language theory; various teaching skills and strategies, different lesson types and the fundamentals of planning units of work. Principles for the evaluation of teaching materials and possible strategies for their use. Student assessment and classroom management in a range of teaching situations for learners of English as a second language.

EDST4132  
**Literacy / English as a Second Language Method 2**  
School of Education  
UOC3 HPW3  
*Prerequisite/s:* EDST1465 or EDST4131;  
*Excluded:* EDST1425, EDST1466, EDST2425.  
Continuation of the topics listed in EDST4131.  
*Note/s:* It is recommended that students complete this course in conjunction with EDST4094.

EDST4133  
**French Method 1**  
School of Education  
UOC3 HPW4  
*Excluded:* EDST1430, EDST2430, EDST1471.  
A variety of approaches to the teaching of languages other than English in secondary classrooms and the contribution of linguistics to language learning. Current New South Wales syllabi; resource materials, in particular audio-visual resources, and a range of techniques to motivate learners of French; lesson preparation and assessment practices.

EDST4134  
**French Method 2**  
School of Education  
UOC3 HPW4  
*Prerequisite/s:* EDST1471 or EDST4133;  
*Excluded:* EDST1431, EDST2431, EDST1472.  
Continuation of the topics in EDST4133.  
*Note/s:* It is recommended that students complete this course in conjunction with EDST4094.

EDST4135  
**Geography Method 1**  
School of Education  
UOC3 HPW3  
*Excluded:* EDST1493  
Designed to equip students with the essential knowledge and skills to function as geography teachers in secondary schools by exposing them to a variety of teaching strategies which will enable them to operate effectively in classroom situations as well as in field settings. Lectures and discussions focus on the aims and objectives of geography teaching and the principles which underpin the selection and application of teaching methods. Also includes practical tasks such as analysing the geography syllabus, planning units of instruction, selecting media of instruction, and designing items for assessment.

EDST4136  
**Geography Method 2**  
School of Education  
UOC3 HPW3  
*Prerequisite/s:* EDST1493 or EDST4135;  
*Excluded:* EDST1494.  
Continuation of the topics in EDST4135.  
*Note/s:* It is recommended that students complete this course in conjunction with EDST4094.

EDST4137  
**German Method 1**  
School of Education  
UOC3 HPW4  
*Excluded:* EDST1434, EDST2434, EDST1475.  
A variety of approaches to the teaching of languages other than English in secondary classrooms and the contribution of linguistics to language learning. Current New South Wales syllabi; resource materials, in particular audio-visual resources, and a range of techniques to motivate learners of German; lesson preparation and assessment practices.

EDST4138  
**German Method 2**  
School of Education  
UOC3 HPW4  
*Prerequisite/s:* EDST1475 or EDST4137;  
*Excluded:* EDST1435, EDST2435, EDST1476.  
Continuation of the topics in EDST4137.  
*Note/s:* It is recommended that students complete this course in conjunction with EDST4094.

EDST4141  
**History Method 1**  
School of Education  
UOC3 HPW4  
*Excluded:* EDST1426, EDST2426, EDST1405, EDST4143, EDST1467.  
Aims and objectives of history teaching and the principles which underpin the selection and application of teaching methods for secondary school students. Teaching strategies for effective operation in classroom situations; practical tasks such as analysing the history syllabus, planning units of instruction, selecting media of instruction, and designing items for assessment.

EDST4142  
**History Method 2**  
School of Education  
UOC3 HPW4  
*Prerequisite/s:* EDST1467 or EDST4141;  
*Excluded:* EDST1427, EDST2427, EDST1406, EDST4144, EDST1468.  
Continuation of the topics listed in EDST4141.  
*Note/s:* It is recommended that students complete this course in conjunction with EDST4094.

EDST4145  
**Indonesian Method 1**  
School of Education  
UOC3 HPW4  
*Excluded:* EDST1436, EDST2436, EDST1483.  
A variety of approaches to the teaching of languages other than English in secondary classrooms and the contribution of linguistics to language learning. Current New South Wales syllabi; resource materials, in particular audio-visual resources, and a range of techniques to motivate learners of Indonesian; lesson preparation and assessment practices.

EDST4146  
**Indonesian Method 2**  
School of Education  
UOC3 HPW4  
*Prerequisite/s:* EDST1483 or EDST4145;  
*Excluded:* EDST1437, EDST2437, EDST1484.  
Continuation of the topics in EDST4145.  
*Note/s:* It is recommended that students complete this course in conjunction with EDST4094.

EDST4147  
**Japanese Method 1**  
School of Education  
UOC3 HPW4  
*Excluded:* EDST1432, EDST2432, EDST1473.  
A variety of approaches to the teaching of languages other than English in secondary classrooms and the contribution of linguistics to language learning. Current New South Wales syllabi; resource materials, in particular audio-visual resources, and a range of techniques to motivate learners of Japanese; lesson preparation and assessment practices.
EDST4148  
Japanese Method 2  
School of Education  
UOC3  HPW4  
Prerequisite/s: EDST1473 or EDST4147;  
Excluded: EDST1433, EDST2433, EDST1474.  

Continuation of the topics in EDST4147.  
Note/s: It is recommended that students complete this course in conjunction with EDST4094.

EDST4149  
Mathematics Method 1  
School of Education  
UOC6  HPW6  
Excluded: EDST1444, EDST1479, EDST2444.  

Practical and theoretical issues in the teaching of mathematics in secondary classrooms; matching appropriate instructional strategies, including the use of technology and motivational strategies, to knowledge of how children learn mathematics. New South Wales syllabi; resource materials; relevant issues, including assessment, problem solving, gender and mathematics; practical experience in the preparation of lesson plans and a range of teaching techniques appropriate for mathematics.

EDST4150  
Mathematics Method 2  
School of Education  
UOC6  HPW6  
Prerequisite/s: EDST1479 or EDST4149;  
Excluded: EDST1445, EDST2445, EDST1480.  

Continuation of the topics listed in EDST4149.  
Note/s: It is recommended that students complete this course in conjunction with EDST4094.

EDST4151  
Science Method 1  
School of Education  
UOC6  HPW8  
Excluded: EDST1446, EDST2446, EDST1481.  

Designed to prepare students for teaching the concepts and processes of science at the secondary level. Aims to assist students to develop skills in planning lessons, presenting demonstrations, using school science equipment, developing audio-visual aids and managing science classrooms. Demonstrates the use of a variety of teaching techniques. In addition, a range of resource material developed in recent projects in secondary science is introduced. Current syllabuses and ways by which they can be implemented are discussed. Important issues such as pupil preconceptions in science, assessment and evaluation, pupil differences, safety, and legal considerations for the science teacher are considered.

EDST4152  
Science Method 2  
School of Education  
UOC6  HPW8  
Prerequisite/s: EDST1481 or EDST4151;  
Excluded: EDST1447, EDST2447, EDST1482.  

Continuation of the topics listed in EDST4151.  
Note/s: It is recommended that students complete this course in conjunction with EDST4094.

EDST4153  
Spanish Method 1  
School of Education  
UOC3  HPW4  
Excluded: EDST1438, EDST2438, EDST1477.  

A variety of approaches to the teaching of languages other than English in secondary classrooms and the contribution of linguistics to language learning. Current New South Wales syllabi; resource materials, in particular audio-visual resources, and a range of techniques to motivate learners of Spanish; lesson preparation and assessment practices.

EDST4154  
Spanish Method 2  
School of Education  
UOC3  HPW4  
Prerequisite/s: EDST1477 or EDST4153;  
Excluded: EDST1439, EDST2439, EDST1478.  

Continuation of the topics in EDST4153.  
Note/s: It is recommended that students complete this course in conjunction with EDST4094.

EDST4157  
Computing Studies Method 1  
School of Education  
Enrolment requires school approval  
UOC3  HPW3  
Prerequisite/s: Enrolment in Program 3408/4055/4075/5560  

Designed to prepare students for teaching computing studies in schools. A number of syllabuses are studied in detail, including Design and Technology, Computing Studies for Years 7-10, Information Processes and Technology, Software Design and Development for Years 11-12. Aims to assist students to develop skills in the planning and management of computing lessons. Demonstrates a variety of teaching strategies associated with computing courses. Emphasises how students learn about computers and computing, and how computers impact on society. There is a focus on computing projects and how computing skills can be used to solve problems in other areas.

EDST4158  
Computing Studies Method 2  
School of Education  
Enrolment requires school approval  
UOC3  HPW3  
Prerequisite/s: EDST4157  

Continuation of topics covered in EDST4158.  
Note/s: It is recommended that students complete this course in conjunction with EDST4094.

EDST4161  
Economics and Business Studies Method 1  
School of Education  
UOC3  HPW3  

Designed to equip students with the essential knowledge and skills to teach Economics and Business Studies at Years 11 and 12. Introduces students to a variety of teaching methods including project work and case studies. Examination of resources that are appropriate for the presentation of content in both HSC courses. Covers a range of assessment strategies.

EDST4162  
Economics and Business Studies Method 2  
School of Education  
UOC3  HPW3  
Prerequisite/s: EDST4161  

Continuation of the topics studied in EDST4161.  
Note/s: It is recommended that students complete this course in conjunction with EDST4094.

EDST4163  
Junior HSIE Method 1  
School of Education  
Enrolment requires school approval  
UOC3  HPW3  

Designed to equip students with the essential knowledge and skills for teaching such HSIE subjects as Commerce and Geography from the Key Learning Area: Human Society and its Environment (HSIE) at Years 7-10 in secondary schools. Exposes students to a variety of teaching strategies which will enable them to operate effectively in both disciplines in classroom situations as well as field settings. Examines the content of both junior syllabuses and provides assessment and classroom management strategies in a range of teaching situations for learners in HSIE.
ELEC0806 Industrial Electrical Design
School of Electrical Eng and Telecommunications
UOC6 HPW3
This course deals with the fundamentals of Electrical Engineering relevant to Industrial Design. Without going into great detail or building on the ultimate physical properties of matter, the course will often use the concept of electrons. That, together with everyday knowledge of electrical applications, will be the starting point. On completion the student will have knowledge of some useful topics including the terminology of Electrical Engineering; which electric motor to choose depending on its application; Electrical Safety; Standards. The syllabus covers Ohm’s law, concepts of AC and DC voltage and current, the basics of transformers, motors and electromechanical product systems, electromagnetic interference, shielding and earthing.

ELEC0807 Electrical Engineering 1E
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: PHYS1169 or PHYS1002 or PHYS1918.

Circuit theory: analysis and design of DC and AC circuits, comprising various energy sources and complex impedances, 3 phase circuits. Laboratory methods: electrical safety, transformers and motors, signal generators, measuring devices, oscilloscopes. Instrumentation: operational amplifiers, sensors, simple signal processing, AC machines and DC machines.

ELEC0809 Electrical Engineering 1C
School of Electrical Eng and Telecommunications
UOC3 HPW3
Prerequisite/s: PHYS1169 or PHYS1002 or PHYS1918.

Circuit theory: analysis and design of DC and AC circuits, comprising various energy sources and complex impedances, 3-phase circuits. Laboratory methods: electrical safety, signal generators, measuring devices, oscilloscopes. Transformers and AC machines and induction motors. DC machines and motors.

ELEC1010 Introduction to Electrical Engineering
School of Electrical Eng and Telecommunications
UOC3 HPW3
The lecture program for this course has three themes. The first lectures provide an introduction to the practice of electrical engineering. Key skills and knowledge in safety, technical communication and information gathering are discussed. Also covered are issues of what engineers do, the wider context in which engineers operate and their obligations to society. Several lectures also explore the key theme of engineering systems. Many of the latter course lectures will be given by guest speakers from industry, and will introduce you to the world of electrical engineering. Your ability to learn from and summarise the visitors' lectures will be included in the material assessed in the examination. A number of lectures will also be given by different lecturers from the School of Electrical Engineering and Telecommunications covering key areas including power systems, control, telecommunications and electronics.

ELEC1011 Electrical Engineering 1
School of Electrical Eng and Telecommunications
UOC6 HPW6

ELEC1041 Digital Circuits
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC1011
Realisations of combinational circuits: MSI devices, ROM's, PLA's. Synchronous sequential logic circuits: latches, flip flops, counters, registers. Algorithmic state machines: systematic design procedures, ITDFS. Asynchronous sequential logic circuits, design applications. PLD_s & FPGAs.

ELEC2015 Electromagnetic Applications
School of Electrical Eng and Telecommunications
UOC3 HPW3
Prerequisite/s: PHYS2939 or PHYS2949.

ELEC2031 Circuits and Systems
School of Electrical Eng and Telecommunications
UOC3 HPW3
Prerequisite/s: ELEC1011
Revision of basic circuit theory; RLC circuits; operational amplifiers; mutual inductance and transformers; state space modelling of systems with particular reference to circuits; Laplace transforms in general and applied to solution of state equations and circuit transient problems; two-port networks; assignments involving an introduction to PSPICE and MATLAB.

ELEC2032 Electronics and Systems
School of Electrical Eng and Telecommunications
UOC3 HPW3
Prerequisite/s: ELEC2031
Revision of basic circuit theory; RLC circuits; sinusoidal circuit response; mutual inductance and transformers; operational amplifiers; computer aided circuit design; state space circuit representations and time responses; homogenous and particular solutions for first and second order linear differential equations; computer aided analysis of signals and systems, including state space representations; continuous time signals, sinuidois and signal norms; convolution, impulse and step responses; phasors; AC circuits (transient and steady state responses); complex power; frequency responses of circuits and systems; three-phase circuits.

ELEC2041 Microprocessors and Interfacing
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: (COMP1011 and ELEC1041) or (COMP1011 and COMP2021)
An introduction to programmer model of computer organisation, including assembly and machine language. Process of translation of computer programs including high level language to assembly, assembly to machine instructions, compilers, assemblers, linkers and loaders. Number representation including computer arithmetic, signed, unsigned and floating point arithmetic. Data types and data structures, including characters, integers, structures, arrays. Instruction set including instruction type and cycles, data processing, load/store and branch instructions, addressing modes. Functions, including functions calling conventions, instruction set support for functions, stack frames. I/O interfacing, I/O
interrupts, and programming interrupts, instructions support for I/O and interrupts, and OS support for interrupt and I/O interfacing. Memory hierarchy; including cache, main memory, virtual memory and memory management unit. Bus system including memory bus, I/O device buses, and arbitration.

**ELEC2042**
**Real Time Instrumentation**
School of Electrical Eng and Telecommunications
UOC3   HPW3

Prerequisite/s: (ELEC1041 and COMP1021) or (SOLA1051 and ELEC1041)

**ELEC3004**
**Signal Processing and Transform Methods**
School of Electrical Eng and Telecommunications
UOC6   HPW5

Prerequisite/s: ELEC2032.

The mathematics of signals and linear systems. Fourier series, Fourier and Laplace transforms, discrete Fourier and Z transforms. Processing and analysis of continuous (analogue) and discrete-time (digital) signals. Analogue filters: approximation theory, Butterworth, Bessel, Chebyshev and elliptic filters. Filter impulse and frequency responses, stability, and sensitivity. Sampling continuous signals: the sampling theorem, reconstruction, and aliasing. The discrete Fourier transform (DFT) and the fast Fourier transform (FFT). Fundamentals of the design and realisation of finite impulse response (FIR) and infinite impulse response (IIR) digital filters. Digital processing of analog signals, including applications of digital signal processing (DSP) and programmable DSP chips. The representation and modelling of non-deterministic (random) signals, correlation functions, and power density spectra.

**ELEC2005**
**Electric Energy 1**
School of Electrical Eng and Telecommunications
UOC6   HPW5

Prerequisite/s: ELEC2015

**ELEC3006**
**Electronics A**
School of Electrical Eng and Telecommunications
UOC6   HPW5

Prerequisite/s: ELEC2032.

**ELEC3014**
**Systems and Control 1**
School of Electrical Eng and Telecommunications
UOC6   HPW5

Prerequisite/s: ELEC2032.

History of feedback control; Differential equations; Laplace transforms; Transfer functions; Poles & Zeros; State space models; Modelling mechanical systems; First and second order systems; Block diagram algebra; Signal flow graphs; Mason’s rule; Stability; Routh-Hurwitz criterion; Steady state errors; Root locus theory and sketching; Generalized root locus/Transient response design via gain adjustment/ Pole sensitivity/ Design via root locus; PID control; Lag-lead compensation; Bode plots/Nyquist plots/Nyquist stability criterion/Gain margin and phase margin/Time delay; M&N circles/Nichols chart/ Introduction to design via frequency response; Practical classes include Matlab tutorials linked to lectures and construction and testing of DC servo motor feedback control systems.

**ELEC3015**
**Electric Energy 2**
School of Electrical Eng and Telecommunications
UOC6   HPW4

Prerequisite/s: ELEC3005

Basic aspects of both the supply and utilisation of electrical energy, with some emphasis on contemporary aspects of energy utilisation, including modern developments, energy efficiency and environmental aspects. Electrical energy supply systems: transmission and distribution systems, power transfer, reactive power effects, fault current calculation and protection. Quality of electricity supply; transient overvoltages, harmonics etc. and their ramifications in the operation of electrical power equipment. Electromagnetic compatibility (EMC). Utilisation of electrical energy: industrial application considerations, including DC machines, induction and synchronous motor drives. Computer-aided analysis of machines. Use of modern techniques of power electronics for application to variable speed drive systems, including DC-AC, DC-DC and AC-AC converters. Utilisation of electrical energy for lighting and industrial heating processes including discharge, induction and RF heating, Electrical safety of power equipment: equipment requirements for use in hazardous atmospheres; earthing and earth leakage protection.

**ELEC3016**
**Electronics B**
School of Electrical Eng and Telecommunications
UOC6   HPW4

Prerequisite/s: ELEC3006

Operating principles and fabrication technologies of electronic and photonic devices. Devices covered include: pn diodes, BJTs, MOSFETs, LEDs, solar cells, lasers and optical waveguides as used in communication systems and microwave devices. Ebers-Moll model of the BJT. BJTs & MOSFETs in analogue and integrated circuits, including TTL, ECL and CMOS. Principles and key technologies involved in microfabrication of integrated circuits. Non-idealities of devices resulting from realistic architectures and the effect of these non-idealities on the operation and design of circuits and systems.

**ELEC3017**
**Electrical Engineering Design**
School of Electrical Eng and Telecommunications
UOC6   HPW5

Electrical product design in a manufacturing environment, from original idea through technical specifications, prototype, manufacture and finally to marketing. In particular: Design Project Management: Introduction to scheduling and other management techniques. Also introductions to costing, pricing, marketing, standards, patents, quality and reliability, safety, (electronic) manufacturing methods and systems, engineering innovation. Design Methodology: Systematic design procedures, design documentation. Designing for quality, for manufacture, for maintenance, for minimum life cycle cost. Use of computer aids for project management, drawing, PCB design, circuit analysis and synthesis, documentation. Engineering Drawing and Graphical Communications: Standards, projections, dimensioning, tolerancing, and drawing interpretation. Aspects of Electronic Design: Device specifications, component choices, sourcing, data sheets, tolerances, aging, thermal dissipation, passive component characteristics. Also RF1 and EMC, earthing, shielding, PCB layout principles, prototyping methods, interconnection technologies. Group Project: including specification, marketing and business plans, scheduling, design, prototype production, testing, formal technical report and seminar presentation.
ELEC3041
Real Time Engineering
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC2042
Real-Time Systems: real-time versus non real-time; hard/soft and critical/ non-critical real-time systems; events and stimuli; processes, tasks and threads; concurrent processes; software architectures; state machines. Real-Time Kernels: Scheduling algorithms; co-routines and multi-tasking; inter-process communication and synchronisation; context switching; task management; reliability, testing and fault tolerance; timing analysis; device drivers. Real-Time Linux: POSIX and Linux; loadable kernel modules; inter-process communication; interrupts; shared memory and RT-FIFO's. Embedded Systems: Real-time kernels for embedded systems; Motorola 68HC11; MXC11 real-time executive.

ELEC3402
Introductory Physiology for Engineers
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC2032.
An introduction to biophysics and physiology for engineers. Cells, tissues and organ systems with emphasis on their functional and regulatory characteristics and their interaction. An introduction to computer models of physiological control systems demonstrating their value in understanding the dynamics of complex neural, hormonal and circulatory responses to changes in homeostasis.

ELEC4010
Project Management for Professional Services
School of Electrical Eng and Telecommunications
UOC3 HPW4
Prerequisite/s: 96 units of credit
The purpose of this course is to provide students with fundamental insights and tools for project management in the provision of professional services. Lectures will cover the Projectised Organisation, planning processes, project execution and ongoing project management. Other topics include negotiation, organizational strategy development, human resources and effective communications.

ELEC4011
Ethics and Electrical Engineering Practice
School of Electrical Eng and Telecommunications
UOC3 HPW2
Prerequisite/s: 120 units of credit.
An introduction to the nature ethical systems; the application of ethical bases to engineering practice with particular reference to electrical engineering and computing; codes of ethics in the professions, with special reference to the Code of Ethics of the Institution of Engineers, Australia; social, political, environmental and economic considerations. Students are required to complete a minimum of 60 days of industrial training with one or more companies, preferably before the commencement of this course. The objectives of industrial training are (i) to develop an appreciation to the structure and operation of industrial organisations, (ii) to understand the role of the engineer and engineering in industry, (iii) to appreciate the importance of good communication and interpersonal skills, and to develop these skills, and (iv) to appreciate the ethical basis of engineering practice in industry. Students are required to submit to the School evidence from their employers of each period of training, confirming the work performed, together with a report. The report, typically 2000-3000 words long, should summarise the actual technical work performed, and should address the extent to which the aims of the industrial training have been met. It is preferred that some industrial training should be obtained in Australia. When the industrial training is done overseas, the report should include a more detailed description of the company concerned.

ELEC4042
Signal Processing 2
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3004
Excluded: ELEC9342

ELEC4205
Electrical Energy Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Excluded: ELEC9213
Review of the basic concepts used in power system analysis: phasors, complex power, three phase systems and per-unit methodology. Modelling of power system components, including transformers and synchronous machines. Aspects of power system operation, including power flow, reactive power control and fault analysis. Harmonics and their effects. Choice and use of protective equipment, including fuses, circuit breakers, relays and surge arresters. Equipment rating for operation in steady state and cyclic modes. Overvoltages and their effect in power systems. Insulation system design and practical limitations. Insulation coordination. High voltage equipment testing methods and their use in insulation condition monitoring of electrical energy systems. Quality of supply.

ELEC4216
Electrical Drive Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3005
Excluded: ELEC9231

ELEC4240
Power Electronics
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3006
Excluded: ELEC9240
Modern power semiconductor devices eg, diodes, thyristors, MOSFETS, and other insulated gate devices such as the IGBT, MCT and the FCT. Static and switching characteristics, gate drive and protection techniques. Various DC-DC, AC-DC, DC-AC and AC-AC converter circuit topologies, their characteristics and control techniques. Application considerations for remote and uninterruptible power supplies, and for computer systems, telecommunications, automobiles, traction and other industrial processes. Utility interaction, harmonic distortion, and power factor. EMI and EMC considerations.

ELEC4412
Control of Continuous-time Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3014
Design of controllers for multivariable dynamical systems (e.g., design of an automatic pilot for an aircraft). State space theory. Design of linear controllers using the polynomial approach and the Diophantine theorem. Continuous-time state space design methods for MIMO systems. Principal gains, shaping system performance, optimal control methods, Linear Quadratic Gaussian (LQG) controllers and Kalman filters.
ELEC4413
Control of Discrete-time Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3014
Covers the design of practical control systems intended for implementation using digital computers and embedded systems. Controllers may be developed using both continuous and discrete designs. The topics covered include: identification of model parameters; numerical integration and implementation of continuous designs; observers; discrete systems; stability analysis; observability and controllability; design of digital controllers; pole placement; nonlinear systems; Aspects of implementation are constantly emphasised.

ELEC4444
New Business Creation
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: 138 units of credit.
In the new economic environment, graduates must be better prepared to take control of their own employment futures which increasingly must include the option of entrepreneurship and the creation and growth of one's own company. For those graduates with a technical or engineering background, the new technology based firm offers extremely large potential to create jobs and wealth. The course provides the final year student with a clear understanding of the venture creation process with particular emphasis on technology-based ventures. A range of skills are developed relating to R&D management, intellectual property, technology contracts, product development, marketing, financial management and business planning. As a result, it is expected that this course could be the first step for a number of its attendees to progress to active involvement in new technology based firms either in Australia or internationally.

ELEC4483
Biomedical Instrumentation, Measurement and Design
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3004
Design and development of biomedical instrumentation for clinical measurement and biomedical research. Hardware and software design issues required to produce instruments which satisfy Australian and International standards for safety, performance and quality control. Tutorials and laboratories will be closely integrated so that design and analysis carried in tutorial sessions will be followed by testing and development in the laboratory sessions. A design project and/or case study will also be required as part of this course.

ELEC4503
Electronics C
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3006

ELEC4522
Microelectronics Design and Technology
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC3006
Review of technology for bipolar and MOS integrated circuits. Device models, layout rules. Analog circuit building blocks. Bipolar and CMOS operational amplifiers. CMOS logic. MOS Analog-Digital and Digital-Analog converters. Memory - DRAM/ SRAM. Yield, reliability, failure analysis techniques and packaging. The laboratory program is aimed at understanding the internal design of some standard IC functions.

ELEC4532
Integrated Digital Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: ELEC1041 or COMP2021
Integrated circuit logic families with emphasis on MOS technologies, structured chip design, custom and semi-custom approaches, system architecture, computer aided design, layout considerations, timing estimates, circuit failures, faults, fault modelling, testing, design for testability.

ELEC4910
Thesis Part A
School of Electrical Eng and Telecommunications
UOC3 HPW4
Prerequisite/s: 132 units of credit and weighted average mark of 65 & ELEC3017.
The thesis (PartsA&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for ELEC4910. Thesis Part A involves a detailed literature search and reviews of the background for the thesis topic and planning the activities that will required for Part B.

ELEC4911
Thesis Part B
School of Electrical Eng and Telecommunications
UOC9 HPW10
Prerequisite/s: ELEC4910.
The thesis (PartsA&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for ELEC4910. Thesis Part B typically involves the detailed theoretical development or modelling work. A written thesis report must be submitted on the thesis topic by Tuesday of Week 14 of the session in which ELEC4911 is taken.

ELEC4914
Group Thesis Part A
School of Electrical Eng and Telecommunications
UOC3 HPW4
Prerequisite/s: ELEC3017 and 132 units of credit.
The group thesis (PartsA&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for ELEC4914. Group Thesis Part A involves a detailed literature search and reviews of the background for the thesis topic and planning the activities that will required for Group Thesis Part B.

ELEC4915
Group Thesis Part B
School of Electrical Eng and Telecommunications
UOC9 HPW10
Prerequisite/s: ELEC4914.
The group thesis PartA&B is carried out in the last two sessions of the BE degree course. It is carried by a group of between two and five students working on various aspects of a particular topic. Under the guidance of a supervisor, directed laboratory and other research work on an approved topic is carried out. Generally, the project involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student group is required to present a seminar as part of the requirements for ELEC4914. Group Thesis Part B typically involves the detailed theoretical development or modelling. A written thesis report must be submitted on the project by Tuesday of Week 14 of the session in which ELEC4915 is taken.
Focuses on the juvenilia and novels of Jane Austen as social and cultural products of their time. Austen's early novels in particular were written under and against the influence of contemporary romantic, gothic and sentimental fiction. Explores the way her work engages with these and other eighteenth- and early nineteenth-century texts as various as gender-based codes of conduct and landscape-gardening, concluding with an examination of transformations, such as film and sequel.

ENGL2104
Poetry, Virtue, Corruption: Milton to Burns
School of English
UOC6 HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: IRSH2104

Studies how English, Irish, and Scottish poets from 1660-1800 define themselves in relation to a culture which they deem to be corrupt. Moves from Milton as the single just man in a society that has betrayed the godly revolution to the poet as libertine in Rochester and Behn, and the poet as political propagandist in Dryden. Sees how Finch, Swift, Pope, Wortley-Montague, and Johnson detach themselves and poetry from political life. Later poets show that once you do this, what is left are passion, death, superstition, madness, and small animals.

ENGL2108
Realism, Pornography and the Novel: Defoe to De Sade
School of English
UOC6 HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall.

Observes how the realism of the early English novel is related to its representation of sexual desire and gratification. Assesses the charges of "lewdness" the first major English novelists levelled against each other. Assesses the relationship between comedy, sentimentality, and the pornographic in these texts. Considers the success in relation to eighteenth-century and modern readers of the English novelists' aims to control the reader's erotic responses. Relates protagonists of the English novel to the mythic figures of eighteenth-century European libertinage and their portrayal in their own writings and contemporary cinema: Casanova, Valmont, Don Giovanni, de Sade.

ENGL2109
Writing Bodies
School of English
UOC6 HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall.

Investigates bodies as both the object and subject of writing. Examines filmic, literary and theoretical texts, addressing issues such as the racialisation, gendering and intercorporeality of bodies and the relationship between bodies and technology. The literary texts may include fiction, life writing and experimental genres. The theoretical texts will be drawn from a range of writers which may include Gil Grosz, Butler, Merleau-Ponty, Frankenberg, Foucault, Lingis, Weiss, Fanon, Bonston and Ahmed. Includes a range of creative writing exercises and workshops designed to facilitate students not only thinking about bodies but through and with them.

ENGL2203
The Twentieth Century: Modernism and Modernity
School of English
UOC6 HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: ENGL2250, ENGL2350.

Examines the main artistic movements which express what it is that makes the twentieth century distinctive in Anglophone societies. Involves investigations into such terms as modernism and postmodernism and their relationship with the experience of modernity as articulated in expressive practices ranging from 'High' to 'Low' culture, from art to the everyday. Although the emphasis is on literary work, the course will also refer to other media including painting, film/video, music.
ENGL2204
The Twentieth Century: Postmodernism and Postmodernity
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall.

Examines literature and related expressive forms in English in the period following the Second World War. Contextualises and questions the relationship between the term ‘Postmodernism’ and its relation to literary and other social practices.

ENGL2207
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: ENGL3257.

A study of English poetry from 1789 to 1914 within the context of contemporary religious, philosophical, social, political, and scientific thought.

ENGL2300
Twentieth-century Australian Literature
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: AUST2014

An examination of some major post-colonial issues in Australian writing of the twentieth century.

ENGL2301
Refiguring Dreams - Twentieth-Century American Literature
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall.

Explores American literature written between the ‘twenties’ and ‘sixties’, using novels and films which captured the spirit and the attention of each decade. Topics include: the ‘roaring twenties’, the Depression, the Second World War, McCarthyism, racial conflict and the liberation movements of the ‘sixties’.

ENGL2504
Children's Literature: A Critical Introduction
School of English
UOC6   HPW3

ENGL2506
Children's Language: Learning Culture
School of English
UOC6   HPW3

Explores how children learn their first language and in the process learn the meanings and values of the social group. Aspects covered include the social-interactional origins of communication, phases of language development, forms and functions of children's speech, class, gender and cultural variation in language learning, perspectives on the development of language and cognition, oral language and literacy, everyday conversation as a site for learning the culture.

ENGL3302
Myths of Self and Society - Irish Writing and Its Relevance for Australian Society
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: IRSH2013

Not only have Irish writers figured prominently as modernists and postmodernists but they have persistently and often controversially engaged the society of their day. Studies the way selected writings of Wilde, Synge, Yeats, Joyce, O’Casey, Beckett and Heaney image the Irish situation and examines the implications for contemporary Australian society.

AUST2015

Excludes:

ENGL3401
Contemporary Australian Women Writers
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: AUST2015

Examines the particular concerns of a selection of contemporary Australian women novelists, poets and a short story writer. In the process asks whether women write from a different perspective, or have different concerns from their male counterparts in a culture that is generally considered to be male-dominated. Also considers the special question of women writing about the land.

ENGL3471
Contemporary Irish Literature
School of English
UOC6   HPW3
Prerequisite/s: 36 units of credit;
Excluded: IRSH2012

Critically examines the poetry and prose written by Irish writers after WWII in terms of issues of identity, nationality, gender, landscape, language, tradition, and religion. Considers how Irish poets have coped with the legacy of Yeats, Irish novelists with the legacy of Joyce and what their writing tells us about present-day Ireland and the contemporary world.

ENGL3502
Professional Writing
School of English
UOC6   HPW3
Prerequisite/s: 36 units of credit;
Excluded: LING2560

Introduces the theory and practice of writing factual texts for professional contexts such as: journalism, educational publishing, the workplace, cultural institutions, non-profit organisations. Aspects covered include: forms and functions of different factual genres, appropriacy to readership of grammatical style, word choice, ‘angle’ and ‘tone’; writing Plain English; writing for the web; self-editing skills. Includes workshops.

ENGL3504
Visual Communication
School of English
UOC6   HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall;
Excluded: ENGL3550, LING2530.

Communication in contemporary society increasingly combines language with one or more different semiotic modalities, such as visual image, sound and spatial layout. Explores the techniques and theoretical frameworks useful in analysing how such multi-modal texts create meaning and construct positions for readers. Considers a range of texts from printed advertisements and magazines, to web pages, CD Roms, and public sites such as shops, museums and galleries. Aspects covered include the ‘grammar’ of visual images, the interaction of verbal and other modalities, ideological dimensions of multi-modal texts, questions of literacy and access.
ENGL3753
Creative Writing A
School of English
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: ENGL3750, GENT0205.

Aims to familiarise students with a wide range of contemporary writing and to encourage experimentation with a variety of different styles and genres in their own writing. Aims for a practical understanding of how literature works by developing critical reading skills. Students will also have the opportunity to gain feedback on their own writing in a supportive workshop environment. Aims to develop the craft skills necessary to generate, revise and edit their own work.

ENGL3754
Creative Writing B
School of English
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: ENGL3751, GENT0205, GENT0212

Development of explorative approaches to creative writing. Emphasis is on experimental methodologies which encompass both a practical and theoretical investigation of language.

ENGL3900
Narrative
School of English
UOC6 HPW3
Prerequisite/s: 6 Level 1 units of credit in English and 36 units of credit overall and a WAM of 70

An analysis of narratives and narrative theory across a range of genres, this course examines selected novels, short stories, poems and plays, and introduces ways of interpreting them in the light of structuralist and post-structuralist narrative theory.

ENGL4000
English Literature Honours Research Full-Time
School of English
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in ENGL including 6 Level 1 at an average of 70% or better.

Coursework and seminars and preparation of a thesis. In the first session students are required to choose two courses. The courses offered in any one session depend on student demand and staff resources. The broad range of offerings is designed to enable students to conduct more intensive study in areas relating to special interests developed during earlier years of their English programs. Please refer to the list under the entry for MA, or see the School handbook. In the second session students submit a thesis of between 15,000 and 20,000 words based on research conducted on a topic to be chosen in consultation with the Head of School and other members of staff where appropriate. Throughout both years students are required to participate in regular thesis workshops.

ENGL4050
English Literature Honours Research Part-Time
School of English
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in ENGL including 6 Level 1 at an average of 70% or better.

Throughout both years students are required to participate in regular thesis workshops.

ENGL4500
Combined English Literature Honours Research Full-Time
School of English
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in ENGL including 6 Level 1 at an average of 70% or better.

Coursework and seminars and preparation of a combined thesis. In the first session students are required to take one coursework course in English and one course in the combined discipline. In the second session students submit a thesis on an agreed topic of between 15,000 and 20,000 words.

ENGL4550
Combined English Literature Honours Research Part-Time
School of English
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in ENGL including 6 Level 1 at an average of 70% or better.

Coursework and seminars and preparation of a combined thesis. In the first year students are required to take one coursework course in English and one course in the combined discipline. In the second year students submit a thesis on an agreed topic of between 15,000 and 20,000 words.

ENVS1011
Environmental Science 1
School of Biological, Earth & Environ Sciences
UOC6 HPW6

An overview of some of the many problems encountered by Environmental Scientists: climatic change, disturbance events (such as logging, fire and mining), management and conservation of marine and terrestrial resources, water management and pollution are considered. These problems are placed in perspective with regional case studies to highlight specific issues using seminars, workshops, field excursions and group projects. Special emphasis is placed on the political aspects and values inherent in environmental issues.

Note/s: Restricted to the Environmental Science Programs.

ENVS2030
The Human Environment
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Prerequisite/s: ENVS1011;

The nature of human population growth and its impact on resource management and global-scale environmental problems. Controls and demographic processes in human populations. Different cultures and development levels. Consideration of urbanisation and the interaction between urban economic and environmental systems. Case studies of urban environmental management, coastal planning and industrial change are used to critically evaluate human-environmental interactions. Practical work involves introduction to Geographical Information Systems (GIS).

ENVS2801
Aspects of Environmental Policy and Law
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Prerequisite/s: ENVS1011

This course examines the legal issues likely to be encountered by an environmental scientist and addresses the question: Is the adversary system the most appropriate method of dealing with conflict in determining the appropriate use of resources? The difficulties encountered with the multiplicity of authorities and interactions between local government regulations, state and federal laws and international law are considered. Case studies examined at each of these levels are used to provide a brief overview of current environmental law in Australia and the World, with examples.

ENVS4101
Environmental Science 4 Biology A (Honours) F/T
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6

Restricted to the Environmental Science Programs.

School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

Half year research project and thesis. 24 UOC of course work as approved by the Environmental Science Program Co-ordinator must also be completed.

Note/s: Completion of 144UOC (with Credit average) of an appropriate Environmental Science program is required for enrolment.

ENVS4508
Environmental Science 4 Geography A (Honours) Full-Time
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

Full year research project and thesis.

Note/s: Superior performance in 144UOC of an appropriate Environmental Science program, including all core requirements is required for enrolment.

ENVS4518
Environmental Science 4 Geography (FBE) (Honours) Full-Time
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

Full year research project and thesis, under supervision of a member of staff in the Geography Program in the Faculty of the Built Environment.

ENVS4546
Environmental Science Geography B (Honours)
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12

Half year research project and thesis. 24 UOC of course work as approved by the Environmental Science Program Coordinator must be completed. 12 UOC research to be completed in each session.

ENVS4602
Environmental Science 4 Geology B (Honours) Part-time
School of Biological, Earth & Environ Sciences
UOC12

Part-time research project and thesis. 12 UOC of course work as approved by the Environmental Science Program Co-ordinator.

Note/s: Completion of 144 UOC (with Credit average) of an appropriate Environmental Science program is required before enrolment is allowed.

ENVS4604
Environmental Science 4 Geology B (Honours) Full-Time
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

Half year research project and thesis. 24 UOC of course work as approved by the Environmental Science Program Co-ordinator must also be completed.

Note/s: Completion of 144UOC (with Credit average) of an appropriate Environmental Science program is required for enrolment.

ENVS4704
Environmental Science 4 Math B (Honours) Full-Time
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24

Half year research project and thesis. 24 UOC of course work as approved by the Environmental Science Program Co-ordinator must also be completed.

Note/s: Completion of 144UOC (with Credit average) of an appropriate Environmental Science program is required for enrolment.

EURO1009
The New Europe A
Faculty of Arts and Social Sciences
UOC6 HPW3

Despite a surprisingly rapid economic recovery after the catastrophe of World War II and the remarkable success of European integration, Western European nations were effectively relegated to the status of second-class powers, both politically and ‘morally’, and the East seemed caught in the vise of state socialism for the foreseeable future. But the unexpected collapse of the Berlin Wall and the disintegration of the Soviet ‘block’ force us to look again at the developments from 1945-1989 in a divided Europe and a divided Germany from a post-89 perspective: what was really going on?
Note/s: EURO1000/1001: Two session-length courses, which together form the first year of the European Studies major, but are also available separately. May also be counted towards a major in HIST.

EURO1001
The New Europe B
Faculty of Arts and Social Sciences
UOC6  HPW3
After the unexpected collapse of the Berlin Wall and the disintegration of the Soviet ‘block’, Europe seemed once again to have assumed a central role on the world stage. Yet the euphoria of 1990, which looked forward to a United Europe and the rapid transformation and integration of post-communist societies, has been followed by a considerable hangover. The events of the last years and their implications will be discussed, and the problems and prospects confronting the New Europe in relation to its past, present and future.

Note/s: EURO1000/1001: Two session-length courses, which together form the first year of the European Studies major, but are also available separately. May also be counted towards a major in HIST.

EURO2300
The German - Jewish Experience
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2485, JWST2103, SOCA3310
The contribution of Jewish Germans to the social, political and cultural life of Germany and Austria from 1900 to 1933. The impact of attempted integration as reflected in the work of Herzl, Schnitzler, Kafka, Buber, Feuchtwanger, Scholten and others; the failure of the German-Jewish symbiosis as a basis for discussion of the concepts of assimilation, acculturation, ethnicity, identity and nationality.

EURO2301
The Attractions of Fascism
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2486, SOCA3311
The social psychology of Fascism and its “aesthetics”, the seductive forms in which its inhuman aims were presented to appeal to both classes and individuals. An attempt to explain, through the study of documents, literary texts and film, the attractions of Fascism for broad sectors of European society without whose support and tolerance it could never have retained power, and the implications for our understanding of our own society.

EURO2302
The Messiah Complex
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2487, JWST2104, SOCA3314
The figure of the Messiah is closely linked with the Jewish apocalyptic tradition, in which an oppressed people gave itself up to visions of redemption and retribution. The cultural dominance of apocalyptic imagery from the turn of the last century; the fascination with the Messianic in stories by Franz Kafka, Isaac Bashevis Singer’s novel, Satan in Goray, on the ‘false Messiah’ Sabbatai Zwi, and the Theses on the Philosophy of History by Walter Benjamin; and how these Jewish ‘double outsiders’ focused the unease of a European society soon to be seduced by ‘false Messiahs’ of a much more menacing kind, such as Franco, Hitler, Mussolini and Petain. What are the attractions, and dangers, of the ‘Messianic’?

EURO2331
Understanding Nazi Germany: Origins, Structures, Explanations
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2422, HIST3101
Explores debates over the origins and role of Nazi Germany. Issues will include its roots in German history; the driving force of the regime; Hitler’s role and Nazi Germany’s war aims. Sixty years after its defeat in World War II, Nazi Germany continues to fascinate and to leave questions hotly debated by historians. Discusses whether the Nazis were modernisers or backward-looking romantics, and why there was so little opposition. Considers Nazi Germany’s war aims and if the Holocaust was the inevitable outcome of Nazi ideology or a bureaucratic response to impending defeat. These issues will be explored in lectures and student-led seminar discussions of primary and secondary texts.

EURO2410
19th Century Europe, 1848-1918: Nation, Empire, Revolution
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2410.
Examines the rise of the explosive social and national tensions in late nineteenth-century Europe which culminated in world war and revolution (Russia, Germany, Hungary, Ireland). Key themes are industrialisation and the rise of the labour movement; urbanisation and its impact on gender roles; the flowering of bourgeois culture and its fin de seicle crisis; the transformation of revolutionary into “integral” nationalism and imperialist jingoism; great power rivalry and the origins of the First World War. Aims to understand how the period laid the foundations for the dramatic events of the “short twentieth century”.

EURO2411
Spain: From Loss of Empire to European Integration
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SPAN2406
An overview of Spain’s turbulent history following loss of empire, including the Spanish Civil War and the Franco Dictatorship. Most attention is given to the nation’s transformation since 1975 (the death of Franco and the return to democracy) and its enthusiastic embrace of Europe. As a peripheral European nation, and one that has been riven by cultural, political and economic conflicts in the recent past, Spain may well constitute a litmus test for the viability of European unity.

EURO2433
The Russian Revolution
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2433, RUSS2103
The Russian Revolution of 1917 was one of the major turning points of the last century and its reverberations continue to be felt in the 21st century. Analyses the principal causes of the Revolution – the economic and social aspects of 19th century Russian society, the decline of Tsarism and the crucial influence of Marxist/Leninist ideology. The Bolshevik seizure of power and the actions of its principal players, Lenin and Trotsky, are discussed in detail, as well as the aftermath of the Revolution - the catastrophic civil war of 1918-1920, the rise of Stalinist dictatorship and the enduring impact of the Revolution on East-West relations and world history.

EURO2600
European Integration
Faculty of Arts and Social Sciences
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: ECOH2322.
Aims to impart a knowledge and understanding of the institutions, current policies and likely directions of economic and social change within the European Union. Problems confronting nation states with differing institutional and policy directions (and in the case of Eastern Europe a different socioeconomic system) that now are in the course of being melded. Specific topics include the process towards a single market; the problems and implications of monetary integration; the trade distortions arising from the Common Agricultural Policy; the collapse of the Soviet system and the widening of the European Union; the operation of European multinationals; the process of privatisation in Europe; and European integration in relation to Australia and Asia.
EURO2700
What is Postcommunism? Central and Eastern Europe after 1989
Faculty of Arts and Social Sciences
UOC6   HPW3
Prerequisite/s: 36 units of credit;
Excluded: LAW2223.

When European communist states collapsed like a pack of cards, there was an explosion of euphoria in the region and around the world. Post-communism has turned out, however, to be a more complex, variable, and uncertain condition than was anticipated by many of those who greeted it with such enthusiasm. An introduction to some of the characteristic features of the post-communist world, to some of its difficulties, problems, challenges and triumphs; and to similarities and differences among the developments in post-communist societies. Discusses some of the major successes of post-communist countries and some of their major failures; students will be encouraged to reflect on similarities and differences between post-communist realities and those of the society/ies which they know.

EURO2800
Discovering Europe
Faculty of Arts and Social Sciences
UOC6   HPW3
Prerequisite/s: 36 units of credit

Designed for students returning from a recent student exchange in Europe, the course will be built around two projects: 1) a detailed report on the student’s own study program, including suggestions on dealing with the practical problems of adjustment and enhancing cultural familiarisation; 2) a research essay on the student’s major topic/area of specialisation while overseas.

EURO3000
Evidence and Interpretation: Controversies in European History
Faculty of Arts and Social Sciences
UOC6   HPW3
Prerequisite/s: 36 units of credit, including 6 units of credit in HIST at credit level or better;
Excluded: HIST3905.

From the famous controversy between E H Carr and Geoffrey Elton, sparked by Carr’s ‘What is History?’ half a century ago, to the more recent ‘postmodernism’ debate, historians have been sharply divided over such key issues in historiography as the relative importance of empirical evidence, theories, moral values, and narrative subjectivity. Explores these issues through both the major writings of the key protagonists in these debates, and case studies of three of the most celebrated ‘wars of interpretation’ in European history: the English Civil War, the French Revolution, and the rise of Nazism in Germany.

EURO4000
European Studies Honours F/T
Faculty of Arts and Social Sciences
Enrolment requires school approval
UOC24
Prerequisite/s: An average of 70% in the European Studies major and related courses

This course is primarily intended for students enrolled in combined degrees who are unable to meet the prerequisites for EURO4500. It requires the completion of a thesis of 15-20,000 words on a cross-disciplinary topic in European Studies and a program of coursework negotiated between the Program and appropriate School(s).

EURO4050
European Studies Honours P/T
Faculty of Arts and Social Sciences
Enrolment requires school approval
UOC12
Prerequisite/s: An average of 70% in the European Studies major and related courses

This course is primarily intended for students enrolled in combined degrees who are unable to meet the prerequisites for EURO4500. It requires the completion of a thesis of 15-20,000 words on a cross-disciplinary topic in European Studies and a program of coursework negotiated between the Program and appropriate School(s).

EURO4500
Combined Honours (Research) in European Studies Full-Time
Faculty of Arts and Social Sciences
Enrolment requires school approval
UOC12
Prerequisite/s: 36 units of credit in EURO with an average of 70% and permission from co-ordinator

Combined Honours candidates are required to present a cross-disciplinary thesis approved by the Heads of two participating schools/programs.

EURO4550
Combined Honours (Research) in European Studies Part-Time
Faculty of Arts and Social Sciences
Enrolment requires school approval
UOC6
Prerequisite/s: 36 units of credit in EURO with an average of 70% and permission from co-ordinator

Combined Honours candidates are required to present a cross-disciplinary thesis approved by the Heads of two participating schools/programs.

FILM1101
Introduction to Film
School of Theatre, Film and Dance
UOC6   HPW4.5
Excluded: THFI1000, THFI1001

An introduction to the study and analysis of film and its reception.

FILM1105
Working with Image and Sound
School of Theatre, Film and Dance
UOC6   HPW3
Prerequisite/s: FILM1101 or THST1101 or THFI1002

Explores the creative and communicative possibilities of film, video and other audio-visual technologies. Presents a wide range of examples, from classics of experimental film to the latest music videos and television advertisements: preparing outlines and storyboards, capturing and generating images and sounds, experimenting with existing images and sounds - the editing process. Explores the creative potential of audio-visual media and deals with the practical problems.

FILM2001
Contemporary Approaches to the Cinema
School of Theatre, Film and Dance
UOC6   HPW4
Prerequisite/s: 36 units of credit

Analyses and tests a number of contemporary theoretical approaches to the cinema.

FILM2002
Australian Cinema and Television
School of Theatre, Film and Dance
UOC6   HPW4
Prerequisite/s: 36 units of credit;
Excluded: AUST2028

Traces the emergence and significance of Australian screen cultures. Studies the development of the Australian film industry, including analysis of the economic, social and political factors and the myths which have shaped the industry. Studies the role of television in shaping the experience of modern Australia and its place in the world. Looks at a number of non-mainstream forms of audio-visual production in Australia.

FILM2007
Movie World: National Cinemas
School of Theatre, Film and Dance
UOC6   HPW4
Prerequisite/s: 36 units of credit
Examines both the experience of the global cinema industry in particular places, and also the power of the cinema to articulate compelling visions of collectivity in different places at particular times and considers the following questions: What is the relationship between ‘world cinema’ and ‘national cinemas’? Is it an economic question, a cultural question, or both? Is ‘world cinema’ anything more than all those films that are not made in Hollywood? What is ‘national’ about national cinemas? How are films supposed to speak for, as well as to, a mass of strangers who happen to share national citizenship?

**FILM2021**  
The Hollywood System  
School of Theatre, Film and Dance  
UOC6 HPW4  
Prerequisite/s: 36 units of credit;  
Excluded: FILM2005, FILM2006

How can the history of Hollywood be viewed as narrative, corporate and cultural system? Covers the rise of continuity and stars, consolidation of the mode of production, including genres, and vertical integration of the major studios through 1950. This period also sees such politically sensitive movements as film noir, postwar melodrama, and the Red Scare. At the same time, the studios had to sell off their theatres and confront television. Independent production and corporate conglomeration changed the structure, but not the ultimate function of Hollywood entertainment. Concludes with discussion of recent scholarship on “New Hollywood,” including new technologies and globalisation.

**FILM3001**  
Video Exercise  
School of Theatre, Film and Dance  
UOC6 HPW4  
Prerequisite/s: FILM2001 or FILM2004 or FILM2005 or FILM2006 and 18 units of credit from FILM2001-2017

Introduces the basic concepts that underlie a video production, from script to final cut, plus some practical experience of video-making.

**FILM3002**  
Aspects of Film History  
School of Theatre, Film and Dance  
UOC6 HPW4  
Prerequisite/s: 12 units of credit in Level 2 FILM courses;  
Excluded: FILM2000

Introduces case studies in film history and brings into focus different perspectives, traditions, and methodologies in the historiography of cinema. Involves analysis of key texts, and viewing of a wide range of relevant films. Possible topics include cinema and popular memory; the cinema, modernism and modernity; changing performance styles in American cinema; cinema and the city.

**FILM3003**  
Explorations in Contemporary Film Theory  
School of Theatre, Film and Dance  
UOC6 HPW4  
Prerequisite/s: At least 12 units of credit from the following courses: FILM2001, FILM2002, FILM2007, FILM2021;  
Excluded: THFJ3903

Engages with specific debates in contemporary film theory at an advanced level. Involves critical analysis of key texts, and the viewing of a wide range of relevant films. Possible topics include theories of film spectatorship; psychoanalysis and the study of cinema; feminist film theory; time, history and realism; film sound.

**FILM3004**  
Film Genres and Styles  
School of Theatre, Film and Dance  
UOC6 HPW4  
Prerequisite/s: 12 units of credit in Level 2 FILM courses;  
Excluded: FILM2008

Examines the development, production and exploitation of various styles of film-making and film genres. Involves critical analysis of key texts, and viewing a wide range of relevant films. Possible topics include film comedy; the musical; song and dance on film; fantasy and the cinema; film noir in social and historical context.

**FILM3005**  
Special Program in Film Studies  
School of Theatre, Film and Dance  
Enrolment requires school approval  
UOC6 HPW4  
Prerequisite/s: At least 12 units of credit in Level 2 FILM courses

Suitably qualified students wishing either to take more than one topic offered under the rubric of a Level 3 course in the Film Studies program or to work in an area not covered by an existing course may apply to the School to take this option. Approval of an independent study program will depend on its suitability, and the availability of a staff member to undertake supervision.  
Note/s: Permission for enrolment in the special program must be obtained from the Head of School. Only one Special Program in Film can be credited to a degree program.

**FILM3006**  
Cinemas and Cultures  
School of Theatre, Film and Dance  
UOC6 HPW4  
Prerequisite/s: At least 12 units of credit in Level 2 FILM courses

Introduces case studies in regional, local, and national cinemas. Critical analysis of key texts and a wide range of relevant films. Topics may include French cinema: issues of aesthetics and representation; Japanese cinema; cinemas of Asia and the Pacific Rim.

**FINS1612**  
Capital Markets and Institutions  
School of Banking and Finance  
UOC6 HPW3  
Corequisite/s: ECON1101, ECON1202

Focuses on the major financial markets, including the equity, money, bond, exchange rate and derivatives markets. Students learn about the basics of financial instruments in these markets, such as bank bills, treasury bonds, futures and options and are exposed to the tools of analyses and the roles and innovations of major financial institutions. These include the banks and non-banks, such as finance companies, building societies and credit unions, life and insurance companies as well as investment management companies. Documents the emergence of the wealth management industry as an integral component of the Australian financial services sector.

**FINS1613**  
Business Finance  
School of Banking and Finance  
UOC6 HPW3  
Corequisite/s: FINS1612 or any two of ACCT1511, ECON1102, ECON1203

Looks at the essential aspects of financial decision-making. Financial mathematics is used to value securities and make capital expenditure decisions. Portfolio theory is introduced to provide a foundation for determining the relationship between expected risk and returns in financial and real asset investments. Dividend payouts and the choices between debt and equity financing are covered. Includes: factors affecting the formulation of the capital structure and the influence of the capital market environment. The implications of financial risk, taxation and the conflict of interest between managers and investors on the value of business firms are introduced.

**FINS2100**  
Industrial Training 1 (Co-op)  
School of Banking and Finance  
Enrolment requires school approval  
UOC6 HPW3  
Prerequisite/s: FINS1613

Students consider the practical application of the fundamental principles of Banking & Finance in an industry environment.

**FINS2622**  
Emerging Capital Markets  
School of Banking and Finance  
UOC6 HPW3  
Prerequisite/s: FINS1612
Emerging capital markets have become in vogue as a result of a wave of mass financial liberalization, which occurred towards the end of the 1980s. Emerging financial markets behave differently to developed financial markets because of their level of integration (or conversely degree of segmentation) with world markets. A major aim of this course is to examine the issues pertinent to investment in emerging financial markets from both the perspective of international investors and policy makers. These broadly revolve around financial crises, liberalization and capital flows, pricing of political risks and other risks, governance and financial architecture, and regional integration.

FINS2624
Portfolio Management
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS1613

Modern investment theories are introduced with an equal emphasis on theory and practice. The Markowitz model, capital asset pricing model, and single index model are studied and applied to design portfolios, price and manage risks, evaluate performance, identify mispriced assets, and estimate asset betas. The pricing of stocks, bonds, options, and futures; the impact of tax on the choice of bonds; the theories of the term structure; the duration concept; and the strategic use of options and futures for hedging and investment are also studied. Spreadsheet applications to securities pricing and investment theories are introduced to put theories into practice.

FINS2643
Wealth Management
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS1613; FINS2624

Examines the investment and financial issues arising from the wealth management activities of retail clients (private individuals). Commences with an introduction of the financial planning industry, then explores the most important components in wealth management - setting financial plans, investment planning and strategies, managed funds and portfolio management, risk management and insurance, superannuation, tax planning, leveraged investments, estate planning and social security. Also evaluates the decision-making processes of institutional superannuation fund trustees, given their role as stewards of member assets.

FINS3100
Industrial Training 2 (Co-op)
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: FINS3616

Students consider the practical application of the fundamental principles of Banking & Finance in an industry environment.

FINS3200
Industrial Training 3 (Co-op)
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: FINS3100

Students consider the practical application of the fundamental principles of Banking & Finance in an industry environment.

FINS3616
International Business Finance
School of Banking and Finance
UOC6 HPW3
Prerequisite/s or Corequisite/s: FINS2624

Focuses on the basic theoretical and practical knowledge required for the management of the financial and investment functions of multinational corporations. Topics include international diversification, foreign investment decisions, cost of capital, financial and political risks, hedging strategies, the financial benefits of Euro-currencies and Eurobonds and international equity markets. It is relevant to a broad range of professions including corporate treasury management, corporate finance, international securities trading and investment management. The general emphasis is on the identification and management of opportunities and risk relating to exchange rate fluctuations, international financial markets and government policy changes.

FINS3625
Applied Corporate Finance
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS1613

Focuses on practical applications relating to the theory of financial decision making. Case studies, empirical evidence and current issues in the financial media are used to illustrate key decisions made by managers of the firm. Topics include advanced capital budgeting issues, capital raising including venture capital and initial public offerings, mergers and acquisitions and advanced capital structure and dividend policy issues. One of the aims is to develop students' ability to make judgments in a realistic setting and to develop the capacity to articulate judgments both orally and in writing.

FINS3616
International Corporate Governance
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: ACCT1511, FINS1613

Corporate governance is fundamental to the existence and growth of public corporations as it encompasses the mechanisms which help suppliers of finance assure themselves of getting a return on their investment. Its practical importance is also evident in the recent mega corporate collapses around the world. This course analyses how different governance mechanisms prevent managerial self-dealing, protect minority shareholders and add value to corporations. Specific topics include: directors responsibilities, board structure; regulations; auditing; executive compensation; financial ownership and control; shareholder activism; hostile takeovers and defence mechanisms; and the difference in governance systems in the US, UK, Australia, Japan, Germany and some Asian countries.

FINS3630
Bank Financial Management
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS1612, FINS1613

The theory and practice of banking from a financial management perspective; banks and the financial services industry; regulatory restrictions and financial management; asset management - liquidity and loan management; liability and deposit management; capital structure and dividend decisions; and financial management implications of electronic banking, and other developments are studied.

FINS3631
Risk and Insurance
School of Banking and Finance
UOC6 HPW3
Prerequisite/s or Corequisite/s: FINS2624

The nature of commercial, financial and physical risk is explored. In addition to the theory of risk, the way in which insurance has evolved to deal with this important aspect of the economic environment is studied in depth. Case studies are used to illustrate points of practical relevance. Emphasises the mathematical and statistical foundations of the discipline. Topics in the area of risk include, risk premia, insurance ratings, simulations of risky environments, physical risk, and death. Insurance is approached as a natural commercial response to risk with inference from insurance data, general insurance, motor insurance, very large risks, and life assurance.

FINS3633
Real Estate Finance
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS2624
Evaluates real estate financing, the mechanics of the mortgage market, and the application of modern finance theory to the evaluation, selection and management of direct and securitised property investments. Topics include the role of regulation, taxation, government agencies, property trusts, and the banking system on real estate activity. Analyses real estate, diversification aspects, valuation techniques, evaluates lease structures, concepts of rent and yields.

FINS3634 Credit Analysis and Lending
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS1612, FINS1613
Focus is credit analysis and lending emphasising finance theory and practical applications. Includes: credit analysis; credit scoring and modelling; loan products; loan pricing; commercial lending; consumer lending; special risk markets such as small business, agricultural and real estate; international and trade financing; managing the loan portfolio; and problem loans. Includes case study work.

FINS3635 Options, Futures and Risk Management
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS2624
An intermediate course on options, futures and techniques for managing asset risk. Topics covered include an overview of derivative securities, forward and futures contracts (on stock indices, investment and consumptive assets), options (on stocks, stock indices and futures), hedging positions in options and other derivative securities, binomial option pricing, risk-neutral valuation, the stochastic process followed by stocks, numerical techniques in option pricing, options on non-traded assets, exotic options and pricing biases.

FINS3636 Interest Rate Risk Management
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS2624
Looks at interest rate risk (IRR) and techniques for managing risk. Topics covered include term structure dynamics (including bond price lattices, spot and forward rate models), analytical and numerical techniques, duration measures, interest rate derivative securities (including options, futures, caps, floors and swaps), mortgage-backed securities and their derivatives, portfolio management, value-at-risk, and the interaction between IRR and credit risk. In discussing interest-rate derivatives, the primary emphasis is on the Hull-White model, but other models, such as the models of Ho-Lee, Cos-Ingersoll-Ross and Heath-Jarrow-Morton are discussed.

FINS3640 Investment Management Modeling
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS2624
Covers the essential analytical and quantitative tools applied in the investment management industry. It provides students with the knowledge and skills required to construct and manage portfolios of financial securities. Examines both index funds and actively managed portfolios, the mix of different types of assets in portfolios, and the role of derivative securities in portfolio management. Focuses on portfolio theory, investment analysis, quantitative analysis, factor models and portfolio risk management. An essential component involves the use of software programs (MS-Excel and Barra) in applying concepts to the real-world market environment.

FINS3641 Security Analysis and Valuation
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS2624
Provides students with an understanding of the techniques and models employed in the valuation of securities; evaluates securities using both technical analysis and fundamental analysis. The technical analysis component reviews security volatility and correlations, moving average models, financial time series models and risk management. The second component examines security valuation approaches, the measurement and forecasting of dividends and cash flows, valuation methods, estimation of growth, equity discount models and the cost of capital, valuation in terms of mergers and acquisitions, and enhancing security valuation. Also includes the valuation of private firms, companies with negative earnings, and distressed corporations.

FINS3642 Strategies for Investment Management
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: FINS3640
Deals with the adoption of financial innovations in funds management with a particular emphasis on the understanding of the characteristics of a large trans-national hedge fund. Covers recent innovations in the development and management of some strategic special-purpose funds, designed for investors interested in particular financial markets eg foreign exchange markets and stock markets. Incorporates extensive use of computer spreadsheets, macros, and programs to aid in the examination of individual stock data and calculations and later hedge a fund via the derivatives market. Involves extensive use of MS-Excel and financial and statistical packages.

FINS3650 International Banking
School of Banking and Finance
UOC6 HPW3
Corequisite/s: FINS3616
Focuses on providing students with an understanding of the operating environments of international banking institutions. Topics covered are: the nature and theory of international banking, the major functions of international banking (international trade financing, participation in the interbank foreign exchange and eurocurrency markets, international investment banking services, and sovereign lending), and other important issues (international money laundering, international banking crisis, regulation of international banking, international debt crisis, and offshore banking markets). Some of the topics covered may vary over time.

FINS3651 International Financial Services
School of Banking and Finance
UOC6 HPW3
Prerequisite/s or Corequisite/s: FINS2624
Designed to acquaint the student with the planning and administration of a worldwide corporate insurance program under conditions of uncertainty. International dimensions of risk management are surveyed, highlighting the importance of differing economic, social, and political environments. Topics include: inter alia; the structure of insurance markets internationally; the economics of international trade in insurance; the integration and globalisation of financial services; the role, importance and functioning of reinsurance worldwide; the legal environment of risk management and insurance internationally; the tax environment for insurance internationally; rationales and nature of government intervention into insurance markets worldwide; regulatory harmonisation in insurance; the demographic and social environment for insurance internationally; the advantages and disadvantages of different social welfare strategies in an international business environment; and global risk management.

FINS3775 Research Methods in Finance 1
School of Banking and Finance
UOC6 HPW3
Prerequisite/s: Credit or better in FINS2624; Excluded: FINS4775
Provides an introduction to econometric theory and its application in empirical finance. Much emphasis is on the practical aspects. There is extensive use of leading statistical and econometric software that is employed extensively in research and practice.
**FINS4774**
Financial Decision Making Under Uncertainty
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Corequisite/s: FINS3777 or FINS4775

Provides an intermediate exposition of the fundamentals of portfolio selection and corporate finance: (i) the basics of choice theory; (ii) binomial option pricing; (iii) portfolio theory; (iv) classical, non-game theoretical theories of capital structure and dividend policy and empirical evidence on these theories; and (v) theories and evidence related to mergers and acquisitions.

**FINS4775**
Research Methods in Finance 1
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: Credit or better in FINS2624;
Excluded: FINS3775

Provides an introduction to econometric theory and its application in empirical finance. Much emphasis is on the practical aspects. There is extensive use of leading statistical and econometric software that is employed extensively in research and practice.

**FINS4776**
Advanced Topics in Asset Pricing
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s or Corequisite/s: FINS3777 or FINS4775

Provides an in-depth treatment of asset pricing theories, including surveying the evidence from tests of these models. Both general asset pricing techniques and the micro-foundations of these models are covered. Emphasis is on applications of mathematical and statistical tools to provide a rigorous development of each topic. Students are assessed through a variety of means, which may include problem sets, exams, papers, and presentations.

**FINS4777**
Advanced Topics in Corporate Finance
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s or Corequisite/s: FINS3777 or FINS4775

The main emphasis is exposure to the latest research on selected topics in corporate finance. Topics covered are primarily selected on the basis of the lecturer’s area of expertise and include methodological considerations in corporate finance research, corporate restructuring, agency theory and governance, performance measurement, valuation models, dividend policy and repurchases, forecasting, and capital structure. A combination of assessment methods is used, including group projects, case studies and student presentations. Assumes a sound knowledge of the theories relating to the foundations of finance.

**FINS4779**
Research Methods in Finance 2
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s or Corequisite/s: FINS3777 or FINS4775

A more advanced course in empirical methods in finance, covering general methodological aspects, testing of hypotheses and falsifiability principle. Review of relevant econometric material applications to topics such as generalised beta models of market equilibrium (including CAPM, APT), foreign exchange risk premium, stock price variability and volatility estimation.

**FINS4781**
Special Topics in Finance
School of Banking and Finance
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: Admission to BCom Honours

This is an optional unit forming part of the Fourth-Year Honours program and is designed in a flexible way to provide students with advanced knowledge in important areas of finance that fit in with the supervisory capacity of the academic staff. The content areas may thus vary from year to year. A more detailed course outline will be provided prior to the commencement of the unit.

**FINS4794**
Thesis B (Finance)
School of Banking and Finance
Enrolment requires school approval
UOC18

Note/s: The thesis is to be approved and supervised by the School of Banking and Finance.

**FINS4795**
Thesis (Finance)
School of Banking and Finance
Enrolment requires school approval
UOC24

**FOOD1120**
Introduction to Food Science
School of Chemical Eng and Industrial Chemistry
UOC6 HPW4

This course will provide students with an insight into the breadth and depth of food science, outlining many of the historical, social, physiological, nutritional, industrial, legal and psychological issues affecting food consumption and production. This course will also introduce some of the common scientific principles underpinning many of the practices and challenges relating to food preparation in the home, the food service industry and food manufacturing sectors, highlighting the role of creativity and innovation in meal design and food product development.

**FOOD1130**
The Food Industry: Professional Perspective and Practice
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6

This course will examine the contribution of the breadth of food science and technology to the food industry, and the skills expected of a food science professional. A technical lecture series will demonstrate the integration of all aspects of food science and technology, and their underpinning by the basic sciences, through examination of a hypothetical company producing a selected food product. Field trips will provide early exposure to the food industry. Students will be exposed to the theory of and have the opportunity to practice a range of generic skills relevant to both their University studies and practice in food science and technology, including oral and written communication, team/group work, information literacy, personality types and learning styles.

**FOOD1230**
Food Choice: Psychology, Preference and Acceptability
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6

This course considers factors that influence the choice of foods and eating patterns by consumers, and provides a rational basis for the design, development and marketing of new food products and new processing technologies. It is aimed at students with interest in food and human behaviour, for example, marketing, advertising, food service/hospitality and psychology, as well as students in food science and technology. Topics covered include: physiology of taste and smell; sensory acceptability of foods in terms of flavour, appearance and texture and its measurement (sensory evaluation); psychological, physiological, cultural, religious, environmental and genetic factors that affect food preference and consumption patterns and behaviour; eating disorders (eg, anorexia, bulimia); diet and consequences for physical and mental activity (eg, sports diets); implications for food product development, process development, marketing, advertising and diet design.

**FOOD1360**
Food Processing Principles
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6

This course considers factors that influence the choice of foods and eating patterns by consumers, and provides a rational basis for the design, development and marketing of new food products and new processing technologies. It is aimed at students with interest in food and human behaviour, for example, marketing, advertising, food service/hospitality and psychology, as well as students in food science and technology. Topics covered include: physiology of taste and smell; sensory acceptability of foods in terms of flavour, appearance and texture and its measurement (sensory evaluation); psychological, physiological, cultural, religious, environmental and genetic factors that affect food preference and consumption patterns and behaviour; eating disorders (eg, anorexia, bulimia); diet and consequences for physical and mental activity (eg, sports diets); implications for food product development, process development, marketing, advertising and diet design.
Food processing is introduced in a series of integrated labs and lectures covering the basics of food engineering: heat transfer and fluid flow. This includes heat and mass balances, heat and mass transfer, Fourier’s equation, modes of heat transfer, heat exchangers, transient heat transfer and Heisler charts for cans, food properties, physical chemistry of phases in crystalline, steam and enthalphy, thermal death, sterility, Fo, Z and D values, retorting, lethality, texture of solids and liquids, product flow and pumping, non-Newtonian behaviour, esp. viscoelasticity, and intermediate moisture foods. Some example food operations are presented, including mixing powders and slurries, baking, frying, roasting, cooling, thawing, and freezing.

**FOOD1370  
Food Preservation: Principles and Applications**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW6

The basis of food science is presented in a series of lectures and integrated labs covering traditional and novel methods of preserving foods for distribution and storage. Food commodities are introduced in groups, including dairy, meat, fish, fruit, vegetables, beverages, eggs, sugars, cereals and lipids. The need for preservation is discussed, including physical, chemical and biological deterioration factors and water relationships. Technologies covered are: heating, chilling, freezing, drying, brining, pickling, sugar, radiation, packaging (MAP and CAF), chemical preservatives and novel methods.

**FOOD1380  
Unit Operations in Food Processing**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW6  
Prerequisite/s: FOOD1360, FOOD1370

The principles introduced in FOOD1360 and FOOD1370 are used in studying some of the more important unit operations in the food industry. The procedure used for each unit operation is to firstly describe the process, its applications, effects on the food product and requirements, appropriate process diagrams, mass and heat balances and flows, solving unit operation problems. Unit operations covered are: refrigeration, dehydration, evaporation, extrusion, physical separation and comminution.

**FOOD1390  
Product Design and Development**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM2921.

This course provides a series of lecture and laboratory classes that cover the basic theoretical and practical concepts associated with the design and development of new food products and processes. The product development process: the need for new products, types of new products, the development team, idea generation, steps in the product development process; the role and specific tasks of market research, market research techniques, target markets, limitations of market research. Roles of advertising and supermarkets in new product success; product lifecycles, reasons for new product failure and preventative strategies. Ingredient and additive behaviour and contributions in foods: properties of the major food components in relation to food properties, storage stability and nutritional properties of foods. Impact of new technology. Sensory analysis: basic sensory analysis techniques, expert vs consumer panels, interpretation and implementation of sensory testing data, sensory rankings from different target markets.

**FOOD1400  
Project**  
School of Chemical Eng and Industrial Chemistry  
Enrolment requires school approval  
UOC6  
Prerequisite/s: CHEM3811, FOOD1360, FOOD1370, FOOD1380, FOOD1390, FOOD2320, FOOD2330, FOOD2340

The student undertakes an individual project involving a literature survey, an experimental investigation, the preparation of a detailed report on a selected topic in food science and technology, and presentation of seminars on a literature review and experimental results.  
**Note/s:** Restricted to program 3060.

**FOOD1480  
Minor Project**  
School of Chemical Eng and Industrial Chemistry  
UOC6  
Prerequisite/s: CHEM3811, FOOD1360, FOOD1370, FOOD1380, FOOD1390, FOOD2320, FOOD2330, FOOD2340

The student will be required to undertake a literature-based study of a research problem, submit a project thesis and present seminars arising from the project.

**FOOD1490  
Advanced Food Chemistry**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW6  
Prerequisite/s: CHEM3811 or equivalent

Chemistry and analysis of food flavours; measurement, fractionation and structural determination of proteins, starch and its derivatives, non-starch polysaccharides, dietary fibre constituents and lipids; detection and measurement of mycotoxins; analysis of selected vitamins; application of advanced separation techniques to food components.

**FOOD2320  
Food Microbiology**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW6

This is a lecture-laboratory course that introduces the basic concepts of food microbiology, covering the ecology, biochemistry, isolation, enumeration and identification of bacteria, yeasts, fungi and viruses associated with foods and beverages. Food spoilage: specific food microorganism associations; taxonomy and biochemistry of major spoilage species; chemical and physical changes to food properties; spoilage of specific commodities. Foodborne microbial disease: foods as vectors of disease and food poisoning; statistics and epidemiology; ecology and taxonomy of foodborne pathogenic microorganisms; control and prevention by hygiene, microbiological standards and legislation. Food fermentation: microbial ecology and biochemistry of fermentations; fermentations of alcoholic beverages, bakery products, dairy products, meats, vegetables, cocoa beans, soy sauce; production of food ingredients and processing aids by fermentation. Microbiological examination of foods: sample preparation and sampling plans; sublethal injury; standard methods for determination of total plate counts, indicator organisms, foodborne pathogenic species, principal spoilage species. Microbiological quality assurance: specifications and standards; decision criteria; hazard analysis and critical control point (HACCP) concept; cleaning and sanitation.

**FOOD2330  
Quality Assurance and Control**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW4

This course aims to provide students with a knowledge base of concepts in quality assurance (QA) and quality control (QC) in the context of the food industry. What are quality, QA, QC?; organisation-wide quality management, quality costs, Total Quality Management and ISO9000-based Quality Management Systems; tools in quality management, brainstorming and other qualitative tools, benchmarking; production-level QA and QC, HACCP, risk analysis and management, statistical quality/process control, sampling and sampling plans, cleaning and sanitation; QA in the laboratory, accreditation, metrology, proficiency testing; regulatory aspects of QA/QC, auditing quality; staff training.

**FOOD2340  
Food Safety**  
School of Chemical Eng and Industrial Chemistry  
UOC6  HPW4

This course presents a package of information and exercises designed to demonstrate the public health risk associated with the production and consumption of foods and the strategies adopted by industry, government and consumers to manage and control these risks. Topics covered include: chemical risks - natural, additives and residues; microbiological risks - bacterial, fungal, viral, algal, parasites, prions; nutrition - diet and health; genetically modified foods - concepts and specific safety issues;
management of food safety by industry - TQM, HACCP, ISO; management of food safety by government - food law, national and international regulation and issues; legal and insurance issues; consumer concerns - education, social, moral and ethical issues.

**FOOD2350**
Forensic Food Science
School of Chemical Eng and Industrial Chemistry
UOC6 HPW3

This course consists of a series of lectures, discussions and assignments that examine a wide range of techno-legal issues which frequently confront companies involved in the manufacture and service of foods and beverages. A portfolio of case studies are used to demonstrate the fundamental and practical aspects of the investigative process: defining the cause of the problem, acquisition of appropriate information and analytical evidence; loss assessment; reporting; communication with solicitors, barristers and insurance companies; appearance at court. Topics covered include: the legal process; prosecution for breach of food safety, quality and labelling regulations; prosecution of fraud, deception and adulteration; compensation disputes between companies when products and processes do not meet contractual specifications; compensation claims from consumers who have experienced foodborne illness; food composition and labelling authenticity; including religious certification for halal and kosher foods, genetic modification using recombinant DNA technology; species homogeneity; sabotage, deliberate adulteration, tampering; protection of intellectual property, patents. The course is aimed at students in food science and technology, but its content and structure are designed to accommodate students with a broader background in science and technology, as well as practicing professionals in the food/beverage industries, government regulatory agencies and consulting companies.

**FOOD2480**
Advanced Food Microbiology
School of Chemical Eng and Industrial Chemistry
UOC6 HPW3
Prerequisite/s: FOOD2320

This course consists of a series of lectures, discussion groups and visits to local food companies that takes food microbiology from its basic concepts and labelled consideration of current issues on food spoilage, foodborne microbial disease, food and beverage fermentations and the use of microorganisms as processing aids and sources of food ingredients and additives. With a focus on commodity groups it considers industry structure, food properties and processing operations that impact on the growth, survival and biochemical activity of microorganisms as they relate to spoilage, safety and desirable fermentations. Commodities considered include dairy products, fruit and vegetables, meat products (red meats, poultry, seafoods) and alcoholic beverages. Advanced concepts of microbial taxonomy, biochemistry, physiology, detection and enumeration are covered as well as the use of microorganisms as sources of colours, flavours, polysaccharides, vitamins, amino acids and as probiotic and biocontrol agents.

**FOOD2320**
Nourishment
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6
Corequisite/s: BIOC2101 or BIOC2181

This course consists of a series of lectures and practical exercises that provide students with knowledge about the occurrence of nutrients in foods and their role in human physiology and health. Structure, properties and sources of nutrients; role of nutrients in human structure and function. Introduction to food groups, tables of food composition, food labels, dietary recommendations; food guides; nutrition in health and disease; nutritional needs of vulnerable groups: infants, pregnant and lactating women, the aged; dietary intolerance, disorders related to the affluent diet including coronary heart disease, dental caries, diabetes, hypertension and cancer; problems of undernutrition including protein, energy, mineral and vitamin deficiencies; physiological and nutritional aspects of dietary fibre, alcohol; assessment of nutritional status using dietary and anthropometric techniques; practical exercises on anthropometric techniques and measurement of nutrient intake using computer systems on an individual and group basis.

**FOOD3330**
Nutrition for Sports Science
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6
Prerequisite/s: BIOC2101 or BIOC2181; Excluded: FOOD3220, FOOD3567.

This course consists of a series of lectures and practical exercises that provide students with the knowledge about the occurrence of nutrients in foods and their role in human physiology and health. Structure, properties and sources of nutrients, role in human structure and function. Introduction to food groups, tables of food composition, food labels, dietary recommendations, National physical activity guidelines. Nutrition through life cycle. Dietary intakes of athletes, disorders related to obesity, alcoholism, iron deficiency and calcium imbalance. Effects of exercise on protein and carbohydrate metabolism, fluid imbalance. Dietary supplements and nutritional aids in sports, special needs of athletes.

**FOOD3440**
Advanced Nutrition
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6
Prerequisite/s: FOOD3220

This course consists of lecture and discussion classes that build on the basic concepts of nutrition with respect to the food supply, giving advanced treatment of the following topics. Food and nutrition policy: structure of the population; food supplies, food consumption, nutritional epidemiology; population dietary references; food programs such as school fortification, supplementary feeding schemes, nutritional rehabilitation, nutritionally modified foods, nutritional regulations and standards, nutrition education, dietary and nutrition interventions (ORT, family planning, infection control, growth monitoring); principles, practice and evaluation of applied nutrition programs; advanced assessment methods in nutrition: nutrient bioavailability studies, nitrogen balance tests, vitamin load tests, sodium and potassium excretion, creatinine excretion, fitness assessment, biochemical assessment, design and evaluation of nutritional epidemiology studies, food intake studies.

**FOOD4450**
Advanced Food Processing
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6

This course consists of lectures and discussion groups covering advanced aspects of modern food processing and preservation. This includes food bulk and thermal properties, rheological properties and models of heat transfer (analytical, graphical and numerical methods, computer packages, microwave, infrared, and radio frequency irradiation), process modelling and control, dehydration, evaporation and distillation.

**FOOD5410**
Industry Liaison
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6
Prerequisite/s: 144 Units Of Credit.

This course involves structured inspections of a variety of food processing establishments, production areas and food research institutes and stations within Sydney, NSW and interstate. The aim is to strengthen student understanding of the structure, practical operation and management of the local food industry and to demonstrate how theoretical concepts in food science and technology are applied in a commercial situation. The important linkage between the technical aspects of food production and commercial requirements of food companies will be explained.

**FOOD5410**
Industry Practicum
School of Chemical Eng and Industrial Chemistry
UOC24 HPW24
Prerequisite/s: 144 Units Of Credit.

This course involves a structured program of activity within a food processing or related company as approved by the course coordinator. The aim is to provide a detailed insight into aspects of company structure and activity through project work, reports and seminars.
FOOD9410
Honours Research Project
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC21

An extensive research project is required on some aspects of food science and technology, including preparation of a literature review, conduct of laboratory-based research, presentation of two seminars, and submission of a thesis based on the results of the research project. Candidates will undertake corequisite formal coursework as approved by the Program Coordinator.

Note/s: Restricted to program 3065.

FOOD9420
Food Science and Technology (Honours)
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC24

Advanced training in selected areas of food science and technology: a formal component consisting of lectures, seminars, tutorials and written assignments plus a supervised research program in a specified area of food science and technology. Students intending to do this program should consult with the Program Coordinator about selection of courses in earlier years.

FOOD9430
Food Science (Honours)
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC24

A research project in a selected area of food science, including preparation of a literature review, conduct of laboratory-based research, presentation of a seminar and submission of a thesis based on results of the research project. Candidates will undertake 24 units of credit corequisite formal coursework as approved by the Program Coordinator.

Note/s: Restricted to programs 3970, and Advanced Science - Life Sciences. Enrolment requires co-requisites: 24 UOC of level III/IV courses as approved by the Program Coordinator.

FREN1101
French Language and Culture 1A
Department of French
UOC6 HPW6
Excluded: FREN1100

Introduction to listening, speaking, reading and writing in French; development of basic competence in everyday practical situations, together with regular study of grammar and initiation to contemporary French culture.

Note/s: For students with no previous knowledge of French.

FREN1102
French Language and Culture 1B
Department of French
UOC6 HPW6
Prerequisite/s: FREN1101 or FREN1001; Excluded: FREN1100

Further development of the skills learnt in FREN1101 now in a wider range of practical situations, together with the continuation of the study of grammar and contemporary French culture.

FREN2101
French Language and Culture 2A
Department of French
UOC6 HPW5
Prerequisite/s: FREN1102 or FREN1002; Excluded: FREN2003

Intensive study of French language, with particular emphasis on aural comprehension, oral expression and the acquisition of elementary writing skills. Initiation into the study of syntax and the various registers of French. Further study of French culture.

FREN2102
French Language and Culture 2B
Department of French
UOC6 HPW5
Prerequisite/s: FREN2101 or FREN2003; Excluded: FREN2004

Extension of the skills gained in FREN2101 with special emphasis on the study of syntax and an introduction to literary text analysis. There is also further study of French culture.

FREN3101
French Language and Culture 3A
Department of French
UOC6 HPW4
Prerequisite/s: FREN3102 or FREN2004; Excluded: FREN1011, FREN3003

Consolidation of interactive skills and initiation to the study of some forms of spoken and written discourse of general interest, mainly oral discussion and short written narrative texts. Systematic study of French syntax and phonology.

FREN3102
French Language and Culture 3B
Department of French
UOC6 HPW4
Prerequisite/s: FREN3101 or FREN1011 or FREN3003; Excluded: FREN1012, FREN3004

Extension of the skills gained in FREN3101 with a focus on spoken and written discourse of general academic interest, such as oral presentation and short essay. Further study of French syntax together with systematic literary text analysis.

FREN3103
French Language and Culture 4A
Department of French
UOC6 HPW3
Prerequisite/s: FREN3102 or FREN1012 or FREN3004; Excluded: FREN1021, FREN2013

Consolidation of all skills and initiation to the study of some forms of spoken and written discourse of vocational interest, mainly interview, oral report and short essay. Systematic study of syntax and contemporary French culture.

FREN3104
French Language and Culture 4B
Department of French
UOC6 HPW3
Excluded: FREN1022, FREN2014

Extension of the skills gained in FREN3103 with focus on some forms of spoken and written discourse of vocational and academic interest such as debate and essay. Further study of syntax and systematic literary text analysis.

FREN3105
Advanced Language Elective 1 (French Today)
Department of French
UOC6 HPW3
Prerequisite/s: FREN3004 or FREN3104 or FREN1022 or FREN2014; Excluded: FREN3110, FREN3120

Theoretical and practical study of the patterns of contemporary French. Special focus on the features of spontaneous speech in interaction. Students will practise interactive skills and expository discourse in French. This course is particularly useful for students intending to teach French as a foreign language.

FREN3106
Advanced Language Elective 2 (French Discourse Studies)
Department of French
UOC6 HPW3
Prerequisite/s: FREN3004 or FREN3104 or FREN1022 or FREN2014; Excluded: FREN2030
Theoretical and practical study of French in various vocational fields. Topics may include media, political and scientific types of discourse. Students will practise their written skills and gain a better understanding of sophisticated uses of French in contemporary Francophone societies.

FREN3211
Special Reading Program
Department of French
UOC6  HPW3
Prerequisite/s: FREN1022, FREN2014, FREN2020, FREN2030, FREN3011 or FREN3104

Reading in selected French masterpieces. Students are required to submit an in-depth analysis of work studied.

FREN3214
Modern French Poetry
Department of French
UOC6  HPW3
Prerequisite/s: FREN1022, FREN2014, FREN2020, FREN3011 or FREN3104

A close study of the works of two major poets of the 19th century, Baudelaire and Rimbaud. Analyses the historical context and the beginnings of modernism in the work of these two poets.

FREN3310
French Popular Culture
Department of French
UOC6  HPW3
Prerequisite/s: FREN1022, FREN2014, FREN2020, FREN3011 or FREN3104

A study of some of the most salient cultural phenomena found in contemporary French society. Topics will include humour, songs, advertising, comic strips, forms of talk, soap operas and current issues stimulating public debate in France. Through the analysis of cultural events and selected written and spoken texts, the course aims at furthering knowledge of French cultural practices.

FREN3312
French Cinema and Society
Department of French
UOC6  HPW3
Prerequisite/s: Excluded: FREN3510

A study of contemporary French cinema. The aims of the course are to develop the student's skills in analysing film, and to examine the ways in which French society is represented in fiction films. It will also introduce students to French film theory. Students should note that films will be screened outside class time.

FREN3410
French for Special Purposes
Department of French
UOC6  HPW3
Prerequisite/s: FREN1022, FREN2014, FREN2020, FREN3011 or FREN3104

A study of French as used in the world of business, tourism, leisure and restoration, particularly from the point of view of the professional in these fields. Particular emphasis will be placed on comparative cultural studies, e.g. expressing Australian cultural concepts in French.

FREN3901
Reading Program 1 (Advanced)
Department of French
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: 36 units of credit including 12 units of French at credit level

Any approved Upper Level option from the following: FREN3120, FREN3210, FREN3214, FREN3310, FREN3410, FREN3110, FREN3121, FREN3215, FREN3220, FREN3312, FREN3510 to be taken second year, plus an intensive reading program.

Note/s: Typically done in the second year, this course is designed for students wishing to proceed to Honours in the Department of French.

FREN3910
Honours Preparatory Seminar
Department of French
UOC6  HPW3
Prerequisite/s: 36 UOC of French courses at Credit level

Critical readings of French or Francophone texts which raise key issues in each of the three categories of Language, Literature and Culture. There is also an introduction to the nature and philosophies of research, research methods and techniques, and the principles of writing a dissertation and thesis.

Note/s: Typically done in the third year, this course is designed for students wishing to proceed to Honours in the Department of French.

FREN4000
French Honours (Research) Full-Time
Department of French
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in FREN, including FREN3910 at 65% and permission from Head of Department.

1. Two seminars (each HPW3 for 14 weeks). 2. A thesis workshop (HPW1 for 14 weeks). 3. A research project (thesis) of 12,000 to 15,000 words, in French, written under the supervision of a member of staff on a subject approved by the Department. Students from A or B streams follow an additional advanced language seminar (HPW3 for 14 weeks). Students from A stream may seek permission from the Head of Department to write their thesis in English rather than French.

FREN4050
French Honours (Research) Part-Time
Department of French
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in FREN, including FREN3910 at 65% and permission from Head of Department.

1. Two seminars (each HPW3 for 14 weeks). 2. A thesis workshop (HPW1 for 14 weeks). 3. A research project (thesis) of 12,000 to 15,000 words, in French, written under the supervision of a member of staff on a subject approved by the Department. Students from A or B streams follow an additional advanced language seminar (HPW3 for 14 weeks). Students from A stream may seek permission from the Head of Department to write their thesis in English rather than French. Program spread over two years of study.

FREN4500
Combined French Honours Full-Time
Department of French
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in FREN, including FREN3910 at 65% and permission from Head of Department.

The program usually consists of one session-length seminar in the Department of French, as well as a research project whose subject and nature have been approved by the two departments/Schools concerned. The exact details of the Fourth Year program and its assessment are subject to prior consultation and approval by the Heads of the two Departments/Schools concerned.

FREN4550
Combined French Honours Part-Time
Department of French
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in FREN, including FREN3910 at 65% and permission from Head of Department.

The program usually consists of one session-length seminar in the Department of French, as well as a research project whose subject and nature have been approved by the two Departments/Schools concerned. The exact details of the Fourth Year program and its assessment are subject to prior consultation and approval by the Heads of the two Departments/Schools concerned. Program spread over two years of study.
An introduction to combustion technology, combustion calculations, burner design, furnace, kiln and boiler thermal design.

**GENC1001**  
**Accounting and Society**  
School of Accounting  
UOC3  HPW2  
Excluded: ACC1101

The aim of the course is to develop students’ understanding of the use of financial information in the allocation of scarce resources in the fields of private and public enterprise, and in the bargaining processes of stakeholders in competing for shares of the wealth generated or distributed by those enterprises. The stakeholders include equity and debt investors, employees and the community within which both private and public enterprises operate under a social contract. The course introduces students to the basic concepts of financial information recognition and measurement, the media through which financial information are communicated and briefly outlines the ethical and regulatory frameworks within which information is communicated. Students are introduced to the various financial and non-financial performance indicators used by stakeholders in the assessment of their interests in private and public enterprises through the analysis of an entity in the private sector and in a government agency.

**GENC2001**  
**An Introduction to the Australian Economy**  
School of Economics  
UOC3  HPW2  
Excluded: ECON2104

This course will introduce students to the main issues and problems currently faced by the Australian economy. The aim is to acquaint students with the basics to enable them to understand contemporary policy debates, and to achieve economic literacy. The focus will be on macroeconomic policy debates, with special attention paid to problems associated with economic growth, inflation, unemployment and the balance of payments. In addition, some of the debates associated with aspects of microeconomic reform, such as privatisation and deregulation, will be considered.

**GENC2005**  
**Economic Philosophers**  
School of Economics  
UOC3  HPW2

The subject of study will be the thoughts and lives of great economists of the past. An examination of major traditions of economic thought illustrates the evolution of economic ideas and contemporary developments. There will be considerable emphasis on the intellectual and social background which influenced the more important contributions.

**GENC2102**  
**Black Death to AIDS: Economic Impact of Epidemics on Society**  
School of Economics  
UOC3  HPW2

The course explores the impact and responses to three major outbreaks of infectious disease: the Black Death in the mid-14th century, the cholera epidemic of the early 1830s and that of AIDS in our own time. This involves the contemporary epidemiology of the disease, suggested cures and behavioural responses. Some of the latter are remarkably similar, with differences reflecting those in the broader social context that is also explored.

**GENC5001**  
**Introduction to the Internet and Electronic Commerce**  
School of Info Systems, Technology & Management  
UOC3

Students will learn to use the Internet, gaining an understanding of Internet applications such as e-mail, news-groups and navigating the World Wide Web to access information from around the world. Students will also design and implement a simple World Wide Web home page. All students will gain hands-on experience with applications and the information superhighway.

**GENC6001**  
**An Introduction to Marketing**  
School of Marketing  
UOC3  HPW2  
Excluded: MARK1012

Marketing is one of the core disciplines of successful management today. It impacts on society every day in a myriad of ways - creating new products and services; helping organisations understand what people want and need; helping people find products and services that meet their needs; communicating information that makes people’s lives more efficient; creating exchanges that generate employment and wealth. But marketing also raises ethical issues about excess consumption, unhealthy obsessions and addictions, the impact we have on the environment and the communities in which we live. This course is designed to provide students with an overview of these different aspects of marketing management. Insights are provided into the way in which businesses, government and not-for-profit organisations manage their marketing efforts. Topics include: the concept of marketing in different types of organisation; how to analyse the market and segment consumers within the market; buyer decision processes, organisational markets and organisational decision processes; the development of the marketing mix; products, brands and services; pricing, channels and promotion (personal selling, advertising, sales promotion and publicity); and marketing strategy within increasingly turbulent and challenging environments.

**GENC6002**  
**Marketing and the Consumer**  
School of Marketing  
UOC3  HPW2  
Excluded: MARK2051, MARK3072

This course is designed to provide students with an understanding of the relationship between marketing as a business discipline and consumer rights and responsibilities. It looks at marketing from the consumer's point of view, rather than from the traditional marketing manager's point of view. The course covers topics such as the "culture" of consumption of products and services in developed economies; the history and development of the consumer rights movement and "consumerism" in the United States and Australia; the philosophical underpinnings of the movement and where it is heading with regard to issues such as personal privacy and anti-globalisation; the opportunities and concerns posed by new interactive and personalisation technologies; and attempts by marketers to respond in multiple ways to all these consumer pressures and challenges. A critical and questioning approach is adopted throughout the course.

**GENC6003**  
**Tourism: The Global Future**  
School of Marketing  
UOC3  HPW2

It is claimed that tourism is one of the three growth industries of the new millennium, along with information systems and communications technology. In this course the wider significance of tourism is examined, looking at its economic, social, political and environmental importance. Topics include: tourism through the ages; tourism models and markets; the structure of the industry; the distribution of tourism products, and transport-related issues; governments and tourism - agents of regulation and promotion; the environmental, cultural and economic impacts of tourism, and the dilemmas that can arise when these appear to be in conflict; tourism planning, innovation and technology; special interest tourism, such as eco-tourism; and the future of tourism, particularly as it relates to sustainability issues. The course challenges students to think about tourism in new ways. This is facilitated with fieldwork to tourist tourism operators, planners and regulators. The course also highlights career opportunities that tourism has to offer university graduates, and provides a starting point for students planning to take an MCom in Tourism, Hospitality Management and Marketing on completion of their undergraduate degree.
GENC7002
Getting Into Business
School of Business Law and Tax
UOC3 HPW2
Excluded: LEGT1711

This course examines how to set up, manage and develop a business within the limits of the law. The law regulates and provides protection and value to every aspect of the business and its activities. In a step by step method, using case studies, students will be exposed to the ideas and concepts which make up the ingredients of a successful business. Identifying the business opportunity; developing the concept; setting up the vehicle to conduct the business, securing premises; equipment and employees; dealing with creditors, suppliers customers and the government; and protecting the assets of the business are all covered in this course.

GENC7003
Managing Your Business
School of Business Law and Tax
UOC3 HPW2
Excluded: LEGT1711

Business management is the science of managing scarce resources, change and competitive forces in a deregulated environment. Within this context the law has emerged as a key player in helping, guiding and prohibiting the behaviour of managers in small to medium businesses. The course examines the regime of laws and regulations, institutions and authorities that govern the function and performance of management in small and large business entities in Australia and internationally. The topics covered include: rights and obligations attached to property; dealing with suppliers, employees and subcontractors; developing legal financial models and business plans and undertaking legal and compliance audits and continuing governance reviews that provide feedback to the business entities. The course will provide a substantial range of analytical research and practical skills to empower students to undertake the responsibilities of the contemporary manager.

GENC9001
From Paper to the Web: Finding and Keeping Information
School of Info Systems, Technology & Management
UOC3 HPW3

As information resources appear in increasingly diverse forms, researchers face increasing challenges. Students will be assisted to become critically aware of this diverging range of resources - books, journals, electronic and multimedia materials - inside and outside the walls of the University Library and throughout the World Wide Web. The context in which these materials are produced and distributed will be discussed. The issues of managing literature searches will be addressed, including search techniques, subject analysis and control, referencing styles and conventions, and the use of personal bibliographic software.

GENC9002
Web Information Resources
School of Info Systems, Technology & Management
UOC3 HPW2

The World Wide Web offers a wealth of information resources with deceptively simple search engines. The social implications of the Web will be critically examined as a background to the effective utilisation of these resources. This examination will lead to a better and deeper understanding of how these resources are organised and retrieved. Traditional approaches to subject analysis are combined here with comparison of different navigational techniques and an introduction to the variety of resources in the electronic environment.

GEND0204
Seeing Light as a Design Tool
College of Fine Arts
UOC3 HPW2

Light. Its essential nature and characteristics are the focus of your study in this course. Light is a core ingredient behind high-end technology such as lasers, optical medical diagnostic tools, live performance event lighting machines, and computers. Light is a design tool unmatched in its flexibility and relative ease of application, and can reveal and enhance our experience of natural and built environments. You will design with light, without the need of sophisticated apparatus, complex equations or a detailed understanding of science. You will consider both the theoretical and practical aspects of light design, and the specific lighting requirements of virtual and real environments. Your learning in this fully online course will be based on demonstrations and experiential observations that seek to understand the effect of light sources on your perception of space. Learning exercise and assessment tasks will include both individual and joint activities to encourage collaborative learning, and will be supported by online resources. Your activities will include problem solving, critical thinking and establishing a design process. Your design decisions for a lighting design solution will be examined and related to an environment design project from design initiation through to documentation. This culminates in the production of a lighting design report. Access to a digital camera or a film camera & scanner is a requirement. For international students: this 3 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.
GEND0205  
Curating Art and Exhibitions  
College of Fine Arts  
UOC3  HPW2

Today’s contemporary art practice includes temporary and site-specific projects, screen-based, digital and online art. The role of the curator, whether museum-based or freelance, has changed dramatically with the emergence of these new art practices. This course investigates key exhibitions and art projects internationally, providing a range of approaches to curating art today. It focuses on new models of exhibition-making both in traditional and alternative art venues, including public art. Throughout the course, exhibitions and art projects in various parts of the world are used as case studies. With assistance from lectures and additional resources, your analysis of these projects will reveal an exciting range of solutions by curators to rapidly evolving media and exhibition possibilities. In addition, you will have opportunities to investigate and discuss new public art projects with reference to cultural and physical contexts. A series of online lectures and resources is offered in a thematic format over 14 weeks. Your learning will be supported and enhanced by online learning activities, including group discussions and assessable tasks. For international students: this 3 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.

GEND0206  
The Art of Plants and Nature  
College of Fine Arts  
UOC3  HPW2

Have you ever looked at parts of a flower, and realized that the petals you think you are seeing are actually an arrangement of modified leaves, perhaps not too different from leaves elsewhere on the plant? Have you thought about the pattern of veins on a leaf, the scars on a stem or a plant’s general growth habit? This fully online course comprises a series of lectures, activities and assessment tasks that seek to increase your visual awareness of plant structures, the analytical and conceptual means by which you see and define them, the possibilities for pictorial and aesthetic outcomes, and the translation of these understandings into your own art/design products. The course centres on visual analysis of natural forms including: structure, growth, environmental influence, issues of symmetry, division, and proportions, the investigation of botanical form (plant morphology), and an introduction to some of the descriptions and traditions which make up artistic responses to plants and flowers. Practical examinations and studies will be made from: specimen, in-situ sources, field studies. This course aims to help you develop imaginative and conceptual processes and skills, and to produce figurative or abstract 2D and 3D responses from your analysis of the systems of plants and nature. Assessment tasks will focus on individual projects and online team activities that encourage participation and collaboration. For international students: this 3 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.

GEND0208  
Fashion 1980 - Now  
College of Fine Arts  
UOC3  HPW2

Why do high-heeled shoes feature in the television series Sex and the City? How are fashion, gender and sexuality linked? Why can women now wear a cheongsam dress and trainers? Fashion history and theory today’s contemporary art practice includes temporary and site-specific projects, screen-based, digital and online art. The role of the curator, whether museum-based or freelance, has changed dramatically with the emergence of these new art practices. This course investigates key exhibitions and art projects internationally, providing a range of approaches to curating art today. It focuses on new models of exhibition-making both in traditional and alternative art venues, including public art. Throughout the course, exhibitions and art projects in various parts of the world are used as case studies. With assistance from lectures and additional resources, your analysis of these projects will reveal an exciting range of solutions by curators to rapidly evolving media and exhibition possibilities. In addition, you will have opportunities to investigate and discuss new public art projects with reference to cultural and physical contexts. A series of online lectures and resources is offered in a thematic format over 14 weeks. Your learning will be supported and enhanced by online learning activities, including group discussions and assessable tasks. For international students: this 3 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.

GEND0209  
Cross Cultural Sculpture  
College of Fine Arts  
UOC3  HPW2

This is a practical, online sculpture course that will introduce you to ways of making contemporary sculpture and installation art through online projects. The two studio projects are designed to help you develop your own future creative enquiries as the activities mimic the processes artists employ to make artworks that are content rich and idiosyncratic. Ordinary skills, such as cutting, assembling, sanding and gluing, painting, sewing, stapling and snap shot photography are required for everyday methods of construction and recording. Materiality will be investigated using culturally encoded found objects and commonplace stuff. Your art making will be informed by studio theory components that will enhance your awareness and understanding of how and why contemporary artists often blend and quote diverse cultural practices in their artwork. Online group discussions and a collaborative online studio theory project will create a community of scholarship and critical feedback to support your art making. The interdisciplinary nature of contemporary sculptural practice will be explored in an installation project, with an invitation to experience a diversity of sculptural methodologies. Interdisciplinary approaches will develop from an initial project that creatively investigates the more familiar, object based sculpture. You will need access to a digital camera. For international students: this 3 unit of credit (UOC) online course can only be undertaken in addition to the minimum 18 UOC face-to-face requirement per session.

GEND1202  
Drawing the Body: Studies of Surface Anatomy  
School of Art  
UOC3

This course provides an introduction to human anatomy through the studies of comparative anatomy, skeletal structure, musculature and a perspective on the history and philosophy of anatomical images. A practical examination of the structure, form, and function of the body develops an understanding of the human figure. Emphasis is placed on direct observations of the nude. Students draw from the skeleton, casts, and prepared anatomical specimens. A range of approaches are covered that will encourage students to understand the basic anatomical constructs.

GEND1203  
Drawing the World From Within/Without  
School of Art  
UOC3  HPW2

Drawing: The initial response to the transformation of an idea, the delineation of shape or the foundation of form. Based upon practical observation, students are encouraged to understand both the inter-relationship of form and content and the creative possibilities of media and techniques. An awareness of the methods of interpretation and translation through the drawing process is a focus of this course. Drawing as the evidence of inquiry, combined with the development of conceptual skills, forms the central structure of this course.

GEND1204  
Studies in Painting  
School of Art  
UOC3  
Excluded: SART1502.

Through paintings we can imagine other times, cultures, psychologies. Practical engagement with painting as a creative form involves the individual in selective and particular imaginative, intellectual and perceptual processes. This course provides an introduction to ways of looking, seeing, thinking and using materials to make paintings. The course involves both theoretical and practical exploration of visual elements to construct form-space relationships within a two-dimensional field. Practical studies include the simple preparation of painting supports, the mixing of tones and colours and experience in using a range of basic materials. The subject includes a supervised excursion to the AGNSW.
This course will cover theoretical and practical aspects of producing a fine art print. The theoretical component will deal with the context in which artists produce prints; describing the contemporary world in which rapidly developing technology has provided the means of producing multiple, repeatable images very easily via the photocopier, fax machine and computer printer. The basic differences between a ‘reproduction’, a commercial printed image and a ‘fine art print’ will be discussed, and the conventions of annotating and numbering a printed edition will be covered. The practical component will enable the student to become familiar with some of the fine art printing techniques, such as Etching, Relief, Lithography and Screen print through studying the work of a selection of Australian printmakers and techniques demonstrated. Students will have the opportunity to produce a print using one of the above mediums and to mount and document it appropriately.

Note/s: Lecture/seminar/workshop.

GEND1208
Studies in Sculpture
School of Art
UOC3
Excluded: SART1591.

This sculpture course provides practical experience in the appreciation of space and form. Theoretical and historical information is discussed related to the discipline and it is practised at a high level in the studio. The relationship to analogue technologies will be introduced in the latter part of the course. Demonstrations, workshops and darkroom procedures in fine printing of black & white and colour photographs are the basis of the practical component of this course. Topics covered and explored.

GEND1209
Studies in the Camera - Analogue Photography
School of Media Arts
UOC3
Excluded: SART1581, SART1582, SART1583.

This course provides an introduction to and overview of small to large camera formats and their application in the context of contemporary visual art practices. Demonstrations and workshops to enhance skill acquisition in the use of 35mm cameras provide the basics of the practical component of this course. Topics covered and practical workshops include: 35mm camera operation; overview of medium and large format cameras; B/W film types and formats; basic natural lighting techniques; light metering; film and print processing; darkroom procedures; and print finishing/presentation. An overview of electronic and digital cameras will be introduced in the latter half of the subject. Students will undertake a gallery visit to view contemporary photomedia work. Slide lecture topics will comprise the History of Photography, and The Photographic Image in Contemporary Visual Arts. The industrial/commercial uses of image capture devices and the impact of new imaging technologies are discussed and explored.

GEND1211
The Artist’s Studio
School of Art
UOC3
Excluded: SART1591.

This course looks at the relationships which have existed between artists, patrons, consumers, dealers, auctioneers and critics, and discusses the directions which the art market may take in the era of the Internet. The lectures are designed for the interested non-specialist and involve visits to artists’ studios, galleries, museums, and auction houses. The student will learn how to make informed decisions concerning the collection of art. Topics will include the effects which new technologies have had upon the traditional arts of painting and drawing, the impact on artists of concepts from diverse cultures and the influence of political ideas on the deskilling of the contemporary artist.

GEND1212
Analysing a Picture: Composition and Design in Art
School of Art
UOC3
Excluded: SART1591.

Apart from paints, pastels and pencils, most of us now possess some image-making device, whether it be a camera, a video recorder or a computer with a graphics program. There is a need for understanding key ideas about pictorial composition if we wish to create better images with these tools. This course is intended to provide an introduction to the analysis of visual works of art for the interested non-specialist. It introduces students to the formal aspects of the visual arts, such as the fundamental elements of colour, shape, size and texture, and explores some of the competing sets of organising principles which have guided artists in the creation of visual images.

GEND2201
Art Therapy
School of Art History and Theory
UOC3
Excluded: SART1591.

The aim of this course is to explore the integration of art and therapy in theory and practice. Students will be introduced to the concepts, philosophies and methodologies of Art Therapy as an emerging discipline in its own right. The subject will look at the use of art within the traditional frameworks of psychology. It will explore various forms of the visual arts as a medium for self expression, communication and growth. It is intended for the non-specialist interested in the psychological implications and effects of image making.

GEND2202
Multicultural Contexts
School of Art Education
UOC3
Excluded: SART1591.

The aims of this course are to increase students’ knowledge and awareness of the cultural diversity of Australian society, develop their sensitivity to the needs of minority groups and explore the implications of multiculturalism for policies and practices represented through the lens of art and art education. Through lectures and discussion groups, the course will consider Australia’s history of multiculturalism and look at the issues and possibilities arising for the visual arts from multicultural education.

GEND2203
Dialogues and Communities
School of Art Education
UOC3
Excluded: SART1591.

This course enables students to become familiar with issues and contexts of contemporary community arts, including cultural development and democracy, cultural resources, real wealth/community value and social capital. Students experience a range of community activities e.g. events, public art/design projects, interest groups together with traditional applications of community arts practice seem as social and cultural development. Students undertake preparation of funding applications, field work in selected community settings and collaborative projects.
GEND2206
The Art Museum and Art Education
School of Art Education
UOC3

This course aims to make students aware of the ideology and philosophies of art museums through an understanding of the broad educational functions of the museum including the vernacular appreciation of art and the development of a lifelong approach to learning. Students have the opportunity to observe the educational functions of the art museum within a diversity of contexts and systematically investigate the roles which the museum performs within our society. Field work in selected museums and the use of videos, discussion and group tasks course experiences include field work in museums video discussions and group work.

GEND3218
Psychoanalysis and Art
School of Art History and Theory
UOC3
Excluded: SAHT2644.

The subject is designed to develop a critical understanding of the relationship between specific theories of psychology, psychoanalysis and art practice. The motivation, reception and interpretation of works of art will be studied in the light of such theories as Freud’s ‘metapsychology’, Jung on Dreams, Laura Mulvey’s notion of the ‘gaze’ and Michael Foucault’s histories of madness and sexuality. Art works examined will be representative of a wide range of movements and traditions.

Note/s: HPW2 lecture/tutorial/seminar. Kensington Campus. Exclusions apply to some Faculty of Arts and Social Sciences courses. Excluded: COFA2256.

GEND3230
Art, Money and Power
School of Art History and Theory
UOC3 HPW2

What is the relationship between art and the economic and political life of our society? Art and power have gone hand in glove from medieval feudalism, through the emergence of mercantile capitalism and centuries of capitalism and colonisation to the global market and cultural infrastructure of today. Those who wielded political and economic power have sought a reflection of greatness, civility, and taste in their art patronage, connoisseurship and collecting. This course explores the nexus between art, money and power in both historical and contemporary society.

GEND3231
Picturing Death: Art and the Human Predicament
School of Art History and Theory
UOC3

If we understand death, will we understand life? Many artists have thought so, and in picturing death, they have given us insight into the meaning and value of life. Looking death in the face, artists from different epochs and cultures have produced extraordinary images that are sometimes troubling, sometimes healing; sometimes dispassionate, sometimes deeply moving. This course explores the art of death, including funerary and memorial images of ancient cultures, images of war and revolution, images giving expression to our experience of AIDS and other catastrophes of the contemporary world. The course ranges from the funerary art of ancient cultures to the contemporary images of Aboriginal artists who express traditional spiritual values in modern forms and media.

GEND3232
Pornography, Art and Politics
School of Art History and Theory
UOC3 HPW2
Excluded: SAHT2643, SAHT9133.

This course will explore the boundary between art and pornography and the social function of that boundary in western society. It will look at the ways in which bodies are eroticised and/or designated as ‘pornographic’ or perverse. Concepts such as fetization, voyeurism, sadism and masochism will be discussed in relation to art history and contemporary art practice. The politics of pornography will be debated in relation to such issues as gender/feminism, child sexuality, censorship and AIDS.

GEND3238
Memory and Self
School of Art History and Theory
UOC3 HPW2
Excluded: SAHT2213.

This course traces contemporary ideas of body and subjectivity through the work of a range of artists and writers. Its major focus is on the experience of memory and self-understanding. It addresses the questions of how memory is constituted and how it is crucial to our sense of self; of how memory affects our relations to images and objects, and how memory is represented. The course also examines human relations to space, the themes of horror and humour, and the topics of gesture, performativity and mimesis. Contemporary art and writing practices will be used as the basis for a creative engagement with theoretical ideas. Focus texts include writing by Christian Boltanski, Georges Perec, Oliver Sacks, Doris Laub, Julia Kristeva, Jef Wall, Judith Butler and the stories of the ‘stolen children’.

GEND4202
Design and Human Functioning
School of Design Studies
UOC3 HPW2
Excluded: SDES1103

This course will introduce students to some of the psychological and physical characteristics of individual human functioning as factors in the design of objects, surfaces and spaces. The concepts explored will include the psychology of perception, theoretical approaches to the analysis of human behaviour, basic anatomy/biology/physiology, basic ergonomics and anthropometrics, analysis and measurements of the relationship between the human body and the design of macro and micro environments.

GEND4203
Design Management
School of Design Studies
UOC3 HPW2
Excluded: SDES2171, SDES2116

This course will develop students’ understanding of principles applied to design management, and the place of design practice within the commercial environment both in the public and private sector. Students will cover the above concepts in one session of study. They will also be introduced to the broader question of general management, and the importance of the development of a design culture within organisations whether companies or institutions.

GEND4204
Designing: Practical Studies in Design
School of Design Studies
UOC3

This course introduces students to the study of the multi disciplinary nature of design. It is organised to extend the student’s level of understanding about the way in which concepts and processes in graphic, object and environments design may be integrated to contribute to the development of richer appropriate design solutions.

GEND4205
Design Communications and Presentations
School of Design Studies
UOC3

This course examines the issues which affect the communication and presentation of visual information in design and other disciplines which deal with text and images. A series of lectures and tutorials will introduce students to the theories and principles of visual communication and information design. Students from different disciplinary backgrounds will be able to interact, acquire, develop and use skills based on visual thinking and critical analysis to address issues dealing with textual and visual communication in society. The course provides opportunities for students to examine conventional communication methods and to approach creatively the dissemination of visual information in ways which are well conceived, communicative, interactive, responsible, comprehensible and user-friendly.
**GEND4206**
Integrated Design Studio  
School of Design Studies  
UOC3

This course provides students with a study of the multidisciplinary nature of integrated design practice through their involvement in a series of design projects. The aim is to extend students’ level of thinking and understanding about the ways in which the communication of concepts and processes in design may be integrated to contribute to the development of richer, more appropriate design solutions in the commercial context.

**GEND4207**
Designing: Models as a Tool for Design Communication  
School of Design Studies  
UOC3  
Excluded: SDES1107.

This course is an introduction to basic model making techniques, materials and equipment. Models are a three dimensional method of expressing design process intent and approach. The students will be made aware of the place of models as a communication tool in an array of design situations. The various types of models required for different objectives will also be described. The course will consist of model making exercises and visual references through lectures and slide shows. Students will be encouraged to experiment and develop understandings and skills which will enable them to appreciate their designs through practicality. Through the exercises and project work, students from varied disciplines can interact through their creativity and experience working approaches from a discipline other than their own specialist study area. The assessment of this course will consist of a progressive evaluation as well as both verbal and visual presentations of the completed exercises and project.

**GEND4208**
Working with Ceramics  
School of Design Studies  
UOC3  
HPW2  
Excluded: SDES1155, GEND1206

This course introduces the student to ceramics through historical, theoretical and practical investigations. An understanding of the ways clay has been used by different cultures at different times will inform the student as to why certain conventions have been established in the medium. An emphasis is placed on the ideas and practices of contemporary ceramics. Practical work is carried out in such a way that demonstration and application will be developed in graduated stages so that the potential for a satisfying result is continually expanded.

**GEND4209**
Working with Jewellery  
School of Design Studies  
UOC3  
HPW2  
Excluded: SDES1154, GEND1207.

This course introduces students to the work and practice of current Australian studio jewellers and object makers. Through projects and exhibition visits students will gain insight into the concepts and ideas that are currently explored. The course is designed to challenge perceptions of body adornment and traditional notions of jewellery. Through studio activities students will learn the skills of jewellery making processes and techniques, idea generation and their application to the realisation of project work.

**GEND4210**
Textiles and Fashion  
School of Design Studies  
UOC3  
Excluded: SDES2167.

This course introduces students to contemporary textiles and their relationship to fashion. Theoretical and practical aspects of textiles and fashion are covered through lectures on the concepts, work and ideas of leading textile artists and designers. The theoretical component deals with the context in which contemporary artists work, the conceptual basis for their work and how historical and social references are made. The practical component enables students to become familiar with some of the elementary techniques used by leading practitioners to make textile and fashion items. The emphasis of the course is on creating textiles and surface designs for textiles and fashion rather than garment construction. Students learn some basic techniques in embroidery and the surface design processes of dyes, dyeing and printed textiles.

**GEND4211**
Design in Performance  
School of Design Studies  
UOC3  
HPW2  
Excluded: SDES2177, COFA7061

This course covers the major elements of design in staging large scale events including theatre performance. Theatricalisation and design theming of public occasions, community ceremonies and sporting events is an established design trend. Students are introduced to the design process on which staging of performance events in various contexts are based. Through close examination of the characteristics by which such occasions are represented and communicated to audiences, students systematically investigate the crafts and contemporary theories of staging such events. A design brief is set for students to construct, draw, design and complete.

**GEND4212**
Design in Adornment and Costume  
School of Design Studies  
UOC3  
HPW2

This course considers clothing as cultural evidence and through a series of lectures and workshops provides students with the opportunity to both investigate the function and meaning of clothing and examine its codes and cultural significance. Clothing and costume provides a unique area of study. It is a potent combination of function, design and cultural meaning. Students are able to communicate their understandings through drawing, designing, constructing and making in a studio environment.

**GEND4213**
The Arts of Aboriginal People and Torres Strait Islanders  
School of Design Studies  
UOC3  
Excluded: SAHT1627.

This course is an ideal means from which to access basic cultural information viewed through art works. No prior knowledge of art or anthropology is necessary to participate in the lectures, museum and gallery visits or any practical work undertaken during the term. The course focuses on one region and a specific art form, like fibre objects or sculpture. Both historical and contemporary work are examined.

**GEND5201**
Landscape Animation  
School of Media Arts  
UOC3  
HPW3  
Excluded: 4810 Bachelor of Digital Media and 4800 Bachelor of Fine Arts major Time-Based Art

Students will be taken through a range of workshops and animation techniques specifically designed to experience nature frame by frame. Students will experience five days of animation in the landscape around historic Broken Hill. This unique approach to animation draws upon environmental sculpture as an aesthetic for animation using digital video. Each student will shoot, edit and score their own digital animation in the Australian outback. Students will learn valuable skills in digital camcorder and digital editing as well as developing classic animation timing skills.

**GENE1011**
From Catchment to Ocean  
School of Civil and Environmental Engineering  
UOC3  
HPW2

The environmental amenity of water in catchments, waterways and the coastal zone is under increasing threat from human generated pollutants such as rubbish, heavy metals, pathogens, nutrients, pesticides and other toxic compounds. This subject provides a non-technical introduction to this threat and what can be done about it. The path and transformation of the pollutants from the catchments where we live, to rivers and estuaries, and finally the oceans is covered. Measures for controlling
pollutants and disposing of pollutants, inclusion of: catchment management on-site techniques; gross pollutant traps; ocean outfalls; chemical and biological treatment; and wetlands will be covered. Finally, the environmental impacts of these pollutants on our waterways are discussed. In particular, human health issues, eutrophication and ecological impacts will be examined.

GENE1012 Tools for Ecologically Sustainable Development in Corporations and Regions
School of Civil and Environmental Engineering
UOC3 HPW2

A brief introduction to Ecologically Sustainable Development (ESD) principles and the social, economic and political context in which they have arisen, and in which they are implemented. A non-mathematical introduction to developing methods and techniques (tools) being used by regional and corporate environmental managers to implement ESD principles in organisations and regions. These tools include a range of material accounting techniques that can be applied at a product level (Life Cycle Assessment), to a corporate and regional level (Materials Flux Analysis), to a regional and national level (Total Material Requirement, Ecological Footprints, Material Inputs per Service Unit). Physical indicators of the State of the Environment at these levels will be introduced. A comparison will be made with the use of economic indices, such as GDP and current account deficit, used in the National Accounts to control the state of the economy.

GENE3051 Solar Cars - Speed of Light
Centre for Photovoltaic Engineering
UOC3 HPW2

Solar powered racing cars capitalise on state-of-the-art developments in engineering and technology, especially photovoltaics, aerodynamics, motor design, electronics, automotive engineering, battery technology, communication and global positioning, software technology, and race strategy development. Besides learning about solar racing cars, enrolled students participate in a "virtual" World Solar Challenge race from Darwin to Adelaide (complete with virtual media stops). In addition, enrolled students participate as a team in the design, construction, testing and racing (against their classmates at the end of session) of model-scale solar powered cars from a simple kit. This class is designed to give non-engineering students a broad perspective in basic engineering principles, like problem solving, design, project planning, technical writing and oral presentation. No previous knowledge or experience in any of the above-mentioned areas is assumed.

GENE4001 Biomedical Engineering: Technology in Medicine
Graduate School of Biomedical Engineering
UOC3 HPW2

The objective of this course is to explore current and future biomedical devices, procedures and technology. Students from non-engineering backgrounds will gain an understanding of the history and development of current technologies such as the bionic ear, artificial heart, bone marrow transplantation, and CT and MRI scanning. Trends and possible future developments will be discussed. Classes will be held in S1 on Wednesdays 10am-12noon.

GENE7801 Energy and Mineral Resources - Use or Abuse?
School of Mining Engineering
UOC3 HPW2

This course examines Australia's importance as a vast source of mineral and energy resources. It concentrates on the impact the continued extraction and consumption of non-renewable resources has on our physical, social and political environment. The issues of global warming, native title, recycling and the viability of alternative energy sources are dealt with in detail. All course material is delivered via WebCT. A number of optional workshops are scheduled throughout the duration of the course to promote discussion on relevant topics and to present additional information. A more detailed description of this course together with the semester timetable can be found under the timetable information link below.

GENL0230 Law in the Information Age
Faculty of Law
UOC3

This course will give students an overview of the operation of new media and communications services under Australian law, examining both the legal requirements and the policy reasoning behind the way in which media and communications are regulated. It will cover five broad areas: how laws are made, changed, interpreted and enforced; electronic commerce and what it means for business, consumers and the community; the laws governing licensing, ownership and control of telecommunications, radiocommunications and broadcasting enterprises, and whether these laws are appropriate and effective to deal with new technologies and services; restrictions on media and online content, including classification and censorship, and regulation of content; and protecting intellectual property and reputation, covering copyright, trademarks and defamation.

GENL1020 World Religions: Customs and Laws
Faculty of Law
UOC3 HPW2

Religion constitutes a significant factor in our understanding of how a society orders and regulates itself. This course offers students a general introduction to five of the world's major religions with a special focus on the manner in which their specific customs and laws impact upon the behaviour of their adherents. The religions studied are Hinduism, Buddhism, Judaism, Christianity and Islam. In each case, we explore the distinctive religious customs and rules, which shape the activity of believers in such areas as worship, dress, diet, marriage and family, work and recreation, birth and death. A major focus of the course is the social relevance of religion in today's society. Its aim is to deepen the student's appreciation of the rich mosaic, which characterises the practical and legal dimensions of the world's great religions.

GENL2020 An Introduction to the Australian Legal System
Faculty of Law
UOC3 HPW2

This course provides a basic understanding of the Australian legal system. It deals with the principal institutions of the legal system, particularly the courts; the legislature and the executive arms of government; the judiciary; the legal profession; the doctrine of precedent; sources of Australian law including the past and present status of Aboriginal customary laws; the origins of common law; the colonisation of Australia; classifications within the common law; the jurisdictions of Australian courts and consideration of alternative methods of dispute resolution. Assessment: Class participation and take-home exam.

GENL2041 Cyberspace Law
Faculty of Law
UOC3 HPW2

This course surveys how cyberspace (the social space created by computing networks such as the Internet) is being regulated by law and other means, and examines how successful is this regulation. The course takes an Australian perspective, but with a strong emphasis on the development of international regulatory mechanisms. Responses to problems by technical controls will be compared with legal controls. As a survey course, the precise topics to be covered will change from year to year but may include topics such as: theories of cyberspace regulation; governance structures of the Internet - the ICANN example; domain names, identities and reputations; encryption and public key infrastructure (PKI); copyright - can copying be controlled by cyberspace; content control through censorship and defamation; computer crime and investigation; privacy and surveillance; e-commerce, contracts and consumer rights; and jurisdictional problems and borderless transactions. There will be a team teaching approach with a number of lecturers.

GENL5020 Business Fundamentals
Faculty of Law
UOC3 HPW2
This course introduces students to the fundamentals of business law. The course provides an overview of the interrelationship of laws governing business in Australia and critically evaluates those laws. Contracts are entered into every day. Most of you will become professionals subject to a duty of care towards your clients. You are also consumers who have the benefit of certain rights afforded by the Trade Practices Act. As entrepreneurs, professionals and/or employees you are also entitled to the benefit of intellectual property protection for your creative or inventive effort or for the good you will have acquired individually or through your business. The aim of the course is to empower students in everyday situations through the study of the law of contract, negligence, defamation, trade practices law and the law of intellectual property such as copyright, patents and trademarks. Assessment: Take home or 2 hour examination (in last lecture) 60%; class participation/project, team and individual problems 40%.

GENL5030 Understanding Tax
Board of Studies in Taxation
UOC3 HPW2

Understanding Tax is for students who want a non-technical, practical introduction to our tax system. Whatever career or lifestyle you’re contemplating, tax will be an important consideration in decisions you make — whether it’s about buying or renting accommodation, amounts that have to be disclosed to the Tax Office, expenses that can be claimed as deductions, how to fill out a tax return, investing in shares, how much tax you have to pay, whether there are acceptable ways of minimising your tax liability, and what you can do if you’re unhappy about a Tax Office decision. The course will be taught in two-hour classes made up of a lecture followed by discussions and practical exercises.

GENM0123 Children - Growing Up in Society
School of Women's & Children's Health
UOC3 HPW2

An introduction to normal growth and development in children and to their interactions with society. Topics include children and the media (advertising and violence), children and sport, childhood accidents, status of children in different cultures, poverty and child health, exploitation of children, behaviour disorders, nutrition, adolescence. In short, how can we ensure that children have an optimal relationship with society?

GENM0201 Human Origins, Human Problems
School of Medical Sciences
UOC3 HPW3
Excluded: ANAT2600, ANAT2610

We will be considering what studies of primate behaviour tell us about the behaviour of ancient and modern humans and looking for the origins of some modern human problems (warfare, child abuse and infanticide) in our primate heritage. The course will examine the neurological and structural basis of language and speech and look at how the human brain and hand have become adapted for tool use. Other issues to be examined include the origins and structural adaptations involved in upright walking, problems of human childbirth, hominid reproductive strategies, modern human variation, human prehistory in Australasia and the human face as a means of communication and recognition. The course involves both lecture and laboratory class sessions. The latter will use models and anatomical material to illustrate important aspects of human evolution. Course dates: Summer recess 21st - 25th February, Winter recess 11th - 15th July.

GENM0202 Frontiers in Brain Research
School of Medical Sciences
UOC3 HPW3
Excluded: ANAT3411

We take for granted the notion that the human brain is the seat of our consciousness and yet very much remains to be learned about how the living brain actually works. Brain disease and mental illness are some of the most important health problems in our community and yet the causes of many of these diseases remain unknown. This course will allow the student to explore the current state of knowledge on the structure and function of the human brain and to learn about current thinking concerning the causes of brain-related illness. Topics include: cellular architecture of the brain; structural and functional differences between the left and right brain hemispheres; developmental abnormalities of the brain; language and the brain; fear and anxiety and the brain; the addicted brain; spinal cord injury and hopes for repair; degenerative brain disease; gender in brain structure and function; and mad cow disease. Students will also have the opportunity to consider ethical issues associated with the treatment of brain diseases (e.g. fetal nerve tissue transplantation in the treatment of degenerative brain disease) in the course of the lecture and laboratory sessions. Course dates: Winter session 18th - 22nd July.

GENM0210 Using the Media: Promotion Through Mass Media and Multi Media
School of Public Health and Community Medicine
UOC3 HPW2

This is an intensive course in the understanding of mass media and ways of dealing with it and using it to advantage. An introductory analysis of mass media is followed by instruction and training in preparation of material for dissemination in mass media. The course material is supplemented by lectures from outside experts who are engaged in media liaison in TV, print and radio on a regular basis. An optional segment deals with the use of the internet as a mass medium. Tutorials are led by students themselves. All participants are encouraged to express their thoughts and opinions about media and also to interact with other students, who are drawn from a wide variety of faculties in the University. Assessment is based on a journal and a media project which are handed in a month after the classes are complete.

GENM0212 (Mis)representation of Health
School of Public Health and Community Medicine
UOC3 HPW2

Students will examine how health issues pertaining to, for example, medicine, nursing, hospitals, the environment, death and dying, marriage and divorce, family planning, drug use, employment, housing, and other social issues, are represented in news items, documentaries, web sites, soaps and fiction films. Having critically appraised the prerogatives of the media, students will examine the institutional and discursive imperatives under which the media operate in its various forms (print and electronic, mass and new). Against this background we examine how these imperatives may lead a particular form of the media to down play complexity and over-simplify, trivialise, and or sensationalise issues to the detriment of informed public debate. The consequences of these limitations will be related to the ways in which we think about and debate health and illness in the public sphere. This subject will develop knowledge and skills in: explaining how health care is represented in news items, documentaries, web sites, films, soaps, dramas, with specific focus on their ‘politics of representation’; situating representations about health care in a historical and socio-cultural perspective; assessing how the prerogatives and established practices of the media institutions which produce the representations in question for the appearance of what is produced; addressing health care’s tragic choices and wicked problems and the moral, practical and political complexities which constitute them.

GENM0518 Health and Power in an Internet Age
School of Public Health and Community Medicine
UOC3 HPW2

Australia spends $60 billion a year on health care and its average health indicators are among the best of any country in the world. None the less, some Australians are much less healthy than others. In exploring the question of why this is so, the course examines concepts of power and wealth in society and how the distribution of power and wealth in society is reflected in the health of different social classes and ethnic groups. It also traces how modern understandings of health are moving towards a more wholistic model, the challenge of alternative models of health, how the internet is bringing about changes in power relationships in the health fields and explores controversies over childbirth.

GENM0701 Contemporary Bioethics
School of Public Health and Community Medicine
UOC3
Bioethics is the process of reflecting on health issues and moral implications, in individual and social contexts. The course concentrates on contemporary dilemmas which are common in health care. Consumer and professional perspectives on the dilemma are presented, and students are encouraged to use ethical frameworks as tools in the development of an argument. Topics for discussion include: the development of bioethics for health professions and consumers; health care information and privacy and confidentiality; safety and autonomy for patients and carers; resources and justice; life decisions; research and health care and advisory bodies.

GENR0007

Concepts of Physical Fitness and Health
School of Public Health and Community Medicine
UOC3 HPW2

The students will be exposed to theory and concepts relating to the development and maintenance of physical fitness and general health. Components will include aerobic fitness and conditioning, resistance training, flexibility training, and appropriate nutritional practices. Lifestyle management issues (exercise, smoking, obesity etc) will be discussed with benefits and consequences of those actions used to direct decision making. Popular misconceptions will be addressed during the course of the subject, with research findings used to dispel these myths.

GENR1000

Miracles and Misadventures of Modern Medicine
School of Medical Sciences
UOC3

Modern medicine has worked miracles, with the result of increased life expectancy for Western populations. This has been achieved by cures for previously fatal infectious diseases, early detection and treatment of cancer and coronary artery disease (our two greatest killers), improved understanding and treatment for chronic disorders such as arthritis and asthma, replacement of worn out parts (joints, heart valves) by prosthetic implants and screening for genetic disorders. This course will assume no knowledge of biology, and will introduce students to a selection of advances in modern medicine, and the scientific principles on which they are based. Students will also be encouraged to think critically about the pitfalls (and misadventures) of modern medicine, examples of which are based upon the work of the late Visiting Professor Peter Kollar.

GENR0003

Spirit, Myth and Sacredness in Architecture
Interior Architecture Program
UOC3 HPW2

The aim of the course is to investigate the sources from which architecture and design have extracted meaning throughout history. The specific focus of the lecture series will be the interrelationship between myth, religion, philosophy and architecture. Case studies demonstrating symbolic traditions will be drawn from both Eastern and Western design, including examples as diverse as the Greek Temple, the Jewish synagogue, the Christian church and the Chinese palace complex. The diversity of subjects and themes will highlight the complexity and sophistication characterising design traditions of the past, and reveal the intricate role architecture has played in the expression of a society's belief systems.

GENR0006

The City: Sydney
Landscape Architecture Program
UOC3 HPW2

The city is the habitat of modern society. While architects make substantial contributions to the form of the city, they have relatively little influence over the success or failure of cities. There are much stronger forces at work than architecture. Buildings make the best contribution to the human habitat when they support the patterns and systems of life in the city. By providing an introduction to those patterns and systems, this subject gives students a basis for making buildings work with the city rather than against; Sydney is used as the example. Each lecture is given by an authority in the topic.
This course is designed to introduce students to some of the key interpretive strategies used in art history and cultural studies over the last hundred years, with an emphasis on current lively debates. The lectures will explore and question some of the layers of interpretation of artists’ works from the time they were made to the present. European, north American and Australian art and design will be examined through various filters such as modernism, postmodernism, internationalism, nationalism, regionalism, gender and identity. In visual and cultural studies there is no single correct interpretation of a particular art work or movement. This course has been designed to enable you to become aware of the plurality of interpretations and to appreciate (if not always endorse or adopt) the arguments for contesting interpretations of objects and events.

GENR0021 Spectacles, Mardi Gras and Fascist Rallies: Use of Public Space
Architecture Program
UOC3 HPW2

This course examines the history of public spectacles from the Renaissance to the late twentieth century. It analyses these as designed events and as political manipulations of cultural memories associated with public spaces. Some examples include the entry of Henry V into Paris, Louis' XIV use of the Gardens of Versailles, the 'Hausmann-isation' of Paris as boulevards for military parades, the World Exposition of 1851 at the Crystal Palace, 'E42' the Fascist plan of a Roman suburb for a World Fair, Leni Reifenstahl's documentation of the 1936 Berlin Olympics and the Nuremberg rallies, Las Vegas as a continuous spectacle of consumer excess, and the Sydney Mardi Gras.

GENR0026 Gendered Spaces
Interior Architecture Program
UOC3 HPW2

This course will examine the paradigms of and connections between sexuality and constructed spaces. Issues of sexuality and place will be considered through literature, architecture and cinema with emphasis on the convergent discourses that are revealed across these disciplines. Excerpts from film, literature and architecture will be used as illustrations for investigation and discussion into the representation of gender and space. Issues regarding the female and space, architectures of masculinity and the androgyne will be considered along with the mechanisms with which architecture perpetuates the social order of gender. Classes will provide a platform from which students are encouraged in the advancement of active speculation and critical discourse of current social ideologies. Material is presented as seminars and tutorials. Assessment will be based on active contribution in discussion together with individual and group projects.

GENR0027 Photography, Society, and the Built Environment
Faculty of the Built Environment
UOC3 HPW3

This elective will give students an individual opportunity to use a camera as a visual research tool in the exploration of society and the built environment. The course involves theory and practice. A series of lectures covering different aspects of social documentary; a brief history of this genre, photojournalism, the photo-essay, street photography, oral history, the family album; and an introduction to some contemporary photographers detailing the urban environment through pattern or landscape. In photography there is an intimate link between the image and the original. Light acting on and transforming emulsion still seems magical, or thousands of pixels transferred digitally to catch a moment in time is extraordinary. ‘The ability to freeze frame movement in space, hold still light in time, document our communities today for tomorrow, record our visual reality is a powerful tool. With this power comes certain responsibility.

GENS0450 Measuring up the Universe
Faculty of Science
UOC3 HPW2

Microscopes, telescopes, sextants, chronometers, computers, scales and the standard meter. Scientific instruments of the past influenced the evolution of all areas of science and many aspects of daily life. This course looks at topics ranging from Galileo’s telescope to the development of barometers. Lectures are supplemented by the examination of items in a historical collection in the Faculty of Science and by visits to museums. The course is ‘hands-on’ with short written assignments and frequent feed-back in place of exams. Students will learn techniques for studying the history of science and technology and their impact on cultural and economic development both internationally and in Australia.

GENS0501 The Marine Environment
School of Biological, Earth & Environ Sciences
UOC6 HPW4

Excluded: GEN$4625, MSCI2001, GENB5001 Not available to students in Science Programs

This course covers aspects of both the physical and biological environment of the sea and their inter-relationships. It depicts marine science as a body of knowledge and a process of continual enquiry and testing of ideas. It considers human impacts on the marine environments and how the principles and methods of science in general are used to predict and to solve the problems created by human activities. This course includes discussion of: i) the marine environment, its physical, geological, chemical and biological characteristics and their interactions; ii) the sea as a source of human food. Attention is given to aspects of marine productivity, fisheries and mariculture and how science can assist in management for a sustainable yield; and iii) the effects of development, especially industrial development on the marine environment and how science can contribute to providing solutions to these problems created by development. Throughout the course emphasis is placed on case studies. Field excursions are used to supplement the lectures and to encourage further discussion of the problems created by human interference in the environment and their possible solutions.

GENS1004 Science and the Cinema
School of Chemistry
UOC3

Imagine Keanu Reeves, Uma Thurman, Elizabeth Shue or Lisa Simpson as scientists. Well Hollywood has in a series of movies which use real scientific concepts as an integral part of the plot. Often the script writers stretch these concepts beyond the realms of reality to make the movies even more exciting. In this general education course you will view at least six movies which deal with a range of scientific issues (and we don't just mean science fiction here!). You will be given some lectures of the basics of the science involved in a given movie, discuss how faithfully the movies portray the science and look at some of the social and ethical issues related to the science that are explored in the films. There will be an opportunity to debate scientific and ethical issues raised by the movies. Not only that but you will get to meet some of the movies stars currently masquerading as chemists in the School of Chemistry. Movies you will see include Gattaca (starring Ethan Hawke, Jude Law and Uma Thurman), The Saint (with Val Kilmer and Elizabeth Shue), Chain Reaction (Keanu Reeves and Rachel Weisz), Jurassic Park (Sam Neill, Jeff Goldblum and Laura Dern), and an old classic Man in a White Suit (starring Sir Alec Guinness) and more. So come along, see some movies and you might learn some basic stuff about how to make your own genetically modified organism, alternative sources of energy and how science could save the world if only the world wanted saving.

GENS2002 Mathematics in Art and Architecture
School of Mathematics
UOC3 HPW2

There will be alternating Art and Architecture lectures/tutorials and Mathematics lectures/tutorials. The Art and Architecture lectures will present the appearance and/or major influence of mathematical concepts in art and architecture, and the following mathematics lectures will illuminate these concepts. The mathematical content will be: Surfaces, Platonic solids, conics, rotational, developable and minimal surfaces, topology: Symmetry, space filling; projective geometry, perspective; ratios, proportions, spirals; fractals, chaos theory; the computer in art. The mathematics tutorials will discuss problems and exercises in the conventional manner, while the art and architecture tutorials will involve students in discussion of visual material. If possible, there will be visits to museums and galleries.
GENS2005
History of Mathematics
School of Mathematics
UOC3 HPW2
Prerequisite/s: Any Level 1 Mathematics course or ECON1202 or ECON1203;
Excluded: MATH3560.

Classification of mathematics, ancient and modern; Counting, navigation
and measurement in pre-literate societies; Babylonian mathematics on
calculating lengths and areas; The ‘Greek miracle’: round earth, logic,
Pythagoras: ‘All is number’; Hippocrates of Chios on areas of lunes;
proof; Euclid on axioms, on idea of deductive structure; Ptolemy’s
geocentric astronomy; Ancient Chinese simultaneous linear equations;
16th C solution of cubic equations; Copernicus’ heliocentric astronomy;
17th C mathematical laws: Galileo, Kepler, Snell, Hooke, Boyle;
development of calculus: Topology: Euler on the bridges of Konigsberg;
Statistical inference, ‘average man’, Galton and correlation; Abstract set
theory; Formal (symbolic) logic in 19-20th C, and its role in computing
software; Operations research, e.g., stock-cutting and hunting
submarines; Chaos, fractals and self-organisation; Social context of
mathematics.

GENS3501
Metals, Ceramics, Plastics - Building the Twenty First Century
School of Materials Science and Engineering
UOC3 HPW2
This course is designed to introduce students with a non-technical
background to the science of advanced materials, with particular
emphasis on how they function and where they are used. The following
topics are included: Surfaces are not superficial. Zeolites: crystals with
Conductors and superconductors. Polymers: how to make them and what
Making metals strong: the tricks of the blacksmith exposed. Why steel
rusts but gold does not. Solar cells, lasers and transistors: how they work.
Composites: making plastics strong. Ceramics from earthenware to
space. Smart materials. Consideration of these materials includes
examination of how they have impacted on and contributed to society
over the last 100 years, and how they may help shape social and
technological development in the future.
Note/s: 28 hrs/week lecture/tutorials. Offered over 5 days on a full-time
basis in the summer recess 14-18 February. Includes field trip to
Powerhouse museum.

GENS4001
Astronomy
School of Physics
UOC3 HPW2
Excluded: PHYS3160, PHYS3160

The course provides a general overview of astronomy, issues important
to this area of science and its role in understanding our place in the
cosmos. The following areas will be covered: the solar system and its
exploration; stars and their life histories; extragalactic astronomy. Two
night time observing sessions are included in the full-session courses, to
introduce students to the techniques of astronomical observation and
measurement.

GENS4003
Cosmology
School of Physics
UOC3 HPW2
Excluded: PHYS2160, PHYS3160

The course examines the development of cosmology from early times to
the present day, its influence on scientific thinking, and how advances
in science and technology have furthered its understanding. The issues
confronting cosmology as a modern science are also explored.
aid to stimulate student interest and as a starting point from which to communicate the science, and its likely future development. This course also examines the interaction between science and society, encouraging students to consider how culture influences science and vice versa. The areas covered are: the physics of space and time; astronomy; space travel and exploration; astrobiology: life in the Universe; computers and robotics, artificial intelligence & human intelligence; the future of the human race.

GENS5001 Flight and Civilisation
Department of Aviation
UOC3 HPW2
Excluded: GEN54625, MSCI2001, GENB8001
Not available to students in Science Programs

Aviation has had a tremendous influence on the development of the world in the Twentieth Century. It has significantly reduced transport times and opened new markets for both business and pleasure. The course explores the development of aviation from the first flight up to the present day and into the future. It considers the many components of the industry ranging from the principles of flight, aerodynamics and design to the importance of flight safety and air traffic control. The importance of aviation as a means of transportation, communication and employment are examined from technological, economic, social and environmental perspectives. A field excursion is used to supplement the lectures by examining aircraft at an operating airport and in the Department of Aviation flight simulator at Bankstown.

GENS6011 The Consumers guide to DNA
School of Biotechnology and Biomolecular Sciences
UOC3 HPW2
Excluded: BIOC2201, BIOC2291, GENB1011

DNA is the genetic information store of almost all organisms. Rapid advances in DNA technology have led to the discovery of new genes, the deliberate transfer of DNA between different organisms, the cloning of whole animals, genetic engineering of new species and the creation of new pharmaceuticals. Many of the fruits of these developments are now or will soon be available to the general public. Medicine is coming to rely more on DNA analysis for genetic testing and gene therapy. Techniques of DNA manipulation have led to a better understanding of diseases like AIDS and cancer. The Human Genome Project has yielded a new view of human biology. The social, ethical and legal ramifications of these technologies are immense - we will all need to make informed decisions about these issues. This course will explore DNA-based technologies and their products with the aim of creating a deeper understanding of their implications for individuals and society.

GENS6012 Diet-Food,Fact,Fiction&Fallacy
School of Biotechnology and Biomolecular Sciences
UOC3
Excluded: BIOC1319, BIOC1320, BIOC2101, BIOC2181, BIOC2312, BIOC2372, GENB1002, BIOC1221, BIOD1319, BIOD1320

This course aims to consider the human diet and to discuss popular opinions and misconceptions about diet, and why many of these are scientifically incorrect. The course will summarise how fat, carbohydrate and protein provide metabolic energy and how metabolic fuels are stored in the body. This information provides the basis for discussing how the body adapts to starvation, how the body's fuels are used during exercise and whether 'diets' are useful for losing weight. The function of vitamins and micronutrients are described and megadoses of vitamins discussed scientifically incorrect. The course will summarise how fat, carbohydrate and protein provide metabolic energy and how metabolic fuels are stored in the body. This information provides the basis for discussing how the body adapts to starvation, how the body's fuels are used during exercise and whether 'diets' are useful for losing weight. The function of vitamins and micronutrients are described and megadoses of vitamins discussed scientifically incorrect. The course will summarise how fat, carbohydrate and protein provide metabolic energy and how metabolic fuels are stored in the body. This information provides the basis for discussing how the body adapts to starvation, how the body's fuels are used during exercise and whether 'diets' are useful for losing weight. The function of vitamins and micronutrients are described and megadoses of vitamins discussed scientifically incorrect. The course will summarise how fat, carbohydrate and protein provide metabolic energy and how metabolic fuels are stored in the body. This information provides the basis for discussing how the body adapts to starvation, how the body's fuels are used during exercise and whether 'diets' are useful for losing weight. The function of vitamins and micronutrients are described and megadoses of vitamins discussed.
GENS6071
Technological, Social and Business Aspects of Alcohol
School of Biotechnology and Biomolecular Sciences
UOC3
Excluded: GENB7001
Consumption of alcoholic beverages has been part of human activity for thousands of years. This course aims to look at various aspects of these products, including an historical and current perspective. The science, technology and commercial aspects of the manufacture of beer, wine and spirits will be emphasised. The quality attributes of flavour, aroma and appearance of alcoholic beverages will be investigated. The impacts of alcohol on human health and society will be considered. The course involves some practical work. A number of lecturers from industry and affiliated research centres contribute to this course.

Note/s: Four full days of lectures/practicals in Summer Session (X1).
Note: Final assessment marks won't be available until May. Students wishing to do a summer session course to graduate in April or May, please do not enrol in this course.

GENS7201
Australian Wildlife Biology
School of Biological, Earth & Environ Sciences
UOC6 HPW3
Not available to students enrolled in Science Programs
The conservation of natural ecosystems is a topic of immense social significance. This is particularly true in Australia, since not only our animals and plants are unique, having evolved for millions of years in isolation from life on other continents, but our ecosystems are considered some of the most fragile on earth. In this course the broad spectrum of the Australian flora and fauna is explored via lectures and hands-on experience in practical classes and a weekend excursion. As well as providing a basic grounding in Australian biodiversity, the factors that have shaped it are examined, as well as the challenges faced in its future survival. The influence of people, both indigenous and newly-arrived, is also considered, especially in regard to conservation problems that are of current interest either because of their inherent ecological significance or because they exist within a complex social framework. The knowledge gained in this course will help you to make intelligent and useful contributions to the discussion of a wide range of ecological issues.

GENS7601
Earth - the Dynamic Planet
School of Biological, Earth & Environ Sciences
UOC3 HPW2
Excluded: GEOL1111/GEOS1111, GEOL1211/GEOS1211
An exploration of the myth of a ‘solid Earth’. With satellite imagery as a tool an examination is made of how the Earth is so different from the other members of the solar system. The fundamental driving forces operating, both within and outside the Earth, are considered in view of their role in the movement of continents, construction of mountain ranges, formation of ocean basins, generation of volcanoes, and circulation within the atmosphere and oceans. A view is given of our relationship with the Earth, including the exploitation of mineral and fuel resources, human-induced hazards such as the greenhouse-effect and the hole in the ozone layer, and the natural hazards that humans have no control over, including ice ages, volcanoes, earthquakes, landslides and tsunamis.

GENS7602
Viewing the Earth Through a Geological Window
School of Biological, Earth & Environ Sciences
UOC3
Excluded: GEOL1111/GEOS1111, GEOL1211/GEOS1211.
The plate tectonics model. An introduction to resources and the geological processes that control their formation. Application of satellite and airborne imagery in viewing the Earth’s surface, environmental assessments and resource discovery. Tutorial sessions on methods of processing satellite imagery and maps. Field excursions examining the influence of geology on landscape and land use. Visit historical mine workings. Four-day short course delivered during July break.

GENS7604
Energy Resources for the 21st Century
School of Biological, Earth & Environ Sciences
UOC3
Excluded: GEOL1111/GEOS1111
This course explores the relative roles of coal, uranium, oil and natural gas as our main energy sources, including current usage patterns and projection of energy needs and resources in the 21st Century. It also covers: a brief history of the international coal, oil and natural gas industries and the organisations involved in their development; the distribution of coal, oil and gas resources in Australia and world-wide, together with their economic, environmental and political significance; alternative sources of energy and improved ways of using conventional energy sources. Four-day short course delivered during July break.

GENS8001
Risk Perception and Reality
School of Safety Science
UOC3 HPW2
Decisions which affect businesses and the community are often made with a very uncertain knowledge of the future. Decisions are made (or often not made) based on distorted perceptions of risks. This course looks at objective and subjective views of risks that are important to business, the environment, the community and the wider social context. The Australian standard on Risk Management will be reviewed and applied to a number of areas selected by students. The class will consider case studies of major natural and man made disasters and personal risks and discuss how the risks could have been better managed and how they relate to emergency and contingency planning.

Note/s: Short course mode only (compulsory 3 day workshop plus assessable tasks completed subsequently).

GENS8002
Sports Performance and Injury Prevention
School of Safety Science
UOC3 HPW2
This course is an introduction to the study of human movement with a focus on sports performance and injury prevention. Lectures will provide the student with a back-ground in anatomy, fundamentals of biomechanics and exercise physiology. Laboratory participation will provide practical experience in methods of performances analysis. There are no mandatory pre-requisites, but a background in science would be helpful to the student.

Note/s: Assignment and laboratory participation.

GENS8003
Work and Safety
School of Safety Science
UOC3
Workplace injuries and deaths are a great financial and social burden. Work and Safety is a course that explores the interactions between humans, work and safety and the concept of ‘duty of care’. It concentrates on identification of workplace hazards, their associated risks to health and how they can be controlled. This is a practical course with that value for future employment as it equips students with fundamental principles of work and safety awareness. It provides tools for students to discharge their legal and social obligations in Occupational Health and Safety. This course is offered by either class attendance or web mode see www.safesci.unsw.edu.au/ge. Students in their final years at University are preferred.

Note/s: Also offered by web delivery in XS 1 X2 S2.

GENS8004
Ergonomics, Productivity and Safety
School of Safety Science
UOC3
Ergonomics, Productivity and Safety is designed to provide students with the basic concepts and principles of ergonomics/ human factors design so that they are able to understand the problems of human-technology interface in the workplaces. The course discusses the role of ergonomics with reference to the social context, especially in enhancing productivity and safety in the workplaces. It emphasises the social role of ergonomics in creating jobs and workplaces that increase workers safety and satisfaction. The course will discuss topics such as origins and development of ergonomics, fundamentals of ergonomics, socially centered design, human error reduction and safety, environmental ergonomics, human performance analysis, ergonomics and industrial productivity, macro-ergonomics, cost-benefits analysis, ergonomics,
OH&S Law, work stress, etc. Case studies from manufacturing, construction, service and other industries will be used to demonstrate the role of ergonomics in improving workplace productivity and safety. The course is available by web mode in all sessions. See www.safesci.unsw.edu.au/ge/

Note/s: Also offered by web delivery in XA S1 X2 S2.

GENS8005
Environmental Management in the Workplace
School of Safety Science
UOC3

Environmental problems are seen by society as a failure of technology and industry to play their part in prevention. Environmental Management in the Workplace explores the full range of environmental problems that occur in industry. Students will develop skills to examine, as well as, to play an active role in solving these problems. Students will gain an appreciation of environmental laws that affect business operations, the concept of ‘due diligence’, the development of environmental management systems and fundamental principles of best practice and of meeting new and changing social expectations in managing environmental problems. The course is available by web mode in all sessions. See www.safesci.unsw.edu.au/ge/

Note/s: Also offered by web delivery in XA S1 X2 S2.

GENS9001
Psychology of the Individual and the Group
School of Psychology
UOC6 HPW4
Excluded: GENB4001, PSYC1001
Not available to students enrolled in Science Programs

After a brief historical introduction this course will examine the development of humans into distinct individuals who nevertheless function in a social environment. There will be emphasis on the cognitive and social development of the individual through childhood and the development of individual differences in the areas of abilities, personality, attitudes and values will be stressed. Finally, the nature and measurement of the social influences on our behaviour will be considered.

GENS9001
Psychology of the Individual and the Group
School of Psychology
UOC6 HPW4
Excluded: GENB4001, GENS9001

After a brief historical introduction this course will examine the development of humans into distinct individuals who nevertheless function in a social environment. There will be emphasis on the cognitive and social development of the individual through childhood and the development of individual differences in the areas of abilities, personality, attitudes and values will be stressed. Finally, the nature and measurement of the social influences on our behaviour will be considered.

GENS9002
Psychology of the Body and the Mind
School of Psychology
UOC6 HPW4
Excluded: GENB4002, PSYC1011
Not available to students enrolled in Science Programs

This course will begin with an introduction to the physiological basis of behaviour. The biological approach will continue through consideration of basic questions in perception, conditioning and learning, and motivation and emotion. These will lead to a discussion of abnormal behaviour and of the question of what it is that makes us uniquely human.

GENS9005
Psychology of Work
School of Psychology
UOC3 HPW2
Excluded: GENB4005, PSYC2001, PSYC3526

How does the psychologist approach the world of work? This course will involve an examination of the aims, methods and ethics of industrial and organisational psychology. How are the tools of this area used to further the aims of organisations in areas such as personnel selection, training, job analysis and design? What is the relation between job satisfaction and job performance?

GENS9007
The Psychobiology of Sex, Love and Attraction
School of Psychology
UOC3 HPW2
Excluded: GENB4007, PSYC2001

This course is an introduction to the study of sex, love and attraction in humans and other animals. Although a broad-based perspective is taken throughout the course (using comparative, historical and cross-cultural approaches), evolutionary interpretations are emphasised. The goal of the class is to increase our understanding of the powerful influences sex, love and attraction have on our, and on other animals’ lives.

GENS9008
Stereotyping and Prejudice
School of Psychology
UOC3 HPW2
Excluded: GENB4008, PSYC2001

This course is an introduction to the psychological study of stereotyping and prejudice. The course will consider how stereotypes develop, how they are applied to others and with what consequences, and how they change. The course will also examine the roots of prejudice, and will consider the broad spectrum of what it means to be prejudiced, from unconscious forms to modern day hate groups.

GENT0201
Communication Skills
School of English
UOC3 HPW2
Excluded: ENGL1004, ENGL2503, ENGL3502 and GENL2220

Examines the factors involved in any communicative event and develops practical skills in effective oral and written communication. Aspects covered include: theoretical models of communication, interpersonal skills, issues of gender and cultural difference, power and solidarity, resolving conflict, oral presentations, writing effectively in a variety of contexts, visual aspects of communication.

GENT0206
Australian Popular Music in the Twentieth Century
School of English
UOC3 HPW2
Excluded: ENGL2700, ENGL2751, ENGL2703

Introduces students to major developments in Australian popular music, taking as the starting point the arrival and spread of its major medium, the sound recording. By looking at a succession of specific case studies, from silent film to Yothu Yindi clips, it considers the way in which the history of our popular music in the twentieth century has intersected with developments in technology, including the microphone, radio, film, television and the video clip. It also enquires into how our popular music has registered cultural shifts including feminism, a reorientation from the UK to the US, and more recently the rise of indigenous and multicultural issues. The approach is cultural rather than musicological, and no formal knowledge of music is required.

GENT0209
Great Books
School of English
UOC3 HPW2
Excluded: All ENGL courses

Introduces students to a number of texts that have been designated as ‘great books’ - either because over time they have achieved the status of classics, or because they have won major literary prizes in our own time. Students will read the set books and try to decide what it is that makes a book ‘great’. There will also be some discussion of the social, pedagogical and economic mechanisms at work in the making of literary reputations.

GENT0211
Seeing Australia
School of English
UOC3 HPW2
Excluded: ENGL1008.
Taught completely in on-line mode. Explores the ways in which Australia has historically been depicted and understood. Investigates how Australia has come to exist in the consciousness of its own and other people: rather than a story of the nation moving forward from the moment of colonisation, Australia is seen as the subject of many culturally disparate ‘ways of seeing’. The concept of ‘seeing’ itself is analysed in this process. ‘Seeing’ stands for many different ways of knowing and representing and these will be explored in a range of texts: written texts in poetic, narrative and dramatic form; popular culture texts such as advertising; visual texts, including painting, photography and films.

GENT0312
Dressed to Kill: Dress and Identity in History
School of History
UOC3 HPW2

Focuses on the many meanings of dress from daily attire, national dress, and religious costume, to high fashion across a wide gamut of cultures. Specific topics include gender and identity, dress and citizenship, inventing national dress, mass manufacturing, uniforms, haute couture, and issues of tradition and modernity as shown through the human body. The relationships between coecalment and etiquette, cloth, holiness and magic, dress and undress, and the manipulation of costume for political agendas will also be explored. Case studies will be taken from world history particularly Europe and Asia from approximately the last four hundred years.

GENT0404
Gods, Heroines and Heroes in Greek Myth and Modern Culture
School of Modern Language Studies
UOC3 HPN2
Excluded: EURO2105

The Greek myths have had a profound and lasting influence on our culture. Partly because the way they comment on the human condition is very adaptable, they continue to be a major source of inspiration to contemporary artists, philosophers, writers and film-makers. An understanding of this influence greatly enhances our appreciation of modern culture. An introduction to the nature of myth, to the creation myths, the stories of the gods and their interaction with humans, and to some of the great cycles - Oedipus, Orpheus, the Trojan War. In order to provide a focus, the myths will be discussed in terms of stories of families and family groups. Reference will be made to contemporary works incorporating new versions of the stories, especially films.

GENT0405
An Introduction to “...Isms”: Ideas That Have Shaped Our World
School of Modern Language Studies
UOC3 HPW2

Introduces students to a number of major intellectual and political movements, focussing mainly on the twentieth-century. Such notions as Fascism, Marxism, Existentialism, Surrealism, Feminism and Postmodernism will be considered, with reference to key texts, in order to give students a general understanding of some of the major elements of these movements. Students will be provided with extensive bibliographic information to allow them to pursue any particular interest they may identify.

GENT0414
Korea at a Glance
Department of Japanese and Korean Studies
UOC3 HPN2
Excluded: KORE2500, KORE3900, GENC8002.

An introduction to Korean society, history, culture, politics and economy, with an emphasis on the relationship between the economic development and socio-cultural aspects. Topics include societal trends and social stratification, family life and the role of women, demographic change, education and schooling, historical impact, electoral politics and political corruption, interest-group representation, the role of the state, the role of media, economy, business and employment practices, industrial groupings, crime and underworld of Korea, and traditional and modern art forms.

GENT0420
Along the Silk Road: Conquerors, Traders and Explorers
Department of Chinese & Indonesian Studies
UOC3 HPW2
Excluded: CHIN2310

Introduces students to the many cultural influences, which contributed to the formation of the ancient world along the ‘Silk Road’. The ‘Silk Road’ has been the link between the great civilisations of Europe and Asia. Travelled by conquerors, missionaries, traders and explorers, the ‘Silk Road’ carried ideas, religion, arts, technologies, cuisines and diseases, as well as silk and trade goods of all descriptions.

GENT0421
Chinese Cinema
Department of Chinese & Indonesian Studies
UOC3 HPW2
Excluded: CHIN2302

Since the mid-1980s, films from China have received critical acclaim in many circles and substantial scholarly response, both from within and outside Chinese Studies. Analyses significant feature and documentary films from China, beginning with examples of the cinema of the 1930s and 1940s, and highlights from the cinema of the hard-line Communist period. Examines examples from the ideological thaw in the late 1970s, the New Wave films of the 1980s and several avant-garde films from the 1990s.

GENT0425
French Language for Beginners
Department of French
UOC6 HPW6
Excluded: FREN1001

Designed for students who have little or no knowledge of French. The most recent methods are used to give students a sound basis in spoken and written French. The course also includes an introduction to contemporary French culture, and a graded reading program.

Note/s: Comprises 5 hwp of scheduled classes plus 1 hwp language laboratory. This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

GENT0426
German Language for Beginners
Department of German & Russian Studies
UOC6 HPW6
Excluded: GER51400

An intensive practical language course which provides students who have no previous knowledge of German with basic culturally appropriate communicative skills in spoken and written German.

Note/s: This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

GENT0427
Greek Language for Beginners
Modern Greek Studies
UOC6 HPW6
Excluded: GREK1001

Aims to enable students to communicate in a Greek-speaking environment, to discuss everyday topics, to write a simple composition and read a short story using a dictionary.

Note/s: This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

GENT0428
Indonesian Language for Beginners
Department of Chinese & Indonesian Studies
UOC6 HPW6
Excluded: IND01001

An integrated program for beginners, which combines listening, speaking, reading and writing. Speaking and listening skills are emphasised through communicative activities in class. Students will learn some 750 vocabulary items, and will be able to communicate in practical situations across a wide range of topics.

Note/s: Excluded 2 or 3 Unit HSC Indonesian or equivalent or native speakers of Indonesian and Malay. This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

GENT0429
Italian Language for Beginners
School of Modern Language Studies
UOC6 HPW6
Excluded: ITAL1001
Introduces the main structures of Italian language and provides an overview of contemporary Italian history and society. The language component develops all four language skills, with a particular focus on the development of grammatical accuracy. The cultural component consists of a series of lectures which offer insights into some of the salient issues of Italian history from Unification to the present. 

**Note(s):** Students who have taken HSC Italian or equivalent courses are excluded from this course. This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

**GENT0430**
**Japanese Language for Beginners**
Department of Japanese and Korean Studies
UOC6 HPW6
Excluded: JAPN1000

Introduces some of the basics of modern Japanese through listening, speaking and reading activities. Covers five broad themes including introducing oneself, talking about university experiences, housing, Japanese geography, and daily routines. Hiragana and katakana are also introduced. Communicating in socio-culturally appropriate ways are stressed.

**Note(s):** This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

**GENT0431**
**Korean Language for Beginners**
Department of Japanese and Korean Studies
UOC6 HPW6
Excluded: KORE1000

Designed to provide beginners with practical language skills for effective communication. Emphasis is on use of the language in basic survival situations. Communicative methods are used to develop in students the four language skills, listening, speaking, reading and writing, within a cultural context. The Korean script, Han-geul, is taught progressively. Communicating in socio-culturally appropriate ways are stressed.

**Note(s):** This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

**GENT0432**
**Latin Language for Beginners**
School of Modern Language Studies
UOC6 HPW6
Excluded: LATN1000

Provides an introduction to the basic forms of the Latin language and essential grammatical constructions. It will be of particular interest to those who want to acquire a knowledge of Latin to support study in other fields, such as language learning, linguistics, ancient history, medieval studies or law, as well as those with a primary interest in Roman literature. The classes will be devoted to practice in translating from English into Latin and from Latin into English, and will also introduce students to some simple examples of Latin literature.

**Note(s):** Excluded HSC Latin or equivalent. This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

**GENT0434**
**Russian Language for Beginners**
Department of German & Russian Studies
UOC6 HPW6
Excluded: RUSS1111

Designed for students who have little or no knowledge of Russian. The most recent methods are used to give students a sound basis in spoken and written Russian. The course also includes an introduction to contemporary Russian culture, and graded reading program.

**Note(s):** Comprises 5 hpw in scheduled classes plus 1 hpw language laboratory. This course is not available to students enrolled in Faculty of Arts and Social Sciences degree programs.

**GENT0435**
**Spanish Language for Beginners**
Department of Spanish and Latin American
UOC6 HPW6
Excluded: SPAN1000, SPAN1001, SPAN1020, SPAN1021, SPAN1100

For students who have little or no knowledge of Spanish. Intended to give students a sound basis of spoken and written Spanish and to introduce them to the history and culture of Spain and Latin America. Five hours language and one hour civilisation lecture.

**GENT0436**
**Chinese Language for Beginners A**
Department of Chinese & Indonesian Studies
UOC3 HPW2
Excluded: All CHIN courses

Introduces Chinese language and culture to beginners and background speakers without any knowledge of Chinese characters. Teaches Mandarin pronunciation through the pinyin script and basic knowledge of Chinese characters.

**GENT0437**
**Chinese Language for Beginners B**
Department of Chinese & Indonesian Studies
UOC3 HPW2
Excluded: All CHIN courses

Teaches Chinese language and culture to beginners and background speakers with a limited knowledge of Chinese characters. Teaches Mandarin pronunciation and basic skills in pinyin and character writing.

**GENT0501**
**Life-Giving Songs: Music in Australian Aboriginal Society**
School of Music and Music Education
UOC3 HPW2
Excluded: All MUSC and MUSI courses, AUST2026

The sonic resources, musical styles and social functions of traditional and popular Australian Aboriginal music; the distribution of musical styles in various parts of the continent; the relationship between music, dance and ceremonies, the anthropologically claimed links between music, social organisation and land occupancy, and the way these musical styles and their encoding of social and ritual structures are articulated in sound recordings and films.

**GENT0503**
**Jazz and Popular Music Studies**
School of Music and Music Education
UOC3 HPW2
Excluded: GENP0250, all MUSC and MUSI courses

Provides an opportunity for the formal study and discussion of personalities and elements that have shaped and enriched twentieth century jazz and selected popular musics (with emphasis given to the popular music of the non-western world). Through a chronological study of music trends, students become familiar with the significant innovations of each of the evolutionary stages of each genre. Through application of some of the methods of ethnomusicology and cultural studies, an understanding of the social ecology of each genre will be sought.

**GENT0504**
**Performance and Practice of Music A**
School of Music and Music Education
UOC3 HPW2
Excluded: All MUSC and MUSI courses

Designed to enable students to gain experience in performing music, thereby developing the technical, artistic and socially co-operative skills necessary to perform music as a member of a group. Students will have opportunities to specialise in either choral, wind ensemble, or orchestral performance. Knowledge of repertoire and of the principles of musical interpretation is developed. Content includes critical appraisal of music being studied and activities designed to extend and enrich students' understandings of different genres of music.
GENT0505
Performance and Practice of Music B
School of Music and Music Education
UOC3 HPW2
Excluded: All MUSC and MUSI courses

As for Performance and Practice of Music A, but with completely different repertoire.

GENT0506
Music Technology
School of Music and Music Education
UOC3 HPW2
Excluded: All MUSC and MUSI courses

Introduction to the theory and practice of digital sound recordings. Examines issues in psychoacoustics and music composition techniques, as well as developments in electronic and related technologies in making, storing, altering and reproducing music in electronic and digital forms. A variety of software will be examined. The practical, lab oriented, focus of the course consists of developing skills and understanding in digital audio and MIDI (Music Instrument Digital Interface) recording and sequencing. Course contents include a project where the student can learn how to create, edit produce and burn their own music CD.

GENT0604
Critical Thinking and Practical Reasoning
School of Philosophy
UOC3 HPW2
Excluded: All PHIL courses

In this course we investigate thinking, arguing and reasoning, and try to get better at them. Skills in these areas are like any other human skill in that, whatever our level of natural talent may be, developing it is a matter of practice and study. Lectures focus on the sorts of moves and techniques which get used in moral, political, social and academic arguments. We will learn how to understand them, evaluate them, and, where necessary, resist them.

GENT0606
The Use of Language, Images and Symbols
School of Philosophy
UOC3 HPW2

The leading question we consider: How do language, images and symbols function as a means of communication? Our central concern is with the basis of meaning and we study the way our use of words, symbols and images gives them the meanings they have for us. The conscious use of signs and symbols is compared with the role of symbols in the unconscious and their relation to metaphor and analogy. Our use of language, talking and writing, is often contrasted with real action. We nevertheless can do a lot using language. The following questions will be explored: How do we manage to say what we mean? What is involved in meaning what you say? How do we often succeed in communicating much more than our words mean?

GENT0707
Globalisation and the Nation State
School of Politics and International Relations
UOC3 HPW2
Excluded: All POLS courses.

An interdisciplinary introduction to ‘globalisation’ and the issues surrounding it. Concentrates on the question of whether or not globalisation is making, or will make, the nation state redundant. Attempts to answer this question by using theories and concepts from economics, history and politics.

GENT0803
Introduction to Mass Media
School of Media and Communications
UOC3 HPW2
Excluded: GEN54507, SOCA1005, all MDCM courses.

Provides students with an introduction to the issues that arise in the study of media. Structured around concepts, such as ideology, mediation, representation and identity, which are exemplified by looking at different media forms. Covers a range of media, from film and television to advertising, print news to the Web. Investigates the media as a cultural industry that does more than merely reflect or report on society. Looks at the complex and quite specific role that media plays in our understanding of society and ourselves.

Note/A: Offered by class attendance or in Web mode. Runs in weeks 1 to 7.

GENT0804
Internet and Cyberculture
School of Media and Communications
UOC3 HPW2
Excluded: All MDCM courses

Introduces critical perspectives on Internet histories, explores the conventions for production and use of online content and applications; examines the industrial and workplace implications of new technologies; and traces changes in political landscapes with new information infrastructures.

GENT0903
Environmental Conflicts
School of History and Philosophy of Science
UOC3 HPW2
Excluded: GEN5429, all HPSC courses, all SCTS courses

Explores the social, historical and political aspects of environmental conflicts and ‘sustainable development’. These can be understood through the history of environmentalism in the twentieth century, and the study of political and social controversies arising from the push for a ‘sustainable’ society. Implications at the local, national and international level are examined through specific areas of conflict, for example fossil fuels and the politics of energy, the politicisation of hazardous chemicals, sustainable urban design, and the politics of trees. Uses a ‘hands-on’ case study approach.

GENT0906
The Risks of Technology
School of History and Philosophy of Science
UOC3 HPW2
Excluded: All HPSC and SCTS courses

Analyses the social context for debates about the risks posed by modern technologies. Employs the methods of the social sciences to understand the social and political controversies which are frequently associated with industrial development. The history of environmental disputes demonstrates that technical solutions alone have not been successful in addressing the concerns of stakeholders, who bring their different cultural perspectives to bear on any controversy. Analyses the way such disputes unfold. Investigates questions of trust, credibility and fairness, the application of the precautionary principle, and the way decisions are made in the presence of scientific uncertainty and competing rationalities.

GENT0911
Maniacs, Murderers and Medical Detectives
School of History and Philosophy of Science
UOC3 HPW2
Excluded: All CRIM courses, SLSP2820

Examines the ways in which many people in the past “got away with murder” and in what ways the detection of crime and the subsequent conviction of criminals have been influenced by developments and discoveries in medical science. Explores these questions using an historical perspective to explain how the public understanding of science and medicine went hand in hand with increasingly sophisticated methods of murder, and hence increasingly efficient methods of scientific detection. Topics include: over-confident poisoners; weapons and wounds; craniometry and the “criminal type”; the 19th century “epidemic” of matrimonial murder; doctors as murderers; science in the courtroom.

GENT0913
From Hysteria to Cyberchondria: Health Scares Past and Present
School of History and Philosophy of Science
UOC3 HPW2
Excluded: GEN5429, all HPSC courses, all SCTS courses

For most of the populations of First World countries, living conditions are healthier and safer than ever before. Why then do we seem to be all too willing to believe that almost every aspect of everyday life is potentially threatening to our well being? By examining the paradox of
the “worried but well”, we shall explore the social dynamics of current health scares and ask how those which appeared (and just as rapidly disappeared) in the past can illuminate our situation today. Some of the topics examined will be: old and new plagues; syndromes and social problems; technophobia; smoking; diet and death.

GENT1202
Social Aspects of Deviance
School of Sociology and Anthropology
UOC3  HPW6
Excluded: SOCA2208 and SOCA3410.

Provides a broad overview of current theories of how deviance is maintained or controlled and provides a closer look at some selected aspects of deviance. The sociology of deviance studies the making and breaking of rules in society. Deviance includes both legally proscribed activities such as arson, vandalism, and assault; and socially sanctioned activities, states and phenomena such as rudeness, promiscuity, acne, obesity, stupidity, pollution and pornography. In a changing society, new forms of deviance may emerge (smoking, sexual harassment) and other activities gain social acceptance (e.g. higher education for women, ethnic diversity).

GENT1205
Experiencing the Pacific Islands Through Fieldwork
School of Sociology and Anthropology
Enrolment requires school approval
UOC6
Excluded: SOCA2204, SOCI3710, GENT1204

Provides training in and use of ethnographic fieldwork methods in the context of a Pacific Island country with an understanding of village life and how development organisations impact. Ethnography is a part of the methodology of both sociology and anthropology, as well as other social science research. Interview techniques and technologies, cultural mapping, methods of recording field data and participatory community development research are amongst the procedures to be explored. Field visits to regional, government and non-government organisations form a part of the research to understand how such institutions shape village life.

Note/s: Taught in November-December 2005. Students must contact Grant McCall g.mccall@unsw.edu.au prior to the commencement of Session 2.

GENT1206
Australian Feminist Issues
School of Sociology and Anthropology
UOC3  HPW2

Examines social implications of the role of law in defining the limits of gender and sexuality, regulating gender and sexual relationships, and in reinforcing particular gender and sex based interests. The intersection of criminality and sexuality demonstrates legal limits of public and private in intimate matters of identity, relationship, and pleasure. Provides an overview of major issues and theories, and may also deal with some specific examples such as pornography, rape, discrimination, AIDS transmission, moral danger, prostitution, abortion, and underage pregnancy.

GENT1207
Crime, Sex and Gender
School of Sociology and Anthropology
UOC3  HPW2
Excluded: SOCA3409, WOMS2007, WOMS3006

Examines social implications of the role of law in defining the limits of gender and sexuality, regulating gender and sexual relationships, and in reinforcing particular gender and sex based interests. The intersection of criminality and sexuality demonstrates legal limits of public and private in intimate matters of identity, relationship, and pleasure. Provides an overview of major issues and theories, and may also deal with some specific examples such as pornography, rape, discrimination, AIDS transmission, moral danger, prostitution, abortion, and underage pregnancy.

GENT1209
Migration and Australian Society
School of Sociology and Anthropology
UOC3  HPW6
Excluded: SOCA3407, SOCI3614, AUST2011.

Examines racial, ethnic and social issues surrounding migration to Australia. Topics may include an ecologically sustainable population; globalisation and international migration flows; brain drain to and from Australia; multiculturalism; criteria in determining migration policy; settlement issues; skilled migrants; refugees, international aid and social justice; identity, ethnicity and community.

GENT1301
Contemporary American Film
School of Theatre, Film and Dance
UOC3  HPW4
Excluded: All FILM, GEN55180, all THFI

From the late 1960s to the present day, America has produced powerful independent films that make up the New Hollywood. This course focuses critically on the diverse range of films, filmmakers and genres of contemporary American cinema from ‘Easy Rider’ to Tarantino. It takes an analytical approach to the study of the formal systems of narrative and filmic style.

GENT1302
Critical Approaches to Film
School of Theatre, Film and Dance
UOC3  HPW4
Excluded: All FILM, GEN55180, all THFI

Introduces students to filmic literacy, looking at the history, analysis and critical theory of the cinema. Shows how films are textual systems that can be ‘read’ in many different ways. Provides exercises in detailed analysis of and reference to a wide range of modern international films, and investigates issues of genre (westerns, action, horror, etc.) and questions of stardom and the screen presence of the actor.

GENT1304
Television and Video Culture
School of Theatre, Film and Dance
UOC3  HPW4
Excluded: GEN55180, all FILM courses, all THFI courses

Investigates the history and current state of the most pervasive media form of the modern world, and asks questions about its future influence and development. The material covered includes popular television series and serials, talk shows, television programming and the politics of the television industry.

GENT1401
Biopsychosocial Study of Humour
School of Social Work
UOC3  HPW2
Excluded: GENP0350

Examines humour from a biopsychosocial perspective. The large number of theories on humour from a variety of perspectives are considered, but the course focuses mainly on theories relating humour to health, well-being and coping. The increasing use of humour in health care and related contexts is critically examined. Students study the research literature on the putative effects of humour on physiological arousal, physiological functioning, immune function, depression, anxiety and coping under stress. In order to understand humour it is necessary to consider individual differences in terms of taste, sense of humour and ability to generate humour. These factors are also considered. Students are required to collect and present humour material, and discuss this in tutorials.

GENT1403
Global Crisis: Transition to a Sustainable Society
School of Social Work
UOC3  HPW2
Excluded: GEN54529

Examines the argument that our industrial-affluent society is not sustainable and that we must face up to fundamental change in coming
decades. The first half analyses major global problems such as the environment, resource depletion, Third World poverty and social breakdown, and explains these primarily in terms of the over-consumption by rich countries. Critical attention is given to the present economic system and to the values of consumer society. The second half presents a vision of a sustainable alternative society, based on more simple lifestyles and self-sufficient communities. There will be a short visit to an alternative lifestyle educational site 45 minutes from the city.

**GENT1501**
*Gifted and Talented Students: Recognition and Response*
School of Education  
UOC3  HPW2  
Excluded: EDST1205, EDST2050.

Explores the concept of giftedness, beginning with an analysis of its historical and cultural roots and leading through to a focus on different domains and levels of giftedness. Introduces some of the objective and subjective methods of assessing the abilities and achievements of gifted students. Examines cognitive and affective development of gifted students as well as empirical research on optimal contexts for learning for students of high intellectual potential.

**GENT1502**
*Student Learning Thinking and Problem Solving*
School of Education  
UOC3  HPW3  
Excluded: EDST1301, EDST2090.

Examines how we reason, think, and solve problems. How should we communicate with people to help them understand and learn? Answers are sought in the context of theories of mental processes.

**Note/s:** Runs for 9 weeks only

**GENT1503**
*Introduction to Educational Psychology*
School of Education  
UOC3  HPW3  
Excluded: EDST1101

An introduction to the study of Educational Psychology which examines some aspects of development and of learning and instruction. Topics include: cognitive development; development of memory; the role of knowledge; problem solving and thinking; an introduction to instructional methods.

**Note/s:** Runs for 9 weeks only

**GENT1506**
*Social Foundations of Education*
School of Education  
UOC3  HPW3  
Excluded: EDST1102

The philosophical examination of aspects of Australian education such as: the role of government and pressure groups in the determination of curriculum and the distribution of resources, educational testing and inequalities in educational achievement, differing accounts of inequality, affirmative action programmes and their putative justifications, the place of justice in the distribution of educational resources, and the justification of curriculum decisions.

**Note/s:** Runs for 9 weeks only

**GENT1507**
*Learning Process and Instructional Procedures*
School of Education  
UOC3  HPW3  
Excluded: EDST1201, EDST2010, EDST1103

Covers critical areas of classroom instruction and provides a solid grounding in the cognitive psychology of school subjects. Topics include cognitive processes involved in writing, reading, mathematics and science.

**Note/s:** Runs for 9 weeks only

**GENT1508**
*Managing Stress and Anxiety*
School of Education  
UOC3  HPW2  
Excluded: EDST1304, EDST2041.

Examines the concepts of emotion, stress and anxiety and their effects on physical and mental health. Discusses a range of physiological and psychological aspects, and the impact of the individual's state on performance outcomes. Includes possible stress management procedures.

**GENT1513**
*Culture, Identity & Education*
School of Education  
UOC3  HPW3  
Excluded: EDST1207, EDST2070.

Examines how the processes of schooling have interacted with issues of identity and diversity. Looks at the historical dynamics of migration and settlement and how their growth has affected the rhetoric of Australian nationalism. How have the issues of race and culture been addressed in our schools? Explores how multiculturalism has influenced educational perceptions at a policy level and examines the interpretations of that policy in the context of the public school classroom.

**Note/s:** Runs for 9 weeks only

**GENT1520**
*Motivation in Learning and Teaching*
School of Education  
UOC3  HPW3  
Excluded: EDST2044

Explores the relationship between power and knowledge in systems of education; its ideological processes and its historical and social context. Many theorists have articulated the role of ideology in schools, school administration and social culture. Studies how and why schools are considered political agents exploring the notions of empowerment, libertarian pedagogy, social and cultural reproduction, social control theory and the dynamics of public policy. Australia, in particular NSW, is used as a case study.

**Note/s:** Runs for 9 weeks only

**GENX0101**
*Indigenous Australia - Travelling Through Time*
Nura Gili (Indigenous Programs)  
UOC3  HPW2  

Examines the relationships of Aboriginal people to this place we now call Australia: Moves through the history of Indigenous Australians up until the 1960s. Designed to give a broad general knowledge and understanding of the diversity of Indigenous societies. The impact of colonisation on Aboriginal people and the effects of government policies will be a theme.

**GENX0102**
*Indigenous Australia - From the Present to the Future*
Nura Gili (Indigenous Programs)  
UOC3  HPW2  
Excluded: AUST2004, AUST2005

Focuses on the political and social issues that have impacted on Indigenous Australians. Government policies on citizens' rights, education, employment, health, housing, and connection to land have been central to the changing circumstances of Aboriginal and Torres Strait Islander peoples. These and other major issues from the 1960s to the present will be examined.

**GENX0103**
*Aboriginal Heritage: From Diggings to Display*
Nura Gili (Indigenous Programs)  
UOC3  HPW2

Focuses on the role of museums, art galleries and cultural centres in the display and representations of Indigenous peoples and their culture. A critical introduction to heritage of both pre-contact and contact Australia and its relationship to perpetuating myths through display are examined. Disciplines of anthropology, ethnography, archaeology, and museum curatorial studies are examined. Particular attention is given to material culture and the politics of display in museums and keeping places.

**Note/s:** Includes museum/gallery visits.
GENX0104
Aboriginal Popular Culture - We Hear the Songs, See the Dance and Live the Culture
Nura Gili (Indigenous Programs)
UOC3 HPW2
Examines the way in which Australia's popular culture is filled with representations and misrepresentations of Indigenous Australians. Focuses on the role of media, film, photography, newspapers, and other written texts in creating, replicating, reproducing and manufacturing stereotypes which represent and misrepresent Aboriginal identity and culture. Also covers the contemporary expressions of Aboriginal art, music and literature.

Note/s: Includes a half-day excursion to examine a number of forms of Aboriginal popular culture.

GENZ0202
Chemistry and Life
Physical, Environmental and Mathematical Sciences
UOC3 HPW2
Prerequisite/s: Enrolment in program 4400
How our knowledge of chemistry has developed and its applications to the life sciences. Risk benefit analysis and the various types of laws needed to govern the use of water, pharmaceuticals, fuels, and air purity. Trace-elements in the human body as well as their essentiality and toxicity; organic substances and life; general nutritional needs, including vitamins. The subject also touches diet, diabetes, cancer and coronary heart disease in relation to health and nutrition; food preservation, storage and transport for the Defence Force; forensic science and the justice system with particular emphasis on problems of interpretation.

GENZ0305
Chemistry and Biological Defence
University College
UOC3 HPW2
This course examines the issues of chemical and biological warfare. These include the modes of action and toxicity of chemical and biological weapons and measures for defence against them. It also examines issues relating to the international disarmament treaties banning such weapons such as the Chemical Weapons Convention of 1997 and the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction (BTWC) of 1972. The course includes the examination of case studies where important social and medical issues have arisen through the inappropriate control of chemical weapons.

GENZ2302
Mechanics of Flight 2
Physical, Environmental and Mathematical Sciences
UOC3 HPW2
Prerequisite/s: GENZ2501, enrolment in program 4400 or 4410
Basic flight theory. Steady level, climbing and gliding flight. Take-off and landing. Turning flight. Aircraft propulsion. Elements of stability and control.

GENZ4004
Australia and the Asia-Pacific Region
UC School of Humanities and Social Science
UOC3 HPW2
Prerequisite/s: Enrolment in program 4405 or 4410 or 4421 or 4422 or 4423 or 4424 or 4425 or 4430 or 4431 or 4432 or 4433 or 4435 or 4436 or 4437.
This course examines Australia's role in the Asia-Pacific region, with an emphasis on the challenges of the region's changing strategic realities. Australia's defence and foreign policy responses to major developments - the political instabilities in the region, the rise of China, and the changing strategic focus of the USA - will be explored. The course will examine the various options open to Australia in its attempts to become a more significant player in the region. It will look, in particular, at whether Australia must reassess its relationship with the USA in order to expand its regional role.

GENZ6004
Environmental Physics
Physical, Environmental and Mathematical Sciences
UOC3 HPW2
Prerequisite/s: Enrolment in program 4400
Many environmental problems cannot be appreciated properly without a reasonable knowledge of the basic physical principles underlying them. In this course we will look at the physics of global warming, depletion of the ozone layer, and the atmospheric dispersal of pollution and radioactive materials. We will also study aspects of the atmospheric environment affecting Australian Defence Force operations, such as visibility, turbulence, and marine and land microclimates.

GEOH1601
Australian and Global Geographies: Integration and Divergence
Built Environment Geography
UOC6 HPW4

GEOH2001
Field Research
Built Environment Geography
UOC6 HPW3
Excluded: GEOG2001
An introduction to field research in geography. Usually composed of a four day field trip in the mid-semester break. Field methods and skills in both physical and human geography. Workshops in report writing, critical analysis, and research practice.

GEOH2611
Geographies of the Asia-Pacific
Built Environment Geography
UOC6 HPW3
The Geographies of the Asia-Pacific introduces a region that is as diverse as it is vast. This course draws on geography's renewed interest in locality, or context specificity. These ‘new location studies’ are informed by the ‘cultural turn’ and link broader structures to processes in local settings. This course aims to encapsulate some of the shared histories, the various experiences of colonisations, and some of the more contemporary consequences, as well as provide details about the uniqueness of context, of places and peoples.

GEOH2641
Australian Urban Environments
Built Environment Geography
UOC6 HPW4
This course examines human environments in Australia. Theoretical frameworks include political ecology, economic and poststructuralist geography. The course begins by exploring ideologies of human-nature relations. Urban and natural landscapes, the built environment and planning principles are all considered as cultural constructions - as concepts linked to ideologies of human-nature relations. The course considers environmental impacts of urbanisation, population growth and economic production that stem from different articulations of human-nature relations, and discusses forms of resistance, theories of environmental justice and participatory decision-making that seek to transform human-nature relations. Practical classes include field exercises and introductory Geographical Informations Systems (GIS) workshops.

GEOH2801
Geographical Information Systems for Built Environment
Built Environment Geography
UOC6 HPW6
An introduction to Geographical Information Systems (GIS) and their applications in urban studies, planning, public management, public health, environment planning, and business contexts. A solid understanding of fundamental concepts, principles, and functions of.
GIS, and of types of spatial data, their entry, analysis and display into a GIS. Overview of technical and institutional issues in GIS development. Teaching will involve lectures and computer laboratories.

**GEOH3101**
**Advanced Geographic Data Analysis**
Built Environment Geography
UOC6  HPW4
Prerequisite/s: GEOG2101 or BIOS2041 or SLSP2001
Applications of multivariate techniques commonly used in geographical enquiry. Explorations of spatial analysis methods and advanced models in a GIS environment. The collection, assembly, analysis and presentation of quantitative and spatial data. Preparation for reading more advanced geographical and statistical literature.

**GEOH3111**
**Advanced Qualitative Method for Geography**
Built Environment Geography
UOC6  HPW4
Excluded: GEOG3161
Application of interview techniques. Construction of interview guides. Landscape interpretation. The collection, assembly, analysis (NVivo) and presentation of qualitative data.

**GEOH3621**
**Place, Identity and Difference**
Built Environment Geography
UOC6  HPW4
Excluded: GEOG3166
Issues of place, identity, territory and representation. Case studies cover a range of axes of difference including religion, race, gender, sexuality, nationalism and popular culture. Key theories of identity, Creative and official representations of places and of peoples. The deployment and representation of cultural difference.

**GEOH3641**
**Regional Australia: Geographies of uneven development**
Built Environment Geography
UOC6  HPW4
Key concepts and theories in regional economic geography. Theories of location and regional development, spatial interaction, uneven development, and structural change. Economic and regional problems in Australia. Field work, workshops and practical skills in regional and spatial analysis. This course is taught as a field school in winter session.

**GEOH3651**
**Geographies of international migration and settlement: remaking nations in the Pacific Rim**
Faculty of the Built Environment
UOC6  HPW4
An international and cross-institutional discussion of the theory and experience of international migration and settlement. Analyses of: immigration policies; international migration patterns; settlement policies; outcomes and experiences; international regimes regulating migration, and; changing global demographics. Case studies of Australia, Canada and Singapore. Mixed tutorial groups (with students from Singapore, Vancouver and Sydney).

**GEOH3661**
**Cities and Urbanism**
Built Environment Geography
UOC6  HPW4
Geographers, and others, are interested in urbanism: the ways we live in cities as individuals, and in groups. Cities and Urbanism provides an overview of urban theory, and in particular the concept of ‘urbanism’. It considers how urbanism is studied and theorised, over time and in different disciplines. During the quantitative revolution, the study of urbanism declined. It then re-emerged with the ‘cultural turn’ in human geography and other disciplines and now includes the benefits of, for example, a postcolonial perspective. This course is designed for human geographers, urban sociologists, urban/town planners, architects and anyone interested in theorisations of ‘the city’.

**GEOH3671**
**Transport, Land Use and Environment**
Built Environment Geography
UOC6  HPW4
Prerequisite/s: 6 units of credit of Level 1 Geography courses or PLAN1011; Excluded: GEOG2071, GEOG3181, AUST2031.
Introduction to the complex interactions between transport, land use, and the environment in urban areas. Special focus on the long term environmental consequences of transport decisions. Introduction to the various methods used to analyse and predict the consequences of policy changes. Australian cities as case studies.

**GEOH3911**
**Environmental Impact Assessment**
Built Environment Geography
UOC6  HPW4
Environmental Impact Assessment (EIA) is an important part of environmental decision making throughout the world. This course will provide students with an understanding of: the Commonwealth and NSW legislative framework for EIA; guidelines for EIA; ecologically sustainable development; impact evaluation in terms of environmental and socio-economic criteria; procedures, techniques and issues in EIA; and, future directions. Case studies of environmental impact statements (EIS) from the physical and human environment are used throughout the course. The course is valuable to students interested in environmental management.

**GEOH3921**
**Coastal Resource Management**
Built Environment Geography
UOC6  HPW4
This course focuses on coastal resource assessment and management. Topics include: Australian coastal zone policy, coastal erosion and conservation, soil and water acidification, global shrimp farming issues and management, oyster farming, causes of fish kills and fish disease outbreaks, estuary management, coastal water resource management, recreational and commercial fisheries, and coastal wetlands. The course considers Australian and global perspectives on current and emerging coastal resource management issues. Students will participate in group work to develop skills in resource management.

**GEOH4418**
**Honours Geography**
Built Environment Geography
Enrolment requires school approval
UOC24
A 24 UOC research project in physical geography to be completed within a single session.

**GEOH4871**
**Transport Applications of Geographical Information Systems**
Built Environment Geography
UOC6  HPW4
Prerequisite/s: GEOG3671.
Introduction to the concepts and applications of Transport Information Systems (Gis-T). Topics covered include network structures, data structures, transportation related referencing systems. Applications of urban transport planning models, vehicle routing and logistics. Location and allocation analysis.

**GEOL4131**
**Advanced Topics in Applied Geology - A**
School of Biological, Earth & Environ Sciences
UOC12  HPW8
Prerequisite/s: 24 units of credit of Level 3 Geology or Physical Geography Courses;
Excluded: GEOL4102.
Instruction by lectures, tutorials and assignments in advanced aspects of geological science and its applications. Students will individually select modules and subjects, which may include subjects drawn from outside
the School or Faculty, approved by the School. Modules will cover a number of specialised fields including mineral exploration, mine geology, sedimentary basin studies, geophysics, environmental geology, hydrogeology, data processing methods, as well as fundamental geology topics. Some modules may be delivered at other universities through the Sydney Universities Consortium of Geology and Geophysics.

Note/s: Some fieldwork may be involved; students may need to meet personal costs.

GEOL4141 Advanced Topics in Applied Geology - B
School of Biological, Earth & Environ Sciences
UOC6   HPW4
Prerequisites: 24 units of credit of Level 3 Geology or Physical Geography Courses;
Excluded: GEOL4102.

Instruction by lectures, tutorials and assignments in advanced aspects of geological science and its applications. Students will individually select modules and subjects, which may include subjects drawn from outside the School or Faculty, approved by the School. Modules will cover a number of specialised fields including mineral exploration, mine geology, sedimentary basin studies, geophysics, environmental geology, hydrogeology, data processing methods, as well as fundamental geology topics. Some modules may be delivered at other universities through the Sydney Universities Consortium of Geology and Geophysics.

Note/s: Some fieldwork may be involved; students may need to meet personal costs.

GEOL4203 Field Project (Part-Time)
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12   HPW10

A major field and laboratory project spread over two sessions for part-time study, which may include geological mapping and interpretation of other geological data (possibly including satellite imagery, geophysical datasets, or hydrogeological information). The project may involve aspects of resource development, engineering or environmental geology, regional geology and groundwater studies.

Note/s: Geological field work of up to six weeks duration may be required. Students may incur personal costs.

GEOL4204 Geology Honours Research Project
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC24   HPW18

A major field and laboratory project, which may include geological mapping, laboratory experimental work and processing of earth science data (possibly including satellite imagery, geophysical or geochemical datasets, or hydrogeological information). The project may involve aspects of resource development, engineering or environmental geology, regional geology and groundwater studies. The results of the project will be presented in the form of an Honours thesis. Projects may receive external support from companies or government agencies. Geological field work of up to six weeks duration may be required. Students may incur personal costs.

GEOL4205 Research Project Geology Honours 18UOC
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC18

An 18 UOC research project in Geology to be completed within a single session.

GEOL4206 Research Project Geology Honours 12UOC
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC12   HPW12

A 12 UOC research project in Geology to be completed within a single session.

GEOL4207 Research Project Geology Honours 6UOC
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6   HPW6

A 6 UOC research project in Geology to be completed within a single session.

GEOL5200 Geology for Mining Engineers
School of Biological, Earth & Environ Sciences
UOC6   HPW4

Basic principles of geology and its relevance to mining. Key mineral groups and common rock types. Geological mapping and structural analysis. Laboratories on identification of common minerals and rocks, interpretation of geological maps and structures.

Note/s: One day of field work is a compulsory part of this course. Details will be provided in the first week of the course.

GEOS1111 Fundamentals of Geology
School of Biological, Earth & Environ Sciences
UOC6   HPW4
Excluded: GEOL5200, GEN57601, GEN57602, GEN57604, GEOL1111

This course provides a sound basis in geology to those wishing to pursue professional careers as geologists, mining and petroleum engineers and environmental earth scientists. It will also be of interest to those who wish to understand more about the nature and origin of earth materials. The fundamental properties of minerals and rocks and the processes by which they form are described. Geological history and structure and consequences for the formation and preservation of mineral, coal and petroleum resources are considered. Methods for the analysis, description and definition of geological materials and resources are provided.

GEOS1211 Environmental Earth Science
School of Biological, Earth & Environ Sciences
UOC6   HPW4
Excluded: GEN57601, GEN57602, GEN57604, GEOL1211

This course takes a modern approach to studying the history of change on planet Earth. The origins of the continents, oceans, atmosphere and the planet itself are considered from a variety of perspectives. The beginnings of life and evolution of selected fauna and flora are investigated from genetic and fossil evidence. The relationships between Earth’s geological environments and their associated life forms are explored. The effects of change, both natural and induced by humans, on soil, water and the landscape are examined. The course is delivered by experts from across the range of earth and environmental sciences.

GEOS1701 Environmental Systems and Processes
School of Biological, Earth & Environ Sciences
UOC6   HPW5
Excluded: GEOG1701, GEOG1721, GEOG1031, GEOG1073, GEOG1711, GEOS1711

An introduction to the role of environmental processes in shaping the patterns of the physical environment and the operation of global environmental systems. Topics include earth, atmosphere and biosphere systems, weather and climate, water resources, soils and land degradation, fluvial and coastal processes and landforms, biodiversity and Australian biotic patterns. A major theme of the course involves the sustainable interaction of humans with their environment and the causes of environmental crises. Instruction is given on practical methods involved in applied geography and environmental sciences including mapping, analysis of aerial photographs, field techniques and remote sensing.

GEOS1711 Planet Earth (Physical Geography for Environmental Engineers)
School of Biological, Earth & Environ Sciences
UOC3
Excluded: GEOG1711, GEOG1701, GEOS1701
An introduction to the role of environmental processes in shaping the patterns of the physical environment and the operation of global environmental systems. Topics include earth, atmosphere and biosphere systems, weather and climate, water resources, soils and land degradation, fluvial and coastal processes and landforms, biodiversity and Australian biotic patterns. A major theme of the course involves the sustainable interaction of humans with their environment and the causes of environmental crises. Instruction is given on practical methods involved in applied geography and environmental sciences including mapping, analysis of aerial photography, field techniques and remote sensing.

GEOS1801 Environmental Earth Observation
School of Biological, Earth & Environ Sciences
UOC6 HPW5
Excluded: GEOG1801

This course is an introduction to the methods used to gather spatial information by remote sensing and how this can be used in mapping and displaying the observed geographical, geological and biological information gained. The course begins with coverage of the fundamentals of remote sensing including the theory of electromagnetic radiation, spectral properties of the natural and manufactured materials and airborne and satellite sensing systems. This is followed by consideration of the principles of photographic analysis and image interpretation, the fundamentals of cartographic models, GIS data handling, elementary spatial measurement, analysis of spatial arrangements, overlay and thematic mapping.

GEOS2071 Life through Time
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOL3121

The course offers an overview of life through time with a focus on Australian prehistory. The nature, functional morphology and evolutionary history of invertebrates, vertebrates and plants are presented in the context of Australia's evolving habitats and climates. Processes and places of fossilisation, evolution, time scales, approaches to assessing relationships and the plate tectonic history of the continent of Australia are important components of this overview of the history of Australia's unique biota. Practical work on the most important groups of fossils is an essential part of the course.

Notes: Up to 4 days of fieldwork at selected fossil sites will be part of the course and students will incur some personal costs.

GEOS2101 Sedimentary Environments
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Prerequisite(s): GEOL1111/ GEOS1111 or GEOL1211/GEOS1211 or GEOS170 or BIOS1101
Excluded: GEOL1210.

An introduction to the processes and products of sedimentation in natural environments, and their preservation in sedimentary rock sequences. Mechanisms of sediment transport and deposition; nature and origin of depositional structures. Analysis of depositional environments; fluvial, deltaic, marine lacustrine, glacial and volcanic sediments. Field and laboratory methods for study of sediments, sedimentary basins, facies successions and an introduction to sequence stratigraphy. The fieldwork component will cover modern and ancient sedimentary systems and fossils at various locations, including an introduction to field measurement techniques.

GEOS2171 Earth Structures
School of Biological, Earth & Environ Sciences
UOC6 HPW4

Most regions of the Earth's crust have been deformed over many millions of years, resulting in a complex three dimensional form. This course seeks to unravel this history through use of remotely sensed geophysical imagery and field mapping data. This course will demonstrate how large scale regional structures are inferred or measures from surface outcrop mapping.

GEOS2181 Earth Materials
School of Biological, Earth & Environ Sciences
UOC6 HPW4

An introduction to the nature and analysis of minerals, rocks and soils. Atomic structure, composition, properties and classification of minerals, with special reference to the rock-forming minerals and the clay minerals. Mineral analysis techniques including chemical methods and X-ray diffraction; application of isotope studies including an introduction to radiometric dating. Genesis, analysis and classification of igneous, metamorphic and sedimentary rock types; chemical weathering and rock formation. Optical properties of minerals and rocks under the polarising microscope.

GEOS2291 Ground and Surface Water
School of Biological, Earth & Environ Sciences
UOC6 HPW4

An introduction to the interaction between water and the surficial environment, and the nature of water resources in Australia. The hydrologic cycle, geological and geomorphological controls on water flow and accumulation. Groundwater chemistry, salinity and contamination; the nature, development and sustainability of Australian groundwater resources. The application of environmental geophysics and drilling methods in groundwater studies and mapping of contaminants, including downhole logging techniques, electrical and seismic methods.

GEOS2711 Australian Climate and Vegetation
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Prerequisite(s): GEOG1701 or GEOG1721 or GEOG1031 or GEOG1073 or GEOS1701;
Excluded: GEOG2025, GEOG3062, GEOG2711.

GEOS2721 Australian Surface Environments and Landforms
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Prerequisite(s): GEOG1701 or GEOG1721 or GEOG1711;
Excluded: GEOG2051, GEOG3011, GEOG3025, GEOG2721.

The study of surface processes and landforms; especially those formed by river systems and coastal environments. The nature of surface deposits, sediments and soils and the interrelationships with landforms in different environmental settings. An emphasis on contemporary processes and factors of landform creation, as well as changes to landforms and surface deposits over time and in response to human modification of the landscape. Field and laboratory based work will provide practical experience in physical landscape evaluation and land management techniques.

GEOS2811 Remote Sensing Applications and Digital Image Analysis
School of Biological, Earth & Environ Sciences
UOC6 HPW4

Computer based techniques for digital image display, analysis and interpretation including the acquisition and processing of optical, hyperspectral, thermal and radar remotely sensed imagery will be introduced. Laboratory work will use practical techniques including image enhancement, geometric correction, mapping. Classification and data interpretation will be developed with a focus on the use of earth-resource imagery for a wide range of environmental applications including geology, vegetation and forestry, agriculture, oceanographic and regional and urban analysis.

Assumed Knowledge: GEOG1801
GEOS2821
Geographic Information Systems and Science
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG2821, GEOG3122, GEOG3123, GEOG3142, GEOG3831

There has been a rapid growth in the use of digital spatial data in many areas of resource management and the environmental sciences. The aim of this course is to provide both a solid theoretical understanding and a comprehensive practical introduction to the use of geographic information systems and science in the analysis of digital spatial data, simple modelling using digital spatial data, and in decision support using commercially available software. Topics covered in the course provide a comprehensive overview of the analytical treatment of digital geographic information including: sources; storage, representation and visualisation; analysis to generate new information and knowledge; and their dissemination through avenues such as the internet.

GEOS3313
Field Methods and Mapping
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG3313

This course provides opportunity to undertake an extended field mapping exercise in a selected area of the state. This course will cover practical geological mapping techniques, general field skills, and the integration of stratigraphic, lithological, structural and palaeontological concepts. Use of remote sensed and geophysical imagery of the area to be mapped will be included. This course may be run in conjunction with other universities.

GEOS3141
Mineral and Energy Resources
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG3411, GEOL3101, GEOL3500, GEOL3201, GEN57604

The course provides an introduction to the nature and formation of mineral and energy resources. It is designed for those students wishing to work in the future as professional geologists, resource engineers and in other fields of geosciences. It covers: the geological setting, characteristics and genesis of major categories of metallic resources, the nature and origin of coal-bearing sequences and the generation, migration, entrapment and degradation of petroleum. Laboratory study of hand specimens, thin and polished sections is undertaken. Exploration and development methods are described.

GEOS3251
Field Studies: Geological Terrains
School of Biological, Earth & Environ Sciences
Enrolment requires school approval
UOC6 HPW5

Examination of geological features of selected geological terrains. Course will involve a series of preliminary readings and tutorials, an extended field excursion incorporating geological mapping and terrain evaluation, as well as a major field report. Course may be delivered in cooperation with other universities, government agencies or companies.

GEOS3281
Environmental and Contaminant Geochemistry
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG3281

This course examines the characteristics, source and fate of metals and organic contaminants in natural and urban environments. Primary and secondary dispersion of elements and weather processes. Principles of vapour, water, soil, drainage sediments, rocks and vegetation geochemistry as applied to environmental assessments; aqueous geochemistry and contaminant modelling, with reference to Australian case studies. Introduction to sampling, analytical techniques and design of environmental surveys.

GEOS3300
Mine Geology
School of Biological, Earth & Environ Sciences
UOC3 HPW4
Excluded: GEOG3314, GEOL3500, GEN57601, GEN57602

Taught in Weeks 1 - 10, this course provides an introduction to the nature and formation of mineral deposits and coal resources. It covers the geological setting, characteristics and genesis of major categories of metallic and non-metallic mineral resources, the nature and origin of coal-bearing sequences and the relevance of geological factors to their extraction and use. There is an introduction to stereographic projection analysis in understanding slope stability. This course includes a laboratory study of hand specimens. Exploration and resource assessment methods are also described.

GEOS3321
Fundamentals of Petroleum Geology
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOL1111/GEOG1111, GEN57601, GEN57602

Introduction to the earth sciences; nature and properties of rocks and minerals; sedimentation and sedimentary environments; stratigraphy and the geological time scale; geological maps and structures; introduction to plate tectonics. Nature and geological properties of petroleum; petroleum generation, migration, entrapment and degradation; sedimentology of petroleum-bearing sequences; primary and secondary porosity; structural and stratigraphic traps; formation waters; coal-bed methane, oil shale and other non-conventional petroleum sources; geological and geophysical methods in petroleum exploration and development; regional geology of selected petroleum basins.

GEOS3331
Petroleum Reservoir Geophysics
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOL5332

The applications of geophysics in 3D mapping of geological structures. Interpretation of 2D and 3D seismic reflection data, including horizontal and vertical slices, presentation parameters, horizon autotracking, fault mapping, stratigraphic and structural interpretation, reservoir evaluation. Inversion of seismic reflection data to determine petrophysical properties. Analysis of direct hydrocarbon indicators.

GEOS3341
Special Topics in Petroleum Geoscience
School of Biological, Earth & Environ Sciences
UOC3 HPW3

Instruction by lectures, tutorials and assignments in aspects of geoscience and their application to the petroleum industry. Individual students will select modules, covering topics such as sedimentary rocks and clay minerals, groundwater hydrology, geophysics, coastal monitoring and environmental assessment, complemented by a relevant project task.

GEOS3711
Biogeography and Human Impact in Australia
School of Biological, Earth & Environ Sciences
UOC6 HPW5
Prerequisite/s: GEOG1701 or GEOS1701 or GEOG1711 or GEOS1711 or GEOG1721 or (BIOS1101 and BIOS1201);
Excluded: GEOG2025, GEOG3711

The principles and applications of biogeography with an emphasis on Australian natural history and human impact, Palaeoanthropology, archaeology, human biogeography and prehistoric human impacts. The impact of Aboriginal people in Australia compared with elsewhere in the Pacific. Methods for the reconstruction of past environments, vegetation and fire. European expansionism and the impact of European settlement in Australia. The application of biogeography to the management of Australian contemporary environments.

GEOS3731
Catchment and Coastal Geomorphology
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG3025, GEOG3731

This course provides a lecture and field-based study of the processes responsible for shaping and modifying Australian and global landforms. An overview of the theoretical framework of geomorphology will provide the foundation for the theme of the course "from catchment to coast".

GEOS3733
Catchment and Coastal Geomorphology
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG3025, GEOG3731

This course provides a lecture and field-based study of the processes responsible for shaping and modifying Australian and global landforms. An overview of the theoretical framework of geomorphology will provide the foundation for the theme of the course "from catchment to coast".

GEOS3741
Catchment and Coastal Geomorphology
School of Biological, Earth & Environ Sciences
UOC6 HPW4
Excluded: GEOG3025, GEOG3731

This course provides a lecture and field-based study of the processes responsible for shaping and modifying Australian and global landforms. An overview of the theoretical framework of geomorphology will provide the foundation for the theme of the course "from catchment to coast".
Topics covered include catchment hydrology, slope evolution, erosion and sediment transport, fluvial systems and coastal processes and landforms. Application of geomorphology to land and resource management will be emphasised.

**Assumed Knowledge:** Geomorphology

A 18 UOC research project in Physical Geography to be completed within a single session.

**GEOS4412**  
Physical Geography Honours  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC12

A 12 UOC research project in Physical Geography to be completed in one session.

**GEOS4413**  
Physical Geography Honours  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC18

A 18 UOC research project in Physical Geography to be completed within a single session.

**GEOS4415**  
Physical Geography Honours  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC6

A 6 UOC research project to be completed in one session.

**GEOS4416**  
Honours in Physical Geography Research Project 12 UOC  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC12

A 12 UOC research project in physical geography to be completed within a single session.

**GEOS4417**  
Research Project Honours in Physical Geography 18 UOC  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC18

A 18 UOC research project in physical geography to be completed within a single session.

**GEOS4418**  
Honours Geography  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC24

A 24 UOC research project in physical geography to be completed within a single session.

**GEOS4421**  
Soil Degradation & Conservation  
School of Biological, Earth & Environ Sciences  
Enrolment requires school approval  
UOC6  
HPW4

Excluded: GEOG4320.

The aim of this course is to examine the major forms of land degradation and practical solutions to land management problems. This course aims to consolidate the current level of knowledge of national and global land degradation issues, but with an emphasis on eastern Australia. The main issues covered will include vegetation clearance, desertification, salination, global climate change and greenhouse, soil health, and wind and water erosion. The format will comprise formal lectures, some by visiting experts, and student presentations.

**GERS1400**  
Introductory German 1  
Department of German & Russian Studies  
UOC6  
HPW6  
Excluded: GENT0426

Aims to provide students who have little or no previous knowledge of German with basic communicative skills in listening, speaking, reading and writing. Incorporates an introduction to the culture of the German-speaking countries into language study.

**Note:** Excludes students qualified to enter GERS1600 or GERS1700.
GERS1401
Introductory German 2
Department of German & Russian Studies
UOC 6  HPW 6
Prerequisite/s: GERS1400
Further consolidation and development of language skills acquired in GERS1400 or an elementary German language course of comparable format.

GERS2400
Intermediate German 1
Department of German & Russian Studies
UOC 6  HPW 5
Prerequisite/s: GERS1000 or GERS1022 or GERS1401; Excluded: GERS2021.
Designed for students with HSC German or two semesters of elementary German at tertiary level. Develops and extends skills in listening, speaking, reading and writing German and provides an introduction to German Studies. Includes 1 hour per week lecture on cultural aspects of German-speaking countries.

GERS2401
Intermediate German 2
Department of German & Russian Studies
UOC 6  HPW 5
Prerequisite/s: GERS2400 or GERS2021; Excluded: GERS2022.
Further develops and extends language skills acquired in GERS2400 and continues introduction to German Studies. Includes 1 hour per week discussion or German literary texts.

GERS3410
Advanced German 1
Department of German & Russian Studies
UOC 6  HPW 4
Prerequisite/s: GERS2401 or GERS1601; Excluded: GERS2605, GERS1700
Designed for students with advanced German language skills. Extends and consolidates these skills through the study of authentic German texts discussing contemporary issues in German-speaking societies. Includes 1 hour per week lecture or individual project.

GERS3411
Advanced German 2
Department of German & Russian Studies
UOC 6  HPW 4
Prerequisite/s: GERS3410 or GERS2605; Excluded: GERS2606, GERS1701
Further extends and consolidates advanced German language skills and discussion of contemporary issues in German-speaking societies. Includes 1 hour per week discussion of German literary texts or individual project.

GERS3700
Professional German 1
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: GERS2701; Excluded: GERS3141, GERS3142.
Designed for students with very advanced German language skills, including native speakers. Concentrates on aspects of advanced German grammar and/or techniques of translation. Includes 1 hour per week lecture on cultural aspects of German-speaking societies or individual project.

GERS3701
Professional German 2
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: GERS2701 or GERS3700
Further concentrates on aspects of advanced German grammar and/or techniques of translation. Includes 1 hour per week discussion of German literary texts or individual project.

GERS3800
German Studies Seminar 1
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: GERS3411 or GERS3701; Excluded: GERS3405
Explores significant aspects of German literature, culture and/or language with an emphasis on contemporary issues.

GERS3801
German Studies Seminar 2
Department of German & Russian Studies
UOC 6  HPW 3
Explores significant aspects of the literature, culture and/or language of the German-speaking countries with particular emphasis on contemporary issues.

GERS3802
German Studies Seminar (Advanced) 1
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: GERS3411
Introduces research methods and critical writing on selected aspects of the literature, culture and/or language of German-speaking societies.

GERS3803
German Studies Seminar (Advanced) 2
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: GERS3411
Examines various topics related to German-speaking peoples and societies. Topics may include, but are not limited to, language, culture, history and literature.

GERS3900
German Studies Pre-Honours Program 1
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: 36 units of credit including 12 units of credit of German at credit level.
An advanced seminar on selected topics on the literature, culture, history, language and society of the German-speaking countries. Particular emphasis will be placed on research methodology and critical writing.

GERS3901
German Studies Pre-Honours Program 2
Department of German & Russian Studies
UOC 6  HPW 3
Prerequisite/s: 36 units of credit including 12 units of credit of German at credit level.
An advanced seminar on selected topics on the literature, culture, history, language and society of the German-speaking countries. Particular emphasis will be placed on research methodology and critical writing.

GERS4000
German Honours (Research) Full-Time
Department of German & Russian Studies
Enrolment requires school approval
UOC 24
Prerequisite/s: 54 units of credit in German Studies at an average of 65%, including GERS3900 and GERS3901.
Two seminars on literary, linguistic or historical topics; and practical language work as required. A thesis of approximately 15,000 - 20,000 words on a topic approved by the Coordinator.

GERS4050
German Honours (Research) Part-Time
Department of German & Russian Studies
Enrolment requires school approval
UOC 12
Prerequisite/s: 54 units of credit in German Studies at an average of 65%, including GERS3900 and GERS3901.
Two seminars on literary, linguistic or historical topics; and practical language work as required, but taken part-time over two years. A thesis of approximately 15,000 - 20,000 words on a topic approved by the Coordinator.

**GERS4500**
**Combined German Honours (Research) Full-Time**
Department of German & Russian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in German Studies, including GERS3900 at 65% or better.

Two seminars on literary, linguistic or historical topics. Of these, one is shared with the other School or Department. Practical language work as required. A thesis on a topic approved by the two Schools/Departments concerned.

**GERS4550**
**Combined German Honours (Research) Part-Time**
Department of German & Russian Studies
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in German Studies, including GERS3900 at 65% or better.

Two seminars on literary, linguistic or historical topics. Of these, one is shared with the other School or Department. Practical language work as required, taken part-time over two years. A thesis on a topic approved by the two Schools/Departments concerned.

**GLST1100**
**Introduction to Globalisation**
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies/Law programs

Considers how the transnational flows of people, goods, culture and capital are changing the significance of locality and national societies in shaping social life. Examines questions of belonging by looking at migration, refugees and citizenship. Looks at the emergence of global culture through a study of the emergence of global and multicultural cities, new patterns of consumption for pleasure, and the role of media and communications in globalisation. Explores the issues of global governance and examines the cultural and political responses to globalisation in anti-globalisation movements, fundamentalism and economic strategies.

**GLST1200**
**Women, Gender & World History**
Faculty of Arts and Social Sciences
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs;
Excluded: HIST1020, WOMS1003

Looks at world change from ancient times, with reference to premodern women, male-female relations, sexuality and social constructions of gender. Emphasis will be placed upon patterns of change from prehistory through to modernity but with the recognition that even ‘revolutionary’ change has not necessarily involved progress for women. Topics include: androcentric periodizations of history; debates about early ‘matriarchies’; patriarchal controls placed upon women, their sexuality and fertility; different social constructs of feminine and masculine roles and identity; and the importance of culture and class in determining social roles, male-female relations and differences between women.

**GLST2101**
**Introduction to Globalisation**
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs, 36 units of credit;
Excluded: COMD2010, HIST2040, HIST2060, SPAN2424, SPAN2428

Examines the role of the USA in the world in the context of the history of changing global orders. Drawing on diplomatic history, international history, international relations, international political economy, and social and cultural history, the main themes include: westward expansion, ‘Manifest Destiny’, theories of imperialism, US-Soviet rivalry, and debates about globalisation and the character and future of the contemporary global order centred on the USA.

**GLST2104**
**Globalisation and Uneven Development**
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 36 units of credit and enrolment in programs 3424 or 4765;
Excluded: COMD2000, INST2420, POLS2023, SLS2701

Examines the problems and political prospects of ‘Third World’ or ‘Less Developed’ countries in the context of the development of a global economic and communications system. The first part examines the historical development of the system, the second part looks at its current structure and functioning and the third part considers the specific role of less developed countries and regions within the global system.

**GLST2106**
**International Security**
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs, 36 units of credit;
Excluded: POLS2048, POLS3023

Examines the concept and practice of security in international relations. Examines theories of security, before addressing central actors to the security project such as states, institutions and civil society forces. Then considers key issues for security in international politics, including traditional conflict; humanitarian crises; environmental change; population movements and terrorism.

**GLST3000**
**Global Studies and Global Transformations**
School of Modern Language Studies
UOC6 HPW3
Prerequisite/s: 96 units of credit in Program 3415, 4768, 3424 or 4765
Provides a detailed examination of the key theoretical debates in the emergent fields of international, transnational and global studies. Discusses the growing array of conceptual and empirical efforts to explain the dynamics of global transformations in the post-Cold War era. Provides Global Studies students with the opportunity to evaluate their time overseas and link it to a detailed discussion of historic and contemporary processes of global transformation.

**GMAT0411**
**Surveying in Building and Construction**
School of Surveying & Spatial Information Systems
UOC3   HPW3
Overview of services provided by Surveyors/Geomatic Engineers. Linear and angular measurement. Setting out. Levelling; laser levelling, Electronic tacheometry. Earthwork surveys. High-rise building surveys; quality assurance. Basic land law and cadastral surveys; subdivision surveys.

**GMAT0442**
**Surveying for Civil Engineers**
School of Surveying & Spatial Information Systems
UOC3   HPW3
To provide civil engineering students an introduction to and understanding of the basic principles of surveying as it applies to civil engineering works. Topics include: Linear and angular measurement (band and electronic distance measurement): Levelling principles and applications including laser levelling and bar code levelling; 3D coordinate systems; Traversing and control surveys; “field-to-finish” electronic detail surveys, electronic data recording; horizontal and vertical curves and construction survey set outs; areas and volumes, surveys to monitor deformations of structures and mine walls; GPS (satellite positioning); and an introduction to consulting services available from Surveyors and Geomatic Engineers.

**GMAT0442**
**Surveying for Mining Engineers**
School of Surveying & Spatial Information Systems
UOC3   HPW3
To provide the fundamental principles and demonstrates the relevance of surveying to mining engineering. Topics include: Principles of surveying: levelling principles and techniques; contouring; theodolites: angle measurements, instrument and survey errors; distance measurement techniques; coordinate calculations; control surveys; traversing; area and volume calculations. Also an introduction to: GPS satellite positioning: deformation monitoring surveys; map projection coordinates and calculations; correlation of surface surveys with underground surveys; shaft plumbing; transfer of height and coordinates; concept of azimuth. Awareness of other contemporary surveying topics.

**GMAT0491**
**Survey Camp**
School of Surveying & Spatial Information Systems
UOC3   HPW3
A one-week field camp (on campus, usually in mid-year recess) for students studying GMAT0442 Surveying for Civil Engineers.

**GMAT0753**
**Introduction to Spatial Information Systems**
School of Surveying & Spatial Information Systems
UOC3   HPW3
**Prerequisite/s:** CIVL2710, MATH2869, MATH2019
To provide Environmental Engineers with an overview of the resources and analytical tools in Spatial Information Systems applicable to their discipline, and to provide an understanding of the roles of other professions in SIS. An introduction to coordinate reference systems, with particular reference to Australia. Overview and background of spatial information systems. Explanations of definitions and terminology of LIS and GIS. Introduction to remote sensing. Sources of spatial information, field surveys including GPS, maps, aerial photography, satellite imagery. Introduction to image analysis techniques for remote sensing. Introduction to geographical information systems for display, management and analysis of spatial information. Modelling and analysis techniques and software for GIS. Application of above to environmental engineering. A view of the future.

**GMAT1100**
**Principles of Surveying**
School of Surveying & Spatial Information Systems
UOC6   HPW5
Induction to Surveying and Spatial Information Systems: to gain exposure to the range of topics covered in Surveying and Spatial Information Systems, hands-on experience with the School’s facilities and laboratories, and to develop teamwork amongst the students. Horizontal reference frames and positions. Tubular bubbles, surveying telescopes. Theodolites: direction measurement. Distance measurement with steel tapes, bands and electronic tacheometers. Total stations. GPS positioning. Detail surveys. Levelling, level runs, instrument errors and tests. Field techniques and data recording. Use of minor survey equipment. Reconnaissance surveys: field sketches and planning. Recovery sketches.

**GMAT1150**
**Survey Methods & Computations**
School of Surveying & Spatial Information Systems
UOC6   HPW5
**Prerequisite/s:** GMAT1100

**GMAT1200**
**Visualisation of Spatial Data**
School of Surveying & Spatial Information Systems
UOC6   HPW4
Applications of computer technology to Geomatics including the development of proficiency with commonly used software packages. Overview of hardware, operating systems, networks, the internet, applications software, and peripherals including storage media, printers, scanners, digitizers. Use of word processors, spreadsheets, databases, presentation packages, graphics and visualisation packages, publishing and multimedia, browsers and email. The application of these packages to various aspects of Geomatics including data input, data manipulation, data management and storage, data presentation and communication.

**GMAT1300**
**Computing Applications in Geomatics**
School of Surveying & Spatial Information Systems
UOC6   HPW4
Overview of hardware, operating systems, networks, the internet, applications software, and peripherals including storage media, printers, scanners, digitizers. Use of word processors, spreadsheets, databases, presentation packages, graphics and visualisation packages, publishing and multimedia, browsers and email. The application of these packages to various aspects of Geomatics including data input, data manipulation, data management and storage, data presentation and communication.

**GMAT1400**
**Land Studies in Geomatics**
School of Surveying & Spatial Information Systems
UOC6   HPW5
What is “Land”? Topographic and geomorphological descriptions of land. Land cover classification: soils and vegetation. Land use: rural and urban land. Land value and land economics. Land as a recreational resource, national parks, and ecological issues. Land as Real Estate. Land ownership and rights to use and redevelopment. Land from the cultural, social and spiritual perspectives. Native and other forms of “title”. Land, water and air space rights. Law of the Sea and sovereign rights over marine resources. State, Local and Federal Government jurisdictions over land. Professional communications will be an integral component of the subject. Students will be expected to analyse the subject material and prepare appropriate responses, including: poster presentations, addresses to a mock local government council meeting, PowerPoint presentations, and application of research methodology for the WWW and subsequent preparation of reports.
GMAT2100  
**Electronic Surveying Instrumentation: Principles & Practice**  
School of Surveying & Spatial Information Systems  
UOC6  HPW5  
*Prerequisite/s:* GMAT100, GMAT1150  
*Corequisite:* MATH2829  

Precise digital levelling (bar code) instruments and techniques; design, accuracy, errors. Precise levelling techniques, design and location of bench marks. Systematic and random errors, motorised levelling. Electronic theodolites, construction, circle reading, level sensors, centring systems, constrained centring, electronic data recording. Sources, testing and elimination of errors in electronic theodolites, eccentricities of alidade and horizontal circle, Vertical circle and level sensor errors; circle graduation errors. Centring and levelling of theodolites. Precise horizontal angle measurement, definition of an arc of directions, observation procedures, elimination of errors, National and State specifications; precise zenith angle measurement. Trigonometric heighting, effects of earth curvature and refraction, observation procedures, precision of computed heights; EDM-height traversing.

GMAT2110  
**Electronic & GPS Positioning Technologies**  
School of Surveying & Spatial Information Systems  
UOC6  HPW5  

Principles and applications of EDM: basic working principles; phase measurement techniques, coefficient of refraction, flight-time measurement in short range pulse distance meters, working principles of microwave distance meters; wave propagation in atmosphere, atmospheric transmittance and range equation; measurement of atmospheric parameters, velocity corrections; geometric reductions, reductions of distances to the spheroid, analysis of errors, corrections to EDM measurements; electro-optical distance meters; calibration of electro-optical instruments; reflectors; field procedures. GPS surveying; the GPS signal and measurement characteristics; GPS instruments; GPS planning, field and office procedures; GPS observations and equations; baseline measurements; networks; presentation of GPS measurements, datums, coordinate systems and heights; data acquisition from maps and images.

GMAT2200  
**Geographic Information Systems & CAD**  
School of Surveying & Spatial Information Systems  
UOC6  HPW5  
*Corequisite/s:* GMAT 2110, GMAT 2700  

Inputting both spatial and attribute data to the GIS. Transformation of data between coordinate systems, such as digitizer coordinates, geodetic and geographic coordinates, and map projection coordinates. Editing data and creating topologically clean data. Tagging spatial data with attributes, linking spatial data to attribute databases. Use of basic analysis functions: spatial selection, attribute selection, making reports of spatial and attribute data, interfacing to the system using a high level language. Surveying CAD familiarisation with at least one CAD package commonly used in engineering surveying. Data entry for detail survey. Editing and setting attributes within the package. Contouring, Plan drawing. Demonstration of alternative CAD packages.

GMAT2300  
**Analysis of Observations**  
School of Surveying & Spatial Information Systems  
UOC3  HPW3  
*Prerequisite/s:* MATH 1231, GMAT 1150;  
*Corequisite/s:* MATH 2019.

GMAT2350  
**Computing for Spatial Information Sciences**  
School of Surveying & Spatial Information Systems  
UOC3  HPW3  
*Corequisite/s:* GMAT1300

Principles of program design. Algorithm development and programming languages. Procedural programming and event driven programming. Variable types, input, output, event, syntax, loops, condition statements, procedures, forms and controls, menus and multiple document interface. Applications and GUI; application development in common programming languages. Exercises in program development relevant to Surveying and Spatial Information Systems throughout the course.

GMAT2700  
**Geometry of Coordinate Reference Systems**  
School of Surveying & Spatial Information Systems  
UOC6  HPW5  

Cartesian coordinate systems, applications of Cartesian coordinate transformations in geomatics. Mathematical transformations between geodetic, Cartesian and topocentric coordinate systems, ellipsoid geometry, orthometric and ellipsoid height systems; Keplerian orbit representation and the transformation of Keplerian elements into other satellite coordinate and velocity representations. Map projections and ellipsoidal geometry, principles of map projections, surveying and mapping projections, transverse Mercator projection, ellipsoidal computations. Corrections to field observations. Geodetic and astronomical reference systems; the relationship between natural and geodetic reference systems, deflection of the vertical; geoid models and reference ellipsoids, height systems, celestial coordinate systems. Geodetic coordinate systems and datums; definition of AGD, GDA and AHD.

GMAT3100  
**Surveying Applications**  
School of Surveying & Spatial Information Systems  
UOC6  HPW5  

This course introduces the student to a wide variety of surveying applications undertaken as part of engineering projects. The student will be expected to perform common engineering surveying tasks such as the determination of volumes as well as the design, computation and set out of horizontal and vertical curves, roads, buildings and large structures. In addition, selected topics of specialist survey applications will be dealt with using lectures, site visits, guest speakers and technology demonstrations. Topics will be selected from the following areas of special surveys: mining surveying (including Azimuth transfer, north-seeking gyro theodolites, plumbing of shafts and high structures), industrial surveying, tunnel engineering, hydrographic surveying, alignments, monitoring of deformations and settlement of terrain, structures and machines, design of precise engineering networks, dimensional measurement.

GMAT3150  
**Field Projects**  
School of Surveying & Spatial Information Systems  
UOC6  

At camp, a survey project of substantial extent is carried out involving detail surveys, contour surveys and the setting-out of a road. The processing of the field data and the preparation of plans and reports is done during session.  
*Note:* Students are required to attend a one week survey camp during the mid-year recess equivalent to 3 contact hours per week followed by three hour per week processing during session.

GMAT3200  
**Geospatial Information Techniques and Applications**  
School of Surveying & Spatial Information Systems  
UOC6  HPW5  

Concepts and definitions of spatial systems, coordinate systems, mapping and spatial issues with maps, data structures including vector, raster and surface modelling. An overview of the components of the technology, database management in the context of spatial data, database design, data acquisition techniques including overviews of digitizing, scanning, field survey and remote sensing, the data conversion process, data management, display of geo-spatial data, cartography, colour and 3D views. Analysis of geospatial problems including components of data acquisition and database development, spatial analysis and display, and customising and performing advanced analysis using macro languages.
and integrating with other software, using the World Wide Web to disseminate information. Management and institutional issues including how the technology and data is used by various organisations and government departments, geo-spatial data issues for government and industry, standards, Metadata, legal issues associated with these systems, intellectual property, copyright, liability, project management and implementation of these systems.

**GMAT3400**

*Cadastral Surveying 1*
School of Surveying & Spatial Information Systems
UOC3 HPW3

The legal system in Australia and NSW; the nature of land law including land tenure, estates in land, interests in land. Land title systems. Land administration in Australia and NSW. Boundary surveying principles. Cadastral mapping in NSW.

**GMAT3410**

*Land Economics & Valuation*
School of Surveying & Spatial Information Systems
UOC3 HPW2

Satisfactory performance in course GMAT4000 is a prerequisite for progress to GMAT4001. GMAT4001 is to be taken in the last session required for the completion of all requirements for the award of the BE. Generally, the thesis involves directed laboratory, investigatory, design, field or research work on an approved subject under the guidance of members of the academic staff. Session 2 (Part B) is for the major part of the thesis work. Students are required to report on their work at a thesis conference in Week 15, Session 2 and to present a written report on the work undertaken in this course. A supervisor guides each student, but the successful completion of the project, the writing of the thesis and the submission of two bound copies by specified deadlines, for example, are the sole responsibility of the student. Students are required to submit a log book and report detailing at least 60 days of professional practice (industrial training).

**GMAT3420**

*Project in Surveying and Spatial Information Systems*
School of Surveying & Spatial Information Systems
UOC6 HPW5

Projects will involve small groups of students working as a team to complete the execution of specially designed multi-faceted selected tasks in Surveying and Spatial Information Systems. Topics may be the remote sensing analysis of the environment from satellite images, a digital photogrammetric mapping task, setting up a precise geodetic control network, the use of precise GPS techniques to map the local road network and insert this data into a GIS system, a precise engineering survey or the development and analysis of a geospatial database of a region. Students will be required to present the results of their project in a well written report and verbally at the annual thesis conference (Week 15, Session2).

**GMAT4400**

*Land Management & Development Project 1*
School of Surveying & Spatial Information Systems
UOC6 HPW2

Design and studio project for a residential neighbourhood development. Constraint and site analysis: preparation of maps of land use, vegetation, surface and soils, drainage and terrain, slopes, climate and aspect; composite overlay maps. Structure plan design: residential precincts, schools, commercial areas, industrial areas, active and passive recreation, pedestrian ways and road hierarchy. Continuation of design and studio project for a residential neighbourhood development. Plan of detailed lot layout: consideration of access, grades, drainage reserves, parks and pedestrian ways.

**GMAT4410**

*Land Subdivision & Development*
School of Surveying & Spatial Information Systems
UOC3 HPW3

Subdivision and development control in New South Wales. Administration of subdivision and development under Local Government and environmental planning and assessment legislation; procedures and legal controls. Statutory requirements for land development and subdivision of land, particularly as they apply to broad-acre subdivisions.

**GMAT4450**

*Land Management and Development Project 2*
School of Surveying & Spatial Information Systems
UOC6 HPW2

Engineering design and plans, catchment details, road longitudinal and cross-sections, drainage layout, flow schedule, hydraulic grade line calculations, longitudinal sections of kerb profiles. Detention systems, infill subdivisions, shadow diagrams, driveway designs.

**GMAT4700**

*Project Management 1*
School of Surveying & Spatial Information Systems
UOC3 HPW3

Types of business, ethics. Organisational and management principles. Goals, strategies and actions. Phases of a project: feasibility study, pilot project, contract work, final report, and control. Principles of project management: organisation, management, planning responsibilities,
GMAT4750
Project Management 2
School of Surveying & Spatial Information Systems
UOC6  HPW3
Aims and forms of project organisation. Preparation of contracts and specifications: contract law, subcontracting, contract work, bidding. Project scheduling, control and documentation. Project teams in a corporation. Psychology of professionals. Qualifications of a project manager. Decision making process in project management: authority, power, interaction, leadership, assignments. Human resource management: small group behaviour, learning curve, management of teams in professional practice, professional liabilities and responsibilities. Case studies in the application of project management.

GMAT4900
Principles of GNSS Positioning
School of Surveying & Spatial Information Systems
UOC6  HPW3
This course will introduce the student to reference coordinate systems and time systems, satellite orbital motion, signal propagation and satellite tracking observables. The principles of positioning using the current two Global Navigation Satellite Systems (GNSS) will be studied: the U.S. developed Global Positioning System (GPS) and Russia's Global Navigation Satellite System (GLONASS). The mathematical models for pseudo-range and carrier phase-based modes of positioning, for both single receiver (absolute) positioning and relative positioning implementations, will be developed. These principles will be illustrated using the Matlab GNSS toolkit, which allows the student to develop algorithms for real and simulated data processing. Local, regional and wide area differential positioning will also be considered. Land, marine and airborne positioning applications will be discussed.

GMAT4910
Modern Navigation & Positioning Technologies
School of Surveying & Spatial Information Systems
UOC6  HPW3
This course presents an overview of the various satellite-based and non-satellite navigation technologies and some of their applications. Particular emphasis will be placed on the role such positioning technologies will play in Intelligent Transport Systems (ITS). Various user receiver configurations, system augmentations and implementation issues will be analysed. These include: differential GPS (DGPS) schemes and services, real-time systems and their communication links, pseudo-range and carrier phase-based techniques, pseudoranges, and combined GPS/ GLONASS positioning. In addition, the role of other sensors (such as gyro, accelerometers and inertial navigation systems (INS)) and ancillary data (such as digital maps) can play in ITS positioning/navigation will be discussed. Data fusion techniques for integrating GPS (or GLONASS) with INS, such as Kalman Filtering, will be presented. Students will gain hands-on experience with a variety of navigation receiver and sensor technology.

GREK1301
Introductory Modern Greek 1A
Modern Greek Studies
UOC6  HPW5
Excluded:  GENT0427, GREK1001
Aims to enable students to communicate in a Greek-speaking environment, to discuss everyday topics, and, for example, to read and write a simple letter.

GREK1302
Introductory Modern Greek 1B
Modern Greek Studies
UOC6  HPW5
Prerequisite/s:  GREK1301 or GREK1001;
Excluded:  GREK1002
Further consolidation and development of language skills acquired in GREK1301.

GREK2301
Intermediate Modern Greek 2A
Modern Greek Studies
UOC6  HPW5
Prerequisite/s:  GREK1302, GREK1002;
Excluded:  GREK1101, GREK2010
Aims to enable students to understand and use Greek accurately, and to develop structural understanding of the language to a point where it can become a practical asset. Includes review of Modern Greek grammar. Equal emphasis is given to the four basic skills of comprehension, speaking, reading and writing. Reading will be taught partly through a selection of simple literary texts and songs.

GREK2302
Intermediate Modern Greek 2B
Modern Greek Studies
UOC6  HPW5
Prerequisite/s:  GREK1101 or GREK2301;
Excluded:  GREK1102
Continues with the development of comprehension, speaking, reading and writing skills acquired in GREK2301.

GREK3301
Advanced Modern Greek 3A
Modern Greek Studies
UOC6  HPW4
Prerequisite/s:  GREK2302 or GREK1102 or HSC Modern Greek;
Excluded:  GREK1200, GREK1201, GREK2003
Aims to enable students to advance their ability to understand and use Greek accurately, and to develop a structural understanding of Greek to the point where it can become a professional asset. Includes review of Modern Greek grammar. Reading will be taught partly through a selection of literary texts.

GREK3302
Advanced Modern Greek 3B
Modern Greek Studies
UOC6  HPW4
Prerequisite/s:  GREK3301 or GREK1201;
Excluded:  GREK1202, GREK2004
A continuation of GREK3301 with further consolidation and development of language skills.

GREK3401
Advanced Modern Greek 4A
Modern Greek Studies
UOC6  HPW3
Prerequisite/s:  GREK3302 or GREK2022 or GREK1202;
Excluded:  GREK2203, GREK3001
An intensive study of the Greek language through texts in different styles and registers (including literary works and journalism) develops the ability to assimilate texts at various levels of complexity, and cultivates discursive competence in spoken as well as written Greek.

GREK3402
Advanced Modern Greek 4B
Modern Greek Studies
UOC6  HPW3
Prerequisite/s:  GREK3401 or GREK2022;
Excluded:  GREK2204, GREK3002
A continuation of GREK3401.

GREK3501
Pandora's Box
Modern Greek Studies
UOC6  HPW3
Prerequisite/s:  36 units of credit;
Excluded:  GREK3205
Mythical heroes and heroines in Greek tragedy are treated as human archetypes which are demythologised and brought down to earth. The tragedies generate universal truths and illuminate aspects of the human condition. Examines gender issues in five tragedies and gives students the opportunity to observe the consistency with which basic attitudes of men and women have endured through the centuries in western society.

**GREK3502**  
**Greek Women Writers**  
Modern Greek Studies  
UOC6 HPW3  
**Prerequisite/s:** 36 units of credit;  
**Excluded:** GREK3202

Examines a number of literary texts written by women within the framework of feminist literary criticism.

**GREK3504**  
**Greek Music: From Homer to Haroula**  
Modern Greek Studies  
UOC6 HPW3  
**Prerequisite/s:** 36 units of credit

Considers the evolution of Greek music from ancient times to the present, including music in antiquity, Orthodox (Byzantine) church music, folk song, rebetika (the Greek “blues”), the national school of symphonic music, and popular composers from the 60s on, such as Theodorakis and Hadjidakis, with emphasis on their settings of modern poetry. Considers the relation between music and society, processes of cultural continuity and change, and elements of diversity and unity within and between musical cultures.

**GREK3505**  
**Born to the Purple: The Byzantine World (330-1453)**  
School of History  
UOC6 HPW3  
**Prerequisite/s:** 36 units of credit;  
**Excluded:** HIST2202

Examines the Byzantine world, from its origins in the late antique world, through the Middle Ages, to its political and cultural legacy in the early modern world. Focuses on political, social and religious developments in the Byzantine state and church, the manner in which Byzantine culture received and redeployed its Classical heritage, and its place between the European, African and Asian worlds.

**GREK3506**  
**The Modern Greek World (1453 - Present Day)**  
Modern Greek Studies  
UOC6 HPW3  
**Prerequisite/s:** 36 units of credit;  
**Excluded:** HIST2203

Examines the contemporary culture of Greece and Cyprus within its historical context. Considers the meaning of events such as the fall of the Byzantine Empire in 1453, the effects of western rule and Ottoman domination, the influence of the European Renaissance and Enlightenment, the movement for independence, the Asia Minor catastrophe, the Nazi and Fascist occupation and the military dictatorship of 1967-74.  
**Note/s:** This course is compulsory for students who wish to major in Modern Greek. Taught in Greek.

**GREK3900**  
**Culture, Ethnicity & Identity in Greek Australian Literature**  
Modern Greek Studies  
UOC6 HPW3  
**Prerequisite/s:** 36 units of credit including 12 units of Greek at credit level;  
**Excluded:** GREK3203

Provides a study of Greek society and culture in Australia, together with a study of prose, poetry and drama texts written in Australia. Special emphasis is placed on the way socio-cultural and historical phenomena are represented in the works by Greek Australian literary writers.  
**Note/s:** Option for Honours.

**GREK3901**  
**The History and Development of the Greek Language**  
Modern Greek Studies  
UOC6 HPW3  
**Prerequisite/s:** 36 units of credit including 12 units of Greek at credit level;  
**Excluded:** GREK3204

A study of the historical development of the modern Greek language and the socio-cultural significance and implications of ‘diglossia’ in the 19th and 20th century Greece. Students will be required to study selected literary texts in Katharevousa (puristic Greek), Medieval Demotic Greek and Demotic (spoken Greek).  
**Note/s:** Option for Honours.

**GREK4000**  
**Modern Greek Studies Honours (Research) Full-Time**  
Modern Greek Studies  
Enrolment requires school approval  
UOC24  
**Prerequisite/s:** 54 units of credit in GREK with an average of 70%.

The Honours program involves two session-length seminar courses, for which students are required to complete coursework, and a thesis of between 15,000 - 20,000 words on a topic approved by the Unit.

**GREK4050**  
**Modern Greek Studies Honours (Research) Part-Time**  
Modern Greek Studies  
Enrolment requires school approval  
UOC12  
**Prerequisite/s:** 54 units of credit in GREK with an average of 70%.

The Honours program involves two session-length seminar courses, for which students are required to complete coursework, and a thesis of between 15,000 - 20,000 words on a topic approved by the Unit.

**HIST1003**  
**The Fatal Shore: Aborigines, Immigrants and Convict Society**  
School of History  
UOC6 HPW3  
**Note/s:** 54 units of credit in GREK with an average of 70%.

Sex and violence pervaded early colonial society. Looks at the way violence was used to dispossess Aboriginal people from their land and to establish and maintain convict society. Examines the complex relationships arising from sexuality: sex as a form of currency, domination, negotiation and identity for both Aboriginal people and Europeans. What is the legacy of these brutal beginnings for modern Australia? Are we still marked by the convict stain? And how did the criminal system develop in Australia? Did early colonial Australia recreate the class, gender and ethnic inequalities of 18th and 19th century Britain? Also includes an excursion to a historic site in the Sydney region.

**HIST1004**  
**Making Australia 1850 - 1901: Land, People and Culture**  
School of History  
UOC6 HPW3  
**Note/s:** 54 units of credit in GREK with an average of 70%.

The historical context for the making of modern Australia, 1850-1901. What was the 19th century experience of Aboriginal people? Where does the Republican Movement find its Australian origins? What do recent stereotypes of masculinity and femininity owe to our colonial past? How has history shaped definitions and expressions of sexuality? What are the origins of our current political system? Charts Australia's development from an isolated colony to an independent nation.

**HIST1010**  
**Introducing Southeast Asia**  
School of History  
UOC6 HPW3  
**Excluded:** ASIA1002

Introduces students to the history of the Southeast Asian region through a survey of the major eras from the classical civilisation of Angkor, Pagan and Borobodur up until the early twentieth century. Beginning with the religious and cultural traditions of Southeast Asia, kingship and power,
pre-colonial society, colonial society and nationalist visions are explored. Analyses the ideas of nationalist figures like Jose Rizal and Sukarno, as well as peasant rebellions against colonialism and capitalism. The Philippines, Indonesia, Cambodia, Burma and Thailand receive particular attention.

**HIST1011**
The Emergence of Modern Europe (A)
School of History
UOC6 HPW3

The principal themes in the history of early modern Europe, concentrating on the 16th and 17th centuries. Topics may include modern trends such as the Renaissance, the Protestant Reformation, the Scientific Revolution, the emergence of towns and the centralised absolute state. Discussion may also include the history of climate, disease and population change and their relationship with the environment; social and religious conflicts; and the lives and beliefs of ‘ordinary people’ in the period, such as witchcraft. For details of topics covered in current year contact the School of History.

**HIST1012**
The Emergence of Modern Europe (B)
School of History
UOC6 HPW3

Examines and assesses the most significant upheavals of the turbulent decades between the late-18th century and the mid-19th century. Topics may include: the French Revolution, Napoleonic Europe, innovations in agriculture, industry and communications, social transformations (population growth, urbanisation, ideas about “classes”), cultural production (Romanticism, the periodical press), the expansion of state power, and conflicts over political representation (conservatism, nationalism, socialism, feminism).

**HIST1015**
The 60s: Australia and the United States
School of History
UOC6 HPW3

Examines the significance of the 1960s in American and Australian national life and explores the construction of the Sixties as an epoch in western history. After exploring the construction of the Sixties the course will examine a number of significant social and political themes which have characterised the period and compare and contrast the Australian and American experience. Themes include issues such as race and minorities, popular culture, civil protest, architecture, the war in Vietnam, student activism, the sexual revolution and the counter-culture. Concludes by examining the legacy of the Sixties for Australia and the United States.

**HIST1016**
World History: The Big Picture
School of History
UOC6 HPW3

Excluded: ASIA1000, HIST1017, INST1000, INST1100

Focuses on the basic features and forces which have shaped human history from the origins of civilisation to modern times. The first part of the course covers major civilisations (e.g. Roman Empire, Han China) while the second covers transnational issues such as nomadism, trade between civilisations, disease and climate. The final part covers the origins and nature of modernity, to the 19th century.

**HIST1020**
Women, Gender & World History
School of History
UOC6 HPW3

Excluded: WOMS1003, GLST1200

Looks at world change from ancient times, with reference to premodern women, male-female relations, sexuality and social constructions of gender. Emphasis will be placed upon patterns of change from prehistory through to modernity but with the recognition that even ‘revolutionary’ change has not necessarily involved progress for women. Topics include: androcentric periodizations of history; debates about early ‘matriarchies’; patriarchal controls placed upon women, their sexuality and fertility; different social constructs of feminine and masculine roles and identity; and the importance of culture and class in determining social roles, male-female relations and differences between women.

**HIST1021**
World History: The Twentieth Century
School of History
UOC6 HPW3

Excluded: HIST1019, HIST2000, INST1200, INST2000, SPAN2432

Focuses on the major forces and features of twentieth century world history. Includes empires, modernity, nationalism, fascism, decolonisation, communist revolutions, total war, genocide, the growth of the media, social movements, environment, ‘Americanisation’, and terror.

**HIST1030**
The Modern Jewish Experience: Emancipation to the Holocaust
School of History
UOC6 HPW3

Excluded: JWST1000

The progress towards emancipation of the Jews in the 18th and 19th centuries was driven not only by Enlightenment ideas of equality and tolerance, but also by highly pragmatic considerations. While initially, for the most part, enthusiastic objects of this process, European Jews grew increasingly aware of the conditions attached to it and of its real and potential dangers. Traces the history of emancipation, its achievements and failures, and the light it sheds on the development of European societies.

**HIST1031**
The Modern Jewish Experience: Nationalism and Statehood
School of History
UOC6 HPW3

Excluded: JWST1001

Explores the origins of modern Jewish nationalism, Zionism, in the mid-nineteenth century and charts its development through to the creation of the State of Israel in 1948. Discusses the influence of emancipation, nationalism, socialism and anti-semitism. Concludes by considering the debate on ‘post-Zionism’ and the challenges it may present for Israel and the Jewish Diaspora.

**HIST2016**
Film in History
School of History
UOC6 HPW3

Prerequisite/s: 36 units of credit

Assesses the significance, for the discipline of History, of film as a major communications medium. Issues include: the industrial archaeology of the film; the political-economic history of the film; national and transnational film industries, the impact of film upon perceptions of the past, and its uses in teaching history; film as a primary historical source material (ie documentaries, pedagogic films, advertising commercials and propaganda films, and home movies); reading film texts from the standpoint of the historian.

**HIST2019**
Identity, Culture, Politics: Ireland and Australia in the 20th Century
School of History
UOC6 HPW3

Prerequisite/s: 36 units of credit; Excluded: IRSH2002

Examines the political, economic and social changes that took place in Ireland and Australia during the course of the 20th century as they became increasingly independent of Great Britain. Compares and contrasts developments in both countries in terms of national identity, constitutional arrangements with Great Britain, the impact of war, politics, economics and social issues.

**HIST2027**
A Commonwealth for a Continent: Australia 1901-1949
School of History
UOC6 HPW3

Prerequisite/s: 36 units of credit; Excluded: AUST2019
Major developments in Australian History in the period from Federation to the beginning of the Cold War. Themes include: Federation, White Australia policy, defence, foreign affairs, entertainment, federal-state relations, Labour, World War I and its impact on society, women's rights, the experience of the Great Depression, the impact of World War II, Aboriginal people, work and politics.

HIST2028
Australia since World War II
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2020

Major developments in Australian Society since World War II. Topics include: immigration, religion, culture, government, education, comparative welfare history, external relations, women's experiences, media studies, Aboriginal culture and politics, the impact of the Vietnam war, tough times and the 1980s, Australia and America, sporting culture and Olympism, television and the media, Australia and Asia, and the emergence of the new commercial and communication systems of 'the Information Age'.

HIST2036
Documentary Film and History
School of History
UOC6  HPW4
Prerequisite/s: 36 units of credit

Documentary film texts raise important questions about representations and constructions of the past. Provides a critical introduction to these issues through an exploration of texts central to the history of documentary film across the twentieth century. Fields discussed include: photography and historical memory, ideology and practice, propaganda and the representations of war, ethnographic film, environmental and natural history, popular memory and gender, narrative forms, cinema verite, dramatised documentaries, and television and contemporary history.

HIST2045
Modern America
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

The history of the United States from 1890s to 1990s. Explores several major themes in modern America including African American histories; indigenous America; immigration and ethnicity; labour history; women in 20th-century US; US foreign relations; war and society; modernity and popular culture; and history, myths and memories.

HIST2047
Winners and Losers: Poverty, Welfare, Justice in Australia
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

A historical examination of poverty, welfare and the quest for social justice in Australia. Traces the transition from charity to welfare; examines the historical relationships between poverty and social problems such as delinquency, domestic violence, insanity; analyses images of Australia from working man's paradise to 'clever country', and examines the cultural and economic context of the New Conservatism.

HIST2050
Women in Southeast Asian Societies
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Explores women's status and roles in politics, culture, economy, and the family, in several countries of the Southeast Asian region; examines women and unofficial power (eg wives of male politicians like First Lady Imelda Marcos), women in politics like President Corazon Aquino, and activists including militant nuns; addresses the controversial issues of women's victimisation such as prostitution, mail-order brides and domestic helpers; finally, cultural constructions of the feminine and national identity including women and the veil, beauty queens and revolutionaries.

HIST2054
Modern Japan: Political Culture, Popular Culture
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: HIST2012

Concentrates on Japan from Meiji (1868 -1912) to the Fifteen-year War (1931-45), but includes the Allied Occupation, post-war popular culture, and the apparent 'successes' of Japan's modernisation; looks at imperial Japan not just through the eyes of its 'successful' leaders, but also through the eyes of Japanese who were marginalised in society or who actively resisted state authoritarianism. Weekly topics vary, ranging from the hegemonic imperialist ideology of emperor-centred paternalism, to social movements of opposition, to changing cultural (eg literary) forms.

HIST2055
Modern India
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: HIST2008

Examines the history of Modern India, and the controversies surrounding history in the subcontinent. Topics include the Mughal empire, the British Raj, the Indian Nationalist Movement, Mahatma Gandhi, Independence and the partition of India into the new nations of India and Pakistan, independent India and the effects of globalisation in South Asia. Themes include colonialism and its aftermath, resistance, gender and religious nationalism. Also engages with, and critiques, popular conceptions of India as it is represented in the West, and incorporates Indian popular culture, literature, film, sport and music to this end.

HIST2060
(Un)Making the Third World: History & Global Development B
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: COMD2010, GLST2101, HIST2040, SPAN2424, SPAN2428

Explores the history of dictatorship and democracy in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. In geographical terms, the focus is on Latin America with a particular focus on Argentina, Brazil, Chile, Peru, Mexico, Cuba, Guatemala and Colombia. The historical trajectories, current circumstances and future prospects of these nation-states will be examined in relation to themes such as authoritarianism, violence, terror, fear, democracy, liberty, freedom, nationalism, revolution, US hegemony, neo-liberalism and globalisation.

HIST2061
(Un)Making the Third World: History & Global Development A
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: COMD2020, GLST2102, INST2000, SPAN2429

Explores the history of underdevelopment and development in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. Themes include: colonialism, nationalism, decolonisation and post-colonial states; the history and politics of development in the Cold War and post-Cold War era; the state and economic development; the role of international organisations such as the World Bank and the IMF; and the question of globalisation. In geographical terms, the focus is on sub-Saharan Africa, especially the Democratic Republic of the Congo; the Middle East, especially Egypt; South Asia, especially India; Southeast Asia, especially Indonesia; and Northeast Asia, especially South Korea.

HIST2074
Holocaust and Genocide in Historical Perspective
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: JST2101.

Introduces students to the field of genocide and Holocaust studies, beginning with competing definitions of genocide and moving to a detailed treatment of various cases of mass death in world history. The Holocaust as a paradigm case of genocide and the legal prosecution of genocide will be considered.
HIST2078
Firing Line: Australians at War
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2008

Examines the importance of the experience of war in shaping Australia, its contribution to definitions of nationality, ethnicity, citizenship, masculinity and femininity; the extent to which it has defined and/or redirected Australia’s relationships with her allies from the colonial period to Vietnam. Focuses on the battle zones and looks at the way that participants understood and represented the experience of war, drawing on literature and film, personal letters and diaries, reminiscences and oral interviews as well as official records. Includes an optional field trip to the Australian War Memorial in Canberra.

HIST2084
The Vietnam War/The American War
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit

Examines the role of history in the modern nation state; demonstrates the wide variety of historical sources which are available to the historian and which offer us alternative means of viewing the past. After examining the place of history in Vietnamese and American national life and the place of the Second Indochinese War within this context, the course examines the different means by which the past can be conveyed and demonstrates how such forms as literature, memory and film can help construct historical narratives. Topics will include Vietnamese and American voices, women, masculinity, race, genocide and Cambodia.

HIST2090
The Transformations of Warfare
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: GENT0309

Examines the role of war in human history, beginning with prehistoric societies and ending with the Second Gulf War. Covers ancient and medieval warfare, the Gunpowder Empires and Europe's military revolution, colonial wars, Total War, and the more significant developments during the twentieth century. Special consideration will be given to the theme of war and society, the role of the state, and technological change.

HIST2100
Urban Legends: The History of Sydney
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2022

Examines Sydney's dramatic transformation from a tiny preindustrial penal settlement to a sprawling city of over four million people by examining the interplay of natural, cultural and spatial histories in the broader context of urban history and historiography. Themes include Sydney's environmental, Aboriginal, immigrant and gendered histories, 'slums' and suburbs, communities and sub-cultures, heritage and modernity, sex and food, the creation and impact of urban images.

HIST2104
Women and Men: Gender in Australia
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: AUST2034, AUST2108, HIST2034, HIST2035

Considers how gender relations shaped Australian society, culture and politics. Situates gender in relation to race, class, age, place and religion over 220 years of Australian history. Topics may include: frontier mythologies, Aboriginal experience and gender, gender and the Pacific frontier, gender and law, gender and the arts, gender and domestic ideology, gender and religion, gender and work, feminisms.

HIST2201
The Medieval World
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit

Examines the Middle Ages among the most dynamic and formative phases in world history. Deals mainly with Europe and the Mediterranean world from Late Antiquity through to the Renaissance, and covers topics such as the 'fall' of Rome, the 'Barbarian West', Byzantium, Persia and Islam, the making of Latin Christendom, the Vikings, the Crusades, and Europe's cultural and intellectual revival from 1000AD. Important themes include sex, gender, Christianity, Islam, heresy, state formation, feudalism, imperialism and warfare.

HIST2202
Born to the Purple: The Byzantine World (330-1453)
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit,
Excluded: GREK3505

Examines the Byzantine world, from its origins in the late antique world, through the Middle Ages, to its political and cultural legacy in the early modern world. Focuses on political, social and religious developments in the Byzantine state and church, the manner in which Byzantine culture received and redeployed its Classical heritage, and its place between the European, African and Asian worlds.

HIST2203
The Modern Greek World (1453 to Present Day)
Modern Greek Studies
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: GREK3506

Examines the contemporary culture of Greece and Cyprus within its historical context. Considers the meaning of events such as the fall of the Byzantine Empire in 1453, the effects of western rule and Ottoman domination, the influence of the European Renaissance and Enlightenment, the movement for independence, the Asia Minor catastrophe, the Nazi and Fascist occupation and the military dictatorship of 1967-74.

Note/s: This course is compulsory for students who wish to major in Modern Greek. Taught in Greek.

HIST2300
Between Dictatorship and Democracy: Contemporary Southeast Asia
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit

Examines the role of history in the modern nation state; demonstrates the wide variety of historical sources which are available to the historian and which offer us alternative means of viewing the past. After examining the place of history in Vietnamese and American national life and the place of the Second Indochinese War within this context, the course examines the different means by which the past can be conveyed and demonstrates how such forms as literature, memory and film can help construct historical narratives. Topics will include Vietnamese and American voices, women, masculinity, race, genocide and Cambodia.

HIST2351
Chinese Civilisation, 1600 BC to 1600 AD
School of History
UOC6 HPW3
Prerequisite/s: 36 units of credit

Examines the Middle Ages among the most dynamic and formative phases in world history. Deals mainly with Europe and the Mediterranean world from Late Antiquity through to the Renaissance, and covers topics such as the 'fall' of Rome, the 'Barbarian West', Byzantium, Persia and Islam, the making of Latin Christendom, the Vikings, the Crusades, and Europe's cultural and intellectual revival from 1000AD. Important themes include sex, gender, Christianity, Islam, heresy, state formation, feudalism, imperialism and warfare.
HIST2410
Nineteenth Century Europe 1848-1918: Nation, Empire, Revolution
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: EURO2410.

Examines the rise of the explosive social and national tensions in late nineteenth-century Europe which culminated in world war and revolution (Russia, Germany, Hungary, Ireland). Key themes are industrialisation and the rise of the labour movement; urbanisation and its impact on gender roles; the flowering of bourgeois culture and its fin de siècle crisis; the transformation of revolutionary into “integral” nationalism and imperialist jingoism; great power rivalry and the origins of the First World War. Aims to understand how the period laid the foundations for the dramatic events of the “short twentieth century”.

HIST2433
The Russian Revolution
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: EURO2433, RUSS2103.

The Russian Revolution of 1917 was one of the major turning points of the last century and its reverberations continue to be felt in the 21st century. Analyses the principal causes of the Revolution - the economic and social specifics of 19th century Russian society, the decline of Tsarism and the crucial influence of Marxist/Leninist ideology. The Bolshevik seizure of power and the actions of its principal players, Lenin and Trotsky, are discussed in detail, as well as the aftermath of the Revolution - the catastrophic civil war of 1918-1920, the rise of the Stalinist dictatorship and the enduring impact of the Revolution on East-West relations and world history.

HIST2468
History from Crime: Interrogating the European Past
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Investigates the historical use of sources drawn from criminal justice records. Through specific examples about Europe from the Middle Ages to the nineteenth century, this course explores narrative, numerical and textual approaches to the study of justice and criminality as well as broader issues: judicial records as sources for gender history and microhistory.

HIST2482
Europe’s Twentieth Century
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: HIST2066, HIST2067.

Explores the impact of catastrophic war, revolutionary upheavals and genocide in Twentieth Century Europe alongside the development of progressive social policies. Reassesses the nature of Europe’s century and places that history within its broader geographical and historical contexts. Themes include: ideological conflict (Fascism, Communism, Social Democracy, Liberalism); societal change (consumerism, inter-generational conflict, gender issues), and state formation (totalitarianism, welfare state capitalism, ‘the Third Way’ options). Identifies the key themes and junctures that have defined European history since the First World War.

HIST2483
European Cultural and Social History
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Focuses on the chief cultural and social developments linked with the development of European modernity. Topics may include: responses to the growth of the market economy; changing gender roles and family life; the growth of rationality linked with the Scientific Revolution and the Enlightenment; the impact of changing patterns of communications; the effect of increasing European contact with other societies; and reactions to industrialisation.

HIST2484
Europe in the Age of Revolutions
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Examines and assesses the most significant upheavals of the turbulent decades between the late-18th century and the mid-19th century. Topics may include: the French Revolution, Napoleonic Europe, innovations in agriculture, industry and communications, social transformations (population growth, urbanisation, ideas about ‘classes’), cultural production (Romanticism, the periodical press), the expansion of state power, and conflicts over political representation (conservatism, nationalism, socialism, feminism).

HIST2485
The German-Jewish Experience
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: EURO2300, JWST2103, SOCA3310.

The contribution of Jewish Germans to the social, political and cultural life of Germany and Austria from 1900 to 1933. The impact of attempted integration as reflected in the work of Herzl, Schnitzler, Kafka, Bulter, Feuchtwanger, Scholem and others; the failure of the German-Jewish symbiosis as a basis for discussion of the concepts of assimilation, acculturation, ethnicity, identity and nationality.

HIST2486
The Attractions of Fascism
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: EURO2301, SOCA3311.

The social psychology of Fascism and its “aesthetics”, the seductive forms in which its inhuman aims were presented to appeal to both classes and individuals. An attempt to explain, through the study of documents, literary texts and film, the attractions of Fascism for broad sectors of European society without whose support and tolerance it could never have retained power, and the implications for our understanding of our own society.

HIST2487
The Messiah Complex
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: EURO2302, JWST2104, SOCA3314.

The figure of the Messiah is closely linked with the Jewish apocalyptic tradition, in which an oppressed people gave itself up to visions of redemption and retribution. The cultural dominance of apocalyptic imagery from the turn of the last century; the fascination with the Messianic in stories by Franz Kafka, Isaac Bashevis Singer’s novel, Satan in Goray, on the “false Messiah” Sabbatai Zwi, and the Theses on the Philosophy of History by Walter Benjamin; and how these Jewish “double outsiders” focused the unease of a European society soon to be seduced by “false Messiahs” of a much more menacing kind, such as Franco, Hitler, Mussolini and Pétain. What are the attractions, and dangers, of the “Messianic”?

HIST2500
The Pacific War: World War II in the Asia-Pacific
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

A trans-national study of one of the most significant events in the history of the Asia-Pacific region in the twentieth century. Deals with military, social, political and economic themes relating to the war. Topics include: origins and causes; military culture; macro and micro war strategy, the prosecution of the war; civilian life and the homefront; gender, race, labour and sex; propaganda and popular culture; legacies and representations.
HIST2510
The United States and Changing Global Orders
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;
Excluded: GLST2103, SPAN2431

Examines the role of the USA in the world in the context of the history of changing global orders. Drawing on diplomatic history, international history, international relations, international political economy, and social and cultural history, the main themes include: westward expansion, ‘Manifest Destiny’, theories of imperialism, US-Soviet rivalry, and debates about globalisation and the character and future of the contemporary global order centred on the USA.

HIST2511
The United States and Conflict in the Middle East
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Explores the US response to continuing conflicts in the Middle East. Traces the emergence of the USA as the pre-eminent power in the area over the course of the second half of the twentieth century as the area became more and more perceived as vital to national security. The analysis of shifting American interests and policies will extend to 9/11 and beyond.

HIST2660
Ancient History 1: The Ancient Near East and Greece
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Deals with the first societies of the ancient world, the manner in which they developed, and the contacts between them. Includes the early Mesopotamian societies, Egypt, ancient Israel, Minoan, and Greek civilizations. Examines political and military events, social history, religious and intellectual developments, and various forms of cultural expression.

HIST2661
Ancient History 2: Rome
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Examines the rise of Rome from a small, relatively insignificant city-state in the Italian peninsula to the Empire that spanned three continents and lasted 500 years. The growth of imperialism and its role in the metamorphosis of republican government into autocratic rule, cultural life, private and family experiences, and religious developments will all be topics of special import.

HIST2751
A Global History of Nightlife: From Moulin Rouge to Rave
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Traces the unfolding of a global culture of nightlife in the twentieth century, thus providing a window into modern urban cultural history. Examines how nightlife spaces created new forms of sociability, fashionability, sexuality, and identity for modern urbanites. Other influences on the growth and spread of nightlife include imperialism, colonialism, and war; advances in media technologies such as radio, film, television, and recording; and the role of criminal organisations and narcotics in building modern nightlife industries. Emphasises East Asian cities such as Tokyo and Shanghai.

HIST2752
Religion in World History
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit

Uses pilgrimage and travel as a device to examine the role of religion in world history, focusing on the politicized nature of religions, the role of religion in people’s lives, and recent manifestations of religious experience. Topics include: Jerusalem; medieval and modern Marian devotion (the Coogee Madonna); Haj; the adoption of pilgrimage as resistance against colonial or totalizing regimes in India and Tibet; religion as protest (Malcolm X); New Religious Movements; ‘civic religion’ (travel to Ground Zero), pilgrimage to Gallipoli; travel to places associated with iconic people (Diana, Elvis); backpacking and New Age travel and virtual pilgrimage.

HIST2760
A History of Sexualities
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit;

Begins with Classical Greece and establishes some important themes concerning gender, sex and culture which will be traced through the intervention of colonisation, Christianity, and the development of social sciences from the 18th century; traces the relationship between sexuality and socio-political control in the 19th and 20th centuries; investigates the shaping of sexualities through art, literature, cinema and media as well as pornography; and looks beyond the infamy of Lesbos, Mary Wollstonecraft, the Marquis de Sade, Oscar Wilde, Margaret Mead, and Monica Lewinsky, amongst others, to uncover a rich history of the west.

HIST3100
The Orient: Western Engagements with East Asia
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit, including 12 units of credit from the HIST2000 range;
Excluded: HIST2082

Terms such as the ‘Orient’ and ‘Asia’ are spatial and cultural constructs which were devised by Western civilisation to help it understand and colonise a large portion of the world’s surface and people. Examines the way Western civilisation has conceived the notion of ‘Asia’; and how such conceptions have informed the West’s engagement of this region. Traces this engagement from pre-modern times to the present. Largely concentrates on that space commonly referred to as the ‘Far East’, namely Northeast Asia, Southeast Asia and South Asia.

HIST3101
Understanding Nazi Germany: Origins, Structures, Explanations
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit overall including 12 units of credit from the HIST2000 range;
Excluded: HIST2422, EURO2331

Explores debates over the origins and role of Nazi Germany. Issues will include its roots in German history; the driving force of the regime; Hitler’s role and Nazi Germany’s war aims. Sixty years after its defeat in World War II, Nazi Germany continues to fascinate and to leave questions hotly debated by historians. Discusses whether the Nazis were modernisers or backward-looking romantics, and why there was so little intervention of colonisation, Christianity, and the development of social sciences from the 18th century; traces the relationship between sexuality and socio-political control in the 19th and 20th centuries; investigates the shaping of sexualities through art, literature, cinema and media as well as pornography; and looks beyond the infamy of Lesbos, Mary Magdalen, the Marquis de Sade, Oscar Wilde, Margaret Mead, and Monica Lewinsky, amongst others, to uncover a rich history of the west.

HIST3904
Going Public: Public History and the Historian
School of History
UOC6  HPW3
Prerequisite/s: 36 units of credit including at least 6 units of credit in History at credit level or better

Public history - the practice of history outside academia - is a conduit between academic history and the wider community. Explores the many ways public history is understood, practised and applied and its dynamic (often subversive) potential to question standard historical narratives. Offers practical information on working as a historian and gives students experience in primary research and writing for diverse audiences. Topics include: heritage and environmental campaigns, conservation and redevelopment projects, museums, and popular history.
HIST3905  
Evidence and Interpretation: Controversies in European History  
School of History  
UOC6  HPW3  
Prerequisite/s: 36 units of credit, including 6 units of credit in History at credit level or better;  
Excluded: EURO3000

From the famous controversy between E H Carr and Geoffrey Elton, sparked by Carr's 'What is History?' half a century ago, to the more recent 'postmodernism' debate, historians have been sharply divided over such key issues in historiography as the relative importance of empirical evidence, theories, moral values, and narrative subjectivity. Explores these issues through both the major writings of the key protagonists in these debates, and case studies of three of the most celebrated 'wars of interpretation' in European history: the English Civil War, the French Revolution, and the rise of Nazism in Germany.

HIST3912  
Researching and Writing History  
School of History  
UOC6  HPW3  
Prerequisite/s: 36 units of credit including at least 6 units of credit in History at credit level or better;  
Excluded: HIST3002

A weekly seminar in which students are introduced to a variety of research methods and styles of writing, eg biography, family history, use of land titles, newspapers, parliamentary papers. Students will receive hands-on experience in dealing with primary sources and visit major archives in the Sydney region.

HIST3914  
Sin in the Ancient World  
School of History  
UOC6  HPW3  
Prerequisite/s: 36 units of credit including at least 6 units of credit in History at credit level or better

Examines both the phenomenon of sin in the Graeco-Roman world and much of the recent historiography of the period. Topics will include ancient notions of evil and sin, sexuality, violence (especially domestic), drugs (alcohol in particular), and the use of magic. Addresses current scholarship on these subjects, as well as introducing the methodologies historians, archaeologists and classicists use to do research on these topics.

HIST4000  
History Honours (Research) Full-Time  
School of History  
Enrolment requires school approval  
UOC24  
Prerequisite/s: 54 units of credit in HIST at 65% including 6 units of credit from HIST3000 courses and permission of head of school.

Honours (Research) students are required to prepare a thesis of between 15,000 - 20,000 words which must be submitted by a date specified by the School and to complete two fourth year seminar courses. At least one of these must be taken in the first session of enrolment. For details consult the School.

HIST4050  
History Honours (Research) Part-Time  
School of History  
Enrolment requires school approval  
UOC12  
Prerequisite/s: 54 units of credit in HIST at 65% including 6 units of credit from HIST3000 courses and permission of head of school.

Honours (Research) students are required to prepare a thesis of between 15,000 - 20,000 words which must be submitted by a date specified by the School and to complete two fourth year seminar courses. For details consult the School.

HIST4550  
Combined History Honours (Research) Part-Time  
School of History  
Enrolment requires school approval  
UOC6  
Prerequisite/s: 48 units of credit in HIST at 65% including 6 units of credit from HIST3000 courses and permission of head of school.

This program is undertaken in two schools, eg History and Politics and International Relations, History and German Studies. Students are required to complete a research and seminar program acceptable to both schools.

HPSC1100  
Cosmos and Culture  
School of History and Philosophy of Science  
UOC6  HPW3  
Excluded: HPST1107, HPST1109

Examines the history and philosophy of science (including medicine) from antiquity to the twentieth century. Places special emphasis on contextual factors (social, political and cultural) and the role of technologies in the development of science. Topics include: Greek and Hellenistic natural philosophy; science in Late Antiquity; Medieval science; the Copernican Revolution; mechanical philosophy; the telescope and microscope; Newtonianism and the Enlightenment; natural history; Romanticism and the Counter-Enlightenment; the Darwinian Revolution; laboratory medicine; chemistry and industrial research; the twentieth-century physics revolutions and their impact on philosophy of science; the atomic bomb and Big Science.

HPSC1200  
Science Good, Bad and Bogus  
School of History and Philosophy of Science  
UOC6  HPW3  
Excluded: HPST1103, HPST1108

What is science? What are its distinctive characteristics as a form of inquiry? Why are astrology, ‘creationism’ or parapsychology widely considered to be pseudosciences? A critical consideration of such inquiries raises central questions concerning the nature of science, involving issues such as the nature of observation and evidence, theories and laws, explanation and prediction, etc. Issues to be considered include the ‘Galileo Affair’, ‘science vs. religion’ and relativism. These are placed in an historical context from the Ancient Greeks to twentieth-century philosophers. Also considered are the nature of scientific revolutions and ‘postmodern’ approaches to science.

HPSC1400  
Science, Technology, Society and Environment  
School of History and Philosophy of Science  
UOC6  HPW3  
Excluded: SCTS1001, SCTS1106, SCOM1011

Examines the relations of science and technology with societies in the modern world. The status and authority of science. Can science tell us what we ought to do? Critiques of science. Is technology applied science? What is the relation between technology and social change? The political uses of expertise. Experts and the rest of us. Issues of participation. These topics will be explored theoretically and by reference to case studies including: modern genetics and its use in agriculture and medicine; information technology, computers and cyberspace; energy technologies, nuclear and solar; technologies of everyday life.

HPSC1500  
Understanding Environmental Controversy  
School of History and Philosophy of Science  
UOC6  HPW3  
Excluded: SCTS1002, SCTS1107

Examines the nature of global and local environmental problems with particular emphasis on understanding controversies about environmental risk. Patterns of population and consumption, production and waste;
what constitutes an environmental problem; risk and risk perception; environmentalism; the uses of knowledge, science and environmental controversy; international attacks on global problems; stakeholders and stances; environmental problems in your backyard; local and global action. In the last seven weeks students will participate in group projects examining particular environmental risk controversies.

**HPSC2100**  
**The Scientific Revolution**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HPST2111

Examines fundamental issues and techniques in the history and philosophy of science. Deals with the origins of modern European science, as exemplified in the work of Copernicus, Galileo, Newton and others. The social, religious, political and economic factors shaping the emergence and content of the new science are analysed. Emphasis is placed on critical historical thinking and use of tools from the sociology of scientific knowledge.

**HPSC2150**  
**Darwin & the Order of Nature**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HPST2107

Examines ideas about the natural order (that is, about the ecology and classification of living things), from the 18th century to the present era, in cultural and political context. Retraces the West's quest for an explanation of living creation in terms of life forces and their interaction with a changing Earth, a quest which ultimately arrived at Darwin's theory of evolution. Also examines the major historical developments that set the stage for these scientific developments in an age of dramatic political and economic revolution, and at the ongoing impacts of the Darwinian worldview.

**HPSC2200**  
**Philosophy of Science**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HPST2111, HPST2116

An examination of central issues in the philosophy of science. Introduces students to the nature and scope of the discipline, and through the examination of central issues prepares students to undertake work not only on the issues examined, but also across the discipline more broadly. Issues include: scientific method; inductivism and deductivism; scientific progress; explanation; causality; confirmation and evidence; values; scientific realism.

**HPSC2300**  
**Sociology of Science and Technology: How Science Works**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SCTS2002, SCTS2107

Examines contrasting accounts of how science works as a system of knowledge production, as a social system, and as a basis for manipulating the world through technology. Is science insulated from social and technological processes or integrated with them? Approaches include: Mertonian normative sociology; sociology of scientific knowledge; Latourian actor-network theory; symbolic interactionism and pragmatist sociology of science. Provides understanding of: the objectivity of scientific knowledge; the relationship between science and technology; the role of science in handling environmental problems; the communication of scientific knowledge to wider business, governmental and community constituencies and their understanding of it.

**HPSC2400**  
**Knowledge and Power**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SCTS2106, SCTS2121

Examines the history of the idea of a special relationship between the possession of both knowledge and power. Through case studies and classroom simulations of scientific, technological and environmental policy issues, the processes by which power is exercised and knowledge used will be explored.

**HPSC2500**  
**Environment, Technology and Politics**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SCTS2118

Provides historical, social and political background for understanding the 'social crisis of the environment' - often blamed on the technological systems of 'Western Industrialised Society'. Also examines alternative visions such as 'Deep Ecology', 'Ecofeminism', and 'Ecological Democracy'. Key developments of thought and action in Western society are related to present day environmental politics. Topics include: pre-industrial developments in Europe; the ideas of the Enlightenment; changing images of nature; ecological impacts of industrialisation; globalisation; and public participation. Examples are drawn from the politics of energy systems, the relationship between agriculture and civilisation, and the politics of waste.

**HPSC2550**  
**Sustainable Development, Globalisation and the Third World**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: COMD2050, INST2401, SCTS3106

This course is about sustainable development along with the technological and social changes that are involved in achieving it, both at a national and global level. It is divided into three parts: (1) the historical causes of the present global environmental and economic crisis; (2) possible solutions to problems of food production, environmental degradation, industrialisation, energy use, and population growth; (3) ideas for a New World Economic Order and the economic and technological changes required to bridge the ever increasing gap between rich and poor nations.

**HPSC2600**  
**Galileo, Science and Religion**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HPST2139

Examines Galileo's scientific discoveries and his defence of Copernicanism against Aristotle and the Church. Also examines "the greatest scandal in Christendom" - the trial and condemnation of Galileo by the Catholic Church in 1633. Issues raised include the perennial conflict between science and religion as well as central issues in the history and philosophy of science. Students will view Jupiter's moons and the phases of Venus, first seen by Galileo, and they will participate in a "re-trial" of Galileo re-enacting the Roman Inquisition hearing.

**HPSC2605**  
**Greek Science & Natural Philosophy: Roots of Western Thought**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit

Examines the development of ancient Greek science and natural philosophy. Attention will be paid to primary texts and their cultural and institutional contexts. Issues will be drawn from the following: Milesian materialism, the Pythagoreans, Parmenides and Zeno, the atomists, Plato, Aristotle, Hellenistic natural philosophies, the mathematical sciences, astronomy, medicine, magic, astrology and the pseudo-sciences, and the decline and re-establishment of Greek science in the West.

**HPSC2610**  
**Computers, Brains and Minds**  
School of History and Philosophy of Science  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Introduction to contemporary discussions of the mind, thought, intelligence and consciousness. Focuses on the issues which arise in connection with the so-called ‘cognitive sciences’ - the disciplines which include such fields as neuro-science, psychology, linguistics, the philosophy of mind, and ‘artificial intelligence’. Can computers think? Is the brain a machine?

**HPSC2630**  
**God, Life and the Universe: Science and Meaning**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HPST2126

‘Ultimate’ questions about God, the meaning of life and the point of it all, have traditionally been the business of religion. Can science provide an answer to these questions, or is there always a realm of understanding which is beyond scientific knowledge? Examines philosophical issues in epistemology, metaphysics and philosophy of science. Topics include arguments for the existence of God and the underlying questions of evidence and explanation in science.

**HPSC2650**  
**Worrying Ourselves to Death? Health, Risk and Modern Medicine**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Excluded: HPST2138

Statistics suggest that populations of First World countries are healthier and longer-living than at any previous time. Ironically, the perception exists that we are ‘doing better but feeling worse’. How did we become the ‘worried well’? Departing from traditional positivist and progressivist approaches in medical history, this course provides a framework for examining some of the practices and paradoxes of modern medicine. We ask why the forces that created modern medical ‘miracles’ have also created the current climate of anxiety and ambivalence. Why has the maintenance of health become a perpetual exercise in risk assessment?

**HPSC2660**  
**Cheating Death: A History of Medicine**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Excluded: GENSS522, GENT0902, HPST2003, HPST2128

What was the Medieval attitude to the bubonic plague? How has the doctor/patient relationship changed through time? In what ways has society reacted to new diseases such as AIDS? The answers to these questions, and many more, will be discussed in this course, which looks at the changes in Western medical theory and practice from the earliest recorded times to the present day. No previous biological knowledge is required for this examination of issues of health and disease in their historical and social contexts.

**HPSC2720**  
**Evolutionary Theories and Change**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SCTS2116, SCTS2122

Diffusion of evolutionary theories of change from biology to many areas in the natural and social sciences. Topics: science as an evolutionary process; evolution of technology; extended phenotype; evolutionary economics; innovation systems; technological and institutional coevolution; evolutionary psychology; evolutionary concepts in cognitive science; memetics; sociobiology; cultural evolution; technology as forms of life; criticisms of eugenics, social Darwinism, ultra-Darwinism; religion, creationism, ethics, animal liberation; ‘Evolution/Darwin Wars’ and the ‘Science Wars’; chance and design; complexity, game theory, and ideas about self-organization; information, knowledge, communications theories; exobiology and extraterrestrial life; evolutionary thinking and forecasting; genetic engineering; posthuman futures.

**HPSC2730**  
**Communicating Science: Theory & Practice**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Excluded: SCTS3127

Communicating science is crucial. Scientists need to communicate not only among themselves but with business, unions, government, the media and environmental and community interest groups. Examines how different concepts of ‘science’ affect our understanding of how science is communicated. Topics include: history of science communication; new communications technologies and science; popularisation; distortion; the communication of uncertainty and risk. Considers the role of communicators and guides students towards on-line tools to access, evaluate and use current information. The class will simulate issues of communication and produce appropriate outputs, including journalistic articles, press releases, contributions to an on-line journal.

**HPSC2750**  
**Energy and its Politics**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SCTS3128

Energy is fundamental to our way of life. Global energy use continues to expand, straining resources and increasing pollution. Australia has resolved to provide 2% extra electricity from clean renewable sources by 2010 yet Denmark is on track to provide 20% from these sources by 2030. There is currently intense jockeying between countries over these matters. Explores energy options, analysing the economic, political, environmental and technical constraints upon them, in light of major current imperatives - climate change and the deregulation of the energy industry. Emphasises matters such as the viability of solar energy and the future of nuclear power.

**HPSC2881**  
**Cultural Heritage Management**  
Nura Gili (Indigenous Programs)  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: ATSS3003, SCTS3120

Over 40,000 years of human habitation has helped to shape Australia’s environment. Examines the policies and processes of managing both Aboriginal and non-Aboriginal (historical/European) ‘cultural heritage’. It will define the notion of ‘cultural heritage’ and examine to what extent the Australian environment may be defined as ‘natural’. Identities and examines the values attributed to cultural heritage items, sites and places by a variety of interest groups, and critically examines the legal, ethical and policy requirements which dictate management processes.  
**Note/s:** Taught by Nura Gili (Indigenous Programs)

**HPSC3100**  
**Advanced History of Science**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Introduces students to key issues, methods and debates in the history of science by means of close examination of case studies of significant turning points in the development of Western science. Critical examination of primary sources will be stressed, along with the central historiographical debates concerning each case. Issues include: the Scientific Revolution of the 17th century; science and technology in the Enlightenment; life science and the sciences of the environment in the 19th and 20th Centuries.

**HPSC3150**  
**Life Science in the 20th Century**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HPST2137

Explores the rise of the experimental biology disciplines, from the embryology, genetics, bacteriology and physiology of the early 20th century through the ‘molecular revolution’ of the period around the
Second World War and the new sciences it spawned. These include sciences such as cell biology, immunology and above all molecular genetics - the science of the genetic code and the linchpin of current biotechnology.

**HPSC3200**  
**Topics in the Philosophy of Science**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Explores central issues in the philosophy of science at advanced level. Topics will be drawn from: scientific change; demarcation; rationality and objectivity; theory and observation; discovery; instrumentalism and realism; cognitive approaches to science; laws of nature; explanation, reduction and causality; underdetermination; justification and evaluation. Emphasis is placed on developing disciplinary skills required for higher level research in the field.

**HPSC3300**  
**Technology and Culture**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: SCTS3900

Explores issues in the history, philosophy and sociology of technology at advanced level. Issues will be drawn from: technology and everyday life; technological determinism and change; ways of being with technology; the development of technological systems; the social construction of technology; actor-network theory; risk and trust; technology and gender; citizen participation and strategies for technological reform. Emphasis is placed on developing disciplinary skills and literacy required for higher level research in the field.

**HPSC3500**  
**Society & Environmental Process: Botany Bay**  
School of History and Philosophy of Science  
UOC6  HPW3  
Prerequisite/s: HPSC2500 or HPSC2550 or SCTS2118 or SCTS3106;  
Excluded: AUST2010, SCTS3013, SCTS3020, SCTS3126

Interprets the concept of the social construction of the environment in the specific context of Botany Bay and its region. Environmental issues are identified and examined in the light of historical, sociological, economic and political developments at the regional, national and global levels. Prospects and processes for intervention. In addition to other work, each student completes a substantial research report.  
**Note/s:** In addition to the prerequisite listed, it is desirable that students have completed two other Upper Level courses listed in the Environmental Studies program.

**HPSC3920**  
**Reading Option**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Students wishing to work in an area not covered by an existing course may apply to the School to take a reading option. Not more than one such course may be counted towards a degree. Approval of a program for a reading option will depend on its suitability, and the availability of a staff member to undertake supervision.  
**Note/s:** Permission for enrolment in the reading option must be obtained from the Head of School.

**HPSC4000**  
**History and Philosophy of Science Honours (Research) Full-Time**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC24  
Prerequisite/s: 54 units of credit in HPSC at 65%

Candidates are required to present a thesis and complete coursework as approved by the Head of School.  
**Note/s:** With the approval of the Head of School, courses outside the School carrying up to 12 units of credit may be substituted.

**HPSC4050**  
**History and Philosophy of Science Honours (Research) Part-Time**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC12  
Prerequisite/s: 54 units of credit in HPSC at 65%

Candidates are required to present a thesis and complete coursework as approved by the Head of School.  
**Note/s:** With the approval of the Head of School, courses outside the School carrying up to 12 units of credit may be substituted.

**HPSC4200**  
**History and Philosophy of Science Combined Honours (Research) Full-Time**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC12  
Prerequisite/s: 48 units of credit in HPSC at 65%

For Combined Honours, candidates are required to present a thesis and complete coursework as approved by the Heads of the two participating Schools.  
**Note/s:** With the approval of the Head of School, courses outside the School carrying up to 12 units of credit may be substituted.

**HPSC4250**  
**History and Philosophy of Science Combined Honours (Research) Part-Time**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC6  
Prerequisite/s: 48 units of credit in HPSC at 65%

For Combined Honours, candidates are required to present a thesis and complete coursework as approved by the Heads of the two participating Schools.  
**Note/s:** With the approval of the Head of School, courses outside the School carrying up to 12 units of credit may be substituted.

**HPSC4500**  
**Combined Honours (Research) in Environmental Studies Full-Time**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC12

The course has three components: thesis (50%); seminar (25%); and either a second seminar, an internship or a project (25%). The project is intended to provide the opportunity for learning experience based on field research involving industry, government, or community activity, in a topic area different from that of the thesis. It could take the form of a radio program, a short film, an environmental action plan or design, a community event, a developed policy proposal, a detailed funding program etc., or elements of several of the foregoing.  
**Note/s:** Students must meet the following requirements: 1. Combined Honours prerequisites in a discipline. 2. At least 48 units of credit from the list of nominated courses for the interdisciplinary major in Environmental Studies, including HPSC2500/SCTS2118 and HPSC3500/SCTS3126, with an average of Credit or better. 3. Permission of the Honours Committee of the Environmental Studies Committee.

**HPSC4510**  
**Environmental Studies Honours (Research) Part-Time**  
School of History and Philosophy of Science  
Enrolment requires school approval  
UOC24

Normal requirements are a thesis (50%), seminar (25%) and an additional component (25%) which could be a second seminar, an internship or a project.  
**Note/s:** At least 54 units of credit from the above list of nominated courses for the interdisciplinary major in Environmental Studies, with an average of Credit or better. This must include the core course HPSC3500, at least one other ‘3000’ course, and at least one Fundamental Knowledge course, and may include only two of the Level 1 courses recommended above.
UOC6   HPW4
Industrial Design Program
IDES1031
Industrial Design Laboratory for their design studio projects.

of this course is required before students will be allowed to use the materials, including timber, plastics, and metals. Successful completion of the laboratory course, a short film, an environmental action plan or design, a community event, a developed policy proposal, a detailed funding program etc., or elements of several of the foregoing.

Note/s: Students must meet the following requirements: 1. Combined Honours prerequisites in a discipline. 2. At least 48 units of credit from the list of nominated courses for the interdisciplinary major in Environmental Studies, including HPSC2500/SCTS2118 and HPSC3500/SCTS3126, with an average of Credit or better. 3. Permission of the Honours Committee of the Environmental Studies Committee.

IBUS3901
Advanced Economies and Emerging Markets: Australia and the Asian Region
School of International Business
Enrolment requires school approval
UOC0

This course will study the interaction of an advanced economy with the spectacular emerging economies of East Asia. The course provides a multidisciplinary perspective and includes an examination of the management of resources and export marketing; the role of government and private decision-makers in a self consciously entrepreneurial society. Several themes are introduced including: the Asia Pacific region and Australia’s role within it; energy requirements; and the experience of an emerging economy in Asia. Topics covered include; business and corporate structures in East Asia, with particular reference to China; international and regional capital markets; human resources and industrial relations in Asian context; business ethics and corruption; private/public sector interaction; the role of global and regional organisations, such as the IMF, APEC, WTO, and bilateral trade treaties.

IDES1012
Safe Workshop Practices
Industrial Design Program
UOC3 HPW2

A laboratory course for inducting students into the safe operation of hand tools, power tools, stationary machinery, and other equipment for the fabrication and finishing of industrial design models and prototypes. Instructional demonstrations of workshop techniques are followed by "hands-on" student exercises, using a wide variety of modelling materials, including timber, plastics, and metals. Successful completion of this course is required before students will be allowed to use the Industrial Design Laboratory for their design studio projects.

IDES1031
Industrial Design Studio 1
Industrial Design Program
UOC6 HPW4

To introduce students to basic aspects of Industrial Design in order to develop an ability to solve problems of very low complexity involving theoretical and project work to introduce design methodologies and their application to three dimensional design problems. At the same time the course assists in the final decision at the end of year 1 that industrial design is the appropriate professional career choice for each individual student.

IDES1071
Materials and Technology Workshop A
Industrial Design Program
UOC6 HPW4

This course is designed to provide a platform of understanding of physics, mechanics and materials. Basic concepts of Energy transfer, Electrostatics and electromagnetism, Sound, Mechanics and Materials will be considered in the context of their applications to Industrial Design activity using a project-based approach.

IDES1101
Clinical Honours Program
Industrial Design Program
UOC4 HPW4

Prerequisite/s: MATH1011.

IDES1111
History of Industrial Design
Industrial Design Program
UOC3 HPW2

This course is a chronological and focused study of the emergence and development of industrial design from 1800 to the present day. It includes products as an aspect of our culture/society/commerce/industry from 1750 to the present day and examines consumer products within the context of the changes taking place in industry and society.

IDES1161
Industrial Design Communication A
Industrial Design Program
UOC6 HPW4

Corequisite/s: IDES1012

This is a studio-based course providing an introduction to a range of methods used to accurately communicate 3-dimensional design ideas. Studies will focus on orographic drawing with particular reference to the Australian Engineering Drawing Standard. This course includes practical assignment work using a range geometrical and mechanical drawing techniques. It will also include some experience in model making for industrial design.

IDES1162
Industrial Design Communication B
Industrial Design Program
UOC6 HPW4

Prerequisite/s: IDES1161
This course enables students to develop practical skill with the representation of 3-dimensional form using a variety of techniques including free hand drawing and formal pictorial drawing and an introduction to computer-aided techniques with particular reference to industrial design practice. The course will also include some 3-Dimensional model making.

**IDES2072**
**Materials and Technology Workshop B**
Industrial Design Program
UOC6 HPW3

This course involves the investigation of the properties of engineering materials in the context of manufacturing technology and processes. The relationship between design practice and manufacturing processes is explored with particular reference to: strengths and properties of materials, basic metrology and tolerancing, forming and machining processes and joining systems. Metals and alloy materials and manufacturing processes: review of major processes, principles of process selection, design constraints and quality assurance, and advanced manufacturing technologies.

**IDES2092**
**Industrial Design Theory and Process**
Industrial Design Program
UOC6 HPW3

This course considers design thinking and clarifies the design process linking the stages with established design methodologies. In addition the nature of form is studied and reviewed against past and current theories. Included also is a consideration of the values associated with the visual language and the signals/tools that reinforce visual appreciation.

**IDES2161**
**Industrial Design Studio 2A**
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES1031

This course introduces students to design problems which require the application of the design process in order to arrive at creative and feasible solutions. The course is based around design projects as well as some critical review of design literature. The projects provide experience working with a restricted range of materials and manufacturing processes in the design and development of fully resolved product proposals. Students will be required to develop a good understanding of their own use of the design process. Skill development will emphasise the areas of rapid exploration and communication of design ideas using a range of media.

**IDES2162**
**Industrial Design Studio 2B**
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES2161

This course builds on the knowledge and skills introduced in Industrial Design Studio 2A in order to further students understanding and command of the design process. The course is based around design projects as well as some critical review of design publications. Project work provides experience in investigating the requirements of particular groups of end-users and exploring the development of product form to meet these requirements. Students will develop skills in communicating highly resolved design concepts.

**IDES2163**
**Industrial Design Communication C**
Industrial Design Program
UOC6 HPW4
Prerequisite/s: BENV1101, IDES1052

This a studio-based course which reviews approaches to perspective drawing and development of rendering techniques with reference to their applications in product design. This course offers a particular focus on techniques for rapidly generating and communicating design ideas. Students will be exposed to a professional standard of design communications of this type and will work on project tasks using a range of media.

**IDES2171**
**Computer Applications in Industrial Design**
Industrial Design Program
UOC6 HPW3
Prerequisite/s: BENV1141; Excluded: BENV2401

This course is structured around practical computer lab classes which cover various aspects of computer modelling and documentation used in industrial design. The first phase of the course aims to consolidate students knowledge of 2-dimensional Computer aided drafting with reference to Engineering Drawing Standards. In the second phase students will gain experience using 3-dimensional surface modelling software to produce computer models of complex, curvilinear forms. Photo-realistic images of these forms will be generated using associated rendering/ray-tracing software. The application of these tools in the industrial design process will be considered.

**IDES2182**
**Materials and Manufacturing Processes for Industrial Design A**
Industrial Design Program
UOC3 HPW3

Description of processes for manufacturing engineering materials. Relationship between design and manufacturing processes.

**IDES2201**
**Ergonomics**
Industrial Design Program
UOC6 HPW3

This course introduces the physiological and psychological aspects of ergonomics human factors and their application to product use, work, environment effects and human/machine interface. The course aims to equip students to investigate human-use implications of their design activities with regard to issues such as usability, comfort, efficiency and safety. Project work and workshops will focus on human factors/ergonomics principles and research methods and their application in Industrial Design and product development.

**IDES3073**
**Materials and Technology Workshop C**
Industrial Design Program
UOC6 HPW3

Plastic materials and manufacturing processes: are discussed together with the economics of production processes, design constraints, alternate design and manufacturing strategies and material properties and test procedures.

**IDES3221**
**Industrial Design Studio 3A**
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES2162.

Learning activities build up on work carried out in previous stages of the Industrial Design program, and are intended to increase students understanding of the complexities of design practice. Projects allow students to gain further experience in applying research and design methodologies to solve problems of moderate complexity. Each undertaking has a strong emphasis on innovation, technical resolution and documentation to a professional standard. A rigorous and responsible approach to product design is fostered by working on projects with “real-world” social, environmental, commercial, technological or industrial constraints.

**IDES3222**
**Industrial Design Studio 3B**
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES3221

This course develops the students understanding of the design process in its application to complex product development problems. The course is based around design projects and will include the compilation, by each student, of a portfolio of design work completed in the Bachelor of
Industrial Design program. Project work completed for this course will include the resolution of full design detail and will successfully address manufacturing and materials performance requirements tailored to particular markets and end-user needs. Design and communication skills will be at a level that would be acceptable in professional design practice.

IDES3231
Advanced Computer Aided Product Design
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES2171

This course focuses on 3-dimensional modelling applications used in Computer Aided Design and Manufacture. The course is structured around practical computer lab classes in which students gain experience using parametric 3D modelling and visualisation tools. Project work involves modelling of complex, multi-component 3D forms and production of photo-realistic visuals. 3D computer modelling issues related to Materials and Manufacturing are also considered.

IDES4291
Industrial Design Studio 4
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES3222.

Studies during this unit will be directed to prepare students to work as Industrial Design professionals. Each student is encouraged to direct his/her project program towards minimising any weaknesses that are evident in his/her knowledge and skills, or covering an area of design that they may not have worked in previously. Projects are orientated towards specific interests that each student has developed in Industrial Design. Each student will finalise their folio during the year, therefore, this requirement should be kept in mind throughout the year when selecting and undertaking projects. The folio should aim at being of professional quality and range.

IDES4301
Project Research
Industrial Design Program
UOC6 HPW4
Prerequisite/s: IDES3222.

Research techniques applicable to products and product systems, covering problem identification, data gathering and analysis, and synthesis of information into a brief for future product design endeavors. The outcomes of IDES4301 form the basis for the IDES4351 Project in the subsequent semester. Project proposals for project research are often aligned with the research interests and activities of the program staff, which include studying the environmental, social, cultural, marketing, engineering, emotional, ergonomic and aesthetic aspects of industrial design. Surveys, focus group discussions, expert interviews, and a comprehensive literature search constitute major activities in the course, with a strong emphasis on ethical research practices being fostered throughout.

IDES4311
Visual Communication Design and Corporate Identity
Industrial Design Program
UOC3 HPW3
Prerequisite/s: IDES1031

The major graphic production processes, and their application in graphic design. Type and typesetting systems. Graphic design projects.

IDES4321
Exhibition Design
Industrial Design Program
UOC3 HPW2
Prerequisite/s: IDES2162.

Understanding the nature of environmental space and spatial ambience, and the relationship of objects and products to the surrounding space. Exhibition design projects.

IDES4352
Industrial Design Project
Industrial Design Program
UOC12 HPW4
Prerequisite/s: IDES4291, IDES4301

Student's final-year project, demonstrating the student's encompassing understanding of the product development process. This major design exercise is normally an application of the research findings in IDES4301. In this course, students attempt to explore the optimum solution to problems identified in the research, using various iterative techniques for concept generation, testing and development until the design is finally resolved. Outcomes of the project are displayed in a public exhibition.

IDES4372
Industrial Design Management and Practice
Industrial Design Program
UOC6 HPW3
Prerequisite/s: IDES2091

This course considers the problem of integrating innovative product design and development within the overall managerial, production and financial structure of industry. Australian and overseas case studies are given. Particular emphasis is placed on the development of appropriate design management structures and methods for the Australian situation that incorporates social ethics, consideration of sustainability and professional practice.

INDC2040
Physical Process Chemistry
School of Chemical Eng and Industrial Chemistry
UOC6 HPW6
Prerequisite/s: CHEM1021 or CHEM1041

INDC3051
Process Chemistry and Operation
School of Chemical Eng and Industrial Chemistry
UOC4 HPW4
Prerequisite/s: CHEC2110, INDC2040

INDC3070
Instrumentation and Process Control 1
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: MATH2021, CHEC2010, CHEC2020

Analog Computer: theory and application of basic analog computing elements; magnitude and time scaling; solution of linear differential equations. Instrumentation: theory and application of transducers and transmitters for measurement of process variables. Process Dynamics: behaviour of linear, lumped parameter dynamics systems; first, second and higher order and integrating systems. Process Control closed loop, block diagrams, controllers and controller tuning.
INDC3071
Process Control
School of Chemical Eng and Industrial Chemistry
Enrolment requires school approval
UOC4

INDC3110
Industrial & Environmental Chemistry
School of Chemical Eng and Industrial Chemistry
UOC6  HPW6
Prerequisite/s: CHEM2839, INDC2040

The qualitative aspects of major unit operations in the chemical process industries. Topics covered include gas absorption, liquid-liquid extraction, distillation, filtration, evaporation, centrifugation, drying and leaching operations, particle size reduction and enlargement. Students are required to attend factory inspections at local and country centres as required and to make a short oral presentation based on information gained during the factory visit. Soil chemistry. Occupational diseases. Smogs and acid rain. Toxic elements and compounds. Toxic waste disposal. Industrial accidents. Atmospheric structure and chemistry. Greenhouse warming. The Ozone hole. Nuclear energy. Alternative energy sources. Water analysis. Air analysis. Occupational health.

INDC3120
Industrial Chemistry Practice
School of Chemical Eng and Industrial Chemistry
UOC6  HPW6
Prerequisite/s: CHEM2839, INDC2040

The production of inorganic industrial chemicals from the standpoint of the application of the basic principles of inorganic and physical chemistry (acid industries, alkali industries, industrial gases electric furnace products, superphosphates, aluminum and glass); a study of some sections of the organic industrial chemical industry cellulose, industrial alcohols, formaldehyde, phenol, urea, phenolic and urea resins, acetic acid, polymers based on ethylene and acetylene, elastomers. A small research project designed to illustrate practical applications of the principles of Industrial Chemistry. Regression analysis. Statistical design of experiments. Two level factorial designs. Screening experiments. Optimisation of process variables. Spread sheet and database utilisation. Basic programming. Industrial applications.

INDC4061
Process Design A
School of Chemical Eng and Industrial Chemistry
UOC4  HPW4
Prerequisite/s: 132 units of credit

This course will encompass the complete process design of a given (small) chemical plant. In Part A, students will be required to produce a design report which will include plant sizing, process flow sheet, equipment selection and costing.

INDC4062
Process Design B
School of Chemical Eng and Industrial Chemistry
UOC4  HPW4
Prerequisite/s: 132 units of credit

In Process Design B students will be required to produce an environmental impact statement, and a financial evaluation of the whole process. The report will also discuss the relevant thermodynamic and kinetic aspects of the process.

INDC4091
Research Project Theory
School of Chemical Eng and Industrial Chemistry
UOC12  HPW11
Prerequisite/s: 132 units of credit

The course requires that the student elects a topic in Industrial Chemistry, undertake a literature survey on that topic and produce a report.

INDC4092
Research Project - Practice
School of Chemical Eng and Industrial Chemistry
UOC12
Prerequisite/s: INDC4091

The experimental investigation of some aspect of an elected topic area in Industrial Chemistry.

INDC4093
Small Research Project Theory
School of Chemical Eng and Industrial Chemistry
UOC8
Prerequisite/s: 132 units of credit

The course requires that the student elects a topic in Industrial Chemistry, undertake a literature survey on that topic and produce a report.

INDC4094
Small Research Project Practice
School of Chemical Eng and Industrial Chemistry
UOC8
Prerequisite/s: INDC4093

The course requires that the student elects a topic in Industrial Chemistry, undertake a literature survey on that topic and produce a report.

INDC4120
Chemistry of the Industrial Environment
School of Chemical Eng and Industrial Chemistry
UOC3
Prerequisite/s: CHEM1011 or CHEM1031, CHEM1201 or CVEN1531

INDO1001
Introductory Indonesian 1
Department of Chinese & Indonesian Studies
UOC6  HPW6
Excluded: GENT0428

An integrated program for beginners, which combines listening, speaking, reading and writing. Speaking and listening skills are emphasised through communicative activities in class. Students will learn some 750 vocabulary items, and will be able to communicate in practical situations across a wide range of topics.

Note/s: Excluded 2 or 3 Unit HSC Indonesian or equivalent or native speakers of Indonesian and Malay.

INDO1002
Introductory Indonesian 2
Department of Chinese & Indonesian Studies
UOC6  HPW6
Prerequisite/s: INDO1001

Further consolidation and development of language skills acquired in INDO1001.

Note/s: Excluded 2 or 3 Unit HSC Indonesian or equivalent or native speakers of Indonesian or Malay.

INDO2001
Intermediate Indonesian 1
Department of Chinese & Indonesian Studies
UOC6  HPW5
Prerequisite/s: INDO1002

Extensive development of skills already acquired in listening, speaking, reading and writing. The course places special emphasis on communicative activities in class. Students will be expected to develop their preferred skills in areas of their own personal interest and future careers.

Note/s: Excluded HSC Indonesian LBS or equivalent.

INDO2002
Intermediate Indonesian 2
Department of Chinese & Indonesian Studies
UOC6  HPW5
Prerequisite/s: INDO2001
Further development and consolidation of communicative skills and broad knowledge of contemporary Indonesian society.

**Note/s:** Excluded HSC Indonesian LBS or equivalent.

**INDO3001**
**Advanced Indonesian 1**
Department of Chinese & Indonesian Studies
UOC6  HPW4
Prerequisite/s: INDO2002

Advanced learning in the Indonesian language, with special emphasis on professional communication skills, and the analytical discussion of aspects of Australian and Indonesian societies eg cultures of the main islands of the archipelago, technology, trade and Australian-Indonesian relations.

**Note/s:** Excluded HSC Indonesian LBS or equivalent.

**INDO3002**
**Advanced Indonesian 2**
Department of Chinese & Indonesian Studies
UOC6  HPW4
Prerequisite/s: INDO3001

Extends and consolidates advanced learning in the Indonesian language, with emphasis on professional skills and analytical discussion. High level speaking and listening skills are combined with advanced reading and writing.

**Note/s:** Excluded HSC Indonesian LBS or equivalent.

**INDO3035**
**Indonesian Popular Culture**
Department of Chinese & Indonesian Studies
UOC6  HPW3
Prerequisite/s: INDO1102 or INDO2002.

This course builds on students’ general proficiency in Indonesian language to examine various aspects of contemporary Indonesian culture. Topics include: popular drama and literature, youth culture, popular music, media, fashion, film and the impact of globalisation. Authentic Indonesian language video, audio and textual materials are used.

**Note/s:** Open to native speakers.

**INDO3500**
**Contemporary Indonesian Society**
Department of Chinese & Indonesian Studies
UOC6  HPW3
Prerequisite/s: INDO1102 or INDO2002.

The course is taught in Indonesian, and is based on discussion of important issues in modern Indonesian society. Includes the examination of major 20th century Indonesian thinkers. Themes include: nationalism, Islam, East and West, Marxism, the role of students, women, the press.

**Note/s:** Open to native speakers.

**INDO3502**
**Islam in Indonesia**
Department of Chinese & Indonesian Studies
UOC6  HPW3
Prerequisite/s: 36 units of credit

Investigates Islamisation in Indonesia and the role of Islam in Indonesian politics and society. Themes include Islam and art, Islam and politics, Islam and women. Students will gain a broader understanding of Islam in general, and the past and likely future of Islam in Indonesia in particular.

**INDO3503**
**Indonesian Political Culture**
Department of Chinese & Indonesian Studies
UOC6  HPW3
Prerequisite/s: 36 units of credit

Examines the building blocks and processes of Indonesia’s political culture, where geography, history, ideologies, interests, ethnic and national identities coincide and compete. Considers the role of poor peasants, labour and the military. Case studies are used for analysis.

**INDO3900**
**Introduction to Indonesian Studies**
Department of Chinese & Indonesian Studies
UOC6  HPW3
Prerequisite/s: 36 units of credit overall, including 6 units of credit in INDO at credit level or better

Introduces a range of issues in Indonesian Studies, including insider and outsider views, shifts of emphasis in themes and explanations, linguistic issues, and major topics of history, politics, economy, regional cultures, law, literature and language. Includes critical readings of key Indonesian texts, as well as providing a broad overview of current work in the area.

**INDO3901**
**Indonesian Studies Research Methods**
Department of Chinese & Indonesian Studies
UOC6  HPW3
Prerequisite/s: 36 units of credit overall, including 12 units of credit in INDO at credit level or better

Critical readings of Indonesian and English texts raising key issues in analysing Indonesian society and language; questions, themes and debates which have shaped current perceptions of Indonesia; tools and methods for conducting research in Indonesian Studies.

**INDO4000**
**Indonesian Honours Research Full-Time**
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in INDO with an average of 70%.

For Honours (Research) candidates are required to present a thesis of 15,000–20,000 words and complete two seminars as approved by the Head of the Department.

**INDO4050**
**Indonesian Honours Research Part-Time**
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in INDO with an average of 70%.

For Honours (Research) candidates are required to present a thesis of 15,000–20,000 words and complete two seminars as approved by the Head of the Department.

**INDO4500**
**Combined Indonesian Honours Full-Time**
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in INDO with an average of 70%.

Students are required to present a 15,000 - 20,000 word thesis and complete seminars as approved by the Heads of the participating Schools/Departments.

**INDO4550**
**Combined Indonesian Honours Part-Time**
Department of Chinese & Indonesian Studies
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in INDO with an average of 70%.

Students must present a 15,000 - 20,000 word thesis and attend seminars as approved by the Heads of both participating Schools/Departments.

**INFS1602**
**Computer Information Systems**
School of Info Systems, Technology & Management
UOC6  HPW3
Prerequisite/s: 36 units of credit overall, including 12 units of credit in INDO at credit level or better

This course provides students with a basic understanding of the content of information systems; the types of information systems; the current roles of information systems in organisations; and the opportunities for and limitations of information systems within organisations and society.
The course also provides an overview of the tools, techniques and frameworks used to analyse information systems; the range of Information Technologies used to support information systems and to explain their use; the alternative approaches for the development and implementation of information systems; the current technologies for the development of personal information systems and for information searches from a range of sources; and the ethical responsibilities of both the Information System professional and the private user of information.

INFS1603
Business Data Management
School of Info Systems, Technology & Management
UOC6 HPW3

This course provides an introduction to the concepts, design techniques and technology for the storage and management of data. Students gain the required knowledge and practical skills to model data including the use of entity/relationship models and object models; design simple databases in an organisational environment; understand the role of data in business; and understand the quality assurance issues in collecting, storing and using data. Students acquire and exercise skills in a number of data modelling and design techniques as well as develop a simple system using Microsoft Access.

INFS1611
Requirements Engineering
School of Info Systems, Technology & Management
UOC6 HPW1.5
Excluded: INFS2611

This course trains students how to define system requirements using rapid prototyping techniques. Requirements elicitation, analysis and traceability methods are addressed, with emphasis on the roles of user interface design and object-oriented techniques. Students receive hands-on experience with an automated design tool.

INFS2603
Systems Analysis and Design
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS1602 or INFS1611, INFS1603

This course examines system analysis and design: requirements analysis and specification; logical and physical design of business systems. More specifically, the object-oriented (OO) methodology and structured methodology (SDLC) are covered. Hands-on experience with CASE tools used by information systems practitioners is provided (ie MetaEdit and RationalRose).

INFS2607
Business Data Networks
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS1602 or INFS1611

This course provides students with an understanding of data communication and distributed data processing in a business environment; and an understanding of the management issues associated with telecommunication systems. Main topics include data communication concepts; computer networks; reference to international standards and common industry communications software packages; local/metropolitan/wide area networks; network management; telecommunications services; and data security.

INFS2609
Software Implementation
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS1602, INFS1603 or COMP1021 or COMP1721 or COMP2811

This course covers programming in the business context with a commercial object-oriented programming language; defining problems and designing structured programs to solve problems; use of data types, selection, iteration, functions, arrays and data structures in procedural programs; and the use of an interactive development environment.

INFS2611
Requirements Elicitation
School of Info Systems, Technology & Management
UOC6 HPW1.5
Prerequisite/s: INFS1602
Excluded: INFS1611

Students learn how to establish and verify user requirements for information systems; become familiar with the instruments for requirements definition and the criteria for requirements quality assessment; and refine analytical skills for the evaluation of customer needs.

INFS2691
Industrial Training 1
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS1602, INFS1603

A practical treatment of the characteristics of commercial information systems. Topics include analysis of an existing information system; development of overview documentation of the system; evaluation of the interface design; consideration of the role of security and control mechanisms.

Note/s: Available only in Program 3971.

INFS2791
Industrial Training A
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS1602, INFS1603

Students consider the practical treatment of commercial information systems in business. The topics include: analysis of an existing system in its organisational setting; evaluation of the interface design; consideration of organisational impact of the information system.

Note/s: Available only to BCom ISM Co-op students.

INFS3603
Business Intelligence Systems
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS1602 or INFS1611, INFS1603

This course examines the process of decision making and work group activity by professional and managerial people; the tools and techniques available in information technology to support these processes and when they can be advantageously used; some of the reasons why so many executive support systems do not achieve their intended objectives; and the cultural and organisational issues involved in the use of Information Technology tools and techniques.

INFS3604
Information Technology Management
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS2603

This course introduces the strategic and operational management issues involving information systems and software. Consideration is given to both quantitative and qualitative management techniques, including the practical application of tools and concepts for software project management, as well as material on software metrics and software quality. In addition, techniques are covered for strategic planning of information systems and ensuring business contribution.

INFS3605
Implementation Workshop
School of Info Systems, Technology & Management
UOC6 HPW3
Prerequisite/s: INFS2603, INFS2609

Students implement an information systems project using a commercial object-oriented programming language in a workshop environment. Topics include advanced program design; computer aided software engineering techniques; a comparison of a range of programming languages; test data specification; implementation procedures; interfacing an application with a commercial database such as Oracle; the production of system documentation; and the production of quality software.
INFS3606
Telecommunications for Electronics Commerce
School of Info Systems, Technology & Management
UOC6  HPW3
Prerequisite/s: INFS2607
This course considers the strategic issues in telecommunications in business; current and emerging technologies for data networking; and the specification of corporate networks including local and wide area networks; a detailed understanding of the Internet protocol suite; TCP/IP - IP version 4, subnets, TCP, UDP, inter-router protocols, multicasting, IP version 6; security threats, Internet application security issues, firewalls, encryption, digital signatures, network management; and an understanding of non TCP/IP peer to peer networking protocols.

INFS3608
Advanced Database Systems
School of Info Systems, Technology & Management
UOC6  HPW3
Prerequisite/s: INFS1602, INFS1603
This course provides students with an in-depth understanding of database application design and database management for large and small businesses; practical experience using formal database design methodologies in systems development; and an understanding of the technological issues of database systems in a modern IT infrastructure. The main topics include advanced modelling of business applications, database logical design, normalisation through decomposition and synthesis, physical design, concurrency, security, and transaction management issues, contemporary issues of object-oriented databases, advanced database applications, multimedia databases, data warehousing, data mining, OLAP, and client/server design on the Internet.

INFS3611
Design Workshop
School of Info Systems, Technology & Management
UOC6  HPW3
Prerequisite/s: INFS2603 and 96 units of credit
This course consists of a real-life systems development project, conducted in a workshop environment. It provides practical experience in the specification and design of commercial business systems. Requirements definitions, system specifications and logical designs are developed to a professional standard.

INFS3621
Alternative System Design Methodologies
School of Info Systems, Technology & Management
UOC3  HPW1.5
Prerequisite/s: INFS2603
This course reviews current systems analysis methodologies, including the process-driven approach, data-driven approach, object-oriented approach and general approaches such as Soft Systems Methodology. It examines the foundations and philosophies, lifecycle stages and resource demands, applied modeling tools and beneficial applications of each approach.

INFS3622
Distributed Application Design and Implementation
School of Info Systems, Technology & Management
UOC3  HPW1.5
Prerequisite/s: INFS2603
This course considers the design and implementation of distributed and client/server applications. Specific topics include the design, coding, testing and implementation of distributed applications; middleware and its impact on the application design; and distributed computing environments.

INFS3623
Multimedia Systems Design
School of Info Systems, Technology & Management
UOC3  HPW1.5
Prerequisite/s: INFS2603
This course teaches the cognitive principles, concepts and design techniques required in implementing multimedia information systems. Students also gain practical experience with the use of commercial multimedia design software.

INFS3685
Electronic Commerce Management
School of Info Systems, Technology & Management
UOC6  HPW3
Prerequisite/s: INFS2603
This course has been designed to help students develop specific skills relating to the management and application of electronic commerce as well as an understanding of essential concepts and technologies. Topics include: types of electronic commerce; Internet and World Wide Web applications; security; payment systems; applications in the banking, retail and manufacturing industries; problems relating to implementations of electronic commerce; and essential concepts/technologies supporting electronic commerce.

INFS3692
Industrial Training 2
School of Info Systems, Technology & Management
UOC12  HPW6
Prerequisite/s: INFS3605
An in-depth practical exposure to information systems development. Topics include the structure and management of the implementation teams; the roles of users and information staff in implementation; scheduling and control during implementation.

Note/s: Available only in Program 3971.

INFS3792
Industrial Training B
School of Info Systems, Technology & Management
UOC12  HPW6
Prerequisite/s: INFS3603
Students are provided with in-depth practical work in information systems analysis and design. Topics include: the management of requirements analysis and design activities; the roles of information system clients; managing the software process; managing and using technology.

Note/s: Available only to BCom ISM Co-op Students.

INFS4693
Industrial Training 3
School of Info Systems, Technology & Management
UOC12  HPW6
In depth practical work in information systems analysis and design. Topics include: the structure and management of analysis and design teams; the roles of users and Information Systems staff in analysis and design; scheduling and control during analysis and design.

Note/s: Available only in Program 3971.

INFS4774
Information Systems Security
School of Info Systems, Technology & Management
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.
Reviews concepts, theory, methodologies and techniques discussed in IS security literature and practice. Includes: information systems security management, risk analysis and management, physical and logical security, database and telecommunications security, continuity planning, computer abuse, internet and electronic commerce, legal and social issues. Case studies will provide students with an understanding of computerised security techniques in practice.

INFS4793
Industrial Training C
School of Info Systems, Technology & Management
UOC12  HPW6
Prerequisite/s: INFS3604
Students study, in-depth, the business process and its relationship with information systems. Consideration is given to the impact of the system on the organisation and the suitability of the system to the organisation's needs; planning and re-engineering the business; and writing a business project.

Note/s: Available only to BCom ISM Co-op Students.
INFS4795  
**Thesis Part A**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.  

Thesis A is undertaken in the first session of the Honours year. Students undertake directed research work in an approved area under the guidance of a member of the lecturing staff. This course represents the research literature section of the thesis.  

Note/s: Available only to Year 4 Honours students.

INFS4796  
**Thesis Part B**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC18  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.  

Thesis B is undertaken in the second session of the Honours year. Students undertake directed research work in an approved area under the guidance of a member of the lecturing staff. This course represents the research literature section of the thesis.

Note/s: Available only to Year 4 Honours students.

INFS4805  
**Information Systems Auditing**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

Management of information systems audit and the evaluation of IT management. Analysis and review of internal controls in contemporary computer installations and applications. Use of basic and advanced information systems audit techniques and methodologies, including audit software, integrated test facility, and concurrent auditing techniques. Technology audit reviews of the audit requirements for such technologies as LANs, EDI, and expert systems. Legal and professional requirements and computer abuse/fraud auditing. Review of future IS audit techniques, methodologies, research and social implications.

INFS4810  
**Advanced Data Management**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

The principle and practice of data administration in a large organisation. Design, redesign and tuning of database. Distributed databases and database management systems, including reliability, security and integrity of the database.

INFS4811  
**Knowledge Management Systems and Technology**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

The objective of this course is to provide the student with an understanding of the business of managing the generation, formulation, dissemination, retention, storage, measurement, application, distribution, archival and disposal of corporate knowledge. It considers various systems and technology supporting knowledge management. It also addresses knowledge discovery in databases and corporate data warehouses, by identifying understandable patterns in data.

INFS4812  
**Software Engineering Management**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

Software engineering management and measurement of complex systems, software development maturity, project planning and management, estimation models and techniques, project scheduling, software quality, reliability, assurance, software productivity models.

INFS4848  
**Information Systems Project Management**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

An introduction to the central concepts and issues of project management and the practical benefits of project planning and management together with resource management. Practical sessions in project planning and the use of a computer based management tool. Additional topics include customer focus, lifecycle customisation, work packages, progress monitoring, risk evaluation, quality management, people skills, and negotiation skills. Case studies of and examples from software development projects will be used as illustrations.

INFS4853  
**Information Systems Management**  
School of Info Systems, Technology & Management  
Enrolment requires school approval  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

This course aims to assist students to develop their knowledge and understanding of important issues involved in the management of information systems in organisations and their ability to critically analyse these issues. Management of information systems will be considered at strategic, tactical and operational levels. Particular emphasis will be given to the management of enterprise-wide and inter-organisational systems and planning for their strategic use. Students without knowledge of and experience in management or the use of IS in organisations, may wish to undertake Information Systems Project Management INFS4848/INFS5848 before enrolling in this course.

INFS4857  
**Information and Decision Technology**  
School of Info Systems, Technology & Management  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

In a knowledge-based economy, organisational prosperity will largely depend on how successful knowledge workers are at creating and applying new ideas productively and efficiently. This course examines the role of information and models of managerial decision making and prediction; the role of information systems in decision making; assessing the value of information systems and the contribution of information in decision making under uncertainty; the role of information in managerial decision prediction and forecasting; the development of computer based models to support tactical management.

INFS4886  
**Research Topics in Information Systems 1**  
School of Info Systems, Technology & Management  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

The development of science. Alternative social science research methodologies - case study, normative, laboratory, field studies and field tests. The research process. Judgement in research. Statistical analysis of research data and interpretation of results. Writing the research report.

INFS4887  
**Research Topics in Information Systems 2**  
School of Info Systems, Technology & Management  
UOC6, HPW3  
Prerequisite/s: Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.
The objective of this course is to enable the students of information systems research to carry out data analysis using statistical tools for empirical research. It examines both the theoretical aspects of scientific data and statistical analysis and introduces the student to a statistical data analysis package.

**INFS4891**
**Decision Support Systems**
School of Info Systems, Technology & Management
Enrolment requires school approval
UOC6 HPW3
**Prerequisite/s:** Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

This course covers issues in the design, development and implementation of systems designed to support decision-making tasks in organisations. The course reviews models of individual and organisational decision-making and provides an overview of a number of existing and emerging techniques that support decision-making, such as, management science, statistics, expert systems, artificial intelligence, group decision-support systems, data warehousing and data mining. Methodologies for the development and implementation of DSS applications are discussed. Case studies describing organisational experiences with DSS applications will be discussed.

**INFS4893**
**Special Topic in Information Systems**
School of Info Systems, Technology & Management
Enrolment requires school approval
UOC6 HPW3
**Prerequisite/s:** Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

A specially assigned project, program or set of readings relating to information systems research.

**INFS4898**
**Project Seminar**
School of Info Systems, Technology & Management
UOC6 HPW3
**Prerequisite/s:** Entry to Honours plan majoring in Information Systems in Commerce or Science programs 3971 and 3979.

The course gives students a fundamental and practical introduction to the innovation and commercialisation processes of high technology industry. Lecture material includes the psychology and strategies for creativity and idea generation, action, strategic and business planning, technical evaluations, benchmarking, market research, intellectual property and R&D and business funding. Workshops explore the innovation process in terms of the identification and evaluation of commercial opportunities. Case studies examine examples of successful and unsuccessful scientific innovation. The course material is delivered by a team of university academics and expert industry professionals.

**Note/s:** This course is only available to students enrolled in the Diploma of Innovation Management program. Coursework comprises 35 hours during Winter Session.

**NOV2110**
**Business Start Up Skills**
Faculty of Science
UOC3 HPW2

The course enables students to acquire the knowledge, skills and attitudes required to organise and operate a business. Student companies are guided through all the stages of a concentrated business cycle, including establishing the company organisational structure, electing an executive management team, researching, designing and producing goods or services to fill a profitable market niche in the community. The companies plan, develop and implement quality systems in the key management areas of finance, manufacturing, human resources and marketing. Each company is required to prepare a business plan and an annual report. Throughout the course, students tackle typical issues and challenges which confront commercial operations and develop skills for decision making, negotiation, creativity, communication, teamwork and networking, leadership, responsibility and accountability, and financial management and planning.

**Note/s:** This course is only available to students enrolled in the Diploma of Innovation Management program.

**INOV3100**
**Strategic Communication**
Faculty of Science
UOC3

The course material provides a theoretical and practical instruction in evaluating, communicating and marketing technical information, ideas and opportunities to a variety of audiences. Workshops focus on the development of the student’s interpersonal skills including oral presentations, persuasion, negotiation, networking, business ethics and leadership. Other areas covered include analysis of personality and audience types, risk perception, locus of control, negotiation of expert status, effective listening, enquiry and feedback strategies, and meeting facilitation.

**Note/s:** This course is available to students either enrolled in the Diploma of Innovation Management program or having school approval. Coursework comprises 35 hours in a one-week block towards the end of Summer session.

**INOV3110**
**Technical Publications**
Faculty of Science
UOC3 HPW2
**Prerequisite/s:** INOV2100 or INOV2101

Student teams, work with academic mentors to prepare a scientific or technical report suitable for publication. Academic mentors provide data from their research findings, which has been previously documented in the form of research reports, patents and student theses. Students are allocated projects based on their nominated preferences for potential papers offered from a range of bioscience disciplines. The academic mentor clearly defines the background and scope of the work to be written up and supplies all the relevant raw data and reports. The student drafts the entire content of the paper including the Abstract, Introduction, Materials and Methods, Results, Discussion and Conclusions, Bibliography and associated Tables and Figures. Each student receives, instruction and constructive criticism throughout the project from their academic mentor. At the end of the assignment, the student will be expected to be completely familiar with the scientific foundation and objectives of the work covered in the paper. Students gain experience in the complete publication process from initial identification of target journals through to the preparation and submission of the final draft report.

**Note/s:** The course is only available to students enrolled in the Diploma of Innovation Management program.

**INOV4001**
**The Bioentrepreneurial Process**
Faculty of Science
UOC6

The course covers an introduction to accounting, economic and business principles with a focus on the special considerations and parameters particular to the entrepreneurial process involved in the establishment of science-based businesses. Tutorials, workshops and assignments involve the interpretation and preparation of budgets, cost analyses, market projections, project evaluations and financial statements for models of both established and proposed businesses.

**Note/s:** This course is only available to students enrolled in the Diploma of Innovation Management program. Coursework comprises 35 hours in a one-week block at the beginning of Summer session and performance of assignments throughout the Summer session.

**INOV4101**
**Innovation in Practice A (6 units of credit)**
Faculty of Science
UOC6
**Prerequisite/s:** INOV2100 or INOV2101

The course will require involvement of students in practical projects for 4 weeks via placement in innovative workplaces. Projects may be undertaken on either a part-time or full-time basis. Generally projects
will be with businesses in Australia or overseas, but some projects may be offered at the University or related institutions. Preparation and presentation of a report is required at the end of the placement period. The placement may be completed during a vacation period or across a session depending on the placement/project undertaken. Students may incur travel costs, particularly if undertaking placements overseas. The placements are supervised by appropriate academic advisors. Internet based interactions with the supervisor and other students will assist in the integration of experiences with previous theory and in the preparation of the project report.

**Note/s:** This course is only available to students enrolled in the Diploma in Innovation Management program.

**INOV4201**  
**Innovation in Practice B (12 units of credit)**  
Faculty of Science  
UOC12  
Prerequisite/s: INOV2100 or INOV2101

The course will require involvement of students in practical projects for 8 weeks via placement in innovative workplaces. Projects may be undertaken on either a part-time or full-time basis. Generally projects will be with businesses in Australia or overseas, but some projects may be offered at the University or related institutions. Preparation and presentation of a report is required at the end of the placement period. The placement may be completed during a vacation period or across a session depending on the placement/project undertaken. Students may incur travel costs, particularly if undertaking placements overseas. The placements are supervised by appropriate academic advisors. Internet based interactions with the supervisor and other students will assist in the integration of experiences with previous theory and in the preparation of the project report.

**Note/s:** This course is only available to students enrolled in the Diploma in Innovation Management program.

**INOV4301**  
**Innovation in Practice C (18 units of credit)**  
Faculty of Science  
UOC18  
Prerequisite/s: INOV2100 or INOV2101

The course will require involvement of students in practical projects for 12 weeks via placement in innovative workplaces. Projects may be undertaken on either a part-time or full-time basis. Generally projects will be with businesses in Australia or overseas, but some projects may be offered at the University or related institutions. Preparation and presentation of a report is required at the end of the placement period. The placement may be completed during a vacation period or across a session depending on the placement/project undertaken. Students may incur travel costs, particularly if undertaking placements overseas. The placements are supervised by appropriate academic advisors. Internet based interactions with the supervisor and other students will assist in the integration of experiences with previous theory and in the preparation of the project report.

**Note/s:** This course is only available to students enrolled in the Diploma in Innovation Management program.

**INST1000**  
**World History A**  
School of History  
UOC6  HPW3  
Prerequisite/s: Enrolment in Program 3424 or 4765;  
Excluded: ASIA1000, HIST1016, HIST1017, INST1000

Focuses on the basic features and forces which have shaped human history from the origins of civilisation to modern times. The first part of the course covers selected major civilisations (eg, Roman Empire, Han China) while the second covers transnational issues such as nomadism, trade between civilisations, disease and climate. The final part covers the origins and nature of modernity, to the 19th century.

**INST1200**  
**World History B**  
School of History  
UOC6  HPW3  
Prerequisite/s: Enrolment in Program 3424 or 4765;  

Focuses on the major forces and features of twentieth century world history. Includes empires, modernity, nationalism, fascism, decolonisation, communist revolutions, total war, genocide, the growth of the media, social movements, environment, ‘Americanisation’, and terror.

**INST1300**  
**International Relations in the 20th Century**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: Enrolment in Program 3424 or 4765;  
Excluded: INST1001, POLS1017

Traces the development of international relations and its major concepts and theories through key themes and events in international history over the past century. Examines ways in which international politics is viewed, and the events, forces, and trends that provide context and justification to these theories. Introduces the major theories of international relations, as well as developments such as the Cold War and the arms race, decolonisation and revolution, globalisation, and the rise of international organisations.

**INST1400**  
**International Relations: Continuity & Change**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: Enrolment in Program 3424 or 4765;  
Excluded: INST1002, POLS1020, POLS2005

An introduction to world politics and its study by scholars of International Relations. The course is in three sections which deal respectively with the key actors in, the dynamics of, and issues currently facing, the system of international politics.

**INST2000**  
**(Un)Making the Third World: History & Global Development A**  
Department of Spanish and Latin American  
UOC6  HPW3  
Prerequisite/s: Enrolment in International Studies or International Studies/  
Law programs, 36 units of credit;  
Excluded: COMD2020, GLST2102, HIST2061, SPAN2429

Explores the history of underdevelopment and development in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. Themes include: colonialism, nationalism, decolonisation and post-colonial states; the history and politics of development in the Cold War and post-Cold War era; the state and economic development; the role of international organisations such as the World Bank and the IMF; and the question of globalisation. 

**INST2010**  
**Globalisation and Fragmentation**  
School of Sociology and Anthropology  
UOC6  HPW3  
Prerequisite/s: Enrolment in International Studies or International Studies/  
Law programs, 36 units of credit;  
Excluded: SOCA2103

Central to the concept of globalisation is the idea of the expansion and development of global capital and the ascendancy of transnational over national forms of economy, society, politics and culture. Globalisation is transforming the character of social boundaries and attachments. Individuals, families, and communities are no longer enclosed in the same way by geography or social worlds. People have become more internationally mobile and so have corporations and whole industries. Global cultures have emerged based on mass communication, media and consumer goods. Draws on the work of Appadurai, Friedman, Tilly, Taylor and Hall to explore concepts such as: identity, borders, migration, global communication, global culture, place and displacement, development, organisation, disorganisation (chaos), sociality and futures.
INST2300
International Law: Power, Politics and Ideology
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs, 36 units of credit;
Excluded: POLS2037

International law is integral to the system of international politics. It is the medium through which states and other actors negotiate their positions on a vast array of subjects and via which politics has, over recent decades, undergone a process of globalisation. Introduces students to the alternative approaches to analysing the political role of international law and examines the role of international law in particular case study scenarios.

Note/s: No prior knowledge of law is assumed.

INST2400
The Theory and Practice of Development
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs, 36 units of credit;
Excluded: COMD2000, GLST2104, POLS2023, SLSP2701

The theories developed to explain the different rate and pattern of economic and social development within and between countries and regions and the policy consequences of these explanations are analysed and compared. The theories covered include explanations for different rates of development internal and external to nation states based on social, market, technological and other factors. Significant cases studies of policy experience from Latin America and Asia, where a variety of economic and social policy approaches have been adopted are examined. The current status of debates about the nature of underdevelopment and its solutions is reviewed.

INST2401
Sustainable Development, Globalisation and the Third World
School of History and Philosophy of Science
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs, 36 units of credit;
Excluded: COMD2050, HPSC2550, SCTS3106

This course is about sustainable development along with the technological and social changes that are involved in achieving it, both at a national and global level. It is divided into three parts: (1) the historical causes of the present global environmental and economic crisis; (2) possible solutions to problems of food production, environmental degradation, industrialisation, energy use, and population growth; (3) ideas for a New World Economic Order and the economic and technological changes required to bridge the ever increasing gap between rich and poor nations.

INST3000
Globalisation and the International System
School of History
UOC6 HPW3
Prerequisite/s: 96 units of credit and enrolment in program 3415 or 4768
Excluded: GLST3000

Focuses on the nation-state system in an era of regionalisation/regionalism and globalisation/globalism. Looks at the role of warfare and military institutions in the rise and transformation of the international system. Various regions and the different forms of regionalism that have emerged in the post-Cold War era are examined, including Europe, the Americas and the Asia-Pacific. Of particular concern is the changing character of state sovereignty. The history and contemporary significance of the United Nations is examined, as is the question of ‘failed states’ and ‘nation-building’ in the post-Cold War era.

INST3101
Individual Study Program A
International Studies Unit
Enrolment requires school approval
UOC24

An individual sessional program of study normally at an overseas institution as approved after consultation with the relevant coordinator.

INST3102
Individual Study Program B
International Studies Unit
Enrolment requires school approval
UOC24

An individual sessional program of study normally at an overseas institution as approved after consultation with the relevant coordinator.

INST3300
Theorising International Political Economy
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: Enrolment in program 3413 or 3414 or 3415 or 3416 or 4766 or 4767 or 4768 or 4769 and 36 units of credit;
Excluded: POLS3054

Introduces key perspectives and central issues in the study of international political economy. Establishes links between theories about the relationship of politics and economics, and the analysis of key structures and processes in the world economy. Explores the theories and concepts designed to investigate the expansion and globalisation of a world economy. Key substantive issues include state-firm relations, production, international trade, and monetary relations.

INST3301
Economic Growth, Technology and Structural Change
International Studies Unit
UOC6 HPW3
Prerequisite/s: Enrolment in International Studies or International Studies/ Law programs, 36 units of credit;
Excluded: ECON3109

The process of economic development is never smooth. It is associated with profound changes in the fundamental structure of economic society. The rate of growth and development varies substantially between different economies. The course seeks to explain the factors that determine how societies grow and develop, with special emphasis on the role of technology and finance. Various approaches will be examined, and attention will be paid to problems associated with growth, including those relating to equity and human rights issues.

INST3900
International Studies Advanced Seminar
School of History
UOC6 HPW3
Prerequisite/s: 96 units of credit in International Studies or International Studies/Law programs

Provides an opportunity for students to evaluate experiences and ideas gained abroad during the International Studies overseas study program in the light of recent scholarship in the field of International Studies. Particular attention will be given to debates over whether international change can be best understood through paradigms which emphasise the primacy of the state and interstate dynamics, or as evidence of newly transforming processes often labelled as ‘globalisation’. Explores these competing forces and the responses to them of governments, institutions and peoples.

INTA2101
Design Studio 1
Interior Architecture Program
UOC6 HPW5

Introduction to the principles of design and their application in studio-based learning exercises to two- and three-dimensional design. Explorations of many of the influences on design thinking and practice, including the philosophical, historical, social and environmental. Critical thinking and expression in different forms. Studio projects and assignments will attempt in particular to address issues raised in the Theory coursework and to apply skills learned in the Communications coursework. Core considerations: ideation - design as purposeful designation; the development and expression of design ideas in many modes; the role of the ideogram in ideation; the role of analysis in design.

INTA2102
Design Studio 2
Interior Architecture Program
UOC6 HPW5
An introduction to the design of space for human habitation. Design projects culminating in the design of a small-scale habitat. Core Considerations: ergonomics and anthropometrics; domestic scale construction systems; principles of structural stability; environmental and energy issues.

INTA2111
Theory 1
Interior Architecture Program
UOC3 HPW2

The study of the discipline of design, understood as designation for a purpose, demands an enquiry into the principles that govern its operation. A general theory of design process: aim, possibility, act and fulfilment. Each of these is investigated within the context of the human life that is to be served and the world order that forms the backdrop to the this life. The role of ‘ideas’ in design is discussed in relation to the process of analysis and synthesis that is fundamental to designing.

INTA2112
Theory 2
Interior Architecture Program
UOC3 HPW2

An introduction and exploration of the central theme of western European architectural design, modernism, as it emerges from practices such as philosophy, art and architecture, from the European Enlightenment until the late 20th century. Comparison is made between buildings that exhibit modern features and non-modern features to show that the discourse of modernism is more extensive and complex than architectural modernism.

INTA2114
Program Exhibition Design
Interior Architecture Program
Enrolment requires school approval
UOC6
Prerequisite/s: INTA2101, INTA2102.

This course will encompass the entirety of the creation, management, administration and organisation of the end of session student exhibition. A maximum of 10 students will be selected to liaise with staff, industry and the student body to showcase excellence in the Interior Architecture program. This course serves as a precursor to the graduating student exhibition. Students need to submit expressions of interest to Lisa Zamberlan.

INTA2115
European Study Tour
Interior Architecture Program
UOC6
Prerequisite/s: INTA2201, INTA2202.

An intensive two week tour in which students are required to participate in design based workshops/installations to be completed/exhibited on tour. A maximum of 15 students will be selected to participate in architectural tours, industry events and academic workshops. Students are required to submit expressions of interest to Lisa Zamberlan.

INTA2121
History 1
Interior Architecture Program
UOC3 HPW1

An introduction to key aspects of Western architectural and design history, from Antiquity to the mid 19th century. Aspects of Chinese, Japanese and Southeast Asian architectural and design history will also be examined. Major themes, such as tradition and revival, will be explored within specific social, economic and political contexts. Their relevance to contemporary practice will also be considered.

INTA2122
History 2
Interior Architecture Program
UOC3 HPW1

An examination of the history of modern design from the mid 19th century to the mid 20th century. This will involve close study of the work of particular architects, interior designers and theorists. Issues to be considered include: design and technology, design and social morality, internationalism and universality and the ‘total work of art’. Feminist and gender critiques of modern design will be discussed.

INTA2141
Communications 1
Interior Architecture Program
UOC6 HPW4

An introduction to the communication skills necessary in the study and practice of interior architecture. Students will develop capabilities in life drawing, freehand sketching, colour theory and the principles of perspective in a variety of techniques and media. These skills will be extended in a series of model making workshops using materials such as card, acrylics and timber. An introduction to the technology of computing and information technology as it pertains to the disciplines of the built environment. Topics include basic operation of a computer, information handling, networks and communications, computer graphics, CAD technology and computational processes.

INTA2142
Communications 2
Interior Architecture Program
UOC6 HPW4

An extension of fundamental presentation and communications skills established in Communications 1. Explorations of a variety of compositional modeling and media techniques will extend into discipline based specific drawing practices and presentation skills for the visual presentations of design based projects. A series of structured workshops will develop skills in freehand and technically constructed perspective, axonometric, isometric and rendering techniques. A component of computer based technical drawing skills is included. Workshops exploring skills for making oral presentations & practical research involving projects based around issues of universal design.

INTA2171
Technology 1
Interior Architecture Program
UOC6 HPW4

The course is divided into two distinct components - Ecological Sustainable Design and Structures. Ecological Sustainable Design: Introduction to the ecological and social issues facing society today with a particular focus on their relationship to the built environment. Particular focus on concepts of social responsibility, environmental accountability and ecological sustainability and their implications for the urban/built and natural environments. The Life Cycle Assessment (LCA) of materials, their use in the built environment as well as national and international case studies and their relationship to ESD will be examined. Structures: Understanding and examining how structures work without the need for mathematical formulas. The concept of forces, load transfer, strength, stability and stiffness will be examined. The course will outline key structural behaviour, concepts and focus upon basic structural elements and systems. The emphasis will be upon general principles and their graphical analysis using case studies throughout history to examine this further.

INTA2172
Technology 2
Interior Architecture Program
UOC6 HPW4

The course is an introduction to both the craft and the discipline of architectural drafting and to the principles of construction. There will be an introduction to constructional systems including small-scale timber structures, small-scale masonry construction with a brief analysis of constructional principles. A further study of structural elements, systems and materials with case studies will also be explored. The study will take place in parallel with a study of architectural drafting with emphasis upon the craft and discipline aspects of the practice. There will be an introduction to the Australian Standards dealing with the architectural drafting and to drawing conventions. Consideration will be given to sketching, measuring and documenting buildings. An exploration of the relationship between design and technology and the witness of actual building sites will also form part of this course.
INTA2201
Design Studio 3
Interior Architecture Program
UOC6   HPW5
Prerequisite/s:  INTA2101, INTA2102.
Design projects centering on the design of small-scale interiors for relatively simple patterns of life. Core Considerations: exploration of the life-event as the origin of human aims in design; clarification of design aims; spatial ordering systems; inside/outside relationships; connections and transitions; the central idea - concept; formal presentation of the concept; ideas as ordering principles in design; translation of ideas into architectural space; natural and artificial lighting; construction detailing as a design activity.

INTA2202
Design Studio 4
Interior Architecture Program
UOC6   HPW5
Prerequisite/s:  INTA2101, INTA2102.
Design projects related to residential patterns of life. Core Considerations: public/private realms; home as hearth; dwelling; sense of place; appropriate materials in the domestic context; sustainability as a general principle; passive energy systems; construction detailing as a design activity.

INTA2211
Theory 3
Interior Architecture Program
UOC3   HPW2
Prerequisite/s:  INTA2111, INTA2112.
Theory of Form. The ontological and causal basis of the antinomical qualities of Form. An investigation of these qualities reflected in the natural world and in art and architecture through the ages. A critical appraisal of current thought and practice in design based on this investigation with a view to postulating improvements to design processes and outcomes that are judged to have shortcomings in relation to the theory of Form.

INTA2212
Theory 4
Interior Architecture Program
UOC3   HPW2
Prerequisite/s:  INTA2111, INTA2112.
In modernism and the critique of modernism there emerge a number of themes. Three of these themes will be briefly investigated in this course. These themes are technology, representation and feminism. The reason for addressing these three themes is that they comprise a common ground between architecture and other current concerns in a more general cultural sense, especially in politics. Each theme is accompanied by readings that offer a range of arguments among which students will apply critical discourse in order to establish their own critical orientation.

INTA2221
History 3
Interior Architecture Program
UOC3   HPW1
Prerequisite/s:  INTA2121, INTA2122.
An examination of the theory and practice of architecture and interior design in the late 20th century in relation to developments in visual culture generally. Issues to be explored include: design as polemic, design and youth, design and popular culture, design and fashion, design and the media. Postmodernist theory and production will provide primary contexts for discussion and debate.

INTA2222
History 4
Interior Architecture Program
UOC3   HPW1
Prerequisite/s:  INTA2121, INTA2122.
A detailed exploration of recent issues in design practice. This will involve close study of the work of particular interior architects and designers. Discussion will be based around three primary themes: public and private spaces; cross-disciplinary and intermedia approaches; cross-cultural interaction and self-determination. There will be a strong Australian emphasis, with guest lecturers providing specialist input.

INTA2241
Communications 3
Interior Architecture Program
UOC3   HPW3
Prerequisite/s:  INTA2141, INTA2142.
This course extends capabilities and techniques in visual presentation. Students will be encouraged to explore a variety of graphic, compositional and media techniques as an extension of design intent. Projects will provide opportunities to develop and refine individual skills in graphic presentation, layout, photography and Photoshop techniques.

INTA2271
Technology 3
Interior Architecture Program
UOC3   HPW2
Prerequisite/s:  INTA2171, INTA2172.
Materials and Detailing. Materials: Materials used within the built environment may be understood with reference to their manufacture, characteristics, ecology and the craft associated with their utilisation. The course will look at both soft and hard materials as the media of interior design. Time shall be given to the finishing aspects of materials. Detailing: The formal study of materials in lectures shall be put into practice in the studio with exercises dealing with the application and documentation of such materials within architecture and interior design. Studies shall look at detailing a small-scale building/interior with emphasis given to construction documentation. Witness to construction sites, manufacturing and various current Sydney designer works will also form part of this course.

INTA2272
Technology 4
Interior Architecture Program
UOC3   HPW2
Prerequisite/s:  INTA2201, INTA2202.
Materials and Detailing: An advanced study of the use of materials in structure, as finishes, the characteristics, ecology and craft associated with their utilization, including case studies of their application. A study of the joining, design and documentation of the detailing of materials for the interior will be thoroughly explored with examples and case studies. An advanced study of materials in lectures shall be put into practice in the studio with exercises dealing with the application and documentation of such materials within architecture and interior design. Studies shall look at detailing a small-scale building/interior with emphasis given to construction documentation, using either AutoCAD or hand drafted drawings. Witness to construction sites, manufacturing and various current Sydney designer works will also form part of this course.

INTA2301
Design Studio 5
Interior Architecture Program
UOC6   HPW5
Prerequisite/s:  INTA2201, INTA2202.
Design projects dealing with small to medium scale commercial, retail or public facilities. Core Considerations: materials and meaning in architecture; furniture and fitments; connections, junctions, mediating elements and tolerances; acoustics; building services, regulations and codes; access and egress; air conditioning and ventilation systems.

INTA2302
Design Studio 6
Interior Architecture Program
UOC6   HPW5
Prerequisite/s:  INTA2201, INTA2202.
Design projects dealing with medium to moderately-large scale commercial, retail or public facilities. Core Considerations: preparing finishes selections; incorporation of textiles into the design; preparing sample boards; space analysis and feasibility of facility and the user requirements; designing through the contact documents; budgeting.
INTA2371
Technology 5
Interior Architecture Program
UOCS HPW2
Prerequisite/s: INTA2271, INTA2272.

INTA2372
Technology 6
Interior Architecture Program
UOCS HPW2
Prerequisite/s: INTA2271, INTA2272.

Thermal Comfort and Advanced ESD: Integration of passive design strategies into buildings and understanding the concepts of human thermal comfort to integrate without mechanical heating and cooling. Skills for carrying out a sun analysis. There will be an introduction to thermal evaluation and design tools, correlation and simulation models. Case studies of traditional and more technologically advanced built environments will be discussed. Building Services: Building services, regulations and standards: air-conditioning, plumbing, telecommunications, lighting, electrical and mechanical services. Implications for the design of interior space. Relationship to best practice principles of passive energy design and energy conservation. Fire protection systems and regulations. Working within the parameters of the Building Code of Australia, Standards Association of Australia standards and the requirements of other Statutory body pertaining to buildings in general and to interiors specifically.

INTA2382
Professional Practice 1
Interior Architecture Program
UOCS HPW2
Prerequisite/s: INTA2301.

This is the first of two consecutive courses in the BIA Practice Stream that aim to introduce Interior Architecture students to the principles of management and best practice. The practice notes and contracts used by the various professional bodies will be examined through lectures, tutorials and assignments. A thorough investigation into project management procedures, building authorities, project costing, estimating and specification to project successfull project delivery. Allowance has been made for students to undertake between 280 and 490 hours of non-compulsory practical professional experience in approved employment between the two consecutive Professional Practice courses commencing at the end of Session 2, Year 3 and finishing by the beginning of Session 2, Year 4. Those who gain such experience may submit a ‘certified logbook’ (contact lecturer for details) of their work for consideration in the assessment of INTA2482 Professional Practice 2 where, at the discretion of the Head of Program the mark gained may be substituted for one of the assessable components of the course to a maximum value of 40% of the total mark for the course. This does not obviate the necessity for all students to complete all assessable components of this course.

INTA2401
Design Studio 7
Interior Architecture Program
UOCS HPW5
Prerequisite/s: INTA2301, INTA2302.

Design projects dealing with medium to large-scale commercial facilities. Core Considerations: the design concept as an expression of a developed personal theoretical position on design; needs analysis and preparation of client briefs; innovation with technical and pragmatic programs; professional verbal presentation skills; best professional practice and quality assurance measures; health and safety issues; space planning and facilities planning and management; skills for designing to a budget.

INTA2402
Graduation Project
Interior Architecture Program
UOCS HPW4
Prerequisite/s: INTA2401, INTA2441, INTA2411 and 168 units of credit.

An approved self-selected large-scale project carefully chosen and executed to demonstrate proficiency in every aspect of the program. The project, though hypothetical, must be based on a real situation with site, client and brief and be carried out under the guidance of an academic supervisor. A mentor scheme running concurrently will seek to align each student with a professional mentor to provide further guidance. The Graduation Project will be examined in a personal presentation made to a jury of professional designers and academics. The theoretical basis for the Graduation Project is established in the Dissertation a precis of which is to form part of the final submission in this course.

INTA2411
Dissertation
Interior Architecture Program
UOCS HPW3
Prerequisite/s: INTA2302.

The dissertation is to be a written work of scholarship of between 8,000 and 10,000 words that deals with the theoretical basis of the student's proposed Graduation Project to be undertaken in the final session of the program. It will demonstrate the student's ability to thoroughly research an approved topic and present a well-reasoned argument in support of a clearly stated hypothesis. It is to be completed before the commencement of the Graduation Project. A precis of the dissertation will be submitted as part of the final presentation of the Graduation Project.

INTA2441
Project Research
Interior Architecture Program
UOCS HPW3
Prerequisite/s: INTA2302.

This course is devoted to laying the foundations for the Graduation Project. It incorporates the development of the design brief; a typological study of relevant buildings and contexts, a thorough analysis of the site of the proposed project and a report on the context of the project and the impact of all regulations and standards. The whole is to be submitted in the form of a report.

INTA2482
Professional Practice 2
Interior Architecture Program
UOCS HPW2
Prerequisite/s: INTA2382.

The course will examine practical and legal aspects of design practice, examining legal contracts, company structures, issues of professional indemnity, professional liability. The course will provide in depth discussions on professional ethics and code of conduct; methods of fee structure, advanced issues in the conditions of engagement, contract variations and general project administration systems; preparing fee proposals and marketing a design practice.

IRSH2002
Identity, Culture, Politics: Ireland and Australia in the 20th Century
School of History
UOCS HPW3
Prerequisite/s: 36 units of credit; Excluded: HIST2019.

Examines the political, economic and social changes that took place in Ireland and Australia during the course of the 20th century as they became increasingly independent of Great Britain. Compares and contrasts developments in both countries in terms of national identity, constitutional arrangements with Great Britain, the impact of war, politics, economics and social issues.

IRSH2012
Contemporary Irish Literature
School of English
UOCS HPW3
Prerequisite/s: 36 units of credit; Excluded: ENGL3471.
Critically examines the poetry and prose written by Irish writers after WWII in terms of issues of identity, nationality, gender, landscape, language, tradition, and religion. Considers how Irish poets have coped with the legacy of Yeats, Irish novelists with the legacy of Joyce and what their writing tells us about present-day Ireland and the contemporary world.

**IRSH2013**  
*Myths of Self and Society - Irish Writing and Its Relevance for Australian Society*  
School of English  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: ENGL3302

Not only have Irish writers figured prominently as modernists and postmodernists but they have persistently and often controversially engaged the society of their day. Studies the way selected writings of Wilde, Synge, Yeats, Joyce, O'Casey, Beckett and Heaney image the Irish situation and examines the implications for contemporary Australian society.

**IRSH2104**  
*Poetry, Virtue, Corruption: Milton to Burns*  
School of English  
UOC6 HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: ENGL2104

Studies how English, Irish, and Scottish poets from 1660-1800 define themselves in relation to a culture which they deem to be corrupt. Moves from Milton as the single just man in a society that has betrayed the godly revolution to the poet as libertine in Rochester and Behn, and the poet as political propagandist in Dryden. Sees how Finch, Swift, Pope, Wortley-Montague, and Johnson detach themselves and poetry from political life. Later poets show that once you do this, what is left are passion, death, superstition, madness, and small animals.

**ITAL1001**  
*Introductory Italian 1*  
School of Modern Language Studies  
UOC6 HPW5  
Excluded: GENT0429

Introduces the main structures of Italian language and provides an overview of contemporary Italian history and society. The language component develops all four language skills, with a particular focus on the development of grammatical accuracy. The cultural component consists of a series of lectures which offer insights into some of the salient issues of Italian history from Unification to the present.  
*Note/s:* Students who have taken HSC Italian and students who have any formal training from another source should apply to enrol as Cross Institutional students at the University of Sydney. Excluded: Students qualified to enter a higher level course.

**ITAL1002**  
*Introductory Italian 2*  
School of Modern Language Studies  
UOC6 HPW5  
Prerequisite/s: ITAL1001

Builds on the structures acquired in ITAL1001. The cultural component explores aspects of twentieth-century Italian cultural, social and political life through weekly lectures that examine major literary and cultural movements and figures, followed by a guided reading and analysis of texts in weekly seminars.

**JAPN1000**  
*Japanese Communication 1B*  
Department of Japanese and Korean Studies  
UOC6 HPW6  
Prerequisite/s: JAPN1000

Introduces some of the basics of modern Japanese through listening, speaking, and reading activities. Covers five broad themes including introducing oneself, talking about university experiences, housing, Japanese geography, and daily routines. Hiragana and katakana are also introduced. Communicating in socio-culturally appropriate ways are stressed throughout the course.
Explores contemporary Japanese culture including Manga, Anime, films, theatre, and J-pop songs. The course combines the studies of culture and language through selected texts, tapes, videos and other materials, and field trips when possible. Different levels of language proficiency are catered for by options in assignments.

**JAPN2701**
**Learning Japanese by Reading Manga**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: Available to students who have completed at least Japanese 2A. Not available to students who have completed Japanese 4A or higher;
Excluded: JAPN37** range of courses

Investigates the vocabulary, grammar and kanji using manga as the primary resource. Socio-cultural aspects of each manga are also studied. Includes reading out loud, the creation of an original manga narrative, and specific language based assignments.

**JAPN3000**
**Japanese Communication 3A**
Department of Japanese and Korean Studies
UOC6 HPW5
Prerequisite/s: JAPN2001

Equips students with solid linguistic skills at intermediate level, with increasing emphasis on reading and writing. Introduction to a variety of local Australia-Japan contact situations and expanding practical usage of students’ interactive skills. Approximately 150 new Kanji are introduced.

**JAPN3001**
**Japanese Communication 3B**
Department of Japanese and Korean Studies
UOC6 HPW5
Prerequisite/s: JAPN3000

Further development of communicative skills and competence attained in JAPN3000. Students use Japanese in a wider context, thereby increasing vocabulary and knowledge of grammatical structures. Another 150 Kanji are introduced.

**JAPN3205**
**Business Japanese**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: JAPN2001; Excluded: JAPN3500, JAPN37** range of courses

Concentrates on interactive skills for business situations, including reading and writing. Introduction to technical language of accounting, finance, economics and marketing and develops skills needed in typical formal and informal business contact situations, such as business introductions and meetings, business conversation, written channels of communication and business etiquette.

**JAPN3300**
**Discover Japanese Grammar A**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: JAPN2001

The grammar of modern Japanese will be introduced systematically as interrelated choices Japanese language users make in order to exchange meaning in the context of social communication. Provides students who already have an intermediate to advanced knowledge of Japanese with an opportunity to rediscover the workings of the grammar of Japanese. A wide variety of natural spoken and written text examples will be used holistically in order to illustrate various features of the grammatical system of Japanese.

**Note/s:** Instruction will be given mainly in Japanese but also in English.

**JAPN3301**
**Discover Japanese Grammar B**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: JAPN2001

Further investigation of the grammar of modern Japanese as an overall grammatical system. Expands the grammatical domains of enquiry of JAPN3300 by including some new areas of grammar whereby logic is constructed. Provides a more detailed map of the areas that are already familiar.

**Note/s:** Instruction will be given mainly in Japanese with some English.

**JAPN3400**
**Japanese Communication 4A**
Department of Japanese and Korean Studies
UOC6 HPW5
Prerequisite/s: JAPN3001; Excluded: JAPN4000

Concentrates on acquisition of late-intermediate to early-advanced interactive skills in Japanese with continued emphasis on reading and writing. Introduction to basic linguistic features of advanced level Japanese and provides opportunities to practise skills needed in typical formal and informal Australia-Japan contact situations. Approximately 150 Kanji are introduced.

**JAPN3401**
**Japanese Communication 4B**
Department of Japanese and Korean Studies
UOC6 HPW5
Prerequisite/s: JAPN3400 or JAPN4000; Excluded: JAPN4001

Prepares students in acquisition of well-rounded linguistic and communicative competence necessary for advanced learners. Further extension and systematic practice of interactive skills. Another 150 Kanji are introduced.

**JAPN3501**
**Japanese Studies Internship**
Department of Japanese and Korean Studies
Enrolment requires school approval
UOC6 HPW3
Prerequisite/s: JAPN2500 or JAPN3900 and JAPN3001 or equivalent

Fourteen days of internship placement in a Japanese or Japan-related government, other public, or commercial organisation. Students will use their skills and knowledge in Japan-specific professional communication tasks and enhance their Japanese literacy and professionally relevant proficiency. They will also gain practical knowledge of Japanese work organisation and management styles.

**JAPN3601**
**Cultural Studies and Japan**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: 36 units of credit

Critically explores how popular culture, leisure and consumption are inter-related with identity construction in Japan, as well as how social and cultural ideologies, beliefs and values are produced, reproduced, challenged and changed within the fields of popular culture. Also examines the globalisation of Japanese popular culture both inside and outside of Japan and discusses how this relates to such issues as cultural imperialism, cultural hybridity, transnationality and diaspora.

**JAPN3603**
**Japanese Literature and Language**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: JAPN3001; Excluded: JAPN4000

Offers a collage of great works of modern and contemporary Japanese literature. Through language-based reading of selected works of Japanese literature, the course provides students with an opportunity to “meet” great writers Japan has produced and also with a challenge to learn how their brilliance is reflected in the way they engage with the Japanese. The literary collage consists of a variety of literary texts, but it also includes verbal art in drama and films.
JAPN3700
Expressing Oneself in Japanese
Department of Japanese and Korean Studies
UOC6   HPW3
Prerequisite/s: JAPN3401, JAPN4001 or equivalent
Develops acquisition of advanced Japanese language and communication by providing a comprehensive approach that uses creative and expressive skills. Contemporary authentic materials (film, TV dramas, plays, and literature texts) are used to enhance understandings of popular culture while developing Japanese speaking and writing skills. Focuses on refining pronunciation, use of colloquial Japanese in both casual and formal situations at the advanced level.

JAPN3701
Advanced Study of Spoken Japanese
Department of Japanese and Korean Studies
UOC6   HPW3
Prerequisite/s: JAPN3401 or JAPN4001; Excluded: JAPN4101
Develops speaking skills through intensive focus on various registers of spoken Japanese. Explores different speaking styles, informal to formal forms including talk, report, discussion, debate, interview, public speaking and presentation. Covers current Japanese socio-cultural issues. Aims to fill the gap between language competence and academic/intellectual interests.

JAPN3702
Politeness in Interaction with (the) Japanese
Department of Japanese and Korean Studies
UOC6   HPW3
Prerequisite/s: JAPN3401 or JAPN4001
Focuses on improving performance in politeness in interaction with Japanese. Deals with the range of theoretical approaches to politeness. Explores the ways in which participants in Contact Situations negotiate and manage the levels and expressions of politeness as scenes develop in the situation.

JAPN3703
Approaches to Japanese Discourse Analysis
Department of Japanese and Korean Studies
UOC6   HPW3
Prerequisite/s: JAPN3000
Introduces specific features of Japanese discourse and how they are socio-culturally interpreted. Presents a variety of approaches to Japanese discourse analysis through an application of the structures and strategies of Japanese discourse to daily communication in Japanese.

JAPN3900
Introduction to Japanese Studies (Advanced)
Department of Japanese and Korean Studies
UOC6   HPW3
Prerequisite/s: 36 UOC in Level 1 including 6 UOC in JAPN at Distinction level; Excluded: JAPN2500
An in-depth examination into Japanese society, culture, politics, economy, and language. Explores topics ranging from Japan’s political and economic system to popular culture, consumer society, gender, and globalisation. Emphasis is given to a critical examination of these issues within a multidisciplinary analytical framework.

JAPN3901
Introduction to Research in Japanese Studies
Department of Japanese and Korean Studies
Enrolment requires school approval
UOC6   HPW3
Prerequisite/s: JAPN2001 plus a Distinction average in JAPN courses.
Provides students with a framework for analysing problems in the field of Japanese Studies, including a theoretical framework and types and sources of problems. Where possible, students carry out empirical data collection and are guided through the analysis of and search for possible solutions to these problems.

JAPN3902
Readings in Japanese Studies (Pre-Honours)
Department of Japanese and Korean Studies
Enrolment requires school approval
UOC6   HPW3
Prerequisite/s: JAPN3000 or higher plus a Distinction average in JAPN courses.
Students read Japanese and English writings in selected fields of Japanese Studies. Students intending to enter the Honours program read extensively in the area of their research fields. They develop ability to read academic writings proficiently and critically, acquire comprehensive understanding of the fields and produce an annotated bibliography of their reading.

JAPN4500
Japanese Studies Honours (Research)
Department of Japanese and Korean Studies
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in Japanese Studies, including JAPN3901 and JAPN3902, an overall WAM of 65 or higher, Distinction average or higher in all Japanese courses and the completion of a major with a minimum language level of JAPN3301
The Honours program consists of a thesis between 15,000 and 20,000 English words or 32,000 - 40,000 Japanese characters in an approved area of Japanese Studies as well as compulsory language study. Note/s: Students who complete the Honours program with JAPN4101 or a higher level will be recognised as having completed the Japanese Studies Advanced Program.

JAPN4550
Combined Japanese Studies Honours (Research)
Department of Japanese and Korean Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in Japanese Studies, including JAPN3901 and JAPN3902, an overall WAM of 65 or higher, Distinction average or higher in all Japanese courses and the completion of a major with a minimum language level of JAPN3301
The Honours program consists of a thesis between 15,000 and 20,000 words in an approved area of Japanese Studies as well as compulsory language study. Note/s: Students who complete the Honours program with JAPN4101 or a higher level will be regarded as having completed the Japanese Studies Advanced Program.

JWST1000
The Modern Jewish Experience: Emancipation to the Holocaust
School of History
UOC6   HPW3
Excluded: HIST1030
The progress towards emancipation of the Jews in the 18th and 19th centuries was driven not only by Enlightenment ideas of equality and tolerance, but also by highly pragmatic considerations. While initially, for the most part, enthusiastic objects of this process, European Jews grew increasingly aware of the conditions attached to it and of its real and potential dangers. Traces the history of emancipation, its achievements and failures, and the light it sheds on the development of European societies.
Explores the origins of modern Jewish nationalism, Zionism, in the mid-nineteenth century and charts its development through to the creation of the State of Israel in 1948. Discusses the influence of emancipation, nationalism, socialism and anti-semitism. Concludes by considering the debate on post-Zionism and the challenges it may present for Israel and the Jewish Diaspora.

JWST2000  
Jews in Modern Society  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: POLS2033.

Introduces students to the social scientific study of the Jews and their communities in the modern period. Focus is on the different paths of Jewish emancipation in Western societies, the impact of modernisation on Jewish life, and the significance of the Holocaust and the establishment of the State of Israel for contemporary Jewish identity. Themes include: occupational, educational, and social class transformations; religious, ethnic, and communal forms of Jewish identification; Jews and others; political allegiances; Israel-Diaspora relations; and assimilation and intermarriage.

JWST2101  
Holocaust and Genocide in Historical Perspective  
School of History  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: HIST2074.

Introduces students to the field of genocide and Holocaust studies, beginning with competing definitions of genocide and moving to a detailed treatment of various cases of mass death in world history. The Holocaust as a paradigm case of genocide and the legal prosecution of genocide will be considered.

JWST2103  
The German-Jewish Experience  
Faculty of Arts and Social Sciences  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: EURO2300, HIST2485, SOCA3310.

The contribution of ‘Jewish Germans’ to the social, political and cultural life of Germany and Austria from 1900 to 1933. The impact of attempted integration as reflected in the work of Herzl, Schnitzler, Kafka, Buber, Feuchtwanger, Schollem and others; the failure of the German-Jewish symbiosis as a basis for discussion of the concepts of assimilation, acculturation, ethnicity, identity and nationality.

JWST2104  
The Messiah Complex  
Faculty of Arts and Social Sciences  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: EURO2302, HIST2487, SOCA3314.

The figure of the Messiah is closely linked with the Jewish apocalyptic tradition, in which an oppressed people gave itself up to visions of redemption and retribution. The cultural dominance of apocalyptic imagery from the turn of the last century; the fascination with the Messianic in stories by Franz Kafka, Isaac Bashevis Singer’s novel, Satan in Goray, on the ‘false Messiah’ Sabbatai Zwi, and the Theses on the Philosophy of History by Walter Benjamin; and how these Jewish ‘double outsiders’ focused the unease of a European society soon to be seduced by ‘false Messiahs’ of a much more menacing kind, such as Franco, Hitler, Mussolini and Petain. What are the attractions, and dangers, of the ‘Messianic’?
Further development of communicative skills attained in KORE3000 and a new orientation to specific needs in everyday business situations. It equips students with a variety of practical language skills and background information necessary not only for everyday conversation but also for Korean-Australian business situation. Includes systematic practice of communicative skills in the classroom and some field work at the real-life situations in the Sydney Korean business community. Another 150 Hanja are introduced.

**KORE3400**
**Advanced Korean A**
Department of Japanese and Korean Studies
UOC6 HPW4
Prerequisite/s: KORE3301; Excluded: KORE2100.

Integrated literary course: a variety of writing, including art, music, folktales, dialogues and everyday writing in all its forms is explored for language study. Familiarises students with different genres of Korean discourses and culturally rich texts. Designed for students who have acquired grammatical knowledge and need to enhance their vocabulary, reading and writing skills.

**KORE3401**
**Advanced Korean B**
Department of Japanese and Korean Studies
UOC6 HPW4
Prerequisite/s: KORE3400; Excluded: KORE2101.

Continuation of the work done in KORE3400. Designed for students who have acquired literacy skills but still need to develop their vocabulary learning and reading strategies. Focuses on the reading of authentic Korean texts by utilising various reading strategies. Includes participation in a variety of writing, such as song writing, poster creation and literature responses.

**KORE3500**
**Professional Korean A**
Department of Japanese and Korean Studies
UOC6 HPW4
Prerequisite/s: KORE3401; Excluded: KORE3100.

Introduces a repertoire of professional discourses along with reading-writing activities. Various genres are introduced, including social commentaries, art reviews, science reports, business documents and literature. Includes the study of the subtleties of grammar, idiomatic expressions and rhetorical structures.

**KORE3501**
**Professional Korean B**
Department of Japanese and Korean Studies
UOC6 HPW4
Prerequisite/s: KORE3500; Excluded: KORE3101.

Continuation of KORE3500. Designed for students who need enriched language experiences to use their literary skills. Includes the reading of newspaper articles for intensive language study and participation in various writing tasks, such as descriptive, expressive, analytic and persuasive writing for class presentation.

**KORE3600**
**Korean Translation A**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: KORE3501 or equivalent

Introduces translation theory and practice in Korean. Focuses on skills of translating English into Korean and provides native-speaker level students with foundations for professional translation. Examines techniques for analysing and rendering texts of different styles and complexity. Addresses cross-linguistic and cross-cultural problems relevant to professional translation, including lexical/grammatical problems and ethical implications. Covers a range of authentic texts and a variety of topics including socio-cultural, educational, commercial, political, medical, etc.

**KORE3601**
**Korean Translation B**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: KORE3600 or equivalent

Builds upon skills from KORE3600 with concentration on more advanced authentic texts in key areas for professional translation such as public, academic and legal documents and excerpts from media. Includes practical skills and strategies relating to translators’ examinations and professional practice.

**KORE3901**
**Topics in Korean Studies (Advanced)**
Department of Japanese and Korean Studies
UOC6 HPW3
Prerequisite/s: KORE2001 plus a Credit average in all KORE courses

Critically examines a range of research work and familiarises students with the research tools and methods available for research in the field of Korean Studies. Covers various theoretical frameworks and empirical methods available for identification of problems, data collection and analysis, and interpretation of results. Designed primarily for intending Honours students.

**KORE4000**
**Korean Studies Honours (Research) Full-Time**
Department of Japanese and Korean Studies
Enrolment requires school approval
UOC24

The Honours program consists of a thesis between 15,000 and 20,000 words in an approved area of Korean Studies as well as compulsory language study.

**LAND1101**
**Design Fundamentals: Studio 1**
Landscape Architecture Program
UOC9 HPW6

Introduction to design as fundamental to coherent thought and action in your discipline. Exploration of the influences on design thinking and practice, including the philosophical, historical, social and environmental precedent studies. Critical thinking and expression in different forms. Studio projects and assignments to develop skills and understanding of design elements and principles. Introduction to a basic vocabulary of representation techniques used by designers to facilitate the development and communication of design ideas including: colour, freehand drawing, sketching, painting, construction, mixed media, desktop publishing, photomontage techniques, technical drawing and drafting.

**LAND1102**
**Landscape Design 2: Design Process**
Landscape Architecture Program
UOC6 HPW4
Prerequisite/s: LAND1101
Corequisite/s: LAND1142.

An introduction to site design and design process. A number of small-scale projects will allow exploration of design process through site planning, the use of historical precedent and design generation. Studio based projects will be supported by theoretical readings.

**LAND1121**
**Introduction to Landscape Architecture**
Landscape Architecture Program
UOC3 HPW2

Introduction to the principles of design education. Overview of landscape architecture as a practice, as a profession and as an academic discipline. Study of contemporary landscape architecture as a design field and as a creative component of the environmental movement. Introduction to the art and technique of reading the landscape.

**LAND1122**
**History of Landscape Architecture**
Landscape Architecture Program
UOC3 HPW2
Critical analysis of cultural landscapes through the investigation of philosophical, aesthetic and social aspects of landscape architecture and garden art in Eastern and Western traditions.

LAND1142
Design Communication
Landscape Architecture Program
UOC3  HPW3
Prerequisite/s: BENV1141;
Corequisite/s: LAND1102.

This course encourages students to develop a personal vocabulary of representation techniques to facilitate the development and communication of design ideas. Students develop a range of techniques including: perspective, freehand drawing and sketching, colour rendering, advanced creative drawing, the use of different media and graphic thinking.

LAND1151
Horticulture
Landscape Architecture Program
UOC3  HPW3

This course introduces students to a botanical understanding of plants, their structure and function, taxonomic classification. The relationship between plants and their environments, habitats, communities and life cycle. Introduction to horticultural practice and plant identification.

LAND1152
Landscape Analysis
Landscape Architecture Program
UOC9  HPW6
Prerequisite/s: GEOG1701, LAND1151

Observation and interpretation of both physical, biological and cultural environments and their interrelationships. Landscape character through sensory inputs and historical understanding. Fundamental characteristics of a range of biological systems, with emphasis on relationships with the physical environment. Survey of Australian plant communities and associated fauna with particular emphasis on the Sydney Region. Recording and presentation techniques associated with landscape surveys, field excursions.

LAND1171
Landscape Technology 1
Landscape Architecture Program
UOC3  HPW3

Developing proficiency in site surveying and mapping techniques. Principles of grading and their application to a variety of site requirements and conditions. Land shaping, contour manipulation, drainage, earthworks.

LAND1201
Landscape Design 3: Site Planning
Landscape Architecture Program
UOC9  HPW6
Prerequisite/s: LAND1152, LAND1102, LAND1171

Response to a specific site with a program of uses, in natural or urban settings. Emphasis is on gaining further skills in site design, effective communication of design concepts and integration of ecological issues with landscape design.

LAND1202
Landscape Design 4: Landform and Planting Design
Landscape Architecture Program
UOC9  HPW7
Prerequisite/s: LAND1171, LAND1201, LAND1251

In this studio students undertake more sophisticated site research and analysis. They will develop an understanding of the relationship between natural systems, constructed environments and ecological sustainability. Focussing on planting and landform manipulation, students will explore techniques for developing and resolving design ideas.

LAND1221
Environmental Sociology for Landscape Architects
Landscape Architecture Program
UOC3  HPW2

Students will be introduced to the study of people-place relationships and sociological techniques for understanding specific user-group requirements in the design of public spaces. Human perception of shared and personal space and the effect of environmental change on individuals and communities will be explored. Universal design and accessibility in design of public areas is also covered.

LAND1222
History and Theory Elective
Landscape Architecture Program
UOC3  HPW6

Students are required to select one of the landscape electives listed in the History and Theory elective courses section. These include: BENV2218, BENV2219, BENV2220 and BENV2221.

Note/s: LAND1222 is not a course and should not appear on your enrolment.

LAND1251
Advanced Horticulture
Landscape Architecture Program
UOC3  HPW2
Prerequisite/s: LAND1151

Based on the knowledge gained in Horticulture, this course will provide students with the horticultural theory and practice necessary for supporting landscape design and documentation.

LAND1271
Landscape Technology 2
Landscape Architecture Program
UOC3  HPW3
Prerequisite/s: LAND1171, LAND1102

Description and selection of materials, their properties, origin and production. Understanding the relationship between materials and design. Use of Australian Standards. Construction principles and methods.

LAND1272
Landscape Technology 3
Landscape Architecture Program
UOC3  HPW3
Prerequisite/s: LAND1271

Preparation of documentation for landscape works including: grading, drainage, earthworks, roads and pavements, planting and structures. Critical analysis of design development and documentation. Design a development of construction documentation and detailing for a wide range of materials, elements and structures.

LAND1281
Professional Practice 1
Landscape Architecture Program
UOC3  HPW2
Prerequisite/s: LAND1121

LAND1301
Landscape Design 5: Design Resolution and Documentation
Landscape Architecture Program
UOC9  HPW6
Prerequisite/s: LAND1202, LAND1272, BENV1242

This studio will focus on design resolution and documentation of one project. Students will develop skills in detailing, use of materials and CAD.
LAND1302
Landscape Design 6: Design with a Complex Program
Landscape Architecture Program
UOC9  HPW6
Prerequisite/s: LAND1301

This studio will introduce students to projects with more complex programs and different approaches to dealing with them. It will focus on developing skills in the manipulation of architectonic space and form. A personal design portfolio forms part of this studio. A satisfactory portfolio is a requirement for completion of this studio.

LAND1321
Research Methods
Landscape Architecture Program
UOC3  HPW2
Prerequisite/s: LAND1221, LAND1351

Investigation of various research methods with application to study in landscape architecture. Development of the critical logical and stylistic skills involved in researching, writing and presenting essays, theses, articles, papers and reports. Each student researches and prepares an approved thesis proposal including a bibliography, chapter outline and first draft chapter.

LAND1351
Landscape Management
Landscape Architecture Program
UOC3  HPW2
Prerequisite/s: LAND1152

Planning and management of both natural and cultural landscapes. Historical review of landscape planning and management in Australia and overseas. Overview of environmental policy and legislative framework. Examination of a range of landscape management methodologies and processes.

LAND1371
Landscape Engineering
Landscape Architecture Program
UOC3  HPW3
Prerequisite/s: LAND1272

Understanding structural design and construction techniques for a range of elements including: earthworks, drainage, retaining and freestanding walls, pavements and roads, masonry, steel and timber structures. Structural design and construction techniques applied to a range of difficult site problems.

LAND1381
Landscape Practice 1
Landscape Architecture Program
UOC12

Students are required to obtain a minimum of 40 days of practical industry experience during enrolment in the program. This forms part of a total requirement of 90 days work experience.

LAND1382
Professional Practice 2
Landscape Architecture Program
UOC3  HPW2
Prerequisite/s: LAND1281

Understanding of legal and professional responsibilities with specific reference to negligence and risk. Understanding of contract law and tender procedures. Application of specific statutes. Specialist areas include tree law, copyright and business practice.

LAND1401
Landscape Design 7: Urban Landscape Design
Landscape Architecture Program
UOC12  HPW8
Prerequisite/s: LAND1302, LAND1382
Corequisite/s: LAND1402;

An exploration of the relationships within the fabric of the urban environment including concepts of city functions and the analysis of disparate parts of the city with physical design being the primary focus.

LAND1402
Landscape Design 8: Graduating Studio
Landscape Architecture Program
UOC12  HPW8
Prerequisite/s: LAND1302, LAND1382
Corequisite/s: LAND1401;

Students are called upon to employ all the knowledge, skill and understanding they have gained in previous years and to explore issues and approaches in design which are of particular interest to them. The graduating design project follows from LAND1401 Landscape Design 7 and involves sketch design and detailed design development. Graduating project is related to the natural, urban or rural environment. The studio will critically assess aspects of theory through design speculation.

LAND1421
Landscape Thesis
Landscape Architecture Program
UOC15
Prerequisite/s: LAND1321

A specialised individual study, enabling each student to gain or extend knowledge and understanding in some aspect of landscape architecture. The proposed topic area and title must be approved by the Course Authority and the Program Head. The thesis is essentially evidence of this individual study, under staff supervision and culminating in a written document deposited in the Faculty library. The course requires each student to carry out the required research, organization of material and writing in order to submit a complete draft of a written thesis in week 7. Each student then refines the draft and undertakes the preparation of illustrative material and completion of all necessary references and bibliography, before the submission of the final unbound manuscript for assessment. The unbound manuscript is assessed by two readers and returned with corrections noted, so that a bound copy of the thesis can be lodged with the Faculty Student Centre. This one session course is graded in accordance with the normal University grading system.

LAND1431
Advanced Research Project in Landscape Architecture
Landscape Architecture Program
UOC9  HPW2
Prerequisite/s: LAND1321

This course is an alternative to LAND1421 Landscape Thesis. Students in this course prepare a report following professional guidelines and gain further insight into the practice of landscape architecture. Students work closely with the instructor on the development of a set research topic and the preparation of a report. The course work refines skills in research, writing and report production. The course is structured as a combination of lectures and workshops, all of which support specific aspects of report preparation.

LAND1481
Landscape Practice 2
Landscape Architecture Program
UOC12

Students are required to obtain a minimum of 40 days of design office experience during enrolment in the program. This forms part of a total requirement of 90 days work experience.

LATN0101
Science and Philosophy in Roman Poetry
School of Modern Language Studies
UOC6  HPW3

Students will read in Latin Virgil's Georgics 4 and a large portion of Lucretius' De Rerum Natura 3. Through this reading students will gain a good understanding of aspects of Roman scientific and philosophical thought as well as a sense of the Roman formulation of epic and didactic poetry. At the same time, these demanding texts will improve considerably students' ability to handle the Latin language. Students will be expected to read, in the original, approximately 1500 lines of poetry.
LATN0102
Women, the Law and Society in Ancient Rome
School of Modern Language Studies
UOC6  HPW5

Students will read in Latin portions of Cicero’s speech Pro Caelio, and a selection of Catullus’ love poetry and Juvenal’s sixth satire. Through this reading students will gain a good understanding of aspects of Roman legal oratory (and practice) and poetry (both lyric and satire) as they focus on representations of the behaviour of some aristocratic Roman women. At the same time, these demanding texts will improve considerably students’ ability to handle the Latin language. Students will be expected to read in the original, approximately 40 pages of prose and poetry.

LATN1000
Introductory Latin A
School of Modern Language Studies
UOC6  HPW5
Excluded: GENT0412

Provides an introduction to the basic forms of the Latin language and essential grammatical constructions. It will be of particular interest to those who want to acquire a knowledge of Latin to support study in other fields, such as language learning, linguistics, ancient history, mediaeval studies or law, as well as those with a primary interest in Roman literature. The classes will be devoted to practice in translating from English into Latin and from Latin into English, and will also introduce students to some simple examples of Latin literature.
Note/s: Excluded HSC Latin or equivalent.

LATN1001
Introductory Latin B
School of Modern Language Studies
UOC6  HPW5
Prerequisite/s: LATN1000

Follows on from LATN1000, extending knowledge of Latin grammatical constructions and reading Latin texts of increasing difficulty. One class per week will be devoted to grammar, the others will be devoted to reading Latin texts. Language assignments will require translation from English into Latin as well as Latin into English.
Note/s: Excluded HSC Latin or equivalent.

LAWS1001
Criminal Law 1
Faculty of Law
UOC6  HPW4

This course examines the principles of criminal law and liability. The aims of the course are: to promote and refine research and social policy analysis skills; develop a rigorous analytical and socially oriented approach to the study of criminalisation and criminal law; investigate the constitution of concepts like crime, criminal and criminal law; question traditional approaches which assume a unified set of principles; suggest an approach to criminal law as a number of diverse fields of regulation; acknowledge the importance of forms of regulation outside the criminal law; examine empirical material on the actual operation of the NSW criminal process such as court statistics and a court observation exercise; and examine the substantive rules developed in selected criminal offence areas. Topics include: the phenomenon of crime, the criminal process, components of criminal offences, drug offences, public order offences.

LAWS1002
Advanced Criminal Law
Faculty of Law
UOC8  HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.

Builds upon the introduction to criminal law and process in the compulsory core curriculum. Topics vary from year to year depending on current developments. The focus is on recent statute and case law, and current research developments in criminalisation, law and order politics, criminal responsibility, defences, criminal process and sentencing.

LAWS1011
Criminal Law 2
Faculty of Law
UOC6  HPW4
Prerequisite/s: LAWS1001

This course examines the principles of criminal law and liability. The aims of the course are the same as for Criminal Law 1. Topics include homicide, criminal defences, offences against the person, offences of dishonest acquisition, attempts, complicity, conspiracy, sentencing and penal practices.

LAWS1033
Communications Law
Faculty of Law
UOC8  HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.

This course provides an introduction to the two broad areas of law regulating the content and carriage of communications in Australia. These include laws relating to the planning and licensing of telecommunications and broadcasting services; rules about who can establish, own and control media and communications businesses; the regulation of media content - classification and censorship, free speech and defamation, laws affecting journalists, and local content; and consumer protection. It is a very topical course, with current issues including regulation of the internet, the introduction of digital broadcasting, and convergence. The course provides an excellent introduction to areas of media and communications law, which can be studied in more detail in the LLB program.

LAWS1052
Foundations of Law
Faculty of Law
UOC6  HPW5

This course considers the legal significance of the arrival of the British in Australia to the original inhabitants and the settlers, the principal institutions of the legal system and their historical roles, interrelationships, and operation. The course considers the State legal institutions’ development up to Federation, and the move to independence from British institutions. The course emphasises the doctrine of precedent and statutory interpretation in relation to these institutions. A number of torts are then studied, notably intentional torts and nuisance, as an example of the legal system in action. This course also includes an integrated research component, which introduces students to the literature relevant to the law in Australia, differentiates primary and secondary materials, and familiarises students with both traditional and electronic research methods.

LAWS1061
Torts
Faculty of Law
UOC6  HPW4
Prerequisite/s: LAWS1051 or LAWS1052

The forms of argument used in tort law as exemplified in the law of negligence are examined. There is a detailed discussion of specific issues such as recovery for personal injury, for pure economic loss and the liability of statutory authorities and occupiers, Vicarious liability, defences and assessment of damages are covered as well as breach of statutory duty and some intentional torts. A second strand of the course introduces students to the wide-ranging debates about the appropriate role and function of tort law. This requires developing a working knowledge of feminist, economic and various other theories (eg corrective justice) of tort law. In developing this working knowledge students will be exposed to secondary materials which build upon and refer to the cases and statutes which are included in the course.

LAWS1071
Contracts 1
Faculty of Law
UOC3  HPW2

LAWS1071 Contracts 1 is the first of two compulsory components of the undergraduate curriculum which together examine the law governing the formation and performance of contracts. This course initially examines the distinctive nature of contractual obligations and some
contemporary social and economic influences upon it. The course then examines systematically the legal principles governing the formation of contracts. Finally, it gives special attention to the possibility of enforcement by third parties, and the manner in which the law of estoppel can result in enforcement of non-contractual promises.

LAWS1072
Contracts 2
Faculty of Law
UOC6 HPW4
Prerequisite/s: LAWS1071

Contracts 2 is the second of the two compulsory contract law components of the undergraduate curriculum. The course presupposes that students have acquired knowledge of the content of LAWS1071 Contracts 1. Topics examined in LAWS1072 Contracts 2 include: the identification and interpretation of contractual terms; factors which may vitiate the formation of a contract, such as misrepresentation, mistake and common law and statutory unconscionability; the effect of exemption clauses; the nature of performatory obligations; breach of such obligations; circumstances in which contractual obligations are terminated; and remedies for contractual breach. Students are encouraged to examine the role of contract law from an historical and contemporary standpoint.

LAWS1081
Property, Equity and Trusts 1
Faculty of Law
UOC6 HPW4
Prerequisite/s: LAWS1071, LAWS1072; or LAWS1420

Property, Equity and Trusts 1 is one of the compulsory “core” courses of the law program. A central objective of the course is to ensure that students gain a sound understanding of basic principles of the law of property, as well as equity and trusts. Course coverage: the conceptual nature of proprietary interests; the nature of possession; remedies to protect possession of goods and possession of land; an introduction to native title; the doctrine of tenure; fragmentation of proprietary interests and the doctrine of estates; future interests; the history of equity and the nature of equitable interests in land; creation and assignment of proprietary interests in land at law and in equity; the express, implied and constructive trust; express trusts; powers and duties of trustees; estoppel; priority between competing legal and equitable interests in land.

LAWS1082
Property and Equity 2
Faculty of Law
UOC6 HPW4

Property and Equity 2 is one of the compulsory “core” subjects of the law course. The course builds upon the foundation work covered in Property and Equity I. Course coverage: the Torrens system of land title; creation of interests under the Torrens system and the resolution of priority conflicts; the caveat system and protection of unregistered interests; alienability of interests in land and the rule against perpetuities; the law of leases; the law of mortgages and securities; co-ownership and statutory trusts for partition and sale; planning the use of land; easements and covenants.

LAWS1092
Business Associations 2
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS4010 or LAWS1091

Areas of company law and securities regulation not covered in LAWS1091 Business Associations 1, and particularly those of relevance to larger companies. Students who wish to complete a comprehensive study of company law and securities regulation are advised to take this course in addition to LAWS4010 or LAWS1091. The areas of company law covered in this course are: The role of the ASX and ASIC as bodies regulating companies and securities markets; The restrictions on the capital structure of the company, ie. the creation of classes of shares and the rights attaching to those shares, the issue of shares at a discount, and the reduction of capital; The restrictions arising out of the various forms of the capital maintenance doctrine, ie. the circumstances in which a company may buy back its own shares, the rules against the giving of financial assistance, and the restrictions on the payment of dividends; The terms and conditions upon which companies may raise funds from the public, ie. the issue and content of prospectuses; The structure and regulation of the market for corporate control (ie. takeovers). The course approaches these topics in two different ways. The first way of approaching each of the topics will be to focus specifically on the scheme of regulation established by that law. The second way of approaching each of the topics will be to establish some themes common to each of these areas of law. In particular, the course will focus on the approaches to regulation adopted in each of these areas.

LAWS1812
Sport and the Law
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1081, LAWS1082; or LAWS3010

Sport is a central part of modern Australian society and culture. Not surprisingly, as professionalism has become the norm, those involved with sport, be they players, managers, administrators and supporters, are increasingly looking to the law to protect their rights and/or resolve their problems. How and why has this happened? The course touches on a number of different areas of law such as torts, contracts, criminal law, administrative law, and business associations. The aim is to draw upon specific issues from these various branches of the law and to place them in an historical and modern day context so as to give participants an understanding of the developing role the law is making in the world of sport as well as the policy and ethical issues facing those involved.

LAWS2021
Industrial and Intellectual Property
Faculty of Law
UOC8 HPW3
Prerequisite/s: LAWS1081, LAWS1082; or LAWS3010

Areas of the law relating to concepts of intangible property including the law of patents, trademarks, trade designs, copyright, confidentiality, passing off and the protection of business reputation. This course is a survey of the areas of law relating to the protection of ideas and new technology and is an excellent introduction to further study in communications, information technology and internet law.

LAWS2022
Trade Practices
Faculty of Law
UOC8 HPW3
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.

Analyses the operation of competition law in Australia and the types of conduct and practices that are anti-competitive. The focus is on the restrictive trade practices provisions of the Trade Practices Act 1974, the decisions of the Federal Court and the determinations of the Trade Practices Commission and the Trade Practices Tribunal. Where relevant, US, UK and European decisions are considered.

LAWS2023
Trusts
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.

The nature, history and classification of trusts; the use of trusts in modern law; interaction of the trust and contract; express private trusts; purpose trusts; discretionary and protective trusts; the creation and variation of private trusts; trusts in commerce; resulting and constructive trusts; charitable and public trusts; powers and duties of trustees.

LAWS2024
Commercial Finance
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.
Commercial Finance aims to provide an introduction to some principal areas of commercial law of general relevance to legal practice and of particular relevance to those interested in banking. Topics: 1. Negotiable instruments, including a study of commercial bills against the background of a description of the operation of the commercial bills and money markets. 2. Secured transactions: students are introduced to the law on securities over personal property including priorities; reference is made to credit arrangements in use in the distribution and sale of goods and services. 3. Introduction to law of bankruptcy.

LAWS2025  
Advanced Contract Law  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1071, LAWS1072; or LAWS1420

This course normally covers some significant topics of the law of contract which are usually omitted from the compulsory contract law courses, LAWS1071 Contracts 1 and LAWS1072 Contracts 2 (eg illegality; agency). It then deals in depth with a selection from the following list of topics which are very important in commercial practice, but are dealt with somewhat briefly in the initial courses: uncertainty and incompleteness in contract formation; economic duress; termination for breach and frustration; privity and third party rights; interpretation. The course constantly considers the increasing impact of equitable principles, and of the law of restitution, on the common law of contract. There is likely also to be an examination of some leading theories on the nature and likely development of contract law.

LAWS2026  
Commercial and Consumer Sales  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

This is an introduction to principal areas of commercial law of relevance to legal practice. This course deals primarily with the intersection of property and contract law in the sale of goods, a species of personal property. It includes a study of product liability, including the liability of the sellers, manufacturers and credit providers. It provides a foundation for the study of risk in the rules for the transfer of property in goods. A major component of the course is the study of Trade Practices law particularly the prohibition against misleading and deceptive conduct. The course examines available statutory remedies.

LAWS2028  
The Law of Employment  
Faculty of Law  
UOC8 HPW4

The employer-employee relationship with particular attention to the individual contract of employment on which that relationship rests, the legal concept of an employee, incidents of the employment relationship, the mutual rights and duties of the employer and the employee; the termination of the relationship with particular reference to the discharge of the contract of employment by performance, by notice and for cause and the remedies for wrongful termination; individual contracts and workplace agreements; the legislation which is designed to protect wages, hours and various entitlements, legislation with respect to unfair dismissal; AntiDiscrimination; programs for Equal Employment Opportunity and Affirmative Action.

LAWS2032  
Employment Protection Law  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

The law relating to protection against dismissal from employment. Topics include: basic concepts of substantive and procedural fairness; statutory protection against unfair dismissal under Commonwealth and State legislation; the British system; international conventions; directives of European Parliament; regulation of redundancies; employment protection provisions in industrial awards; employment protection through regulation of unfair contracts; employment protection through equitable remedies; the labour market implications of employment protection.

LAWS2033  
Law of Banking  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

The Law of Banking provides an introduction to aspects of the practice of banking and to relevant legal principle. Both traditional views and contemporary developments are adverted to. While the central focus is on the relation of banker (in legislation now authorised deposit-taking institution) and customer, not only the cheque but also a range of recently developed and developing banking instruments and processes are considered. Regulation and deregulation are discussed and in that context functionally related activities are traversed.

Note/s: This course may be studied on its own but students interested in a wider view of banking law should also enrol in LAWS2024 Commercial Finance.

LAWS2035  
Land Dealings: Residential and Commercial Contracts  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

The law of vendor and purchaser with special emphasis on the standard form contract for sale of land in use in New South Wales. Aims to benefit those intending to practise in any field of land law and property law, whether in large, medium or small legal firms, city, suburban or country. The course focuses upon both commercial and residential contracts. The course will also benefit those at the bar practising in the property and equity area. Topics: whether a binding contract of sale exists, auction contracts; vendor disclosure and anti-gazumping legislation, the requirements of the Statute of Frauds, exchange of contracts, proper preparation of the contract of sale, detailed examination of the standard Law Society approved contract of sale, the law concerning notices to complete and other remedies available to vendor and purchaser, remedies for breach of contract, damages, liquidated and unliquidated, termination, specific performance; the law of deposits.

LAWS2051  
Elements of Income Tax Law  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

1. Introduction: the policies served by taxation with particular reference to distributional and economic objectives; the uniform tax system: the structure of the current Income Tax Assessment Act and its administration. 2. A critical analysis of the principal concepts of the law of income taxation and the taxation of capital gains and fringe benefits; the law on income and deductions as applicable to individuals; the trading stock provisions and tax accounting; concepts of residence and source. 3. The judicial interpretation of taxing statutes; ethical and policy questions concerning tax avoidance.

LAWS2052  
Advanced Revenue Law  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS2051

Areas of income tax introduced in LAWS2051 Elements of Income Tax Law in greater depth. Several areas of income tax law and other revenue law not touched on in the earlier course. Topics: 1. taxation of partnerships, trusts and companies, including capital gains tax; 2. assignment of income; 3. tax avoidance and evasion - analysis of general, and specific, antiavoidance legislation and penalties legislation; 4. an introduction to aspects of international tax including some international tax agreements; 5. tax decisionmaking and review in the context of a mass decision making process; 6. an introduction to goods and services tax.

Note/s: Students should have completed LAWS4010 Business Associations 1 6UOC or LAWS1091 Business Associations 1 6UOC or be taking that course concurrently with LAWS2052.
LAWS2065
Comparative Law
Faculty of Law
UOC6 HPW4

Some of the principal legal systems of the world, and the advantages in looking at legal problems from a perspective broader than that of one’s own legal system. Three parts: 1. An introduction to the Modern Civil Law, Roman, Hindu and Islamic legal systems, wherever possible comparing them with the Common Law system, and with each other. The history and uses of Comparative Law, and a discussion of the manner in which the Civil Law and Common Law systems have interacted with the others, and with each other; 2. A more detailed study of the Civil Law system, through the medium of criminal procedure and administrative law in Europe, especially France, against the background of the common law; 3. Student-led seminars examining, comparatively, administrative law in Europe, especially France, against the background in which the Civil Law and Common Law systems have interacted with each other. The history and uses of comparative law, the theory of ‘legal families’, the ‘civil law’ – ‘common law’ dichotomy, introduction to the German legal system, comparative approaches to tort law, reception of foreign laws, comparative human rights jurisprudence, the role of the European Court of Justice, harmonisation and unification of laws, and globalisation.

LAWS2079
Restitution
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610; Corequisite/s: LAWS2311 or LAWS1010.

Unjust enrichment, along with such subjects as contract and tort, is one of the law’s primary sources of rights and obligations. This course examines unjust enrichment, and the law’s response to unjust enrichment, called restitution. Liability in unjust enrichment is encapsulated in the phrase “unjust enrichment at the expense of the plaintiff”. We commence with enrichment. Not all benefits received by the defendant are enriching and the courts have developed tests to determine whether the defendant is enriched and whether this enrichment is at the plaintiff’s expense. The next question is injustice; this question being answered by the unjust factor. We will cover various unjust factors, including mistake, failure of basis, pressure and policy motivated unjust factors. Finally, we will look at two defences: change of position and estoppel.

LAWS2081
Public International Law
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610; Corequisite/s: LAWS2311 or LAWS1010.

International law seeks to order human affairs at the international level. It accordingly covers a vast field, extending to issues such as autonomy or otherwise of peoples and territories, the allocation of resources (land, maritime and air), the preservation of the environment, the regulating of interstate transactions, the resolution of disputes and the maintenance of international peace and security. This course aims to provide a solid introduction to certain central topics within the overall field of international law. Topics covered include: the nature and sources of international law, the relationship between international law and domestic law, international agreements, statehood and title to territory, territorial and maritime jurisdiction, recognition of states and governments, immunities, state responsibility, the use of force, and peaceful settlement of international disputes.

LAWS2084
International Trade Law: The Law and Policy of the WTO
Faculty of Law
UOC8 HPW4

This course introduces students to the legal, business and policy aspects of international trade, focusing on the legal framework of the various WTO Agreements. This course analyses the regulatory legal principles of the WTO and how they operate at both the national and international level. More specifically, the course covers issues such as tariffs and tariff negotiations, quotas, most favoured nation, regional trade agreements, national treatment, intellectual property, anti-dumping, export subsidies, countervailing duties, exceptions for environmental, health and safety and other issues of contemporary importance. The course gives participants a sound understanding of key legal issues and principles relating to international trade and a thorough knowledge and understanding of the importance of domestic and international policy issues to the world trading system. There are no prerequisites for this course and no background in economics, international relations or international law is assumed.

LAWS2085
Comparative Law
Faculty of Law
Enrolment requires school approval
UOC8
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610; Corequisite/s: LAWS2311 or LAWS1010.

This course will introduce students to some of the major legal systems of the world. Comparative law has an important function in enhancing an understanding of our own system and in raising awareness of alternative solutions to legal issues. Increasingly, comparative law is used for law reform purposes and by judges in their decision-making process. By the end of this course students should be able to apply comparative methodology for law reform purposes, compare legal institutions and substantive laws of foreign legal systems in a meaningful way with similar institutions and laws in the Australian legal system, critically assess the possibilities and limitations in transplanting law from one country to another, and explain and discuss the impact of cultural, political and economic factors on law. Topics include functions and aims of comparative law, comparative methodology, the theory of ‘legal families’, the ‘civil law’ - ‘common law’ dichotomy, introduction to the German legal system, comparative approaches to tort law, reception of foreign laws, comparative human rights jurisprudence, the role of the European Court of Justice, harmonisation and unification of laws, and globalisation.

LAWS2086
International Law Competitive Moot
Faculty of Law
Enrolment requires school approval
UOC8
Prerequisite/s: LAWS2088

The International Moot Program is open to students who have been selected to represent UNSW in one of the following competitions: Jessup International Law Court Competition; Jean Pictet International Humanitarian Law Moot Competition; Manfred Lachs Space Law Moot Competition; and Vis International Commercial Arbitration Moot Competition. Each of these competitions is a prestigious international competition which involves extensive research and writing of case memorials followed by participation in oral mooting rounds and the possibility of representing Australia in final competition rounds overseas. Students will be selected for teams early in Session 2 on the basis of academic merit, research, and/or mooting skills and experience. The majority of the work for each competition will be conducted over the summer months. Application is open to all students who have completed International Advocacy, Public International Law or International Humanitarian Law.

LAWS2088
International Advocacy
Faculty of Law
Enrolment requires school approval
UOC8 HPW4
Corequisite/s: LAWS2311 or LAWS1010; Excluded: LAWS4082

This course has a dual aim: to train students in advocacy before courts and tribunals, and to develop and enhance students’ understanding of international law. Students will be provided with an excellent grounding in issues arising in litigation on the international stage, including jurisdiction, admissibility, interim measures, principles of state responsibility and remedies. The course will focus on a variety of international courts and tribunals, including the International Court of Justice, the International Criminal Court, international commercial arbitration, the WTO Dispute Panel, the UN Human Rights Committee, and others. The course will also have a practical component aimed at enhancing the advocacy skills of participants and applying the theory to the practical aspects of the conduct of international advocacy. Students will be involved in the preparation and presentation of a hypothetical case before an international tribunal of their choice and will be given the opportunity to develop their advocacy skills, including the preparation
of written submissions and delivery of oral submissions, in a non-competitive context. Those students not interested in the advocacy dimension of the course have the option of completing an essay focussing on international courts and tribunals. This course is the preferred prerequisite for the International Moot program.

**LAWS2090**
**Issues in Space Law**  
Faculty of Law  
UOC8  
HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

This course examines the underlying legal principles that specifically regulate the use, exploration and exploitation of space, and how these and other principles of International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the evolution, legal framework and organisational structures of this area of law, so as to comprehend the legal context in which the diverse range of space activities take place and to understand and examine the various legal _vacuums_ that have arisen. The course looks at the 5 specific international space law treaties as well as the various United Nations Principles. The domestic regulatory systems of a number of countries, including the recently implemented Australian legal regime, are also discussed. Students are encouraged to examine and suggest ways in which the laws and principles regulating Space should be expanded to deal with many emerging issues.

**LAWS2091**
**Introduction to Space Law**  
Faculty of Law  
UOC4  
Prerequisite/s: LAWS1001

This course provides a basic understanding of the legal regime regulating the use of space, which is necessary in order to apply the law to the many space activities currently (and in the future) being undertaken. This course examines the underlying legal principles that specifically regulate the use, exploration and exploitation of space. It examines the evolution, legal framework and organisational structures of this area of law, and concentrates on the 5 specific international space law treaties as well as the various United Nations Principles. The domestic regulatory systems of a number of countries, including the recently implemented Australian legal regime, are also discussed.

**LAWS2123**
**Chinese Legal System**  
Faculty of Law  
UOC8  
Prerequisite/s: (LAWS2311, LAWS2321) or (LAWS1010) and LAWS6210

This is a two-week intensive course held in Beijing each January. It provides an introduction into the legal system of the People's Republic of China with particular reference to modern developments in contract and commercial law. China opened up its economy to market forces only in the late 1970s. When it did so, law and the legal system lost the pariah status to which they had been assigned during the Proletarian Cultural Revolution. The course examines the role law is playing in modern China by reference to its historical antecedents. The course examines particular areas of development not only for their own sake but also as indicators of the changing role of law in Chinese society. Areas which are the subject of particular attention include: the elements and institutions of Chinese legal system; the role of law in Chinese society from the perspectives of legal history and philosophy; contract law; intellectual property law; foreign investment law; corporate and securities law; foreign trade law and mediation, arbitration and civil enforcement procedures.

**LAWS2140**
**Public Law**  
Faculty of Law  
UOC3  
HPW2

This course introduces the students to the study of public law, including its methods of reasoning, history and fundamental principles. It deals with introductory principles and theories of constitutional and administrative law and the essential features of our system of government. Topics include the Westminster System, Federation, Indigenous Peoples and the Question of Sovereignty, the Federal Parliament, the Separation of powers, Human Rights and Bills of Rights and Constitutional Change.  

Note/s: Taken concurrently with LAWS1071 Contracts 1 as a composite course.

**LAWS2148**
**Sir Harry Gibbs National Moot Competition**  
Faculty of Law  
UOC8

The Sir Harry Gibbs National Moot Competition is the only national mooting competition in Federal Constitutional Law. It is organised by the T.C. Beirne School of Law at the University of Queensland and supported by the Australian Association of Constitutional Law. The competition began in 2002 with UNSW as a participant. The competition is held in Brisbane each year in early October. The four team members will receive course credit for their participation.

**LAWS2150**
**Federal Constitutional Law**  
Faculty of Law  
UOC6  
HPW4

Federal Constitutional Law deals basically with a number of the Commonwealth's legislative powers and their limitations, as discussed in the case law. In particular, the following powers and limitations: trade and commerce, external affairs, corporations, race, aliens, appropriation, grants and taxation, inconsistency of Commonwealth and State laws, freedom of interstate trade and commerce, excise and implied limitations on Commonwealth and State powers, including implied rights. Larger ideas concerning the nature of constitutional interpretation and the basic values of public law are also discussed. Further study of constitutional law may be undertaken in LAWS2292 The High Court of Australia and LAWS 429 Comparative Constitutional Law.

**LAWS2156**
**Issues in Australian Constitutional Law**  
Faculty of Law  
UOC4  
HPW4  
Prerequisite/s: LAWS2150

A seven week, 4UOC course on selected topics in Australian constitutional law and conducted in seminar style. The first three weeks of the course centre on discussion and analysis of prepared materials. The remaining four weeks are allocated to student led seminars on topics selected for research essays. Emphasis is on recent constitutional litigation and material not developed in detail in compulsory courses. Issues for inclusion in the prepared materials and/or on the list of suggested research essay topics may include: status of Territories, contemporary problems about State Constitutions, just terms for acquisition of property, re-thinking the conciliation and arbitration power, technology and the Constitution, implications of High Court decisions in lower courts, style and method in constitutional argument, developments on Chapter III, viability of proposals for amendment, standing in constitutional cases, amicus curiae, role of special leave in constitutional appeals.

**LAWS2158**
**Principles of Colonial Constitutional Law**  
Faculty of Law  
UOC4  
HPW4

This course focuses on the constitutional law principles which have influenced and continue to influence aspects of contemporary Australian constitutional law and structure. The object of the course is to demonstrate that the substance of many current principles may be traced to developments in the colonial era. The first three weeks of the course centre on discussion and analysis of prepared materials. The remaining four weeks are allocated to student led seminars on topics selected for research essays. Topics in the prepared materials and/or on the list of suggested research projects may include: Commonwealth Constitution as an instrument of colonial self-government, judicial review in the colonial period, repugnancy doctrine, significance of the Colonial Laws Validity Act, the legacy of manner and form, origin of the “peace, order and good government” formula, extra-territoriality, colonies and treaties, colonial Governors and military powers, the Viceroy debate, concept of plenary power, structure of colonial constitutions and charters, influence of the British North America Act, the Federal Council of Australasia.
experiment, role of the Privy Council, long shadow of English constitutional revolutions, non-citizens and prerogative powers, the British connection and colonial constitutional legacies in the twentieth century, colonial models of responsible government.

**LAWS2160 Administrative Law**  
Faculty of Law  
UOC6 HPW4

This course considers the law concerning the accountability and control of government officials. Topics covered include: delegated legislation; the duty to give reasons for administrative decisions; freedom of information, the Ombudsman, Administrative Appeals Tribunals; and judicial review of administrative action (the principles of legality and procedural fairness).

**LAWS2181 International Humanitarian Law**  
Faculty of Law  
UOC8 HPW4

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

International humanitarian law (also known as the law of war, or the law of armed conflict) consists of the international rules governing the conduct of hostilities, the methods and means of warfare, and international rules designed to protect the victims of armed conflict. It can also be said to cover international rules relating to treatment of displaced persons and refugees where these persons are fleeing from armed conflict. This course will examine the laws relating to the conduct of armed conflicts, including the four 1949 Geneva Conventions and their historical antecedents; the 1977 Protocols; the laws of the Hague; problems of enforcement of humanitarian law; war crimes; humanitarian intervention; protection of refugees; and the role of NGOs, the Red Cross, and the UN. The proliferation of internal conflicts during the last few decades and the increasing threat of international terrorism is forcing us to reexamine many of the traditional axioms of international human rights and humanitarian law. The course will examine the contemporary relevance of international humanitarian law in light of these challenges.

**LAWS2182 International Human Rights Law and Advocacy**  
Faculty of Law  
UOC8 HPW4

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

This course introduces students to the fundamental legal principles and institutions of international human rights. It focuses particularly on the application of human rights principles to current issues, including the role of human rights in a rapidly globalising world. Special attention is given to economic, social and cultural rights, human rights and development in countries, the expansion of multinational corporations, trade and investment liberalisation, the rise of terrorism, the rights of women, the “cultural relativism” debate and the rights of Indigenous peoples.

**LAWS2183 Australian Journal of Human Rights**  
Faculty of Law  
UOC8  
Enrolment requires school approval

A student may be deemed, on the recommendation of the Head of School and the Faculty Adviser to the Australian Journal of Human Rights, to have satisfactorily completed this course on the basis of work done as Student Editor for a specified number of issues of the Australian Journal of Human Rights.

**LAWS2184 Human Rights in the Global Economy**  
Faculty of Law  
UOC8 HPW4

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

This course introduces students to the policies and legal principles operating in the global economy and their relationship with human rights, with particular emphasis on economic and social rights, and analyses the impact on those rights of the global economic institutions and multinational corporations. Controversial issues will be explored, including the lending policies of the Bretton Woods Institutions (the World Bank and the IMF), the human rights impacts of the law of the World Trade Organisation and liberalisation of foreign investment in the Global South. The course studies and evaluates current initiatives for the regulation (and self-regulation) of transnational corporations in relation to human rights. Cases raising relevant human rights issues before the WTO’s Appellate Body and before selected national and international courts and tribunals are studied in detail.

**LAWS2212 Australian Indigenous Law Reporter**  
Faculty of Law  
Enrolment requires school approval  
UOC8

This course provides intensive small group tutoring for Indigenous students, focussing on developing skills in legal writing, research and comprehension, problem-solving, and critical and analytical skill development.

**LAWS2213 Foundations Enrichment 1**  
Faculty of Law  
UOC2 HPW2

This course is an extension of Foundations Enrichment 1 in its focus on providing support and sufficient resources to Indigenous LLB students. The course requires students to attend the Kingsford Legal Centre as a group to gain first hand experience of practical legal problem-solving, community legal practice and client interaction. Communication skills, in particular interviewing skills, will be a major focus of this course, along with increasing student's self-confidence. Students will gain the opportunity to experience law in a practical sense and thus gain an enhanced understanding of the general legal system, the legal aid system and the relevance of legal practice to a community. Pre-requisite: LAWS2213 Foundations Enrichment 1

**LAWS2222 Communications Law: Broadcasting and Telecommunications**  
Faculty of Law  
UOC8 HPW4

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

This course addresses the law regulating the structure of communications in Australia. This is a very topical course with current issues including digital broadcasting, convergence, and the implications for traditional regulation of broadcasting and telecommunications. Topics include: planning and licensing of telecommunications and broadcasting services; rules about who can establish, own and control media and communications businesses; the introduction of competition into telecommunications in Australia in the 1990s; consumer protection issues in relation to communications; and, rules affecting electronic communications content such as the Australian Content Standard, the Anti-Siphoning rules governing premium sports on free-to-air and pay television; and classification schemes including film censorship guidelines and online content regulation.

**LAWS2232 Law After Communism**  
Faculty of Law  
UOC8 HPW4

This course is an extension of Foundations Enrichment 1 in its focus on providing support and sufficient resources to Indigenous LLB students. The course requires students to attend the Kingsford Legal Centre as a group to gain first hand experience of practical legal problem-solving, community legal practice and client interaction. Communication skills, in particular interviewing skills, will be a major focus of this course, along with increasing student's self-confidence. Students will gain the opportunity to experience law in a practical sense and thus gain an enhanced understanding of the general legal system, the legal aid system and the relevance of legal practice to a community. Pre-requisite: LAWS2213 Foundations Enrichment 1
This course will seek to introduce students to some of the characteristic features of the post-communist world, to some of its difficulties, problems, challenges and triumphs, and to similarities and differences among the developments in post-communist societies. In particular law students will focus on the attempts to build and rebuild legal institutions to replace or transform those which were inherited from communism, and of the problems and prospects facing such attempts. Among the particular issues discussed are the prerequisites for establishing the rule of law after its prolonged absence, the role of constitutions and constitutional courts, the legal requirements for, and problems associated with, privatizing an economy which long had no private property, the legal impact of the legal standards of the European Union on any countries that want to join it and must satisfy those standards, the moral and legal problems associated with attempts to deal with the legacies of an unsavoury past. These latter problems include questions about the present role of former communists and informers of communist secret services. They also include questions of criminal justice in relation to war crimes and crimes against humanity in the former Yugoslavia.

**LAW2272 Australian Immigration Law and Practice**
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.
Examines Australian immigration law and practice. Focus is on the role of law in immigration selection and control, and the notions of citizen and alien. The course considers different models of selection and control. It examines in detail the present law in relation to the main visa classes granting permanent and temporary residence. Topics include: freedom of movement, residence and citizenship, entry for migrants, and temporary residents, admission and stay under international obligations, illegal entry, the function of compliance, the detention and removal of illegal immigrants and the immigration appeal system.

**LAW2301 Remedies**
Faculty of Law
UOC8 HPW4
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.
A study of the principal private law remedies at common law and in equity. The course analyses the nominate remedies of Australian law by reference to the remedial goals of the legal system, namely compensation, restitution, punishment and coercion. The relationship between the various remedies is also explored, as are the ways in which remedies are enforced in practice. The course aims to synthesise the law studied in courses, such as Torts, Contracts and Property and Equity from a remedial perspective.

**LAW2303 Clinical Legal Experience (Intensive)**
Faculty of Law
Enrolment requires school approval
UOC16 HPW16
Clinical legal education takes students out of the classroom and places them in a legal practice. This enables students to analyse the effect of law in practice and engenders in students an appreciation of the ethical, social and practical complexity of the legal system. Students are required to attend the Faculty's clinic, the Kingsford Legal Centre, one full day a week. The clinic is a community legal centre which provides a free legal service to the local community. Students are required to attend during midsession holidays and study breaks.

**LAW2304 Clinical Legal Experience**
Faculty of Law
Enrolment requires school approval
UOC8 HPW8
Clinical legal education takes students out of the classroom and places them in a law practice. This is both to enable students to analyse the effect of law in practice, and to engender in students an appreciation of the ethical, social and practical complexity of the legal system. Students are required to attend the Faculty's clinic, the Kingsford Legal Centre, one full day a week. The clinic is a community legal centre which provides a free legal service to the local community. Students are required to attend during midsession holidays and study breaks.

**LAW2305 Clinical Program - Employment Law**
Faculty of Law
Enrolment requires school approval
UOC16 HPW16
The Employment Law clinic requires students to undertake work for real clients while providing the student with opportunities to analyse the effect of law in practice. Through their work for disadvantaged clients on case, education and policy files students develop their understanding of substantive and procedural law and ethical issues in the area of employment. Students undertaking this Clinic will be working in a legal practice at Kingsford Legal Centre on employment law matters. They will be required to attend the Centre two days a week, 9am to 5pm, attend a weekly seminar of two hours and undertake evening and daytime public advice sessions. Students will be responsible for files under the supervision of the clinical supervisor. Students will conduct interviews with clients, make strategic decisions about conduct of the file, undertake research, draft all documents and where appropriate undertake advocacy in court or tribunals for the client. A daily tutorial and regular lectures provide opportunities for discussion and analysis of students' experiences and for instruction and development of ethical issues, employment law, legal procedure and skills. The course is offered in both teaching sessions and over summer. Students should note that due to requirements of caseloads, students will be required to attend during midsession holidays and study breaks.

**LAW2307 Social Justice Intern Program**
Faculty of Law
Enrolment requires school approval
UOC8
This program involves an internship for one day per week at one of the eight specialist centres associated with the Law Faculty. The principal goal is to provide students with training and practical experience in research, writing and advocacy on aspects of policy and practice relating to social justice (especially the reduction of inequality and exploitation).
Prerequisite/s: UOC6  HPW4

Faculty of Law

LAWS2311

Litigation 1

Litigation 1 examines civil pre-trial procedure and criminal pre-trial procedure. Civil procedure focuses on Supreme Court actions and topics such as the legal constraints relating to who may be a party to an action, the types of process for initiating a case, pleading rules, serving court process, discovery and exchange of information between parties. Supreme and Federal Court Rules are examined to determine the extent to which they facilitate just, accurate and speedy resolution of disputes.

The course examines problems of delay and cost in litigation with particular reference to alternative dispute resolution mechanisms, case management initiatives and the courts increasing control over the pre-trial litigation process. Criminal pre-trial procedure involves an examination of the law (and related policing issues) associated with arrest, warrants, search of the person and of premises, police questioning of suspects, the admissibility of illegally obtained evidence and the fundamentals of drafting indictments and informations. Comparisons are drawn between the civil and the criminal pre-trial processes on many issues.

Prerequisite/s: UOC8  HPW4

Dispute Resolution

This course is designed to follow and expand upon the compulsory Litigation courses. Students are expected to know the fundamentals of evidence law and trial procedure. Evidence and Advocacy concentrates on the criminal trial and is designed to allow a hands-on approach to learning evidence law and developing expertise in trial practice and procedure. The advocacy component requires students, working in groups, to prepare cases for trial. Effectively, students will be learning what US advocacy writers have called ‘case theory’. This is the pre-trial preparation of examination-in-chief, cross-examination, opening and closing addresses for trial. The evidence component builds on students’ basic knowledge of the doctrine, principles and rules relating to criminal litigation. Outside classroom hours students must attend criminal trials in progress to observe the conduct of judges, jurors, accused, witnesses and lawyers in real cases. Classroom discussion focuses on commentaries in the course text that examine a variety of issues associated with the dynamics of criminal trials.

Corequisite/s: LAWS2311, LAWS2321 or LAWS1010 and LAWS6210

Litigation 2

Litigation 2 introduces students to the legal principles and rules relating to the presentation of evidence in court. The course provides a comprehensive examination of the rules of evidence (the accused at trial, prosecutorial obligations, relevance, the rule against hearsay, the treatment of unreliable evidence, proof, witness questioning, protections for vulnerable witnesses, tendency and character evidence). Litigation 2 emphasises the context of evidence law and procedure - including for example an examination of the role of the trial judge, the impact of adversarialism and the difficulties faced by the accused (particularly the unrepresented accused) and certain witnesses in the courtroom. The Evidence Acts 1995 (Cth) and (NSW) form the backbone to the course.

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.

For details, see LAWS8320 Legal Theory earlier in the compulsory course section.

Prerequisite/s: UOC8  HPW4

Law and Social Theory

This course examines environmental law in both a theoretical and a practical sense. From the theoretical point of view, environmental law is considered through interdisciplinary perspectives in a policy setting. The non-legal perspectives in terms of which environmental law is considered include ecology, economics and philosophy. The practical orientation of the course is toward developing an understanding of the legal framework for environmental decision making in Australia, particularly in N.S.W. Topics to be covered include the relevance of ecology to environmental law, environmental ethics, international environmental law, Commonwealth powers with respect to the environment, a range of Commonwealth and NSW legislation relating to the environment, and different legal techniques for enhancing protection of the environment (eg, regulation through the criminal law, through traditional common law techniques such as nuisance and private covenants, through economic incentive schemes, and through systems of consents and licenses). Litigation and alternative dispute resolution techniques are examined. Attention is also given to: (1) the part played by political and administrative discretion in the field of environmental decision-making, with some emphasis on the tensions which exist between various levels and bodies of government; (2) the role of public participation in the decision making process; and (3) environmental law in other countries, particularly the U.S. Students are encouraged to take an interest in topical environmental issues.

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;
Corequisite/s: LAWS2311 or LAWS1010.

For details, see LAWS8820 Law and Social Theory earlier in the compulsory course section.

Law and Social Theory
responsibilities of parents and others relating to children; adoption of children; and procedural aspects of family law, including the roles of lawyers and court counsellors.

**LAWS2392**  
**Children and the Law**  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

The course is intended both for students who are interested in legal practice relating to children, and those who wish to broaden their understanding of the legal system by a critical examination of how it operates in a controversial and rapidly changing area. The present law in New South Wales is considered as well as the historical development of laws relating to children, proposed reforms, and comparative material from other jurisdictions. The materials draw on disciplines other than law (such as sociology, child development theory) so that legal developments can be related to the position of children in society and different perspectives on their rights and interests. There may be some variation in the topics to be covered, according to the interests of the particular teacher and students, but in general the course deals with the concept of children's rights; child welfare laws; the application of the criminal law to children and the jurisdiction and procedures in children's courts; education; foster care, and other forms of alternative care. It is desirable that students have completed LAWS2391 Family Law.

**LAWS2393**  
**Succession**  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1082; or LAWS3010

The law governing succession to property on death including the rules relating to wills, administration of assets, family provision and intestate succession. The law relating to death and the body is also part of this course. Equitable doctrines relating to the law of wills and administration of estates, including construction of wills, marshalling, satisfaction, and ademption are also studied. Emphasis is placed on Australia, but there is a significant comparative aspect to this course: Civil law systems, Aboriginal customary law and Islamic law of inheritance, inter alia. This is both an illuminating way of considering the relevant doctrines, and also is appropriate for practitioners in a multicultural country.

**LAWS2411**  
**Disability, Rights and the Law**  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

Real concerns have arisen in recent years about the rights of people with disabilities. This has resulted in the enactment of the Disability Discrimination Act 1992 (Cth) and in a number of legislative reforms at State level including the Guardianship Act 1987 (NSW) and amendments to the Anti-Discrimination Act 1977 (NSW). In order to understand these developments, this course examines the legislation in the light of the historical treatment of disability, both physical and intellectual, and critically evaluates the social construction of disability and the ensuing policies and practices. A variety of models explaining disability will be discussed and evaluated. The theoretical and legal context for disabilities will then be tested by an examination of a number of case studies. These may include case studies on integration in education, sexuality, medical treatment, employment and treatment in the criminal justice system. Finally, the role of law and social policy in facilitating change for people with disabilities will be considered.

**LAWS2412**  
**Discrimination and the Law**  
Faculty of Law  
UOC8 HPW4  
Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610;  
Corequisite/s: LAWS2311 or LAWS1010.

This course deals with the law and policy of anti-discrimination and equal opportunity. The problem of arbitrary denials of equality to many different sorts of groups, in many different aspects of life, is one which is increasingly recognised. The law has an important role as an instrument of public policy in this area. The course examines legal mechanisms, particularly those in Australia, which seek to end or control discrimination. Some aims of the course are to provide a good working knowledge of Australian anti-discrimination law (broadly understood, and covering legislation), as well as informal means of dispute resolution and to encourage a critical assessment of the relevant law and its limits.

**LAWS2421**  
**Research Project**  
Faculty of Law  
Enrollment requires school approval UOC2

This course permits individual students to undertake a research project upon a legal topic of their choice. The project will be undertaken in a topic area in which the student has studied or is already studying and where the research topic is undertaken in addition to assessment for that course. The indicative length of the Research Project is 2,500 words. The Research Project must have a clearly defined topic which has been approved by the academic supervisor of the project. The supervisor shall also examine the project. Unless the supervisor agrees otherwise, the final date of submission shall be the last day of the session in which the student is enrolled in the Research Project.

**LAWS2422**  
**Research Thesis: 16 UOC**  
Faculty of Law  
Enrollment requires school approval UOC16

Enrolment in a Research Thesis shall be approved by the School of Law if: 1. A clearly defined project is proposed: the thesis topic must be approved at the outset but may be modified at a later stage. 2. The student has a sufficient academic background in legal study to enable the thesis to be completed in a satisfactory manner. (An average mark of 65% in previous law courses is normally required). 3. Adequate supervision is available: supervision may be conjoint but at least one supervisor should be a full-time member of the School of Law’s academic staff. A research project may be undertaken (but by no more than three students) if a statement of the proposed division of work among members of the group is approved in advance by the supervisor or supervisors. The School of Law will initially limit its approval for a Research Thesis to the 8UOC enrolment (LAW2423). A student who has received approval for the 8UOC enrolment may be given subsequent approval to transfer to a 16UOC enrolment (LAW2422). Similarly a student who has received approval for a 16UOC enrolment may be given retrospective approval for transfer to the 8UOC enrolment. Thesis: The indicative length of the Research Project is 2,500 words. Where the research topic is undertaken in addition to assessment for that course, the indicative length of the Research Project is 2,500 words. The thesis must have a clearly defined topic which has been approved at the outset but may be modified at a later stage. 2. The thesis must be typed on A4 bond paper and two copies must be prepared in a cover (spring back folder or bound). References may appear at the foot of each page or at the end of each chapter. As a general rule the thesis shall be a maximum of 12,500 words for an 8UOC enrolment or 25,000 words for a 16UOC enrolment. Examination: Each thesis shall have two examiners, one of whom may be the supervisor or one of the supervisors. Unless the supervisor or supervisors otherwise agree, the final date for submission shall be the last day of the session in which the student is enrolled in the Research Thesis. Examiners may require a candidate or group of candidates to attend an oral examination on the subject matter of the thesis; examiners may require a thesis to be resubmitted under such conditions as the examiners may determine. These electives permit selected students to obtain credit for approved research projects undertaken individually or in groups. No student shall be permitted to obtain more than 16 UOC in any combination of the subjects LAWS2422 and LAWS2423.
LAWS2425
Research Thesis
Faculty of Law
Enrolment requires school approval
UOC4

LAWS2441
Law Journal
Faculty of Law
Enrolment requires school approval
UOC8

A student may be deemed, on the recommendation of the Dean and the Faculty Advisers to the Law Journal, to have satisfactorily completed this course on the basis of work done as an editor of the University of New South Wales Law Journal.

LAWS4010
Business Associations 1
Faculty of Law
Enrolment requires school approval
UOC6 HPW4

An introduction to a number of important legal and theoretical aspects of the operation of business corporations. In addition, there is a brief overview of partnership law. The corporate law component of the course falls into two parts. The first deals with the process and incidents of incorporation, including the derivation of the modern corporation and an introduction to regulatory structures; an introduction to the corporate constitution, organs and capital; the separate personality of the corporation and its exceptions. The balance of the course is concerned with the structure and governance of the corporation. It examines the corporate organs (the board of directors and the general meeting) and the division of corporate powers between them; the duties and liabilities of directors and other officers; the remedies available to shareholders for the enforcement of directors duties and protection against oppression or overreaching by controllers. While much of this legal doctrine is equally applicable to the large corporation as to the small enterprise, the course stresses the problems, processes and transactions typically encountered by small incorporated businesses.

Note/s: If taken as an elective, it is LAWS1091 UOC8.

LAWS6210
Law, Lawyers and Society
Faculty of Law
UOC6 HPW4

This course is a course in applied legal ethics. It examines the different values, rules and regulation that affect legal practice. Students will (1) learn to identify the values, rules and norms that lawyers should apply in practice; (2) judge what roles lawyers do play in society and the justice system, and what roles lawyers ought to play; (3) identify and begin to develop the skills necessary for ethical practice. The course considers the lawyer-client relationship, the regulatory framework governing legal practice including the role of self-regulation, the role of lawyers as advocates including the responsibility of lawyers for access to justice and the special duties and roles of the criminal defence lawyer, the prosecutor, and the public interest lawyer.

LAWS7420
Advanced Legal Research
Faculty of Law
UOC2 HPW2

Prerequisite/s: LAWS2140

This subject revises and expands upon students’ legal research skills. It introduces students to more specialised legal research tools such as digest and loose leaf services, and also introduces students to some of the tools used in researching foreign and international law. There is considerable emphasis in this subject on the use of electronic research tools.

LAWS8320
Legal Theory
Faculty of Law
Enrolment requires school approval
UOC6 HPW4

The course is composed of two parts. In part one we discuss a number of basic notions associated with contemporary legal philosophy. These include - the nature of legal analysis, the separation of law from other areas of social life, the character of legal positivism, the role of the legal decision-maker, legal practice as an interpretive activity, the character of moral judgment, the difference in moral theory between the right and the good, liberalism as a political theory and its opponents, and liberalism’s attitude to rights and to cultural difference. In part two we apply some of these ideas to a number of ‘problems’ in contemporary legal practice. Just which problems varies from semester to semester but typical areas of study would be - human rights in East Asia, the legal response to cultural diversity, feminism and difference, legal responsibility, punishment, rights and judicial power, citizenship, the character of legal decision-making.

LAWS8820
Law and Social Theory
Faculty of Law
Enrolment requires school approval
UOC6 HPW4

This course has to do primarily with interrelationships between law and other institutions and practices in society, particularly modern society; with what law does in society and what other elements of society do to it. These questions are approached, first, by examination of the great social theorists - especially Marx, Durkheim and Weber - who sought to explain the distinctive character of modern societies, and then by examination of transformations in contemporary law and society, and of different theoretical attempts to understand that law and those transformations. Those attempts include feminist and post-modernists analyses. LAWS8320 and LAWS8820 form part of the compulsory core of the LLB and BJuris degree courses with respect to students who entered the Faculty in 1981 or later. Students are required to take one of these two courses to fulfil compulsory requirements and are permitted to take the other as an elective.

LAWS9988
International Business Transactions
Faculty of Law
UOC8 HPW4

Prerequisite/s: LAWS1001, LAWS1011; or LAWS1610; Corequisite/s: LAWS2311 or LAWS1010.

This course examines the legal framework of the international business transaction by focussing on trade terms, the Vienna Convention on the International Sale of Goods and the structure and finance of international trade. The course covers a wide range of topics, including the commercial terms of the sales agreement, shipping contracts, financing arrangements (letters of credit, electronic transfers, etc.), insurance and customs documentation. The course also examines the foreign direct investment transaction, international franchise and distribution agreements and contracts for the transfer of technology. International business regulation is also reviewed with particular attention focussed on the World Trade Organization Agreements and regional trade agreements. Finally, dispute resolution is considered with emphasis on choice of law and forum, arbitration and enforcement of arbitral awards and foreign judgments.

LAWX1719
Issues in Community Corrections
Faculty of Law
UOC6 HPW2

LAWX1720
Crime and Society
Faculty of Law
UOC6 HPW2

Some of the issues arising from the relationship of crime to society, Crime as a dividing practice in the construction of normality. A critical history of traditional and current accounts of crime and delinquency. The subject is sourced from a variety of literatures. Topics include: the dramatisation of evil and the politics of social control; a genealogy of delinquency and its psychological and sociological explanations; theories of conformity and alienation; crime and discipline; women, crime and power.

LEGT1711
Legal Environment of Commerce
School of Business Law and Tax
UOC6 HPW3
The entire fabric of commerce is woven from a complex legal regime, judicial and statutory, which regulates all commercial activity. This subject deals with the Australian legal system; the Constitution and Commonwealth/State relations; Parliament and statute law; the courts and case law; the executive and administrative law; the legal process and alternative dispute resolution. Areas of substantive law relevant to commerce are examined including property law (with particular reference to intellectual property), torts law (with particular reference to negligence), contract law, criminal law, commercial entities and transactions, competition and consumer protection.

**LEG**T1732
**Franchising**
School of Business Law and Tax
UOC6 HPW3
Excluded: LEGT1733

Franchising is rapidly becoming the dominant force in the distribution of goods and services. This course examines the nature, development and significance of franchising in the Australian and international economies and addresses relevant legal and commercial issues. The legal nature and commercial implications of licensing arrangements to commercialise intellectual property are also examined.

**LEG**T2712
**Business, Ethics and the Law**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT1711 or 12UOC offered by Commerce and Economics or the approval of Head of School;
Excluded: LEGT1712, LEGT1750

Society increasingly demands ethical and social responsibility. This course provides an ethical dimension to the conduct of contemporary commerce in Australia. Although ethics exist independently of the law, legislative and common law developments are increasingly imposing higher standards of commercial morality. This course examines the conceptual basis of ethical behaviour, and the increasing attempts by the law to prescribe ethical behaviour, through a series of case studies drawn from disciplines within the Faculty's jurisdiction.

**LEG**T2721
**Business Transactions**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT1711:
Excluded: LEGT7721

Contract law forms the basis of all important commercial transactions and is essential to a proper understanding of more specialised areas of commercial law. This course examines the general principles of contract law and how they are developed and expanded in relation to specialised commercial transactions including agency, contracts for the sale of goods, guarantees, bankruptcy, negotiable instruments, securities and insurance law. Relevant areas of consumer protection and competition law are also discussed. The common contractual themes in which these areas are grounded will be highlighted, along with the different requirements attaching to the rights and obligations of parties to the transaction in such areas.

**LEG**T2731
**Marketing and Distribution Law**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT1711 or 12UOC offered by Commerce and Economics or approval of the Head of School;
Excluded: LEGT1731

The marketing and distribution of goods and services operates within a comprehensive regulatory framework. This course examines that framework. Topics include restrictive trade practices implications of distribution with special reference to collusion activity, exclusive dealing, resale price maintenance and abuse of market power; consumer protection and fair trading implications of sales promotion with particular reference to misleading or deceptive conduct and other unfair practices; advertising self regulation; product liability; protection of intellectual property; franchising, licensing and character merchandising.

**LEG**T2741
**Business Entities**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT2721 or LEGT7721;
Excluded: LEGT7741.

The law relating to the legal structures available for business including partnerships, joint ventures, trusts and companies. The primary focus is on the modern company and its operation under the Corporations Act. Topics include the nature of the corporate entity; establishing the company and fund raising; shares and dividends; the rights and duties of directors; the position of management; shareholders' rights and remedies for their enforcement; insolvency and liquidation.

**LEG**T2751
**Business Taxation**
School of Business Law and Tax
UOC6 HPW4
Prerequisite/s: LEGT2721 or LEGT7721;
Excluded: LEGT7751.

The complexity and comprehensiveness of the Australian taxation system demands that tax considerations must be taken into account in most business decisions. An understanding of the structure of the Australian taxation system and of the policy factors that guide legislators is essential to professional business advisors. This subject concentrates on income taxation in Australia. Topics include: concepts of income; allowable deductions; tax accounting; taxation of partnerships, trusts and corporations; anti-avoidance provisions; tax administration; capital gains tax; fringe benefits tax.

**LEG**T2756
**International Business Tax.**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT1711 or permission of the Head of School;
Excluded: LEGT7791

This course discusses the principles relevant to international taxation and uses Australian international tax rules to highlight possible international tax policy choices and problems. Special emphasis is given to tax strategies relevant to international direct investment.

**LEG**T2761
**Law of Banking and Finance**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT1711 or 12UOC offered by Commerce and Economics or the approval of the Head of School;
Excluded: LEGT1761

This course examines the regulatory environment for banking and finance with particular reference to lending transactions and the securities taken by all financial institutions that lend for profit. Topics include legal concepts underlying the bank-customer relationship and duties of banker and customer; foreign currency loans; consumer issues in lending; electronic banking; use and regulation of negotiable instruments (cheques, promissory notes and bills of exchange); corporate fund raising; domestic and international methods of fund raising.

**LEG**T2771
**Information Technology Law**
School of Business Law and Tax
UOC6 HPW3
Prerequisite/s: LEGT1711 or INF51602;
Excluded: LEGT7771

This course examines the laws governing information technology. The topics examined include intellectual property law - patents, copyright and confidential information; licensing; technology contracts; tortious liability; product liability; computer crimes; data protection and privacy; and current issues.
LEG72791
International Business Law
School of Business Law and Tax
UOC6  HPW3
Prerequisite/s:  LEGT1711 or 12UOC offered by Commerce and Economics or the approval of the Head of School;
Excluded:  LEGT1715, LEGT1791

Business today increasingly operates in an international market place. This course provides an introduction to the legal and commercial considerations affecting the conduct of business at an international level. Various types of international business activities and the more appropriate structures for them are considered, as are basic questions of finance, transport, property, intellectual property, fair trading and dispute resolution.

LEG73744
Corporate Fraud and Crime
School of Business Law and Tax
UOC6  HPW3
Corequisite/s:  LEGT3741 or LEGT7741;
Excluded:  LEGT7812.

Corporate fraud costs Australian business billions of dollars every year. This course examines aspects of fraud and corporate crime in their legal and commercial contexts. Topics include the analysis of the various laws relating to theft, fraud and other white collar crimes; the detection and investigation of fraud and associated issues including the powers of employers and law enforcement agencies, surveillance, and privacy; strategies for minimising legal exposure to fraud.

LEG73752
Capital Gains Tax
School of Business Law and Tax
UOC6  HPW3
Prerequisite/s:  LEGT3751;
Excluded:  LEGT7853

Capital Gains Tax in Australia potentially applies to an exceptionally wide range of transactions. The disposal of assets, the creation of rights, the granting of leases and options, and the forfeiture and surrender of rights all involve Capital Gains Tax issues. This course examines the basic structural features of Capital Gains Tax in Australia. Issues concerning the scope of Capital Gains Tax and the boundaries between Capital Gains Tax and ordinary income are then examined through a series of business related case studies. The Australian approach to taxing capital gains is compared with the approach taken by some of our major trading partners and reform options are discussed.

LEG73753
GST and FBT
School of Business Law and Tax
UOC6  HPW3
Prerequisite/s:  LEGT2751 or LEGT3751;
Excluded:  LEGT7754

The first part of this course examines Goods and Services Tax (GST). Emphasis is placed on the practical operation of GST. Topics discussed include: registration; taxable supplies; input tax credits; adjustments; accounting for and documenting GST; treatment of GST free supplies; treatment of input taxed supplies; and anti-avoidance provisions. The second part of this course deals with Fringe Benefits Tax (FBT). Topics include: the calculation of FBT liability; the rationale behind grossing up the taxable value of fringe benefits; definition of fringe benefit; valuation rules for fringe benefits; exempt fringe benefits; reconciliation with income tax; treatment of income tax exempt employers; and the use of fringe benefits in salary packaging.

LEG73755
Taxation of Business Entities
School of Business Law and Tax
UOC6  HPW3
Prerequisite/s:  LEGT2751 or LEGT3751;
Excluded:  LEGT7752

Australia currently taxes the different types of business entities in ways that are consistent with their legal form. It follows that some economically equivalent business structures are treated quite differently from each other for tax purposes. Issues relating to the choice of a particular type of business entity and its operation produce tax planning opportunities and tax policy challenges. This course examines tax issues relevant to the creation, operation and termination of partnerships, trusts and companies. It places particular emphasis on a detailed examination of the dividend imputation system and on issues arising when dividend income moves through a partnership, a trust or an interposed company. It also examines tax issues relevant to other selected business entities such as joint ventures, cooperatives, and superannuation funds.

LEG73757
Corporate Tax Strategy
School of Business Law and Tax
UOC6  HPW3
Prerequisite/s:  LEGT2751 or LEGT3751

What are the tax implications of the different financing alternatives available to corporations? Are all the different methods of profit distribution from a company equally tax effective? How should a merger or a demerger be structured from a tax perspective? Why are the tax consequences of restructuring the capital of corporations? What are the implications of the tax consolidation provisions for corporate groups? What tax considerations might be relevant when undertaking a corporate restructuring? This course will examine these and similar questions through a series of case studies and simulation games.

LEG73758
Taxation of Financial Products
School of Business Law and Tax
UOC6  HPW3
Prerequisite/s:  LEGT2751 or LEGT3751

This course deals with the taxation treatment of financial products. It examines the current classifications of financial products for tax purposes and the tax consequences that flow from those classifications. Topics dealt with include: public offers of equity and debt instruments; hybrid securities; discounted and deferred interest securities; derivatives; foreign exchange gains and losses; asset financing; lease financing; and international taxation issues associated with financial products.

LEG74721
Special Topic in Business Law
School of Business Law and Tax
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s:  LEGT1711 and approval from the Head of School;
Excluded:  LEGT7821

A specially assigned project, program or set of readings relating to research in business law.

LEG74722
Special Topic in Taxation
School of Business Law and Tax
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s:  LEGT1711 and approval from Head of School;
Excluded:  LEGT7822

A specially assigned project, program or set of readings relating to research in taxation.

LIFE1001
Life Science Advanced Seminar 1
Faculty of Science
UOC3  HPW2

An introduction to the professional abilities underlying key advances in research across the broad range of Life Sciences, and insights into how these advances impact on their fields and on society. Examples of the latest research and future directions from a broad range of disciplines will be examined critically, with fields covered including biomedical science, environmental science, biotechnology and psychology. Library and WWW searches will consolidate material, which will focus on research activities and facilities within the University, including laboratory visits, and discussions with laboratory staff.

Note/s: Restricted to Advanced Science students.
Introduces modern biochemistry and the fascinating world of microorganisms covering functional aspects of the structure and function of proteins; the biology, diversity and function of bacteria; and intermediary metabolism in micro- and higher organisms. Major topics include: the three domains of life (i.e. Eubacteria, Archaea and Eucarya) and viruses; the nature and function of enzymes; the metabolic working of cells, tissues and organs; the interrelationships between pathways of carbohydrate, lipid and amino acid metabolism; the vital roles of enzymes in catalysis and metabolic regulation; the energy-trapping mechanisms of micro-organisms, animals and plants; comparative aspects of microbial growth; bacteria biosynthetic pathways; bacteria and disease; the action of antimicrobial agents.

Note/s: Restricted to Bioinformatics Program

LING1000
The Structure of Language
Linguistics
UOC6 HPW3

An introduction to general linguistics, focusing on the traditional core areas of language structure (phonology, morphology, grammar and semantics) and on the acquisition of language. This course is particularly recommended not only for those interested in the nature and structure of the English language, but also for those studying ESL or a foreign language.

LING1500
The Use of Language
Linguistics
UOC6 HPW3

Examines how contemporary linguists deal with issues of language use, such as the nature of human communication, the influence of social attitudes on language, the principles of pragmatics, the historical development of languages, language universals and language typology, the nature and evolution of writing, regional and situational variation in language.

LING2510
Analysing Talk
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500

Explores conversation and other forms of talk from an ethnomethodological perspective, with the main focus on how participants in conversation structure and organise their contributions and interactively construct meanings and activities in their talk. Special attention will be paid to methods speakers employ to distribute turns at talk, the ways in which the actions performed in these turns are coherently sequenced, how speakers and listeners deal with disagreements and disaligning talk (preference organisation) and with troubles in hearing, speaking and understanding (repair). Students will be required to transcribe a short conversation, and then analyse it in terms of one or more features of the talk that have been discussed in the class.

LING2520
Generative Grammar
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500

An introduction to generative grammar as developed by Noam Chomsky and others. Examines earlier Chomskyan models of syntax and the more recent ones, with particular reference to the Principles and Parameters framework. Topics include syntactic categories and features, phrasal representations, economy, movement and empty categories.

LING2530
Visual Communication
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500;
Excluded: ENGL3504, ENGL3550.

Communication in contemporary society increasingly combines language with one or more different modalities, such as visual images, sound and spatial layout. Explores the techniques and theoretical frameworks useful in analysing how such multi-modal texts create meaning and construct positions for readers, and considers a range of texts from printed advertisements and magazines, to web pages, CD Roms, and public sites such as shops, museums and galleries. Aspects covered include the ‘grammar’ of visual images, the interaction of verbal and other modalities, ideological dimensions of multi-modal texts, literacy and access.

LING2540
Semantics and Pragmatics
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500;
Excluded: LING2603

Considers the nature and scope of semantics and pragmatics and their place within linguistics. Begins with an examination of the nature of linguistic meaning. Particular attention is paid to the different theoretical approaches to lexical semantics, the relationship between semantics and grammar, and semantic change. Considers the way language is used in real world contexts and how meanings are shaped by contextual factors, such as who is speaking to whom, in what kinds of spatio-temporal and sociocultural situations. Includes an exploration of speech act theory, conversational maxims, politeness theory, and notions of context and culture.

LING2551
Contemporary English Grammar
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500;
Excluded: LING2200, LING2550

Introduces the concepts, categories and terminology of English grammar, beginning with the parts of speech and progressing, through phrases and clauses, to the sentence and beyond. While the approach is traditional, it is informed by the work of contemporary grammarians. Applies the analytical methods presented to the analysis of texts representing a range of genres, to issues of ‘good’ and ‘bad’ usage, and to the development of writing.

LING2590
The English Language: Its first Millennium
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500

Examines early English from the first written texts to the development of Standard English. Studies a variety of texts from the Old English & Middle English periods and considers how these differ from Modern English in sounds, sentence formation and vocabulary. Particular attention will be paid to exploring the reasons for the seeming illogicality of Modern English spelling.
LING2680
Language Universals and Linguistic Typology
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500;
Excluded: LING2612
Examines language universals and linguistic typology. Explores linguistic categories across a wide range of languages, including word classes, case, transitivity, negation, complex predicates and complement clauses, among others. Also examines language-internal and language-external explanations for language universals.

LING2700
Language Learning and Teaching
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500;
Excluded: LING2000, LING2300, LING3901.
Studies the application of linguistics and applied linguistics in a variety of educational contexts, including literacy education. explores English as a second language, bilingual education and languages other than English. In particular, the course considers the contributions from research and from linguistics to teaching practices.

LING2900
The Linguistics of Signed Languages
Linguistics
UOC6 HPW3
Prerequisite/s: LING1000 or LING1500
Introduces the fundamental structure of natural signed languages, covering the essentials of signed language phonology, morphology and syntax, and examining the important features of all these levels of structure. Compares the basic properties of signed languages with those of spoken languages in order to see in which ways signed languages are similar to spoken languages and in which ways they differ. Examines signed languages in terms of their acquisition as first and second languages, and some sociolinguistic issues that arise for users of signed languages.
Note/s: Students do not need to be able to sign in order to take this course.

LING3001
Current Issues in English Grammar
Linguistics
UOC6 HPW3
Prerequisite/s: LING2551;
Excluded: LING2800
Explores current issues in descriptive grammar, including the distinction between structure and function, the nature of constituency, the language particular - language general distinction, the relationship between grammar and information packaging, the definition of word classes, and the description of subordination and coordination.

LING4000
Linguistics Honours (Research) Full-Time
Linguistics
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in LING at an average of 70%, including two of LING3900, LING3901, LING3902, LING3903 and permission of Head of Department.
Honours (Research) students are required to prepare a thesis of between 15,000 and 20,000 words, which must be submitted by a date specified by the Department, and to complete two courses. Please refer to the list of courses under the entry for MA (Pass) Linguistics (Applied).

LING4500
Combined Linguistics Honours Full-Time
Linguistics
Enrolment requires school approval UOC12
Prerequisite/s: 48 units of credit in LING at an average of 70%, including two of LING3900, LING3901, LING3902, LING3903.
This program is undertaken in conjunction with one of the other Schools/Departments in the Faculty. Students are required to complete a research and seminar program acceptable to both the Linguistics Department and the other School/Department.

LING4550
Combined Linguistics Honours Part-Time
Linguistics
Enrolment requires school approval UOC6
Prerequisite/s: 48 units of credit in LING at an average of 70%, including two of LING3900, LING3901, LING3902, LING3903.
This program is undertaken in conjunction with one of the other Schools/Departments in the Faculty. Students are required to complete a research and seminar program acceptable to both the Linguistics Department and the other School/Department.

MANF4420
Production Management
School of Mechanical and Manufacturing Engineering
UOC6 HPW6
Excluded: MANF4420, MANF4430, MANF4440
General principles of management: an overview of the basic ideas and issues of management including the functions and roles of a manager, strategic and operational planning and monitoring systems with an emphasis on production and operations management; classical and modern organisation theories; overview of human and cultural issues in organisations; issues of project management. Quantitative techniques for management: engineering economic analysis including the analysis of investment decisions under risk and uncertainty. Modern techniques of statistical quality control and its extensions to statistical process control. Project management and control using network analysis. Human and cultural aspects of management: motivation and leadership theory; organisational cultures; organisational change and development; TQM cultures and the "internal customer".

MANF1130
Introduction to Manufacturing
School of Mechanical and Manufacturing Engineering
UOC6 HPW7
Excluded: MANF1100, MANF1110, MANF1120
The relationship between product design and manufacturing processes is introduced with theoretical and practical classes. Description and elementary analysis of manufacturing processes such as forming from liquid or solid and material removal. Introduction to non-metallic materials processing. Introduction to drawing techniques for engineering communication which includes freehand sketching and orthogonal projections. Use of computer graphics for modelling and production of detailed drawings of components. Elementary functional analysis of product design for manufacturing and performance. Practical training of approximately 33 hours will involve processes such as welding, fitting and machining as well as introduction to safety in a manufacturing environment.
Note/s: Protective items e.g. safety glasses, safety boots, overalls or dustcoat, etc are required for the practical training in order to comply with the Occupational Health and Safety Act. Students must possess these items before commencing this course. Students who have done appropriate technology-based courses at school or who have an appropriate trade or certificate qualification or are suitably employed, may seek an exemption for the practical training classes.
Design for economic manufacture. Geometric analysis of product designs and the technology and economics of manufacturing and assembly processes. The principle and technology underlying dimensional metrology for quality product manufacture. The analysis provides a basis for rational process selection and the refinement of product design to suit the chosen manufacturing methods.

MANF3300
Design of Manufacturing Facilities 1
School of Mechanical and Manufacturing Engineering
UOC6 HPW4
Corequisite/s: MANF3210, MANF3420, MANF3500, MATH2839

The design of workplaces including jigs and fixtures where operations such as assembly and measurement are performed by a human operator or robot. Documentation of manufacturing processes, characteristics of human operators and robots, workplace and methods design. Measurement of workplace element characteristics.

MANF3420
Industrial Experimentation
School of Mechanical and Manufacturing Engineering
UOC3 HPW2
Prerequisite/s: MATH2839

Statistical design and analysis of experiments to investigate the quality of products and the performance of manufacturing processes. Experiments of comparison, classical correlation and regression analysis, multiple linear regression analysis, accelerated experiments, analysis of variance.

MANF3500
Computers in Manufacturing 1
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: ELEC0807, MANF1130, MECH1500

Selection and use of computer-controlled devices such as robots and machine tools in manufacturing systems: principles of numerical control and PLCs, NC machine tools, NC programming, CNC/AC/DNC computer controls, accuracy of NC machines, fundamentals and applications of robots.

MANF3601
Manufacturing Operations Analysis A
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: MATH2839, MECH1500

Principles and techniques of Operations Research and Analysis including linear and non-linear programming; basic queuing theory and stochastic processes; heuristic techniques; applications to manufacturing.

MANF3602
Manufacturing Operation Analysis B
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: MATH2839, MECH1500

Introduction to simulation; use of simulation packages; experimental design in simulation. Simple data modelling and information systems design; running an information system in conjunction with a factory simulation model.

MANF4011
Analysis of Manufacturing Systems A
School of Mechanical and Manufacturing Engineering
UOC3 HPW2

Students will work in project teams to perform a complete manufacturing system design and analysis, involving activities such as: design for manufacture, process selection, tolerance optimisation, workplace design, factory layout, production control system, detailed budget. A satisfactory grade in this course is provisional pending successful completion of MANF4012.

MANF4012
Analysis of Manufacturing Systems B
School of Mechanical and Manufacturing Engineering
UOC3 HPW2
Prerequisite/s: MANF4011

Further project work, continuing from activities in MANF4011 Manufacturing Systems A.

MANF4300
Design of Manufacturing Facilities 2
School of Mechanical and Manufacturing Engineering
UOC6 HPW4
Corequisite/s: MANF3300

Introduction to plant layout design, materials handling and assembly systems. Use of ergonomic design for man/machine tasks. Analysis and simulation of various types of manufacturing facilities.

MANF4430
Management for Engineers
School of Mechanical and Manufacturing Engineering
UOC6 HPW6
Excluded: MANF0420

General principles of management: an overview of the basic ideas and issues of management including the functions and roles of a manager, strategic and operational planning and monitoring systems with an emphasis on production and operations management; classical and modern organisation theories; overview of human and cultural issues in organisations; issues of project management. Quantitative techniques for management: engineering economic analysis including the analysis of investment decisions under risk and uncertainty. Modern techniques of statistical quality control and its extensions to statistical process control. Project management and control using network analysis. Human and cultural aspects of management: motivation and leadership theory; organisational cultures; organisational change and development; TQM cultures and the “internal customer”.

MANF4440
Strategic Manufacturing Management
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: MANF3420, MANF3602

Industry dynamics; Porters model, the value chain and forms of competitive advantage; matching manufacturing strategy to the market; core competencies and process positioning; focused manufacturing; vertical vs horizontal integration; supply chain management, global manufacturing and the virtual corporation; matching performance measures to strategy.

MANF4500
Computers in Manufacturing 2
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: MANF3500

Integration of the basic elements of manufacturing facilities into systems: selection of automation equipment, principles of group technology and cellular manufacturing, Flexible Manufacturing Cells, planning and layout of Flexible Manufacturing Systems, integration of CAD and CAM, computer integrated manufacturing, computer aided process planning.

MANF4601
Computer Aided Production Management A
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: MANF3601

The dynamics of material flow through a manufacturing system; basic and advanced techniques of production planning and control and their realisation within a factory simulation model; matching different approaches to different types of manufacturing situations.
MANF4602
Computer Aided Production Management B
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MANF3602

Use of decision support and knowledge based systems in production management; designing a production management database; types of integration and integrated decision making; implementation of these concepts with a factory simulation model.

MARK1012
Marketing Fundamentals
School of Marketing
UOC6 HPW3.5

Major concepts and theories relevant to the study and practice of marketing are introduced. Topics include the changing global marketplace, marketing processes and planning, the use of market research, an understanding of consumers and customers, decision-making and the marketing mix, market segmentation, positioning and product differentiation. This introductory subject prepares students for further study across the broad spectrum of product, service, consumer, business-to-business, industrial, global and social marketing.

MARK1014
Customer Relationship Management
School of Marketing
UOC6 HPW3

Customer Relationship Management (CRM) lies at the heart of marketing and management consulting. It has long been the backbone of industrial, trade, purchasing and services marketing, and the trend in recent years has been to use CRM techniques in dealing with final consumers as well. A purpose of the course is to develop relationship-building skills, in areas such as personal selling, direct marketing and commercial negotiations. Another goal is to demonstrate the role of new technology in widening the scope and potential of CRM, especially through the use of interactive and personalisation technologies. Topics include: CRM, loyalty and retention marketing; traditional methods of direct marketing and personal selling; commercial negotiations for lasting results; technology-based methods of relationship-building with customers, including interactive and e-customer management; permission marketing, data protection and privacy concerns. Exercises and cases are an integral part of the course, and this may require some flexibility with the timing of classes.

MARK2051
Consumer Behaviour
School of Marketing
UOC6 HPW3.5
Prerequisite/s: MARK1012; Corequisite/s: MARK2052

The need for marketers to understand why consumers act as they do in the marketplace is the crux of this subject. Students are equipped with theoretical and conceptual knowledge of consumer behaviour, drawing heavily on both psychological and sociological viewpoints. This includes the psychology of individual decision-making and choice, patterns of behaviour exhibited by aggregate groups of consumers, and also the sociological and cultural influences on consumer attitudes and behaviour. This prepares students for making informed decisions about how to manage and respond to the needs and wants of consumers.

MARK2052
Marketing Research
School of Marketing
UOC6 HPW4
Prerequisite/s: MARK1012; Corequisite/s: MARK2051

The sources and types of marketing information relevant to marketing management are examined, with the aim of developing an informed analytical approach to the study of consumers and markets. Topics include problem definition, research design, questionnaire design, sampling, basic numeracy, analysis and interpretation of data, reporting, and also management control of research, including briefing, evaluation of proposals and the distinction between research results and marketing implications. The use of continuous research and new developments such as automated and interactive forms of data gathering are discussed as well.

MARK2053
Marketing Communications and Promotions Management
School of Marketing
UOC6 HPW3.5
Prerequisite/s: MARK2051; Corequisite/s: MARK2054

The aim is to offer insights into the various decisions and principles that marketing managers have to consider when developing an overall communications and promotions strategy. Key topics are the promotional mix, the design, implementation and evaluation of communications strategies and the need to make use of both creative and reasoning processes. An integrated approach is adopted, including an understanding of the role of media advertising, promotions, public relations, direct marketing and new interactive media. The course builds on knowledge of consumer behaviour and the analytical skills of marketing research.

MARK2054
Market Analysis
School of Marketing
UOC6 HPW4
Prerequisite/s: MARK2052; Corequisite/s: MARK2053

This course links the analytical material of MARK2052 with practical issues in marketing management, including the analysis of competitive markets, product positioning, strategic analysis, demand forecasting, and financial and budgetary aspects. The subject is practical and data driven, with students exposed to specific tools and techniques using computer-based software. The importance to contemporary business of numeracy, problem-solving, measurement and analysis is a central theme, and is explored through exercises and tutorials.

MARK2999
Industrial Training 1 (Co-op)
School of Marketing
UOC12
Prerequisite/s: MARK1012; Corequisite/s: MARK2052, MARK2054

Students consider the practical application of the fundamental principles of marketing in an industry environment.

MARK3071
International and Global Marketing
School of Marketing
UOC6 HPW3
Prerequisite/s: MARK1012

The purpose of this course is to develop a thorough appreciation of the international aspects of contemporary marketing. Topics include: conceptual and environmental aspects of international marketing; market entry strategies; managing marketing across borders; globalisation strategies, including global branding; developing practical marketing strategies for different world markets; how marketing theory needs to be adjusted or extended for application in an international setting. Skills will be acquired through case analysis, teamwork and creative problem-solving.

MARK3072
Advanced Consumer Behaviour
School of Marketing
UOC6 HPW3
Prerequisite/s: MARK2051, MARK2052

The principles covered in MARK2051 are explored in a deeper and more questioning way. Content is focused on critical issues in consumer behaviour thought and practice, including an understanding of consumer choice processes, the effects of experience and learning, attitude formation, social networks and their impact on consumption, segmentation, brand management and communications processes. Issues are explored through theoretical frameworks, market research, experiments and detailed case studies.
This course presents an integrated approach to distribution strategy and retail channel management. It addresses analytic, strategic and managerial aspects of distribution (the creation of product and service availability through marketing channels) and retail marketing (the management and marketing assortments of merchandise for direct sale to the consumer). Typically, topics include: marketing channel structure and functions, the retailing industry, channel design, channel structure, channel power and conflict, distribution intensity, retail product selection, assortment planning, retail buying, retailer's own brands, channel integration, wholesaling, franchising, strategic alliances in distribution, international retailing, non-store retailing, electronic retailing and electronic distribution channels.

A course that integrates knowledge of market analysis with strategic business considerations, to achieve superior performance in sales growth, market share and profit contribution. Topics include: business definition, organisational strategy, and corporate policy; competitive and life-cycle strategies at the level of the business unit; portfolio analysis, diversification, and differentiation; social, ethical, technological, legal and global issues as they impact on marketing performance. Students draw on materials from all previous marketing courses and practical case studies.

A course focused on how to develop a business plan for a new product or service launch, having diagnosed a market opportunity. This involves an understanding of product-based competition and an appreciation of strategic options available to firms that are adept at development. Themes include: NPD processes, from setting a strategic framework for the development effort through to monitoring post-launch success; methods of market research and the use of analytical approaches such as perceptual mapping, benefit segmentation, trends unbundling and morphological analysis; screening and ranking processes to set priorities for development; converting concepts into prototypes; developing strategies and plans for the commercial launch. Some exercises may require flexibility with the timing of classes.

What brands are, how they are created and managed, and how they add value to consumers and the firm. Topics include: the importance of product, service and corporate brands; how awareness, loyalty, perceived quality, design, legal protection, and the name itself combine to produce brand equity; how these dimensions are tested, measured and valued; strategies and tactics for maintaining and reviving brands; multi-brand portfolios, extensions, and brand architectures; brands as a driving force for standardisation and globalisation. Detailed case analysis is an integral part of the subject and this may require flexibility with the timing of classes.

Students consider the practical application of the fundamental principles of marketing in an industry environment.

Students consider the practical application of the fundamental principles of marketing in an industry environment.

Students consider the practical application of the fundamental principles of marketing in an industry environment.

Students consider the practical application of the fundamental principles of marketing in an industry environment.

Students consider the practical application of the fundamental principles of marketing in an industry environment.

Students consider the practical application of the fundamental principles of marketing in an industry environment.

Students consider the practical application of the fundamental principles of marketing in an industry environment.
MARK7213
Contemporary Research Methods in Marketing
School of Marketing
Enrolment requires school approval
UOC6 HPW2
Prerequisite/s: Admission to BCom Honours in Marketing.

The Marketing discipline - its origin, development and future direction. The use of different methods to examine research questions - quantitative, experimental, qualitative, and ethnographic approaches. Advanced survey-based methods. Experimental approaches to research in marketing, including experimental designs and analysis of variance. Consideration of non-quantitative methods - notably qualitative methods, in-depth interviews, case-study analysis, anthropological and ethnographic approaches, cross-cultural studies and phenomenological work. Post-modernist methods of enquiry.

MATH1000
Modelling Real World Phenomena
School of Mathematics
UOC3 HPW2
Introduction to the process of constructing mathematical models of real-world processes and situations. The emphasis is on seeking reasonable solutions to open-ended problems, not on the application of particular mathematical techniques. Examples will be taken from biology, finance, operations management, computer science, meteorology and other fields. Students will research a large project in teams and present a written and oral report on their results.

Note/s: Restricted to students in Advanced Science.

MATH1011
General Mathematics 1B
School of Mathematics
UOC6 HPW6
Excluded: MATH1031, MATH1131, MATH1141, MATH1151, ECON1202, ECON2291

Functions (and their inverses), limits, asymptotes, continuity; differentiation and applications; integration, the definite integral and applications; inverse trigonometric functions; the logarithmic and exponential functions and applications; sequences and series; mathematical induction; the binomial theorem and applications; introduction to probability theory; introduction to 3-dimensional geometry; introduction to linear algebra.

Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC Mathematics. Students who have taken General Mathematics will not have achieved the level of knowledge which is assumed in this course.

Note/s: This course is not intended for students who propose to study a substantial amount of Mathematics beyond first year level. Many later year courses in Mathematics have completion of MATH1231, MATH1241 or MATH1251 as a prerequisite.

MATH1021
General Mathematics 1C
School of Mathematics
UOC6 HPW6
Excluded: MATH1031, MATH1131, MATH1141, MATH1151, ECON1202, ECON2291

Techniques for integration, improper integrals; Taylor’s theorem; first order differential equations and applications; introduction to multivariable calculus; conics; finite sets; probability; vectors, matrices and linear equations.

Note/s: This course is not intended for students who propose to study a substantial amount of Mathematics beyond first year level. Many later year courses in Mathematics have completion of MATH1231, MATH1241 or MATH1251 as a prerequisite.

MATH1031
Mathematics for Life Sciences
School of Mathematics
UOC6 HPW6
Excluded: MATH1011, MATH1021, MATH1131, MATH1141, MATH1151, MATH1231, MATH1241, MATH1251, ECON1202, ECON2291

Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC Mathematics. Students who have taken General Mathematics will not have achieved the level of knowledge which is assumed in this course.

Note/s: This course is not intended for students who propose to study a substantial amount of Mathematics beyond first year level. Many later year courses in Mathematics have completion of MATH1231, MATH1241 or MATH1251 as a prerequisite.

MATH1041
Statistics for Life and Social Sciences
School of Mathematics
UOC6 HPW6
Excluded: MATH1049, MATH1059, MATH2829, MATH2839, MATH2841,MATH2859, MATH2899, ECON1203, ECON2292

Assumed Knowledge: As for MATH1031

Note/s: This course is not intended for students who propose to study a substantial amount of Mathematics beyond first year level. Many later year courses in Mathematics have completion of MATH1231, MATH1241 or MATH1251 as a prerequisite.

MATH1081
Discrete Mathematics
School of Mathematics
UOC6 HPW6
Corequisite/s: MATH1131 or MATH1141 or MATH1151;
Excluded: MATH1090.

Assumed Knowledge: HSC Mathematics Extension 1. Students will be expected to have achieved a combined mark of at least 100 in Mathematics and Mathematics Extension 1.

MATH1090
Discrete Mathematics for Electrical Engineers
School of Mathematics
UOC6 HPW6
Corequisite/s: MATH1131 or MATH1141;
Excluded: MATH1081.

The role of proof in mathematics, logical reasoning and implication, different types of proofs. Sets, algebra of sets, operations on sets, mathematical logic, truth tables, syntax, induction. Recursion, recursive logic, recurrence relations.

Assumed Knowledge: HSC Mathematics Extension 1. Students will be expected to have achieved a combined mark of at least 100 in Mathematics and Mathematics Extension 1.

Note/s: Available only to students for whom it is specifically required as part of their program.

MATH1131
Mathematics 1A
School of Mathematics
UOC6 HPW6
Excluded: MATH1011, MATH1031, MATH1141, MATH1151, ECON1202, ECON2291

Complex numbers, vectors and vector geometry, linear equations, matrices and matrix algebra, determinants. Functions, limits, continuity and differentiability, integration, polar coordinates, logarithms and
exponentials, hyperbolic functions, functions of several variables. Introduction to computing and the Maple symbolic algebra package. **Assumed Knowledge**: HSC Mathematics Extension 1; Students will be expected to have achieved a combined mark of at least 100 in Mathematics and Mathematics Extension 1.

**MATH1141**  
**Higher Mathematics 1A**  
School of Mathematics  
UOC6 HPW6  
Excluded: MATH1011, MATH1031, MATH1131, MATH1151, ECON1202, ECON2291  
As for MATH1131 but in greater depth.  
**Assumed Knowledge**: HSC Mathematics Extension 1 and Extension 2. Students will be expected to have achieved a combined mark of at least 186 in Mathematics Extension 1 and Extension 2.

**MATH1151**  
**Mathematics for Actuarial Studies and Finance 1A**  
School of Mathematics  
UOC6 HPW6  
Excluded: MATH1011, MATH1031, MATH1131, MATH1141, ECON1202, ECON2291  
Vectors and vector geometry, linear equations, matrices and matrix algebra, basic input-output linear models, determinants, least squares approximation, probability and statistics. Limits, continuous and differentiable functions, mean value theorem, fundamental theorem of calculus, numerical integration, functions of several variables, introduction to Matlab.  
**Assumed Knowledge**: HSC Mathematics Extension 1. Students will be expected to have achieved a combined mark of at least 140 in Mathematics and Mathematics Extension 1 or 180 in Mathematics Extension 1 and Extension 2.

**MATH1231**  
**Mathematics 1B**  
School of Mathematics  
UOC6 HPW6  
Prerequisite/s: MATH1131 or MATH1141;  
Excluded: MATH1021, MATH1031, MATH1241, MATH1251, ECON1202, ECON2291.  
Vector spaces, linear transformations, eigenvalues and eigenvectors. Introduction to probability and statistics. Integration techniques, solution of ordinary differential equations, sequences, series, applications of integration.

**MATH1241**  
**Higher Mathematics 1B**  
School of Mathematics  
UOC6 HPW6  
Prerequisite/s: MATH1131 CR or MATH1141CR;  
Excluded: MATH1021, MATH1031, MATH1231, MATH1251, ECON1202, ECON2291.  
As for MATH1231 but in greater depth.

**MATH1251**  
**Mathematics for Actuarial Studies and Finance 1B**  
School of Mathematics  
UOC6 HPW6  
Prerequisite/s: MATH1151;  
Excluded: MATH1021, MATH1031, MATH1231, MATH1241, ECON1202, ECON2291.  
Complex numbers, vector spaces, polynomial interpolation, linear transformations, Markov processes, eigenvalues and eigenvectors. Exact and numerical solution of ordinary differential equations, sequences, double integrals, Lagrange multipliers.

**MATH2011**  
**Several Variable Calculus**  
School of Mathematics  
UOC6 HPW5  
Prerequisite/s: MATH1231 or MATH1241 or MATH1251;  
Excluded: MATH2019, MATH2039, MATH2049, MATH2100, MATH2110, MATH2111, MATH2510, MATH2610.  
Functions of several variables, limits and continuity, differentiability, gradients, surfaces, maxima and minima, Taylor series, Lagrange multipliers, chain rules, inverse function theorem, Jacobian derivatives, double and triple integrals, iterated integrals, Riemann sums, cylindrical and spherical coordinates, change of variables, centre of mass, curves in space, line integrals, parametrised surfaces, surface integrals, del, divergence and curl, Stokes’ theorem, Green’s theorem in the plane, applications to fluid dynamics and electromodynamics, orthogonal curvilinear coordinates, arc length and volume elements, gradient, divergence and curl in curvilinear coordinates.

**MATH2019**  
**Engineering Mathematics 2CE**  
School of Mathematics  
UOC6 HPW5  
Prerequisite/s: MATH1231 or MATH1241;  
Excluded: MATH2011, MATH2111, MATH2510, MATH2610, MATH2120, MATH2130.  
Partial differentiation and applications, vector algebra, double integrals, ordinary differential equations, introduction to vector field theory, extrema of functions of 2 variables, matrices and their applications, Laplace transforms, Fourier series, partial differential equations and their solution for selected physical problems.  
**Note/s**: Available only to students for whom it is specifically required as part of their program.

**MATH2020**  
**Mathematics 2A**  
School of Mathematics  
UOC3 HPW2  
Prerequisite/s: MATH1021(CR) or MATH1031(CR) or MATH1231 or MATH1241.  
**Note/s**: MATH2020 and MATH2030 are intended for students who want to take no more than 6 units of credit in Level II Mathematics. If any other Level II courses in Mathematics other than Statistics courses are taken then neither MATH2020 nor MATH2030 will be counted.

**MATH2029**  
**Engineering Mathematics 2A**  
School of Mathematics  
UOC6 HPW6  
Prerequisite/s: MATH1231 or MATH1241;  
Excluded: MATH2120, MATH2130.  
**Note/s**: Available only to students for whom it is specifically required as part of their program.

**MATH2030**  
**Mathematics 2B**  
School of Mathematics  
UOC3 HPW2  
Prerequisite/s: MATH1021(CR) or MATH1031(CR) or MATH1231 or MATH1241.  
Fourier series; multiple integrals, matrices and their applications to the theory of linear equations, eigenvalues; introduction to numerical methods.  
**Note/s**: MATH2020 and MATH2030 are intended for students who want to take no more than 6 units of credit in Level II Mathematics. If any other Level II courses in Mathematics other than Statistics courses are taken then neither MATH2020 nor MATH2030 will be counted.

**MATH2039**  
**Engineering Mathematics 2B**  
School of Mathematics  
UOC3 HPW3  
Prerequisite/s: MATH1231 or MATH1241;  
Excluded: MATH2011, MATH2111, MATH2510, MATH2610.  
Multiple integrals, vector calculus, extrema of functions of several variables.  
**Note/s**: Available only to students for whom it is specifically required as part of their program.
MATH2049  
Mathematics and Statistics for Materials Science A
School of Mathematics
UOC3  HPW3
Prerequisite/s: MATH1231 or MATH1241; Excluded: MATH2011, MATH2111, MATH2510, MATH2610, MATH2841.

Statistics: graphical data analysis, random variables and their properties, normal and binomial distributions, functions of random variables and their simulation using computers, one and two sample inference methods, simple and multiple linear regression. Mathematics: functions of two variables, double integrals. 
Notes: Available only to students for whom it is specifically required as part of their program.

MATH2059  
Mathematics for Materials Science B
School of Mathematics
UOC3  HPW3
Prerequisite/s: MATH1231 or MATH1241; Excluded: MATH2120, MATH2130.

Notes: Available only to students for whom it is specifically required as part of their program.

MATH2060  
Professional Issues and Ethics in Mathematics
School of Mathematics
UOC3  HPW2
Prerequisite/s: 24 units of credit in Math courses.

MATH2111  
Higher Several Variable Calculus
School of Mathematics
UOC6  HPW5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251 each with a mark of at least 70; Excluded: MATH2019, MATH2039, MATH2049, MATH2011, MATH2100, MATH2110, MATH2310, MATH2610.

As for MATH2011 but in greater depth.

MATH2120  
Mathematical Methods for Differential Equations
School of Mathematics
UOC3  HPW2.5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251; Excluded: MATH2019, MATH2029, MATH2059, MATH2130.

MATH2130  
Higher Mathematical Methods for Differential Equations
School of Mathematics
UOC3  HPW2.5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251 each with a mark of 70; Excluded: MATH2019, MATH2029, MATH2059, MATH2120.

As for MATH2120, but in greater depth, and with additional material on Green's function methods, nonlinear partial differential equations, Lie group methods and symmetry reduction.

MATH2140  
Operations Research: Methods and Applications
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH1031(CR) or MATH1231 or MATH1241 or MATH1251; Excluded: MATH2160, MATH2180, ECON2208.

An introduction to modelling and solution techniques for linear optimization problems and their application to business and industry. Formulation of problems, the simplex method, duality and sensitivity analysis, integer programming using branch and bound, networks, transportation and assignment problems. Matlab will be used to solve realistic problems.

MATH2240  
Introduction to Oceanography and Meteorology
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH1031(CR) or MATH1231 or MATH1241 or MATH1251

An introduction to mathematical models for the circulation of the atmosphere and oceans. The equations of motion are exploited so as to provide simplified models for phenomena including: waves, the effects of the Earth's rotation, the geostrophic wind, upwelling, storm surges. Feedback mechanisms are also modelled: the land/sea breeze, tornadoes, tropical cyclones. Models for large-scale phenomena including El Nino and the East Australian Current will be discussed as well as the role of the atmosphere-ocean system in climate change.

MATH2260  
Dynamical Systems
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH1031(CR) or MATH1231 or MATH1241 or MATH1251; Excluded: MATH2200, MATH2220.

A comprehensive introduction to continuous time and discrete time dynamical systems. Differential equations and difference equations, linear systems. Linearization of nonlinear systems. Phase plane analysis. Equilibrium fixed points and cycles, stability analysis and bifurcations. Dynamical modelling techniques with applications selected from environmental, physical, social and economic contexts.

MATH2280  
Biomathematics
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH1031(CR) or MATH1231 or MATH1241 or MATH251; Excluded: MATH2120, MATH2130.

Introduction to mathematical models for the circulation of the atmosphere and oceans. The equations of motion are exploited so as to provide simplified models for phenomena including: waves, the effects of the Earth's rotation, the geostrophic wind, upwelling, storm surges. Feedback mechanisms are also modelled: the land/sea breeze, tornadoes, tropical cyclones. Models for large-scale phenomena including El Nino and the East Australian Current will be discussed as well as the role of the atmosphere-ocean system in climate change.

MATH2200  
Mathematical Computing
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH1031(CR) or MATH1231 or MATH1241 or MATH1251

Introduction to mathematical modelling of biological and biomedical systems. Examples include: the spread of diseases such as HIV/AIDS and hepatitis C through the community, the interaction between pathogens and the immune system in the body, the growth of tumours, population dynamics, pharmacokinetics, renewable and non-renewable resources, and other biological and biomedical applications. Computer simulation, differential equation methods, data analysis methods and other mathematical techniques will play important roles.

MATH2301  
Mathematical Computing
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH1031(CR) or MATH1231 or MATH1241 or MATH1251

An introduction to mathematical computing, programming and visualization using Matlab, with a focus on mathematical modelling and simulation. Introduction to Matlab, floating point arithmetic, difference equations, nonlinear equations, numerical differentiation and integration, initial value problems.
MATH2400
Finite Mathematics
School of Mathematics
UOCS HPW5
Prerequisite/s: MATH1081 or MATH1231 or MATH1241 or MATH1251

This is an introduction to those areas of Mathematics which underpin
parts of computing. The main topics are integer and modulo arithmetic
(including tests for primeness of integers), polynomial algebra (including
factorization of polynomials and creation of new fields) and an
introduction to cryptography and error correcting codes.

Note/s: MATH1081 Discrete Mathematics is recommended.

MATH2501
Linear Algebra
School of Mathematics
UOCS HPW5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251;
Excluded: MATH2509, MATH2601.

Vector spaces, linear transformations, change of basis. Inner products,
orthogonalization, reflections and QR factorizations. Eigenvalues and
eigenvectors, diagonalization. Jordan forms and functions of matrices.
Applications to linear systems of differential equations, quadratics,
rotations.

MATH2509
Linear Algebra for Engineers
School of Mathematics
UOCS HPW3
Prerequisite/s: MATH1231 or MATH1241;
Excluded: MATH2501, MATH2601.

Vector spaces, linear transformations, change of basis. Orthogonalization,
least squares approximation, QR factorization. Determinants. Eigenvalues
and eigenvectors, diagonalization. Singular value decompositions.
Jordan forms. Matrix exponentials and applications to systems of
differential equations.

Note/s: Available only to students for whom it is specifically required as
part of their program.

MATH2510
Real Analysis
School of Mathematics
UOCS HPW2.5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251;
Excluded: MATH2019, MATH2039, MATH2049, MATH2011, MATH2111, MATH2610.

Multiple integrals, partial differentiation. Analysis of real valued functions
of one and several variables. Fourier series.

MATH2520
Complex Analysis
School of Mathematics
UOCS HPW2.5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251;
Excluded: MATH2620.

Analytic functions, Taylor and Laurent series, integrals. Cauchy's theorem,
residues, evaluation of certain real integrals.

MATH2501
Higher Linear Algebra
School of Mathematics
UOCS HPW5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251 each with a
mark of 70 or greater;
Excluded: MATH2501.

As for MATH2501, but in greater depth, and with additional material on
unitary, self-adjoint and normal transformations.

MATH2520
Higher Complex Analysis
School of Mathematics
UOCS HPW2.5
Prerequisite/s: MATH1231 or MATH1241 or MATH1251 each with a
mark of at least 70;
Excluded: MATH2520.

As for MATH2520 but in greater depth.

MATH2801
Theory of Statistics
School of Mathematics
UOCS HPW4
Prerequisite/s: MATH1021(AR) or MATH1031(AR) or MATH1231 or
MATH1241 or MATH1251 (or, in program 3653, MATH1131 or
MATH1141);
Excluded: MATH2829, MATH2839, MATH2841, MATH2859, MATH2899, MATH2901, BIOS2041, BEES2041, ECON2215.

Probability, random variables, standard distributions, bivariate
distributions, transformations, central limit theorem, sampling
distributions, point estimation, interval estimation, hypothesis testing.

MATH2810
Statistical Computing for Categorical Data
School of Mathematics
UOCS HPW2
Prerequisite/s: MATH2801 or MATH2901;
Excluded: MATH2910.

This course will focus on the statistical computing tools appropriate for
discrete-valued data. Exploratory and graphical analysis of data using
modern statistical packages. Data visualisation. Analysis of cross-
tabulated data. Logistic and Poisson regression for analysis of binary
and count data. Log-linear models for contingency tables.

MATH2829
Statistics SU
School of Mathematics
UOCS HPW3
Prerequisite/s: MATH1231 or MATH1241;
Excluded: MATH1041, MATH2841, MATH2801, MATH2901, BIOS2041, BEES2041.

Introduction to probability theory, random variables and distribution
functions, sampling distributions, including those of chi-square, t and F.
Estimation procedures, including confidence interval estimation with
an emphasis on least squares and surveying problems, and computer
based exercises.

Note/s: Available only to students for whom it is specifically required as
part of their program.

MATH2831
Linear Models
School of Mathematics
UOCS HPW4
Prerequisite/s: MATH2801 or MATH2901;
Excluded: MATH2931, BIOS2041, BEES2041.

Multiple linear regression models and examples. Graphical methods for
regression analysis. Multi-variate normal distribution. Quadratic forms
(distributions and independence), Gauss-Markov theorem. Hypothesis
testing, Model selection. Analysis of residuals. Influence diagnostics.
Analysis of variance.

MATH2839
Statistics SM
School of Mathematics
UOCS HPW3
Prerequisite/s: MATH1231 or MATH1241 or MATH1011
if in Program 3385;
Excluded: MATH1041, MATH2841, MATH2801, MATH2901, BIOS2041, BEES2041.

Graphical data analysis. Review of probability, random variables and their
properties. The normal and binomial distributions, the central limit
test. Applications to statistical quality control. Theory of statistical
inference including confidence intervals and hypothesis testing with
applications to one and two sample problems based on the t- and F-
test. Simple and multiple linear regression including data transformations
to normality. Design and analysis of experiments, analysis of variance,
introduction to factorial designs. Applications will be drawn primarily
from the fields of mechanical and mining engineering and industrial
design.

Note/s: Available only to students for whom it is specifically required as
part of their program.
MATH2841
Statistics SS
School of Mathematics
Prerequisite/s: MATH1021 or MATH1031 or MATH1231 or MATH1241 or MATH1251;
Excluded: MATH2049, MATH2801, MATH2829, MATH2839, MATH1041, MATH2859, MATH2899, MATH2901, BIOS2041, BEES2041, ECON2215.

The goal in this course is to develop skills that are fundamental to data collection and analysis. These general skills are useful for anyone who needs to understand data, particularly science and information systems students. We focus on practical problems from research, business and the media that involve one or two variables. For such problems students should be able to: recognise what analysis procedures are appropriate, describe how to conduct a valid study, apply principles of probability theory, apply and interpret statistical procedures on a computer using SPSS, use a hand calculator for simple statistical procedures.

Note/s: This course is intended for students who want to take no more than 6 units of credit in Level II Statistics. It does not satisfy the prerequisites for any Level III Statistics course.

MATH2859
Probability, Statistics and Information
School of Mathematics
Prerequisite/s: MATH1231 or MATH1241 (or, in program 3648 or 3651 or 3652, MATH1131 or MATH1141);
Excluded: MATH1041, MATH2841, MATH2801, MATH2901, BIOS2041, BEES2041.

Note/s: Available only to students for whom it is specifically required as part of their program.

MATH2899
Applied Statistics for Chemical Engineers
School of Mathematics
Prerequisite/s: MATH1231 or MATH1241;
Excluded: MATH1041, MATH2841, MATH2801, MATH2901, BIOS2041, BEES2041.

Graphical data analysis. Review of probability, random variables and their properties. The normal and binomial distributions, the central limit theorem. Applications to statistical quality control. Theory of statistical inference including confidence intervals and hypothesis testing with applications to one and two sample problems based on the t- and F-tests. Simple and multiple linear regression including data transformations to normality. Design and analysis of experiments, analysis of variance, introduction to factorial designs. Applications will be drawn primarily from the fields of chemical, bioprocess and petroleum engineering. Statistical computing will be based on Matlab.

Note/s: Available only to students for whom it is specifically required as part of their program.

MATH2910
Higher Theory of Statistics
School of Mathematics
Prerequisite/s: MATH2801 or MATH1231 or MATH1241 or MATH1251;
Excluded: MATH2049, MATH2801, MATH2829, MATH2839, MATH1041, MATH2859, MATH2899, MATH2901, BIOS2041, BEES2041, ECON2215.

As for MATH2801 but in greater depth.

MATH2931
Higher Linear Models
School of Mathematics
Prerequisite/s: MATH2901;
Excluded: MATH2831, BIOS2041, BEES2041.

As for MATH2831 but in greater depth

MATH3000
Mathematics/Statistics Project
School of Mathematics
Enrolment requires school approval
Prerequisite/s: 12 units of credit in Level 2 Maths courses.

Under supervision of an academic staff member of the School of Mathematics a student will undertake a course in reading and/or research on a topic in mathematics or statistics or on applications of mathematics or statistics to other disciplines such as physical, biological or social sciences, economics, finance, computing, etc. The student is expected to write an essay summarising the results of their project.

MATH3001
Mathematics/Statistics Project
School of Mathematics
Enrolment requires school approval
Prerequisite/s: 12 units of credit in Level 2 Maths courses.

Under supervision of an academic staff member of the School of Mathematics a student will undertake a course in reading and/or research on a topic in mathematics or statistics or on applications of mathematics or statistics to other disciplines such as physical, biological or social sciences, economics, finance, computing, etc. The student is expected to write an essay summarising the results of their project.

MATH3002
Mathematics/Statistics Project
School of Mathematics
Enrolment requires school approval
Prerequisite/s: 12 units of credit in Level 2 Maths courses.

Under supervision of an academic staff member of the School of Mathematics a student will undertake a course in reading and/or research on a topic in mathematics or statistics or on applications of mathematics or statistics to other disciplines such as physical, biological or social sciences, economics, finance, computing, etc. The student is expected to write an essay summarising the results of their project.

MATH3041
Mathematical Modelling for Real World Systems
School of Mathematics
Prerequisite/s: 12 units of credit in Level 2 Maths courses.

Why are no two snowflakes alike? When will the next major stock market collapse occur? Which is the greatest sporting nation on earth? Addressing real world problems involves the steps of formulating a mathematical description of the problem, solving the mathematical model, interpreting the mathematical solution and critically evaluating the model. Motivated by real world problems, the course will survey mathematical techniques for: achieving the best possible outcomes, predicting future events and dealing with uncertainties. The course will provide introductions to popular mathematical resources for algebraic manipulation, numerical
Most mathematical models in engineering, finance and science are based on differential equations. In general these equations cannot be readily solved analytically. This course introduces computational methods for solving, to high accuracy, systems of both initial and boundary value problems for ordinary differential equations. There is a substantial computing component involving implementation of the methods and simulation of some mathematical models using the MATLAB software package on UNIX and Windows-based computer systems. Introduction to approximation of functions based on global interpolation and splines. Explicit and implicit computer methods for non-stiff and stiff initial value problems for ordinary differential equations. Introduction to the shooting, finite difference and orthogonal collocation numerical methods for boundary value problems. Direct computer algebra methods for matrix equations. Implementation of the modern computer methods using MATLAB Spline Toolbox and Ode Suite Package.

Note/s: This course includes a substantial computing component, and assumes some familiarity with Matlab.

MAT3121 Mathematical Methods
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses; Excluded: MATH3141, MATH3150.

Note/s: MATH2320 or MATH2620 is recommended.

MAT3161 Optimization Methods
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2501 or MATH2601 and MATH2011 or MATH2100 or MATH2110 or MATH2111 or MATH2120 or MATH2130.

Development, analysis and application of methods for optimization problems. Theory of multivariable optimization; including necessary and sufficient optimality conditions, stationary points, Lagrange multipliers, Kuhn-Tucker conditions, convexity and duality. Numerical methods for one dimensional minimization, unconstrained multivariable minimization (including steepest descent, Newton, quasi-Newton and conjugate gradient methods) and constrained multi-variable minimization (including linear programming and quadratic programming).

MAT3181 Optimal Control
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2110 or MATH2100 or MATH2110 or MATH2111 or MATH2510 or MATH2610.

An introduction to the optimal control of dynamical systems. Mathematical descriptions of dynamical systems. Stability, controllability, and observability. Optimal control. Calculus of variations. Dynamic programming. Examples and applications are selected from biological, economical and physical systems.

MAT3201 Dynamical Systems and Chaos
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2120 or MATH2130 or MATH3541 or MATH3641.

Regular and irregular behaviour of nonlinear dynamical systems. A selection from topics developing the theory of nonlinear differential and difference equations, with applications to physical, biological and ecological systems. Topics from: stability and bifurcation theory, Floquet theory, perturbation methods, Hamiltonian dynamics, resonant oscillations, chaotic systems, Lyapunov exponents, Poincare maps, homoclinic tangles.

MAT3241 Fluid Dynamics
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2120 or MATH2130 or MATH2110 or MATH2111 or MATH2120 or MATH2130.

The mathematical modelling and theory of problems arising in the flow of fluids. Cartesian tensors, kinematics, mass conservation, vorticity, Navier-Stokes equation. Topics from inviscid and viscous fluid flow, gas dynamics, sound waves, water waves.

MAT3261 Atmosphere-Ocean Dynamics
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2120 or MATH2130 or MATH2110 or MATH2111 or MATH2120 or MATH2130; Excluded: MATH3270.

The dynamics underlying the circulation of the atmosphere and oceans are detailed using key concepts such as geostrophy, the deformation radius and the conservation of potential vorticity. The role of Rossby waves, shelf waves, turbulent boundary layers and stratification is discussed. The atmosphere-ocean system as a global heat engine for climate variability is examined using models for buoyant forcing, quasi-geostrophy and baroclinic instability.

MAT3301 Advanced Mathematical Computing
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2120 or MATH2130 and MATH2301; Excluded: MATH3311.

The course has a number of streams dealing with theoretical and practical aspects of floating-point computation as it is needed in numerical simulations for scientific, engineering and financial applications. The mathematical content consists of some essential topics from numerical linear algebra and partial differential equations. However, the main focus of the course is on understanding how numerical application programs can best exploit the capabilities of the available computing hardware, which might be anything from a desktop PC to a high performance computer with multiple processors. The importance of high quality optimizing compilers, numerical libraries and visualization software is also emphasized. Students will learn Fortran 90 and use this language for programming assignments.

MAT3311 Mathematical Computing for Finance
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH2120 or MATH2130 and MATH2501 or MATH2601 and 6 units of credit in Level 2 Statistics; Excluded: MATH3301.

In the end, finance is concerned with making definite numerical recommendations which frequently can only be made by analysing sophisticated models using high-speed computers. This course studies
the design, implementation and use of computer programs to solve practical mathematical problems of relevance to finance, insurance and risk management. A review of MATLAB, floating point numbers, rounding error and computational complexity. A selection of topics from: approximation and parameter estimation, Fourier series and the FFT, finite difference approximations, partial differential equations (heat equation), sparse linear systems, non-linear algebraic equations, trees, Monte Carlo methods and simulation, random numbers and variance reduction, numerical integration. Computing environments for mathematical finance. Practical examples and programming assignments using MATLAB.

MATH3411 Information, Codes and Ciphers
School of Mathematics
UOC6 HPW4
Prerequisite/s: MATH1081 or MATH1090.

Discrete communication channels; information theory, compression and error control coding, cryptography.

MATH3421 Logic and Computability
School of Mathematics
UOC6 HPW4
Prerequisite/s: MATH1081 or MATH1090.

Software is written in the language of logic, and logic is the science on which computing is based. This course develops the classical mathematics of propositional and predicate logic and automata, which inspired the founders of computing such as Turing and von Neumann. Topics include Propositional calculus: formal proofs and the Deduction theorem; consistency, completeness, compactness, independence of axioms. Predicate calculus: interpretations; axiomatisations; soundness, completeness and compactness theorems; nonstandard analysis; Peano arithmetic and Godel's incompleteness theorems. Automata: deterministic and non-deterministic finite automata, regular languages. Computability: algorithms; Turing machines, computable and uncomputable functions; Church's thesis, different formalisations of computation; unsolvable problems; recursive functions:

MATH3511 Transformations, Groups and Geometry
School of Mathematics
UOC6 HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses; Excluded: MATH3710, MATH3780.

Euclidean geometry, geometry of triangles, transformations, groups, symmetries, projective geometry. Note/s: Offered in even numbered years only.

MATH3521 Algebraic Techniques in Number Theory
School of Mathematics
UOC6 HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses; Excluded: MATH3710, MATH3740.

The integers, residue class arithmetic, theorems of Lagrange, Fermat and Euler, groups of units, Chinese remainder theorem, primitive roots, Gaussian integers, division algorithm and principal ideals in $\mathbb{Z}[i]$, quadratic residues, algebraic number fields, extensions, Eisenstein's test, ruler and compass constructions.

MATH3531 Topology and Differential Geometry
School of Mathematics
UOC6 HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2011 or MATH2111 or MATH2510 or MATH2610; Excluded: MATH3760.

Curves in the plane and what it means to be curved rather than straight. Curves in space and how they curve and twist. Surfaces and how they bend both internally and externally. Soap bubbles and minimal surfaces. Why a map of the earth must be distorted: Gauss' "Remarkable Theorem" and the Gauss-Bonnet Theorem. Euler characteristic and the platonic solids. Mobius bands and other surfaces. Classification and elementary combinatorial topology of surfaces. Topological spaces, fixed point theorems, Hairy Ball, Pancake and Ham Sandwich Theorems.

Note/s: Offered in odd numbered years only.

MATH3541 Differential Equations
School of Mathematics
UOC6 HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2501 or MATH2601 and MATH2520 or MATH2620; Excluded: MATH3641.

Initial value problems, linear systems, variation of parameters, applications to physical and biological systems, autonomous nonlinear systems, Lyapunov's method, linear approximations, plane autonomous systems, cycles and bifurcations, the Poincare-Bendixon theorem, introduction to first order PDEs, classification and normal forms for second order equations, the Cauchy-Kowalewski Theorem, Dirichlet and Neumann problems associated with the Laplace operator in two variables.

MATH3560 History of Mathematics
School of Mathematics
UOC3 HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses.

The development of mathematical ideas has often been very slow and at times tortuous, but nearly always interesting. The finished product which is presented at secondary school and in University courses often hides much of the story which led to the development of the subject. This course is a pot-pourri of episodes from the long and fascinating history of the subject. It is of interest to anyone studying mathematics for its own sake, and is of special relevance to those planning a career in secondary teaching.

MATH3570 Foundations of Calculus
School of Mathematics
UOC3 HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses; Excluded: MATH3610.

What does it mean for a limit to exist? What does it mean for a function to be continuous or differentiable? There are functions which are continuous everywhere but differentiable nowhere! Are there functions whose integral does not exist? In this course, we look again at the essential concepts of limit, continuity, differentiability and integrability and try to place them on a sure footing. The syllabus includes material on sequences and series of real numbers and also of real valued functions. Although of general interest to those studying mathematics for its own sake, this course is of special relevance to those planning a career in secondary teaching.

MATH3610 Higher Analysis 1: Real Analysis
School of Mathematics
UOC3 HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2111 or MATH2610 or MATH2011(CR) or MATH2510(CR), with an average mark of at least 75 or permission from the Head of Department; Excluded: MATH3570.

Limits and continuity are the central concepts of calculus in one and several variables. These concepts can be extended to quite general situations. The simplest of these is when there is some way of measuring the distance between two objects. Some of the most important examples of these ‘metric spaces’ occur as sets of functions, so this course looks at ways in which one might say that a sequence of functions converges. Taking these ideas one step further, we look at convergence which does not come from a generalized distance function. These are the ideas of point set topology. The course will include topics such as countability, continuity, uniform convergence, compactness and connectedness. This is not a ‘computational’ course, but rather one in which you will develop your ability to think abstractly, precisely and creatively.
Excluded:

functions, asymptotic methods, integral formulae, harmonic functions, analytic continuation, entire and meromorphic functions, elliptic permission from the Head of Department.

MATH2620
Higher Analysis 2: Functional Analysis
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH3610 and MATH2601 or MATH2501(CR)

Functional analysis is the discipline which has arisen out of the attempt to extract from diverse problems of analysis their common underlying features and to develop an abstract theory which is applicable to these diverse problems as particular cases. The purpose of the course is to introduce students to part of the vast field of functional analysis in such a manner that they will see that the theory was stimulated by concrete problems. The course should also be helpful to students of disciplines other than mathematics who must make effective use of a somewhat limited mathematical training. The course covers Hilbert spaces, the theory of compact operators, Banach spaces, the closed graph theorem, the Hahn-Banach theorem, Fourier series and Plancherel’s theorem.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3630
Higher Analysis 3: Integration
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH3610

Rings and algebras of sets, Lebesgue integration, dominated convergence theorem, Lp-spaces, Rorel-Cantelli theorem, Riesz representation theorem, Fubini’s theorem, stochastic processes, random variables, martingales.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3641
Higher Differential Equations
School of Mathematics
UOC6  HPW4
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2621 or MATH2521(CR) and MATH2620 or MATH2520(CR), with an average mark of at least 75 or permission from the Head of Department; Excluded: MATH3541.

As for MATH3541 but in greater depth.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3680
Higher Complex Analysis
School of Mathematics
UOC3  HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2620 or MATH2520(CR), with an average mark of at least 75 or permission from the Head of Department.

Topics in advanced complex function theory from: conformal mappings, analytic continuation, entire and meromorphic functions, elliptic functions, asymptotic methods, integral formulae, harmonic functions, Riemann surfaces.

Note/s: MATH3610 is recommended. Offered in even numbered years only. Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3690
Higher Algebraic Topology
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH3610, MATH3710; Excluded: MATH3760.

Algebraic topology is about associating algebraic structures (for example, groups) to topological spaces in such a way that continuous mappings naturally give rise to homomorphisms between the associated algebraic objects. Intractable topological problems like determining the maximum number of linearly independent tangent vector fields on a sphere of given dimension can be translated into algebraic problems and solved by exploiting the greater rigidity of algebraic structures. The course begins by establishing the combinatorial classification of surfaces and uses this as a readily accessible context for introducing some basic ideas of algebraic topology. It then develops the fundamental aspects of homotopy and homology theories.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3700
Higher Differential Geometry
School of Mathematics
UOC3  HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2111 or MATH2610 or MATH2011(CR) or MATH2510(CR) and MATH2601 or MATH2501(CR), with an average mark of 75 or permission from the Head of Department; Excluded: MATH3531, MATH3760.

The course begins with a study of curves and how they bend and twist in space. It then considers surfaces, studying the classical fundamental forms introduced by Gauss, the various measures of curvature for surfaces and what they mean for the internal and external appearance and properties of surfaces. A closer look at the intrinsic geometry of surfaces leads to Gauss’ famous “Remarkable Theorem” on curvature and provides the starting point that would lead to the fundamental uses of differential geometry in, for example, Einstein’s general relativity. In relation to surfaces, the course also covers geodesics, the Gauss-Bonnet theorem and the Euler characteristic. This leads to a consideration of non-Euclidean geometries, especially the hyperbolic plane.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3710
Higher Algebra 1: Group Theory
School of Mathematics
UOC3  HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses including MATH2621 or MATH2521(CR), with an average mark of at least 75 or permission from the Head of Department; Excluded: MATH3511, MATH3521.

Apart from its intrinsic value as an attractive branch of abstract algebra, group theory has many practical applications in physics (especially quantum mechanics, the theory of fundamental particles and crystal structure) and in all areas of science where consideration of symmetry is involved. Topics covered in this course will include groups, subgroups, factor groups, isomorphism theorems, permutation groups, matrix groups, symmetry groups, generators and relations, characters of finite Abelian groups and the Sylow theorems.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3720
Higher Algebra 2: Rings And Fields
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH3710

The theory of rings and fields holds the key to questions which frustrated mathematicians for hundreds of years, including the impossibility of squaring a circle or trisecting an angle with ruler and compass or finding a formula for solving quintic equations. It also forms the basis for algebraic aspects of number theory, with applications to encryption. Topics covered in the course will include subrings, ideals, quotient rings, integral domains, fields of fractions, factorization in various special types of rings, Gaussian and algebraic integers, extension fields, splitting fields and Galois theory.

Note/s: Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.
MATH3740
Higher Number Theory
School of Mathematics
UOC3  HPW2
Prerequisite/s: 12 units of credit in Level 2 Math courses with an average mark of at least 75 or permission from the Head of Department;
Excluded: MATH3521.

Topics from: elementary number theory, prime numbers, number theoretic functions, Dirichlet series, prime number theorem, continued fractions, Diophantine approximation, quadratic reciprocity, algebraic number theory, class number theorem.

Note/s: Offered in even numbered years only. Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3780
Higher Geometry
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH3710;
Excluded: MATH3511.

Axiomatic geometry, affine geometry. Desargues theorem, projective geometry, spherical and hyperbolic geometry.

Note/s: Offered in odd numbered years only. Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3790
Higher Computational Combinatorics
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH1081 and 12 units of credit in Level 2 Math courses with an average mark of at least 75 or permission from the Head of Department

This content of this course includes topics in mathematics which have important applications in computer science. Topics to be covered include the structure of posets and lattices, generating functions and tableaux, group actions and representations of the symmetric group, graph theory and Ramsey theory.

Note/s: Offered in odd numbered years only. Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

MATH3801
Probability and Stochastic Processes
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH2501 or MATH2601 and MATH2111 or MATH2111 or MATH2510 or MATH2610 and MATH2801 or MATH2901;
Excluded: MATH3901.

MATH3811
Statistical Inference
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH2831 or MATH2931;
Excluded: MATH3840, MATH3850, MATH3911, MATH3940, MATH3950.

MATH3821
Statistical Modelling and Computing
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH2831 or MATH2931, MATH2810 or MATH2910;
Excluded: MATH3800, MATH3810.

MATH3830
Design and Analysis of Experiments
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH2831 or MATH2931;
Excluded: MATH3930.

Principles of good experimental design with a focus on industrial quality improvement. Factorial designs and their analysis. Response surface designs for product and process optimisation. Random effects models and components of variance.

MATH3831
Statistical Methods in Social and Market Research
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH2801 or MATH2901;
Excluded: MATH2840, MATH2940, MATH3931.

MATH3841
Statistical Analysis of Dependent Data
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH3811 or MATH3911;
Excluded: MATH3820, MATH3870, MATH3941, MATH3970.

MATH3880
Advanced Probability
School of Mathematics
UOC6  HPW4
Prerequisite/s: MATH3801 or MATH3901;
Excluded: MATH3980.

MATH3890
Special Topics in Statistics
School of Mathematics
UOC3  HPW2
Prerequisite/s: MATH2831 or MATH2931

New developments in statistical science theory and methods.
MATH3901
Higher Probability and Stochastic Processes
School of Mathematics
UOC6, HPW4
Prerequisite/s: MATH2501 or MATH2601 and MATH2011 or MATH2101 or MATH2510 or MATH2610 and MATH2901;
Excluded: MATH3801.
As for MATH3801 but in greater depth.

MATH3911
Higher Statistical Inference
School of Mathematics
UOC6, HPW4
Prerequisite/s: MATH2901;
Excluded: MATH3811, MATH3840, MATH3850, MATH3940, MATH3950.
As for MATH3811 but in greater depth.

MATH3930
Higher Design and Analysis of Experiments
School of Mathematics
UOC3, HPW2
Prerequisite/s: MATH2901;
Excluded: MATH3830.
As for MATH3830 but in greater depth.

MATH3931
Higher Statistical Methods in Social and Market Research
School of Mathematics
UOC6, HPW4
Prerequisite/s: MATH2901;
Excluded: MATH2840, MATH2940, MATH3831.
As for MATH3831 but in greater depth.

MATH3941
Higher Statistical Analysis of Dependent Data
School of Mathematics
UOC6, HPW4
Prerequisite/s: MATH3911;
Excluded: MATH3820, MATH3870, MATH3841, MATH3920, MATH3970.
As for MATH3841 but in greater depth.

MATH3980
Higher Advanced Probability
School of Mathematics
UOC3, HPW2
Prerequisite/s: MATH3901;
Excluded: MATH3880.
As for MATH3880 but in greater depth.

MATH4003
Mathematics and Computer Science Honours (Full Time)
School of Mathematics
Enrolment requires school approval
UOC24, HPW24
Undergraduate thesis in Applied Mathematics or Pure Mathematics together with advanced lectures on topics chosen half from MATH4103 or MATH4603, and half from Computer Science.
Note/s: See notes for MATH4003.

MATH4012
Mathematics and Finance Thesis Project
School of Mathematics
Enrolment requires school approval
UOC12, HPW5
Under the supervision of a member of the academic staff of the School of Mathematics a student will undertake a major project in mathematics and finance. The project could range from reading and/or research on theoretical aspects to financial engineering involving implementation of a practical model in C/C++. Research interaction with the finance industry is encouraged. The student will write a thesis summarising the result of their project and make a presentation of it.

MATH4103
Applied Mathematics Honours (Full Time)
School of Mathematics
Enrolment requires school approval
UOC24, HPW24
Skill in practical numerical computing is highly recommended for students taking this course. Those students who have not already taken a suitable computing course may be required to take a short bridging course. Undergraduate thesis together with advanced lectures on topics chosen from the following fields: advanced mathematical methods for applied mathematics, advanced optimization, numerical analysis, theory of linear and non linear dynamical systems, optimal control, operations research, functional analysis and applications, mathematics of economic models and of economic prediction, fluid mechanics, oceanography, micro- hydrodynamics, and analytical and numerical solution of partial differential equations. May also include advanced lectures given by other Departments or Schools.
Note/s: See notes for MATH4003.

MATH4104
Applied Mathematics Honours (Part Time)
School of Mathematics
Enrolment requires school approval
UOC12, HPW12
Skill in practical numerical computing is highly recommended for students taking this course. Those students who have not already taken a suitable computing course may be required to take a short bridging course. Undergraduate thesis together with advanced lectures on topics chosen from the following fields: advanced mathematical methods for applied mathematics, advanced optimization, numerical analysis, theory of linear and non linear dynamical systems, optimal control, operations research, functional analysis and applications, mathematics of economic models and of economic prediction, fluid mechanics, oceanography, micro- hydrodynamics, and analytical and numerical solution of partial differential equations. May also include advanced lectures given by other Departments or Schools.
Note/s: See notes for MATH4003.

MATH4603
Pure Mathematics Honours (Full Time)
School of Mathematics
Enrolment requires school approval
UOC24, HPW24
Undergraduate thesis together with advanced lectures on topics chosen from the fields of current interest in Pure Mathematics. May also include advanced lectures given by other Departments or Schools.
Note/s: See notes for MATH4003. Some Higher level Mathematics courses should normally be included at Levels II and III.
MATH4604
Pure Mathematics Honours (Part Time)
School of Mathematics
Enrolment requires school approval
UOC12 HPW12

Undergraduate thesis together with advanced lectures on topics chosen from the fields of current interest in Pure Mathematics. May also include advanced lectures given by other Departments or Schools.

Note/s: See notes for MATH4003. Some Higher level Mathematics courses should normally be included at Levels II and III.

MATH4903
Statistics Honours (Full Time)
School of Mathematics
Enrolment requires school approval
UOC24 HPW24

Undergraduate thesis together with advanced lectures on topics chosen from the following fields: mathematical basis, experimental design, response surfaces, stochastic processes, theories of inference, sequential analysis, nonparametric methods, multivariate analysis, mathematical programming, information theory, discrete distributions. May also include advanced lectures given by other Departments or Schools.

Note/s: See notes for MATH4003.

MATH4904
Statistics Honours (Part Time)
School of Mathematics
Enrolment requires school approval
UOC12 HPW12

Undergraduate thesis together with advanced lectures on topics chosen from the following fields: mathematical basis, experimental design, response surfaces, stochastic processes, theories of inference, sequential analysis, nonparametric methods, multivariate analysis, mathematical programming, information theory, discrete distributions. May also include advanced lectures given by other Departments or Schools.

Note/s: See notes for MATH4003.

MATS1002
Microstructure Analysis
School of Materials Science and Engineering
UOC3 HPW3

MATS1013
Diffusion and Kinetics
School of Materials Science and Engineering
UOC3 HPW2

MATS1021
Computing in Materials Science
School of Materials Science and Engineering
UOC3 HPW3

The aim of the course is to gain a basic understanding of the computing applications and practices that are relevant to materials engineering degrees and industry practice. Topics covered are: a brief overview of the place of computing in materials engineering; use of common materials software packages; using the internet as a part of the degree; search engines; email; website composition; and computer programming to solve materials based problems.

MATS1092
Materials and Design 1
School of Materials Science and Engineering
UOC3 HPW2

An appreciation of the relationships between the properties of materials, component design, manufacturing and product performance. Materials selection as an integral part of successful design. Long-term potential for materials improvement and substitution.

MATS1093
Thermodynamics of Materials 2
School of Materials Science and Engineering
UOC3 HPW2

Prerequisite/s: MATS1182

MATS1111
Materials Science 1
School of Materials Science and Engineering
UOC3 HPW3

MATS1112
Phase Equilibria
School of Materials Science and Engineering
UOC3 HPW2

MATS1142
Crystallography and X-Ray Diffraction
School of Materials Science and Engineering
UOC3 HPW3

MATS1152
Materials Engineering 1B
School of Materials Science and Engineering
UOC6 HPW4

Materials process principles and engineering application. Steady and unsteady state material and energy balances. Heat transfer mechanisms such as conduction, convection and radiation. Principles of steady and unsteady heat transfer and application in the production and application of materials. Materials and heat flow involving high temperature solid, liquid and gaseous phases. Computer programming and application. Course examples are drawn from materials engineering practice in the broadest sense.

MATS1163
Chemistry of the Solid State
School of Materials Science and Engineering
UOC3 HPW2
Crystal chemistry, nature of bonding in solids, silicate structures, and structure-composition relationships. Glass and glass-ceramics. Reactions with solids, grain boundary and interfacial effects, ceramic reactions, and polymorphic transformations (oxides, non-oxides, aluminosilicates).

MATS1172
Physical Properties of Materials
School of Materials Science and Engineering
UOC6  HPW3

The particle and wave nature of matter; The Schrödinger equation; Electrons in a crystal: Zone and band theory; Fermi energy, Fermi surface and density of states; Electrical conduction in materials; Intrinsc and extrinsic semiconductors; Band-gap engineering; Basic semiconductor devices; Superconductivity and superconducting materials; Thermal properties of a solid: Heat capacity and thermal conduction. Magnetic behaviour: Basic concepts, modern theory and types of magnetism; Magnetic materials and applications.

MATS1182
Thermodynamics of Materials
School of Materials Science and Engineering
UOC6  HPW4
Prerequisite/s: CHEM2817.

Unit 1 Thermodynamics of Materials Staff Contact: Professor Oleg Ostrovski.

MATS1214
Welding and Other Joining Processes
School of Materials Science and Engineering
UOC3  HPW2

Fusion welding. Capabilities, advantages and limitations. Metallurgical aspects of fusion welding. Cause of welding defects and weldability of carbon and alloy steels, stainless steels, aluminium and other common non-ferrous alloys. Design of welded fabrications to reduce distortion and the risk of failure by fatigue, brittle fracture, etc. Soldering, brazing, adhesive bonding.

MATS1223
Corrosion Control
School of Materials Science and Engineering
UOC6  HPW2

MATS1232
Materials Engineering 1A
School of Materials Science and Engineering
UOC3  HPW3

Fluid flow in materials processing. Application of the principles of fluid flow in the production and application of materials. Examples are drawn from ceramic, materials and metallurgical engineering practices in the broadest sense.

MATS1242
Crystallographic and Microstructural Characteristics
School of Materials Science and Engineering
UOC6  HPW6

MATS1244
Materials Industry Management A
School of Materials Science and Engineering
UOC6  HPW4

Unit 1 Industrial management in the materials industry. Major issues, research findings and strategies relating to management of people in organisations. Topics include management and power, leadership, managerial decision-making, stress at work, group dynamics and inter-group conflict, organisational design, goal setting and performance appraisal, personal and organisational development, occupational health and safety, risk management. Marketing: principles of marketing and selling; marketing research, pricing strategies and marketing programs. Project management: project definition, planning and scheduling, estimating cost, project control, modification and closure. Unit 2 Industrial Training. Students are required to complete a minimum of twelve weeks of approved industrial training prior to the commencement of the final year of the program.

MATS1262
Mechanical Properties of Materials
School of Materials Science and Engineering
UOC6  HPW5

MATS1282
Thermodynamic Materials
School of Materials Science and Engineering
UOC6  HPW4

MATS1343
Materials Industry Management B
School of Materials Science and Engineering
UOC3  HPW3

MATS1354
Design Project
School of Materials Science and Engineering
UOC3  HPW3

This project will cover the design of a selected piece of processing equipment or an engineering component. It will involve selection and specification of materials and other relevant aspects covered within the undergraduate program.
MATS1414
Surface Treatment and Wear
School of Materials Science and Engineering
UOC3  HPW2

MATS1464
Professional Communication and Presentation
School of Materials Science and Engineering
UOC3  HPW2

MATS1902
Industrial Training A
School of Materials Science and Engineering
UOC24

Industrial Training (Co-op IT. 2)

MATS1903
Industrial Training B
School of Materials Science and Engineering
UOC24

Industrial Training (Co-op IT. 3)

MATS2013
Ceramic Materials
School of Materials Science and Engineering
UOC3  HPW3

Excluded: MATS2313.

Geological origin and classification of ceramic raw materials. Composition, crystal structures, chemical and physical properties, and physical aspects of the production of ceramics and related materials. Chemical and physical reactions during processing and firing of traditional and advanced ceramics, cement, glass, refractories, and composites. Fabrication routes of commercial ceramic materials.

MATS2153
Ceramic Processing Laboratory
School of Materials Science and Engineering
UOC3  HPW3

Laboratory program illustrating processing and engineering aspects of ceramic technology. Students are required to take part in a series of factory inspections.

MATS2183
Refractories
School of Materials Science and Engineering
UOC3  HPW2

Classification of refractories. Chemical and physical properties of refractories. Introduction to raw materials and manufacturing technology. Description of chemical reactions occurring between refractories and solid, liquid, and gas phases in ferrous and nonferrous metal industries. Review of phase equilibria.

MATS2203
Physico-Chemical Ceramics Laboratory
School of Materials Science and Engineering
UOC3  HPW3

Laboratory program illustrating the physical and chemical properties associated with the processing and performance of ceramic materials. Students are required to take part in a series of factory inspections.

MATS2213
Diffusion
School of Materials Science and Engineering
UOC3  HPW2

MATS2263
Sintering of Ceramics
School of Materials Science and Engineering
UOC3  HPW2

MATS2294
Thermal and Mechanical Properties of Ceramics
School of Materials Science and Engineering
UOC3  HPW3

Heat capacity, measurement of heat capacity, and factors affecting heat capacity. Thermal expansion, measurement of thermal expansion, and factors affecting thermal expansion. Thermal conductivity, thermal diffusivity, measurement of thermal conductivity and thermal diffusivity, factors affecting thermal transport, phonon and photon conductivity, and factors affecting phonon and photon conductivity. Thermal stresses and thermal shock. Influence of structure and composition of pure materials on thermal conductivity of multiphase materials. Effects of composition, microstructure, and physical properties on the mechanical properties of ceramics, design approaches for ceramics, inspection and non-destructive testing of ceramics, and case studies.

MATS2313
Chemistry of Ceramics
School of Materials Science and Engineering
UOC3  HPW2

Geological origin and classification of ceramic raw materials. Composition, crystal structures, physical properties, chemical reactions, and physical aspects of production of: clay minerals and commercial clays, silicates, porcelain, whitewares, cements and plaster, advanced high purity ceramics, refractory oxides, and cermets.

MATS2314
Glass-Based Ceramics
School of Materials Science and Engineering
UOC3  HPW2

MATS2363
Ceramic Processing and Design
School of Materials Science and Engineering
UOC3  HPW3

Prerequisite/s: MATS5013;
Excluded: MATS2353.

MATS3064
Composite Materials
School of Materials Science and Engineering
UOC3  HPW2

MATS3443
Polymer Science and Engineering
School of Materials Science and Engineering
UOC3  HPW3
Polymer structure, monomers, bond strength, addition/condensation polymerisation, amorphous, crystalline, conformation, chain branching, co-polymer, additives in plastics, glass transition. Effect of molecular structure on performance, orientation, structure-property correlation, commodity and specialty plastics; application of polymers in ceramic industry, rheological behaviour.

MATS3524
Materials Engineering Project
School of Materials Science and Engineering
UOC6
An experimental or technical investigation or design related to some aspects of materials engineering in the specific discipline (ceramic engineering, metallurgical engineering or materials engineering).

MATS3564
Polymer Engineering 1
School of Materials Science and Engineering
UOC3  HPW3
Critical effects of temperature on behaviour of thermoplastics under load; Comparisons with thermostets; Factors contributing to strength and toughness; Yield, deformation and fracture; Crazing; Effects of environment.

MATS3574
Polymer Engineering 2
School of Materials Science and Engineering
UOC3  HPW3

MATS3624
Materials Engineering Project (18 UOC)
School of Materials Science and Engineering
Enrolment requires school approval
UOC18
An experimental or technical investigation or design related to materials engineering in the specific discipline (metallurgical engineering, materials engineering or ceramic engineering). Students with average mark above 70 will be allowed to do 24 units of credit Project MATS3724 with approval by the Head of the School.

MATS3724
Material Science Projects
School of Materials Science and Engineering
Enrolment requires school approval
UOC24
An experimental or technical investigation or design related to materials engineering in the specific discipline (metallurgical engineering, materials engineering or ceramic engineering). Only students with average mark above 70 will be allowed to do 24 units of credit Project with approval by the Head of the School. Students with average mark below 70 will be doing 18 UOC project MATS3624 AND ADDITIONAL 6 UOC Elective courses in Materials Science and Engineering.

MATS4013
Physical Metallurgy
School of Materials Science and Engineering
UOC3  HPW3
Unit 1 Dislocations- Deformation of metals. Atomic and molecular description of deformation. Introduction to dislocation theory and its application to mechanical properties. Unit 2 Phase Transformations-

MATS4023
Phase Transformations
School of Materials Science and Engineering
UOC3  HPW2

MATS4064
Thermomechanical Processing
School of Materials Science and Engineering
UOC3  HPW2
Polycrystalline plasticity and origin of deformation microstructure; stored energy; mechanisms of dynamic and static restoration in materials; flow stress; superplasticity; nucleation and growth of new grains; kinetics; effect of purity, solutes and particles; control of grain size; grain growth and secondary recrystallization; deformation and annealing textures; anisotropy of mechanical and physical properties; case studies.

MATS4083
Physical Metallurgy of Alloys
School of Materials Science and Engineering
UOC3  HPW3

MATS4084
Specialty Alloys
School of Materials Science and Engineering
UOC3  HPW3
Prerequisite/s: MATS4013
embrittlement of quenched steels. Alloy engineering (constructional) steels, tool and die steels, corrosion and heat resistant steels, high strength low alloy steels.

**MATS4133**
**Deformation and Strengthening Mechanisms**
School of Materials Science and Engineering
UOC3 HPW2
Prerequisite/s: MATS4013
Grain size dependence of strength, solute strengthening, work-hardening, age-hardening, strain ageing. Point defects and the role of point defects in strengthening. Creep, fatigue and high temperature deformation. Twinning. Interfaces.

**MATS4213**
**Fractographic Analysis**
School of Materials Science and Engineering
UOC3 HPW3
Prerequisite/s: MATS4013

**MATS4333**
**Fracture Mechanics**
School of Materials Science and Engineering
UOC3 HPW2

**MATS4613**
**Deformation of Metals and Strengthening Mechanisms**
School of Materials Science and Engineering
UOC3 HPW2
Unit 1 Deformation of Metals Atomic and molecular description of deformation. Introduction to dislocation theory and its application to mechanical properties. Unit 2 Strengthening Mechanisms in Metals Strengthening mechanisms, creep, fracture, grain size dependence of strength. Introduction to generation of deformation and recrystallisation textures. Measurements of age-hardening, activation energy of strain ageing.

**MATS5013**
**Materials Processing**
School of Materials Science and Engineering
UOC6 HPW6

**MATS5033**
**Extractive Metallurgy**
School of Materials Science and Engineering
UOC3 HPW2
Prerequisite/s: MATS5013; Excluded: MATS5273
Unit 1 Hydrometallurgical Processes (Staff Contact: Dr Haiping Sun) Application of principles of aqueous thermodynamics, electrochemistry, chemical and electrochemica kinetics to hydrometallurgical processes: leaching of minerals and concentrates, solution purification precipitation, and other separation processes, ion-exchange and liquid-liquid extraction, electrowinning and electrorefining. Unit 2 Light Metals Production (Staff Contact: Professor Oleg Ostrovski) Bayer process. Thermodynamics and kinetics of electrochemical reactions. Aluminium melting and refining. Hall-Heroult process and alternative technologies. Technologies for magnesium and titanium production. Economics and environmental issues.

**MATS5043**
**Heat, Fluid and Mass Flow in Materials Processing**
School of Materials Science and Engineering
UOC3 HPW2
Prerequisite/s: MATS1232, MATS1152
In-depth understanding of fundamental principles dictating transport phenomena in materials processing. Development of governing equations related to the transfer of fluid, energy and mass and their inter-dependence based upon fundamentals to analyse and solve problems encountered in current metallurgical operating environments. Application of the understanding developed to the emerging new technologies for metals processing such as direct reduction and smelting for iron making and near net shape casting.

**MATS5113**
**Materials Engineering Laboratory**
School of Materials Science and Engineering
Enrolment requires school approval
UOC3 HPW4
A laboratory program designed to illustrate property-structure-processing relationships in materials science and engineering through experimentation and analysis. Laboratory experiments are linked directly to lecture materials taught in MATS1013 Diffusion and Kinetics, MATS2013 Ceramic Materials, MATS3443 Polymer Science and Engineering, MATS4013 Physical Metallurgy, and MATS5013 Materials Processing. Students will be exposed to experimental methods and instruments used for materials characterization as well as processing techniques. Implicit in this course is the cultivation of safe laboratory practices and good experimental techniques, and training in routine property measurements, methods of literature search, reliable data collection, data representation, elementary statistical analysis of data, and writing of technical reports. Two visits to selected manufacturing plants in the Sydney region are compulsory in the course.

**MATS5253**
**Metallurgical Reaction Engineering**
School of Materials Science and Engineering
UOC3 HPW2

**MATS5323**
**Modelling in Materials Engineering 1**
School of Materials Science and Engineering
UOC3 HPW2
Prerequisite/s: MATH1131 or MATH1231 or MATH2049 or MATH2059
The course introduces a range of numerical and analytical modelling techniques and then applies them to situations faced in materials science and engineering. Initially the pre-requisite knowledge is reviewed. Topics then covered are finite difference modelling and finite element analysis. These techniques are then applied to stress analysis, and heat transfer. A number of commercial software packages are introduced as well as designing computer programs to suit specific situations.

**MATS5394**
**Pollution Control in Materials Processing**
School of Materials Science and Engineering
UOC3 HPW2
Pollutants from the different industrial processes. Technical principles and equipment to control the emission of pollutants. Examples of various processes in the metallurgical, ceramic and chemical industries. Pollution control legislation specific to industry and compliance case studies.

MATS3413  
**Kinetics of Metallurgical Processes**  
School of Materials Science and Engineering  
UOC3  HPW2  
Prerequisite/s: MATS1013.  

MATS3423  
**Pyrometallurgy 1**  
School of Materials Science and Engineering  
UOC3  HPW2  
Prerequisite/s: MATS5013;  
Excluded: MATS1323.  
The course includes two units: Unit 1: Extractive Metallurgy Laboratory, and Unit 2: Metallurgical Plant Practice.

MATS3424  
**Modelling in Materials Engineering 2**  
School of Materials Science and Engineering  
UOC3  HPW2  
Prerequisite/s: MATH1131 or MATH1141 or MATH1232 or MATH1241, MATH2021, MATS1021, MATS1092, MATS1132, MATS1163, MATS3323.  

MATS3524  
**Pyrometallurgy 2**  
School of Materials Science and Engineering  
UOC3  HPW2  
Prerequisite/s: MATS5013;  
Excluded: MATS1334.  

MATS9410  
**Materials for Mining Engineers**  
School of Materials Science and Engineering  
UOC3  HPW3  
Microstructure and structure-property relationships of the main types of engineering materials (metals, polymers, ceramics and composites). Micromechanisms of elastic and plastic deformation. Fracture mechanisms for ductile, brittle, creep and fatigue modes of failure in service; corrosion. Metal forming by casting and wrought processes. Phase equilibria of alloys; microstructural control by thermomechanical processing and application to commercial engineering materials. Laboratory and tutorial work includes experiments on mechanical testing, cast and recrystallised structures, ferrous and non-ferrous microstructures, and fracture and failure analysis.

MATS9520  
**Engineering Materials**  
School of Materials Science and Engineering  
UOC3  HPW3  
Microstructure and structure-property relationships of the main types of engineering materials (metals, polymers, ceramics and composites). Micromechanisms of elastic and plastic deformation. Fracture mechanisms for ductile, brittle, creep and fatigue modes of failure in service; corrosion. Metal forming by casting and wrought processes. Phase equilibria of alloys; microstructural control by thermomechanical processing and application to commercial engineering materials. Laboratory and tutorial work includes experiments on mechanical testing, cast and recrystallised structures, ferrous and non-ferrous microstructures, and fracture and failure analysis.
Builds on the skills in multimedia production developed in MDCM1000/1001 by adding workshops in developing content from various audio-visual sources. Workshops cover the capture of video and photographic images, sound, illustration and techniques of interactivity.

**MDCM2003 Multimedia Production**  
School of Media and Communications  
UOC6 HPW3  
Prerequisite/s: MDCM2002  
Students learn video/audio postproduction and develop their ideas into multimedia works suitable for publication. CD Roms, web-sites and video are produced in small groups, under supervision.

**MDCM2101 Media Tastes and Values**  
School of Media and Communications  
UOC6 HPW4  
Prerequisite/s: 36 units of credit; Excluded: SOCA3105, SOCA3705, SOCA3704.  
How do we become enchanted by media and what is the nature of this enchantment? What is happening to the self when we swoon, drift into the story, recoil, laugh, jump out of our skins, weep? Investigates valuing as a dynamic relation, as exchange and communication, rather than intrinsic quality. Explores how our tastes for particular media are formed and the various economic, institutional and discursive contingencies that shape these tastes. Also considers how our media tastes and values mark us, how they generate particular styles of life, identities and ethical systems.

**MDCM2102 Media Contexts: Political and Cultural**  
School of Media and Communications  
UOC6 HPW3  
Prerequisite/s: 36 units of credit  
Introduces students to theoretical issues relating to the historical significance of media in terms of cultural practices and citizenship. Influential writings on the media and media institutions, from the printing press to the internet, are examined. Methods of on-line, library and field research are developed. Essay and other academic writing genres are examined in the context of current media-based cultures.

**MDCM3000 Media Forms**  
School of Media and Communications  
UOC6 HPW3  
Prerequisite/s: MDCM2001 or MDCM2003; Excluded: MDCM3001  
The relationship between changing media forms and their techno-cultural contexts is studied. Various social and theoretical explanations are given for these relationships. Students are encouraged to develop a critical perspective on the issues together with an appreciation of the way in which forms develop and function in society.

**MDCM3002 Advanced Media Production**  
School of Media and Communications  
UOC6 HPW3  
Prerequisite/s: MDCM2001 or MDCM2003; Excluded: MDCM3001.  
Focuses on writing for and pre-production techniques in multimedia for various genres - narrative, interactive and expository. Students work in small groups under supervision and study in depth various aspects of multimedia production in laboratory workshops.

**MDCM3003 Multimedia Production in Industry Contexts**  
School of Media and Communications  
UOC6 HPW3  
Prerequisite/s: MDCM3002  
Focuses on multimedia production work in genres studied in MDCM3002 and 3000. Students produce, individually or in pairs, short works in time-based media or in multimedia, suitable for publication or exhibition.

**MDCM3100 Introduction to Legal Issues for the Media and the Arts**  
School of Media and Communications  
UOC6 HPW3  
Prerequisite/s: 36 units of credit  
Explains the structure of the Australian legal system - the processes of making and changing laws, the courts, the profession. Introduces the areas of law which a practitioner in media and the arts is likely to encounter, providing an overview of the legal rights and obligations of producers of media ‘content’ (journalists, writers, radio presenters, film and television program makers, multimedia producers, managers of media and arts organisations). Also considers legal aspects of the media as they affect audiences and consumers of media content.

**MDCM3102 Art, the Senses and Everyday Life in the Digital Age**  
School of Media and Communications  
UOC6 HPW4  
Prerequisite/s: 36 units of credit  
Investigates the realm of art as it now occurs at the intersection of new media and virtual culture. First it looks at the new arts made possible by new media technologies and at the kinds of technical, cultural and conceptual shifts involved. It considers the relation of aesthetics to culture in general and asks how it might be changing as the result of new media technologies. General theoretical approaches to virtual or digital aesthetics will be studied as well as the numerous examples given in the course.

**MDCM4000 Media and Communications Honours (Research) Full-Time**  
School of Media and Communications  
Enrolment requires school approval  
UOC24  
Prerequisite/s: 54 units of credit in MDCM at an average of 65% and permission from Head of School  
Consists of two seminars or equivalent in Session 1, a thesis workshop in Session 1, and a 15,000 word research-based thesis or a creative, research based media/multimedia project including a theoretical commentary of 5,000-6,000 words to complement the production.

**MDCM4050 Media and Communications Honours (Research) Part-Time**  
School of Media and Communications  
Enrolment requires school approval  
UOC12  
Prerequisite/s: 54 units of credit in MDCM at an average of 65% and permission from Head of School  
Consists of two seminars or equivalent in Session 1, a thesis workshop in Session 1, and a 15,000 word research-based thesis or a creative, research based media/multimedia project including a theoretical commentary of 5,000-6,000 words to complement the production.

**MDCM4500 Combined Media and Communications Honours (Research) F/T**  
School of Media and Communications  
Enrolment requires school approval  
UOC24  
Prerequisite/s: 48 units of credit in MDCM at an average of 65% and permission from Head of School  
Coursework and seminars and preparation of a combined thesis. In the first session students are required to take one coursework course in Media and Communications and one coursework course in the combined discipline. In the second session students submit a thesis on an agreed topic of between 15,000 and 20,000 words.

**MDCM4550 Combined Media and Communications Honours (Research) Part Time**  
School of Media and Communications  
Enrolment requires school approval  
UOC6  
Prerequisite/s: 48 units of credit in MDCM at an average of 65% and permission from Head of School
Coursework and seminars and preparation of a combined thesis. In the first session students are required to take one coursework course in Media and Communications and one coursework course in the combined discipline. In the second session students submit a thesis on an agreed topic of between 15,000 and 20,000 words.

**MDSG3001**
Clinical Studies 3
Faculty of Medicine
UOC4 HPW4
Prerequisite/s: MDSG2001

Objectives: To acquire and practice the skills of history taking and physical examination in order to elicit the features of common diseases. Interpretation of the mechanisms of production of the presenting signs and symptoms requires the integration of clinical skills with basic sciences, a concept introduced in Year 2. Clinical Studies in Year 3 builds on this experience and introduces the student to clinically relevant pathophysiology, with particular emphasis on the mechanisms associated with the development of symptoms and physical signs which indicate disease. The components of the course are: 1. Lectures in medicine and surgery which introduce the student to the more common diseases and clinical problems, with emphasis on material relevant to history taking and to physical examination. The teaching builds on and compliments related discussions in physiology, pathology, pharmacology and microbiology and where possible is integrated with these disciplines. 2. One surgical and one medical tutorial at a teaching hospital each week. Tutors will be building on the communication skills learnt in the first and second years of the program. By the end of third year, students must be able to obtain a full history from patients in a disciplined and prescribed manner and present that history both orally and in writing. Physical examination skills will be taught during the third year. Students are expected to master the routine associated with conducting an examination of the major body systems and be able to recognise and understand the significance of those major signs which indicate the presence of pathophysiology. Assessment: Continuous assessment of written case histories and clinical skills is carried out by surgical and medical tutors. The end of year examinations will include a multiple choice question paper (MCQ) and an objective structured clinical examination (OSCE).

**MDSG3002**
Clinical Studies 3 Special Program
Faculty of Medicine
UOC1

**MDSG4001**
Integrated Clinical and Community Studies
Faculty of Medicine
UOC24
Prerequisite/s: MDSG3001, PATH3101, PHPH3055

Objectives: By the end of Year 4, students will be expected to have mastered the skills in communication, history taking, and physical examination. Students will be able to generate a list of the patient’s problems which includes the physical, emotional and psychosocial aspects of the case. For each problem, students will develop a plan for problem resolution. Students will learn much about management and drug treatment during Year 4 but only the principles of management and introductory aspects of therapeutics will be assessed at the end of Year 4. Students will be expected to interpret symptoms and signs in terms of disorders of structure and function; to understand the pathological basis of symptoms and signs; to know what special investigations are required to reach a diagnosis; to obtain a full history from patients and to be able to present that history both orally and in writing. Physical examination skills will be taught during the third year. Students are expected to master the routine associated with conducting an examination of the major body systems and be able to recognise and understand the significance of those major signs which indicate the presence of pathophysiology. Assessment: Continuous assessment of written case histories and clinical skills is carried out by surgical and medical tutors. The end of year examinations will include a multiple choice question paper (MCQ) and an objective structured clinical examination (OSCE).

**MDSG4003**
Clinical Studies 4 Spec Prog (24 units)
Faculty of Medicine
UOC24

**MDSG6001**
Integrated Clinical Studies 6
Faculty of Medicine
UOC22
Prerequisite/s: MFCAS5001, OBST5001, PAED5101, PSCYS5001

Objectives: To build on the student’s experiences in Years 4 and 5 of the course. To ensure that during clinical attachments in Year 6 students are capable of accepting additional responsibility within clinical teams. To ensure a smooth transition from medical student to Intern. To integrate knowledge and skills gained in the previous three years, so that the student’s assessment, documentation and management of clinical problems is sufficiently mature and rounded to warrant graduation and provisional registration. To have students leave medical school committed to the importance of continued medical education. Year 6 of the new curriculum is fully integrated with the fourth year of the program. There are two campus weeks held during the year. The lecture, tutorial and correlation clinic programs build on knowledge of the disease processes gained in Year 4 and a special emphasis is placed on management, the principles and practical information needed for students who will soon commence work as Interns. Individual Principal Teaching Hospitals may strengthen the structured learning experience by providing additional teaching. However the time available for such additional programs will be strictly limited so that students are not diverted from their principal work on the wards. Five-week attachments are available in a variety of specialties, including medical, surgical, intensive care, obstetrics, gynaecology, Paediatrics and psychiatry. Three-week attachments are available in a limited range of specialties including Critical Care Medicine, Obstetrics and Gynaecology, Paediatrics, and Psychiatry. Each attachment is designed to provide an opportunity for the student to develop their own strengths and interests in areas where they wish to work in the future. Students will be able to choose from a range of attachments, and the final choice will be made in consultation with the student’s Line Tutor. Students will be expected to attend a minimum number of autopsy demonstrations during the year. Additional exposure to Pathology will be attained by student attendance at Grand Rounds and Clinico-Pathological Conferences. Campus Weeks: All students will attend the University campus for 3 weeks throughout the year, during which lectures in Medicine, Surgery, Clinical Pharmacology, Pathology, and Population Health will be provided. Population Health teaching will utilise the knowledge and experience gained during clinical attachments to elucidate basic principles of epidemiology, public health, and continuing care. The Pathology lectures and demonstrations will concentrate on the pathogenesis of complex disease processes which cannot be effectively covered in a tutorial format. An excursion to the NSW State Government Forensic Laboratory and Coronal Courts is a compulsory activity. Where possible, days will be arranged so that a particular subject is approached in a multi-disciplinary way. A series of correlation clinics, held during campus weeks, will further emphasise the interdisciplinary approach to understanding a subject.
procedural skills, therapeutics and such practical matters as interaction with ancillary medical staff and discharge planning.

**MECH0330 Engineering Mechanics**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Communication of form and layout of real world objects, solid modelling of objects. Engineering drawing layouts, orthogonal projections, dimensioning, tolerancing and standard drawing symbols, principles of detail design drawings and assembly drawings. Use of computer graphics and production of drawings.

**MECH0330 Engineering Mechanics**
School of Mechanical and Manufacturing Engineering
UOC4 HPW4

Excluded: CEIC1020, IDES1082, MECH1300

**MECH0440 Engineering Statics**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Excluded: CEIC1020, IDES1082, MECH0330, MECH1300

**MECH1120 Design and the Engineering Profession**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Introduction to the engineering profession; to assess abilities in written expression, to develop a consciousness of the importance of written, pictorial and oral expression in engineering life and to begin to develop these skills; to begin to develop an awareness of the professional attitude. Introduction to engineering hardware and components; geometry, function, manufacture and reasons for various configurations. The design process, problem identification, search for solution concepts, non technical considerations in design, decision techniques, detail.

**MECH1300 Engineering Mechanics 1**
School of Mechanical and Manufacturing Engineering
UOC6 HPW4

Corequisite/s: MATH1131 or MATH1141
Excluded: MECH0330

**MECH1400 Mechanics of Solids 1**
School of Mechanical and Manufacturing Engineering
UOC6 HPW4

Corequisite/s: MECH1300 or MECH0330 or MECH0440
Excluded: MECH0430

Resultants and equilibrium in three-dimensions; stress and strain; internal forces; stresses, deformation and strain energy due to axial loading, bending and torsion; helical springs.

**MECH1500 Computing 1M**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Introduction: history, applications, hardware, software, a model of a computer system, editors, operating systems. Networking and the internet. Program design and development: programming objectives, data structures, algorithms, symbolic names, translation of algorithms, steps in programming, programming style, errors and debugging. Data: data types, declarations, input output, file control. Programming constructs: arithmetic expressions, assignments, relational and logical expressions, selection. Application in sorting, word processing, graphics and plotting, simultaneous linear algebraic equations.

**MECH2101 Machine Design A**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MANF1130, MECH1400
Corequisite/s: MECH1120

Selection and specification of materials and manufacturing processes for engineering items. Communication by means of engineering drawing (including tolerances) of manufacturing information for simple components structures and assemblies. Application of standards and trade literature to design.

**MECH2102 Machine Design B**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MECH1120, MECH2101
Corequisite/s: MECH2411

Design of common engineering components and systems. Simple design-and-build project to meet a published specification and to demonstrate achieved performance.

**MECH2300 Engineering Mechanics 2**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MATH1231 or MATH1241, MECH1300

Kinetics of systems of particles; steady mass flow. Plane kinematics and kinetics of rigid bodies: moment of inertia; motion relative to translating and rotating frames of reference; equations of motion; work and energy, impulse and momentum. Virtual work for static and dynamic systems. Engineering applications.

**MECH2411 Mechanics of Solids 2A**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MATH1231 or MATH1241
Corequisite/s: MECH1400

Revision of Statics. The variation with orientation of stress at a point in 2D, Mohr’s circle. The variation with orientation of stress at a point in 3D given one principal stress. The variation with orientation of strain at a point, Mohr’s circle, strain gauges. The relationships between stress and strain during linear elastic deformation. The interdependence of elastic moduli. The variation with orientation of stress at a point in the general 3D case. Octahedral stresses. Strain energy stored in a linearly elastic body resulting from volume change and from distortion. Yield criteria. Fatigue, stress concentrations, Miner’s rule. Material properties and testing.

**MECH2412 Mechanics of Solids 2B**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MECH2411

Co-op scholars are required to do a 25 week period of industrial training in Session 2 of their Year 4. The location of the training is at the site of one of the sponsors of scholarships for that year. At the end of the training, they are required to submit a report on the training, which is evaluated by their academic mentor, and normally make a presentation on this topic at the company to company representatives and the academic mentor.

**MECH3101**
**Machine Systems Design A**
School of Mechanical and Manufacturing Engineering
UOC3  HPW3
Prerequisite/s: MECH2102, MECH2300, MECH2412
Corequisite/s: MECH3400

Mathematical modelling for design applications. Force flow through components and assemblies. Dynamically loaded bolted connections and welded joint design. Design of more engineering components and systems.

**MECH3102**
**Machine Systems Design B**
School of Mechanical and Manufacturing Engineering
UOC3  HPW3
Prerequisite/s: MECH2102, MECH2300, MECH2412
Corequisite/s: MECH3300

Design of mechanical power transmission systems. Major design project involving broad engineering aspects, concurrent design and the interaction with other group members.

**MECH3203**
**Engineering Experimentation A**
School of Mechanical and Manufacturing Engineering
UOC3  HPW2
Prerequisite/s: ELEC0807, MECH2411, MECH2612, MECH2712

Scientific method, engineering method; experimental program; report writing; error analysis; principles of transducers; selection of instruments.

**MECH3204**
**Engineering Experimentation B**
School of Mechanical and Manufacturing Engineering
UOC3  HPW2
Prerequisite/s: ELEC0807, MECH2411, MECH2612, MECH2712

Dynamic response of instruments; signal processing; digital data acquisition; interfacing transducers to computers; computer control of experiments; smart transducers.

**MECH3211**
**Linear Systems Analysis**
School of Mechanical and Manufacturing Engineering
UOC3  HPW3
Prerequisite/s: MATH2029, MECH1300

Models of physical systems: differential equations for physical systems including mechanical, electrical, hydraulic, thermal and pneumatic systems; linearisation. System analysis techniques: solution by Laplace transform method. Transfer functions and block diagrams. System response: response of first and second order systems to impulse step, ramp, sinusoidal and periodic inputs; higher order system response; system stability, applications.

**MECH3300**
**Engineering Mechanics 3**
School of Mechanical and Manufacturing Engineering
UOC3  HPW3
Prerequisite/s: MATH2029, MECH2300

**MECH3330**
**Vibration Analysis**
School of Mechanical and Manufacturing Engineering
UOC3  HPW3
Prerequisite/s: MATH2029, MECH2300
Excluded: MECH2310, MECH3310, MECH9311

**MECH3400**
**Mechanics of Solids 3**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MECH2411, MATH2029, MATH2039

Excluded:

Introduction to theory of elasticity and torsion of prismatic bars. The virtual work principle and its application to deflection of beams and trusses. Introduction to the linear elastic fracture mechanics and crack propagation.

**MECH3520**
**Programming and Numerical Methods**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MECH1500

Excluded: MANF3800, MECH3800

Programming language features essential to complex engineering calculations. Logic, control, arrays, functions and subroutines in FORTRAN. Application of numerical methods to solve non-linear equations, linear and non-linear systems, differencing schemes, ordinary and partial differential equations in mechanical engineering applications.

**MECH3601**
**Thermoﬂuid System Design**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MECH2612, MECH2712

**MECH3602**
**Advanced Thermodynamics**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Prerequisite/s: MECH2612, MECH2712

Utilisation of energy, availability - open and closed systems; generalised thermodynamic relations; kinetic theory of gases; non-reactive ideal gas mixtures. Combustion, chemical equilibrium, chemical kinetics and emission control. Compressible flow.

**MECH4001**
**Communications for Professional Engineers**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

Corequisite/s: MECH4003 or BIOM5001

Corequisites may be adjusted for some mid-course entry plans.

Note/s: Corequisites may be adjusted for some mid-course entry plans.

**MECH4003**
**Thesis A**
School of Mechanical and Manufacturing Engineering
UOC6

Prerequisite/s: MECH3000

Excluded: MECH4000

To be taken in the second last session required for the completion of all requirements for the award of the degree. This course, together with MECH4004 Thesis B, which is to be taken in the following session, requires each student to demonstrate managerial, technical and professional skills in planning and executing an approved engineering project within a stipulated time limit. Each student is also required to report on their project work at a thesis conference which is organised under MECH4001 Communications for Professional Engineers. Each student is guided by a supervisor, but successfully planning, executing and reporting on the project is the sole responsibility of each student. Thesis A does not require the submission of a thesis document. A satisfactory grade in this course is provisional pending successful completion of MECH4004.

**MECH4004**
**Thesis B**
School of Mechanical and Manufacturing Engineering
UOC9

Prerequisite/s: MECH4003

Corequisite/s: MECH4001

Excluded: MECH4000

To be taken in the last session required for the completion of all requirements for the award of the degree, i.e. in the session immediately following that in which MECH4003 Thesis A is taken. This course, together with MECH4003 Thesis A, requires each student to demonstrate managerial, technical and professional skills in planning, executing and reporting on an approved engineering project within a stipulated time limit. Each student is also required to report on their project work at a thesis conference which is organised under MECH4001 Communications for Professional Engineers. The project, on which each student works, will be a direct continuation of the project on which that student worked in MECH4003 Thesis A. Each student is guided by a supervisor, but successfully completing the project, writing the thesis and submitting two bound copies by specified deadlines are the sole responsibility of each student.

**MECH8312**
**Fundamentals of Noise and Vibration Measurement**
School of Mechanical and Manufacturing Engineering
UOC6

Excluded: MECH9312

**MECH9310**
**Advanced Vibration Analysis**
School of Mechanical and Manufacturing Engineering
UOC6 HPW3

Prerequisite/s: MECH3330

Introduction to experimental vibration analysis using Fast Fourier Transform (FFT) techniques. Typical sources of vibration in machines. Analysis of continuous systems via classical and finite element techniques. Experimental modal analysis. Torsional vibrations, including geared shaft systems.

**MECH9312**
**Fundamentals of Noise and Vibration Measurement**
School of Mechanical and Manufacturing Engineering
UOC6 HPW3

Excluded: MECH8312

MECH9325
Fundamentals of Noise
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Excluded: MECH4321, MECH3825

MECH9361
Lubrication Theory and Design
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Types of hydrodynamic bearings and bearing operation; properties of lubricants; theory of steady state hydrodynamic lubrication; hydrostatic and squeeze film lubrication applied to slider and journal bearings; bearing design with side leakage; thermal balance. Journal bearing dynamics; instability analysis. Elastohydrodynamic lubrication. Bearing materials; friction and wear. Grease lubrication.

MECH9400
Mechanics of Fracture and Fatigue
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH3400
Excluded: MECH4400

MECH9410
Finite Element Applications
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH3400
Excluded: AERO4401, AERO9415, MECH4410, NAVL4401
Introduction to finite element and associated graphics packages. Principles of mesh design and validation. Specification of boundary conditions including use of symmetry. Estimation of the cost of solution. Interpretation of results. Assessment of the accuracy of the results. Convergence to the exact solution. Selection of applications from linear and non-linear elasticity; three dimensional solids, plates and shells, plasticity, buckling and post-buckling behaviour; thermal stresses, dynamics including natural and forced vibration.

MECH9620
Computational Fluid Dynamics
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH2612, MECH2712

MECH9720
Solar Thermal Energy Design
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH2612, MECH2712

MECH9730
Two Phase Flow and Heat Transfer
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH3601, MECH3602

MECH9740
Power Plant Engineering
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH3601, MECH3602

MECH9751
Refrigeration and Air Conditioning 1
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH2612, MECH2712

MECH9752
Refrigeration and Air Conditioning 2
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH8751 or MECH9751
Psychrometrics; application to air conditioning design. Direct contact heat and mass transfer; application to the design of cooling towers and air washers. Cooling and dehumidifying coils. Properties of homogeneous binary solutions; steady flow processes with binary mixtures. Rectification of a binary mixture. Analysis of absorption systems. Production of low temperatures. Liquefaction and rectification of gases. Magnetic cooling. Note/s: Candidates wishing to specialise in Refrigeration and Air Conditioning should select this course.

MECH9758
Air Conditioning Design
School of Mechanical and Manufacturing Engineering
UOC6 HPW3
Prerequisite/s: MECH2612, MECH2712
Pipe and duct design, air conditioning systems, plant room design, cooling towers and evaporative condensers, heat and mass transfer equipment, load calculations, building thermal simulation, life cycle cost minimisation.

MECH9761
Internal Combustion Engines 1
School of Mechanical and Manufacturing Engineering
UOC6 HPW3

**MECH9920**  
Special Topic in Mechanical Engineering  
School of Mechanical and Manufacturing Engineering  
UOC6 HPW3

The syllabus changes to allow presentation of a special topic of current interest particularly by visitors with recognised expertise in the topic.

**MEDMS8001**  
Principles of Medicine for Optometry Students  
Faculty of Medicine  
UOC3 HPW3

An overview of historical, epidemiological, pathophysiological, diagnostic, therapeutic and public health aspects of disease in man and the various clinical categories of practice. Specific topics in eye health are also covered with emphasis on diagnosis and appropriate referral.  
Note: Students normally take the course in Year 4 of course 3950. Restricted to program 3950.

**MFAC1501**  
Foundations  
Faculty of Medicine  
UOC12 HPW15

The overall aim of the Foundations course is to introduce students to the independent and collaborative learning approach that characterises the new Medicine program. Foundations is an integrated eight-week experience for new students, which requires them to work independently and in teams to explore their understanding of the fundamentals of cell biology, the structure of the human body, and a range of professional issues pertinent to medical practice. It consists of two separate but interlinked health scenarios, the first on immunisation for medical students, and the second on stomach pain. The teaching and learning methods are designed to incorporate issues such as information management, research methodology, and communication. The Foundations course also provides an orientation for new students into the academic support and mentoring programs. Assessment will be by evidence of satisfactory participation in each of the various activities undertaken.

**MFAC1502**  
Society & Health 1  
Faculty of Medicine  
UOC12 HPW15

The two courses, Society and Health 1 & 2 are complementary vertically integrated components in phase 1 of the Medicine program. The following description refers to the areas of study students will encounter upon completion of both courses. Depending upon the year of enrolment, the exact content allocated to either component will vary. Objectives: - To gain an understanding of the various aspects of human society, the family, health and disease, and the role of the health care professional in society.  
Restricted to program 3950.

**MFAC1503**  
Beginnings, Growth & Development 1  
Faculty of Medicine  
UOC12 HPW15

The two courses, Beginnings, Growth and Development 1 & 2 are complementary vertically integrated components in phase 1 of the Medicine program. The following description refers to the areas of study students will encounter upon completion of both courses. Depending upon the year of enrolment, the exact content allocated to either component will vary. Objectives: - To gain an understanding of the various aspects of human society, the family, health and disease, and the role of the health care professional in society.  
Restricted to program 3950.

**MFAC1504**  
Health Maintenance 1  
Faculty of Medicine  
UOC12 HPW15

The two courses, Health Maintenance 1 & 2 are complementary vertically integrated components in phase 1 of the Medicine program. The following description refers to the areas of study students will encounter during both courses. Depending upon the year of enrolment, the exact content allocated to either component will vary. Objectives: - To gain an understanding of the various aspects of human society, the family, health and disease, and the role of the health care professional in society.  
Restricted to program 3950.
structure and function of the brain and central nervous system, and the pathology of stroke, dementia and neoplasia. Relevant aspects of public health, including clinical epidemiology and community resources will be explored, whilst learning of clinical skills will involve examination of the central nervous system and breast examination. In the other year, the focus will shift to the peripheral nervous system and musculoskeletal system, including the cellular and molecular aspects of nerve transmission, membrane physiology and relevant pharmacology. The biological, psychological and behavioural aspects of pain will be used as an integrating concept to link many of these topics. Clinical skills will focus on examination of the musculoskeletal and peripheral nervous system. A second major topic area will be further study of neoplasia, focusing on bowel cancer and anaemia. A series of learning activities focusing on communication skills and clinical communication operates throughout phase 1 of the Medicine program. It involves learning within clinical environments and will be integrated with content topics specific to individual courses. Assessment will involve performance in two projects/assignments and an end of course integrated examination.

### MFAC1506

**Society and Health 2**

Faculty of Medicine

UOC10  HPW15

See description for MFAC1502 Society and Health 1.

### MFAC1507

**Beginnings, Growth and Development 2**

Faculty of Medicine

UOC10  HPW15

See description for MFAC1503 Beginnings, Growth and Development 1.

### MFAC1508

**Health Maintenance 2**

Faculty of Medicine

UOC10  HPW15

See description for MFAC1504 Health Maintenance 1.

### MFAC1509

**Ageing and Endings 2**

Faculty of Medicine

UOC10  HPW15

See description for MFAC1505 Ageing and Endings 1.

### MFAC1510

**Ageing and Endings 2 plus extension**

Faculty of Medicine

UOC12  HPW15

In addition to the standard course content for Ageing and Endings 2, students will receive training in library and information skills relevant to the Arts & Social Sciences, to facilitate completion of their concurrent/consecutive BA program. Assessment of the extension work will be by evidence of satisfactory participation in each of the various activities.

### MFAC2501

**Society and Health 3**

Faculty of Medicine

UOC10  HPW15

Objectives: - By using authentic clinical or practical experiences as the basis for learning, students will build upon their understanding (developed in phase 1) of the biomedical, behavioural and social science principles involved in the human life cycle stages spanning conception to adulthood. In addition, students will develop understandings of the clinical aspects of illnesses relevant to this stage, whilst extending their capabilities in communication with, and physical examination of, patients with specified health issues. A case-based teaching methodology is employed to link acquisition of clinical capabilities with the learning of mechanisms and principles underlying health and illness. Approximately 60% of available time will be spent in clinical environments associated with the Faculty of Medicine, in which students will encounter patients or health issues relevant to the domain themes. The issues covered include gynaecology and sexual health issues in women of reproductive age, normal pregnancy and delivery, pregnancy complications, the healthy neonate and normal infant development, acute illness and injury in young children, chronic conditions in childhood and adolescent health.. Clinical experiences will be augmented by a range of tutorials, laboratory classes, and face-to-face and/or electronic resources. Assessment will include submission of a project/assignment report, demonstrating integration/correlation of prior and current learning with linkage to basic biomedical sciences; medical imaging and diagnostic tests; ethics; or population health issues. In addition, the student's clinical performance during the module will be graded as satisfactory/unsatisfactory.

### MFAC2502

**Beginnings, Growth and Development 3**

Faculty of Medicine

UOC10  HPW15

Objectives: - By using authentic clinical or practical experiences as the basis for learning, students will build upon their understanding (developed in phase 1) of the biomedical, behavioural and social science principles involved in the human life cycle stages spanning conception to adulthood. In addition, students will develop understandings of the clinical aspects of illnesses relevant to this stage, whilst extending their capabilities in communication with, and physical examination of, patients with specified health issues. A case-based teaching methodology is employed to link acquisition of clinical capabilities with the learning of mechanisms and principles underlying health and illness. Approximately 60% of available time will be spent in clinical environments associated with the Faculty of Medicine, in which students will encounter patients or health issues relevant to the domain themes. Clinical experiences will be augmented by a range of tutorials, laboratory classes, and face-to-face and/or electronic resources. Assessment will include submission of a project/assignment report, demonstrating integration/correlation of prior and current learning with linkage to basic biomedical sciences; medical imaging and diagnostic tests; ethics; or population health issues. In addition, the student's clinical performance during the module will be graded as satisfactory/unsatisfactory.
MFAC2504  
Ageing and Endings 3  
Faculty of Medicine  
UOC10 HPW15

Objectives: By using authentic clinical or practical experiences as the basis for learning, students will build upon their understanding of the specific health issues faced by elders that they established in phase 1. In addition, students will develop understandings of the clinical aspects of illnesses occurring in elders, whilst extending their capabilities in communication with, and physical examination of, patients with specified health issues. A case-based teaching methodology is employed to link acquisition of clinical capabilities with the learning of mechanisms and principles underlying health and illness. Approximately 60% of available time will be spent in clinical environments associated with the Faculty of Medicine, in which students will encounter patients or health issues relevant to the domain themes. Typical clinical issues encountered will include complex co-morbidity problems in elders, chronic illness and disability, degenerative diseases including arthritis and dementia, rehabilitation, palliative care and cancer medicine, stroke, vascular disease, and terminal illness. These experiences will be augmented by a range of tutorials, laboratory classes, and face-to-face and electronic resources. Assessment will include submission of a project/assignment report, demonstrating integration/correlation of prior and current learning with linkage to basic biomedical sciences; medical imaging and diagnostic tests; ethics; or population health issues. In addition, the student’s clinical performance during the module will be graded as satisfactory/unsatisfactory.

MFAC2509  
Clinical Skills Refresher  
Faculty of Medicine  
UOC4 HPW25

This short course will be offered in intensive mode and will include clinical work and classes in a clinical skills laboratory. Assessment will be by evidence of satisfactory participation in each of the various activities undertaken.

MFAC3501 – MFAC3512  
Clinical Modules 1 to 12  
Faculty of Medicine  
UOC10 HPW10

These courses collectively comprise the Phase 3 clinical program. All students will enrol in MFAC 3501-3510 and may enrol in additional modules i.e. MFAC 3501 and 3502) and a report submitted at the conclusion of the project (i.e. on completion of MFAC 4503).

MFAC4501  
Independent Learning Project 1  
Faculty of Medicine  
UOC8 HPW12

The three courses [MFAC 4501, MFAC 4502, MFAC 4503] collectively comprise the Independent Learning Project and must be taken consecutively. After completing Phase 1, all students (unless exempt) will be required to undertake an Independent Learning Project (ILP) equivalent to 3 x 8-week blocks. During the course of the ILP period the students will also complete 12 units of credit (UoC) in courses offered by Faculties other than the Faculty of Medicine (the Flexible course). In order to complete both of these requirements, the 24 week ILP enrolment will be staggered as 16 weeks full-time and 16 weeks part-time, over 32 weeks. Each module in the ILP will comprise 8-week program (equivalent to 24 UOCS) and the ILP offers scope for in-depth study in a variety of possible settings and fields of study. Some examples include laboratory-based work in the biomedical sciences, audits of clinical practice, projects dealing with cross-cultural issues, as well as projects dealing with medical law or ethics and health economics. Projects may be undertaken outside the Faculty, or subject to approval, in another institution. Although there are considerable flexibility in the choice of topic, all projects must involve: (1) identification of an issue and related questions relevant to the field or environment where learning will occur; (2) a review and critical analysis of literature or practice relevant to the issue; (3) articulation of an approach to address the issue, including consideration of ethical issues; (4) a period of research or scholarship in which the issue is explored or investigated; and (5) evaluation, communication and presentation of the results of in-depth study. Assessment will include the components of progressive assessment (on completion of each of the first two 8-week modules i.e. MFAC 4501 and 4502) and a report submitted at the conclusion of the project.
This nine week term commences with an introductory week of tutorials in Geriatrics, Dermatology, Otorhinolaryngology and General Practice. The remainder of the term consists of four-week teaching blocks in urban general practice, rural general practice, geriatric practice, and a final viva assessment. Dermatology objectives: 1. To gain an understanding of disease processes and management in dermatology. 2. To address the management of certain special cases encountered in the elderly such as warts, eczema, psoriasis, acne, fungal infections. 3. To manage the various aspects of acne, warts, eczema, psoriasis, and fungal infections. 4. To gain information on appropriate drug therapy. 5. To gain insight into the roles of workers involved in caring for the elderly. Occupational therapists, speech therapists, community nurses and nurses in nursing homes. 6. To gain an understanding of the respiratory system and its management. Assessment: Students will be assessed through completion of a log book and during the attachments, students are introduced to: key terms and concepts, case studies, presentations, discussion, and examination. Students will also attend approximately 4-6 sessions in dermatology clinics or a week attached to a dermatology registrar or dermatologist in their rooms. Assessment: Students will be assessed through completion of a log book and written assignment on a rural health care facility. Topics include: the management of diseases and conditions affecting the skin, the role of control, gender, social responsibility, organisational structures, processes and modes of organising. Management practices, issues and debates associated with the management of public, private and third sector organisations. The frameworks, concepts and theories covered in the course include: an introduction to how managers deal with the diversity of issues faced in the effective management of contemporary organisations. The underpinning themes of the course centre on how managers can deal with the multiple demands of complex and turbulent environments, promote and sustain competitive advantage, manage changing social, political and technological factors inside and outside the organisation, ensure ethical and social responsibility, develop global organisations and manage diversity in the workforce. How management goes about its principal tasks of managing strategy, structures, people and systems are the key focus issues of the course. The management of public and private sector organisations, the management of health and social care organisations, and management of third sector organisations. The frameworks, concepts and theories covered in the course include: an introduction to how managers deal with the diversity of issues faced in the effective management of contemporary organisations. The underpinning themes of the course centre on how managers can deal with the multiple demands of complex and turbulent environments, promote and sustain competitive advantage, manage changing social, political and technological factors inside and outside the organisation, ensure ethical and social responsibility, develop global organisations and manage diversity in the workforce. How management goes about its principal tasks of managing strategy, structures, people and systems are the key focus issues of the course. The management of public and private sector organisations, the management of health and social care organisations, and management of third sector organisations. The frameworks, concepts and theories covered in the course include: an introduction to how managers deal with the diversity of issues faced in the effective management of contemporary organisations. The underpinning themes of the course centre on how managers can deal with the multiple demands of complex and turbulent environments, promote and sustain competitive advantage, manage changing social, political and technological factors inside and outside the organisation, ensure ethical and social responsibility, develop global organisations and manage diversity in the workforce. How management goes about its principal tasks of managing strategy, structures, people and systems are the key focus issues of the course.
MGMT1101
Global Business Environment
School of Organisation & Management
UOC6   HPW3

This course examines key global environmental factors and issues impacting on the development of international business. Major topics include: globalisation of business; national differences in the political, social and legal environment, political and country risk; cultural differences and their impact on international business; ethical issues in international business; international trade issues; theory and politics of foreign direct investment; international competitiveness; the internationalisation of business activities and the development of multinational enterprises; foreign exchange markets; the international monetary system and development of the global capital market.

MGMT1102
Managing Across Cultures
School of Organisation & Management
UOC6   HPW3

The aim of this course is to develop a conceptual and practical understanding of how people differ across cultures, how these cultural differences impact on international business interactions, and how organisations can recognise and value cultural differences, aspects that are critical to the international business environment. Topics include the nature and dimensions of culture, managing cultural differences, the dynamics of intercultural communication, negotiating across cultures, working with multi-cultural teams, managing cross-border conflicts, and global perspectives to leadership, motivation and decision making. Further topics include human resource development across cultures and issues unique to global management including cross cultural entry and re-entry transitions, problems relating to expatriation and repatriation, and the challenges of managing global careers. Central to this course is the integration of theory and practice, analyses of international business case studies, role plays, interactive and experiential learning activities, and the critical evaluation of relevant readings and journal articles.

MGMT1701
Industrial Relations
School of Organisation & Management
UOC6   HPW3

Provides a multi-disciplinary introduction to a range of important concepts and issues in Australian industrial relations. Topics include: political, social, economic, legal, historical and psychological aspects of the evolution and operation of modern industrial relations; the nature and implications of strikes, lockouts and other forms of industrial conflict and alienation; the structure and policies of State and Federal trade unions, the State labor councils and such peak organisations as the Australian Council of Trade Unions; the employer industrial relations function, management strategies and the structure and policies of employer associations; processes of work rule determination, such as collective bargaining, mediation, conciliation and compulsory arbitration; labour movements; and the role of the various arbitration tribunals and government instrumentalities with respect to industrial relations.

MGMT1712
Management of Organisations
School of Organisation & Management
UOC6   HPW3

Provides an interdisciplinary approach to the field of organisational behaviour and management. It introduces students to a range of perspectives on organisational structures and processes, and considers how they help us understand various management theories and practices. On this basis, issues of power, control, conflict and culture are explored. Other topics include: changing approaches and attitudes to work; social and political influences on group behaviour; teamwork and other managerial interventions; leadership and motivation; gender, EEO and human resource management.

MGMT2001
Managing Innovation and Organisational Change
School of Organisation & Management
UOC6   HPW3
Prerequisite/s: MGMT1001, MGMT1002

This course examines the role of the innovation process in the management of organisations and change managing change. It explores the role of creativity in innovation and the nature and processes of organisational change. It focuses on technological, administrative and process innovation as well as contemporary techniques and procedures used to understand, initiate, plan and implement change. The course is shaped by contemporary concerns over the need to combine consistent structures for predictable and efficient operations and personnel employment, with flexibility and timely adaptability to respond to the environment. It adopts a critical perspective and uses a multi-disciplinary framework drawing on several disciplinary areas as they contribute to the theory and practice of innovation and change. Topics encompassed include: features of organisation design; types and phases of change; nonlinear dynamics; managerial and organisational cognition; interpretative systems and sense-making; culture and intervention for change; organisation development; techniques for process change, e.g. TQM; business processes; the role of entrepreneurship, creativity, leadership and managerialism; and change agency. Case studies and exercises are used to explore central issues.

MGMT2002
Managing Business Communication
School of Organisation & Management
UOC6   HPW3
Prerequisite/s: MGMT1001

Effective communication management, at both individual and organisational levels, is essential in business and professional contexts. This course facilitates understanding of how people manage their communication processes, considers ‘best practice’ for successful organisational communication, and provides opportunities for communication skills development and enhancement. Topics include the theories and principles of communication management; the dynamics of interpersonal communication; the significance of intercultural and international business communication; the use of language and non-verbal communication; managing communication in small groups and teams; communication in negotiations; creating communication networks; managing ethical issues in business communication; conducting communication audits and developing benchmarks; and strategies for improving organisational communication. The course also includes practical components for improving individual and small group communication.

MGMT2101
International Business and Multinational Operations
School of Organisation & Management
UOC6   HPW3
Prerequisite/s or Corequisite/s: IBUS1101 or MGMT1101

The focus of this course is on the multinational enterprise and the management of cross-border operations. Major topics include: multinational enterprises and the internationalisation process; motives for foreign investment; strategy of international business; organisation of international business; foreign market selection and entry strategy; exporting, importing and countertrade; the management of international business operations including an introduction to international human resource management, learning and knowledge management, manufacturing and materials management, marketing management, and accounting and financial management.

MGMT2105
Chinese Business Enterprise
School of Organisation & Management
UOC6   HPW3
Prerequisite/s: 48UOC in Arts or Law or Commerce & Economics
Exclusion: CHIN2501

MGMT2106
Comparative Management Systems in East Asia
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IBUS1101 or MGMT1101
An introduction to the comparative management systems in Northeast Asia including Japan, Korea, and China. Topics include: recent business performance in East Asia; comparative analysis of business systems, including Japanese Keiretsu, Korean Chaebol and Chinese family business; State enterprises and government-business relations in China; comparative analysis of organisational structures, corporate strategy and human resource management practices; impact of culture on management style and decision making; sub-contracting and buyer-supplier networks; and the globalisation of business.

MGMT2702
Industrial Law
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IROB1701 or IROB1702 or IROB1712 or MGMT1701 or MGMT1702 or MGMT1712
Looks at the nature and purposes of the legal system and industrial law, the law concerning the contract of employment; trade unions; industrial law; powers of Government; and the Commonwealth Conciliation and Arbitration System, awards, penal sanctions for industrial law, industrial torts, topics and issues of importance in the industrial law field.

MGMT2704
Social Organisation of Work
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IROB1701 or IROB1702 or IROB1712 or MGMT1701 or MGMT1702 or MGMT1712
Covers the conceptual foundations of industrial sociology, and their application to work practices and institutions. The course will look at the rise of industrial capitalism and trade unionism, work and non-work (including the question of domestic labour), the labour process and work organisation, conflict and control, occupations and the division of labour, divisions in the workforce, technology, skill formation, productivity and flexibility, and the changing nature of work in the late 20th century.

MGMT2718
Human Resource Management
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IROB1701 or IROB1702 or IROB1712 or MGMT1701 or MGMT1702 or MGMT1712
Looks at management of paid employment in Australia. It covers contemporary management thinking; issues in managing people: problem solving; leadership, power, communications and managing in an organisation - group dynamics and supervision, setting goals and performance appraisal, developing individual and organisational resources, career planning.

MGMT2721
Managing People
School of Organisation & Management
Enrolment requires school approval
UOC6 HPW3
This course cannot be undertaken by students majoring in HRM or students in the Faculty of Commerce. It focuses on managing in a rapidly changing environment. Topics include: leadership, decision-making and innovation; power, legitimacy, and the socialisation process; the structure and design of organisations, organisation and domination, the evolution of ethical awareness; intergroup conflict and conflict resolution; skills of managing - communication, negotiation, coaching and objectives setting; organisational culture and transformation.

MGMT2724
Health and Safety at Work
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IROB1701 or IROB1702 or IROB1712 or MGMT1701 or MGMT1702 or MGMT1712
Examines the occurrence, origins and management of occupational health and safety problems. It assesses the contribution of technical and social science disciplines to understanding and addressing occupational injury and disease. The role of management, government and trade unions in addressing health and safety will also be critically assessed. Topics covered include the incidence and nature of occupational illness; theories of injury causation; explaining occupational disease; occupation stress; shiftwork; repetition strain injury; the regulation of occupational illness; workers compensation and rehabilitation; management and union approaches; safety engineering; noise; hazardous substances; and case study.

MGMT3001
Managing Business Strategy
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: MGMT1001, MGMT1002, MGMT2001, MGMT2002; Corequisite/s: MGMT2002
This course provides a detailed analysis of the latest developments in the theory and practice of strategic management. The course covers concepts of strategy, goals, values and performance including shareholder value and balanced scorecard approaches; analysis of the industry environment; analysis of resources and capabilities; organisational structure and management systems; analysis of competitive advantage; industry evolution; technology-based industries; vertical integration strategies; game theory and competitive behaviour; global strategies and multinational enterprises; diversification strategy; managing the multibusiness corporation. Case studies are used to illustrate strategy making in practice by corporations from around the world.

MGMT3101
International Business Strategy
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IBUS2101 or MGMT2101
This course covers the fundamentals of strategic management from the perspective of both large and small organisations operating internationally. It thus builds directly on prior studies in international business and focuses on corporate and business level strategies, rather than functional strategies. Particular emphasis is given to the dynamics of the competitive environment and emerging issues. Major topics include: theoretical perspectives on strategic management in the international business arena; the interface between the firm's internal and external environments; country selection; mergers and acquisitions; management of strategic alliances; the role of government in international strategy; emerging technologies and intellectual property; strategic use of international standards; and international entrepreneurship.

MGMT3102
Asia-Pacific Business
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IBUS2101 or MGMT2101
What explains the success of Asian enterprises? This course provides an insight into the dynamics of Asian business systems in Japan, Korea, China, India, Taiwan, Hong Kong and Singapore. Topics include: the institutional and policy context of dynamic learning and innovation in Asian business; strategy and structure of multinational companies from Asia; paradigms of industrial development; state guided capitalism; the role of networks, markets, and non-market institutions; role of foreign direct investment and export promotion in the Asia Pacific. Attention is directed to the dynamic institutional context of Asian business, the nature and source of competitive advantage of domestic enterprises, and the comparative aspects of developing and managing multinational and domestic enterprises across the region.

MGMT3103
Global Stakeholder Management
School of Organisation & Management
UOC6 HPW3
Prerequisite/s: IBUS2101 or MGMT2101
This course introduces students to a theoretical and conceptual framework for analysing corporate governance and stakeholder management, particularly in complex international environments.
Controversial aspects of dealing with stakeholders considered in the course include: incorporating ‘social responsibility’ into firm strategies and operations, corruption and cronyism, the power and influence of the media, diversity management, the environment, and bio-technology.

**MGMT3702**
**International Human Resource Management Practice**
School of Organisation & Management

*Prerequisite/s:* IBUS2101 or MGMT2101

Examine from both applied and theoretical perspectives the effect of national culture on the processes and systems associated with managing human resources across cultural boundaries, as in the case of multinational corporations. The opening topics look at the conceptual and methodological difficulties and challenges facing the practice and research of International HRM. Other topics include: the role of culture in configuring the perceptions and actions of managers and subordinates; HRM systems as cultural artefacts; the clash between culturally diverse indigenous HRM frameworks; and the problems associated with transferring HR management systems across cultural boundaries. Also examines practical issues such as: the selection, preparation, training and management of expatriates, host-country nationals and third-country nationals for international assignments, developing intercultural competence, managing cultural adaptation at the individual and system levels, and the HR processes involved in staffing joint venture partnerships. Case study material used throughout the course is drawn from both Asia-Pacific and European regions.

**MGMT3705**
**Management and Employment Relations**
School of Organisation & Management

*Prerequisite/s:* IROB1701 or IROB1702 or IROB1712 or MGMT1701 or MGMT1702 or MGMT1712

Covers: organisations of employers; employer organisation structure and strategy; employer associations relations with firms; multi-employer and single employer bargaining; corporate strategy; the structure of private and public sector organisations in relation to their environments; management values and ideology regarding employee motivation and regulation; management strategy and practice regarding employees and unions; the personnel and industrial relations function; line management and employee relations; management effectiveness in employee relations.

**MGMT3708**
**Research Methods in Employment and Management**
School of Organisation & Management

Enrolment requires school approval

*Prerequisite/s:* UOC6 HPW3

This course is designed as an advanced level course for students intending to undertake the fourth year Honours program in the areas of Employment and Management. It examines the philosophical foundations of the various approaches and the contributions of basic social science disciplines to the study of employment and management studies. The course will provide students with research philosophy, strategy, design, and execution skills. Topics include disciplinary perspectives on employment and management, the foundations of social science and competing paradigms used in research, identifying research topic, strategy, design and a variety of research methods - case-study and field research, comparative method, historical analysis, interviewing, focus groups, survey design and analysis.

**MGMT3721**
**Negotiation Skills**
School of Organisation & Management

*Prerequisite/s:* UOC6 HPW3

This course provides a set of generic concepts and skills for negotiation and resolving interpersonal and inter-group conflicts. Students gain the opportunity to work with theory, skills and processes of negotiation relevant to a wide range of contexts: commercial; organisational; community; political and public policy; legal; and industrial relations. This course will provide an analytical understanding of negotiations, including negotiation planning, strategy and tactics, as well as the development of the practical skills necessary for implementation of this knowledge. Students will gain these practical skills through participation in negotiation seminars. The seminar programme is made up of negotiation role play exercises which develop in complexity as the course progresses.

**MGMT3724**
**Strategic Human Resource Management**
School of Organisation & Management

*Prerequisite/s:* IROB2718 or MGMT2718

This course deals with the ways in which strategic thinking can be applied to Human Resource Management. It aims to provide students with opportunities to synthesise managerial strategy issues with HRM processes, in a considered and reflective manner. The course focuses on the way strategies can be formed and enacted in organisations, and on the internal and external environmental contexts from which human resource strategies emerge. It also deals with a range of contemporary issues in human resource management against a backdrop of new and changing people management practices. In this course how can people manage and enhance organisational performance? How can we integrate stakeholder concerns into organisational decisions and strategies? How can strategic thinking underpin HRM activities? What are the barriers to strategic thinking in organisations? What does it mean to be a HR professional? Students are given the opportunity to enhance their skills in teamwork, organisational analysis, problem solving and strategic thinking - through fieldwork, case studies and seminars.

**MGMT3728**
**Managing Pay and Performance**
School of Organisation & Management

*Prerequisite/s:* IROB1701 or IROB1702 or IROB1712 or MGMT1701 or MGMT1702 or MGMT1712

Examines contemporary remuneration and performance management from both applied and theoretical perspectives, emphasising theories, practices and forces associated with the current trend away from traditional fixed, job-based pay to variable, person-based and performance-based remuneration. Topics covered include: HRM and the New Pay, motivation theory, fair pay, job evaluation, pay for skill and competencies, merit pay, recognition awards, performance appraisal vs performance management, broadbanding, team-based pay, gainsharing, employee share ownership, and executive pay. Also examines strategies for achieving an efficient and equitable mix of pay methods appropriate to particular levels of the workforce, from senior executives to non-managerial workers. Case study material is used throughout.

**MGMT3729**
**Managing Workplace Training**
School of Organisation & Management

*Prerequisite/s:* IROB2718 or MGMT2718

Skill formation and training have become central features of public policy and human resource management. This course introduces students to the theory and practice of workplace training, and to the public policies and regulations that shape such training. It is designed to build on and complement the content of nationally recognised training qualifications in Assessment and Workplace Training. Issues covered include - the context of training; learning in theory and practice; the nature of skill; training needs analysis, delivery and evaluation; competency-based training; the National Training Framework; training and employment policies; management education and development.

**MGMT4734**
**Thesis (Industrial Relations)**
School of Organisation & Management

Enrolment requires school consent

*Prerequisite/s:* Admission to Honours in Industrial Relations.

**MGMT4736**
**Industrial Relations Honours**
School of Organisation & Management

Enrolment requires school approval
A thesis of 20,000 words, Industrial Relations seminar (both Sessions), and two approved MGMT courses (one per Session). Details of approved courses may be obtained from the Head of School.

**MGMT4737**

**Industrial Relations 4 (Honours) Part-time**  
School of Organisation & Management  
Enrolment requires school approval  
UOC12  
A thesis of 20,000 words, Industrial Relations seminar and two approved MGMT courses. Details of approved courses may be obtained from the Head of School.

**MGMT4738**  
**Thesis (Human Resource Management)**  
School of Organisation & Management  
Enrolment requires school approval  
UOC12  
HPW3  
Prerequisite/s: iROB3708 or MGMT3708 and admission to Honours in Human Resource Management.

**MGMT4740**  
**Human Resource Management 4 (Honours) Full-time**  
School of Organisation & Management  
Enrolment requires school approval  
UOC24  
A thesis of 20,000 words, Human Resource Management seminar (both Sessions), two approved MGMT courses (one per Session). Details of approved courses may be obtained from the Head of School. Students undertaking this Honours year program should enrol only in MGMT4740.

**MGMT4741**  
**Human Resource Management 4 (Honours) Part-time**  
School of Organisation & Management  
Enrolment requires school approval  
UOC12  
A thesis of 20,000 words, Human Resource Management seminar, two approved MGMT courses. Details of approved courses may be obtained from the Head of School. Students undertaking this Honours program part time should enrol only in MGMT4741.

**MGMT4744**  
**Combined Honours in Human Resource Management Part-time**  
School of Organisation & Management  
Enrolment requires school approval  
UOC6  
A thesis of 20,000 words, Industrial Relations seminar and one approved MGMT course. Details of approved courses may be obtained from the Head of School. Students undertaking this Honours program part time should enrol only in MGMT4744.

**MICM3228**  
**Microbiology for Medical Students**  
School of Biotechnology and Biomolecular Sciences  
UOC4  
HPW4  
Objectives: The overall objective is for students to understand the nature of the interactions between parasites and their human hosts, and the fundamentals of human immunology. Early lectures and tutorials are concerned with the basics of the scientific discipline of immunology. In order to achieve the microbiology requirement, students will know the causative agents of common microbial diseases and how they produce their effects, comprehend host defence processes, understand the epidemiology of infectious diseases, understand the basis of prevention and treatment of microbial diseases, appreciate the role of the microbiologist in the diagnosis and management of microbial disease and where appropriate, integrate these objectives with a knowledge of pathology and immunology. Emphasis is given to the nature of the response of pathogens to various physical, chemical and antibiotic agents which can be used to interrupt their normal function. An analytical approach is taken to the means by which microorganisms exist in association with humans and their environment and how they gain access to tissues and produce disease. Attention is given to the mechanisms of host defence against microbial infection. Emphasis throughout the course is placed on diseases of body systems. Laboratory based classes emphasise the role of the laboratory in diagnosis and include the use of problem solving approaches to the study of microbial diseases. Assessment: This is based on mid-year and end of year examinations as well as a major assignment and practical examination.

**MICR2011**  
**Microbiology 1**  
School of Biotechnology and Biomedical Sciences  
UOC6  
HPW6  
Prerequisite/s: MICR2201;  
Corequisite/s: BIOS2201, BIOS2501 or BIOS2621.  
This course is for students majoring in microbiology and who wish to enlarge their knowledge and skills in microbiology beyond those obtained in Fundamentals of Microbiology & Immunology or equivalent courses at other institutions. The biology, diversity and function of bacteria. Modern approaches to bacterial diversity through the use of bioinformatics. Comparative aspects of microbial growth. Bacterial nutrition and biosynthetic pathways. Microbial survival and global responses to environmental stimuli. Theory and practice of sterilization. Action of antimicrobial agents. Introduction to microbial ecology, medical and industrial microbiology.

**MICR2201**  
**Fundamentals of Microbiology and Immunology**  
School of Biotechnology and Biomedical Sciences  
UOC6  
HPW6  
Prerequisite/s: BIOS2101 (Except for Postgraduate Students).  
This course is designed to give undergraduate and post graduate students a solid background in fundamentals of microbiology and immunology. The course introduces the student to the fascinating world of microorganisms: their ubiquity, peculiarities and the three domains of life i.e. Bacteria, Archaea and Eucarya. Most of the course will consider bacteria, fungi, yeasts and viruses in our every day life and how their activities impinge on our well being. Metabolism and growth, microbial death & microbial genetics will be introduced to the students. Practical aspects of microbiology will be considered such as food intoxication, infection, spoilage and food fermentation. The immune system & the study of immunology will also be introduced in this course. This introduction will encourage the student to question controversial areas of microbiology and immunology such as AIDS. Immunization, environmental pollution, food hygiene, food spoilage causes and prevention etc.  
Note/s: BIOS1101 is recommended. No prerequisites/corequisites are required for Postgraduate students.

**MICR3021**  
**Microbial Genetics**  
School of Biotechnology and Biomedical Sciences  
UOC6  
HPW6  
Prerequisite/s: 12 units of credit from MICR2011 or MICR2611 or BIOS2501 or BIOS2621 or BIOCC2201;  
Excluded: BIOT3031, MICR3621.  
This course provides a broad coverage of material describing the fundamentals of microbial genetics. The course differs from MICR3621 Microbial Genetics (Advanced) by requiring less contact time in terms of laboratory practicals and tutorials, and laboratory and lecture assessment. The course in intended for students interested in gaining a background in molecular biology/ genetics and those considering Molecular Biology, Microbiology, Medical Microbiology and Immunology and Genetics majors. Main topics include genetics of bacteriophage, bacteria and yeasts, mutation and repair, plasmids, gene transfer, transposable genetic elements, gene cloning (genetic engineering) and two component regulatory systems. The practical component includes a range of contemporary microbial genetics experiments that complement lecture material. They may include experiments involving bacteria, archaea, or yeast involving transposon mutagenesis, gene library construction, gene complementation using recombinant plasmids, gene expression and regulation studies, UV mutagenesis and DNA repair, restriction/modification systems, promoter rescue experiments, and a variety of gene exchange techniques. The socioeconomic impact of microbial genetics is also discussed.  
Note/s: Replaces BIOT3031
MICR3031
Eukaryotic Microbiology (UTS)
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: MICR2011

This course provides an opportunity for students interested in a broad education in medical microbiology to undertake studies in the areas of parasitology and mycology. The unit is offered by agreement with the University of Technology, Sydney, and is taught at the Core Hill Campus of UTS. The course offers students training in the principals and practices of medical laboratory parasitology and mycology. The parasitology component covers the identification of parasitic worms, insects and protozoa. Mechanisms of disease is also covered. The mycology component examines pathogenic yeasts and fungi, their identification and mechanisms of disease. The course is supported by a comprehensive laboratory program.

Notes:
Enrolment limited to 20 students. If oversubscribed, placements awarded according to achievements in Level 1, 2 and 3 courses. To avoid complications with HECS/fees payments, students should enrol in this course through UTS, not UNSW, and have the units of credit transferred towards the UNSW degree.

MICR3041
Immunology 1
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: BIOC2101 or (BIOC2181 and MICR2201);
Excluded: MICR3641, MICR3042.

This course provides a broad coverage of material describing the principles of immunology. There is a significant component of self-directed learning, including internet-based tutorials and assignments. The course is intended for students majoring in any area of Life Science or Medical Science interested in gaining a background in Immunology, and for those undertaking Microbiology or Medical Microbiology and Immunology majors. Topics addressed include the multiple components of the immune response and how they interact; an introduction to the concepts behind the regulation of the immune response; and introduction to the applied and clinical aspects of immunology; including allergy, transplantation and immunodeficiency. An element of choice in assessment tasks enables students to pursue in some depth an area of immunology which particularly interests them.

MICR3051
Immunology 2
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: MICR3041 or MICR3641

This course takes students to the frontiers of immunological knowledge, exploring conflicting theories of immunological function and regulation, and highlighting new therapeutic strategies that build upon a knowledge of immunology. Students are also introduced to research techniques ranging from the use of knockout and transgenic animals to mathematical modelling. In addition, major topics of study include the immunogenetics of the molecules of recognition, cytokines and their regulation and lymphocyte biology. Issues arising from the public debate surrounding vaccination are an additional major focus of this course.

MICR3061
Viruses and Disease
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: MICR2011

The course explores the biology of viruses and their unique strategic properties that enable their persistence. We will examine virus structure, classification and replication strategies, epidemiology, molecular virology, laboratory diagnosis, and applications of viruses in biotechnology, including gene therapy. The pathogenesis of a number of human, animal and plant diseases is discussed in the context of virus-host interactions, as well as the persistence, transfer and control of virus infections in the community. A WebCT component of the course allows students to engage in on-line computer activities including virtual experiments, electron micrograph identification, group discussions and research for the final consultancy brief project. The final “consultancy brief” project provides students with an opportunity to gain experience in working in consultancy teams, utilise the WebCT platform for discussions to facilitate research on a current topic in virology for a “client”, and produce a professional report and a short seminar.

Notes:
Highly recommended: MICR2201

MICR3071
Environmental Microbiology
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: MICR2011

The field of Environmental Microbiology offers great potential for the development of new and innovative strategies and products for the management and protection of the environment. In this course, students learn of the vital role of microbes in marine, freshwater and terrestrial ecosystems by exploring the dynamic interactions that take place between microbial communities, the surroundings and higher organisms. A series of lectures and practical sessions cover key themes in contemporary environmental microbiology including sensing and adaptive responses of bacteria, biogeochemical cycling and microbial communities and interactions. Laboratory sessions allow students to gain experience in the experimental design and practical skills of research in the context of mini-research projects into modern environmental issues. Students will gain theoretical and practical experience in modern molecular techniques for the detection, phylogeny and tracking of microbial communities. A WebCT component of the course is used to support laboratory activities and to help students track their own progress and understanding of the course content. This course emphasises how the principles and techniques of Environmental Microbiology can be applied to a range of environmental problems and lead to the development of sustainable resources and commercial applications, as expanded in Environmental Biotechnology (BIOT3081).

Notes:
Highly recommended: MICR2011, BIOC2201, BIOS2021 or BIOS2621.

MICR3081
Bacteria and Disease
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Prerequisite/s: MICR2011

Bacteria and Disease aims to develop a high level understanding of bacterial pathogenesis, disease control and prevention. We examine in depth a select number of pathogens that portray the diverse characteristics seen in different pathogenic bacterial species. In conjunction with the lecture program, contemporary medical laboratory training is given through a simulated diagnostic unit. Development of communication skills constitutes part of this course.

Notes:
Highly recommended: MICR3041 or MICR3641.Half of the compulsory practical component of this course consists of seven practical classes run over four days during the mid-session break. In-session time, 6 practical classes will be run in weeks 10 through 14.

MICR3611
Microbial Physiology: A Molecular Approach
School of Biotechnology and Biomolecular Sciences
UOC6 HPW6
Excluded: MICR3011

The goal of this course is to combine theory introduced in previous courses with an understanding of how modern research endeavours are approached. This goal will be achieved by linking lectures and laboratories to contemporary research in molecular aspects of microbial physiology. Lectures will address molecular mechanisms involved in: determining microbial cell shape, cell division, sensing and responding to environmental signals, strategies for survival in extreme and stressful environments, and regulation of the synthesis of gene products. The lecture series also contains a module outlining the commercialisation of scientific discoveries. The practical program involves planning and implementing a research project in consultation with the course supervisor. Students will be challenged to identify relevant research problems, to generate feasible solutions to these problems, and to carry out critical peer review. The research training through lectures and practicals provides a solid basis for undertaking research in the Honours year.
MICR3621
Microbial Genetics (Advanced)
School of Biotechnology and Biomolecular Sciences
UOC6, HPW6
Excluded: BIOT3031, MICR3021.

Course available to Advanced Science students, or as an advanced option to non-Advanced Science students. This advanced course differs from MICR3021 Microbial Genetics by providing additional laboratory practicals, laboratory tutorials and laboratory assessment, a number of advanced level lectures (presently two), and different questions (both in content and number) in lecture based assessment. The course aims to extend fundamental concepts and principles of microbial genetics to an advanced level. The course is intended to be particularly useful for students interested in molecular biology/ genetics and those considering Molecular Biology and Microbiology majors. Main topics include genetics of bacteriophage, bacteria and yeasts, mutation and repair, plasmids, gene transfer, transposable genetic elements, gene cloning (genetic engineering) and two component regulatory systems. The practical component includes a range of contemporary microbial genetics experiments that complement lecture material. They may include experiments involving bacteria, archaea or yeast, involving transposon mutagenesis, gene library construction, gene complementation using recombinant plasmids, gene expression and regulation studies, UV mutagenesis and DNA repair, restriction/modification systems, promoter rescue experiments, and a variety of gene exchange techniques. The socioeconomic impact of microbial genetics is also discussed.

Note/s: Replaces BIOT3031

MICR3641
Immunology 1 (Advanced)
School of Biotechnology and Biomolecular Sciences
UOC6, HPW6
Prerequisite/s: BIIOC2101 or (BIIOC2181 and MICR2201);
Excluded: MICR3041, MICR3042.

This advanced course differs from MICR3041 Immunology 1 by providing advanced level laboratory practicals incorporating design and performance of experiments, advanced level problem-solving tutorials, and different questions (both in content and number) in examinations. There is also a significant component of self-directed learning, including internet-based tutorials and assignments. The course aims to extend fundamental concepts and principles of immunology to an advanced level, and to promote both theoretical and practical problem solving skills. The course will be particularly useful for students considering Immunology and Microbiology majors. Topics addressed include the multiple components of the immune response and how they interact; an introduction to the concepts behind the regulation of the immune response; and introduction to the applied and clinical aspects of immunology. There will be an emphasis on experimental design and performance as applied to solving immunological problems, and students will be expected to apply their basic knowledge to various research and “real-life” scenarios. An element of choice in assessment tasks enables students to pursue, in some depth, an area of immunology which particularly interests them. This course is available to Advanced Science and Medical Science students, and to students form other degree programs with a particular interest in Immunology and a Credit average in relevant courses.

Note/s: Maximum enrolment limited to 25 students.

MINE1010
Introduction to Mining Engineering
School of Mining Engineering
UOC6, HPW4

This course provides the basic introduction to the profession of mining engineering for all new students. Bearing this in mind, at the completion of this course a student should: appreciate the range of roles and responsibilities a mining engineer encounters in the workplace, and the broad range of career paths available; have a basic understanding of underground and open cut mining methods and an introductory appreciation of the importance and relevance of the science and other engineering disciplines to mining; be familiar with basic mine ventilation, explosions and blasting; understand and appreciate the importance of safety and risk management in the workplace; be confident in appreciating the history and current status of mining in Australia with a particular understanding of economic, social and environmental issues; be prepared for what you may encounter in your first industrial training period. Note: Site visits and industry lectures are a requirement of this course and may involve additional personal expense.

MINE1020
Mining Industry Practice
School of Mining Engineering
UOC6, HPW4

The course aims to build on the students earlier introduction by developing their understanding in areas associated with processes and practices in the minerals industry. The course covers: mineral economics and markets; environmental responsibilities, management and rehabilitation; communication needs within the industry and safety and common techniques used to convey information. These include computer packages, web pages, internet, email, role plays, presentation skills, technical drawing and graphical presentation, report writing, resume preparation, research methodologies. An overview of engineering drawing fundamentals risk management - MISHC Component 1: Introduction to risk management. Note: Site visits and industry lectures are a requirement of this course and may involve additional personal expense. Assumed Knowledge: MINE1010

MINE1300
Applied Mechanics
School of Mining Engineering
UOC6, HPW4

To provide students with an understanding of the basic engineering principles governing the statics, kinematics and dynamics of rigid bodies as applied to mechanical components. Statics: definition of force and moment, static equilibrium of rigid bodies, statical equivalence of systems of forces, centre of mass, centroid, centre of pressure, frictional forces. Kinematics: linear and angular motion, motion in a plane, relative displacement, velocity and acceleration. Dynamics: equations of motion for rigid body, work and energy, impulse and momentum, strain energy. Upon successful completion of the course, the student will be able to apply the principles of statics and dynamics outlined above to the analysis of systems of forces, the motion of mechanisms and the relation between forces applied to an object and the resulting motion.

MINE2010
Mining Project Development
School of Mining Engineering
UOC6, HPW4

The course covers the interaction between the core processes of the mining system. Exploration. Planning and the development of mines, infrastructure requirements; environmental assessment. Ore body parameters for surface and underground mines; stratified and non-stratified deposits; mine layout for surface and underground operations; underground access; introduction of techniques of rock breakage and support for coal and metal mines; processing of minerals; disposal of overburden and rejects rehabilitation. The course also includes an introduction to the principles of project management. On completion of the course the student should have an understanding of the different processes involved in a mining project providing the context for the various specialist courses offered in subsequent years of the mining engineering program. Note: Visits to mines and related undertakings are a requirement of this course. Assumed Knowledge: 1020

MICR4013
Microbiology Honours Full-Time
School of Biotechnology and Biomolecular Sciences
Enrolment requires school approval
UOC24

Advanced training in selected areas of Microbiology and Immunology: a formal component consisting of seminars, tutorials, use of information science in biology and written assignments, plus a supervised research program in a specific area of microbiology or immunology. Choice of research projects in laboratories that provide extensive training in one or more of the following: biotechnology, bioinformatics, molecular biology, cell biology, cell culture, immunogenetics, clinical microbiology, medical microbiology, microbial genetics, diagnostics, bioremediation, environmental microbiology, flow cytometry and confocal laser microscopy.
MINE2310 Structural Mechanics
School of Mining Engineering
UOC6  HPW4

To provide students with an understanding of the principles of analysis and design of structures and the concepts of stress and strain. Basic definition of force, displacement, stress, strain and elastic material properties. Forces and stresses in pin-jointed frames; bending moment, shear force, bending stresses; shearing stresses in beams; stress due to bending of beams; deflection of beams; buckling of struts; stress due to torsion of shafts; combined axial and bending stress; stress in thin walled pressure vessels. Shear stresses in beams. Continuous beams: Slope-deflection equations, stiffness matrix and nodal force vector, computer analysis. Definition of stress in three dimensions. Stress transformation in two dimensions; principal stresses in two dimensions. Mohr’s circle of stress. Definition of strain and strain-displacement relations in two dimensions; strain transformation and principal strains in two dimensions; isotropic elasticity.Upon successful completion of the course, the student will be able to calculate stresses and displacements of simple skeletal structures according to the theory generally applied in engineering practice, and will be aware of the circumstances in which that theory may not yield results of adequate accuracy. The student will also be able to carry out some analysis of the states of stress and strain in a material, for the cases of plane strain and plane stress. Assumed Knowledge: 1300

MINE2320 Mining Stress Analysis
School of Mining Engineering
UOC3  HPW3

To provide an understanding of stress analysis that can be applied to geotechnical engineering. Stress transformation and principal stresses in three dimensions; strain-displacement relations in three dimensions; strain transformation and principal strains in three dimensions; equations of equilibrium, boundary conditions; strain compatibility and the Airy stress function; stress in thick walled tubes under pressure; stresses around circular tunnel; anisotropic elasticity; the equivalent continuum; elastoplasticity. Upon successful completion of the course, the student will be able to analyse the states of stress and strain in a material for the general three-dimensional case, solve simple boundary value problems of plane strain for an elastic material, and idealise a mass of rock or soil as an anisotropic or elastoplastic material as required in the application of computational methods of stress analysis. Assumed Knowledge: MINE2310

MINE2500 Fluids & Thermodynamics
School of Mining Engineering
UOC6  HPW4

To give students the underpinning knowledge that is applied to the physical environments encountered in mines and the behaviour of liquids and gases in mining services and mineral processing. Fluid mechanics: properties, fluid statics, steady and unsteady flow, laminar and turbulent flow, Reynold’s number, acceleration of a fluid particle, continuity equation, steady flow for stream-tube, momentum equation, Bernoulli’s equation, measurement of flow, laminar flow between parallel plates, flow in pipelines, open channels, head losses at enlargements, contractions. The student will also be able to carry out some analysis of the states of stress and strain in a material, for the cases of plane strain and plane stress. Assumed Knowledge: MINE2310

MINE2700 Mining Data Analysis
School of Mining Engineering
UOC3  HPW2

Mining and minerals processing involves materials which are variable in composition and physical characteristics. Mining Engineers are required to make decisions and projections on the basis of incomplete information and experimentation. They need to manage a range of risks on the basis of probability and levels of confidence. These activities require the use of statistical tools developed to provide quantitative information from variable data with known levels of confidence. This subject provides the basis for designing investigations, presenting data, and forming statistically valid engineering conclusions. Precision, accuracy, approximation, bias. Samples and sampling. Averages (mean, median, model). Graphical data analysis. Arithmetic, logarithmic and exponential relationships. Correlation coefficients (r). Index numbers and time series. Review of probability, random variables and their properties. Quartiles and percentiles. The normal and binomial distribution. Applications to statistical quality control. Theory of statistical inference including confidence intervals and hypothesis testing with applications to one and two sample problems based on the t- and F-tests. Simple and multiple linear regression. Design and analysis of investigations, analysis of variance and introduction to factorial designs. Applications will be drawn primarily from the fields of mining and minerals engineering. Assumed Knowledge: MATH1231.

MINE3210 Resource Mining Control Systems
School of Mining Engineering
UOC3  HPW2

Resource mining control systems exist in order to ensure optimum exploitation of the in situ economic resource. This course covers the various elements necessary in designing appropriate control systems including estimation of the distribution and grade of economic minerals, and of the tonnes and grade of ore/coal as mined; alternate feedback mechanisms used in forecasting; grade control; sampling theory, calculation of fundamental sampling error, design of sampling protocols; the use of univariate and bivariate statistics in evaluating the quality of sample analytical data; geostatistical modelling including spatial statistics, continuity and variography; grade interpolation and block modelling; and, reconciliation and other feedback mechanisms. On completion of this course the student should be able to design or review the effectiveness of resource control systems used in a mining operation.

MINE3300 Mining Geomechanics
School of Mining Engineering
UOC6  HPW4

This course provides an understanding of the principles of soil and rock mechanics and the impacts of these disciplines in mining engineering practice. Soil Mechanics: nature of soil, groundwater flow, stability of slopes, tailings storage facilities, earth retaining structures, shallow foundations, consolidation, compaction, liquefaction. Rock Mechanics: principles applied to mining; stress, strain, deformational behaviour and stiffness; time dependency and stress in rock; rock properties, rock failure criteria, discontinuities in rock, rock mass classification, stresses around excavations, laboratory techniques and experiments. Assumed Knowledge: MINE2320

MINE3410 Coal Mining Systems
School of Mining Engineering
UOC6  HPW4

This course provides a comprehensive understanding of mining systems that are used in the underground and surface coal mining sector. History, significance and characteristics of the global and the Australian mining industry. Detailed descriptions and selection criteria for various coal mining methods including surface and underground techniques. Introductory mine planning and scheduling. Focus will be on the examination of the core risk of each mining method including safety, environmental and economic. Case studies are a feature of the course. On completion of this course the student should be able to demonstrate a sound working knowledge of mining techniques used in the Australian coal mining industry and be able to apply that knowledge to enable the safe, economic and responsible recovery of ores from any type of coal deposit. NB: Site visits and industry lectures are a requirement of the course and may involve additional expense.

MINE3420 Metal Mining Systems
School of Mining Engineering
UOC6  HPW4

This course provides a comprehensive understanding of mining systems that are used in metal mines and extractive industries. History, significance and characteristics of the global and the Australian mining
industry. Detailed descriptions and selection criteria for various metalliferous mining methods including surface and underground techniques. Introductory mine planning and scheduling. Focus will be on the examination of the core risk of each mining method including safety, environmental and economic. Case studies are a feature of the course. On completion of this course the student should be able to demonstrate a sound working knowledge of mining techniques used in the Australian mining industry and be able to apply that knowledge to enable the safe, economic and responsible recovery of ores from any type of orebody. NB: Site visits and industry lectures are a requirement of the course and may involve additional expense.

**MINE3500**
*Mine Workplace Environment*
School of Mining Engineering
UOC6 HPW5

**MINE3610**
*Excavation Engineering*
School of Mining Engineering
UOC6 HPW5

The course provides an understanding of the various rock breakage technologies used in mining and tunnelling excavations and the various systems for access, development and operations. The course covers: Rock drilling techniques (percussive, rotary and hydraulic), drilling equipment & drill pattern design for headings, stopes and benches in surface and underground mining operations; Types of explosives and their properties; Theories of rock fragmentation by blasting; Various initiation systems; Blasting accessories and their applications; Blast design in underground and surface operations; Blasting hazards and precautionary methods; Design to control blast-induced ground vibrations and airblasts; Special blasting techniques including presplitting, smooth wall blasting, trenching, cast blasting and paddock blasting; Environmental considerations, handling and storage of explosives; Principles of rock cutting; Performance of picks and free rolling cutters; Cutter tool interaction; Design of cutting arrays for machine mining and tunnelling; Cutting tool materials and effect of tool metallurgy on wear and fracture resistance; Methods of assessing rock cuttability; Site investigation and site preparation; Tunnelling methods; Conventional and mechanised excavation systems including drilling and blasting, roadheader, tunnel boring machines, pipe-jacking; Excavation in difficult ground; Shaft sinking methods (both vertical and inclined shafts), conventional and mechanical boring. On completion of the course the student should have an understanding of the various methods, issues and design principles associated with the main forms of rock breakage (drill & blast and mechanised mining) and the application of these processes to mining and tunnelling. Note: Site visits and industry lectures are a requirement of this course and may involve additional personal expense.

**MINE3620**
*Mine Infrastructure and Services*
School of Mining Engineering
UOC3 HPW3

The course provides an understanding of material handling systems used in mining and the various infrastructure needs to support mining operations including power reticulation and control systems. The course covers: Transport systems for minerals, waste rock, people and materials; Design of conveyor systems; Trackless methods of haulage - shovels, loaders and trucks; Track mounted methods; Mechanics of hoisting and design of winding systems; Winding cycle diagrams and power requirements for hoisting; Winding ropes; Safety aspects, maintenance of haulage and winding systems; Mine power requirements and reticulation; Electrical power distribution in surface and underground operations; Mine cables and switch gear; Explosion-protected electrical devices; Fault protection and risk analysis; Design and operational characteristics of electric, diesel, hydraulic and pneumatic motors and drive systems; Speed and torque control; Fluid characteristics; Mine control systems; Signalling and communications; Types and designs of control systems. On completion of the course the student should have an understanding of the design principles related to principles methods of bulk materials haulage used in and about mine sites and the services required to support a mining operation. Note: Site visits and industry lectures are a requirement of this course and may involve additional personal expense.

**MINE3710**
*Mine Economics and Business Systems*
School of Mining Engineering
UOC6 HPW4

The course provides an understanding of management principles and perspectives that can be applied in mining. The Mine Economics component of this course reflects the fact that mining is an economic activity. It will cover the principles and techniques of project evaluation and the construction of fully integrated and internally consistent technical/financial computer models of mining projects. The Business Systems component will cover issues vital to a mine manager’s successful running of a mining enterprise. On completion of the course the student should be able to demonstrate a sound working knowledge of: the time value of money; discounted cash flow evaluation techniques; technical/financial model examples and assignments; commodity markets, revenue estimation, risk analysis and project financing; company financial statements and underlying accounting principles; the feasibility study process; determination of economic cut-off grades and reserves estimation; legal aspects of managing a mine; and, theory and processes of management including human behaviour, industrial relations, contracts & contractors, financial statements & financial ratios, and management in an international context.

**MINE3800**
*Mineral Processing*
School of Mining Engineering
UOCC HPW3

Minerals Engineering is the link between mining and the utilisation of mineral resources, and is a key operation in the minerals industry. By a combination of breakage, sizing, separation, and dewatering processes, valuable components in mined material are concentrated into products suitable for subsequent hydrometallurgical or pyrometallurgical processing or direct utilisation. Minerals engineering processes are applied in the treatment of precious metal and gemstone deposits, base metal ores, heavy mineral beach sands, coal, and industrial minerals such as clays and aggregates. This introductory course provides a description of the principal unit processes and their applicability, and of the mineral properties and characteristics of mined materials on which they are based. On completion, you will be able to carry out calculations relating to the characterisation of mined materials, carry out materials balance calculations for simple mineral processing circuits, and nominate appropriate processes for their beneficiation. For many of those processes you will also be able to determine equipment sizes for specified duties. Topics include: Rocks, minerals and ores. Grades, recoveries. Materials balances. Liberation. Communion (crushing and grinding). Screening. Size classification. Dry and water-based separation processes. Dense media separation. Surface properties of liquids and solids. Froth flotation. Leaching processes. Screens and centrifuges. Flocculation and thickening. Filtration. Tailings disposal. A series of laboratory investigations forms part of the course.

**Assumed Knowledge:** PHYS1169, CHEM1817, MINE2500 (or equivalents)
MINE4210
Mine Planning
School of Mining Engineering
UOC6  HPW5

The course provides an understanding of the fundamentals of the mine planning process including design, scheduling and evaluation, and the tools available to assist in the planning process. The course covers: the mine planning process; strategic planning and tactical planning; mine design; economic cut-off grade and optimisation; resource estimation; scheduling; feasibility studies; economic modelling; equipment selection; mine systems selection; performance benchmarks for operations; project risks; environment and mine site rehabilitation planning; government regulations; and an introduction to computer tools to assist in mine planning. On completion of the course a student should have an understanding of the process to derive an optimum mine plan including an appreciation the various factors and constraints to be considered in the mine planning process; an ability to design a pit shell; construction of a production schedule and creation of an economic model to analyse a mining scenario. Assumed Knowledge: MINE3710, MINE3400

MINE4220
Coal Mine Design and Evaluation Project
School of Mining Engineering
Enrolment requires school approval
UOC9  HPW7

The course provides the means of integrating the technical, economic and management knowledge as presented within the mining engineering program whilst conforming to industry and community expectations. Technical design and project evaluation of a coal deposit is a core focus of the subject. The work draws on the subject content from previous courses and is undertaken in teams. The teams are required to prepare and present a feasibility study of a mining project. Teamwork, project management and presentations skills are assessed in addition to the technical analysis and content of the final feasibility study. Those students who successfully complete the course should achieve: a well rounded understanding of the theoretical principles and practical methodologies associated with mine planning and feasibility study projects; an ability to recognise and be capable of managing the inter-relationships and dependencies of the previously taught coursework subjects within the Mining Engineering undergraduate degree course; a demonstrated capability to work on a project within a self-managed team environment and to provide quality communication (written and oral) of progress and final outcomes; a basic working knowledge and ability to use state-of-the-art mine planning software (proficiency in the use of this specialised software is not expected - the software is a tool to assist you in your project). A minimum of 80 days of approved industrial training is required for successful completion of this course. Assumed Knowledge: MINE4210

MINE4230
Metal Mine Design and Evaluation Project
School of Mining Engineering
Enrolment requires school approval
UOC9  HPW7

This course provides the means of integrating the technical, economic and management knowledge as presented within the mining engineering program whilst conforming to industry and community expectations. Technical design and project evaluation of a metalliferous deposit is a core focus of the course. The work draws on the course content from previous courses and is undertaken in teams. The teams are required to prepare and present a feasibility study of a metal mining project. Teamwork, project management and presentations skills are assessed in addition to the technical analysis and content of the final feasibility study. Those students who successfully complete the course should achieve: a well rounded understanding of both the theoretical principles and practical methodologies associated with mine planning and feasibility study projects; an ability to recognise and be capable of managing the inter-relationships and dependencies of the previously taught coursework subjects within the Mining Engineering undergraduate degree course; a demonstrated capability to work on a project within a self-managed team environment and to provide quality communication (written and oral) of progress and final outcomes; a basic working knowledge and ability to use state-of-the-art mine planning software (proficiency in the use of this specialised software is not expected - the software is a tool to assist you in your project). A minimum of 80 days of approved industrial training is required for successful completion of this course. Assumed Knowledge: MINE4210

MINE4240
Mine Design and Evaluation Project
School of Mining Engineering
UOC9  HPW7

The course provides the means of integrating the technical, economic and management knowledge as presented within the mining engineering program whilst conforming to industry and community expectations. Technical design and project evaluation of a mineral/coal deposit is a core focus of the course. The work draws on the subject content from previous courses and is undertaken in teams. The teams are required to prepare and present a feasibility study of a mining project. Teamwork, project management and presentations skills are assessed in addition to the technical analysis and content of the final feasibility study. Those students who successfully complete the course should achieve: a well rounded understanding of both the theoretical principles and practical methodologies associated with mine planning and feasibility study projects; an ability to recognise and be capable of managing the inter-relationships and dependencies of the previously taught coursework subjects within the Mining Engineering undergraduate degree course; a demonstrated capability to work on a project within a self-managed team environment and to provide quality communication (written and oral) of progress and final outcomes; a basic working knowledge and ability to use state-of-the-art mine planning software (proficiency in the use of this specialised software is not expected - the software is a tool to assist you in your project). A minimum of 80 days of approved industrial training is required for successful completion of this course. Assumed Knowledge: MINE4210

MINE4300
Geotechnical Engineering
School of Mining Engineering
UOC6  HPW4

Course content includes the following components across the range of coal and metalliferous mining systems: core geotechnical risks inherent in major mining methods and risk management criteria; hazard recognition, mapping and ground control management plans; underground mining excavation design; rock mass classification; surface mining geomechanics; application of numerical stress analysis modelling; geotechnical instrumentation; pillar and roadway design; principles and practice in ground control; geotechnical role of mine fill systems; rock reinforcement principles and systems; subsidence engineering; roadway and pillar design; caving mechanics, outbursts, rockbursts, wind/airblasts. Case studies, group work and problem-based learning projects will form a major component of this course. Successful completion of this course will equip the student with the ability to recognise the major geotechnical applications and their significance within the mainstream mining systems and conditions. Students will also have a sound working knowledge of fundamental mechanisms and mining geotechnical principles within the context of practical mining applications. Note: Site visits and Industry lectures are a requirement of this course and may involve additional personal expense. Assumed Knowledge: MINE3300

MINE4310
Industry Applications
School of Mining Engineering
UOC6  HPW4

The course provides the student with an awareness of current issues facing the mining industry. A series of seminars are presented by invited speakers from within the university, other research establishments and selected industrial operations covering topics of special interest. The course also covers the processes associated with initiating a research project. Candidates are select a research topic related to mining, minerals engineering or other approved topic approved by the Head of School. It is strongly suggested that candidates evaluate various topic options in the period prior to commencement of the course, preferably during the period of Industrial Training. The research project may take the form of an engineering analysis, experimental investigation, theoretical study or design project. Candidates are required to carry out a literature review of the chosen research topic and submit a project plan. On completion of the course a student should be capable of preparing a report which critically evaluates social and technical issues. In addition, students will
develop the knowledge and skills to assimilate current understanding and knowledge on a topic and synthesise this into a written document in support of a major investigation that also includes a formal project plan and risk management plan.

MINE4420
Thesis A
School of Mining Engineering
UOC9 HPW4

The course provides the opportunity for the student to undertake a research project on a mining, minerals engineering or other topic approved by the Course Authority. Candidates are required to submit a dissertation or thesis, a conference paper and make a presentation. The work may take the form of an engineering analysis, experimental investigation, theoretical study or design project. On completion of the course a student will be capable of carrying out and report on a research project and prepare a draft document for submission to technical conference. Assumed Knowledge: MINE4410

MINE4430
Thesis B
School of Mining Engineering
Enrolment requires school approval
UOC6 HPW4

The course provides the opportunity for the student to undertake a research project on a mining, minerals engineering or other topic approved by the Course Authority. Candidates are required to submit a dissertation or thesis, a conference paper and make a presentation. The work may take the form of an engineering analysis, experimental investigation, theoretical study or design project. On completion of the course a student will be capable of carrying out and report on a research project and prepare a draft document for submission to technical conference. Assumed Knowledge: MINE4410

MINE4500
Sustainable Mining Practices
School of Mining Engineering
UOC3 HPW2

This course provides a comprehensive understanding of the impacts both positive and negative that mining may have on society. International perspective and treaties; sustainable development; corporate responsibility; legislative and regulatory framework; environmental impact assessment; environmental management systems, ISO 14001; corporate reporting; code for environmental management; environmental auditing; risk management; best practice environmental management techniques - exploration; waste disposal; tailings; quarries; water management; air pollution; rehabilitation and mine closure; social impact. On completion of this course the student should be able to demonstrate a sound working knowledge of the legal and political context; company-based initiatives in environmental management; and state of the art techniques in environmental management on mine sites. They should also be able to describe the major issues associated with the social/community impacts of mining in Australia and internationally.

MINE4700
Mining Law
School of Mining Engineering
UOC6 HPW5

The course provides an understanding of certain critical management issues of fundamental importance to the mining industry. The course is divided into two main parts. The first is concerned with advanced applications in risk management, in particular the human behavioural side of risk taking, making errors, accident occurrence, ergonomics, as well as application of risk management to some of the major hazards in the coal and metalliferous mining industry. The analysis of mining disasters is covered in the course. The second part of the course covers modern mining law including safety, environment and exploitation of mineral deposits. On completion of the course the student should be able to demonstrate a sound working knowledge of: the latest concepts in mining law; the fundamentals of risk management; the adoption of risk management tools in the regulatory environment; risk management in specific mining-related processes; environmental risk management; mining and other disasters and the application of risk management techniques; emergency preparedness in the mining industry.

MINE4800
Mine Simulation and Modelling
School of Mining Engineering
Enrolment requires school approval
UOC3 HPW3

The course aims to equip students with knowledge and skills in two dimensional (2D) and three dimensional (3D) computer simulation software used in the mining industry. Students undertake a critical analysis of simulation software and technology and discuss their findings through an online discussion group with the aim of identifying when, where and how to apply either 2D or 3D computer simulation technology to mine planning or mine operations. A model of a mining system is then designed, built and evaluated using simulation techniques. An informed report is written and presented that discusses the model developed in the course and the conclusions drawn on the application of 2D and 3D simulation to mining operations. On successful completion of the course students should be able to: identify and select appropriate computer simulation software tools that are available to the mining industry; design, develop and evaluate an interactive computer model of a mining system using 2D and 3D simulation software; visualise disparate mine data within a 3D model and appraise their role in ore deposit modelling; make an informed assessment of when it is appropriate to apply 2D and 3D modelling techniques to mining operations.

MINE4805
Mineral Process Technology
School of Mining Engineering
UOC3 HPW3

MINE4810
Computational Methods in Geomechanics
School of Mining Engineering
UOC3 HPW3

To provide students with an understanding of the theory and practice of finite difference, finite element and boundary element methods applied to problems of geomechanics. Boundary value problems, solution of Poisson’s equation by finite differences, variational principle for Poisson’s equation, stiffness matrix and equivalent nodal force vector, finite elements and matrix assembly, variational statement and finite elements for elasticity, isoparametric elements, modelling techniques, elastoplastic finite element analysis. Indirect and direct boundary element methods for Poisson’s equation, isoparametric boundary elements, direct method for elasticity. Upon successful completion of the course, the student will be able to carry out elastic and elastoplastic analyses of stress in rock, soil and other materials. The student will know for any given problem
what input data including material properties are required, which is the most suitable method of analysis, and how to obtain the best possible accuracy with available computing resources. Assumed Knowledge: MINE2320

MODL2000
Cross-Cultural Communication
School of Modern Language Studies
UOC6   HPW3
Prerequisite/s: 36 Level 1 units of credit in Arts, including at least 12 units of credit in a language course or equivalent

Examines the factors which determine our use of verbal and non-verbal language in social interaction in different cultures. Aims to identify and compare (1) factors which lead to communication breakdown; (2) expressions of formality, politeness and emotion in European and Asian languages. Designed to complement courses offered within the School of Modern Language Studies by developing learners’ cross-cultural communication skills. Lectures will be in English with language specific work included in tutorials. It will also be of interest to any students whose work involves dealing with people of different cultures.

MODL2002
Introduction to Professional Interpreting
School of Modern Language Studies
UOC6   HPW3
Prerequisite/s: 36 Level 1 units of credit in Arts, including at least 12 units of credit in a language course or equivalent

Aims at providing students with foundations of professional interpreting. Essentially a practical course, it deals with subject areas most common in Australia and international contexts. Involves tasks such as dialogue and consecutive interpreting and deals with thematic areas such as welfare, social security, medical and legal. Addresses crucial interpreting and linguistics problems relevant to interpreting; problems of vocabulary, equivalents, syntax, grammar and speech register. Includes the acquisition of interpreter’s practical skills and looks at socio cultural aspects of interpreting and professional ethics.

Note/s: High level of skills in English and a language other than English is a prerequisite. This course is available to students who have completed at least 12 units of credit or equivalent in French, German, Indonesian, Russian or Spanish and students who have completed JAPN3001 or KORE3001 or equivalent.

MSCI2001
Introductory Marine Science
School of Biological, Earth & Environ Sciences
UOC6   HPW4

This course introduces students to a cross-section of the theory and application of marine science and includes an opportunity to experience field research. Spanning the disciplines of geology, chemistry, physics, and biology, it provides a fundamental understanding of how oceans work. Topics covered are: the chemistry of seawater; air-sea interactions; ocean circulation; waves, tides, and coastlines; biological productivity and biological diversity.

MSCI2051
Coral Reef: Environment and Ecology
School of Biological, Earth & Environ Sciences
Enrolment requires school approval UOC3

Basic oceanographic processes and how these apply in the Great Barrier Reef, the characteristics of the waters of the Great Barrier Reef; the types and development of reefs, corals and reef communities, environmental damage to corals and exploitation of the reef, management by Great Barrier Reef Marine Park Authority. Laboratory classes include a study of the reef flat, its inhabitants, their distributions and interactions, the reef environment and its measurement.

MSCI3001
Physical Oceanography
School of Biological, Earth & Environ Sciences
UOC6   HPW4

An introduction to the physical properties and circulation of the oceans. The geography of the sea and properties of seawater. Understanding what controls coastal ocean currents, water mass formation, upwelling, storm surges and large-scale ocean flow. The dynamics of a range of ocean processes, including waves, tides, shelf currents and the El-Nino/Southern Oscillation. Oceanographic instrumentation and the design of ocean measuring programs.

Assumed Knowledge: Any 6 units of credit of Level 1 Mathematics.

Note/s: Laboratory and field work.

MSCI3052
Tropical and Subantarctic Marine Systems
School of Biological, Earth & Environ Sciences
Enrolment requires school approval UOC12   HPW168

Multidisciplinary study of the Australian tropical and New Zealand subantarctic seas, integrating physical, chemical and biological disciplines. Physical environment including meteorology and physical oceanography, ocean currents, nutrients and nutrient supply, waves, and tides. Climate change and impacts on physical processes. Larval ecology, including composition and abundance of principal larval types, primary and secondary productivity, and transport and settling processes. Benthic community structure and relationships and their dependence on the environment. Pelagic mega-fauna and their role in the ecology. Conservation and management of tropical and subantarctic marine parks, philosophy, implementation and monitoring. Natural and anthropogenic hazards. Management plans for multiple use areas. The course will include practical field projects on Lady Elliot Island, Queensland, Australia and at Dunedin, Fiordland and Kaikoura, New Zealand.

MSCI4003
Marine Science 4 Honours Full-Time
School of Biological, Earth & Environ Sciences
Enrolment requires school approval UOC24   HPW30

The General Education requirements are met within the Honours program by seminars, an essay and participation in discussion groups.

MSCI6200
Coastal Monitoring Techniques
School of Biological, Earth & Environ Sciences
UOC6   HPW5

Note/s: Field work of up to 4 days is a compulsory part of this course. Students will incur personal costs.

MSCI6300
Coastal Environmental Assessment
School of Biological, Earth & Environ Sciences
UOC6   HPW5

The interaction of water masses, bottom sediments and benthic organisms. Sampling techniques, analytical methodology and statistical data evaluation. Environmental assessment of Australia and overseas areas. An important aspect of this course is its practical approach: from data gathering, data evaluation and environmental assessment report writing. Practical work in the course involves each student as an active member of a project team.

Note/s: Field work of up to 3 days is a compulsory part of this course. Students will incur personal costs. Details will be provided in the first week of the course.

MTRN2201
Digital Logic for Mechatronics
School of Mechanical and Manufacturing Engineering
UOC3   HPW3

Excluded: MECH4201, MECH9201, MTRN9201

MTRN3202  
Microprocessor Control  
School of Mechanical and Manufacturing Engineering  
UOC3  HPW3  
Prerequisite/s: ELEC0807  
Excluded: MECH3202, MECH9202, MTRN9202  

Microprocessor architecture; introduction to microprocessor programming in assembler and high level languages and specific aspects of programming of a single board (chip) microcomputer; programming concepts. Instruction sets and addressing modes; instruction timing; interrupts. Laboratory complement to lectures based on the use of single board computers.

MTRN3212  
Principles of Control of Mechanical Systems  
School of Mechanical and Manufacturing Engineering  
UOC3  HPW3  
Prerequisite/s: MECH3211  

Introduction to modern systems analysis. Review of modelling, simulation and non-linear systems. Stability criteria; use of Root Locus and Bode for system analysis and modification. The matrix exponential and state space notation. The transfer matrix. Pole and state feedback, controllability and observability. Use of MATLAB as a simulation environment.

MTRN3530  
Computing Applications in Mechanical Systems  
School of Mechanical and Manufacturing Engineering  
UOC3  HPW3  
Prerequisite/s: MECH1500  
Excluded: MECH3530  

Development of programming skills in the C++ language for applications in Mechanical Engineering. Object Oriented Programming for developing software models of mechanical systems such as open kinematic chains. Development of user machine interfaces for instrumentation, interfacing and measurement. Interrupt service routines and introduction to real-time programming. Development of C++ routines for integration with MATLAB for data acquisition.

MTRN4221  
Industrial Robotics  
School of Mechanical and Manufacturing Engineering  
UOC3  HPW3  
Prerequisite/s: MECH3200 or MECH3204, MECH3212 or MTRN3212, MECH3530 or MTRN3530  

Automation types; introduction to industrial robots; end effectors. Robotic history, populations and main use; laboratory and PC environments. Kinematics of multidegree of freedom systems; simulation with open systems software. Safety standards; design of installations. Anatomy of an industrial robot as an intelligent machine; robot languages; work cell design. Projects.

MTRN9211  
Modelling and Control of Mechatronic Systems 1  
School of Mechanical and Manufacturing Engineering  
UOC6  HPW3  
Prerequisite/s: MTRN3212  

Development of modelling technique and design of controllers using digital computers, with special emphasis on digital control systems for motion control. Typical examples of mechatronic systems.

MTRN9222  
Artificially Intelligent Machines  
School of Mechanical and Manufacturing Engineering  
UOC6  HPW3  
Prerequisite/s: MTRN3530  

The principles of operation of machines into which limited powers of decision making have been delegated. The grouping of intelligent machines. Cognition; sensor technology; parsing; information representation; convolutions; software and hardware environments.
MUSC1401
Professional Practices A
School of Music and Music Education
UOC6  HPW5
Prerequisite/s: Enrolment in Program 3425 or 3427;
Excluded: MUSI1401

Includes private tuition and examination on major instrument, participation in university ensembles, plus classes in performance studies and electives in composing, jazz studies or musicology.

MUSC1402
Professional Practices B
School of Music and Music Education
UOC6  HPW5
Prerequisite/s: MUSC1401;
Excluded: MUSI1402

Continuation of MUSC1401.

MUSC1501
Music Performance 1A
School of Music and Music Education
UOC6  HPW5
Prerequisite/s: Enrolment in Program 3426;
Excluded: MUSI1501

Includes private tuition on major instrument and participation in university ensembles, plus tutorials on minor studies instruments (guitar and percussion).

MUSC1502
Music Performance 1B
School of Music and Music Education
UOC6  HPW5
Prerequisite/s: MUSC1501 or MUSI1501;
Excluded: MUSI1502

Continuation of MUSC1501.

MUSC1601
Introduction to Music Education
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: Enrolment in Program 3426;
Excluded: MUSI1600, MUSI1801

Covers basic issues in music education, theory and practice and develops a range of skills, knowledge and understandings associated with classroom teaching at the K-6 level. Also introduces basic teaching skills with opportunities to observe, critically evaluate and practise a variety of music lessons in varying formats. Deals with issues related to the responsibility of a music teacher in relation to the expectations of pupils, parents and employers.

Note/s: Includes three weeks of practice teaching in primary schools.

MUSC2101
Music of the Baroque
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC1302 or MUSC1312 or MUSC2111;
Excluded: MUSI1142

A detailed study of 17th and 18th century baroque music. Includes an historical introduction to the issues of performance practice.

MUSC2111
Introduction to Musicology
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC1001, MUSC1312;
Excluded: MUSI1003, MUSI1141, MUSI2311

Designed as an introduction to a wide range of musical styles, techniques and circumstances as well as methods of study in music. Enables students to acquire insight into compositional processes and the place music occupies in different societies. Includes study of early 20th music and ethnomusicology.

MUSC2132
Music of the late Middle Ages and Renaissance
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC1302 or MUSC2111 or MUSI1142;
Excluded: MUSI3141

An introduction to Medieval and Renaissance music in its social, historical and cultural contexts.

MUSC2201
Music of Aboriginal Australians
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC1302 or MUSC1312 or MUSC2111 or MUSI1142;
Excluded: MUSI2141, AUST2026

A study of traditional and contemporary Aboriginal music in its social, historical and cultural contexts.

MUSC2301
Musicianship B
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC2301 or MUSC1242;
Excluded: MUSI2241

Extends MUSC1302 by furthering students’ knowledge of harmonic vocabulary through the analysis of both diatonic and chromatic harmony and the observation of harmonic and melodic practices in musical composition. Also includes further development of aural skills and a keyboard tutorial which covers score reading and figured bass and completion of music literature tests.

MUSC2302
Musicianship C
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC2301 or MUSI2241;
Excluded: MUSI2242

Extends MUSC2301 by furthering students’ knowledge of chromatic harmony, analysis and counterpoint. Includes further development of aural, sight-reading and keyboard skills such as improvising an accompaniment and realising figured bass, plus the completion of music literature tests.

MUSC2311
BA Musicianship B
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC1312 or MUSI1242

Extends MUSC1312 by furthering students’ knowledge of harmonic vocabulary through the analysis of both diatonic and chromatic harmony and the observation of harmonic and melodic practices in musical composition. Also includes further development of aural skills, completion of music literature tests and one hour participation in a performance ensemble.

MUSC2312
BA Musicianship C
School of Music and Music Education
UOC6  HPW3
Prerequisite/s: MUSC2311 or MUSI2241;
Excluded: MUSI2242, MUSI3312

Extends MUSC2311 by furthering students’ knowledge of chromatic harmony, analysis and counterpoint. Includes further development of aural, sight-reading and keyboard skills such as improvising an accompaniment and realising figured bass, plus the completion of music literature tests.

Note/s: Includes one hour of performance ensemble participation.
MUSC2401
Professional Practices C
School of Music and Music Education
UOC6: HPW5
Prerequisite/s: MUSC1101, MUSC1302, MUSC1402 or MUSI1142, MUSI1242, MUSI1402;
Excluded: MUSI2401

Includes private tuition and examination on major instrument, participation in university ensembles, plus classes in performance studies and electives in composing, jazz studies or musicology.

MUSC2402
Professional Practices D
School of Music and Music Education
UOC6: HPW5
Prerequisite/s: MUSC2401 or MUSI2401;
Excluded: MUSI2402

Continuation of MUSC2401.

MUSC2501
Music Performance 2A
School of Music and Music Education
UOC6: HPW5
Excluded: MUSI2501

Includes private tuition on major instrument and participation in university ensembles, plus tutorials on minor studies instruments (brass or woodwind).

MUSC2502
Music Performance 2B
School of Music and Music Education
UOC6: HPW5
Prerequisite/s: MUSI2501

Continuation of MUSC2501.

MUSC2601
Introduction to Secondary Music Education
School of Music and Music Education
UOC6: HPW3
Prerequisite/s: MUSC1601 or MUSI1802;
Excluded: MUSI1801, MUSI2801, MUSI2802

Emphasises high school general classroom music methods for years 7 and 8, by developing strategies for listening, aural and literacy development, music appreciation, performance and creativity (improvisation and composition). Special attention is given to the new curriculum guide and includes techniques for introducing popular music, jazz, and music from other cultures, and evaluating selected documents concerned with professional ethics, and the theory and practice of classroom management. Includes three week practice teaching in a secondary school.

MUSC3101
Professional and Ethical Practices in Music
School of Music and Music Education
UOC6: HPW3
Prerequisite/s: MUSC2302 or MUSC2312 or MUSI2242;
Excluded: MUSI3111

Requires active participation in a seminar devoted to developing an understanding of research methodologies in music across a range of topics. Individually chosen topics provide the subject areas for the class and these lead to detailed discussions of professional and ethical issues.

MUSC3112
Seminar in Music
School of Music and Music Education
UOC6: HPW3
Prerequisite/s: MUSC3101;
Excluded: MUSI3112

Continuation of MUSC3101, a seminar devoted to exploring the processes in research on music through discussion, and the development of individually chosen research projects on a wide range of topics in musicology and ethnomusicology. The seminar culminates in the preparation and submission of a formal research project on an approved topic.

MUSC3131
Jazz and Popular Music
School of Music and Music Education
UOC6: HPW3
Prerequisite/s: MUSC1302 or MUSC2111 or MUSI1142;
Excluded: MUSI3121

Study of the elements that have shaped and enriched 20th century jazz and popular musics through a chronological study of musical trends within the broad category of jazz. Applies methods drawn from ethnomusicology and cultural studies in order to develop an understanding of the social ecology of each genre studied.

MUSC3302
Orchestration and Arrangement
School of Music and Music Education
UOC6: HPW3
Excluded: MUSI1211, MUSI2122

Develops skills in arranging, orchestration and preparation of music scores through the study of instrumental techniques, a historically wide range of orchestral scores, listening and practical exercises.

MUSC3311
Electronic Music
School of Music and Music Education
UOC6: HPW3
Prerequisite/s: MUSC2302 or MUSC2312 or MUSI2242;
Excluded: MUSI2141, MUSI2142

Examines psychoacoustics and historical foundations of electronic music with practical experiences on a range of software and hardware. Includes use of internet resources.

MUSC3331
Advanced Electronic Music
School of Music and Music Education
UOC6: HPW3
Prerequisite/s: MUSC3311;
Excluded: MUSI3141, MUSI3142

Continuation of MUSC3311 with specialisation in selected techniques, sound recording, studio work, software and hardware, plus methods of using technology in music composition.

MUSC3401
Advanced Professional Practices A
School of Music and Music Education
UOC6: HPW5
Prerequisite/s: MUSC2402 or MUSI2402;
Excluded: MUSI3401

Includes private tuition and examination on major instrument, participation in university ensembles, plus classes in performance studies and electives in composing, jazz studies or musicology.

MUSC3402
Advanced Professional Practices B
School of Music and Music Education
UOC6: HPW5
Prerequisite/s: (MUSC2302, MUSC3401) or (MUSI2242, MUSI3401);
Excluded: MUSI3402

Continuation of MUSC3401, but also includes preparation for public recital, and opportunities for further specialisation.

MUSC3501
Advanced Music Performance 3A
School of Music and Music Education
UOC6: HPW5
Prerequisite/s: MUSC2502 or MUSC2502;
Excluded: MUSI3501
Includes private tuition on major instrument and participation in university ensembles, plus lectures and masterclasses on performance practice, pedagogy and conducting, to refine individual performance skills, and to develop competencies for teaching performance at all levels of the school curriculum.

**MUSC3502**  
Advanced Music Performance 3B  
School of Music and Music Education  
UOC6 HPW5  
Prerequisite/s: MUSC3501 or MUSI3501; Excluded: MUSC3502  
Continuation of MUSC3501, plus masterclasses on performance practice and preparation for recital at end of semester.

**MUSC3601**  
Specialist Studies in Music Education  
School of Music and Music Education  
UOC6 HPW4  
Prerequisite/s: MUSC2601 or MUSI1802; Excluded: MUSI2801, MUSI2802, MUSI3801  
Focuses on the elective secondary curriculum and teaching strategies involved in effectively meeting syllabus requirements. Content includes performance, aural perception, literacy development, creativity (improvisation and composition), listening, and a critical evaluation of selected documents concerned with educational policy and practice. Extends previous work by developing effective strategies for classroom management and learning how to cater for the needs of individual learners. Includes three weeks of practice teaching in a secondary school.

**MUSC3602**  
Creativity and Special Topics in Music Education  
School of Music and Music Education  
UOC6 HPW4  
Prerequisite/s: MUSC3601; Excluded: MUSI3801  
Extends work covered by providing specialist study in one or more of the following areas: HSC preparation, creativity (improvisation and composition), aesthetics, philosophy of music education, music technology, curriculum development and planning for the needs of special learners.

**MUSC3612**  
Principles and Processes of Music Education  
School of Music and Music Education  
UOC6 HPW3  
Prerequisite/s: MUSC3601 or MUSI2802; Excluded: MUSI3812  
Examines the scope of recent research in music education and surveys the field of music psychology and sociology, and the methodological approaches to and sources for further investigation specifically related to music teaching and learning. Focuses on the application of these areas in the Australian environment, and examines theories and current research concerned with creativity, musical ability and current issues in studies of music perception and cognition. Aims to expose students to a variety of ideas and trends which confirm or contradict established norms and attitudes on effective music teaching.  
**Note/s:** At the discretion of the Program Coordinator, this course can be used to replace one Education elective.

**MUSC4000**  
Bachelor of Music Honours Full-Time  
School of Music and Music Education  
Enrolment requires school approval UOC24  
Prerequisite/s: Completion of the requirements for the Pass degree with an average of at least Credit  
Appropriate seminars in musicology, further development of performance skills and musical leadership, together with a thesis of 15,000 - 20,000 words on a musico logical topic, an extended recital or other approved special project.  
**Note/s:** For BMus and BMusBA students only.

**MUSC4001**  
Music Honours (BA)  
School of Music and Music Education  
Enrolment requires school approval UOC24  
Prerequisite/s: 54 units of credit in Music courses, including MUSC3101 and MUSC3112, with an average of at least Credit  
Appropriate seminars in musicology, further development of performance skills and musical leadership, music literature study, together with a thesis of 15,000 - 20,000 words on a musico logical topic.

**MUSC4002**  
Music Education Honours  
School of Music and Music Education  
Enrolment requires school approval UOC24  
Prerequisite/s: Completion of the requirements for the Pass degree with an average of at least Credit  
Seminars on research methods in music education culminating in a thesis of 15,000-20,000 words on a topic in music education or other approved special project and further study of music.

**MUSC4601**  
Advanced Studies in Music Education  
School of Music and Music Education  
UOC6 HPW3  
Excluded: MUSI4801  
Develops competencies for teaching music in years 11 and 12 and covers requirements for the Higher School Certificate examinations in music. Lesson styles are examined and methods for designing programs are also considered. An additional component deals with current developments in educational policy and practice plus issues concerned with the professional responsibilities of teachers. Administrative arrangements for the practicum in Session 2 and professional ethics, legal responsibilities of teachers, and programming which addresses Objective 3 of the General Education program.

**MUSC4602**  
Music Teaching Experience  
School of Music and Music Education  
UOC6 HPW3  
Prerequisite/s: MUSC4601, MUSC3502 or MUSI3502; Excluded: MUSI4802, MUSI4812  
Consists of 35 days experience in a secondary school which allows the observation of lessons conducted by experienced teachers and the planning and delivery of lessons, under the direction of supervising teachers, plus development of knowledge concerned with organisational aspects of a high school and activities other than those related to subject delivery, especially school policies and general supervision of school students. Reflective sessions at the completion of the in-school experience allow students to share ideas and to discuss strategies for improving their music teaching.

**MUSC4650**  
Conducting  
School of Music and Music Education  
UOC6 HPW4  
Prerequisite/s: MUSC3402 or MUSC3502; Corequisite/s: MUSC4602; Excluded: MUSI4501  
Develops proficient skills and confidence in conducting and managing a variety of school ensemble situations including small vocal groups and the larger instrumental ensembles.

**NANO1001**  
Nanotechnology 1  
School of Materials Science and Engineering  
UOC3 HPW3  
This course will provide students with an overall view of nanotechnology. The course is composed of self-learning modules and a weekly seminar. The seminars will primarily be given by outside speakers discussing different aspects of Nanotechnology including device manufacture, the
Nanotech industry, intellectual property and establishing start-up companies. The major component of the topic will be two projects to study the connection between the underlying nanoscience of various nanotechnology devices. Students, in small groups, will undertake studies chosen from each of the major themes of biodvices and nanostructures. Examples from major nanotechnology initiatives will include quantum computing, DNA chips, nanogears, quantum dots, DNA sequencing, nanoparticles, ion-channel biosensors and other examples. Students will prepare written reports and oral presentations of their material.

**Note/s:** Available only to students enrolled in program 3617.

**NANO2002**
**Nanotechnology 2**
School of Materials Science and Engineering
UOC3 HPW3

This course will concentrate on specific issues relating to the production of nanostructures, nanostructured materials and nanoscale devices. The production of nanostructures will deal with methods for synthesizing and assembling nanostructures, the concept of self-assembly and methods of characterizing their composition and structure. The second and third themes will use contemporary examples to illustrate the unique mechanical and electronic properties of nanoscale materials and devices and their application to, for example, quantum computing.

**Note/s:** Available only to students enrolled in program 3617

**NANO3003**
**Nanotechnology 3**
School of Materials Science and Engineering
UOC3 HPW3

This course will concentrate on the evolution of nanodevices from concept to commercialisation. Specific issues dealt with will include approaches to fabrication, engineering or bioengineering aspects, putting the whole device together, commercialization aspects, protection of intellectual property and the raising venture capital.

**NANO3410**
**Chemistry of Surfaces**
School of Chemistry
UOC3 HPW3

**Prerequisite/s:** NANO2002 or approval from the course authority

Vacuum, surface analysis techniques (XPS etc), STM, AFM, surface spectroscopy and solution surface chemistry (micelles, self-assembly, colloids and nanoparticles etc).

**NANO3420**
**Fabrication of Nanostructured Devices**
School of Materials Science and Engineering
UOC3 HPW2

Material processes used in the fabrication of electronic devices such as single crystal growth, lithography, etching and thin film growth. Methods of device packaging. Sources of failure and methods of fault diagnosis in devices.

**NANO3440**
**Biosensors and Biodevices for Nanotechnology**
School of Chemistry
UOC3 HPW3

**Prerequisite/s:** NANO2002 or approval from the course authority

Principles of transduction, immobilisation of biomolecules, affinity sensors, catalytic sensors, practical realities of their construction, electrochemical sensors, evanscent wave and other optical sensors.

**NANO4004**
**Nanotechnology Project**
School of Materials Science and Engineering
Enrolment requires school approval
UOC36 HPW18

This course will require a major piece of research undertaken by students in the fourth year of the Nanotechnology program 3617. A range of interdisciplinary projects will be offered by contributing schools, Chemistry, Physics, Material Science and Biochemistry, enabling students to carry out experimental investigations in an area of nanotechnology.

**Note/s:** Enrolment in and completion of Stages 1-3 of program 3617 Nanotechnology is required. This course will not run in 2003.

**NAVL3100**
**Principles of Ship Design**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

**Prerequisite/s:** NAVL3601 or NAVL3603

**NAVL3110**
**Ship Practice**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

**Corequisite/s:** NAVL3601 or NAVL3603

**NAVL3400**
**Ship Structures 1**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

**Prerequisite/s:** MATH2009 or MATH2029, MATS9520, MECH2412, MECH3400

**NAVL3603**
**Ship Hydromechanics A**
School of Mechanical and Manufacturing Engineering
UOC6 HPW6

**Prerequisite/s:** MATH2029, MECH2300, MECH2612

**NAVL3604**
**Ship Hydromechanics B**
School of Mechanical and Manufacturing Engineering
UOC3 HPW3

**Prerequisite/s:** NAVL3603

**Corequisite/s:** MECH3330

Propeller and waterjet terminology, theories of action, interaction with the hull, cavitation, propeller, waterjet and engine data, practical details and drawing, strength, estimation of polar moment of inertia and entrained water.

NAVL4102 Design of Yachts
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL3100, NAVL3604 or NAVL4402
Corequisite/s: NAVL4101

NAVL4111 Ship Design Project A
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL3700
Corequisite/s: NAVL4101, NAVL4710

Each student is required to perform the following design tasks for a vessel of their choice and submit the results: 1. Rationale, specification, weights, inboard profile. 2. Power, capacities, freeboard, trim, stability, stern gear. 3. Sectional area curve, lines plan, preliminary midship section.

NAVL4112 Ship Design Project B
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL4111
Corequisite/s: NAVL4102, NAVL4720

Each student is required to perform the following design tasks for a vessel of their choice and submit the results: 4. Hydrostatics, stability and subdivision analysis. 5. Powering, propeller, systems - schematic drawing, detailed capacities. 6. Section modulus calculation, bulkhead, midship section, module concept. 7. Final weights, capacity drawing, operational data and evaluation. 8. Specification.

NAVL4401 Ship Structures 2A
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL3400, MEC3400
Excluded: AERO4401, AER9415, MEC9410

Application of MSC/PATRAN and MSC/NASTRAN to structural analysis. Structural modelling, mesh generation, resources required for solution, evaluation of results. Applications to analysis of practical structures including structural vibrations and prediction of stiffness and ultimate strength.

NAVL4402 Ship Structures 2B
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL4401

NAVL4710 Ship Standards
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL3602 or NAVL3604
Corequisite/s: NAVL4401

NAVL4720 Marine Engineering
School of Mechanical and Manufacturing Engineering
UOC3 HPW3
Prerequisite/s: NAVL3602 or NAVL3604

OBST5001 Obstetrics and Gynaecology
School of Women's & Children's Health
UOC12
Prerequisite/s: MDSG4001

Objectives: To be able to take a history and perform a physical examination relevant to the female reproductive system; to recognise common disorders of the female reproductive system; to manage common medical gynaecological disorders likely to be encountered in primary care practice; to provide antenatal and postnatal care for normal women and to recognise deviations from normal; to be able to provide emergency care when indicated and to know the indications for referral. The program consists of tutorials in core subjects, clinical, physiological and pathological conferences and simulated patient management problem exercises. Students are taught in small tutorial groups. Supervised clinical experience is gained in outpatient clinics, inpatient services and the labour wards of The Royal Hospital for Women, St George, Bankstown, and Liverpool hospitals. Some undergraduates currently spend six months in the hospitals in Wagga Wagga and Albury in a combined Paediatric/Obstetrics & Gynaecology term. From 2004, hospitals in Coffs Harbour & Port Macquarie will provide teaching for students who will spend the whole nine week term at the School of Rural Health sites. Neonatal paediatric experience is integrated with the teaching of Obstetrics and Gynaecology. Full details are described in a booklet published by the School. Assessment: Continuing evaluation of clinical work, a multiple choice examination and an objective, structured clinical examination in the last week of term.

OPTM1105 Optics and the Eye 1
School of Optometry and Vision Science
UOC8 HPW8

Objectives: Understanding of physical and geometrical optics, the eye and ametropia, the measurement of optical radiation preliminary to ocular hazard assessment, colour measurement and specification and lighting design. Brief Curriculum: Geometrical optics; rectilinear propagation of light, reflection and refraction at plane and spherical surfaces, prisms, thin lenses, simple magnifiers, compound magnifiers, stops, pupils and windows. Physical optics: Wave nature of light, superposition of waves, interference, diffraction, polarisation. The eye and ametropia: Models of the eye, spherical refractive errors of the eye and their correction
with lenses. Measurement of light and colour: Sources of optical radiation, sunlight and daylight, detectors, the eye as a detector, principles and practice of photometry, principles and practice of colour measurement and specification, uniform colour scales, colour rendering, metamerism, colour atlases and order systems.

**OPTM1201**
**Ocular and Visual Science 1**
School of Optometry and Vision Science
UOC4 HPW4

**Objective:** An understanding of the anatomy and physiology of the eye (particularly the anterior eye), the adnexa and visual system, and detailed information on some aspects of vision that form the foundation of Clinical Optometry. These subjects are studies in greater depth in later years.

**Brief Curriculum:** Introduction to the gross anatomy of the eye, orbit and adnexa; the microscopic anatomy of the cornea, lens, uvea, eyelids, lacrimal apparatus and retina. The physiology of the cornea, of tear and aqueous production, along with the physiology of the crystalline lens, are also covered.

**OPTM1202**
**Clinical Optometry 1**
School of Optometry and Vision Science
UOC6 HPW6

**Objective:** Understanding of basic microbiology applied to ophthalmic lenses, special populations.

**Prerequisite:** OPTM1105, BIOS1401

**Corequisite:** OPTM1201

**OPTM1205**
**Optics and the Eye 2**
School of Optometry and Vision Science
UOC4 HPW4

**Objective:** An understanding of the anatomy and physiology of the eye, orbit and adnexa; the microscopic anatomy of the cornea, lens, uvea, eyelids, lacrimal apparatus and retina. The physiology of the cornea, of tear and aqueous production, along with the physiology of the crystalline lens, are also covered.

**Brief Curriculum:** Introduction to the gross anatomy of the eye, orbit and adnexa; the microscopic anatomy of the cornea, lens, uvea, eyelids, lacrimal apparatus and retina. The physiology of the cornea, of tear and aqueous production, along with the physiology of the crystalline lens, are also covered.

**OPTM1207**
**Foundations of Hygiene & Infectious Disease in Optometric Practice**
School of Optometry and Vision Science
UOC4 HPW4

**Objective:** Understanding of the anatomy and physiology of the eye, orbit and adnexa; the microscopic anatomy of the cornea, lens, uvea, eyelids, lacrimal apparatus and retina. The physiology of the cornea, of tear and aqueous production, along with the physiology of the crystalline lens, are also covered.

**Brief Curriculum:** Introduction to the gross anatomy of the eye, orbit and adnexa; the microscopic anatomy of the cornea, lens, uvea, eyelids, lacrimal apparatus and retina. The physiology of the cornea, of tear and aqueous production, along with the physiology of the crystalline lens, are also covered.

**OPTM2102**
**Clinical Optometry 2A**
School of Optometry and Vision Science
UOC6 HPW6

**Objective:** Understanding of the optics of ophthalmic instruments and clinical applications. Understanding the optics of the devices and components of refraction. Understanding the subsidiary effects and the basic design principles of ophthalmic lenses. Understanding the aberrations of the human eye. Brief Curricula: Ophthalmic instruments and clinical applications: direct ophthalmoscope, indirect ophthalmoscope, retinoscope, keratometry, the radiodrome, tonometry, pachymetry, projectors, bio-microscopy, stereo-microscopy, low vision aids devices and components of refraction: optometers (subjective/objective), Stokes lens, Scheiner disc. astigmatic decomposition, photorefraction and remote refraction. Ophthalmic lenses: near astigmatism, horizontal and vertical prismatic effects, anisometropia, abberations, (oblique astigmatism, curvature error, distortion & chromatic aberration), best form lenses, and design of contact lenses. Ablations of the eye; measurement and correction of the monochromatic wave abberations of the eye.

**Prerequisite:** OPTM1201, OPTM1202

**Corequisite:** OPTM1201

**OPTM2105**
**Optics and the Eye 3**
School of Optometry and Vision Science
UOC3 HPW3

**Objective:** Understanding of the optics of ophthalmic instruments and clinical applications. Understanding the optics of the devices and components of refraction. Understanding the subsidiary effects and the basic design principles of ophthalmic lenses. Understanding the aberrations of the human eye. Brief Curricula: Ophthalmic instruments and clinical applications: direct ophthalmoscope, indirect ophthalmoscope, retinoscope, keratometry, the radiodrome, tonometry, pachymetry, projectors, bio-microscopy, stereo-microscopy, low vision aids devices and components of refraction: optometers (subjective/objective), Stokes lens, Scheiner disc. astigmatic decomposition, photorefraction and remote refraction. Ophthalmic lenses: near astigmatism, horizontal and vertical prismatic effects, anisometropia, abberations, (oblique astigmatism, curvature error, distortion & chromatic aberration), best form lenses, and design of contact lenses. Ablations of the eye; measurement and correction of the monochromatic wave abberations of the eye.

**Prerequisite:** OPTM2101, OPTM2102

**Corequisite:** PHPH2221.

**Objective:** To develop an understanding of the structure and function of the human visual system, in adults and during development. Brief Curricula: The structure and function of the visual pathway from the optic nerve to visual areas of the cerebral cortex. Basic embryology, and the normal and abnormal development of the visual pathway, from eye to brain. The assessment of visual function using electrophysiological techniques. The assessment of visual function in non-verbal patients, using psychophysical techniques. The neural basis of binocular vision: the way in which the human visual system assesses relative depth of objects within the visual scene.

**OPTM2201**
**Ocular and Visual Science 2B**
School of Optometry and Vision Science
UOC6 HPW6

**Objective:** An understanding of basic microbiology applied to ophthalmic lenses, special populations.

**Prerequisite:** OPTM2101, OPTM2102

**Corequisite:** PHPH2221.

**Objective:** To develop an understanding of the structure and function of the human visual system, in adults and during development. Brief Curricula: The structure and function of the visual pathway from the optic nerve to visual areas of the cerebral cortex. Basic embryology, and the normal and abnormal development of the visual pathway, from eye to brain. The assessment of visual function using electrophysiological techniques. The assessment of visual function in non-verbal patients, using psychophysical techniques. The neural basis of binocular vision: the way in which the human visual system assesses relative depth of objects within the visual scene.

**OPTM2202**
**Clinical Optometry 2B**
School of Optometry and Vision Science
UOC6 HPW6

**Objective:** To build on OPTM2102 in equipping the student to be professional in manner with good communication and technical skills and able to carry out a logically sequenced primary care evaluation of the health of the ocular and visual system, refractive status and binocular
OPTM2206
Pathology for Optometry
School of Optometry and Vision Science
UOC3  HPW3
Prerequisite/s:  OPTM1207, OPTM2102
Corequisite/s:  OPTM3108, OPTM3204, PHPH3302.

Objectives: A basic understanding of general and systemic pathophysiology. Brief Curriculum: Cell injury and adaptation, pathogenesis of cell injury, inflammation, edema, thrombosis, embolism, arteriosclerosis, neoplasia, environmental disease, diabetes, hypertension, myocardial infarction, intracranial pathology, cerebral disease. Practical examples of ocular disease shall be discussed.

OPTM3102
Clinical Optometry 3A
School of Optometry and Vision Science
UOC12  HPW12
Prerequisite/s:  OPTM2201, OPTM2202, OPTM2206; OPTM3108, PSYC3516.
Corequisite/s:  OPTM2202, OPTM3102.

Objectives: To produce a student with professional attitude and good communication skills who has the ability to integrate scientific and clinical aspects of optometry and make well-reasoned decisions while undertaking patient care at the UNSW Optometry Clinic under supervision of a registered optometrist. To advance student knowledge in and to stimulate students' interest in optometric subspecialties such as low vision, binocular vision and contact lenses. Brief Curriculum: Lectures, tutorials, and practical classes will deal with: contact lenses - soft and rigid contact lens design and manufacture, fitting techniques and evaluation, care and maintenance of contact lenses; paediatric optometry - child development and role of vision, behavioural optometry, visual perceptual dysfunction and learning difficulties, contact lenses and special needs children; dispensing - practical aspects; advanced ocular assessment - colour vision, visual fields and other techniques of assessing ocular and visual function.

OPTM3108
Ocular Disease
School of Optometry and Vision Science
UOC6  HPW6
Prerequisite/s:  OPTM2202, OPTM2206
Corequisite/s:  OPTM3108, OPTM3109.

Objectives: to introduce the diagnosis and optometric management of diseases of the anterior and the posterior eye and visual system. Brief curriculum: diseases of the lids, conjunctiva, lacrimal system, sclera, cornea, vitreous body, crystalline lens, uvea, retina, optic nerve, pupils, cranial nerves and visual pathway. Glaucoma, dipllopia, effects of systemic disease and ocular trauma will also be discussed.

OPTM3203
Clinical Optometry 3B
School of Optometry and Vision Science
UOC3  HPW3
Prerequisite/s:  OPTM3102, OPTM3108, PSYC3516; OPTM3203, PHPH3302.
Corequisite/s:  OPTM3203, OPTM3209, PHPH3302.

Objectives: To produce a student with professional attitude and good communication skills who has the ability to integrate scientific and clinical aspects of optometry and make well-reasoned decisions while undertaking patient care at the UNSW Optometry Clinic under supervision of a registered optometrist. To advance student knowledge in case analysis by integrating all aspects of optometry. Brief Curriculum: Students will examine patients in the Optometry Clinic and satellite clinics and participate in tutorials.

OPTM3204
Clinical Optometry 3C
School of Optometry and Vision Science
UOC8  HPW8
Prerequisite/s:  OPTM3102, OPTM3108, PSYC3516; OPTM3203, OPTM3209, PHPH3302.
Corequisite/s:  OPTM3203, OPTM3209, PHPH3302.

Objectives: To produce a student with professional attitude and good communication skills who has the ability to integrate scientific and clinical aspects of optometry and make well-reasoned decisions while undertaking patient care at the UNSW Optometry Clinic under supervision of a registered optometrist. To advance student knowledge in and to stimulate students' interest in optometric subspecialties such as low vision, binocular vision and contact lenses. Brief Curriculum: Lectures, tutorials, and practical classes will deal with: contact lenses - complications, clinical management, special applications and advanced topics; binocular vision - case analysis, diagnosis and management of strabismus and amblyopia, anisokoria and related topics; low vision rehabilitation - epidemiology of visual impairment, the low vision examination, survey of current low vision aids, adaptive technology, the multidisciplinary model.

OPTM3209
Environmental Optometry
School of Optometry and Vision Science
UOC6  HPW6
Prerequisite/s:  OPTM3202, OPTM3102.
Corequisite/s:  OPTM4311, OPTM4312, OPTM4313.

OPTM4114
Optometry and the Professional Environment A
School of Optometry and Vision Science
UOC3  HPW3
Prerequisite/s:  OPTM4311, OPTM4312, OPTM4313.
Corequisite/s:  OPTM3108, OPTM3203, OPTM3209, PHPH3302.

OPTM4210
Research Project
School of Optometry and Vision Science
UOC3  HPW3
Prerequisite/s:  OPTM3108, OPTM3203, OPTM3209, PHPH3302.
Corequisite/s:  OPTM4311, OPTM4312, OPTM4313.

Objectives: This subject seeks to develop students' skills in searching the literature, critical analysis of publications, developing hypotheses, designing and running experiments, statistical data analysis and oral and written presentation of reports. Students in groups of 2 to 4 carry out a small research project under the guidance of an academic staff member. In November each group makes a presentation to a symposium.
aware of their social responsibilities as optometrists. Brief Curriculum: History of optometry and optics. Legal aspects of optometry. Medicare. State law and how it affects optometry. Starting an optometric practice. MODES OF PRACTICE. PRACTICE INFORMATION SYSTEMS. COMPUTERS AND OPTOMETRY. CONTINUING EDUCATION. CHALLENGES IN OPTOMETRY.

OPTM4311
Clinical Optometry 4A
School of Optometry and Vision Science
UOC6  HPW6
Prerequisite/s: OPTM3108, OPTM3203, OPTM3204, OPTM3209, PSYC3156, PHPH3302;
Corequisite/s: MDCN8001
Objectives: further development of the clinical skill to examine critically patients in optometric practice and recommend appropriate treatment and strategies for patients presenting for primary eye care. Brief Curriculum: Clinical experience in primary eye care. Diagnosis, management and treatment of these patients will be emphasised.

OPTM4312
Clinical Optometry 4B
School of Optometry and Vision Science
UOC6  HPW6
Prerequisite/s: OPTM3108, OPTM3203, OPTM3204, OPTM3209, PSYC3156, PHPH3302;
Corequisite/s: MDCN8001
Objectives: further development of the clinical skill to examine critically patients in optometric practice and recommend appropriate treatment and strategies for patients presenting for primary eye care. Brief Curriculum: Clinical experience in the following areas: colour vision, low vision, ocular disease and participation in patient review clinics. Diagnosis, management and treatment of these patients will be emphasised.

OPTM4313
Clinical Optometry 4C
School of Optometry and Vision Science
UOC6  HPW6
Prerequisite/s: OPTM3108, OPTM3203, OPTM3204, OPTM3209, PSYC3156, PHPH3302;
Corequisite/s: MDCN8001
Objectives: further development of the clinical skill to examine critically patients in optometric practice and recommend appropriate treatment and strategies for patients presenting for primary eye care. Brief Curriculum: Clinical experience in the following areas: colour vision, low vision, ocular disease and participation in patient review clinics. Diagnosis, management and treatment of these patients will be emphasised.

PAEDS101
Paediatrics
School of Women's & Children's Health
UOC12
Prerequisite/s: MDSG4001
Objectives: To understand the physical, intellectual, and emotional development of children; to recognise important interactions between the child, the family and the community; to take a reliable medical history from children and parents/guardians; to perform a reliable physical examination; to communicate with children and parents/guardians; to recognise acutely ill children and initiate management; to recognise and initiate management of common paediatric disorders; to recognise the role of preventative care in child health; to recognise the roles of allied health care professionals. General Paediatrics and Paediatric Surgery are taught at the Sydney Children’s Hospital (5 weeks) and Associated Hospitals including rural locations (4 weeks). Clinical clerking and practical involvement in care of inpatients is emphasised. Seminars and lectures on core material, case conferences, and instruction in clinical skills are provided. Students are expected to spend one night in four and one or two weekends per term in residence. Neonatal medicine is integrated with teaching of obstetrics and gynaecology. Assessment: Progressive assessment from clinical supervisors through the term, multiple choice, objective structured clinical assessments and clinical examinations in the last week of term.

PATH0005
Pathology Honours Full-time
School of Medical Sciences
Enrolment requires school approval UOC24
Research component of thesis: basic mechanisms of human disease processes, including inflammation, rheumatoid arthritis, asthma, uveit, infections, bone and biomaterials, tumour biology, vascular biology, atherosclerosis and genetics. Projects can include techniques such as tissue culture and cell biology, microbiology and genetics, protein chemistry, histology and microscopy, immunology and enzymology. Projects may be undertaken within the School of Pathology or at a laboratory of an affiliated institute or hospital department associated with the school.

PATH0006
Pathology Honours Part-time
School of Medical Sciences
Enrolment requires school approval UOC12
Research component of thesis: basic mechanisms of human disease processes, including inflammation, rheumatoid arthritis, asthma, uveitis, infections, bone and biomaterials, tumour biology, vascular biology, atherosclerosis and genetics. Projects can include techniques such as tissue culture and cell biology, microbiology and genetics, protein chemistry, histology and microscopy, immunology and enzymology. Projects may be undertaken within the School of Pathology or at a laboratory of an affiliated institute or hospital department associated with the school.

PATH2201
Processes in Disease
School of Medical Sciences
UOC6  HPW4
Prerequisite/s: ANAT2241, plus any one of ANAT2111, PHPH2101, BIOC2101/BIOC2181.
Lectures, tutorials and museum study sessions aimed at increasing understanding of important disease processes. Comparisons between normal and abnormal cell, tissue and organ function will be made. Includes processes of cell and tissue degeneration, acute and chronic inflammation, regeneration and repair, infection, atherosclerosis, thrombosis, embolism and infarction. Particular examples include diseases of practical importance such as pneumonia, tuberculosis, pulmonary embolism and myocardial infarction. Aberrations of cell growth introduces neoplasia with examples of common tumours.

PATH3205
Molecular Basis of Disease A
School of Medical Sciences
UOC6  HPW4
Prerequisite/s: PATH2201
Recent advances in understanding molecular mechanisms of acute and chronic inflammation, allergy, autoimmune diseases, atherosclerosis and thrombosis. Detailed discussion of mediators of these processes, including cytokines and growth factors. Systemic pathology of the cardiovascular and respiratory systems, with an emphasis on ischaemic heart disease and asthma. Laboratory classes introduce modern research and diagnostic techniques.
Note/s: Students are advised that previous and concurrent study of Anatomy, Physiology, Biochemistry or Immunology would be an advantage.

PATH3206
Molecular Basis of Disease B
School of Medical Sciences
UOC6  HPW4
Prerequisite/s: PATH3205
Recent advances in understanding the pathogenetic mechanisms underlying congenital disorders and neoplasia. Detailed discussion of molecular carcinogenesis, the metastatic process and techniques for diagnosing congenital diseases. Common tumours, with an emphasis on colorectal, breast, prostate and cervical carcinoma. Systemic
pathology of the gastrointestinal, genitourinary and central nervous systems, including peptic ulcer disease, liver disorders, glomerulonephritis, and Alzheimer disease.

Note/s: Advantage in having undertaken previous study in ANAT3231 Cell Biology.

**PATH3207**

**Musculoskeletal Diseases**

School of Medical Sciences

UOC6 HPW4

Prerequisite/s: PATH2201, ANAT2111 or ANAT2511

Current scientific concepts of musculoskeletal diseases including arthritis, metabolic bone disease, primary and secondary bone neoplasms and neuromuscular disease. Detailed coverage of fracture healing and its complications and of biomaterials and prosthetic devices relevant to orthopaedic applications.

**PATM3101**

**Pathology**

School of Medical Sciences

UOC5 HPW5

The discipline of Pathology forms a continuous stream of teaching of the pathogenesis of disease throughout the 3rd, 4th, 5th and 6th years of the medical curriculum. In Year 3, the course PATH3101 comprises an introduction to basic disease processes (General Pathology), ie. those fundamental processes which are common to all tissues and organs of the body. The course covers classification of disease, and deals with both congenital and acquired diseases. The program comprises lectures, tutorials, practical classes and demonstrations on responses of cells to injury, inflammation, aberrations of the blood and vascular system and specific related effects of embolism and infarction, as well as studies of normal and abnormal growth, and of healing and regenerative processes. In addition, it includes consideration of the basic processes of neoplasia and carcinogensesis, as well as an introduction to the pathobiology of such contemporary health problems as environmental toxicity. In order to integrate the teaching of pathology with clinical studies, each fundamental process will be exemplified by references to examples of diseases of organ systems (Systemic Pathology) of practical importance. Assessment: Proficiency in the course, sufficient to proceed to Year 4, will be assessed by mid-year and end of year examinations which will comprise 30% and 70% respectively of the total mark in Pathology. Both assessments will comprise theory and practical components. Progress self-assessments with automated feedback will be made available on the World Wide Web.

**PECO1000**

**Introduction to Political Economy**

School of Social Science and Policy

UOC6 HPW3

Introduces the main schools of thought in political economy. Covers the development of economic ideas since Adam Smith and the key debates that have engaged the study of political economy.

**PECO1001**

**Australia in the Global Economy**

School of Social Science and Policy

UOC6 HPW3

Excluded: ECON1301, ECON1302

Looks at the international economy at the end of the 19th century (trade, factor flows, and payments arrangements); problems of the international economy between the wars; the impact of World War II and the international economy in the post-war era; and Australian economic development and its relationship with the international economy in terms of economic fluctuations, problems of the inter-war period, growth of manufacturing, government policy and action, the importance of the mining industry, economic development and the distribution of income and wealth.

**PECO2000**

**Political Economy and the State**

School of Social Science and Policy

UOC6 HPW3

Prerequisite/s: 36 units of credit; Excluded: SLSP2000

An interdisciplinary overview of the relationship between social and economic theory and policy development. Considers how theory informs and legitimates policy choices and how policies are dependent on historical, social and economic contexts. Major social and economic theorists are considered and current policy case studies are used to evaluate policy implementation in the public and private sectors in Australia.
and obligations of society. This team-taught course considers the moral issues raised by such decisions, along with some of the political, philosophical principles which inform our public debate. Also examines the nature and justification of rights, as well as contemporary concepts of justice and equality.

PHIL1010
Thinking About Reasoning
School of Philosophy
UOC6 - HPW3
Excluded: GENT0604

Thinking clearly, reasoning productively, arguing well. These are skills essential in life in general and at University in particular. Philosophy has a lot to say about these practices, and also about the whole nature of human reason. Involves practical work on reasoning and argumentative strategies, and an introductory investigation into what good reasoning actually is. There is a great deal of modern philosophical investigation into these matters.

PHIL1014
Introduction to European Philosophy
School of Philosophy
UOC6 - HPW3

Provides a broad introduction to themes in European Philosophy, such as: the character of human subjectivity, rationality (and its limits), alienation, progress, history, freedom and how to understand meaning and morality with the waning of religious authority. Focuses on the legacy of the Enlightenment (Rousseau, Kant), the principal critics of this tradition (Hegel, Marx and Nietzsche), the emergence of existential and phenomenological themes in the work of thinkers such as Heidegger; some of the influential sources of contemporary theory such as the Frankfurt School and Hannah Arendt, and mostmodern thinkers such as Foucault.

PHIL2001
Logic
School of Philosophy
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: MATH3400, PHIL2106

This course is about deductive logic (in particular, propositional logic and predicate logic). Aims to construct - and to understand - a precise, unambiguous, formal language. Many important parts of English are translatable into it, hence many arguments of English are translated into it too. It is a language with which we can better understand the concept of deductive proof.

PHIL2002
Ways of Reasoning
School of Philosophy
UOC6 - HPW3
Prerequisite/s: 36 units of credit;
Excluded: PHIL2108

Examines what reasoning and argument really are and how best to engage in them. Material for this course is drawn from everyday sources, such as newspapers, books and advertisements, including television, as well as some of the brilliant pieces of reasoning in the philosophical tradition. From studying the structure of arguments, the purpose of reasoning, and a number of strong and weak argumentative moves, and from a guided re-evaluation of their own writing, students will be able to improve their critical skills and the presentation of their own arguments.

PHIL2004
20th Century Analytical Philosophy
School of Philosophy
UOC6 - HPW3
Prerequisite/s: 6 level 1 units of credit in Philosophy and 36 units of credit overall;
Excluded: PHIL2226

Examines a range of thinkers who have influenced key developments of contemporary philosophy and deals with many issues surrounding mind, meaning, ethics, metaphysics, freedom, the nature of language, the nature of possibility. Such thinkers may include: Moore, Russell, Ramsey, Frege, Carnap, Quine, Ryle, Austin, Wittgenstein, Strawson, Ancombe, Geach, Lewis, Kripke, Dennett and Putnam.
PHIL2206
Philosophy of Mind
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall
An introduction to some central concerns and major debates about the nature of mind. Addresses questions such as can our conscious mental life be an object of scientific study? What is the relation between mind and brain? Can we explain how consciousness evolved? What is the basis and nature of our personal identity?

PHIL2208
Contemporary Epistemology
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Excluded: PHIL2209.
What is knowledge? What knowledge are people capable of having? Might people have no knowledge at all? Might people at least have much less knowledge than they take themselves to have? We will discuss sceptical, as well as non-sceptical, philosophical theories of knowledge, covering such topics as these: truth, fallibility, evidence, certainty, knowledge of the world, knowledge of the unobserved, knowledge of one’s mind, knowledge of meaning.

PHIL2218
Philosophical Foundations of Artificial Intelligence
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Artificial intelligence: an examination of its assumptions, history, goals, achievements and prospects.

PHIL2418
Bioethics
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Examines current issues in the field of bioethics by considering a number of dilemmas raised by current bio-medical developments. Introduces the main streams of ethical theory used in contemporary bioethics debates, primarily utilitarianism, deontology, virtue ethics and ethics of care, as a platform for philosophical discussion of a number of controversial bioethical issues. Issues addressed may include the doctrine of the sanctity of human life and the concept of the person, brain death, organ transplanting, abortion, stem cell research, new genetic technologies, reproductive technologies, euthanasia, and the principle of informed consent in biomedical research.

PHIL2419
Existential Phenomenology and its Critics
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Explores ideas of human existence that have emerged from 20th Century existential phenomenology, especially those of Merleau-Ponty. These ideas challenge the way we usually understand the role of the body in agency and perception, meaning and sense, temporality and spatiality, intersubjectivity and self-other relations, community, and freedom. In exploring these themes, background is provided by aspects of Sartre’s and Beauvoir’s existentialism. Recent advances to the field are examined through sympathetic criticals such as Levinas and Nancy.

PHIL2421
Philosophy, Education and Society
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 level 1 units of credit in Philosophy or Level 1 Education and 36 units of credit overall.
An introduction to the theory and practice of philosophical communities of inquiry. Explores the ways in which philosophy may be reconstructed for educational and other social purposes. Examines the relations between community and inquiry, self and society, and democracy and education. Addresses the social utility of philosophy and its educational potential. Authors whose works are discussed include Aristotle, Jerome Bruner, John Dewey, Immanuel Kant, Matthew Lipman, G.H. Mead, Jean-Paul Sartre and Lev Vygotsky.

PHIL2422
Biopolitics and Biotechnology
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Examines contemporary texts in ethical and political theory that critically interrogate recent developments in biotechnology, focusing on questions about power, subjectivity and materiality. Introduces emerging literature on the concept of biopolitics, and several influential approaches to technology, and critically examines the usefulness of these for analysing the social, political and ethical implications of biotechnologies. Contemporary ethical and political issues posed by advances in biotechnologies examined include the human genome project and new genetics, bio-terrorism, and bio-risk. Philosophical texts to be used include works by Foucault, Agamben, Arendt, Heidegger, Latour, Habermas and Haraway.

PHIL2505
Kant
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Kant’s Critique of Pure Reason is arguably the most important work in Modern Western philosophy. His thought is a continuing influence on all subsequent developments in philosophy. Introduces Kant’s thought, focussing on his critique of traditional metaphysics in the Critique of Pure Reason and in other texts. Positions Kant’s distinctive approach with respect to other philosophical positions such as empiricism and rationalism. Themes to be examined include: intuition, self-consciousness, rationality and judgment.

PHIL2511
Political Theory and the Rights of Indigenous Peoples
School of Philosophy
UOC6  HPW3
Prerequisite/s: 36 units of credit
Examination of arguments for and against distinctive rights for indigenous peoples put forward within contemporary political philosophy, including theories of historical injustice, the value of minority cultural identity and the right to self determination of free peoples. Philosophical analysis of the emergence and evolution of native title, as a distinctive form of legal right, in Australia and other common law countries such as Canada. Provides a distinctive approach to issues of public policy concern including citizenship, sovereignty, national identity, minority rights and human rights.

PHIL2515
Existence, Alienation and Freedom
School of Philosophy
UOC6  HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall.
Examines how the notions of freedom, existence and alienation have come to assume a central place in the development of 20th Century Philosophy and how we understand ourselves and our relation to others and the world. Covers the different approaches to these notions developed in the work of key figures in 20th century Philosophy, particularly Heidegger, Jaspers, Arendt, Beauvoir, Sartre and also in the thought of the 19th Century philosopher Soren Kierkegaard.
PHIL2708
Reading Option
School of Philosophy
UOC6 HPW3
Prerequisite/s: 6 units of credit in level 1 Philosophy and 36 units of credit overall
Students wishing to do work in an area not covered by an existing course or seminar may apply to the School to take a reading option. Not more than one such course may be counted towards a degree. Approval of a program for a reading option depends on its suitability and on the availability of a member of staff to undertake supervision.

PHIL3910
Advanced Philosophy Seminar
School of Philosophy
UOC6 HPW3
Prerequisite/s: 30 units of credit in Philosophy;
Excluded: PHIL3106
An in-depth treatment of selected philosophical problems or traditions. Involves particular focus on the skills required for independent philosophical research.

PHIL4000
Philosophy Honours (Research) Full-Time
School of Philosophy
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in PHIL including PHIL3910 with an average of 70% and at least 6 units of credit in PHIL at 75% or higher
The Honours year consists of a year-length thesis workshop, three session-length seminars and the writing of a research thesis under supervision.

PHIL4050
Philosophy Honours (Research) Part-Time
School of Philosophy
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in PHIL including PHIL3910 with an average of 70% and at least 6 units of credit in PHIL at 75% or higher
The Honours year consists of a thesis workshop, three session-length seminars and the writing of a research thesis under supervision usually over a period of two years.

PHIL4500
Combined Philosophy Honours (Research) F/T
School of Philosophy
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in PHIL including PHIL3910 with an average of 70% and at least 6 units of credit in PHIL at 75% or higher
For Combined Honours candidates are required to present a thesis as approved by the Heads of the two participating Schools.
Note/s: Students contemplating Honours are urged to seek advice from the School early in their program.

PHIL4550
Combined Philosophy Honours (Research) P/T
School of Philosophy
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in PHIL including PHIL3910 with an average of 70% and at least 6 units of credit in PHIL at 75% or higher
For Combined Honours, candidates are required to present a thesis as approved by the Heads of the two participating Schools.
Note/s: Students contemplating Honours are urged to seek advice from the School early in their program.

PHPH1502
Introduction to Health & Sports Science B
School of Medical Sciences
UOC6 HPW6
This course introduces students to the area of physical activity, health, and lifestyle. An overview of the impact of physical activity will be provided. Students will learn how to assess different components of physical fitness and varying aspects of lifestyle. Health-based screening and intervention techniques will also be outlined with students undertaking a personal lifestyle change project.

PHPH2011
Introductory Pharmacology and Toxicology
School of Physiology and Pharmacology
UOC6 HPW6
Prerequisite/s: 6 units of credit from level 1 Biology (BIOS1201 pref); and 12 UOC of Level 1 CHEM; and 6 UOC Level 1 MATH(not including MATH1041). Excluded PHPH3151
This course will cover the basic principles of pharmacology with an emphasis on drug action from the molecular and cellular levels to tissue, organ and whole animal levels. The course will provide an understanding of the principles of drug action (pharmacodynamics) in terms of drug chemistry, drug-receptor interaction, receptor theory and dose-response relationships. An introduction to receptor-mediated signal transduction, membrane receptors and autonomic pharmacology will be covered. The handling of drugs by the body through the processes of absorption, distribution, metabolism and excretion (Pharmacokinetics) will be covered in some detail along with drug analysis and the adverse effects of drugs. Aspects of clinical trials, legal aspects of drug registration and the principles of toxicology will be introduced. The laboratory classes will involve basic pharmacological and toxicological methods.

PHPH2101
Physiology 1A
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: 6 UOC from level 1 Biology (BIOS1101 pref); and 6 UOC of Level 1 CHEM; and 6 UOC Level 1 MATH(not including MATH1041). Recommended: BIOC2101 or BIOC2181.
Introduces fundamental physiological principles, from basic cellular function in terms of chemical and physical principles to the operation and interaction of body systems. The areas of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience. The unit includes a substantial series of practical class experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.
Note/s: Students intending to major in Physiology or Pharmacology should note that prerequisites can only be waived at the discretion of the Head of Department of Physiology and Pharmacology. Biochemistry is highly recommended for a major in Physiology and essential for a major in Pharmacology.

PHPH2121
Principles of Physiology A
School of Medical Sciences
UOC6 HPW6
Provides an introduction to fundamental physiological principles for students in BOptom. degree course. The areas of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience, and includes a series of practical class experiments on these different areas of physiology.
Note/s: Restricted to students enrolled in BOptom degree course and the Biomedical Engineering double degree programs.
PHPH2201
Physiology 1B
School of Medical Sciences
UOC6 HPW6

The Areas of Physiology covered in this unit build on the fundamental physiological principles introduced in PHPH2101 Physiology 1A. The topics covered include reproduction, the respiratory system, the gastrointestinal system, kidney and body fluids and the endocrine system. This unit includes a substantial series of practical class experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.

PHPH2211
Principles of Physiology B
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2121

The area of physiology covered in this unit builds on the fundamental physiological principles introduced in PHPH2121 Principles of Physiology A. The topics covered include reproduction, the respiratory system, the gastrointestinal system, kidney and body fluids and the endocrine system. This unit includes a series of practical class experiments on these different areas of physiology.

Note/s: Restricted to students enrolled in BOptom degree course and the Biomedical Engineering double degree programs. PHPH2121 is highly recommended.

PHPH2301
Physiology for Health and Sports Science A
School of Medical Sciences
UOC6 HPW6

Introduces fundamental physiological principles, from basic cellular function in terms of chemical and physical principles to the operation and interaction of body systems. The areas of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience. The unit includes a substantial number of practical class experiments on these different areas of physiology.

Note/s: Restricted to students enrolled in program 3850.

PHPH2302
Physiology for Health and Sports Science B
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2301.

The areas of physiology covered in this unit build on the fundamental physiological principles introduced in PHPH2301. The topics covered include reproduction, the respiratory system, the gastrointestinal system, kidney and body fluid balance, and the endocrine system. Again this unit includes a substantial series of practical class experiments on these different areas of physiology.

PHPH2303
Exercise Physiology
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: ANAT2111, PHPH2301, PHPH2303

This courses focuses on how human structure and function is influenced by work and physical activity. Areas to be studied include energy metabolism and liberation, applied muscle physiology, and applied cardiopulmonary physiology. The unit includes a number of laboratories on these different areas of exercise physiology.

PHPH3121
Membrane and Cellular Physiology
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2101 and PHPH2201

This subject deals with the properties and physiology of excitable cells, building on the concepts introduced in PHPH2101. Topic areas include: how electrical signals are generated across cell membranes; the function, properties and structure of ion channels and transporters; how individual nerve, muscle and epithelial cells function; how cells communicate with each other in the brain, including synaptic transmission and receptor-mediated signaling; how alterations in functioning of transporters and channels can lead to disease states; modern experimental techniques in cellular physiology; and recent advances in this field. The course provides an ideal introduction for further detailed studies in single cell physiology and pharmacology, and provides a foundation for the understanding of higher physiological systems.

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

PHPH3131
Neurophysiology
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2101 and PHPH2201

Brain mechanisms in sensation and perception are analyzed in detail for vision, hearing and touch, and for the position sense arising from muscles, joints and the vestibular apparatus. The sensorimotor mechanisms responsible for the control of fine movement and postural regulation are also studied at different levels of the nervous system, from the sensory and motor nerves within muscles through to the highest levels of cerebral cortical function. Segments are also included on the neural control of cardiorespiratory function; transmitters and neuromodulators; neural mechanisms in certain higher functions, eg language and memory; nervous system plasticity; computer applications in neuroscience. Experimental work introduces the student to electrophysiological and other neuroscience research techniques, such as in seminar-discussion groups to a critical evaluation of neuroscience research literature.

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

PHPH3151
Introductory Pharmacology and Toxicology
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2101, PHPH2201, BIOC2101 or BIOC2181, BIOC2210 or BIOC2291

Includes a study of the fundamentals of drug action, such as dose-response methods, receptor binding, drug absorption, distribution and metabolism. Further material on drug analysis and adverse effects of drugs will be presented. Segments dealing with aspects of chemical toxicity and the requirements of government agencies for the registration and evaluation of toxic chemicals will be covered. The practicals will cover basic pharmacological methods. Advanced Science students will be affiliated with a research group within the School involving attendance at group meetings, seminars and the presentation of a report based on literature within the subject area.

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

PHPH3221
Cardiorespiratory and Exercise Physiology
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2101, PHPH2201

An advanced course which emphasises function and control of the cardiovascular system; gas exchange in the lung, respiratory pathophysiology, preventive medicine and laboratory testing of the cardiorespiratory system in exercise physiology. Performance of the cardiorespiratory system in extremes of pressure and temperature is discussed. Extensive practical components involve mammalian preparations and human subjects.

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

PHPH3221
Endocrine, Reproductive and Developmental Physiology
School of Medical Sciences
UOC6 HPW6
Prerequisite/s: PHPH2101, PHPH2201
There are three major components to this subject, which consists of lectures, practical classes, tutorial and case studies. The first component of the course is a study of neuroendocrinology, molecular and systematic endocrinology. The second component of the subject deals with female and male reproductive physiology. The third component of the subject features the physiology of pregnancy, and that of the fetus and the newborn. 

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

**PHPH3251 Clinical and Experimental Pharmacology**  
School of Medical Sciences  
UOC6 HPW6  
Prerequisite/s: PHPH2101, PHPH2201, PHPH3151, BIOC 2101 or BIOC2181, BIOC2201 or BIOC2291

The subject deals with the pharmacology of drug classes, with emphasis on mode of drug action. Effects of drugs on the major organs, including the cardiovascular system, kidney, endocrine systems, and the central nervous system, will be covered. Students will be introduced to recent innovations in drug development and emerging therapeutic strategies based on advances in understanding cellular physiology and drug action. The practicals will cover basic pharmacological methods from both clinical and experimental standpoints. 

Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

**PHPH3302 Pharmacology for Optometry**  
School of Medical Sciences  
UOC4 HPW4  
Prerequisite/s: OPTM2101, PHPH2121, PHPH2221

Objectives: To introduce optometry students to the mechanisms of drug action and interaction, with an emphasis on the pharmacology of the eye. Pharmacodynamics, pharmacokinetics and toxicology of drugs used in the diagnosis and treatment of eye conditions; side effects of drugs used to treat systemic disease.

**PHPH3501 Brain Mechanisms in Sensory-Motor Integration**  
School of Medical Sciences  
UOC6  
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101

Brain mechanisms in sensation and perception are analysed in detail for vision, hearing and touch, and for the position sense arising from muscles, joints and the vestibular apparatus. The sensorimotor mechanisms responsible for the control of fine movement and postural regulation are also studied at different levels of the nervous system, from the sensory and motor nerves within muscles through to the highest levels of cortical function.

**PHPH3502 Skeletal Muscle in Health and Exercise**  
School of Medical Sciences  
UOC6 HPW3  
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101

This course will focus on the identification of specific joints and muscles responsible for sport and exercise movements. Students will use a dynamic analysis approach to assess skills and movements for the purpose of physical conditioning, injury prevention, and exercise rehabilitation.

**PHPH3503 Advanced Exercise Physiology**  
School of Medical Sciences  
UOC6 HPW6  
Prerequisite/s: ANAT2111, PHPH2501, PHPH2503

An advanced course linking previous physiological principles with advanced applications associated with endurance based energy systems and metabolism. This will incorporate endocrine physiology, biochemistry of energy systems during exercise and will look at the responses and adaptations occurring with such activity. This will also cover other aspects such as tapering, over-reaching, overtraining and the associated detrimental physiological and pathological results. A significant practical component will continue to build relevant experience for future employment.

**PHPH3504 Physical Activity and Health**  
School of Medical Sciences  
UOC3 HPW3  
Prerequisite/s: ANAT2111, PHPH2501, PHPH2503

This course will introduce students to the literature examining the effects of physical activity on health. In particular, the effects of exercise on cancer, AIDS, heart disease, vascular disease, stroke, hypertension, diabetes, obesity, immune function, sleep, stress, cognitive functioning, depression, arthritis, and asthma will be described. Health based screening and intervention techniques will also be outlined with students undertaking a supervised lifestyle change project.

**PHPH3505 Motor Control & Dysfunction**  
School of Medical Sciences  
UOC6 HPW6

This course will describe the neurophysiological basis of dysfunctional and normal human motion control. The neurophysiology and anatomy of the motor control system will be described as well as analysis techniques of movement patterns.

**PHPH3506 Principles of Exercise Prescription**  
School of Medical Sciences  
UOC3 HPW3  
Prerequisite/s: ANAT2111, PHPH2501, PHPH2503

This course will serve to integrate knowledge acquired in previous stages of the program. A course that is focused strongly on practical application of theory. Exercise prescription principles will be revised and then further developed with the extension into a variety of population groups from the apparently healthy through to clinical and athletic groups.

**PHPH4218 Physiology 4 Honours Full-Time**  
School of Medical Sciences  
UOC24

The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a report and presented as a seminar. Students are also required to participate in departmental seminars, and to submit a literature review. For further information see the Honours coordinator.

**PHPH4224 Physiology 4 Honours Part-Time**  
School of Medical Sciences  
UOC12

The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a report and presented as a seminar. Students are also required to participate in departmental seminars and to submit a literature review. For further information see the Honours coordinator.

**PHPH4258 Pharmacology Honours Full-Time**  
School of Medical Sciences  
UOC24

The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a report and presented as a seminar. Students are also required to participate in departmental seminars, and to submit a literature review. For further information see the Honours coordinator.

**PHPH4264 Pharmacology Honours Part-Time**  
School of Medical Sciences  
UOC12
The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a report and presented as a seminar. Students are also required to participate in departmental seminars and to submit a literature review. For further information see the Honours coordinator.

**PHPH4501 Introductory Research Methods**  
School of Medical Sciences  
UOC3 HPW3

This course deals with the statistical and epidemiological bases for understanding the scientific process for undertaking research. The student receives training in statistical software such as SPSS and learns to use the software for tests on the various levels of measurement including correlation, regression, t-tests, and analysis of variance. The student develops a research proposal during the course.

**PHPH4502 Principles of Pharmacology**  
School of Medical Sciences  
UOC3  
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101

This course includes a study of the fundamentals of drug action, such as dose response methods, receptor binding, drug absorption, distribution and metabolism. Further material on drug analysis and adverse effects of drugs will be presented. Segments dealing with aspects of chemical toxicology and the requirements of government agencies for the registration and evaluation of toxic chemicals will be covered. This is a lecture only course.

**PHPH4503 Practicum A**  
School of Medical Sciences  
UOC6

Students are required to complete 80 hours of work experience with an approved organisation under the supervision of the placement program officer. Course availability: it is intended that students will complete this placement over semester 1. The student chooses, after consultation and academic advice, to undertake a structured internship in a relevant professional area. This is done under the supervision of an accredited exercise physiologist with suitable industry experience. The supervisor will ensure adequate records of activities and skills developed by the student. Students will be assessed by the submission of a substantial report of the internship, together with the submission of the completed journal and a seminar presentation.

**PHPH4504 Practicum B**  
School of Medical Sciences  
UOC6

See description for Practicum A. The student may take an internship in a different or related professional area to that of Practicum A. The same requirements apply in terms of a completed journal, substantial report and seminar presentation.

**PHPH4505 Research Project**  
School of Medical Sciences  
UOC6 HPW6  
Prerequisite/s: PHPH4501.

A research proposal will have been developed in the course Introductory Research Methods (PHPH4501). In this course the student will implement the approved project in terms of reviewing the literature, applying the appropriate methods, accumulating results and processing these through the relevant statistics, discussing the results and drawing conclusions. A report is to be written in the form of a scientific paper.

**PHPH4506 Drugs in Sport (Effects and Interactions)**  
School of Medical Sciences  
UOC3 HPW3  
Prerequisite/s: PHPH2051, PHPH2052, PHPHP2053

This is a course in systematic pharmacology dealing with the effects of drugs on systems with particular emphasis on the drugs that enhance performance and underlying mechanisms responsible for their effects. As well students will study the impact of drug treatment on performance and the effects of exercise on drug actions and side effects. This course will be given as lecture only.

**PHPH4507 Movement Rehabilitation**  
School of Medical Sciences  
UOC6 HPW6

This course describes the use of exercise as a clinical rehabilitative tool for humans with neurological and muscular pathologies. The subject delivers information about evaluation of injury sites and the design and implementation of exercise-based rehabilitative techniques to improve functional capability.

**PHPH4508 Brain Mechanisms and Sensory-Motor Integration**  
School of Medical Sciences  
UOC3 HPW3  
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101

Brain mechanisms in sensation and perception are analysed in detail for vision, hearing and touch, and for the position sense arising from muscles, joints and the vestibular apparatus. The sensorimotor mechanisms responsible for the control of fine movement and postural regulation are also studied at different levels of the nervous system, from the sensory and motor nerves within muscles through to the highest levels of cortical function.

**PHPH4511 Sports Management**  
School of Medical Sciences  
UOC3 HPW3

The principles and practice of sports management will be dealt with, emphasising planning, staffing, financial management and information systems management. A ‘systems’ view of sporting organisations will be developed. There will be examination and discussion of the Australian sporting industry and its changing structure and its relation to the media and multimedia international organisations. Practical work will require selecting appropriate topics in these areas for analysis and reports.

**PHPH4512 Circadian Rhythms: Sleep Physiology and Pathophysiology**  
School of Medical Sciences  
UOC3 HPW3  
Prerequisite/s: PHPH2503

The course emphasises the importance of circadian rhythms in regard to athletes and their performance. The neurophysiology and location of rhythm generators will be reviewed and their effects on the neuro-hormonal axis discussed. The ultradian rhythms, such as the alert-drowsy cycle, will be discussed in relation to performance. Sleep physiology and its stages will be discussed in relation to hormonal changes such as on diurnal changes in plasma cortisol and growth hormone. There will be discussion of jet-lag in relation to the phase changes due to rapid changes in longitude as occurs in airline travel. The effects of disordered sleep will be considered in relation to its effects on performance and related effects on arousal and attention and on hormones. Practical work will include observations in a sleep laboratory.

**PHPH4513 Physical Activity in Special Populations**  
School of Medical Sciences  
UOC3 HPW3  
Prerequisite/s: ANAT2111, PHPH2501, PHPH2503

The focus of this course is on special populations and their special needs for engaging in physical activity. The course will introduce students to the literature examining the effects of physical activity on health. In particular, the role of physical activity in the health of children, women, aging adults, pain, arthritis, and asthma patients will be described.
PHPM3014
Medical Physiology 2
School of Physiology and Pharmacology
UOC4 HPW4
Prerequisite/s: PHPM2018

Objectives: To extend knowledge of normal physiology to areas not covered in Medical Physiology I, particularly blood, the nervous and endocrine systems and reproduction; problem solving approaches are emphasised and students are encouraged to integrate their knowledge of anatomy, biochemistry and physiology to provide an understanding of normal human structure and function. Those principles of biophysics necessary for an understanding of the subject are discussed. In addition, the subject places emphasis on applied physiology, including the physiology of exercise. Some clinical physiology is included where basic physiological principles are applied to the understanding of selected clinical disorders. Teaching involves systematic lectures, tutorials, practical classes and demonstrations. Assessment: Examinations are held both mid-year and at the end of the year and cover both lecture and practical content.

PHPM3055
Medical Pharmacology
School of Physiology and Pharmacology
UOC5 HPW6

Objectives: To understand the mechanism of drug action with special reference to drugs of clinical importance; to be aware of the principles of drug interaction. Medical pharmacology is the science of drugs or chemicals used to prevent, diagnose and heal disease, as well as the role of chemicals in the environment that cause disease. The medical pharmacology subject is concerned with basic principles of drug action, including the pharmacodynamics, pharmacokinetics and toxicology of drugs of clinical importance. Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

PHTN1010
Introduction to Photonics
School of Electrical Eng and Telecommunications
UOC3 HPW3

The lecture program for this course has three themes. The first lectures provide an introduction to the practice of photonics engineering. Key skills and knowledge in safety, technical communication and information gathering are discussed. Also covered are issues of what engineers do, the wider context in which engineers operate and their obligations to society. Several lectures also explore the key engineering theme of engineering systems. Many of the latter course lectures will be given by guest speakers from industry, and will introduce you to the world of Telecommunications and photonics engineering. Your ability to learn from and summarise the visitors’ lectures will be included in the material assessed in the examination. A number of lectures will also be given by different lecturers from the School of Electrical Engineering and Telecommunications covering basic communications theory, photonics, computing, data networks, the Internet, electronics and communications systems.

PHTN4310
Optical Signal Processing
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE4313 and ELEC3004

Optical analogue signal processing; optical filters, bragg gratings; optical switches and memories, holograms; optical sensing elements.

PHYS1000
Physics Thinking
School of Physics
UOC3 HPW3

Techniques in scientific thinking and experimentation: seeing similarities, using diverse knowledge and techniques, having good ideas. Estimation in theory and experiment. The subject will mainly be taught in small groups organised to solve experimental and theoretical problems, some of them quite difficult. The problems may have fundamental as well as applied character, but the emphasis of the course is on universal principles, including conservation, symmetries, scaling and dimensional analysis, behaviour near equilibrium.

PHYS1103
Physics of the Human Musculoskeletal System
School of Physics
UOC3 HPW3

In this course we assume the student begins with little or no previous exposure to physics and only basic high school mathematics. We introduce the central ideas of mechanics and fluid mechanics, electricity and magnetism, atomic and nuclear physics. Throughout, and particularly at the conclusion of each unit, we will illustrate how physics principles are central to a proper understanding of the musculoskeletal system by looking at some applications of physics knowledge. We also show some of the technologies associated with measuring and examining the human body have been possible through physics - in essence, we want to show how physics is in fact extremely useful, not the difficult, dry subject that some might believe it to be!

Assumed Knowledge: A basic understanding of Physics, equivalent to year 11 High School level.

PHYS1111
Fundamentals of Physics
School of Physics
UOC6 HPW6

The methods of physics, describing motion, the dynamics of a particle, conservation of energy, kinetic theory of gases, properties of liquids, vibrations and waves, electricity and conduction in solids, magnetism and electromagnetic induction, alternating current, atomic nature of matter, X-rays, the nucleus and radioactivity, geometrical optics, optical instruments, wave optics.

Note/s: Introductory level course for students of all disciplines. Recommended courses: MATH1011 or MATH1131 or MATH1031.

PHYS1121
Physics 1A
School of Physics
UOC6 HPW6
Corequisite/s: MATH1131 or MATH1141

PHYS1131
Higher Physics 1A
School of Physics
UOC6 HPW6
Corequisite/s: MATH1131 or MATH1141

Vectors, kinematics, particle dynamics, work and energy, the conservation of energy, conservation of linear momentum, rotational kinematics and dynamics, simple harmonic motion, gravitation. Electrostatics, magnetostatics in vacuum, ferromagnetism, electromagnetic induction.

PHYS1149
Physics 1A (Aviation)
School of Physics
UOC6 HPW6
Corequisite/s: MATH1011 or MATH1079 or MATH1131 or MATH1031

The methods of Physics, describing motion, the dynamics of particle, conservation of energy, kinetic theory of gases, properties of liquids, vibrations and waves, electricity and conduction in solids, ions and ionic conduction, magnetism and electro magnetic induction, alternating current.

PHYS1169
Physics 1 (Chem, Mech, Min Eng)
School of Physics
UOC6 HPW6

**PHYS1189**
Physics 1 (Geomatic Engineering)
School of Physics
UOC6 HPW6

**PHYS1199**
Physics 1 (Optometry)
School of Physics
UOC6 HPW6

Vectors, linear mechanics, Newton’s law of motion, rotational mechanics, electric forces, fields and potential. Magnetic forces and fields. Ampère’s Law, Faraday’s Law, electric circuit theory, AC, DC and transient circuits. Fluid mechanics; Bernoulli’s equation; viscosity; Stoke’s Law. Nuclear Physics; radioactivity, half-life, nuclear forces, binding energies, fission and fusion.

**PHYS1211**
Energy and Environmental Physics
School of Physics
UOC6 HPW6

Energy its uses and environmental impacts, thermodynamics, heat engines, heat transfer, solar radiation and its uses, properties of fluids, alternative energy sources, photons and atoms, photovoltaic energy, nuclear science and technology, environmental effects of natural and technological radiation sources, energy management.

**PHYS1221**
Physics 1B
School of Physics
UOC6 HPW6

Prerequisite/s: PHYS1121;
Corequisite/s: MATH1231 or MATH1241

Waves in elastic media: application of wave theories to optical and acoustical phenomena such as interference, diffraction and polarisation. Properties of matter: solids, liquids, gases. Fluids and thermal physics. Inductance and electric circuit transients. Alternating current circuit theory.

**PHYS1231**
Higher Physics 1B
School of Physics
UOC6 HPW6

Prerequisite/s: PHYS1131;
Corequisite/s: MATH1231 or MATH1241

**PHYS1241**
Higher Physics 1B (Special)
School of Physics
UOC6 HPW6

Prerequisite/s: PHYS1131;
Corequisite/s: MATH1231 or MATH1241

This course is designed for Physics majors and all students taking an Advanced Science program that includes Physics. Physics1241 is the ‘companion’ course to PHYS1231 Higher Physics 1A, available in S1.

Students taking PHYS1241 can choose the standard Higher Physics 1B laboratory program (HPW2) or, alternatively, may select a research project, supervised by a member of Physics’ academic staff, totalling approximately 20 hours for the session. A list of projects offered will be circulated at the commencement of Session 2.

**PHYS1249**
Environmental Physics (Aviation)
School of Physics
UOC3 HPW6

Energy, its uses and environmental impacts, thermodynamics, heat engines, heat transfer, solar radiation and its uses, properties of fluids, alternative energy sources.

**PHYS1250**
Physics 1 (Building)
School of Physics
UOC3 HPW3

Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism; electric and magnetic fields; DC circuits. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

**PHYS1259**
Physics 1 (Industrial Design)
School of Physics
UOC4 HPW4

Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism; electric and magnetic fields; DC circuits; electromagnetic induction. Sound: wave properties; absorption of sound. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

**PHYS1279**
Physics 1 (Civil Engineering)
School of Physics
UOC4 HPW4

Mechanics; elastic waves; electromagnetism; DC and AC circuits; introduction to electric measurement systems; instrumentation; digital electronic information processing systems; mechanical properties of matter; atomic structure; elasticity of solids; surface tension and viscosity of fluids; non-destructive testing; wave phenomena and acoustic techniques.

**PHYS1601**
Computer Applications in Experimental Science 1
School of Physics
UOC6 HPW6

An introduction to the internal structure, operating and interfacing of computers. Binary and digital electronic logic; logic control devices; bus communication structures; instruction execution in a processor; machine language code and instruction sets; interfaces and interaction schemes between processor and the outside world.

**PHYS2010**
Mechanics
School of Physics
UOC3 HPW2

Prerequisite/s: PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241 and MATH1231 or MATH1241;
Corequisite/s: MATH2011 or MATH2110 or MATH2100;

Damped and forced harmonic oscillations and resonance phenomena. Central force problems and celestial orbits. Variational principles; the Lagrangian and Hamiltonian formulations of mechanics; coupled oscillators, normal modes, continuous systems and fields. Many-particle systems.
PHYS2020
Computational Physics
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1022 or PHYS1221 or PHYS1231 or PHYS1241 and MATH11021 or MATH11231 or MATH1241 or MATH1031; Excluded: PHYS2001.

Use of computers to solve problems in Physics. Topics will be chosen from, but not limited to, random number generators, Monte Carlo techniques, sorting, numerical integration, gravitational, cellular automata, classical mechanics, and data analysis. Software used will include C and Maple.

PHYS2030
Laboratory A
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1022 or PHYS1221 or PHYS1231 or PHYS1241 and MATH11021 or MATH11231 or MATH1141 or MATH1031; Excluded: PHYS2031.

Experimental investigations in a range of areas: x-ray diffraction, work function, semiconductor bandgap, Hall effect, carrier lifetimes, nuclear magnetic resonance, magnetic properties.

PHYS2040
Quantum Physics
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241 and MATH11231 or MATH1241; Excluded: PHYS2021.

PHYS2050
Electromagnetism
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241, MATH1231 or MATH1141; Corequisite/s: MATH2011 or MATH2110 or MATH2100; Excluded: PHYS2011.

Static and time-dependent electric and magnetic fields. Electric and magnetic potentials. Electromagnetic waves. Materials in electric and magnetic fields.

PHYS2060
Thermal Physics
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241, MATH1231 or MATH1141 or MATH1031; Excluded: PHYS2011.

Laws of thermodynamics, kinetic theory, microscopic processes, entropy, solid-state detects, Helmholtz and Gibbs' functions, Maxwell's relations, phase diagrams, chemical and electrochemical potentials.

PHYS2160
Astronomy
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241 or PHYS1022

Galaxies, the distance scale, large scale structure of the universe, galaxy evolution, the very early universe.

PHYS2170
The Search for Life Elsewhere in the Universe
School of Physics
UOC3  HPW2
Excluded: GEN3041

A scientific examination of the question ‘Are we alone’. The material will include discussions on the origin and survival of life, current hi-tech searches for radio signals from extra-terrestrials, discoveries of new planetary systems, possible types of life-forms, Einstein’s relativity, space-travel, and much more. A team of researchers will present the lectures, which will be supported by special tutorials which will look in detail at quantitative aspects of the subject. Note/s: This course is not available to Advanced Science students.

PHYS2410
Biophysics 1
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1022 or PHYS1221 or PHYS1231 or PHYS1241, MATH1241 or MATH1031; Excluded: PHYS2031.

PHYS2601
Computer Applications in Experimental Science 2
School of Physics
UOC6  HPW5
Prerequisite/s: PHYS1601

Technical aspects of computer hardware, peripherals and systems. Bus logic devices; simple interface design; use of a general purpose interface for communication, data collection and control. Speed and capacity limitations of conventional peripherals; techniques to improve performance.

PHYS2630
Electronics
School of Physics
UOC6  HPW5
Prerequisite/s: PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241 or PHYS1022; Excluded: PHYS2920, PHYS2031.

Electronic bench experiments and tutorials on diodes, transistors, operational amplifiers, power supplies and digital electronics.

PHYS2801
Atmospheric Science
School of Physics
UOC6  HPW4
Prerequisite/s: PHYS1002 or PHYS1022 or PHYS1149 or PHYS1111 or PHYS1221 or PHYS1231 or PHYS1241 or PHYS1889 or GEOG1701 or GEOG1701 and MATH1021 or MATH1231 or MATH1079 or MATH1031
Excluded: PHYS2810

Atmospheric composition, thermodynamics of dry and moist air, stability, atmospheric motion and weather systems, energy transport, cloud processes, radiation laws, solar and terrestrial radiation, ozone formation and loss, 1D and 3D climate models and climate analysis, global warming. Laboratory exercises including chart analysis and computer simulations.

PHYS2810
Atmospheric Physics
School of Physics
UOC3  HPW2
Prerequisite/s: PHYS1002 or PHYS1022 or PHYS1149 or PHYS1111 or PHYS1221 or PHYS1231 or PHYS1241 or PHYS1889 or GEOG1701 or GEOG1701 and MATH1021 or MATH1231 or MATH1079 or MATH1031; Excluded: PHYS2801.

Atmospheric composition, thermodynamics of dry and moist air, stability, cloud physics, atmospheric electricity, radiation laws, solar and terrestrial radiation, applications, ozone hole, atmospheric energy transport, 1D and 3D climate models, applications, global warming.
**PHYS2939**

*Physics 2 (Electrical Engineering)*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* PHYS1231 or PHYS1241 or PHYS1969 or PHYS1002.

**PHYS2969**

*Physics of Measurement (Geomatic Engineering)*  
School of Physics  
UOC3 HPW3  
*Prerequisite/s:* PHYS1998 or PHYS1189

**PHYS3010**

*Quantum Mechanics (Advanced)*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* PHYS2021 or PHYS2040;  
*Corequisite/s:* MATH2120;  
*Excluded:* PHYS3210.

Fundamental principles; the Hydrogen atom; angular momentum; stationary and time-dependent perturbations; semi-classical radiation theory; variational methods; systems of particles; the Helium atom; matrix formulation.  
*Note/s:* Not available without a mark of 65 or greater in PHYS2040.

**PHYS3020**

*Statistical Physics*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* PHYS2060 or PHYS2011;  
*Excluded:* PHYS3021.

**PHYS3030**

*Electromagnetism (Advanced)*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* (PHYS2011 or PHYS2050 or PHYS2934) and MATH2011 or MATH2111 and MATH2120 or MATH2130 and MATH2520 or MATH2620;  
*Excluded:* PHYS3230.

Electromagnetic fields; Maxwell's equations, Poynting theorem, potential formulation. Plane waves, reflection and transmission. Emission of radiation from accelerating charges, scattering and propagation of radiation in material media. Extended review of special relativity and its relations to electromagnetism.  
*Note/s:* Not available without a mark of 65 or greater in PHYS2050.

**PHYS3040**

*Experimental Physics A1*  
School of Physics  
UOC3 HPW4

A selection of experimental investigations in areas including: chaotic motion, high temperature superconductivity, semiconductors, electron and tunneling microscopy, X-ray and electron diffraction, laser physics and holography, optical fibre technology, Fourier optics and transform spectroscopy, magnetic measurement techniques and resonance imaging, electromagnetic waves and waveguides, nuclear counting techniques and neutron activation, vacuum techniques. Formal scientific report writing.  
*Note/s:* Some experiments assume knowledge of PHYS2030, PHYS2040 or PHYS2050.

**PHYS3050**

*Nuclear Physics*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* PHYS3010 or PHYS3210 at a Credit average or above.

Nuclear shell model; theory of beta decay; the deuteron, nucleon-nucleon scattering; theories of nuclear reactions, resonances; mesons and strange particles, elementary particle properties and interactions; symmetries and quark models; strong and weak interactions.

**PHYS3060**

*Advanced Optics*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* PHYS1002 or PHYS1221 or PHYS1231 or PHYS1241;  
*Corequisite/s:* MATH2120 or MATH2130

Review of geometrical optics, including ray tracing, aberrations and optical instruments: physical optics, including Fresnel and Fraunhofer diffraction, transfer functions, coherence, auto and cross correlation: applications of optics, including fibre optics, lasers and holography.  
*Note/s:* This course may also be studied via distance education.

**PHYS3070**

*Experimental Physics A2*  
School of Physics  
UOC3 HPW4

As for PHYS3040 Experimental Physics A1.  
*Note/s:* Some experiments assume knowledge of PHYS2030, PHYS2040 or PHYS2050.

**PHYS3080**

*Solid State Physics*  
School of Physics  
UOC3 HPW2  
*Prerequisite/s:* PHYS2021 or PHYS2040;  
*Corequisite/s:* PHYS3010 or PHYS3210, PHYS3020;  
*Excluded:* PHYS3021.

Free electron model of metals, Bloch states and energy bands, reciprocal space and the Fermi surface, electron dynamics, Landau levels. Crystal structure, Brillouin zones, elementary diffraction theory, bonding, cohesive processes, impurity states, impurity conductivity. Lattice vibration, monatomic and diatomic chain, acoustic and optic phonons, Einstein and Debye models, dielectric effects. Recommended corequisites PHYS3010 or PHYS3210 and PHYS3020.

**PHYS3110**

*Experimental Physics B1*  
School of Physics  
UOC3 HPW4

A selection of experimental investigations in areas including: chaotic motion, high temperature superconductivity, semiconductors, electron and tunneling microscopy, X-ray and electron diffraction, laser physics and holography, optical fibre technology, Fourier optics and transform spectroscopy, magnetic measurement techniques and resonance imaging, electromagnetic waves and waveguides, nuclear counting techniques and neutron activation, vacuum techniques.  
*Note/s:* Some experiments assume knowledge of PHYS2030, PHYS2040 or PHYS2050.

**PHYS3120**

*Experimental Physics B2*  
School of Physics  
UOC3 HPW4

As for PHYS3110 Experimental Physics B1.
PHYS3160
Astrophysics
School of Physics
UOC3 HPW2
Prerequisite/s: PHYS2021 or PHYS2040

PHYS3170
Cosmology and Instellar medium
School of Physics
UOC3 HPW2

The interstellar Medium; Radiative Transfer; local thermodynamic equilibrium, ionization and recombination; emission lines; dynamics; shock waves; HII regions; supernova remanants. The expanding universe; newtonian cosmology; the cosmological parameters; problems with the standard Big Bang; inflation, cosmic microwave background radiation. Note: Offered in odd years only.

PHYS3210
Quantum Mechanics
School of Physics
UOC3 HPW2
Prerequisite/s: PHYS2021 or PHYS2040;
Corequisite/s: MATH2120 or MATH2130;
Excluded: PHYS3010.

As for PHYS3010 Quantum Mechanics (Advanced), but treated in less depth and excluding matrix formulation.

PHYS3230
Electromagnetism
School of Physics
UOC3 HPW2
Prerequisite/s: (PHYS2011 or PHYS2050 PHYS2939) and MATH2011 or MATH2111 and MATH2120 or MATH2130;
Excluded: PHYS3030.

As for PHYS3030 Electromagnetism (Advanced), but treated in less depth.

PHYS3310
Physics of Solid State Devices
School of Physics
UOC3 HPW2
Prerequisite/s: PHYS3080 or PHYS3021

Review of electronic structure in semiconductors; p-n junctions; bipolar and field effect transistors including formation, characteristics and electrical breakdown. Optical devices including light emitting diodes and junction lasers. Integrated circuit structures.

PHYS3410
Biophysics 2
School of Physics
UOC3 HPW2
Prerequisite/s: PHYS2011 or PHYS2060 and PHYS2410

PHYS3510
Advanced Mechanics, Fields and Chaos
School of Physics
UOC3 HPW2
Prerequisite/s: (PHYS2001 or PHYS2010) and MATH2011 or MATH2111

Lagrange's equations and applications, variational principles, dissipative systems, Hamiltonian formulation, canonical transformations, Poisson brackets, Hamilton-Jacobi equation, continuous systems and fields, stability and chaos.
Honours programs consist of advanced lecture subjects and project work. Students normally undertake two separate projects during the year, in different research areas. All students take subjects in quantum mechanics, statistical mechanics, solid state physics and electromagnetism and the standard model. Additional subjects are chosen from topics such as astronomy, molecular physics, condensed matter physics and quantum field theory. 

**Note/s:** For the combined Physics/Geology Honours see entry under course code BSSM4103. Admission to the Honours program is at the invitation of the Head of School and normally requires at least a Credit average in Year 3.

### PHYS4411 Medical Physics

**School of Physics**

**UOC3 HPW2**

**Prerequisite/s:** PHYS2021 or PHYS2040

**Note/s:** Enrolment restricted to program 3973 Medical Physics.

### PHYS4413 Medical Physics Projects

**School of Physics**

**UOC9 HPW9**

These projects for final year Medical Physics students will be in areas such as Radiotherapy, Nuclear Medicine, Medical Imaging or Biophysics. Generally carried out in a hospital environment under the supervision of a practising medical physicist but may be carried out in the university or elsewhere, if suitable facilities available. Students required to submit a written thesis and present a seminar describing their project work.

**Note/s:** Enrolment restricted to program 3973 Medical Physics.

### PHYS4949 Advanced Topics in Physics

**School of Physics**

**UOC6 HPW4**

Typically this course would be a combination of one of the Physics Honours courses plus additional laboratory work from PHYS3040, PHYS3070, PHYS3110 or PHYS3120. This course is restricted to student enrolled in program 3644

### PHYS4979 Photonic Devices

**School of Physics**

**UOC6 HPW4**

Introduction to non-linear optics, modulation of light, types of optical detectors, optical light sources. A selection of experiments using techniques and instruments connected to fibre optics and photonics.

### PLAN0081 Work Experience

**Planning and Urban Development**

**UOC24**

As a key part of their planning degree, students must undertake 48 weeks of approved employment related to the professional objectives of the Planning and Urban Development Program: for example, in private development companies, planning consultancies, state government departments and agencies, or with local councils. This is normally undertaken in the twelve months following the end of Session 1 of Year 3. The Program Head must approve the type of employment proposed.

The requirements of courses PLAN0081 and PLAN0082 Work Experience must be successfully completed before a student will be permitted to graduate. Assessment components include documentation and submission of a work experience diary, a reflective report and participation in a compulsory seminar.

### PLAN0082 Work Experience

**Planning and Urban Development**

**UOC24**

As a key part of their planning degree, students must undertake 48 weeks of approved employment related to the professional objectives of the Planning and Urban Development Program: for example, in private development companies, planning consultancies, state government departments and agencies, or with local councils. This is normally undertaken in the twelve months following the end of Session 1 of Year 3. The Program Head must approve the type of employment proposed. The requirements of courses PLAN0081 and PLAN0082 Work Experience must be successfully completed before a student will be permitted to graduate. Assessment components include documentation and submission of a work experience diary, a reflective report and participation in a compulsory seminar.

### PLAN1011 Urban Society

**Planning and Urban Development**

**UOC6 HPW3**

The primary objective of this course is to encourage students to critically consider their understanding of the society in which they live. Students are introduced to different sociological perspectives that have been used to describe and analyse aspects of contemporary urban society and the way in which the sociological imagination can inform an understanding of urban life. Of central concern are the origins, theoretical traditions and contemporary debates of sociology. Issues of social equity, social class, technological change, ideal and imagined communities are canvassed underpinned by an interest in the role of planning in managing change and community development. The course is structured around a combination of lectures, weekly readings, and occasional audio and visual materials, with a variety of assessment tasks.

### PLAN1042 Local Planning

**Planning and Urban Development**

**UOC6 HPW6**

This course is an introduction to local planning processes. It focuses on theoretical understandings and practical knowledge needed by planners working on local issues. The course is set in the broad context of the notion of the ‘local’ and its importance for communities and individuals. The identification of local planning issues, competing stakeholders, and strategies that planners can use to deal with conflicting local demands are considered. Students are exposed to these issues through lectures, class exercises, readings and field trips. Critical observation skills are developed during field trips. Basic planning research is undertaken in a group setting. Key readings in locality studies, communication, conflict resolution, and stakeholder identification/interests, help students to bring theoretical understandings into current practice. Assessment is based on class participation, reading set texts, group projects on field excursions and a final examination.

### PLAN1052 Quantitative Methods

**Planning and Urban Development**

**UOC6 HPW6**

An appreciation of the range, utility and meaning of quantitative research techniques is a fundamental part of the planner’s methodological training. This course provides an introduction to basic techniques of data collection and analysis, introductory statistics and survey research. The course is structured around a series of lectures, supplemented by readings, exercises on questionnaire design, and computer exercises to familiarise students with Statistical Package for Social Sciences (SPSS) for Windows. Most of the SPSS exercises make use of real, planning-related data sets. Instruction is through lectures and computer laboratory sessions.
PLAN1101 Understanding Design
Planning and Urban Development
UOC6 HPW6

The course is an introduction to urban design principles and basic design skills targeted specifically at planners. It involves an introduction to the basic vocabulary of planning and design terminology, exploration of the general principles of urban design, understanding the meaning of places and spaces, evaluation of good and bad urban design, development of basic skills of reading and interpreting maps and plans, and the creative communication of design ideas including drawing, modeling writing, mapping and presentation. Teaching involves lectures, workshops, discussions, and fieldtrips. Assessment is primarily via individual projects, group work and class participation.

PLAN1122 Development Processes
Planning and Urban Development
UOC6 HPW6

An introduction to the processes involved in property development in market economies in the context of government supervision of regulatory and approval processes. Emphasis is on the various roles of private market economies in the context of government supervision of regulatory and approval processes. Topics include examination of the nature and purposes of property development, real property law, development economics, the regulatory context, and taxation issues. Learning relies on lectures supplemented by student seminars focusing on individual projects. Assessment is based on individual assignments and seminar participation.

PLAN1241 Planning Theory and Practice
Planning and Urban Development
UOC6 HPW6

This course aims to introduce students commencing their planning studies to the principles which underlie planning as a profession, the explicit and implicit meanings of planning and its activities, some of the basic methods planners use to achieve their goals, and the interrelationships between planning, society and governments. The course familiarizes students with the social context of planning, the roles of various organizations involved in planning processes, and the relationships between planning and related development and environmental activity. It does this by way of lectures, student-presented seminars, and directed exercises, and field investigations.

PLAN2032 Urban Design
Planning and Urban Development
UOC6 HPW6

The role of urban design is to unite the partnership between planning and design to help improve the quality and sustainability of the built environment. This course provides an introduction to and basic understanding of urban design methodologies in relation to current planning practice. Taking off from an appreciation of the fundamentals of design, topics include site investigations, defining urban structure, enhancing the public realm, understanding building typologies, and controlling built form. The course is structured around lectures, methodological instruction, discussions, case studies, site visits, and design projects. Assessments are based on individual and group projects. Students submit projects in written reports and oral presentations, supported by drawings, sketches and images.

PLAN2041 Integrated Planning 1 - Communication in Planning
Planning and Urban Development
UOC6 HPW6

The course targets a range of communication skills required of planners in practice and is designed to enhance student expertise in the oral, written, graphic and digital presentation of planning information. Students are introduced to theories of communication as a foundation for their work. The course canvasses issues of professional writing, seminar presentation techniques, effective graphic displays, and communication of information through different media. The course is designed to encourage independent research skills as well as the team-based planning and cooperation necessary for major presentations. The major outcome is a series of multi-faceted student presentations on topics of contemporary planning interest. The course builds on acquired knowledge as the first in a series of three major courses in integrated learning and skills development.

PLAN2111 Economics of Planning and Development
Planning and Urban Development
UOC6 HPW6

This course examines the interrelationships between urbanization, planning and the sustainable management of environmental systems. It situates the potential of land use planning in resource management relative to scientific bodies of knowledge and the roles of cognate professionals. The role of environmental factors in complex planning issues is considered. The course reviews principles of ecologically sustainable development and how these may be interpreted in an urban context. Models for reporting on the ‘state of the environment’ are considered. Analytical and procedural tools for use in strategic and tactical management of the urban environment and non-metropolitan regions impacted by urbanization are introduced. Instruction is via lectures, tutorials and fieldwork.

PLAN2122 History, Heritage and the Built Environment
Planning and Urban Development
UOC6 HPW6

This course examines the interrelationships between urbanization, planning and the sustainable management of environmental systems. It situates the potential of land use planning in resource management relative to scientific bodies of knowledge and the roles of cognate professionals. The role of environmental factors in complex planning issues is considered. The course reviews principles of ecologically sustainable development and how these may be interpreted in an urban context. Models for reporting on the ‘state of the environment’ are considered. Analytical and procedural tools for use in strategic and tactical management of the urban environment and non-metropolitan regions impacted by urbanization are introduced. Instruction is via lectures, tutorials and fieldwork.

PLAN3015 Social Planning
Planning and Urban Development
UOC6 HPW6

This course examines the interrelationships between urbanization, planning and the sustainable management of environmental systems. It situates the potential of land use planning in resource management relative to scientific bodies of knowledge and the roles of cognate professionals. The role of environmental factors in complex planning issues is considered. The course reviews principles of ecologically sustainable development and how these may be interpreted in an urban context. Models for reporting on the ‘state of the environment’ are considered. Analytical and procedural tools for use in strategic and tactical management of the urban environment and non-metropolitan regions impacted by urbanization are introduced. Instruction is via lectures, tutorials and fieldwork.
children, youth, older people, homeless, poor, those with disabilities, and gays and lesbians. Using both key theoretical readings and practical exercises, students question their own prejudices and values and the way that these impact on their professional roles. Assessment is based on participation in class exercises, workshops and field trips, set readings, some written assignments and a group presentation.

**PLAN3031**
**Integrated Planning 2 - Strategic Planning**
Planning and Urban Development
UOC6 HPW6

Strategic planning is a dynamic, analytical, and interdisciplinary process. It can encompass comprehensive area planning, targeted problem solving, and non-physical planning scenarios. A major characteristic is the synthesis of diverse information sources and community opinions into communicable planning documents. This course provides instruction in the theory and practice of strategic planning as an integrative activity. It adopts an applied focus in considering a typical multifaceted planning issue. Examples would include environmental, town centre, open space, transportation, employment zone, redevelopment, heritage or general locality studies which might underpin local environmental planning actions. The emphasis is on individual and team research, analysis, report production, and presentation, with a significant fieldwork component. The course explicitly builds on the skills and knowledge which students have gained in other courses and is the second in sequence of three major courses in integrated learning and skills development.

**PLAN3032**
**Integrated Planning 3 - Master Planning**
Planning and Urban Development
UOC6 HPW6

This course focuses on planning frameworks for the delivery of quality urban outcomes on complex major development sites. The primary aim is for students to acquire a working knowledge and skills for planning and development using techniques of Master Planning. This is an increasingly common technique in planning practice as government and the development industry strive to create more liveable and sustainable communities. The course introduces students to the theory, processes, techniques, and politics of master plans. The focus is more than physical and other aspects covered include social capital, economic appraisal and due diligence. Students workshop the development of a Master Plan for a real world development and the third in a series of integrative planning projects, the course enables students to synthesise knowledge and skills acquired in other courses.

**PLAN3041**
**Planning Law and Administration**
Planning and Urban Development
UOC6 HPW6

The course provides an overview of the legal system and environmental planning law with particular reference to the Australian experience. The course targets three main foci: planning law, planning administration and land valuation. Planning law considers historical and theoretical issues in law and jurisprudence. The administrative context within which planning operates as a function of government is addressed, principally the role and function of statutory bodies in the planning and environment area. The property dimension covers fundamental issues of property rights, definitions of value, methods of valuation, and compensation and betterment. Lectures and seminar presentations are involved with assessment by essay and examination.

**PLAN3051**
**Development Assessment**
Planning and Urban Development
UOC6 HPW6

This course introduces students to the implementation of planning objectives via the statutory development control system, with particular reference to the NSW planning system. Various development control systems are examined, based on common law, statute and policy. Considered in detail are aspects of statutory and policy planning, the nature of environmental planning instruments, the development application process, and statutory-based development assessment. Emphasis is placed on familiarising students with the practical and creative skills required by a professional planner in undertaking various tasks involved in the development assessment process.

**PLAN3052**
**Qualitative Methods**
Planning and Urban Development
UOC6 HPW6

This course focuses on the importance of inter-personal relationship skills in planning practice. The emphasis is on developing and refining such skills to facilitate interviewing techniques for successful qualitative research, dealing with people, team building, community consultations and mediation. Basic instruction is given in interviewing technique, its use in different qualitative research situations, community consultation, mediation and related planning techniques. Students undertake a variety of class exercises to develop their skills. A major qualitative research project involves in-depth interviewing, transcription preparation, data analysis, and reporting of findings. Students have the opportunity to reflect on and share experiences. Assessment is based on participation in class discussions and exercises, a major research project and reading set texts.

**PLAN4031**
**Research Design**
Planning and Urban Development
UOC3 HPW3

Consideration of issues of research design in planning studies that seeks to integrate a range of relevant methodological issues into a foundation for major research investigations. The primary focus is on the substantive research project in the final year of the planning degree. The course considers fundamental epistemological questions about research paradigms, explores the realities of the research process, and covers practical topics such as writing and presentation. Students gain an understanding of the conceptual, methodological, and technical bases for the construction and delivery of research projects. Lectures, tutorials and assessments guide students toward a developed thesis proposal and plan of study.

**PLAN4121**
**Spatial Policy**
Planning and Urban Development
UOC6 HPW6

Collective efforts to influence land use change and the structure and behaviour of spatial activity systems in their environmental, social and economic dimensions take place at different geographical scales. This advanced course focuses on the supra-local - regional - scale: that is, metropolitan sub-regions, metropolitan regions as a whole, and non-metropolitan regions. The emphasis is primarily on the metropolitan scale where the conditions requiring spatial planning are most in evidence. The course addresses the organization of government and public-private relationships in achieving spatial planning objectives. While the empirical focus is primarily on the Australian scene the principles apply internationally and reference is made to international cases. Instruction employs lectures and class discussions. Assessment is via research papers and student presentations.

**PLAN4132**
**Thesis Project**
Planning and Urban Development
UOC12 HPW2

Prerequisite/s: PLAN4031

A major research project is the culmination of the undergraduate planning program. The form of the project is most conventionally a written thesis. The option of incorporating a significant multi-media (e.g. CD-ROM) component may be approved. The thesis project is an individual study taken with the object of allowing students to acquire more specialised knowledge. The range of topics and the methodology is flexible, but a rigorous approach is required. A thesis proposal is developed in the complementary course PLAN4031. While most research, analysis and final preparation may be done off-campus, students are required to maintain close contact with their advisers.

**PLAN4142**
**Professionalism, Ethics and Politics**
Planning and Urban Development
UOC6 HPW6

This course focuses on professional and political skills required by a professional planner in undertaking various tasks involved in the development assessment process. Planning involves participation in class exercises, workshops and field trips, set readings, some written assignments and a group presentation.
This course in the final session of the final year of the planning degree addresses vital issues surrounding the professional planning practice. It equips students to think more critically of planning (particularly as a function of the state) and their role as future practitioners. Students develop an advanced understanding of the fundamentals of professional practice in terms of ethics, standards, negligence, as well as common tasks such as responding to a consultant's brief, managing a project, and preparing for court work. Hands-on skills are discussed in the broader context of philosophical positions, planning trends, and broader societal environment in which planning practice is situated. Lectures, workshops, and seminars from visiting professionals are employed.

PLANS222
Regional Policy
Planning and Urban Development
UOC3 HPW4

Collective efforts to influence land use change and the structure and behaviour of spatial activity systems in their environmental, social, and economic dimensions take place at different geographical scales. This advanced course focuses on the supra-local - regional - scale: that is, metropolitan sub-regions, metropolitan regions as a whole, and non-metropolitan regions. The emphasis is primarily on the metropolitan scale where the conditions requiring spatial planning are most in evidence. The course addresses the organization of government and public-private relationships in achieving spatial planning objectives. While the empirical focus is primarily on the Australian scene the principles apply internationally and reference is made to international cases. Instruction employs lectures and class discussions. Assessment is via research papers and student presentations.

POL1002
Power and Democracy in Australia
School of Politics and International Relations
UOC6 HPW3

Explores Australian democracy starting with the basic premise that the notion of democracy is complex and sometimes contradictory. Democracy is heralded in Australia and across the world as an inherent good because it is rule 'of the people, by the people, for the people'. Yet there is no simple formula to apply that will ensure democracy is a success. In Australia, democracy involves voting by all citizens to ensure the people's will reigns. But there is no such clear idea as this. Furthermore, the nature of representative democracy and political parties complicates the outcome. Different, contending groups of institutions within society can appeal to different aspects of the concept of democracy in order to justify their actions. Explores the concepts of democracy, representation, government and opposition, parties, pluralism and interest groups, the state, the High Court and the Constitution, and the electoral system.

POL1003
Australian Political Practice
School of Politics and International Relations
UOC6 HPW3

The nature and history of Australian political institutions in depth, including a study of the Australian constitution and federal structure and the role of the High Court, the political parties and the formal institutions of government (parliament, cabinet and the bureaucracy), elections and voting in Australia and pressure groups.

POL1005
Politics and Crisis: An Introduction to Western Political Theory
School of Politics and International Relations
UOC6 HPW3

An introduction to Western political theory through the study of major texts taken from distinctly different political civilisations. Each text is studied against its social and intellectual background and in the context of the political crises to which it was addressed. The main themes of the lectures concern the relationship between political theory and practice and that between language and political awareness. The texts could include Plato, The Republic; Machiavelli, The Prince and Discourses; Hobbes, Leviathan; More, Utopia.

POL1008
Politics of Post-Communist Systems
School of Politics and International Relations
UOC6 HPW3

Examines political concepts and phenomena in Post-Communist systems, with the emphasis on Russia. Background is given on the Communist period, before moving to post-1989.

POLS1017
International Relations in the 20th Century
School of Politics and International Relations
UOC6 HPW3

Excluded: INST1000, INST1300

Traces the development of international relations and its major concepts and theories through key themes and events in international history over the past century. Examines ways in which international politics is viewed, and the events, forces, and trends that provide context and justification to these theories. Introduces the major theories of international relations, as well as developments such as the Cold War and the arms race, decolonisation and revolution, globalisation, and the rise of international organisations.

POLS1018
Politics, Power, Principle: An Introduction to Modern Political Theory
School of Politics and International Relations
UOC6 HPW3

Introduces the ideas of some of the main political thinkers of the twentieth century; examines some of their main theories and concepts with particular emphasis on their views of power, of society and of the state; examines some of the main principles of justice, equity and human rights that have become current this century.

POLS2003
The Political Development of Contemporary China
School of Politics and International Relations
UOC6 HPW3

Prerequisite/s: 36 units of credit

An introductory study of Chinese politics with special attention to political issues, values, and the conflicts of interests in policy-making. Includes the development and nature of communism in China, economics and development strategy, education and culture, defence and foreign policy.

POLS2008
Power and Policy in Australian Politics
School of Politics and International Relations
UOC6 HPW3

Prerequisite/s: 36 units of credit

Examines Australian public policies in the context of contemporary theories and techniques of policy analysis. Considers the problems of government administration and decision-making in the modern state. Examines the role of the state and the impact of economic rationalism and managerialism. Focuses on a range of policy issues and areas including: economic policy, social policy, Industrial relations and industry policy, the environment, Indigenous affairs, immigration and women's policy. Encourages specialisation in specific policy areas, drawing on relevant analytical frameworks to produce policy briefs and case studies.

POLS2015
Political Language
School of Politics and International Relations
UOC6 HPW3

Prerequisite/s: 36 units of credit; Excluded: POLS3900

Tactics and strategies of political argument; rhetoric and our understanding of the political; word change, metaphor and the formation of the concepts we use in and to understand, politics.
POLS2023  
**Globalisation and Uneven Development**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: COMD2000, GLST2104, INST2400, SLSP2701

Examines the problems and political prospects of ‘Third World’ or ‘Less Developed’ countries in the context of the development of a global economic and communications system. The first part examines the historical development of the system; the second part looks at its current structure and functioning and the third part considers the specific role of less developed countries and regions within the global system.

POLS2033  
**Jews in Modern Society**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit in Arts and Social Science courses;  

Introduces students to the social scientific study of the Jews and their communities in the modern period. Focus is on the different paths of Jewish emancipation in Western societies, the impact of modernisation on Jewish life, and the significance of the Holocaust and the establishment of the State of Israel for contemporary Jewish identity. Themes include: occupational, educational, and social class transformations; religious, ethnic, and communal forms of Jewish identification; Jews and others; political allegiances; Israel-Diaspora relations; and assimilation and intermarriage.

POLS2035  
**Multiculturalism in Law and Political Theory**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Examines justifications for the recognition of cultural group identity in law and politics. Focus is on whether multiculturalism threatens or complements liberal notions of justice, equality and common citizenship. Issues include: the various meanings of multiculturalism; the sense in which “cultural rights” may be rights; and the differences between kinds of cultural groups and the kinds of state recognition, accommodation, and support to which they might be entitled. Course material is based on cases from Australia, Britain, France, and North America and on readings in contemporary political theory.

POLS2037  
**International Law: Power, Politics and Ideology**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: INST2300

International law is integral to the system of international politics. It is the medium through which states and other actors negotiate their positions on a vast array of subjects and via which politics has, over recent decades, undergone a process of globalisation. Introduces students to the alternative approaches to analysing the political role of international law and examines the role of international law in particular case study scenarios.  
**Note/s:** No prior knowledge of law is assumed.

POLS2040  
**Politics and Business**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

An examination of the relationship between business and politics at both international and national levels. The emphasis is on developed capitalist countries, but attention is also devoted to transitional, NIC and developing countries. Topics dealt with include globalisation, politics and business; corporatist relationships; business lobbying; business influence on public opinion; and corruption.

POLS2041  
**Sexuality and Power: The Social Relations of Sex and the Sexes**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit  
Excluded: POLS3049, WOMS2006

Introduces some of the main theories of power and of sexuality; analyses different sexualities, and issues relating to sexuality, in the context of theories of power. Topics include compulsory heterosexuality; the construction of masculinity, femininity and desire; marriage and prostitution; sexuality and work; body politics; and pornography and popular culture.

POLS2046  
**Political Rhetoric**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Introduces students to the study of political rhetoric and the art of speech-making. Explores rhetorical theory including informal reasoning, aesthetic evaluation, prose style and an array of commonly used argumentative strategies. Focuses on political oratory in the twentieth century.

POLS2047  
**Human Rights and Wrongs in Australia**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: POLS1019

Examines the human rights debate in Australia by first examining the idea of human rights and the international human rights system. Considers mechanisms within Australia to promote and protect human rights, and examines case studies including IVF, refugees, indigenous land rights, hate crimes and free speech.

POLS2048  
**International Security**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit;  
Excluded: GLST2106, POLS3023

Examines the concept and practice of security in international relations. Examines theories of security, before addressing central actors to the security project such as states, institutions and civil society forces. Then considers key issues for security in international politics, including traditional conflict; humanitarian crises; environmental change; population movements and terrorism.

POLS2051  
**Gender, Power and Politics in Australia**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Examines Australian political practice from a feminist perspective. Focuses on the gender dimensions of a range of political institutions including the constitution, Parliament, the bureaucracy, the judiciary and the media. Explores the effect that gendered norms in political practice have in women’s lives and on women’s political experiences. Considers specific areas of policy, political institutions and political practice such as work and family policy, representation and the feminist policy machinery.

POLS2052  
**Activism and Public Policy**  
School of Politics and International Relations  
UOC6  HPW3  
Prerequisite/s: 36 units of credit

Examines the relationship between social movements and the policy process in contemporary Australia. Social movements studied will include the women’s movement, the environment movement, the lesbian and gay rights movement, the anti-capitalist movement, and the men’s rights
movement. Concepts such as opportunities and constraints, institutionalisation and cooption will be explored within a framework of social movement theory that asks whether social movements can still be considered legitimate actors in the policy process.

POLS3024
Australian Foreign Policy
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at Credit level, Excluded: GLST2106, POLS2048

An examination of the foreign policy making and implementing processes in Australia; traditions, assumptions and perceptions; actors and audiences; interests and issues; incentives and constraints.

POLS3028
Perspectives on US Politics: The American President
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at 70% average.

A study of modern US Presidents and theories of presidential power and what makes for successful and unsuccessful presidencies.

POLS3034
Conflict and Continuity: Issues in Australian Politics
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at Credit level, Excluded: GLST2106, POLS2048

Explores persistent tensions which, after one hundred years of federation, remain unresolved in Australian politics. Focuses on both the social forces and the institutional framework that underpin the Australian political system. Students can develop an in-depth research project in the field of Australian Politics. This could be in any significant subfield including federalism, electoral politics, political parties, social movements, policy analysis or governance.

POLS3040
Early Political Texts
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at Credit level, Excluded: GLST2106, POLS2048

An examination of Thomas Hobbes’s Leviathan (1651), its contexts, the controversies surrounding its reception and some of the uses to which it has been put in the twentieth century. Leviathan is, by general consent, the most important work in political theory written in the English language, but it is more than a political theory; it is an argument about philosophy, science, language, human psychology and religion. It is a work of rhetoric and satire and it is one of the great prose works of English. It thus evokes a range of contexts, of the Reformation, the Scientific revolution, the British and French Civil Wars, the humanism of the Renaissance. On publication it proved highly controversial. It was largely overlooked in the nineteenth century but in our own it has been re-discovered as central to the understanding of political civilisation. It is still as controversial, though for different reasons, as it was in the seventeenth century. Studying it is a way into our own civilisation as well as Hobbes’s own world.

POLS3054
Theorising International Political Economy
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at Credit level; Excluded: INST3001

Introduces key perspectives and central issues in the study of international political economy. Establishes links between theories about the relationship of politics and economics, and the analysis of key structures and processes in the world economy. Explores the theories and concepts designed to investigate the expansion and globalisation of a world economy. Key substantive issues include state-firm relations, production, international trade, and monetary relations.

POLS3055
Prime Ministers & Leadership
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at 65% average; Excluded: POLS2038.

A great deal of what is called politics in Australia is identified with political parties and, ultimately, with prime ministers. Popular and media views identify the prosperity of Australia, various events and the achievements of a Federal government with success or failure of the Prime Minister. Hence, there are a great many people who discuss the so-called ‘presidentialisation’ of Australian politics. But do prime ministers have as much power as is popularly conceived? This course is based on the old political theme of agency versus structure. How much can one individual achieve as prime minister when he/she is dependent on a political party and a cabinet which include powerful allies? How much has the process of socialisation in a party shaped the aspirant? What style of leadership must a prime minister present to the electorate?

POLS3910
The Art of Political Science
School of Politics and International Relations
UOC6 HPW3
Prerequisite/s: 18 units of credit in POLS at 65% average; Excluded: POLS3056.

Is political science like the natural sciences in terms of its aims and methods? Or is it more like journalism or perhaps interpreting a text? Examines debates in political science over its subject matter and mission, and over what political knowledge is and how it is acquired. The focus is on ‘landmark’ studies in political science and influential works in the philosophy of science. Topics include the nature of political phenomena and political explanation; different approaches to political research; and how contending theories and knowledge claims may be evaluated.

POLS4000
Politics and International Relations Honours (Research) Full-Time
School of Politics and International Relations
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in POLS at an average of 65%, including at least 12 units of credit at 65% in one POLS39## and one POLS391# course and permission from Head of School.

During the Honours year, students are required: a) to undertake an original piece of research work extending throughout the year and to submit a thesis based upon it; b) to complete two coursework courses offered in the first Semester; c) to participate in the thesis workshop each week in the first Semester.

POLS4500
Combined Politics and International Relations Honours (Research) Full-Time
School of Politics and International Relations
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in POLS at an average of 65%, including at least 12 units of credit at 65% in one POLS39## and one POLS391# course and permission from Head of School.

POLY3011
Polymer Science - Theory
School of Chemical Eng and Industrial Chemistry
UOC3 HPW3
Prerequisite/s: CHEM2021, INDC2040

POLY3012  
Polymer Science - Practice  
School of Chemical Eng and Industrial Chemistry  
UOC3  HPW3  
Prerequisite/s: CHEM2021, IND2040, POLY3011  

A series of practical laboratory exercises designed to illustrate the kinetics of polymerisation and the mechanical behaviour and properties of polymers.

PSYC2201  
Human Behaviour (Science)  
School of Psychiatry  
UOC6  HPW3  

Aims to provide students with key concepts in the areas of research methods, psychology, sociology, biomedial ethics, and human sexuality; and to explore the relevance and application of these concepts to the practice of medicine. Specific topics include: scientific method; risk behaviours; stress/anxiety; mood and mood disorders; models of illness; the sexual response across the lifespan; ethical themes including research ethics, euthanasia, reproduction ethics, the doctor and the state. Encourages an understanding of human behaviour as the result of complex interactions between multiple factors, and an appreciation and respect of patients and colleagues as individuals. Emphasis is placed on practising an integrative style of problem solving, critical thinking, and on developing skills in clear professional communication. Tutorial exercises encourage teamwork and foster the development of supportive and cooperative working relationships among students. Interviewing skills are practised in the context of taking a sexual history.  
Note/s: Restricted to combined degree program 3821.

PSYC1001  
Psychology 1A  
School of Psychology  
UOC6  HPW5  
Excluded: GENB4001, GENS9001  

This course introduces the content and methods of psychology as a basic science, with emphasis on the social bases of behaviour. After an initial review of the historical foundations for the scientific study of human behaviour, several specific topics related to the social aspects of human behaviour are discussed. Specific topics covered in this course include: development, measurement of personality, theories of consciousness, and social influences on behaviour. In addition, training in the methods of psychological inquiry and basic procedures of data analysis is also provided.

PSYC1011  
Psychology 1B  
School of Psychology  
UOC6  HPW5  
Excluded: GENB4002, GENS9002  

This course introduces the content and methods of psychology as a basic science, with emphasis on the biological bases of behaviour. Specific topics covered in this course include: perception, learning, memory, motivation, emotion, and abnormal behaviour. After describing the basic phenomena within an area, the goal will be to explore the neural bases of these behaviours. In addition, training in the methods of psychological inquiry and basic procedures of data analysis is also provided.

PSYC1021  
Introduction to Psychological Applications  
School of Psychology  
UOC6  HPW4  

The approach of psychology to issues arising in the management of human affairs and to the remediation of human problems. Topics include psychology as a scientific discipline, an overview of areas such as clinical psychology, neuropsychology and developmental disabilities in which psychological knowledge is applied to help individuals to change or to function optimally, and specific areas of public concern where psychology has a major contribution to make such as education, selection, training in industry, traffic and aircraft safety, and the law. The practical component will focus on the professional and social responsibilities of psychologists.  
Note/s: Restricted to Program 3432, Bachelor of Psychology.

PSYC2001  
Research Methods 2  
School of Psychology  
UOC6  HPW4  
Prerequisite/s: PSYC1001, PSYC1011  
Excluded: GENB4004, GENB4005, GENB4007, GENB4008, GENS4004, GENS4005, GENS4007, GENS4008  

General introduction to the analysis of data by means of inferential statistics (z, t and chi square). Issues in the use of statistics (power, robustness). General features of research methodology. Laboratory and statistical traditions affecting design and control procedures. The implications of the use of inferential statistics for research methodology generally. Ethics of research and interpretation of data.  
Note/s: PSYC1001 may be taken as a corequisite.

PSYC2061  
Social and Developmental Psychology  
School of Psychology  
UOC6  HPW4  
Prerequisite/s: PSYC1001, PSYC1011  

Two strands: 1. Social - The basic principles of research and theory in social psychology, with a special emphasis on understanding how people relate to each other. Issues such as the nature of human sociability, the perception and interpretation of social behaviour, ambiguities of interpretation of interpersonal behaviour, verbal and nonverbal communication processes, impression formation and impression management and related topics will be covered. 2. Developmental - The age at which certain abilities or dispositions develop or are learned, and the processes by which developmental changes occur. Issues such as nature and nurture, continuity vs discontinuity, nomothetic vs ideographic approaches and the methods and ethics of developmental research will be covered from various perspectives - psychodynamic, biological/ethological, environmental/learning, and cognitive - developmental.

PSYC2071  
Perception and Cognition  
School of Psychology  
UOC6  HPW4  
Prerequisite/s: PSYC1001, PSYC1011  

Introduces the fundamental principles underlying human perception and cognition such as sensory coding, perceptual organisation, perception of spatial layout, perceptual learning, object recognition, attention, memory storage and retrieval, problem solving and decision making. The practical program will provide an introduction to the use of psychophysical methods, experimental approaches to the study of cognitive processes, and the application of findings in society.

PSYC2081  
Learning and Physiological Psychology  
School of Psychology  
UOC6  HPW4  
Prerequisite/s: PSYC1001, PSYC1011  

An examination of brain and behaviour relationships with emphasis on learning, memory and motivation. Topics may include habituation, sensitisation, classical/operant conditioning, basic motivations, hunger, sex aggression, neuropsychology of amnesia and normal memory.  
Note/s: PSYC1001 may be taken as a corequisite.

PSYC2101  
Assessment and Personality  
School of Psychology  
UOC6  HPW4  
Prerequisite/s: PSYC1001, PSYC1011  

Systematic measurement of various aspects of people occurs in many different settings such as clinical, counselling, legal, educational and vocational guidance, and personnel settings. An introduction to the principles and techniques of psychological measurement, including consideration of what makes tests useful, how to evaluate tests and factors that are important to consider in their interpretation. Underlying many tests is a theoretical position about personality. Discussion of how aspects of personality are operationalised and measured will enable students to
understand how tests relate to these theories. The practical program will provide the opportunity to explore the application of tests in a number of different settings.

**PSYC2126**  
*Sports Psychology*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC1001, PSYC1011

This course focuses on intrapsychic and interpersonal processes relevant to the training and practice of sport. Theories in areas such as self-perception, self-evaluation, attentional control, attribution, social comparison, group cohesiveness, leadership, and conflict management will be described and applied to the sporting context. Physiological consequences of psychological processes, and their implications for preparation and performance will be discussed. Practical classes will include consideration of issues and methods involved in assessment of relevant personality and individual differences.  
**Note/s:** Restricted to Program 3850, Bachelor of Science - Health and Sports Science.

**PSYC3001**  
*Research Methods 3A*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC2001

Analysis of variance for single factor and multifactor designs. MANOVA model analyses of repeated measures data. Simultaneous inference procedures for contrasts defined on parameters of ANOVA and MANOVA models. General principles of experimental design. Analysing experimental data with the PSY program.

**PSYC3011**  
*Research Methods 3B*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC3001

Multiple regression and its application to prediction, analysis of designed experiments and construction of structural models. Principal components analysis and factor analysis. Data analysis using SPSS.

**PSYC3051**  
*Physiological Psychology*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC2001, PSYC2081

The neural control of behaviour with special emphasis on cerebral localisation of function in humans. Clinical conditions will be considered to the extent they illuminate mechanisms and theory of brain function, and the professional issues raised by different theories will be canvassed.

**PSYC3121**  
*Social Psychology*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC2001, PSYC2061  
**Excluded:** GENB4005, GENS4005, PSYC3126.

A review of the history, principles and methods, and ethics of social psychology at an advanced level. Substantive research areas such as the nature of affiliation and attraction, interpersonal relationships, the study of beliefs, values and attitudes, persuasion and processes of attitude change, social influence processes, and group behaviour, among others, will be covered.

**PSYC3141**  
*Behaviour in Organisations*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC2001, PSYC2061  
**Excluded:** GENB4005, GENS4005, PSYC3126.

The application of general psychological theories and principles to contemporary management problems. It will acquaint students with research in employee motivation, satisfaction, selection, training, evaluation, and teamwork as well as other topics in industrial and organisational psychology, including the role of the professional in organisations and in dealing with other professionals.

**PSYC31201**  
*Psychopathology*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC2001, PSYC2081

An introduction to the scientific analysis of behavioural and mental disorders. The major syndromes, focusing upon current models and theories of causation and the empirically-based evaluation of these aetiological models and theories will be described. Treatment of the disorders will be outlined, especially where modern treatment developments throw light on fundamental causal mechanisms. Professional and ethical aspects of various treatments will be considered.

**PSYC31211**  
*Cognitive Science*  
School of Psychology  
UOC6 HPW4  
**Prerequisite/s:** PSYC2001, PSYC2071

Sees the human as an amazing achievement, taking up 40% of the visual cortex. This course will consider how we see and how this reveals what is involved in a psychology of individual differences and groups, and the theories or explanations that account for them, is the study of persons from two separate, but related perspectives. The psychology of personality involves the study of the organised functioning of individuals, their traits, cognitions and motives. The expression and measurement of the consequences of psychological processes, and their implications for the origin and treatment of clinical disorders will be described.
An introduction and broad overview to the discipline of psychology and law. You will be introduced to a wide range of forensic issues, civil and criminal, drawing on cognitive, social and clinical psychological research. The goal is to demonstrate the relevance of psychological research on the development of policy and all aspects of the legal process.

PSYC3311
The Psychology of Language
School of Psychology
UOC6 HPW4
Prerequisite/s: PSYC2001, PSYC2071

One of the features that distinguishes humans from other animals is their use of a sophisticated symbolic system for communication - namely, language. This course will examine how humans cognitively represent their language system in order to successfully produce and comprehend spoken and written words. All levels of language will be considered ranging from the smallest sounds up to full discourse within context. Evidence obtained from language dysfunctions and from investigations of language development will also be considered.

PSYC3331
Health Psychology
School of Psychology
UOC6 HPW4
Prerequisite/s: PSYC2001, PSYC2061 or PSYC2101
Excluded: PSYC3356

This course aims to introduce students to some of the major theoretical and empirical work in Health Psychology. Its primary focus will be on the promotion and maintenance of health-related behaviour and the prevention of illness. The course will begin with a brief overview of core material in the discipline of psychology with an emphasis on personality, social and developmental psychology. The application of that knowledge will then cover health promotion strategies and methods (for example, improving diet-related behaviour and attitudes, initiating and maintaining exercise programs), and disease prevention skills and behaviour (for example, coronary heart disease, cancer, and smoking related problems).

PSYC3341
Developmental Psychology
School of Psychology
UOC6 HPW4
Prerequisite/s: PSYC2001, PSYC2061
Excluded: GENB4005, GEN54005, PSYC3356.

This is an advanced level course which provides an overview of theories and research in developmental psychology, with an emphasis on understanding how biological, cognitive, emotional, and social processes develop and interact. Specific topics may include prenatal growth, attention and memory, language development, cognitive development, development of attachments, moral development, and gender-role development. The implications of research in these areas for the understanding of emotional, intellectual and behavioural problems during childhood will be examined.

PSYC3516
Psychology for Optometry
School of Psychology
UOC3 HPW2

An introduction to various aspects of psychology of relevance to optometrical practice. Includes development of psychological theories, human development, social psychology, psychopathology, perceptual learning and human neuropsychology.

Note/s: Restricted to Program 3950 Bachelor of Optometry.

PSYC3526
Workplace Psychology
School of Psychology
UOC3 HPW2
Excluded: GENB4005, GEN59005, PSYC2001

An examination of the aims, methods and ethics of industrial and organisational psychology. Topics will include personnel selection, training, job analysis and design, and the relation between job satisfaction and job performance.

Note/s: Restricted to students enrolled in Bachelor of Science (Safety Science major).

PSYC4053
Psychology 4A
School of Psychology
Enrolment requires school approval UOC24

A supervised research thesis and coursework to be determined in consultation with the Head of School.

PSYC4063
Psychology 4B
School of Psychology
UOC24
Prerequisite/s: PSYC4053

A continuation of PSYC4053.

PSYM5001
Psychiatry
School of Psychiatry
UOC12
Prerequisite/s: MDSG4001

Objectives: To be aware of the key symptoms, signs and syndromes of psychiatric disorders; to be able to take a history and conduct a mental state examination; to have acquired those skills necessary for a doctor in general or non-psychiatric specialisation to decide appropriate management strategies; to be aware of, and have some experience in basic counselling skills; to be able to assess a patient’s personality, psychological adjustment, coping repertoires, social function; to appreciate the importance of psychological factors in the diagnosis and treatment of illness; to be trained in interpersonal skills appropriate to clinical practice in any area of medicine; to be aware of the appropriate sections of the Mental Health Act and Guardianship Board legislation; to have received basic knowledge in special areas of development disability, forensic psychiatry, child psychiatry, transcultural psychiatry and psychogeriatrics; to be competent in prescribing psychotropic medications; and to be able to use simple behavioural techniques such as relaxation training. Formal teaching seminars are held in the mornings and afternoons Monday to Friday in week 1, and mornings and afternoons Monday and Friday weeks 2-8. The remaining days are spent at Prince of Wales, St George, St Vincent’s, Sutherland, Bankstown, Liverpool and Campbelltown Hospitals, where small group tutorials, case conferences and video analyses are carried out with academic and clinical staff, and clinical experience is obtained. Attachments to liaison psychiatry teams are organised so that students receive the appropriate teaching of skills related to general hospital patients. Visits to appropriate community facilities and to the Forensic Psychiatry Unit at Long Bay Gaol are organised. Voluntary attachments to Illawarra and to a number of rural sites (Wagga, Lismore, Port Macquarie, Armidale, Dubbo, Albury, Coffs Harbour and Taree) occur across the term. Assessment: A video examination is held mid-term to assess interviewing skills. A written examination is conducted on the first day of the last week of term, and viva voce examinations are carried out during that week. A liaison psychiatry report and two clinical case histories are also part of the assessment.

PTRL1010
Introduction to the Petroleum Industry
School of Petroleum Engineering
UOC3 HPW3

PTRL1013
Computing for Petroleum Engineers
School of Petroleum Engineering
UOC6 HPW3
Overview of computer applications in petroleum engineering. Scientific
programming languages. Introduction to mathematical software and
spreadsheets. Basic probability and statistical concepts for geological
applications. Cross-plotting. Use of spreadsheets for well log analysis
and petrophysical evaluation. Computer contouring, Interpolation of
Petroleum economics and cash flow analysis.

**PTRL1016**
Reservoir Rock & Fluid Properties
School of Petroleum Engineering
UOC6 HPW6

- Unit A: Porosity. The fluid content of subsurface rocks. Salinity,
  permeability, fluid saturations. Darcy’s Law. The permeability coefficient.
  The measurement of permeability. The permeability of ‘Dirty’ Sands.
- Electrical and acoustic properties of reservoir rocks. The interpretation
  of fluid content data. Fundamentals of the behaviour of hydrocarbon
  fluids. PVT properties of oil-gas systems. Composition and phase diagrams
  of natural gases. Pseudo-critical properties of hydrocarbons. Surface
  tension and properties of the liquid and vapour phases. Properties of
  water and brines.
- Unit B: An integrated reservoir engineering and formation evaluation
  laboratory incorporating experiments in porosity, permeability, capillary
  pressure, resistivity of reservoir rocks and PVT properties of crude oil.
  Introduction to the API standard laboratory equipment and their processes
  in measuring the above rock and fluid properties. Sample preparation from
  whole cores of different types of rock and shale. Demonstration of differences
  of properties in different rocks by conducting various experiments. Understanding PVT properties
  of a mixture of hydrocarbon and their phase behaviour under different
  test conditions.

**PTRL1101**
Reservoir Rock Properties and Fluid Flow
School of Petroleum Engineering
UOC3 HPW3

- Porosity, permeability, saturation. Steady-state flow of compressible
  and incompressible fluids. Basic reservoir engineering concepts. Static
  pressure distribution. Capillary pressure and relative permeability. Static
  distribution of fluids and capillary-gravity equilibrium.

**PTRL2010**
Business Communications & Practices for Engineers
School of Petroleum Engineering
UOC6 HPW6

- Communication skills: Preparation of resume. Background research for
  interviews and guidelines for conduct during interviews. Preparation of
  written reports and memorandums for maximum audience impact.
  Impromptu and prepared oral presentation skills.
- Business Practices: Joint Ventures, contracts, company structures, types of interest, stockmarket
  applications. Cross-plotting. Use of spreadsheets for well log analysis
  programs. Introduction to mathematical software and
  overview of computer applications in petroleum engineering. Scientific
  programming languages. Introduction to mathematical software and
  spreadsheets. Basic probability and statistical concepts for geological
  applications. Cross-plotting. Use of spreadsheets for well log analysis
  and petrophysical evaluation. Computer contouring, Interpolation of
  Petroleum economics and cash flow analysis.

**PTRL2014**
Fluid Dynamics in Porous Media
School of Petroleum Engineering
UOC3 HPW3
Prerequisite/s: PTRL1016

- Hydrostatic pressure and geothermal gradients. Porosity-permeability
  relationships and rock microstructure. Diffusivity equation. Steady-state,
  pseudo-steady-state and transient flow. Radial flow and well models.
  Skin, partial penetration and well productivity index. Horizontal wells.
  Gas flow and Klinkenberg effect.

**PTRL2015**
Well Drilling Equipment & Operations
School of Petroleum Engineering
UOC3 HPW3

- Introduction to physical processes involved in drilling oil and gas wells.
  Rotary drilling rigs for both land and offshore operation. Drilling
  equipment including rig powering and transmission, hoisting, rotary
  systems, BOP equipment and hookup, drill pipes and collars. Drilling
  fluid circulating systems including pumps, mud tanks, mud mixtures
  and mud cleaners. Elements of rock mechanics and its application in
  drilling. Selection of drill bits and penetration rate optimisation. Rig
  sizing and selection. Special marine equipment.

**PTRL2016**
Introduction to Petrophysics
School of Petroleum Engineering
UOC3 HPW3

  parameters. Borehole environment. Inversion profiles and inversion
  characteristics. Hydrocarbon mobility. Acquisition of petrophysical data.
  Distribution of fluids and capillary-gravity equilibrium. Relative
  permeability, capillary pressure, rock microstructure and multi-phase
  flow. Review of oil-gas phase behaviour and fluid PVT properties. Material
  balance equations. Calculation of water influx from material balance.

**PTRL3008**
Reservoir Engineering A
School of Petroleum Engineering
UOC6 HPW3
Prerequisite/s: PTRL2014

- Capillary-gravity equilibrium and initial fluid distribution. Relative
  permeability, capillary pressure, rock microstructure and multi-phase
  flow. Review of oil-gas phase behaviour and fluid PVT properties. Material
  balance equations. Calculation of water influx from material balance.

**PTRL3009**
Reservoir Engineering B
School of Petroleum Engineering
UOC6 HPW3
Corequisite/s: PTRL3008

- Recovery factors, mobilisation, displacement and sweep efficiencies.
  Fractional flow analysis and displacement efficiency. Heterogeneity and
  gravity segregation and their effect on recovery. Water and gas coning.
  Unsteady-state field water influx calculations. Determination of aquifer
  parameters from history matching. Pseudo relative permeability and
  vertical equilibrium. Decline curve analysis.

**PTRL3013**
Reservoir Characterisation and Modelling
School of Petroleum Engineering
UOC3 HPW3

- Overview of reservoir characterisation and modelling problems. Reservoir
  mapping. 3D modelling. Univariate, bivariate and multivariate statistics
  for geological data analysis. Pattern recognition techniques. Petrophysical
  predictions from well logs. Introduction to petroleum geostatistics.
  Variograms. Kriging. Uncertainty quantification. Stochastic reservoir
  modelling. Sequential simulation. Gaussian simulation. Indicator
  simulation. Integrating seismic attributes, well tests and production data.
  Constraining reservoir models with various sources of information.
  Reservoir upgridding and upscaling.

**PTRL3016**
Field Development Geology for Petroleum Engineers
School of Petroleum Engineering
UOC3 HPW3

- Introduction to the field development geology. Impact of sedimentary
  environment and associated diagenesis on field development strategy.
  Carbonate depositional processes and their effect on reservoir
  characteristics. Identification and characterisation of reservoir flow and
  barrier units. Reservoir seals. Importance of electrolyte correlation in oil
  recovery. Identification and quantification of reservoir
  heterogeneity. 3D geological modeling. Reserves estimation. Geology
  of fractured reservoirs. Reservoir geophysics. Aquifer characterisation.
  New oil from old fields. Data planning during field development. Role
  of synergy in oil and gas field development. Case histories.

**PTRL3021**
Design Project for Petroleum Engineers
School of Petroleum Engineering
UOC6 HPW3
Prerequisite/s: CEIC2110
The design project covers all aspects of the design of processing facilities for a potentially viable oil/gas field from conceptual design and environmental impact statement preparation through to a detailed design of processing facilities. Major emphasis is placed on the preparation of piping and instrumentation diagrams. Other topics include control schemes, a HAZOP analysis, equipment layout, main power and material requirements, and project schedule and economics.

**PTRL3023**
**Formation Evaluation**
School of Petroleum Engineering
UOC6 HPW6

**Prerequisite/s:** PTRL2014, PTRL2016

**PTRL3024**
**Drilling Fluids & Cementing Techniques**
School of Petroleum Engineering
UOC6 HPW6

**Prerequisite/s:** PTRL3016

Unit A: Introduction to the basic functions and properties of drilling fluids and cement slurries. Composition and related properties of drilling fluids and cement slurries. Types of equipment and methods used in cementing operations. Drilling fluid and cement slurry hydraulics. Determination of torque and drag. Calculation of cutting transport efficiency. Placement technique of cements. Gas migration through cement columns. Unit B-Drilling and Production Laboratory: The laboratory includes measurement and control of the basic properties of drilling fluids (density, viscosity, filtration, lubricity and electrochemical properties) and cement slurries (density, viscosity, filtration, thickening time and mechanical properties). The objective of this laboratory are to demonstrate the processes involved in drilling and cementing operations, introduce laboratory techniques which are used to select and optimise drilling fluids and cement slurry and to develop interest in experimentation.

**PTRL4001**
**Integrated Oil/Gas Field Evaluation**
School of Petroleum Engineering
UOC9 HPW6

The students gain hands-on experience of the complete evaluation of an actual field offshore Australia. This course covers (a) Field Geology- an analysis of the geological characteristics of the field itself, (b) Log and Formation Test Evaluation-analyses of the properties of the reservoir(s) to enable a later analysis of the reserves, (c) a production performance analysis, (d) reservoir engineering, (e) reservoir engineering, well test analysis and simulation of reservoir(s) to predict reserves, production performance and field development options (this also involves assessing the economics of the field development options) and (f) valuing the field and formulating a bid to acquire a participating interest in the property.

**PTRL4015**
**Numerical Reservoir Simulation**
School of Petroleum Engineering
UOC3 HPW3

**PTRL4016**
**Natural Gas Engineering**
School of Petroleum Engineering
UOC3 HPW3

**Prerequisite/s:** CEIC1020

RUSS1111 Introductory Russian 1
Department of German & Russian Studies
UOC6  HPW6
Prerequisite/s: RUSS1111
A continuation of RUSS1111. Assessment: weekly assignments and tests.
Note/s: Excluded native speakers and students qualified to enter RUSS1113 or RUSS1114.

RUSS2100 Nineteenth Century Russian Classics
Department of German & Russian Studies
UOC6  HPW3
Prerequisite/s: 36 units of credit in Arts and Social Science courses; Excluded: RUSS1001, RUSS2001, RUSS1115.
Surveys the most important 19th Century Russian classics that have made an impact on the Russian and Western civilizations. Major works by selected Russian authors will be studied in English translation. Plays, short stories and novels are examined both as literary works of major importance and as a reflection of their times.
Note/s: No knowledge of Russian is required.

RUSS2111 Intermediate Russian 1
Department of German & Russian Studies
UOC6  HPW5
Prerequisite/s: RUSS1112 or RUSS1000; Excluded: RUSS2000, RUSS2001.
A continuation of Level 1 Russian language for beginners (with consolidation and extension of written and oral proficiency in Russian). Assessment: weekly assignments, tests.

RUSS2112 Intermediate Russian 2
Department of German & Russian Studies
UOC6  HPW4
Prerequisite/s: RUSS2111.
A continuation of RUSS2111. Assessment: weekly assignments, tests.

RUSS3111 Advanced Russian 1
Department of German & Russian Studies
UOC6  HPW5
Prerequisite/s: RUSS2112 or RUSS2001 or RUSS2000; Excluded: RUSS3000, RUSS3001.
Advanced grammar, translation into Russian, essay-writing and advanced oral work. Assessment: weekly assignments, tests.

RUSS3112 Advanced Russian 2
Department of German & Russian Studies
UOC6  HPW4
Prerequisite/s: RUSS3111.
A continuation of RUSS3111. Assessment: weekly assignments, tests.
Russ4000
Russian Honours (Research) Full-Time
Department of German & Russian Studies
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in RUSS courses at 65%.
Advanced language (2 hours) or equivalent plus two options and a 15,000-20,000 word thesis on a topic to be approved by the Head of Department.

Russ4050
Russian Honours (Research) Part-Time
Department of German & Russian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in RUSS courses at 65%.
Advanced language (2 hours) or equivalent plus two options and a 15,000-20,000 word thesis on a topic to be approved by the Head of Department.

Russ4500
Combined Russian Honours (Research) Full-Time
Department of German & Russian Studies
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in RUSS courses at 65%.
Advanced language (2 hours) or equivalent or one option and a 15,000-20,000 word thesis on a topic to be approved by the Heads of the participating Schools/Departments.

Russ4550
Combined Russian Honours (Research) Part-Time
Department of German & Russian Studies
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in RUSS courses at 65%.
Advanced language (2 hours) or equivalent or one option and a 15,000-20,000 word thesis on a topic to be approved by the Heads of the participating Schools/Departments.

Wa4101
Human Growth and Development
School of Art Education
Uoc4  HPW3
This course fosters the prospective teacher's understanding of secondary school students through awareness of developmental theories, processes, determinants, variations and patterns. Fieldwork provides students with opportunities to exercise observation skills, reflect and relate theoretical constructions to classroom practices. Studies of the biological, personality, social, cognitive and moral development of adolescents include theorists such as Erikson, Piaget, Kohlberg and Bandura.

SAED4043
Foundations of Art and Design Education
School of Art Education
UOC6  HPW3
This course introduces the field of art and design education using a series of key theorists, a WEBCT online workshop and an interview with an art or design teacher. A modular course structure facilitates an investigation of territories, institutions and issues in art and design education today. Transition into university life and pre-service teaching is explored through introduction to scholarly practices of writing, information literacy and database skills.

SAED4057
Making Curriculum in Art & Design
School of Art Education
UOC6  HPW3
This course introduces curriculum as a construct using current and proposed syllabuses in the Visual Arts and Design and Technology. Curriculum constructs shape understandings of art and design, classroom implementation, approaches to programming; the teacher's role; the resources used in developing learning experiences: including artists, designers, artworks and exhibitions and artwork references. Students will focus on how teachers generate content informed by personal interest and expertise, syllabus requirements and an understanding of good teaching practice.

SAED4191
Professional Experience Stage 1
School of Art Education
UOC3
Corequisite/s: SAED1402.

Professional Experience 1 is a ten-day professional attachment orienting students to the conventional practices of the teaching profession and the typical school daily routine. The in-school component focuses on students becoming familiar with teaching and learning needs of younger pupils. Students are introduced to school procedures while developing their confidence as prospective teachers. Students may extend and apply concepts and procedures introduced in SAED1402 Learning and Teaching: Practice & Structure, to prepare and implement lessons for classes in years 5/6 or 7/8 - in visual arts and/or design, working with whole classes and/or small groups.

SAED4201
Educational Psychology
School of Art Education
UOC6  HPW3
Prerequisite/s: SAED 1401
An introduction to the nature and objectives of educational psychology from a cognitive, social and ecological perspective, this course covers the nature of learning, the processes involved in social cognition and motivation, and theories of group processes in a school. Theories are applied through an analysis of the match between the teacher, the material and the student, the problems of different learning styles, the management of classrooms and principles of discipline and how these aspects contribute to planning and implementing a learning program in a positive educational environment.

SAED4202
Learning and Teaching Art & Design: Language & Communication
School of Art Education
UOC3  HPW3
Prerequisite/s: SAED1402, SAED1491;
Corequisite/s: SAED2491
This is the second in a series of three Learning and Teaching Art and Design courses. Students expand concepts and skills introduced in SAED1402 and applied in the first professional experience placement SAED1491. Course content focuses on the language and communicative demands of teaching and learning in Art and Design classrooms. The need for tutorial and instructional clarity in applying content to learning situations is explored through practical cases in the context of syllabus requirements. Students learn to extend their personal repertoire of teaching tactics through increasing awareness and development of classroom communication strategies, including language use, questioning and feedback skills.

SAED4205
Special Education in Art and Design Contexts
School of Art Education
UOC6  HPW3
Special Education in Art and Design Contexts extends and develops the pre-service teacher's experiences, attitudes and understandings of students with special and/or high support needs in the secondary school. Through in-class workshops, field trips, and hands on projects, students enhance their understanding of ways in which art and design can enhance the educational experiences of the special needs student. The Life-Skills component of syllabuses in Visual Arts, Design, and related subjects are introduced with regard to provision of appropriate experiences for students with special needs. The course, following a non-categorical approach, includes consideration of the psychology and special educational needs of students with mild and moderate intellectual disabilities and those with physical disabilities. It also includes the diagnosis and description of physical and learning disabilities and the
role of and possibilities for art and design education in providing positive, supportive and inclusive educational choices and experiences for all students.

**SAED2406**

**The Sociology of Education**
School of Art Education
UOC6 HPW3

Sociology examines the interaction between society and the individual and among socialising groups that shape behaviour. Students are encouraged to apply their knowledge of social processes for greater teacher effectiveness, to analyse and project strategies for effective student learning, to understand group processes in classrooms and appreciating the school as a social system. Significant developments in and theoretical contributions to social research are investigated.

**SAED2471**

**Histories of Australian Education**
School of Art Education
UOC6 HPW3

This course aims to develop student understanding of the social and historical forces which have shaped traditions and policy in schooling and education in Australia. Social concepts including reproduction theory, structuration and cultural capital will be used with more orthodox historical tools to analyse, critique and revise historical explanations of educational developments. The impact of intellectual modes and paradigms originating beyond the educational arena will also be explored. Some art educational trends will be identified and explained in terms of these broader intellectual and historical origins.

**SAED2472**

**Creativity in Art and Design Education**
School of Art Education
UOC6 HPW3

The course introduces students to a range of explanations of creativity drawn from the fields of philosophy, psychology, sociology and art and design education. Student will explore how creativity is applied in art, design and education practice. Investigative topics will include the creative subject, genius and creative personality; the creative process, problem solving and divergent thinking; and the product as an outcome of performance valued by its recognition within a field of practice. Through a combination of lectures, seminars, and workshops student will consider how theories of creativity inform art and design teachers' beliefs and practices affecting their views on art and design, teaching students, the artefacts produced, assessment, the HSC examination and ARTEXPRESS.

**SAED2473**

**Seminar in Art Education**
School of Art Education
UOC6 HPW3

The aim of this course is to provide a general introduction to research in art education. Through involvement in this subject students will become familiar with research bearing on major areas of interest in art education.

**SAED2474**

**Art Education and the Primary School**
School of Art Education
UOC6 HPW3

This course is designed to expand the student's knowledge of the art of the primary school child and to examine approaches to teaching art at that level. Students will examine curricula already designed for use at the primary levels and will construct programs suitable for implementation in specific environments. Through lecture and discussion groups, the course will renew the theories of development linked with children's artistic development, consider the place of art education in the primary school curriculum, and design and evaluate appropriate learning experiences.

**SAED2475**

**Multicultural Contexts**
School of Art Education
UOC6 HPW3

The course aims to explore multiculturalism, encompassing personal and professional contexts. The terrain of multiculturalism is both historically and currently contested, variously impacting policy and practice. Through lectures and seminar experiences, students will analyse the way in which race, gender, class and ethnic consciousness is produced. This consciousness, and the various conceptions of multiculturalism are examined in relation to the personal and professional contexts in which students are engaged. The course provides the opportunity for students to increase their awareness of the cultural diversity of Australia and develop their sensitivity and responsiveness to the needs of minority groups.

**SAED2478**

**Art Education and Aboriginal Studies**
School of Art Education
UOC6 HPW3

This course is designed to foster students' insights into the social and political background that has affected, and continues to affect, the educational opportunities of Aboriginal people in contemporary Australia. Through lectures, discussions, seminars and visits by Aboriginal guest speakers, this subject will examine the following topics: Aboriginal identity, Kinship, Law, Religious and Educational Systems and Land Rights. It will also explore European ethnocentricity, prejudice, stereotyping and racism. All topics will be illustrated by the works of both Aboriginal and non-Aboriginal artists.

**SAED2479**

**Dialogues and Communities**
School of Art Education
UOC6 HPW3

Through a planned series of workshops, this introductory course enables students to become familiar with some of the issues and contexts of contemporary community arts, including cultural development and democracy, cultural resources, real wealth/community value and social capital. The practice and management of selected contemporary groups, events and public art and design projects, along with more traditional applications of community arts practice as social and cultural development are explored, including the preparation of funding applications, field work and collaborative projects.

**SAED2480**

**The Art Museum and Art Education**
School of Art Education
UOC6 HPW3

This course aims to foster an awareness in students of the ideology and philosophies of art museums and an understanding of the broad educational functions of the museum including the vernacular appreciation of art and the development of a lifelong approach to learning. Students will have the opportunity to observe the educational functions of the art museum within a diversity of contexts and systematically investigate the plurality of roles which the museum performs within our society.

**SAED2481**

**Media and Communication Contexts for Art and Design**
School of Art Education
UOC6 HPW3

This course utilises contemporary theories and practices of communication to investigate the role of broadcast, print and electronic media in producing, making and transmitting knowledge and information in art and design curriculum. A series of case studies and lectures introduces key contributions to media studies (Baudrillard, Hall, Kuhn, McLuhan, Williams), theories of communication and texts (Berelston, Ellis, Fiske, Kress) social power, ideologies and discourse (Hall), reading and reception (Elliott, Giroux, Morley, Radway). Students will participate in workshops dedicated to the analysis of art, design and education media as they relate to print, radio, television, video, web and CD ROM.

**SAED2491**

**Professional Experience Stage 2**
School of Art Education
UOC3

Prerequisite/s: SAED1491;
Corequisite/s: SAED2402.
Ten days professional experience in the practices, protocols, responsibilities and ethics of the professional art educator provides students the opportunity to extend their understanding of the function and organisation of schools and teaching practice within secondary contexts. The course models a typical high school structure and the concepts and conventions of the working educator are introduced and worked through. Experts from a range of relevant educational fields are deployed to discuss policy and practice in their respective domains. These include the School Executive, the Child Protection Unit, Occupational Health and Safety, and Information Computer Technology. Students will investigate an individual school as a case study of these professional standards in practice. Each student works with a Cooperating Teacher in a negotiated program of classroom, departmental and whole school activities and responsibilities. Students with increased confidence plan and implement classes for Years 7-10 Visual Arts and Design.

SAED3402
Learning and Teaching Art & Design: Classroom Management
School of Art Education
UOC3  HPW3
Corequisite/s: SAED3491.

This is the third in a sequence of Learning and Teaching Art and Design courses. Students focus on integrating tutorial strategies introduced in Learning and Teaching courses and developed through professional experiences in schools. This is facilitated by focusing on the principles and practices of management in Art and Design classrooms through a series of clinical cases developed through a short webCT module utilising e-tutors. Capable educational management facilitates the development of positive learning communities, assured teaching performances and a productive classroom environment. Management entails student attitudes, content organisation, development and maintenance of safe working environments and teacher reflective practice in a range of art and design settings.

SAED3403
Issues in Contemporary Design Education
School of Art Education
UOC6  HPW3

Issues in Contemporary Design Education comprises an analysis and interpretation of the principal discourses shaping design education. This course examines the emergent possibilities for design education in the secondary school subject of visual arts and Key Learning Area Technology and Applied Studies, along with other curricula and educational applications. This course will facilitate the negotiation of two at times distinct fields and domains of knowledge, the fine arts and design within educational contexts.

SAED3404
Practices of Art and Design History in Education
School of Art Education
UOC6  HPW3

This course enables students to examine a range of conventions of art and design history. Fieldwork and in class debates provide real world contexts for the development of teaching strategies appropriate to pupil learning historical content in an active and authentic way. This is undertaken while developing an ability to explore and apply historical methodologies to art and design cases within the educational context of setting, student and curriculum. Students consider the educational significance of concepts of the historical event, the interpretation of artworks in cultural and historical contexts and the formation of spatio-temporal relationships among artworks.

SAED3407
Curriculum Studies in Art Education
School of Art Education
UOC6  HPW3

This course introduces and develops interpretive and critical perspectives in curriculum, with particular reference to contemporary art and design curriculum and theory and practice. Contributions to the field by significant educators and the principal theoretical positions in curriculum are examined. These orientations or ideologies are informed by the wider theoretical and philosophical contexts and related to art and design educational curriculum practice. Political, historical and institutional structures shaping curriculum contexts in visual arts and design with an emphasis on local contexts are investigated. The struggles and dilemmas manifested in the contested values of and challenges to contemporary curriculum discourse are considered.

SAED3491
Professional Experience Stage 3
School of Art Education
UOC3
Prerequisite/s: SAED2491, SAED2402;
Corequisite/s: SAED3402.

Professional Experience 3 involves further in-school professional experience. Students work in a secondary school setting selected with a view to diversifying their experience of a range of educational cultures and practices. Students are expected to extend concepts of the demands of the teaching profession introduced in SAED2491 including administration, collegial and community consultation, together with visual arts and design expertise demonstrated through completion of required classroom projects.

SAED4051
Practices of Research in Art, Design and Education
School of Art Education
UOC6  HPW3

Research is broadly conceived in this subject as a pattern of practices in which the major agencies which contribute to the research process are perceived as a mutually dependent relation. This course introduces students to the agencies of investigative practice in the humanities and social sciences and to an understanding of their role in the validation, analysis and interpretation of content within the domains of art, design and education. While practices of research in art, design and education vary widely in their instrumental and political significance it is nevertheless the goal of this subject to enable students, through the analysis of exemplars of research, to rehearse these practices in a manner consistent with an apprenticeship model of learning. In particular students will be able to integrate and apply systematically key agencies of research practice in art, design and education including - the role of explanatory theory, the functional stance of the researcher, the constraints imposed by art as the object of investigation, the use of nonomothetic and ideographic methods, and the conventions of proposal writing.

SAED4052
Theoretical Frameworks in Art and Design Education
School of Art Education
UOC6  HPW3

This course aims to introduce students to the theoretical frameworks which form the basis for the conception of visual arts education as a distinctive field. Theoretical frameworks in art education will be explained as a largely discontinuous collection of histories. These histories are united by ruling paradigms many originating outside of the field in the human sciences, and in the practices of the visual arts. Examples include psychoanalytical approaches to creativity anthropological and socio-cultural studies, and cognitive theories.

SAED4053
Curriculum in Art, Design and Education
School of Art Education
UOC6  HPW3

This course will provide students with modernist and post-modernist theoretical frameworks of curriculum evaluation and critique. Particular reference will be made to the critical methodologies of Habermas and the genealogical archeology of Foucault as appropriate to an interpretation of the visual arts in education.

SAED4055
Honours Research Project in Art and Design Education Studies
School of Art Education
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: SAED4051.

This course enables students to prepare and complete an Art or Design Education research project in a chosen area of specialisation. Students will complete a research project submitting a report, which identifies an issue or problem of art or design educational significance and
demonstrates understanding and appropriate application of selected methodologies to the investigation of the chosen problem, presented in the form of a project report of 5500-7500 words in length.

**SAED4056**
**Theories of Knowing in Art, Design and Education**
School of Art Education
UOC6 HPW3

This course aims to further students understanding of the cognitive foundation of the visual arts. It provides a general introduction to epistemology including concepts such as belief, truth, perception and representation. Reference will be drawn to recent concepts in metaphysics including, theory of mind, ontology and self. The course goes on to reposition these concepts within the assumptions of a variety of philosophical perspectives. Students will be required to examine a range of these concepts and perspectives for their relevance to the teaching of art.

**SAED4057**
**Art and Design History in Education**
School of Art Education
UOC6 HPW3

This course introduces a range of contemporary theories of art and design history. Students will examine and evaluate art-history methodologies and apply them to educational settings within the context of general education. The textual, interpretive and revisionist character of the historical act are experienced, abalysed and understood as a set of interpretive and explanatory practices which enable indentification and revision of historical narratives.

**SAED4403**
**Aesthetics in Art, Design & Education**
School of Art Education
UOC6 HPW3

Prerequisite/s: SAED 3404

This course aims to provide students with opportunities to examine aesthetics and art theory as these relate to the teaching of art and design to increase their critical awareness, to become more aware of their own philosophy of art and design education and its implications for their teaching. Through a combination of lectures and seminars the subject will investigate the ideas and aims of aesthetics in educational contexts.

**SAED4406**
**Philosophical Issues in Education**
School of Art Education
UOC6 HPW3

The aim of this course is to introduce students to contemporary philosophical theories applied to the field of education. Using the critical theories of society put forward by Jurgen Habermas students will analyse knowledge and human interests in order to critically understand a range of significant educational issues in terms of their technical, practical and critical consequences.

**SAED4472**
**Independent Study in Art, Design, and Education**
School of Art Education
UOC6 HPW3

This course provides senior student with the opportunity to explore an area of art education, which is of particular interest. In collaboration with a staff member, students undertake a study in some issue or topic in art or design education, which is not encountered in other scheduled courses. Students are expected to demonstrate initiative and organisational skills in independently pursuing the research process and reaching educational objectives through completion of a series of preliminary investigations and construction of a short critical paper arguing a position regarding the selected issue/topic.

**SAED4473**
**Politics and Identity in Art and Design Education**
School of Art Education
UOC6 HPW3

This course provides students with opportunities to examine how practices of governments are manifested in civic values and cultural policy, and influentially reflected through art and design education. The impact of cultural theory upon education and understanding within the arts will be examined as a series of traditions, habits, practices, values and expectations. Students will become familiar with the way in which concepts such as identity, subjectivity, alterity, ethnicity, gender and post-colonialism mediate relationships between artworld and popular perceptions, governmental priorities, and art and design education. Students will focus on a range of historical and contemporary cases to understand the mechanisms and manifestations of politics, identity and power in art, design and educational contexts.

**SAED4474**
**Dilemmas of Praxis: The State, the School and the Educator**
School of Art Education
UOC6 HPW3
Excluded: SAED2472, COFA4025

This course utilises the student's internship experiences as a platform to explore the ethical, political and pedagogical dilemmas entailed in the School. Students will utilise a range of contemporary perspectives to explore philosophical, sociological and political dilemmas and conflicts in the context of education. Perspectives include Althusser’s ideological state apparatuses, Gidden’s Structuration; Habermas’s communicative action; and Foucault’s notion of discourse and difference.

**SAED4491**
**Professional Experience Internship**
School of Art Education
UOC24 HPW3

During the Professional Experience Internship students make a full time teaching commitment in a secondary school. Students are required to take responsibility for several classes, including preparation of lessons and associated teaching materials, complete administration and record keeping as required by the school, including school reports, participate fully in the professional obligations of the school such as sporting and co-curricular activities, staff meetings, professional development days and community consultations. Students should demonstrate their knowledge of professional conduct required by the college and the school. Students plan, implement, evaluate and document a curriculum of ten weeks duration for a selected class. Clinical supervision methods, applied at five weekly intervals, in consultation with their cooperating teacher, identify and address their developing teaching practice. The Professional Experience Internship requires a synthesis and application of theoretical and practical understandings introduced and examined throughout the course. The Internship is supervised by cooperating teachers and jointly assessed by cooperating teachers and faculty of the School of Art Education. Students may apply for a variation of program that will entail a placement for the final two to four weeks of the Professional Experience Internship in a museum, cultural, industry, media or community setting. These placements are competitive and subject to the completion of the related Art Education Elective (consult Head of School for conditions) and the approval of the Head of School. Students should consult the lecturer in their elective orientation for further advice.

**SAHT1101**
**Mapping the Modern**
School of Art History and Theory
UOC6 HPW3

Commencing in the nineteenth-century and concluding with World War Two, this course examines seminal art and design movements and tendencies within changing social, political and cultural contexts. The material covered includes Realism, Impressionism, Expressionism, Art Nouveau, Bauhaus, and early avant-gardes such as Futurism, Dada and Surrealism. These are considered against the backdrop of industrialisation, technological transformations, colonization, international conflicts and totalitarian regimes.

**SAHT1102**
**Mapping the Postmodern**
School of Art History and Theory
UOC6 HPW3

This course examines major transformations in art and design practice and theory from the late 1940s to the present, and locates these within
changing social, political and economic contexts. Issues relating to Formalism, Pop, image and text, the _de-materialisation_ of art, and performance are addressed, as well as Feminist theories and practice, post-colonial culture, and the new technologies.

SAHT121
Theories of the Image
School of Art History and Theory
UOC6  HPW3

An introduction to ways of understanding and evaluating the making, reception and theoretical understandings of images in our culture. Different cultures and historical periods have treated images in radically different ways with different ways of understanding the way images relate to their producer(s), viewer(s) and to the world. There is also a philosophical concern with the nature of the image, how it is able to have meaning, to represent at all. How are we able to read images? Is it a natural process or culturally determined? These issues will be addressed by critically examining the different ways of understanding the artistic image in Western and Non-western arts, and in crucial developments in Western art history (including Renaissance perspective; the invention of photography; photo-mechanical reproduction; Modernism and abstraction; and feminist critiques).

SAHT122
Theories of Art History and Culture
School of Art History and Theory
UOC6  HPW3

Introduces art history and cultural analysis as forms of narrative, which aim to explain and integrate cultural objects into historical or other order. Draws upon and critically assesses the key methodologies (such as connoisseurship, periodisation, formalism, iconography, historicism and historical materialism, social history, psychoanalysis, semiotics, high culture/popular culture, ethnocentrism, and feminism). These methodologies will be examined by reference to such historians as Wolfflin, Panofsky, Gombrich, Baxandall, Fry, Antal, Clark, and Pollock.

SAHT124
Methods of Research and Writing on Art
School of Art History and Theory
UOC6  HPW3

This course is primarily concerned with the teaching of skills necessary to conduct specific research projects. The focus is on methods of researching primary material as well as locating archival documentation, in order to evaluate and effectively utilise different forms of visual and theoretical evidence for research projects. Topics include field work methods, such as oral history, together with knowledge of indexing procedures, statistical analysis and the utilisation of computer resources, as well as critical methodologies for appraising research material. The course also includes topics to address the logical construction of a valid argument, the rhetorical promises of different genres of writing and the delineation of ideas.

SAHT1211
Contexts for Art
School of Art History and Theory
UOC6  HPW3

The course exposes students to the different types of contemporary art exhibited locally - in public galleries, dealer galleries, contemporary art spaces, artist run initiatives, community centres and non-art spaces such as shopping malls. Designed to reflect the diversity both of art and the institutions through which it is viewed, this subject is structured around an examination of works in situ. Students are encouraged to engage with work in relation to specific contexts, to consider issues of taste and value and how these are mediated by place and modes of display.

SAHT1222
The Production of Art
School of Art History and Theory
UOC6  HPW3

The emphasis in this course is on a behind the scenes exposition of art. It looks critically at the processes by which visual art is made available to viewing publics. These processes take into account a range of concerns (practical, strategic, ideological) that vary widely between institutions. Students are introduced to various professional art practices, through the processes of curating, managing, catalogue writing and production, exhibition display and handling of works. The infrastructure of the art industry, including the administration of State Museums and other art organisations, such as funding bodies, are presented as a subject for practical purposes, as well as critical consideration.

SAHT1301
Design History, Theory and Aesthetics 1
School of Art History and Theory
UOC6  HPW3

This course provides an overview of design history from the early modern period through to Postmodernism. The theories and strategies employed by industrialists, designers, philosophers and artist/designers will be explored. An understanding of elements and principles of design, and the role that design plays in the evolution of market systems along with its emergence as a powerful tool for national and cultural identity, will be investigated. Key moments in design history - designers, movements, innovations etc. - are considered against the backdrop of industrialisation, technological transformations, colonisation and international conflicts. The theories, practices, aesthetics, cultural and economic considerations employed by 20th Century designers will be explored both from a formal elements and principles base and a socio-political standpoint. Within these parameters 20th Century design movements, styles, manufacturers and retailing will be considered to assist students to understand the designer's role in society as well as to provide a context for the analysis of their designs.

SAHT1627
Aboriginal Art
School of Art History and Theory
UOC4  HPW2

This course will provide an historical overview of the variety of Aboriginal Art Forms that were practiced prior to European invasion; traditionally-based art forms that are still practised in the more remote parts of Australia and the innovative art forms that have developed in contemporary Aboriginal Australia. It will examine the ethnocentrism of European thinking that can inhibit appreciation of Aboriginal art and will address the problem of appropriation of Aboriginal imagery.

SAHT2103
Aesthetics for Contemporary Practice
School of Art History and Theory
UOC6  HPW3
Prerequisite/s: SAHT1101 or SAHT1102.

This course will critically examine the many interrelationships between artistic practices and critical, aesthetic and theoretical issues that have arisen out of them and been used to frame and comprehend them. The overall aim of the course is to give students a critical understanding of the central philosophical and conceptual underpinnings of art practice and theory particularly from the 18th century as well as an understanding of how research into these underpinnings is undertaken. Romantic, Modernist and Postmodernist art practices and artists are examined in the context of these framing theories of art practice and reception.

SAHT2221
Eurocentred Visions: Grand Narratives in Western Art
School of Art History and Theory
UOC6  HPW3

To tell progressive stories about Western art, _grand narratives_ were constructed. In these _grand narratives_, as this course reveals, Eurocentric and ethnocentric historical material was ordered into stories about Western nations becoming more and more civilised as signified by the development of perspective, the _Classical_ canon, landscape and cityscape, portraiture and the nude from Ancient Greece to Modernism. Positioned as peripheral to this evolution or merely a subtext to these grand narratives, Non-Western art, particularly that of Islam, was either excluded or misrepresented as uncivilised, regressive and barbaric. Issues of cultural difference capable of disrupting the seamless flow of Western art’s evolution, such as gender relations, sexualities, ethnicities, nationhood, diaspora, work, patronage and money, criminality and disease, were disavowed. To deconstruct these _grand narratives_, this course will use these exclusions and denials as its tools.
Drawing upon interdisciplinary models for reconstructing history provided by Michel Foucault, Edward Said, Jonathan Crary and Abigail Solomon-Godeau, amongst others, it will explore how to rewrite histories of art in relation to non-western art, homoeroticism, manhood and the ‘heterosexual imperative’, prostitution and ‘the venereal peril’, health, disability and hysteria, the alienated and displaced, the ‘orientalised other’, the nuclear family and ‘docile bodies’.

SAHT2212
Art and Cultural Difference
School of Art History and Theory
UOC6 HPW3

The conceptualisation of difference, diversity and multiplicity, both within and across cultural boundaries, has occupied a central position in the historical trajectory of Art, particularly since the end of World War II and the advent of a variety of neo and postcolonialisms. Topics covered include the relationship of theories of ethnicity, gender, race, class, culture, knowledge and power to the complex history and practices of art. These will be addressed by critically examining Adorno, Benjamin, Freud, Irigaray and Marx, and theorists and artists of colonial struggle such as Káhlo, Rivera, Sartre and Fanon. The implications for art of such contemporary issues as multiculturalism will also be included.

SAHT2213
Memory and Self
School of Art History and Theory
UOC6 HPW3

This course traces contemporary ideas of body and subjectivity through the work of a range of artists and writers. Its major focus is on the experience of memory and self-understanding. It addresses the questions of how memory is constituted and how it is crucial to our sense of self; how memory affects our relations to images and objects, and how memory is represented. Themes include: horror and humour, gesture, performativity and mimesis. Contemporary art and writing practices will be used as the basis for a creative engagement with theoretical ideas.

SAHT2214
Approaches to Australian Art
School of Art History and Theory
UOC6 HPW3

This course introduces some of the preoccupations of Australian art in the years since colonisation. Issues to be discussed include: the notion of the artist as a recorder in the 19th century and a tourist in the 20th; the search for a ‘Great’ Australian artist; national identity and art; links between art and commerce; the idea of ‘modern’ in an Australian context; and attempts to place Australian art in an international context.

SAHT2215
Theories of Colour in Art, Design and Culture
School of Art History and Theory
UOC6 HPW3

This subject explores theoretical frameworks within which the content, meaning, aesthetics and impact of digital and new media practice can be critically analysed and evaluated. Topics covered include metaphors of convergence and divergence that structure digital media and aesthetic production; interfaces (particularly the interface between the body and technology), theories of the real, virtuality, materiality and immateriality, and concepts of post-media and software aesthetics. Experimental, innovative and conceptually sophisticated practitioners and current critical debates and theories relating to digital media are considered.

SAHT2216
Queer Art and its Histories
School of Art History and Theory
UOC6 HPW3

This course examines the fluid definitions of “queerness” and the implications they have for the study and production of art. Queer theories posited by theorists, such as Sedgwick, Butler, Jagose, Edelman, Halperin, Berlant and Warner, and White will be studied in terms of their application to visual culture. Such a preliminary study will demonstrate that queer theory does not infer the “presence” of homosexuality in art or our readings, but references the ongoing instabilities by which art can be read as canonical, normative, or “straight”. This course will gesture to “post-queer” theories and politics that suggest readings of sexuality and surfacings of sexuality in art are frustrated by shifting cultural histories. Whilst this course will examine artists - such as Michelangelo, Caravaggio and Caillebotte - to examine the role that sexuality played historically in their representations of the body and its environments, we will explore other artists in terms of their self-fashioned queerness. These artists include Andres Serrano, Felix Gonzalez-Torres, David Wojnarowicz, Zoe Leonard, Nayland Blake, Ross Bleckner, Kiki Smith, Gilbert and George, Scott Redford and “art2go.”

SAHT2217
Spanish Art and Culture: From the Golden Age to Surrealism
School of Art History and Theory
UOC6 HPW3

This course examines the significant body of Spanish painting produced from roughly 1450 to 1950. This course examines the impact of Spain’s “Golden Age” on the production of art and the conversance that Spanish art established with other schools of painting throughout Europe, particularly Italy and Flanders. Historically, we will examine the significance that the development of other nations had upon Spain’s aesthetics and its own perceptions of a unified, successful nation-state. Topics discussed include geographic influences on the development of art and design, the relationship between Christian art and Mozarabic and Mudejar art, Spanish realism and religious ecstasy, the Age of Enlightenment, architecture and the “churriguerezque,” Romantic art and representations of catastrophe, post-impressionism and “fuminismo,” and the art and philosophy of the Generation of 1898 and the Generation of 1927. Some artists that will be discussed include Bermejo, El Greco, Zurbaran, Murillo, Ribalta, Ribera, Velázquez, Goya, Picasso, Gris, Dali, Miro, and Sorolla.

SAHT2218
Theories of the Digital
School of Art History and Theory
UOC6 HPW3

Excluded: 4810 Bachelor of Digital Media students.

This subject explores theoretical frameworks within which the content, meaning, aesthetics and impact of digital and new media practice can be critically analysed and evaluated. Topics covered include metaphors of convergence and divergence that structure digital media and aesthetic production; interfaces (particularly the interface between the body and technology), theories of the real, virtuality, materiality and immateriality, and concepts of post-media and software aesthetics. Experimental, innovative and conceptually sophisticated practitioners and current critical debates and theories relating to digital media are considered.

SAHT2221
Writing for Art and Design
School of Art History and Theory
UOC6 HPW3

This course examines different genres of writing on the visual arts, with an emphasis on contemporary practices. Newspaper reviews, journal criticism, scholarly catalogue essays, in house catalogue notes, coffee table art books and collaborative works between artists and writers are studied in terms of their connections to other genres of writing (for example journalistic, fictional narrative, descriptive prose). The course looks at these writings within specific cultural fields and their assumed sets of values. It also demonstrates how such categories play an active role in the shaping and production of meanings in art. Students also become participants in the writing, editing and design of the School of Art Theory’s magazine, Anwrite.

SAHT2222
Methods of Research and Writing on Art and Design
School of Art History and Theory
UOC6 HPW3

This course is primarily concerned with the teaching of skills necessary to conduct specific research projects. The focus is on methods of researching primary material as well as locating archival documentation, in order to evaluate and effectively utilise different forms of visual and theoretical evidence for research projects. Topics include field work
methods, such as oral history, together with knowledge of indexing procedures, statistical analysis and the utilisation of computer resources, as well as critical methodologies for appraising research material. The course also includes topics to address the logical construction of a valid argument, the rhetorical promises of different genres of writing and the delineation of ideas.

SAHT2223
Modern Art and French Imperialism
School of Art History and Theory
UOC6 HPW3

When Paris was invaded by Nazi troops, the art writer Harold Rosenberg reminisced how it had once been “the Holy Place of our time. The only one.” Until then, a Modern Art market had flourished in Paris, unsurpassed in scale and complexity by any other nation. It was actively supported by the French Third Republic. Whilst encouraging artists worldwide to come to Paris, it also encouraged international collectors to acquire Modern Art made in France. At the same time, the Republic also bought artwork for transmission to French provinces and colonies in its ethnocentric conviction that those at the _peripheries_ would become “civilized” by this “mission”. This course will explore how Paris evolved as a unique field of cultural production through the network of institutional interrelationships forged between the French State, Paris Salons, art dealers and patrons. It will examine the huge number and national diversity of artists from Rupert Bunny and Marie Vassiliev to Pablo Picasso, who flocked from cities as geographically diverse as Sydney, St. Petersburg and Barcelona to this Modern Art Centre. By charting the dissemination of acquisitions, it will reveal how cultural imperialist strategies deployed by America during the Cold War, were alive and well in twentieth-century France.

SAHT2224
Art and Biogenetics: Breeding the Body Beautiful
School of Art History and Theory
UOC6 HPW3

When Eugenic Sterilisation became law in the Third Reich, American, Australian, European and British Eugenic Societies immediately congratulated Hitler. He, in turn, commended their eugenic policies and acknowledged them as his precedent. Far from being an isolatable phenomenon, this course will then reveal why Nazi eugenics may be perceived as the extreme realisation of a biogenetic culture that flourished worldwide. By examining images and exhibitions of _the body beautiful_ alongside those of _degeneracy_ it will explore different ways in which art propelled the quest for genetic perfection. Through an investigation of the artwork of such critical Modernists as Marcel Duchamp, it will expose ways in which art was also able to parody this quest.

SAHT2225
Decadents, Dissidents, and Degenerates: Fin-de-Siecle Symbolism to Nazi Degenerate Art Exhibitions
School of Art History and Theory
UOC6 HPW3

Before the Third Reich came to power, Adolf Hitler vowed to unleash a thunderbolt against degenerate art as epitomized by Symbolism, Cubism, Futurism, Expressionism, Dadaism and Surrealism. Once he was Chancellor, Hitler commanded President of the Third Reichs Chamber of Art, Adolf Ziegler, to extract 16,000 “degenerate” artworks from German museums. Before being sold or burnt, they were exhibited in Degenerate Art Exhibitions designed to expose this art as pathological, in their words, “the product of sick minds and bodies”. Yet the Third Reich was by no means the first to conflate “degeneracy” with dissonant art. In his book “Art for the Future”, British artist and writer John Heartfield, who had been one of the first to use photomontage as a means of political protest, warned that the “art of the future” would be “a synthesis of all the degenerate art of our time.” This course will investigate the relationship of self-proclaimed “decadents” to the new aetiologies of neurology and sexology, the diagnosis of such disorders as hysteria and neurosthenia, as well as the new practice of psychoanalysis. It will examine their linkage with such twentieth-century dissidents as Khnopff, Munch, Nolde, Ibsen, Alfred Jarry, Gauguin, Picasso, Kees Van Dongen, Kirchner, Picabia, Duchamp, Max Ernst, Sonia Delaunay, Hannah Höch, Suzanne Valadon and Meret Oppenheim, to examine why those artists, who featured so prominently in Nazi Decadent Art Exhibitions, were long derided elsewhere as decadent, dissident and degenerate.

SAHT2226
Jewishness, Art and Modernity
School of Art History and Theory
UOC6 HPW3

Ethnicities and the diaspora have been key categories of analysis for the new Art History. This course considers how to approach the question of Jewishness in the production and evaluation of art through an exploration of differing concepts of Jewish art and Jewish aesthetics. Jewishness will be examined starting with the rise of a national Jewish art movement and cosmopolitan responses to modernity by Simmel, Nordau, Ruben, Olin and Bland. Jewish aesthetics will be interrogated using the work of key Jewish art historians and cultural theorists, such as Aby Warburg, Erwin Panofsky, Walter Benjamin, Theodor Adorno, Clement Greenberg, Harold Rosenberg, Linda Nochlin, Juliet Steyne and Janet Wolff.

SAHT2227
Fashion History and Theory
School of Art History and Theory
UOC6 HPW3

The course examines the history of Western fashion from the Middle Ages to the present day. Methodologies employed include those of art history, cultural and media studies, anthropology, history, and economic history. Theories of gender, sexuality and the politics of identity will be emphasised. The social and economic histories of making and consuming clothes and the relationship of dress to the body, and to urban and domestic space, which will provide a focus for the course. Topics to be studied include Elizabethan court dress, representation and politics, the 18th-century consumer revolution, the rise of the dictator-designer within modernism, and post-modern dressing.

SAHT2301
Design History, Theory and Aesthetics 2
School of Art History and Theory
UOC6 HPW3
Prerequisite/s: SAHT1301

This course reflects upon histories, theories and practices in the realm of design in order to provide an analytical framework for understanding present and future design from the designer’s viewpoint. Within this context a variety of themes and issues will be analysed in relation to the “designer” product, the designer’s role in society, designer education, the designer and mass production and consumption. This course through further reflection on historical and contemporary theories and practices in design, will address such specific issues as packaging, marketing and retailing of designed products as well as aspects of consumer psychology. The communication qualities inherent in design products, graphics and environments will be considered in some depth.

SAHT2601
The Art of Ancient Cultures: Assyria, Mesopotamia, Egypt, Persia, Greece & Rome
School of Art History and Theory
UOC6 HPW3

How do we ‘read’ objects and images from cultures that lived thousands of years ago? What methods can we use to enhance our appreciation and understanding of ancient artefacts? With knowledge and understanding increasing with every new discovery, where does this leave Prehistory? These and other commonly asked questions will be answered in this course, which provides an historical, cultural and theoretical study of the Ancient world through examining a variety of objects and images. This will include presentation of a range of thematic studies that examine the arts of the Ancient world including the role of jewellery, body ornament and clothing towards defining gender, status and wealth. A cultural decoding of the symbolic messages contained within ancient ornament and decoration will be presented from a variety of perspectives. The culture of death (including burials, rituals and ceremonies) and the artefacts associated with this, will be examined.
The course will also include a discussion of a variety of objects and images that portray the history of theatre, sport and other forms of entertainment.

SAHT2605
The Avant-Garde and the Academy, the Politics of Colonialism and School of Art History and Theory
UOC6  HPW2

Following Napoleon's blaze of European and colonial conquests and his downfall, a wave of revolutionary fervour marked early 19th century reaction in Europe, in which church, monarchy and such authoritarian institutions as The Academy for Arts became reactivated, but subsequently contested. The schism between Neoclassicism and Romanticism, concepts of art-for-art's-sake, oppositions to academic art, the rise of Orientalism, the emergence of photography and formations of an avant-garde are issues which will be examined in this context, through such artists as Ingres, Canova, Goya, Turner, Daumier and Delacroix.

SAHT2606
The Painting of Modern Life: French and English Painting in Focus School of Art History and Theory
UOC6  HPW3

This course focuses on Realist and Impressionist painting in the second half of the nineteenth century in France and England. The work is considered within changing social, political and cultural contexts, with special attention paid to its critical reception in reviews and cartoons. Questions to do with gender, class, sexuality, labour and leisure are examined in relation to such well known artists as Courbet, Manet, Morisot, Degas, Holman Hunt and Ford Madox Brown, as well as lesser known figures including Augustus Egg, Luke Fildes and Francois Salle.

SAHT2612
Art and its Others: Interdisciplinarity in Contemporary Art School of Art History and Theory
UOC6  HPW3

This course examines interdisciplinarity as a major trend in post-sixties and contemporary visual art. It studies international and Australian art from the sixties to the present that interfaces with other cultural fields, including design, architecture, science, environment and pornography. The course interrogates the historical and theoretical implications of visual art's increased dialogue with other disciplines.

SAHT2633
Peripheral Visions: Perspectives of Colonial and Post-Colonial Art School of Art History and Theory
UOC6  HPW3

This course will investigate the effects of the spread of Euro-American modernism through the so-called Third World during the 20th century and particularly during the period following World War II. It will analyse the ways in which different cultures selectively adopt and transform aspects of various modernist styles and the ways in which these styles are incorporated into indigenous visual practice. It will examine such matters as the relationship between economic imperialism and cultural production, the transition from colonialism to postcolonialism, the effects of tourism and the value of ‘decentred’ postmodern modes of understanding in a Third World context. Art of the Asia-Pacific region, Africa and Latin America will be addressed. Some general knowledge of the evolution of modern and postmodern art will be assumed.

SAHT2641
Modern Aesthetics: From the Enlightenment to the 21st Century School of Art History and Theory
UOC6  HPW3

This course introduces students to key critical philosophies of modern aesthetics from the 18th Century to the present. Specifically, it examines the relevance of aesthetic theories of Kant, Hegel, the German Romantics, Nietzsche, Lyotard, Derrida, psychoanalysis and marxism to new modes of perceptual and affective experience associated with postmodernity. Themes investigated include debates between formal and historical aesthetic theories; the revival of aesthetic theory in the visual arts in recent decades; responses to the spectacular image culture of postmodernity; and the relationship between aesthetics and ethics. The course addresses how key currents of modern aesthetic theory might be applied and revised in light of contemporary social and cultural conditions.

SAHT2642
Art, Gender, Sexuality and the Body School of Art History and Theory
UOC6  HPW3

This course concentrates on art after 1960 which deals with issues of gender, sexuality and the body. The course will start with postminimalism, performance and body art. It examines the rise of women's art in the 1960s and 70s, the first art to self-consciously attempt to represent gender difference, and will track the shifting concerns and debates in art about the body, gender and sexuality from then until now. This period coincides with an explosion of feminist theory and the widening of feminist debates to include questions of sexuality, race and ethnicity. The course will explore the particular ways in which these debates are refracted through art practice and art history. Key questions to be explored in the course include: Is there a feminine aesthetic? Is the depiction of the body linked to essentialism? Is masculinity the new “dark continent”? How can the body be used as an expressive medium? How does art practice relate to both identity formation and fantasy? Topics to be covered include: the rise of body art; performance and masochism; identity and essentialism; postmodern irony; female and male masquerade; queer and gay art; and the rise of bad girl and bad boy art in the 1990s.

SAHT2643
Pornography, Art and Politics School of Art History and Theory
UOC6  HPW3

This course will explore the boundary between art and pornography and the social function of that boundary in western society. It will look at the ways in which bodies are eroticised and/or designated as pornographic or perverse. Concepts such as fetishisation, voyeurism, sadism and masochism will be discussed in relation to art history and contemporary art practice. The politics of pornography will be debated in relation to such issues as gender/lesbianism, child sexuality, censorship and AIDS.

SAHT2644
Psychoanalysis and Art School of Art History and Theory
UOC6  HPW3

Psychoanalysis is a key approach to the study of art and visual culture. This course will consider the work of the founder of psychoanalysis, Sigmund Freud and three of the main streams of contemporary psychoanalysis his work has spawned: object relations, Kleinian and French Freudianism (Lacan, Kristeva). It will also examine an emerging area of research: affect theory. The course will examine the key concepts from psychoanalysis that have been applied to the analysis of art, such as: dreams and primary processes, sublimation, the uncanny, the fetish and abjection. Each week we will read a key psychoanalytic text and then consider what it illuminates about the nature of art in general, or specific works of art. The aims of this course are to examine how psychoanalysis is used to interpret: the function of art, the origins of vision and creativity, and the unconscious processes that works of art deploy or activate.

SAHT2647
The Artist and the Writer School of Art History and Theory
UOC6  HPW2

Note: Not available to BArtTh students. The aim of the first unit of this two-session course is to enable students to understand and appreciate some of the writings on art by poets, novelists or essayists which have been particularly influential in the shaping of artistic tastes and values. Reading the works of 18th and 19th century literary figures such as Diderot, Hazlitt, Goethe, Baudelaire, Ruskin, Wilde et al. students will be expected to develop an understanding of the interdependence of art and literature, as well as its implication for both artists and writers. To illustrate the point, the literary production of visual artists such as Delacroix or Courbet will also come under close scrutiny.
SAHT2648
Writing on Art
School of Art History and Theory
UOC4 HPW2

Note: Not available to BArtTh students. Following on from COFA2254, the second unit of this two-session subject will be concerned with the works of seminal 20th century writers who, from a nonphilosophical (systematic) perspective, have contributed to the definition of contemporary art and its understanding. With the works of poets (Rilke, Wallace Stephens or Paul Celan), novelists (Hermann Bloch, Kafka, Proust, Breton), essayists (Valery, Benjamin, Steiner), or artists (Cezanne, Braque or Klee), students will be given a wide range of writings on art to explore.

SAHT2649
Creative Writing for Artists
School of Art History and Theory
UOC4 HPW2

Many visual artists develop and maintain a writing practice that informs, supplements and enriches their art, and/or that complements work presented in exhibitions and artists' books. In this course, students read the writing of artists and develop their own writing directions and skills. Particular attention is paid to the forms of creative writing that many artists appear to find valuable, including short stories, poetry and autobiography.

SAHT2653
Dance - Party Culture
School of Art History and Theory
UOC6 HPW3

This course examines the relationship between design and dance-party culture with reference to fashion, graphics, music, film and architecture. Topics examined include geographies of youth culture, the carnivalesque, clubbing and consumption, new masculinities, sexuality, cyber-feminism, spatiality and sensation, techno music and computer-generated graphics, psychadelic design and drug culture. Theoretical frameworks are drawn from sub-culture theory, critical theory, cultural studies and sociology. Writers include Adorno, Bakhtin, Bachelard, de Certeau, Deleuze and Guattari, and Levi-Strauss.

SAHT2661
Experimental Film and Video since the 1960s
School of Art History and Theory
UOC6 HPW3

This screenings course will offer an overview of experimental film and video from the 1960s to the present, incorporating international and Australasian practices. It examines neo avant-garde practices and theories of the 1960s and 1970s, as well as film and video art of recent decades. The course addresses the history and significance of the current proliferation of the moving image in the international art world, and examines the impact of new technologies.

SAHT2663
Avant-Garde Cinema: 1900-1950
School of Art History and Theory
UOC6 HPW3

This screenings course will survey avant-garde cinema of the first half of the Twentieth Century. It will include historical and theoretical examination of Abstract Cinema, Dada and Surrealist film, Soviet Cinema, German Expressionism, Impressionist film, and avant-garde film of the U.S. The course will give students grounding in the early history of avant-garde cinema, framed by key film theories.

SAHT2667
After Modern Sculpture: Installation, Structures and Space
School of Art History and Theory
UOC6 HPW3

This course examines the radical changes in sculptural practices from the mid-1960s to the present. Movements to be analysed include: Fluxus, Arte Povera, Minimalism, Land Art, Postmodernism, and emerging trends such as Designer-Artists (Jorge Pardo, Andrea Zittel). Particular attention will be given to the emergence of installation art and the questioning of the integrity of the art object. The course aims are: to trace and examine the historical and philosophical understandings of late modern, postmodern and contemporary spatial and sculptural practices; to consider how these practices relate to conceptions of time, space and subjectivity and; to examine two recurrent themes in the discussion of installation: the total work of art and the spectacle.

SAHT2668
Photography's Histories
School of Art History and Theory
UOC6 HPW3

This course will examine key aspects of the photographic medium's history, taking into account the diversity of photographic practice since its inception in the 19th Century, through to its contemporary incarnations. Areas to be examined include changes in photographic technology, genres, uses, aesthetic debates and the intersection of photography with broader historical forces such as colonialism and civic governance. Specific topics include the interface between painting traditions and photography, avant-garde and fine art photography, documentary and photojournalism, and fashion and advertising photography.

SAHT2672
History of Jewellery
School of Art History and Theory
UOC4 HPW2

This course has been designed to introduce students to the history of jewellery with particular reference to its evolution in the Western World. The course will encompass the period from the Bronze Age to contemporary times.

SAHT2674
A History of Drawing
School of Art History and Theory
UOC6 HPW3

This course is designed to provide students with an understanding of a wide historical range of drawings, and to examine the relationship of drawing to other art forms as well as its development as an art form with its own integrity. Drawings from the Neolithic and Greek periods, from Carolingian and Medieval times through to the Renaissance, Baroque and Modern times will be examined, within the cultural contexts.

SAHT2676
Art, Technology and New Media
School of Art History and Theory
UOC4 HPW2

This course explores the ways in which artists have responded to developments in technology and new media. A range of practices are examined from digital media to holography to techno-performance. In addition to investigating the work of specific artists, the subject investigates the ways in which museums and galleries are responding to the demands of new media and developing new strategies of presentation. The course will also introduce a range of theoretical work on new media and on virtual reality. In particular it will debate the nature of virtual experience, examining the temporal and spatial implications of operating within a virtual environment. The course incorporates a certain amount of hands-on experience and also demonstrations of artist's work.

SAHT2677
Time-Based Art: Histories and Themes
School of Art History and Theory
UOC4 HPW2

This course will look at changing notions of identity, time and space, cultural production and media brought about by our engagement with networked, nonlinear communications. At a conceptual level it will look at new theories of complexity and connectivity, globalisation and the information society. There will be an emphasis on how net communication, art and design have changed our relation to time-based media. Students will be asked to locate and research aspects of net culture such as virtual worlds and to look at new forms of animation used online. Particular attention will be paid to how artistic practices and productions have developed through networked cultures and to the
SAHT2678
Vision, Sensation and Desire
School of Art History and Theory
UOC6 HPW3

Vision here is closely associated with the sense of touch and is formed by a complex interaction between inside and outside the body. This course will focus upon two key accounts of vision, and their implications for the analysis and production of visual culture. The first, the approach of theorists like Merleau-Ponty, links vision to the formation of the sensing body. The second, the psychoanalytic account of vision, links vision to identification, desire and fantasy. What is highlighted in this account is misperception and the strange imbrication of vision and desire. The course will consider how these accounts differ, what they reveal about the nature of vision, and their limitations. In particular, the question of affective engagement with images is not well addressed by either account. The possible links between vision, affect, feeling and sensation will be explored. This course will examine instances where vision is linked to affect, for example: visual pleasure, the fascination of the spectacle, the uncanny, disgust and the abject, and visual overload. The work of Deleuze on sensation and affect will also be considered.

SAHT3105
Art since 1990
School of Art History and Theory
UOC6 HPW2

This course will explore the many interrelationships between artistic practices, whether drawing, painting, printmedia, photomedia, sculpture, or time based art, and critical and theoretical issues that arise out of these practices and have been used to frame and comprehend them. Many modern and postmodern artists chose to carry a toolbox of history and of philosophical assumptions into the studio with them. The overall aim is to enable students to gain a critical understanding of both the historical and contemporary discourses which have framed our understanding of the role and meaning of art.

SAHT3211
Art After Postmodernism
School of Art History and Theory
UOC6 HPW3

This course will re-examine a number of theoretical approaches to the understanding of images and objects that have been addressed during the course. These approaches will be applied to a range of artworks produced in Australia and internationally over the last decade or so. It will offer an overview of many of the contemporary developments, themes and issues that have concerned artists in the period up to and beyond postmodernism. Issues to be considered include: how objects and images come to have meaning; the ways in which artworks differ from other objects; the relations between language and visual images; the ways images and objects can be seen and the sort of viewer(s) they imply; the different forms of perceptual address that we bring to artworks, including visual, tactile and kinaesthetic; and the significance of art images and objects in relation to the politics of information dissemination, gender, postcolonialism, class and ethnicity.

SAHT3212
Art and Everyday Life
School of Art History and Theory
UOC6 HPW3

This course examines the major structures and ways of thinking which have both constituted and transformed the practices of art and criticism and evaluation of art in an era characterised by the pervasiveness of mass media and the aestheticization of everyday life. The course explores the forms and significance of popular culture in the 20th century, focussing on such phenomena as consumerism, mass media, TV and advertising, subcultures, the city and the suburb. The interdisciplinary development of cultural studies provides tools for reading artistic strategies in the light of television, film, computer imaging, the popular press and advertising. The work of theorists such as Jean Baudrillard, Michel de Certeau and Meaghan Morris is applied to these areas and critically examined.

SAHT3213
Museum Studies: Exhibitions, Collections and Material Culture
School of Art History and Theory
UOC6 HPW3

This course reviews theoretical frameworks and current research on museums and art museums. It examines the history of collecting and exhibiting, and the museum as an institution. Taking the new museology as its theoretical starting point, it considers the cultural role of museums. It compliments the practical emphasis of the professional contexts strand within the core of the BArtTh by exploring critical theoretical approaches to museum culture. Its emphasis is on material culture, objects, artworks and curatorship in the contexts of collections and exhibitions.

SAHT3214
Research Project
School of Art History and Theory
UOC6 HPW3

This course provides an opportunity for students to complete a sustained piece of research and to develop their skills of independent writing and research. Students can choose to research a topic concerned with either a particular artist, art writer, art historian or philosopher, an institution or particular issue, such as modernity, nationalism, orientalism or gender. Students must then, under the supervision of the assigned academic staff, conduct independent archival and field research. The writing of a 6,000 word paper on the basis of this research will allow the development of such key research practices as cohesive methodology, critical evaluation and classification of research material, valid argumentation and writing skills, as well as speculation and a clear delineation of ideas. This course is recommended for students who are considering undertaking Honours.

SAHT3221
Contexts, Professions and Practices
School of Art History and Theory
UOC6 HPW3

This course provides an opportunity for students to complete a sustained piece of research and to develop their skills of independent writing and research. Students can choose to research a topic concerned with either a particular artist, art writer, art historian or philosopher, an institution or particular issue, such as modernity, nationalism, orientalism or gender. Students must then, under the supervision of the assigned academic staff, conduct independent archival and field research. The writing of a 6,000 word paper on the basis of this research will allow the development of such key research practices as cohesive methodology, critical evaluation and classification of research material, valid argumentation and writing skills, as well as speculation and a clear delineation of ideas. This course is recommended for students who are considering undertaking Honours.

SAHT3222
Industry Placement
School of Art History and Theory
UOC6

This course is designed to give students hands-on experience in a particular area of professional practice. In consultation with the course coordinator, students are placed into an institutional framework for a specified period of time. This could be a commercial gallery, museum, artist run initiative, artist's studio or arts funding body. The student shall carry out one project while at the institution, and prepare a report at the end of the session on the placement.

SAHT3301
Design History, Theory and Aesthetics 3
School of Art History and Theory
UOC6 HPW3
Prerequisite/s: SAHT2301
Through reference to philosophers and scholars whose theories underpin historical and contemporary design practice, students will be encouraged to conceptualise and develop their own design philosophy. A number of specific design examples will be analysed in order to highlight the influence various theories of aesthetics and function has had on the design domain.

SAHT3613
Digital Theory and Aesthetics
School of Art History and Theory
UOC6  HPW3

This subject explores theoretical frameworks within which the content, meaning, aesthetics and impact of digital media practice can be critically analysed and evaluated. Topics covered include rhizomic organisation of thought, temporality; interfaces (particularly the interface between the body and technology) and theories of the real, virtuality, materiality and immateriality. Experimental, innovative and conceptually sophisticated practitioners and current critical debates and theories relating to digital media are considered.

SAHT3614
Screen Culture
School of Art History and Theory
UOC6  HPW3

Information and screen culture is central to the shaping of the political and economic structures and cultural experience of contemporary global society. The impact of screen culture is pervasive and deeply integrated into everyday life and yet digital media are also capable of generating and communicating complex and highly critical cultural insights. Topics covered in this subject include authorship, virtual communities, utopianism, cyberculture, gaming, interactivity, privacy, censorship and intellectual property. Social responsibility and ethical action in digital media practice is explored through a critical understanding of the significance and impact of screen culture.

SAHT3634
Peripheral Visions 2: Perspectives of Colonial and ‘Peripheral’ Art Practiced in Asia, India, SE Asia
School of Art History and Theory
UOC6  HPW3

This course will investigate the effects of the spread of Euro-American ‘modernism’ through the Asian, Indian and South East Asian region during the Twentieth Century and particularly during the period following World War II. It will analyse the ways in which different cultures selectively adopt and transform aspects of various modernist styles and the ways in which these styles are incorporated into indigenous and local visual practices. It will examine such matters as the relationship between economic imperialism and cultural production, the transition from colonialism to postcolonialism, the effects of tourism and the value of ‘decentred’ postmodern modes of understanding in a non-European context.

SAHT3669
Critical Theories of Photography
School of Art History and Theory
UOC6  HPW3

This course will critically examine the major ways in which photography has been theorised. Semiotic and post structuralist approaches to the photographic medium will receive particular attention. Other areas covered include realist theories of photography, aesthetic and contextualist approaches, and theories about the impact of digital technologies on the photographic image. The theories studied in the course will be applied to historical and contemporary examples of photographic practice.

SAHT3690
Special Project
School of Art History and Theory
UOC6  HPW3

From time to time, one-off opportunities arise for the College to offer special programs of study for credit. For example, supervised international experiences (such as study tours, exhibition participation or attendance, or special projects). This course is intended to facilitate the College in developing its educational program for undergraduate students by incorporating such opportunities into the academic program. Specific course outlines will be distributed detailing the academic content, objectives, assessment tasks and criteria, modes of teaching and learning, expectations and requirements of student participation. Please note that there may be costs involved (such as costs associated with travel, accommodation, meals and museum visits) in taking this course.

SAHT4211
Thesis A
School of Art History and Theory
Enrolment requires school approval UOC12

This course comprises the first semester’s research and writing which will lead, in Session 2, to the completion of a research thesis of 15-18,000 words, or equivalent research project (for example, in curatorship), on an approved topic. Students are expected to consult with the Honours Co-ordinator in February about their topics. A supervisor will be assigned no later than mid-March, when work on the thesis should commence. Students attend and contribute to Thesis Seminars and such presentations and seminars as required. Satisfactory participation in the Thesis Seminar and presentations is a requirement of the successful completion of Thesis A. Thesis A is a prerequisite for completion of Thesis B.

SAHT4212
Honours Seminar
School of Art History and Theory
UOC6  HPW3
Corequisite/s: SAHT4211 Thesis A.

The seminar course is designed to enhance skills in research and writing through seminar discussion of readings illustrating a range of art historical and theoretical approaches, styles and techniques. In consultation with a supervisor and the Honours coordinator, and subject to the approval of the Head of School, students may undertake Honours Seminar by attending and satisfying the requirements of another UNSW course at an appropriate level.

SAHT4213
Thesis B
School of Art History and Theory
Enrolment requires school approval UOC24
Prerequisite/s: SAHT4211 Thesis A.

Thesis B follows on from Thesis A and is the completion of a research thesis of 15-18,000 words, or equivalent research project (for example, in curatorship), on an approved topic. Students attend occasional intensive workshops and seminar presentations as required.

SAHT4301
Design History, Theory and Aesthetics 4
School of Art History and Theory
UOC4  HPW2
Prerequisite/s: SAHT3301 or COFA5337

This course addresses issues faced by the student designer moving into the professional design environment. These include: market trends, design ethics, semiotics, product semantics, design economics and socio-environmental politics. These investigations will build on skills, knowledge and understanding gained by students from their previous studio and theoretical courses.

SART1301
Introductory Studies: Drawing & Painting
School of Art
UOC6  HPW3

This course will introduce students to the basic relationships between drawing and painting. Through a series of projects, incorporating the study of line, tone, colour, proportion, composition and the use of media, students will be encouraged to explore creative possibilities of these areas in order to make an informed choice of core studies for sessions 2-6.
This course will assist students to develop and extend basic concepts and skills in drawing and painting. Students will be encouraged to understand both the inter-relationships of form and content and the creative possibilities of various media. The importance of analytical observation will be emphasised along with investigations into historical precedents and conventions. Students will be expected to attain a basic competence in drawing and painting by the end of the session.

**SART1313**
Printmaking 1A  
School of Art  
UOC6  HPW3  
Prerequisite/s: SART1303 Introductory Studies: Photomedia & Printmaking.

This course will introduce students to basic concepts and skills in printmaking, developing a firm conceptual base from which they will expand in their continuing studies in the discipline. Students will be encouraged to understand both the inter-relationships of form and content and the creative possibilities of various media. In line with current art practice expression is encouraged through the use of traditional and contemporary print media. The importance of analytical observation will be emphasised. Students will be expected to attain a basic competence in printmaking by the end of session.

**SART1314**
Sculpture/Performance/Installation 1A  
School of Art  
UOC6  HPW3  
Prerequisite/s: SART1302 Introductory Studies: Sculpture & Time Based Art.

This studio based course provides the basic foundations for sculptural studies through a series of projects that are a trajectory into the students’ personal creative enquiries. The projects foster a relation between concept to process, and intention to outcomes. Critical awareness and interpretive skills are developed along with an understanding of basic sculptural languages such as metaphor, narrative, metonymy, space, materiality, form, mass and scale. The interdisciplinary nature of contemporary sculptural practice is emphasised and includes a diversity of experiences such as producing works using time, light, installation, sound, collaboration and performance, as well as exploratory applications of traditional forms and methodologies.

**SART1319**
Drawing  
School of Art  
UOC4  HPW3

This course will provide a foundation of drawing skills and introduce students to a basic drawing vocabulary. A range of approaches will be taken and diverse media will be explored. Through the investigation of drawing process, students will be encouraged to develop an expression appropriate to, and integrated with, their major area of art practice.

**SART1333**
Drawing: Object, Life and Landscape  
School of Art  
UOC4  HPW3

This course will introduce students to the techniques for visually representing objects, figures and landscapes as well as using abstract concepts. The use of sketching will be encouraged to “visually think” and communication, using a variety of methods, techniques, tools and materials, and strategies. Students will examine the human form, landscape and objects in terms of structure, proportion, movement, surface qualities and associated ideas.

**SART1361**
Etching  
School of Art  
UOC6  HPW3

This course provides an introduction to the basic principles and techniques of intaglio printing, including etching, drypoint and engraving. Through investigation and selection students will develop an understanding of the technical means and aesthetic qualities of the
original print. Students will attain a level of competence in intaglio processes and develop their potential as creative artists in the printmaking medium as well as investigate the historical precedents of the discipline.

SART1401
Foundation Studies: Draw/Paint/Print (BArtEd)
School of Art
UOC6 HPW3

This course will introduce students to a dynamic studio methodology that integrates the theory and practice of the visual arts and provides a basic overview of its current and historical contexts. The focus of this course will be on the use of drawing as a platform for interdisciplinary artwork in other 2 dimensional forms. Through sustained inquiry, students will have the opportunity to be critical, inventive and experimental in their approach. An emphasis is placed on the student's own developing practice.

SART1402
Foundation Studies: Sculpt/Photo/Time (BArtEd)
School of Art
UOC6 HPW3

This course introduces three-dimensional, and photo-media based art practices by engaging students in a series of structured projects to encourage individual exploration and expression. The focus of the course is to extend existing two dimensional skills into the areas of sculpture and still and moving photography. Through sustained inquiry, students will have the opportunity to be critical, inventive and experimental in their approach. These studies will expand the range of critical and practical skills through which the student may develop a personal visual language and ideas whilst further developing their own art practice.

SART1501
Painting
School of Art
UOC6 HPW3

The aim of this course is to enable the student to develop skills and an intuitive awareness of aesthetic values in painting so that the student can use the discipline of painting as a means of individual artistic expression. The student will explore theoretical concepts and develop relevant skills as a basis for making paintings. The student will undertake projects aimed at encouraging an individual, creative and professional approach to painting.

SART1502
Drawing
School of Art
UOC6 HPW3

This course will enable students to develop a command of drawing as a visual arts discipline and to relate the art of drawing to other areas of creative endeavour. The student will explore various aspects of drawing and develop competence and confidence in drawing. The student will undertake exercises which will emphasise drawing as a means of creative expression, and also as a tool of research in the visual arts.

SART1581
Screen Printing
School of Art
UOC6 HPW3

This course aims to introduce the student to all techniques involved in screen printing. Through investigation and selection students will develop an understanding of the technical means and aesthetic qualities of the original print. Students will investigate the historical precedents of these processes in the context of art practices. These courses will deal with original print. Students will attain a level of competence in intaglio processes and develop their potential as creative artists in the printmaking medium as well as investigate the historical precedents of the discipline. In line with current art practice, expression is encouraged through the use of traditional and contemporary print media to be chosen (dependant upon availability) from the range of etching, digital imaging, lithography, paper moulding, photocopying, relief and screen printing. The aim of this course is to enable the student, by application of theory and developed skills, to create print-based works in both two and three dimensions. The student will undertake projects, either as separate entities or combined in installed pieces, aimed at encouraging an individual, creative and professional approach to printmaking.

SART1601
Sculpture
School of Art
UOC6 HPW3

Through a program of practical studio projects, students will experiment with sculptural methods, ideas, techniques and mediums to develop a series of works. Through studio practice, group discussion and individual tutorials, students will consider aesthetic, conceptual, technical and material factors towards the fabrication of these works. The projects will introduce students to a variety of approaches that are characteristic of the breadth of contemporary art practice. Pertinent research and a studio theory project will broaden the student's appreciation of contemporary sculpture will also support the student's art practice.

SART1606
Drawing for Media
School of Art
UOC4 HPW3

Various drawing media will be introduced to the student and their applications and use explored. This course aims at making the student proficient in the depiction and understanding of line, space, volume and proportion, using a variety of different media. The fundamentals of drawing taught in this unit will be orientated towards its use as a tool in the solving of creative problems. This subject encourages the use of drawing, perspective, and the projection systems, as elements in the manipulation and creation of space on the two dimensional format, and analysis and clarification of tasks and concepts.

SART1621
Installation
School of Art
UOC6 HPW3

This course provides the opportunity to explore the various forms and disciplines three-dimensional activity can take in contemporary art practice. This course is designed to allow flexibility for both multimedia experimentation and specialisation in the exploration of the construction, installations and spaces as an expressive vehicle. This course is studio based with an emphasis on the critical analysis of research, experiential learning and conceptual development. This discussion is centred around a rigorous studio theory program, conducted on the studio floor and in tutorials.

SART2320
Drawing/Painting 2A
School of Art
UOC6 HPW3
Prerequisite/s: SART1311 or SART1401.

In this course students will begin the investigation and imaginative interpretation of conventions of the disciplines of drawing and painting. In consultation with lecturers, students will examine and begin to develop a program of studio studies which demonstrate an understanding of contemporary and historical pictorial theories.

SART2322
Printmaking 2A
School of Art
UOC6 HPW3
Prerequisite/s: SART1313 or SART1401

In this course students will investigate and imaginatively interpret the significant concepts and conventions of the disciplines within printmaking. In consultation with lecturers, students will begin to develop a program of printmaking studies which reflects their individual focus.
within the printmaking discipline. Students will be encouraged to develop concepts relating to the characteristics of specific media in the context of contemporary practice.

**SART2323**  
**Sculpture/Performance/Installation 2A**  
School of Art  
UOC6  HPW3  
Prerequisite/s: SART1314 or SART1402

This studio based course supports the development of the individual student's sculptural ideas and through seminars, tutorials and critical evaluation, broadens the student's awareness of related issues in contemporary thought, sculptural theory and practice, and diverse areas of concern in the social and cultural environment. Students may choose to produce divergent or interdisciplinary works such as, site specific, temporal, ephemeral or performative installations, or develop particular sculptural forms such as object making or body works. The emphasis at this stage is on an open-ended, exploratory investigation of sculptural language, the simulation of the imagination, and the development of creative ideas and rigorous studio methodologies through challenging project work. This process is supported by the acquisition of skills pertinent to the students' needs, including the presentation of projects, field work, studio theory and documentation of completed works.

**SART2330**  
**Drawing/Painting 3A**  
School of Art  
UOC6  HPW3  
Prerequisite/s: SART2320

In this course students will investigate and imaginatively interpret concepts relevant to the disciplines of drawing and painting. In consultation with lecturers students will develop a program of studio studies which reflect their individual interests and enable them to view their work in relation to both art history and contemporary developments.

**SART2332**  
**Printmaking 3A**  
School of Art  
UOC6  HPW3  
Prerequisite/s: SART2322

In this course, students will continue to investigate and imaginatively interpret the significant concepts and conventions of the discipline of printmaking. In consultation with lecturers, students will further develop a program of printmaking studies which reflects their individual interests and which may be built upon and expanded in subsequent sessions. Students will be encouraged to develop concepts relating to the characteristics of specific media. Documentation and conservation of prints and printmaking will be covered.

**SART2333**  
**Sculpture/Performance/Installation 3A**  
School of Art  
UOC6  HPW3  
Prerequisite/s: SART2323

This studio based course continues to support the development of the individual student's sculptural ideas and through seminars, tutorials and critical evaluation, broadens the student's awareness of related issues in contemporary thought, sculptural theory and practice, and diverse areas of concern in the social and cultural environment. Students may choose to produce interdisciplinary works such as spatial, temporal, ephemeral or performative installations, or develop particular sculptural forms related to object making or works related to the body. The emphasis is on the transition from a reliance on set projects towards self initiated project work in consultation with lecturers. The representation of the students' ideas and studio methodologies are supported by the continued acquisition of skills pertinent to their needs, including the presentation of projects, field work, studio theory and the documentation of completed works.

**SART2340**  
**Drawing/Painting 2B**  
School of Art  
UOC6  HPW3

In this course students will begin the investigation and imaginative interpretation of conventions of the disciplines of drawing and painting. Students will examine and interpret issues of space, form and structure within their emerging practice.

**SART2342**  
**Printmaking 2B**  
School of Art  
UOC6  HPW3

In this course students will investigate conventions of the disciplines within printmaking. In consultation with lecturers, students will begin to develop a program of printmaking studies. Various media, techniques and aspects of printmaking will be examined, and students will be encouraged to develop work relating to the characteristics of specific media. Workshop procedures will be covered.

**SART2343**  
**Sculpture/Performance/Installation 2B**  
School of Art  
UOC6  HPW3

This studio based course focuses on the students' sculptural practice, and the importance of skills acquisition, experimentation, interdisciplinary technologies, and the manipulation of materials. Practical aspects of professional practice are taught - the development of project proposals, the documentation of completed work, the formal exhibition of project work. Research skills are introduced to encourage an increased rigour in the realisation of ideas, including exploratory field work, preparatory drawing, journals, analysis and critique of work in progress and completed project work. Problem solving projects are devised to ensure a continued, lateral approach to the students' chosen areas of interest, which are addressed in self-initiated project work. Appropriate health and safety procedures are demonstrated, discussed and practised in the production of works.

**SART2350**  
**Drawing/Painting 3B**  
School of Art  
UOC6  HPW3

In this course students will investigate and imaginatively interpret processes relevant to the disciplines of drawing and painting. Students will develop a program of studio studies which reflect their individual interests and enable them to view their work in relation to both art history and contemporary developments. Students will undertake investigations into the appropriateness of a range of media, materials and processes related to contemporary practice.

**SART2352**  
**Printmaking 3B**  
School of Art  
UOC6  HPW3

In this course students will continue to investigate the discipline of printmaking. In consultation with lecturers, students will further develop a program of printmaking studies which reflects their individual interests and which may be built upon and expanded in subsequent sessions. Various media, techniques and aspects of printmaking will be examined, and students will be encouraged to develop concepts relating to the characteristics of specific media. Documentation and conservation of prints and printmaking will be covered.

**SART2353**  
**Sculpture/Performance/Installation 3B**  
School of Art  
UOC6  HPW3

This is a studio based course with an emphasis on an increasingly rigorous representation of ideas, and the development of a speculative studio methodology. Self initiated project work is supported by practical workshops, set project work, and excursions to generate ideas, develop a creative visual language, acquire skills, including research skills, perceptual acuity, conceptual analysis, technical proficiency, explorative problem solving. This course develops the student's documentation skills, and focuses on a considered presentation of completed works of a standard appropriate to this level of study.
SART2361
Advanced Etching
School of Art
UOC6 HPW3
Prerequisite/s: SART1361.

This course allows students to develop the basic principles and techniques of intaglio printing, including etching, drypoint and engraving. Through investigation and selection students will demonstrate an understanding of the technical means and aesthetic qualities of the original print. Students will attain a level of competence in a chosen process and develop their potential as creative artists in the printmaking medium in the context of contemporary practice.

SART2501
Life Painting
School of Art
UOC6 HPW3

The aim of this course is to enable students to develop a command of painting as a visual arts discipline whilst consolidating and extending previously acquired painting skills and applying these to various aspects of life painting. Students will explore those aspects of life painting which will involve an examination of the clothed form, the nude or portraiture whilst providing opportunities to work from observational, interpretive and conceptual approaches.

SART2502
Advanced Drawing
School of Art
UOC6 HPW3

The aim of this course is to enable students to develop a command of drawing as a visual arts discipline whilst consolidating and extending previously acquired drawing skills. Students will explore various strategies of drawing which provide observational, interpretive and conceptual approaches. Emphasis will be given to drawing as a means of creative expression and also as a tool of research in the visual arts.

SART2581
Advanced Screen Printing
School of Art
UOC6 HPW3
Prerequisite/s: SART1581.

This course aims to develop the student's emerging practice in the discipline of screen printing. Through investigation and selection students will demonstrate an understanding of the technical means and aesthetic qualities of the original print. These courses will deal with skills and techniques, experimental approaches, the relationship between the technical and aesthetic properties of prints and the ability to assess the results of one's own work in the context of contemporary practice.

SART2591
Advanced Printmaking
School of Art
UOC6 HPW3
Prerequisite/s: SART1591.

In this course students focus on a chosen area of traditional and contemporary print media (dependant upon availability) from the range of etching, digital imaging, lithography, paper moulding, photocopying, relief and screen printing. The aim of this course is to enable the student, by application of theory and developed skills, to create print-based works of an increasingly professional standard in both two and three dimensions. The student will undertake projects, either as separate entities or combined in installed pieces, aimed at encouraging an individual, creative and professional approach to printmaking in the context of contemporary art practice.

SART2601
Advanced Sculpture
School of Art
UOC6 HPW3
Prerequisite/s: SART1621 or SART1601.

The aim of this course is to develop in the student the capacity to resolve aesthetic, theoretical, technical and material considerations in the creation of sculptural works. Through a program of theoretical and practical studies, students will experiment with sculptural concepts, techniques and mediums toward the resolution of original works.

SART2621
Advanced Installation
School of Art
UOC6 HPW3
Prerequisite/s: SART1621 or SART1601.

This course provides the opportunity to develop skills in the various forms and disciplines three-dimensional activity can in contemporary art practice. This course is designed to allow maximum flexibility for both interdisciplinary experimentation and specialisation in the exploration of the installations and space as an expressive vehicle. This course is studio based with an emphasis on the critical analysis of research, experiential learning and conceptual development. This discussion is centred around a rigorous studio theory program, conducted on the studio floor and in tutorials.

SART2818
Custom Printing
School of Art
UOC6 HPW3

This course will provide students with a valuable professional practice opportunity of engaging with a number of visiting artists in the operating of a print editioning workshop. Students will refine their technical and production skills and be exposed to professional methodology of the editioning process. Students will work with the artists and also realise a body of their own work from concept to final production. Previous printmaking skills are essential to undertake this course.

SART2819
Advanced Custom Printing
School of Art
UOC6 HPW3
Prerequisite/s: SART2818.

This course will further the students professional practice opportunity of continuing to engage with visiting artists in the operating of a print editioning studio. Students will perfect their technical and production skills and work within the professional methodology of the editioning process. Students will work with the artists and also realise a body of their own work from concept to final production to the highest professional standards.

SART2821
Metal Joining Techniques Workshop
School of Art
UOC4 HPW3

This is a workshop based course to extend students' skills in metal fabrication. It contains information and practice concerning skills of joining various metals efficiently, safely and with aesthetic consideration. Mechanical, soldered and welded joining will be carried out by students as well as cutting and shaping techniques.

SART2823
Sculpture: Casting Workshop
School of Art
UOC4 HPW3

This is a workshop class for those students seeking skills in casting and mould making. Through lectures, demonstrations and projects, students will learn how to make moulds of increasing complexity, and to cast various material. The theory of casting processes will be discussed as it applies to individual work required by the student.

SART2826
3D Fabrication Workshop
School of Art
UOC4 HPW3

This is a workshop-based course for students wishing to improve their ability to manipulate materials for making sculpture installation, and bodyworks. It contains information and practice in elementary fabrication
and assembly techniques. Through lectures, demonstrations and projects, students will acquire understanding and skills concerning the purpose and use of a range of hand and power tools, and methods of measuring and gauging.

SART2827
Sculpture Field Studies
School of Art
UOC6 HPW3

This course is designed to enable students with a particular interest in working in the natural environment to devote an extended and concentrated time in the field to research a chosen location. By direct experience and observations, students will deal with the natural world as a source of ideas and inspiration particularly relevant to the focus of their major studies in sculpture. Students will be encouraged to seek out, identify and document new material that they can gather in the field that they feel will be most relevant to their developing work in the studio.

SART2828
Artists’ Books
School of Art
UOC6 HPW3

This course will enable students to acquire skills in the production of artists’ books, folios and other limited edition publications. Examples of the different kinds of artists’ publications will be examined. A variety of materials, skills and techniques, both traditional and contemporary, which are involved in book and folio production will be demonstrated. Students will have the opportunity to produce an artists’ book.

SART2829
Anatomy for Artists
School of Art
UOC6 HPW3

This course will provide an introduction to human anatomy through the studies of comparative anatomy, skeletal structure, musculature and a perspective on the history and philosophy of anatomical images. A practical examination of the structure, form and function of the body will develop an understanding of the human figure. The course will also include the study of canons of proportion and cultural perceptions of the body. Emphasis will be placed on direct observations of the nude. Students will draw from the skeleton, casts and prepared anatomical specimens. A range of approaches will be covered that will encourage students to understand basic anatomical constructs. This course is designed to be relevant to a broad range of student interests from diverse disciplines.

SART2831
Spatial Constructions Drawing Workshop
School of Art
UOC4 HPW3

This course is designed to consolidate and extend previous drawing experience. Students will be engaged in practical representation of form/spaces relationships within interior and exterior spatial contexts. Specific studies may be made from architecture, furniture, the street, land and natural forms. Particular reference will be made to human scale and location in each spatial context.

SART2832
Life Drawing
School of Art
UOC6 HPW3

This course will provide the opportunity for students at all levels of drawing experience to explore the drawing of the human figure. Students will develop an understanding of the structure and form of the human body. A range of approaches will be covered that will encourage students to understand relationships of contour, form, mass, volume, line, movement, rhythm and gesture. This course will provide an introduction to anatomy. Emphasis will be placed on direct observations and their interpretation in graphic media.

SART2833
Figurative Composition in Painting
School of Art
UOC6 HPW3

This course is designed to enable students to explore a range of visual images and ideas related to the human figure. The course will deal with practical and theoretical issues of figurative painting. Through interpretation and translation of two and three dimensions the student will examine space, form and composition. Students will also be encouraged to investigate the historical and contemporary contexts of the various genre associated with figurative representation.

SART2834
Experimentation in Mixed Media
School of Art
UOC6 HPW3

This course will facilitate experimentation across disciplines. Students will be encouraged to investigate the physical and aesthetic possibilities and limitations of a range of media and materials. Attention will also be given to developing such practical skills and methodologies as may be required by students’ own workshop projects.

SART2835
Composition and Design
School of Art
UOC6 HPW3

This course will introduce students to the theory and application of two dimensional composition and design. It will examine terminology, proportion and format, elements and principles of design and colour theory. It will investigate the application of theories of composition, colour interaction and visual measurement.

SART2836
Colour
School of Art
UOC6 HPW3

This course will investigate the theory and practice of colour as it applies to the discipline of painting.

SART2841
Electronic Technologies
School of Art
UOC6 HPW3

This is a workshop based course which aims to provide the student with skills in the application of low voltage electricity and electronics sculpture. Basic understanding of power source and linking will precede instruction in the use of small motors and lighting units. This will progress to practical exercises in the use of simple computer boards.

SART2842
Metal Casting
School of Art
UOC6 HPW3

This is a practical class for those students seeking skills in metal casting and mould making. Through lectures, demonstrations and projects, students will learn how to make moulds of increasing complexity and to cast various metals, especially bronze. The theory of metal casting will be discussed as it applies to individual work required by the student.

SART2845
Drawing/Painting Field Studies
School of Art
UOC6 HPW3

This course is designed to enable students to experience the practical applications of a concentrated time in the field. Drawing and painting a range of visual motifs derived from a first hand encounter with a specific landscape. By working en plein air, from direct observations, this course will deal with the natural world as a source of ideas and inspiration and the practical solutions to working outside the studio environment. Students will also be required to use the material gathered in the field in developing studio work.
SART2846
Figurative Sculpture
School of Art
UOC6  HPW3

This is a workshop based course founded on observation and interpretation of the human figure. It contains information and practice concerning skills in representing the figure in various materials, with aesthetic considerations. Modelling and casting skills are followed by basic constructivist techniques.

SART2848
Advanced Drawing/Painting Field Studies
School of Art
UOC6  HPW3

This course is designed to enable students with a particular interest in the natural world to devote an extended and concentrated time in the field to researching a remote location through drawing. By direct encounter and observations, students will deal with the natural world as a source of ideas and inspiration particularly relevant to the thrust of their major studies in drawing and painting. Students will be encouraged to seek out, identify and document new material that they can gather in the field that they feel will be most relevant to their developing work in the studio.

SART2849
Alternative Printmaking
School of Art
UOC6  HPW3

This subject will allow students at any level of experience to explore the use of alternative materials and procedures in printmaking. Through lectures, demonstrations and projects students will gain understanding and skills in the use of inexpensive and low-tech materials in the production of medium to large scale printworks. Emphasis will be placed upon investigating and exploiting the manner in which these materials and techniques influence the resulting imagery with respect to contemporary practice.

SART2851
Print as Object
School of Art
UOC6  HPW3

This course is designed to consolidate and extend previous printmaking experience. Students will be engaged in projects using both traditional and non traditional materials, which will allow them to explore the concept of a print in relation to the third dimension. Specific techniques will be demonstrated which involve the manipulation of three dimensional space. Beginning with exercises utilising comparatively low relief techniques such as embossing and paper casting, students will move towards the construction of multiples, and finally to the fabrication of printworks which are freestanding, or in the form of an installation piece.

SART2853
Printmaking Colour Workshop
School of Art
UOC4  HPW3

This course aims to demystify the complexities of colour theory and techniques as they relate to printmaking. Beginning with a basic introduction to Colour Theory and a comparison of analogue and digital colour models students are introduced to advanced colour printing procedures with emphasis upon etching and screenprinting. Through lectures, demonstrations and projects students will gain understanding and skills in the practical application of specialist procedures not generally covered in elective printmaking courses. This course will be of most benefit to students who have some previous experience in etching.

SART2856
Digital Printmaking
School of Art
UOC6  HPW3

This course will introduce students to digital imaging and output procedures as they apply to printmaking. Through lectures, demonstrations and projects, students will gain understanding and skills in the use of computing software and hardware as a means to extending the possibilities for the creation of unique and original works of art in a fine art context. Emphasis will be placed upon the applicability of methods and materials to artistic purpose; the pros and cons of these procedures as compared directly with traditional print practice, and the extension of traditional print media through the incorporation of these practices into existing technologies.

SART2857
Paper Technology Workshop
School of Art
UOC4  HPW3

This course will attempt a comprehensive investigation of the characteristics and functions of paper in its broadest sense, with emphasis on the wide variety of papers used by printmaking artists. Students will gain an insight into the history, making and usage of paper, particularly as it applies to contemporary art practice. Through lectures, demonstrations and projects, students will gain an understanding of such things as the conservation of paper, hand paper making, cast paper, and other three dimensional uses of paper in artworks, and appropriate choice of paper for various media.

SART2859
Abstraction for Drawing and Painting
School of Art
UOC6  HPW3

This course will assist students to develop and extend their awareness of concepts of abstraction. Through a series of studio based projects students will gain a knowledge of historic and contemporary models of abstraction as well as an understanding of formal developments as they apply to drawing and painting.

SART3340
Drawing/Painting 4A
School of Art
UOC6  HPW3
Prerequisite/s: SART2330

In this course students will concentrate on developing their individual creative interests. In consultation with lecturers, students will undertake a body of studio work which demonstrates the relationship between their own ideas and current concepts and conventions. Students will be encouraged to evaluate the relationship between intention and outcome achieved in their studio practice.

SART3342
Printmaking 4A
School of Art
UOC6  HPW3
Prerequisite/s: SART2332

In this course, students will further investigate and resolve the significant concepts and conventions of the discipline of printmaking. In consultation with lecturers, students will further develop a program of printmaking studies which reflects their emergent practice. Various media, techniques and aspects of printmaking will be examined, and students will be encouraged to consolidate concepts relating to the characteristics of specific media. Documentation and conservation of prints and printmaking will be covered.

SART3343
Sculpture/Performance/Installation 4A
School of Art
UOC6  HPW3
Prerequisite/s: SART2333

This studio based course centres upon the students' self initiated work programs which are devised in consultation with their lecturers towards the development of their emergent practice. Tutorials, lectures, field work, the acquisition of advanced skills in studio research methodologies and the presentation of seminars by each student about the content and contexts of their practice are employed to achieve a thorough knowledge
and critical awareness of contemporary sculptural practice and an ability to articulate the concerns of their art making. An experimental approach to sculptural practice is encouraged and may take the form of divergent or interdisciplinary works such as site specific, temporal, ephemeral or performative installations, or the development of particular sculptural forms related to object making or works related to the body.

**SART3350**
**Drawing/Painting 5A**
School of Art
UOC6  HPW3
Prerequisite/s: SART3340

In this course students will concentrate on their major creative interests. Students will be required to initiate and execute a body of studio work which demonstrates the relationship between their own work and current art practice. In this course students are expected to extend and develop the focus of their inquiry towards a coherent body of work which incorporates previous theories and concepts.

**SART3352**
**Printmaking 5A**
School of Art
UOC6  HPW3
Prerequisite/s: SART3342

This course will consolidate concepts and skills developed in previous sessions. Students will be required to execute a body of work which demonstrates the relationship between their own practice and contemporary issues. Students are expected to incorporate previous investigations into theory and concept.

**SART3353**
**Sculpture/Performance/Installation 5A**
School of Art
UOC6  HPW3
Prerequisite/s: SART3343

This studio based course focuses on the resolution of the students' self initiated projects which are devised in consultation with their lecturers towards the development of their emergent practice. Tutorials, lectures, field work, studio research methodologies, and the presentation of seminars by each student about the content and contexts of their practice are employed to achieve the synthesis of conceptual concerns and studio practice. The students are required to furnish support material and visual documentation of works produced during their sculpture studies, along with a body of works that represent the culmination of an intensive application of their study of sculptural practice.

**SART3360**
**Drawing/Painting 4B**
School of Art
UOC6  HPW3

In this course, students will concentrate on developing their individual creative interests. In consultation with lecturers, students will undertake a body of studio work which demonstrates the relationship between their own concepts and outcomes. Students will specialise in a range of media pertinent to their individual practice with a demonstrable relationship between content and process.

**SART3361**
**Etching Elective 3**
School of Art
UOC4  HPW3

These courses aim to introduce the student to a wide range of experiences in the process of intaglio printing, including etching, drypoint and engraving. Students will be encouraged to cultivate an awareness of the creative possibilities of intaglio printing and to relate their concepts to the characteristics of the medium through a combination of theoretical and practical studies.

**SART3362**
**Printmaking 4B**
School of Art
UOC6  HPW3

In this course students further investigate and interpret the significant conventions of the disciplines within printmaking. In consultation with lecturers, students will further consolidate a program of printmaking studies which reflects their individual interests. Various media, techniques and aspects of printmaking will be refined, and students will be encouraged to resolve the characteristics of their chosen media. Documentation and conservation of prints and printmaking will be covered.

**SART3363**
**Sculpture/Performance/Installation 4B**
School of Art
UOC6  HPW3

This is a studio based course that pursues a self initiated program of project work, formulated in consultation with the student’s lecturers. Studio research training requires students to submit project proposals and to furnish support material for a series of works of a standard appropriate to this level of study. Students are required to demonstrate the intellectual and practical skills required to execute a coherent body of work. With lecturers’ guidance students broaden their understanding of the relationship of their conceptual concerns to their personal working methods, their project management skills, enabled by a hypothetical public art project, strategies for research, the representation of ideas, and the presentation of their art work.

**SART3370**
**Drawing/Painting 5B**
School of Art
UOC6  HPW3

In this course students will concentrate on the resolution of their major creative interests. Students will be required to initiate and execute a body of studio work which demonstrates the relationship between their own work and current art practice. In this course students are expected to resolve the focus of their inquiry towards a coherent body of work which incorporates previous investigations into theories and concepts. Appropriate techniques of presentation for exhibition will be addressed in this course.

**SART3372**
**Printmaking 5B**
School of Art
UOC6  HPW3

This course will consolidate concepts and skills developed in previous sessions. Students will concentrate upon their major creative interests and will be required to initiate and execute a body of studio work which demonstrates the relationship between their own work and current art practices and concepts. Appropriate techniques of presentation for exhibition will be addressed in this course.

**SART3373**
**Sculpture/Performance/Installation 5B**
School of Art
UOC6  HPW3

This studio based course is comprised of a self initiated work program that is planned in consultation with the students’ lecturers. The result of this program will be a body of work of a standard appropriate to this level of study, suitable for public exhibition. This process is supported by the continued acquisition of advanced skills, refined perceptual analysis, material manipulation, and technologies pertinent to the students’ ideas. This includes the writing of project proposals, exploratory, interdisciplinary research, the planning, production and presentation of projects, and the documentation of completed works at a professional standard. This course provides a focus for the development of strategies towards the rigorous resolution of the student’s artworks as an emergent, professional artist.

**SART3301**
**Advanced Life Painting**
School of Art
UOC6  HPW3

The aim of this course is to enable students to develop skills and an awareness of aesthetic values in life painting so that the student can use the discipline of painting as a means of individual artistic expression.
The student will explore theoretical concepts and develop relevant skills to allow them to realise their ideas. The student will undertake projects aimed at encouraging an individual, creative and professional approach to painting.

SART3502
Drawing Elective 3
School of Art
UOC4  HPW3

The aim of this course is to enable students to develop a command of drawing as a visual arts discipline and to relate the art of drawing to other areas of creative endeavour. The student will explore various aspects of drawing and develop competence and confidence in drawing. The student will undertake exercises which will emphasise drawing as a means of creative expression, and also as a tool of research in the visual arts.

SART3581
Screen Printing Elective 3
School of Art
UOC4  HPW3

This course aims to introduce the student to all techniques involved in screen printing. Through investigation and selection students will develop an understanding of the technical means and the aesthetic qualities of the original print. The course will engage elements including skills and techniques, experimental approaches, the relationship between the technical and aesthetic properties of prints and the ability to assess the results of one's own work.

SART3591
Printmaking Elective 3
School of Art
UOC4  HPW3

In line with current art practice, expression is encouraged through the use of traditional and contemporary print media to be chosen (dependant upon availability) from the range of etching, digital imaging, lithography, paper moulding, photocopying, relief and screen printing. The aim of this course is to enable the student, by application of theory and developed skills, to create print-based works of an increasingly professional standard in both two and three dimensions. The student will undertake projects, either as separate entities or combined in installed pieces, aimed at encouraging an individual, creative and professional approach to printmaking.

SART3601
Sculpture Elective 3
School of Art
UOC4  HPW3

The aim of this course is to develop in the student the capacity to resolve aesthetic, theoretical, technical and material considerations in the creation of sculptural works. Through a program of theoretical and practical studies students will experiment with sculptural concepts, techniques and mediums toward the development of original works.

SART3621
Installation Elective 3
School of Art
UOC4  HPW3

This course provides the opportunity to explore the various forms and disciplines three-dimensional activity can take in contemporary art practice. This course is designed to allow maximum flexibility for both multimedia experimentation and specialisation in the exploration of the construction, installation and space as an expressive vehicle. This course is studio based with an emphasis on the critical analysis of research, experiential learning and conceptual development. This discussion is centered around a rigorous studio theory program, conducted on the studio floor and in tutorials.

SART3800
Professional Practice
School of Art
UOC4  HPW3

This course will prepare students completing the BFA for professional practice as artists in Australia.

SART3801
Special Projects - Studio
School of Art
UOC6  HPW3

This course is intended to facilitate the School of Art in developing its educational program for undergraduate students by incorporating such opportunities into the academic program. Specific course outlines will be distributed detailing the academic content, objectives, assessment tasks and criteria, modes of teaching and learning, expectations and requirements of student participation appropriate to the event/proposal. Please note that there may be costs involved (such as costs associated with travel, accommodation, meals and museum visits) in taking this course.

SART3860
Digital Imaging and Painting
School of Art
UOC6  HPW3

The aim of this course is to investigate the possibilities of digital media for the painter. The course will concentrate on how the contemporary painter is able to integrate digital technology into their art practice. As part of the session will be devoted to the outputting of imagery and subsequent work in the studio, the session will be divided between the computer lab and the painting studio. Previous experience in digital imaging is necessary as the student needs to concentrate on the introduction of appropriate software. This must be undertaken prior to enrolling in this course so that sufficient time can be spent on the studio work.

SART3862
Ceramic Shell Casting
School of Art
UOC6  HPW3

This sculpture course is an advanced studio workshop devised to extend the student's understanding, research skills and practical expertise in traditional and alternative metal casting technologies. Research and practice using a variety of casting techniques will be undertaken with a focus on ceramic shell casting. The conception and processing of the student's self initiated project work will be developed in the context of contemporary art theory and practice.

SART3863
Installation and Electronic Art
School of Art
UOC6  HPW3

This research based elective course in studio practice engages in the investigation of the theory, aesthetics and three dimensional applications of electrical, electronic and digital components in contemporary sculpture, performance, installation and digital media. Research will be studio based and it is expected that a diversity of ideas and practices within the electronic arts will be explored. The course will build upon the students’ technical knowledge of electronic and digital technologies to conceptualise, process and present completed art works. The course has a studio theory component in which all students will actively engage in the research, discussion and debate of issues related to contemporary thought in electronic arts, such as interactive sculpture, installation, IT spaces, and the interface of the visual arts with technology and science.

SART3864
Advanced Electronics
School of Art
UOC6  HPW3

An advanced workshop devised to extend students' existing skills and understanding of artistic practice at the intersection of sculpture, installation and performance with electronic technologies and digital media. The acquisition of skills and research methods in technical areas are fuelled by the students' advanced, self initiated project work. Reportage of research is required as a skill sharing strategy. A diversity of practices will be explored, ranging from movement and light sensing to digital input and imaging, to site specificity and presentation.
methodologies. Students will be encouraged to liaise with both industrial and research organisations to achieve goals and meet deadlines.

SART4030
Honours Paper
School of Art
Enrolment requires school approval
UOC6

A paper of approximately 5,000 words researching a selected subject, or subjects, related to the student's studio practice and interests. Subject approval, the work undertaken will be initiated by the student.

SART4044
Honours Studio Practice
School of Art
Enrolment requires school approval
UOC18

The completed studio-based research works appropriate to the field of study which will be formally exhibited, published or displayed at the end of the course.

SCOM1011
Science, Technology and Society
Faculty of Science
UOC6 HPW3
Excluded: HPSC1400, SCTS1001, SCTS1106.

Examines the relations of science and technology with societies in the modern world. The status and authority of science. Can science tell us what we ought to do? Critiques of science. Is technology applied science? What is the relation between technology and social change? The political uses of expertise. Experts and the rest of us. Issues of participation. These topics will be explored theoretically and by reference to case studies including: modern genetics and its use in agriculture and medicine; information technology, computers and cyberspace; energy technologies, nuclear and solar; and technologies of everyday life.

SCOM1021
Introduction to Science Communication
Faculty of Science
UOC6 HPW3

This course employs activities and discussion to introduce students to methods of reporting, discussing, debating and learning in relation to concepts involving science. The course surveys employment in science communication and introduces the range of skills required of practitioners in the area. It provides practical skills in research, organising, writing and presenting scientific and quantitative information to a non-scientific audience with clarity and accuracy. Students will gain experience in talking and writing about science and help in achieving the skills required through presentation of science reports for group feedback. There will be consideration of the need to present information to non-scientific audiences and to consider the likely impact of what is communicated. Case studies and guest lectures will illustrate the differing requirements of communicating controversial and non-controversial issues.

SCOM2014
Science Communication
Faculty of Science
UOC6 HPW3
Excluded: SCOM1021

Activities and discussion are used to enhance students' abilities in reporting, discussing, debating and stimulating learning in relation to science and related concerns. The course surveys a broad range of employment in science communication from management to journalism, and introduces a range of strategies required in each area. Practical skills in research, organising, writing, and presenting scientific and quantitative information to non-scientific audience are refined through frequent practice and feedback to improve accuracy and impact. Students also develop skills in facilitation and teamwork. There is special focus on understanding different types of audiences—children to non-scientific professionals—in terms of their knowledge, learning styles, and vested interest in the scientific issues addressed. The differing requirements for communicating controversial and non-controversial issues are illustrated through case studies, guest lectures, and excursions.

SCOM2021
Professional Science Communication
Faculty of Science
UOC6 HPW3
Prerequisite/s: SCOM1021 or LIFE1001 or INOV3100 or SCOM2014

Key issues in science communication are addressed and skills in science communication are practised and developed—writing and speaking as well as multi-media. Tensions faced by the professional science communicator that are addressed include: the need to identify and communicate the ‘truth’; the need to simplify in order to be understood by the public and non-scientific professionals; the need to deal with a range of stakeholders with incommensurable viewpoints; and whether to allow the hopes and fears about the potential impact of what is communicated to influence the act of communication. The course will be taught as a seminar and workshop combining examination of current issues with simulations for practising professional communication skills. Guest lecturers will include accomplished communicators from business, government and the media.

Note/s: This course is also available to students either having school approval or who have completed LIFE1001 or LIFE2001 or INOV3100. This course is only offered in alternate years commencing 2004.

SCOM2505
Science Communication Project A
Faculty of Science
UOC3 HPW2
Prerequisite/s: SCOM1021 or LIFE1001 or INOV3100 or SCOM2014

Students pursue a project to learn about an area of science communication of their choice—eg. museum work, web site development, writing for publication—plus project management, extending professional networks, and garnering feedback to improve what they produce. A learning contract will determine the scope of effort and the nature of the deliverable product. Assessments include a log of reflections on communication, science and professional relationships; a short interim report; and a final product. Approval for enrolment depends on the project's suitability and availability of a lecturer to supervise. SCOM2505 and SCOM3505 may be taken simultaneously.

Note/s: This course is also available to students either having school approval or who have completed LIFE1001 or LIFE2001 or INOV3100.

SCOM2700
Topics in Science Communication- Language and History
Faculty of Science
UOC3 HPW2

This course on the role of language and history in science communication involves hands-on examination of topics such as the evolving jargon of science and technology, changes in the instrumentation of science, and the careers of people who have made scientific discoveries. The focus is on the day-to-day processes of arguing with colleagues or government bureaucrats, a scientist trying to be understood by his or her business partner, or how specialists in a field learn to exploit new instrumentation. This course reveals practical insights into how technical and nontechnical people interact in various scientific and institutional settings. Course content will vary significantly from session to session depending on the lecturer. Initial courses will address topics such as the evolution of scientific instrumentation or the recording of oral histories of Australian science. A number of these 3 UOC courses are being offered by the SCOM program.

SCOM2750
Topics in Science Communication - Social and Organisational Processes
Faculty of Science
UOC3 HPW2

Social and organisational processes often necessitate communication among various kinds of scientific or technical specialists as well as involvement of relatively non-technical people. New technology gets developed and integrated with other new or existing technologies, or court cases get heard on environmental issues with each side having its 'experts'. This course reveals practical insights into how technical and nontechnical people interact in various organisational and institutional settings. Course content will vary significantly from session to session depending on the lecturer. Initial courses will address topics like—how
designers and operators interact in the design of new technology or how one addresses ethical concerns in science communication. A number of these 3 UOC courses are being offered by the SCOM program.

SCOM2800
Topics in Science Communication - Processes in Science Media and Education
Faculty of Science
UOC3 HPW2

Whenever scientific or technical specialists engage with lay people, interesting things can happen - such as the development of new technology, publicity for scientific discoveries, or changes in how science is taught. This course reveals practical insights into how technical and nontechnical people have - and how they can - communicate with each other through the media and in educational settings. Course content will vary significantly from session to session depending on the lecturer. Initial courses will address topics like - how to make a science video or how to design a museum exhibit. A number of these 3 UOC courses are being offered by the SCOM program.

SCOM3011
Communicating Science: Theory and Practice
Faculty of Science
UOC6 HPW3
Excluded: SCTS3127, HPSC2730

Communicating science is crucial in modern societies. Scientists need to communicate not only among themselves but with representatives of business, unions, government, the media and environmental and community interest groups. This course examines how different ideas about the nature of science affect our understanding of how science is communicated. Topics include: the history of science communication; new communication technologies and science; popularisation; distortion; the communication of uncertainty and risk. The course considers the role of communicators and policy advisors and guides students toward the latest on-line tools required to access, evaluate and use current information about science, technology and their social and environmental impacts. The class will simulate issues of communication and the roles of science communicators and produce appropriate outputs, such as journalistic articles, press releases and presentations to be published through an on-line journal.

Note/s: This course is only offered in alternate years commencing 2005.

SCOM3021
Science Communication Internship
Faculty of Science
UOC6 HPW3
Prerequisite/s: SCOM1021 or SDES1103 and SDES1104

Students undertake an internship in a scientific or science communication workplace relevant to the student’s career plans and science focus. The internship placement may be outside the University, or the student may pair up with a scientific researcher at UNSW. The intern will benefit from working with a mentor who permits them access to observe and discuss research in progress, policy issues under debate, or products being developed for commercialisation. The course coordinator will assist students to write and/or produce a series of pieces that explain the character of the research, its primary aims, and its potential contribution to the development of a scientific field and the community at large. With the help of the course coordinator, the student will produce a series of reports on the scientific activities there, reports that are suitable for popular and technical audiences. Students will engage in regular meetings of their internship cohort to share insights and broaden their professional networks.

SCOM3505
Science Communication Project B
Faculty of Science
UOC3 HPW3
Prerequisite/s: SCOM1021 or LIFE1001 or INOV3100 or SCOM2014

Students pursue a project to learn about an area of science communication of their choice - eg. museum work, web site development, writing for publication - plus project management, extending professional networks, and garnering feedback to improve what they produce. A ‘learning contract’ will determine the scope of effort and the nature of the deliverable product. Assessments include a log of reflections on communication, science and professional relationships; a short interim report; and a final product. Approval for enrolment depends on the project’s suitability and availability of a lecturer to supervise. SCOM2505 and SCOM3505 may be taken simultaneously.

Note/s: This course is also available to students either having school approval or who have completed LIFE1001 or LIFE2001 or INOV3100.

SDES1101
Design Studio 1 - Elements and Principles of Design
School of Design Studies
UOC6 HPW3

This course extends the study of fundamental design principles. The relationship between two-dimensional and three-dimensional representation of form and space is examined through a series of problems, exercises and projects. Students are introduced to concepts of constructing and de-constructing form as well as relationships between form and function. The studies of Design Studio 1A are progressed to analyse designed objects, environments and graphics as well as the processes of designers and their practice. Students are required to respond to the projects contained within this course using both two-dimensional and three-dimensional techniques to communicate their creativity and resolutions. Further understanding of the design process is encouraged by placing emphasis on extended development of concepts as well as methods and techniques for presenting design solutions.

SDES1102
Design Studio 3 - Analysing Design Principles
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES1101

This course extends the study of fundamental design principles. The relationship between two-dimensional and three-dimensional representation of form and space is examined through a series of problems, exercises and projects. Students are introduced to concepts of constructing and de-constructing form as well as relationships between form and function. The studies of Design Studio 1A are progressed to analyse designed objects, environments and graphics as well as the processes of designers and their practice. Students are required to respond to the projects contained within this course using both two-dimensional and three-dimensional techniques to communicate their creativity and resolutions. Further understanding of the design process is encouraged by placing emphasis on extended development of concepts as well as methods and techniques for presenting design solutions.

SDES1103
Design and Human Functioning - the Body at Work
School of Design Studies
UOC4 HPW2

The aim of this course is to introduce and develop understandings about the functioning human being at both the physical and cognitive levels. The relationship between human physiology and psychology is examined in the context of the designed environment and its implications for questions of ergonomics. The course will refer to the physiology and neurology of sensation, the psychology of perception, ergonomics and anthropometrics as knowledge domains pertinent to designing the optimum interface between humans and their environment.

SDES1104
Interactive Systems
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES1101

The aim of this course is to introduce and develop understandings about patterns of interaction between design processes and natural and manufactured systems. The relationship between nature, human society, ethical values and design are examined in the context of pressures on resources and the implications for the quality of life. The course will refer to ecology, ethics, value systems, social systems, political systems and legal systems so that students understand some of the dynamics of the social and environmental contexts for design as well as the foundations of responsible design practice.
SDES1105
Presentation Techniques
School of Design Studies
UOC3 HPW2

This course aims to emphasise the development of a keen and critical awareness in students of the principles of verbal and visual presentation techniques within the Design context. The questions of intent; content and application are focussed towards the intended development of the individual's visual language and presentation technique.

SDES1106
Design and Computers 1 - Introduction to Graphics Computing
School of Design Studies
UOC6 HPW3

This course is an introductory investigation of computers and applications for graphics. It explores manipulation, image acquisition, layers, and various effects. The course investigates rapidly developing tool sets, identifies and familiarises students with basic user interface metaphors utilised by most software packages while placing into context software applications commonly seen in industry and studio work flows.

SDES1107
Design Studio 2 - Materials, Equipment and Process in the Design Studio
School of Design Studies
UOC6 HPW3
Corequisite/s: SDES1101.

The aim of this course is to introduce and demonstrate the multidisciplinary and integrated nature of the design process. Students will be introduced to basic materials, equipment and techniques involved in presenting and representing ideas both visually and verbally. The importance and relevance of two-dimensional and three-dimensional models/studies within the design process is emphasised by understanding their place as tools of exploration, communication, visualisation and presentation. This course will equip students with necessary knowledge and skills to apply within the design studio setting.

SDES1108
Design Studio 4 - Thinking and Theory in the Design Studio
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES1101, SDES1107;
Corequisite/s: SDES1102.

In this course, students are introduced to thinking processes whereby theoretical and philosophical understandings are applied to support the creative process. These understandings within the design process are used to create complexity and to reinforce design outcomes. Further, students are involved in critical analysis of solutions derived in order to develop the capacity to evaluate different design approaches. Questions of intent, content and application are focused towards the development of the individual's visual language.

SDES1109
Measured Drawing
School of Design Studies
UOC3 HPW2

This course will introduce students to the communication of ideas through measured drawing. Students will be introduced to topics by means of exercises in plane geometry, descriptive geometry and orthographic projections. Exercises will also include those to develop the ability to visualise and record forms and spaces in measured drawings.

SDES1110
Design and Computers 2 - Introduction to CAD
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES1106

This course provides an introductory investigation of computers and applications for 2D CAD. It explores rapidly developing tool sets, identifies and familiarises students with basic user interface metaphors utilised by most 2D CAD software packages, while placing into context software applications commonly seen in industry and studio work flows.
and safety issues associated with the ceramic studio. The course is primarily practical in nature, but seeks to place the acquisition of skills within the broader context of art/ceramic history, theory and contemporary practice. Students are expected to display competence in basic studio processes by the end of the session.

SDES1317  
Jewellery 1A  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES1304 Introductory Studies: Ceramics, Jewellery, Textiles.

This course will extend students’ understanding of the scope and possibilities of the jewellery workshop and provide an overview of traditional and contemporary perceptions of jewellery practice. Through lectures, demonstrations and projects, students will develop skills of working, acquiring skills and knowledge in techniques and with materials related to the practice of jewellery. Studio activity will examine the technology of metals and other materials applying such cold joining techniques as sawing, filing, drilling and riveting to translate ideas into wearable and non-wearable jewellery works.

SDES1318  
Textiles 1A  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES1304 Introductory Studies: Ceramics, Jewellery, Textiles.

This course introduces students to contemporary art textile practice, extending their understanding of the scope and possibilities of textiles. Contemporary, traditional, cultural and historical textiles are referenced and examined to develop knowledge and a critical awareness of textile processes and ways of integrating cloth, fabric, fibre and materials into the contemporary context. Textiles 1A provides the context to develop individual approaches with research, experimentation and investigation through lectures, demonstrations and conceptually based projects.

SDES1319  
Ceramics 1B  
School of Design Studies  
UOC6 HPW3

This course introduces basic ceramic processes and materials and provides the opportunity for students to develop familiarity with ceramic media and studio skills. While primarily practical in nature, the course seeks to place the acquisition of skills within the broader context of ceramic art/design/craft history, theory and contemporary practice. Lectures, demonstrations and studio practice introduce a range of approaches which may include handbuilding, techniques, throwing, low impact processes, clay and glaze technology and firing. Appropriate health and safety procedures associated with the studio are demonstrated, discussed and applied in the production of students’ work.

SDES1320  
Jewellery 1B  
School of Design Studies  
UOC6 HPW3

This course extends students’ understanding of the scope and possibilities of the jewellery workshop and provides an overview of traditional and contemporary perceptions of jewellery practice. Through lectures, demonstrations and projects, students acquire skills in techniques and the handling of materials related to the practice of jewellery and small-scale objects. Studio activity examines the technology of metals and other materials applying such techniques as sawing, filing, drilling, riveting and soldering to translate ideas into wearable and non-wearable jewellery works. This is a practical class in skills related to jewellery and metal-working.

SDES1321  
Textiles 1B  
School of Design Studies  
UOC6 HPW3

This course introduces students to contemporary art textile practice, extending their understanding of the scope and possibilities of textiles. Contemporary, traditional, cultural and historical textiles are referenced and examined to develop knowledge and a critical awareness of textile processes and ways of integrating cloth, fabric, fibre and materials into contemporary practice. Textiles 1B provides the context to develop individual investigations into art textiles by introducing a range of textile processes. Students are expected to attain basic competence and incorporate these textile processes into their work.
and skills with material, formal and contextual issues in ceramic design. Theoretical and practical enquiry highlights the conceptual, material and sculptural understandings of three dimensional object design in clay and associated materials. In particular, the course provides an introduction to the ceramic studio and addresses issues of identity, seriality, certainty, familiarity and the mundane, interrogating the meaning of the repeated object. In practical terms, it provides the opportunity to investigate techniques of replication, including the principles and applications of model mouldmaking. Students are encouraged to develop and explore ideas in relation to the articulation, transformation and reproduction of objects using a range of ceramic materials. Elements of the design process - critical analysis, research, problem solving and design development - are undertaken to facilitate the resolution of formal, material, fabrication and design issues in ceramic practice.

SDES2105
Jewellery Studio 1
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES1102
In this course design practice integrates conceptual exploration with technical knowledge and material investigations applied to jewellery and object design. Projects address stages of the design process, critical analysis, research, problem solving and design development and culminate in the fabrication of design solutions for wearable or body related objects. This course develops students’ understanding of jewellery practice through investigations of materials and jewellery processes. In practical terms, students will examine the technology of metal and its translation through heat into three-dimensional forms. The techniques of soldering, casting, hydraulic forming and fabrication will be explored using both ferrous and non-ferrous materials, to translate design drawings and models into three-dimensional jewellery objects, both wearable and non-wearable.

SDES2106
Textiles Studio 1: Material Processes
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES1102
This course introduces the language, traditions, materials, processes and practices that constitute textile design. Design projects are undertaken which require students to integrate knowledge, conceptual ideas, references and technical skills with materials, surface, form and contextual issues. Aspects of the design process, research, critical analysis, problem solving and design development are undertaken to facilitate the resolution and fabrication of textile designs. Through projects, the course develops an understanding of a variety of surface design processes and textile construction techniques to translate design concepts, drawings and models into textiles for the body and interior contexts.

SDES2107
Design and Computers 3 - CAD & Graphics Computing
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES1110
This course is an investigation of graphics and CAD software used in the design of graphics/media and 3D models. The skill sets covered include photographic enhancement, image manipulation, typography and multi page documents, including style sheets and vector illustrations. This course also covers procedural techniques for conceptualisation in 2D and 3D as well as the processes and techniques used in computer-generated design within the graphics & print arena, objects and environments.

SDES2108
Applied/Object Studio 2 - Form Function and Fabrication
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES2101
This course aims to extend knowledge of materials and processes and their relationship to three dimensional object design. Projects address the cultural positioning that objects have in the world around us. A series of case studies exemplifying design research, production/technology methodologies including moulding/casting, laser cutting and sheet forming and fabrication is undertaken. Students further develop skills in problem solving and creatively explore the relationship between the human interface and object design. Communication techniques in both 2D and 3D format are developed, including basic computer skills.

SDES2109
Environments Studio 2 - Space and Context
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES2102
In this course design practice is investigated which requires students to extend their capacity to integrate technical knowledge and artisan skills with space, form and contextual issues in the human environment design discipline. Projects will address the conceptual, material and spatial understandings of both exterior and interior environments. Elements of the design process - critical analysis, research, problem solving and design development - will be undertaken to facilitate the resolution of complex spatial relationships and forms in articulated and structured human environments.

SDES2110
Graphics Media Studio 2 - Media and Experience
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES2103
This course examines a range of media forms with a critical practitioner perspective of how experiences in media shape discussion, exchange and international understanding. Students explore media production and consumption to develop skills in media generation and visual interpretation. The aim of the course is to develop skills in discerning between information and misinformation in a range of contexts. The graphic languages of television, the internet, news print and SMS inform studio projects that develop strategies for typographic design in a range of media for information retrieval in work, leisure and entertainment contexts.

SDES2111
Ceramics Studio 2 - Concepts and Contexts
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES2104
The course extends students’ awareness of relevant theoretical, critical and contemporary contexts; and deepens understanding of an engagement with materials, processes and technologies relevant to ceramic design and studio production. In particular, the course highlights relationships between form and surface. It introduces and critiques processes that are involved in the development of painted, printed and digitally generated surfaces on ceramic media: students engage with issues, materials and techniques relevant in their development. Elements of the design process - critical analysis, research, problem solving and design development - are undertaken to facilitate a more complex resolution of formal, material, fabrication and design issues in ceramic design practice.

SDES2112
Jewellery Studio 2
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES2105
In this course, students investigate existing design practice extending their capacity to integrate technical knowledge and skills with material and conceptual issues in the jewellery design domain. Projects address the conceptual, material and technical understandings of jewellery and object design, applying a design process that involves critical analysis, research, problem solving and design development to more complex formal and fabrication issues. This course focuses students on a thorough examination of the body as the format or site for design solutions, allowing for experimentation and the development of an understanding of techniques such as advanced fabrication, repousse, anodising, use of the lathe, and research and experimentation with a variety of non-metal materials and processes. Studio activity combines the development of one-off designs and multiple production of jewellery objects.
SDES2113
Textiles Studio 2 - Surface and Structure
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES2106

In this course textile design practices are investigated, requiring students to extend their understanding of the language of textiles and their capacity to integrate knowledge, conceptual understanding and technical skills with materials, surface, form, structure and contextual issues in textile design. The design processes of research, critical analysis, problem solving and design development are undertaken to facilitate the resolution and fabrication of 2D and 3D textile designs. All projects involve conceptual development, historical and contemporary references and consideration for the application of the textile. Projects require students to consider the development of their individual design aesthetic. Through projects, the course develops an understanding of surface and print design techniques and construction processes to translate design concepts, drawings and models into textiles for apparel and interiors contexts.

SDES2114
Design and Social Theory
School of Design Studies
UOC4  HPW2

This course introduces students to concepts within social theory and their application within the area of design. Current issues in design will be discussed and analysed to examine the behaviour of social groups and target populations. By investigating issues such as green design, gender and social responsibility in design, students can develop an understanding of the social impact of design. This investigation will require active involvement by the students in observation, analysis and speculation concerning the social factors present in all aspects of the design process.

SDES2115
Design and Computers 2B
School of Design Studies
UOC4  HPW4
Prerequisite/s: SDES2107

This course will integrate the graphics component the introduction to 2D drawing on the computer by the use of CAD (Computer Aided Drawing) software program for the generating of technical and mechanical design drawings. With this basis of computer generated drawing, the students can create and manipulate designs and drawings. The areas that this course will cover includes placing, manipulating and modifying elements, drafting features, references filing, dimensioning, annotating, plotting and 2D drawing techniques.

SDES2116
Design Practice
School of Design Studies
UOC6  HPW3

In Design Practice, students will investigate: the moral and philosophical contexts for professional activity, professional ethics, contract law, patents, copyright and registration of designs, preparation and budgeting for a brief, production co-ordination & project management, preparation of reports and other written material, Corporate Identity, and Design Culture. Students will be introduced to the broader question of general management, design management and the importance of a design culture, and target populations. By investigating issues such as green design, gender and social responsibility in design, students can develop an understanding of the social impact of design. This investigation will require active involvement by the students in observation, analysis and speculation concerning the social factors present in all aspects of the design process.

SDES2140
Clay, Glaze, and Firing Technology
School of Design Studies
UOC6  HPW3

This course provides an introduction to the basic materials and technology associated with the development and production of creative work in clay. Practical and theoretical classes focus on approaches to firing; and the chemistry, preparation and modification of clay bodies, slips and glazes. Workshop activity highlights experimentation, testing and evaluation, and the application of knowledge to studio practice. It provides the context in which students may explore personally relevant ideas and goals through an investigation of a range of materials and approaches. Theoretical information is contextualised with reference to ceramic history and to contemporary developments/usage. The course includes an introduction to specialist software designed to facilitate relevant calculations, assist in the development of ceramic formulations and provide for the storage of data.

SDES2141
Moulding and Casting in Clay
School of Design Studies
UOC6  HPW3

This course introduces moulding, casting and extrusion processes as a means of developing and producing three-dimensional form in clay. It provides a working knowledge of the principles and applications of model and mouldmaking and encourages students to develop and explore ideas in relation to the articulation, replication and transformation of objects using a variety of ceramic media. The course spans a range of applications from casting/moulding associated with multiples and series (e.g. in small scale industrial and studio production) to casting for “one-off” or sculptural outcomes. Theoretical information is contextualised with reference to ceramic history and to contemporary developments/usage. In addition, the course examines the impact of new and emerging technologies, particularly computing technologies such as CAD, on the manner in which ceramic artists and designers understand, develop, produce and replicate objects.

SDES2142
Drawing, Photographic and Print Techniques on Clay
School of Design Studies
UOC6  HPW3

This course examines media and processes associated with the elaboration of both raw and fired clay surfaces. It provides students with the opportunity to explore, evaluate and develop a range of approaches to the production of graphic surfaces on clay. Theoretical information is contextualised with reference to ceramic history and to contemporary developments/usage. Lectures, demonstrations and individual projects provide the focus for gaining understanding and skills in the practical application of drawn, painted, photographic, printed and digitally generated images/surfaces to clay. Studio activity is conducted within a context of enquiry in which students are challenged to interrogate the relationship between idea, material, process, outcome and meaning. It highlights experimentation, testing and evaluation, and the application of knowledge to studio practice.

SDES2143
Low Impact and Alternative Ceramic Processes Workshop
School of Design Studies
UOC4  HPW3

This course provides an introduction to alternative materials and low impact processes relevant to the construction and firing of work in clay. Lectures, demonstrations and practical projects examine approaches that include adobe, pisé, paper clay and a range of accessible, low impact firing methods. Throughout, students work with accessible materials to produce clay media, equipment and firing that are inexpensive, energy efficient and easily replicated in the domestic studio.

SDES2149
Metal Forming Workshop
School of Design Studies
UOC4  HPW3

This is a practical studio based class open to those students requiring skills in jewellery and small-scale object making. This course will extend students familiarity with the scope of the jewellery workshop and build their skills in particular areas related to the production of three-dimensional forms. Through experimentation with materials and with processes such as casting, advanced fabrication and hydraulic forming, students will be asked to realise three-dimensional works.

SDES2150
Jewellery Workshop: Processes for Multiple Production
School of Design Studies
UOC4  HPW3

This is a practical studio based class open to those students requiring skills in jewellery and small-scale object making. This course will extend students familiarity with the scope of the jewellery workshop and build their skills in particular areas related to the production of three-dimensional forms. Through experimentation with materials and with processes such as casting, advanced fabrication and hydraulic forming, students will be asked to realise three-dimensional works.
This is a practical class open to students requiring skills centred in the jewellery studio. This course will develop students’ experiences with those jewellery materials, techniques and processes which are linked to the production of multiples and series for jewellery and small-scale objects and include the use of CAD to design object prototypes.

SDES2151
Jewellery Workshop: Surface Techniques
School of Design Studies
UOC4 HPW3

This is a practical class open to students requiring skills centred in the jewellery studio. This course will focus on a thorough examination of surface as applied to jewellery allowing for experimentation in any one of a variety of specialist surface techniques such as granulation, etching, keum-bo or married metal.

SDES2152
Jewellery Workshop in Colour
School of Design Studies
UOC4 HPW3

This is a practical class open to students requiring skills centred in the jewellery studio. This course takes colour as a focus as it applies to jewellery practice. This advanced class will encourage students to integrate ideas, processes and materials from their major study area with the specific colour techniques demonstrated within the Workshop. Techniques such as enamelling, anodising and the application of a variety of applied pigments appropriate to the jewellery studio would form the basis for experimentation.

SDES2163
Jewellery Elective 1: Contemporary Wearables
School of Design Studies
UOC4 HPW3

This course will enable students to gain insight into and understanding of jewellery practice. Within a framework encompassing traditional and contemporary jewellery perceptions, students will develop a sound understanding of jewellery skills and materials to be used when translating ideas into objects. Central to the course is the focus on the body as the format for wearable work.

SDES2164
Jewellery Elective 2: 3D Jewellery and Small Scale Objects
School of Design Studies
UOC4 HPW3

This course will develop students understanding of jewellery practice, as applied to three-dimensional form. Through experimentation with materials and jewellery processes students will be asked to realise works which are body related but not wearable and which may be expressed as vessels or implements expanding their understanding of this traditional component of jewellery practice.

SDES2167
Textiles for Fashion
School of Design Studies
UOC6 HPW3

The course provides an introduction to textiles, explored in the context of fashion. The course covers the design of textiles for the fashion, apparel and accessories Industry. Particular emphasis will be placed on the textiles used, the selection of fabrics and the manipulation of the textile surface for fashion garments. It will also cover the work of selected designers, investigating how they incorporate specific textile techniques into their fashion ranges. The course will focus on design as a process, ways of interpreting trend inspirations and will culminate in a final textile surface design/presentation. Students will design their own textile collection based on research into current market and fashion trends, applying these influences to the design process.

SDES2168
Commercial Textile Design
School of Design Studies
UOC6 HPW3

This course tracks the evolution of a textile design from sketch, design brief, concept development to sampling and final commercial production. It examines weave, stitch and print design processes at studio and industry level covering professional presentations, “colourways”, client requirements, studios equipment and sources of inspiration. Industry visits will enable students to see the work of professional textile designers involved in the fashion, home wares & interior design industries, offering excellent insights into career possibilities in textile design. The course will cover the historical evolution of textile design and techniques and consider techniques currently used commercially including screen printing, roller printing, digital design development and direct digital printing onto fabric. Students will develop their own designs for printed textiles to set briefs, relating to fashion or furnishing fabrics.

SDES2170
Rendering and Illustration for Designers
School of Design Studies
UOC6 HPW3

Students will undertake traditional and contemporary methods of hand rendering illustration as well as concept drawing, process drawing, storyboard and highly finished realization drawings. This course will examine through practice the techniques, processes, media and ideas associated with various design domains.

SDES2171
Design Management Elective - Brand & Identity
School of Design Studies
UOC6 HPW3

This subject will develop students’ understanding of how design management assists in the development of a companies brand and identity. Through a series of case studies students will investigate: company branding and communication, leadership and management, retail branding and positioning strategies, corporate identity and design management within corporate culture. They will also be introduced to the broader question of general management, and the importance of the development of a design culture within organisations whether Companies or Institutions.

SDES2174
Fashion and Costume Design 1
School of Design Studies
UOC6 HPW3

This course will introduce students to the contemporary and commercial applications of fashion and costume design. Students will learn pattern making, basic garment construction, fashion drawing and design, and they will study applied decoration, embroidery and the uses of fashion accessories. The history of costume and fashion will be explored through the study of museum objects and artworks, and this will be supported by contact with the contemporary fashion industry in Australia.

SDES2177
Design in Performance
School of Design Studies
UOC6 HPW3

Theatricalisation and design theming of public occasions, community ceremonies, performance events and sporting events is an established design trend. Design in staging large-scale events, including theatre performance, will be the major focus of this subject. Through a series of lectures and workshops, students will be introduced to the design processes used in a variety of performances. Through close examination of the characteristics by which such occasions are represented and communicated to audiences, students will systematically investigate the crafts and contemporary theories of staging such events. A design brief will be set for students to design, draw and construct.

SDES2178
Independent Study
School of Design Studies
UOC4 HPW3

This course is a directed study in a discipline or multidisciplinary area of interest and of relevance to the professional and vocational interests of the student. It should extend the knowledge and understanding of the subject through a systematic investigation and development of a project in association with a supervisor. Permission of the Head of School may be sought to determine the suitability of undertaking an independent study.
SDES2179
Design in the Theatre
School of Design Studies
UOC6  HPW3

Students will be introduced to the fundamentals of stage design for the theatre. This will include scenic design, painting, perspective, lighting, special effects and costume design. Through a series of lectures, workshops and design projects, students will explore basic design skills such as: technical drawing, rendering and model construction. Costume will cover character analysis, design, rendering, and pattern making. Historical and social research in theatre design will be given as well as design briefs for students to design, draw and construct.

SDES2184
Textiles: Woven Forms
School of Design Studies
UOC6  HPW3

This course covers the textile processes and techniques of woven, interlaced and constructed textiles with practical projects in tapestry, basketry, 3d interlacing andloom weaving. Weaving produces structures that can be used to make the finest of silk fabrics, define a shape or image in tapestry, create a texture or interlace any flexible material, metal or plastic to express a concept. Practical work in basketry, tapestry andloom weaving are complimented by historical, theoretical and conceptual references and information, providing an understanding of contemporary textile art and design practices involving woven structures.

SDES2185
Textiles: Fabric Manipulation
School of Design Studies
UOC6  HPW3

This course provides an introduction to textile processes and techniques associated with surface design and fabric manipulation as a means of expressing ideas. Practical work is complemented by critical, historical and theoretical information which assists the students in understanding elements of contemporary textile work. This subject covers processes involved in the surface decoration and manipulation of fabric including altered surfaces such as hand embroidery, machine embroidery, piecing, and fabric collage; mixed media techniques incorporating materials other than fibre; and drawing, design and concept development.

SDES2187
Ceramics: The Contemporary Vessel Elective
School of Design Studies
UOC4  HPW3

This course provides an opportunity for students to use basic materials, technology, processes and skills associated with the construction and firing of studio based work in clay. Practical work is contextualised within historical and theoretical considerations/debates that frame contemporary ceramic practice. In particular, studio projects give prominence to disparate contemporary interpretations of the vessel and associated notions of containment.

SDES2188
Ceramics: Multiples, Meanings and Methods Elective
School of Design Studies
UOC4  HPW3

This course highlights a range of fundamental approaches and skills that underpin multiple strands of contemporary ceramic practice. Practical work is contextualised within historical and theoretical considerations/debates that frame contemporary ceramic practice. In particular, studio projects give prominence to ideas and processes associated with the construction and firing of ceramic multiples and work in series.

SDES2195
The Arts and Aboriginal People and Torres Strait Islanders
School of Design Studies
UOC4  HPW3

This course will concentrate on one form of visual art, such as textiles, from the range of media utilised by the Aboriginal and Torres Strait Islander people. It will examine the course from a traditional and contemporary viewpoint with emphasis placed on its relationship to other art forms. The interconnectedness of the art forms with the culture will be studied. Visits to museum and gallery collections will be included. A studio component will be incorporated to complement the art and problem solving activities based on stylistic qualities of various art forms.

SDES2198
Advanced Typography and Publication Design
School of Design Studies
UOC6  HPW3

Complexity of information and data density have increased with the integration of information in a greater range of private and public contexts. This course involves cultural, historical and practical exploration of typographic and publication genres from a design perspective. The relationship between typography as an expressive medium and its technological development is explored through a series of studio workshops. Publications such as books and magazines in print and screen media are developed to gain an advanced understanding of dynamic typography, page and screen architecture and information layout for publication.

SDES2199
Propaganda and Advertising
School of Design Studies
UOC6  HPW3

Design and visual communication are often discussed in terms of transparency and clarity. This course proposes that design artefacts have rarely been politically neutral and that insights into the role of design in society can be drawn from conceptualising and developing design to express specific points of view. Students explore the relationships between graphic design and political persuasion in the 20th and 21st centuries both locally and internationally and use typography, layout and a range of media to develop both theoretical and practical understandings of “promotion” for a range of contexts. Studies of visual rhetoric, subjectivity and representation and alternative processes for the research and development of designed communication are explored individually and as a group.

SDES2213
Digital Textiles
School of Design Studies
UOC6  HPW3

Digital design for textiles is covered in this course, introducing the specific requirements for digital textile design and production. Digital technologies have radically changed the way textiles are designed, printed, stitched, tufted and woven. This course will give students an understanding of these digital processes, designing in Photoshop for specific textile design projects. Studio design projects will cover all aspects of digital textile design from repeats, “colour ways”, directional effects, production, finishing and end use applications.

SDES2214
Art and Fashion
School of Design Studies
UOC6  HPW3

This studio-based course explores the relationship between art and fashion, looking specifically at how artists have used clothing and the creation of garments as a medium for their creative expression. “Art and Fashion” presents the work of artists and practitioners from the Futurists to today who clearly demonstrate the significance of fashion and clothing as an expression of the aesthetics and the philosophical issues of their times. Artists and practitioners such as Sonia DELAUNAY, Roy Lichtenstein, Robert Rauschenberg, Andy Warhol, Beverly Semmes, Issey Miyake, Akira Isogawa, Wendy Parmour and Caroline Broadhead have all created individual one off garments for exhibition, production and the cat walk. Many have influenced fashion trends and museum collections. Studio projects will cover the design and construction of textiles and garments inspired by these artists and their practice.

SDES2225
Ceramics 2A
School of Design Studies
UOC6  HPW3

Prerequisite/s: SDES1316 or SART1402
This course highlights both mechanical and non-mechanical approaches to the construction of three-dimensional objects in clay and associated considerations of form, purpose, permanence, scale and site. Studio projects require that students gain competency in the use and manipulation of ceramic materials, while encouraging an innovative, experimental approach in their deployment and an imaginative interpretation of the significant ideas, conventions and precedents of the discipline.

SDES2326
Jewellery 2A
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES1317 or SART1402

This course will develop students' understanding of jewellery practice, as applied to three-dimensional form. Through experimentation with materials and jewellery processes students will be asked to realise works which are body related three-dimensional jewellery objects. Studio activity will examine the technology of metal and its translation through heat into three-dimensional forms. The techniques of soldering, casting and advanced fabrication will be explored using both ferrous and non-ferrous materials to translate two-dimensional designs into three-dimensional jewellery objects.

SDES2327
Textiles 2A
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES1318 or SART1402

This course extends the practice of contemporary art textiles by developing conceptual interpretations and the experience of individual textiles practice. The studio emphasises an open ended, innovative and experimental investigation of the language of textiles with historical, cultural and contemporary references. Students produce individual work integrating technical and conceptual approaches in response to studio projects. Textiles 2A provides an environment and context to develop individual approaches with research, experimentation and investigation through lectures, demonstrations and conceptually based projects.

SDES2328
Ceramics 2B
School of Design Studies
UOC6 HPW3

This course highlights a range of fundamental approaches and skills that underpin the multiple strands of contemporary ceramic practice. Practical work is contextualised within the historical and theoretical considerations/debates that frame contemporary ceramic practice. In particular, studio projects give prominence to ideas and processes associated with the development of ceramic multiples and work in series, using the wheel as the principal tool.

SDES2329
Jewellery 2B
School of Design Studies
UOC6 HPW3

This course develops students' understanding of jewellery practice as applied to three-dimensional form. Through experimentation with materials and jewellery processes, students are asked to realise works which are body related and which may be expressed as vessels or implements, expanding their understanding of this traditional component of jewellery practice. The techniques and processes introduced may include the fabrication of hollow forms, raising and die-forming. Students are required to work with a variety of materials, exploring their potential and limitations through the application of jewellery skills. Each set of exercises culminates in a body related three-dimensional object.

SDES2335
Ceramics 3A
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2325

This course provides the opportunity for students to further develop and enhance ideas via participation in the practical activities and debates of the ceramic studio. It provides the context in which students continue to explore personally relevant ideas and goals through an investigation of a range of ceramic materials, procedures and approaches. In particular, this course highlights relationships between form and surface, introducing and critiquing processes that are involved in the development of painterly, printed and digitally generated surfaces on clay. The intention and meaning of surface elaboration and image development is examined with reference to both traditional and contemporary approaches to work in clay.

SDES2336
Jewellery 3A
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2326

This course will focus on a thorough examination of qualities of surface as applied in jewellery practice allowing for experimentation and the development of techniques such as metal alloying, etching, patination, mokume gane, keum boo and granulation. Studio activity will combine the development of one-off designs and multiple production of jewellery objects both wearable and non-wearable.

SDES2337
Textiles 3A
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2327

This course extends the practice of contemporary art textiles by developing conceptual interpretations and the experience of individual textiles practice. The studio emphasises an open ended, innovative and experimental investigation of the language of textiles with historical, cultural and contemporary references. Students produce individual work integrating technical and conceptual approaches in response to studio projects. Textiles 3A provides an environment and context to develop individual approaches with research, experimentation and investigation through lectures, demonstrations and conceptually based projects.

SDES2338
Ceramics 3B
School of Design Studies
UOC6 HPW3

This course examines media and processes associated with the elaboration of both raw and fired clay surfaces. It provides students with the opportunity to explore, evaluate and develop a range of approaches to the production of graphic surfaces on clay. Theoretical information is contextualised with reference to ceramic history and to contemporary developments/usage. Lectures, demonstrations and individual projects provide the focus for gaining understanding and skills in the practical application of drawn, painted, photographic, printed and digitally generated images/surfaces to clay. Studio activity is conducted within a context of enquiry in which students are challenged to interrogate the relationship between idea, material, process, outcome and meaning. It highlights experimentation, testing and evaluation, and the application of knowledge to studio practice.

SDES2339
Jewellery 3B
School of Design Studies
UOC6 HPW3

This is a practical studio class for students requiring skills in jewellery and small-scale object making. This course will extend students' familiarity with the scope of the jewellery workshop and build their skills in particular areas related to the production of three-dimensional forms. Students will explore the concepts of making multiples to produce wearable and non-wearable objects. Through experimentation with materials and with processes such as casting, advanced fabrication and hydraulic forming, students will be asked to realise three-dimensional works.

SDES2345
Textiles 2B
School of Design Studies
UOC6 HPW3
This course extends the practice of contemporary art textiles by developing conceptual interpretations and the experience of individual textiles practice. The studio emphasises an open ended, innovative and experimental investigation of the language of textiles with historical, cultural and contemporary references. Students produce individual work integrating technical and conceptual approaches in response to studio projects. Textiles 2B provides an environment and context to develop individual approaches by exploring textile processes relating to surface design, providing knowledge to realise conceptual ideas. Students are expected to have the ability to incorporate various surface design processes into their work at the completion of the course.

SDES2355 Textiles 3B
School of Design Studies
UOC6 HPW3

This course extends the practice of contemporary art textiles explored in Textiles 2A/2B by developing conceptual interpretations and the experience of individual textiles practice. The studio emphasises an open ended, innovative and experimental investigation of the language of textiles with historical, cultural and contemporary references. Students produce individual work integrating technical and conceptual approaches in response to studio projects. Textiles 3B provides the context for developing individual approaches by exploring three dimensional textile structures and techniques providing the knowledge to realise conceptual ideas. Students are expected to have the ability to incorporate 3D constructed textiles into their work at the completion of the course.

SDES3101 Applied Object Studio 3 - Reuse/Recycle
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2108

In this course, design solutions are developed from briefs that address problems associated with ethical and environmental responsibility typical of applied design in professional practice. Students are encouraged to develop a philosophical approach to their design process and apply their skills to facilitate the resolution of form and fabrication of design solutions. Projects address the multidisciplinary relationships between manufacturing, design and the end user. Students develop skills in analysing and articulating primary and secondary research and contextual issues and the interactions presented by the brief. Students will be encouraged to develop a clear design process and apply their skills to appropriate documentation and presentation by use of environment design conventions.

SDES3102 Environments Studio 3 - Commissions and Practice
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2109

In this course design solutions are developed from briefs that are academically based or emulate problems typical of environment design in professional practice. The design proposals must address complex contextual issues and the interactions presented by the brief. Students will be encouraged to develop a clear design process and apply their skills to appropriate documentation and presentation by use of environment design conventions.

SDES3103 Graphics Media Studio 3 - Visual Representation
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2110

This course explores strategies for the design of visual information for print, interactive and signage design. A range of multi-dimensional spaces in which graphic designers provide navigation cues and complex information will be considered from the perspectives of content, context and purpose. Students design information graphics for specific users according to a brief provided by a client in a real-world setting.

SDES3104 Ceramics Studio 3 - Innovation and Interdisciplinarity
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2111

The course deepens students' awareness of the theoretical, historical, critical and interdisciplinary settings of contemporary ceramic design. Moreover, it extends students' capacity to operate independently in response to the design brief through increasing experience of the complexity and attributes of diverse ceramic materials, their application and processing. It provides the opportunity to extend skill, knowledge and familiarity with the conceptual contexts relevant to the design and production of objects in clay and associated materials. Students develop design solutions from briefs that are academically based and emulate the approaches and problems typical of ceramic design in the professional context. The design proposals address complex contextual issues and the interactions presented by the brief. Students are encouraged to develop a clear design process and apply their skills to appropriate documentation and presentation.

SDES3105 Jewellery Studio 3 - Contextual Issues
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2112

In this course design solutions are developed from briefs that are academically based or emulate problems typical of jewellery design in professional practice. The design proposals must address complex contextual issues and the interactions presented by the brief. Students will be encouraged to develop a clear design process and apply their skills to appropriate documentation and presentation.

SDES3106 Textiles Studio 3 - Forecasting and Innovation
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2113

This course provides an opportunity for students to develop and predict design solutions from briefs that emulate approaches and problems typical of the professional textile design industry. Individual design proposals will address complex contextual issues and the interactions presented by the brief, requiring design solutions ranging from one-off textiles for exhibition and production, to designs and trend predictions for commercial textile production. Briefs cover design for a range of industries and may include fashion, apparel, homewares, rugs, interior and exterior textile designs. Students will be encouraged to develop a clear design process and apply their skills to appropriate documentation, presentation and the execution of innovative textile designs.

SDES3107 Design and Computers 4 - Introduction to Multimedia
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES2107

This course is an introductory investigation into computers and interactive multimedia authoring and its application in the graphics/media industry. The course includes combinations of various media such as sound, animation, digital video and dynamic interactive eventing mechanisms. This course introduces interface design processes and concepts within an industry context.

SDES3108 Applied/Object Studio 4 - Design and Production
School of Design Studies
UOC6 HPW3
Prerequisite/s: SDES3101

Self-direction is encouraged so that students apply their skills within the development and articulation of a project brief. Project documentation and presentation methods are expected to reflect a substantial sophistication of design ideas and communication techniques. Projects undertaken consider a range of manufacturing processes and production systems used in industry and demonstrate a professional focus on the design process. Collaboration with industry is utilised in the development of projects. Students acquire knowledge of detailing, construction techniques and costing. Designs are realised as either scaled models or full-scale prototypes.
SDES3109
Environments Studio 4 - Philosophies and Processes
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES3102

The aim of the course is to build on the skills and knowledge of Environments Studio 3 and to increase the complexity of studio practice within the environments discipline. Self-direction is encouraged so that students develop and apply their skills within the development and articulation of a brief. Project documentation and presentation methods are expected to reflect a substantial sophistication of design ideas and communication techniques.

SDES3110
Graphics Media Studio 4 - Design and Reflection
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES3103

This course explores advanced concepts and practices in graphics media concerned with a range of approaches to visual identity and reflective practices in design. Studio discussions, lectures and readings contextualise designer, client and supplier, user and artifact interactions. Students develop a design portfolio and through reflection on designs completed in the program, explore strategies to attract client-based work and/or to attract funding for self initiated work in future practice.

SDES3111
Ceramics Studio 4 - Research, Application and Practice
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES3104

The course provides for consolidation, application and elaboration of skills in the design and prototyping/production of a unique body of ceramic work. Students extend research relevant to their individual design practice and produce a body of work which evidences a critically engaged and technically accomplished/appropriate approach. Self-direction is encouraged so that students develop and apply their skills within the framing and articulation of the brief. Project documentation and presentation methods are expected to reflect a substantial sophistication of design ideas and communication techniques.

SDES3112
Jewellery Studio 4 - Design and Production
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES3105

This course extends the skills and knowledge of Jewellery Studio 3 and increases the complexity of the studio practice within the jewellery domain. Self-direction is encouraged so that students develop and apply their skills within the development and articulation of a brief. Projects address the conceptual, material and technical understandings of jewellery and object design and require, in some instances, for students to liaise with industry partners in the development of their design solutions. Project documentation and presentation methods are expected to reflect a substantial sophistication of design ideas and communication.

SDES3113
Textiles Studio 4 - Textile Applications
School of Design Studies
UOC6  HPW3
Prerequisite/s: SDES3106

The aim of this course is to extend the students’ design experience through complex projects in textile design, building on the skills and knowledge acquired from previous textile studios. Self direction is encouraged so that students develop and apply their skills within the development and articulation of a brief appropriate for the textile art/design industry. Briefs cover design for a range of industries and may include fashion, apparel, homewares, rugs, interior and exterior textile designs. Project documentation and presentation methods are expected to reflect a substantial individual sophistication of textile design ideas, techniques, execution and realisation for the diverse textiles industry.

SDES3162
Ceramics Elective: Non-Functional, 3 Dimensional Ceramics
School of Design Studies
UOC4  HPW3

This course provides the opportunity for students to explore technical and creative skills in developing and executing studio based work in clay. The practical component of the program broadens students’ engagement with ceramic processes and materials while critical/theoretical elements encourage students to deepen their understanding of contemporary ceramic practice. In particular, studio projects give prominence to ideas and processes associated with non-functional, three dimensional ceramics.

SDES3165
Jewellery Elective 3: the Replicated Object-Jewellery Multiples
School of Design Studies
UOC4  HPW3

Students will develop an understanding of jewellery practice and explore the concepts of making multiples to produce wearable and non-wearable objects which have the body as their format. Students will be encouraged through a range of material and process experiments to focus their making on the production of jewellery multiples and series in the studio.

SDES3166
Jewellery Design for Fashion
School of Design Studies
UOC4  HPW3

This course will introduce students to the contemporary and commercial applications of jewellery design for fashion. The class will encourage students to integrate ideas, processes and materials in the design and fabrication of jewellery and accessories with a fashion focus. Specific technologies will be selected for research within the subject. In the pursuit of this research liaisons with industries associated with the related technologies will be established.

SDES3169
Textiles: New Technology
School of Design Studies
UOC6  HPW3

This course introduces the new technologies and processes developed by artists and industry specialists for textiles in the worlds of art, fashion, design, engineering and science. It covers recent developments in textile fabrics, materials, structures, manufacture, technologies and processes. Areas examined may include thermoplastics, smart textiles, microelectronics, molecular nanotechnology sustainability and green textiles transfer print processes, direct digital printing, new developments in man made and natural textiles properties and architectural, medical, engineering, manufacturing and sporting applications for new textiles.

SDES3170
Textiles: Nylon to Now
School of Design Studies
UOC6  HPW3

This course tracks the development of man-made “techno” textiles for fashion, design, interior and environmental applications. Exploring fibres and fabrics from nylon in the 1950’s to the present with Issey Miyake’s recent APOC range, it looks specifically at the processes and techniques associated with synthetics for colouring, printing, resisting, blistering, bonding, shaping and adding textures. Recent developments to man-made fabrics and fibres have changed their character to replicate natural materials in relation to physical characteristics, drape, handle and feel. Nylon, polyester, polyamide, non wovens, microfibres, synthetic polymers, PVC and polypropylene have application for 3D forms, interior, exterior, art, design and sporting environments. Studio projects will cover various processes and techniques and may include sublstatic printing, transfer dye printing, heat transfer printing, thermoplastic shaping, latex printing, flocking and bonding.

SDES3171
Digital Design - Video and Interactive
School of Design Studies
UOC4  HPW2

This course introduces the students’ design experience through complex projects in textile design, building on the skills and knowledge acquired from previous textile studios. Self direction is encouraged so that students develop and apply their skills within the development and articulation of a brief appropriate for the textile art/design industry. Briefs cover design for a range of industries and may include fashion, apparel, homewares, rugs, interior and exterior textile designs. Project documentation and presentation methods are expected to reflect a substantial individual sophistication of textile design ideas, techniques, execution and realisation for the diverse textiles industry.
The course expands the students' knowledge in digital video and interactive applications in the development and display of digital image design, information technology and information design processes. Students will also develop skills in pre-production and post-production media processes as well as the administrative and non-digital elements required for interactive media design, authoring and construction. Students will experience 'hands on' tuition in computer software for graphics/media design as it relates to video imaging. Students will also learn to interpret, design and produce digital video interactive applications from briefs and concepts developed in class. The course will increase their knowledge of the design processes required for developing high-end video output.

**SDES3172 Digital Design - Interactive Media**  
School of Design Studies  
UOC4  HPW3

The course is an advanced investigation into computing in and design in graphics and their application in the graphics/media industry. The course also considers the areas of information technology, information design and the design processes involved in the creation of interactive media. The subject expands the students use of CAD modelling, image manipulation, typography, digital audio, digital video and reactive software for computer interaction. Students will be given 'hands on' experience in computer software for the graphics/film/title design industry.

**SDES3174 Web Design and Screen Interface**  
School of Design Studies  
UOC6  HPW3

This course provides students with the knowledge and skills to design web and screen based interface; to a design brief. This course focuses on the creation and design of web and screen based interface in relation to and satisfying the parameters set for a specified brief and target audience. Students will explore and apply hypertext markup language, research content, create and apply navigational strategies and structures, generate and produce fully functioning web pages to a brief to a sophisticated level of design. The content includes: Critical analysis of selected web page applications and sites; Criteria governing web page design; Research and structuring of web page design; Research and application of HTML to web page design; Research and analysis of navigational strategies to web page design; Research, analysis and use of appropriate technologies.

**SDES3175 Fashion and Costume Design 2**  
School of Design Studies  
UOC6  HPW3

This course will explore the scope of costume design in a theatrical context, building on the skills gained by students in Fashion and Costume Design 1. Students will study historical and contemporary costume in theatre, film and television. Cutting, decoration and the construction of theatrical costumes will be explored in order to allow students to develop individual skills and designs from set briefs. Theatrical venues and museum collections will be investigated in order to support the practical component of the subject.

**SDES3176 Digital Design Pre-Press**  
School of Design Studies  
UOC6  HPW3

In this course students will learn to use appropriate industry principles and terminology to select, plan and implement the most appropriate digital pre-press, direct to press processes and digital print production processes for print graphics applications. Students will focus on the preparation and creation of appropriate digital artwork and print specifications for a variety of briefs from single colour to multi-colour print designs, and from single page to multi-page documents. The content of this course focuses on familiarising students with the industry terminology principles and processes involved in digital pre-press, direct to press and print production, while developing the knowledge, skills and attitudes required to produce artwork and print specifications to a specified industry standard across a range of media, methods and applications. The content includes: Digital pre press techniques, direct to press techniques, Paper technology and other print substrates; ink technology; printing technology, printing problems and troubleshooting; print grids, formatting and imposition; process colours and Pantone colours, print resolution and dot gain; Principles of planning, preparation and execution of finished artwork for print; special printing effects; writing print specifications liaison with pre-press bureaux and printers, and industry expectations and standards for quality assurance and OH&S.

**SDES3179 Digital Design - Introduction to Flash Design**  
School of Design Studies  
UOC6  HPW3

This course introduces vector based interface design in the context of satisfying the parameters set by a specified brief and target audience. Students will explore and apply vector based interactive applications, research content, create and apply navigational strategies and structures, generate and produce fully functioning vector content to a introductory level of design. The content includes: critical analysis of selected Flash implementations and sites; criteria governing Flash design; critical analysis of target audience for a specified brief; research and structuring of Flash design; and research and analysis of navigational strategies. Students will be expected to have experience with Adobe Photoshop and Illustrator.

**SDES3183 Jewellery 3**  
School of Design Studies  
UOC4  HPW3

Students will develop their understanding of jewellery practice and explore the concepts of making multiples to produce wearable and non wearable objects which have the body as their format. Students will be encouraged through a range of material and process experiments to focus their making on the production of jewellery multiples and series in the studio.

**SDES3186 Textiles: Surface Design**  
School of Design Studies  
UOC6  HPW3

This course provides an introduction to the textile processes and techniques associated with dyed and printed textiles and explores these as a means of expressing ideas. Surface design incorporates various techniques including dyeing, block-printing, screen printing, devori, discharge, Shibori and wax-resist, which are used in contemporary art and design practice and introduced in this course. Students will develop their own textile pieces using a combination of these techniques. Practical work is complimented by historical information, cultural references and contemporary textile art, craft and design practice.

**SDES3345 Ceramics 4A**  
School of Design Studies  
UOC6  HPW3  
Prerequisite/s: SDES2335

This course provides the opportunity for students to pursue a self initiated approach to art practice within a creative methodology that is exploratory, speculative and personal. At the same time, students deepen their awareness of the theoretical, historical and interdisciplinary settings of contemporary ceramic practice. Students are expected to engage with an area of research appropriate to their emerging practice and produce a body of work which evidences a development of relevant ideas and skills. Group seminars and critique develop the capacity to express the central concerns of studio work, constructive critical abilities and skill in their articulation.

**SDES3346 Jewellery 4A**  
School of Design Studies  
UOC6  HPW3  
Prerequisite/s: SDES2336
This is a course of advanced studio practice that requires the student to initiate a jewellery design proposal; research and investigate appropriate technology, materials and audience; place the design within a conceptual framework and; construct a body of work that relates to the jewellery process.

SDES3347  
Textiles 4A  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This course provides the opportunity for students to pursue a self initiated work program devised in consultation with lecturers. Students are expected to develop an area of research appropriate to their emerging practice and produce a body of work that demonstrates an understanding and refinement of relevant concepts with technical ability. Students extend their understanding of the theoretical, historical and interdisciplinary nature of contemporary textiles practice. Textiles 4A integrates lectures, individual and group tutorials, studio research methodologies and the presentation of seminars by each student about their content and context of their practice. These are employed to achieve the synthesis of conceptual concerns and studio practice.

SDES3348  
Ceramics 4B  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This course provides an introduction to the basic materials and technology associated with the development and production of creative work in clay. Practical and theoretical classes focus on approaches to firing; and the chemistry, preparation and modification of clay bodies, slips and glazes. Workshop activity highlights experimentation, testing and evaluation, and the application of knowledge to studio practice. It provides the context in which students may explore personally relevant ideas and goals through an investigation of a range of materials and approaches. Theoretical information is contextualised with reference to ceramic history and to contemporary developments/usage. The course includes an introduction to specialist software designed to facilitate relevant calculations, assist in the development of ceramic formulations and provide for the storage of data.

SDES3349  
Jewellery 4B  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This is a practical class open to those students requiring skills centred in the jewellery studio. This course will focus on a thorough examination of surface as applied to jewellery and object making allowing for experimentation in a variety of specialist surface techniques, colours and coatings.

SDES3355  
Ceramics 5A  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

Students further develop a self initiated approach to art practice within a creative methodology that is exploratory, speculative and personal. It provides for the resolution of work devised in consultation with studio staff. Students extend research relevant to their individual art practice and produce a body of work which evidences a technically accomplished/appropriate, critically engaged approach to making.

SDES3356  
Jewellery 5A  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3346

Students are required to produce a substantial project which demonstrates a refinement of the concepts and contexts central to their work and a developed areas of research relevant to their jewellery practice. The presented body of work will evidence the refinement of students' conceptual and technical capabilities.

SDES3357  
Textiles 5A  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3347

This studio based course requires that students produce a substantial project which demonstrates a refinement of the concepts and contexts central to their work and a developed area of research relevant to their textiles practice. The presented body of work will evidence the refinement of the student's conceptual and technical capabilities. An experimental approach to textiles practice is encouraged and may take the form of divergent or interdisciplinary works such as site specific work, 3D forms, object making, works relating to the body or design for exhibition and studio production. Textiles 5A covers an integrated approach to studio practice through lectures, tutorials, studio research methodologies and the presentation of seminars by each student about their content and context of their practice. These are employed to achieve the synthesis of conceptual concerns and studio practice.

SDES3358  
Ceramics 5B  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This course provides the opportunity to pursue a coherent project that supports the student's emerging ceramic practice. Students are expected to engage with an area of research appropriate to their practice and develop a body of work that evidences maturation and the sophistication of relevant ideas and skills. Students may work across the range of approaches that constitute contemporary fine art contexts. Experimentation, interdisciplinary and hybrid means are supported and encouraged. Group seminars and critique develop the capacity to express the central concerns of studio work, constructive critical abilities and skill in their articulation.

SDES3359  
Jewellery 5B  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This course extends the skills and knowledge developed in the jewellery studio and increases the complexity of the studio practice within the jewellery discipline. Self-direction will be encouraged so that students develop and apply their skills within the articulation of a brief. Projects will address conceptual, material and technical understandings of jewellery and object design and require, in some instances, for students to liaise with industry partners in the development of their jewellery solutions. Project documentation and presentation methods are expected to reflect a substantial sophistication of design ideas and communication.

SDES3365  
Textiles 4B  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This studio based course provides the opportunity for students to pursue a self initiated work program devised in consultation with lecturers. Students are expected to develop an area of research appropriate to their emerging practice and produce a body of work that demonstrates an understanding and refinement of relevant concepts with technical ability. Students extend their understanding of the theoretical, historical and interdisciplinary nature of contemporary textiles practice. Textiles 4B integrates lectures, individual and group tutorials, studio research methodologies and the presentation of seminars by each student covering the content and context of their practice, to achieve a thorough knowledge and critical awareness of contemporary textile practice and an ability to articulate the concerns of visual art textiles.

SDES3375  
Textiles 5B  
School of Design Studies  
UOC6 HPW3  
Prerequisite/s: SDES3345

This studio based course requires that students produce a substantial project which demonstrates a refinement of the concepts and contexts central to their work and a developed area of research relevant to their
textiles practice. The presented body of work will evidence the refinement of the student’s conceptual and technical capabilities. An experimental approach to textiles practice is encouraged and may take the form of interdisciplinary works such as site specific work, 3D forms, object making, works relating to the body or design for exhibition and studio production. Textiles 5B covers an integrated approach to studio practice through lectures, tutorials, studio research methodologies and the presentation of seminars by each student about the content and context of their practice. These are employed to achieve the synthesis of conceptual concerns and studio practice.

SDES4101
Design Studio Project
School of Design Studies
UOC12 HPW6

This student-initiated project will be positioned in a “real” context and provide students with an experience of the multi-disciplinary nature of design. The project will extend from research and development through to the translation of students findings into realised design solutions. The project will be developed in conjunction with selected professionals and/or with a client who presents an actual design problem. The guiding philosophy of the Bachelor of Design Studies, that of an integrated approach to design must be demonstrated throughout the course with reference to more than one studio area in the finished project. The design proposals must address complex contextual issues and fully address the constraints of the brief. Students will be required to develop a recognisable design process, to incorporate costing of the final scheme, to demonstrate design management of the project and apply their skills to clear documentation and presentation of an integrated design outcome.

SDES4102
Professional Experience Program
School of Design Studies
UOC12

The aim of this course is to provide students with the opportunity to experience real-life professional design situations, over an extended period. During this course, students will establish a working relationship with the profession and potential employers as well as a working knowledge of the practice of design and production.

SDES4103
Design and Computers 4
School of Design Studies
UOC4 HPW4

Prerequisite/s: SDES3107

The course in computer studies is self-directed and works in conjunction with the students Design Studio Project work that is to be presented. The course will expand the range of software and hardware previously studied with emphasis on the advanced use of equipment in relation to specific projects nominated by the students.

SDES4104
Honours Project
School of Design Studies
Enrolment requires school approval
UOC6 HPW2

Prerequisite/s: SADE4051.

The aim of this project is to provide the Honours candidate with the opportunity to research and document an approved design related topic. Topics that explore design’s relationship to: history/theory, processes and techniques, objects and prototypes, interactivity, ethics, materials and potential use, studio management, studio practice strategies, and education are examples of appropriate research areas. The Honours program in the Bachelor of Design provides a series of seminar presentations by research experts and Honours candidates to support the development of a research project comprising a research document and, where appropriate, studio outcomes. Candidates are asked to frame a research question or hypothesis in relation to an existing body of knowledge. The research process will include the application of a nominated research practice or methodology suited to the question. Analysis of the research findings based on documented evidence forms the basis for conclusions and suggestions for further research. Successful completion of the course with a grade of Credit (65%) and above will lead to the award of the Bachelor of Design with Honours.

SDES4501
Project A (Honours)
School of Design Studies
UOC18 HPW3

Honours program: investigation of theoretical and practical issues that focus upon the student’s major area of specialisation. Each student will be required to identify a topic, area of interest & design problem that can be researched, documented and reported in a major illustrated paper of 5000 words. An alternative presentation of an equivalent standard may be individually negotiated.

SDES4502
Project B (Honours)
School of Design Studies
UOC24 HPW6

Students accepted into the fourth year of the program (Honours) will be required to complete a research and development project in their specialist craft art area leading to a major presentation/exhibition. The project will need to be fully documented (words/visuals) and the documentation presented as an additional record. This record should identify a research area, methods for investigating the particular creative process and findings. The project will include regular meetings/discussions with a supervisor. At regular periods over the academic year members of the School will be invited to participate in some of these discussions to provide feedback. The project must be approved by the Head of School or the Head of School nominee.

SDES55491
Professional Experience Program
School of Design Studies
UOC6

The aim of this course is to provide students with the opportunity to experience real-life professional design situation, over an extended period. During this program of 25 working days, students will establish a working relationship with the profession and potential employers as well as working knowledge of the practice of design and production.

SENG1010
Software Engineering Workshop 1A
School of Computer Science and Engineering
UOC3 HPW2.5

The Software Engineering Workshop is a series of courses that span the first three years of the Software Engineering program. The course series will provide an opportunity to work in small teams on substantial, realistic projects, covering most phases of the software production life cycle. The SE Workshop stream also provides an opportunity to apply the techniques and methods covered in other courses of the course. Under guidance from staff, the intention of this series is to enable students to learn by reflective practice. Whatever steps are taken students should become aware of what they are doing, and reflect on the consequences. This is the essence of the Personal Software Process described in the textbook by Watts Humphrey. Each course in the series will involve group project work, presentations, report writing, and documentation. This is the first course in the series and will contain: an introduction to the software process and to a number of the software engineering practices to be adopted throughout the series; the formation of the first set of small groups; a number of exercises to develop group skills; a discussion of the project to be undertaken in SENG1020. The groups formed during this course will not persist for the entire series of courses. Groups will be reformed arbitrarily at various stages.

SENG1020
Software Engineering Workshop 1B
School of Computer Science and Engineering
UOC3 HPW2.5

Corequisite/s: SENG1010, INF1611

This is the second course in the series and during this phase each group will complete a domain analysis and a requirements analysis for the project determined in SENG1010. Each group will: examine similar systems; interview users or potential users of the system; develop a requirements document; validate the requirements by prototyping. This course will form the practical component of INF51611.
SENG2010
Software Engineering Workshop 2A
School of Computer Science and Engineering
UOC3  HPW2.5
Prerequisite/s: SENG1020;
Corequisite/s: INFS2603, COMP2110

This is the third course in the series and will cover specification. During this course the groups will take a requirements document (not necessarily the same document developed by the current teams during SENG1020) and develop a logical specification document. The specification document must be developed using the modelling techniques discussed in INFS2603 and COMP2110. As part of the specification document, the groups should identify a set of acceptance tests appropriate to the functional specification This course forms the practical components of COMP2110.

SENG2020
Software Engineering Workshop 2B
School of Computer Science and Engineering
UOC3  HPW2.5
Prerequisite/s: SENG2010

In this course, the fourth course in the series, the groups will take a specification document, such as might have been produced in SENG2010, and will produce a design document describing how the specified system will be mapped onto physical components.

SENG3010
Software Engineering Workshop 3A
School of Computer Science and Engineering
UOC3  HPW2.5
Prerequisite/s: SENG2020

Each group will take a design document, such as might have been produced in SENG2020, and carry out the implementation and testing of the components of the system. As for all components of this series the implementation and testing will be documented.

SENG3020
Software Engineering Workshop 3B
School of Computer Science and Engineering
UOC3  HPW2.5
Prerequisite/s: SENG3010

In the sixth and final course in the series, the groups will undertake the integration, testing, evaluation, and maintenance of a system, whose components have been produced in SENG2010.

SENG4903
Industrial Training
School of Computer Science and Engineering
UOC0
Excluded: COMP4903, COMP4905.

Students enrolled in program 3648 must complete a minimum of 60 days’ industrial training. At least some of this should be obtained in Australia. Students are required to submit to the School evidence from their employers confirming completion of the prescribed training and a report, typically 2000 words long, summarising the work done and training received. Students will formally enrol in Year 4, although they are strongly encouraged to complete as much industrial experience as possible in the breaks between the early years of the course.

SENG4910
Thesis Part A (Software Engineering)
School of Computer Science and Engineering
UOC6  HPW7
Prerequisite/s: Enrolment in Program 3648 or 3651 or 3652;
Excluded: BINF4910,BIOM5920,COMP4910.

This course represents the thesis proposal component. The proposal is assessed by a seminar given at the end of semester.

SENG4911
Thesis Part B (Software Engineering)
School of Computer Science and Engineering
UOC12  HPW14
Prerequisite/s: SENG4910;
Excluded: BINF4911,BIOM5921,COMP4911.

The thesis is done in the last two semesters of the BE degree program. For full-time students, seven hours per week in the first semester and fourteen hours per week in the second semester are devoted to directed laboratory and research work on an approved course under guidance of members of the lecturing Staff of the Schools of Computer Science and Information Systems. Generally, the thesis involves the design, construction, and testing of a software application, but the thesis could be an exploration and evaluation of some aspects of a software development method. Each student is required to demonstrate the outcome of the thesis work, and present a written thesis at the end of the second semester.

SENG4921
Professional Issues and Ethics
School of Computer Science and Engineering
UOC6  HPW4

This course will develop a framework on which professional and ethical issues can be developed. Topics covered will include team and meeting skills, communication skills, interpersonal skills, software quality and process, in addition to ethics. The subject will be delivered using lectures, class discussions, written assignments, reading lists, the Internet, presentations, and invited speakers.

SESC1001
Safety, Health and Environment
School of Safety Science
UOC6  HPW4

The course introduces students to the main issues of safety, health and environmental (SHE) science. Themes and inter-relationships are explored using scenarios based in the workplace, community and environment. SHE as an integrated concept.

Note/s: Also offered in off campus mode in X1, S1, X2, S2.

SESC1580
Risk Management 1
School of Safety Science
UOC3  HPW4

This course provides an introduction to risk managemen in aviation. Risk management is first treated generally but more detailed examples focus on safety health and environmental risks. The course covers the nature of risk and the process of managing risk. The range of risks of relevance to aviation are identified and ranked as an introduction to qualitative risk assessment. The course then covers OHS and Major Hazards legislation and general safety issues in aviation. Statistical analysis and fault and event tree analysis are used to demonstrate examples of quantitative risk assessment. Safety, Quality and Environmental management systems are discussed with reference to ISO9000, ISO14000 and AS/NZS4804.

SESC2091
Safety, Health and Environmental Hazards
School of Safety Science
UOC6  HPW4

This course introduces students to safety health and environmental hazards, including chemical hazards, atmospheric contaminants, biohazards and psychological risks. The course also introduces epidemiology as a means of studying these hazards by examining safety, health and environmental case studies.

SESC2451
Biomechanics for Sports Scientists
School of Safety Science
UOC6  HPW5

Student will study the basic principles of biomechanics and apply these to the analysis of sports. Basic mechanics (statics, kinematics and dynamics) will be studied in two and three dimensions. Human
movement measurement methods will be introduced. The mechanics of the musculoskeletal system will be studied in detail in human gait walking, running and jumping. This will integrate the student's understanding of mechanics with functional anatomy through the study of normal gait dynamics, muscle function, work and power. Aerodynamics and hydrodynamics will be introduced and explained through the analysis of throwing and swimming.

SESC2580  
Risk Management 2  
School of Safety Science  
UOC3  HPW2

This course provides an introduction to the management process with a focus on operational risk issues. The process is demonstrated in case study examples involving business and safety decisions. The second half of the course identifies problems which could lead to emergency situations then considers the planning required for different types of emergency. The course covers writing emergency procedures, emergency plans, setting up an emergency control centre, running an emergency exercise and the links with the state emergency services. While there is an emphasis on application to the aviation industry the course is of relevance to other disciplines.

SESC2800  
Fundamentals of Toxicology  
School of Safety Science  
UOC3  HPW2

An introduction to the underlying principles of toxicology. It provides an introduction to chemical, biochemical and cellular principles. The course is aimed at students who have not previously studied chemistry or biology.

SESC3020  
Occupational Health and Safety Law 1  
School of Safety Science  
UOC3  HPW2

This course outlines the legal regime for the regulation of occupational health and safety in Australia. It deals with occupational health and safety legislation; relevant case law; duty of care of employers, controllers of premises and suppliers and manufacturers; risk management obligations; and duty of employees. The course also deals with public policy issues regarding legal reforms of occupational health and safety.

Note/s: Also offered in off campus mode in S2.

SESC3030  
Occupational Health and Safety Law 2  
School of Safety Science  
UOC3  HPW3

This course extends concepts of law introduced in SESC3020, and covers other workplace legislation and procedures, such as consultation obligations; reporting obligations; incident response and investigation; workers compensation and rehabilitation obligations.

Assumed Knowledge: SESC3020

Note/s: Also offered in off campus mode in S2.

SESC3091  
Safety, Health and Environmental Practice  
School of Safety Science  
UOC6  HPW3

A workplace assessment based course, where students are required to report on the safety, health or environmental issues of management following visits to a number of diverse industrial sites.

Assumed Knowledge: SESC3101

SESC3101  
Risk Assessment and Safety Engineering  
School of Safety Science  
UOC6  HPW4

Risk management requirements and responsibilities in safety legislation. Methodologies of risk identification and assessment. Application of principles of risk identification, assessment and control to a range of engineering safety problems including manual materials handling, mechanical plant and equipment, pressure vessels, confined spaces, fire and explosion, noise, whole body vibration, ionising and non-ionising radiation, electrical safety, workplace design and ergonomics and safety in construction.

SESC3310  
Social Issues in Science and Technology  
School of Safety Science  
UOC3  HPW2

This course is an objective 5 course which covers social issues arising from future scientific and technological developments and the role that the professional engineer or scientist can play in influencing future directions. The course is taught by a combination of group activities, case studies, projects and seminars. This course will cover four major topic areas, which are: professional ethics, environmental related issues, safety and liability and control of future technology.

SESC3451  
Human Movement Measurement Methods  
School of Safety Science  
UOC6  HPW6

Prerequisite/s: SESC2451.

Students will study the theory and practice of human movement measurement. The course will be taught through lectures and laboratory sessions. Students will learn 2D video measurement techniques and how to apply these to the study of human movement. Electromyography, force, temporo-spatial, balance and postural measurement and analysis methods will be studied as well as instrumentation data processing and analysis methods. Methods for the study of human movement and skills, including gait, electromyography and sporting skills will be covered in laboratory sessions.

SESC3541  
Assessment of the Workplace Environment  
School of Safety Science  
UOC6  HPW4

This course is designed to give students an opportunity to learn and apply methods and techniques used to assess the workplace and the environment. The course is based on measurements in the working and external environment. Topics are selected from measurement and evaluation of noise, lighting, vibration, ventilation, air quality, thermal environment, radiation, chemical hazards, slip resistance etc. Assessments will be carried out on sites in and around UNSW.

SESC3601  
Safety, Health and Environmental Management Systems  
School of Safety Science  
UOC6  HPW4

Excluded: SESC6610.

SESC3620  
Occupational Disease and Injuries  
School of Safety Science  
UOC3  HPW3

This course deals with the ways in which work can affect the health of workers. Covers occupational diseases and injuries of skin, respiratory system, nervous system, reproductive system, the musculoskeletal system, kidneys and occupational cancer.

Assumed Knowledge: ANAT2151

Note/s: Also offered in off campus mode in S2.

SESC4010  
Project Research Methods  
School of Safety Science  
UOC3  HPW2
This course is the preparation for the fourth year project in safety science. It covers issues in research methodology, including literature searching, problem formulation, null and alternative hypotheses, qualitative and quantitative research designs, statistical inference and the analysis of quantitative data, and a research report. Students will be expected to be able to recognise and avoid common methodological problems in research.

SESC4140
Radiation Protection
School of Safety Science
UOC3 HPW3

Principles and practices of radiation protection for both ionising and non-ionising radiation. Radiation physics, detection and measurement; background radiation; biological effects of radiation; dose limits; technical controls for radioactive sources and radiating apparatus. Codes of safe practice; radiological monitoring and personal dosimetry; storage, transport and disposal of sources; environmental impact; administrative controls; control of non-ionising radiation.

SESC4211
Risk Management
School of Safety Science
UOC6 HPW3

This course gives an overview of Risk Management following the format of the Australian Standard in Risk Management (AS4360). Tools and techniques applicable to each step of the risk management process are discussed using examples applicable to the class. The same risk management process is applied to manage a wide range of business issues including health and safety, the environment, finance and project management. This course is therefore relevant as part of a wide variety of programs and students from any program are accepted. The student selects examples for exercises to suit the industry and role in which they work (or intend to work). At the end of the course, students should be able to use risk management tools applicable to their specific interest and have an awareness of tools used in other industries and applications.

Note/s: Also offered in off campus mode in S1.

SESC4310
Industrial Safety Management
School of Safety Science
UOC3 HPW3

This course covers basic issues for managing safety, health and the environment in organisations. Topics include management and management theory, the behaviour of workers, the behaviour of managers, safety culture, systems for managing safety, health and the environment.

SESC4410
Ergonomics 2
School of Safety Science
UOC3 HPW3

Covers displays and controls, design of human-machine-environment systems, job design and work organisation, design of workplaces, the physical environment and an introduction to product design.

Assumed Knowledge: SESC2091, SESC3101

SESC4820
Chemical Safety and Toxicology
School of Safety Science
UOC3 HPW3

This course provides an outline of the toxicological, occupational hygiene and environmental aspects of chemical hazards and exposures. Atmospheric contaminants, metals, solvents, pesticides, carcinogens, hazardous wastes and dioxins are used as case studies.

Assumed Knowledge: SESC2091

Note/s: Short course mode in S1 (compulsory 2 day workshop plus assessable tasks completed subsequently). Also offered in off campus mode in S1.

SESC4850
Management of Dangerous Materials
School of Safety Science
UOC3 HPW3

Chemicals legislation, the dangerous goods system, the hazardous substances regulation and systems for management of hazardous wastes, and systems for management of chemicals in the workplace.

Note/s: Short course mode in S2 (compulsory 2 day workshop plus assessable tasks completed subsequently). Also offered in off campus mode in S2.

SESC4924
Research Project
School of Safety Science
UOC24

Stage 4 undergraduate project comprising 24 units of credit (50% of Year 4 load, with the other 50% made up from Stage 4 courses). This course provides an introduction to the research process. Students will undertake a research project with supervision which is written up as a research project report.

SESC6610
Work and Safety
School of Safety Science
UOC3 HPW2

Excluded: SESC2091, SESC3101, SESC3601

This is an introductory course that covers the fundamental safety science principles. It is aimed at giving future managers the skills needed to identify and deal with safety issues in the workplace. The course concentrates on identification of workplace hazards, their associated risks to health and how they can be controlled.

Note/s: Also offered by web delivery in X1, S1, X2, S2...

SESC6620
Fundamentals of Occupational Diseases and Injuries
School of Safety Science
UOC3 HPW3

An introduction to the structure and function of the cells, tissues and organs of the human body. The ways in which workplace hazards and risks impact on the body structure and function. Basic disease and injury processes.

Note/s: May not be taken as part of the 48UOC Masters program. Also offered in off campus mode in S1

SLSP1000
Social Science and Policy
School of Social Science and Policy
UOC6 HPW3

Explores the nature of social science, the knowledge and information created by it, and how this is applied to real world policy problems. These applications are examined in the context of a range of policy areas drawn from health, education, environment and social policy. Investigates how policy is developed, changed, implemented and evaluated and the role social science plays in this process. Considers practical, political and ethical problems encountered by social scientists in applying their knowledge and skills to inform policy and the role social science plays in the management of social change.

SLSP1001
Research and Information Management
School of Social Science and Policy
UOC6 HPW4

Explores the processes involved in making sense of information used in the policy process and in generating new information through research. Introduces and examines a range of technologies to assess the use of information by policy making bodies both public and private, including the media. Provides skills in the use of such technologies and in the design, conduct and analysis of social research and considers the utilisation of such research in management and decision making.

SLSP1002
Introduction to Policy Analysis
School of Social Science and Policy
UOC6 HPW3

An introduction to the social, political and organisational context of policy making. Includes the governmental and legal framework within
which public policy is made; organisations and policy; the role of interest
groups and the media in influencing policy. Studies of key policy areas
such as communications policy, environmental policy or health policy
will be used to illustrate the concepts introduced in the course.

SLSP2000
Economy and Society
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: PECO2000

An interdisciplinary overview of the relationship between social and
economic theory and policy development. Considers how theory informs
and legitimates policy choices and how policies are dependent on
historical, social and economic contexts. Major social and economic
theorists are considered and current policy case studies are used to
evaluate policy implementation in the public and private sectors in
Australia.

SLSP2001
Applied Social Research 1
School of Social Science and Policy
UOC6 HPW4
Prerequisite/s: 36 units of credit

Issues and problems in conducting social research in applied contexts.
Research methods and the analysis of data: qualitative and quantitative
research methods, techniques for the analysis of data including inferential
statistics, the use of statistical data packages and methods of qualitative
data analysis. Reporting research findings and ethical issues in research.

SLSP2002
Policy Analysis Case Studies
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: SLSP2000

Examines the role of the social scientist in policy work, exploring both
theoretically and practically the policy/action relationship. Case studies
in policy work are introduced in workshops to develop practical skills
in dealing with policy implementation issues.

SLSP2701
The Theory and Practice of Development
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: COMD2000, GLST2104, INST2400, POLS2023

The theories developed to explain the different rate and pattern of
economic and social development within and between countries and
regions and the policy consequences of these explanations are analysed
and compared. The theories covered include explanations for different
rates of development internal and external to nation states based on
social, market, technological and other factors. Significant case studies
of policy experience from Latin America and Asia, where a variety of
economic and social policy approaches have been adopted are
examined. The current status of debates about the nature of
underdevelopment and its solutions is reviewed.

SLSP2820
Crime and Punishment in Historical Perspective
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: 36 units of credit

Examines the historical development of key institutions and practices of
modern law, enforcement and punishment. Traces the evolution of crime
and 'criminals', the legal code, police forces transportation versus the
prison, and other components of the criminal justice system from the
end of the 18th century through to the present day, and the thinking
behind these developments. The lecture series provides an overview,
fooking on Britain with reference to continental Europe, the United
States, and Australia; tutorials explore a series of policy case studies.

SLSP3000
Social Theory and Policy Analysis
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: SLSP2000

Addresses the way that the application of the social sciences to policy
questions involves theorising - that is, the construction and application
of abstract concepts - by both observers and practitioners. The place
of theory in the production of knowledge, and the way in which knowledge
is reflected in the organising of social order, are subject to critical review.
Tracks the development of ideas in the social sciences, including
contemporary debates about modernism and post modernism, and
investigates their impact on policy.

SLSP3001
Applied Social Research 2
School of Social Science and Policy
UOC6 HPW4
Prerequisite/s: SLSP1001, SLSP2001

Characteristics of applied social research. Planning applied research:
Specifying research questions, writing research proposals. Applied
research designs and their strengths and limitations: Randomised and
quasi-experiments, surveys, case studies, field research & qualitative
research designs. Issues in data collection: choice of method,
considerations of time and cost, consultation with stakeholders,
operationalisation of concepts including social measurement and scale
construction. Analysis of applied research data: qualitative and
quantitative techniques including qualitative data analysis, analysis of
variance, correlation, multiple regression analysis, analysis of
contingency tables. Use of SPSS for data analysis. Reporting and
interpreting research outcomes. Ethical issues and utilisation of research
findings.

SLSP3002
Social Science and Policy Project
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: SLSP2002, SLSP3000, SLSP3001

Students undertake a major social science research project in one of
several policy areas. The project involves bringing together the research
and analytical skills necessary for policy-related work and will involve
students in all phases of the project. This includes preparation of a
literature review and a research proposal, the conduct of research, and
the writing of a report embodying the results of the research.

SLSP3911
Inquiry and Interpretation in the Social Sciences
School of Social Science and Policy
UOC6 HPW3
Prerequisite/s: SLSP3000, SLSP3001

Examines the conceptual foundations of the social sciences both
historically and currently, to provide an understanding of the theoretical
dimensions of social science research and their methodological
implications.

SLSP4000
Social Science and Policy Honours (Research) Full-Time
School of Social Science and Policy
Enrolment requires school approval
UOC4
Prerequisite/s: 48 units of credit in SLSP and SLSP3911 at an average of
at least 65% and permission from Head of School.

Students are required to prepare a thesis of between 15,000 - 20,000
words. Participation in prescribed seminars of at least four hours duration
per week is also required.

SLSP4050
Social Science and Policy Honours (Research) Part-Time
School of Social Science and Policy
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in SLSP and SLSP3911 at an average of
at least 65% and permission from Head of School.
Students are required to prepare a thesis of between 15,000 - 20,000 words. Participation in prescribed seminars of at least four hours duration per week is also required.

**SLSP4100**
**Policy Studies Honours (Research) Full-Time**
School of Social Science and Policy
Enrolment requires school approval
UOCl2
Prerequisite/s: 54 units of credit at 65% including SLSP1002, SLSP2000, SLSP2002, SLSP3000, SLSP3911 and permission from Head of School.

Students are required to prepare a thesis of between 15,000 - 20,000 words. Participation in prescribed seminars of at least four hours duration per week is also required.

**SLSP4150**
**Policy Studies Honours (Research) Part-Time**
School of Social Science and Policy
Enrolment requires school approval
UOCl2
Prerequisite/s: 48 units of credit in SLSP and SLSP3911 at an average of at least 65% and permission from Head of School.

Students are required to complete a research and seminar program acceptable to both Social Science and Policy and the other school/department.

**SLSP4500**
**Combined Social Science and Policy Honours (Research) Full-Time**
School of Social Science and Policy
Enrolment requires school approval
UOCl2
Prerequisite/s: 48 units of credit in SLSP and SLSP3911 at an average of at least 65% and permission from Head of School.

Students are required to complete a research and seminar program acceptable to both Social Science and Policy and the other school/department.

**SLSP4550**
**Combined Social Science and Policy Honours (Research) Part-Time**
School of Social Science and Policy
Enrolment requires school approval
UOCl6
Prerequisite/s: 48 units of credit in SLSP and SLSP3911 at an average of at least 65% and permission from Head of School.

Students are required to complete a research and seminar program acceptable to both Social Science and Policy and the other school/department.

**SOCA1001**
**Cultural Identities**
School of Sociology and Anthropology
UOCl6 HPW3
Excluded: SOCC1431

Explores cultural identity in the contemporary world; as a construction within specific historical, spatial and cultural contexts; the central themes of identity, self, culture, place, difference and tradition; the relationship of European and non-European worlds through a study of the construction of knowledge of “the Other” in sociological and anthropological work; cross-cultural realities of our contemporary world and the growing interdependence of cultures between North and South; the role of ideas in shaping social life. Examines questions of belonging by looking at migration, refugees and citizenship. Looks at the emergence of global culture through a study of the emergence of global multicultural cities, new patterns of consumption for pleasure, and the role of media and communications in globalisation. Explores the issues of global governance and examines the cultural and political responses to globalisation in anti-globalisation movements, fundamentalism and economic strategies.

**SOCA1004**
**Relationships: Sociology and Everyday Life**
School of Sociology and Anthropology
UOCl6 HPW3
Excluded: SOCC1231, SOCI1230

Works through longstanding concerns of sociology with the qualities of self and sociality, with what it means to live in relation to others. Aims to enhance the productive tension between ways of knowing and ways of living and to teach particular skills in reading, writing and researching. Among the topics considered are ritual, passion, intellectualism, enchantment, estrangement, play, inspiration, sympathy and humility. Among the theorists are Durkheim, Sartre, Bachelard, Simmel and Buber.

**SOCA1005**
**Australia's Media: Sociological Perspectives**
School of Sociology and Anthropology
UOCl6 HPW3
Excluded: SOCC1531, SOCA3900

Introduces students to theoretically informed examination and analysis of the mass media based upon sociological intellectual traditions which address the mediation of social relations, the social construction of everyday life and the formation of socially constructed and culturally inflected personal and collective identities. Explores of newspapers, television, film and electronic communications set in the context of patterns of ownership and control produce new understandings of culture, ideology and social processes.

**SOCA1006**
**Introduction to Globalisation**
School of Sociology and Anthropology
UOCl6 HPW3
Excluded: INST1003

Considers how the transnational flows of people, goods, culture and capital are changing the significance of locality and national societies in shaping social life. Examines questions of belonging by looking at migration, refugees and citizenship. Looks at the emergence of global culture through a study of the emergence of global and multicultural cities, new patterns of consumption for pleasure, and the role of media and communications in globalisation. Explores the issues of global governance and examines the cultural and political responses to globalisation in anti-globalisation movements, fundamentalism and economic strategies.

**SOCA2101**
**Encountering Modernity**
School of Sociology and Anthropology
UOCl6 HPW3
Prerequisite/s: 6 level 1 units of credit in Sociology and 36 units of credit overall;
Excluded: SOCI2101, SOCI2501

An encounter of the most influential theoretical accounts of ‘modernity’ through an examination of ‘postmodernity’. The course begins with an examination of key descriptions of postmodernity as an historical development (including Lyotard, Jameson, Bauman) as a way into analysing modernity. The most influential theoretical traditions for studying modernity are explored. (Marx, Weber, Durkheim). The course asks: Is postmodernity a break with modernity or is it merely a fold within modernity?

**SOCA2103**
**Globalisation and Fragmentation**
School of Sociology and Anthropology
UOCl6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: INST2200, SOCC2302, SOCI3596

Central to the concept of globalisation is the idea of the expansion and development of global capital and the ascendency of transnational over national forms of economy, society, politics and culture. Globalisation
is transforming the character of social boundaries and attachments. Individuals, families, and communities are no longer enclosed in the same way by geography or social worlds. People have become more internationally mobile and so have corporations and whole industries. Global cultures have emerged based on mass communication, media and consumer goods. Draws on the work of Appadurai, Friedman, Tilly, Taylor and Hall to explore concepts such as: identity, borders, migration, global communication, global culture, place and displacement, development, organisation, disorganisation (chaos), sociality and futures.

SOCA2104
Technology, Work, Culture
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCI3813.

An introduction to sociological debates about the relationship between technological innovation, including especially that within the field of communications, and broader aspects of social life. Particular emphasis is placed on the theoretical and practical problems which result when the celebration of technological innovation is regarded as an explanation in itself. Includes an examination of such issues as the sociology of the future (including the future forms of work and leisure), the social role of aesthetic avant-gardism, the post-industrial society and information society (or superhighway) theses, competing conceptions of social change (e.g. technological innovation vs social movements), technological convergence and communications policy, and the social and political environments of policy-making.

SOCA2106
Cities: Experiencing Sydney
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 36 units of credit; Excluded: AUST2029, SOCC2703

Focuses on experiences and representations of cities. It is concerned with how the city has become the archetypal site and sign of modernity, and with how spatiality is now central to how cities are lived and imagined. Looks at the city as the site of social transformation in the twentieth century and the tensions between order and disorder. Explores images of the city as the site of liberal and radical utopian dreams as well as the promise and disaster of cities. The changing landscapes of the city are investigated through examples such as streets, crowds, light/darkness, gardens, museums and shopping malls.

SOCA2108
Social Anthropology: Diversity, Difference, Identity
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCI2101, SOCI3709.

Diversity, difference and identity have been at the core of social anthropology as a discipline since its inception. Foundations of social anthropology, its core concepts and contemporary theoretical approaches are examined using examples from Australia and the Asia-Pacific Region. Tensions between the local and the global, sexuality, belief, modes of exchange, the role of secrets, the cultural treatment of the body, work and leisure and communication focus the readings and lectures, including audio-visual material.

SOCA2110
Anthropology, Identity and the Cinema
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 36 units of credit

Examines a range of films from an anthropological perspective and how particular cultures are represented, paying particular attention to the privileged gaze and the hegemonic re/ construction of cultural identities. Covers various topical areas including Orientalism, nationalism and violence, feminism, hyper-masculinity, post-modern alienation and nostalgia.

SOCA2204
Pacific Island Research Fieldwork
School of Sociology and Anthropology
Enrolment requires school approval
UOC6
Prerequisite/s: 36 units of credit; Excluded: GENT1204, GENT1205, SOCI3710.

Provides training in and use of ethnographic fieldwork methods in the context of a Pacific Island country with an understanding of village vs urban life and how development organisations impact. Ethnography is a part of the methodology of both sociology and anthropology, as well as other social science research. Interview techniques and technologies, cultural mapping, methods of recording field data and participatory community development research are amongst the procedures to be explored. Field visits to regional, government and non-government organisations form a part of the research to understand how such institutions shape village life.

Note/s: Taught in November-December 2005. Students must contact Grant McCall g.mccall@unsw.edu.au prior to the commencement of Session 2.

SOCA2205
Society and Desire
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCC2201, WOMS2005.

The subject of desire is an especially curious one because it makes us think about the nature of the human condition. The perception of difference is an erotic process through which we are forged as bodily beings whose identities are constantly shifting. Explores how our sense of self emerges in relation to others. How we divide our own bodies into alien parts that may delight or repulse us is part of a larger social process that includes how we experience the world, how we live our sex, sexuality and cultural difference. Will draw on several continental thinkers.

SOCA2206
Embodiment
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 12 units of credit in Level 1 Sociology and 36 units of credit overall; Excluded: SOCC2501.

We are lived bodies inhabiting a world. Addresses a range of themes which emerge when we reflect upon ourselves in this way: I am a body, yet I have a body; my body is always in communication with a world, I am both sentient and sensible; I am both bounded and open. Consideration of such themes requires an investigation of theoretical constructs of the social and cultural formations of embodied subjectivity, the relations of consciousness and flesh, habit and inhabitation, the significance of body image, relationality and emotions. Major theorists include Merleau-Ponty, Foucault, Douglas, Turner, Bachelard and Lingis. Case studies such as reproduction, sacred and profane bodies, bodybuilding and anorexia, dissociation and disembodiment, illness, will be used to enable students to reflect upon their own embodied experience, to examine critically everyday and theoretical assumptions, and to develop skills in qualitative analysis.

SOCA2210
Anthropology of Human Rights
School of Sociology and Anthropology
UOC6 HPW3
Prerequisite/s: 36 units of credit

SOCA3104
Global Migration, Global Refugees
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 12 units of credit in Level 1 Sociology and 36 units of credit overall; Excluded: SOCC2702.
Considers both voluntary and involuntary migration: from business migration and family reunion to various forms of exile and refugee flows. The social consequences of migration on the host society, the country of origin, and the migrant will be examined in light of questions of human solidarity, neighbourliness and justice.

SOCA3106
Anthropology and Tourism
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit
Explores the social, cultural, linguistic, archaeological and ecological outcomes of these processes through various case studies and theoretical enquiry. Topics include studying travel and tourism; varieties of tourists and tourist experiences; commoditisation and authenticity, tourism and representations of culture, history and identity; local responses to tourism; sex and eco-tourism.

SOCA3203
Oceanic Societies: Pacific Island Living
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCI1702.
Provides students with the historical and intellectual context of the study of the Pacific Islands, including the conceptual and theoretical tools needed to comprehend the more than one thousand societies and cultures there. The broad outlines of the waves of human settlement in the region are explored, followed by discussions of specific topics, in selected locales, that best represent the rich diversity of the region. Topics include suicide, art and creativity, religion and sorcery, chieftainship, relations with the environment and how islanders see themselves in their worlds.

SOCA3204
Modernity & Development in the Pacific Islands
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCI1706.
Australian organisations, NGOs (Non-Government Organisations), religious groups, secular charities and AusAID, the government development assistance organisation, all have played important roles in the Pacific Islands. Representatives of these and other groups will provide practical accounts of their experiences “doing development” in the Pacific, along with readings and reflection on what their experience means in terms of the impact of modernity on the region. The particular Australian role in Pacific affairs and its meanings is featured.

SOCA3206
Anthropology of Celebration
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit
Presents a series of key debates in the social anthropological literature of the last decade with the common theme of understanding celebration and the crucial role of play in human culture, inspired by Huizinga’s concept of “homo ludens”. Festivals, carnival, religious and secular ceremonial, rites of passage in culture and individual identity, global sport, visual anthropology, food, music and dance performance are some of the celebrations examined.

SOCA3208
Colonisation and Indigenous Identity Formation
Nura Gili (Indigenous Programs)
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: ATSI3001, SOCC3701
Investigates the formation of contemporary Indigenous identities in the context of the ongoing colonisation of Australia. Explores the interplay between culture and identity and analyses the various historic and academic constructions of Aboriginality. The history of imposed colonial notions of Aboriginal identity and their consequences for both Aboriginal people and non-Indigenous Australians are identified and examined. The use of contemporary media such as film, television, literature and art are examined as case studies in the analysis of contested identities.

SOCA3209
Indigenous Australia: Gendered Identities
Nura Gili (Indigenous Programs)
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: ATSI3002, AUST2012, SOCC3717
Encourages students to engage in a critical analysis of the way in which gender influences and structures the experiences of Aboriginal women and men in the past and the present. A wide range of issues involving gender roles will be covered including land, art, activism, feminism, violence, race, and literature. Particular attention will be paid to colonial constructs of gender roles within Aboriginal communities. Aboriginal women’s and men’s roles in subverting the colonisation of their identities will be explored.

SOCA3210
Whiteness Beyond Colour: Identity and Difference
Nura Gili (Indigenous Programs)
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: ATSI3005
Whiteness is generally assumed to be the norm in classifying difference. It is also assumed to be neutral. Delves into whiteness as a mode of identification and whether it can be assumed to be the norm as well as neutral. Topics include whiteness as Other, whiteness as a non-Indigenous identity, and whiteness in coloniser societies. Explorations of whiteness as a representation of oppression and as transformation will be addressed.

SOCA3407
Australian Migration Issues
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: AUST2011, GENT1209, SOCI3614
An examination of racial, ethnic and social issues surrounding migration to Australia. Topics include an ecologically sustainable population; globalisation and international migration flows; brain drain to and from Australia; multiculturalism; criteria in determining migration policy; settlement issues; skilled migrants; refugees, international aid and social justice; identity, ethnicity and community.

SOCA3409
Crime, Gender and Sexuality
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: GENT1207, WOMS2007, WOMS3006
Examines social implications of: the role of law in defining the limits of gender and sexuality, regulating gender and sexual relationships, and in reinforcing particular gender and sex based interests; the intersection of criminality and sexuality (specific examples may include pornography, rape, discrimination, AIDS transmission, moral danger, prostitution, abortion, under age pregnancy). Notions of public interest, privacy and consent in matters of gender and sex. The interaction of gender and sexuality with other stratification factors such as age, class, disability, ethnicity and race in the social construction of crime.

SOCA3410
Deviance
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCA2208.
Examines a variety of definitions of deviance to include both legally proscribed activities such as arson, vandalism, and assault; and socially sanctioned activities, states and phenomena such as rudeness, promiscuity, acne, obesity, stupidity, pollution and pornography. Reviews theories of how deviance is maintained or controlled. Considers the making, changing and breaking of rules in society, especially in times of social change when new forms of deviance may emerge (e.g., smoking, sexual harassment) or other activities gain social acceptance (e.g., higher education for women, ethnic diversity).

SOCA3411
Forensic Sociology: Evidence, Implication and Responsibility
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit

Explores the similarities between sociology and crime scene investigation by examining how isolated and seemingly random pieces of data are actually embedded in larger frames of social and informational significance. Considers how these larger patterns of association can provide predictive relevance and meaning. Beginning with Durkheim’s foundational work on suicide, the course explores the interpretive approach called sociology, the science of reading signs. Several CSI tools, such as forensic facial reconstruction and fingerprinting, illustrate the empirical and philosophical implications of this method.

SOCA3607
Sociology of Ageing
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit

Considers historical legacies in social attitudes to ageing; wider economic and political processes such as the role of the state and social policies concerned with aged care, health and pensions; media representations of ageing; implications of an ageing workforce; consumer, attitudinal and political preferences of various aged cohorts; and new family and intergenerational relationships. Of particular relevance for students with interests in public policies and services for an ageing society. Addresses the professional interests of people who work in gerontology and public health, aged care, superannuation and retirement income consulting.

SOCA3701
Discipline of the Law
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCC3601.

Explores political, cultural and sociological interdependence of law and society. The relation between law and legal systems, on one hand, and socially located ideas, values and interest, on the other. Particular attention is directed to current issues and controversies and the activities of all caught up in the law – police and judiciary, legal profession and clients, prisoners and gaolers and any with material and ideal interest in the law.

Notes/s: Taught by distance education.

SOCA3703
Nationalism, Citizenship and Cultural Identity
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCI3506.

Explores different forms of contemporary nationalism, its main sources, various levels of its construction, and its political employment. Investigates the resurgence of nationalism against the background of globalisation and the connected processes of dislocation and relocation. Focuses on the numerous antinomies resulting from these processes, including that between democratic citizenship and formation of collective and individual identities. Addresses some of the theoretical perspectives concerning the potential of multiculturalism for the formation of non-exclusive, open identities.

SOCA3801
Healing
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit

What is healing? One view might be that to heal is to bring about the absence of illness to eradicate disease through external intervention. Another view might be that healing occurs from within. We will consider another holistic approach. Healing is a matter of making whole, but what is whole? This question will be addressed with reference to ways of being in everyday life.

SOCA3804
Living and Dying
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCC2203, SOCC3203.

Is death the ultimate, immutable other, the incomprehensible and unspeakable limit of existence? Or is death not also integral to life, a condition for life, experienced as impermanence, absence and lack or a creative impetus? Investigates the complex and ambiguous relations of life and death by examining different responses to death: how death is managed or excoriated, sought, denied or transcended. Includes discussions of love, ecstasy, grief, sex, laughter, generationality, seasonality, religion and science. Based on a close reading of Michel Serres’ book, Angels: A Modern Myth, but this is supplemented by readings from Berger, Steinid-Rast, Rilke, Moore, Hillman and others.

SOCA3806
Medicine, the Body and Culture
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit; Excluded: SOCI3604.

Presents an overview of sociological and cultural studies of the relationship between medical knowledge and practice, the experience of health and illness and contemporary society. Focuses particularly on the ways medicine affects the experience, understanding and performance of the body; the effect of medical intervention on the organisation of sexuality, illness and aging; the decentralisation of medical knowledge and the changing status of the doctor-patient relationship.

SOCA3810
The Space of Terror
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit

Violence is historically an integral part of social and political processes even though it is often constructed as deviant and from the dark side. Explores contemporary political violence and its relationship to social space, self and community. Focuses on contemporary civil wars and ethnic and religious violence. Explores themes such as massacre, ethnic cleansing, and martyrdom as ways in which individual death is given collective meaning in the context of the crisis of the nation-state. Its methodology involves a micropolitics of violence and the semiotics of pain. Explores concepts such as the abject, torture, war, terrorism, trauma, testimony, witnessing, reconciliation and post-violence worlds. Draws on the work of Scarry, Kristeva, Nordstrom, Massumi, Foucault, Zulaika and Tausig.

SOCA3912
Risk and Trust in Modern Societies
School of Sociology and Anthropology
UOC6  HPW3
Prerequisite/s: 36 units of credit including at least 6 units of credit in Sociology at Credit level; Excluded: SOCA3302, SOCI3508.

Detached from local contexts, mechanisms of risk-production are increasingly impersonal. Responsibility for managing risk is assumed by the same powerful agencies that create it, while traditional structures of risk-containment (such as kinship, locality, and religion) are dissolving. This process poses questions about how people cope with risk and about new forms of social solidarity that might support social trust and confidence.
SOCA4000
Sociology Honours (Research) Full-time
School of Sociology and Anthropology
Enrolment requires school approval
UOC24  HPW5
Prerequisite/s: 54 units of credit in SOCA at 70% average including 12 upper Level in the SOCA3810 - 3915 range

The Honours program consists of research and writing a thesis and coursework. The thesis is a sustained research project which produces an Honours thesis of approximately 16,000 - 20,000 words. Coursework for Honours consists of two compulsory Honours seminars and a thesis research and writing workshop.

Note/s: Before enrolling in the Honours program, students are required to attend an interview about their proposed research with the Honours coordinator.

SOCA4050
Sociology Honours (Research) Part-time
School of Sociology and Anthropology
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in SOCA at 70% average including 12 upper Level in the SOCA3810 - 3915 range

In special circumstances, students may be permitted to enrol in an Honours program on a part-time basis. Students will thus complete their Honours program over the course of two years. This program consists of research and writing a thesis and coursework. The thesis is a sustained research project which produces an Honours thesis of approximately 16,000 - 20,000 words. Coursework for Honours consists of two compulsory Honours seminars and a thesis research and writing workshop.

Note/s: Before enrolling in the Honours program, students are required to attend an interview about their proposed research with the Honours coordinator.

SOCA4500
Combined Sociology Honours (Research) Full-time
School of Sociology and Anthropology
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in SOCA at 70% average including 6 upper Level in the SOCA3810 - 3915 range

This program, designed by the relevant units in consultation with the student, is usually a jointly supervised and jointly examined thesis, with required seminar work being divided equally between the units. In addition to seminar and thesis work, students are required to attend and contribute to regular thesis workshops.

Note/s: Students who have also qualified to read for a degree at Honours level in another school/department may, with the permission of both units, seek to read for a Combined Honours degree. The program, designed by the relevant units in consultation with the student, is usually arranged around a jointly supervised and jointly examined thesis, with required seminar work being divided equally between the units. In addition to seminar and thesis work, students are required to attend and contribute to regular thesis workshops.

SOCA4550
Combined Sociology Honours (Research) Part-time
School of Sociology and Anthropology
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in SOCA at 70% average including 6 upper level in the SOCA3810 - 3915 range

This program, designed by the relevant units in consultation with the student, is usually arranged around a jointly supervised and jointly examined thesis, with required seminar work being divided equally between the units. In addition to seminar and thesis work, students are required to attend and contribute to regular thesis workshops.

Note/s: In special circumstances, students may be permitted to enrol in a combined Honours program on a part-time basis. Students who have also qualified to read for a degree at Honours level in another school/department may, with the permission of both units, seek to read for a Combined Honours degree. The program, designed by the relevant units in consultation with the student, is usually arranged around a jointly supervised and jointly examined thesis, with required seminar work being divided equally between the units. In addition to seminar and thesis work, students are required to attend and contribute to regular thesis workshops.

SOCW1001
Introduction to Social Work
School of Social Work
UOC6  HPW3

Provides an overview and rationale for the BSW curriculum. Students are introduced to the scope and parameters of the social work profession, the diversity of levels and contexts of intervention, the range of theory and knowledge that informs social work practice, and the code of ethics that guides professional intervention. A variety of case studies and scenarios are used to illustrate this material. To reinforce the links between conceptual knowledge and practical application, contact will be made with a range of relevant agencies.

SOCW1002
Communication and Social Work Practice
School of Social Work
UOC6  HPW3

Excludes: Students enrolled in program 3970 (Bachelor of Science) and program 3972 (Bachelor of Advanced Science) are not permitted to enrol in this course.

Provides an understanding of theories of communication and their application in the context of social work practice. Includes selected communication skills exercises. Provides an awareness of the ways effective communication can be used to achieve particular outcomes. Exploration of professional and personal value systems in relation to social work codes of ethics.

SOCW1003
Human Behaviour 1 (Life Stress and the Life Span)
School of Social Work
UOC6  HPW3

Excludes: Students enrolled in program 3970 (Bachelor of Science) and program 3972 (Bachelor of Advanced Science) are not permitted to enrol in this course.

Looks at theories of stress which have influenced the way the topic is researched and applied today. The main theoretical underpinnings are critically examined for their relevance to particular types of stress or events and applicability across the life span. The role of the individual, the nature of coping and the relative importance of biological and environmental factors are explored. Also examines the theoretical underpinnings and empirical evaluation of stress management techniques.

SOCW2001
Human Behaviour 2 (Physical and Psychological Health)
School of Social Work
UOC6  HPW3

Sustains the biopsychosocial framework of Human Behaviour 1 to examine factors which influence the maintenance of health and the development of illness. The contribution that major theories of human behaviour make to our understanding of health and illness are critically evaluated. Interdisciplinary theoretical and empirical contributions are used to examine a range of themes related to health and illness. Social factors which influence our view of health, the disorders we research and the theories we accept are examined.

SOCW2002
Society and Social Work 1
School of Social Work
UOC6  HPW3

Explores the nature of society and the interrelationship between conceptual knowledge and social work practice with the emphasis on the Australian context. Students will examine concepts, theories and key social trends related to social work.

SOCW2003
Social Work Practice - Casework
School of Social Work
UOC6  HPW3
Prerequisite/s: SOCW1002
Addresses practice theory and skills relevant to social work intervention at the direct personal level. Skills that are relevant to each of these phases are taught and practised in tutorials: exploratory interviewing and assessment skills, demand-for-work skills, and skills of reviewing and leave-taking.

**SOCW2004**  
**Society and Social Work 2**  
School of Social Work  
UOC6  HPW3

Explores further the study of social and political institutions and structures and their effect on social work. Builds on the use of theory to understand the link between policy and practice in diverse public and private arenas. Identifies crucial factors in the distribution of resources, status and power. Provides a foundation for the study of Social Policy 1 and 2.

**SOCW2005**  
**Research for Social Work**  
School of Social Work  
UOC6  HPW3

Looks at the nature of research - in particular, research in a social context. Aims to equip students with basic skills in research design, data collection and analysis. In addition, the course presents concepts that will enable students to critically evaluate others’ research. Covers information on descriptive and experimental research, and qualitative and quantitative approaches to design and analysis. Students will learn to apply basic techniques of data analysis, including inferential and descriptive statistics.

**SOCW2006**  
**Social Work Practice - Community Work**  
School of Social Work  
UOC6  HPW3

Prerequisite/s: SOCW1002, SOCW2003.

Analyses and critiques models and theories of community work within the contemporary social policy and economic and political context. Skills and knowledge required for effective practice are pursued. An emphasis is placed on issues of power, powerlessness and the collective processes that empower marginalised communities.

**SOCW2007**  
**Social Work Practice - Bridge**  
School of Social Work  
Enrolment requires school approval  
UOC3

Through a set reading program, students are introduced to the scope and parameters of the social work profession, the diversity of levels and contexts of intervention, the range of theory and knowledge that informs social work practice, and the code of ethics that guides professional intervention.

**Note/s:** Students who enter the BSW program with advanced standing take this course.

**SOCW2100**  
**Aboriginal People and Social Work**  
Nura Gili (Indigenous Programs)  
UOC6  HPW3

Prerequisite/s: Enrolment in program 4031 or 4035 or 4036 or 4785.  
Excluded: ATSI3004

Examines the history and current legacy of colonisation and government policies for Indigenous Australians and their position in contemporary Australian society. Social movements and actions relevant to Indigenous Australians’ social experience will be discussed. Addresses in particular the skills social workers need to work with Indigenous clients and what role social work can play in progressing equity and social justice for Indigenous Australians.

**SOCW3001**  
**Social Work Practice - Third Year Practicum**  
School of Social Work  
UOC12

Prerequisite/s: SOCW2003, SOCW2006;  
Corequisite/s: SOCW3002.

Students are allocated to a social welfare agency to undertake field-based learning under the supervision of a qualified field educator. Placements occur in a range of traditional and contemporary settings and contexts, such as hospitals, local governments, state and federal government departments, as well as non-government, community based organisations. Performance is monitored and assessed by the university, in consultation with the field educator and student. This placement begins in mid-January with a six-week full-time block period, then reduces to three days a week during Session 1.

**SOCW3002**  
**Social Work Practice - Groupwork**  
School of Social Work  
UOC6  HPW3

Prerequisite/s: SOCW2003, SOCW2006;  
Corequisite/s: SOCW3001

Building on SWP-Casework and SWP-Community Work, this course provides the specialised knowledge needed for social work intervention at the social groupwork level of practice. Examines the phases of group development, the dynamics of group process, and a range of group work models which support the diversity of group work practice. An emphasis is placed on experiential learning and skills development in addition to theoretical/conceptual understanding.

**SOCW3004**  
**Social Policy 1**  
School of Social Work  
UOC6  HPW3

Basic Sociology is assumed for this course. Understanding of historical, ideological, political and economic backgrounds to Australian social arrangements is assumed. Policy analysis frameworks are introduced along with perspectives from various policy theorists and analysts. These are applied in the detailed discussion and analyses of major policies in policy domains such as health, housing, urban and regional, finance, transport and criminal justice. Comparative policy studies are used in several of these critical analyses.

**SOCW3005**  
**Research Honours**  
School of Social Work  
Enrolment requires school approval  
UOC6  HPW4

Offered as a pre-Honours course. Students are introduced to various forms of experimental, qualitative and survey research designs, forms of data collection and the development of measuring devices. Investigates validity and reliability concepts and correlation analysis and prediction of problems. Introduces multivariate analysis. Part of class time is allocated to working on individual project designs.

**SOCW3006**  
**Socio-Legal Practice in Social Work Settings**  
School of Social Work  
UOC6  HPW3

Explores the legal, professional and ethical opportunities and constraints of social work practice. Includes a consideration of the tensions and dilemmas of socio-legal practice through an examination of social work interventions in selected settings. Attention is paid to legal systems, legal concepts, law making processes, and sources of legal assistance and interactions between social workers and lawyers.

**SOCW3007**  
**Research Methods 2**  
School of Social Work  
UOC6  HPW3

SOCW3008
Social Work Practice - Selected Studies 1
School of Social Work
UOC6 HPW3
Prerequisite/s: SOCW3001, SOCW3002.

Students select from a range of specialised modules that build on the methods-based input of earlier practice courses. The range of topics varies from year to year, depending on staff availability and student interest.

SOCW4002
Social Work Practice in Organisations
School of Social Work
UOC6 HPW3
Prerequisite/s: SOCW3001, SOCW3002, SOCW3008.

Provides a critical and practical examination of social work practice in organisations. Introduces organisational and management theories and considers their relevance for social work settings. Examines the tensions inherent in professionalism and contemporary ideas about management and the management of change in organisations and the importance of planning and evaluating for change. Explores strategies for effective and ethical practice. Organisations are examined. Issues-based and experiential learning provides a basis for the development of organisational skills, such as skills in negotiation, teamwork, program planning, supervision and the management of information.

SOCW4003
Social Work Practice - Selected Studies 2
School of Social Work
UOC6 HPW3
Prerequisite/s: SOCW3001, SOCW3002, SOCW3008.

Students take a second selected studies component to complement that taken in SOCW3008.

SOCW4004
Social Philosophy
School of Social Work
UOC6 HPW3

Introduces students to the basics of moral philosophy in the first part of the course and builds upon this in dealing with political philosophy in the second part. Begins with moral reasoning and moral theory and these topics introduce students to some of the central thinkers and the doctrines which have shaped modern understandings of ethics.

SOCW4005
Social Policy Honours
School of Social Work
Enrolment requires school approval
UOC6 HPW4
Prerequisite/s: SOCW3005

Offered as a pre Honours course. Understanding of historical, ideological, political and economic backgrounds to Australian social arrangements is assumed. Introduces students to the social policy processes of formulation, implementation and evaluation. Processes and elements of the policy analysis framework are utilised to closely examine some social policy domains (eg social security, education, employment) as well as the impact of several policies on the patterns of welfare experienced by people within major population groupings (eg immigrants, Aboriginal and Torres Strait Islander peoples).

SOCW4010
Social Work Practice - Fourth Year Practicum
School of Social Work
UOC24 HPW35
Prerequisite/s: SOCW3001, SOCW4002, SOCW4003; Excluded: SOCW4001

Building on the first placement experience, students are placed in a different social welfare agency to develop additional competencies and further enhance those already mastered at a basic level. By the end of this placement students need to demonstrate satisfactory performance in the full range of required competencies. Students are consulted about placement allocations. The placement is undertaken as a full-time block period, beginning in mid-July and extending throughout Session 2.

SOLA1050
Introduction to Photovoltaics, Solar Energy and Computing 1
Centre for Photovoltaic Engineering
UOC6 HPW4

An overview is given of solar energy, its harnessing and its conversion into electricity via various converter technologies. In particular, an overview is given of solar cells and their applications with emphasis on visual presentations and interesting case histories. The interesting area of “solar cars” is considered in detail as an example of a high profile application of photovoltaic (PV) devices and systems that deals with state-of-the-art technology. Students will also gain experience in computer programming particularly with the C++ language. Trends in the PV industry are considered, particularly with regard to costs, industry growth and technology innovation. Insight is given into the types of jobs carried out by PV engineers including manufacturing, research, system design, system analysis and fault diagnosis, policy and analysis, marketing, quality control and testing, training/education, maintenance, electronics design and interfacing, etc. In general, one lecture each week will be given by guest lecturers who are experts from industry, end-user groups, research, government and other major areas of photovoltaics that are covered in this degree program.

SOLA1051
Introduction to Photovoltaics, Solar Energy and Computing 2
Centre for Photovoltaic Engineering
UOC3 HPW3

An overview is given of solar energy, its harnessing and its conversion into electricity via various converter technologies. In particular, an overview is given of solar cells and their applications with emphasis on visual presentations and interesting case histories. The interesting area of “solar cars” is considered in detail as an example of a high profile application of photovoltaic (PV) devices and systems that deals with state-of-the-art technology. Trends in the PV industry are considered, particularly with regard to costs, industry growth and technology innovation. Insight is given into the types of jobs carried out by PV engineers including manufacturing, research, system design, system analysis and fault diagnosis, policy and analysis, marketing, quality control and testing, training/education, maintenance, electronics design and interfacing, etc. In general, one lecture each week will be given by guest lecturers who are experts from industry, end-user groups, research, government and other major areas of photovoltaics that are covered in this degree program.

SOLA1055
Introduction to Renewable Energy Technologies 1
Centre for Photovoltaic Engineering
UOC6 HPW4

An overview is given of solar energy, its harnessing and its conversion into electricity via various converter technologies. In particular, an overview is given of the various renewable energy (RE) technologies and their applications with emphasis on visual presentations and interesting case histories. The interesting area of “solar cars” is considered in detail as an example of a high profile application of a Renewable Energy system that deals with state-of-the-art technology. Trends in the RE industry are considered, particularly with regard to costs, industry
growth and technology innovation. Insight is given into the types of jobs carried out by RE engineers including manufacturing, research, system design, system analysis & fault diagnosis, policy & analysis, marketing, quality control & testing, training/education, maintenance, electronics design & interfacing, etc. Students will learn about the importance of computers to the RE industry and receive a basic grounding in programming and CAD packages. Many lectures will be given by guest lecturers who are experts from industry, end-user groups, research, government and other major areas of Renewable Energy that are covered in this degree program.

SOLA1056
Introduction to Renewable Energy Technologies 2
Centre for Photovoltaic Engineering
UOC3 HPW3

An overview is given of solar energy, its harnessing and its conversion into electricity via various converter technologies. In particular, an overview is given of the various renewable energy (RE) technologies and their applications with emphasis on visual presentations and interesting case histories. The interesting area of “solar cars” is considered in detail as an example of a high profile application of a Renewable Energy system that deals with state-of-the-art technology. Trends in the RE industry are considered, particularly with regard to costs, industry growth and technology innovation. Insight is given into the types of jobs carried out by RE engineers including manufacturing, research, system design, system analysis & fault diagnosis, policy & analysis, marketing, quality control & testing, training/education, maintenance, electronics design & interfacing, etc. Students will learn about the importance of computers to the RE industry and receive a basic grounding in programming and CAD packages. Many lectures will be given by guest lecturers who are experts from industry, end-user groups, research, government and other major areas of Renewable Energy that are covered in this degree program.

SOLA2051
Project in Photovoltaics and Solar Energy 1
Centre for Photovoltaic Engineering
UOC6 HPW5

Satisfactory performance in SOLA2051 is a prerequisite for progress to SOLA2052. Each student is required to prepare for assessment a project proposal as part of the requirements for SOLA2051.

SOLA2052
Project in Photovoltaics and Solar Energy 2
Centre for Photovoltaic Engineering
UOC6 HPW5

To be completed sequentially with SOLA2051. The main emphasis of this course is hands-on “projecteering”, or project engineering. A wide range of projects is made available for students or groups of students, and new projects regularly become available, giving students some degree of choice. Examples of projects include monitoring and analysing existing installations, installing new PV, thermal solar, wind or micro-hydro generation systems, developing educational multimedia presentations, system design, modelling, developing country applications of renewable energy, biodiesel manufacturing and solar cell laboratory projects. Each project will have a research component, a planning component, a hands-on component and a reporting component and may involve a peer-reviewed oral presentation component. Lectures covering project engineering skills and practice are given in the early weeks, after which students work closely with their nominated project supervisor on their projects. A written project report must be submitted on each project to satisfy the requirements for SOLA2052.

SOLA2060
Introduction to Electronic Devices
Centre for Photovoltaic Engineering
UOC3 HPW3

Operation, circuit characteristics, basic design principles and applications of a range of semiconductor devices. Material covered includes pn junction theory, bipolar junction transistors, avalanche diodes, MOSFET’s, basic digital circuits, solar cells, light emitting diodes, semiconducting lasers and photodetectors.

SOLA3507
Solar Cells and Systems
Centre for Photovoltaic Engineering
UOC6 HPW4

Prerequisite/s: SOLA3540

Photovoltaics systems harness sunlight by using solar cells to convert it directly into electricity. This course covers factors important in the design of solar cells which are studied with regard to their effects on spectral response, temperature sensitivity, resistive losses, current generation and open circuit voltages. A range of solar cell technologies are considered both at the laboratory and commercial levels, including advanced concepts and designs for photovoltaic modules. Significant emphasis is placed on applications including systems design, construction and operation with this subject building on the material introduced in the subject Applied Photovoltaics. Relevant types of systems receive particular attention. Experience will be gained with the computer-aided design procedures for photovoltaic systems. Management and entrepreneurial approaches in relation to starting a small business within the photovoltaic industry are also considered.

SOLA3540
Applied Photovoltaics
Centre for Photovoltaic Engineering
UOC6 HPW4

Prerequisite/s: SOLA3540

The use of solar cells (photovoltaic devices) as electrical power supplies based on the direct conversion of sunlight into electricity. The emphasis is placed on applications including systems design and construction, although the properties of sunlight, the operating principles of solar cells and the interaction between sunlight and the cells are also treated.

SOLA4012
Grid-Connected Photovoltaic Systems
Centre for Photovoltaic Engineering
UOC6 HPW4

Prerequisite/s: SOLA4012

This course familiarises students with issues relevant to the use of photovoltaics in systems connected to the electricity distribution network with the aim of attaining competency in design and specification. The types of systems considered include residential, building-integrated, distributed grid-support and central station. System components, design, operation, safety, standards and economics are addressed making extensive use of past field experience and site visits where appropriate.

SOLA4910
Thesis Part A
Centre for Photovoltaic Engineering
UOC6 HPW6

SOLA4911
Thesis Part B
Centre for Photovoltaic Engineering
UOC12 HPW12

The Thesis Project (Parts A and B) is carried out in the last two sessions of the BE degree course for full-time students. Six hours per week in the first session, and twelve hours per week in the second session are devoted to directed laboratory and research work on an approved subject under guidance of members of the lecturing staff. Part-time students may need to attend the University full-time in their final session or attend for one further part-time session, if facilities are not available for the thesis to be done at their workplace. Typically, the thesis involves the design and construction of experimental apparatus together with practical tests. Each student is required to present a seminar as part of the requirements for SOLA4910, Thesis Part A. Satisfactory performance in subject SOLA4910 is a prerequisite for progress to subject SOLA4911. A written thesis report must be submitted on each project by the Tuesday of the 14th week of the second session of enrolment to satisfy the requirements for SOLA4911, Thesis Part B.

SOLA4912
Thesis in Renewable Energy Engineering Part A
Centre for Photovoltaic Engineering
UOC9 HPW8
The Thesis Group Project is carried out in the last two sessions of the BE degree course for full-time students. Six hours per week in the first session, and twelve hours per week in the second session are devoted to directed laboratory and research work on an approved subject under guidance of members of the lecturing staff. Part-time students may need to attend the University full-time in their final session or attend for one further part-time session, if facilities are not available for the thesis to be done at work. Generally, the thesis involves the design and construction of experimental apparatus together with laboratory tests. The Group Thesis Project is for students with an NSS WAM of less than 65. Each student is required to present a seminar as part of the requirements for SOLA4914, Group Thesis Project Part A. Satisfactory performance in subject SOLA4914 is a prerequisite for progress to subject SOLA4915. A written thesis report must be submitted on each project by the Tuesday of the 14th week of the second session of enrolment to satisfy the requirements for SOLA4915 Group Thesis Project Part B.

SOLA5051
Life Cycle Assessment
Centre for Photovoltaic Engineering
UOC3  HPW6
This course will deal with life cycle analysis and its use for life cycle assessment of energy systems. Methodologies, boundary issues, data bases and applications will be studied. The uses of LCA will be illustrated with industrial case studies and with studies aimed at quantifying externalities associated with different electricity generation technologies.

SOLA5053
Wind Energy Converters
Centre for Photovoltaic Engineering
UOC6  HPW4
This course will cover the principles of wind energy and wind power, as well as the design and operation of different types of wind energy converters. It will include machines for water pumping, remote area power supply and grid electricity generation. It will cover issues of site selection, monitoring and analysing wind data, estimating output from wind generators, integrating wind generators into hybrid power systems or the grid, economics, standards and environmental impacts.

SOLA5054
PV Stand-Alone System Design & Installation.
Centre for Photovoltaic Engineering
UOC6  HPW4
This course will allow students to obtain their Business Council for Sustainable Energy (BCSE) (formally SEAAA), provisional accreditation to design and install stand alone power systems. This is required for the installation of systems under the various AGO funded grants. The course will cover the following areas: preparing energy assessments of households and properties, batteries, inverters, regulators, trackers, and system design. This will include thorough study of the Australian Standard: AS4509.2 Stand Alone Power Systems Part 2: System Design Guidelines, System Installation. This (and the following subject) will include thorough study of the Australian Standard: AS4509.3 Stand Alone Power Systems Part 3: Installation and Maintenance, System Maintenance, O&H&S issues relating to the installation of systems, and all relevant standards that relate to the installation of systems. This course will include a practical laboratory component relating to the installation and testing of photovoltaic systems.

SOLA5059
Industrial Elective
Centre for Photovoltaic Engineering
Enrolment requires school approval
UOC6
Each Industrial Elective (6 UOC) represents one year of appropriate quality industrial experience or equivalent in a suitable field. Students must submit evidence and a written report to the satisfaction of the Head of School. Some attendance at the University for verbal reporting may also be required. A maximum of 12 UOC can be taken and the credits may be substituted for certain courses in program 3642 requirements. The substitution is not available for work done during the first year of employment if this coincides with the first year of part-time enrolment. The period of employment claimed must precede the completion of the thesis SOLA4911 or SOLA4915. An Industrial Elective cannot be claimed for work submitted for credit as SOLA4911 Thesis or SOLA4915 Group Thesis. Details of the procedure for registering and the requirements to be met can be obtained from the Centre for Photovoltaic Engineering.

SOLA5060
Industrial Elective
Centre for Photovoltaic Engineering
UOC3
Each Industrial Elective (3 UOC) represents 6 months of appropriate quality industrial experience or equivalent in a suitable field. Students must submit evidence and a written report to the satisfaction of the Head of School. Some attendance at the University for verbal reporting may also be required. A maximum of 12 units of credit can be taken and the credits may be substituted for certain courses in program 3642 requirements. The substitution is not available for work done during the first year of employment if this coincides with the first year of part-time enrolment. The period of employment claimed must precede the completion of the thesis SOLA4911. An Industrial elective cannot be claimed for work submitted for credit as SOLA4911 Thesis. Details of the procedure for registering and the requirements to be met can be obtained from the Centre for Photovoltaic Engineering.

SOLA5061
Industrial Elective
Centre for Photovoltaic Engineering
UOC3
Each Industrial Elective (3 UOC) represents 6 months of appropriate quality industrial experience or equivalent in a suitable field. Students must submit evidence and a written report to the satisfaction of the Head of School. Some attendance at the University for verbal reporting may also be required. A maximum of 12 UOC can be taken and the credits may be substituted for certain courses in program 3642 requirements. The substitution is not available for work done during the first year of employment if this coincides with the first year of part-time enrolment. The period of employment claimed must precede the completion of the thesis SOLA4911 Thesis or SOLA4915 Group Thesis. An Industrial Elective cannot be claimed for work submitted for credit as SOLA4911 Thesis or SOLA4915 Group Thesis. Details of the procedure for registering and the requirements to be met can be obtained from the Centre for Photovoltaic Engineering.

SOLA5508
High Efficiency Silicon Solar Cells
Centre for Photovoltaic Engineering
Enrolment requires school approval
UOC6  HPW3
Prerequisite/s: SOLA2060
This is an advanced level subject for those with a good background in semiconductor device physics and an interest in silicon solar cells or related devices. After a brief review of the crystal structure, energy bands and phonon spectra of silicon, the course examines silicon's optical, recombination and transport properties in some detail. Next comes a discussion of efficiency limits upon photovoltaic energy conversion, with particular emphasis upon light trapping and the potential for exceeding conventional limits. After discussion of presently achievable surface and bulk material properties, the final section of the course studies in detail the design of silicon cells upon both crystalline and multicrystalline substrates and under concentrated and non-concentrated sunlight.
SOMA1308
Time Based Art 1B
School of Media Arts
UOC6 HPW3

The aesthetics, practice and history of media art will be introduced and developed, with an emphasis on contemporary fine art practice. Time based art practices such as: experimental film, video art, performance, time based installation, interactive multimedia and experimental sound will be explored. Concepts and techniques of spatial and temporal montage will be introduced and elaborated through technical workshops, screenings, seminars and individual project work. Video editing software will also be introduced.

SOMA1309
Photomedia 1B - Digital Studies
School of Media Arts
UOC6 HPW3

This course introduces the student to the broad experience of working with photomedia. The course emphasises the development of a keen critical awareness in students by investigating the content and context of photographic images in contemporary visual art and culture. The questions of intent, content and context are focussed toward the development of the individual's visual language. The course introduces students to the basic technical concepts of digital imaging. Using digital imaging software students learn basic scanning, resolution theory, image manipulation and output. Students are encouraged to explore, experiment and develop their ideas through the completion of set projects.

SOMA1312
Photomedia 1A - Analogue Studies
School of Media Arts
UOC6 HPW3

Prerequisite/s: SART1303 Introductory Studies: Photomedia & Printmaking.

This course introduces the student to the broad experience of working with photomedia. The course emphasises the development of a keen critical awareness in students by investigating the content and context of photographic images in contemporary visual art and culture. The questions of intent, content and context are focussed toward the development of the individual's visual language. Students explore the possibilities of image-making processes by the acquisition of basic photographic technical skills including: 35 mm camera operation, B/W development of the individual's visual language. The course introduces students to the basic technical concepts of digital imaging. Using digital imaging software students learn basic scanning, resolution theory, image manipulation and output. Students are encouraged to explore, experiment and develop their ideas through the completion of set projects.

SOMA1315
Time Based Art 1A
School of Media Arts
UOC6 HPW3

Prerequisite/s: SART1302 Introductory Studies: Sculpture & Time Based Art.

Time based art is a cluster of units dealing with the complex multiplicity of artistic forms which use the passage of and the manipulation of time as the essential element. Time Based Art 1A introduces key concepts in time based art with specific reference to experimental film, video art and installation, sound, performance and multimedia computing. The course develops critical awareness by close study of histories of the moving image and the expressive use of technology and the human body. Concurrently the subject provides preliminary technical training in the various technologies used in the production of video, sound and performance works.

SOMA1521
Introduction to Analogue Photography
School of Media Arts
UOC6 HPW3

The aim of this course is to develop skills through the direct participation in intellectual and technical processes relevant to the field, and to create Photomedia based works of an increasingly professional standard. Students explore the possibilities of image-making processes by the acquisition of basic photographic technical skills including: overview of 35mm camera operation; B/W film types and exposure; processing and printing; print finishing and presentation. This technical knowledge is advanced by the development of the student's critical awareness of contemporary visual arts practice through the completion of set projects.

SOMA1600
Language of Digital Media
School of Media Arts
UOC6 HPW3

This course provides an overview of theories of language and looks critically at the way these apply to popular media. Starting with basic principles of communication and introducing theories of semiotics, students are encouraged to critically engage with the deconstruction of media as text. Lectures in this course provide an introduction to linguistic and semiotic theory, as well as newer concepts such as memetics. Media platforms are also examined in individual lectures, ranging from comics to digital games and hypertext. In tutorials the concepts introduced in lectures are examined in more detail, and assessment is undertaken through presentation involving the examination and analysis of popular media.

SOMA1602
Web Authoring
School of Media Arts
UOC6 HPW3

This course provides an introduction to the production of web pages and web sites. It covers basic web page composition, HTML, file directory organisation and the authoring and optimisation of media elements such as typography, images, sounds and animations through various software and processes. Examples of both simple and sophisticated web sites will be critiqued. The emphasis will be on creative utilisation, web interface design theory.

SOMA1603
Digital Video 1
School of Media Arts
UOC6 HPW3

This course is designed to explore and expand an understanding of video production methods and practice, analog then digital. The course is comprised of: technical demonstrations and workshops, discussions and tutorials, individual and group project development, assessment and critique, proficiency on analog and digital editing systems will be gained in the workshop. The use of camera, lighting and sound editing will also be introduced.

SOMA1604
Introduction to Digital Media
School of Media Arts
UOC6 HPW3

This course provides a broad introduction and foundation to video, photography and sound. It will cover aspects of video capture and editing, photographic capture and manipulation and sound capture and editing. Students will learn to use basic sound recording equipment and receive an introduction to concepts of sound layering and editing. Students will be introduced to the fundamentals of the video process associated with analogue and digital technologies. An introduction to photographic process will also be covered.

SOMA1605
Lighting
School of Media Arts
UOC6 HPW3

Lighting for the digital environment workshop is designed to explore the nature of light and expand the understanding of “light” in many of its forms. Light in relation to Digital production, issues of the consistency of light the fall of light, lighting for multiple outcomes, the measurement of light, key lighting and light ratios. Colour temperature in relationship to available light, artificial light, and studio lighting tungsten and electronic. This course will seek to establish an understanding and appreciation of the roll light plays in the image making process.
SOMA1608
Digital Composite
School of Media Arts
UOC6  HPW3

This subject will introduce students to the principles, techniques and applications of digital imaging technology. The central aim will be to provide students with a clear perception and appreciation of the manner in which the various discrete components of hardware and software symbiotically interact to form an effective imaging system. Practical and creative experiences will give students the opportunity to gain basic proficiency in operating industry standard packages.

SOMA1641
Video Art
School of Media Arts
UOC6  HPW3

These courses offer students the opportunity to gain an awareness of the nature and variety of experiences included in the television area, to appreciate the specific qualities and potential of the video and electronic media and to acquire the technical, intellectual and creative skills necessary for the creation of original video work. By exploration of a theoretical overview and the development of relevant skills the student will formulate and implement an extensive study of a field of practice within the area of Video.

SOMA1651
Introductory Analogue and Digital Animation and Timing Skills
School of Media Arts
UOC6  HPW3

Analogue and Digital Animation is a general introduction to various techniques and methods involved with both linear capture of pictures onto film or hard drives and other computer animation techniques. Much time is spent developing timing skills and investigating through workshops various approaches to timing. As well through a series of projects students develop a comprehensive range of approaches to computer animation.

SOMA1661
Performance
School of Media Arts
UOC6  HPW3

The course develops a strongly eclectic approach to making contemporary performance and performance art exploring anti-narrative, physical and conceptual approaches. Issues of context, audience, spatial relationships and interactivity are addressed. Various technologies and media may also be used within the project work.

SOMA1681
Introductory Multimedia Computing
School of Media Arts
UOC6  HPW3

These courses enable students to develop concepts and techniques of multimedia production which utilise the computer to assemble sound, video, text and images in order to develop interactive media which is innovative, challenging and pertinent. By exploring a theoretical overview and gaining relevant skills the student will develop original and engaging interactive works.

SOMA1810
Introduction to Computing
School of Media Arts
UOC6  HPW3

This subject covers the basic use of Macintosh computers and the Macintosh operating system. This will include disc formatting, network server storage and printing, email set-up, the Internet, using the web as a research tool and various Web utilities including NS Student. An introduction to Microsoft Office Word, focusing on the basics of formatting and COFA style requirements; an introduction to the basics of Web authoring; an introduction to Power Point; File and document management with file formats commonly used and file types to use for cross-platform applications.

SOMA2201
Landscape Animation
School of Media Arts
UOC6  HPW56

Students will be taken through a range of workshops that develop animation skills, with particular attention being paid to stop-motion techniques. Students will work in and experience the unique Australian landscape in and around historic Broken Hill. This course draws upon the aesthetics and theories of environmental sculpture and animation. The arid landscape provides an opportunity to see the essential nature of the environment, making underlying structures visible. Traces left on the landscape by natural and manmade events are more easily seen and rendered. The projects are developed further using digital video editing and digital video postproduction. Students will work on various individual and group projects in the field to enhance and extend their production techniques, with each student shooting, editing, and scoring animation projects. On completion of this course, students will have an understanding of the technical and aesthetic foundations of digital video production and animation. Cost to students is approx $480 which includes all travel, meals and accommodation. The course is run in the first week of the winter session refer to information posted by School.

SOMA2221
Photomedia 2A - Analogue Studies
School of Media Arts
UOC6  HPW3
Pre requisite/s: SOMA1312 or SART1402

This is a studio based course with an emphasis on placing the student's practice in the context of art history and studio theory. The course extends the conceptual and analogue technical skills acquired in Photomedia 1A. Students are introduced to medium format camera operation and advanced B/W and colour darkroom processes. Students are required to have a basic knowledge of B/W and colour photography, 35 mm camera operation, film exposure, processing and print production. Students are directed towards an analysis and critical awareness of current visual arts practice, central to the production and advancement of their own work. Students are encouraged to explore, experiment and develop ideas through set projects.

SOMA2224
Time Based Art 2A
School of Media Arts
UOC6  HPW3
Pre requisite/s: SOMA1315 or SART1402

This course introduces the conceptual understanding and technical skills underpinning practice in time based art. Screening programs and analysis of sound, the moving image and performance augment the students knowledge of the traditions and contemporary contexts of technological and non-technological art forms. Students become familiar with the processes of video production, 16 mm cinematography and editing and/or computer-based image and sound technologies. Students are directed to develop a body of work which integrates technical and conceptual approaches.

SOMA2331
Photomedia 3A - Analogue Studies
School of Media Arts
UOC6  HPW3
Pre requisite/s: SOMA2321

This is an analogue studio based course with an emphasis on placing the student's practice in the context of art history and studio theory. The course extends the conceptual and analogue technical skills acquired in Photomedia 1A and 2A. Students are introduced to large format camera operation and fieldwork projects. Students are required to have knowledge of basic lighting techniques, medium format camera operation and darkroom processes. Students explore a diversity of conceptual approaches, including the relationship of audience, site and context to visual art works and artist multiples/books, in order to extend their use of visual language. This conceptual and technical knowledge is advanced by the development of the student's critical awareness through set and self-initiated projects.
This course furthers the conceptual understanding and technical skills underpinning practice in time based art. The course examines the traditions and contemporary contexts of art practices which developed in response to the mediums of film, television and multimedia. The course investigates the interactions between film, video, sound and computing technologies in time based art practices. Students develop a body of work exploring and integrating these technologies in art.

SOMA2341
Photomedia 2B - Digital Studies
School of Media Arts
UOC6  HPW3

This is a studio based course with an emphasis on placing the student's practice in the context of art history and studio theory. The course extends the conceptual and digital technical skills acquired in Photomedia 1B. Students are introduced to advanced digital imaging software, image manipulation techniques, high resolution scanning and output devices, vector imaging and colour space theory. Students are directed towards an analysis and critical awareness of current visual arts practice, central to the production and advancement of their own work. Students are encouraged to explore, experiment and develop ideas through set projects. The integration of new technologies within analogue practice is explored.

SOMA2344
Time Based Art 2B
School of Media Arts
UOC6  HPW3

Students will gain the conceptual and technical skills to develop soundscapes and audiovisual soundtrack work. Technically, the following elements are covered: digital sound recording, editing and mixing; sampling; synthesis; sound design. All students will gain proficiency on the basic operation of the sound studios. Various conceptual, aesthetic and philosophical approaches to sound and sound design will be introduced through critical discussion of examples and project work.

SOMA2351
Photomedia 3B - Digital Studies
School of Media Arts
UOC6  HPW3

This is a digital studio based course with an emphasis on placing the student’s practice in the context of art history and studio theory. The course extends the conceptual and digital technical skills acquired in Photomedia 1B and 2B. Students are introduced to advanced imaging software, digital image capture, advanced scanning, digital composite, image manipulation techniques and output alternatives. Students explore a diversity of conceptual approaches, including the relationship of audience, site and context to visual art works and artist multiples/books, in order to extend their use of visual language. This conceptual and technical knowledge is advanced by the development of the student’s critical awareness through set and self-initiated projects. Students are encouraged to explore external print bureaus for final production of their work.

SOMA2354
Time Based Art 3B
School of Media Arts
UOC6  HPW3

Expressive and technical means for creating fine art practice in time based media will be further explored and developed through an emphasis on the development of the student’s individual artistic practice. A strong focus on the presentation of work will be pursued.

SOMA2521
Introduction to Studio Lighting
School of Media Arts
UOC6  HPW3

This course introduces the student to the basic analysis and control of natural and artificial light for photography. Students are instructed how to observe the quality of natural light for photography as a basis for learning basic photographic studio lighting techniques and their creative applications. The student requires knowledge of basic B/W and colour photography; 35mm camera operation; film exposure and processing; and print production. The emphasis is on the development of new technical skills central to the production and advancement of the student's work. Projects are set which focus on the production of photographic images for contemporary visual art works.

SOMA2551
Introduction to Audio
School of Media Arts
UOC6  HPW3

Excluded: SOMA2344 and SOMA2602.

Students will gain the conceptual and technical skills to develop either “stand alone” audio work or audio soundtracks in relation to other mediums such as video, installation and multimedia work. Technically, the following elements are covered: digital sound recording, editing and mixing; sampling; synthesis; audiovisual sound design. All students will gain proficiency on the basic operation of the sound studios. Various conceptual, aesthetic and philosophical approaches to audio practice will be introduced through critical discussion of examples and project work.

SOMA2602
Sound Media 1
School of Media Arts
UOC6  HPW3

This course covers all aspects of audio production relating to art works, soundtracks for film, video, performance and multimedia computing. Students are introduced to various conceptual, stylistic, aesthetic and philosophical approaches to the use of sound within art, with attention also being paid to the relationship of sound to other art practice. A screening and listening lecture program examines various sound/music pieces, installations and soundtracks.

SOMA2606
Advanced Multimedia Authoring
School of Media Arts
UOC6  HPW3

Excluded: SOMA2607 or SOMA1681.

Advanced Multimedia Authoring extends the students’ experience gained in Multimedia Authoring 1 furthering the conceptual understanding, appreciation and technical skills underpinning interactive practice.

SOMA2607
Multimedia Authoring 1
School of Media Arts
UOC6  HPW3

Multimedia authoring provides the platform for students to combine the media of sound, text, images moving and still. Interactive events are planned and structured, notions of the linear and non-linear are addressed. This multimedia-authoring course utilises multiple software programs and seeks the creative development of interactive and animated media outcomes.

SOMA2608
Digital Composite 2
School of Media Arts
UOC6  HPW3

Topics to be considered include digital capture, colour theory, operation of input and output devices, image manipulation, compatibility issues relating to digital composite. The knowledge, skills and experience gained in practical and theoretical sessions will provide the understanding of the digital composite cycle. Students will apply imaging theory to optimise their digital media practice in a variety of situations across mutable media, using industry standard packages.
SOMA2609
3D Modelling and Animation 1
School of Media Arts
UOC6 HPW3

This course is an introduction to the many operational elements within 3D. Students will be introduced to the fundamentals of 3D modelling, texturing, lighting and animation. The integration of 3D into other digital media will be explored. Emphasis is placed on establishing good working studio practices.

SOMA2610
Writing for the Digital Media
School of Media Arts
UOC6 HPW3

This course focuses on creative writing and visual storyboarding as a means of extending the student's imaginative and conceptual approach to digital production. Classes will comprise workshops and individual and group projects covering issues of writing for both single screen and interactive works. Students will engage with issues of dialogue and voiceover texts, script and character construction, and storyboarding, mapping and visual description. The course enriches the students comprehension of the creative process necessary to the generation of video or digital media works.

SOMA2651
Advanced Analogue and Digital Animation
School of Media Arts
UOC6 HPW3
Prerequisite/s: SOMA1651.

Advanced Analogue and Digital Animation offers the student who had already completed SOMA1651 the chance to develop more complex techniques and projects. More emphasis is given to project management and a greater detail is developed about the particular project requirements.

SOMA2661
Performance Elective 2
School of Media Arts
UOC4 HPW3

These courses enable students to develop critically aware multi-disciplinary approaches, which will intelligently utilise the traditions of sound performance and installation in order to form a contemporary art practice which is innovative, challenging and pertinent. By exploration of the theoretical overview and the development of relevant skills, students will formulate and implement an extensive study of a field of practice in this area.

SOMA2681
Advanced Multimedia Computing
School of Media Arts
UOC6 HPW3
Prerequisite/s: SOMA1681.

This course enables students to develop concepts and techniques of multimedia production which utilise the computer to assemble sound, text and images in order to develop time based art which is innovative, challenging and pertinent. By exploring a theoretical overview and gaining relevant skills, the student will develop original web based interactive works.

SOMA2811
Multimedia Computing Workshop
School of Media Arts
UOC4 HPW3

The course consists of a series of workshop/tutorials examining contemporary art issues as explored through relevant software, particularly the interactive manipulation of digital photographic images, planar and 3D animation and sound. Classes include demonstrations and workshops, treatments, discussions and tutorials, review and critique.

SOMA2813
Video Workshop
School of Media Arts
UOC4 HPW3

The course is designed to explore and expand an understanding of video production methods and practice. The course is comprised of technical demonstrations and workshops, discussions and tutorials, individual and group project development, assessment and critique. Proficiency on A/B roll editing will be gained in the workshop. The use of timecode, telecine, and sound editing will also be introduced.

SOMA2814
Cinematography Workshop
School of Media Arts
UOC4 HPW3
Prerequisite/s: SOMA1312 or SART1402.

The cinematography workshop offers students grounding in the technical operation of cameras and lighting equipment and explores related conceptual issues. Attention is focused on control of the media through an understanding of framing, lighting, and film stock. Areas of concern include camera operations, film language, exposure, lighting, camera mounts, frame speed, filters, printing and the laboratory process. Classes include demonstrations and workshops, treatments, discussions and tutorials, review and critique.

SOMA2815
Introduction to Digital Imaging
School of Media Arts
UOC6 HPW3

In this studio workshop, the student is introduced to the basic concepts and future possibilities of digital imaging processes. The emphasis is on the integration of digital technologies into visual arts practices. The subject opens up for consideration a range of digital applications suitable for extending image production and visualisation. The student is introduced to the practice and methods of production of contemporary artists who utilise a variety of digital technologies in their work.

SOMA2816
Photomedia: Analogue Workshop
School of Media Arts
UOC4 HPW3

The course introduces the student to the basic analogue skills in photography. Students will acquire technical skills in B/W photographic processes and are encouraged to explore, experiment and develop ideas through set projects. The course addresses and questions the content and context of the photographic image with relationship to the intent of the student.

SOMA2817
Extended Photomedia Workshop
School of Media Arts
UOC4 HPW3

In this workshop the student is introduced to extended photomedia processes and activities outside of the utilisation of the camera. The student is provided with the opportunity to experiment with photo-sensitive methods for transferring and reproducing images onto a variety of materials. Innovative and interdisciplinary activity will extend the student's image making opportunities. An emphasis is placed on the application of these new skills in work which continues to explore the individual's current areas of concern.

SOMA2837
Sound Studio: Advanced Workshop
School of Media Arts
UOC4 HPW3
Prerequisite/s: SOMA2812 or SOMA2602 or SART1812.

Through consultation with the lecturer, each student will develop projects based upon the utilisation of the audio studio. This may be a soundtrack for a film, video, performance or computer based work or a recorded sound work. This course, if taken in conjunction with Time-Based Art 3, will facilitate the completion of advanced film and video projects within that unit.

SOMA2839
Animation Workshop
School of Media Arts
UOC4 HPW3
The Animation Workshop explores an overview of various animation techniques in both traditional film and computer graphic forms as well as ways of combining these various techniques. Such techniques as pixilation, cell animation, smudge animation, computer graphic manipulation of the image, computer animation, cut out techniques, in camera techniques, concepts of the frame, and landscape animation are explored.

SOMA2854
Vector Graphics in Visual Arts
School of Media Arts
UOCC6 HPW3
Prerequisite/s: SOMA2815 or SOMA2811 or SOMA1521 or SOMA1312

In this studio workshop the student explores advanced photo-based digital imaging techniques, and is introduced to interrelated software suitable for the production of illustration, graphic based images, and artist publications. The emphasis is on the integration of digital imaging as utilised in visual arts practices. The course advances the student’s skills for image production, visualisation and presentation.

SOMA2858
Narrative and Gameplay
School of Media Arts
UOCC6 HPW3
Starting from the nature of traditional narrative and story structure, this course provides intensive hands-on work in the understanding and development of creative design documents for films, games and other interactive media. It focuses especially on the intersection of narrative, gameplay and interactivity, and how these concepts are translated into a design document. Students spend time analysing the components of different media, before developing an original design idea.

SOMA3341
Photomedia 4A - Analogue Studies
School of Media Arts
UOCC6 HPW3
Prerequisite/s: SOMA2331

This studio based course centres upon the student's development of a self-initiated body of work that demonstrates an understanding, exploration, and refinement of the concepts central to their practice. This course will address and critically refine the knowledge students have gained in Photomedia 1A - 3A. Students will concentrate on developing a body of work that demonstrates an understanding and refinement of concepts and contexts central to their individual art practice. The works produced will be an investigation of research possibilities and this investigation is initiated by the student and undertaken with lecturer supervision. It is expected that students continue to refine and advance their analogue technical skills to a standard appropriate to the concerns in their work. Students are directed toward an analysis and critical awareness of current visual arts practices and issues. Issues of production and documentation within the contemporary visual arts and media arts industry are emphasised.

SOMA3344
Time Based Art 4A
School of Media Arts
UOCC6 HPW3
Prerequisite/s: SOMA2334

This course further develops the students knowledge of the art historical contexts and inter-disciplinary skills necessary to time based art practices. Students are expected to develop an area of research relevant to their individual art practice. The students concentrate on producing a substantial body of work which demonstrates an understanding and refinement of the concepts and contexts central to their work. Specialised content extend the students technical and conceptual skills in the use of film, video, audio and multi-media computing technologies. Concurrently, the subject deepens the students critical comprehension of time based forms through study and analysis of different art works in the screening and presentation programs.
This course assumes prior knowledge of 3D and builds upon the skills developed in SOMA2609. This course extends the student’s experience of 3D with higher-level character creation, character control and animation. Photorealism is also explored through the illustration of more advanced texture application, lighting and rendering techniques. Integration of 3D into other digital media is further developed through compositing techniques and camera control.

SOMA3610
Digital Studio
School of Media Arts
UOC6  HPW6

The digital studio course has been established for students to consolidate their various digital media practices. This course is designed to encourage student speculation experimentation and then creative development into a mature outcome. Students are supported in their area of research, within an environment that encourages collaboration across divergent media and practice.

SOMA3611
Industry Placement
School of Media Arts
UOC6  HPW3

The Industry Placement program is seen as a critical component of the BDM. Students are placed into appropriate industry settings, either nationally or internationally. The Industry Placement program will test students ability within the contemporary Digital Media environment. Each student will have a lecturer assigned to him or her.

SOMA3612
Professional Portfolio
School of Media Arts
UOC6  HPW3

The professional portfolio course seeks to offer students the opportunity to develop a portfolio of work at an industry standard. This course will encourage students to focus on a discreet body of work that will assist them in realising their career goals. The portfolio could be of a specific nature i.e. reflective of the student’s own disciplinary strengths and interests.

SOMA3615
Sound Media 2
School of Media Arts
UOC6  HPW3

“Sound Media 2” more closely examines both audio/visual relationships and sound/music genres, while expanding upon the techniques and ideas taught in the previous semester. Both individual and group projects will be based around the sound design and sound/music score of audio/visual works created within other classes, with an option to create further “stand-alone” sound/music works. The relationship of sound to editing within time-based and interactive works will be examined. Technical knowledge of sound recording and editing will be refined, with a concentration on working between audio/visual programs such as Final Cut Pro, Flash and Dreamweaver. Further techniques such as MIDI composition and analogue synthesis will be explored. A screening and listening lecture program will examine further sound/music pieces, installations and soundtracks.
SOMA3651
Animation Elective 3
School of Media Arts
UOC4  HPW3
The Animation Electives explore an overview of various animation techniques in both traditional film and computer graphic forms as well as ways of combining these various techniques. This sequence of courses encourages experimentation on the part of the student. Such techniques as pixilation, cell animation, stop-motion animation, computer graphic manipulation of the image, computer animation, cut out techniques, in camera techniques, concepts of the frame, and landscape animation may be explored. Through the development of an awareness of movement and timing and the application of rigorous techniques to the various media the student’s individual and experimental artistic practice will be developed.

SOMA3661
Performance Elective 3
School of Media Arts
UOC4  HPW3
These courses enable students to develop critically aware multi-disciplinary approaches, which utilise the traditions of sound performance and installation in order to form a contemporary art practice which is innovative, challenging and pertinent. By exploration of the theoretical overview and the development of relevant skills, students will formulate and implement an extensive study of a field of practice in this area.

SOMA3681
Multimedia Computing Elective 3
School of Media Arts
UOC4  HPW3
These courses enable students to develop concepts and techniques of multimedia production which utilise the computer to assemble sound, text and images in order to develop time-based art which is innovative, challenging and pertinent. By exploring a theoretical overview and gaining relevant skills the student will develop original web based interactive works.

SOMA3840
Advanced Multimedia Computing Workshop
School of Media Arts
UOC4  HPW3
This advanced workshop explores concepts and techniques of 3D simulation. Notions of linear sequence and interactive structures in the production of artworks are both explored. Individual elements of sound, image and text are generated using these programs with the knowledge that these elements could become frames/fragments of time based works.

SOMA3858
Advanced Studio Lighting
School of Media Arts
UOC6  HPW3
This course introduces the student to advanced techniques in studio lighting and their creative applications. The course focuses on the use of artificial lighting techniques for studio lighting set-ups in addition to specific lighting techniques for portraiture and still life. The student is required to have knowledge of basic lighting techniques; B/W and colour photography; 35 mm camera operation; film exposure and processing; and print production. The emphasis is on the development of new technical skills central to the production and advancement of the student’s work. Projects are set which focus on the production of photographic images for contemporary visual art works.

SOMA3859
Advanced Digital Imaging - 3D Workshop
School of Media Arts
UOC4  HPW3
In this studio workshop the student is introduced to advanced techniques for digital imaging and their creative application. The course is founded on a pre-requisite knowledge of 2D digital imaging techniques. This knowledge is extended into a variety of 3D digital imaging techniques to be used by the student within projects which focus on image production and visualisation for contemporary visual art works. Students will also explore how to combine 2D and 3D digital imaging techniques together. Finally students will investigate a variety of options for digital print output, and how to navigate the colour correction of digital files to a selected print media. The emphasis is on the development of skills suitable for the integration of digital technologies into visual arts practices.

SOMA3860
Advanced Digital and Web Media
School of Media Arts
UOC6  HPW3
In this lecture and studio based course, students will explore the integration of photo-based digital imaging techniques in conjunction with web-based production and delivery. Students will learn to create their own website through a combination of basic html and web production software packages, as well as elementary animation techniques. The emphasis is on the integration of digital technologies as utilised in visual arts practices. The course advances the student's skills for image production, visualisation, interface design and presentation utilising the web as a platform for delivery.

SOMA3861
Art Science & Visualisation
School of Media Arts
UOC6
Assumed knowledge of photographic processes and digital imaging software is necessary for this course; the equivalent of SART1312. This course will introduce students to contemporary and historical crossovers and collaborations between art, science and medicine, looking at imaging and visualisation techniques such as microscopy, electron microscopy, anatomical photography, DNA sequencing and visualisation. Positioning these within the history of art and science from the seventeenth century to the present, it will examine the differences between documentation and representation in the scientific image, the concept of the clinical gaze, imaging the unseen and virtual representations of the organic and inorganic worlds. These concerns will be addressed both from a studio and theory level with equal time spent on developing historical and conceptual understanding of scientific imaging and acquiring basic technical skills in producing and working with various kinds of images.

SOMA4045
Honours Program - Bachelor of Digital Media
School of Media Arts
UOC21
Prerequisite/s: Bachelor of Digital Media 4810.

The Bachelor of Digital Media (BDM) Honours program is a one-year full time program, at a higher level of study. In their Honours year students undertake self-nominated research into areas of Digital Media. The aim of the Honours year is to provide the Honours student with the opportunity through critical inquiry and practice to develop a research project that is presented at the end of the year as a project and research paper. The Bachelor of Digital Media encourages a diverse range of media practice and recognises the possible complexity of the media. It is with this in mind that the BDM Honours program may include, where appropriate collaborative work.

SOMA4046
Honours Program - Bachelor of Digital Media
School of Media Arts
UOC15
Prerequisite/s: Bachelor of Digital Media 4810.

The Bachelor of Digital Media (BDM) Honours program is a one-year full time program, at a higher level of study. In their Honours year students undertake self-nominated research into areas of Digital Media. The aim of the Honours year is to provide the Honours student with the opportunity through critical inquiry and practice to develop a research project that is presented at the end of the year as a project and research paper. The Bachelor of Digital Media encourages a diverse range of media practice and recognises the possible complexity of the media. It is with this in mind that the BDM Honours program may include, where appropriate collaborative work.
SOMA4609
3D Modelling and Animation 3
School of Media Arts
UOC6 HPW3
**Prerequisite/s:** SOMA3609.

This is an advanced course which assumes prior knowledge of 3D and builds upon the skills developed in SOMA3609. It will take you through the production and development of a short computer generated character animation. Sophisticated character control and facial animation systems will be illustrated culminating with the completion of a major studio project in animation.

SPAN1001
Introductory Spanish 1A
Department of Spanish and Latin American
UOC6 HPW6
**Excluded:** GENT0435, SPAN1000, SPAN1020, SPAN1021, SPAN1100

For students who have little or no knowledge of Spanish. Intended to give students a sound basis of spoken and written Spanish and to introduce them to the history and culture of Spain and Latin America. Five hours language and one hour civilisation lecture. All language teaching is in tutorial groups.

**Note/s:** All students enrolled in SPAN1001 must attend a first meeting for information and organisation of tutorial groups. See Department noticeboard for details.

SPAN1002
Introductory Spanish 1B
Department of Spanish and Latin American
UOC6 HPW6
**Prerequisite/s:** SPAN1001;
**Excluded:** SPAN1000, SPAN1020, SPAN1021, SPAN1100.

Intended to give students a sound basis of spoken and written Spanish and to introduce them to the history and culture of Spain and Latin America. Five hours language and one hour civilisation lecture. All language teaching is in tutorial groups.

SPAN1021
Introductory Spanish 1C
Department of Spanish and Latin American
UOC6 HPW5
**Excluded:** SPAN1000, SPAN1001, SPAN1020, SPAN1100.

Begins an intensive review of Spanish grammar and stimulates the development of writing skills. It also contains an introduction to the history, literature and culture of Spain and Latin America. Three hours language, two hours literature and one hour civilisation lecture. All language and literature teaching is in tutorial groups.

**Note/s:** For students with previous knowledge of Spanish. An assessment of each student’s existing knowledge of Spanish will be made in week 1.

SPAN1022
Introductory Spanish 1D
Department of Spanish and Latin American
UOC6 HPW5
**Prerequisite/s:** SPAN1021;
**Excluded:** SPAN1000, SPAN1002, SPAN1020, SPAN1100.

For students who completed SPAN1021. Completes an intensive review of Spanish grammar and continues the development of writing skills. Also contains an introduction to the history, literature and culture of Spain and Latin America. Three hours language, two hours literature and one hour civilisation lecture.

SPAN2003
Intermediate Spanish A
Department of Spanish and Latin American
UOC6 HPW5
**Prerequisite/s:** SPAN1000 or SPAN1100 or SPAN1002;
**Excluded:** SPAN2001.

Two hours audio/visual comprehension and two hours of grammar/reading/written expression, plus one hour of cultural studies.

SPAN2004
Intermediate Spanish B
Department of Spanish and Latin American
UOC6 HPW5
**Prerequisite/s:** SPAN2001 or SPAN2003;
**Excluded:** SPAN2002.

Two hours audio/visual comprehension and two hours of grammar/reading/written expression, plus one hour of cultural studies.

SPAN2023
Intermediate Spanish C
Department of Spanish and Latin American
UOC6 HPW4
**Prerequisite/s:** SPAN1020 at credit level or SPAN1022;
**Excluded:** SPAN2021.

One hour grammar, one hour aural comprehension, one hour discussion, one hour video.

SPAN2024
Intermediate Spanish D
Department of Spanish and Latin American
UOC6 HPW4
**Prerequisite/s:** SPAN2023;
**Excluded:** SPAN2022.

One hour grammar, one hour aural comprehension, one hour discussion, one hour video.

SPAN2401
Colonising the Americas: The Spanish and Portuguese Empires
Department of Spanish and Latin American
UOC6 HPW3
**Prerequisite/s:** 36 units of credit

Provides an introduction to the history of the Spanish empire in the Americas from the sixteenth century to the early nineteenth century. The major trends, events and processes of the colonial era are examined, up to and including the wars of independence in the early nineteenth century. The colonial history of Brazil is also covered. Apart from a comparison of Portuguese and Spanish America, an attempt will be made to compare the rise and decline of the Spanish and Portuguese empires with the vicissitudes of English colonialism in the Americas.

SPAN2406
Modern Spain: From Loss of Empire to European Integration
Department of Spanish and Latin American
UOC6 HPW3
**Prerequisite/s:** 36 units of credit;
**Excluded:** EURO2411

An overview of Spain’s turbulent history following loss of empire, including the Spanish Civil War and the Franco dictatorship. Most attention is given to the nation’s transformation since 1975 (the death of Franco and the return to democracy) and its enthusiastic embrace of Europe. As a peripheral European nation, and one that has been driven by cultural, political and economic conflicts in the recent past, Spain may well constitute a litmus test for the viability of European unity.

SPAN2421
Special Topic in Latin American History 1
Department of Spanish and Latin American
UOC6 HPW3
**Prerequisite/s:** 36 units of credit

In unusual circumstances a special topic in Latin American history may be chosen by the student, in close consultation with the lecturer, to pursue a particular area of interest. Weekly tutorials and written work.

SPAN2422
Special Topic in Latin American History 2
Department of Spanish and Latin American
UOC6 HPW3
**Prerequisite/s:** 36 units of credit

In unusual circumstances a special topic in Latin American history may be chosen by the student, in close consultation with the lecturer, to pursue a particular area of interest. Weekly tutorials and written work.
SPAN2425
Pre-Columbian Empires: Aztecs and Incas
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: 36 units of credit

An interdisciplinary study of the great civilisations encountered by the Spanish at conquest including Aztec and Inca ethnohistory, class, stratification, economy, religion, arts, crafts and lifestyles.

SPAN2428
(Un)Making the Third World: History and Global Development B
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: 36 units of credit;
Excluded: COMD2010, GLST2101, HIST2040, HIST2060, SPAN2424

Explores the history of dictatorship and democracy in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. In geographical terms, the focus is on Latin America with a particular focus on Argentina, Brazil, Chile, Peru, Mexico, Cuba, Guatemala and Colombia. The historical trajectories, current circumstances and future prospects of these nation-states will be examined in relation to themes such as authoritarianism, violence, terror, fear, democracy, liberty, freedom, nationalism, revolution, US hegemony, neo-liberalism and globalisation.

SPAN2429
(Un)Making the Third World: History and Global Development A
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: 36 units of credit;
Excluded: COMD2020, GLST2102, HIST2061, INST2000

Explores the history of underdevelopment and development in the nineteenth and twentieth centuries from the vantage point of the early twenty-first century. Themes include: colonialism, nationalism, decolonisation and post-colonial states; the history and politics of development in the Cold War and post-Cold War era; the state and economic development; the role of international organisations such as the World Bank and the IMF; and the question of globalisation. In geographical terms, the focus is on sub-Saharan Africa, especially the Democratic Republic of the Congo; the Middle East, especially Egypt; South Asia, especially India; Southeast Asia, especially Indonesia; and Northeast Asia, especially South Korea.

SPAN2431
The United States and Changing Global Orders
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: 36 units of credit;
Excluded: GLST2103, HIST2510

Examines the role of the USA in the world in the context of the history of changing global orders. Drawing on diplomatic history, international history, international relations, international political economy, and social and cultural history, the main themes include: westward expansion, ‘Manifest Destiny’, theories of imperialism, US-Soviet rivalry, and debates about globalisation and the character and future of the contemporary global order centred on the USA.

SPAN3003
Advanced Spanish A
Department of Spanish and Latin American
UOC6  HPW4

Prerequisite/s: SPAN2002 or SPAN2004 at credit level;
Excluded: SPAN3001.

Two hours grammar, one hour aural comprehension, one hour audiovisual.

SPAN3004
Advanced Spanish B
Department of Spanish and Latin American
UOC6  HPW4

Prerequisite/s: SPAN3001 or SPAN3003;
Excluded: SPAN3002.

Two hours grammar, one hour aural comprehension, one hour audiovisual.

SPAN3040
Spanish Linguistics
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: SPAN1020 or SPAN2004 or SPAN1021

Aims to provide students with a knowledge of the norms and structure of the Spanish language and its use. The course focuses on the areas of Spanish phonology, morphology, grammar, pragmatics and semantics. It will be very helpful for students wishing to pursue the language to translator level.

Note/s: The language of instruction is Spanish.

SPAN3339
Magical Realism in Latin America
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: 36 units of credit

Begins with a brief account of the various attempts to define Magical Realism and of the ensuing acrimonious critical debate in Latin America. However, the main part of the course will be a reading of some of the key texts of the trend, from its beginnings in Brazil in the 1920s up to the so-called Magical Feminism of the 1980s.

SPAN3602
Hispanic Fiction Into Film
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: SPAN1010 or SPAN1020 or SPAN2003

Twentieth century novels, one from Spain and two from Latin America, are examined, comparing a film version with the original text. Modes of discourse are contrasted, evaluating devices and resources available to each medium, considering differences and similarities, as well as authenticity, validity and artistic merit.

Note/s: The language of instruction is Spanish.

SPAN3900
Special Topic in Hispanic Studies (Advanced)
Department of Spanish and Latin American
UOC6  HPW3

Prerequisite/s: 36 units of credit including 12 units of Spanish at credit level

This course is tailor-made to individual student requirements in consultation with staff members in the Department. Students will undertake an extensive reading of primary and secondary sources on selected areas in Spanish and Latin American Studies. They will be required to produce bibliographies and a number of essays or papers displaying a developed understanding of the materials involved in their chosen topics.

SPAN4000
Spanish and Latin American Studies Honours Full-Time
Department of Spanish and Latin American
Enrolment requires school approval
UOC24

Prerequisite/s: 54 units of credit in SPAN at an average of 65% and permission from Head of Department

Language and Literature: 2 seminars and a thesis. History: 2 seminars and a thesis.

SPAN4050
Spanish and Latin American Studies Honours Part-Time
Department of Spanish and Latin American
Enrolment requires school approval
UOC12

Prerequisite/s: 54 units of credit in SPAN at an average of 65% and permission from Head of Department

Language and Literature: 2 seminars and a thesis. History: 2 seminars and a thesis.
This course examines the marketing context of tourism and hospitality. Major topics include: marketing of public and private sector tourism products and destinations; global dimensions of tourism; strategic destination marketing; consumer decision processes; strategic marketing systems of multinational tourism companies. The course includes seminars with industry executives and field trips.

**TAHM2888**

**Applied Tourism & Hospitality Management 1**

School of Marketing

UOC6

Prerequisite/s: TAHM1777

This course complements the theory and operational training gained in stage 1 with a period of at least 250 hours of industry employment in the summer vacation at the end of that year.

**TAHM3001**

**Tourism: Legal Aspects & Risk Management**

School of Marketing

UOC6  HPW3

Prerequisite/s: TAHM2002

This course examines the legal foundations of commerce in the tourism and hospitality industry and the components of risk management in tourism at both the macro and micro levels. Law-related topics include: national and international laws relating to tourism; legal environment of facilities, agents and operators; interaction of community and developer needs; and consumer rights. Risk management topics range from the protection of the health and physical, psychological and economic integrity of travellers, host communities, and the destination more broadly (including the natural and cultural environment), as well as the safeguarding of the security interests of tourism entrepreneurs and the countries sending and receiving visitors. Risk is considered at both the macro level (destinations) and the micro level (enterprises), and potentially at the visitor level. Models will also be developed to identify the approaches that can be adopted in various scenarios to recover from crises.

**TAHM3002**

**Tourism and Hospitality Operations Management**

School of Marketing

UOC6  HPW3

Prerequisite/s: TAHM2002

This course examines the competitive operational methods that Tourism and Hospitality businesses use to achieve their strategic goals. Topics include: environmental scanning; identifying forces driving change; choosing competitive methods; portfolios of products and services; competitive advantage; core competencies as competitive methods; managing service quality; globalisation, multinationals and corporate strategies.

**TAHM3003**

**Tourism Policy and Planning 2**

School of Marketing

UOC6  HPW3

Prerequisite/s: TAHM3002

This course analyses the institutional, financial, regulatory, legal and industrial environment of tourism and hospitality, and the strategic relationships between investors, developers, operators and regulators within it. Resulting policy and investment planning issues are analysed and evaluated.

**TAHM3004**

**Managing People in the Tourism and Hospitality Industry**

School of Marketing

UOC6  HPW3

Prerequisite/s: TAHM3002

This course examines the management of employees in hospitality and tourism operations. It uses human resources, organisational development and services marketing frameworks to understand contemporary and future employment in these sectors. Topics include: recruiting and selection; training and development; leadership; teamwork; stress management and managing turnover; corporate culture and climate; performance evaluation and career pathing.
**TAHM3888**  
Applied Tourism and Hospitality Management  
School of Marketing  
UOC6  
Prerequisite/s: TAHM2888

This course complements the theory and operational training gained in stage 2 with a period of at least 250 hours of industry employment in the summer vacation at the conclusion of that stage.

**TAHM4001**  
Customer Experience Management  
School of Marketing  
UOC6 HPW3  
Prerequisite/s: TAHM3004

This course uses a services marketing approach to examine the management of customer experience. These experiences are experiential and physical. The experiential elements include a focus on the principles of hospitality as a specific strategy in the process of service provision. The physical elements of the service environment are explored through the planning and management of the facilities that comprise the servicescape. Typically, topics include: defining service and the customer experience, hospitality as a theoretical framework, measuring service quality, measuring experiences and satisfaction, planning and designing the servicescape, the branded service environment, service delivery, the role of personnel and customers, service recovery, managing supply and demand, service product pricing.

**TAHM4002**  
Project Report in Tourism and Hospitality  
School of Marketing  
UOC6 HPW3  
Prerequisite/s: TAHM3004

This course builds on the theoretical principles of marketing research in an original, investigative project in tourism and hospitality policy or management.

**TAHM4003**  
Strategic Management in Tourism and Hospitality  
School of Marketing  
UOC6 HPW3  
Prerequisite/s: TAHM4001

This course examines the practical application of tourism and hospitality policy and planning to the operation of major tourist and hospitality segments and key organisations within those segments. The course involves experiential learning with industry executives in workshops and seminars, debating current issues.

**TAHM4388**  
Applied Tourism and Hospitality Management  
School of Marketing  
UOC6  
Prerequisite/s: TAHM3888

This course complements the theory and operational training gained in stage 3 with a period of at least 250 hours of industry employment in the summer vacation.

**TELE1010**  
Introduction to Telecommunications  
School of Electrical Eng and Telecommunications  
UOC3 HPW3

The lecture program for this course has three themes. The first lectures provide an introduction to the practice of telecommunications engineering. Key skills and knowledge in safety, technical communication and information gathering are discussed. Also covered are issues of what engineers do, the wider context in which engineers operate and their obligations to society. Several lectures also explore the key engineering theme of engineering systems. Many of the latter course lectures will be given by guest speakers from industry, and will introduce you to the world of telecommunications engineering. Your ability to learn from and summarise the visitors’ lectures will be included in the material assessed in the examination. A number of lectures will also be given by different lecturers from the School of Electrical Engineering and Telecommunications covering basic communications theory, computing, data networks, the Internet, electronics and communications systems.

**TELE3013**  
Telecommunication Systems  
School of Electrical Eng and Telecommunications  
UOC6 HPW4  
Prerequisite/s: ELEC2032.

To present a general introduction to telecommunications aspects such as signal acquisition, transmission and processing in communication systems. This course is intended for telecommunication engineering students as a necessary background, and also for electrical or computer engineering students not specialising in telecommunications as a general knowledge. Characteristics of typical communication channels. Typical signals (speech, audio, video, data) and their characteristics. Basic analogue and digital techniques. Key techniques in handling transmission system issues (modulation, coding, multiplexing). System performance and evaluation (channel noise, intersymbol interference, bit error rate). Major communication systems including telephony, radio, TV, satellite, mobile phone, optical fibre, radar and networks.

**TELE3015**  
High Frequency Electromagnetics  
School of Electrical Eng and Telecommunications  
UOC3 HPW3  
Prerequisite/s: PHYS2939 or PHYS2949.

**TELE3018**  
Data Networks  
School of Electrical Eng and Telecommunications  
UOC6 HPW4  
Prerequisite/s: COMP1021 and ELEC1041.

**TELE4313**  
Optical Communications  
School of Electrical Eng and Telecommunications  
UOC6 HPW4  
Prerequisite/s: TELE3013;  
Excluded: ELEC9350 and ELEC8350

**TELE4314**  
Optical Communication Systems  
School of Electrical Eng and Telecommunications  
UOC6 HPW4  
Prerequisite/s: TELE4313  
Excluded: ELEC9355 / ELEC8355

Digital and analogue optical communication systems; fibre connections and losses; fibre-device coupling; WDM systems; optical modulation; optical components; optical networks.
TELE4323
Digital Modulation and Coding
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3013; Excluded: TELE9343

TELE4333
Wireless Data Communication Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3013; Excluded: TELE9343

Introduction to wireless communication systems. Basic principles of wireless communication. Mobile communication systems. Satellite communication systems. Introduction to cellular radio systems. Mobile satellite communication systems. Spread spectrum techniques. GPS.

TELE4343
Source Coding and Compression
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3013 and ELEC3004

TELE4352
Data Networks 2
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3018; Excluded: TELE9302

TELE4353
Mobile and Satellite Communication Systems
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3013; Excluded: TELE9344.

TELE4354
Network Management
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3018; Excluded: TELE9303

This course will introduce students to methods, techniques and tools for the management of telecommunication systems and networks with specific examples from Internet and the public switched telecommunication networks. It will introduce the fundamental concepts of SNMP. Then it will examine QoS management mechanisms and mobility management in IP networks. Finally it examine the concepts of content distribution networks.

TELE4363
Telecommunications Systems 2
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: TELE3013; Excluded: TELE9301

This course provides a fundamental coverage of important telecommunication systems, their basic components, as well as legal and commercial aspects affecting the design and operation of these systems. This subject is intended for students who wish to major in telecommunications or to strengthen their knowledge of modern telecommunication systems. Basic principles of guided and unguided wave propagation. Transmission aspects of voice telephony, digital networks, radio, television and Internet.

TELE4910
Thesis Part A
School of Electrical Eng and Telecommunications
UOC6 HPW4
Prerequisite/s: 132 units of credit and weighted average mark of 65 & ELEC3017.

The thesis (Parts A&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for TELE4910. Thesis Part A involves a detailed literature search and reviews of the background for the thesis topic and planning the activities that will required for Part B.

TELE4911
Thesis Part B
School of Electrical Eng and Telecommunications
UOC9 HPW10
Prerequisite/s: TELE4910.

The thesis (Parts A&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for TELE4910. Thesis Part B typically involves the detailed theoretical development or modelling work. A written thesis report must be submitted on the thesis topic by Tuesday of Week 14 of the session in which TELE4911 is taken.
The group thesis (Parts A&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for TELE4914.

Group Thesis Part B

Thesis workshops.

TELE4915

Group Thesis Part B
School of Electrical Eng and Telecommunications
UOC9 HPW10
Prerequisite/s: TELE4914

The group thesis (Parts A&B) is carried out in the last two sessions of the BE degree course. Under the guidance of a supervisor, directed laboratory and research work on an approved topic is carried out. Generally, the thesis involves the design and construction of experimental apparatus, software simulations or models with laboratory tests. Each student is required to present a seminar as part of the requirements for TELE4914. Thesis Part B typically involves the detailed theoretical development or modelling work. A written thesis report must be submitted on the thesis topic by Tuesday of Week 14 of the session in which TELE4913 is taken.

THFI1002
Reading Performance
School of Theatre, Film and Dance
UOC6 HPW3.5
Excluded: THFI1000, THFI1001

Examines a range of performance practices in theatre, film, video and dance, to providing an introduction to different ways of theorising and analysing performance and performing bodies.

THFI2010
Comedy and Power
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in credit in Arts and Social Sciences.

Studies stand-up, group and sketch-based comedy in live performance and on television since the 1950s, incorporating selected examples from Australia, New Zealand, USA, Canada and the UK.

THFI2011
Theatres of Cruelty: Performance and Transgression
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in credit in Arts and Social Sciences.

Madness, violence, perversion, passion, eroticism, addiction - this course looks at the interaction between theatre, society and subjectivity at their limits. Examines extreme representations and excluded behaviours in twentieth century theatre and contemporary culture, with a particular focus on the legacy of Surrealism.

Note/s: Students are advised that some of the material studied in this course may shock or offend.

THFI4000
Theatre Film and Dance Honours (Research) Full-time
School of Theatre, Film and Dance
Enrolment requires school approval
UOC24
Prerequisite/s: 54 units of credit in FILM/PFST/THFI/THST courses at 70% including THFI3902, THFI3903 and either THFI3900 or THFI3901 and permission of Head of School.

Students are required (a) to undertake either an original piece of research extending throughout the year and submit a thesis based upon it or a practical project and report, and (b) to complete two seminars, one of which is compulsory, the other chosen from two alternatives (see School Honours Handbook for further details). The choice of seminars enables students to pursue a specialisation in theatre, or in film, or in dance or in theatre/film, theatre/dance or film/dance. In addition to seminar and practical project/thesis work, students are required to attend and contribute to regular thesis workshops.

THFI4050
Theatre Film & Dance Honours (Research) Part-time
School of Theatre, Film and Dance
Enrolment requires school approval
UOC12
Prerequisite/s: 54 units of credit in FILM/PFST/THFI/THST courses at 70% including THFI3902, THFI3903 and either THFI3900 or THFI3901 and permission of Head of School.

Students are required (a) to undertake either an original piece of research extending throughout the year and submit a thesis based upon it or a practical project and report, and (b) to complete two seminars, one of which is compulsory, the other chosen from two alternatives (see School Honours Handbook for further details). The choice of seminars enables students to pursue a specialisation in theatre, or in film, or in dance or in theatre/film, theatre/dance or film/dance. In addition to seminar and practical project/thesis work, students are required to attend and contribute to regular thesis workshops.

THFI4500
Combined Theatre and Film Studies Honours (Research) Full-Time
School of Theatre, Film and Dance
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit in DANC/FILM/PFST/THFI/THST courses at 70% including THFI3902 and THFI3903 and permission from Head of School.

Students who have qualified to read for a degree at Honours level in another school/department may, with the permission of both units, seek to read for a Combined Honours degree. The program, designed by the relevant units in consultation with the student, is usually arranged around a jointly supervised and jointly examined thesis, with required seminar work being divided equally between the units. In addition to seminar and thesis work students are required to attend and contribute to regular thesis workshops.

THFI4550
Combined Theatre and Film Studies Honours (Research) Part-time
School of Theatre, Film and Dance
Enrolment requires school approval
UOC6
Prerequisite/s: 48 units of credit in DANC/FILM/PFST/THFI/THST courses at 70% including THFI3902 and THFI3903 and permission from Head of School.

Students who have qualified to read for a degree at Honours level in another school/department may, with the permission of both units, seek to read for a Combined Honours degree. The program, designed by the relevant units in consultation with the student, is usually arranged around a jointly supervised and jointly examined thesis, with required seminar work being divided equally between the units. In addition to seminar and thesis work students are required to attend and contribute to regular thesis workshops.

THST1101
Introduction to Theatre and Performance Studies
School of Theatre, Film and Dance
UOC6 HPW3
Excluded: THFI1000, THFI1001

Introduces the basic principles of and analytic vocabulary for the study of theatrical performance.

THST2135
Production Exercise
School of Theatre, Film and Dance
UOC6
Prerequisite/s: DANC1102 or FILM1101 or PFST1103 or THFI1002 or THST1101

Practical work on a theatrical presentation within the School aimed at providing direct experience of the production process and its evaluation.
Note/s: Before enrolling in this course students must study the detailed course outline available from the Io Myers Studio and complete a Production Selection Form. Students should note that rehearsals will commence four weeks before the beginning of Session, and they must be available in the evenings for technical rehearsals in Week 1 of Session and for the performances in Week 2.

THST2137
Workshop Exercise
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1002 or FILM1101 or PFST1103 or THFI1002 or THST1101

Practical work on a small-scale theatrical presentation within the School. This is timetabled on a weekly basis with more intensive rehearsal close to presentation.

THST2143
Modern Theories of Acting
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1002 or DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in Arts and Social Sciences

Explores some of the major innovations in the theory and practice of acting in the twentieth century.

THST2145
Writing for Performance
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1002 or DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in Arts and Social Sciences

An introduction to writing for a performance space, with special focus on the writer and her/his material. Practical exercises and discussion which develop some strategies for approaching writing for live performance.

THST2164
Australian Playwriting
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in Arts and Social Sciences

Excluded: AUST2006

A special study of the work of two or three contemporary Australian stage writers, taking into account critical and (auto)biographical material and specific productions of key plays.

THST2166
Building a Repertoire for Contemporary Theatre
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in Arts and Social Sciences

Excluded: HIST2102, GLST1200

Introduction to the practical skills and theoretical knowledge required in the selection of plays for performance in the contemporary theatre. Involves an extended project in which students will read widely in the classical and modern repertoire and choose a season for a hypothetical contemporary theatre company.

THST2202
Critical Perspectives on Theatre and Performance
School of Theatre, Film and Dance
UOC6 HPW3
Prerequisite/s: DANC1103 or FILM1101 or PFST1103 or THFI1002 or THST1101 or 48 units of credit in Arts and Social Sciences

Investigates the current state of the field of theatre and performance studies both in terms of the diverse range of critical approaches to it and in terms of the latest developments in repertoire. Critical methods surveyed include historiographical approaches (new historicism and cultural histories), theoretical developments such as postmodernism and post-structuralism, ritual and ethnographic studies. These approaches will be analysed in terms of a range of forms from melodrama to the rise of the modern theatre movement.

WOMS1001
Introduction to Feminism
School of English
UOC6 HPW3

Introduces students to some key areas of feminist thought and to questions of sex and gender. There will be a focus on questions of representation and on differences and conflicts within feminism.

WOMS1003
Women, Gender and World History
School of History
UOC6 HPW3

Excluded: HIST2102, GLST1200

Looks at world change from ancient times, with reference to premodern women, male-female relations, sexuality and social constructions of gender. Emphasis will be placed upon patterns of change from prehistory through to modernity but with the recognition that even ‘revolutionary’ change has not necessarily involved progress for women. Topics include: androcentric periodizations of history; debates about early ‘matriarchies’; patriarchal controls placed upon women, their sexuality and fertility; different social constructs of feminine and masculine roles and identity; and the importance of culture and class in determining social roles, male-female relations and differences between women.

WOMS2003
A History of Sexualities
School of History
UOC6 HPW3

Excluded: HIST2760

Begins with Classical Greece and establishes some important themes concerning gender, sex and culture which will be traced through the intervention of colonisation, Christianity, and the development of social sciences from the 18th century; traces the relationship between sexuality and socio-political control in the 19th and 20th centuries; investigates the shaping of sexualities through art, literature, cinema and media as well as pornography; and looks beyond the infamy of Lesbos, Mary Magdalen, the Marquis de Sade, Oscar Wilde, Margaret Mead, and Monica Lewinsky, amongst others, to uncover a rich history.

WOMS2005
Society and Desire
School of Sociology and Anthropology
UOC6 HPW3

Excluded: SOCA2205, SOCC2201

Introduces students to some key areas of feminist thought and to questions of sex and gender. There will be a focus on questions of representation and on differences and conflicts within feminism. Will draw on several continental thinkers.

WOMS2006
Sexuality and Power: The Social Relations of Sex and the Sexes
School of Politics and International Relations
UOC6 HPW3

Excluded: POLS2041, POLS3049

Introduces some of the main theories of power and of sexuality; analyses different sexualities, and issues relating to sexuality, in the context of theories of power. Topics include compulsory heterosexuality; the construction of masculinity, femininity and desire; marriage and prostitution; sexuality and work; body politics; and pornography and popular culture.
WOMS3006
Crime, Gender and Sexuality
Faculty of Arts and Social Sciences
UOC6 HPW3
Prerequisite/s: 36 units of credit;
Excluded: SOCA3409, WOMS2007, GENT1207

Examines social implications of: the role of law in defining the limits of gender and sexuality, regulating gender and sexual relationships, and in reinforcing particular gender and sex based interests; the intersection of criminality and sexuality (specific examples may include pornography, rape, discrimination, AIDS transmission, moral danger, prostitution, abortion, underage pregnancy). Notions of public interest, privacy and consent in matters of gender and sex. The interaction of gender and sexuality with other stratification factors such as age, class, disability, ethnicity and race in the social construction of crime.

WOMS4500
Combined Women's and Gender Studies Honours (Research) Full-time
School of English
Enrolment requires school approval
UOC12
Prerequisite/s: 48 units of credit, including 6 Level 1 in WOMS at Credit level and permission from the Coordinator.
Students are required to complete coursework nominated by the Coordinator. The Women's and Gender Studies component consists of a 2 HPW seminar or reading program for one session. In addition, a thesis on an approved interdisciplinary topic, with joint supervision, must be submitted.
