Introduction

The Undergraduate and Postgraduate Handbooks are designed as a detailed source of information for prospective and current students who are seeking information about studying at the University of New South Wales.

The Handbooks contain extensive information about all the programs (degrees) and plans (disciplinary streams) offered at UNSW. Program and plan outlines are presented by faculty and students should refer to the relevant faculty section for program and plan requirements and related information.

The Undergraduate and Postgraduate Handbooks also provide information on some of the most important administrative rules and procedures at UNSW.

It is important that students read the ‘General University Rules & Student Information’ section in the Handbook, which details these rules and procedures, prior to the information contained within faculty sections. This section also contains the ‘Schedule of Undergraduate Programs 2006’ or ‘Schedule of Postgraduate Programs 2006’, which lists all programs offered by UNSW, and the University’s ‘Tuition Fee Schedule’.

Additional copies of the Undergraduate and Postgraduate Handbooks are available for sale at the UNSW Bookshop: (+61 2) 9385 6622 or www.bookshop.unsw.edu.au/handbooks.html

Further Information

While the University has attempted to make this information as accurate as possible at the time of going to print, students should note that information is also available online at:

www.handbook.unsw.edu.au

It is recommended that students consult the Online Handbook for the latest information regarding approved programs and plans.

The Online Handbook also contains up-to-date information about which courses (subjects) are available at UNSW. This includes course descriptions and timetabling information.

How to Read the Handbook – Navigation Guide

Step 1
Read Handbook Introduction or Faculty Overviews

View further information online: https://my.unsw.edu.au

Step 2
Read about Programs of interest

View further information on Online Handbook: www.handbook.unsw.edu.au

Step 3
Read about Plans of interest related to the Program

View further information on Online Handbook: www.handbook.unsw.edu.au

Step 4
Read about Courses of interest related to the Program or Plan

View further information on Online Handbook: www.handbook.unsw.edu.au

Step 5
Read further information online: www.handbook.unsw.edu.au or https://my.unsw.edu.au or www.timetable.unsw.edu.au or Faculty websites

Key to Abbreviations Used in this Book:

If you are uncertain of any terminology relating to studying at UNSW, please refer to the Glossary at the end of this publication.

- CS Commonwealth Supported places available in this program
- L Local fee places available in this program
- I programs available for International fee paying students
- CCH class contact hours
- f full-time
- HPW hours per week
- L lecture
- UOC units of credit
- P/T part-time
- S1 Session 1
- S2 Session 2
- T tutorial/laboratory
- WKS weeks of duration
- X external
- X1 Summer Session
- X2 Winter Session

While the Undergraduate and Postgraduate Handbooks have been designed as a detailed source of information regarding University rules and procedures, the Handbooks should be used in conjunction with other University publications containing rules and procedures, especially the UNSW Student Guide and online information available at: http://my.unsw.edu.au

International students should contact the International Office for a copy of the international students’ prospectus: (+61 2) 9385 6996 or www.international.unsw.edu.au

Students interested in studying at the Australian Defence Force Academy (UNSW@ADFA) should obtain a copy of the ADFA Handbook: (+61 2) 6268 6000 or www.unsw.adfa.edu.au/student/handbook/index.html

Further Information

While the University has attempted to make this information as accurate as possible at the time of going to print, students should note that information is also available online at:

www.handbook.unsw.edu.au

It is recommended that students consult the Online Handbook for the latest information regarding approved programs and plans.

The Online Handbook also contains up-to-date information about which courses (subjects) are available at UNSW. This includes course descriptions and timetabling information.

## Important Dates in 2006

### January
- **W** 4 UNSW Info Day

### February
- **M** 27 Session 1 commences (faculties other than Medicine, AGSM and University College, ADFA)

### March
- **F** 3 UNSW Payment Due Date for all Session 1 fees
- **F** 10 Last day to enrol in Session 1 courses
- **F** 31 Census Date for Session 1
  - Last day for students to discontinue without financial penalty from Session 1 courses
  - Last day for students to finalise arrangements for HECS-HELP and FEE-HELP.

### April
- **F** 14 Commencement mid-session recess
- **M** 17 Commencement AVCC Common Vacation week
- **F** 28 Last day for students to discontinue without academic penalty from Session 1 courses

### May
- **I** 9 Publication of the provisional timetable for the June examinations
- **W** 17 Last day for students to advise of examination clashes
- **I** 30 Publication of the Final Timetable for the June examinations

### June
- **F** 16 Examinations begin for faculties other than Medicine, AGSM and University College, ADFA

### July
- **M** 3 Commencement AVCC Common Vacation week
- **I** 4 Examinations end for faculties other than Medicine, AGSM and University College, ADFA
- **W** 5 Commencement mid-year recess
- **M** 24 Session 2 commences (faculties other than Medicine, AGSM and University College, ADFA)
- **F** 28 UNSW Payment Due Date for all Session 2 fees

### August
- **F** 4 Last day to enrol in Session 2 courses
- **Th** 31 Census Date for Session 2
  - Last day for students to discontinue without financial penalty from Session 2 courses
  - Last day for students to finalise arrangements for HECS-HELP and FEE-HELP

### September
- **S** 2 UNSW Courses and Careers Day
- **F** 15 Last day for students to discontinue without academic penalty from Session 2 courses
- **S** 23 Commencement mid-session recess
- **M** 25 Commencement AVCC Common Vacation week

### October
- **T** 3 Publication of the provisional timetable for the November examinations
- **W** 11 UNSW Postgraduate Expo
- **W** 11 Last day for students to advise of examination clashes
- **T** 24 Publication of the Final Timetable for the November examinations

### November
- **F** 10 Examinations begin for faculties other than Medicine, AGSM and University College, ADFA
- **T** 28 Examinations end for faculties other than Medicine, AGSM and University College, ADFA
### Schedule of UNSW Undergraduate Programs 2006

The range of programs offered by the University is indicated in the tables below, listed by faculty. For details of the programs, please consult the relevant faculty section of this Handbook.

Please refer, in addition, to the ‘2006 Tuition Fee Schedule’ which follows the ‘Schedule of UNSW Undergraduate Programs 2006’.

*This information is current as at 31 August 2005 and is subject to change.*

## 2006 Tuition Fee Schedule

### Identification of Courses and Course Fees 2006

A course is defined by the Academic Board as ‘a unit of instruction approved by the University as being a discrete part of the requirements for a program offered by the University’.

Each approved course of the University is identified by a sequence of eight characters, consisting of a four character alphabetical prefix which identifies the subject area, and a four digit numeric suffix which identifies the course. Each course has a unit of credit value defined.

Course identifiers are approved by the Registrar and the system of allocation is based on the following guidelines:

1. A four character alphabetical prefix is used to indicate the subject areas. This usually correlates with the authority offering the course (normally a School of the University), but in some cases identifies subject specialisations or cross-disciplinary subject areas.
2. Each course identifier is unique and is not used for more than one course title.

Courses taught are listed in full in the Undergraduate and Postgraduate Handbooks and in the Online Handbook. The subject areas and organisational units for each identifying alphabetical prefix are also described in the Handbooks and the specialisation pages in the Online Handbook.

### Course Prefixes and Associated Fees Per Unit of Credit

A standard session academic load is 24 units of credit (48 UOC per annum).

Fees for courses are charged by unit of credit according to the classification of the course (that is undergraduate, postgraduate, research) and then the classification of the student.

To calculate the charge for a course - refer to the course prefix, appropriate course classification and student classification to determine the fee per unit of credit.

Non-award courses will also be charged according to the classification of the course as above.

**For Example:** An International student is enrolling in a Faculty of Commerce and Economics course, ACCT3563, which has a value of 6 units of credit and the course is classified as undergraduate.

The fee for this course will be 6 x $400 = $2400.00

The fees listed are applicable to students who commenced study from Summer Session 2003 onwards.

Admission Requirements and Procedures

Admission Enquiries
The Student Recruitment Office (Kensington Campus) is the initial referral point for local students for information on undergraduate programs, and admission requirements. The office is located in RM LG20, The Chancellery Building and is open from 9am-5pm, Monday to Friday. Tel: (+61 2) 9385 1844/1886/2413 email: studentrecruitment@unsw.edu.au

Program and course information for prospective students can be found at www.unsw.edu.au/futureStudents

UNSW International is the initial referral point for international students for information on undergraduate and postgraduate programs. The office is located on the Ground Floor, East Wing of the Red Centre Building. Tel: (+61 2) 9385 6996, email: internationaloffice@unsw.edu.au

Program information for prospective international students can also be found at www.international.unsw.edu.au

College of Fine Arts: The Student Centre is located on the ground floor of 8 Block. It is open from 8.30am to 5.30pm Monday-Friday.

UNSW@ADFA - University College, Australian Defence Force Academy: The Student Centre is located on the top floor in the Administration Building. It is open from 8.30am to 5pm Monday – Thursday and 8.30am – 4pm Friday. Tel: (+61 2) 6268 6000.

Admission Procedures
The procedures for applying to UNSW will vary, depending on whether you are a local or international applicant:

- **Local** applicants are Australian citizens, Australian permanent residents or New Zealand citizens.
- **International** applicants are citizens of a country other than Australia or New Zealand and are not Australian permanent residents.

Local Applicants
All local applicants must apply through the Universities Admissions Centre (UAC). Students who are enrolled in Year 12 in NSW/ACT in 2006 will be issued with a copy of the UAC Guide by their school or TAFE. Other local applicants can purchase the Guide from newsagents in August or apply online at www.uac.edu.au.

The UAC Guide outlines admission/application requirements and procedures for all UNSW undergraduate programs (including ADFA) and includes important information regarding determinant, special consideration for applicants who have experienced long term educational disadvantage (the ACCESS Scheme for students who have not undertaken tertiary study before and SCATS for applicants with a tertiary record) and key dates.

International Applicants
If you are an international applicant currently completing Year 12 in Australia you must apply through the Universities Admissions Centre (UAC). You will be issued with a UAC Guide by your school or TAFE and should read Part 3 of the Guide thoroughly.

All other international applicants (i.e. international applicants who have completed or are completing qualifications OTHER than the current Australian Year 12 or are completing an Australian Year 12 outside Australia) must apply for admission directly to UNSW. Before you lodge your application, please refer to UNSW International’s website at www.international.unsw.edu.au for further information and entry requirements, or telephone (+61 2) 9385 6996.

Online applications can be lodged at https://apply.unsw.edu.au

Entry Requirements
Admission to UNSW is based on academic merit. If you are seeking admission to an undergraduate program you must be able to provide evidence that you have the potential for tertiary study. Age alone is not a sufficient criterion for admission. Some programs may consider work experience where this is relevant to the application, but this factor alone is not a basis for admission.

Some programs may require additional entry criteria, such as an admissions test, interview and/or audition.

Though there are no specific prerequisite requirements for entry to UNSW undergraduate degrees it will be assumed candidates have studied certain subject areas in their last year of high school or other studies. (See ‘Assumed Knowledge’ below).

It is also assumed that students are competent at communicating in both written and spoken English. (See ‘English Language Requirements’).

The following are considered for admission:

**Australian and New Zealand High School Qualifications:**

- Universities Admission Index (UAI)
- Equivalent National Tertiary Entrance Rank (ENTER) or other interstate Year 12 qualification rank
- Overall Position (OP) and New Zealand National Certificate of Educational Achievement (NCEA level 3)

**Other Australian and New Zealand Qualifications:**

**TAFE Qualifications and qualifications from private colleges** - If you hold completed TAFE qualifications including an advanced diploma, diploma, associate diploma or AQF Certificate Level IV or above, you are eligible to be considered for admission. However, due to the high demand for places in most programs, successful applicants generally require a Credit or above average with no failures. Trade certificates are not acceptable for admission purposes.

Currently, UNSW has formal articulation arrangements for students holding a Diploma of Building Studies who wish to study the Bachelor of Building Construction Management (program 3331), and may award approximately 18 months advanced standing, depending upon course selection. Similarly, holders of a 2-year Diploma of Community Services (Welfare) may be granted up to 25% of a 4-year Social Work degree (programs 4031, 4035, 4036).

In the past, students holding other TAFE diplomas have been admitted to degree programs such as Bachelor of Arts, Bachelor of Fine Arts and various Engineering programs. All applicants are considered on a case-by-case basis.

**Nursing Qualifications** - If you are a registered nurse who has completed hospital-based training you are eligible to be considered for admission to some programs. In general, it would be an advantage to have completed at least one post-basic course. Completion of Enrolled Nurse training is not acceptable for admission purposes.

**International Qualifications:**

Local Students (Australian Citizens, Permanent Residents and New Zealand Citizens) who hold qualifications from overseas should contact Admissions. Tel: (+61 2) 9385 3228, email: ugradmis@unsw.edu.au.

International students should check the following website for entry requirements from their country:

www.international.unsw.edu.au/future/entry

Honours Entry:
Current UNSW students should apply to their Faculty or School Office. Other local students should refer to the following website: www.unsw.edu.au/honours. Other international students should refer to www.international.unsw.edu.au

**Alternative Entry**
If you do not possess any of the qualifications outlined in ‘Entry Requirements’, there are a number of alternative avenues through which you may seek admission to an undergraduate program at UNSW.

- **Degree Level Studies** - If you have successfully completed the equivalent of at least two whole-year degree level courses at any recognised Australian tertiary institution on a non-award basis, or four one-unit Open Learning degree level courses, you are eligible to be considered for admission. However, due to the high demand for places in most programs, successful applicants generally hold Credit average results and, in the case of Open Learning at least eight one-unit courses, with credit average results. Please note: If you have attempted any post-secondary studies you will be considered for selection on the basis of your overall record, i.e. both secondary and post-secondary studies. In general, greater weight will be given to your post-secondary record.
Assumed Knowledge

www.unsw.edu.au/assumedknowledge

For some degree programs and first-year courses, it is assumed that through secondary studies or other equivalent studies a student will have achieved a level of knowledge of the subject area that is considered desirable for successful university level study.

Students who do not have the recommended level of assumed knowledge are not prevented from enrolling but they may be placed at a considerable disadvantage. Any students who have not achieved the recommended level of assumed knowledge are strongly advised to undertake a bridging program or other appropriate preparation. (See ‘Bridging Programs’).

When a student enrols in a program at UNSW, it is assumed that they are competent at communicating in both written and spoken English. Many courses require students to make oral presentations, prepare assignments or write essays. Without a high level of written and spoken English, it would be difficult to meet the requirements for successful performance at Band 4 has been achieved. General Mathematics does not meet the recommended level of assumed knowledge.

Prerequisite (P) Assumed knowledge (A), Recommended studies (R)

Aviation (Flying)                  (P) Flight screening and medical examination and interview
   (A) Mathematics                 (R) Physics
Aviation (Management)             (A) Mathematics
   (R) Physics
Advanced Science                 (A) Mathematics and Chemistry, plus one or more of: Biology, Earth and Environmental Science, Physics, HSC Mathematics Extension 1
   (depending on chosen area of study)
   (R) For Science Communications: English Advanced
Art Education                    (A) Visual Arts
Biotechnology                     (A) Mathematics and Chemistry
   (R) Biology
Business Information Technology  (A) Mathematics
Commerce & Commerce/Law           (A) Mathematics
Commerce (Marketing, Tourisn and Hospitality Management)  (P) Questionnaire and interview
   (A) Mathematics
Computer Science & Computer Science/Law (A) HSC Mathematics Extension 1
   (R) Software Design and Development or Information Processes and Technology
Design                           (A) Visual Arts
Economics & Economics/Law        (A) Mathematics
Education (Dance/Education)      (P) Audition and interview
Education (Music/Education)      (P) Audition and interview
   (R) Music 2 or AMEB (7th grade Practical and 6th grade theory or Musicanship) or equivalent study.
Education (Science/Education)    (A) Mathematics (prospective science teachers must have Physics or Chemistry)
   (R) HSC Mathematics Extension 1
Engineering & Engineering/Law    (A) Mathematics and Chemistry
   (R) Earth and Environmental Science or Physics or Biology
Environmental Science            (A) Mathematics and Chemistry
Fine Arts                        (A) Visual Arts
Health and Sports Science        (A) Mathematics and Chemistry
   (R) Biology and/or Physics
Industrial Design                (A) Mathematics
   (R) Physics or Engineering Studies
Information Systems              (A) Mathematics
   (R) Physics or Chemistry
Medical Science                  (A) Mathematics and Chemistry
   (R) Biology
Medicine                         (P) Undergraduate Medicine and Health Sciences Admission Test
   (UMAT) and interview
   (A) English Standard
   (R) Chemistry
   Note: English as a second language (ESL) and Fundamentals of English are not considered suitable preparation for this program
Music                             (P) Audition and interview
   (R) Music 2, or AMEB (7th Grade Practical and 6th Grade Theory or Musicanship) or equivalent study.
Nanotechnology                    (A) HSC Mathematics Extension 1
   and Physics and Chemistry
Optometry                         (A) Mathematics and Chemistry and English Advanced
   (R) Physics
Psychology                       (A) Mathematics
   (R) Biology or Chemistry and Earth and Environmental Sciences or Physics
Science & Science/Law            (A) Mathematics and Chemistry, plus one or more of: Biology, Earth and Environmental Science, Physics, HSC Mathematics Extension 1
   (depending on chosen area of study)

Assumed Knowledge for Commerce and Economics: Quantitative Methods A (QMA) and Quantitative Methods B (QMB) are compulsory first year courses for students enrolled in Commerce and Economics programs at UNSW. These courses assume students have knowledge of algebra (logarithms, exponentials and graphs), calculus (differentiation and integration) and basic probability concepts. Without a background equivalent to HSC Mathematics, a student would be placed at a considerable disadvantage in QMA and QMB.

Assumed Knowledge for Engineering: All Engineering programs at UNSW assume knowledge of HSC Mathematics Extension 1. Common mathematics courses taken by engineering students in their first year include Mathematics 1A and Mathematics 1B. Students enrolled in these courses whose level of mathematics is below HSC Mathematics Extension 1, will be placed at a considerable disadvantage. In addition to these first year courses, some Engineering programs also require additional study of mathematics in upper level years. Physics is also a compulsory course in many programs. However some programs offer introductory level studies in mathematics and physics to assist those students without a thorough knowledge of both.

Assumed Knowledge for Medicine: The Medicine program at UNSW assumes that students have studied HSC English Standard (or higher), and
have achieved a level of performance of at least Band 4. As is the case in all undergraduate programs at UNSW, Fundamentals of English and English as a Second Language (ESL) are not considered suitable preparation for this program. Medicine students are required to satisfactorily complete a communications course in Year 1 and clinical work from Year 2.

Assumed Knowledge for Science: All Science programs at UNSW assume a level of knowledge equivalent to HSC Mathematics. Some programs require students to continue studying mathematics throughout the program, while others involve the study of mathematics in first year only. In addition, all science degrees recommend studies of at least one HSC science subject and/or HSC Mathematics Extension 1.

Bridging Programs
UNSW bridging courses offer you the opportunity to revise Mathematics, Chemistry and Physics subjects and experience how these subjects are taught at university. Each course has a total of 33-40 hours of lectures, tutorials, laboratory classes and/or demonstration sessions.

All Year 12 (or equivalent) students, older students, and deferring students are eligible. If you intend to study at another university you may still enrol in a UNSW bridging course. However, we advise that you first ensure that the bridging course you select is recognised by that institution.

For further information, please refer to the following website or contact Admissions (tel: 1300 36 8679, email: ugadmis@unsw.edu.au): www.unsw.edu.au/bridging

English Language Requirements
All applicants for admission to UNSW undergraduate or postgraduate programs either in Australia or overseas whose first language is not English, must provide evidence that their English language ability meets the requirements for admission.

The required evidence may take the form of results from an acceptable English Language test undertaken no more than two years prior to the commencement of the program at UNSW.

Only ORIGINAL test certificates are acceptable. The University does not accept certified copies of English language results.

Alternatively, applicants whose first language is not English, but who have undertaken at least one year of full-time study at a university or other post-secondary educational institution where the sole language of instruction was English, will not be required to undertake a language test, if they can provide a statement or certificate issued by the Registrar's office of that institution confirming this. This study must have been undertaken no more than two years prior to the commencement of the program at UNSW.

For further information, please refer to the following website: www.unsw.edu.au/englishproficiency

Non-Award Enrolment
Non-award enrolment refers to all enrolments in courses or a sequence of courses which do not lead to or count towards a formal award (e.g. degree or diploma) of the University of New South Wales.

Non-award enrolments fall into two categories, voluntary and cross-institutional.

- A voluntary course enrolment is where the student enrolls in a course either out of interest, or to develop professional competence in an area of specialisation. Students enrolled for award programs sometimes simultaneously enrol voluntarily in courses additional to their award requirements. Students should note that they are liable to pay Student Activity Fees each session at the published rate.

- A cross-institutional enrolment is where the student enrolls in a course at UNSW for credit towards an award at another Australian tertiary institution in which the student is concurrently enrolled. Before an application for cross-institutional enrolment can be approved, the student must submit both the home institution's written confirmation that the course applied for will be credited towards award requirements and a certified copy of the student's complete academic transcript. Undergraduate cross-institutional enrolments will incur Student Contribution liability for the courses taken at UNSW in addition to the liability at the student's home institution. Students enrolled as local fee paying students at their home institution will also be charged tuition fees at UNSW. International students are permitted to enrol on a cross-institutional basis, and are charged tuition fees for their courses.

Rules and Guidelines
The following principles and rules govern the acceptance and enrolment by the University of non-award students, and of students enrolled in award programs in courses, which are additional to their award requirements:

(1) Non-award enrolment in a course, taken either voluntarily or cross institutionally, may be permitted provided that the student has appropriate educational qualifications and in each case the Head of School offering the course considers that the student will benefit from the enrolment, that accommodation is available, and that the enrolment does not prevent a place in the course being available to a student proceeding to an award.

(2) The University may limit the number of non-award courses in which a student may enrol, regardless of the permission to enrol that the student may have received from Heads of Schools offering the courses. In general, enrolment will not be permitted in more than four half-year courses in any one academic year.

(3) A student who is under exclusion from any course of the University may not enrol in that course as a voluntary enrolment.

(4) A student who is under exclusion from any program at the University may not enrol in any course which forms a compulsory component of the program from which the student is excluded.

(5) A student who is subsequently admitted to an award program at the University for which the courses completed as a non-award student form a part, may apply for credit for those courses.

(6) As a general rule the University does not permit non-award enrolments in first year undergraduate courses. In addition, the University may decline permission to enrol in a course if the student has not completed prerequisites for that course.

Fees
Tuition fees are charged according to the classification of the course. Please refer to the ‘Fee Schedule’ in this Handbook.

Application Procedures
Applications to enrol as a non-award student must be made on the Non-Award Enrolment application form available from UNSW Student Central or on the following website: www.unsw.edu.au/futureStudents/nonAward/sad/fnacrossinsit.html

Permission to enrol as a non-award student is conditional on the permission of the Head of School and authorisation from the Director, UNSW Student Services. Applicants should follow the instructions given to them with the application form.

Admission with Advanced Standing and Credit Transfer
Students may be admitted to undergraduate degrees or award with credit for previous study and/or attainments. All credit granted in undergraduate degrees or awards must comply with the following rules:

(1) Any credit granted must be consistent with the rules governing progression within the program which are operative at the time the application is determined.

(2) Students who transfer from another program shall not, in general, be granted standing which is superior to what they had in the program from which they are transferring.

(3) Students who are admitted to the University after completing, or partly completing, the requirements of another degree or award of another tertiary institution must complete a program of study deemed to be no less than that required of students in full-time attendance in the final year of the program concerned.

(4) Where faculty rules permit, students who have been awarded the degree of Bachelor at Pass level may be permitted to enrol for the award of the degree at Honours level with credit for all courses completed if, during their studies for the Pass degree, they have satisfied the prerequisites for entry to the Honours level laid down by the schools concerned or the equivalent of those prerequisites.

(5) Enrolled students have the right of appeal against credit transfer decisions under the Procedures for Resolution of Student Grievances and Disputes.

Applicants should also note that eligibility for credit in a UNSW program does not guarantee admission to that program.

Student Fees
Please note: The information provided in this Handbook relating to Student Activity Fees is subject to change pending the outcome of proposed changes to Commonwealth legislation. For the latest information, please refer to https://my.unsw.edu.au

Commonwealth Support
Commonwealth Supported Places (Formerly HECS)
A Commonwealth supported place is a higher education place for which the Commonwealth makes a contribution towards the cost of your
education. If you are enrolled in a unit of study as a Commonwealth supported student, you will generally be required to contribute to the cost of your education through a student contribution.

There are three classes of Commonwealth Supported Students:

(1) Post-2005 students commenced a program of study on or after 1 January 2005. These students pay student contributions at rates approved by UNSW within ranges set by the Commonwealth (indexed annually). (See Student Contribution Ranges for information about how rates have been set at UNSW.)

(2) Pre-2005 students commenced a program of study before 1 January 2005. These students pay student contributions at rates set by the Commonwealth (indexed annually). This classification lapses at the end of 2008: from 1 January 2009 students in this category will pay student contributions at the same rates as students commencing after 1 January 2005.

(3) Pre-1997 students commenced a program of study before 1 January 1997. In most respects these students have the same status as pre-2005 students, except that they pay a fixed student contribution set by the Commonwealth (indexed annually).

Student Contributions
Student contributions are paid either up-front or are deferred and paid later through the tax system. The options available for paying your student contribution will depend on your citizenship or residency status.

Student Contribution Ranges
For post-2005 students, higher education providers determine student contribution amounts for each unit of study within ranges set by the Commonwealth. The Commonwealth permits Higher Education Providers to set student contribution rates within a range from $0 to 125% of the Commonwealth’s rate. In June 2004 the UNSW Council approved the University setting its higher education student contribution rates for all courses as follows:

2005: 100% of the indexed indicative Commonwealth rate
2006: 125% of the indexed indicative Commonwealth rate
2007: 125% of the indexed indicative Commonwealth rate

Please refer to the Student Contribution Rate Table for 2006 student contribution rates.

The range that applies to a unit of study is dependent on the student contribution band in which the unit of study is classified. The amount of a student’s contribution will also depend on the weight of the unit within the course of study (the equivalent full-time student load [EFTSSL] value of the unit).

Student Learning Entitlement
From 1 January 2005 all Commonwealth Supported students will commence using their Student Learning Entitlement (SLE). The SLE gives all Australian citizens, New Zealand citizens and holders of a permanent visa access to seven years of equivalent full-time study in a Commonwealth supported place.

Eligibility for Loans and Discounts
Only Australian citizens and holders of a permanent humanitarian visa are eligible for HECS-HELP assistance. The discount for full up-front payments or up-front payments of $500 or more is 20%. New Zealand citizens and holders of non-humanitarian Permanent Resident visas are still entitled to Commonwealth Support, but must pay 100% of their Student Contribution up-front.

If you enrol in a Commonwealth supported place, you must complete a Request for Commonwealth Support and HECS-HELP application on or before the relevant census date. These students are eligible for HECS-HELP assistance, including the new discount rate of 20% for up-front payments of $500 or more.

Failure to complete the appropriate Request for Commonwealth Support and HECS-HELP application will result in the cancellation of your enrolment as a Commonwealth supported student.

Before signing the application, students must read the Information for Commonwealth Supported Students booklet in order to be aware of their obligations as the recipient of assistance from the Commonwealth.

Provision of your Tax File Number (TFN)
You need to supply your TFN if you are eligible for HECS-HELP assistance and you wish to obtain a HECS-HELP loan for all or part of your student contribution; or you are paying your student contribution up-front but, as a safety net, you want to ensure that if you fail to make the payment on or before the census date, that you can still obtain a HECS-HELP loan.

If you have not paid your student contribution in full on or before the census date and you did not provide your TFN, UNSW will be obligated to cancel your enrolment as a Commonwealth supported student.

Students who Commenced Studies before 2005 (Pre-2005 Students)
If you commenced your program of study as a Higher Education Contribution Scheme (HECS) student before 1 January 2005, you may be considered to be a pre-2005 HECS student. However, you will be affected by most of the provisions outlined in the previous section. This is:

• you will become a Commonwealth supported student;
• commence using SLE; and
• if eligible, access HECS-HELP assistance, including the new discount rate of 20% for up-front payments of $500 or more.

Pre-2005 HECS students will also be subject to the current thresholds for the repayment of HECS debt and the new bonus for voluntary repayments.

The only changes that affect students differently as a pre-2005 HECS student are:

• changes to the student contribution amounts; and
• new eligibility criteria for HECS-HELP.

The arrangements that apply are described below. From the end of 2008, however, all students will be subject to the new arrangements, regardless of whether they have completed their program.

Student Contribution Amounts 2006
UNSW has set the following Student Contribution amounts for Commonwealth supported students. In 2006, all ‘post-2005 students’, including those who commenced a program of study on or after 1 January 2005 will pay student contributions at 125% of the indicative Commonwealth rate (see Student Contribution Ranges above and the Student Contribution Rate Table for further information.)

<table>
<thead>
<tr>
<th>Student Contribution Rate Table – 2006</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student Contribution Band</td>
</tr>
<tr>
<td>---------------------------</td>
</tr>
<tr>
<td>Band 1 (humanities, behavioural science, social studies, foreign languages, visual and performing arts)</td>
</tr>
<tr>
<td>Band 2 (accounting, administration, economics, commerce, mathematics, statistics, computing, built environment, health, engineering, science, surveying, agriculture)</td>
</tr>
<tr>
<td>Band 3 (law, dentistry, medicine, veterinary science)</td>
</tr>
<tr>
<td>National Priorities (education, nursing)</td>
</tr>
</tbody>
</table>
For pre-2005 HECS students who began their program before 1 January 1997, the Student Contribution for 2006 is $2,943. The pre-1997 rate is indexed each year.

Calculating Student Contribution Amounts and EFTSL
Equivalent full-time student load (EFTSL) is a measure of the study load, for a year, of a student undertaking a program on a full-time basis. The amount of the student contribution depends on the EFTSL value of the course.

Calculating EFTSL for a course
At UNSW, a normal full-time enrolment for one year is defined as 48 units of credit (24 units per session). A course (unit of study, e.g. MATH1011) has the same unit of credit value and generates the same load (EFTSL) irrespective of the program (e.g. BSc) or the stage in which it is taken. Most courses at UNSW have a value of 6 units of credit (6 UOC).

To calculate the EFTSL of a course, you will need to note its units of credit (UOC) value. The unit of credit value for a course is displayed in this Handbook or in the Online Handbook at www.handbook.unsw.edu.au.

Eligibility for HECS-HELP assistance
HECS-HELP loans are available to eligible students enrolled in Commonwealth supported places. A HECS-HELP loan will cover all or part of the student contribution amount.

Commonwealth supported students who are eligible for HECS-HELP can either:
- pay their student contribution amount up-front and receive a 20% HECS-HELP discount, or
- defer payment, request a HECS-HELP loan and pay later through the tax system.

HECS-HELP assistance is available only to Australian citizens or holders of a permanent humanitarian visa.

HECS-HELP assistance eligibility for New Zealand citizens or holders of a permanent visa (other than a permanent humanitarian visa) who are pre-2005 HECS students will be determined under the old HECS rules until the end of 2008.

FEE-HELP
FEE-HELP is a new loan program that assists eligible fee-paying students to pay their tuition fees at eligible higher education providers. Australian citizens and holders of a permanent humanitarian visa are eligible for FEE-HELP assistance.

Under FEE-HELP, students can borrow up to a maximum of $50,950 (indexed each year) over their lifetime.

Undergraduate FEE-HELP loans are subject to a 20% loan fee.

OS-HELP
OS-HELP is a new loan program that assists eligible undergraduate students who wish to study overseas for one or two study periods. It assists these students with payment of their tuition fees at eligible higher education providers. Australian citizens and holders of a permanent humanitarian visa are eligible for OS-HELP assistance.

Under OS-HELP, students can borrow up to $5,095 per study period for one or two study periods of overseas study.

OS-HELP loans are subject to a 20% loan fee.

Commonwealth Assistance Notice
A Commonwealth Assistance Notice (CAN) is a notice that contains information about a student's enrolment and use of Commonwealth assistance. This notice is published to the web and is available via the My Student Profile tab on myUNSW within 28 days of the census date for each semester.

If you are a Commonwealth supported student, your CAN will include the following information:
- the units of study for which you have received Commonwealth assistance
- your student contribution amounts
- your Student Learning Entitlement (SLE) usage
- the amount of any up-front payments you have made
- your HECS-HELP assistance.

If you have applied for FEE-HELP, your CAN will include the following information:
- tuition fees for your unit(s)
- units of study for which you have received FEE-HELP
- amount of any up-front payments you have made
- loan fee for undergraduate units of study

You are required to check your CAN notice for any discrepancies within 7 days of the issue of the notice, and you have the right to request correction of information contained in this notice until the date as shown in the last paragraph of the notice.

Payment of Fees
Fees are charged and are payable on a semester basis. Tuition fees and Student Activity Fees are payable each semester in advance. Students must access their statements online. Students will be able to view their fee statement and payment options (Statement of Student Debt) online approximately 2-3 weeks before classes commence. Students should refer to the online statement (available at https://my.unsw.edu.au) for payment deadlines and payment options.

Students with An Existing HECS or PELS Debt
HECS or PELS Debts
From 1 January 2006, an accumulated HECS or PELS debt will become known as an accumulated HELP debt. Any HECS-HELP or FEE-HELP debts you incur from 1 January 2005 will be added together with your HECS or PELS debt to become one accumulated HELP debt on 1 June 2006.

Repayment Thresholds
The repayment threshold for compulsory repayment of HELP debts in 2005-06 is $36,185.

Bonus for Voluntary Repayments
From 1 January 2005, if you make a voluntary repayment of $500 or more, you will receive a bonus of 10% of the repayment you make.

Bankruptcy Rules
From 1 January 2005, HELP debts and accumulated HELP debts are not provable under the Bankruptcy Act 1966 and you will have to pay them as if you had not been declared bankrupt. Your HECS or PELS debt will remain provable until it becomes part of your accumulated HELP debt on 1 June 2006. Further information is available from https://my.unsw.edu.au or www.goingtouni.gov.au.

Student Activity Fees
Please note: The information provided in this Handbook relating to Student Activity Fees is subject to change pending the outcome of proposed changes to Commonwealth legislation. For the latest information, please refer to https://my.unsw.edu.au.

Total Activity Fee charged per semester (incl. Miscellaneous Student Activity Fee and GST)
Kensington Students
- full-time students: $257.80
- part-time students: $205.00

COFA Students
- full-time students: $176.40
- part-time students: $125.80

1.1 Student Activity Fees have two components: Semester Subscriptions (to the various student organisations (listed in (a) below) and the Miscellaneous Activity Fee (see (b) below).

a) 2006 Semester Subscriptions:
These are charged and payable each standard semester. Due dates are the same as for student contributions and tuition fees. Subscriptions are adjusted annually by a system of indexation. Please note that, as explained below, GST has been included in these fees.

Kensington Campus:
- University Union per semester subscription: full-time students: $137.50
- part-time students: $103.40
- Sports Association per semester subscription: full-time students: $44.00
- part-time students: $33.00
- Student Guild per semester subscription: full-time students: $36.30
- part-time students: $28.60
- College of Fine Arts:
- College of Fine Arts Students’ Association per semester subscription: full-time students: $136.40
- part-time students: $103.80
- GST (Good and Services Tax)
The Australian Government has determined that a Goods and Services Tax (GST) of 10% applies to all goods and services and anything else consumed in Australia. Certain exceptions include most education courses provided by the University. If you are enrolled in an award program you will not be liable for the GST.
However subscriptions for membership of the Students’ Union, Guild and Sports Association are not part of the academic award program and these fees are therefore subject to GST.

b) 2006 Miscellaneous Activity Fee:
This fee is used to finance expenses generally of a capital nature relating to student activities and includes an allocation for insurance cover for students. Funds are allocated for projects approved by the University Council.
Kensington: $40.00 per session
College of Fine Arts: $40.00 per session

1.2 Exemption from Student Activity Fees
Students often seek exemption from Student Activity Fees for reasons other than those set out below. It is stressed that the fees charged are a contribution by students towards services and amenities for the University community both now and in the future and exemption from them cannot be claimed because a student is unable or unwilling to make use of some of these services or amenities.

(1) Life members of the University Union and the Sports Association are exempt from Subscriptions.

Students who consider themselves eligible for life membership of the University Union or the Sports Association should make enquiries at the offices of those organisations. Once life membership has been approved, contact the Treasury with your life membership details.

(2) Students enrolled in programs classified as external or who are enrolling in programs where for a semester or semesters the formal academic requirements are undertaken at a part of the University away from their campus such as a teaching hospital or field station or at another tertiary institution or elsewhere, are exempt from all Semester Subscriptions but not the Miscellaneous Activity Fee. Students who consider themselves eligible for a Semester Subscription fee concession on the basis of external study should contact their Program Authority in the first instance.

(3) Students enrolled in programs at the University College, Australian Defence Force Academy, are exempt from the Student Activity Fees, but shall pay such other fees and charges as the Council may from time to time determine.

(4) Students who while enrolled at and attending another tertiary institution in a degree or diploma course are given approval to enrol at the University in courses to be credited towards the degree or diploma for which they are enrolled elsewhere are exempt from all subscription Student Activity Fees. Students should provide proof of payment of such fees at another tertiary institution to the Student Financials Section at UNSW Student Central.

(5) Graduate students who have completed all the experimental and research work for their degree at the commencement of session, except for the submission of their thesis or project report, may be exempted from the payment of all Student Activity Fees by the Registrar on production of an appropriate statement from the student’s supervisor or Head of School certifying that the student is no longer using University facilities.

(6) Graduate students required to resubmit their thesis or project report where resubmission requires no further experimental or research work may be exempted from payment of all Student Activity Fees by the Registrar on production of an appropriate statement from the supervisor or Head of School.

(7) The Registrar is empowered to grant exemption from membership of the University Union, Student Guild and/or the Sports Association to students who have a genuine conscientious objection to such membership, subject to payment of all prescribed fees to the Miscellaneous Activity Fee fund.

1.3 Refund of Student Activity Fees Paid

(1) If notice of discontinuation of a program is received on or before 31 March a full refund of Session 1 Subscriptions and the Miscellaneous Activity Fee paid will be made; if notice is given on or before 31 August a refund of Session 2 Subscriptions and the Miscellaneous Activity Fee paid will be made; thereafter no refund will be made except that provided for in (2) below.

(2) The refunds mentioned above may be granted to a student unable to notify the Registrar in writing by the dates required provided evidence is supplied that the student had ceased attendance by those dates. Students who consider themselves eligible for a refund should contact the Treasury.

(3) The refunds mentioned in (1) above also apply to graduate students who submit a thesis or project report for examination or whose enrolment is discontinued by the dates given.

UNSW Fee Policy: Local Students
Australian citizens, New Zealand citizens and Australian permanent residents are categorised as local students. Fee-paying programs include postgraduate, undergraduate and non-award programs. These rules apply only to students enrolled as fee-paying students. They do not apply to Commonwealth supported students (HECS).

Acceptance of an Offer of Admission
There is no tuition fee deposit required, however your reply must be received within 4 weeks of date of offer, or as otherwise advised, to secure your place. Tuition fees for the first semester of the program are payable by the end of the first week of the semester, as indicated on the fees statement available at https://my.unsw.edu.au

Fees Payable
Tuition Fees:
Fees are reviewed annually and may increase. See the ‘2006 Tuition Fee Schedule’ in this Handbook for a complete schedule of tuition fees.

Non-Award, Cross-Institutional and Voluntary Course Fees:
Fees are charged for non-award enrolment in a course, and for enrolment in an inter-institutional course. Fees are charged according to the classification of the course (Undergraduate, Postgraduate, Research). See the ‘2006 Tuition Fee Schedule’ in this Handbook for a list of a complete schedule of tuition fees.

Student Activity Fees:
All students enrolling in fee-paying programs, including non-award enrolments, are liable to pay Student Activity Fees each semester at the published rates (please refer to ‘Student Activity Fees’ under ‘Student Fees’ for more information). Student Activity Fees are additional to tuition fees and are separately identified on fee statements. Student Activity Fees are subject to annual review and may increase from one year to the next. These fees (with the exception of the Miscellaneous Activity Fee component) are subject to the Australian Government’s Goods and Services Tax (GST), which is levied at 10%. Students enrolling in distance education programs are required to pay the Miscellaneous Activity Fee component only.

Calculation of tuition fees:
Tuition fees are calculated on a student’s enrolment in specific courses. UNSW students enrolled in most programs have some flexibility in the courses they choose and, at times, these courses will be from outside their own Faculty. Tuition fees are derived from the relative cost of providing each type of course and will be calculated on the basis of that year’s current fee. Information on tuition fees is provided in the offer letter. Further information is also available on the following website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

Repeated Courses – Students who are required to repeat courses will be charged the full cost to re-enrol in the course, based on the units of credit for that course at the time it is repeated.

Payment of fees:
Fees are charged and payable on a semester basis. Tuition fees and Student Activity Fees are payable by semester in advance. Students must access their statements online. Students will be able to view their fee statement and payment options (Statement of Student Debt) online approximately 2 – 3 weeks before classes commence. Students should refer to this online statement (available at https://my.unsw.edu.au) for payment deadlines and payment options.

Please note: Costs associated with payments for deposit requirements, tuition and/or activity fees to the University via electronic or direct funds transfer will be seen as the students’ responsibility and the cost shall be borne by the student. Please check with your financial institution before making any transfer of payment.

Non-Payment of Fees:
Failure to pay fees according to the payment guidelines may result in a student’s enrolment being cancelled. If, with notice, a student’s enrolment is cancelled for non-payment of fees and that student is subsequently permitted to have his/her enrolment reinstated, a $250.00 reinstatement fee will be levied. A student whose enrolment is cancelled will retain her/his fee liability, so that re-enrolment in a subsequent year, or semester, will not be permitted unless such a time as the debt is either paid in full or agreement reached between the student and the Registrar on the method of repayment.

Students indebted to the University will not be issued with academic transcripts or any other official credentials and will not be permitted to graduate.
Refund of Fees Paid

(1) Refund of Deposit
Where a student is required to make an initial deposit to confirm her/his place in a program, the deposit is non-refundable.

(2) Refund of Program Fees – New Students
If a student in her/his commencing semester lodges a notice of discontinuation of a program after enrolment and before the census date for that semester, all tuition fees will be refunded less $500.00. The student will incur and retain a liability for payment of $500.00 regardless of whether or not fees have been paid.

(3) Refund of Program Fees Paid – Re-Enrolling Students:
For re-enrolling students, if notice of discontinuation of course is received on or after the census date of a new academic semester, no refund of tuition fees paid for that semester will be made. In such instances, the student will incur and retain a liability for that semester’s fees regardless of whether or not fees have been paid.

(4) Refund of Program Fees - Non-Award Enrolment
If notice of discontinuation of a course is lodged on or before the census date for that semester, a full refund of the fee for the course will be made.
A student will incur and retain liability for the course fee, regardless of whether the fee has been paid, if notice of discontinuation is not lodged before the census date for that semester.
In the case of a course(s) conducted outside the normal semester format, such as those conducted in summer or winter sessions, a refund will only be made if notice of discontinuation is lodged before the commencement of the course.

(5) Refund of Program Fees Paid – Special Cases:
A refund may be granted to a student unable to notify the Registrar in writing by the dates required, provided evidence is supplied that the student had ceased attendance by the census date, and was unable to notify the Registrar or reasons beyond her/his control. A refund may be granted in cases where the applicant is unable to commence or continue in the program because of documented illness or misadventure.
A postgraduate student who submits a project report or thesis for examination by the census date for that semester will not be liable for fees in that semester.

Commonwealth Assistance Notice (CAN)
A Commonwealth Assistance Notice (CAN) is a notice that contains information about a student’s enrolment and use of Commonwealth assistance. This notice is issued to the web and is available via the My Student Profile tab on myUNSW within 28 days of the census date for each semester.
The Commonwealth Assistance Notice (CAN) is issued to Commonwealth Supported and FEE-HELP students only.

Relevant Dates
A complete schedule of semester and census dates is available on the UNSW website: https://my.unsw.edu.au

Disclaimer
Students should note that courses, programs and any arrangements for programs, including staff allocated, as stated in any University publication, are an expression of intent only, and are not to be taken as a firm offer of undertaking. Students wishing to take particular elective courses should ensure that these will be available prior to accepting the offer.

UNSW Fee Policy: International Students
This policy applies to all international students. An international student is a student who is not a citizen or permanent resident of Australia, or a New Zealand citizen. All enrolled international students (or their sponsors), whether in attendance at a campus of UNSW or offshore are liable for payment of tuition fees and Student Activity Fees.

Acceptance of an Offer of Admission
Tuition Fee Deposit: International students wishing to accept an offer of admission to a program must pay a deposit fee to secure their place. Places in programs will be allocated in order of receipt of the deposit. The balance of tuition fees for the first session of the program is payable according to the payment guidelines on the fees statement issued after enrolment. External or offshore students and some government-sponsored students have different deposit requirements, as detailed in the offer letter.
Student Visa: On receipt of the deposit and, if appropriate, the health insurance payment, the University will issue an Electronic Confirmation of Enrolment for Overseas Students (e-COE) form which a student requires in order to apply for a student visa for travel to, and temporary residence in, Australia.

Deferment: Requests to defer initial enrolment from one year to the next, or one session to the next, must be made in writing or online by the deadline stipulated in the offer letter. Not all programs permit deferment. Students not permitted to defer must lodge a new application for admission at the time appropriate for their intended commencement of the program. A student who defers will be liable for the tuition fees applicable in the year in which he/she will enrol.

Fee Charges and Payments

Fees Payable
(1) Tuition Fees:
Fees are reviewed annually and may increase. See the ‘2006 Tuition Fee Schedule’ in this Handbook for a list of a complete schedule of tuition fees.

(2) Student Activity Fees:
All students enrolling in fee-paying programs, including non-award enrolments, are liable to pay Student Activity Fees each session at the published rates (please refer to ‘Student Activity Fees’ under ‘Student Fees’ for more information). Student Activity Fees are additional to tuition fees and are separately identified on fee statements. Student Activity Fees are subject to annual review and may increase from one year to the next. These fees (with the exception of the Miscellaneous Activity Fee component) are subject to the Australian Government’s Goods and Services Tax (GST), which is levied at 10%. Students enrolling in distance education programs are required to pay the Miscellaneous Activity Fee component only.

(3) Health Insurance:
It is a requirement of the Australian Government that student visa holders are covered by medical insurance (Overseas Student Health Cover, OSHC) for the duration of their study in Australia. Students must ensure that they have made arrangements for their OSHC when accepting their offer of a place. OSHC can initially be paid for a minimum period of 12 months or for the duration of the student’s program*. Students who pay for a minimum of 12 months are responsible for renewing their health cover directly with either the University’s Preferred Provider for medical insurance for international students or other approved provider, when their initial cover expires. OSHC charges are regularly reviewed and charges quoted on the UNSW offer letter are subject to change.
Students should be aware that the duration of cover might be shorter than anticipated, should an increase in the charge occur after the offer letter has been sent. Students on external/distance education programs and not residing in Australia are not required to pay OSHC. Similarly, students who do not need a student visa to study in Australia are not required to pay OSHC.

* Please note that the University will require students to take out program-length OSHC cover from Semester 2 2006 onwards.

(4) Calculation of Tuition Fees:
Tuition fees are calculated on a student’s enrolment in specific courses. UNSW students enrolled in most programs have some flexibility in the courses they choose and, at times, these courses will be from outside their own Faculty. Tuition fees are derived from the relative cost of providing each type of course and will be calculated on the basis of that year’s current fee. Information on the tuition fees is provided in the offer letter. However further information can be found on the myUNSW website: https://my.unsw.edu.au/student/fees/FeesMainPage.html

(5) Full-Time Program Study Requirement:
Students holding a student visa are required to undertake their studies on a full-time basis. UNSW defines a standard normal full-time enrolment as 24 units of credit (UOC) per session. A minimum load of 18 UOC will satisfy the full time requirement. However, if students enrol in the minimum full-time load, they will need to take additional courses in a future session to complete their program within the time frame specified on their visa. The University expects that students will undertake their studies on a full-time basis and complete the program in the minimum time.

(6) Payment of Tuition Fees & Student Activity Fees:
Fees are calculated and payable on a session basis. Tuition fees and Student Activity Fees are payable per session in advance. Students must access their statements online. Students will be able to view their fee statement and payment options (Statement of Student Debt) online approximately 2 to 3 weeks before classes commence. Students should refer to this online statement (available at https://my.unsw.edu.au) for payment deadlines and
payment options. Students who have an agreement with the University that their fees will be paid by a recognised sponsor (i.e. home government/institution) will be able to view a fees statement online indicating if any fees are required (i.e. fees which are not covered by their sponsor). If a student is not liable for any fees, the online statement simply serves as a confirmation of their enrolment. A separate invoice for fees will be sent to the sponsor after the census date of each session. Unless stipulated in the offer letter, all fee payments must be made in Australian dollars, and finalised by the University payment due date for each session.

Please note: Costs associated with payments for deposit requirements, tuition and/or activity fees to the University via electronic or direct funds transfer will be seen as the students’ responsibility and the cost shall be borne by the student. Please check with your financial institution before making any transfer of payment.

(7) Non-Payment of Fees:
Failure to pay tuition fees and Student Activity Fees according to the payment guidelines may result in a student's enrolment being cancelled. If, with notice, a student's enrolment is cancelled for non-payment of fees and that student is subsequently permitted to have his/her enrolment reinstated, a $250.00 reinstatement fee will be levied. A student whose enrolment is cancelled, will retain her/his fee liability, so that re-enrolment in a subsequent year or session will not be permitted until such a time as the debt is either paid in full or agreement reached between the student and the Registrar on the method of repayment. Students indebted to the University will not be issued with academic transcripts or any other official credentials and will not be permitted to graduate.

Fee Variations (including Change of Residency)
Permanent Resident Status:
If a student obtains Australian permanent residency before enrolling in the program, or prior to the census date of the session of first enrolment in an approved program (or as a local student), the student will be seen as a local student in that program, the offer of a place (or the enrolment) as an international student will lapse. The student will then be considered for admission as a local student. The Department of Science, Education and Training (DEST) guidelines clearly state that all students must finalise enrolment issues (including permanent residency status) by the relevant census date. There is no provision to extend the census date deadlines. Students must provide proof of residency on or before the relevant session census date in order to be assessed for admission as a local student and be eligible for the local tuition rate. Students who receive their residency on or prior to the relevant session census date but fail to provide the University with a certified copy of their evidence until after the census date will remain liable for the international tuition rate for the remainder of the session.

Please note: the University cannot be held accountable for problems which may occur between students and the Department of Immigration and Multicultural Affairs (DIMIA) regarding the issuing of permanent residency visas and is unable to apply retroactive adjustments for prior sessions.

Students who are granted Australian permanent resident status after the census date of their first session of enrolment or after the census date of any subsequent session will be seen as having entered into a contract with the University to pay international fees for that session.

Please note that because of government controls on the number of local students that can be enrolled, students who obtain permanent residency may not qualify for a Commonwealth Supported place (HECS).

Repeated Courses:
Students who are required to repeat courses will be charged the full cost to re-enrol in the course, based on the units of credit for that course at the time it is repeated.

Non-Award Course Enrolment:
In certain cases, students may be permitted by a Faculty to enrol in additional courses that cannot be counted towards award requirements. If permitted to do so, the student will need to apply for and be enrolled in a separate non-award program and charged at the international student rate according to the band fee for the course enrolled in.

Graduate students completing a thesis or project report:
Graduate students who have completed all work (i.e. all research, laboratory, computational and field work) before the commencement of a session, except for the preparation and submission of the thesis or project report, will be exempted from the fees for that session if the thesis or project report is submitted before the census dates. After these dates fees will be charged at the rate of 50% for the session in which the thesis or project report is submitted, provided the student has exceeded the minimum period of enrolment specified in the degree conditions. Graduate students who are permitted to resubmit a thesis or project report and required to undertake a further period of study are liable for the full cost of the further study period.

Refund of Fees Paid
(1) Withdrawal Prior to Enrolment (Refund of all fees paid less administrative charge of $500):
Applicants who notify the University in writing before they enrol in the program for the first time that they wish to withdraw, will receive a refund of all tuition fees paid less an administrative charge of $500. The full amount may be refunded in cases where the applicant has not been granted a student visa or is unable to attend because of documented illness or misadventure. Any refund so made will be at the discretion of the Registrar. A student may receive a full refund if it can be shown that, following discussions with program authorities, it is not possible for that student to enrol in an appropriate program. Refunds of tuition fees will normally be made within four weeks from the date of request or the date of clearance of the original payment, whichever is the later.

(2) Commencing Students - Withdrawal By Census Date (Refund of all fees paid less administrative charge of $1000):
Students who withdraw from the program prior to the census date in their commencing session will receive a refund of all fees paid less an administrative charge of $1,000.

(3) Commencing Students - Withdrawal After Census Date (No refund):
Students who withdraw after the census date in their commencing session will not receive a refund for fees paid unless they have also paid fees for a full year, in which case, fees paid for the second session will be refunded in full.

(4) Re-enrolling Students - Withdrawal By Census Date (Refund of all fees paid):
Students who withdraw from the program prior to the census date of that session will receive a refund of all fees paid for the session.

(5) Re-enrolling Students - Withdrawal After Census Date (No Refund):
Students who withdraw from the program after the census date will not receive a refund of fees paid unless they have also paid fees for a full year, in which case, fees paid for the second session will be refunded in full.

(6) Illness and Misadventure:
Students who have to withdraw at any time because of documented ill health or misadventure may apply for a refund of fees paid. However, pro-rata refunds will be considered only in exceptional circumstances. Any refund so made will be at the discretion of the Registrar.

(7) Students Not Permitted to Continue:
Students not permitted to continue in their program because of a determination made by the University in relation to unsatisfactory progress, or any other reason, at the end of Session 1, will receive a refund of any fees paid for Session 2.

(8) Refunds for Tuition Fees Paid:
Refunds will be processed and normally paid within 4 weeks of receiving a written request, and all required documentation from the student. Refunds will only be made in Australian Dollars, following clearance of the original payment, and are usually in the form of a bank draft, mailed to the student. If a telegraphic transfer is required to a bank account, please ensure you include all bank details on the refund request. This method of refund is not recommended because of banking difficulties in some countries.

(9) Difficulties with Payment:
Students who are unable to pay their fees by the agreed dates should apply in writing to the Student Financials Section, Student Administration and Records Office, through UNSW Student Central, Lower Ground Floor of the Chancellery Building. In exceptional circumstances special payment arrangements may be made for students, taking into account their financial and other circumstances. Students should not assume that extensions will be granted automatically and are reminded that non-payment of fees may result in cancellation of enrolment.

(10) OSHC
Students who decide not to enrol with the University will be eligible for a full refund of any OSHC paid. The refund will be issued by the University, if the payment has not been sent to the OSHC Provider. However, students will be responsible for contacting the Provider directly, if the payment has been sent and processed.
Students who enrol with the University, but who decide to withdraw, should be aware that they are required to pay a minimum of 3 months cover, and this will be deducted from any refund.

In requesting a refund, students must provide the Provider with the following information: full name, date of birth, OSHC membership number together with the reason for refund and either evidence of transferring to another university, or the date of departure from Australia.

Relevant Dates
A complete schedule of session and census dates is available on the myUNSW website: https://my.unsw.edu.au

Disclaimer
Students should note that courses, programs and any arrangements for programs including staff allocated, as stated in any University publication, are an expression of intent only and are not to be taken as a firm offer or undertaking. Students wishing to take particular elective courses should ensure that these will be available prior to arriving in Australia

This fee policy does not remove the right to take further action under Australia’s consumer protection laws (Education Services for Overseas Students Act 2000 Section 43.1).

Other Fees and Charges
Special Examination Fees
Examinations conducted in special circumstances for each course: $85

Other Charges
In addition to any of the fees outlined above and depending on the course being taken, students may be asked to make a payment for equipment; money so paid is, in general, refunded if the equipment is returned in a satisfactory condition. Charges may also be payable for accommodation and subsistence on excursions and fieldwork; and for hospital residence by medical students.

Penalty Fees
(1) Failure to lodge enrolment or pay fees* according to enrolment procedure: $100
(2) Late enrolment penalty for re-enrolling students: enrolment in Week 1 of Session 1 or later: $250
(3) Reinstatement of enrolment fee: $250
(4) A penalty fee of $250 will be incurred by a student when a result is returned for a course which is not included in the student’s enrolment program.

Penalties (1) and (2) may accumulate.* Fees include Student Activity Fees, fees levied for voluntary enrolment, non-award enrolment, international student fees, tuition fees for postgraduate and undergraduate programs, and up-front Student Contribution Liability.

Sponsored or Assisted Students
Sponsored or Assisted students are those who have an official sponsor recognised by the University and whom the University invoices directly, rather than invoicing the individual student.

Students who have an “unofficial sponsor” such as an employer or a family member who have agreed to cover study costs should note that in all cases UNSW considers the student is solely responsible for any financial liability to the University.

Students in receipt of an official sponsor should note that they will be liable for any unpaid tuition and activity fee costs should the sponsor default on payment in any given semester. A student with an outstanding debt may not be permitted to re-enrol in a subsequent year or semester until such time as the debt is paid in full. Students indebted to the University will not be issued with academic transcripts or any other official credentials and will not be permitted to graduate.

Debts
Any student who is indebted to the University and who fails either to make a satisfactory settlement of indebtedness upon receipt of due notice or to receive a special exemption will be disenrolled and will cease to be entitled to membership and privileges of the University. Such a student is not permitted to attend classes or examinations, or to be granted any official credentials. Re-enrolment in a subsequent session or year will not be permitted until such time as the debt is either paid in full, together with any enrolment reinstatement penalty fee (if appropriate) or agreement is reached between the student and the Registrar on the method of repayment.

In exceptional cases the Registrar may grant exemption from the provisions referred to in the preceding paragraph upon receipt of a written statement from the student setting out all relevant circumstances.

Enrolment Rules and Procedures
Enrolment
All students must re-enrol each year for the full academic year. Students who fail to enrol in accordance with advertised procedures or who enrol after the nominated date will incur a penalty fee. By enrolling, students incur Student Activity Fees, tuition fee charges or liability under the Student Contribution Scheme.

Refer to myUNSW (https://my.unsw.edu.au) for full details of enrolment procedures and up-to-date fee information.

All students are required to confirm their enrolment details e.g. check that they are enrolled in the correct course(s) by accessing their online Fee Statement/Confirmation of Enrolment at https://my.unsw.edu.au prior to the session’s census date. Any enrolment issues must be referred immediately to the Program Authority in writing.

A complete schedule of session and census dates is available on the website: https://my.unsw.edu.au/student/resources/KeyDates.html

1. New Undergraduate Enrolments
For application procedures, please see ‘Admissions Procedures’ above.

Successful applicants will be required to complete enrolment on the web via myUNSW and to complete any other procedures required by their program office before the start of session.

2. Re-enrolling Undergraduate Students
Re-enrolling undergraduate students are required to re-enrol on the web via myUNSW, and complete any other procedures required by their program office. Different enrolment procedures may apply for some programs, particularly some distance or alternative mode programs. In these instances, students should follow the instructions emailed or sent to them by their program office. Detailed information regarding enrolment is available on myUNSW and students should check this site regularly for updated information: https://my.unsw.edu.au

3. Re-enrolment Deadlines and Penalties
Students must enrol in accordance with the enrolment procedures for their program. The University has established enrolment deadlines and penalties for late enrolment or failure to enrol in accordance with program office requirements as follows.

Students who have an outstanding debt to the University will not be able to process any enrolment changes until the outstanding debt is finalised.

Students must access their Fee Statement online at https://my.unsw.edu.au. Students should refer to this online statement for payment deadlines and payment options.

(1) On the recommendation of the program authority, the Registrar may impose a penalty fee of $100 on students who fail to enrol in accordance with their program office’s instructions. Circumstances under which the penalty may be imposed include:
- failure to re-enrol by the deadline set by the University or the student’s program office;
- failure to attend the program office to enrol on or by the published date where this is a requirement of enrolment for the program.

(2) Lodgement of a proposed enrolment, and acceptance of a student’s enrolment, in Week 1 of session and subsequently, will incur a late enrolment penalty fee of $250.

(3) Students who do not pay all the fees assessed on their fees statement (including up-front Student Contributions where relevant) by the end of the first week of teaching may have their enrolment cancelled.

4. Summer Session Enrolments
Students will be required to complete formal enrolment procedures prior to the commencement of their Summer Session of study. Enrolment at this time will be for a student’s approved Summer Session program. Students must access their fee statement online.

5. Restrictions on Re-enrolling
Students whose progress is deemed to be unsatisfactory should follow the written instructions they have received from the Registrar.

6. Multiple Enrolment
The University has laid down the following rules on multiple enrolments:
(1) No person shall be permitted to enrol in a degree, diploma or certificate course at the University of New South Wales at the same time as he/she is enrolled for any other degree, diploma or certificate in the University
A request for leave should be made in writing to the Registrar either:

1. For a student who discontinues a program with or without failure after the last day to discontinue a course without failure, and for the census date for a session may result in failures being recorded.

2. For a student whose application for leave is rejected or who does not provide their Tax File Number and has not made the required student contribution payment by the date set by the University, or at any other tertiary institution, except with the approval of the faculty or faculties concerned.

(2) The Registrar may suspend from enrolment any student who is found to be enrolled, without approval, in more than one degree, diploma or certificate course.

7. Non-Award Enrolment

Non-award enrolment refers to all enrolments in courses or a sequence of courses which do not lead to or count towards a formal award (e.g. degree or diploma) of the University of New South Wales. Non-award enrolments fall into two categories, voluntary and cross-institutional.

Applications to enrol as a non-award student must be made on the Non-Award Enrolment application form available from UNSW Student Central or the following website: www.unsw.edu.au/futureStudents/nonAward/sad/fsnacrossinst.html. Permission to enrol as a non-award student is conditional on the permission of the Head of School and authorisation from the Director, UNSW Student Services. Applicants should follow the instructions given to them with the application form.

8. Final Dates for Enrolling in Courses

No enrolments for Session 1 courses will be accepted from students after the end of the second week of Session 1, except with the express approval of the Registrar and the Head(s) of the School(s) concerned.

No enrolments for Session 2 courses will be accepted after the end of the second week of Session 2, except with the express approval of the Registrar and the Head(s) of the School(s) concerned.

9. Deadlines for Payment of Fees, Charges and Student Contributions

The University has set deadlines for the payment of all fees that are set out below. Students who do not pay all fees by the due date may be disenrolled. Students who are permitted to be reinstated following disenrollment will be required to pay a penalty fee of $250 plus all outstanding fees before reinstatement.

Under Government legislation, a student who has elected not to provide their Tax File Number and has not made the required student contribution payment by the date set by the University, must have their enrolment cancelled. Such students will not be permitted to undertake studies in their program in that session as a Commonwealth supported student.

Session 1

Session 1 Student Activity Fees, Student Contributions and tuition fees: Friday 3 March 2006

Session 2

Session 2 Student Activity Fees, Student Contributions and tuition fees: Friday 28 July 2006

Variations in Enrolment (including Discontinuation and Program Leave)

1. Variation of Enrolment

Undergraduate students wishing to vary their enrolment program will be able to do so on the web (https://my.unsw.edu.au/) at specified times throughout the year. Where a student is unable to successfully vary their enrolment online, or they are in doubt as to whether the courses they wish to enrol in will count towards their program requirements, they should contact their program office or appointed academic adviser for further advice.

It is a student’s responsibility to ensure that they enrol in accordance with the University’s rules, and that the courses they enrol in will count towards their program requirements. Students should take care to enrol only in classes that are defined as core units or electives for their academic program. If they enrol in classes that cannot be counted, they may have to enrol in extra classes, or for an extra session. They may also incur additional fees.

2. Variation of Summer Session Enrolment

Students may vary their Summer Session enrolment program on the web. Students should check with the relevant course authority for the last day to discontinue a course without failure, and for the census date for the course.

3. Discontinuation of Program

Students discontinuing programs are required to notify the Registrar in writing or to complete the discontinuation form available from UNSW Student Central. Such students may be entitled to a fee refund for fees paid (see ‘Student Fees’ entry in this Handbook). The Registrar acknowledges discontinuation of a program in writing.

A new undergraduate student in Stage 1 of a program who discontinues that program without failure prior to the census date must reapply through UAC and is guaranteed re-admission to the same program the following year. A student who does not resume study in the following year must compete for a place, if and when re-admission is sought.

A new undergraduate student in Stage 1 of a program who discontinues after the census date may apply for leave for Session 2 prior to the Session 2 census date. It should be noted that discontinuation after the census date for a session may result in failures being recorded.

4. Discontinuation of Courses

Discontinuation of courses prior to the census date for a session can generally be processed by a student on the web (https://my.unsw.edu.au/). All variations to course enrolments can also be confirmed by students on the web.

Students can discontinue a course online without academic and financial penalty until the census date.

Students can discontinue a course online without academic penalty until half session plus one week (the withdraw without academic penalty date).

Students should be aware that they will be financially liable for all courses in which they are enrolled as at the census dates.

Written applications to discontinue courses after the withdraw without academic penalty date may be lodged with the course authority but will result in students being regarded as having failed the courses concerned, except in special circumstances.

5. Program Leave

Leave from a program of study may be granted to undergraduate or postgraduate students. Leave is generally restricted to a total of two sessions; applications for leave in excess of two sessions will be approved only in exceptional circumstances at the discretion of the program authority.

Undergraduate students may be granted leave before commencement of the program. This type of leave, usually referred to as deferment of enrolment, will normally be granted once only and for a maximum of 2 sessions.

The following procedures apply:

- A request for leave should be made in writing to the Registrar either by letter or by using the Discontinuation/Leave form available from program offices and the Student Centres at each campus.
- Leave must be sought prior to the census date. For information about census dates, please refer to: https://my.unsw.edu.au/student/resources/KeyDates.html
- A student who discontinues a program with or without failure after the census date for a session retains an enrolment record for that session and is subject to the rules on student progression. A student who discontinues after the Session 1 census date may apply for leave for Session 2.
- A student whose application for leave is rejected or who does not resume study at the end of the approved leave period must formally apply, in the usual manner, for re-admission to the program.

Enquiries about re-admission to a program should be directed to the Admissions Office.

6. Resumption of Program

Students who have had leave for twelve months and wish to resume their program should follow the instructions about re-enrolling given in the letter granting leave of absence. If these instructions are not fully understood or have been lost, students should contact UNSW Student Central in the Chancellery before November in the year preceding the one in which they wish to resume their program.

If students have not obtained leave of absence from their program and have not been enrolled in the program over the past twelve months or more, they should apply for re-admission to the program through the Universities Admissions Centre before the end of September in the year preceding that in which they wish to resume studies or to the Admissions Office by the appropriate closing date.

Program Transfers

Local Students:

Students in the Faculty of Arts and Social Sciences who wish to transfer between the Bachelor of Arts, Bachelor of Social Science or Bachelor of...
of Arts/Bachelor of Education should apply to the Faculty Office in December. Students in the Faculty of Commerce and Economics, who wish to combine either the Bachelor of Commerce with Arts, Science or Social Science, or the Bachelor of Economics with Arts or Social Science, should apply to the Faculty Office in December. Students in the Faculty of Engineering who wish to combine their undergraduate engineering program with MEng, or MEngSc should apply to the relevant Engineering School Office in December. Students in the Faculty of Law who wish to change their non-law program (e.g. Commerce/Law to Arts/Law) or major in their non-law degree (e.g. Accounting to Finance) should apply to the Law Faculty Office in December. Students who wish to transfer from a combined Law program to the single non-law program should apply to the Faculty Office of the program in which they wish to continue. Graduate Law students wishing to change from full-time to part-time study or vice versa should also apply to the Faculty Office in December. Students wishing to change their plan within their current degree should apply to their Faculty Office. All other local students wishing to transfer to an undergraduate program must apply through the Universities Admissions Centre (UAC) by the end of September (late applications are accepted until early February on payment of a late fee or in May for mid-year transfers. Further information is available from the Admissions Office, telephone 1300 36 8679.

International Students: All international students can apply for an internal transfer by completing the form available from UNSW Student Central or online via https://my.unsw.edu.au. For further information, international students may contact the Direct Admissions Office, tel: (+61 2) 9385 3636.

Progression Rules and Procedures Attendance at Classes Students are expected to be regular and punctual in attendance at all classes in the courses in which they are enrolled. All applications for exemption from attendance at classes of any kind must be made in writing to the Registrar. In the case of illness or of absence due to other unavoidable causes students may be excused by the Registrar for non-attendance at classes for a period of not more than one month or, on the recommendation of the Dean of the appropriate faculty, for a longer period. Absence from Classes Explanations of absences from classes, or requests for permission to be absent from forthcoming classes, should be addressed to the Registrar and, where applicable, should be accompanied by a medical certificate. If examinations or other forms of assessment have been missed, this should be stated in the application. If students attend less than eighty per cent of their possible classes they may be refused final assessment.

General Education Requirements UNSW requires that undergraduate students undertake a structured program in General Education as an integral part of studies for their degree. General Education requirements are set out in detail in the General Education section of this Handbook.

Plagiarism

What is Plagiarism?

Plagiarism is the presentation of the thoughts or work of another as one’s own. Examples include:

- direct duplication of the thoughts or work of another, including by copying work, or knowingly permitting it to be copied. This includes copying materials, ideas or concepts from a book, article, report or other written document (whether published or unpublished), composition, artwork, design, drawing, circuitry, computer program or software, website, Internet, other electronic resource, or another person’s assignment without appropriate acknowledgement;
- paraphrasing another person’s work with very minor change keeping the meaning, form and/or progression of ideas of the original;
- piecing together sections of the work of others into a new whole;
- presenting an assessment item as independent work when it has been produced in whole or part in collusion with other people, for example, another student or tutor; and;
- claiming credit for a proportion of work contributed to a group assessment item that is greater than that actually contributed.1 Submitting an assessment item that has already been submitted for academic credit elsewhere may be considered plagiarism. Knowingly permitting your work to be copied by another student may also be considered plagiarism.

Note that an assessment item produced in oral, not written, form, or involving a live presentation, may similarly contain plagiarised material. The inclusion of the thoughts or work of another with attribution appropriate to the academic discipline does not amount to plagiarism.¹ Based on that proposed to the University of Newcastle by the St James Ethics Centre. Used with kind permission from the University of Newcastle.¹ Adapted with kind permission from the University of Melbourne.

UNSW Policy on Plagiarism

At UNSW plagiarism is considered to be a form of academic misconduct and is viewed very seriously. UNSW is committed to helping students understand the conventions which govern academic communication to assist them avoid action which may result in academic misconduct. In the interests of maintaining high standards in scholarship and research, the University reminds students that when they are writing essays, theses, and assessment items of any nature, they are ethically bound to refrain from plagiarism in all its forms. Students are advised to inform themselves about University policies and practices concerning assessment and Academic Misconduct (including plagiarism). Wherever possible, students should also take up those opportunities provided to them by the University to improve their academic and/or information literacy.

The UNSW Approach to Student Plagiarism

The UNSW approach to plagiarism is educative. The University wishes to foster a culture of learning informed by values of integrity and honesty and all staff and students are encouraged to consider their rights and responsibilities as set out in this Handbook. UNSW is also committed to providing a consistent, fair and equitable approach to managing student plagiarism. It is therefore expected that Faculties and Schools will strive to ensure the fair, consistent and equitable treatment of students when handling student plagiarism, and adopt relevant policy, procedures and guidance provided by the University. It is also expected that staff will be conscientious in their evaluation of students’ work and the identification of cases of possible plagiarism. All Faculties and Schools will provide students with discipline-specific examples of good and bad academic practice according to the conventions of the discipline, and provide specific advice regarding those techniques that will be required of students whilst studying at UNSW. UNSW has published an e-document handbook for students, Guidelines and Rules on Student Plagiarism, which contains detailed information on UNSW’s policy, approach and resources for students. UNSW has also developed an online information literacy tutorial (ELISE) to assist students. See Further Information below.

The Learning Centre

The Learning Centre Plagiarism and Academic Integrity website is the central University online resource for staff and student information on academic honesty and understanding and avoiding plagiarism. It can be found at: www.lc.unsw.edu.au/plagiarism. The Learning Centre also provides substantial educational written materials, workshops, and individual assistance to aid students, for example, in:

- correct referencing and citation practices;
- paraphrasing, summarising, essay writing, and time management;
- appropriate use of, and attribution for, a range of materials including text, images, formulae and concepts.

Further Information Learning Centre’s Plagiarism and Academic Integrity website: www.lc.unsw.edu.au/plagiarism/index.html

GENERAL UNIVERSITY RULES AND STUDENT INFORMATION 27
2.3.1 Plagiarism and failure to acknowledge sources

Plagiarism involves using the work of another person and presenting it as one’s own. Acts of plagiarism include copying parts of a document, without acknowledging and providing the source for each quotation or piece of borrowed material. These rules against plagiarism apply whatever the source of the work relied upon may be, whether printed, stored on a compact disc or other medium, found on the World Wide Web or Internet.

Similarly, using or extracting another person’s concepts, experimental results or conclusions, summarising another person’s work or, where there is collaborative preparatory work, submitting substantially the same final version of any material as another student constitutes plagiarism.

It is your responsibility to make sure you acknowledge within your presented work where you have “sourced” the information, ideas and facts etc.

The basic principles are that you should not attempt to pass off the work of another person as your own, and it should be possible for a reader to check the information and ideas that you have used by going to the original source material.

Acknowledgment should be sufficiently accurate to enable the source to be located speedily. If you are unsure whether, or how, to make an acknowledgment consult your lecturer.

The following are some examples of breaches of these principles:

(a) Quotation without the use of quotation marks. It is a serious breach of these rules to quote another’s work without using quotation marks, even if one then refers to the quoted source. The fact that it is quoted must be acknowledged in your work.

(b) Significant paraphrasing, e.g., several sentences, or one very important sentence, which in wording are very similar to the source. This applies even if the source is mentioned, unless there is also due acknowledgment of the fact that the source has been paraphrased.

(c) Unacknowledged use of information or ideas, unless such information or ideas are commonplace.

(d) Citing sources (e.g. texts) which you have not read, without acknowledging the ‘secondary’ source from which knowledge of them has been obtained.

These principles apply to both the text and footnotes of sources. They also apply to sources such as teaching materials, and to any work by any student (including the student submitting the work) which has been or will be otherwise submitted for assessment. You must obtain the prior approval of your lecturer if you wish to submit to that lecturer an essay substantially similar to one which has already been, or will be, submitted to another lecturer.

Using the principles mentioned above about proper acknowledgment, you should also proceed on the general assumption that any work to be
submitted for assessment should in fact be your own work. It ought not be the result of collaboration with others unless your lecturer gives clear indication that, for that assignment, joint work or collaborative work is acceptable. In this latter situation, you should specify the nature and extent of the collaboration and the identity of your co-workers.

2.3.2 Unauthorised materials in exams
The possession of unauthorised materials in exams is another common example of academic misconduct. The University’s rules for the conduct relating to examinations state that no materials are to be brought into the examination room other than those specified in the examination timetable.

The following are examples of materials which would be regarded as unauthorised (and if not specified as being permitted in the examination):
(a) A bag, writing paper, blotting paper, manuscript or book, other than the specified material;
(b) A mobile telephone brought into the examination room must be switched off and placed under the candidate’s seat for the duration of the examination;
(c) Written or printed notes of any kind or size;
(d) Writing on the hand or any other part of the body;
(e) Writing on a ruler or any other instrument;
(f) A calculator or hand-held computer where these are not permitted or where calculators are supplied by the University for the examination.

It does not matter whether or not the notes or writing are relevant to the exam. It does not matter that the notes are inside your pocket or a closed pencil case. It also does not matter that writing on the body is illegible.

It is academic misconduct simply to be in possession of such notes and writing, or to have writing on your body, in the first place.

There are simple steps that you can take to ensure they do not infringe the University’s rules for examinations:
• Read the examination timetable carefully and make sure you fully understand what materials are permitted in the exam;
• Place all bags and belongings outside or at the front of the room before the exam commences;
• Check your pockets and inside any pencil cases or calculators to ensure that you haven’t accidentally left notes in them;
• Listen carefully to the instructions given to you by the examination supervisor. Ask for assistance if you have any questions about the rules and arrangements for the examination;
• Surrender any unauthorised notes or other materials before the exam begins: if you are found with these after the exam commences you will have broken the examination rules.

2.4 Penalties
Students found guilty of academic misconduct may be excluded from the University for up to two years, depending on the individual circumstances. In serious cases, penalties may include permanent exclusion from the University.

2.5 Breach of Discipline and Misconduct in Assessment Procedures
The University has detailed procedures for dealing with allegations or complaints of academic misconduct. Please contact UNSW Student Central or refer to the following website: https://my.unsw.edu.au/student/academiclife/assessment/BreachDisciplineMisconductProcedures.html

3. Student Misconduct
3.1 University Rules and Codes of Conduct
While the University has not formulated a formal general code of conduct, it has defined rules and good practice for many activities. That is, a number of areas within the University have specified rules and codes of conduct for particular activities for the use of facilities. For example, there are rules for the conduct of examinations, rules for borrowing privileges and the use of other University Library resources, and behaviour in the Library. The Division of Information Services has also formulated rules for the use of computers and computer laboratories, and for behaviour in laboratories. These rules are publicised to all users of these facilities.

There are, in addition, University rules governing general student conduct. These are described below.

3.2 What is student misconduct?
Student misconduct of a kind that impairs the reasonable freedom of other persons to pursue their studies or research or to participate in the life of the University includes such activity as:
(a) breach of any rule relating to student conduct in the University;
(b) conduct which unduly disrupts or interferes with a class, a meeting or any other official activity within the University;
(c) conduct detrimental to University property, such as stealing, destroying or deliberately damaging laboratory equipment;
(d) stealing, destroying, impairing the accessibility of, or defacing any part of the University Library collection;
(e) using University computing or communications facilities in a manner which is illegal or which will be detrimental to the rights and properties of others;
(f) acting so as to cause students or staff or other persons within the University to fear for their personal safety;
(g) refusing or failing to identify oneself truthfully when so required by a member of the academic staff or other officer of the University.

3.3 Penalties
The following penalties may apply:
(a) A student who commits a breach of the University parking rules or damages University property (including, but not limited to, fittings, fixtures, equipment, facilities, trees, plants, shrubs, and lawns) shall be guilty of a breach of discipline and shall be liable for the payment to the University of a fine not exceeding $1,000 and/or the cancellation of her or his parking permit.
(b) A student who misuses University Library facilities, or computing or communications facilities, shall be guilty of a breach of discipline and shall be liable for the payment to the University of a fine not exceeding $1,000 and/or restriction or withdrawal of borrowing or access privileges.
(c) Fines and other penalties may only be imposed under these rules by the Registrar, the Chief Information Officer, or a person who holds a written delegation from either officer so authorising her or him.
(d) It shall not be necessary for the University to prove in any case that it has suffered financial or actual loss.
(e) The University may withhold any benefit (including any degree, diploma or result) from a student until any penalty imposed under these rules has been discharged.
(f) Students adversely affected by determinations made and penalties imposed under this rule may appeal to the Vice-Chancellor. The appeal must be in writing and lodged within fourteen days of the student receiving notification of the adverse determination. Such notification shall include notice of the student’s right of appeal. In all other respects, action under this rule is final.

In addition, in situations where it is considered that students present a threat of destruction to University property and/or disruption of academic instruction, assessment, examinations, and the proper functioning of the University, they may be temporarily suspended from part or all of the University.

3.4 Student Misconduct Procedures
The University has detailed procedures for dealing with allegations or complaints of student misconduct. The full text of the Council resolution on student misconduct, which contains details of these procedures, can be obtained from UNSW Student Central or the following website: https://my.unsw.edu.au/student/academiclife/assessment/StudentMisconductRules.html

Academic Standing
At the end of every standard 14-week session the University determines each undergraduate or coursework postgraduate student’s Academic Standing in his or her program of study.

The purpose of specifying a student’s Academic Standing is to alert the student and his or her program authority as early as possible to any problem that may prevent the student graduating in minimum time, or (in more extreme cases) that may prevent the student graduating at all. With early intervention by a University academic advisor, the more serious consequences of a student’s continued poor performance may be prevented. Academic Standing is determined differently for undergraduate and postgraduate students.

Academic Standing for Undergraduate Students
A student’s Academic Standing is determined by two factors: his or her academic standing at the end of the previous standard 14-week session and his or her academic achievement in the current 14-week session. In normal circumstances, academic achievement is classified as satisfactory if the number of units of credit in all courses passed is at least half the total number of units attempted. If it is not satisfactory, academic achievement
is classified either as poor if some units are passed (but fewer than half the total number attempted), or nil if no units at all are passed. If 6 or fewer units of credit are attempted, then academic achievement is classified as indeterminate if any of these units are passed, or as poor if no units at all are passed.

Table 1 indicates how each academic achievement classification is determined. The far right-hand column describes how a student's academic standing at the end of the current session is derived from that student's academic standing at the end of the previous session.

Table 2 lists the undergraduate academic standing categories and their implications. Each student not in Good Standing is assigned an academic advisor, whom the student consults to discuss his or her progress, plans for improving results, and future enrolment options. The student is also encouraged to contact other University services, especially the Counselling Service and the Learning Centre, who can offer advice on ways in which the student may enhance his or her academic performance.

The usual effect is modified in certain situations:

- as it is not possible to skip Suspension, a student whose previous standing was Probation 2 must pass at least half of the attempted units to avoid Suspension. A similar rule applies to Probation 4 in respect to Exclusion.
- after Suspension, a student is assigned Probation 3. The student may then be assigned to Probation 1, if he or she passes half of the attempted units in the first session after returning (i.e. during Probation 3) from Suspension. Thus, two successive satisfactory sessions are required for Good Standing to be regained. If poor progress is recorded the student moves to Probation 4. If nil progress is recorded the student moves to Exclusion and
- in exceptional circumstances a student's academic advisor, in consultation with the program authority, may alter the student's standing. The usual action in this case is to retain the previous standing or to move the standing one step instead of two.

### Academic Standing – Re-enrolment Appeal Procedures

In June 2000, the University's Academic Board adopted the following rules governing appeals against suspension or exclusion:

1. Students who are suspended or excluded from a program have the right to appear before an Undergraduate Re-enrolment Appeal Committee and a Postgraduate Re-enrolment Appeal Committee of the Academic Board will be constituted for the purpose of hearing such appeals.
2. Each Committee will have a membership of five members of academic staff (with a quorum of three) and will be chaired by a member of the Academic Board nominated by the President. The remaining members of the Committee need not be members of the Academic Board but will be nominated by the President taking into account their relevant experience and expertise. Members will not currently be involved in managing student progress and will disqualify themselves if they have previously been involved in the case of a particular student.
3. The decision of the Committee shall be final.
4. The notification to students that they have been suspended or excluded shall indicate that they may appeal that decision to the relevant Re-enrolment Appeal Committee. The appeal must be lodged with the Registrar within fourteen days of the date of notification; in special circumstances a late appeal may be accepted at the discretion of the chairperson of the Appeal Committee.
5. In lodging such an appeal with the Registrar, students should provide a complete statement of all grounds on which the appeal is based.
6. The Appeal Committee shall determine appeals after consideration of each appellant's academic record and stated grounds of appeal. Students may elect to appear before the Committee and/or be represented.

### Assessment

(See also ‘Assessment Policy’ under ‘Other University Policies & Procedures’)

#### Assessment of Progress

In the assessment of a student's progress in a program, consideration may be given to work in laboratory and class exercises and to any term or other tests given throughout the year, as well as to the results of written examinations.

#### Results of Assessment

Assessment result advices include the final composite marks students achieve in courses taken that session.

Passes are graded as follows:

- **High Distinction**: an outstanding performance
- **Distinction**: a superior performance
- **Credit**: a good performance
- **Pass**: an acceptable level of performance
- **Satisfactory**: satisfactory completion of a course for which graded passes are not available

---

**Table 1: The effect of the current session's achievement on Academic Standing:**

<tbody>
<tr>
<td>Good Standing</td>
<td>May continue in program</td>
</tr>
<tr>
<td>Referral</td>
<td>Recommended to consult Faculty advisor to discuss academic progress</td>
</tr>
<tr>
<td>Probation 1</td>
<td>Required to consult assigned advisor who advises on and approves next session's program</td>
</tr>
<tr>
<td>Probation 2</td>
<td>Required to consult assigned advisor, who approves next session's program. Student must improve to avoid suspension</td>
</tr>
<tr>
<td>Suspension</td>
<td>Not permitted to re-enrol for two standard sessions (one year)</td>
</tr>
<tr>
<td>Probation 3</td>
<td>Return from suspension period</td>
</tr>
<tr>
<td>Probation 4</td>
<td>Required to consult assigned advisor, and must improve to avoid exclusion</td>
</tr>
<tr>
<td>Exclusion</td>
<td>Excluded from the University for four standard sessions (two years)</td>
</tr>
</tbody>
</table>
Pass Conceded: this may be granted provided that the overall performance is considered to warrant such a concession. A Pass Conceded in a course will allow progression to another course for which the former course is a prerequisite.

Notification of Results

Assessment results are available on the web via [https://my.unsw.edu.au](https://my.unsw.edu.au). You will need your Student ID and UniPass to use these services.

Review of Results

A student may make application to the Registrar for the review of a result. The application form must be submitted not later than fifteen working days after the date of confirmation of assessment results via the web.

A review of result may take one of two forms:

1. Checking that all marks have been included in the final composite mark.
2. An academic reassessment of a piece of work. Before applying for a reassessment, students must first discuss their performance in the course with the course examiner. If students still have reason to believe that the mark awarded does not reflect their performance, they may apply for reassessment. Reasons must be given to justify a request. Requests may be refused where insufficient reasons are put forward.

Examinations

Examinations are held in June/July and in November/December. It is inadvisable for students to make any vacation travel arrangements within the examination period until dates for all assessment requirements have been finalised.

Provisional timetables are posted on the University website/intranet in May and October.

Final timetables are posted on the University website/intranet in May and October.

Clash of examinations: Students must advise UNSW Student Central of any clash in examinations as soon as the provisional timetable is released. The following website provides important information about the rules and procedures governing examinations at UNSW. It is the students’ responsibility to be aware of these rules and procedures: [https://my.unsw.edu.au/student/academiclife/assessment/examinations/examinations.html](https://my.unsw.edu.au/student/academiclife/assessment/examinations/examinations.html)

Special Consideration – Illness and Misadventure

On some occasions, sickness, misadventure, or other circumstances beyond students’ control may prevent them from completing a course requirement or attending or submitting assessable work for a course. Such assessable requirements may include formal end of session examination, class test, laboratory test, seminar presentation, etc. It is also possible that such situations may significantly affect your performance in an assessable task. The University has procedures that allow students to apply for consideration for the affected assessments. Depending on the circumstances, the University may take action to allow students to overcome the disadvantage; e.g. offer an additional assessment or extend a deadline.

Students should note that merely submitting a request for Consideration does not automatically mean they will be granted additional assessment, nor that they will be awarded an amended result. For example, if a student has a poor record of attendance or performance throughout a session/year involving only three consecutive days or a total of five days within the teaching period of a session is not considered sufficient grounds for an application.

Applications are accepted only in the following circumstances:

1. Where academic work has been hampered to a substantial degree by illness or other cause. Except in unusual circumstances a problem involving only three consecutive days or a total of five days within the teaching period of a session is not considered sufficient grounds for an application.
2. The circumstances have to be unexpected and beyond your control. Students are expected to give priority to their University study commitments and any absence must clearly be for circumstances beyond your control. Work commitments are not considered a justification.
3. An absence from an examination should be supported by a medical certificate or other document that clearly indicates you were unable to be present.
4. A student absent from an examination or who attends an examination and wants to request special consideration is normally required to provide a medical certificate dated the same day as the examination.
5. An application for special consideration has to be provided within three working days of the assessment to which it refers. In exceptional circumstances an application may be accepted outside the three-day limit.

To give the University sufficient and appropriate information on which to base its decision about your request, you must support your application with certified official documentation that normally contains at least the following key information:

(1) the assessment task/s for which you are seeking consideration
(2) the dates/deadlines associated with these tasks
(3) the basis of your request i.e. the nature of your misadventure, illness, etc.
(4) the date/s on which you were seen by the professional/authority providing your official documentation
(5) the date of the illness or misadventure or the dates of the period of time of the illness or misadventure
(6) the professional’s/authority’s assessment of the severity of your illness or misadventure and opinion of the likely effect on your capacity to undertake the assessment task/s concerned.

Items 4. to 6. need to be certified by the provider. For example, by your medical practitioner or other health professional (for illness or injury) or counsellor (for personal or family problems), so you will need to make the provider aware of the University’s requirements.

For causes other than sickness, (e.g. road accident, court hearing, or death of a relative) written evidence (e.g. a police report, a court summons, or a death certificate) instead of the documentation required in 4. above is acceptable (i.e. Section B of the Consideration form need not be completed).

You should note that Consideration requests normally will not be considered:

- unless the application is made on the appropriate form;
- unless all the key information is provided;
- if more than 3 days have elapsed since the assessment for which Consideration is sought;
- if the assessment task is worth less than 20% of the total course assessment, unless the student can provide a Medical Certificate that covers three consecutive days.

In exceptional circumstances the University may waive these requirements, for example, if an accident or sudden illness occurs which requires your immediate hospitalisation.

How to apply for Consideration

A student must make formal application for Consideration for the course/s affected as soon as practicable after the problem occurs and within three working days of the assessment to which it refers.

The application must be made on the ‘Request for Consideration’ form available from UNSW Student Central (or the Student Centre at your campus), from faculty and program offices, the University Health Service, the Counselling Service or from the web at: [https://my.unsw.edu.au/student/atoz/SpecialConsideration.html](https://my.unsw.edu.au/student/atoz/SpecialConsideration.html)

To assist you the ‘Request for Consideration’ form has a sheet attached explaining the procedures and the information required. The form and information sheet must be taken with you when you obtain the certification so as to ensure all the key information is provided.

The completed application form must be submitted to the Student Centre at each campus.

Applications are accepted only in the following circumstances:

1. Where academic work has been hampered to a substantial degree by illness or other cause. Except in unusual circumstances a problem involving only three consecutive days or a total of five days within the teaching period of a session is not considered sufficient grounds for an application.
2. The circumstances have to be unexpected and beyond your control. Students are expected to give priority to their University study commitments and any absence must clearly be for circumstances beyond your control. Work commitments are not considered a justification.
3. An absence from an examination should be supported by a medical certificate or other document that clearly indicates you were unable to be present.
4. A student absent from an examination or who attends an examination and wants to request special consideration is normally required to provide a medical certificate dated the same day as the examination.
5. An application for special consideration has to be provided within three working days of the assessment to which it refers. In exceptional circumstances an application may be accepted outside the three-day limit.

To give the University sufficient and appropriate information on which to base its decision about your request, you must support your application with certified official documentation that normally contains at least the following key information:

(1) the assessment task/s for which you are seeking consideration
(2) the dates/deadlines associated with these tasks
(3) the basis of your request i.e. the nature of your misadventure, illness, etc.
(4) the date/s on which you were seen by the professional/authority providing your official documentation
(5) the date of the illness or misadventure or the dates of the period of time of the illness or misadventure
(6) the professional’s/authority’s assessment of the severity of your illness or misadventure and opinion of the likely effect on your capacity to undertake the assessment task/s concerned.

Items 4. to 6. need to be certified by the provider. For example, by your medical practitioner or other health professional (for illness or injury) or counsellor (for personal or family problems), so you will need to make the provider aware of the University’s requirements.

For causes other than sickness, (e.g. road accident, court hearing, or death of a relative) written evidence (e.g. a police report, a court summons, or a death certificate) instead of the documentation required in 4. above is acceptable (i.e. Section B of the Consideration form need not be completed).

You should note that Consideration requests normally will not be considered:

- unless the application is made on the appropriate form;
- unless all the key information is provided;
- if more than 3 days have elapsed since the assessment for which Consideration is sought;
- if the assessment task is worth less than 20% of the total course assessment, unless the student can provide a Medical Certificate that covers three consecutive days.

In exceptional circumstances the University may waive these requirements, for example, if an accident or sudden illness occurs which requires your immediate hospitalisation.
You also need to follow any local procedures of the relevant course or program authority. You will have been informed of these procedures by the course authority or faculty representative in the course brochure information sheet made available to you upon commencement of the course or program. For example, as well as submitting your application through UNSW Student Central, the course authority may require you to contact them. If you need advice about any of the policies or procedures relating to Consideration contact UNSW Student Central.

What happens after you make the application

If your application meets the University’s criteria for acceptance, it is stamped, a copy is taken and the original is returned to you. Only documentation that meets the requirements listed above will be accepted. No consideration will be given when the condition or event is not related to performance or is considered not to be serious. Details, including the summary information provided by you, are made available to the relevant course authority/faculty. The University’s procedures ensure that confidentiality of this information is maintained.

Note that many course authorities require you to take action within a specified period of time to determine the outcome; for example to consult the course authority’s notice board, to contact the authority in person or by phone, etc. Details of the arrangements will have been made available to you in the course information sheet. Failure to take this action will normally result in forfeiture of any additional assessment granted to you.

On the basis of the information provided in your application, a decision is made regarding the appropriate response in your particular case. The following may be taken into account:

1. Your performance in other items of assessment in the course.
2. The severity of the event.
3. Academic standing in other courses and in the program.
4. History of previous applications for special consideration.

For enquiries relating to your application, please contact the relevant course authority or head lecturer of the course.

What outcomes you can expect

If your application for illness or misadventure is accepted, the following may ensue:

1. No action.
2. Additional assessment or a supplementary examination. Additional assessment may take a different form from the original assessment. If you are granted additional assessment, the original assessment may be ignored at the discretion of the course authority. Consequently, a revised mark based on additional assessment may be greater or less than the original mark.
3. Marks obtained for completed assessment tasks may be aggregated or averaged to achieve a percentage.
4. The deadline for assessment may be extended.
5. Discontinuation from the course. This is unlikely to occur after an examination or final assessment has taken place.

The following examples are included to give an indication of the outcomes you can expect in the most common circumstances. (Many course authorities include similar examples for the special types of assessment used by them in their course information sheets.)

Formal end of session examinations

- If you miss such an examination through an illness, other circumstance beyond your control, etc., which is certified as being severe enough to have prevented your attendance, in general, you will be granted additional assessment. This is usually in the form of a supplementary examination.
- If you attend an examination but prior to it an illness or other circumstance beyond your control occurs which, because of its duration or severity, is certified as having a significant effect on your preparation for that course, in general you will be granted additional assessment. This is usually in the form of a supplementary examination.

Note: In either of these cases if you have attained a Pass in the course concerned from assessment tasks completed during session, it may not be regarded as necessary to grant you additional assessment.

- If you attend an examination but have an illness on the day, which is either certified as not having a significant effect on your performance (such as a minor head cold), or for which you were examined after the illness had subsided, you will not be granted additional assessment.

Class tests, laboratory examinations, vivas

The same types of outcomes as outlined above for formal end of session examinations normally will apply in the circumstances listed.

Field work, practical placements, etc.

Each course authority conducting field work, etc., has in place appropriate mechanisms for dealing with consideration for these type of assessments.

Additional assessment

The time at which any additional assessment granted to you is held, is determined by the course authority concerned. Consult the course information sheet for detailed information about the times and arrangements for the various additional assessment tasks in that course.

Most course authorities conduct supplementary examinations in the period immediately after the formal end of session examination period. For example, for the end of Session 2, supplementary examinations are often held in the three-week period just prior to Christmas. In general, course authorities will provide only one opportunity for you to sit a supplementary examination except in exceptional circumstances. You need to ensure you will be available during this period to take any supplementary examination granted to you.

You should expect any additional assessment granted to you to be of the same degree of difficulty as the original assessment task which it replaces.

Student Contact Details

It is essential that students maintain current email and postal addresses. The University cannot accept responsibility if official communications fail to reach students who have not amended their postal and/or email address as soon as possible after any change of postal and/or email address. See also email Policy in this Handbook.

Student ID Card

All students enrolling at the University are issued with a student identification card. The number appearing on the card is the student identifier used in the University’s records. This number should be quoted in all correspondence.

1. The card must be carried at the University and shown on request. It must be presented when borrowing from the University libraries, when using library facilities and when applying for concessions. The card is encoded by University Security to allow building access.
2. The card is not transferable.
3. The student to whom the card has been issued must notify the University Security (unsw located in the Red Centre) of its loss or theft. Failure to do so may result in the cardholder being held responsible for items issued on the card after its loss or theft.
4. The card is valid only for the period of enrolment each year.
5. The cardholder accepts responsibility for all library books issued on his/her card and agrees to return books by the due date.
6. If the card is damaged or becomes otherwise unusable, it is the cardholder’s responsibility to seek replacement.
7. The card always remains the property of the University and must be returned to it when the holder leaves the University.

Note: Students may be required to provide photo identification such as a driver’s licence or passport in special circumstances where their student ID card does not satisfactorily verify their identity.

Graduation

The University’s policy is to graduate at the next series of ceremonies all students who have completed requirements for their degree or diploma in the previous academic session. Graduands who are indebted to the University will not be permitted to graduate until the debt has been cleared.
The University usually holds graduation ceremonies in the following periods:

March/May: All degrees and diplomas
June/July: Overseas graduation ceremonies in Hong Kong and Singapore/Kuala Lumpur. (No ceremony will be held in Kuala Lumpur in 2006).
September/October: All degrees and diplomas
December: University College, Australian Defence Force Academy.

Undergraduate and research degrees within the Faculty of Medicine. Updated graduation information is posted on the myUNSW website each session before results for that session are released.

All graduates and potential graduates are expected to read the detailed graduation information on myUNSW, and to check their graduation details. In particular, graduates and potential graduates should check that their name, address and degree details are correct. The website is located at: https://my.unsw.edu.au/student/academiclife/graduations.html

Queries regarding graduations can be directed to the Graduations Section on (02) 9385 3092 or graduations@unsw.edu.au.

Information Technology Rules and Procedures

Introduction

The University is committed to using technology to support teaching and learning. For information on the IT resources and services available to students, please refer to ‘Information Technology Services’ in the ‘Student Services and Resources’ section below.

The rules and procedures relating to information technology at UNSW are detailed below.

Please note that students undertaking computing studies in any program are responsible for ensuring that they have appropriate back-ups of their work. Furthermore, work should not be stored on University computers as its security cannot be guaranteed by the University. Students who alter or delete another person’s work may be committing a criminal offence. Students should also note that it is against UNSW policy to knowingly spread computer viruses.

UniPass

UniPass is the Universal Password System that allows students access to UNSW Online Services and the University-wide network. New students will be required to set up their personal online student account in order to access the online services. All new students must also activate their student account by agreeing to the terms and conditions of use of UNSW’s electronic services. For more information, visit: www.disconnect.unsw.edu.au/student/zhome.htm.

ELISE (Enabling Library and Information Skills for Everyone)

Information literacy is a UNSW graduate attribute. For commencing students, a basic level of information literacy is necessary to enable each student to undertake their academic program effectively. It has been found that many students, regardless of their UAI, or other entry criteria, do not clearly understand the use of information in the university environment.

ELISE is a mandatory online tutorial on how information is organised and used in the University context. It is a university requirement for all new undergraduate and postgraduate coursework students to complete the tutorial and attain at least 80% in the ELISE quiz following the tutorial.

More information is available from:
http://my.unsw.edu.au/student/atoz/ELISE.html

The ELISE tutorial and quiz is accessible from the Web CT homepage: http://webct.edtec.unsw.edu.au/webct/public/home.pl

Email Policy

Each student is given an email address as part of his or her enrolment at UNSW. It is essential to check email regularly since this is the main mode of formal communication between students and the University.

All students have a central email address of the form z1234567@unsw.edu.au, where ‘1234567’ is the student number. It is a requirement that all students read email that is sent to this address, as it may contain vital administrative or teaching material not provided any other way. If a student uses an email account other than the centrally provided UniMail account, the student must arrange to forward UniMail to an account that they do use. For the complete policy on electronic mail, please see: www.its.unsw.edu.au/policies/policies_home.html

IT Requirements for UNSW Students

Please refer to the following website for home computer guidelines or contact the IT Service Desk on (+61 2) 9385 1333:
www.its.unsw.edu.au/policies/policies_home.html

Rules for the Use of Computing and Electronic Communications Facilities for Students

UNSW policy is to facilitate the use of information resources by the provision of appropriate and timely technology solutions and technical assistance, and a key strategy of the UNSW Corporate plan is to use information technology in support of the educational, research and administrative activities of the University. Making information technology more readily available contributes significantly to improving academic quality and student access.

While at UNSW, students are responsible for ensuring that their use of computing and communications facilities is ethical and lawful. They are responsible for ensuring that their actions are not detrimental to the property of the University and the rights of others. The following rules, which have been made by Council under the University’s Student Misconduct Rules, apply across all UNSW facilities. In certain local systems, additional restrictions may apply. The manager of the relevant resources will advise these additional restrictions. These rules apply to all student use of University computing or communications facilities. By using any of these facilities, the student is acknowledging that they have read and will abide by these rules. Breach of any of these rules may be considered student misconduct.

1. Definitions

1.1 “account” refers to any computing or electronic communication resource allocated for sole or shared usage by a student and protected from general usage by a security system. Such a resource might include, but is not limited to, storage space; access to a computer terminal; processor time; printed output or dial-up access time. A security system might include, but is not limited to, password protection.

1.2 “communications” refers to the use of any of the University’s computing and/or electronic communications facilities, including, but not limited to, telecommunications, PABX and facsimile equipment to access or transmit information.

1.3 “computing facilities” refers to:
(1) all networked services and computer hardware and software, owned, leased or used under licence by the University including the University’s academic and administrative systems;
(2) computing facilities maintained by other bodies but available for use through an agreement or agreements with UNSW; and
(3) all other computing facilities, wherever situated, where access is by means of UNSW-provided services.

1.4 “University” means the University of New South Wales.

1.5 “user” means any person or persons utilising, accessing or attempting to gain access to the computing or communications facilities at UNSW.

Any reference to the singular includes a reference to the plural and vice-versa in these rules.

2. Legal framework

Users of computing and communications facilities must be aware that use of these facilities is subject to the full range of State and Federal laws that apply to communications and to the use of computers, as well as any other relevant laws. This includes copyright, breach of confidence, defamation, privacy, contempt of court, harassment, vilification and anti-discrimination legislation, the creation of contractual obligations, and criminal laws.

3. Access

3.1 Access to the University’s computing and communications facilities is available to students for teaching, research and administrative purposes, and for other specifically authorised activities.

3.2 Students are entirely responsible for their own accounts and any actions or materials resulting from any use of their accounts.
3.3 The University reserves the right to withdraw the availability of any computing or communications facility without notice.

3.4 Students may use only those facilities to which they have been given specific access by the University or which have been advertised for general student usage, and to the extent and in the manner that they are authorised to use them.

3.5 Students are not to assist persons who do not normally have access to a resource to obtain such access.

4. Non-permitted uses

The following uses and/or activities are not permitted:

4.1 Any use not related to University teaching, learning and research, unless specifically authorised by the University. If a student is unclear of his/her access for purposes unrelated to University teaching, learning and research, clarification should be sought from the relevant University system manager or student supervisor.

4.2 Any commercial purpose.

4.3 UNSW facilities are not to be used for:

(1) the deliberate or negligent preparing, storing, displaying of racist, pornographic or other offensive material;

(2) the deliberate receiving or transmitting of racist, pornographic or other offensive material unless it is a requisite component of a program of study and has the approval of the relevant lecturer or supervisor.

4.4 Use of the facilities to harass any person (whether within or outside the University) or interfere with their work. Examples of breaches to this rule could include the sending of obscene, abusive, fraudulent, threatening or repetitive messages, as well as unsolicited non-University work-related email.

4.5 Tampering with other users’ accounts in any way, including attempting to thwart the system security, setting password traps, and any other behaviour designed to interfere with other users’ access to the facilities.

4.6 Use of other users’ accounts, a false identity or another person’s identity to gain access to any aspect of the facilities.

4.7 Allowing or assisting another person to obtain access to resources or information not authorised.

4.8 Smoking, eating or drinking in computer laboratories or while using computing facilities at the University.

4.9 Behaviour that impacts adversely on other users in shared spaces, such as making unreasonable noise.

4.10 Deliberately or negligently interfering with the operation or performance of a system by:

- generating excessive load, use of storage capacity, network traffic, etc.;

- physically damaging or adjusting the equipment. Any such tampering, vandalism, theft or wilful and/or reckless damage may be referred to the police;

- introducing viruses or other software components designed to interfere with the normal operation of a system;

- deleting, adding or modifying information relevant to the system’s operation;

- obtaining extra resources without authorisation;

- excessive printing;

- creating excessive network links.

4.11 Circumventing, or attempting to circumvent security or obtaining or attempting to obtain information that would allow security to be circumvented.

4.12 Using a resource not allocated or accessing material not permitted, whether by breaching security, using another’s account or taking advantage of another person’s negligence. This includes the use of resources in amounts or to a degree other than authorised.

4.13 Copying, disclosure of, transferring, deleting, examining, renaming, changing or adding to software, data or information belonging to UNSW or another person unless permission has been granted or the software, data or information is clearly intended to be public.

4.14 Activities that impact adversely on the University’s reputation.

5. Copyright and licences

Students will not copy, disclose or transfer any computer software on the computing and communications facilities provided by the University in such a way as to breach any right of any person (including copyright) without the express written permission of the appropriate University officer or head of school/unit/centre.

6. Security

6.1 The University wishes to maintain a secure, efficient computing and communications environment. It has the right to examine all computer files and to monitor computer usage to ensure compliance with these rules.

6.2 If necessary, computer processes that are actively causing a problem will be terminated, or access to any files related to a breach of the rules removed.

7. Related Documents

These rules operate together with other relevant policies, rules and guidelines of the University on the use of its facilities and resources. These include:

- Student Misconduct Rules
- Breach of Discipline and Misconduct in Assessment
- Email Policy.

8. Breaches

Students found in breach of these rules are liable to disciplinary action under these rules and the Student Misconduct Rules. Disciplinary action could result in a warning, a reprimand, suspension of access to computing facilities, a fine or exclusion from the University for a period.

9. Schedule of Fines

The Chief Information Officer may impose fines of up to $1,000.

Website Policy

The increasing reliance on UNSW websites as a means of communicating information and providing services has resulted in the need for an updated and consolidated University website policy.

The scope of this policy includes personal websites. Personal websites are defined as sites owned by, or affiliated to, students and hosted by the UNSW network. It also includes sites hosted on the UNSW network which are affiliated with, but not controlled by UNSW e.g. the Student Guild, Student Union, Kingsford Legal Centre.

The complete UNSW Website Policy is accessible at: www.its.unsw.edu.au/policies/pol_web.html

Other University Policies and Procedures

Access to Assessment Information and Freedom of Information

The University of New South Wales is committed to a policy of openness regarding exchange of information in matters involving the assessment of students. To this end:

1. Course authorities are responsible for ensuring that a clear written statement of expectations is provided for each course which should include a statement of the objectives of the course: its assessment plan, including weights allocated to each significant assessable component and related submission dates; the kind of evidence required for consideration to be given to late submissions; attendance, timetable and other requirements, to be presented at the first class of each session/term, recognising always the ability to negotiate changes with the students concerned within the first week.

2. All items of assessment completed during session should be marked promptly and returned to students with a mark or grade and, where appropriate, comments. Course authorities where appropriate should provide information on the distribution of results in all items of assessment so that students can gauge their own performance against that of the other members of the class.

3. Final composite marks in courses as determined by Faculty Assessment Review Groups should continue to be provided to students.

4. Final examination scripts (other than those returned to students) are to be retained in the School for six months. Students should have access to their own scripts and be able to consult the examiner or the course authority on their performance. Faculties and Boards of Studies may determine the conditions under which access may be granted.

5. Where examination question papers or other forms of assessment need to be kept confidential (e.g. multiple choice question papers where questions are reused in later examinations) arrangements should be made for students to receive advice on their performance with reference to their own examination script but in a way which does not prejudice the examination mode.
6. In the case of the examination of theses and project reports, the examiners’ report should be released to the student, following determination of the grades of examiners. The names of examiners, while remaining undisclosed, prior to assessment, should be released subsequently unless a particular examiner requests that this information be not released.

Information about how to make a Freedom of Information application and the charges involved may be obtained from UNSW Student Central (Student Enquiries), the UNSW Freedom of Information Officer (+61 2) 9385 2860 or the web at: www.infofo.unsw.edu.au/admin/privacy/index.html

Assessment Policy

This is an excerpt from the UNSW Assessment Policy. The full policy can be found online at: https://my.unsw.edu.au/student/academiclife/assessment/AssessmentPolicyIndex.html

1. Introduction

1.1 Principles underlying assessment

The University’s teaching programs are designed to provide a rich diversity of formal and informal learning opportunities for students. University students learn for many reasons: to acquire knowledge for its own sake; to prepare themselves for professional work and careers; and to develop discipline-specific as well as generic skills, for example, the skill to learn independently of a teacher.

A University award (as documented on a testamur) certifies that a student has demonstrated his or her understanding of what has been learned at a standard commensurate with that expected of the holder of the qualification for which the student has been enrolled. Assessment is integral to this certification procedure.

Some assessment is formative. That is, it is specifically intended to assist students to identify weaknesses in their understanding, so that they may improve their understanding and enhance their learning. Other assessment is summative; its objective is primarily to pass judgment on the quality of a student’s learning, generally in terms of assigned marks and grades. Furthermore, critical reflection on the outcomes of course assessments, both formative and summative, can inform teachers and students, not only about the quality of student learning but also about the effectiveness of teaching. In the design and administration of assessments and the reporting of summative assessment results, the University has a commitment to promoting open, equitable and accountable procedures. The University is also committed to providing valid and reliable assessment information, in accord with standards in which students, potential employers and accrediting bodies can have confidence.

1.2 Assessment in relation to course development and teaching methods

While teachers can contribute profoundly to students’ understanding of a discipline, students are ultimately responsible for their own learning. This responsibility extends beyond the assimilation of topics within the course. Students should ensure that they have the necessary assumed knowledge for the course, that they have an adequate grasp of academic English, that they satisfy attendance requirements, that they familiarise themselves with the course assessment requirements, and that they prepare properly for those assessments by the due dates.

For English language requirements and assessed knowledge, please refer to the ‘Admission Requirements and Procedures’ entry in this Handbook.

2. Timing and Weight of Assessments

Students are expected to reach the objectives of a course progressively throughout a session. They should be set tasks during the session that allow their progress to be evaluated against established criteria. Such in-session tasks should contribute to the final assessment in a course.

Assessment tasks should be designed carefully, first, to keep in proportion student time commitment and the weight of the assessment task in the overall assessment, and second, to reflect, as far as possible, the importance of each task in determining the effectiveness of students’ meeting the course objectives. This means more than that an important task, such as a final examination, is weighted heavily.

The Academic Board has determined that the normal workload expectations of a student are 25-30 hours per session for each unit of credit, including all contact hours, preparation and time spent on all allowable work.

Care should also be taken to avoid the imposition of a heavy imbalance of assessment load toward the second half of the session. In disciplines where comprehensive assessment is possible only when students have completed a significant proportion of the session’s work, milestone tasks should be set to enable students to build towards the submission of a more substantial assessment task closer to the end of the course. While assessment regimes will vary across the disciplines of the University, the following guidelines represent accepted norms.

2.1 Except in highly unusual circumstances, one or more tasks should be set, submitted, marked and returned to students by the mid-point of a course, or no later than the end of Week 8 of a 14-week session. This is particularly important when students are considering discontinuing a course (See 8. Discontinuation and Effective Feedback).

2.2 Although students need regular feedback on their progress, set assessment tasks should be kept to the minimum that is sufficient to enable students to make judgements about their progress.

2.3 Deadlines for assessment tasks should be well separated in time so as to give students periods of time for reflective learning that are free from the pressure engendered by a looming deadline.

2.4 In some disciplines, students are expected to practice skill development continuously. To evaluate students’ ability to perform such on-going tasks, consideration should be given to strategies for self-assessment. In this way, students can obtain evidence concerning their level of understanding of the work while avoiding the stress of frequent formal appraisal by an examiner.

2.5 No examination worth 20% or more of the assessment in a course should be scheduled during the final week of a standard session, and no assessment tasks should be set in the period between the end of session and start of the formal examination period. Study for these tasks inevitably impacts on other work undertaken during this period, including the preparation for formal examinations.

2.6 Students should not normally be required to sit 3 exams in 2 consecutive days.

2.7 Apart from examination scripts, all assessed work should be returned to the student, preferably in a class context where the student has the right to query the assessment for resolution either then or at a later time. Examination scripts may be returned at the discretion of the course authority.

2.8 Course handouts should advise students at the beginning of session how all assessment results are to be combined to produce an overall mark for the course. In particular, the handout should make expressly clear:

• the weight of each task in contributing to the overall mark;
• the formulas or rules used to determine the overall mark;
• minimum standards that are applied to specific assessment tasks, and the consequences if such standards are not met (including failure to submit particular tasks);
• rules regarding penalties applied to late submissions; and
• precise details of what is expected in terms of presentation of work for assessment. Emphasis should be placed on appropriate referencing conventions and requirements, on the degree of cooperation permitted between students, and on what constitutes plagiarism and the consequences of committing it.

3. Assessing Students’ Progress

The University is committed to evaluating students’ progress towards the completion of their degree requirements and in relation to the objectives of each course in a way that is meaningful to graduates and to employers. Thus, the University implements several procedures for the preparation for and fair conduct of examinations, and also strategies for the finalisation and communication of assessment results to ensure that there is consistent interpretation of progress indicators across the institution.

3.1 Conduct of examinations and of other forms of assessment

Examinations are conducted by the Examinations Section and by schools. It is important that all examinations are conducted under the same conditions and that those conditions are strictly adhered to. Schools should consult the Guidelines for the conduct of examinations, which are located at: https://my.unsw.edu.au/student/academiclife/assessment/examinations/examinationrules.html

Assessment should be anonymous where this is consistent with the learning outcomes of the course. Schools should develop and inform students of their policy in regard to anonymous assessment. The policy should indicate conditions under which anonymous assessment will normally be applied. In anonymous assessment, the student’s ID number only should appear on the work submitted for marking. The number is subsequently paired with the name of the student when the mark is recorded. In other cases, for example class presentations, individual viva voice assessment and small size classes, anonymous marking will not be possible.
Students with disabilities, in certain circumstances, may be eligible for alternative provisions for assessments or examinations. Provisions for school or faculty final examination and assessments should be arranged with the relevant academic staff member or school administrative officer, in conjunction with the Equity Officer, Disability. Provisions for the end of session examinations should be arranged with the Equity Officer, Disability, who will liaise with the Examinations Section. Information on equity issues at UNSW is located at www.equity.unsw.edu.au

Course authorities should ensure that course convenors follow the guidelines issued by the Registrar for the ‘Preparation and Printing of Examination Papers’. Course convenors are responsible for the accuracy of the examination papers in the courses for which they have authority.

3.1 Scheduling assessment and examinations

The University recognises that there are students whose religious faith prohibits them from sitting for examinations or attempting assessment during certain periods or on particular holy days. The University tries, wherever possible, to accommodate students so that they may fulfil both their religious and University obligations. Course convenors and other academic staff are requested to observe this policy and where possible to consult with students so that alternative arrangements may be discussed.

3.1.1 Group-based assessment

Wherever students’ grades derive from an assignment that has been completed in a group, the students should know from the outset how the marks are to be determined. In particular, students should be informed if individual or group-based grades are to be awarded. As in all assessment tasks, the students should be told the criteria against which the group’s assessment or presentation will be evaluated. It is also recommended that students be asked to complete self and peer evaluations of contributions to the group’s final product, and that students be provided with a handout that informs them about this when the group-based assignment is given to them.

3.1.2 Finalisation of results of assessment

There are two stages in the finalisation of the results that are provided to the Registrar. In the first stage, course authorities are expected to calculate for each student enrolled in each course for which they are responsible a composite mark. It is appropriate that composite marks be calculated only when, on the basis of the work completed, a reasonable assessment can be made of the student’s standard of knowledge and understanding of, and skills in, the course. The recommended mark should normally fall between 0 and 100. The minimum pass is recorded as 50 and marks above 50 reflect the level of performance, according to the categories identified in sub-section 3.2.2 below. If necessary, the provisional composite marks should be scaled so as to achieve this objective. It is expected that only minor adjustments should be required to establish suitable standards.

The course authority is then required to submit a provisional composite mark to the Faculty Assessment Review Group (FARG), or, in cases where it is inappropriate to calculate a provisional composite mark, a recommendation about any action that is to be taken.

The full range of marks and symbols used by UNSW is set out below. Some symbols represent decisions that can be made only by the FARG. Course authorities should not include these on their return of results. Course authorities may, however, use some symbols to convey to the FARG their recommendation as to further action to be taken with respect to a student’s result. These are WD, WC, UF (with a composite mark), AF, EC, and RD.

Course authorities may, in the time between the assessment and the meeting of the FARG, require students to present themselves for further assessment. Any subsequent alteration in marks should be advised by the course authority at the meeting of the FARG.

In the second stage, the FARG considers the provisional marks and recommendations and decides the final marks or any recommended further actions.

Faculty Assessment Review Groups may invite course authorities who are not members of the relevant Faculty Board to attend assessment meetings at which composite marks for courses within their responsibility are considered. If the course authorities or their nominees are unable to attend any meeting of the FARG, notes on the student cases to be considered should be provided for the presiding member prior to the meeting. If the course authorities or their nominees do not attend, the committee shall have full authority to make decisions on the standing of those courses for which the course authorities are responsible. Provided that the general statements in this document are not contravened, additional procedures and guidelines for the FARG may be laid down by its Faculty Board. If, when the composite marks for the course are being finalised, course authorities and/or Faculty Assessment Review Groups propose to vary the marks returned by the course convenor, they should advise the convenor on the action taken and the reasons.

3.2 Graded passes

When a composite mark falls in the range 50-100, the grade is determined in accordance with the following categories:

<table>
<thead>
<tr>
<th>Mark Range</th>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>85-100</td>
<td>High Distinction</td>
<td>Outstanding performance</td>
</tr>
<tr>
<td>75-84</td>
<td>Distinction</td>
<td>Superior performance</td>
</tr>
<tr>
<td>65-74</td>
<td>Credit</td>
<td>Good performance</td>
</tr>
<tr>
<td>50-64</td>
<td>Pass</td>
<td>Acceptable performance</td>
</tr>
</tbody>
</table>

3.3 Unsatisfactory failure

The symbol UF (Unsatisfactory Fail) may also be used with a composite mark in the range 40-100 where a student has not performed satisfactorily in an essential item of assessment. UF should not be used to indicate that a student has failed to reach an acceptable standard in a major assessment task such as a final examination unless it is an essential item of assessment. Normally, the assessment weights or formulas should be adjusted so that failure in a major piece of assessment is reflected in an overall mark less than 50. UF should also not be used by a Faculty Assessment Review Group to circumvent the award of a conceded pass.

3.4 Ungraded pass/fail

Where graded passes are not awarded in a course, the grade SY (Satisfactory) is used to indicate that the student has attained the required standard of knowledge and understanding of, and skills in, the course. The grade FL (Fail) should be used to indicate that the student’s performance is below the minimum level of competence in the course.
3.2.5 Grade only

In special circumstances, when it is inappropriate to return a composite mark, the grades HD (High Distinction), DN (Distinction), CR (Credit), PS (Pass) and FL (Fail) may be used. Course authorities should be aware that a national mark is generally assigned to the grade in computing weighted averages (or WAMs). The notional mark used is High Distinction 90, Distinction 80, Credit 70, Pass 55 and Fail 25.

3.2.6 Composite marks below 50

Where the composite mark falls below 50, the Faculty Assessment Review Group will determine which of the following grades applies.

3.2.7 Pass Conceded

A Pass Conceded (PC) may be granted by a Faculty Assessment Review Group, provided a student's overall performance is considered to warrant such a concession. A Pass Conceded allows a student to progress to another course for which the former course is a prerequisite. A PC should not be submitted by course authorities.

In deciding whether a student is eligible for the award of a PC (Pass Conceded), Faculty Assessment Review Groups apply a standard concession algorithm. An undergraduate student will be considered for the award of a Pass Conceded on a mark returned by the course authority that falls between 46 and 49 inclusive, provided that any of the following conditions is met:

- the mark is 48 or 49 and the student’s term WAM is at least 53;
- the mark is 46 or 47 and the student’s term WAM is at least 55;
- the student’s cumulative WAM prior to the start of the current session is at least 55; or
- the student is a potential graduand with no failures in the current term.

However, a returned grade of UF cannot be converted into PC without reference to the course authority; and a student who has previously been awarded PCs for courses totalling 18 units of credit or more shall not normally be awarded further PCs. Whenever a Faculty Assessment Review Group decides not to award a PC in accordance with the standard concession algorithm, that decision should be able to be justified.

3.2.8 Failure

If a student has made no attempt at any assessment task, the result should be returned as AF (Absent Fail). An AF should not be returned simply because the student did not attend a final examination or complete some other single piece of assessment. In the absence of any of the conditions above, a mark should be returned.

3.2.9 Withheld results

To indicate the withholding of a student’s result, one of two symbols, a WD or a WC, is used, depending on the reasons for not finalising the result. In each case, a mark is returned.

WD: This symbol should be used to indicate that it is not yet possible or desirable to finalise a composite mark based on the work completed, or that the mark is not to be released until the student consults the course authority. WD is not appropriate when students have completed all assessment tasks but marking is not complete. In this case, LE (late entry) results are not awarded.

WC: This symbol refers to results that are withheld for special circumstances, or where further assessment is recommended for a student who through illness or some other acceptable misadventure has been prevented from taking one or more of the assessments or has been disadvantaged during the assessment.

Further assessment should not be granted when the composite mark, whether more or less than 50, accurately reflects the student’s level of achievement in the course.

Withheld results cause significant inconvenience. They should, therefore, be used sparingly.

3.2.10 Finalising withheld results

Each school should designate a specified period, as close as possible to the date on which results are released, during which supplementary assessment will be held, and inform the students of this in the course handout at the beginning of the session. Students should be advised that they are required to be available for supplementary assessment, if required.

Students whose results have been withheld (indicated by a WD or a WC) are advised by the Registrar to contact the course authority within the specified time that has been communicated in the course handout, but in any case no more than 5 days after the release of the results on the web, because it might be necessary to arrange for further assessment.

The deadlines for finalising withheld results are:

- Session 1: the first Friday in August
- Session 2: the second Friday in February
- Summer Session: the third Friday in February
- Winter Session: the third Friday in August.

If a student fails to contact the course authority within the specified time, a failure in the course may be recorded. All results not finalised by the relevant date will be converted to:

- a mark and grade based on the mark held in the examinations module, or to
- a grade of NC, which signifies that assessment in the course was not completed.

3.2.11 Other symbols

LE Late entry (or assessment not finalised) indicates that a result was not submitted on time by the course authority. It is the responsibility of the course authority to provide a composite mark at the meeting of the Faculty Assessment Review Group.

RC Enrolment continuing indicates that the course is taken over more than one academic session and the assessment will be finalised in a later session.

KD Result Deferred is used for project courses to indicate that the student is unable to complete in the current session. The student must re-enrol to obtain a result.

GP The mark falls in the range 46 to 49, and a decision whether or not to award a PC is pending. This is used to indicate to a Faculty Assessment Review Group that withheld results currently prevent the determination of a PC recommendation. All late results in the range 46 to 49 returned by a course authority should be entered as GP unless UF applies. Regularly, the UNSW concession algorithm is administratively applied to GP grades that are to be converted to PC or to FL, if all other results are finalised.

NC This symbol is used when a result has been withheld for an extended period of time, and there is no prospect of its being resolved.

3.2.12 Distribution of marks

The two principal approaches to the award of grades are referred to as the standards-referencing approach (in which students’ achievements are evaluated against some pre-determined criteria) and the norm-referencing approach (that assesses students in comparison with their peers or relevant cohort). Over a period of years, the distribution of marks in large classes has shown a consistency across all courses. Patterns of distribution for the current session and for previous sessions are available from the Registrar. In small classes, and in courses and programs with high entrance qualifications, an increased percentage of higher marks may occur. A similar shift in the distribution of marks typically occurs in later years of most degree programs. Course authorities and course convenors are advised not to pass or fail any given percentage of students, but should be prepared to give reasons for a distribution pattern that differs from that which is consistently found in the particular course.

For more information, please refer to the ‘Guide to UNSW Grades’, expressing grade distributions in international terms: https://my.unsw.edu.au/student/academiclife/assessment/GuideToUNSWGrades.html

3.2.13 Time for marking

Assessment of students’ work is a normal component of the duties of academic staff. The Head of School is expected to ensure that markers are not overloaded. While workload estimates vary across disciplines, one rule of thumb relates the amount of time spent by a marker to that spent by the student on the assessment task. For the grading of examination scripts, some schools use a ratio of roughly one-sixth to one-twelfth, depending on the complexity of the task and the level of objectivity used in determining a fair mark. For example, in an seven-hour day an experienced marker might be expected to assess between 14 and 28 entire three-hour examination scripts. In practice, marking may be distributed among several markers, each of whom assesses the corresponding part of each examination paper.

3.2.14 Submission of results

The Registrar is responsible for the provision of the means by which provisional results for each student in a course can be recorded
centrally. Such means might include the transfer of marks and grades in electronic form from systems maintained by the course authority. Course authorities must ensure that their systems conform fully to the Registrar’s specifications, that student lists are current at the time of submission, and that procedures are followed to check provisional results for accuracy prior to submission. Course authorities may elect to enter the results online. Care must be taken to ensure that any transcription that is required is checked manually.

Where the results of assessment are displayed, this should be done in a way that no student can identify another student’s results. This means that student IDs cannot be used because privacy of these cannot be assumed.

3.2.15 Students not formally enrolled in a course
If a student is not identified on a list of those formally enrolled in a course that is provided by the Registrar, normal electronic submission or online entry of a provisional result for the student in the course is not possible. Instead, the provisional result is to be forwarded to the Registrar using a form provided for the purpose (the form may be on paper or other medium at the Registrar’s discretion). Students will be enrolled in the course on a non-award basis and will be liable for the applicable tuition fee. The course may then be counted towards the student’s program at the discretion of the Registrar.

3.2.16 Confidentiality
Assessment is a confidential matter. No person involved in the process shall divulge to any unauthorised person any information about composite marks or standards in any course.

3.2.17 Student access to examination scripts
Examination scripts (other than those returned to students) are to be retained in the school for six months. Students should have access to their own scripts and be able to consult the examiner or the course authority on their performance. Faculties may determine the conditions under which access may be granted.

Where examination question papers or other forms of assessment need to be kept confidential (e.g. multiple choice question papers where questions are reused in later examinations) arrangements should be made for students to receive advice on their performance, with reference to their examination script, but in a way which does not prejudice the examination mode.

3.2.18 Release of results
Final composite marks are released to students on the web and at the Registrar’s discretion may be released in other formats.

3.2.19 Retention of assessment information
Course convenors must ensure that a breakdown of the individual components that have contributed to the final mark is available at all times. Teaching staff who take leave or terminate their employment with the university should lodge those records with the course authority who will retain them for five years. An electronic record is sufficient.

3.2.20 Casual teaching staff
Where one or more non-UNSW staff are employed to teach in a course, the course authority must nominate a course convenor who is a member of staff to be responsible for ensuring that the UNSW Policy on assessment is followed. Areas of particular concern include the late return of results, failure to lodge with the School a breakdown of marks in addition to the final mark, non-return of assignments, unavailability to give feedback during the session or to discuss the final mark after the release of the results, and the inability of the School to arrange for cross-marking of assignments marked by an external examiner because of the lack of relevant expertise within the School.

3.2.21 Review of results
Students who believe that there has been an error in the calculation of their final mark may apply for a review of their result. The review may take the form of:
- either an administrative check that all marks have been included in the final composite mark; or
- an academic re-assessment of a piece of work.

Where a case is made for re-assessment, the work should be re-marked by an appropriately qualified member of staff who was not involved in the initial marking of that piece of assessment and should be done on a clean copy of the work. Please contact UNSW Student Central for further information.

3.2.22 Additional assessment for potential graduands
The status of students who have completed all the requirements for the degree in which they are enrolled, except for a potential failure in one course, will be reviewed by the Faculty Assessment Review Group. Further assessment may be granted, notwithstanding a student’s failure to otherwise qualify for such concession (see also 3.2.7).

3.2.23 Supplementary assessment
Additional or supplementary assessment should be granted only when warranted by the circumstances. Final supplementary examinations should not be granted if a student’s performance in previous assessment has been of a standard that he or she would be unlikely to pass the course. Consideration should be given to the severity of the impact of any special circumstances on the student before allowing additional assessment. (See also Section 6 concerning Special Consideration.)

3.2.24 Discontinuation of courses
Faculty Assessment Review Groups may, in special circumstances, give approval for students to discontinue a course or courses without failure.

3.2.25 Degrees with Merit/Distinction
Some undergraduate Pass degrees may be awarded with Distinction when a Distinction level of performance based on a Weighted Average Mark (WAM) of at least 75% has been achieved in all courses completed since enrolment at UNSW which are credited to the relevant award. This applies only to undergraduate Pass degrees where an award with Honours is not available, for example the three year BCom where a student would have to complete a fourth year to be eligible for the BCom with Honours.

Proposals that Pass degrees be awarded with Distinction must be made through Faculty committees for approval by the Academic Board. For details see www.studentadmin.unsw.edu.au/academiclife/pass_with_distinction.shtml

3.2.26 Award of Honours
Program authorities who are responsible for programs that lead to a Bachelor’s degree make recommendations concerning graduation with Honours for determination by the Faculty Assessment Review Group. The recommendations should be made by completing the appropriate form that is then distributed to the members of the Faculty Assessment Review Group before the meeting, in accordance with conditions for the award of Honours that are determined by the Faculty Board.

3.2.27 Award of the University Medal
The award of the University Medal is determined twice a year by the University Medal Committee following the Session 1 and Session 2 series of Faculty Assessment Review Group meetings. The membership of the University Medal Committee is the Vice-Chancellor or nominee (Chair), the President of the Academic Board, a Deputy President of the Academic Board, and the Registrar or nominee.

Recommendations for the award of a University Medal are forwarded directly from the Faculty Assessment Review Groups for the approval of the University Medal Committee as the final authority for the awarding of the University Medal. The award of a University Medal indicates that, taking the whole of the academic record into account, a student in an undergraduate program has shown highly distinguished merit and, where Honours are awarded, has performed at a level significantly above the minimum required for Honours Class 1. If there are specialisations within a program that involve sufficiently distinct areas of study, a Medal may be awarded for each such specialisation. Given that the award of a Medal indicates outstanding academic performance, it is expected that only in exceptional circumstances would there be more than one recommendation for a Medal for a particular specialisation. If the Medal Committee is of a mind not to award a Medal that has been recommended by a Faculty Assessment Review Group, it will discuss the matter with the appropriate presiding member and head of school, before making a final decision.

3.3 Academic Standing
Please refer to the entry ‘Academic Standing’ in this Handbook.

4. Special Consideration
Please refer to the entry ‘Special Consideration’ in this Handbook.

5. Ethical Use of Scholarly Materials
UNSW policies and procedures in this area are currently being reviewed and expanded to ensure the highest standard of ethical use of scholarly material.

The University is committed to assisting students to understand the conventions which govern academic communication and thereby to avoid action which may result in academic misconduct. The following statement on the ethical use of scholarly materials by students writing
6. Appeals Against Decisions Affecting Standing or Ability to Progress

Any student may complain about an academic decision that affects him or her if there are grounds for believing that the decision may have been made on inappropriate criteria. An academic decision includes any decision made by a member of the University staff that affects a student’s standing or ability to progress in a program. Many of these decisions affect assessment but they may relate to other matters that could adversely affect a student’s standing, such as the granting of advanced standing, discontinuation, the award of scholarships and prizes and decisions regarding fee liability.

Students can lodge an appeal or a grievance without fear of victimisation.

A complaint should be made initially at a local level to enable the concerns to be addressed in an informal way. If this does not provide a satisfactory outcome, the student may take the complaint to the Registrar who will undertake an investigation to ensure that appropriate procedures exist and have been followed. The final level of appeal is to the Presiding Member of the relevant committee of the Academic Board depending on whether the student is undertaking an undergraduate or postgraduate coursework program or a candidate for a research degree.

Students should lodge an appeal or make a grievance known within a reasonable time frame, usually within a month of the decision being communicated. The University has an obligation to resolve appeals and grievances expeditiously.

Separate appeal procedures exist under the Managing Student Progress policy and the Student Misconduct policy. The full policy is located at: https://www.unsw.edu.au/students/atz/Grievance.html In this Handbook, reference is made to ‘Guidelines and Procedures for the Resolution of Academic Grievances and Disputes’.

7. Rights and Responsibilities

In order that assessment policy might be implemented effectively, formal responsibility for specific aspects of policy and practice is distributed across the University (through the Vice-Chancellor and the Academic Board), the faculties, the schools, course convenors and individual academic staff. Though some responsibilities for assessment are shared, others are specific to a particular domain. Students have their part to play in the assessment process; they have rights that correlate with the University’s responsibilities. Students also have responsibilities to ensure that they are aware of, and comply with, the assessment requirements that apply to them, and to report any anomalies or problems.

7.1 Responsibilities of the University

The University, through the Vice-Chancellor and the Academic Board, has a responsibility to ensure that:

- assessment practices are explicit, fair and consistent across the institution;
- assessment procedures are monitored at the level of schools and faculties so that they meet the criteria set out in this document;
- resources are available to provide staff with access to information and expertise on the theory and practice of assessment;
- policies regarding special consideration following sickness or other misadventure, and for students with disabilities, are explicit and consistently applied;
- policies on plagiarism and cheating, including penalties for breaches, are explicit and consistently applied; and that
- appropriate appeal processes are available and publicised.

7.2 Rights and responsibilities of students

Students have a right to:

- be treated fairly and consistently in all aspects of assessment policy and practice;
- be informed of all aspects of assessment policies and practices in each course, including the criteria to be met and penalties for breaches, and in a format appropriate to students with a disability;
- the timely return of the results of assessments with appropriate and effective feedback;
- information which allows them to calibrate their own performance against the criteria for each course and the performance of other students;
- review their examination scripts and other forms of summative assessment (except those saved for reuse in subsequent testing) for the duration of the script retention period;
have access to their
be aware of the rules of progression and the requirements for the award
reading material, such as anthologies of required readings, provided

apter 12 of the Commonwealth Grant Scheme
Under the provisions of the Higher Education Support Act 2003 (HESA),
Fees for Goods and Services Incidental to
Students have a responsibility to:
• ensure that they are properly enrolled, otherwise they may be refused
• behave ethically and appropriately, avoiding any action or behaviour
• be aware that a major objective of assessment is the promotion
• use assessments to help them develop strategies for self-assessment;
• be aware of the rules of progression and the requirements for the award
• inform themselves about assessment policies and practices, including
• be aware of the means for seeking assistance and advice on assessment
within the school and the University;
• ensure that they understand the requirements for examinations and
other assessment tasks;
• ensure that submitted assessment tasks are their own work except
when they acknowledge shared ownership of a group project;
• notify staff as early as possible if difficulties arise with the timing or
other requirements of assessment tasks;
• advise schools or faculties as appropriate of any substantial absence
and be aware of the appropriate use of medical and other certificates
in applications for special consideration;
• ensure that they understand the advantages and possible adverse
implications of discontinuation or withdrawal;
• seek the advice of the course authority if they believe the proposed
assessment method for a particular unit to be unfair;
• comply with requirements in relation to attendance, completion of
work, and utilisation of support facilities. It is important to note that
if students attend less than 80 percent of their possible classes, they
may be refused final assessment;
• seek feedback on the assessment of their work and advice on how to
remedy weaknesses in learning skills and examination technique if
necessary;
• seek early resolution, through the Head of School or nominee, over
any problem in their working relationship with a staff member;
• inform themselves of appropriate appeal processes; and to
• inform the EO Disability and/or the school/faculty in a timely manner
if they require alternative examination or assessment arrangements.

8. Discontinuation and Effective Feedback
The discontinuation without failure date for students withdrawing from
courses is half the session plus one week. The discontinuation without
failure date for whole year courses is the Session 2 census date. Students
are financially liable for all courses in which they are enrolled as at the
relevant census date.
Students who are thinking of discontinuing should be provided with
effective feedback by the end of week 8. This may take one of the following forms:
1. an assessment task to be completed by the end of week 7 and marked
and available for collection by week 8;
2. an online test to be available through the mycourse@unsw.edu.au link.
This may be a self-assessment task or an assessment task marked by the
relevant school. This test should be listed in the course handbook as a study
mechanism and have directions for the students wishing to access it; or
3. a formal meeting with the lecturer or tutor.
Effective feedback should correspond to the purpose for which it is
intended, which might include advice on whether the student should
continue in the course. However, some students might discontinue for
reasons unrelated to effective feedback.

Fees for Goods and Services Incidental to
Studies
Under the provisions of the Higher Education Support Act 2003 (HESA),
Commonwealth supported students and local fee-paying students

Circumstances in which providers may levy fees
In accordance with chapter 12 of the Commonwealth Grant Scheme
Guidelines, a provider may charge a student for a good or service related
to the provision of their course if one of the following criteria applies:
1. The fee is for a good or service that is not essential to the course of
study.
For example:
• access to internet and computer facilities (except where these are
required as part of a course);
• printing of notes from the internet or disks; and
• graduation ceremonies in cases where students are not required to
attend the ceremony in order to obtain their award.
2. The fee is for an alternative form or alternative forms of access to a good
or service that is an essential component of a course but is otherwise made
readily available at no additional charge by the provider.
For example:
• lecture notes or tapes, provided that lectures are available to students
free of charge;
• electronic provision of essential information if the information is also
readily available free of charge in another form (eg, in the university
library); and
• reading material, such as anthologies of required readings, provided
that these texts are also available free of charge.
3. The fee is for an essential good or service that the student has the choice
of acquiring from a supplier other than the provider and is for:
• equipment or items that become the physical property of the
student and that are not consumed during the course of study; or
For example: artwork; fabric for sewing class; first aid courses; police
clearance checks; musical instruments; protective clothing or footwear;
stethoscopes; dance shoes; and reference texts.
• food, transport and accommodation costs associated with the provision
of field trips.
4. The fee is a fine or penalty, provided that the charge is levied principally
as a disincentive and not in order to raise revenue or cover administrative
costs.
For example:
• fines or penalties for late enrolments, late variations to enrolments,
late withdrawals from a course, and late payment of charges, student
contribution amounts and tuition fees;
• review of grade if a student has already passed the course but is seeking
to improve their grade; and
• a charge for an assessment of prior learning in circumstances where
a person has not applied for entry to the institution.

Circumstances in which providers must not levy fees
Providers must not charge students for a good or service which is required
for a course of study unless that good or service, or an alternative to it,
is also available to students at no additional charge.
For example:
- course materials, such as: subject outlines; reading lists; tutorial or seminar topics and problems; assignment and essay questions; and requirements and guidelines for the presentation of work;
- access to library books, periodicals and manuals;
- clinic, laboratory or workshop materials such as anaesthetics, chemicals, filters, fuel, fertilisers, animal feed or crops used in practical sessions or research;
- access to computers or other online resources;
- recognition of prior learning if the student is enrolled with the provider or the student is applying for enrolment (including auditions);
- equipment and manuals which a professional in the field would not be required to own, such as: fixtures in a clinic, laboratory or workshop; or large items of equipment and relevant workshop manuals required for their use;
- admissions services;
- examinations or assessments, including practical assessment, for example, which requires the services of musical accompanists;
- reassessment of results where a student has failed an assessment and thereby failed a subject or unit; and
- mailing charges associated with distance education.

Copyright
Copyright is the intellectual property of authors, composers, photographers or artists which gives them the exclusive right to copy, publish, perform, broadcast or to make an adaptation of their work. Copyright in an original work is automatic and subsists as soon as the work is created. Under Australian law a copyright work is protected whether or not the work has been marked with the copyright symbol ©. Works published in any form, whether on the Internet, in hard copy or in any other medium, are protected by copyright.

The University does not claim ownership of the copyright of any original work contained in a higher degree thesis or project report submitted as a requirement for the award of a degree.

Under the provisions of the Copyright Act 1968 (as amended), students are permitted to make single copies of literary, dramatic, musical or artistic works provided they are required for research or study purposes and provided they do not comprise more than a reasonable portion of the work. As a guide, a reasonable portion is regarded as:
- not more than 10% of a literary work of not less than 10 pages, or one chapter;
- one article from a periodical or two or more articles if they relate to the same subject matter.

In certain circumstances the Act allows for one full copy of a work to be made for research or study purposes if it is not separately published or available commercially.

The University is also permitted under a special provision in the Act to make multiple copies of written works for teaching purposes, subject to a number of conditions including copying limits and payment of remuneration to copyright owners. This provision does not relate to individual students.

Students enrolled at UNSW may refer to the UNSW Copyright website at www.copyright.unsw.edu.au for further information.

Equity and Diversity
Equity and Diversity Policy Statement
The University of New South Wales is committed to the goals of equal opportunity and affirmative action in education and employment. It aims to provide a study and work environment for staff and students that fosters fairness, equity, and respect for social and cultural diversity, and that is free from unlawful discrimination, harassment and vilification as determined by legislation and by University Council.

In fulfilling this commitment, the University will:
- foster a University culture which values and responds to the rich diversity of its staff and students;
- provide equal opportunity by removing barriers to participation and progression in employment and education so that all staff and students have the opportunity to fully contribute to University life;
- offer programs which aim to overcome past disadvantage for members of staff and student equity groups;
- promote clear and accountable educational and management policies and practices to engender trust between managers, staff and students;
- enhance the quality of students’ learning through the provision of culturally, socially and gender inclusive education in areas such as curricula, teaching methods, assessment and review provisions, written and audiovisual material and support services;
- ensure that its staff and students are aware of their rights and their responsibilities as University members.

To achieve these goals, the University depends on the continued cooperation of all members of the University community. The Vice-Chancellor as Chief Executive Officer and Director of Affirmative Action is responsible for compliance with all relevant legislation. He is assisted by the Executive and the Director, Equity and Diversity.

Explanatory Notes
1. Currently the grounds of unlawful discrimination and harassment are:
- age;
- compulsory retirement from employment;
- disability (physical, intellectual, psychiatric, sensory, neurological or learning disability, physical disfigurement, the presence in the body of an organism capable of causing disease, and current, past, future or imputed disability);
- homosexuality (male or female, actual or presumed);
- marital status (single; or, with reference to a person of the opposite sex, married, separated, divorced, widowed or in a de facto relationship);
- political affiliation, views or beliefs;
- pregnancy or potential pregnancy;
- race (including colour; descent; ethnic, ethno-religious or national origin, nationality; and immigration);
- religious affiliation, views or beliefs;
- responsibilities as a carer;
- sex; sexual harassment;
- transgender or transsexuality (anyone who lives, has lived, or wants to live as a member of the opposite gender to their birth gender including people who are assumed to be transgender);
- actual or imputed characteristics of any of the attributes listed above; and
- association with a person identified by reference to any of the attributes listed above.

It is also unlawful to terminate employment on any of the grounds listed above, and also on the grounds of temporary absence from work because of injury or illness, membership or non-membership of a union, participation in union activities, and absence from work during maternity or other parental leave.

The grounds of unlawful vilification are:
- HIV/AIDS;
- homosexuality;
- race; and
- transgender (transsexuality).

The University is complying with the following statutory requirements with regard to unlawful discrimination and vilification: The NSW Anti-Discrimination Act, and The University of New South Wales Act; and The Federal Disability Discrimination Act, Racial Discrimination Act, Sex Discrimination Act and Workplace Relations Act.

Note (i): University College at the Australian Defence Force Academy in the ACT is subject also to the ACT Discrimination Act. Staff working at, or visiting, University College need to be aware of the following grounds of unlawful discrimination in addition to those listed above:
- bisexuality;
- breastfeeding;
- membership or non-membership of an association or organisation of employers or employees;
- profession, trade, occupation or calling; and
• association (whether as a relative or otherwise) with a person identified by reference to one of the above attributes.

Note (iii): Under the Federal Human Rights and Equal Opportunity Act there are a number of further grounds of discrimination in the area of employment or occupation:
• criminal record;
• medical record;
• national extraction or social origin; and
• trade union activity.

However, discrimination on these grounds is not made unlawful by the Act, and the grounds do not apply where the discrimination is necessary because of the inherent requirements of a particular job. The only avenue of redress for a complaint under this Act is conciliation.

2. In compliance with the NSW Charter of Principles for a Culturally Diverse Society endorsed in 1993 and reaffirmed in 1995 by the NSW Government.

3. For staff, in compliance with Part IXA of the NSW Anti-Discrimination Act 1977 and the Federal Equal Opportunity for Women in the Workplace Act 1999. The equity groups currently identified are: Aboriginal and Torres Strait Islander people; people with disabilities; people of non-English speaking background; and women.

For students, in compliance with Federal Government policy as outlined in A Fair Chance for All, AGPS, 1990 and subsequent amendments as outlined by DETYA. The identified equity groups are: Aboriginal and Torres Strait Islander people; people with disabilities, from socio-economically disadvantaged backgrounds, from rural and isolated areas, from non-English speaking backgrounds; and women in non-traditional areas of study.

Other Equity and Diversity Policies and Procedures

In addition to the Equity and Diversity Policy Statement, the University has a number of other policies to help make it a safe, equitable and fair environment for all students and staff. These policies include:
• Equal Opportunity in Education Policy;
• Anti-Racism Policy;
• HIV and other Blood Borne Infections Policy;
• Policies and Guidelines: Students with Disabilities;
• Code of Practice: Students with Disabilities;
• Discrimination and Harassment Grievance Procedures for Students

These can be found on the Equity and Diversity website www.equity.unsw.edu.au/policies.html or are available from the Equity and Diversity Unit, contact details as per below.

Occupational Health and Safety

UNSW’s Occupational Health and Safety Policy requires each person to work safely and responsibly, in order to avoid personal injury and to protect the safety of others. This requirement is particularly pertinent for both undergraduate and postgraduate students undertaking arts and science-based projects because of the experimental and research nature of work carried out in laboratories and workshops.

OHS Guidelines
• Students should discuss the safety implications of any project or experiment that they are planning with their supervisor or demonstrator and complete risk assessments before commencing the work. Be aware of recommendations for the safe use, transport, storage, and disposal of the materials being used. Students should have access to, and read thoroughly, the Material Safety Data Sheets for any chemicals they may use and operating instructions for plant and equipment. Special requirements and training apply to students undertaking work with radioactive substances, ionising radiation apparatus, lasers or genetically manipulated organisms. Students need to read the AS/NZS 2243 series on Safety in Laboratories and comply with their requirements. Students performing high risk activities as defined by Appendix D of AS 2243:1, should not work alone. Additional requirements may apply to students working with animals, microorganisms and or human tissue particularly concerning immunisations prior to hospital placements or laboratory work.

• OHS Policy guidelines are available on the Risk Management Unit website: www.riskman.unsw.edu.au

• Students need to be aware of the OHS Policy guidelines that relate to their area of study including policies on OHS accountability, hazardous substances, bio-safety, carcinogens gene technology, fieldwork, plant safety and radiation safety.

Students must report any hazards or incidents and any injuries or illnesses acquired during the course of their study, especially if it results in their being unable to pursue their studies for a continuous period of 7 or more days. The relevant reporting forms are available in all school offices and are accessible on the web at www.riskman.unsw.edu.au/ohs/forms.shtml

• The Occupational Health, Safety and Environment section in the Risk Management Unit organises and participates in orientation and training courses for students throughout the year via the schools. Students are encouraged to attend these sessions. Undergraduate and postgraduate student representatives are nominated for the school OHS committees and Level 1 OHS committee.

• Students working at night on campus are advised to use the Unibeat service arranged by phoning Security on 9385 6000 to accompany themselves safely to the car park areas. They should be familiar with the procedures to follow in the event of an emergency, and should know the location of emergency exits, fire-fighting equipment, first-aid cabinets and telephones. All emergencies are to be reported to Security on 9385 6666. Students should also know the telephone number of their Building First Aid Officer, the University Health Service 9385 5425 and their supervisor’s contact telephone number for emergency purposes. They should co-operate fully in the conduct of any building evacuation drill which is carried out in the school within which they are working and should be aware of any special instructions which might be relevant in the event of an incident involving their project. Students may only work after hours in accordance with school policy.

• All students have obligations as ‘persons’ under Sections 21, 24 & 25 of the Occupational Health and Safety Act 2000 and OHS Regulation 2001. It is essential students read their legal obligations, which can be found at the website www.austlii.edu.au under ‘Cases and Legislation: NSW’, ‘NSW Consolidated Acts’ and ‘NSW Consolidated Regulations’.

Action may be taken under the UNSW Student Misconduct Rules against students who deliberately act in an unsafe manner causing potential risk to their own or others health and safety.

Guidelines and Procedures for the Resolution of Academic Grievances and Disputes

The University of New South Wales recognises that all decisions which affect a student’s standing or progress in a program or course must be made fairly and must be based on appropriate academic criteria.

Guidelines

The University is committed to providing a harmonious work and study environment, and will seriously listen to complaints and resolve them quickly if possible. The resolution procedures ensure that students are able to air legitimate complaints, knowing that ad hoc, vindictive or arbitrary action will not be taken against them or the staff complained about. By providing a clear set of procedures, it is hoped that grievances can be dealt with satisfactorily and expeditiously, and will prevent a minor grievance from becoming a major problem.

These procedures apply to all enrolled students and to any decisions which may affect a student’s standing in a course or program. Many of these decisions concern assessment, but they may relate to other matters which could adversely affect a student’s standing such as the granting of advanced standing, discontinuation, supervision arrangements, access to facilities, the award of scholarships and prizes, and decisions regarding fees. Research students may have a grievance concerning a thesis topic, access to facilities or supervision.

As there are many different decision-making processes in the University potentially affecting academic standing, not all of them can be covered specifically in one set of procedures. It is however the University’s intention that a student’s right to resolution of a grievance or dispute is not limited by this statement of procedures. Existing appeal procedures established under the Managing Student Progress policy or the Misconduct policy are not affected by these procedures. Information on these procedures is available in the University Calendar, from UNSW Student Central in the Chancellery or on the web.

A student is required to make his/her grievance known within a reasonable time frame, normally within a month of the decision being communicated.

The University expects that student grievances and claims of unfair treatment should in most instances be able to be resolved through informal discussion and consultation without recourse to formal appeal.
However, where resolution is not possible, the University is committed to listen seriously to complaints and resolve them quickly if possible, by the following procedures:

**Procedures**

**Step 1**
The student should attempt to resolve the grievance with the staff member(s) concerned within a reasonable time frame.

**Step 2**
If the grievance is still unresolved, it should be directed to the Head of School (or other responsible officer nominated by the Faculty) who will attempt to resolve the grievance informally. Reasons should be provided by the Head of School (or nominated officer) for any recommendation or decision in respect of the matter.

**Step 3**
If the matter is not satisfactorily resolved at this stage, the student should refer the grievance to the Registrar. Except when insufficient or unfounded reasons have been given by the student to support the complaint, the Registrar will take the complaint in writing, inform the respondent officially, commence an investigation, including reference to the Dean or President Member of the faculty, and give an answer (including reasons) normally within 7 days.

**Step 4**
If the student is still dissatisfied, an appeal may be lodged in writing with the Presiding Member of the Undergraduate Studies Committee (USC), the Postgraduate Coursework Committee (PPC) or the Committee on Research (COR) within 14 days of receiving the Registrar's notification. The Presiding Member may decline to take action in cases where insufficient or unfounded reasons have been given by the student and shall inform the student accordingly.

If the matter has not already been considered by the USC, PPC or COR, this appeal will be heard by an Appeal Sub-Committee, empanelled for the purpose by the Presiding Member of the appropriate Committee. The Presiding Member will appoint as Chair of the Appeal Sub-Committee a member of the corresponding Studies Committee.

If the matter has not already been considered by the USC, PPC or COR, this appeal will be heard by an Appeal Sub-Committee of the Academic Board, empanelled for the purpose by the President of the Board. The President will appoint as Chair of the Appeal Sub-Committee a member of the Academic Board.

The Appeal Sub-Committee will consist of at least three members, one of whom will be a student. The student member will be drawn from the Academic Board or from the current list of student members of faculties.

No member of the Appeal Sub-Committee will have been associated with either the original decision or any earlier step in the appeal process.

Within two months the Appeal Sub-Committee will make a decision on the matter. Decisions made by the Appeal Sub-Committees will be reported annually to the Academic Board. There will be no further right of appeal.

Each stage is to be handled expeditiously.

**Student Discrimination and Harassment**

**Grievance Policy and Procedures**

In addition to the above procedures for the resolution of student grievances and disputes, the University has a policy and procedures relating specifically to grievances on the grounds of unlawful discrimination and/or harassment. The Policy applies to all enrolled students and covers all student grievances of unlawful discrimination and harassment. A grievance may involve unlawful discrimination if it contains allegations of unfair and inequitable treatment on the basis of a person’s race, ethnic and ethno-religious origin or nationality; sex or sexual preference (including transgender); marital status; status as carer; pregnancy or potential pregnancy; age; disability; religious, trade union or political affiliation. Vilification on the grounds of race, homosexuality and HIV/AIDS status is also unlawful. Unlawful harassment is unwelcome and offensive or intimidating behaviour, comments or images based on any of these grounds. The most common forms of harassment are racial and sexual harassment.

A copy of the Student Discrimination and Harassment Grievance Policy and Procedures can be found on the UNSW website at [www.equity.unsw.edu.au/policies.html](http://www.equity.unsw.edu.au/policies.html). For further advice, please contact the Equity and Diversity Unit, telephone (02) 9385 4734, email equity-diversity@unsw.edu.au.

---

**UNSW Student Services: Privacy Code of Practice**

The privacy of your personal information is a vital part of our relationship with you as a student. We are committed to maintaining the secure custody of your personal information and strictly adhere to the Privacy and Personal Information Protection Act 1998 (NSW).

The following statement outlines policy, procedures and safeguards in place to manage the personal information of students at UNSW.

**Personal Information Collected**

As a part of our functioning as an educational institution UNSW holds personal information regarding our students.

The nature of personal information collected and maintained about students by the University generally comprises name, date of birth, gender, contact details (including addresses, phone, fax and email), citizenship/residency status, nationality, passport numbers and visa status, as well as details of previous study and disabilities. This information is used for a range of purposes (see ‘Use and Disclosure of Personal Information’ below).

Some information is collected for statistical purposes for use in University planning and for mandatory government reporting. This may include information relating to ethnic origin, country of birth, languages spoken, source of financial support, and mode of transport.

When you are issued with your Student ID card your photograph will be taken and will be printed on your card for identity verification purposes. This photograph may also be provided to other University departments in electronic format for this purpose.

Records of financial transactions with the University may be maintained (including credit card numbers and banking details). Your tax file number (TFN) will be collected where necessary as required by the Higher Education Support Act 2003 (HESA) for taxation and income related purposes. Universities are authorised to retain TFN data only for the purposes of reporting details of your HECS-HELP, OS-HELP, or FEE-HELP debt to the ATO. Special security measures are in place to protect the confidentiality of TFNs.

Other information collected may include documentation relating to medical and/or personal circumstances provided directly by you in relation to applications for consideration of these circumstances in regard to your admission, academic progression, financial liability, and in the administration of some student services such as accommodation and disability services.

Records will be maintained of your enrolment, academic progress and attendance whilst a student at UNSW. Audit trails may also be maintained of any enrolment transactions you submit through the University’s web based student system, myUNSW.

Our primary means of collection of personal information is information provided by yourself. However, where you have applied for admission through an agent they may have provided information on your behalf. Obviously, some information is also generated by UNSW in the course of our activities (for example, your examination results).

**Use and Disclosure of Personal Information**

All information collected is necessary for the conduct of our business as an educational institution.

The information collected is used for a variety of purposes including:

- Student admission
- Enrolment and progression
- Scholarship administration
- Conduct of student elections
- Provision of student services
- Mandatory reporting to external agencies which include the Department of Education, Science and Training (DEST), Centrelink, the Australian Taxation Office (ATO), and the Department of Immigration & Multicultural & Indigenous Affairs (DIMIA);

- Archival purposes

Upon graduation some personal information regarding students gets transferred to the University’s alumni database. The data is used in order to keep graduates informed of University activities and events. The information may also be passed to the UNSW Foundation for fund raising purposes. Students who would prefer that their personal information is not used for these purposes may opt out by contacting the Marketing and Development Office at the University.

---
We do not sell, rent or trade your personal information. Personal information is not released outside the University except in the following circumstances. It may be disclosed when required or authorised by law, such as in response to a subpoena or in the case of mandatory government reporting under relevant legislation. It may also be disclosed when you have consented to our disclosing information about you through the acceptance of the terms and conditions which form part of your application for admission or your enrolment. The Deputy Registrar or a more senior officer of the University may also disclose information in exceptional circumstances because it is considered imperative for your health and safety.

For admissions purposes, your information may be shared with other educational institutions. Where you are engaged in cross-institutional study it is also necessary that your personal information be exchanged with the other institution's involved.

There is a very limited amount of personal information held by the University which amounts to a matter of public record. A notable example is the status of a person as a graduate of UNSW. However, the fact that a student is enrolled at the University is not treated as a matter of public record.

The University is occasionally willing to assist bona fide researchers undertaking studies, for example, by the distribution of questionnaires within the University community. These requests must obtain the approval of the Registrar and clearance by the University Ethics Committee. Name/address labels are provided under stringent conditions associated with the preservation of individual privacy. Material relating to these requests must contain a clear statement of purpose and responses must be entirely voluntary.

Your Responsibilities
As a UNSW student you have certain responsibilities in relation to the privacy and maintenance of your personal information. These responsibilities are to:

• Maintain the confidentiality of any secure passwords issued to you
• Update your contact and personal information as soon as practicable after any change
• Provide true and complete information in regards to your application and enrolment
• Provide correctly verified documentation to the institution where requested.

Control Over your Personal Information (myUNSW)
As a student, you are able to view and update much of your personal and enrolment data through myUNSW.

myUNSW enables you to:

• manage your enrolment, if you are an undergraduate or postgraduate award student
• view your personal class schedule
• check your enrolment details
• view your student financial account
• change personal details such as your mailing address and contact details
• check your assessment results and academic standing
• update some statistical information about yourself

You cannot change some personal details through myUNSW. For example, your name, date of birth or citizenship/residency, as these require documentary evidence. Such changes must be submitted, together with documentary evidence, through the Student Centre on your campus.

If you are unable to use, or do not have access to myUNSW for whatever reason, please contact the Student Centre on your campus or your program/faculty office and all reasonable efforts will be made to correct the information.

If You Fail to Meet Your Responsibilities
If you provide untrue, misleading or incomplete information to the University, it may be necessary on the basis of this for the University to refuse, reverse or terminate your enrolment or cancel or vary any decision it has made. It may also be necessary for the University to disclose the information to any person or body the University considers has a legitimate interest in receiving it.

The University cannot be held responsible for any infringement of your privacy on the basis of your failure to maintain the confidentiality of secure passwords issued to you.

Failure to maintain your personal data may have serious consequences. For example, if you are an international student in Australia on a student visa you may have your visa cancelled if you do not notify the University of a change of residential address or a change of education provider within timeframes specified as a condition of your visa.

If We Fail to Meet Our Responsibilities
We recognise that in any organisation things can go wrong. Should you have a grievance regarding privacy and believe that we have not met our responsibilities in accordance with this policy and privacy legislation, please contact us. This gives us an opportunity to fix the problem and allows us to do all we can to retain your confidence. You should address your grievance in writing to the UNSW Privacy Officer giving all relevant details. The Privacy Officer will arrange for your concerns to be investigated immediately and will write to you as soon as possible.

Security of Personal Information
We are committed to keeping secure the information you provide to us, and we will take all reasonable precautions to protect your personally identifiable information from loss, misuse, unauthorised access, alteration or disclosure. We have a range of physical and technology policies in place to provide a robust security environment. We regularly review these measures to ensure their ongoing adequacy.

Most personal data is stored on the student administration system (NewSouth Student). This database is protected through the use of secure passwords and other security safeguards. You can expect that access to your account will not be available to other users.

In some instances we also maintain paper based files e.g. for medical documentation, and paperwork relating to admission, scholarships, enrolment and the provision of student services. Files are kept in a secure environment. When the information is no longer required for the purposes for which it was collected, and any legal obligations in relation to retention of data for a specified period have been fulfilled, information is destroyed in accordance with established UNSW procedures for the disposal of confidential material.

Staff access to either computerised or paper-based records is granted only where there is a demonstrable need for this because of a staff member’s responsibilities. Security on the student database is allocated according to a staff member’s role at the University. Staff members have unique passwords assigned to them and their use is monitored and audited. A range of other IT security measures are also deployed on the University’s networks.

Access to Personal Information
You can ask us to provide you with access to the personal information we hold about you. If we are able to, we will provide you with access and a fee may apply. If we cannot meet your request for access, in whole or in part, we will let you know why.

Further Information
This page is not intended to be an exhaustive statement of UNSW Student Services’ obligations under the Act and should be read in conjunction with UNSW’s Privacy Management Plan on the following website: www.infonet.unsw.edu.au/poldoc/privacy.htm

Government Policies
Health-related Programs
Criminal record checks:
The NSW Department of Health has a policy to carry out criminal record checks on all students undertaking clinical placements or who require access in any capacity to facilities operated by the Department. (This includes all the Teaching Hospitals used by UNSW in its Medicine program.) It undertakes these checks, as it has a duty of care to all patients and clients receiving services from the Department. The check is conducted by the NSW Police Service and is coordinated by the Department of Health and the University. Further details can be obtained from your program authority.

Infectious diseases:
Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health relating to immunisation, infection and blood-borne viruses. Further details can be obtained from your program authority.

Education Programs
Criminal record checks:
It is a requirement that a check of police records be conducted for all teacher education students applying for an unsupervised internship.
placement in a NSW government school. Contact your program coordinator for further details.

**Working with Children**

Under the Commission for Children and Young People Act 1998 and the Child Protection (Prohibited Employment) Act 1998, students who as part of their enrolment are required to work with children must declare whether they are a ‘prohibited person’, that is they have been convicted of a serious sex offence. It is an offence for a ‘prohibited person’ to work with children.

**International Students (ESOS Act)**

The Education Services for Overseas Students (ESOS) Act 2000 is Commonwealth Government legislation that ensures providers of education and training are regulated in the delivery of education services to international students. All providers and programs available to international students are required to be registered on the Commonwealth Register of Institutions andCourses for Overseas Students (CRICOS). A National Code of Practice has been established which provides for consistent standards for the registration and conduct of registered providers and the conduct of persons who deliver educational services on behalf of registered providers. The Act also provides for obligations and restrictions on students to comply with the conditions of their student visa. Under the Act, the University is required to monitor and report on some of these conditions to the Department of Immigration, Multicultural and Indigenous Affairs (DIMIA).

The ESOS Management Unit at UNSW is responsible for coordinating the monitoring and reporting requirements under the Act and is available for advice to students on any of these requirements. For further information, please refer to the following website or contact the Unit via phone (+61 2) 9385 3065 or email esos@unsw.edu.au: 
https://my.unsw.edu.au/student/resources/ESOSstudent.html

UNSW staff should refer to the following website for information:
https://my.unsw.edu.au/student/staff/ESOSstaff.html

**Student Resources**

UNSW offers a wide range of services and resources to support local and international students during their period of study. Please refer to the A-Z Guide on the following website for a full and up-to-date list: 
https://my.unsw.edu.au

**The University Library**

The Library offers resources and services to assist UNSW students and staff with their research and study. Many of these resources and services are available 24 hours a day via the Library homepage: 
www.info.library.edu.au

Situated within the Library you will find computers and printing facilities, photocopiers, books, and journals. An interlibrary loans service is available for postgraduate students and staff.

The collections within the Library are divided into disciplines, Social Sciences and Humanities (enquiries, Library Level 3), Physical Sciences (enquiries, Library Level 7), Law (enquiries, Library Level 8), Biomedical Sciences (Mathews Annex, enquiries ground floor), and Fine Arts (COFA Library, Paddington).

The Library is able to assist you with information literacy resources and programs. For students, this means classes and online tutorials demonstrating how to locate information for your assignments; see ‘skills classes’ on the Library homepage. For staff, this means resources and assistance that will help you integrate information literacy into your courses. Additional information is available from library staff in your discipline area.

Free IT help and training for students and staff, is located in the main Library on the Library Lawn entry level. There is drop-in assistance, classes, and online tutorials aimed at helping you develop your computer skills. See the ICT Assist web site: www.ict.unsw.edu.au

Library opening hours vary during the academic year. See ‘opening hours’ on the Library homepage.

Other library facilities providing services to the students and staff of particular faculties are located at: Water Research Laboratory, Manly Vale, the Australian Graduate School of Management (AGSM), Kensington and the Australian Defence Force Academy (ADFA), Canberra.

**University Counselling Service and Compass Programs**

The Counselling Service, Compass Programs, provides personal development resources, enhancement programs and confidential counselling to enrolled students of UNSW. Students are encouraged to access the Counselling Service in relation to any issue that might adversely affect their personal and academic progress. The service employs psychologists who are able to assist students with concerns such as: transition and adjustment to university life and academic expectations; support with sorting out academic or administrative issues; motivation and other difficulties which affect study; interpersonal problems or relationship conflicts; and personal concerns such as stress, anxiety, depression or loneliness. Students can access the service via the “Drop In” option (no appointment necessary) available from 11am (sign up at 10.45am) each day or make an appointment in advance.

The Counselling Service’s website contains an introduction to the service and useful resources for students and staff: 
www.counselling.unsw.edu.au

Appointments on the Kensington campus are available between 9am and 5pm. The Counselling Service is located on the 2nd Floor, East Wing Quadrangle Building. Appointments can be made by visiting the service or telephoning (02) 9385 3418. Telephone counselling appointments and before/after hours appointments can be negotiated.

Appointments at the College of Fine Arts can be made by telephoning (02) 9385 0733 or visiting the COFA service at Ground floor, G Block, Room 06.

**Careers and Employment**

Careers and Employment offers the following services:

- Careers and Employment Online for job vacancies (graduate, vacation and part-time), employment related information (including sample resumes, cover letters, interview and job search tips) and information on all Careers and Employment activities;
- International Employment Program;
- Workshops including job search, career planning, resume writing, and interview skills. These can be tailored to meet specific faculty needs (see website for schedule);
- Guest Presenter Workshops in which representatives from organisations speak about graduate employment issues;
- Individual assistance for resume checking and help with career management issues;
- Career guidance programs;
- Fortnightly e-list of job vacancies;
- Careers library with resources on career development;
- Workshops including job search, career planning, resume writing, and interview skills. These can be tailored to meet specific faculty needs (see website for schedule);
- Guest Presenter Workshops in which representatives from organisations speak about graduate employment issues;
- Individual assistance for resume checking and help with career management issues;
- Career guidance programs;
- Fortnightly e-list of job vacancies;
- Careers library with resources on career development;
Disability Services

Students with disabilities who require any services should contact Laurie Alsop, Equity Officer (Disability), at the Equity and Diversity Unit on telephone (02) 9385 4770, email l.alsop@unsw.edu.au, location Level 9 Applied Science Building.

Services include the provision of notetakers, readers, sign-interpreters, examination provisions, assistive technology, texts in alternative formats, liaison with academic staff, an electronic mailing list, and access to the Disability Resource Centre.

Whenever possible, students requiring services should contact Laurie Alsop prior to the commencement of classes, to facilitate the organisation of those services. More information can be found at: www.equity.unsw.edu.au/disabil.html

Equity and Diversity Unit

The Equity and Diversity Unit provides services to students, staff and managers, including:

- disability services for students and staff (see above);
- support for ACCESS students;
- assistance with grievance handling under UNSW’s discrimination and harassment grievance procedures;
- guest lectures and presentations to students; and
- advice and information on anti-discrimination legislation, policies and practice.

You are welcome to contact the Unit at any time to talk confidentially about any issues relating to equity and diversity in your study.

The Equity and Diversity Unit is located at Level 9, Applied Science Building, telephone (02) 9385 4734, email equity-diversity@unsw.edu.au.

For further information, please refer to the Equity and Diversity Unit’s website: www.equity.unsw.edu.au

IT Service Desk

The IT Service Desk is the central support point for UNSW staff and students requiring assistance with IT related matters.

The IT Service Desk provides support and technical advice on:

- UDUS - the UNSW Internet Service
- UDUS/Uniwide/Uniweb payments/queries/problems
- UNSW online services queries and problems
- WebCT support
- UniPass requests
- UniMail & University email services
- UniWide - UNSW Campus Wireless Network

Please note that problems with faculty-based IT services should be directed to your school or faculty IT support.

The IT Service Desk Counter is located opposite the ICT Assist training room, Level 2, the Library. Email: servicedesk@unsw.edu.au, tel: (+61 2) 9385 1333 or 9385 1777, website: www.its.unsw.edu.au

Prizes

The University has over 400 prizes available that are presented to students for meritorious academic achievement. Prizes are in the form of medals, books, book vouchers, cash amounts and certificates and are awarded annually on the recommendation of the Head of School.

Scholarships

The University administers a number of scholarships for full-time study. Many of these have been made available by the generous donations and bequests of private donors and organisations.

Further details and the latest scholarship listings can be obtained by visiting the Scholarships@UNSW website (www.scholarships.unsw.edu.au) or by contacting the Scholarships and Financial Support Office. Tel: (+61 2) 9385 1708, email: scholarships@unsw.edu.au

New scholarships are advertised on the Scholarships website and on notice boards in schools and outside UNSW Student Central. To receive newsletters on the latest Scholarships information, subscribe to our mailing list by visiting the Scholarships@UNSW website: www.scholarships.unsw.edu.au

Services for ACCESS Students

Students who enrolled via the ACCESS entry scheme can receive support and referral from the Equity Officer (ACCESS), at the Equity and Diversity Unit on telephone (+61 2) 9385 5434, email equity-diversity@unsw.edu.au, location Level 9 Applied Science Building. More information can be found at: www.equity.unsw.edu.au/help.html#infstud.

Student Representatives

Each year a number of student members are elected to each faculty to represent all enrolled students in the faculty. These students have full voting rights at faculty meetings and committees and hence a direct input in decisions affecting students. Further information can be obtained from www.elections.unsw.edu.au

UNSW Bookshop

The UNSW Bookshop is located in the lower section of the Quadrangle building on the Kensington Campus. Phone: (+61 2) 9385 6622, email: orders@bookshop.unsw.edu.au, website: www.bookshop.unsw.edu.au

Text and reference book information is available online at: www.bookshop.unsw.edu.au/textlist.html

Introduction

Why General Education?

Since its foundation, the University of New South Wales has been committed to the provision of a General Education Program for its undergraduate students. The University believes that a general education complements the more specialised learning undertaken in a student’s chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they highly value graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. In addition, over many years graduates of this University have reported that they greatly value graduates with the skills provided by a broad general education, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden and deepen students’ understanding of the environment in which they live and work and to enhance their skills of critical analysis. Above all, the program presents students with interesting, challenging and enjoyable opportunities to pursue their own intellectual curiosity.

Objectives

Objectives of the General Education Program

The following objectives were approved by the Council of the University in December 1994 and with some minor changes in 2005:

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.
2. To enable students to evaluate arguments and information.
3. To empower students to systematically challenge received traditions of knowledge, beliefs and values.
4. To enable students to acquire skills and competencies, including appropriate written and spoken communication skills.

5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.
6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.
7. To provide structured opportunities for students from disparate disciplines to interact cooperatively within a learning situation.
8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist courses offered in those other areas.
9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross and interdisciplinary connections, and cross-cultural contexts.
10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education Requirements

The University’s basic requirements are the same for students in all single degree programs. Students must:

(a) satisfactorily complete a minimum of 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption – see below). Combined undergraduate degrees offered with another faculty and leading to the award of two degrees satisfy the first requirement (12 units of credit in General Education) within the program.

(b) undertake additionally 56 hours of study which examines the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. The extent to which individual programs meet this requirement varies from program to program. In the Faculty of Arts and Social Sciences, for example, this requirement is satisfied in the BA degree through an ARTS3000 course.

In some other degrees of the Faculty of Arts, it is distributed throughout the program. Most programs in the Faculty of the Built Environment fulfil the latter requirement as part of the normal program curriculum. However, in the case of both the BBCM and BSc(Arch) programs, students are required to take BENV1382, Social Responsibility and Professional Ethics.

Restrictions and students’ choices

In order to ensure that students have the maximum amount of choice possible in the courses that can be taken to fulfill the General Education requirement, all programs have agreed to allow students to select either:

- courses that were developed especially for the General Education Program (these courses are listed at the back of this Handbook and have a course identifier that begins GEN);
- a limited number of ‘mainstream’ courses that are offered in the degree programs of other faculties.

However, certain restrictions apply to students’ choices:

Students may undertake a maximum of three units of credit from approved General Education courses within the faculty which is the program authority for the program in which the student is enrolled. Further General Education courses may be drawn from any other faculties with a maximum of six units of credit to be drawn from any one faculty, other than the faculty that has the authority for the program in which the student is enrolled.

* The Faculty of Commerce and Economics has not approved GE courses offered by FCE to be available to students enrolled in FCE degree programs.

The following rules will apply:

(a) Where students have been granted advanced standing in any program, any remaining General Education requirements in those programs must be met from courses offered in a faculty other than the faculty which is the program authority for the program in which the student is enrolled.
In programs that have a partial exemption from General Education, the remaining General Education courses must be taken in faculties other than the faculty that is the program authority for the program in which the student is enrolled.

Faculties must identify any of their mainstream courses which overlap substantially with the General Education courses offered within that faculty and must stipulate that students who have completed or are completing these mainstream overlapping courses are excluded from enrolment in the related General Education course. Additionally:

- the program requirements for each faculty which relate to the undergraduate degree programs offered by that faculty, may in some cases limit the number or type of ‘mainstream’ courses a student may include in the total number of courses necessary to complete their General Education requirement (in any case ‘mainstream’ courses may substitute for a maximum of 50% of the General Education requirement for a course), and
- students’ first choices cannot be guaranteed, as students in later program stages will be given preference over those in earlier stages; quotas may be set for different faculties and courses. Courses with insufficient enrolments will be cancelled by 31 January (for Session 1 courses) and 27 June (for Session 2 courses). Staff leave means that not all courses are necessarily offered each session or year.

Exemption from Part or All of the General Education Program

There will be no general exemptions for students enrolled in single degree programs.

**Students enrolling in combined programs**

As a general rule, students enrolled in combined undergraduate programs leading to the award of two degrees, each in a different faculty, meet their General Education requirements.

Variation to the General Education requirement in some combined programs may have been approved. Students enrolled in combined programs should check their General Education requirements with their faculty or program office.

**Special student exemptions**

Students transferring from one faculty to another at UNSW, or from another higher education/tertiary institution, who believe that their prior learning and/or qualification satisfies the University's General Education objectives are eligible to seek exemption from all, or part of the UNSW General Education requirements (4 courses or 12 units of credit).

Applicants for exemption must supply full written justification for their request, plus appropriate documentation, showing how they have satisfied the GE objectives (see above). Applications will be considered on a case by case, and course by course basis by the faculty, which will make a determination and notify the student accordingly. The faculty's yardsticks will be:

- the extent to which the courses nominated for exemption satisfy sufficient GE objectives (i.e. cooperative interaction with students in other disciplines, most importantly; skills/competencies complementary to the major discipline area; social and ethical responsibility and development; empowerment to challenge traditional knowledge/paradigms);
- the extent to which the previous program is different in paradigm and content to that in which the student is presently enrolled;
- the length of previous study undertaken, where, in principle, 1 year might qualify for exemption from one GE course (3 units of credit), 2 years for 6 UOC, 3 years for 9 UOC and 4 years for 12 UOC.

In all cases, the onus is on the student to present a written justification.

**Note:** Life experience and/or mature age entry are not grounds for exemption.

**Substitution**

Students may apply to their faculty for approval to substitute any course(s) from other faculties for General Education courses up to a total maximum of 6 units of credit (or 50%) of General Education. Substitution requests must be submitted in writing and approved prior to enrolment and state how the proposed courses will satisfy the GE objectives in their program, together with the remainder of the student’s GE program. The faculty will approve the request if satisfied that the substitution(s) will indeed allow this to occur.

Students may substitute the study of Language Other Than English (LOTE) within their General Education program. English (and other languages) as offered by the Institute of Languages or Learning Centre are excluded. Only languages offered by academic units are acceptable; a maximum of 50% of General Education can be substituted with language courses.

- Irrespective of the amount of units of credit associated with a mainstream course, students can only count 6 UOC towards the General Education requirement.
- Students should ensure that the substitute course has a seminar component. It is unlikely that the Faculty will accept it otherwise.

**Faculty General Education Requirements**

Each faculty has the responsibility for deciding what courses are not able to be counted towards the General Education requirement for their students. This may mean that courses offered by the faculty in which a student is enrolled, or courses which are a required part of a program even though offered by another faculty, are not able to be counted toward the General Education requirement.

Information concerning the substitution of other university courses or exemption from some General Education courses on the basis of previous formal study at tertiary level is available from the faculty or program office.

**Student Involvement in the General Education Program**

An important feature of the General Education Program is that student representation on committees that make decisions about General Education is assured. There are two student members on the Academic Board’s Committee on Education. All General Education courses are required to be regularly evaluated by students and the results of the evaluations made known to the members of all faculties whose students are taking those courses.

**Administrative Arrangements**

**The enrolment process**

Students enrol in General Education courses through myUNSW [https://my.unsw.edu.au](https://my.unsw.edu.au) the web interface to the University’s student information system, in the same way that they enrol in other courses.

Before nominating the General Education courses they wish to take, students should ensure that they are familiar with:

- the relevant faculty and program policy and procedures for General Education including approval requirements, as set out in this Handbook and additional faculty program policy and enrolment information.
- the General Education course timetable, which includes lecture and tutorial times and the campus on which the course is taught.
- how many General Education courses (or General Education units of credit) they have completed, and how many they are still required to complete.
- their own timetable for 2006, including times which they have available to take General Education courses.
- where a course is offered in more than one class (that is, the course is streamed and students must register for a particular stream), students must ensure that they enrol into the correct class using myUNSW.

Students will be able to vary their enrolment in General Education courses, subject to places in other courses being available. Course enrolment variations will be conducted through myUNSW.

Students who are unable to enrol through myUNSW should contact their faculty or program office regarding alternative enrolment arrangements.

**Quotas and preferences**

General Education courses may have enrolment quotas set for both overall course enrolments and for each faculty. Although these quotas are flexible, students may be unable to enrol in a particular course because it is already full. In these cases, students may attempt to enrol in the class at a later time, as places may become available.
To increase the chances of enrolment in first preference courses, the University will generally try to allocate enrolment appointment times to students who have progressed furthest in their degree program, before students in earlier stages of their program. This means that if a student misses out on admission to a course in one year, they are more likely to be successful in subsequent years, as they gain more senior status in their program.

**Alternative mode courses**

Most General Education courses (with GEN prefix) will be offered in the format of one lecture and one tutorial per week. However, in developing courses for the General Education program a number of faculties have put forward courses that can be completed in a more intensive mode – either over a summer session, or in some other non-standard arrangement. Some approved courses will be offered in an open learning or distance learning format, supported by electronic delivery techniques. It is hoped that the choice of delivery mode will increase in response to student preferences and the course evaluation process.

**Campus at which courses are taught**

General Education courses are taught at Kensington as well as the Paddington (Faculty of the College of Fine Arts) campus. Students may enrol in courses offered on either campus provided the courses have been approved as part of their General Education requirement. Separate arrangements are in place for students of the Australian Defence Force Academy and of the Australian Taxation Studies Program. Students in these programs should consult their faculty for information on courses and venues.

**Units of Credit, Fees & Charges and General Education**

The University's academic structure is based on 'units of credit'. A fulltime enrolment for one year is defined as 48 units of credit (24 per session). A course will have the same unit of credit value and generate the same load for student contribution charges and tuition fees irrespective of the program or stage in which it is taken. All courses are measured in whole units of credit. The normal workload expectations are 25–30 hours per session for each unit of credit, including class contact hours, preparation and time spent on all assessable work.

Every course in the University has a unit of credit value, with program requirements defined, in part, in terms of the completion of a specified number of units of credit. The most important thing to remember about units of credit and General Education is that, because the General Education Program is an integral component of each undergraduate degree program at UNSW, units of credit earned for General Education are not additional to program requirements, but rather are a required part of each program. For the same reason, students do not pay extra for undertaking General Education courses.

Student contribution charges and tuition fees are based on the student’s total study load, taking into account the discipline grouping of the unit of study. Student load is calculated on the sum of the units of credit of all courses undertaken (including General Education courses) as a proportion of the specific full-time total (48 units of credit) for the particular stage of the program.

All General Education courses form part of the discipline group which includes Arts, Humanities, Social Studies/Behavioural Science and Visual/Performing Arts which attracts the lowest level of charges. Where approval is given to undertake mainstream courses instead of General Education courses, these courses will be charged according to the discipline grouping of the unit of study.

**The Heinz Harant Challenge Prize**

A prize of $1,000, awarded twice yearly, has been established especially for work done by students in the UNSW General Education Program. The prize commemorates one of the University's earliest alumni and most devoted supporters, the late Heinz Harant. It is called 'The Heinz Harant Challenge Prize' because challenging orthodoxy was the driving spirit of Heinz Harant's life and the prize attempts to recognise this belief.

The prize recognises challenging and original thinking in work submitted for assessment in a General Education course. Academics in charge of General Education courses will be asked to select items of work of high standard and which they judge to be in keeping with the spirit of this prize.

Students may also submit their own work of high standard if they feel that it meets the spirit of the prize. Entry forms are available from UNSW Student Central and work must be submitted within one month of the close of the session in which the course is offered. At the end of Session 1 for courses completed in Session 1 or the Summer Session, and again at the end of Session 2 for courses completed in Session 2, a small number of items are selected for submission to a judging panel, subject to the author’s consent.
### General Education Courses

Descriptions of courses offered in 2006 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at [www.handbook.unsw.edu.au](http://www.handbook.unsw.edu.au)

A warm welcome to the Faculty of Arts and Social Sciences at the University of New South Wales. I am sure you will find your studies with us exciting, challenging and rewarding.

The Faculty has 350 staff and 3893 undergraduate students. Over recent years competition to enter the Faculty’s programs has become very vigorous, as our distinctive profile and provision of excellent teaching and learning experiences become more widely recognised. Our staff are highly qualified and experienced researchers as well as being dedicated teachers. The benefits to students which flow from the combination of research with teaching are widely recognised in the world’s top universities.

Employers in today’s world increasingly value the skills gained by students who have studied in the Arts and Social Sciences fields. These include the ability to write accurately and concisely, to express and critique a point of view, to analyse thoroughly and objectively, and to speak in public readily and with confidence. No matter what specific areas of interest our students follow, they will graduate with a high level of skill and experience in using computers, databases and research tools, the ability to document sources carefully, to manage time, and work in cross-cultural contexts. Many will have studied one or more languages in addition to their mother tongue, and in some areas of study they will have obtained high level skills in research design and statistical analysis.

Degrees can be tailored to meet students’ own aims and goals, by combining different disciplines and areas of specialised study. Graduates are highly valued in many occupations: in commerce and business, policy studies, governmental organisations, international bodies, the diplomatic service, corporate affairs and human resources, and will be found also in vocations and occupations such as education and social work, public health and community service, advertising, media and public relations. Many of our graduates are now renowned writers and film-makers, not to mention our distinguished History graduate, the former premier of NSW, Mr Bob Carr.

We encourage all our students who are qualified to do so to undertake a fourth year Honours program. This enhances the skill-base by permitting a student to undertake a sustained and significant piece of research under the supervision of a staff member. Employers are particularly impressed by a good Honours degree.

The Faculty fosters friendly and co-operative relations between staff and students. Advice can readily be obtained from the Faculty office, thence for more specialised assistance from your lecturers and tutors, and other administrative staff. You can also undertake a period of internship for credit, which will be arranged by our Internship Officer, and periods of international exchange are available for all students, usually in the second year, where you can be located for one semester’s study in a highly recognised university in a country of your choice. All arrangements for exchanges are managed by the University. Many other unique opportunities are open for students in the Faculty. I believe your period of study here will be highly rewarding both personally and professionally and welcome you as one of our most important assets, our fine students.

Annette Hamilton
Dean
Arts and Social Sciences

Faculty of Arts and Social Sciences
Faculty of Arts and Social Sciences Website
The Faculty of Arts and Social Sciences maintains its own web server at www.arts.unsw.edu.au which provides information to prospective students as well as timetable and course information for current students.

Course Descriptions
Descriptions of courses offered in 2006 can be found in alphabetical order by course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Advanced Standing
Students admitted with advanced standing are given credit towards the degree for all appropriate courses up to a maximum of two thirds of the total units of credit required for each degree. Specified credit will be given for courses closely related to courses offered within our degree programs; unspecified credit may be given for other “Arts-type” courses, if they are of appropriate standard and range.

ARTS2000 Faculty Internship
ARTS2000 offers selected second and third year Arts and Social Sciences students an internship experience in a range of organisations outside UNSW. This practical work-place experience is accompanied by a reading program. The reading component examines different approaches to the study of organisations, their structures, functions and policies, and links these issues to the internship experience. The internship component provides work experience in a host organisation for a minimum of one day a week throughout one session or an equivalent block of time. The internship may be undertaken at any time during the year but is subject to the availability of a suitable host organisation. The course may be included as part of a major sequence with the prior permission of the relevant Head of School. For more information, contact Zarni Jaugietis, telephone (02) 9385 1443, email zarni@unsw.edu.au

ARTS3000 Courses
Objective 5 of the University’s General Education program requires all faculties “to ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.” In some programs administered by the Faculty of Arts and Social Sciences this objective is met entirely by the content of compulsory core courses, while in others it is met partly by the structure of the degree and partly by ARTS3000 level courses specifically designed for this purpose.

Degrees in which at least one ARTS3000 course must be included are the Bachelor of Arts and the Bachelor of International Studies. Bachelor of Music and Bachelor of Music/Bachelor of Arts students must complete either an ARTS3000 course or MUSC3101. ARTS3000 courses are also available as elective courses for students in other degrees. These courses should normally be taken in a student’s third year of study.

ARTS3001 Censorship and Responsibility in the Performing Arts, Film, Literature and Media
ARTS3002 Making Histories and Historians: Ethics, Scholarship and Public Roles
ARTS3005 Arts and Social Sciences Graduates in the Workplace: Ethical & Social Responsibility
ARTS3006 Corruption and Integrity in Public Life
ARTS3007 East Asian Values and Identities
ARTS3010 Feminist Thought and Action

Faculty Computing Facilities
The Faculty of Arts and Social Sciences provides general purpose Macintosh computer laboratories in the Morven Brown and Mathews buildings. Special purpose laboratories are located in the Robert Webster Building. Self-access to the general purpose laboratories is available 24 hours 7 days per week. Printing charges apply. Access to email and the Internet is available. Further information can be obtained from the Technical Resources Centre, Room 105, Morven Brown Building, Room G6.3 in the Morven Brown Building is available to students in the Faculty for enrolment purposes.

Faculty Timetable
The Faculty Timetable is published in a separate booklet and will be distributed to new students on final enrolment. Students are able to access the information on the web at www.arts.unsw.edu.au in November.
Students in Years 2, 3 and 4 are reminded that alterations to the published timetable are occasionally made before the beginning of session. A check should be made with the appropriate school/department in late February for times of Upper Level courses.

General Education Requirements

Where a General Education requirement is prescribed, students must complete the equivalent of 12 units of credit from the University's General Education program. Arts and Social Science students should choose their courses in accordance with the requirements set out in the General Education section of this Handbook. No more than three units of credit can be chosen from courses with a GENT prefix. Information concerning the substitution of other university courses or exemptions from some General Education courses on the basis of previous formal study is available from the Faculty Office.

Re-enrolment Procedures

All students of the Faculty are expected to re-enrol via the web, apart from those who intend to enrol in an Honours program in 2006. Honours pre-enrolment forms will be available from school offices in December and will need to be returned to the Faculty Office by the second last week of December. Failure to re-enrol a week before the beginning of session may incur a late fee.

Societies and Clubs

For information about societies and clubs in the Faculty of Arts and Social Sciences, refer to the Faculty website at www.arts.unsw.edu.au/currentstudents/undergraduate/clubs.shtml or contact the individual schools/departments.

Faculty Rules

Standard enrolment

1. (a) In any year of study, students must enrol in a minimum of 24 units of credit, unless they require less than that number to complete the requirements for the degree. (b) In their first year of study, full-time students will normally complete 48 units of credit; in subsequent semesters, they will normally complete 24 units, but may be permitted to enrol in an additional 6 units.

Prerequisite and corequisite requirements

2. A student enrolling in a course must satisfy the prerequisite and corequisite requirements for that course.

Progression

3. In order to obtain units of credit for a course, a student must in that course:
   (a) satisfy attendance requirements;
   (b) complete satisfactorily any assignments prescribed;
   (c) pass any prescribed examination.

4. Students are not permitted to enrol in Upper Level courses until they have completed at least 36 Level 1 units of credit.

5. Students are required to complete at least 12 units of credit at Level 3 in any program or major sequence offered by the Faculty of Arts and Social Sciences.

6. Students who fail to complete at least 24 units of credit in any year may be required to 'show cause' as to why they should be permitted to proceed with their studies.

7. Students whose progress is satisfactory may apply for leave of absence from their studies for no more than two semesters.

Concurrent study

8. No student may enrol in any course to be counted towards degrees offered by the Faculty of Arts and Social Sciences at the same time as he/she is enrolled in any other degree or diploma program, except in the case of approved concurrent programs.

Study at another university

9. With the prior approval of Faculty, up to 48 units may be completed at another university, unless equivalent courses are available at the University of New South Wales. Faculty will not approve courses offered by external study.

10. Students must have completed at least 48 units of credit in courses offered by the Faculty before a period of study overseas will be approved.

Advanced standing

11. Students seeking advanced standing must submit documentary evidence of courses completed elsewhere and specify the courses they wish to complete within the Faculty. Faculty will then determine the number of units of credit to be granted. Advanced standing will not be granted for courses completed more than 10 years previously.

Transfers

12. (a) The Faculty will grant the maximum credit possible to facilitate a student's transfer from one degree to another. The credit will vary depending on the degrees concerned. (b) A student enrolled in the combined Arts/Law program who does not wish to proceed to the combined degree BA LLB may apply to transfer to the BA degree with credit for all courses completed in the program.

Special admission to Honours

13. Students who have been awarded a degree at Pass level from the University of New South Wales or a comparable degree from another university may be admitted by Faculty to candidature for the award of that degree at Honours level with credit for all courses completed if, during their studies for the Pass degree, they have satisfied the prerequisites for entry to the Honours level program or completed an equivalent program of study. Permission will not be granted if more than three years have elapsed since the completion of the Pass degree.

Modification of requirements

14. Faculty may modify the requirements of any of these rules in special circumstances.

Key to Course Identifiers

The following table shows the organisational unit and faculty responsible for all courses offered in the Faculty of Arts and Social Sciences.

Courses whose prefixes are not listed below are not available for students enrolled in the Faculty of Arts and Social Sciences.

</table>
The basic requirements for the degree are:

1. A total of 144 units of credit. Each course offered by the Faculty has a unit of credit rating, depending on the number of hours taught and the type of course.

2. A total of 66 units of credit must be gained in courses offered by schools, departments or programs within the Faculty.

3. A major sequence (List A) in one of the following:
   - AUSI: Australian Studies
   - CHIN: Chinese Studies
   - COMD: Development Studies
   - EDST: Education
   - ENGL: English
   - SOIL: Soil Environmental Studies
   - EURO: European Studies
   - FREN: French
   - GERS: German Studies
   - GREK: Greek
   - HIST: History
   - HPML: History and Philosophy of Science
   - INDO: Indonesian Studies
   - JAPN: Japanese Studies
   - KORE: Korean Studies
   - LING: Linguistics
   - MEFT: Media, Culture and Technology/Film/Theatre and Music Education Studies

   - PECO: Political Economy
   - PHIL: Philosophy
   - POLS: Politics and International Relations
   - RUSS: Russian Studies
   - SLSP: Policy Studies
   - SOCA: Sociology and Anthropology
   - SPAN: Spanish and Latin American Studies
   - WOMS: Women’s and Gender Studies

4. At least 66 units of credit must be gained in courses offered by schools, departments or programs within the Faculty.

5. At least 66 units of credit gained in schools, departments or programs outside the school/departments in which you are majoring, so that your program does not become too one-sided.

7. During their second and third years of study, students are also required to complete 12 units of credit from the University’s General Education Program.

8. 6 units of credit in an upper level ARTS3000 course detailed in the Handbook.

How to Choose Your First Year Program

You must include the first year requirements for at least two major sequences in schools or departments within the Faculty of Arts and Social Sciences, as you must complete at least one to qualify for the degree. Find the courses you need from the corresponding entries in the online handbook; this will normally account for 24 units of credit of your first year program. In deciding what other courses to enrol in, you should consider which courses best complement the ones you have chosen. These may not necessarily be ‘close relations’; for instance, a foreign language may be extremely useful for a history major, and vice versa. Unless you are a part-time student, you should enrol in courses carrying 48 units of credit.

Upper Level and Honours Entry

In structuring your program for second and third year Upper Level, it is essential that you fulfill the requirements for a major sequence in the school(s) or department(s) in which you are specializing. If you have any doubts about them, make sure you consult a member of staff before enrolling in second year. Try to complement your majors with courses which will provide you with skills and perspectives which will contribute to a broader and more critical approach to your special areas of interest. Major sequences offered by programs such as AUST Australian Studies are designed to provide this kind of context. They offer an interdisciplinary...

Students are also required to complete 12 units of credit from the University's General Education program during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.

### Academic Rules

#### Pass Degree

To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:

1. a total of 48 Level 1 units of credit;
2. no more than 12 Level 1 units of credit in any one sequence of study from Lists A, B, and C below;
3. a major sequence of 42 units of credit from List A below;
4. at least 66 units of credit, including a minimum of 24 at Level 1, from sequences in Lists A and B;
5. at least 66 units of credit from courses offered outside the major sequence specified in 3. above, which may include major sequence(s) from Lists A, B or C;
6. 12 units of credit from the General Education program, normally taken in the second and third year of study;
7. 6 units of credit from a third year ARTS elective.

3402 Bachelor of Media and Communications

#### BA(Media)

##### Typical Duration

- 3 years

##### Minimum UOC for Award

- 144 units of credit

##### Typical UOC per Session

- 24 units of credit

##### Program Description

The program emphasises new computer-based multimedia skills and focuses on Australian media industries in relation to globalisation. The degree is vocationally relevant in its orientation and all students are given significant practical experience in new computer-based multimedia communication technologies.
In addition to studying the Media and Communications core program, students complete a major in the humanities or social sciences, to permit them to study a second field in depth by pursuing their interests in another area. First and second years cover multimedia writing and production and contextual media studies. The third year consolidates the program’s emphasis on production and analytical skills. This grounding enables students to interpret, create and apply the products of new media not only in the context of the mass information and entertainment industries but also in a variety of other public and private sector areas such as education, on-the-job training and specialised information services.

A fourth (Honours) year of study is an option for selected students.

Program Objectives and Learning Outcomes
The Media and Communications program aims to develop in students a sophisticated understanding of the history, scope and socio-cultural impact of new media technologies, and of the debates that have accompanied their development and use. Second, it offers extensive experience in the production of new media content appropriate for employment in the contemporary media.

Program Structure
The basic requirements for the degree are:

1. A total of 144 units of credit. Each course offered within the degree has a unit of credit rating, depending on the number of hours taught and the type of course.
2. 48 units of credit in the Media and Communications (MDCM) core program:
   - First Year
     - MDCM1000 New Media Technologies A
     - MDCM1001 New Media Technologies B
   - Second Year
     - MDCM2000 Writing for New Media
     - MDCM2002 Media Production
     - MDCM2003 Multimedia Production
   - Third Year
     - MDCM3000 Media Forms
     - MDCM3002 Advanced Media Production
     - MDCM3003 Multimedia Production
   - 3. 2 MDCM electives (12 Upper Level units of credit).
   - 4. 1 elective (6 Upper Level units of credit) from the offerings of the Faculty of Arts and Social Sciences.
5. A major sequence (List A) in one of the following:
   - AUST Australian Studies
   - CHIN Chinese Studies
   - COMD Development Studies
   - EDST Education
   - ENGL English
   - ENV Environment Studies
   - EURO European Studies
   - FREN French
   - GER German Studies
   - GREK Greek, Modern
   - HIST History
   - HPS History and Philosophy of Science
   - INDO Indonesian Studies
   - JAPN Japanese Studies
   - KORE Korean Studies
   - LING Linguistics
   - MEFT Media, Culture & Technology/Film/Theatre & Performance Studies
   - MUSC Music
   - PSLO Political Economy
   - PHIL Philosophy
   - POLS Politics and International Relations
   - RUSS Russian Studies
   - SLP Policy Studies
   - SOCA Sociology and Anthropology
   - SPAN Spanish and Latin American Studies
   - WOMS Women’s and Gender Studies

A major sequence is an approved progression of courses in a school, department or program: you will find details under the relevant entry.

6. 48 units of credit obtained in Level 1 (first year) courses, including MDCM1000 and MDCM1001, and any first year courses in your major sequence. No more than 12 units of credit can be obtained in first year courses from any one school, department, unit or program, with the exception of students wishing to pursue studies in Film, Theatre & Performance Studies or Media, Culture & Technology. These students can do up to 24 units of credit in Level 1 courses from the School of Media, Film and Theatre (MDCM1000, MDCM1001 and 12 units of credit in Level 1 courses with a MEFT prefix).

7. during their second and third years of study, students are also required to complete courses from the University’s General Education program carrying the equivalent of 12 units of credit.

How to Choose Your First Year Program
Enroll in the core courses MDCM1000 and MDCM1001 (see 2. above); then choose one or more areas from 5. above in which you might like to major, and enrol in the appropriate first year (Level 1) courses. Then select additional first year courses to make up a total of 48 units of credit. 24 Level 1 units of credit must be selected from courses offered by the Faculty of Arts and Social Sciences.

Upper Level
In your second and third year, enrol in the prescribed core courses (see 2. above) and the necessary courses for your major sequence. The additional units of credit should be taken in other Upper Level courses and in courses from the University’s General Education program. Try to spread your workload evenly over the four sessions of study.

General Education Requirements
Students are also required to complete 12 units of credit from the University’s General Education program during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.

Academic Rules
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:

1. the core program (48 units) in MDCM Media and Communications;
2. a major sequence from List A of the BA Rules;
3. a total of 48 Level 1 units of credit, including no more than 12 in any one sequence of study, from Lists A, B and C of the BA Rules;
4. two Upper Level MDCM electives outside the core program;
5. 12 units of credit from the General Education program, normally taken in the second and third year of study;
6. The Pass degree of Bachelor of Arts (Media and Communications) may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrollment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:

7. have obtained 144 units of credit in accordance with 1.-5. above and satisfied the appropriate prerequisites for entry to the Honours level program;
8. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

3408 Bachelor of Arts (Dance) Bachelor of Education
BA(Dance)BEd
Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The School of Media, Film and Theatre offers a four-year full-time double degree for intending specialist dance educators leading to the award of Bachelor of Arts (Dance) Bachelor of Education.

Entry to the BA(Dance) BEd program is by audition and satisfactory University academic entry requirements.
Program Objectives and Learning Outcomes
The Bachelor of Arts (Dance) Bachelor of Education is a professional double degree which qualifies successful graduates to be recognised as high school teachers with the NSW Department of Education and Training. The double degree also serves as an ideal basis from which to enter a range of dance and dance education professions.

Program Structure
To qualify for the award of the Bachelor of Arts (Dance) Bachelor of Education, students must complete courses to the value of at least 192 units of credit, including:

1. the relevant sequences in Dance Theory, Dance Practice, Dance Education and Education as prescribed by the School of Media, Film and Theatre for the BA (Dance) BEd degree.
2. at least 42 units of credit drawn from the following major sequences (List E) offered within the BA degree:
   - Chinese, Drama (Theatre), Economics/Business Studies, English, French, Geography, German, History, Indonesian, Japanese, Literacy/English as a Second Language (ESL), Spanish.
   - This major sequence functions as the students’ second teaching area. Students are strongly advised to familiarise themselves with the Department of School Education’s current pattern of employment prospects when choosing both their second teaching area and the elective courses within that program.
3. 12 units of credit in courses approved by the Faculty in the University’s General Education program.

Academic Rules
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. the approved sequences in Dance Theory, Dance Practice, Dance Education and Education;
2. a sequence of 42 units of credit from List E below, including no more than 12 Level 1;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study.

List E
- CHIN Chinese,
- ENGL English*,
- ECON Economics,
- FREN French,
- GEOH/GEOS Geography,
- GERS German,
- HIST History,
- INDO Indonesian,
- JAPN Japanese,
- LING Linguistics,
- MEFT Theatre & Performance Studies,
- SPAN Spanish

* A major sequence in ENGL English is the most appropriate background for Literacy/ESL teaching.

The Pass degree of Bachelor of Arts (Dance) Bachelor of Education may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:

1. have obtained 192 units of credit in accordance with 1.-3. above and satisfied the appropriate prerequisites for entry to the Honours level program;
2. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may apply to graduate with the Pass degree.

Admission Requirements
Entry to the BA (Dance) BEd program is by audition, satisfactory physiotherapy report, and satisfactory University academic entry requirements.

3417 Diploma in Languages

DipLang

Typical Duration
3 years

Minimum UOC for Award
42 units of credit

Typical UOC per Session
6 units of credit

Program Description
The Diploma in Languages requires a program of 42 units of credit in a language and related courses as approved by the School of Modern Language Studies. It may be taken concurrently with another degree program, and offers an ideal opportunity to acquire an additional language for professional purposes.

Program Objectives and Learning Outcomes
The objective of the Diploma is to provide a pathway for those wishing to gain a major in a language, following or in conjunction with another program.

Program Structure
The basic requirements for the award of the Diploma in Languages are:
1. Over a period of at least two semesters of study, 42 units of credit in language or related courses offered within the Bachelor of Arts (program 3400) as approved by the School of Modern Language Studies.

Academic Rules
1. To qualify for the award of the Diploma in Languages, students must complete, over a period of at least two semesters of study, 42 units of credit in language or related courses offered within the Bachelor of Arts (program 3400) as approved by the School of Modern Language Studies. Graduates must have achieved a minimum level of competence in the relevant language equivalent to that attained by students who have completed six semesters of study in a language commencing at Introductory Level.

2. A candidate for the Diploma shall:
(i) have been awarded the Bachelor from the University of New South Wales or another tertiary institution, or
(ii) with the approval of the program authorities concerned, be enrolled concurrently within the University of New South Wales in an undergraduate program of the University of New South Wales which does not offer a major sequence in the language concerned.

Admission Requirements
To be eligible to enrol in the Diploma program, students must already hold a tertiary degree or currently be enrolled in a degree program at UNSW.

3418 Diploma in Music

DipMus

Typical Duration
3 years

Minimum UOC for Award
42 units of credit

Typical UOC per Session
6 units of credit

Program Description
The Diploma in Music requires a program of 42 units of credit in Musicology, Musicianship skills and performance in an ensemble.

Program Objectives and Learning Outcomes
The objective of the Diploma is to provide a pathway for those wishing to gain a major in Music, following or in conjunction with another program.

Program Structure
The basic requirements for the award of the Diploma in Music are:
1. The completion of a sequence of courses totalling 42 units of credit and constituting the prescribed major sequence in Music of the Bachelor of Arts. Please refer to plan MUSCA13400 in the Online Handbook.
Academic Rules

1. To qualify for the award of the Diploma in Music, students must complete a sequence of courses totalling 42 units of credit and constituting the prescribed major sequence in Music of the Bachelor of Arts (program 3400).

2. A candidate for the Diploma shall:
   (i) have been awarded the Bachelor from the University of New South Wales or another tertiary institution, or
   (ii) with the approval of the program authorities concerned, be enrolled concurrently within the University of New South Wales in an undergraduate program of the University of New South Wales which does not offer a major sequence in Music.

3420 Bachelor of Social Science

BSocSc

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description

The Bachelor of Social Science degree combines a core program of study in social science, policy analysis and research methods with a major in a particular social science discipline.

Program Objectives and Learning Outcomes

The Bachelor of Social Science core program aims to provide students with skills in undertaking social research, particularly in an applied policy setting. These include written communication skills with particular emphasis on reports, submissions, position papers and proposals; the ability to undertake research and data analysis, both quantitative and qualitative; analysis and critical evaluation of research, arguments and policies; and the use of computers in social research and information processing.

The major study aims to equip students with a knowledge base in one of the social sciences.

Program Structure

The basic requirements for the degree are:

1. A total of 144 units of credit.
2. 48 units of credit in the core courses of the BSocSc degree program, each of which carries 6 units of credit:

   **First Year**
   - SLSP1001 Research & Information Management
   - and one of the following:
     - SLSP1000 Social Science & Policy
     - SLSP1002 Introduction to Policy Analysis

   **Second Year**
   - SLSP2000 Political Economy & the State
   - SLSP2001 Applied Social Research 1
   - SLSP2002 Policy Analysis Case Studies

Total required for BSocSc Pass Degree - 144 units of credit

BSocSc Core Program, 48 units of credit

Major Sequence, 42 units of credit
Students who major in Film and Theatre must also complete a sequence of 24 units of credit in a discipline listed in 3. above.

A major sequence is an approved progression of courses in a school or program; you will find details under the relevant entry.

4. 48 units of credit obtained in Level 1 (first year) courses, including the two core courses, the first year courses of your major sequence and two other electives.

5. during their second and third years of study, students are also required to complete courses from the University's General Education program carrying the equivalent of 12 units of credit.

How to Choose Your First Year Program

Enrol in the core courses SLSP1001 and either SLSP1000 or SLSP1002 (see 2. above); then choose one area from the list in point 3. which you would like to major in, and enrol in the appropriate first year (Level 1) courses. Then select additional courses to make up a total of 48 units of credit. 24 Level 1 units of credit must be selected from courses offered by the Faculty.

Upper Level and Honours Entry

In second and third year, enrol in the prescribed core courses (see 2. above) and the necessary courses for your major sequence. The additional units of credit should be taken either in the area you chose as a possible second major or in other Upper Level courses. You must also enrol in the prescribed courses from the University’s General Education program. Try to spread your workload evenly over the four sessions of study.

In addition, if you intend to apply for entry to the Honours year, you should enrol in SLSP3911 Inquiry and Interpretation in the Social Sciences in your third year of study.

For entry to Honours in the BSoSc degree Program, you must have obtained an average of credit or better in your core program and major sequence; and a credit or above in SLSP3911. You have to apply to the Head of School for admission.

General Education Requirements

Students are also required to complete 12 units of credit from the University's General Education program, normally during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.

Academic Rules

Pass Degree

To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:

1. the core program (48 units) in SLSP Social Science and Policy;

2. a major sequence from List F below;

3. a total of 48 Level 1 units of credit, including no more than 12 in any one sequence of study, from Lists A, B and C of the BA Rules;

4. at least 24 Level 1 units of credit, including 12 in SLSP; from Lists A and B of the BA Rules;

5. 12 units of credit from the General Education program, normally taken in the second and third year of study.

List F

AUST Australian Studies, COMD Development Studies, ECON Economics/Economic History, Environmental Studies, EURO European Studies, GEOH/GEOS Geography and Geology, HIST History, HPSL History and Philosophy of Science, MEFT Film/Theatre & Performance Studies, MGMT International Business/Industrial Relations/Human Resource Management, PECO Political Economy, PHIL Philosophy, POLS Politics and International Relations, PSYC Psychology, SOCA Sociology and Anthropology, SPAN Spanish and Latin American Studies (History Stream), WOMS Women's and Gender Studies.

Students who major in Film or Theatre & Performance Studies must complete at least 24 units of credit in other sequences from List F.

6. The Pass degree of Bachelor of Social Science may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:

7. have obtained 144 units of credit in accordance with 1.-5. above and satisfied the appropriate prerequisites for entry to the Honours level program;

8. obtain a further 48 units of credit in an approved Honours program. The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

3422 Bachelor of Social Science in Criminology

BSocSc

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description

The Bachelor of Social Science in Criminology combines core studies in social science with core studies in criminal law, criminal procedures and criminal justice institutions; theories of crime; research in crime and justice, and electives in other criminological topics. The core sequence in social science includes courses in social and economic theory and policy, case studies in policy analysis, research methods and statistical applications, and social science research projects.

Program Objectives and Learning Outcomes

The Bachelor of Social Science in Criminology program gives students the skills to apply the social sciences to criminological problems. The program will provide students with a coherent program of knowledge about crime, its causes and social construction, the history and operation of crime control institutions, and the outcomes of criminal justice policies.

Program Structure

The basic requirements of the degree are:

1. a total of 144 units of credit,

2. 48 units of credit in the core courses of the BSocSc degree program and 24 units of credit in core courses in Criminology:

   First Year
   CRIM1000 Criminal Law and Justice 1
   CRIM1001 Criminal Law and Justice 2
   SLSP1000 Social Science & Policy
   SLSP1001 Research & Information Management

   Second Year
   CRIM2000 Criminological Theories
   SLSP2000 Political Economy & the State

3. a total of 48 Level 1 units of credit, including no more than 12 in any one sequence of study, from Lists A, B and C of the BA Rules;

4. at least 24 Level 1 units of credit, including 12 in SLSP; from Lists A and B of the BA Rules;

5. 12 units of credit from the General Education program, normally taken in the second and third year of study.

List F

AUST Australian Studies, COMD Development Studies, ECON Economics/Economic History, Environmental Studies, EURO European Studies, GEOH/GEOS Geography and Geology, HIST History, HPSL History and Philosophy of Science, MEFT Film/Theatre & Performance Studies, MGMT International Business/Industrial Relations/Human Resource Management, PECO Political Economy, PHIL Philosophy, POLS Politics and International Relations, PSYC Psychology, SOCA Sociology and Anthropology, SPAN Spanish and Latin American Studies (History Stream), WOMS Women's and Gender Studies.
SLSP2001  Applied Social Research 1
SLSP2002  Policy Analysis Case Studies

Third Year
CRIM3000  Researching Crime and Justice
SLSP3000  Social Theory and Policy Analysis
SLSP3001  Applied Social Research 2
SLSP3002  Social Science & Policy Project

The Social Science and Policy core program satisfies the University’s requirement for 56 hours of study relating to the purposes and consequences of university education, professional and ethical action, and social responsibility.

3. 24 units of credit in the approved list of criminology-related electives (an indicative list) below:
   - CRIM2010  Community Corrections
   - CRIM2011  Crime & Society
   - CRIM2012  Crime Prevention Policy
   - CRIM2013  Juvenile Justice
   - CRIM2014  Policing
   - CRIM2015  Sentencing: Law, Policy & Practice
   - CRIM2016  Criminal Justice System
   - CRIM2017  The ‘New’ Prosecutors
   - CRIM2018  Crime, Power and Human Rights
   - CRIM3010  Comparative Criminal Justice
   - ENGL2480  Crime fiction
   - HIST2468  History from Crime
   - POLS2020  Sex, Human Rights & Justice
   - PSYC3301  Psychology and Law
   - SLSP2820  Crime & Punishment
   - SOCA2208  Deviant Fieldwork
   - SOCA3103  Professions
   - SOCA3408  Crime in Australian Society
   - SOCA3409  Crime, Gender and Sexuality
   - SOCA3410  Deviance
   - SOCA3411  Forensic Sociology
   - SOCA3701  Discipline of the Law
   - SOCA3710  Moral Panics
   - SOCA3810  The Space of Terror

4. 48 units of credit obtained in Level 1 (first year) courses, including SLSP1000, SLSP1001, CRIM1000 and CRIM1001. No more than 12 units of credit can be obtained in first year courses from any one school, department, unit or program.

5. 12 units of credit from the University’s General Education program, normally during the second and third years of study.

How to Choose Your First Year Program
Enrol in the core courses CRIM1000, CRIM1001, SLSP1000 and SLSP1001; then select additional courses to make up a total of 48 units of credit. 24 Level 1 units of credit must be selected from courses offered by the Faculty.

Upper Level and Honours Entry
In second and third year, enrol in the prescribed core courses (see 2. above) and the 24 units of credit in the approved list of criminology-related electives. The additional units of credit should be taken in other Upper Level courses. You must also enrol in the prescribed courses from the University’s General Education program. Try to spread your workload evenly over the four sessions of study.

In addition, if you intend to apply for entry to the Honours year, you should enrol in SLSP3911 Inquiry and Interpretation in the Social Sciences your third year of study.

For entry to Honours in the BSocSc Criminology degree Program, you must have obtained an average of credit or better in your core program and criminology electives; and a credit or above in SLSP3911. You have to apply to the Head of School for admission.

General Education Requirements
Students are also required to complete 12 units of credit from the University’s General Education program, normally during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.

3424 Bachelor of International Studies

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The Bachelor of International Studies is a four-year full-time degree program offered in the following five area-study concentrations: Asian Studies Plan, Development Studies Plan, European Studies Plan, Global Studies Plan, Language Studies Plan.

Program Objectives and Learning Outcomes
International Studies provides the knowledge and skills essential for understanding and working in the rapidly changing global environment. It examines the interactions of nations, economies, institutions, peoples, cultures, technologies and ideas against a background of increasing international integration and changing modernity. The program provides specialised sequences of courses in five area streams which are designed to give students a thorough preparation for further study and employment in areas vital to Australia's increasing participation in the international arena. The degree incorporates a period of overseas study during the third and fourth year for students who have made satisfactory progress towards the degree in their first and second years of study. The Faculty provides a contribution to the expenses of this study.

Program Structure
To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses. The program includes a core sequence of courses in International Studies (INST) and an approved program (Overseas Study Program) at an overseas institution normally of two semesters, undertaken during the third and fourth years of study.

Bachelor of International Studies in Asian Studies - Sample Program

To proceed on the Overseas Study Program, students must have achieved satisfactory academic progress in their first and second years of study and must fulfill the requirements of the University's Exchange Program.

ASIAA13424 Asian Studies Plan
Coordinator: Karyn Lai, School of Philosophy

The Bachelor of International Studies specialising in Asian Studies is an integrated program combining language study, a core program of study in International Studies, and a core program in Asia-related study, together with an approved overseas program to be undertaken during the third and fourth years of study.

The study of Asian societies and Asian languages is increasingly important for Australia. Australia is located in the Asian region, most of its trade is with Asia and Asian countries are becoming important sources of investment in Australia. They are also becoming important areas of investment by Australian companies. Australia’s future lies in increasing social, economic and political interaction with Asian countries.

Graduates who combine proficiency in an Asian language and knowledge of one or more Asian countries with a professional qualification will be in increasing demand with both private and public employers.

Enquiries may be directed to the Coordinator listed above.

COMDB13424 Development Studies Plan
Coordinator: Michael Johnson, School of Social Science and Policy

In many parts of the developing world large numbers of people live in poverty and the natural environment is under pressure, making it difficult to access clean water, energy sources and natural materials for housing and other uses. Understanding these and other related global trends and how they can be addressed is the concern of the Development Studies Plan, an interdisciplinary program that introduces students to the field of development studies. Central issues and themes in Development Studies examined in the program include the history and political economy of development; the causes of poverty and inequality; the relationship between the environment and economic development; the problems that confront remedial efforts at local, state and international levels; social, economic, environmental and political institution-building and the debate about globalisation and development.

The Bachelor of International Studies in Development Studies requires the completion of a sequence of courses in Development Studies and a core sequence of courses in International Studies, together with an approved overseas program undertaken during the third or fourth year of study. There is scope in the degree for students to study a language in depth. Courses in the Bachelor of International Studies in Development Studies are offered at all levels; they are taught in English and require no previous knowledge of other languages.

Enquiries may be directed to the Coordinator listed above.

EUROA13424 European Studies Plan
Coordinator: Centre for European Studies

Studying Europe is an essential part of defining Australia’s role as a predominantly ‘European’ country located in the Asia-Pacific. Any attempt...
Globalisation has emerged as a defining trend of the early twenty-first century. This process addresses the main themes and debates that relate to globalisation. It locates this process in relation to world history, international relations, international political economy, global development and large-scale social change. Questions about the rising levels of inequality world-wide, the environment, the changing role of nation-states and the nation-state system, the relationship between globalisation and transnational corporations (TNCs), the growing power of international institutions and organisations, and the significance of technological change will be examined. The relationship between globalisation and national identity will also be explored as will the wider social and cultural significance of recent international changes.

The Bachelor of International Studies specialising in Global Studies requires the completion of a core sequence of courses in Global Studies and International Relations. This includes a core sequence of courses in Globalisation and National Identity, Globalisation and Political Economy, Globalisation and Society, and Globalisation and the Environment. Students will also be required to undertake an approved overseas program to be undertaken during the third or fourth year of study. There is scope in the degree for students to study a language in depth. Courses in the Bachelor of International Studies in Globalisation are offered at all levels; they are taught in English and require no previous knowledge of other languages.

Enquiries may be directed to the Coordinator listed above.

MODLA13424 Language Studies Plan
Coordinator: Carmen Cabot, School of Modern Language Studies

Australia's position in the world requires us to communicate in an informed manner with our neighbours and trading partners. We also have a rich heritage from the diverse cultures from which we have come. This continues to influence our experience of the world and represents a considerable resource in Australia's current efforts to 'internationalise' its economic and cultural systems. Genuine proficiency in other languages not only greatly expands personal horizons, but also enhances later opportunities for overseas study and employment.

The Bachelor of International Studies specialising in Language Studies is designed for students wishing to prepare themselves for a professional career in the fields of translation, interpreting, teaching, or working with international organisations.
career in the languages area, in Australia or overseas. It requires major sequences in two languages other than English, with the opportunity to acquire real fluency and competence through the overseas study period prescribed for the degree. Both within the language majors themselves, and in the courses offered in International Studies, students will acquire a thorough understanding of the social and cultural contexts in which their chosen languages are used, and be ideally equipped to be articulate communicators and representatives for Australia overseas.

Enquiries may be directed to the Coordinator listed above.

**General Education Requirements**

Students are also required to complete 12 units of credit from the University's General Education program during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.

**Academic Rules**

**Asian Studies Plan (ASIAA13424)**

To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. 48 units of credit at Level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. a sequence of 36 units of credit in one of the following Asian languages: CHIN Chinese, INDO Indonesian, JAPN Japanese, KORE Korean;
4. at least 36 units of credit in Asia-related courses, including ASIA1001 and ASIA1002 at Level 1:
   - ASIA1001 Introduction to Contemporary Asia
   - ASIA1002 Introducing Southeast Asia
   - ECON2116 Economics of Japanese Business and Government
   - ECON3112 The Newly Industrialising Economies of East Asia
   - ECON3113 Economic Development in ASEAN Countries
   - HIST2050 Women in Southeast Asian Societies
   - HIST2054 Modern Japan: Political Culture, Popular Culture
   - HIST2055 Modern India
   - HIST2084 The Vietnam War/The American War
   - HIST2300 Between Dictatorship and Democracy: Contemporary Southeast Asia
   - HIST2351 Chinese Civilisation, 1600 BC to 1600 AD
   - HPSC2550 Sustainable Development, Globalisation and the Third World
   - PHIL2519 Introduction to Chinese Philosophy
   - PHIL2520 Aspects of Chinese Thought
   - POLS2003 The Political Development of Contemporary China
   - POLS2014 Regional Cooperation and Conflict in Southeast Asia
   - POLS2036 Political Development in Northeast Asia
   - SOCA3211 Sustainable Development
   - SPAN2430 Miracles of Modernisation/Crisis of Capitalism: Asia and the Americas

5. 48 units of credit at an approved overseas university over two sessions (INST3101 and INST3102);

---

6. 6 units of credit in an Upper Level ARTS course;
7. 12 units of credit from the University's General Education program at Upper Level;
8. The Pass degree of Bachelor of International Studies may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level, a student must:
9. have obtained 192 units of credit in approved courses, satisfied the appropriate prerequisites for entry into the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions, and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

Development Studies Plan (COMDB13424)

To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. 48 units of credit at level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. a sequence of 36 units of credit in Development Studies (COMD) including COMD1002, COMD2000, COMD2050 and ECON3110:
   - COMD1001 Development Studies: The Emergence of Underdevelopment;
   - COMD2010 (Un)Making the Third World: History and Global Development B;
   - COMD2050 Sustainable Development, Globalisation and the Third World;
4. a sequence of at least 36 units of credit in one of the following European languages: FREN French, GERS German, GREK Greek, ITAL Italian, RUSS Russian, SPAN Spanish;
5. 6 units of credit in an Upper Level ARTS course;
6. 48 units of credit at an approved overseas university over two sessions (INST3101 and INST3102);
7. 12 units of credit from the University's General Education program at Upper Level;
8. The Pass degree of Bachelor of International Studies may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level, a student must:
9. have obtained 192 units of credit in approved courses, satisfied the appropriate prerequisites for entry into the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions, and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

Global Studies Plan (GLSTA13424)

To qualify for the award of the degree, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:
1. 48 units of credit at level 1, including no more than 12 in any one area of study;
2. a major sequence of 42 units of credit from the core program in International Studies;
3. a sequence of 36 units of credit in Global Studies (GLST) including GLST1100, GLST2104 and GLST3000:
   - GLST1100 Introduction to Globalisation;
   - GLST1200 Women, Gender and World History;
   - GLST2101 (Un)Making the Third World: History and Global Development B;
   - GLST2102 (Un)Making the Third World: History and Global Development A.
**BMus Requirements**

BMus students must take part in at least two of the performance ensembles offered by the School, one of which must be a major performing ensemble.

**General Education Requirements**

Students are also required to complete 12 units of credit from the University's General Education program, normally during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.
Academic Rules

Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over three years of study, a minimum of 144 units of credit in approved courses including:
1. 96 units of credit in the relevant sequences in Musicology, Musicianship and Professional Practices;
2. an additional 24 Level 1 and 6 Upper Level units of credit from Lists A, B or C of the BA Rules, including no more than 12 Level 1 in any one sequence;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study;
4. 6 units of credit from a third year ARTS elective or equivalent course.
5. The Pass degree of Bachelor of Music may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:
6. obtain 144 units of credit in accordance with 1.-4. above and satisfied the appropriate prerequisites for entry to the Honours level program;
7. obtain a further 48 units of credit in an approved Honours program.

Musicology and Musicianship Options
MUSC2101 Music of the Baroque
MUSC2111 Introduction to Musicology
MUSC2112 Music of the 18th and 19th Centuries
MUSC2132 Music of the late Middle Ages and Renaissance
MUSC2201 Aboriginal Music
MUSC2332 Electronic Music
MUSC3101 Professional and Ethical Practices in Music
MUSC3112 Seminar in Music
MUSC3131 Jazz and Popular Music
MUSC3162 Twentieth Century Music
MUSC3212 Music of India
MUSC3301 Music Analysis
MUSC3302 Orchestration and Arrangement
MUSC3331 Advanced Electronic Music
MUSC4650 Conducting

Further Information
Admission to the program is subject to a satisfactory audition/interview and an acceptable level of attainment in year 12 studies or equivalent. Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

For more information, please refer to the School's website: http://music.arts.unsw.edu.au/futurestudents/undergraduate.php

3426 Bachelor of Music Bachelor of Education

BMusBEd

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The School of Music and Music Education offers a four-year full-time double degree for intending specialist music educators leading to the award of Bachelor of Music Bachelor of Education (BMusBEd).

Program Objectives and Learning Outcomes
The BMusBEd offers an integrated training in six major areas: Musicology, Musicianship, Music Education Studies, Performance Studies, Education Studies and Contextual Studies. Graduates are qualified to teach classroom and instrumental/vocal music from kindergarten to Year 12, and are accredited to teach in all Australian states.

Program Structure
To qualify for the Bachelor of Music, Bachelor of Education at Pass level, a student must obtain at least 192 units of credit normally taken from the six major components listed below:

1. **Musicology and Musicianship (66 units of credit)**
   MUSC1101 Music Reinvented
   MUSC1302 Musicianship A
   MUSC2201 Aboriginal Music
   MUSC2301 Musicianship B
   MUSC2302 Musicianship C
   MUSC2332 Electronic Music
   3 Musicology Options (18 units of credit):
   MUSC3101 Professional and Ethical Practices in Music
   MUSC3131 Jazz and Popular Music (highly recommended)
   2 Musicianship electives (12 units of credit)

2. **Music Education (36 units of credit)**
   MUSC1601 Introduction to Music Education
   MUSC2601 Introduction to Secondary Music Education
   MUSC3601 Specialist Music Education
   MUSC3602 Creativity in Music Education
   MUSC4601 Advanced Music Education
   MUSC4602 Music Teaching Experience

3. **Performance Studies (36 units of credit)**
   MUSC1501 Music Performance 1A
   MUSC1502 Music Performance 1B
   MUSC2501 Music Performance 2A
   MUSC2502 Music Performance 2B

MUSC3501  Advanced Music Performance 3A  
MUSC3502  Advanced Music Performance 3B

### 4. Education Studies (24 units of credit)

Four courses (each of 6 units of credit) selected from core and elective courses offered by the School of Education. The core courses EDUC1101 Educational Psychology 1 and either EDUC1103 Educational Psychology 2 or EDUC1104 Social Perspectives in Education are prerequisites for an additional three electives (of 12 units of credit) offered by the School of Education. The Year 4 core courses, EDUC4093 Special Education and EDUC4095 Gifted and Talented Students: Recognition and Response are required for registration by the NSW Department of Education and Training. At the discretion of the Program Coordinator for Music Education, students may be permitted to substitute MUSC3612 Principles and Processes of Music Education (6 units of credit) for one of the two School of Education electives.

### 5. Contextual Studies (18 units of credit)

A choice of courses available from the Faculty of Arts and Social Sciences programs.

### 6. General Education (12 units of credit)

Courses totalling 12 units of credit from those approved for students in the Faculty of Arts and Social Sciences.

### Program Requirements

The student's training involves practice teaching sessions in Years 1, 2, 3 and 4 in a variety of different schools.

### Honours Level

Prerequisite: Completion of all requirements for the Pass degree with an average of at least credit level in either music (in the case of Honours in music) or music education (in the case of Honours in music education) courses.

### Academic Rules

**Pass Degree**

To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. the relevant sequences in Music, Music Education, Education and Performance Studies;
2. an additional 6 Level 1 and 12 Upper level units of credit from Lists A, B or C of the BA Rules;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study.
4. The Pass degree of Bachelor of Music Bachelor of Education may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

**Honours Degree**

To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:

5. have obtained 192 units of credit in accordance with 1.-3. above and satisfied the appropriate prerequisites for entry to the Honours level program;
6. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

### Admission Requirements

Entry to the program is subject to a satisfactory audition/interview and acceptable level of attainment in Year 12 studies or equivalent. Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

### 3427 Bachelor of Music Bachelor of Arts

**BMus BA**

**Typical Duration**

4 years

**Minimum UOC for Award**

192 units of credit

**Typical UOC per Session**

24 units of credit

### Program Description

The School of Music and Music Education offers a four-year double degree leading to the award of Bachelor of Music Bachelor of Arts. The BMusBA provides an opportunity for students to undertake all of the courses required for the Bachelor of Music degree, including the Music Performance stream, as well as 84 units of credit from the Bachelor of Arts degree, including an approved major of 42 units of credit.

Entry to the program is subject to a satisfactory audition/interview and acceptable level of attainment in Year 12 studies or equivalent. Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

### Program Objectives and Learning Outcomes

The Bachelor of Music/Bachelor of Arts develops the full range of music skills in the areas of musicology, ethnomusicology, performance, composition, music technology and jazz studies as well as the skills and perspectives provided by more extensive studies in other parts of the Faculty.

The whole range of professional careers open to BMus graduates is available to BMusBA graduates. In addition, the BA qualification offers opportunities in public and private sector administrative and policy positions.

### Program Structure

The program is as follows:

**Year 1**

MUSC1101  Music Reinvented  
MUSC1302  Musicianship A  
MUSC1401  Professional Practices A  
MUSC1402  Professional Practices B  
First year BA courses (24 units of credit)

Year 4
- Musicianship Option (6 units of credit)
- Musicology Option (6 units of credit)
- Either MUSC3101 Professional and Ethical Practices in Music or a course from the ARTS3000 series
- Upper Level BA courses (24 units of credit)
- General Education courses (6 units of credit)

BMus Requirements
BMus students must take part in at least two of the performance ensembles offered by the School, one of which must be a major performing ensemble.

BA Options
The BA courses must include one major sequence for the BA degree (List A) in addition to the Music major.

Academic Rules

Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. a total of 48 Level 1 units of credit;
2. no more than 12 Level 1 units of credit in any one sequence of study from Lists A, B or C of the BA Rules, other than MUSC courses;
3. 102 units of credit in the relevant sequences in Musicology, Musicianship and Professional Practices;
4. a major sequence (other than Music) of 42 units of credit from List A of the BA Rules;
5. 36 units of credit outside the major sequence in 4. above from Lists A, B or C of the BA Rules;
6. 12 units of credit from the General Education program, normally taken in the second and third year of study;
7. 6 units of credit from a third year ARTS elective or equivalent course;
8. The Pass degree of Bachelor of Music Bachelor of Arts may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:

9. have obtained 192 units of credit in accordance with 1.-7. above and satisfied the appropriate prerequisites for entry to the Honours level program;
10. obtain a further 48 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The School of Social Work offers a four-year degree leading to the award of Bachelor of Social Work (BSW). The BSW provides an opportunity for students to undertake core Social Work courses, which include studies in the areas of social work practice, social and behavioural sciences, and contextual studies.

Program Objectives and Learning Outcomes
The Bachelor of Social Work program requires four years of full-time study. It is designed to prepare students for the professional practice of social work including work in the wider field of welfare. The essence of social work is working with people, including individuals, couples, families, groups, organisations or communities, and this will span people of any age, from any walk of life, or from any ethnic or racial background.
Program Structure

Year 1
SOCW1001 Introduction to Social Work
SOCW1002 Communication and Social Work
SOCW1003 Human Behaviour 1
Psychology elective
Sociology elective
Level 1 Arts elective
Level 1 Arts elective

Year 2
SOCW2001 Human Behaviour 2
SOCW2002 Society and Social Work 1
SOCW2003 Social Work Practice: Individuals, Families & Groups 1
SOCW2004 Society and Social Work 2
SOCW2005 Research for Social Work
SOCW2006 Social Work Practice - Community Work
SOCW2100 Aboriginal People and Social Work
General Education course
General Education course
SOCW2007 Bridging (for students exempt from 1st year)

Year 3
SOCW3001 Social Work Practice - Third Year Practicum
SOCW3002 Social Work Practice: Individuals, Families & Groups 2
SOCW3004 Social Policy 1
SOCW3006 Socio-Legal Practice
SOCW3008 Social Work Practice
Research elective
General Education course
General Education course

Year 4
SOCW4002 Social Work Practice in Organisations
SOCW4003 Social Work Practice
SOCW4004 Social Philosophy
SOCW4006 Social Policy 2
SOCW4010 Social Work Practice

Program Requirements - Field Education

An integral aspect of the program is organised learning in the field and this is a basic requirement for the professional recognition of the degree. In the field education courses, a field educator, usually in a social welfare agency, is responsible for a student learning to apply the principles of professional practice in an actual practice setting. From year 3, a total of 140 seven-hour days are taken up in this way. Forty of these days are scheduled during academic recess periods. A student's two field education placements are in more than one type of practice setting. The settings vary and can include medical, psychiatric, local government, community health, community, family and child welfare, services to groups with disabilities, services to the aged, services to migrants, income security, and corrective services. Non-government social welfare agencies and all levels of government are utilised. For some students, their second field education placement may be located outside the Sydney metropolitan area.

General Education Requirements

Students are also required to complete 12 units of credit from the University's General Education program, normally during their second and third years of study. For further information, please refer to the General Education Requirements entry under Faculty Information and Assistance.

Honours

Students may graduate with Honours by enrolling in the Honours program in the third year of the degree. Students must complete SOCW3005 Research Honours in Year 3 and SOCW4006 Social Policy Honours in Year 4. Students are then required to enrol for an additional fifth year for one session to complete an Honours Thesis (SOCW4800) of 12,000 - 15,000 words.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

Academic Rules

Pass Degree

To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. the prescribed sequences in Social Work courses and electives;
2. a total of 18 Level 1 units of credit, including no more than 12 in any one sequence of study, from Lists A, B or C of the BA Rules;
3. 12 units of credit from the General Education program, normally taken in the second and third year of study.
4. The Pass degree Bachelor of Social Work may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are counted towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level, a student must:

5. have obtained 192 units of credit in accordance with 1.-3. above and satisfied the appropriate prerequisites for entry to the Honours level program;
6. obtain a further 24 units of credit in an approved Honours program.

The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.
Professional Recognition
Graduates with the degree of Bachelor of Social Work from UNSW are eligible for membership of the Australian Association of Social Workers.

Further Requirements
It is a requirement that students who are undertaking placements in certain government departments and related organisations undergo a criminal record check.

4035 Bachelor of Social Work Bachelor of Arts

BSW BA
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
The School of Social Work offers a five-year double degree leading to the award of Bachelor of Social Work Bachelor of Arts. The BSW BA provides an opportunity for students to undertake all the courses required for the Bachelor of Social Work program, as well as 60 units of credit from the Bachelor of Arts program, including an approved major sequence of 42 units of credit (see List A of the BA rules).

Program Objectives and Learning Outcomes
The Bachelor of Social Work is designed to prepare students for the professional practice of social work including work in the wider field of welfare. The essence of social work is working with people, including individuals, couples, families, groups, organisations or communities and this will span people of any age, from any walk of life, or from any ethnic or racial background.

Program Structure
The program is as follows:

Year 1
SOCW1001 Introduction to Social Work
SOCW1002 Communication and Social Work
SOCW1003 Human Behaviour 1
Psychology elective
Sociology elective
2 x Arts Major Level 1
1 x Arts Level 1 elective

Year 2
SOCW2001 Human Behaviour 2
SOCW2002 Society and Social Work 1
SOCW2004 Society and Social Work 2
SOCW2005 Research for Social Work
SOCW2100 Aboriginal People and Social Work
2 x Arts Upper Level electives
2 x General Education electives
SOCW2007 Bridging (for students exempt from 1st year)

Year 3
SOCW3001 Social Work Practice: Individuals, Families & Groups 1
SOCW3006 Social Work Practice - Community Work
SOCW3004 Social Policy 1
Research elective
3 x Arts Major Upper Level
2 x General Education electives

Year 4
SOCW3001 Social Work Practice - Third Year Practicum
SOCW3002 Social Work Practice: Individuals, Families & Groups 2
SOCW3006 Socio-Legal Practice
SOCW3008 Social Work Practice
2 x Arts Major Upper Level
3 x Arts elective Upper Level

Year 5
SOCW4002 Social Work Practice in Organisations
SOCW4003 Social Work Practice
SOCW4004 Social Philosophy
SOCW4006 Social Policy 2
SOCW4010 Social Work Practice

Academic Rules
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over five years of study, a minimum of 240 units of credit in approved courses including:
1. the prescribed sequences in Social Work courses and electives;
2. a total of 48 Level 1 units of credit;
3. no more than 12 Level 1 units of credit in any one sequence of study, from Lists A, B or C of the BA Rules, other than SOCW courses;
4. a major sequence of 42 units of credit from List A of the BA Rules;
5. 12 units of credit from the General Education program.
6. The Pass degree Bachelor of Social Work Bachelor of Arts may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Non-government social welfare agencies and all levels of government are utilised. For some students, their second field placement may be located outside the Sydney metropolitan area.

Academic Rules
Pass Degree
To qualify for the award of the degree at Pass level, a student must obtain, normally over five years of study, a minimum of 240 units of credit in approved courses including:
1. the prescribed sequence of 156 units of credit in courses for the Bachelor of Social Work;
2. the prescribed core sequence of 48 units of credit in courses from the Bachelor of Social Science;
3. a total of 48 Level 1 units of credit;
4. 24 units of credit from Lists A, B or C (excepting SOCW and SLSP) of the BA Rules;
5. 12 units of credit from the General Education program.
6. The Pass degree Bachelor of Social Work Bachelor of Social Science may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree
To qualify for the award of the degree at Honours level in the Bachelor of Social Work or Bachelor of Social Science, a student must have satisfactorily completed a prescribed period of extra study.

It is a requirement that students who are undertaking placements in certain government departments and related organisations undergo a security check.

4055 Bachelor of Arts Bachelor of Education

BABEd

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The combined degree of Bachelor of Arts Bachelor of Education at pass level is a four-year program for intending secondary school teachers. Students combine studies in two approved teaching disciplines with both theoretical and practical aspects of education. In the final two years of the program, students develop skills in classroom competence and spend 50 days on supervised teaching practice in allocated secondary schools.

Program Objectives and Learning Outcomes
The combined degree of Bachelor of Arts Bachelor of Education at pass level is a four-year program designed to prepare students for teaching in secondary schools.

Program Structure
To qualify for the Bachelor of Arts Bachelor of Education at pass level it is necessary to complete at least 192 units of credit.

Total | 42 | 42 | 30 | 78 | 192 |
1. Education courses

Students must complete two Level 1 courses (12 units of credit) including EDST1101, EDST3090 (6 units of credit) and EDST4093 (3 units of credit) are compulsory Year 3 courses. EDST4095, EDST4081, EDST4094 and EDST4092 (27 units of credit) are compulsory Year 4 courses. A further 18 units of credit must be selected from Education Upper Level elective courses for Years 2, 3 or 4.

2. Teaching Method courses

Students must complete 12 units of credit in approved teaching method courses from two single method courses over years 3 and 4.

3. Arts courses as Preparation for Teaching

Major sequences of at least 42 units of credit must be completed in two schools/divisions to provide suitable background for teaching the following school subjects:

Chinese, Drama (Theatre), Economics/Business Studies, English, French, Geography, German, History, Indonesian, Japanese, Literacy/English as a Second Language (ESL)*, Spanish.

*A major sequence in English is the most appropriate background for Literacy/ESL teaching. Students who wish to teach Literacy/ESL may undertake a Linguistics major but they must also include two Level 1 English courses in their program.

Students should be aware that certain combinations of teaching courses may not lead to satisfactory employment opportunities and may result in timetable difficulties in Year 4. For more details, consult the School of Education.

4. Other Arts courses

The remaining Arts courses in Years 1 and 2 (12 Level 1, 6 Upper Level) should be selected from those available in the Faculty of Arts and Social Sciences.

5. General Education courses

12 units of credit must be selected from those approved for students in the Faculty of Arts and Social Sciences.

6. English Proficiency

Proficiency in English is essential in all Education courses. Prospective teachers must be able to communicate effectively with school students and staff members.

Honours Level

Students may elect to undertake an Honours program in either their fourth or fifth year of study (ie before the intensive teacher preparation year or afterwards). The Honours program may be undertaken in either Education or in an Arts discipline. Students with a good credit average in Year 1 are normally invited to undertake additional study in the relevant discipline over Years 2 and 3.

Academic Rules

Pass degree

To qualify for the award of the degree at Pass level, a student must obtain, normally over four years of study, a minimum of 192 units of credit in approved courses including:

1. a total of 48 Level 1 units of credit;
2. no more than 12 Level 1 units of credit in any one sequence of study from Lists A, B and C or the BA Rules;
3. 78 units of credit in EDST Education including compulsory core courses in Years 1, 3 and 4;
4. two sequences of 42 units of credit from List E below;
5. an additional 6 Upper Level units of credit from Lists A, B and C of the BA Rules;
6. 12 units of credit from the General Education program, normally taken in the second, third or fourth year of study.

List E

CHIN Chinese, ENGL English*, ECON Economics, FREN French, GEOH/GEOS Geography, GERS German, HIST History, INDO Indonesian, JAPN Japanese, LING Linguistics, MEFT Theatre, SPAN Spanish

*A major sequence in ENGL English is the most appropriate background for Literacy/ESL teaching.

7. The Pass degree Bachelor of Arts Bachelor of Education may be awarded with Distinction where a candidate has achieved a weighted average mark (WAM) of at least 75% in all courses completed since enrolment at UNSW which are credited towards the degree.

Honours Degree

To qualify for the award of the degree at Honours level in one or two schools/specialisations, a student must:

8. have obtained 192 units of credit in accordance with 1.–6. above and satisfied the appropriate prerequisites for entry to the Honours level program;
9. obtain a further 48 units of credit in an approved Honours program. The Honours degree is awarded in three classes (Class 1, Class 2 in two Divisions and Class 3). Students who fail to obtain one of these classes may proceed to graduate with the Pass degree.

Further Requirements

A police record check is required before students can be employed as a teacher and all schools require student teachers and potential applicants to have signed the mandatory “Working with Children Check”.

Combined Degree Programs

The Faculty strongly encourages combined program study. The following programs are available to students from other faculties:

Faculty of the Built Environment

Bachelor of Architecture/Bachelor of Arts (3262)
BArch BA (Faculty of Built Environment)
Bachelor of Architecture/Bachelor of Social Science (3263)
BArch BSoSc (Faculty of Built Environment)

College of Fine Arts

Bachelor of Art Theory/Bachelor of Arts (4806)
BArrTh BA (College of Fine Arts)
Bachelor of Art Theory/Bachelor of Social Science (4807)
BArrTh BSoSc (College of Fine Arts)
Bachelor of Fine Arts/Bachelor of Arts (4812)
BFA BA (College of Fine Arts)

Faculty of Commerce and Economics

Bachelor of Commerce/Bachelor of Arts (3525)
BCom BA (Faculty of Commerce and Economics)
Bachelor of Commerce/Bachelor of Social Science (3327)
BCom BSoSc (Faculty of Commerce and Economics)
Bachelor of Economics/Bachelor of Arts (3526)
BEC BA (Faculty of Commerce and Economics)
Bachelor of Economics/Bachelor of Social Science (3528)
BEC BSoSc (Faculty of Commerce and Economics)

Faculty of Engineering

Bachelor of Engineering/Bachelor of Arts (various)
BE BA (Faculty of Engineering)

Faculty of Law

Bachelor of Arts/Bachelor of Laws (4760)
BA LLB (Faculty of Law)
Bachelor of Arts (Media & Communications)/Bachelor of Laws (4764)
BA (Media) LLB (Faculty of Law)
Bachelor of International Studies/Bachelor of Laws (4765)
BIntSt LLB (Faculty of Law)
Bachelor of Social Science/Bachelor of Laws (4761)
BSoSc LLB (Faculty of Law)
Bachelor of Social Work/Bachelor of Laws (4785)
BSW LLB (Faculty of Law)

Faculty of Medicine

Bachelor of Arts/Bachelor of Medicine (3841)
BA BSc(Medi)MBBS (Faculty of Medicine)

Faculty of Science

Bachelor of Environmental Science/Bachelor of Arts (3932)
BEnvSc BA (Faculty of Science)
Bachelor of Science/Bachelor of Arts (3930/3931)
BSc BA (Faculty of Science)
Bachelor of Science/Bachelor of Education (4075)
BSc BEd (Faculty of Science)
Bachelor of Science/Bachelor of Social Science (3935/3936)
BSc BSoSc (Faculty of Science)

For details of these combined degree programs, consult the relevant Faculty.
Plan Rules and Information

Aboriginal Studies
Coordinator: Celia Moon, Academic Coordinator, Nura Gili Indigenous Programs Centre
Office: Nura Gili Resource Centre
Tel: (02) 9385 3805
Email: nuragili@unsw.edu.au

Aboriginal Studies provides an integrated, progressive exploration of Indigenous cultures, society and epistemologies and Australian race relations historically and in contemporary Australian society. Aboriginal Studies places Indigenous experience and Indigenous conceptual frameworks at the centre of the program. All courses are taught by academic staff of Nura Gili with input from elders from the local Indigenous community and Indigenous specialists. Aboriginal Studies critiques received notions of Australian history and identity, policy and contemporary relations between non-Indigenous and Indigenous Australians.

The Level 1 core courses offer students an introduction to Aboriginal identity and culture and to how Indigenous Australians represent themselves both here in Australia and overseas. These foundational courses provide the key conceptual frameworks which set the context for the Aboriginal Studies program. Level 2 courses provide a detailed political historical analysis of Aboriginal cultures and their interface with non-Indigenous Australia from pre-colonisation to contemporary Australia across a range of areas including health, law, education, arts and culture. Level 3 courses provide theoretical frameworks from anthropology, sociology, politics, social work, cultural heritage, gender studies, race theory and Indigenous research perspectives, of the complexities of inter-racial relations in Australia. Courses may be studied individually and are all designed to be self-contained. They are available to all students within the Faculty and many from outside. As well as providing the basis for a major sequence, Aboriginal Studies courses also form excellent ‘extensions’ to majors in Australian Studies, History, History and Philosophy of Science, Politics and International Relations, Sociology and Anthropology, Social Work and Film and Theatre.

Major Sequence
Aboriginal Studies may be taken as a major sequence. This requires the completion of 36 units of credit in Aboriginal Studies’ approved courses. Students must complete the program’s two core courses at Level 1 (ATS11001 and ATS11002) and two core courses at Level 2 (ATS21001 and ATS21002) as well as at least two Level 3 Aboriginal Studies courses, at least one in session one (ATS31001; ATS31003) and one in session two (ATS31002; ATS31003; ATS31004).

First Year Core Courses (12 UOC)
ATS11001 Introduction to Aboriginal People and Society S1
ATS11002 Australia: Representations, Identities and Difference S2

Second Year Core Courses (12 UOC)
ATS21001 Aboriginal Australia: The Pre-Colonial and Colonial Experience S1
ATS21002 Aboriginal Australia: The Post-Colonial Experience S2

Third Year Core Courses (12 UOC)
ATS31001 Colonisation and Indigenous Identity Formation S1
ATS31002 Indigenous Australia: Gendered Identities S2
ATS3103 Cultural Heritage Management S2
ATS3104 Aboriginal People and Social Work S2
ATS3105 Whiteness - Beyond Colour: Identity and Difference S1

Art History and Theory
Coordinator: Peter McNeil, School of Art History and Theory
Tel: (02) 9385 0777
Email: artth@unsw.edu.au
Website: www.cola.unsw.edu.au/schools/arthistorytheory/

Courses in Art History and Theory are offered by the School of Art History and Theory at the College of Fine Arts and taught on the Paddington Campus. There may be a limit on the number of places available to Arts students.

Art History and Theory offers an interdisciplinary approach to the study of visual arts and culture. These courses, taken individually or as a plan, will provide an intriguing and useful ‘set’ of strategies for understanding art objects, images and visual culture.

Courses offered within the Art History and Theory program include such topics as notions of Western art history, forms of visuality, the relationships of Western to non-Western art, the mass culture of television, films, the popular press, advertising and the culture of museums. Other issues explored include the social relationship of art and design to the themes of science, sexuality, trauma and memory. Students may choose courses which lay foundations for professional practice in art writing and arts-related work. (The School also offers a wide range of electives and General Education courses, which complement the list below.)

Major Sequence
A major sequence consists of 36 units of credit in Art Theory courses offered by the College of Fine Arts (12 Level 1 and 24 Upper Level units of credit).

Level 1
SAHT1211 Theories of the Image
SAHT1212 Theories of Art History and Culture
SAHT1221 Contexts of Art
SAHT1122 The Production of Art

Upper Level
SAHT2211 Eurocentred Visions: Grand Narratives in Western Art
SAHT2212 Art and Cultural Difference
SAHT2213 Memory and Self
SAHT2214 Approaches to Australian Art
SAHT2221 Writing for Art and Design
SAHT2222 Methods of Research and Writing on Art and Design
SAHT3211 Art after Postmodernism
SAHT3212 Art and Everyday Life
SAHT3213 Museum Studies: Exhibitions, Collections and Material Culture

Asian Studies
Coordinator: A/Prof David Reeve, Department of Chinese and Indonesian Studies
Office: Room 238, Morven Brown Building
Tel: (02) 9385 1019
Email: d.reece@unsw.edu.au

Asian Studies is an interdisciplinary area of study focusing on modern Asian societies and cultures and their historical traditions, with a particular focus on China, Indonesia, Japan and Korea. Asian Studies brings together various perspectives and approaches from culture, Economics, History, Politics, Sociology, literature and media to explore the changes that have happened in the Asian region over the last century, the integration of Asian countries in a global environment and Australia’s relations with its Asian neighbours.

Students who wish to specialise in Asian studies are encouraged to learn a relevant Asian language.

Major Sequence
At an undergraduate level, the study of Asian Studies is available in the Bachelor of Arts and related combined degree programs. Students may take a major sequence in Asian Studies as their second major, together with a major in a school-based discipline within the Faculty of Arts and Social Sciences. Alternatively, students may take one or more Asian Studies courses toward the general requirements of their Bachelor degree.

Students wishing to gain a major sequence in Asian Studies must obtain 6 Level 1 and 36 Upper Level (or 12 Level 1 and 30 Upper Level) units of credit from the following courses. Students who wish to count any other course towards their major sequence in Asian Studies should consult the Coordinator.

Level 1
ASIA1001 Introduction to Contemporary Asia S2
ASIA1002 Introducing Southeast Asia S1

Or 12 UOC from approved language courses in Chinese, Japanese, Korean or Indonesian language.

Upper Level
CHIN2301 Chinese Social and Cultural Change through Visual Art S1
CHIN2312 Chinese Cinema S1
CHIN2303 Gender in Contemporary Chinese Culture and Society S2

### Honours Entry

At present only the Combined Honours program is available in Australian Studies. Students must have obtained:

1. Combined Honours prerequisites in a discipline.
2. 42 units of credit at Credit level or better in prescribed Australian Studies and Australia related courses, including 12 units of credit in Level 1 AUST courses, and at least one of the Australian Studies Aboriginal courses.

### Biological Science

**Coordinator:** A/Prof Michel Beal, School of Biological, Earth and Environmental Sciences  
**Tel:** (02) 9385 2116  
**Email:** m.beal@unsw.edu.au  
**Website:** www.bees.unsw.edu.au

Biological Science encompasses all aspects of plants and animals including their relationship to each other and to the environment. Areas of study in Biological Science include cell biology, plant and animal physiology, ecology, genetics, taxonomy, marine biology, and evolutionary studies. Knowledge of the Biological Sciences is particularly relevant in...
the fields of wildlife and vegetation management, agriculture, forestry, conservation and other related environmental sciences.

**Major Sequence**

A major sequence consists of 12 units of credit at Level 1 (BIOS1101 and one of BIOS1201 or BIOS1301) plus 30 units of credit at Upper Level. Note that many Level III courses assume knowledge acquired in Level II courses.

**Level 1**

B IOS1201  Molecules, Cells and Genes  S1
B IOS1301  Ecology and Sustainability  S1
B IOS1101  Evolutionary and Functional Biology  S2

**Upper Level**

B IOS2041  Data Analysis for Life and Earth Sciences  S1
B IOS2011  Evolutionary and Physiological Ecology  S1
B IOS2031  Biology of Invertebrates  S2
B IOS2051  Flowering Plants  S2
B IOS2061  Vertebrate Zoology  S1
B IOS3011  Animal Behaviour  S2
B IOS3021  Comparative Animal Physiology  S1
B IOS3061  Plant Ecosystem Processes  S1
B IOS3071  Conservation Biology and Biodiversity  S1
B IOS3081  Ocean Biology and Fisheries  S1
B IOS3091  Marine and Aquatic Ecology  S2
B IOS3111  Population and Community Ecology  S2
B IOS3601  Advanced Field Biology  S1

**Chemistry**

**Office**: Room 102, Heffron Building

No more than two Level 1 courses (12 units of credit) and three Upper Level courses (18 units of credit) may be counted towards the degree of Bachelor of Arts or related programs.

**Level 1**

CHEM1011  Fundamentals of Chemistry 1A  S1
CHEM1021  Fundamentals of Chemistry 1B  S1
CHEM1031  Higher Chemistry 1C  S1
CHEM1041  Higher Chemistry 1D  S1

**Upper Level**

Chemistry offers a number of Upper Level courses in the four main discipline areas. Consult the School of Chemistry as to the appropriate choice to make. The following courses are available:

CHEM2011  Physical Chemistry  S2
CHEM2021  Organic Chemistry  S2
CHEM2031  Inorganic Chemistry and Structure  S2
CHEM2041  Chemical and Spectroscopic Analysis  S2
CHEM2083  Inorganic Chemistry  S1

**Note**: Chemistry is not available as a major sequence within the Faculty of Arts and Social Sciences.

**Chinese Studies**

**Coordinator**: Associate Professor Hans Hendrichke

**Administrative Assistant**: Rosanna Cheung

**Office**: Room 240, Morven Brown Building

**Tel**: (02) 9385 2416

**Email**: rosanna.cheung@unsw.edu.au

**Website**: http://languages.arts.unsw.edu.au/chinese/chinese.html

The Department offers a flexible language and academic program for students with different interests and different Chinese language backgrounds. Students can enter Chinese language courses at different levels, depending on their knowledge of Chinese characters. Chinese Studies courses enable students to study aspects of Chinese culture and society. Students who wish to study additional subjects on China and Asia may concurrently enrol in Asian Studies.

In order to count Chinese Studies as a major sequence, students must complete 42 units of credit in Chinese language and Chinese Studies courses, including two Level 3 or two Level 4 courses.

**Major Sequences (42 units of credit)**

**Honours**

**Prerequisite**: 54 units of credit in Chinese Studies, including CHIN3900 and CHIN3901 and a grade average of at least 70% in Chinese Studies courses. Honours candidates have to enrol in the two pre-Honours courses worth 6 units of credit each in Year 2 and/or Year 3. Intending Honours students are recommended to contact the Head of Department at an early stage in their undergraduate studies to discuss their selection of courses and their proposal for the Honours research project.

**ARTS AND SOCIAL SCIENCES** 81
Cognitive Science

Coordinator: Dr Anthony Corones, School of History and Philosophy of Science
Office: Room LG24, Morven Brown Building
Tel: (02) 9385 2357
Email: a.corones@unsw.edu.au

In the last twenty years, Cognitive Science has emerged as an exciting and fruitful domain of enquiry in which there is a convergence of interests in a number of disciplines which deal with mind, language, knowledge and intelligence. The Cognitive Science movement is based on a broad consensus that the problems and issues do not belong exclusively to any one discipline, but fall collectively to all of them.

The Cognitive Science program is designed to complement a school-based major sequence by grouping courses within the fields of Philosophy, Psychology, Linguistics, and Computer Science, which have special relevance to Cognitive Science. It provides the opportunity for students who undertake one or more of the Level 1 courses in the relevant disciplines to become acquainted with the broader enterprise of Cognitive Science through participation in the core course 'HPSC2610 Computers, Brains and Minds', and to build upon that acquaintance in selecting further courses from the program. Students should take the core course in their second year of study.

Major Sequence

Entry to the program requires 12 units of credit from the Level 1 prerequisite courses listed below. A major in Cognitive Science requires not less than 24 units of credit from the Upper Level courses listed in the program, including the core course. If you wish to major in Cognitive Science, these Upper Level courses may not be counted toward a major sequence in a School or Department. In planning your program for the degree, you should make sure that you meet the prerequisite requirements of individual courses, unless granted exemption by the course authority.

Level 1

Prerequisite: 12 units of credit obtained in any of the following courses:
- HPSC1200 Science, Good, Bad and Bogus
- LING1000 The Structure of Language
- PHIL1010 Thinking about Reasoning
- PHIL1011 Minds, Bodies and Persons*

Upper Level

Core course:
- HPSC2610 Computers, Brains and Minds

plus at least 18 units of credit obtained in any of the following courses:
- COMP3411 Artificial Intelligence
- HPSC2620 Body, Mind and Soul: The History and Philosophy of Psychology*
- LING2520 Generative Grammar*
- LING2680 Language Universals and Linguistic Typology*
- LING3003 Theoretical and Descriptive Linguistics
- PHIL2020 Philosophy of Language
- PHIL2206 Philosophy of Mind
- PHIL2207 Philosophy of Psychology
- PHIL2218 Philosophical Foundations of Artificial Intelligence
- PSYC2071 Perception and Cognition
- PSYC2081 Learning and Physiological Psychology

*Not offered in 2006.

Computing

Coordinator: Dr Tim Lambert
Office: Room G03, K17 Building
Email: undergrad@cse.unsw.edu.au
Website: www.cse.unsw.edu.au

Major Sequence

A major sequence in Computing within the Faculty of Arts and Social Sciences consists of 42 units of credit comprising: COMP1081, COMP1091, COMP2091 plus COMP2011 and at least 18 units of credit Level III Computer Science courses.

Students with well developed IT skills may omit COMP1081 and enrol in an extra level III Computer Science elective, alternatively the other option is to replace COMP1081, COMP1091 and COMP2091 with COMP1711 and COMP1721. MATH1131 and MATH1101 are recommended to be taken with these courses.

Note: No more than 12 units of Level I units of credit in Computer Science can be taken.

Level 1

COMP1081 Harnessing the Power of Information Technology
COMP1091 Solving Problems with Software and Tools

Upper Level

COMP2091 Computing 2
COMP2011 Data Organisation
COMP2041 Software Construction: Techniques and Tools
COMP2121 Microprocessors and Interfacing
COMP2711 Higher Data Organisation
COMP2920 Professional Issues and Ethics
COMP3111 Software Engineering
COMP3120 Introduction to Algorithms
COMP3121 Algorithms and Programming Techniques
COMP3131 Programming Languages and Compilers
COMP3141 Software System Design and Implementation
COMP3151 Foundations of Concurrency
COMP3211 Computer Architecture
COMP3231 Operating Systems
COMP3311 Database Systems
COMP3331 Computer Networks and Applications
COMP3411 Artificial Intelligence
COMP3421 Computer Graphics
COMP3431 Robotic Software Architecture
COMP3441 Cryptography and Security
COMP3531 Human Computer Interaction

The School of Computer Science and Engineering offers advanced versions of some of the courses listed here. Please consult the webpages at www.cse.unsw.edu.au for updated versions of timetables and availability of these courses.

Criminology

Coordinator: Professor Janet Chan, School of Social Science and Policy
Office: Room G30, Morven Brown Building
Tel: (02) 9385 2292
Email: slsp@unsw.edu.au
Website: http://slsp.arts.unsw.edu.au

From its original narrow inquiry into the causes of crime and punishment of offenders, criminology has developed into a multidisciplinary area of study involving contributions from sociology, political science, law, psychology, history and other disciplines. The Bachelor of Social Science in Criminology has a research and policy analysis orientation. It builds on the core curriculum in Bachelor of Social Science, which provides solid training in quantitative and qualitative research methods, social and economic theory, and policy analysis. The Criminology core courses provide students with substantive knowledge about criminal law and procedures, criminal justice institutions, theoretical debates in criminology and issues in criminal justice research and policy. A range of elective courses on criminological topics are available from the Faculty of Arts and Social Sciences and the Faculty of Law.

The Core Program in the Bachelor of Social Science in Criminology

First Year
- CRIM1000 Criminal Law and Justice 1
- CRIM1001 Criminal Law and Justice 2
- SLSP1001 Research and Information Management
- SLSP1000 Social Science and Policy

Second Year
- CRIM2000 Criminological Theories
- SLSP2000 Political Economy and the State
- SLSP2001 Applied Social Research 1
- SLSP2002 Policy Analysis Case Studies

Third Year
- CRIM3000 Researching Crime and Justice
- SLSP3000 Social Theory and Policy Analysis
- SLSP3001 Applied Social Research 2
- SLSP3002 Social Science and Policy Project

Electives

24 units of credit in the approved list of criminology-related electives (an indicative list):
- CRIM2001 Community Corrections
- CRIM2011 Crime and Society
- CRIM2012 Crime Prevention Policy
- CRIM2013 Juvenile Justice
- CRIM2014 Issues in Policing
- CRIM2015 Sentencing
- CRIM2016 The Criminal Justice System
ARTS AND SOCIAL SCIENCES 83

CRIM2017 The ‘New’ Prosecutors
CRIM2018 Crime, Power and Human Rights: Transnational Social Sciences
CRIM3010 Comparative Criminal Justice: From Investigation to Trial
ENGL2480 Crime Fiction, Film and Theatre
HIST2468 History from Crime
POL2020 Sex, Human Rights and Justice
PSYC3301 Psychology and Law
SLS2020 Crime and Punishment in Historical Perspective
SoCA2208 Deviant Fieldwork, Data Collection and Analysis
SoCA3103 Professions: Discipline, Knowledge, Power
SoCA3408 Crime in Australian Society
SoCA409 Crime, Gender and Sexuality
SoCA410 Deviance
SoCA411 Forensic Sociology: Evidence, Implications and Responsibility
SoCA3701 Discipline of the Law
SoCA3710 Moral Panics
SoCA3802 Fear and Hatred in Everyday Life
SoCA3810 The Space of Terror

Honours Level
Students must have obtained 144 units of credit in accordance with the requirements for the BSoSc in Criminology pass degree including the pre-Honours course SLS2093 Inquiry and Interpretation in the Social Sciences. Students need to have attained a good credit or better average in their SLP and CRIM core and related courses.

Level 1
CRIM1000 Criminal Law and Justice 1
CRIM1001 Criminal Law and Justice 2
SLS2001 Research and Information Management
SLS1000 Social Science and Policy

Upper Level
CRIM2000 Criminological Theories
CRIM3000 Researching Crime and Justice
CRIM4000 Criminology Honours
SLS2000 Political Economy and the State
SLS2001 Applied Social Research 1
SLS2002 Policy Analysis Case Studies
SLS2820 Crime and Punishment in Historical Development
SLS3000 Social Theory and Policy Analysis
SLS3001 Applied Social Research 2
SLS3002 Social Science and Policy Project

Development Studies
Coordinator: A/Prof Michael Johnson, School of Social Science and Policy
Office: Room G29, Morven Brown Building
Email: michael.johnson@unsw.edu.au
Website: http://www.arts.unsw.edu.au/futurestudents/developmentstudies/undergrad.html

The Development Studies program is an interdisciplinary program that introduces students to the issues that concern the developing world such as poverty and inequality and the theories, policies and practical measures introduced to address these issues. Central issues and themes that are examined include the history, sociology and political economy of development; the causes of poverty and global inequality; the relationship between the environment and development; the debates about globalisation and the relationships of international institutions to developing countries. A range of electives grouped by their focus on development practice, historical development, political economy, regional and cultural studies including human rights are offered.

Development Studies may be taken as a major sequence (42 units of credit). Students are advised that the program is designed to complement, most particularly, related majors in Politics and International Relations, Sociology and Anthropology, Economics, Economic History, Geography, History, History and Philosophy of Science, Policy Studies, Political Economy, Politics and Spanish and Latin American Studies. Bachelor of Social Science students majoring in Development Studies as part of the Bachelor of Social Science will complete the normal core courses for Social Science and Development Studies (Note that SLS2000 excludes PECO2000).

To complete a major sequence you must take at least two compulsory COMD courses (from COMD1001 or, COMD1002 or, SoCA1006 or, GEOR1601 and COMD2000) and two from the list of core elective COMD courses listed below, totalling 24 units of credit, and a further 18 units of credit from the other approved elective courses listed below. The Upper Level courses selected must include at least 12 units of credit at the 3000 level. With the approval of the Coordinator of the Development Studies program, courses from other schools may be substituted for up to 12 of the optional units of credit. Many of these courses will have their own prerequisites, and you must also fulfill Faculty of Arts and Social Sciences requirements concerning your distribution of courses. Please check school entries for availability, and consult the Coordinator about the best combinations of courses.

Major Sequence
Level 1
Compulsory courses
From 6 to a maximum of 12 units of credit in the core program selected from:
COMD1001 Development Studies: The Emergence of Underdevelopment
COMD1002 Development Studies: Poor World, Rich World
S1
S1
SOCA1006 Introduction to Globalisation
(except if majoring in INST)
GEOH1601 Australian and Global Geographies: Integration and Divergence
S2
S2

Upper Level Courses
At least two courses (12 units of credit) including the compulsory course (COMD2000) selected from the Upper Level Core courses and three elective courses (18 units of credit) if only six credit point course completed at Level 1:

Compulsory course
COMD2000 The Theory and Practice of Development
S1

And at least one of the following:
COMD2010 (Un)Making the Third World: History and Global Development B
COMD2050 Sustainable Development, Globalisation and the Third World
S1
S1
ECON3110 Development Economics
S2
S2
POLS2023 Globalisation and Uneven Development
ECON3111
SOCA3701 The Politics of the Third World
S2
S2

Electives
Students majoring in Development Studies must select a minimum of an additional 18 units of credit made up of additional courses taken from the core electives list or selected from the following electives listed by focus of study. The additional requirement of 6 units of credit for students intending to enrol in Combined Honours is detailed below. Students should carefully check any prerequisite requirements are met.

Development Practice
GEOR2001 Field Research
S2
GEOR3641 Regional Australia: Geographies of Uneven Development
X2
GEOR3651 Geographies of Migration and Settlement
S2
SOCA2204 Anthropology Research Fieldwork
S2

Political Economy
ECON3109 Economic Growth, Technology and Structural Change
S1
MFF3304 Transnational Media in the Asia Pacific
S1
PECO2000 Political Economy and the State (excludes SLS2000)
S1
PECO3000 Political Economy (excludes ECON3111)
S2
POLS2049 Asia in the International Political Economy*
S1
POLS3058 Theorising International Political Economy
S1
SOCA3711 Political Economy of Media and Culture*
S2

Globalisation
HIST2510 The United States and Changing Global Orders
S2
S2
POLS3054 Theorising the International Political Economy
S1
SOCA2103 Globalisation and Fragmentation
S2

Historical Development
HIST2039 Environmental History*
HIST2039 Environmental History*

Office:
Room G29, Morven Brown Building

Website: http://www.arts.unsw.edu.au/futurestudents/developmentstudies/undergrad.html
Economics courses must be chosen from Options (i) or Options (ii). At least one option must be selected from Options (ii).

**Options (i):**
- ECON2101 Microeconomics 2
- ECON2102 Macroeconomics 2
- ECON2103 Business and Government
- ECON2104 Applied Macroeconomics
- ECON2105 Economics of Corporations
- ECON2107 Economics of Information and Technology
- ECON2109 Economics of Natural Resources
- ECON2111 Globalisation
- ECON2112 Game Theory and Business Strategy
- ECON2113 Economics of E-Commerce
- ECON2116 Economics of Japanese Business & Government
- ECON2117 Economics of Tourism
- ECON2127 Environmental Economics
- ECON2291 Quantitative Methods A
- ECON2292 Quantitative Methods B
- ECON2305 Modern Asian Economic History
- ECON2313 Australian Economic Development
- ECON2319 Economic and Social Policy in Australia
- ECON2321 Growth and Development of International Business
- ECON2322 European Integration
- ECON3191 Political Economy
- ECON3290 Introductory Econometrics

All other Economics courses have prerequisites which are associated with other major sequences.

**Options (ii):**
- ECON3291 Econometric Methods
- ECON3101 Markets and Public Choice
- ECON3104 International Macroeconomics
- ECON3105 Economic Analysis of Productivity
- ECON3106 Public Finance
- ECON3107 Economics of Finance
- ECON3109 Economic Growth, Technology and Structural Change
- ECON3110 Development Economics
- ECON3112 The Newly Industrialising Economies of East Asia
- ECON3113 Economic Development in ASEAN Countries
- ECON3114 Superannuation and Retirement Benefits
- ECON3116 International Economics
- ECON3120 Economic Reasoning
- ECON3121 Managerial Economics

**Major Sequence Professional Level in Economics**

For a major sequence in Economics at the professional level, all students must complete at least 42 units of credit in Economics courses, including:

- ECON1101 and ECON1102
- ECON2101 and ECON2102

Economics courses must be chosen from Options (i) or Options (ii). At least two options must be chosen from Options (ii).

**Options (i):**
- ECON2101 Microeconomics 2
- ECON2102 Macroeconomics 2
- ECON2103 Business and Government
- ECON2104 Applied Macroeconomics
- ECON2105 Economics of Corporations
- ECON2107 Economics of Information and Technology
- ECON2109 Economics of Natural Resources
- ECON2111 Globalisation
- ECON2112 Game Theory and Business Strategy
- ECON2113 Economics of E-Commerce
- ECON2116 Economics of Japanese Business & Government
- ECON2117 Economics of Tourism
- ECON2127 Environmental Economics
- ECON2291 Quantitative Methods A
- ECON2292 Quantitative Methods B
- ECON2305 Modern Asian Economic History
- ECON2313 Australian Economic Development
- ECON2319 Economic and Social Policy in Australia
- ECON2321 Growth and Development of International Business
- ECON2322 European Integration
- ECON3191 Political Economy
- ECON3290 Introductory Econometrics
- ECON3291 Econometric Methods
All other Economics courses have prerequisites which are associated with other major sequences.

**Options (ii):**

- ECON3101 Markets and Public Choice
- ECON3104 International Macroeconomics
- ECON3105 Economic Analysis of Productivity
- ECON3106 Public Finance
- ECON3107 Economic Growth, Technology and Structural Change
- ECON3110 Development Economics
- ECON3114 Superannuation and Retirement Benefits
- ECON3116 International Economics
- ECON3120 Economic Reasoning
- ECON3121 Managerial Economics

Students may count up to 60 units of credit in ECON courses within the total required by the BA degree.

**Major Sequence in Economic History**

Students may undertake either a Level 1 major or an Upper Level major in Economic History. A major sequence consists of at least 36 units of credit in courses offered in Economic History, of which no more than 12 units of credit may be from Level 1 courses. In order to enrol in a 6 unit credit Upper Level course in Economic History a candidate must have passed 36 Level 1 units of credit in Arts and completed any specific prerequisite course or courses listed.

**Level 1 Courses**

- ECON1101 Microeconomics 1 S1 & S2
- ECON1102 Macroeconomics 1 S1 & S2
- ECON1301 Australia in the Global Economy S1
- ECON1302 Australia and the Asia-Pacific Economies S2

**Upper Level Courses**

- ECON2305 Modern Asian Economic History S1
- ECON2313 Australian Economic Development S1
- ECON2319 Economic and Social Policy in Australia S1
- ECON2321 Growth and Development of International Business S1
- ECON2322 European Integration S2

**Honours in Economics (Arts)**

Students intending to do Honours in Economics should be completing ECON1101, ECON1102, ECON2101, ECON2102, ECON2291, ECON2292, ECON3290, ECON3291 and obtain at least an average of Credit or better in Upper Level courses. They then take ECON4120 Economics Honours (Arts) in their fourth year.

**Honours in Economic History (Arts)**

In order to enter Year 4 Honours, a candidate must have completed 36 units of credit in Economic History plus ECON1101 and ECON1102:

1. ECON1101 + ECON1102 - 12 units of credit.
2. Five Upper Level courses in Economic History - 30 units of credit.
3. 1 other Upper Level course from the School of Economics - 6 units of credit.

Students take ECON4321 Economic History 4 Honours.

**Economics**

- ECON2101 Microeconomics 2 S1
- ECON2102 Macroeconomics 2 S2
- ECON2103 Business and Government S2
- ECON2104 Applied Macroeconomics S1
- ECON2105 Economics of Corporations S2
- ECON2107 Economics of Information and Technology S1
- ECON2109 Economics of Natural Resources S1
- ECON2111 Globalisation S2
- ECON2112 Game Theory and Business Strategy S1
- ECON2113 Economics of E-Commerce S2
- ECON2116 Economics of Japanese Business and Government S1
- ECON2117 Economics of Tourism S1
- ECON2127 Environmental Economics S2
- ECON2291 Quantitative Methods A (Arts) S1 & S2
- ECON2292 Quantitative Methods B (Arts) S1 & S2
- ECON3101 Markets and Public Choice S1
- ECON3104 International Macroeconomics S1
- ECON3105 Economic Analysis of Productivity S2
- ECON3106 Public Finance S2
- ECON3107 Economics of Finance S1
- ECON3109 Economic Growth, Technology and Structural Change S1
- ECON3110 Development Economics S2
- ECON3112 The Newly Industrializing Economies of East Asia S2
- ECON3113 Economic Development in ASEAN Countries S1
- ECON3114 Superannuation and Retirement Benefits S2
- ECON3116 International Economics S2
- ECON3119 Political Economy S2
- ECON3120 Economic Reasoning S2
- ECON3121 Managerial Economics S1
- ECON3290 Introductory Econometrics S1
- ECON3291 Econometric Methods S2

**Economic History**

- ECON2305 Modern Asian Economic History S1
- ECON2313 Australian Economic Development S1
- ECON2319 Economic and Social Policy in Australia S1
- ECON2321 Growth and Development of International Business S2
- ECON2322 European Integration S2

**Honours**

- ECON4120 Economics Honours (Arts) S1 & S2
- ECON4321 Economic History 4 Honours S1 & S2

**Education**

As an area of study, Education crosses the boundaries between a number of disciplines including aspects of philosophy, sociology and psychology, and addresses their interaction with the learning and teaching process. The School of Education offers a range of courses to all students in the Faculty. While some Education courses are compulsory for students in the combined Education programs (BA BEd, BMus BEd, BA(Dance) BEd, BSc BEd), they are also available to students with an interest in education who are not undertaking teaching programs. For further details or special permission to have prerequisites waived, consult the School of Education.

**1. Bachelor of Arts (BA) with an Education major**

A major sequence in Education comprises

42 units of credit including:

12 Level 1 units of credit (EDST1101 and either EDST1103 or EDST1104) and

30 units of credit chosen from: EDST2030, EDST2032, EDST2041, EDST2044, EDST2045, EDST3102, EDST3103, EDST3105, EDST3106, EDST2060, EDST2070, EDST2090, EDST4081, EDST4093, EDST4095.

**2. Bachelor of Arts Bachelor of Education (BA BEd)**

Students in the combined BA BEd program should follow the sequence of core and elective courses shown below.

**Level 1 Courses**

12 units of credit from Level 1 courses  
EDST1101 Educational Psychology 1 S1 and either  
EDST1103 Educational Psychology 2 S2 or  
EDST1104 Social Perspectives in Education S2

**Upper Level Elective Courses**

18 units of credit from Upper Level courses:  
EDST2030 History, Philosophy and Science Teaching S2  
EDST2032 Philosophical Issues in Education S2  
EDST2041 Stress and Anxiety in Students and Teachers S1  
EDST2044 Motivation in Learning and Teaching S2
EDST2045 Teacher Effectiveness, Research and Practice $S1
EDST2046 Language and Literacy in the Classroom $S1
EDST2052 Relationships between Personality, Mood, Motivation and Learning $S1
EDST2053 Human Variation and Education $S2
EDST2054 Managing the Classroom Environment $S1
EDJS1260 Educational Programs and Curricula for Intellectually Gifted Students $S2
EDST2070 Culture, Identity and Education $S1
EDJS1290 Student Learning, Thinking and Problem Solving $S2
EDST4081 Professional Issues in Teaching $S1
EDST4093 Special Education $S1
EDST4095 Gifted and Talented Students: Recognition and Response $S1

The following Year 3 and 4 courses are compulsory for all BA BEd students.

Year 3 Compulsory Courses
EDJS1390 Introductory Teaching Experience $S1
EDST4095 Gifted and Talented Students: Recognition and Response $S1
EDJS1XXX Appropriate Method Course $S1

Year 4 Compulsory Courses
EDST4081 Professional Issues in Teaching $S1
EDST4092 Computer Skills for Teachers $S1
EDST4093 Special Education $S1
EDST4094 Teaching Experience $S2

Method Courses
EDST4121 Chinese Method 1 $S1
EDST4122 Chinese Method 2 $S2
EDJS1425 Drama Method 1 $S1
EDJS1426 Drama Method 2 $S2
EDST4127 English Method 1 $S1
EDJS1428 English Method 2 $S2
EDST4129 English Double Method 1* $S1
EDST4130 English Double Method 2* $S2
EDJS1411 Literary/English as a Second Language Method 1 $S1
EDJS1412 Literary/English as a Second Language Method 2 $S2
EDST4133 French Method 1 $S1
EDST4134 French Method 2 $S2
EDST4135 Geography Method 1 $S1
EDST4136 Geography Method 2 $S2
EDST4137 German Method 1 $S1
EDST4138 German Method 2 $S2
EDJS1411 History Method 1 $S1
EDJS1412 History Method 2 $S2
EDST4145 Indonesian Method 1 $S1
EDJS1416 Indonesian Method 2 $S2
EDST4147 Japanese Method 1 $S1
EDST4148 Japanese Method 2 $S2
EDJS1419 Mathematics Method 1 $S1
EDJS1420 Mathematics Method 2 $S2
EDST4151 Science Method 1 $S1
EDST4152 Science Method 2 $S2
EDST4153 Spanish Method 1 $S1
EDJS1415 Spanish Method 2 $S2
EDST4157 Computing Studies Method 1 $S1
EDJS1418 Computing Studies Method 2 $S2
EDST4161 Economics and Business Studies Method 1 $S1
EDST4162 Economics and Business Studies Method 2 $S2
EDJS1416 Junior HSIE Method 1 $S1
EDJS1416 Junior HSIE Method 2 $S2

*Only available in program $S560.

Honours Level
The prerequisites for entry to the Education Honours program are: 42 units of credit in EDST courses, plus 12 units of credit in approved courses offered by other schools, at an average of credit level or better.

EDJS1400 Education Honours Full-Time
EDJS4050 Education Honours Part-Time

English
Head of School: A/Prof Sue Kossew
Office: Room 145, Morven Brown Building
Tel: (02) 9385 2298 Fax: (02) 9385 1047

Email: english@unsw.edu.au
Website: http://english.arts.unsw.edu.au
English is a discipline for students with a special interest in English literature and language. The study of English is not compulsory within the Faculty of Arts and Social Sciences. Therefore, courses within the School of English are planned for students who have a genuine interest in English and want to develop a special ability in it, including the ability to read perceptively and to write good English, and the ability to write creatively.

Students who have successfully completed English at Level 1 (6 Level 1 units of credit may enrol in Level 2 English courses without necessarily pursuing a major in English. (Arts and Social Science students are only allowed to count 12 English Level 1 units of credit towards their degree.)

The usual prerequisite for enrolment in a Level 2 English course is a Pass in one Level 1 English course. The choices of courses in Level 1 for 2006 are: ENGL1001 Ways of Writing: An Introduction to Literary Genres, ENGL1006 Imagining the City, ENGL1007 The Canon of English Literature and ENGL1009 Literature of Revolution. A student who has not completed 6 Level 1 units of credit but is interested in one or more of our Level 2 courses may seek the special permission of the Head of School to have the prerequisite waived. In considering such requests, the School gives strong preference to a candidate with a Credit or higher result in a related discipline.

Major Sequence
Any student who wishes to gain a major sequence in English must complete 6 Level 1, 24 Level 2 and 12 Level 3 (or 12 Level 1, 18 Level 2 and 12 Level 3) units of credit in English. Students undertaking a major sequence are permitted to enrol in other courses offered by the School which are additional to the requirements of their basic major sequence.

Honours Entry
Students may choose one of two available Honours programs.

1. Honours in English (Research)
The normal entry requirement for a student seeking admission to the Honours Program in English is a minimum of 54 units of credit in English which must include 6 or 12 Level 1 units of credit, 30 or 24 Level 2 units of credit and 18 Level 3 units of credit. The School also requires students to have an average of 70% or better in all previous ENGL courses.

With the permission of the Head of School, a student who is studying a combined Arts degree (e.g. BA LLB, BA BEd) may substitute one related 6 unit course from another discipline.

2. Combined Honours (Research)
The Combined Honours Program allows a student to undertake the Honours year in both English and another discipline. The normal School of English entry requirement for a student seeking admission to a Combined Honours Program is 48 units of credit in English including at least 6 Level 1 units of credit, at least 12 Level 3 units of credit and an average of 70% or higher.

Entry into the Combined Honours program is subject to the approval of both the Head of the School of English and the Head of the other School concerned.

Assessment
In all English courses, assessment is by a combination of the following: essays, class tests, tutorial participation, tutorial presentation, and examinations. Further details of assessment will be available at the first class in each course.

Level 1
ENGL1001 Ways of Writing: An Introduction to Literary Genres $S1
ENGL1006 Imagining the City $S1
ENGL1007 The Canon of English Literature $S2
ENGL1009 Literature of Revolution $S2

Upper Level
Level 2
ENGL2101 Women on the Shakespearean Stage $S2
ENGL2104 Poetry, Virtue, Corruption: Milton to Burns $S1
ENGL2206 Nineteenth Century Prose $S1
ENGL2321 Twentieth Century: Modernism & Modernity $S2
ENGL2340 Contemporary Irish Literature $S2
ENGL2422 Frontiers and Crossings $S1
ENGL2460 Refiguring Dreams: Twentieth Century American Literature $S2
ENGL2520  Twentieth Century Australian Literature  S1
ENGL2621  Contemporary Australian Women Writers  S2
ENGL3821  Visual Communication  S2
ENGL2921  Creative Writing A  S1
ENGL2930  Professional Writing  S2

Level 3
ENGL3122  Jane Austen in Context  S2
ENGL3320  Modernism: Joyce  S1
ENGL3423  African Resistance Writing  S1
ENGL3442  Narrative  S2
ENGL3631  Contemporary Critical & Cultural Theory  S2

Honours Level
ENGL4000  English Literature Honours (Research) Full-Time  S2
ENGL4050  English Literature Honours (Research) Part-Time  S2
ENGL4500  Combined English Literature Honours (Research) Full-Time  S2
ENGL4550  Combined English Literature Honours (Research) Part-Time  S2

Environmental Studies

Coordinators:

The Environmental Studies program is designed for students who wish to undertake a major sequence concentrating on the historical, theoretical, and policy implications of the environmental construction and transformation of the environment. Honours and Combined Honours in Environmental Studies are also available (see below).

Major Sequence
The interdisciplinary program in Environmental Studies constitutes a stand-alone major, with the following requirements:

Level 1
24 Level 1 units of credit in Arts. There are no compulsory Level 1 courses. However, a typical program would include:

- HPSC1400 Science, Technology, Society and Environment  S1
- HPSC1500 Understanding Environmental Controversy  S2

The attention of students is also drawn to other Level 1 courses that may be of particular relevance to this major sequence, as follows:

- AUST1003 Paradise Lost: Australian Environmental History  S1
- POLS1014 Global Politics and the Environment  S2

and courses offered under the Geography program in the Faculty of Science.

Upper Level
For a pass degree you must have a total of 42 units of credit at Upper Level, from the courses listed below. Note that the core course is compulsory and that you must also take at least one of the fundamental knowledge courses. Apart from the core course, you must also include at least one other course numbered with a ‘3000’ code.

Core Course (compulsory and normally taken in the third year of study):

- HPSC3500 Society and Environmental Process: Botany Bay  S2

Fundamental knowledge courses (you must take at least one)

- HPSC2350 Environment, Technology and Politics  S1
- HPSC2550 Sustainable Development, Globalisation, and the Third World  S1

Electives

- ARTS2000# Arts and Social Sciences Internship X1 S1 X2 S2
- HNS12039 Environmental History  S2
- HPSC2750 Energy and its Politics*  S2
- HPSC2881 Cultural Heritage Management  S2
- HPSC3150 Life Science in the Twentieth Century  S2
- HPSC3920 Reading Option (must be an Environmental topic) X1 S1 X2 S2
- PHIL2418 Bioethics*  S1
- PHIL2420 Environmental Ethics  S1
- PHIL2422 Biopolitics and Biotechnology*  S1
- PHIL2424 Human Nature and Technology  S1
- SLSP2002 Policy Analysis Case Studies  S2
- SOCA2104 Technology, Work, Culture  S1
- SOCA2204 Pacific Islands Research Fieldwork  S2
- SOCA3204 Modernity & Development in the Pacific Islands*  S2
- SOCA3211 Development and Modernity  S2
- SOCA3212 Environment, Society and Culture  S1
- SOCA3704 Social Movements and Society: Current Debates*  S2
- SPAN2418 Amazonia*  S2

and, by approval of the Environmental Studies Coordinator, selected courses offered under the Geography program in the Faculty of Science.

Please check school entries to confirm availability.

* These courses run in alternate years and will not be offered in 2006.

Honours Level
Prerequisites:
1. At least 54 units of credit from the above list of nominated courses for the interdisciplinary major in Environmental Studies, with an average of Credit or better. This must include the core course HPSC3500, at least one other ‘3000’ course, and at least one fundamental knowledge course, and may include only two of the Level 1 courses recommended above. 2. Permission of the Environmental Studies Honours Coordinator.

Normal requirements are a thesis (50%), seminar (25%) and an additional component (25%) which could be a second seminar, an internship or a project. Environmental Studies Honours is coordinated by the School of History and Philosophy of Science.

- HPSC4510 Environmental Studies Honours (Research) Full-Time  S2
- HPSC4520 Environmental Studies Honours (Research) Part-Time  S2

Honours in Environmental Studies may also be combined with Honours study in a school or department. Typical combinations are with History and Philosophy of Science, Sociology and Anthropology, History, Geography, Politics and International Relations or Philosophy. For combined honours the above assessment scheme may vary depending on the requirements of the participating school or department.

Prerequisite for Combined Honours: 1. Combined Honours prerequisites in a discipline. 2. At least 48 units of credit from the interdisciplinary major in Environmental Studies, with an average of Credit or better. This must include the core course HPSC3500, at least one other ‘3000’ course, and at least one fundamental knowledge course, and may include only two of the Level 1 courses recommended above. 3. Permission of the Environmental Studies Honours Coordinator.

- HPSC4500 Combined Honours (Research) in Environmental Studies Full-Time  S2
- HPSC4550 Combined Honours (Research) in Environmental Studies Part-Time  S2

European Studies

Coordinator: TBA, Centre for European Studies
Office: Room G64, Morven Brown
Tel: (02) 9385 2325
Email: TBA
Website: www.centre.unsw.edu.au/euro/

Studying Europe is not a ‘cultural cringe’: it is an essential part of defining Australia’s role as a predominantly “European” country located in the Asia-Pacific. Any attempt to define Australian identity must be based not only on a new relationship with our neighbours, but on a critical understanding of our European heritage and the continuing dialogue with European thought and practice. The momentous changes which are taking place in Eastern and Western Europe will have an extraordinary impact on world developments over the next years, and on the part Australia will play in them.

EURO courses are designed to provide an interdisciplinary European context which addresses basic issues and problems in the study of European culture and society, seen from the perspective of current attempts to establish a new role for a united Europe. They focus both on the enormous contribution of the European Enlightenment to our concepts of freedom, humanity and citizenship, and its troubled relationship to the...
realities of European world domination and power politics. The “New Europe” has become an economic power second only to the United States; will it be able to resolve these dilemmas, and regain some kind of moral and political leadership in world affairs as well? We can learn much from both Europe’s failures and its achievements, especially the astonishing success of European integration in overcoming centuries-old hostilities, and its development of new political structures more appropriate to representing cultural diversity within a rapidly globalising economy.

EURO courses are an ideal complement to majors in history, philosophy, politics and sociology with a European ‘focus’, or in English or European languages. Courses are offered at both Level 1 and Upper Level; they are taught in English, require no previous knowledge of other languages, and are available to all students enrolled in the Faculty.

The program also offers a major sequence. It requires the completion of seven EURO courses (42 units of credit). You may, however, request the Coordinator to approve the substitution of other appropriate courses focusing on Europe up to a total of 18 units of credit. A major sequence in European Studies is a requirement for the Bachelor of International Studies degree in European Studies (program 3424), which is described in the Program Rules and Information section of this Faculty entry.

Students who wish to specialise in European Studies are encouraged to learn a relevant European language.

The European Studies notice-board is located opposite the Centre for European Studies (MB G64).

Major Sequence
A minimum of 42 units of credit in European Studies, including at least 30 units of credit in Upper Level courses.

Honours Level
Combined Honours (recommended): Students must satisfy the single Honours prerequisite for the School concerned and have completed a major in EURO with an average of 70%. They are required to present a thesis on a cross-disciplinary topic approved by the Coordinator and the relevant Head of School.

Single Honours: This program is primarily intended for students enrolled in combined degrees who are unable to meet the requirements for Combined Honours. The prerequisite is a WAM of 70% in the EURO major and related courses. Students must complete a thesis on a cross-disciplinary topic and a program of coursework negotiated between the program authority and the appropriate school(s).

Level 1
EURO1000 The New Europe A $1
EURO1001 The New Europe B $2

Upper Level
EURO2000 Concepts of Europe $1
EURO2201 Text Workshop A* $2
EURO2311 The Attractions of Communism* $1
EURO2331 Understanding Nazi Germany $2
EURO2410 Nineteenth Century Europe 1848-1918: Nation, Empire, Revolution $2
EURO2411 Spain: From Loss of Empire to European Integration $1
EURO2482 Europe, 1914-1945: Dark Continent? $2
EURO2483 Decadence, Dada & All That Jazz $1
EURO2600 European Integration $2
EURO2700 What is Postcommunism? $1
EURO3000 Central and Eastern Europe after 1989 $1
EURO3010 Evidence and Interpretation $1
EURO3101 Barbarians, Peasants & Vampires $1
EURO3900 Advanced Program A $2
EURO3901 Advanced Program B $2

*Subject to staff availability.

Honours Level
EURO4000 Honours (Research) in European Studies F/T $1
EURO4050 Honours (Research) in European Studies P/T $2
EURO4500 Combined Honours (Research) in European Studies F/T $2
EURO4550 Combined Honours (Research) in European Studies P/T $2

French
Coordinator: Dr Maurice Blackman
Office: Room 258, Morven Brown Building
Tel: (02) 9385 2321
Email: m.blackman@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/french/french.html

French is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. The program includes courses in Language and Linguistics, Literature and Thought, French Culture and Society and Francophone studies. French is the language of instruction in most courses.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students with prior knowledge of French sit for a placement test in order to gain entry to an appropriate language course.

Honours Level
Prerequisite: At least 54 units of credit, including FREN3102 or higher language core, and FREN3910 at an average of at least 70%.

With permission of the Head of Department, Honours students who started from FREN1101 may arrange to write their Honours thesis in English rather than French. Combined Honours requires 48 units of credit in French including FREN3910.

Language Core
FREN1101 French Language and Culture 1A $1
FREN1102 French Language and Culture 1B $2
FREN2101 French Language and Culture 2A $1
FREN2102 French Language and Culture 2B $2
FREN3101 French Language and Culture 3A $1
FREN3102 French Language and Culture 3B $2
FREN3103 French Language and Culture 4A $1
FREN3104 French Language and Culture 4B $2

Upper Level Electives
FREN3105 French Today $1
FREN3106 Discourse Studies: Media, Politics & Society $2
FREN3210 French Prose Fiction $2
FREN3211 Special Reading Program $1 or $2
FREN3214 Modern French Poetry $1
FREN3312 French Cinema and Society $1

Advanced Upper Level Courses
FREN3901 Reading Program 1 (Advanced) $1 or $2
FREN3910 Honours Preparatory Seminar $2

Honours Level
FREN4000 French Honours (Research) Full-Time $1
FREN4050 French Honours (Research) Part-Time $2
FREN4500 Combined French Honours (Research) Full-Time $1
FREN4550 Combined French Honours (Research) Part-Time $2

Geography

Email: s.mooney@unsw.edu.au

Geography is the study of social and environmental relationships. The cultural significance of geography lies in its contribution to an understanding of the total environment. Geographers are employed as professionals in urban management, regional planning, and environmental assessment.

First year courses involve systematic studies of the physical, human, and technological basis of geography. There is a progressive specialisation in the following years, with an emphasis on field observation, data handling, policy and management.

Many courses in geography include laboratory and field work, involving the use of qualitative and quantitative techniques. Assessment in Geography is normally by a combination of coursework and examinations, although the procedure varies between courses.
Major Sequence
At least 6 Level 1 units of credit plus another 36 Upper Level units of credit in GEOH or GEOS courses, including GEOH2001 (up to 12 units of credit of Social Science and Policy courses can be counted towards a Geography major).

Honours (Research) Entry
Students must satisfy Faculty of Arts and Social Sciences requirements for entry to Honours programs. They must have obtained at least 6 Level 1 units of credit in GEOH or GEOS, and have completed SLSP1001. Students must complete another 42 Upper Level units of credit in GEOH or GEOS or related courses, two of which must include SLSP2001, GEOH2001 and GEOH3111. (Substitute courses may be approved by the Geography coordinators.) A minimum cumulative average at Credit grade is required for all Upper Level GEOH or GEOS courses taken.

Combined Honours (Research) Entry
At least 6 Level 1 units of credit plus another 36 Upper Level units of credit in GEOH or GEOS or related courses, including two of SLSP2001, GEOH2001 and GEOH3111. (Substitute courses may be approved by the Geography coordinators.) A minimum cumulative average at Credit grade is required for all Upper Level GEOH or GEOS courses taken.

Level 1
GEOH1601 Australian and Global Geographies S2
LtS1701 Environmental Systems and Process S1

Upper Level
GEOH2001 Field Research S1
GEOH2611 Geographies of the Asia-Pacific S1
LtH2641 Australian Urban Environments S2
GEOH2801 Geographical Information Systems for Built Environment S2
GEOH3111 Advanced Qualitative Methods for Geography S1
GEOH3411 Special Topic S1 & S2
LtH3421 Place, Identity and Difference S1
LtH3461 Regional Australia: Geographies of Uneven Development S2
GEOH3651 Geographies of Migration & Settlement S2
GEOH3661 Cities and Urbanism S2
GEOH3671 Transport, Land Use and Environment S1
LtH3911 Environmental Impact Assessment S1
GEOH3921 Coastal Resource Management S2
GEOS2711 Australian Climate and Vegetation S2
GEOS2721 Australian Surface Environments and Landforms S1
LtA2381 Remote Sensing Applications S1
GEO2821 Geographic Information Systems S2
GEO3731 Catchment and Coastal Geomorphology S2
GEO3761 Environmental Change S2
GEO3811 Advanced Techniques in Remote Sensing S2
LtH3621 Remote Sensing & GIS Applications S2
GEO4721 Soil Degradation & Conservation S1

Honours Level
Students who wish to enrol in a 48 unit of credit thesis course enrol in:
LtH4418 Geography Honours (Research) Full-Time S1 & S2
or
GEOH4424 Combined Honours (Research) in Geography Full-Time S1 & S2

Students who wish to undertake the School of Biological, Earth and Environmental Sciences (BEES) Honours program enrol in the following:
GEO5418 Physical Geography Honours S1 & S2
BEE5411 Professional Skills S1
and either:
BBS4521 Literature Review S1
and 12 units of credit of electives approved by the BEES Honours committee or 18 units of credit of electives approved by the BEES Honours committee.

Geology
Coordinate: Dr Paul Lennox, School of Biological, Environmental and Earth Sciences
Tel: (02) 9385 8096
Email: p.lennox@unsw.edu.au
Website: www.bees.unsw.edu.au/future/geology.html

Geology is the study of the nature and evolution of our Earth. It spans many areas, including the relationship between humans and the physical environment. Geology is an important complement to other disciplines in Arts and Social Studies for those wishing to pursue careers in various areas of public and corporate policy, including resource assessment, environmental regulation, environmental management and urban planning.

Field tutorials are an essential part of some of these courses, and may be held during weekends and/or recesses. Dates and costs are available during the first week of the course. Attendance is compulsory.

Major Sequence
A major sequence in Geology comprises:
12 Level 1 units of credit and 30 Upper Level units of credit, including at least one and not more than two Level 3 courses. MSCI6300 is considered to be a Level 3 course. Course selection must be made in consultation with the Geology program advisor.

Level 1
GEO5111 Fundamentals of Geology S1
GEO5121 Environmental Earth Science S2

Upper Level
GEO5201 Life Through Time S1
GEO5210 Sedimentary Environments S1
GEO5217 Earth Structures S2
LtS2181 Earth Materials S1
GEO5229 Ground and Surface Water S1
GEO5311 Field Methods and Mapping S1
GEO5314 Mineral and Energy Resources S1
GEO5328 Environmental and Contaminant Geochemistry S2
MSCI6201 Coastal Monitoring Techniques S1
MSCI6300 Coastal Environment Assessment S1

German Studies
Coordinate: Dr Bettina Boss
Tel: (02) 9385 3649
Email: german@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/german/german.html

German Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective option, General Education unit or as a major in the Diploma in Languages. Language study and the study of literature and linguistics are integrated in the German Studies program. Seminars in German literature and civilisation support the development of language proficiency and communicative competence. Practical language work involving a wide range of topics contributes to an increased awareness and understanding of the forces that have shaped the development of modern German speaking societies.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students are advised to consult the German Studies staff to plan their entry point in the language sequence.

Note: Students with any proficiency must consult the staff in German Studies prior to enrolment, unless they have taken German in the previous session at UNSW. Please see: http://languages.arts.unsw.edu.au/main/placetest.html

Major Sequence
Major sequences in German Studies require 42 units of credit in GERS courses. Students completing the German language core with GERS3701 will be recognised as having completed the German Studies Advanced Program.

Honours Level
Entry into the Honours program requires 54 units of credit in German Studies, including GERS3900 and GERS3901, with an average of at least 70%.

Combined Honours requires 48 units of credit in German Studies, including GERS3900, with an average of at least 70%.

Language Core
GERS1400 Introductory German 1 S1
GERS1401 Introductory German 2 S2
GERS2400 Intermediate German 1 S1
GERS2401 Intermediate German 2 S1
GERS3410 Advanced German 1 S1
GERS3411 Advanced German 2 S2
GERS3700 Advanced German 3 S1
GERS3701 Advanced German 4 S2

Seminar Courses
GERS3800 Modernism and Cultural Innovation in Weimar Germany S1
GERS3801 Language and Society in the German-speaking Countries S2
GER3802 German Culture and Society: 19th and 20th Century  S1
GER3803 Post-war German Literature and Culture: Hans Magnus Enzensberger  S2

Advanced Upper Level Courses
These courses are compulsory for students intending to proceed to Honours.
GERK3900 German Option 1  S1
GERK3901 German Option 2  S2

Honours Level
GERK4000 German Honours (Research) Full-Time  S1
GERK4050 German Honours (Research) Part-Time  S2

Greek
Coordinator: Dr Eleni Amvrazi
Office: Room 231, Morven Brown Building
Tel: (02) 9385 3649
Email: greek@unsw.edu.au
Website: http://languages.arts.unsw.edu.au

Greek Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. Greek Studies provide students with proficiency in spoken and written Greek through practical language work and an understanding of the way Greek society has developed through the study of Greek literature and history and culture.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students are advised to consult the Greek Studies staff to plan their entry point in the language sequence.

Modern Greek programs are also offered by correspondence. The correspondence program provides an opportunity for students who have full-time work commitments or timetable clashes to study Greek.

Note: Students with any proficiency in Greek must consult the Greek Studies staff prior to enrolment, unless they have taken Greek in the previous session at UNSW. Please see: http://languages.arts.unsw.edu.au/main/placetest.html

Major Sequence
Major sequences in Greek Studies require 42 units of credit in GREEK courses including at least four consecutive language courses and GREEK3506. Students completing the Greek language core with GREEK402 will be recognised as having completed the Greek Studies Advanced Program.

Honours Level
Intending Honours students are recommended to contact the Greek Studies staff at an early stage in their undergraduate studies to discuss their selection of programs and their proposal for the Honours research project. For entry to the Greek Honours program, the completion of 54 units of Greek courses, including GREEK3900 and GREEK3901, with an average of 70% is required. The entry for Combined Honours with GREEK3402 will be recognised as having completed the Greek Studies Advanced Program.

Language Core
GREEK1301 Introductory Modern Greek 1A  S1
GREEK1302 Introductory Modern Greek 1B  S2
GREEK2301 Intermediate Modern Greek 2A  S1
GREEK2302 Intermediate Modern Greek 2B  S2
GREEK3301 Advanced Modern Greek 3A  S1
GREEK3302 Advanced Modern Greek 3B  S2
GREEK3401 Advanced Modern Greek 4A  S1
GREEK3402 Advanced Modern Greek 4B  S2

History and Culture Courses
GREEK3506 The Modern Greek World (1453-present day)  S1

Electives
GREEK3500 Greek Traditional Culture  S2
GREEK3501 Pandora’s Box  S1
GREEK3502 Greek Women Writers  S2
GREEK3503 The Modern Greek Experience  S1
GREEK3504 Greek Music: From Homer to Haroula  S2
GREEK3505 Born to Purple: The Byzantine World (330-1453)  S1

Advanced Upper Level Courses
GREEK3900 Culture, Ethnicity & Identity in Greek Australian Literature  S1
GREEK3901 The History and Development of the Greek Language  S2

Honours Level
GREEK4000 Modern Greek Studies Honours (Research) Full-Time  S1
GREEK4050 Modern Greek Studies Honours (Research) Part-Time  S2

History
Coordinator: Associate Professor Rae Frances
School Office: Room 351, Morven Brown
Tel: (02) 9385 2343
Email: history@unsw.edu.au
Website: http://history.arts.unsw.edu.au/

The School of History offers a variety of Level 1 and Upper Level courses, giving students a wide range of options at all levels. Courses are mainly concerned with aspects of modern history and related to periods and themes in Australian, Asian, European, Middle Eastern and American history. Ancient History is taught, both as part of the World History courses and in a few specialist courses. General theories and problems of historical explanation are also studied, as well as techniques of researching and writing history.

Class contact in most courses is three hours per week. Level 1 courses offered in each of the following fields – Australian, European or world history – can be taken separately or as a complementary pair of courses over two sessions. (Details and timetables of lectures are available from the School of History.) Most of a history student’s working time, however, is spent in the University library or in private study, preparing papers for tutorials and seminars, and writing the required essays.

Assessment in each course usually involves one essay and a written tutorial contribution. Most courses also use end of session tests as a form of assessment. For details of assessment in particular courses, consult the School of History Handbook or individual course guides.

Details of a major in History, and of the requirements for entry into Honours (4th year), are listed below. Under Faculty rules: (i) a student may complete only two Level 1 History courses (12 Level 1 units of credit), and (ii) for entry into Upper Level courses in History, students should have completed 36 units of credit.

The study of History develops important skills in research, interpretation, evaluation of evidence, reasoning and writing. Study at Honours or postgraduate level further refines these skills and permits students to demonstrate an ability to undertake independent and original research and to communicate the results of this research clearly and persuasively.

Major Sequence
A major sequence in History consists of at least 42 units of credit in courses offered by the School of History. Students enrolling in the Faculty of Arts and Social Sciences from 2005 and wishing to complete a major in History must include at least two 3000 Advanced upper level courses. In order to enrol in one of these 3000 level courses you need to have completed at least 12 History units of credit in 2000 level courses (or other courses approved by the Head of School). Pre-Honours courses, which are distinguished by the prefix HIST39+ may be included in this Major requirement. However, these courses are restricted to students with a credit average (or better) in History.

Honours Entry
Students must satisfy Faculty of Arts and Social Sciences requirements for entry to Honours programs, and must have obtained at least 54 units of credit at an average of 70% or better in the School of History, including 6 units of credit from the Pre-Honours HIST3900 courses.

For entry to a Combined Honours program, students must have obtained at least 48 units of credit at an average of 70% or better in the School of History including 6 units of credit from the HIST3900 courses.

Level 1
HIST1003 The Fatal Shore: Aborigines, Immigrants and Convict Society  S1
HIST1004 Making Australia 1850-1910: Land, People and Culture  S2
HIST1010 Introducing Southeast Asia  S1
HIST1011 The Emergence of Modern Europe (A)  S1
HIST1012 The Emergence of Modern Europe (B)  S2
HIST1014 Enter the Dragons: Continuity and Change in East Asia  S2

History and Philosophy of Science
Coordinator: Dr Nicholas Rasmussen, School of History & Philosophy of Science
School Office: Room LG19, Morven Brown Building
Tel: (02) 9385 2356
Email: n.rasmussen@unsw.edu.au
Website: http://hps.arts.unsw.edu.au

History and Philosophy of Science (HPS) is the field that deals with the nature, history, social shaping and social impacts of science, technology and medicine. Courses in the School of HPS therefore cover a number of related themes: the historical origins and philosophical foundations of modern science; the social, political and economic dimensions of technological change; the history and politics of medicine and health, as well as contemporary environmental studies, environmental policy and management. Courses in HPS make ideal complements to courses in intellectual and social history, philosophy, sociology, politics and international relations, psychology and public policy.

While not everyone is trained in science or engineering, everybody is affected by science and technology in their private and working lives. Issues concerning the impact and risks of technological and scientific change are inescapable. HPS courses provide critical and contextual understanding of these issues, both for students of humanities and social sciences, as well as natural sciences, medicine and engineering.

No previous study of mathematics or science is required. Entry to most Upper Level courses is possible without having studied Level 1 HPS courses.

* The School of History and Philosophy of Science was previously named the School of Science and Technology Studies. Courses in the School of History and Philosophy of Science, coded HPS, replace courses in the two streams previously offered by the School of Science and Technology Studies (HPST and SCTS).

Major Sequence
For students commencing in 2002 or earlier, a major sequence in History and Philosophy of Science consists of at least 42 units of credit in HPS courses (or their HPST and SCTS predecessors), of which no more than 12 units of credit may be from Level 1 courses.

For students commencing in 2005 or later, a major sequence in History and Philosophy of Science consists of at least 42 units of credit in HPS courses, of which no more than 12 units of credit may be from Level 1 courses; at least 2 courses from Level 2 fundamental knowledge courses & 2 from Level 3 courses; plus at least one elective from any Upper Level HPS course.

By permission of the Head of School, up to 6 units of credit obtained in approved Upper Level courses in other Schools may be counted towards a major sequence.

Interdisciplinary Programs
The School coordinates interdisciplinary programs in Environmental Studies, Cognitive Science, and the Philosophy of Science. See entries under those headings for further information.

Level 1
HPSC1100 Cosmos and Culture S1
HPSC1200 Science, Good, Bad & Bogus S2
HPSC1400 Science, Technology, Society and Environment S1
HPSC1500 Understanding Environmental Controversy S2

Level 2
Fundamental Knowledge Courses
HPSC2150 Darwin and the Order of Nature S1
HPSC2200 Philosophy of Science S2
HPSC2300 Sociology of Science & Technology: How Science Works S2

**Honours**

Students thinking of studying for Honours in the School of History and Philosophy of Science should consult the School in session 3 of their study.

A program of study will be worked out for each student according to his or her needs and interests. It is, however, possible to move to Honours at a later stage, and students wishing to do so should contact the School.

**Indonesian Studies**

Coordinator: A/Prof David Reeve
Administrative Assistant: Rosanna Cheung
Office: Room 238, Morven Brown Building
Tel: (02) 9385 1019
Email: d.reeve@unsw.edu.au

Courses in Indonesian Studies are offered both for students with no prior knowledge of the language (Beginners’ level entry) and for those with HSC Indonesian (Intermediate or Advanced level entry). There are also courses available for native speakers (Professional level entry).

In order to count Indonesian Studies as a major sequence, students must complete 42 units of credit in Indonesian language and Indonesian Studies courses. Those interested in doing Honours must in addition complete two qualifying one semester courses worth 6 units of credit each in Year 2 and/or Year 3.

**Major Sequences**

1. **Beginner’s Entry level – 42 units of credit**
   - Year 1
     - IND01001 Introductory Indonesian 1
     - IND01002 Introductory Indonesian 2
   - Year 2
     - IND02001
     - IND02002
   - Year 3
     - IND03001
     - IND03002
     - plus one Indonesian Studies course
   - Year 2
     - IND03001
     - IND03002

2. **Intermediate Entry Level – 42 units of credit**
   - Year 1
     - IND01001
     - IND01002
   - Year 2
     - IND02001
     - IND02002

### International Studies - Global Studies

**Coordinator:** Roger Bell, International Studies

**Office:** Room G66, Morven Brown Building

**Tel:** (02) 9385 2431

**Email:** r.bell@unsw.edu.au

**Website:** www.arts.unsw.edu.au/futurestudents/undergraduate/internationstudies.html

The Bachelor of International Studies in Global Studies requires the completion of a sequence of 42 units of credit in Global Studies (GLST) including GLST1100, GLST2104 and GLST3000. A maximum of 12 Level 1 units of credit can be completed.

#### First Year

- **GLST1100** Introduction to Globalisation (core) S1
- plus one of the following:
  - **GLST1200** Women, Gender and World History S1
  - **GEOH1601** Australia and Global Geographies: Integration and Convergence S2
  - **PECO1001** Australia in the Global Economy S1
  - **SOCA1100** Cultural Identities S1

#### Second Year

- **GLST2104** Globalisation and Uneven Development (core) S2
  - plus two of the following:
    - **GLST1201** (Un)Making the Third World: History and Global Development B S1
    - **GLST2102** (Un)Making the Third World: History and Global Development A S2
    - **GLST2103** The United States and Changing Global Orders S1
    - **GLST2105** Theories and Concepts of International Relations S1
    - **ECON2111** Globalisation S2
    - **EUKJ2600** European Integration S2
    - **EURO2700** What is Post-communism? S2
    - **HIST2085** Australia’s Asian Context S2
    - **MFT2100** Global Media: Markets, Flows and Culture Regional Cooperation and Conflict in Southeast Asia S2
    - **SOCA2101** Encountering Modernity S1
    - **SOCA2210** Anthropology of Human Rights S1

#### Third Year

- **GLST3000** Global Studies and Global Transformations (core) S2
  - plus two of the following:
    - **GLST3302** States, Nations and Ethnic Identities S2
    - **GEOH3661** Cities and Urbanisation S2
    - **MFT2305** Cinemas and Cultures S2
    - **POLS3050** Theories of Nationalism S2
    - **SOCA3104** Global Migration, Global Refugees S1
    - **SOCA3106** Anthropology and Tourism S2
    - **SOCA3703** Nationalism, Citizenship and Cultural Identity S2
    - **SOCA3801** The Space of Terror S2

*Not offered in 2006.*

### Irish Studies

**Coordinator:** Dr Peter Kuch, School of English

**Tel:** (02) 9385 2364

**Email:** p.kuch@unsw.edu.au or irish@unsw.edu.au

**Website:** http://irishstudies.arts.unsw.edu.au/

The major in Irish Studies provides an interdisciplinary exploration of Irish history, culture and society over the past two hundred years that takes particular account of Ireland’s relationships with Australia and with Europe. While attention is paid to issues such as identity, ethnicity, and ‘nation-building’, and the history of their contestation in Ireland, the principal focus is on ways these can be situated within readings of the cultural, social and political forces that shaped Ireland’s interaction with Australia and Europe. From being subject to the British Empire and thus a major source-country for the European settlement of Australia, Ireland has become a wealthy, technologically advanced, highly educated and culturally sophisticated European nation.

The Level 1 core courses offer students an understanding of the Irish contribution to the history of Australia and an understanding of contemporary Europe, of which Ireland is now part. Given the literary component of the major, students are strongly advised to enrol in either ENGL1001 and/or ENGL1006 and/or ENGL1007 and/or ENGL1009 in their first year.

Upper Level courses are taught by different schools in the Faculty and consequently the major enables students to enjoy a range of disciplinary and interdisciplinary approaches. Courses may be studied individually and, though all complement one another, all are designed to be self-contained.

### Major Sequence in Irish Studies

The major in Irish Studies comprises 12 units of credit at Level 1 and 24 Upper Level units of credit.

*Not offered in 2006.*
Italian
Coordinator: Dr Diana Palaversich, Department of Spanish & Latin American Studies
Tel: (02) 9385 1188/1681
Email: italian@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/italian/italian.html

Italian is currently offered at beginners’ level only within the School. Students wishing to continue their studies in Italian may be able to do so by enrolling in courses offered by the University of Sydney. Students with prior Italian language knowledge may be able to commence study at a course higher than ITAL1001 at the University of Sydney.

Level 1
ITAL1001 Introductory Italian 1 S1
ITAL1002 Introductory Italian 2 S2

Japanese Studies
Coordinator: Dr Gi-Hyun Shin
Office: Room 203, Morven Brown Building
Tel: 9385 3760
Email: japankorea@unsw.edu.au
Website: www.languages.arts.unsw.edu.au/japan/japan.html

Japanese Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/opption, General Education unit or as a major in the Diploma in Languages. The program offers a range of Japanese language and non-language based courses to students, including courses in Japanese cultural studies, and professional language.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students with prior knowledge of Japanese sit for a placement test in order to gain entry to an appropriate language course.

Note: For students admitted in their first year of studies into JAPN2000 or higher on the grounds of ability and/or previous study, such courses will be counted as Level 1 courses in terms of degree regulations. No student will be permitted to enrol in courses carrying more than 12 Upper Level units of credit in any School/area of studies under this provision.

Major Sequence
A major sequence in Japanese Studies comprises 42 units of credit and requires (1) 24 units or more from Japanese language core or JAPN3700 series; (2) either JAPN2500 (or JAPN3900*); and (3) the remaining units from Culture and Professional Language courses. Students completing the Japanese Studies major including two or more courses from the JAPN3700 series will be recognised as having completed the Japanese Studies Advanced Program.

LOTE
Those pursuing a LOTE qualification in the BA BEd program should take 36 LUC from Language core or JAPN3700 series as well as JAPN2500 (or JAPN3900*).

Honours Level
Prerequisite: The completion of 54 units of credit, including JAPN3901 and JAPN3902 in Japanese Studies, a WAM of 65 or above in all courses, Distinction or higher in all JAPN courses, and the major with a minimum language level of JAPN3001.

Entry to the Combined Honours program requires the completion of 48 units of credit, including JAPN3901 and JAPN3902, a WAM of 65 or above in all courses, Distinction or higher in all JAPN courses, and the major with a minimum language level of JAPN3001.

Language Core
JAPN1000 Japanese Communication 1A S1
JAPN1001 Japanese Communication 1B S2
JAPN2000 Japanese Communication 2A S1
JAPN2001 Japanese Communication 2B S2
JAPN3000 Japanese Communication 3A S1

JAPN4010 Japanese Communication 4B S2

JAPN3700 Series
JAPN3700 Expressing Oneself in Japanese** S1
JAPN3701 Advanced Study of Spoken Japanese** S2
JAPN3702 Politeness in Interaction with (the) Japanese S1
JAPN3703 Approaches to Japanese Discourse Analysis S2
JAPN3704 Contact Situations in Japanese** S2

Culture and Professional Language Courses
Core
JAPN2500 Introduction to Japanese Studies S1 & S2
or JAPN3900 Introduction to Japanese Studies (Advanced)* S1

Electives
JAPN2501 Japan’s Others: Assimilation, Exclusion, and Resistance** S1
JAPN2510 Japan and Korea: Cultures in Conflict S1
JAPN2513 Cultures of War and Peace in Japan** S1
JAPN2600 Hospitality Japanese S1
JAPN2700 Talking Japanese Pop Culture S1
JAPN2701 Learning Japanese by Reading Manga S2
JAPN2705 Business Japanese S2
JAPN3300 Discover Japanese Grammar A S1
JAPN3301 Discover Japanese Grammar B** S1
JAPN3301 Japanese Studies Internship** S1
JAPN3601 Cultural Studies and Japan S2
JAPN3602 Gender & Sexuality in Contemporary Japan** S2
JAPN3605 Japan in the World** S2
JAPN3901 Introduction to Research in Japanese Studies* S1
JAPN3902 Readings in Japanese Studies (Advanced)* S2
HIST2054 Modern Japan: Political Culture, Popular Culture S1
HIST3102 Premodern Japan S1
MODL2000 Intercultural Communication S1

*Advanced Upper Level courses usually taken by those students who are intending to enrol in Honours.

**Not offered in 2006.

Honours level
JAPN4500 Japanese Studies Honours (Research) Full-Time
JAPN4550 Combined Japanese Honours (Research) Full-Time
JAPN4555 Japanese Studies Honours (Research) Part-Time

Jewish Studies
Coordinator: Dr Julie Kalman, School of History
Office: Room 351, Morven Brown Building
Email: history@unsw.edu.au
Website: www.arts.unsw.edu.au/jewishstudies/

Jewish Studies is an interdisciplinary program focusing on the modern Jewish experience. It brings together various perspectives and approaches from History, Politics, Sociology, Literature, and Law to explore the subject of the Jews – their religion, culture and politics and their interrelations with non-Jews and the wider society – with an emphasis on the past two centuries.

Major Sequence
Students may take a major sequence in Jewish Studies as their second major, together with a major in a school-based discipline within the Faculty of Arts and Social Sciences. A major sequence consists of 36 units of credit in the Jewish Studies program, including at least 24 units of credit in Upper Level courses. With the approval of the Coordinator, up to 12 units of credit in other courses related to Jewish Studies may be counted towards the major.

Level 1
JWST1000 The Modern Jewish Experience: Emancipation and Statehood S1
JWST1001 The Modern Jewish Experience: Nationalism and Statehood S2

Upper Level
JWST2101 Holocaust and Genocide in Historical Perspective S2
JWST1203 The German-Jewish Experience* S1

Elective
HIS12511 United States and Conflict in the Middle East S2

*Keeper subject to staff availability.

Korean Studies
Coordinator: Dr Gi-Hyun Shin
Office: Room 203, Morven Brown Building
Tel: 9385 1731
Email: g.shin@unsw.edu.au
Website: www.languages.arts.unsw.edu.au/korean/korea.html
Korean Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. The program offers a range of Korean language and non-language based courses to students, including courses in Korean cultural studies, and professional language.

The program has a flexible entry-point policy, which allows students to enrol in the language program that builds on their existing language skills. Students with prior knowledge of Korean sit for a placement test in order to gain entry to an appropriate language course.

**Note:** For students admitted in their first year of studies into KORE2000 or higher on the grounds of ability and/or previous study, such courses will be counted as Level 1 courses in terms of degree regulations. No student will be permitted to enrol in courses carrying more than 12 Upper Level units of credit in any School/area of studies under this provision.

**Major Sequence**

A major sequence in Korean Studies comprises 42 units of credit. A major sequence in Korean Studies requires: (1) the completion of at least 4 consecutive language courses; (2) the completion of KORE3001 or higher; (3) the remaining units from Culture courses. In exceptional cases, a student may take Culture courses instead of Language courses with the Department's permission. Students who complete the language core with KORE3001 or higher will be recognised as having completed the Korean Studies Advanced Program.

**Honours**

**Prerequisite:** The completion of 54 units of credit, including KORE3000 and KORE3001 in Korean Studies, a WAM of 65 or above in all courses, Distinction or higher in all KORE courses, and the major with a minimum language level of KORE3001.

**Language Core**

**Note:** Latin is not available as a major sequence within the Faculty of Arts and Social Sciences.

**Linguistics**

**Coordinator:** A/Prof Peter Collins

**Office:** Room 231, Morven Brown Building

**Tel:** (02) 9385 3649

**Email:** linguistics@unsw.edu.au

**Website:** www.arts.unsw.edu.au/languages/linguistics

Linguistics is the study of human language. Its practitioners address questions such as: How do people use language in various situations? What is the biological basis for language? Is language unique to the human species? How and why do languages change? How do children learn language? What is the meaning of ‘meaning’? Can machines talk? As well, linguistics provides a basis for a variety of practical applications, including the teaching and learning of foreign languages, translating and interpreting, facilitating cross-cultural communication, diagnosing and treating language disorders, providing linguistic support for such professions as law and medicine, developing language curricula in schools, improving literacy skills, generating speech by computer, producing ‘plain English’ documents, and so on.

Students who have successfully completed either or both of the Level 1 Linguistics courses may enrol in Upper Level Linguistics courses. A student who has not fulfilled this prerequisite but is interested in a particular Upper Level course may request the permission of the Head to have the prerequisite waived. In considering such requests, the Head will give preference to a candidate with a successful year’s work in another language, or in English, or a Credit or better in another related discipline.

**Major Sequence**

A major sequence in Linguistics requires 12 units of credit in Linguistics at Level 1 and 30 units of credit in Upper Level courses, including at least 12 units of credit at 3000 level. Students may count up to 6 units of credit in approved Upper Level courses taught outside the Linguistics Department towards a major sequence in Linguistics. Approved courses are MODL2000 Intercultural Communication, MODL2002 Introduction to Professional Interpreting, JAPN330 Discover Japanese Grammar A and JAPN3301 Discover Japanese Grammar B. Students who wish to count any other course from outside the Linguistics Department towards a major sequence in Linguistics should consult the Department.

**Note:** Students are strongly advised to consult the Head on their eligibility to enter Honours programs.
Mathematics

Coordinator: School of Mathematics Office
Office: Room 3070, Red Centre
Tel: (02) 9385 7111
Email: info@maths.unsw.edu.au
Website: www.maths.unsw.edu.au

While Mathematics as a major study is usually taken in one of the Science, Advanced Science or Science/Arts programs, it may also be taken within an Arts program.

Students wishing to do a Honours degree in Mathematics or to specialise in one of the disciplines of Applied Mathematics, Pure Mathematics or Statistics must transfer from the Arts program to one of the Science, Advanced Science or Science/Arts programs. This should normally be done prior to commencing Year 2, but may be possible at the end of Year 2 depending on the courses selected.

First Year Mathematics
MATH1131 and MATH1231 are the standard courses and are generally selected by students who intend to pursue further studies in Mathematics. There is an assumed knowledge for these courses of HSC Mathematics Extension 1.

MATH1141 and MATH1241 are aimed at the more mathematically able students. They cover all the material in MATH1131 and MATH1231 at greater depth and sophistication. There is an assumed knowledge for these courses of HSC Mathematics Extension 2.

MATH1011, MATH1031 and MATH1041 are courses available for students who do not intend studying Mathematics beyond Level I, but whose studies require some knowledge of basic mathematical ideas and techniques. Only a very limited number of Upper Level Mathematics courses are available to students who have done these courses. There is an assumed knowledge for these courses of HSC Mathematics (this does not include HSC General Mathematics).

Higher Level Mathematics
Many courses in the School are offered at two levels. The Higher level caters for students with superior mathematical ability. Where a prerequisite is mentioned at the ordinary level, the corresponding Higher level course may be substituted.

Students with Low Mathematical Qualifications
The University organises a bridging course in Mathematics which is available for those students intending to enrol in MATH1131 who have inadequate mathematical background. The bridging course covers the gap between HSC Mathematics and Mathematics Extension 1 and is a very useful refresher course generally. The course is held at the University during February each year. Students who do not have a background equivalent to at least HSC Mathematics should not take Mathematics at UNSW.

Major Sequences in Mathematics
A major sequence in Mathematics consists of 42 units of credit, subject to the following rules.

Level I
12 units of credit (MATH1131 or MATH1141, MATH1231 or MATH1241)

Upper Level
30 units of credit in which:
(a) at least 12 units of credit are at Level II
(b) at least 12 units of credit are at Level III
(c) MATH2501 and MATH2011 are compulsory
(d) additional courses recommended at Level II are:
MATH2120 and MATH2520, or MATH2801 and MATH2810

Students should also consult the School concerning their choice of Upper Level courses before enrolling in Year 2.

Level I
MATH1011 General Mathematics 1B
MATH1031 Mathematics for Life Sciences
MATH1041 Statistics for Life and Social Sciences
MATH1131 Mathematics 1A
MATH1141 Higher Mathematics 1A
MATH1231 Mathematics 1B
MATH1241 Higher Mathematics 1B

Upper Level
Mathematics Level II
MATH2011 Several Variable Calculus
MATH2111 Higher Several Variable Calculus

Applied Mathematics Level II
MATH2120 Mathematical Methods for Differential Equations
MATH2130 Higher Mathematical Methods for Differential Equations
MATH2140 Operations Research: Methods and Applications
MATH2240 Introduction to Oceanography and Meteorology
MATH2260 Dynamical Systems
MATH2281 Biomathematics
MATH2301 Mathematical Computing

Pure Mathematics Level II
MATH2400 Finite Mathematics
MATH2501 Linear Algebra
MATH2510 Real Analysis
MATH2520 Complex Analysis
MATH2601 Higher Linear Algebra
MATH2620 Higher Complex Analysis

Statistics Level II
Note: The course MATH2841 Statistics SS is available for students who wish to take only 6 units of credit of Level II Statistics. It cannot be followed by any Level III statistics courses.

MATH2801 Theory of Statistics
MATH2830 Statistical Computing for Categorical Data
MATH2831 Linear Models
MATH2841 Statistics SS
MATH2871 Data Management for Statistical Analysis
MATH2901 Higher Theory of Statistics
MATH2910 Higher Statistical Computing for Categorical Data
MATH2931 Higher Linear Models

Mathematics Level III
MATH3041 Mathematical Modelling for Real World Systems

Applied Mathematics Level III
Before attempting any Level III Applied Mathematics course a student must have completed at least 12 units of credit of Level II Mathematics courses including the prerequisites specified for individual courses.

MATH3101 Computer Methods for Differential Equations
MATH3121 Mathematical Methods
MATH3161 Optimisation Methods
MATH3181 Optimal Control
MATH3201 Dynamical Systems and Chaos
MATH3241 Fluid Dynamics
MATH3261 Atmosphere-Ocean Dynamics
MATH3301 Advanced Mathematical Computing

Pure Mathematics Level III
Before attempting any Level III Pure Mathematics courses, except MATH3411 or MATH3421, students must normally have completed at least 12 units of credit of Level II Mathematics including the prerequisites specified for individual courses. For higher courses the performance in these courses should be at distinction level. Subject to the approval of the Head of the Department, this may be relaxed. Students wishing to enrol in Level III Higher Pure Mathematics courses should consult with the Pure Mathematics Department before enrolling.

The courses MATH3511, MATH3680 and MATH3740 are normally offered only in even numbered years and the courses MATH3531, MATH3780 and MATH3790 only in odd numbered years.

MATH3411 Information, Codes and Ciphers
MATH3421 Logic and Computability
MATH3511 Transformations, Groups and Geometry
MATH3521 Algebraic Techniques in Number Theory
MATH3531 Topology and Differential Geometry
MATH3541 Differential Equations
MATH3560 History of Mathematics
MATH3570 Foundations of Calculus
MATH3610 Foundations of Analysis
MATH3620 Higher Analysis 2: Functional Analysis
MATH3630 Higher Analysis 3: Integration
MATH3641 Higher Differential Equations
MATH3680 Higher Complex Analysis
MATH3690 Higher Algebraic Topology
MATH3700 Higher Differential Geometry
MATH3710 Higher Algebra 1: Group Theory
MATH3720 Higher Algebra 2: Rings and Fields
MATH3740 Higher Number Theory
MATH3780 Higher Geometry
MATH3790 Higher Computational Combinatorics
Statistics Level III
Note: Not all Level III Statistics courses are offered every year. Contact the Department of Statistics for details.

MATH3801 Probability and Stochastic Processes
MATH3811 Statistical Inference
MATH3821 Statistical Modelling and Computing
MATH3830 Design and Analysis of Experiments
MATH3831 Statistical Methods in Social and Market Research
MATH3841 Statistical Analysis of Dependent Data
MATH3880 Advanced Probability
MATH3890 Special Topics in Statistics
MATH3901 Higher Probability and Stochastic Processes
MATH3911 Higher Statistical Inference
MATH3930 Higher Design and Analysis of Experiments
MATH3931 Higher Statistical Methods in Social and Market Research
MATH3941 Higher Statistical Analysis of Dependent Data
MATH3980 Higher Advanced Probability

Media, Film and Theatre
Coordinator: Professor Philip Bell
School Office: Room 311U, Robert Webster Building
Administrative Assistants: Jennifer Beale, Julie Miller
Tel: (02) 9385 4856 Fax: (02) 9385 6812
Email: mft@unsw.edu.au
Website: http://media.arts.unsw.edu.au

The School of Media, Film and Theatre teaches undergraduate and postgraduate programs in media production and its contexts, film aesthetics and history, the analysis and history of drama and theatrical performance, and dance education.

The School is housed in the Sir Robert Webster Building and employs sophisticated production, post-production digitally-equipped laboratories, excellent rehearsal spaces and theatres, as well as modern teaching spaces.

Bachelor of Arts
Major Sequences in Media, Culture and Technology, Film, and Theatre and Performance Studies

Students may take a major sequence, which will consist of no fewer than 42 units of credit and normally involve two years of Upper Level study in 1. Media, Culture and Technology, or 2. Film, or 3. Theatre and Performance Studies.

Before proceeding to a major sequence at Upper Level, all students must take at least 6 or 12 units of credit in Level 1 core courses. Please see the major sequences below for the relevant core course:

Level 1
MFT1100 An Introduction to Media: Television, Telephones and Everyday Life
MFT1200 Introduction to Film
MEFT2101 Working with Image and Sound
MEFT2100 Reading Performance
MEFT1301 Introduction to Theatre and Performance Studies

1. Major Sequence in Media, Culture and Technology

The major in Media, Culture and Technology provides students with a progressive understanding of the social, cultural and phenomenological impacts of media and communication technologies in the twentieth and twenty-first centuries. The major consists of no fewer than 42 units of credit.

After completion of the core course MFT1100 An Introduction to Media: Television, Telephones and Everyday Life at Level 1, the major must include the following:

At Level 2, at least 12 units of credit from:
MEFT2100 Global Media: Markets, Flows and Cultures
MEFT2101 Media Uses: Practices of Cultural Consumption*
MEFT2102 Media Technologies and Cultural Change
MEFT2103 Reading Media*
MEFT2201 Australian Cinema and Television
MEFT2351 Live Entertainment and Popular Culture

At Level 3, at least 12 units from:
MEFT3100 Media, Tastes and Values*
MEFT1302 Electronic and Digital Aesthetics
MEFT3103 Media Democracies*
MEFT1304 Transnational Media in the Asia Pacific
MEFT3105 Media Forms*
MEFT3353 Performance in a Mediatized Culture S1
* Courses not offered in 2006 but will be offered in future years as part of the major sequence.

2. Major Sequence in Film

The major in Film provides students with a sophisticated understanding of the history and contemporary significance of film as a medium and cinema as an institution. The study of film is set in a broader context of screen cultures and audio-visual industries – including television, video and emerging new media – both in Australia and globally. The major consists of no fewer than 42 units of credit.

After completion of the core course MFT11200 Introduction to Film at Level 1, the major must include the following:

At Level 2, at least 12 units of credit from:
MEFT2200 Contemporary Approaches to Cinema S1
MEFT2201 Australian Cinema and Television S1
MEFT2202 Movie World: National Cinema S2
MEFT1203 The Hollywood System S2

At Level 3, at least 12 units from:
MEFT3200 Video Exercise S1
MEFT3201 Aspects of Film History S1
MEFT3202 Explorations in Contemporary Film Theory S1
MEFT3203 Film Genres and Styles S2
MEFT3204 Special Program in Film Studies S1 & S2
MEFT3205 Cinemas and Cultures S2

3. Major Sequence in Theatre and Performance Studies

The major in Theatre and Performance Studies concentrates on the history, theory and practice of theatre and performance. It will consist of no fewer than 42 units of credit.

After completion of at least one of the core courses MFT11300 Reading Performance or MFT11301 Introduction to Theatre and Performance Studies at Level 1, the major must include the following:

At Level 2, at least 6 units of credit from:
MEHT1200 Staging Australia S2
MEFT3206 Theories of Acting and Performing S2
MEHT1251 Live Entertainment and Popular Culture S1

At Level 3, at least 12 units from:
MEHT1300 Aspects of Theatre and Performance History S1
MEFT3301 Building a Repertoire for Contemporary Stage *
MEFT3302 Production Exercise S1
MEFT3303 Workshop Exercise S2
MEFT3304 Writing for Performance*
MEFT3351 Live Art and Physical Theatres S2
MEFT3352 Studies in World Theatre S2
MEFT3353 Performance in a Mediatised Culture S1
MEFT3354 Performance Making S1
* Courses not offered in 2006 but will be offered in future years as part of the major sequence.

Honours Level
For entry to Honours students must have completed 54 units of credit in a major sequence in Media, Culture and Technology, Film or Theatre and Performance Studies, with a grade average of at least 70%.

MEFT4000 Media, Film and Theatre Honours Full-time
MEFT4050 Media, Film and Theatre Honours Part-time

Bachelor of Arts (Media and Communications)

The Media and Communications core program gives students a sophisticated understanding of the history, scope and socio-cultural impact of new media technologies, and of the debates that have accompanied their development and use. Important features of this core program are its emphasis on new computer-based multimedia and its focus on Australian media industries in relation to globalisation. The degree is vocationally relevant in its orientation and all students are given significant practical experience in new computer-based multimedia communication technologies.

The program emphasises analytical skills combined with extensive production experience to equip students with a thorough knowledge of the rapidly changing fields of media and communications. This grounding enables them to interpret, create and apply the products of new media not only in the context of the mass information and entertainment industries but also in a variety of other public and private sectors such as education, on-the-job training and specialised information services.
In addition to the Media and Communications core program, students must complete two elective courses and a major in the humanities or social sciences, to permit them to study a related field in depth or to pursue their interests in other areas.

Core Courses
The core program is only available to students enrolled in the BA (Media and Communications) (program 3402), BSc (Media and Communications) (program 3994), and BA (Media) LLB (program 4764).

Level 1
- MDCM1000 New Media Technologies A S1
- MDCM1001 New Media Technologies B S2

Level 2
- MDCM2000 Researching and Writing for New Media S1
- MDCM2002 Media Production S1
- MDCM2003 Multimedia Production S2

Level 3
- MDCM3000 Media Forms S1
- MDCM3002 Advanced Media Production S1
- MDCM3003 Multimedia Production in Industry Contexts S2

Elective Courses
These courses are available to all Faculty of Arts and Social Sciences students at Upper Level.
- MFT2100 Global Media: Markets, Flows and Cultures S2
- MFT2102 Media Technologies and Cultural Change S2
- MFT2201 Australian Cinema and Television S1
- MFT3102 Electronic and Digital Aesthetics S2
- MFT3104 Transnational Media in the Asia Pacific S1
- MFT3353 Performance in the Mediatised Culture S1

Honours Level
For entry to Honours in Media and Communications, students must have normally completed 60 units of credit in MDCM courses with a grade average of at least 70%.
- MLCM4000 Media and Communications Honours Full-time
- MLCM4050 Media and Communications Honours Part-time

Bachelor of Arts (Dance) Bachelor of Education
The BA(Dance) BEd (program 3408) is a specialist double degree in Dance and Dance Education. Although a wide variety of dance careers is open to graduates, the primary focus of the double degree program is to equip graduates to serve as dance teachers in schools and in the community.

The program offers extended study in four major areas (plus the General Education program). Dance Practice offers dance styles classes designed to improve and consolidate students’ dance skills. Dance Theory is a sequence of mainly theoretical courses which provide an intellectual rationale for understanding the course. Dance Education and Education both give dance a pedagogic context as well as introduce students to educational theories. A major sequence in a second course area from within the Faculty provides students with their second teaching subject.

The program carries 192 units of credit and consists of:

**Level 1**
- DANC1001 Dance Styles 1 S1
- DANC1002 Dance Styles 2 S2
- DANC1101 Anatomical Foundations of Dance Education S1
- DANC1102 Teaching Safe Dance S2
- EDST1101 Educational Psychology 1 S1
- EDST1103 Educational Psychology 2 or S2
- EDST1104 Social Perspectives in Education S2

**Upper Level**
- DANC2000 Dance Analysis and Composition 1 S1
- DANC2002 Theatre Production S2
- DANC2005 Dance Analysis and Composition 2 S2
- DANC2007 History of Dance S1
- DANC2103 Dance Styles 3 S1
- DANC2104 Dance Styles 4 S2
- DANC2105 Dance Styles 5 S1
- DANC2106 Dance Styles 6 S2
- DANC2107 Dance Styles 7 S1
- DANC2201 The Teaching-Learning Process in Dance S2
- DANC2203 Dance Teaching Practice S2
- DANC2209 Dance Method A S1

**Level 2**
- DANC2211 Dance Method B S2
- EDST4080 Special Education S1
- EDST4081 Professional Issues in Teaching S1
- EDST4095 Gifted and Talented Students: Recognition and Response S1

plus 30 units of credit from Upper Level courses in the approved major sequences

plus 6 units of credit in the requisite Second Teaching Method course offered by the School of Education

and

12 units of credit in courses approved by the Faculty in the General Education program.

Outside Credits
In special circumstances students may be given permission to include towards a major sequence in the School up to a maximum of 6 units of credit in a related course or courses offered by another school/department. It is imperative, however, that they seek the written authorisation of the Head of School prior to making their enrolment.

Honours Level
Students seeking permission to undertake Dance Honours must have completed 192 units of credit as detailed above and achieved a minimum average grade of Credit in dance courses. Those intending to enroll in the Honours program must seek the permission of the Dance Program Coordinator so that an appropriate course of study can be planned.

DANC4000 Dance Honours Full-time
DANC4050 Dance Honours Part-time

Modern Language Studies
School Office: Reception Room 258, Moran Brown Building
Email: languages@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/

The School of Modern Language Studies teaches majors in Chinese and Indonesian Studies, French, German Studies, Japanese and Korean Studies, Linguistics, Greek, Russian Studies and Spanish and Latin American Studies. Some courses are also available in Italian and Latin. The courses listed below are taught in English and are available to all students who meet the prerequisites. They are team-taught by staff members from different cultural backgrounds and will emphasise cross-cultural analysis.

**Upper Level**
- MODL2000 Intercultural Communication S1
- MODL2002 Introduction to Professional Interpreting S2

Music and Music Education
Coordinator: Dr Christine Logan
School Office: Room G19, Robert Webster Building
Tel: (02) 9385 4871
Email: music@unsw.edu.au
Website: http://music.arts.unsw.edu.au/

The School of Music and Music Education offers the following undergraduate degrees and courses of study:

1. A major sequence and an Honours program within the Bachelor of Arts (BA) or some other Bachelor programs
2. The Bachelor of Music degree (BMus)
3. The combined Bachelor of Music Bachelor of Education degree (BMus BEd)
4. The combined Bachelor of Music Bachelor of Arts degree (BMus BA)
5. Fundamentals of Music, which serves as an introductory course in musicianship and musical techniques

6. A Diploma in Music which may be undertaken concurrently with another program of study or by students who already hold a Bachelor Degree in another discipline other than music

**The Bachelor of Arts (BA)**  with a major in music is a three year degree designed to develop musicianship and performing skills in association with an exploration of musicology; music history, style, musical perception and analysis, music technology, and the study of music in its cultural contexts (ethnomusicology). There are two possible major sequences. The first is:

**Year 1**
- MUSC1101 Music Reinvented
- MUSC1312 BA Musicianship A
4. The Bachelor of Music Bachelor of Arts (BMus BA) is a four year double degree which combines the full professional training of the BMus with an extensive range of other options within the Faculty of Arts and Social Sciences. The music degree develops musicianship and musical skills in general through courses in musicology and ethnomusicology – including music history, style, musical perception and analysis, music in its cultural contexts – and musical technology, performance, jazz studies and composition. The Arts degree offers a wide range of options for specialist studies in two or three other areas within the Faculty. The whole range of professional work open to BMus graduates in performance, private teaching, broadcasting, recording, arts administration, concert planning, music and general arts journalism, arranging and composition will be open to the BMus BA graduates. In addition, the BA will qualify them for public and private sector administrative and policy positions.

Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

5. Music Fundamentals serves as an introductory course in musicianship and musical techniques. It is open to all undergraduates and does not have a musical prerequisite.

6. The Diploma in Music (program 3418) may be taken either concurrently with a non-music Bachelor program (with approval from a student's program authority) or as a three year, part-time program for students who already hold a Bachelor degree (with approval from the Faculty of Arts and Social Sciences). The structure of the Diploma follows that of the Bachelor of Arts major in music (item 1 above).

University Performance Ensembles – Music studies in the Faculty concentrate on the texts and contexts of music, and involve the active development of the student's musicianship and practical abilities. Performance groups run by the School include: The Collegium Musicum Choir, the UNSW Orchestra, the Pipers Wind Band (Concert Band), a vocal chamber group the Burgundian Consort, chamber music ensembles, Traditional Music Group, Handbell Ensemble, Jazz Groups.

The Collegium Musicum Choir of UNSW is open to all students and staff of the University interested in choral singing. The choir rehearses each Wednesday evening from 4.30–7.30 pm and gives several public concerts each year, often with the Collegium Musicum Orchestra who are based on the Australia Ensemble and resident at UNSW. For audition and further details, please contact the School of Music and Music Education.

The University of New South Wales Orchestra and Concert Band are open to all Australian students and staff with the necessary instrumental performance standards. The student's training involves practice teaching sessions in Years 1, 2 and 3 and 4 in a variety of different schools.

Admission to the program is subject to satisfactory audition/interview and an acceptable level of attainment in Year 12 studies or equivalent.

Assumed knowledge: HSC Music 2 or Extension or equivalent qualification.

Restrictions to the domestic context. Specialist knowledge and skills are required to be successful in international business. For example, strategic decisions have to be made about which countries to operate in and whether or not to export or license, whether to set up a new facility, establish a joint venture or acquire an existing business, and how to sustain competitiveness internationally. Cultural differences also have to be understood to conduct effective business negotiations and to manage people in a cross-border context.

The School's program of study in Industrial Relations focuses on the institutions, practices and processes associated with contemporary employment relations. It is designed on a multidisciplinary social science basis to foster an appreciation of the many important questions relating to the role of individuals, trade unions, employers and government bodies in the world of work.

**Major Sequence in Industrial Relations**
A total of 42 units of credit obtained in the following Required and Option courses:

**Required Courses (Minimum 18 units of credit)**
- MGMT1701 Industrial Relations
- MGMT1702 Labour Organisation
- MGMT2702 Industrial Law

**Option List A (Minimum 12 units of credit)**
- MGMT2704 Social Organisation of Work
- MGMT2715 Labour History*
- MGMT3705 Management and Employment Relations
- MGMT3706 Industrial Relations Policies and Processes*

**Option List B (Minimum 6 units of credit)**
- MGMT1203 International Employment Relations*
- MGMT2718 Human Resource Management
- MGMT2724 Health and Safety at Work
- MGMT3702 International Human Resource Management Practice
- MGMT3708 Research Methods in Employment and Management
- MGMT3721 Negotiation Skills
- MGMT3724 Strategic Human Resource Management
- MGMT3728 Managing Pay and Performance
- MGMT3729 Managing Workplace Training

* This course is not offered every year, see the timetable for offerings in 2006.

**Honours Entry**
To progress to Year 4 Honours in Industrial Relations a student must:
1. Complete the specified number of Required and Options courses, plus MGMT3703**
2. Pass all these courses and obtain average grades of 71% or better in these courses
3. Obtain the permission of the Honours Coordinator to undertake the Honours year

** MGMT3703 is a prerequisite for Honours & should normally be taken as an Option in the session preceding the Honours year.

** Honours Level
Students need to complete the following:
1. A thesis of 20,000 words
2. Honours Seminar (both sessions)
3. Two approved MGMT courses, one per session. (Details of approved courses may be obtained from the Head of School.)
4. A thesis of 20,000 words

** This course is not offered every year, see the timetable for offerings in 2006.

**Major Sequence in Human Resource Management**
A total of 42 units of credit obtained in the following Required and Option courses:

**Required Courses (18 units of credit)**
- MGMT1701 Industrial Relations
- MGMT1712 Management of Organisations
- MGMT12718 Human Resource Management

**Option List A (minimum 12 units of credit)**
- MGMT3702 International Human Resource Management Practice
- MGMT3724 Strategic Human Resource Management
- MGMT3728 Managing Pay and Performance
- MGMT3729 Managing Workplace Training
Option List B (minimum 6 units of credit)

- MGMT2702 Industrial Law*
- MGMT2703 International Employment Relations*
- MGMT2704 Social Organisation of Work
- MGMT2715 Labour History*
- MGMT2724 Health and Safety at Work
- MGMT3705 Management and Employment Relations
- MGMT3706 Industrial Relations Policies and Processes*
- MGMT3708 Research Methods in Employment and Management*
- MGMT3721 Negotiation Skills

* This course is not offered every year, see the timetable for offerings in 2006.

Honours Entry

To progress to Year 4 Honours in Human Resource Management a student must:

1. Complete the specified number of Required and Options courses, plus MGMT3708**
2. Pass all these courses and obtain average grades of 71% or better in these courses
3. Obtain the permission of the Honours Coordinator to undertake the Honours year

** MGMT3708 is a prerequisite for Honours and should normally be taken as an Option in the session preceding the Honours year.

Honours Level

1. A thesis of 20,000 words
2. Honours Seminar (both sessions)
3. Two approved MGMT courses, one per session. (Details of approved courses may be obtained from the Head of School.)

Students undertaking Honours in Human Resource Management should enrol in one of the following course numbers in each session:

- MGMT4740 Human Resource Management 4 Honours Full-Time
- MGMT4741 Human Resource Management 4 Honours Part-Time

Major Sequence in International Business

A total of 42 units of credit obtained in the following required and option courses.

Required Courses

Level 1 (12 units of credit)
- MGMT11101 Global Business Environment
- MGMT11102 Managing Across Cultures

Upper Level (18 units of credit)
- MGMT2101 International Business and Multinational Operations
- MGMT21010 International Business Strategy
- MGMT3102 Asia-Pacific Business

Options (12 units of credit)
- MGMT2103 Chinese Business Enterprise
- MGMT2106 Comparative Management Systems in East Asia
- MGMT2110 Alliance Management and International Co-operation*
- MGMT3103 Global Stakeholder Management

* This course is not offered every year, see the timetable for offerings in 2006.

Other courses in Arts and Social Sciences may be substituted for the above options with the approval of the Head, School of Organisation and Management.

Honours Entry

To progress to Year 4 Honours in International Business a student must:

1. Complete 48 units of credit in International Business satisfying the requirements of a major sequence**
2. Pass all these courses and obtain average grades of 71% or better in these courses
3. Obtain the permission of the Honours Coordinator to undertake the Honours year

** Students are highly encouraged to take MGMT3708 as a Free Option in the session preceding the Honours year.

Honours Level

1. A thesis of 20,000 words
2. Honours Seminar (both sessions)
3. Two approved MGMT courses, one per session. (Details of approved courses may be obtained from the Head of School.)

Students undertaking Honours in International Business should enrol in one of the following course numbers in each session:

- MGMT4000 International Business Honours Full-Time
- MGMT4050 International Business Honours Part-Time
- MGMT4200 Combined International Business Honours Full-Time
- MGMT4250 Combined International Business Honours Part-Time

Philosophy

Head of School: A/Prof Stephen Cohen
School Office: Room G34, Morven Brown Building
Tel: (02) 9385 2371
Email: philosophy@unsw.edu.au
Website: http://philosophy.arts.unsw.edu.au

Studying Philosophy provides intellectual skills that can help you to think critically, to better organise your thoughts and to present them logically and persuasively. Philosophy also addresses fundamental questions about the nature of reality, language, meaning, human knowledge and values. It provides a useful complement to studies in many disciplines but especially those in which logical thinking and clear expression are important. The range of Upper Level courses makes it possible for students majoring in other disciplines to select courses complementing their interests.

Level 1

There are four Level 1 courses. Students can gain Upper Level status by completing one, but it is suggested that two be completed if you wish to complete a major sequence in Philosophy.

Upper Level

Students must be in at least Year 2 of study in the Faculty in order to take Upper Level courses in Philosophy. Each course is designed to be self-contained, but particular groupings of courses will enable students to pursue sustained treatments of particular areas or historical developments in the treatment of issues. The School recommends that students intending to continue upper level courses enrol in one or more PHIL2000 gateway courses. In certain circumstances the prerequisites specified for courses may be waived. Students who feel they have a case for a concession of this kind should consult the School.

Major Sequence

A major sequence in Philosophy is a sequence of courses offered by the School carrying a total of at least 42 units of credit including no more than 12 units of credit in Level 1 courses and at least 18 units of credit in PHIL2100 courses or above. Subject to the approval of the School, a student may be permitted to count up to 6 units of credit offered outside the School toward a major sequence in Philosophy. Some Philosophy courses may be counted towards a major sequence in the School of History and Philosophy of Science and in the School of Education.

Honours Entry

For entry to Philosophy Honours (Research), students must normally have completed 54 units of credit in Philosophy, consisting of 6 or 12 units of credit at Level 1 and the remainder at Upper Level. Upper Level courses must include at least 24 units of credit in PHIL2100 courses or above, including PHIL3910 Advanced Philosophy Seminar. Students must also normally have a grade average of at least 70 per cent in their Philosophy courses, including at least one Distinction result.

For Combined Honours (Research), the requirement is normally 48 units of credit in Philosophy, consisting of 6 or 12 units of credit at Level 1 and the remainder at Upper Level. Upper Level courses must include no more than 12 units of credit at the PHIL2000 level, at least 24 units of credit in PHIL2100 courses or above, including PHIL3910 Advanced Philosophy Seminar. Students must also normally have a grade average of at least 70 per cent in their Philosophy courses, including at least one Distinction result. The School recognises that the particular overall programs of some students enrolling in Combined Honours (Research) might be such as to make it desirable to vary the Philosophy course requirements for admission. Students are invited to consult the School about this matter with regard to their particular situations.

Subject to approval of the School, which considers the individual courses nominated by a student and the student's overall program in Philosophy, a student may be permitted to count up to 6 units of credit offered outside the School toward satisfying the Honours entry requirements.

Level 1

- PHIL1007 Knowledge and Reality
- PHIL1008 Ethics and Society
- PHIL1010 Thinking about Reasoning
- PHIL1014 Introduction to European Philosophy

Upper Level

- PHIL2001 Logic
- PHIL2002 Ways of Reasoning
PHIL2005 20th Century European Philosophy  S2  
PHIL2008 Issues in Applied Ethics  S1  
PHIL2020 Philosophy of Language  S2  
PHIL2109 Contemporary Metaphysics  S1  
PHIL2206 Philosophy of Mind  S1  
PHIL2207 Philosophy of Psychology  S2  
PHIL2208 Contemporary Epistemology  S1  
PHIL2218 Foundations of Artificial Intelligence  S1  
PHIL2309 Introduction to Hegel  S1  
PHIL2310 Heidegger  S2  
PHIL2316 Philosophy of Religion  S1  
PHIL2416 Nietzsche and Philosophy  S2  
PHIL2420 Environmental Ethics  S1  
PHIL2421 Philosophy, Education and Society  S1  
PHIL2424 Human Nature and Technology  S1  
PHIL2510 Political Philosophy: Equality, Freedom and Justice  S1  
PHIL2517 Representation and Sexual Difference  S1  
PHIL2519 Introduction to Chinese Philosophy  S2  
PHIL2520 Aspects of Chinese Thought  S2  
PHIL2708 Reading Option  S1 & S2  
PHIL2709 Ethics and Accountability  S2  
PHIL3910 Advanced Philosophy Seminar  S2  

Honours Level  
PHIL4000 Philosophy Honours (Research) Full-Time  
PHIL4050 Philosophy Honours (Research) Part-Time  
PHIL4500 Combined Philosophy Honours (Research) Full-Time  
PHIL4550 Combined Philosophy Honours (Research) Part-Time  

Philosophy of Science  
Coordinator: Anthony Corones, School of History & Philosophy of Science  
Office: Room LG24, Morven Brown Building  
Tel: (02) 9385 2357  
Email: a.corones@unsw.edu.au  

The Philosophy of Science program is jointly taught by the School of Philosophy and the School of History and Philosophy of Science. It is designed to provide a coherent sequence of courses both for students who wish to prepare themselves for undertaking advanced study within the areas of logic, methodology and philosophy of science, and those who merely wish to deepen their comprehension of the course matter of a major in another field. While a second major may be taken in any discipline available, the program is designed in such a way that students can pursue a second major in either Philosophy or History and Philosophy of Science.

A major sequence is made up of not less than 36 units of credit. Students should note, however, that they may not ‘double-count’ courses towards a second major and they must satisfy general Faculty regulations. Students may also need to meet certain prerequisite requirements within the program. The program given below may be varied by the Coordinator.

Level 1  
6 units of credit obtained from one of the following courses:  
HPSC1100 Cosmos and Culture  
HPSC1200 Science, Good, Bad and Bogus  
PHIL1007 Knowledge and Reality  
PHIL1008 Ethics and Society  
PHIL1010 Thinking about Reasoning  
PHIL1011 Minds, Bodies and Persons#  

Upper Level  
18 units of credit obtained in the following courses:  
HPSC2200 Philosophy of Science  
HPIL2001 Logic  
HPIL3200 Topics in the Philosophy of Science  
or  
PHIL2107 Advanced Philosophy of Science#*  
or  
PHIL2117 Philosophical Logic#*  
12 units of credit obtained in the following:  
HPSC2100 The Scientific Revolution#  
HPIL2600 Galileo, Science and Religion  
HPIL2610 Computers, Brains and Minds  
HPIL3200 Topics in the Philosophy of Science  
PHIL2107 Advanced Philosophy of Science*  
PHIL2116 Scientific Method#  

PHIL2117 Philosophical Logic#*  
PHIL2118 Philosophy and Biology#  
PHIL2206 Philosophy of Mind  
PHIL2207 Philosophy of Psychology  
PHIL2208 Contemporary Epistemology  
PHIL2218 Philosophical Foundations of Artificial Intelligence  

*Students may not count the same course toward satisfaction of both the 12 units of credit requirement and the 18 units of credit requirement from the above list.  
# Not offered in 2006.  

Physics  
Coordinator: A/Prof G Morriss  
Tel: (02) 9385 4353  
Email: info@phys.unsw.edu.au  
Website: www.phys.unsw.edu.au  
The School of Physics is in the Faculty of Science. The 1st Year Office is in Room LG03, Old Main Building. Enquiries about Upper Level courses are dealt with by the Physics Friend, School Office, Room 62, Old Main Building.

Level 1  
PHYS1111 Fundamentals of Physics  
PHYS1211 Physics 1A  
PHYS1221 Physics 1B  

Upper Level  
PHYS2010 Mechanics  
PHYS2020 Computational Physics  
PHYS2030 Laboratory A  
PHYS2040 Quantum Physics  
PHYS2050 Electromagnetism  
PHYS2060 Thermal Physics  
PHYS2160 Astronomy  
PHYS2170 The Search for Life Elsewhere in the Universe  
PHYS2410 Biophysics 1  
PHYS2630 Electronics  
PHYS2801 Atmospheric Science  
PHYS2810 Atmospheric Physics  
PHYS3020 Statistical Physics  
PHYS3030 Quantum Mechanics  
PHYS3210 Quantum Mechanics  
PHYS3230 Electromagnetism  
PHYS3630 Electronics  
PHYS3710 Lasers and Applications  
PHYS3720 Optoelectronics  
PHYS3770 Laser and Spectroscopy Laboratory  
PHYS3780 Photonics Laboratory  

Note: Physics is not available as a major sequence within the Faculty of Arts and Social Sciences.

Political Economy  
Coordinator: Dr George Argyrous, School of Social Science and Policy  
Office: G23, Morven Brown Building  
Email: g.argyrous@unsw.edu.au  
Website: http://www.arts.unsw.edu.au/futurestudents/undergraduate/politicaleconomy.html  
The major in Political Economy consists of seven courses, each of 6 units of credit, for a total of 42 units of credit with at least 12 units of credit from the 3000 level.

First year  
PECO1000 Introduction to Political Economy  S1  
PECO1001 Australia in the Global Economy  S2  

Upper Level  
PECO2000/  
SLS2000 Political Economy and the State*  S1  
PECO3000 Political Economy  S2  

Bachelor of Arts  
BA students majoring in Political Economy must complete the core courses PECO1000, PECO1001, PECO2000 and PECO3000. They must also
complete any three courses from the list of electives below including at least one 3000 level course.

**Bachelor of Social Science**

Students majoring in Political Economy as part of the Bachelor of Social Science must complete the core courses PECO1000, PECO1001 and PECO3000. Students must also select four courses from the list of electives below including at least one 3000 level course.

* Please note that students who complete SLSP2000 cannot enrol in PECO2000, and vice versa.

**Electives**

- ARTS2000: Arts and Social Sciences Internship
- COMD2000: The Theory and Practice of Development (SLSP2701)
- COMD2050: Sustainable Development, Globalisation and the Third World (HPSC2550)
- ECON3109: Economic Growth, Technology and Structural Change
- ECON3110: Development Economics
- ECON3120: Economic Reasoning
- EURO2600: European Integration
- HIST2047: Winners and Losers: Poverty, Welfare, Justice in Australia
- POLS2023: Globalisation and Uneven Development
- POLS2040: Politics and Business
- PURNS2049: Asia and the International Political Economy
- POLS3047: Theories of the Market and its Critics
- POLS3054: Theorising International Political Economy
- SOCA2103: Globalisation and Fragmentation
- SOCA2104: Technology, Work, Culture
- SOCA3604: Gender, Work and Employment

**Honours**

Students who have completed 48 units of credit in Political Economy, including all compulsory courses, at a good credit average, may be admitted to a Combined Honours program. They must also have met the requirements for a single Honours program in one of the Schools or Departments teaching in the Bachelor of Arts program. For Combined Honours, students are required to present a thesis as approved by the Heads of the participating Schools or Departments.

**Combined Political Economy Honours (Research)**

- Full-time: PECO4500
- Part-time: PECO4550

**Politics and International Relations**

- Coordinator: Professor Gavin Kitching
- Administration: Pat Hall-Ingrey & Samantha Prats
  - Tel: (02) 9385 7876
  - Email: p.hall-ingrey@unsw.edu.au & s.prats@unsw.edu.au
- School Email: politics_ir@unsw.edu.au
- School Office Fax: (02) 9385 1555
- Website: http://politics-ir-arts.unsw.edu.au/

The School of Politics and International Relations is concerned with the study of political action, ideas, institutions and actors, from the local to the global. It deals with governments and how policies are made on a wide range of issues, such as the economy, the environment, and social issues. It explores ideas and the important thinkers who have helped shape political beliefs. It analyses different political systems, cultures and societies. It also covers the study of International Relations, in theory and practice, the global economy, international law, regionalism and institutions such as the United Nations. Our objective is to describe, analyse and understand the politics of our own country, of other countries and of the global community, as well as evaluate ideas about politics.

**Major Sequence**

Any student who wishes to gain a major sequence in Politics and International Relations must obtain 6 Level 1 and 36 Upper Level (or 12 Level 1 and 30 Upper Level) units of credit including 12 units of credit in POLS3### courses in Politics and International Relations.

**Level 1**

Normally students take only one Level 1 course in each session. Students cannot count more than 12 units of credit from Level 1 Politics and International Relations courses towards their degree.

- POLS1002: Power and Democracy in Australia
- POLS1003: Australian Political Practice
- POLS1005: Politics and Crisis: An Introduction to Western Political Theory

**POLS1013**: Thinking about Politics
**S1**

**POLS1017**: International Relations in the 20th Century
**S1**

**POLS1020**: International Relations: Continuity and Change
**S2**

**Upper Level**

Courses commencing with the numbers POLS2### have as their minimum prerequisite 36 units of credit; those commencing with the numbers POLS3### are advanced Upper Level lecture courses and require 36 units of credit including 6 units of Politics and International Relations at Credit level; while those commencing with the numbers POLS30### and POLS39### are Upper Level seminar courses and require at least a 65% average in 18 units of Politics and International Relations.

**Upper Level Lecture Courses**

- POLS2003: The Political Development of Contemporary China
- POLS2008: Power and Policy in Australian Politics
- POLS2020: Sex, Human Rights and Justice
- POLS2023: Globalisation and Uneven Development
- POLS2024: Theories and Concepts of International Relations
- POLS2036: Political Development in Northeast Asia
- POLS2037: International Law: Power, Politics and Ideology
- POLS2040: Politics and Business
- POLS2041: Sexuality and Power: The Social Relations of Sex and the Sexes
- POLS2043: Free Speech
- POLS2046: Political Rhetoric
- POLS2048: International Security

**Pre-Honours Seminar Courses**

- POLS3943: US Hegemony and International Law
- POLS3948: Language, Satire and Politics
- POLS3952: Sovereignty, Order and the State

**Upper Level Seminar Courses**

- POLS3045: Politics and Policy: Theory and Practice
- POLS3024: Australian Foreign Policy
- POLS3040: Early Political Texts
- POLS3054: Theorising International Political Economy

**Honours Level**

Coordinator: Dr Katherine Gelber
- Email: k.gelber@unsw.edu.au

For entry to the Politics and International Relations Honours Program (Research) students must normally have completed 54 units of credit (9 courses) at 70% or higher average, including at least 6 Level 1 units of credit and 12 units of credit at 70% or higher from Pre-Honours POLS3### (or equivalent) courses. Courses equivalent to Pre-Honours POLS3### are all those POLS3### courses which had a credit entry requirement and were successfully completed prior to the end of 2005. With the permission of the Head of School, a student may include up to 12 units of credit from related courses in other schools.

**Combined Honours**

The Combined Honours Program allows a student to undertake an Honours year in both Politics and International Relations and another discipline. The normal School of Politics and International Relations entry requirement for a student seeking admission to a Combined Honours Program is 48 units of credit (8 courses) at 70% or higher average in Politics and International Relations, including at least 6 Level 1 units of credit and 12 units of credit at 70% or higher from Pre-Honours POLS3### (or equivalent) courses. Courses equivalent to Pre-Honours POLS3### are all those POLS3### courses which had a credit entry requirement and were successfully completed prior to the end of 2005. With the permission of the Head of School, a student may include up to 12 units of credit from related courses in other schools.

**Psychology**

The School of Psychology is in the Faculty of Science.
- Coordinator: Professor Peter Lovibond
- School Office: Room 1011, Mathews Building
- Tel: (02) 9385 3041
- Email: Enquiries@psy.unsw.edu.au
- Website: www.psy.unsw.edu.au
Psychology is the scientific study of human behaviour. It is a diverse discipline that includes study of the processes of perceiving, learning and memory; the assessment of abilities and attitudes; the origins of personality and emotional states; the nature and effects of social interactions with other people; brain-behaviour relationships; and the causes of abnormal behaviour. Study in the scientific discipline of psychology provides the background necessary for further training in the application of psychology in a variety of professional contexts (see below for details about the requirements for registration as a professional psychologist).

Psychologists work in clinical, correctional, counselling, legal, educational and other professional settings. People with training in psychology also pursue careers in diverse areas including academic and health research; rehabilitation; occupational health and safety; advertising and marketing; and personnel selection, training and management.

Students enrolled in the Bachelor of Arts or the Bachelor of Social Science degrees can study psychology for one or two years in order to learn about themselves and other people, develop analytic skills and enhance their employability. Psychology can also be taken as a major sequence within these degrees and is an ideal complement to majors in other domains when an understanding of the nature and causes of human behaviour is relevant to your chosen profession.

Students should be aware that a Psychology major sequence in the Bachelor of Arts or Bachelor of Social Science degrees does not satisfy the requirements for an “accredited three-year sequence in Psychology” as described below. To satisfy these requirements, students must complete three courses in addition to the major sequence.

It is not possible to satisfy the requirements for entry to Honours in Psychology within the Bachelor of Arts or Bachelor of Social Science degrees, but students with this goal can apply to transfer to the Bachelor of Psychology at the end of Stage 2. Students with this aim should consult with the School of Psychology for advice about program selection.

What is required to become a professional psychologist?

To become a member of the professional body, the Australian Psychological Society, and for registration as a psychologist in NSW, students first need a university Bachelor degree which includes an accredited three-year sequence in psychology as approved by the Australian Psychological Society, plus an approved fourth year. Students must also follow this by completing an accredited 5th and 6th year academic program such as one of the Master of Psychology degrees (Clinical, Forensic or Organisational) or a combined Doctor of Philosophy/Master of Psychology degree as offered by this University. An alternative of two years of supervised experience in professional practice may be undertaken for registration as a psychologist in NSW.

English Proficiency

A high proficiency in English is necessary to pass Psychology courses.

Major Sequence

A major in Psychology is obtained by the completion of 42 units of credit (7 courses) which consist of PSYC1001 and PSYC1011, PSYC2001, and four other Psychology Upper Level II or Level III courses (either one Level II and three Level III, or two Level II and two Level III).

An accredited three-year sequence in Psychology is obtained by the completion of 60 units of credit (10 courses) which consist of PSYC1001 and PSYC1011, PSYC2001 and three other Psychology Upper Level II courses, and PSYC3001 and three other Psychology Upper Level III courses including one course from at least two of the following three elective groups: Advanced Perceptual-Cognitive – PSYC3151, PSYC3211, PSYC3221, PSYC3311, PSYC3321; Advanced Biological – PSYC3051, PSYC3241, PSYC3251, PSYC3261; Advanced Social – PSYC3121, PSYC3271, PSYC3281.

Russian Studies

Coordinator: Dr Ludmila Stern
Tel: (02) 9385 3649
Email: russian@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/russian.html

Russian Studies is available as a major in Arts and also to students of all faculties as a co-major, minor, elective/option, General Education unit or as a major in the Diploma in Languages. Russian Studies offers a range of courses designed to develop an informed understanding of Russia and the former Soviet Union through the study of Russian language, literature, civilisation and history. Russian language courses cater both for complete beginners and also for advanced or native speakers. Although language study is required for a major sequence in Russian Studies, several of the Upper Level courses require no knowledge of the Russian language and can be taken by students from other schools interested in learning about Russian literature, society and history.

Note: Students with any proficiency in Russian must consult the staff in Russian Studies prior to enrolment, unless they have taken Russian in the previous session at UNSW. Please see: http://languages.arts.unsw.edu.au/main/placetest.html

Major Sequence

Major sequences require 42 units of credit in Russian Studies. It requires (1) 12 units or more from the language core; (2) the completion of RUSS2112 or higher (3) the completion of 18 units or more from upper level electives. Students are advised to consult with the Russian Studies staff to plan their program.

Honours Level

Entry into the Honours program requires 54 units of credit in an approved sequence with an average of at least 70% or better in Russian courses or 48 units of credit in an approved sequence with an average of at least 70% or better for entry to the Combined Honours program.

Social Science and Policy

Coordinator: Dr Rogelia Pe-Pua, School of Social Science and Policy
School Office: Room G30, Morven Brown Building
Tel: (02) 9385 2292
Email: slsp@unsw.edu.au
Website: http://slsp.arts.unsw.edu.au

The School of Social Science and Policy offers programs in social science and policy studies. These include the core program in the Bachelor of...
Social Science degree, Bachelor of Social Science in Criminology and a major sequence in Policy Studies in the Bachelor of Arts degree.

The programs offered are interdisciplinary, drawing from all the social sciences to achieve an integrated social scientific approach to many of the key issues and problems facing societies today. They encourage and cultivate creativity and a critical perspective and develop skills in conducting research and in the application of social science to the policy process.

Special emphasis is placed on familiarising students with the ways in which social science is put into practice by using case studies drawn from current projects being undertaken or commissioned by governments, non-government and private sector organisations. The School aims to equip graduates with the skills and knowledge necessary to plan and conduct social research projects and to hold responsible positions in policy analysis and social research in either the public or private sectors.

The Bachelor of Social Science combines a core program of study in social science, policy analysis and research methods with a major study in a particular social science discipline.

The core program aims to provide students with skills in undertaking social research particularly in an applied policy setting. These include written communication skills with particular emphasis on reports, submissions, position papers and proposals; the ability to undertake research and data analysis, both quantitative and qualitative; analysis and critical evaluation of research, arguments and policies; and the use of computers in social research and information processing.

The major study aims to equip students with a knowledge base in one of the social sciences.

The Core Program in the Bachelor of Social Science

The core program is a 48 unit credit sequence consisting of eight courses taken over three years.

SLSP1000 Social Science and Policy
SLSP1002 Introduction to Policy Analysis
SLSP1001 Research and Information Management
SLSP2000 Political Economy and the State
SLSP2001 Applied Social Research 1
SLSP2002 Policy Analysis Case Studies
SLSP3000 Social Theory and Policy Analysis
SLSP3001 Applied Social Research 2
SLSP3002 Social Science and Policy Project

Major Sequence in Policy Studies in the Bachelor of Arts

This sequence is designed for students enrolled in the Bachelor of Arts degree who wish to major in Policy Studies without completing the full Social Science and Policy core program including all the research methods courses. It would be suitable for students seeking employment in policy work which does not involve a substantial research component.

The major sequence in Policy Studies consists of at least 42 units of credit in courses offered by the School of Social Science and Policy of which no less than 6 and no more than 12 units of credit must be from Level 1 courses and no more than 6 units of credit from approved courses offered by other schools. Students should consult the School for a list of these approved courses.

Honours Level

The BSocSc Honours degree may be taken in two ways. All programs require completion of fourth year seminars and a substantial research project:

1. Social Science and Policy Honours, with a Major in an approved area

Prerequisite: Completion of the minimum requirements for a BSocSc Pass degree including the 48 units of credit BSocSc core program, SLSP3911 Inquiry and Interpretation in the Social Sciences, and a Major concentration in an approved area, both with a good Credit or better average.

2. Combined Social Science and Policy Honours (Research)

Prerequisite: Completion of the minimum requirements for a BSocSc Pass degree including the 48 units of credit BSocSc core program, SLSP3911 Inquiry and Interpretation in the Social Sciences or equivalent in the relevant school, and the prerequisites for Combined Honours in the school/department in which the student has taken an approved Major concentration, both at a level of performance determined by the relevant course authorities.

Honours in Policy Studies in the Bachelor of Arts

Entry to honours in Policy Studies requires completion of 54 units of credit with a Credit or better average in courses offered by the School of Social Science and Policy, including at least 6 Level 1 units. The 54 units of credit may include up to 12 units of credit taken from approved courses offered by other schools and must include the following:

SLSP2000 Political Economy and the State
SLSP2002 Policy Analysis Case Studies
SLSP3000 Social Theory and Policy Analysis
SLSP3911 Inquiry and Interpretation in the Social Sciences

Level 1

SLSP1000 Social Science & Policy
SLSP1001 Research & Information Management
SLSP1002 Introduction to Policy Analysis

Upper Level

SLSP2000 Political Economy and the State
SLSP2001 Applied Social Research 1
SLSP2002 Policy Analysis Case Studies
SLSP2711 The Theory and Practice of Development
SLSP2820 Crime and Punishment in Historical Perspective
SLSP3000 Social Theory and Policy Analysis
SLSP3001 Applied Social Research 2
SLSP3002 Social Science and Policy Project

Advanced Upper Level Course

SLSP3911 Inquiry and Interpretation in the Social Sciences

Honours Level

SLSP4000 Social Science and Policy Honours (Research) Full-Time
SLSP4050 Social Science and Policy Honours (Research) Part-Time
SLSP4100 Policy Studies Honours (Research) Full-Time
SLSP4150 Policy Studies Honours (Research) Part-Time
SLSP4500 Combined Social Science and Policy Honours (Research) Full-Time
SLSP4550 Combined Social Science and Policy Honours (Research) Part-Time

Social Work

Coordinator: Professor Richard Hugman
School Office: Room 1519, Mathews Building
Administrative Assistant: Maggie O’Keeffe
Email: Social.Work@unsw.edu.au
Website: http://socialwork.arts.unsw.edu.au

At the undergraduate level, the School of Social Work offers programs leading to the award of the degree of Bachelor of Social Work, and the combined degrees of Bachelor of Social Work/Bachelor of Laws, Bachelor of Social Work/Bachelor of Arts and Bachelor of Social Work/Bachelor of Social Science.

Bachelor of Social Work

The BSW degree (program 4031) is designed to prepare students for the professional practice of social work. It is expected to be undertaken as a four year full-time program, although part-time enrolment can be negotiated. The Honours program is available to students who have achieved appropriate results.

The aim is to produce a social worker who has a general foundation for continuing professional learning, and can undertake independent professional practice at a basic level of competence, utilising relevant knowledge and skills in accordance with the profession’s values. Some courses are subject to prerequisite and corequisite requirements.

*Students outside the School of Social Work may take these as electives.
**Students who have gained entry to the 2nd year of the program with a Welfare Diploma must complete this course.

Bachelor of Social Work Bachelor of Arts
The School also offers a combined Bachelor of Social Work/Bachelor of Arts. This is a five year program leading to the award of the two degrees of Bachelor of Social Work and Bachelor of Arts. An Honours program is available to students who have achieved appropriate results.
For details regarding the Bachelor of Social Work/Bachelor of Arts program, refer to the section ‘Program Rules and Information’.

Bachelor of Social Work Bachelor of Social Science
The School also offers a combined Bachelor of Social Work/Bachelor of Social Science. This is a five year program leading to the award of the two degrees of Bachelor of Social Work and Bachelor of Social Science. An Honours program is available to students who have achieved appropriate results.
For details regarding the Bachelor of Social Work/Bachelor of Social Science program, refer to the section ‘Program Rules and Information’.

Sociology and Anthropology
Coordinator: Professor Michael Humphrey
School Office: Room 159, Morven Brown Building
Tel: (02) 9385 1807
Email: sociology@unsw.edu.au
Website: http://sociology arts.unsw.edu.au

Sociology is a discipline for students with a special interest in human relationship and the multiplicity of interactive cooperation, conflict and communication which constitutes any society. The School of Sociology and Anthropology offers a diverse program where students may choose courses in sociology, social anthropology, cultural theory, cultural studies, sociological approaches to communication and the public media, political sociology and policy-related studies.

Level 1
First year sociology offers a broad introduction to sociology as a profound and productive way of describing, analysing and understanding society. Students commencing their first year in 2006 of studying Sociology and Anthropology can choose between four introductory courses. Those students intending to take a major must do two first year courses. As the course descriptions indicate, Level 1 courses may focus on different societies and cultures, but each is an introduction for university students beginning their study of the discipline and is preliminary and prerequisite for more advanced study in later years of the degree.

SOCN1002 Australian Society  S2
SOCN1004 Relationships: Sociology and Everyday Life  S1
SOCN1005 Australia’s Media: Sociological Perspectives  S2
SOCN1006 Introduction to Globalisation  S1

Major Sequence
Students must complete 42 units of credit in order to gain a major in Sociology, including 12 units of credit in Level 1 courses and at least 12 units at Level 3.
While a major in Sociology consists of 42 units of credit, students may extend their study further and take one or two more sociology courses as part of their program.

Part-time (Evening) Study
Part-time and evening students are advised that the School teaches selected first year and Upper Level courses in the evening. It is possible to complete a major in Sociology by attending evening classes.

Upper Level Courses
SOCN2113 Globalisation and Fragmentation  S2
SOCN2104 Technology, Work, Culture  S1
SOCN2106 Cities: Experiencing Sydney  S1
SOCN2108 Social Anthropology: Diversity, Difference, Identity  S1
SOCN2110 Anthropology: Identity and the Cinema  S2
SOCN2204 Anthropology Research Fieldwork  S2
SOCN2205 Society and Desire  S2
SOCN2206 Embodiment  S2
SOCN3103 Professions  X2
SOCN3104 Global Migration, Global Refugees  S1
SOCN3123 Oceanic Societies: Pacific Island Living  S1
SOCN3206 Anthropology of Celebration  S2
SOCN3208 Colonisation and Indigenous Identity Formation  S1
SOCN3209 Indigenous Australia: Gendered Identities  S2
SOCN3210 Whitness – Beyond Colour: Identity and Difference  S1
SOCN3211 Development and Modernity  S2
SOCN3212 Environment, Society and Culture  S1
SOCN3301 Critical Reason: Modern Sociological Theory  S1
SOCN3407 Australian Migration Issues  X1
SOCN3409 Crime, Gender and Sexuality  X1
SOCN3410 Deviance  X2
SOCN3411 Forensic Sociology  S1
SOCN3403 Quality of Life  S1
SOCN3607 Sociology of Ageing  S1
SOCN3702 Social Power: Theories and Structures  S1
SOCN3703 Nationalism, Citizenship and Cultural Identity  S2
SOCN3806 Medicine, the Body and Culture  S1
SOCN3912 Risk and Trust in Modern Society  S2

Honours Program
Honours in Sociology and Anthropology requires a further year of study after completing the requirements for a Pass degree including a more concentrated study of Sociology in second and third year. Students who are achieving good grades are encouraged to plan a four-year program leading to an Honours degree in Sociology and Anthropology.
The last year of studying for an Honours degree is directed to students’ development of research and writing skills which will prepare them for entering a career or proceeding to postgraduate research studies. The experience will provide skills in critical thinking, research and writing that will be invaluable in future pursuits, whether academic or otherwise.
Honours Entry
Prior to enrolment in the Honours year, students must have:

- completed up to 54 units of credit in Sociology, including no more than two Level 1 Sociology courses;
- achieved an average of 70%.

All students should consult with any of their lecturers during the second year of enrolment about the Honours year and the courses to be taken in preparation for that enrolment.

Combined Honours Entry
Students may also undertake a combined Honours program in Sociology and another approved discipline. Prior to enrolment in the Honours year, students must have:

- completed up to 48 units of credit in Sociology, including no more than two Level 1 Sociology courses;
- achieved an average of 70%;
- completed the requisite number of units of credit at a standard set by the other School in the combined Honours program.

Honours Level
SOCA4000 Sociology Honours (Research) Full-Time
SOCA4050 Sociology Honours (Research) Part-Time
SOCA4500 Combined Sociology Honours (Research) Full-Time
SOCA4550 Combined Sociology Honours (Research) Part-Time

Spanish and Latin American Studies
Coordinator: Dr Peter Ross
Tel: (02) 9385 2421/2418
Email: p.ross@unsw.edu.au
Website: http://languages.arts.unsw.edu.au/spanish/spanish.html

The Department of Spanish and Latin American Studies offers a major in the Faculty of Arts and Social Sciences. Major sequences may be followed in language, literature, cultural studies and/or history. Spanish is also available to students of other faculties as a co-major, minor, elective or as a major in the Diploma in Languages. A major in Spanish and Latin American history may be completed with no knowledge of Spanish but a reading knowledge of the language is a prerequisite for entry to the Honours year.

Major Sequences

1. Language courses

- Elementary Level
  - SPAN1001 Introductory Spanish 1A
  - SPAN1002 Introductory Spanish 1B

- Intermediate
  - SPAN2003 Intermediate Spanish A
  - SPAN2004 Intermediate Spanish B

- Advanced
  - SPAN3003 Advanced Spanish A
  - SPAN3004 Advanced Spanish B

2. Literature, Cultural Studies, and Linguistics Upper Level Courses

- SPAN3040 Spanish Linguistics
- SPAN3539 Latin American Culture and Globalisation: From Macondo to McOndo
- SPAN3343 Topics in Latino American Cinema
- SPAN3345 Spanish as a World Language

3. History Stream

A major in History in the Department requires 42 units of credit including SPAN2428 and SPAN3401.

Year 1

SPAN1001 and SPAN1002, or other approved 12 units of credit in Level 1 courses from History, Economic History, Development Studies, Politics and International Relations, and Sociology and Anthropology.

Year 2 and 3

SPAN2428 and SPAN3401 +18 Upper Level units of credit from the Department’s history, literature/cultural studies/linguistics/language options (entry to these courses may require a certain level of fluency in the Spanish language).

Upper Level History Courses

- SPAN2406 Modern Spain: From Loss of Empire to European Integration
- SPAN2421 Special Topic in Latin American History 1
- SPAN2425 The Americas Before Columbus
- SPAN2428 (Un)Making the Third World:
  - History and Global Development B
  - History and Global Development A
- SPAN2431 The United States and Changing Global Orders
- SPAN3401 Colonising the Americas:
  - The Spanish and Portuguese Empires
  - Special Topic in Latin American History 2

Honours Entry

Prerequisite: At least 54 units of credit in SPAN courses or other approved courses at a Credit level of 70% or better. Students are reminded that they must have a proven reading competence in Spanish before they can be admitted to an Honours program. Honours theses may be written in English or Spanish.

Students thinking of doing Honours can consult any member of staff at any time during their undergraduate years and should obtain the advice and approval of the Head of Department in the third year of study prior to enrolment.

Combined Honours Entry

Prerequisite: At least 48 units of credit in SPAN courses or other approved courses at a Credit level of 70% or better. Students wishing to undertake study at Honours Level in Spanish and Latin American Studies and another discipline should enrol in SPAN4500 Combined Honours (Research).

Honours Level

- SPAN4000 Spanish and Latin American Studies Honours Full-Time
- SPAN4050 Spanish and Latin American Studies Honours Part-Time
- SPAN4550 Combined Spanish and Latin American Studies Honours Part-Time

Surveying and Spatial Information Systems

Coordinator: Professor Chris Rizos
School Office: Room 426, Electrical Engineering
Email: l.daras@unsw.edu.au
Tel: (02) 9385 4182
Website: www.gmat.unsw.edu.au

The School of Surveying and Spatial Information Systems offers two Upper Level courses in the Faculty of Arts and Social Sciences. The courses (listed below) are of particular interest to students majoring in Environmental Studies or other majors where knowledge of mapping, geographic information and its analysis is increasingly required. Many decisions made on future developments in the community will affect the environment. To be able to manage these developments, knowledge of the relative positions of objects and features on the terrain will be required.

GMAT3500 covers the acquisition and analysis of images from air and space for determining details of features and terrain cover types and GMAT0753 deals with the management and analysis of spatial data. Excellent facilities are available in the School for these courses. Further details can be obtained from the School.

The courses involve an integrated approach to the acquisition, analysis, storage, distribution, management and application of spatially-referenced data. The School also offers other courses that embrace the traditional area of surveying and mapping, as well as the comparatively new fields of remote sensing and spatial information systems.

Fields of specialisation within Surveying and Spatial Information Systems, also known as Geomatics, include: Satellite Surveying (position determination techniques using satellite signals); Geodesy (determining the mathematical model of the Earth, and its gravity field, and the practice of control network surveying); Engineering Surveying (precise surveying for engineering projects); Cadastral Surveying (knowledge of the laws and practices for survey of property boundaries); Land Management and Development (environmental assessment and design for resource...
management and change of land use); Land Information Management (the use of computer-based information systems of spatially related data for planning and administration purposes); Geographic Information Systems (computer-based information systems for environmental assessment and monitoring); Photogrammetry and Remote Sensing (the use of airborne and spaceborne equipment to remotely sense images for mapping, monitoring and resource surveys).

**Upper Level**

GMAT0753 Introduction to Spatial Information Systems  
GMAT3500 Photogrammetry & Remote Sensing

**Note:** Surveying is not available as a major sequence within the Faculty of Arts and Social Sciences.

**Women's and Gender Studies**

**Coordinators:** Dr Elizabeth McMahon and Dr Brigitta Olubas, School of English  
**Office:** Room 145, Morven Brown  
**Tel:** (02) 9385 2298  
**Email:** womenstudies@unsw.edu.au  
**Website:** www.arts.unsw.edu.au/womenstudies/

The undergraduate program in Women's and Gender Studies enables students to construct an interdisciplinary major focusing on feminist scholarship, debates and issues and the study of women, gender and sexualities. The Level 1 core course WOMS1001: Introduction to Feminism, convened by the Coordinators is designed to introduce students to some central preoccupations of feminist theorising from a range of perspectives and positions. Other Level 1 and Upper Level courses are taught and administered through different Schools in the Faculty and offer a range of disciplinary and interdisciplinary approaches.

**Major Sequence**

Women's and Gender Studies may be taken as a major sequence. This requires the completion of a total of 42 units of credit in Women's and Gender Studies approved courses (listed below). Students must complete the program's introductory core course at Level 1, WOMS1001, as well as two further core courses. The remaining 24 units of credit (or 4 courses) may be selected either from other core offerings or from the list of electives.

**List A**

**Level 1 Core Courses**

WOMS1001 Introduction to Feminism  
WOMS1003 Women, Gender and World History

**Upper Level Core Courses**

WOMS2001 Twentieth Century Women Writers*  
WOMS2002 Gender, Race, Nature and Reason*  
WOMS2003 A History of Sexualities  
WOMS2004 Sex, Human Rights and Justice  
WOMS2005 Society and Desire  
WOMS2006 Sexuality and Power: The Social Relations of Sex and the Sexes  
WOMS2104 Women and Men: Gender in Australia*  
WOMS2105 Women in Southeast Asian Societies*  
WOMS2106 Embodiment  
WOMS3005 Australian Masculinities: Reading Gender, Sex and Culture*  
WOMS3006 Crime, Gender and Sexuality

**List B**

**Upper Level Electives**

**Honours Entry**

Students who have met the requirements for a major in Women's and Gender Studies may apply to be admitted to a Combined Honours Program in Women's and Gender Studies together with an approved discipline (from the A, B or C lists). The normal requirement for a student seeking admission to a Combined Honours Program is 48 units of credit in approved WGS courses (including WOMS1001 and 2 Upper Level core courses) at 70% average or better. Students may request to substitute up to 6 units of credit of the Women's and Gender Studies component with other courses particularly relevant to their proposed topic areas. This will be decided at the discretion of the Program Coordinator. When a student undertakes Combined Honours, arrangements are made between the relevant Schools or programs to determine, in conjunction with the student, the thesis topic, the Honours courses undertaken and the supervisors. In the case of WGS, students would be expected to do either one 2 hour per week seminar or a reading program for one session (see WOMS4500 or WOMS4550) in addition to a thesis on an approved topic, with joint supervision, if appropriate.

**Honours Level**

WOMS4550 Combined Women's and Gender Studies Honours (Research) Part-Time
Faculty of the Built Environment

A Message from the Dean

Welcome to the Faculty of Built Environment (FBE) at UNSW. I hope you find the information in this Handbook helpful in understanding the programs offered in our Faculty. The structure of FBE is unique in Australia in the range of disciplines it offers including Architecture, Building, Industrial Design, Interior Architecture, Landscape Architecture and Planning & Urban Development. FBE is structured to encourage synergy between the disciplines and flexibility for students in the range of courses they can take. Students have the opportunity to gain both expertise in their chosen disciplines and to become familiar with the concepts and ideas of the other disciplines in the Faculty. In reading this Handbook you will discover the wide range of courses on offer.

The undergraduate and postgraduate programs offered by the Faculty are well established and well regarded by employers. Each program integrates the academic knowledge and practical skills required for professional practice. Undergraduate students also have the option of selecting from a number of combined degrees offered in conjunction with other faculties.

Around 20 per cent of our students are international students. FBE has a reputation for the excellence of its staff and students and is professionally recognised nationally and internationally. The Faculty receives strong industry support and extensive international academic links provide opportunities for exchange and collaboration in learning and research.

If you have further questions after reading through this Handbook, please do not hesitate to obtain advice from your lecturers and from the Faculty administrative staff at all stages of your study. You may also wish to visit FBE's website at: www.fbe.unsw.edu.au

Faculty Information and Assistance

Who Can Help?

This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of the Built Environment.

If you require advice about enrolment, degree requirements, progression within programs, information and advice about course content and requirements, contact the Faculty Student Centre, Level 3, Red Centre Building.

To speak to any of the Undergraduate Program Heads, you need to make an appointment through the Undergraduate Programs Office located on Level 4, Red Centre Building.

For assistance with access to the computing resources of the Faculty, please visit the Built Environment Computing Unit office located in room 2032, Level 2, Red Centre Building.

The Faculty of the Built Environment Website

Please refer to the Faculty website for further information. The website provides detailed information on the Faculty's programs, staff, research and events as well as exhibits of student work and an extensive online learning resource. Here you will find ready information on almost any matter that affects your life within the FBE: www.fbe.unsw.edu.au

The Faculty

The Faculty of the Built Environment offers the following undergraduate degree programs: BArch, BSc(Arch), BIA, BBCM, BlindDes, BArch and BPlan. These programs provide professional education in the fields of architecture, industrial design, building, quantity surveying, interior architecture, landscape architecture and planning. Put more generally, these programs provide education and training in the arts and sciences involved in the design and construction of buildings, in the development of cities, in landscape design and the development of manufactured products. In addition to professional and vocational training, the programs include general education courses to provide graduates with a broad understanding of the humanities and the social sciences. In addition, the Faculty offers a range of combined degrees with other faculties such as Arts and Social Sciences, Law and the Institute of Environmental Studies.
Course Descriptions
Descriptions of courses offered in 2006 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Computing Information
The Faculty has five major computing laboratories containing 80 personal computers available for general use by students in the Faculty. These laboratories are used for teaching formal classes, as well as providing general network and computing access for students 24 hours a day. The computers are higher end PC workstations configured to support a wide range of applications including: CAD, modelling, rendering, visualisation, multimedia presentations, GIS, analysis, general office applications and much more. The Faculty’s Resource Centre and Postgraduate labs add a further 40 computers to this mix which is complemented by the student accessible wireless networking in and around the Faculty.

These laboratory resources are supported by a range of devices and services from standard printers, plotters and scanners to notebooks, digital cameras and projectors for presentations. The Faculty offers a printing service providing large format colour printing, photo-quality output and laminating. This will allow student presentations to exceed professional quality. The labs provide an environment where the computing technology can be utilised throughout the wide range of courses offered across the Built Environment’s disciplines.

All these computers are connected to the Campus Wide Network, providing secure and reliable file storage, access for students to the information resources supported by the Faculty and the University generally, as well as the international resources of the Internet.

Student Ownership of Personal Computers
The Faculty encourages all students to consider the purchase of a personal computer to support their studies. The prevailing policy is that the Faculty endeavours to provide for the high-end computing needs of students in the belief that many students are able to meet their own needs for more basic applications. To that end, the Faculty publishes a document which is available on the website, providing advice to students regarding the purchase of personal computers, software and network connectivity.

Enrolment Procedures
All students re-enrolling in the Faculty will re-enrol online via myUNSW. Instructions can be found on the FBE website.

Faculty Electives
The Faculty offers a broad range of over 100 elective courses that may be selected as part of any of the undergraduate programs. They are also generally available to all students in the University, subject to appropriate prerequisites knowledge. These may be identified in the course descriptions at the end of this Handbook as they all have course codes in the form BENVXXXX. These courses are generally offered in only one session each year and students are advised to check availability and timetabling for these electives on the Faculty website.

In addition, students may take many of the core courses associated with the other programs in the Faculty as electives. Details of these options are explained on the website.

General Education Requirements
The University’s basic requirements are the same for students in all single degree programs.

(a) Students must satisfactorily complete a minimum of 12 units of credit in General Education courses or their equivalent (unless entitled to exemption as prescribed in the University rules). Combined degrees offered with another faculty are deemed to satisfy this requirement within the prescribed program.

(b) Students must undertake 56 hours of study which examine the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. Most programs in the Faculty of the Built Environment fulfill this requirement as part of the normal program curriculum. However, in the case of both the BBCM and BSc(Arch) programs, students are required to take BENV1382 Social Responsibility and Professional Ethics in part fulfillment of this requirement.

Student Exchange
The University has established an extensive and growing number of student exchange programs with universities around the world. The Faculty strongly encourages all students to consider participating in one of the programs for one or two semesters. Contact UNSW Exchange Office for detailed information on course options and scholarships or refer to the website: www.international.unsw.edu.au

Societies and Clubs
The Faculty of the Built Environment has a number of student clubs including BIAS (Bachelor of Interior Architecture Students), TAC (The Architecture Club), BUGS (Building Undergraduate Society), IDSOC (Industrial Design Society), SOLA (Society of Landscape Architects) and OOPS (Organisation of Planning Students).

Faculty of the Built Environment Resource Centre
The Resource Centre is located on the ground floor of the Red Centre Building and serves the day-to-day needs of the staff and students in the Faculty. It provides information services based on both print and electronic resources. The reference collection, which has no lending facilities, consists of textbooks and recommended reading, background information to programs, serials and standards (these being duplicated in the Physical Sciences Library). Unique materials held consist of donations, undergraduate theses, trade catalogues and an open reserve collection of specific materials left by lecturers to supplement program work.

The Resource Centre computers provide access to library catalogues and other online databases, email facilities and the Internet and six of the computers have word processing facilities. Photocopying facilities are also provided.

Assistance is provided by the librarian in using the Centre’s resources and developing information retrieval skills. In addition, a printed guide on how to use the Resource Centre is issued to each student. During Session 1 & 2, the Resource Centre is open from 8.30am to 6.00pm Monday to Thursday, 8.30am to 4.00pm on Friday. Out of session, the Resource Centre is open from 8.30am to 4.00pm Monday to Friday, closed all January, weekends and public holidays.

Faculty Regulations for Undergraduate Study
1. Open Elective courses may be selected from any program offered at the University of New South Wales, provided such course has not been taken to fulfill any other requirement of the Degree Rules. There is a wide range of electives offered within the Faculty. Open electives selected outside the Faculty of the Built Environment are subject to the approval of the Faculty. Open Electives may also be selected from courses offered by other institutions, but only with the approval of the Program Head and at an agreed unit value approved by the Program Head.

2. As a general guide, expected normal student workload is 2 hours per week per unit of credit, including both class contact time as well as individual study, completion of assigned work and exam preparation where appropriate. Students are strongly advised not to over commit themselves to paid work or voluntary activities that will impinge on their studies. Such external commitments will not be taken into consideration in relation to matters such as extensions of time for submission of project work or failure to attend classes or examinations.

3. Where reference is made to the requirement that a student complete units of credit by taking one or more courses, that requirement shall be construed as meaning that the student shall:
   - attend at least 80% of all lectures, studios, tutorials or other classes, including site visits or other activities as may be prescribed in that course, always maintaining a satisfactory standard of preparation for and participation in such classes and activities.
   - perform satisfactorily in such exercises, essays, theses, and other work (whether written, oral or practical) as may be prescribed in that course, and undertake any prescribed reading related to that subject.
   - achieve a satisfactory standard in all examinations and other assessable tasks assigned for that course.

4. In general, students admitted with advanced standing into programs within the Faculty are given units of credit towards the degree for all appropriate courses completed at UNSW or other approved institutions. This is in the form of full session exemptions and/or specified exemptions in particular courses. Such credit will not normally be given for study undertaken more than 7 years before the date of admission to the program, except with the approval of the Program Head.

5. Notwithstanding any advanced standing that may have been granted upon entry to a program, students may seek exemptions in specific courses on the basis of appropriate study or experience. Where such an exemption is granted for study at an approved institution, students are normally awarded the appropriate units of credit, unless such credit
has already been allowed as part of admission with advanced standing. Where the exemption is granted on the basis of knowledge or skills gained through experience, students would normally be required to complete the equivalent units of credit as open electives.

6. In general, progression in all programs offered by the Faculty is managed by individual course prerequisites. Except with the permission of the Program Head, students are required to complete all stated prerequisites before enrolling in any course, and must always repeat any failed course on the next occasion that it is offered.

7. Except with the permission of the Program Head, where two courses are shown as corequisite, they must be taken concurrently on the first occasion any one is attempted.

8. Students wishing to take courses additional to those required for the award should be aware that the relevant courses will attract an additional fee, payable up front.

9. Students may not enrol in two design studios as core courses in any one session.

Program Rules and Information

3255 Bachelor of Interior Architecture

BIA

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Head: Judith O’Callaghan

Program Description

Interior Architecture is the specialist area of architecture concerned predominantly with interior environments. The professional practice of the discipline demands simultaneously a broad theoretical as well as a focused practical education in both the art and science of architecture and design. The interior designer must have a professional understanding and concern for client and community in a seamless integration of the work with all elements of the built environment. (It should be noted that, unlike elsewhere in the world, use of the title ‘Interior Architect’ in Australia is not permitted under current Australian legislation).

The Bachelor of Interior Architecture is a four-year full-time semester-based program consisting of core and elective courses with design as the central concern. The Design Studio is the focus for the application of the theoretical material delivered in all courses in the program as well as developing and presenting its own.

Program Objectives and Learning Outcomes

On completion of the program, students will have attained a sound knowledge base in the field of Interior Architecture.

Program Structure

Year 1

Session One
 INTA2101 Design Studio 1 (6 UOC)  
 INTA2111 Theory 1 (3 UOC)  
 INTA2121 History 1 (3 UOC)  
 INTA2141 Communications 1 (6 UOC)  
 INTA2171 Technology 1 (6 UOC)

Session Two
 INTA2172 Technology 2 (6 UOC)  
 INTA2102 Design Studio 2 (6 UOC)  
 INTA2112 Theory 2 (3 UOC)  
 INTA2122 History 2 (3 UOC)  
 INTA2142 Communications 2 (6 UOC)

Year 2

Session One
 INTA2271 Technology 3 (3 UOC)  
 INTA2201 Design Studio 3 (6 UOC)  
 INTA2211 Theory 3 (3 UOC)  
 INTA2221 History 3 (3 UOC)  
 INTA2241 Communications 3 (3 UOC)  
 General Education/Open electives (6 UOC)

Session Two
 INTA2272 Technology 4 (3 UOC)  
 INTA2202 Design Studio 4 (6 UOC)  
 INTA2212 Theory 4 (3 UOC)  
 BENV1242 Computer-Aided Design (3 UOC)  
 INTA2222 History 4 (3 UOC)

Year 3

Session One
 INTA2371 Technology 5 (3 UOC)  
 INTA2301 Design Studio 5 (6 UOC)  
 BENV1341 Design Modelling and Visualisation (3 UOC)  
 General Education/Open electives (12 UOC)

Session Two
 INTA2372 Technology 6 (3 UOC)  
 INTA2302 Design Studio 6 (6 UOC)  
 INTA2382 Professional Practice 1 (3 UOC)  
 General Education/Open electives (12 UOC)

Year 4

Session One
 INTA2401 Design Studio 7 (6 UOC)  
 INTA2411 Dissertation (6 UOC)  
 INTA2441 Project Research (6 UOC)  
 Open electives (6 UOC)

Session Two
 INTA2402 Graduation Project (15 UOC)  
 INTA2482 Professional Practice 2 (3 UOC)  
 Open electives (6 UOC)

Student Exchange

Students in the BIA program may go on exchange any time after the completion of Year 2.

Honours

The Bachelor of Interior Architecture degree may be awarded with Honours based upon the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Academic Rules

1. The degree of Bachelor of Interior Architecture is awarded at either Pass or Honours level after the successful completion of a minimum of 192 units of credit.

2. To fulfil these requirements, students must complete:
   - 144 units of core courses, being all those prescribed in the Faculty regulations for this program;
   - 18 units of open electives, selected in accordance with the Faculty regulations for undergraduate study in the Faculty of the Built Environment;
   - 18 units of FBE electives, selected in accordance with the Faculty regulations for this program;
   - 12 units of General Education courses in accordance with University requirements.

3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester).

4. General Education courses may not be taken before a student enters Year 2 of the Program.

Professional Recognition

The UNSW degree of Bachelor of Interior Architecture is recognised by the Design Institute of Australia (DIA - the professional body representing Interior Architecture/Interior Design in Australia) and the International Federation of Interior Architects (IFi). Students enrolled in the program are eligible to apply for student membership of the DIA and Associate membership upon graduation. Full membership requires two years of approved professional experience after graduation.

The BIA program at UNSW is also a member of IDEA (Interior Design/Interior Architecture Educators Association) representing all 4 year university degree programs in the discipline in the region.
3260 Bachelor of Architecture

BArch

Typical Duration
5.5 years

Minimum UOC for Award
264 units of credit

Typical UOC per Session
24 units of credit

Program Head: To be advised

Program Description

The Bachelor of Architecture degree provides academic education and practical experience leading to professional qualifications in architecture. It requires full time attendance for five years plus six months work experience that must be completed prior to the Graduation Project. Progression through the program is by years, each comprising two semester-long design studios and their corresponding corequisites. In most years these design studios and corequisites may be taken in either order in any one year to facilitate mid-year entry to the program where required. However courses must be taken in the session they are offered at the first available opportunity. Admission to each year is subject to the successful completion of the preceding design stages and a majority of their corequisite courses, except where approval has been given by the Program Head.

Program Objectives and Learning Outcomes

There are two central goals. The primary goal is to equip students with the theoretical and practical knowledge, skills and techniques needed for the design, documentation and administration of building construction. A more general goal is to provide students with an all-round general problem-solving education. Lectures and practical sessions cover theoretical knowledge in the following areas:

- Architectural Design
- Architectural Communications
- Architectural History and Theory
- Architectural Technology
- Architectural Practice

Program Structure

Year 1

Session One

- ARCH1171 Architectural Technologies 1 (9 UOC)
- BENV1141 Computers and Information Technology (3 UOC)
- ARCH1121 Architectural History and Theory 1 (4 UOC)
- BENV1101 Design Fundamentals: Studio 1 (8 UOC)

Session Two

- ARCH1172 Architectural Technologies 2 (8 UOC)
- ARCH1102 Architectural Design Workshop 1 (8 UOC)
- ARCH1122 Architectural History and Theory 2 (4 UOC)
- ARCH1142 Communications 1 (4 UOC)

Year 2

Session One

- ARCH1271 Architectural Technologies 3 (6 UOC)
- ARCH1201 Architectural Design Workshop 2 (8 UOC)
- ARCH1221 Architectural History and Theory 3 (4 UOC)
- ARKL1241 Communications 2 (3 UOC)
- General Education (3 UOC)

Session Two

- ARCH1272 Architectural Technologies 4 (4 UOC)
- ARCH1202 Architectural Design Workshop 3 (8 UOC)
- ARCH1282 Research Practice (3 UOC)
- BENV1242 Computer-Aided Design (3 UOC)
- ARCH1222 Architectural History and Theory 4 (3 UOC)
- General Education (3 UOC)

Year 3

Session One

- ARCH1371 Architectural Technologies 5 (4 UOC)
- ARCH1301 Architectural Design Studio 1 (8 UOC)
- BENV1341 Design Modelling and Visualisation (3 UOC)
- ARKL1321 Architectural History and Theory 5 (3 UOC)

Electives (3 UOC)

General Education (3 UOC)

Session Two

- ARCH1302 Architectural Design Studio 2 (9 UOC)
- ARCH1382 Practicum (3 UOC)
- Electives (3 UOC)
- General Education (3 UOC)

Opportunity for alternate off-campus Exchange Program with the approval of the Program Head

Year 4

Session One

- ARCH1401 Architectural Design Studio 3 (9 UOC)
- Electives (15 UOC)

Opportunity for alternate off-campus Exchange Program with the approval of the Program Head

Session Two

- ARCH1470 Building Services 1 & 2 (6 UOC)
- ARCH1381 Professional Practice 1 (3 UOC)
- ARCH1402 Architectural Design Studio 4 (9 UOC)
- Electives (6 UOC)

Opportunity for alternate off-campus Exchange Program with the approval of the Program Head

Additional Requirement

(Completed after Year 1 and before Year 5)

- ARCH1583 Work Experience (24 UOC)

Year 5

Session One

- ARKL1501 Investigation Workshop (9 UOC)
- ARCH1582 Professional Practice 2 (6 UOC)
- Electives (9 UOC)

Session Two

- ARCH1502 Graduation Project (9 UOC)
- Electives (15 UOC)

General Education Requirements

Students in this program must also satisfy the University's General Education requirements. For further information, please refer to the Academic Rules section and the General Education section in this Handbook.

Honours

The Bachelor of Architecture degree may be awarded with Honours based on the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

In order to be considered for the University Medal, students must have completed at least 3 years of study towards their BArch degree at the University of New South Wales.

Academic Rules

1. The degree of Bachelor of Architecture is awarded at either pass or honours level after the successful completion of a minimum of 264 units of credit.

2. To fulfil these requirements, students must complete:
   - 171 units of core courses, being all those prescribed in the in the faculty regulations for this program;
   - 24 units of work experience completed after Year 1 and before Year 5 as prescribed in the faculty regulations for this program;
   - 18 units of FBE electives, selected in accordance with the faculty regulations for this program;
   - 39 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment;
   - 12 units of General Education in accordance with University regulations.

3. The standard duration of the program is 5.5 years consisting of 10 semesters of full-time study (24 units of credit per semester) plus 1 semester of required work experience.

4. General Education courses may not be taken before a student enters Year 2 of the Program.

5. Students are not able to enrol in two design studios concurrently.
Professional Recognition
The Degree of Bachelor of Architecture from the University of New South Wales is accredited by the Board of Architects of New South Wales for the purpose of registration and is recognised by the Royal Australian Institute of Architects (RAIA).

Graduates are eligible for Graduate Membership of the Royal Australian Institute of Architects. Students enrolled in the BArch program (3260) or the BSc(Arch) program (3265) or any of the combined BArch programs are eligible to become Student Members of the Royal Australian Institute of Architects. SONA (Student Organised Network for Architecture Australia) is the national student organisation affiliated with RAIA.

In addition, for registration as an architect in NSW, candidates must satisfy the following requirements:
1. Produce evidence of two years approved work experience, at least one of which has been subsequent to the completion of the program; and
2. Pass an examination in Architectural Practice administered by the NSW Board of Architects.

Faculty Regulations for the BArch

FBE Electives
Faculty of the Built Environment (FBE) electives must be selected from those offered by the FBE. General Education Electives may not be substituted for either FBE or Open Electives.

Work Experience
Each student is required to undertake 24 weeks of off-campus activity in the pursuit of architectural work experience. Ideally, this is undertaken as a single block of time working in an architectural design office. Where this is the case and it overlaps a normal academic session, students should enrol in ARCH1583 and are not permitted to enrol in any other courses concurrently.

Work experience may also be carried out in several smaller components during summer breaks, provided that no such component is less than eight weeks in duration. Where this is the case, students must enrol in ARCH1583 for the summer session in which they are completing their work experience requirements.

If students wish to propose an alternative experience to that carried out in a registered architect's office, approval must be given by the Program Head.

In all events, assessment is only within the terms of the course ARCH1583 Work Experience in the Bachelor of Architecture degree program. The Architecture Program takes no responsibility for any assessment or consideration for registration with the Board of Architects of New South Wales or membership of the Royal Australian Institute of Architects.

Composite Courses
Where a composite course is failed, all component parts must be repeated. This includes the courses in the technology core. To achieve a pass result in technology core courses, at least two components must be passed.

Progression
After Year 2, progression in the Design stream requires a pass level to be gained in the previous session’s Design Studio. No two design studios can be taken concurrently.

A Progress Portfolio will be submitted at the end of third year as part of the assessment for ARCH1302 and to determine progression into fourth year of design. Similarly another Progress Portfolio will be submitted at the end of fourth year which will determine progression into final year.

A Progress Portfolio will also be submitted during third year as part of the assessment for ARCH1371 and to determine progression into the fourth year course ARCH1470.

3265 Bachelor of Science (Architecture)

BSc(Arch)
Typical Duration
3 years
Minimum UOC for Award
144 units of credit
Typical UOC per Session
24 units of credit
Program Head: Graham Bell
Program Coordinator: Stephen Peter

Program Description
This program provides an opportunity for students to undertake studies within the discipline of architecture, generally within a well-defined area of specialisation.

At present, a formal specialisation is offered in the area of architectural computing, but the opportunity exists for any major to be identified through consultation with the Program Coordinator. Where at least 24 units of electives and both research projects have been completed within the area of specialisation, then that major will be identified on the degree testamur. The program can also be undertaken with no identified major, in which case it is referred to as the generalist stream and no major is identified on the testamur at graduation.

The program is normally completed in three years of full-time study. Year 1 is taken in common with BArch students. In Year 2, students undertake courses in their area of specialisation. During Year 3 of the program, students undertake two research projects that provide an opportunity to explore areas of specialised interest in considerable depth.

The program allows students to select courses based on their interests. These could include: technology, history, theory and communications. The computing major educates students in architectural computing and allows students to specialise in an area of computing such as: computer-aided design (CAD), building modelling, rendering, animation, multimedia and IT management.

Program Objectives and Learning Outcomes
The Bachelor of Science (Architecture) degree is a three year full-time program with an optional fourth year for Honours. The first year introduces the fundamental concepts of Architecture and is undertaken as a common year with the Bachelor of Architecture program. During the second and third years, students concentrate on an area of specialisation. At present, the main area of specialisation is architectural computing.

Suggested Electives for the Computing Major

This table shows the recommended electives for Year 2 and 3 for the computing major. Note that students are required to complete 24 units of credit (and the 2 projects) to receive the major, while this recommended program includes 42 UOC of computing electives. It should be noted that students are not obliged to complete these electives in the order set out in the schedule. Also, the list is not an exhaustive list of the available computing electives, so some students may choose to complete courses not listed here.
The Bachelor of Building Construction Management is a four-year full-time program which allows students to specialise for careers in Construction and Project Management, Quantity Surveying, Property Development and Property Management.

The program is offered over a period of 4 years of full-time study, or a minimum of eight sessions, leading to the award of the degree of Bachelor of Building Construction Management (BBCM). The program is structured as follows:

- **Years 1-3** consist of a fixed program of compulsory courses.
- **Year 4** consists of electives and a compulsory thesis.

### Program Objectives and Learning Outcomes

Students will acquire a sound foundation of knowledge which will prepare them for graduate careers in areas such as Construction and Project Management, Quantity Surveying, Property Development and Property Management.

### Program Structure

#### Year 1

**Session One**
- BENV1141 Computers and Information Technology (3 UOC)
- BLDG1260 Construction Management 1 (6 UOC)
- BLDG1281 Construction Law 1A (3 UOC)
- BLDG1121 Construction Science (6 UOC)
- BLDG1211 Construction Technology 1A (6 UOC)

**Session Two**
- BLDG1282 Construction Law 1B (3 UOC)
- BLDG1050 Structures 1 (6 UOC)
- BLDG1212 Construction Technology 1B (6 UOC)
- BLDG1302 Construction Economics (6 UOC)
- GMAT0411 Surveying in Building and Construction (3 UOC)

#### Year 2

**Session One**
- BLDG2212 Construction Technology 2B (6 UOC)
- BLDG2482 Computer Applications in Construction (3 UOC)
- BLDG2332 Measurement & Documentation (6 UOC)
- BLDG2282 Construction Management 2B (6 UOC)
- General Education (3 UOC)

**Session Two**
- BLDG3301 Advanced Measurement & Documentation (6 UOC)
- BENV1382 Social Responsibility and Professional Ethics (3 UOC)
- BLDG3101 Construction Technology 3A (6 UOC)
- BLDG3281 Construction Management 3A (6 UOC)
- General Education (3 UOC)

#### Year 3

**Session One**
- BLDG3284 Construction Management 3B (6 UOC)
- BLDG3402 Research Skills (3 UOC)
- BLDG3332 Construction Cost Estimating (6 UOC)
- BLDG3102 Construction Technology 3B (6 UOC)
- General Education (3 UOC)

**Session Two**
- BLDG3302 Advanced Measurement & Documentation (6 UOC)
- BENV1382 Social Responsibility and Professional Ethics (3 UOC)
- BLDG3101 Construction Technology 3A (6 UOC)
- BLDG3281 Construction Management 3A (6 UOC)
- General Education (3 UOC)

### Additional Requirement

To be completed before start of Year 4

Successful completion of one of the following:
- BLDG9998 Quantity Surveying Industry Program (12 UOC)
- BLDG9999 Building Industry Program (12 UOC)

#### Year 4

**Session One**
- BLDG4501 Thesis Foundation (6 UOC)
- Electives (18 UOC)

### General Education Requirements

It is UNSW policy that all students must complete up to 56 hours of study that fosters acceptance of professional and ethical action as well as social and environmental responsibility. The BSc(Arch) program satisfies half of that requirement within the courses that are taken in common with the BArch program. Taking the course BENV1382 Social Responsibility and Professional Ethics in the third year of study satisfies the remaining 28 hours.

### Honours

The Bachelor of Science (Architecture) degree may be awarded with Honours after the successful completion of a two-semester Honours program following the completion of the BSc(Arch) program, and in accordance with current Faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Students must qualify by achieving a minimum Credit average during the first three years of study before being admitted to the Honours year.

### Academic Rules

1. The degree of Bachelor of Science (Architecture) is awarded at Pass level after the successful completion of a minimum of 144 units of credit.

2. The degree of Bachelor of Science (Architecture) is awarded at Honours level after the successful completion of a minimum of 192 units of credit including 48 units in an approved Honours program.

3. To fulfil these requirements, students must complete:
   - 75 units of core courses, being all those prescribed in the faculty regulations for this program;
   - 18 units of FBE electives, selected in accordance with the faculty regulations for this program;
   - 39 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment;
   - 12 Units of General Education in accordance with University requirements.

4. A student may undertake a major by completing a minimum of 24 units in an approved disciplinary stream (in lieu of an equivalent unit value of open electives) plus undertaking approved topics related to that disciplinary stream for both the core Research Project courses (ARCH1398 and ARCH1399).

5. The standard duration of the program is 3 years consisting of 6 semesters of full-time study (24 units of credit per semester). This is extended by 1 year (or 2 semesters), if the Honours program is attempted.

6. General Education courses may not be taken before a student enters Year 2 of the Program.
Session Two
BLDG4502 Thesis (12 UOC)
Electives (12 UOC)

Electives
Students' attention is drawn to the list of suggested electives below. These courses are offered specifically to meeting the requirements for membership of professional bodies as defined below under the section ‘Professional Recognition’.

Session 1 Electives
BENV2813 Construction Marketing (3 UOC)
BENV2814 Property Law (6 UOC)
BENV2815 Construction Management 4A (6 UOC)
BENV2986 Property Management & Development (6 UOC)
BLDX4285 Professional Practice & Procedure (6 UOC)
BENV2718 Construction Technology 4 (3 UOC)
BLDG4403 Design Evaluation (6 UOC)

Session 2 Electives
BENV2408 Building Information Systems (6 UOC)
BENV2985 Land Economics & Valuation (6 UOC)
BLDG4273 Dispute Avoidance & Resolution (3 UOC)
BENV2816 Construction Organisational Behaviour (6 UOC)
BLDG4304 Forecasting, Bidding & Cost Control (6 UOC)
BENV2719 Housing Delivery Systems (3 UOC)
BLDG4315 Business & Financial Control (6 UOC)

Honours
The award of Honours is based on performance throughout the whole program, without requiring an additional Honours program. Honours are determined on the basis of a score which is calculated by weighting more heavily the courses taken in the later years of the program.

Academic Rules
1. The degree of Bachelor of Building Construction Management is awarded at either Pass or Honours level after the successful completion of a minimum of 204 units of credit.
2. To fulfil these requirements, students must complete:
   - 147 units of core courses, being all those prescribed in the faculty regulations for this program;
   - 12 units of work experience prior to entry into Year 4 as prescribed in the faculty regulations for this program;
   - 30 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment;
   - 12 units of General Education in accordance with University requirements.
3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester) plus the required work experience.
4. General Education courses may not be taken before a student enters Year 2 of the program.

Work Experience
Prior to commencing their final year, all students are required to have gained a minimum of 80 days work experience by appropriate employment in the building industry. Notwithstanding the above, for registration with the Australian Institute of Quantity Surveyors or the Board of Quantity Surveyors Malaysia or the Royal Institution of Chartered Surveyors, students must undertake 6 months approved work experience to be completed before the start of the final year of the program.

A proposal for employment must be submitted to the Program Head for approval prior to starting work. Students will be required to produce documented evidence of their work experience. In order to complete this requirement, students must enrol in BLDG9999 Building Industry Program or in BLDG9998 Quantity Surveying Industry Program.

Progression
In the event of failure in one or more courses, students may carry the failed course(s) provided that:
- prerequisite courses have been completed to the satisfaction of the Program Head;
- the total number of courses taken at any time does not exceed 6 including General Education;
- the total contact hours do not exceed 20 per week.

Assumed Knowledge
Before entry to the Bachelor of Building Construction Management program it is recommended that students complete studies in at least HSC Mathematics.

Career Information
This program prepares students for professional and executive employment within one of Australia's largest industries, the construction industry. Careers in a wide variety of areas, in both private enterprise and in the public sector are available to building construction management graduates. More specifically, these include positions as project manager, master builder, construction consultant, building estimator, quantity surveyor, building economist, property manager and building scientist.

Professional Recognition
The award of the degree, Bachelor of Building Construction Management is recognised for admission to membership by:
1. The Australian Institute of Building
2. The Australian Institute of Quantity Surveyors, subject to completion of all compulsory courses and elective courses nominated by the Australian Institute of Quantity Surveyors plus BLDG9998 Quantity Surveying Industry Program
3. The Board of Quantity Surveyors Malaysia, subject to completion of all compulsory courses and elective courses nominated by the Board of Quantity Surveyors Malaysia plus BLDG9998 Quantity Surveying Industry Program
4. The Australian Property Institute, subject to the completion of the following electives in addition to all compulsory courses and selection of a thesis topic in the area of Land Economics.
5. The Royal Institution of Chartered Surveyors, subject to completion of all compulsory courses and elective courses nominated by RICS plus BLDG9998 - Quantity Surveying Industry Program

The electives nominated by each of these accrediting bodies are listed on the FBE web site under the Building Construction Management program.

3360 Bachelor of Planning

BPlan
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit
Program Head: Susan Thompson

Program Description
The Bachelor of Planning program provides academic education and applied learning leading to professional qualifications in planning. The program is of four years full time duration with an additional mandatory year of work experience, normally taken after completing Session 1 of Year 3.

Planning has as its focus the management and development of urban and rural areas; ranging from small local precincts to metropolitan areas and regions. The planner's task is often to integrate and coordinate the aims and actions of a large number of government and private organisations and individuals to provide an equitable and efficient distribution of resources. Working at the interface of development and the environment, this involves collecting and analysing information; identifying needs and options; making forecasts; preparing policies, plans and programs for implementation; exercising development control; investigating development proposals; and evaluating results, communicating outcomes and consultation.

The Bachelor of Planning is also offered in combination with the Master of Environmental Management (PLANG23360). Please refer to the Bachelor of Planning Master of Environmental Management (BPlan MEM) entry under 'Combined Degree Programs'.
Program Objectives and Learning Outcomes
The objectives of the program are to create an awareness of the context in which planning operates, impart knowledge of how planning can influence the community and the physical environment, equip students with the competence to apply this knowledge at different levels in a wide range of situations, create an understanding of the contribution other disciplines can make to planning and vice versa, and develop skills in policy formulation, land use allocation and control, design and communication.

The program is structured to allow students to study a secondary specialisation in a particular area or to sample a wide range of educational experiences from across the University.

Program Structure
Year 1
Session One
PLAN1241 Planning Theory and Practice (6 UOC)
PLAN1101 Understanding Design (6 UOC)
PLAN1011 Urban Society (6 UOC)
GEOS1701 Environmental Systems and Processes (6 UOC)

Session Two
PLAN1122 Development Processes (6 UOC)
PLAN1042 Local Planning (6 UOC)
GEOH2801 Geographical Information Systems for Built Environment (6 UOC)
Electives (6 UOC)

Year 2
Session One
PLAN2111 Economics of Planning and Development (6 UOC)
PLAN2032 Urban Design (6 UOC)
PLAN2041 Integrated Planning 1 (6 UOC)
Electives (6 UOC)

Session Two
PLAN2122 History, Heritage and the Built Environment (6 UOC)
PLAN2152 Resources, Planning and the Natural Environment (6 UOC)
PLAN1052 Quantitative Methods (6 UOC)
General Education (6 UOC)

Year 3
Session One
PLAN3031 Integrated Plan 2 (6 UOC)
PLAN3041 Planning Law & Administration (6 UOC)
GEOH3671 Transport, Land Use and Environment (6 UOC)
PLAN3051 Development Assessment (6 UOC)

Session Two
PLAN0081 Work Experience (24 UOC)

Year 4
Session One
PLAN0082 Work Experience (24 UOC)

Session Two
PLAN3032 Integrated Plan 3 (6 UOC)
PLAN3015 Social Planning (6 UOC)
PLAN3052 Qualitative Methods (6 UOC)
Electives (6 UOC)

Year 5
Session One
PLAN4031 Research Design (3 UOC)
PLAN4121 Spatial Policy (6 UOC)
Electives (9 UOC)
General Education (6 UOC)

Session Two
PLAN4132 Thesis Project (12 UOC)
PLAN4142 Professionalism, Ethics and Politics (6 UOC)
Electives (6 UOC)

Program Minor
Students are strongly encouraged to use the elective courses to develop a specialisation in addition to their core planning studies.

Honours
Honours are awarded in the Bachelor of Planning degree on the basis of quality of performance throughout the whole program and in accordance with current faculty policy. For the purpose of calculating Honours at graduation, the Honours value of each course is indicated by the units of credit associated with that course. Units of credit generally reflect the workload required of students in courses in which grades are awarded. Honours grades are Class 1, Class 2 Division 1, or Class 2 Division 2.

Academic Rules
1. The degree of Bachelor of Planning is awarded at either Pass or Honours level after the successful completion of a minimum of 240 units of credit.
2. To fulfil these requirements, students must complete:
   • 147 units of core courses, being all those prescribed in the Faculty regulations for this program;
   • 48 units of work experience normally undertaken in 2nd session of Year 3 and 1st session of Year 4 as prescribed in the Faculty regulations for this program;
   • 33 units of open electives selected in accordance with the Faculty regulations for undergraduate study in the Faculty of the Built Environment;
   • 12 units of General Education in accordance with University requirements.
3. The standard duration of the program is 5 years, consisting of 8 sessions of full-time study plus 2 sessions of required work experience, with each session worth 24 units of credit.
4. General Education courses may not be taken before a student enters Year 2 of the program.

Work Experience
During the program, students must undertake 48 weeks of approved employment related to the program. The program assists with placements in state government agencies, planning consultants, private firms, and local councils. This is normally undertaken in the twelve months following Session 1 of Year 3 as indicated in the Program Structure. Work experience requirements must be completed prior to graduation. The type of employment proposed must be submitted to the Program Head for approval.

Progression
Courses are to be taken in the year sequence listed above, except with the permission of the Head of the Planning and Urban Development Program.

Professional Recognition
The Bachelor of Planning Degree is recognised by the Planning Institute of Australia as an academic qualification for Corporate Membership after at least one additional year of practical experience following graduation. Corporate Membership of the Planning Institute of Australia confers reciprocal recognition in many countries.

3380 Bachelor of Landscape Architecture
BLArch
Typical Duration
4 years
Minimum UOC for Award
216 units of credit
Typical UOC per Session
24 units of credit
Program Head: Catherine Evans

Program Description
The Bachelor of Landscape Architecture program is of four years duration and requires full-time attendance throughout. Students are introduced to the theory and practice of landscape architecture through an exploration of design principles, graphic techniques, ecological processes and studies of human modification of the environment. As students progress through the program, increasing emphasis is laid upon creative design with particular application to Australian conditions. Projects are related to the subject matter of concurrent lectures and culminate in landscape studies of regional and national significance.

The majority of courses are taught specifically within the Landscape Architecture Program. However, contact with the students and staff of other programs is ensured by the inclusion of courses from other programs in the Faculty of the Built Environment, the University's General Education program and the program of elective courses. In the final two years of
the program students are able to undertake a significant component of elective courses from the Landscape Architecture Program, other programs within the Faculty or from other faculties, which effectively allows them to develop a major specialisation.

Program Objectives and Learning Outcomes
The program seeks the synthesis of knowledge and skills through project based learning in a sequence of eight Design Studios. Support courses are grouped into strands: environment, history and theory, communication, technology and practice.

Program Structure

**Year 1**

**Session One**

- **BENV1141** Computers and Information Technology (3 UOC)
- **LANU1101** Design Fundamentals: Studio 1 (9 UOC)
- **LAND1121** Intro Landscape Architecture (3 UOC)
- **GEOS1701** Environmental Syst. & Analysis (6 UOC)
- **LANU1131** Horticulture (3 UOC)

**Session Two**

- **LAND1152** Landscape Analysis (9 UOC)
- **LAND1171** Landscape Technology 1 (3 UOC)
- **LAND1102** Land Design 2: Design Process (6 UOC)
- **LAND1122** History of Landscape Arch. (3 UOC)
- **LAND1142** Design Communication (3 UOC)

**Year 2**

**Session One**

- **LAND1251** Advanced Horticulture (3 UOC)
- **LAND1271** Landscape Technology 2 (3 UOC)
- **LAND1201** Landscape Design 3: Site Planning (9 UOC)
- **LAND1221** Environmental Sociology for Landscape Architects (3 UOC)
- **BENV1242** Computer-Aided Design (3 UOC)
- **LAND1202** Landscape Design 4: Landform and Planting Design (9 UOC)
- **LAND1222** History and Theory Elective* (3 UOC)
- **LAND1221** Environmental Sociology for Landscape Architects (3 UOC)
- **LAND1272** Landscape Technology 3 (3 UOC)
- **LAND1251** Advanced Horticulture (3 UOC)
- **LAND1271** Landscape Technology 2 (3 UOC)
- **LAND1201** Landscape Design 3: Site Planning (9 UOC)
- **LAND1222** History and Theory Elective* (3 UOC)
- **LAND1221** Environmental Sociology for Landscape Architects (3 UOC)
- **LAND1272** Landscape Technology 3 (3 UOC)

**Session Two**

- **LAND1301** Landscape Design 5 (9 UOC)
- **LAND1321** Research Methods (3 UOC)
- **LAND1321** Research Methods (3 UOC)
- **LAND1251** Advanced Horticulture (3 UOC)
- **LAND1271** Landscape Technology 2 (3 UOC)
- **LAND1201** Landscape Design 3: Site Planning (9 UOC)
- **LAND1222** History and Theory Elective* (3 UOC)
- **LAND1221** Environmental Sociology for Landscape Architects (3 UOC)
- **LAND1301** Landscape Design 5 (9 UOC)
- **LAND1321** Research Methods (3 UOC)
- **LAND1321** Research Methods (3 UOC)
- **LAND1301** Landscape Design 5 (9 UOC)

**Additional Requirement**

(completed before the start of Year 3)

- **LAND1311** Landscape Practice 1 (12 UOC)

**Year 3**

**Session One**

- **LAND1351** Landscape Management (3 UOC)
- **LAND1311** Landscape Practice 1 (12 UOC)
- **LAND1371** Landscape Engineering (3 UOC)
- **LAND1301** Landscape Design 5 (9 UOC)
- **LAND1251** Advanced Horticulture (3 UOC)
- **LAND1271** Landscape Technology 2 (3 UOC)
- **LAND1201** Landscape Design 3: Site Planning (9 UOC)
- **LAND1222** History and Theory Elective* (3 UOC)
- **LAND1221** Environmental Sociology for Landscape Architects (3 UOC)
- **LAND1301** Landscape Design 5 (9 UOC)

**Session Two**

- **LAND1302** Land Design 6 (9 UOC)
- **LAND1321** Research Methods (3 UOC)
- **LAND1321** Research Methods (3 UOC)
- **LAND1251** Advanced Horticulture (3 UOC)
- **LAND1271** Landscape Technology 2 (3 UOC)
- **LAND1201** Landscape Design 3: Site Planning (9 UOC)
- **LAND1222** History and Theory Elective* (3 UOC)
- **LAND1221** Environmental Sociology for Landscape Architects (3 UOC)
- **LAND1301** Landscape Design 5 (9 UOC)

**Additional Requirement**

(completed before the start of Year 4)

- **LAND1481** Landscape Practice 2 (12 UOC)

**Year 4**

**Session One**

- **LAND1421** Landscape Thesis (15 UOC)
- **LAND1431** Advanced Research Project (9 UOC)
- **BENV2106** Landscape Design 9: Integrated Studio (6 UOC)
- **LAND1401** Landscape Design 7: Urban Landscape Design (12 UOC)
- **LAND1402** Landscape Design 8: Graduating Studio (12 UOC)

**Honours**

The Bachelor of Landscape Architecture degree may be awarded with Honours based upon the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

**Academic Rules**

1. The degree of Bachelor of Landscape Architecture is awarded at either Pass or Honours level after the successful completion of a minimum of 216 units of credit.
2. To fulfill these requirements, students must complete:
   - 156 units of core courses, being all those prescribed in the faculty regulations for this program;
   - 24 units of work experience prior to Year 4 as prescribed in the faculty regulations for this program;
   - 24 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment;
   - 12 units of General Education in accordance with University requirements.
3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester) plus the required work experience.
4. General Education courses may not be taken before a student enters Year 2 of the Program.
5. Students who achieve a final mark above 65 in the prerequisite course, LAND1321 Research Methods, will be directed to the Landscape Design Thesis, and those who pass LAND1321 but whose final mark is 65 or less will be directed to the Advanced Research Project in Landscape Architecture. Students doing the Research Project will also be required to enrol in the co-requisite, Landscape Design 9: Integrated Studio.
6. A Progress Portfolio will be submitted at the end of second year as part of the assessment for LAND1202 and to determine progression into the third year of design. Similarly, another Progress Portfolio will be submitted at the end of third year which will determine progression into the final year of design.
7. Design Studios are considered to be a linear sequence, which requires that each design studio must be passed before a student can advance to the next level.

**Work Experience**

Students of the undergraduate program must obtain a total of 90 days work experience prior to graduation, of which a minimum of 40 days must be in landscape industry work and a minimum of 40 days in a landscape design office. This normally takes the form of employment during long student vacations supervised by a landscape architect, landscape contractor or nursery. Each student undertaking work experience must obtain prior approval of the Work Experience Coordinator.

Each student must obtain from the employer a statement of experience gained, maintain an accurate record in logbook form and submit a written report describing the work undertaken during the various work experience components. Details of these arrangements are available on the Faculty website.

**Professional Recognition**

The program is accredited by the Australian Institute of Landscape Architects and graduates holding the BLArch degree may qualify for corporate membership of the Institute.

**3385 Bachelor of Industrial Design**

**BIndDes**

**Typical Duration**

4 years

**Minimum UOC for Award**

204 units of credit

**Typical UOC per Session**

24 units of credit

**Program Head:** To be advised

**Program Description**

Industrial design involves the research and design of the whole range of consumer and capital products used by people. These are as diverse as telephones and transportation, kitchen appliances and exhibition systems. Ideally, the industrial designer works as part of a team involving engineering, production and marketing. The industrial designer initially concentrates on establishing the concept as a marketable, producible,
useable and socially responsible product; and subsequently details the human factors (ergonomics), appearance (style) and mode of operation. Frequently the designer becomes involved in the corporate image of companies and their products as well as the graphics of the product’s packaging and the associated retail support systems. The Bachelor of Industrial Design Program provides academic education and practical experience leading to professional qualifications in industrial design. It requires full time attendance for four years culminating in the Major Project.

**Program Objectives and Learning Outcomes**

There are two central goals. The primary goal is to equip students with the theoretical and practical knowledge, skills and techniques needed for the design, documentation and administration of design and product development. A more general goal is to provide students with an all-round general problem-solving education. Lectures and practical sessions cover theoretical knowledge in the following areas:

1. Industrial Design Studio
2. Visual Communication of Design (Computer aided and manual methods)
3. Marketing
4. Technology (Engineering materials and manufacture)
5. History and Theory

**Program Structure**

**Year 1**

**Session One**

IDES1101 Industrial Design Fundamentals (6 UOC)
IDES1012 Safe Workshop Practices (3 UOC)
BENV1141 Computers and Information Technology (3 UOC)
MATH1011 General Mathematics 1B (6 UOC)
IDES1161 Industrial Design Communication A (6 UOC)

**Session Two**

MATH2389 Statistics SM 1 (3 UOC)
IDES1031 Design Studio 1 (6 UOC)
IDES1121 History of Industrial Design (3 UOC)
IDES1071 Materials and Technology Workshop A (6 UOC)
IDES1162 Industrial Design Communication B (6 UOC)

**Year 2**

**Session One**

IDES2072 Materials and Technology Workshop B (6 UOC)
IDES2163 Industrial Design Communication C (6 UOC)
IDES2201 Ergonomics (6 UOC)
IDES2161 Industrial Design Studio 2A (6 UOC)

**Session Two**

IDES2162 Industrial Design Studio 2B (6 UOC)
IDES2171 Computer Applications in Industrial Design (6 UOC)
IDES2092 Industrial Design Theory and Process (6 UOC)
MARK1012 Marketing Fundamentals (6 UOC)

**Year 3**

**Session One**

IDES3073 Materials and Technology Workshop C (6 UOC)
MARK2051 Consumer Behaviour (6 UOC)
MARK2052 Marketing Research (6 UOC)
IDES3221 Industrial Design Studio 3A (6 UOC)

**Session Two**

IDES3222 Industrial Design Studio 3B (6 UOC)
Electives (12 UOC)
General Education (6 UOC)

**Year 4**

**Session One**

IDES4291 Industrial Design Studio 4 (6 UOC)
IDES4301 Project Research (6 UOC)
IDES4372 Industrial Design Management and Practice (6 UOC)
Electives (6 UOC)

**Session Two**

IDES4352 Industrial Design Project (12 UOC)
Electives (6 UOC)
General Education (6 UOC)

**Honours**

The Bachelor of Industrial Design degree may be awarded with Honours based upon the quality of performance in the program, and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

**Academic Rules**

1. The degree of Bachelor of Industrial Design is awarded at either Pass or Honours level after the successful completion of a minimum of 192 units of credit.
2. To fulfil these requirements, students must complete:
   - 156 units of core courses, being all those prescribed in the faculty regulations for this program.
   - 24 units of open electives, selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 12 units of General Education in accordance with University requirements.
3. The standard duration of the program is 4 years consisting of 8 semesters of full-time study (24 units of credit per semester).
4. General Education courses may not be taken before a student enters Year 2 of the program.

**Career Information**

The program prepares students for professional and executive employment in areas involving the research, design and development of new manufactured products. Whilst it is anticipated that most graduates will be initially employed in an industrial design capacity either in manufacturing companies or consultancies, it is likely that some graduates may subsequently choose to specialise in aspects of marketing, engineering, product management or design management.

**Professional Recognition**

The Degree of Bachelor of Industrial Design from the University of New South Wales is recognised by the Design Institute of Australia.

**Combined Degree Programs**

3262 Bachelor of Architecture Bachelor of Arts

**BArch BA**

- **Typical Duration**: 6 years
- **Minimum UOC for Award**: 288 units of credit
- **Typical UOC per Session**: 24 units of credit
- **Program Head**: To be advised

**Program Description**

The BArch BA program is administered by the Architecture Program in the Faculty of the Built Environment. The program requires students to obtain the approval of the Faculty of Arts and Social Sciences for the BA components of their program. The final program and timetable must be approved by the Architecture Program Head in the Faculty of the Built Environment.

The program is open to all students who satisfy both the Architecture and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the Architecture program after the completion of at least one year if they have a credit or higher average or the permission of the Architecture Program Head. Transfer after the second year may result in the student taking more than minimum time to complete the combined degree.

Students should start discussing their program with representatives of the Architecture Program and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Arts program that they wish to undertake. The Arts and Social Sciences section in this Handbook describes the options. There are rules that prescribe what may be taken in each year and students should be aware of the Architecture requirements prior to choosing Arts preferences.

Students will also need to refer to the Faculty of Arts and Social Sciences section in this Handbook for complete program and course details.
Program Objectives and Learning Outcomes

This combined degree allows students to add their choice of an Arts program to the standard, professionally accredited Architecture program offered by the Faculty of the Built Environment. It provides flexibility in the choice of courses with the full Arts program and enables students to gain a broad education in Arts as well as the specialised studies of Architecture. Since both the Architecture and Arts programs can have common subject areas, and the Architecture program contains a percentage of open electives, the combined program requires only one additional session of study on top of the standard BArch program to gain the additional qualification of Bachelor of Arts. In general, the BA courses are taken concurrently with the BArch program so that both can be completed in eleven sessions.

The award of this combined degree demands an amalgamation of the conditions governing both the BArch degree and the BA degree with changes to the requirements for participation in General Education programs and total units of credit.

Honours

Students may be awarded a BA (Honours) degree through successfully completing an Honours year.

It should be noted that entry into a particular BA (Honours) program may require completion of courses additional to those specified in the Degree Rules and Faculty Regulations. The Honours year would be outside the suggested time for the combined degree.

The Bachelor of Architecture degree may be awarded with Honours based on the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

In order to be considered for the University Medal, students must have completed at least 3 years of study towards their BArch degree at UNSW. Where appropriate, BArch (Honours) is conferred at graduation for the combined degree unless students carry out the additional BA Honours program.

Academic Rules

1. The degrees of Bachelor of Architecture and Bachelor of Arts are awarded at either Pass or Honours level (BArch only) after successful completion of a minimum of 210 units of credit from the Architecture Program and 78 units of credit from the Arts Program. The combined total units of credit is 288. To gain Honours in Arts, students are required to carry out an extra year of study (48 units of credit) with a Major in an approved area.

2. To fulfil these requirements, students must complete:
   - 171 units of core courses in Architecture, being all those prescribed in the in the faculty regulations for this program.
   - 24 units of work experience completed after Year 1 and before Year 5 as prescribed in the faculty regulations for this program.
   - 15 units of FBE electives in the Faculty of the Built Environment, selected in accordance with the faculty regulations for this program.
   - 78 units of credit from the range of Arts majors in accordance with the Faculty of Arts and Social Science Rules. Students in the combined degree should undertake no more than 24 units of credit in Level 1 courses.

3. The standard duration of the program is 6 years consisting of 11 semesters of full-time study (24 units of credit per semester) plus 1 semester of required work experience.

4. Arts courses may not be taken until after the student has completed 96 units of credit points from the BArch program.

5. To fulfil the requirements of the BA component of the program, students must undertake a major by completing 42 units of credit in one of the approved disciplinary streams identified in the faculty regulations for this program.

Faculty Regulations for the BArch BA

Core Courses in Architecture

The core courses prescribed for the program are all those named in Program Structure above.

FBE Electives

Faculty of the Built Environment (FBE) electives must be selected from those offered by the FBE.
Arts Major
For the Arts Majors and course selection restriction, please see the Faculty of Arts and Social Sciences.

Course Selection Restrictions
No course included for credit in the BArch program can be included in the 78 units of credit required in Rule 1 for the BA program.

Work Experience/Composite Courses/Progression rules
Please see the BArch (program code 3260) for work experience regulations.

Professional Recognition
Please refer to the BArch (program code 3260) professional recognition section for complete details.

3263 Bachelor of Architecture Bachelor of Social Science

BArch BSocSc

Typical Duration
6 years

Minimum UOC for Award
288 units of credit

Typical UOC per Session
24 units of credit

Program Head: To be advised

Program Description
The BArch BSocSc program is administered by the Architecture Program of the Faculty of the Built Environment. The program requires the student to obtain approval of the Faculty of Arts and Social Sciences for the BSocSc components of their program. The program and timetable must be approved by the Architecture Program Head in the Faculty of the Built Environment.

Students should start discussing their program with representatives of the Architecture Program and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Social Science Major that they wish to undertake. The Faculty of Arts and Social Science section in this Handbook describes the options available and students will need to refer to this section for complete program and course details. There are rules that prescribe what may be taken in each year and students should be aware of the Architecture requirements prior to choosing Social Science preferences.

Program Objectives and Learning Outcomes
This combined degree allows students to add their choice of a Social Science program to the standard, professionally accredited Architecture program offered by the Faculty of the Built Environment. It provides flexibility in the choice of courses with the full Social Science program and enables students to gain a broad education in Social Science as well as in the specialisations of Architecture. Because Architecture and Social Science programs can have common subject areas, and the Architecture program contains a percentage of open electives, the program requires only one additional session of study to gain the additional qualification of Bachelor of Social Science. In general, the BSocSc courses are taken concurrently with the BArch program so that both can be completed in eleven sessions.

The award of this combined degree demands an amalgamation of the conditions governing both the BArch degree and the BSocSc degree with changes to the requirements for participation in General Education programs and total units of credit.

Year 3

Session One
ARCH1371 Architectural Technologies 5 (4 UOC)
ARCH1301 Architectural Design Studio 1 (8 UOC)
BENV1341 Design Modelling and Visualisation (3 UOC)
ARCH1321 Architectural History and Theory 5 (3 UOC)
BSocSc courses (6 UOC)

Session Two
ARCH1302 Architectural Design Studio 2 (9 UOC)
ARCH1382 Practicum (3 UOC)
BSocSc courses (12 UOC)

Opportunity for alternate off-campus Exchange Program with the approval of the Program Head

Year 4

Session One
ARCH1401 Architectural Design Studio 3 (9 UOC)
BSocSc Courses (12 UOC)
FBE Elective (3 UOC)
Opportunity for alternate off-campus Exchange Program with the approval of the Program Head

Session Two
ARCH1470 Building Services 1 & 2 (6 UOC)
ARCH1381 Professional Practice 1 (3 UOC)
ARCH1402 Architectural Design Studio 4 (9 UOC)
BSocSc Courses (6 UOC)

Opportunity for alternate off-campus Exchange Program with the approval of the Program Head

Additional Requirement
(After Year 1 and before Year 5)
ARCH1583 Work Experience (24 UOC)

Year 5

Session One
ARCH1501 Investigation Workshop (9 UOC)
ARCH1582 Professional Practice 2 (6 UOC)
BSocSc Courses (6 UOC)
FBE Elective (3 UOC)

Session Two
ARCH1502 Graduation Project (9 UOC)
BSocSc Courses (12 UOC)
FBE Elective (3 UOC)

Year 6

Session One
BSocSc Courses (24 UOC)

Honours
Students may be awarded Honours in the BSocSc degree by successful completion of an Honours year. It should be noted that entry into a particular BSocSc Honours program may require completion of courses additional to those specified in the Degree Rules and Faculty Regulations.

The Honours year would be outside the suggested time for the combined degree.

The Bachelor of Architecture degree may be awarded with Honours based on the quality of performance in the program and in accordance with current program policy. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2. In order to be considered for the University Medal, students must have completed at least 3 years of study towards their BArch degree at the University of New South Wales.
4707 Bachelor of Planning Bachelor of Arts

BPlan LLB

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Planning program offered by the Faculty of the Built Environment. The Law courses satisfy the requirements for the award of the professional LLB degree. Because the Planning program contains a percentage of open electives that can be replaced by Law courses, the combined program requires only four additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BPlan program and both can be completed in a minimum of seven years, consisting of twelve academic sessions (six years), plus two sessions of compulsory work experience. This compares with the five-year BPlan program, which consists of eight academic sessions and two sessions (12 months) of compulsory work experience.

For full details of this program, please refer to the Faculty of Law section of this Handbook.

3360 Bachelor of Planning Master of Environmental Management

BPlan MEM – Plan PLANG23360

Program Head: Susan Thompson

This program provides an opportunity to obtain two professional degrees. It allows students to add the Masters in Environmental Management program offered by the Institute of Environmental Studies to the professionally accredited Bachelor of Planning program offered by the Faculty of the Built Environment. Because the Planning program contains a percentage of open electives which can be replaced by MEM courses, the linked program requires only two additional sessions of study to gain both qualifications. Both degrees can be completed in a minimum of twelve sessions. As an alternative, the final 48 units of credit in the MEM program may also be taken part-time or by distance learning.

Students may transfer to this program following three years of study in the Bachelor of Planning program having achieved a weighted average of 65 or higher in all graded courses undertaken.

Students in the BPlan MEM program will not be eligible for the award of the Graduate Certificate in Environmental Management nor the Graduate Diploma in Environmental Management.

The BPlan MEM program is administered by both the Faculty of the Built Environment (Years 1–5) and the Institute of Environmental Studies (Year 6). The final program and timetable for Years 1–5 must be approved by the Head of the Planning and Urban Development Program in the Faculty of the Built Environment and for Year 6 by the Director of the Institute for Environmental Studies.

Registration/Professional Recognition

Please refer to the BPlan professional recognition section for complete details.

4705 Bachelor of Architecture Bachelor of Laws

BArch LLB

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Architecture program offered by the Faculty of the Built Environment. The Law courses, while fewer in number than the Jurisprudence/Law program, satisfy the requirements for the award of the professional LLB degree. Because the Architecture program contains a percentage of open electives which can be replaced by Law courses, the combined program requires only three additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BArch program and both can be completed in thirteen sessions, although students are considered to have a significant workload throughout these thirteen sessions.

For full details of this program, please refer to the Faculty of Law section of this Handbook.
Session Two

MEM Electives** (12 UOC)
Total 24 UOC

Session Two
IEST5003 Addressing Environmental Issues (6 UOC)
MEM Electives** (18 UOC)
Total 24 UOC

*BIOSS9001 Fundamental Knowledge in Environmental Management: Ecology is undertaken as a Summer Session course between Years 4 and 5.
**Students cannot undertake MEM elective courses which have course identifier prefixes of BENV or UDES offered by the faculty of the Built Environment.

Note: That Sessions 1 and 2 of Year 6 may also be undertaken part-time or by distance learning.

Plan Award Rules
1. The degree of Bachelor of Planning will be awarded at either Pass or Honours level after the successful completion of a minimum of 240 units of credit including 24 units of credit from the MEM program. The degree of Master of Environmental Management will be awarded at Pass level after the successful completion of 72 units of credit from the MEM program, 24 of which are carried out during the final two years of the BPlan program.

2. To fulfill these requirements, students must complete:
   - 147 units of core courses in Planning, being all those prescribed in the faculty regulations for this program.
   - 48 units of work experience as prescribed in the faculty regulations for this program.
   - 9 units of open electives selected in accordance with the faculty regulations for undergraduate study in the Faculty of the Built Environment.
   - 42 units of core courses in Environmental Management, being all those prescribed in the regulations for the MEM program.
   - 12 units of General Education in accordance with University requirements.
   - 30 units of program electives in Environmental Management selected in accordance with the regulations for the MEM program.

3. The standard duration of the program is 5 years consisting of 10 semesters of full-time study (24 units of credit per semester) plus 1 year of required work experience.

4. The student must complete 144 units of credit in the Bachelor of Planning program before attempting any courses from the MEM Program.

Faculty Regulations for the BPlan MEM
Core Courses in Planning
The core courses prescribed for the BPlan program are all those named in Plan Schedule up to and including the end of Year 5 and excluding the four courses named in MEM Core Courses.

Transfer Arrangements
Students may transfer to this program following the successful completion of at least 144 units of credit in the Bachelor of Planning program provided they have achieved a weighted average mark across all graded courses of 65 or higher.

Students in the BPlan MEM program may transfer back to the BPlan program. They will receive credit toward their BPlan degree of up to 24 units of credit for MEM courses completed while undertaking the program. Students in the BPlan MEM program who do not complete the BPlan degree including 24 units of credit of MEM courses cannot transfer directly to the MEM program, but may subsequently apply for admission to the MEM upon completion of the BPlan and may request credit for MEM courses completed while they were undertaking the joint program.

Course Selection Restrictions
During the final three sessions of the BPlan program students must complete the four MEM courses listed in MEM Core Courses table.

MEM Core Courses
IEST5001 Frameworks for Environmental Management
CVEN9895 Fundamental Knowledge in Environmental Management: Engineering
BIOS9001 Fundamental Knowledge in Environmental Management: Ecology
CHEM7300 Fundamental Knowledge in Environmental Management: Physical Science

Honours
The Bachelor of Planning degree may be awarded with Honours based on the quality of performance in the program of study undertaken to fulfill the requirements of that degree, and in accordance with current faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Work Experience
During the degree, students must undertake 48 weeks of approved planning-related employment. The Planning and Urban Development Program assists with placements in state government agencies, planning consultants, private firms, and local councils. This is normally undertaken in the twelve months following Session 1 of Year 3 as indicated in the Program Schedule. Work experience requirements must be completed prior to graduation. The type of employment proposed must be submitted to the Head of the Planning and Urban Development Program for approval.
Faculty of the College of Fine Arts

A Message from the Dean

The College of Fine Arts is one of the ten dynamic faculties of the University of New South Wales. Studying at COFA is characterised by rigorous studio activities, high levels of scholarship and research, exposure to the best and most exciting art and design practice Sydney can offer, and participation in collaborative international art projects. Located in Paddington, the centre of Sydney’s gallery and museum district, COFA offers a comprehensive range of undergraduate, postgraduate and research degrees through its five professional schools (School of Art, School of Art Education, School of Art History and Theory, School of Design Studies and School of Media Arts). The College is unique amongst Australian art and design institutions in that it provides studio practice as well as professional studies in theory, history, education and management.

Staff and students at the College are engaged in scholarship and research across a wide range of visual arts and design disciplines including painting, drawing, printmaking, sculpture/performance/installation, photography, film/video, mixed media, digital media, ceramics, textiles, jewellery, graphics/media, applied/object and environments/spatial. Specialist degrees are offered in the areas of art education, design education, art and design history and theory, and arts administration. Cross-disciplinary courses that link COFA and other UNSW teaching and research expertise are also available, combining, for example, arts administration with law or commerce.

The teaching and research of both studio and theoretical activities is based on three principles. Firstly, the increased cross-disciplinary nature of the visual arts and design is recognised. Secondly, the acquisition of traditional skills and the application of new technologies (often regarded as mutually exclusive) are integral to all aspects of teaching and learning. Thirdly, students are offered a college and a wider university experience that enhances their capacity to respond in a significant way to the personal, artistic, cultural and political issues of our time.

COFA has a commitment to the international engagement of its students, staff, curriculum and research activities. Within an overall enrolment of approximately 2200, 210 are international students who come from more than 25 countries across Asia and the Pacific, Europe and the Americas. The College has cooperative agreements with specialist art and design institutions throughout the world. For example, the International Drawing Research Institute (located at the College) places COFA staff and students in key learning roles alongside colleagues in Beijing and Glasgow.

COFA has the expertise, resources and experience to offer specialised yet flexible cross-disciplinary degree programs in visual arts and design. The extensive holdings of the Clement Semmler Library, the vibrant and challenging exhibition programs of the COFA student gallery and internationally renowned Ivan Dougherty Gallery, the excellent materials handling and fabrication workshops, AV support and computer facilities that are essential learning and research tools within art and design make a major contribution to the student experience at COFA. The research activities of students and staff are supported by individual staff and student initiatives, specialist conferences, centres and institutes.

It gives me great pleasure to welcome you into the community of artists, designers, theorists and educators that make up the Faculty of the College of Fine Arts, UNSW.

Faculty Information and Assistance

The College of Fine Arts
Research and scholarship in the disciplines of art and design is organised and administered through five faculties. Undergraduate degree programs allow specialised studies, combined and interdisciplinary student plans. The College includes the Clement Semmler Library, a specialist art and design research library; the Ivan Dougherty Gallery, the COFA Exhibition/Performance Spaces, and Three Foot Square; and four research centres: the International Drawing Research Institute, the iCINEMA Centre for Interactive Cinema Research and the Centre for Contemporary Art and Politics.

Who Can Help?
If you require advice about enrolment, degree requirements, progression within programs or any other general matters, contact the Student Centre, ground floor, B Block, phone (02) 9385 0684.
Faculty timetables and official University forms are also available from the Student Centre.
The location of the College of Fine Arts is:
Cnr. Oxford Street and Greens Road
Paddington NSW 2021 Australia
All enquiries should be addressed to:
The Student Centre
College of Fine Arts,
The University of New South Wales
PO Box 259
Paddington NSW 2021
Tel: (02) 9385 0684
Fax: (02) 9385 0706
email: cofa@unsw.edu.au

Course Descriptions
Course descriptions for 2006 can be found in alphabetical order by course code at the back of this Handbook. Many non-core courses are offered on a rotating two or three year schedule, and the full list is available in the Online Handbook at www.handbook.unsw.edu.au

Units of Credit
The University has introduced a university-wide units of credit system for all courses offered to both undergraduate and postgraduate students. The system means that a course will have the same units of credit value irrespective of which faculty’s program it is counting towards. Students are able to determine the value of courses taken from other faculties when planning their programs of study. The student load for a course is calculated by dividing the units of credit value of a course by the total units of credit required for that year of the program. Student load is used to determine both student contribution charges and tuition fees. Students who take more or less than the standard load for that year of a program will be charged accordingly.

Prerequisite and Corequisite Requirements
A student enrolling in a course must satisfy the prerequisite and corequisite requirements for that course.

General Education Requirements
The objectives of General Education and details of the courses offered across the University are available at the front of this Handbook. Please contact the College of Fine Arts for further information regarding the Faculty’s rules and regulations on General Education.
The following courses are not available as General Education for students in the following degrees:
Bachelor of Art Education
Bachelor of Design Bachelor of Art Education

GENB4001 Psychology of the Individual and the Group
GENT1502 Student Learning, Thinking and Problem Solving
GENT1503 Introduction to Educational Psychology
GENT1504 Ethics and Education
GENT1506 Social Foundations of Education
GENT1507 Learning Process and Instructional Procedures

Applicants for exemption from General Education courses on the basis of prior studies, must complete the Application Form for General Education Exemption and submit it to the Associate Dean, Academic at the College of Fine Arts at the time of enrolment at COFA. Students may apply for approval to substitute any course(s) from other faculties for General Education courses up to a total maximum of 6 units of credit (or 50%) of General Education. Applicants for substitution must complete the Application Form for General Education Substitution and submit it to the Associate Dean, Academic. Application forms are available from the Student Centre or the office of the Associate Dean, Academic.

Advanced Standing
Credit can be gained for relevant equivalent courses completed at another recognised institution within the previous ten years. The maximum advanced standing available is 50% of the program.

Attendance
Except where leave is granted:
• students must attend and participate in all classes for courses in which they are enrolled;
• where absences in excess of 3 classes occur, students may be given a fail grade (UF).

Computing Information
For general details of computing services, see ‘General University Rules and Student Information’ in this Handbook.
Computing resources at the College include 4 main teaching labs, a general access lab, smaller specialist labs, specialist audio and video studios, workstations and control rooms. In total, COFA provides over 150 general and specialist workstations equipped with hardware and software complementary to course requirements. All workstations are connected to the University Wide Network, which in turn is connected to the Internet via the ARRNNet2 network.
The General Access Laboratory provides COFA students with word processing, email, Internet access and basic imaging needs including OCR and image scanning. The teaching labs provide access to multimedia, web authoring, DVD authoring, modelling, animation, CAD, desktop publishing and high end scanning. The Digital Studio and Moving Image Labs provide access to digital audio and video production. Decks patched into these workstations include DAT, VHS, Mini DV and DVCAM. The Research Imaging Laboratory includes a number of computers with a range of 2D and 3D digital imaging applications.
In addition to the College computing facilities, COFA also encourages students to consider the purchase of a personal computer as recommended by UNSW Division of Information Services (DIS) to support their studies. The COFA Computing Resource Handbook detailing further information on purchasing a computer, computing policy, facilities and services can be found at www.cofa.unsw.edu.au/units/csu
Advice is available from school offices on the requirements for computing equipment and software for each program offered. Students undertaking computing studies in any program are responsible for ensuring that they have appropriate backups of their work. Work should not be left on College computers as its security cannot be guaranteed by the College. All students enrolled in courses at the College are bound by the COFA Computing Code of Conduct for Students, which can be found at www.cofa.unsw.edu.au/units/csu/studentinfo/
Technical Resources

The Resource Centre provides audio-visual services to the Faculty in the form of equipment and expertise. The Centre has a wide range of equipment, including DAT recorders, mini DV cameras, digital still cameras, and portable data projectors. For more information, see www.cofa.unsw.edu.au/units/resource/

A range of video and audio editing equipment and studios is also available at the College. Other services at the College include Digital Print and Copy Service (DP&CS) which provides various output services to the students and staff of COFA, UNSW and external clients. Services include: large format printing on a range of media; digital to colour copier; photographic continuous tone; CD burning; digital to film and high quality film scanning.

Clement Semmler Library

The Clement Semmler Library supports teaching, learning and research in art and design at the College of Fine Arts. For information regarding resources and opening hours, please refer to the website at http://info.library.unsw.edu.au/cofa/about/cofa.html

Ivan Dougherty Gallery

UNSW Ivan Dougherty Gallery provides an educational and cultural resource for the University, the broader national and international art community and the general public. The Gallery presents around ten to twelve group or thematic exhibitions per year of Australian and international recent and contemporary art in all media and disciplines: painting, sculpture, prints, drawings, design and installation work. There is a faculty and postgraduate exhibition held each year. Public programs such as forums, symposia and floor talks accompany exhibitions. These are attended by UNSW students and the general public. In addition, a publication is produced for each exhibition, generally in the form of an illustrated catalogue containing curatorial essays, artist texts and background information. The Gallery keeps a research archive of all published material and photographic images of each exhibition.

Ivan Dougherty Gallery was established in 1977 by the Alexander Mackie College of Advanced Education at 200 Cumberland Street, The Rocks and was named after Major General Sir Ivan Dougherty, Chairman of the first College Council. It moved to its current premises in 1981. UNSW Ivan Dougherty Gallery hours: Monday to Saturday 10am – 5pm (closed public holidays).

Website: www.cofa.unsw.edu.au/idg

UNSW College of Fine Arts also houses the COFA Exhibition and Performance Space (COFA Gallery), primarily for the benefit of student work. It oversees a dynamic program of week-long exhibitions featuring the work of COFA students, students from international art institutions, recurrent events such as ARTEXPRESS and various student award exhibitions.

COFA Gallery hours: Monday to Friday 10am – 5pm (closed public holidays).

Support for Students

The Counselling Service, Compass Programs, provides personal development resources, enhancement programs and confidential counselling to enrolled students of UNSW. Students are encouraged to access the Counselling Service in relation to any issue that might adversely affect their personal and academic progress. The service employs psychologists who are able to assist students with concerns such as: transition and adjustment to university life and academic expectations; support with sorting out academic or administrative issues; motivation and other difficulties which affect study; interpersonal problems or relationship conflicts; and personal concerns such as stress, anxiety, depression or loneliness.

Appointments at the College of Fine Arts can be made by telephoning (02) 9385 0733 or visiting the COFA service at ground floor, G Block, Room 05. Appointments on the Kensington campus are available between 9am and 5pm and can be made by dropping in or telephoning (02) 9385 5418 for the Counselling Service which is located on the 2nd Floor, East Wing, Quadrangle Building. Telephone counselling appointments and before/after hours appointments can be negotiated.

The Counselling Service website contains an introduction to the service and useful resources for students and staff: www.counselling.unsw.edu.au

Indebtedness to the University

A student becomes indebted to the University by non-payment of any fee or charge and by non-return of any College property. A student who is indebted to the University and who fails to make a satisfactory settlement of the indebtedness upon receipt of due notice will be penalised.

Students who fail to pay charges and late charges levied by the University will not be permitted to attend classes, undertake assessments or be granted any course grades.

Students who fail to return material borrowed from the Clement Semmler Library by the due date may be refused further borrowing privileges at the discretion of the College Librarian or delegate.

Students who fail to return on time materials borrowed from College Resource units may be refused further borrowing privileges, at the discretion of the Dean or delegate.

Students unable to return Library or other Resource items borrowed from the College are required to pay the cost of their replacement. The minimum charge per item will be determined by the College.

Students who fail to return any materials borrowed from the College, or who fail to satisfy any financial obligation to the University may incur one or more of the following penalties:

1. refusal of further borrowing privileges;
2. withdrawal of authority to attend classes;
3. refusal of permission to enrol;
4. withholding of the testamur for an award.

Such penalty will remain in force until materials are returned, compensation made, or other such obligations satisfied.

Building Rules

Students are required to abide by the building closing times determined for the campus. Opening and closing times will be determined by an authorised College officer from time to time and will be shown on official notice boards. Building and other campus premises or grounds are to be vacated at any time when required by an authorised officer of the College.

In the interests of safety and student welfare, persons under the age of 16 years are not permitted on campus unless expressly authorised by the Dean.

In the interests of general comfort and safety, students, staff and visitors are required to obey the campus rules regarding smoking, eating and drinking.

Students seeking to serve alcoholic drinks at social functions are required to have the prior permission of the Dean or delegate.

Animals are not permitted on any part of the campus, except with the permission of an authorised College officer.

Students who fail to comply with these rules may be required to show cause why they should not lose their entitlement to membership and privileges of the College and, subsequently, may be subject to such penalty as may be determined by the Dean.

Traffic and Parking Rules

The College grounds are private property and the University reserves the right to regulate the entry of individuals and vehicles and their behaviour and operation within the grounds. Students may not bring vehicles onto College grounds unless they have the express permission of the Facilities Zone Manager and accept the College Traffic and Parking Rules and the penalties for the infringement of those rules.

Any vehicle brought onto the grounds is required to be driven, parked and managed in compliance with the College rules and in the observance of the directions of authorised University/College officers.

The College does not accept responsibility for any damage caused to vehicles while travelling, standing or parked in the grounds, nor for any damage to, or loss of, accessories and/or contents.

The bringing or driving of vehicles or cycles on paths, grassed areas, or elsewhere on the grounds, except for roadways and car parks, is prohibited except with the permission of an authorised University/College officer.

Where a breach of the Traffic and Parking Rules occurs, the following penalties will apply:

• for the first infringement or offence, an authorised officer will record the vehicle registration number and issue a written “first parking warning notice”;
• for the second and subsequent infringements or offences, an authorised officer will record the vehicle registration number and issue a “second parking warning notice”. The driver shall be required to pay a minimum fine of $50.
Program Rules and Information

4800 Bachelor of Fine Arts

BFA

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description

The Bachelor of Fine Arts is a three year full-time degree. It is intended to provide an introduction for those who wish to involve themselves as practitioners in the visual arts or related fields.

Program Objectives and Learning Outcomes

The program aims:
1. To provide an opportunity for students to undertake rigorous and demanding studies at tertiary level from a wide range of approaches and disciplines within the visual arts;
2. To provide the opportunity for students to explore aspects of the visual arts through critical examination of the possibilities they offer and by use of available technological resources;
3. To encourage students to develop an increased self-motivation and commitment to their studies;
4. To provide an environment in which students may develop as far as possible the following characteristics and abilities both during and subsequent to their involvement in the program:
   - an understanding of concepts relevant to aesthetics and the visual arts;
   - an understanding of various media through practice and experimentation with such media;
   - a confidence and competence in decision making, together with an appreciative and informed awareness of viewpoints in the visual arts other than their own; and
   - an understanding of the historical and theoretical underpinning of contemporary fine art practice.
5. To encourage students to realise their own intellectual and creative potential;
6. To increase students’ awareness of, and sensitivity to, their environment.

Program Structure

Selection of Major Studies

Following the completion of Introductory Studies in Session 1, placement of students in a major sequence in Session 2 will be based on the results for Session 1 courses, student preferences and the availability of places. Students will be allocated to the highest preference that their aggregate of marks determines.

Students may undertake either a major sequence of 60 units of credit OR a major of 42 units of credit and a minor in another discipline of 18 units of credit.

Approved Disciplinary Streams

Painting/Drawing
Printmaking
Sculpture, Performance, Installation
Photomedia
Time Based Art
Ceramics
Jewellery
Textiles

Electives

Electives allow students to plan their studies to specific needs, interests and career aspirations. Some students may choose electives to focus and deepen their studies, others will choose electives from a broad range of art, art education, design, digital media, art history and theory courses. Electives may be taken as courses offered by other faculties of the university.

General Education Requirements

Students are required to complete 12 units of credit in General Education. General Education contributes to the broad educational objectives of university study, and is usually taken at the Kensington campus. No more than 3UOC may be taken from COFA General Education courses.

For further information on available courses, please refer to the General Education section in this Handbook.

Honours

BFA Honours is a program of higher level study available to BFA students who wish to undertake research in Fine Arts, extending into a Honours fourth year. BFA students, in consultation with lecturers, should apply for entry to the program by the end of Session 4 but no later than Session 6. For entry to Honours, students must have achieved a Distinction average in 48 units of credit in Fine Arts core courses from Years 2 and 3, and have completed, or be enrolled in a course in research practices.

In their Honours year, students undertake a research program in their area of Fine Arts specialisation. Each student is allocated a supervisor. Honours students are expected to perform at a satisfactory (SY) level throughout the program. The course is full-time. The body of work undertaken will be presented and assessed in exhibition form, accompanied by the presentation of a research paper relating to the student's studio practice.

Students are required to undertake formal activities in conjunction with SART4030 and SART4044:

1. To be eligible to graduate with Honours students must complete all requirements of the Pass degree (see below) and complete an additional 48 units of credit over the equivalent of 1 year full-time.
   a) Entry from completed 3rd year (without having graduated);
   b) To be eligible for entry to Honours a student must have achieved a distinction average in 48UOC in Fine Arts core courses in years two and three. Students will normally nominate at the end of year 2 but must nominate no later than the end of year 3, and must complete a course in research practices in art and design prior to entry to the Honours program.
   c) Entry where candidate has graduated with a Pass-level degree:
      • Applicants with a degree of Bachelor at pass level (i.e. without Honours) may be permitted to enrol in Honours with credit for all courses in the program prior to Honours. In this case applicants must satisfy the prerequisites for entry to the Honours or the equivalent of those prerequisites.
2. The Honours year consists of:
   a) an Honours Paper outlining studio research practice;
   b) Honours Studio Practice, which shall lead to the exhibition of work; and
   c) attendance at such seminars, lectures and classes shall be required.
Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the following weightings: Honours Studio Practice 75%, Honours Paper 25%. Honours is not awarded where the weighted mark is less than 65.

Academic Rules

1. For the Pass degree, a student must complete and pass 144 units of credit.
2. Students must complete 18 units of credit in approved Fine Arts Introductory Studies courses or their equivalent.
3. A degree must contain a major sequence of study or a combination of a major and a minor.
4. Students must complete 30 units of credit in courses approved as Fine Arts Contextual Studies [see Fine Arts Table B].
5. Students must complete 12 units of credit of General Education.
6. Students must complete 24 units of credit in electives.
7. A major sequence is defined as 60 units of credit in a single discipline. A major sequence may also be taken as 42 units of credit in one discipline with an 18 units of credit minor in another discipline. Major sequences are defined in Fine Arts Table A.
8. A minor sequence is defined as 18 units of credit in a single discipline which is available within but not taken as part of a major defined in Fine Arts Table A, or a sequence as defined in other undergraduate College of Fine Arts programs.
9. Not more than 60 units of credit in Level 1 courses will be counted towards the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.

### Typical UOC per Session

- 24 units of credit

### Program Description

The BFA BA degree program is the equivalent of four years full-time study. It enables students to combine the broad range of offerings available in the BA with the focused study of the visual arts and visual culture provided by the BFA. The major study in the BFA develops students’ career-related skills and experiences for the art and cultural industries or as arts practitioners, as well as a depth of knowledge in historical and social studies. Graduates will be prepared for employment in the arts and cultural industries. Students undertaking this combined degree program complete the core requirements of both the Bachelor of Fine Arts and the Bachelor of Arts.

### Program Objectives and Learning Outcomes

Students will acquire a sound knowledge base in both the Fine Arts and in their chosen specialisation/s in the Bachelor of Arts component of their degree.

### Program Structure

Please refer to the ‘Academic Rules’ below for program requirements and structure.

For information on courses available within the Fine Arts and Arts components of this combined degree program, students may also wish to refer to the following program entries:

- Bachelor of Fine Arts: 8000 Bachelor of Fine Arts
- Bachelor of Arts: 3400 Bachelor of Arts

### Academic Rules

1. Students must complete a program of study of 192 units of credit, of which:
   - a) at least 90 units of credit must be obtained in courses offered by the College of Fine Arts;
   - b) at least 84 units of credit must be obtained in courses approved for the Bachelor of Arts degree (excluding those offered by the College of Fine Arts); and
   - c) 18 units of credit in open electives.

2. The BFA component of the combined degree must include:
   - a) a major sequence (at least 42 units of credit) in an approved Fine Arts discipline [see Fine Arts Table A];
   - b) 12 units of credit in Fine Arts Introductory Studies;
   - c) SAHT1101 and SAHT1102; and
   - d) 24 units of credit from COFA electives.

3. Of the units of credit obtained in courses approved for the BA degree (excluding those offered by the College of Fine Arts):
   - a) between 24 and 36 units must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit in any one sequence of study;
   - b) no more than 54 units of credit in total may be from any one school, department, unit or interdisciplinary program;
   - c) at least 18 units must be obtained in Upper Level courses other than those taught by the school, department, unit or interdisciplinary program in which a major is being taken; and
   - d) at least 42 units of credit must be obtained in one of the following major sequences within the Faculty of Arts and Social Sciences:
     - AUSTR Australian Studies
     - CHIN Chinese Studies
     - COMD Development Studies
     - EDST Education
     - ENGL English
     - ENV Environmental Studies
     - EURO European Studies
     - FREN French
     - GERS German Studies
     - GREEK Greek
     - HIST History
     - HPSC History and Philosophy of Science
     - INDO Indonesian Studies
     - JAPN Japanese Studies
     - KORE Korean Studies
     - LING Linguistics
     - MEFT Media, Culture and Technology/Film/Theatre and Performance Studies
     - MUSC Music

Program Structure

The Foundation Year
All students complete foundation courses in art education (including school field experiences), fine arts and art history and theory. These courses provide a core, foundational experience. In subsequent years students develop plans emphasising their interests in the practices of art education and fine arts and design, contextualised through courses in their art education major including professional experience.

Art Education
Courses in art education provide students with investigations and applications of the theoretical and practical knowledge of the art educator. These compulsory courses include fieldwork and professional experience in a range of educational, cultural, community and industry contexts and the Professional Experience Internship.

Fine Arts
Courses in fine arts include: ceramics, drawing, jewellery, painting, photomedia, printmaking, sculpture, performance and installation, textiles and time based art. Students may plan sequences of courses in the fine arts as a major (at least 24 units of credit). In completing a Fine Arts major, students may choose courses offered as electives and the core in the Bachelor of Fine Arts.

Art History and Theory
Students complete SAHT1101 Mapping the Modern and SAHT1102 Mapping the Postmodern in their foundation year, and may take other courses as part of their electives.

Electives
Electives allow students to plan their studies to develop specific needs, interests and career aspirations. Students are encouraged to take at least one art education elective. Some students may choose electives to focus on art education and design, digital media, art theory and practice.

4801 Bachelor of Art Education

BArtEd

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The Bachelor of Art Education comprises an art education major, professional experience in art education, courses in fine arts, including art history and theory, electives and General Education courses.

Program Objectives and Learning Outcomes
Secondary art teachers are required to fulfil many and varied responsibilities. This program prepares students to function as a visual arts and design teacher in secondary schools, primary schools, community organisations, museums and galleries, as a curriculum development officer, designer, artist, art and design historian/theorist/critic. The opportunity exists within the course for students to focus on any of these roles.

- Stage 2: 48
- Stage 3: 48
- Stage 4: 48

The Fine Arts Studio is made up of 12 UOC Introductory Courses and 42 UOC from Major Disciplines.

42 UOC in BA Major

18 UOC Open Electives

Collected.

College of Fine Arts
General Education Requirements

Students are required to complete 12 units of credit in General Education. General Education contributes to the broad educational objectives of university study, and is usually taken at the Kensington campus. No more than 3UOC may be taken from COFA General Education courses. For further information, please refer to the General Education section in this Handbook.

Honours

The Bachelor of Art Education may be completed with Honours. Please refer to the Academic Rules for more information.

Academic Rules

To complete the requirements for the award of the degree of Bachelor of Art Education:

1. For the Pass degree, a student must complete and pass 192 units of credit which shall include:
   a) 69 units of credit in Core Studies in Art Education;
   b) 33 units of credit Professional Experience in Art Education;
   c) a Fine Arts Major, consisting of 12 units of credit in Fine Arts Introductory courses, SAHT1101 and SAHT1102, and at least 24 units of credit from Fine Arts courses;
   d) 12 units of credit of approved General Education courses;
   e) 24 units of credit in open electives; and
   f) 6 units of credit in Art Education electives.

2. No more than 60 units of credit in Level 1 courses will be counted towards the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.

3. Honours will be awarded to students with a Distinction average in at least 42 units of credit in Upper Level Core Studies in Art Education, who have successfully completed SAED4051 Practices of Research in Art, Design and Education and SAED4055 Honours Research Project in Art and Design Education Studies. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SAED4051 and SAED4055 and in accordance with School and Faculty policies.

4808 Bachelor of Design Bachelor of Art Education

BDes BArtEd

Typical Duration

3 years

Minimum UOC for Award

240 units of credit

Typical UOC per Session

24 units of credit

Program Description

The Bachelor of Design Bachelor of Art Education aims to prepare students as visual arts and design educators and design professionals working in graphic and media design, film and television production and post-production, festivals theatre exhibition and display, furnishings and interiors, ceramic textile and jewellery product design.

Program Objectives and Learning Outcomes

Students will acquire the skills needed to teach Technology and Applied Studies, particularly design and technology, in secondary schools, primary schools, community organisations, museums, and galleries and to work as curriculum development officers.

Program Structure

The Bachelor of Design Bachelor of Art Education comprises an art and design education double major, courses in design, including history, theory and aesthetics, electives and General Education courses.

The Foundation Year

All students complete foundation courses in art education (including school field experiences), design and design history theory and aesthetics. These courses provide a core, foundational experience. In subsequent years students develop plans emphasising their interests in the practices of art education and design, contextualised through courses in their art education major including professional experience.

Art and Design Education

Courses in art and design education provide students with investigations and applications of the theoretical and practical knowledge of the art and design educator. These compulsory courses include fieldwork and professional experience in a range of educational, cultural, community and industry contexts and the Professional Experience Internship.

Design

Studio disciplines in design include: applied, ceramics, environments, graphics, jewellery and textiles. Students may plan sequences of courses in design studio disciplines as a major (at least 24 units of credit) or a minor (at least 12 units of credit). The Design Studio component culminates in the Design Internship and Design Studio Project. Students also undertake a sequence of Design and Computer courses.

Design History, Theory and Aesthetics

Students complete 18 units of credit in design history, theory and aesthetics. Additional courses may be chosen as a design history, theory and aesthetics minor, comprising at least 18 units of credit.

Electives

Electives allow students to plan their studies to specific needs, interests and career aspirations. Some students may choose electives to focus and deepen their studies, others will choose electives across a broad range of art, art education, design, digital media, art history and theory courses. Electives may be taken as courses offered by other faculties of the university.

General Education Requirements

Students are required to complete 6 units of credit in General Education. General Education contributes to the broad educational objectives of university study, and is usually taken at the Kensington campus. No more than 3UOC may be taken from COFA General Education courses. For further information, please refer to the General Education section in this Handbook.

Honours

The Bachelor of Design Bachelor of Art Education may be completed with Honours. Students must apply for entry into the Honours pathway by the beginning of Session 9.

Honours in Design will be awarded to students with a Distinction average in at least 42 units of credit in Core Studies in Design taken at Upper Level who have successfully completed SDES4104. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SDES4104 and in accordance with School and Faculty policies.

Honours in Art Education will be awarded to students with a Distinction average in at least 42 units of credit in Core Studies in Design taken at Upper Level and who have successfully completed SAED4051 Practices of Research in Art, Design and Education and SAED4055 Honours Research Project in Art and Design Education Studies. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SAED4051 and SAED4055 and in accordance with School and Faculty policies.

Honours Class 1

Honours Class 2 Division 1

Honours Class 2 Division 2

Academic Rules

1. A student must complete 240 units of credit, made up of:
   a) 75 units of credit in Core Studies in Art Education;
   b) 33 units of credit Professional Experience in Art Education;
   c) 90 units of credit in Core Studies in Design, which shall include a major in a Design Studio discipline of at least 24 units of credit;
   d) 18 units of credit in History Theory;
   e) 18 units of credit in Elective Studies; and
   f) 6 units of credit in General Education.

2. Students may complete no more than 60 units of credit at Level 1 with a minimum of 24 units of credit of Level 1 courses being successfully completed prior to undertaking Upper Level courses.

3. Honours in Design or Art Education will be awarded to students with a Distinction average in at least 42 units of credit in Core Studies in Design or Art Education taken at Upper Level who have successfully completed certain prescribed courses. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in those prescribed courses and in accordance with School and Faculty policies.
4802 Bachelor of Design

**BDes**

**Typical Duration**
4 years

**Minimum UOC for Award**
192 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**

The Bachelor of Design is the equivalent of four years full-time study with the opportunity to undertake Honours study in the fourth year.

This program provides an education to students who wish to enter a range of different areas of the design profession, including graphic design, media design, film, television production and post-production, illustration, publications, interiors, theatre, exhibitions, display, festivals and furnishings, ceramics, textiles, jewellery and product design.

In Year 1, students will be involved in a comprehensive and intensive range of 2D, 3D and 4D (time based) experiences as well as the acquisition of historical, theoretical and technological skills and understandings. These include studying human individuals, society, the environment, and the application of computer skills to design.

In Years 2 and 3, students will extend their work on projects with the opportunity to integrate the following: graphics/media design, applied/object design, environments/spatial design, ceramics design, textiles design and jewellery design. Historical, theoretical and technological contexts will also be studied.

In Year 4, Design Studio Project leads into a graduation project/exhibition and is designed to parallel professional practice while integrating theoretical design studies. Year 4 students also undertake a period of work experience via an approved professional placement.

This program recognises the College of Fine Arts’ particular strengths, resources and requirements to provide an undergraduate program which places emphasis on an integrated approach rather than on narrow vocational specialisations. These strengths are its technology and its relationship with industry, its courses in visual arts, art education and art theory, and the ability to offer design from a creative and cross disciplinary base.

**Program Objectives and Learning Outcomes**

This program aims to provide students with a sound knowledge base for entry into a wide range of design-related professions. Students will acquire an understanding of the history and theory of design, in addition to design practice.

**Program Structure**

**General Education Requirements**

Students are required as part of their studies, to complete 12 units of credit in General Education courses or their equivalent. General Education courses, normally taken at Kensington campus, contribute to the broad educational objectives of the degree. No more than 3UOC may be taken from COFA General Education courses.

For further information, please refer to the General Education section in this Handbook.

**Honours**

The degree of Bachelor of Design is awarded as a degree with Honours where eligible students have achieved superior grades in their design studies and completed SDES4104 Honours Project and SAED4051 Practices of Research in Art and Design Education.

**Academic Rules**

The degree of Bachelor of Design is awarded as a Pass degree at the completion of four years full-time study or a degree with Honours where eligible students have completed the Honours pathway in the program.

1. A student must complete 192 units of credit, which shall include:
   a) 24 units of credit in Introductory Design Studio courses;
   b) 48 units of credit in Design Studio courses composed of 2 approved disciplinary streams;
   c) 12 units of credit in Design Studio courses in an additional disciplinary stream;
   d) 24 units of credit in approved Design computing courses;
   e) 30 units of credit in courses approved for Design Contextual Studies;
   f) 12 units of credit in General Education; and
   g) 18 units of credit in electives.

2. No more than 60 units of credit of Level 1 courses may be undertaken, with a minimum of 24 units of credit of Level 1 courses being successfully completed prior to undertaking Upper Level courses.

3. Honours will be awarded to students with a Distinction average in at least 42 units of credit in Upper Level Core Studies in Design, who have successfully completed SAED4051 Practices of Research in Art, Design and Education and SDES4104 Honours Project. Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the basis of results in SAED4051 and SDES4104 and in accordance with School and Faculty policies.

COLLEGE OF FINE ARTS 137
Program Description
The Bachelor of Art Theory offers intensive study of the visual arts and design. The degree program encourages students to take full advantage of its location within one of Australia's largest art and design schools and a leading university. The degree offers students in-depth study of art and/or design history and theory and prepares students for research careers or professional employment in the arts or design industries. Examples of likely careers include art administration, art and design criticism, art historical research, curating, museum education and arts project management.

Program Objectives and Learning Outcomes
Graduates from the Bachelor of Art Theory will have the ability to make informed critical judgements about various forms of visual culture, with a particular emphasis on understanding the visual arts and design and the historical-theoretical interpretation of images and objects. Graduates may benefit from the opportunity to combine theoretical and historical studies with studio-based subjects in art and design and to draw on a wide range of electives offered within the University.

Program Structure
The Bachelor of Art Theory comprises a theory major and a co-major, open electives and General Education courses. Students take a total of 48 units of credit per year; the program totals 144 units. The duration of the program is three years full-time equivalent.

Theory Major
Students take courses in the Art and Design Theory major to gain an understanding of the history of Art and Design. Some courses address key methods in art history. These courses provide a framework for other studies in the program.

Contextual Studies
In addition, students take a sequence of contextual studies courses, normally in Art and Design contexts. Students may take a different sequence, subject to the approval of the course authority.

Art Industry Contexts courses explore the institutional contexts in which art is exhibited, catalogued, collected, interpreted, evaluated and promoted. Although careers within the arts-related professions frequently require further study, these courses provide ‘hands-on’ experience in writing and publishing, and curating.

Art and Design Contexts includes courses which allow students to place the broader understandings of art and design history and theory explored in the major into the context of a close investigation of specific media histories.

Studio Contexts includes practical courses in the art and design studio that explore the workings of either the design industry or art practice.

Open Electives
These courses allow students to tailor their studies to their specific interests and career aspirations. Students are encouraged to take at least one elective from studio courses offered by the Schools of Art, Art Education, Media Arts or Design Studies. Courses may be chosen from any of those offered by Schools of the College of Fine Arts, or by other Faculties of UNSW, subject to prerequisite requirements.

General Education Requirements

Students are required as part of their studies, to complete 12 units of credit in General Education courses or their equivalent. General Education courses, normally taken at Kensington campus, contribute to the broad educational objectives of the degree. No more than 3UOC may be taken from COFA General Education courses.

For further information, please refer to the General Education section in this Handbook.

Honours

To be eligible to graduate with Honours students must complete all requirements of the Pass degree (see below) and complete an additional 48 UOC over the equivalent of 1 year full-time.

a) Entry from completed 3rd year (without having graduated):

- To be eligible for entry to Honours a student must have achieved a distinction average in 48UOC in Art Theory core courses in years two and three. Students will normally nominate at the end of year 2 but must nominate no later than the end of year 3, and must complete a course in research practices in art and design prior to entry to the Honours program.

b) Entry where candidate has graduated with a Pass-level degree:

- Applicants with a degree of Bachelor at pass level (i.e. without Honours) may be permitted to enrol in Honours with credit for all courses in the program prior to Honours. In this case applicants must satisfy the prerequisites for entry to the Honours or the equivalent of those prerequisites.

The additional Honours study consists of:

1. SAHT4211 Thesis A and SAHT4213 Thesis B;

2. SAHT4212 Honours Seminar [which may be substituted by an Upper Level or postgraduate course, subject to approval by the Program Authority]; and
3. 6 units of credit from an Upper Level or postgraduate course, subject to approval by the Program Authority.

Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the following weightings: Thesis 70%, Honours Seminar 15%, Elective course 15%. Honours is not awarded where the weighted mark is less than 65.

Academic Rules

Students must complete and pass 144 units of credit. This comprises:

a) a major in Art and Design Theory, made up of 78 units of credit in approved courses [see Art Theory Table A], which must include the following Level 1 courses: SAHT1101, SAHT1102, SAHT1211 and SAHT1221;
b) 30 units of credit in courses approved as Art Theory Contextual Studies [see Art Theory Table B], which must include SAHT1221;
c) 12 units of credit in approved General Education courses;
d) 24 units of credit in electives; and
e) no more than 60 units of credit in Level 1 courses will be counted towards the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.

4803 Bachelor of Art Theory/9302 Master of Art Administration Fast-Track Program

This ‘fast-track’ progression recognises that students who have completed the Bachelor of Art Theory (BArtTh) have undertaken undergraduate studies which prepare them specifically for the Master of Art Administration (MArtAdmn) and will allow those students to benefit from specialisation at undergraduate level. The ‘fast-track’ progression enables students to take four courses of the Master of Art Administration in the third year of the Bachelor of Art Theory. This effectively reduces the total number of courses and the time taken to complete both programs by a full session. The program can be completed in 4 years full-time equivalent study.

Academic Rules

1. Admission in the first instance is to the Bachelor of Art Theory (4803). At the end of Year 2, candidates will be permitted to transfer to the Fast-Track Program, subject to the approval of the Head of School of Art History and Theory. Approval will normally require an average of 65% in courses studied.

2. Within the fast-track program, 144 units of credit are credited to the undergraduate component of the degree and 72 units of credit are credited to the postgraduate component of the degree.

3. The undergraduate component of the degree must include:
   a) a major comprising 72 units of credit in Art and Design Theory, including 12 units of credit of MArtAdmn core courses other than SAHT9115 and SAHT9116;
   b) Contextual Studies (36 units of credit) in Art and Design Contexts, including 12 units of credit of MArtAdmn core options. The co-major shall not include SAHT3222 Industry Placement;
   c) 24 units of credit of electives; and
   d) 12 units of credit in General Education.

4. The postgraduate component of the degree must include:
   a) 24 units of credit of core courses from the Master of Art Administration, including SAHT9115 Internship and SAHT9116 Research Paper. Students who have completed SAHT2221 Genres of Art Writing are excluded from SAHT9112 Writing for Different Cultures and Audiences; and
   b) 48 units of credit of Master of Art Administration core options. Subject to approval, students may substitute for core options, other postgraduate courses offered by UNSW.

5. For entry to BArtTh Honours a student must complete the Theory major and have achieved an average of 75% across Theory major courses in Stages 2 and 3. Students would normally complete an Honours year at the completion of the Fast-Track Program.

6. Where a student does not go on to complete the fast track final year, he or she may graduate with a BArtTh provided normal program rules are met. Up to 24 units of credit of postgraduate courses completed may be credited towards the BArtTh.

7. Students taking the Fast-track Bachelor of Art Theory and Master of Art Administration are not permitted to take out the Graduate Certificate in Art Administration. ‘Fast-track’ students, however, are permitted to exit with the Bachelor of Art Theory and Graduate Diploma of Art Administration (3.5 years full-time equivalent study). In this case students must complete:
   - SAHT9111 Management and Organisation
   - SAHT9113 Cultural Property, Ethics and the Law
   - SAHT9114 Exhibition Management and Curatorial Studies
   - SAHT9126 Organisational Psychology
   Plus 4 postgraduate core option/elective courses from the Master of Art Administration.

4806 Bachelor of Art Theory Bachelor of Arts

BArtTh BA

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description

The BArtTh BA degree is the equivalent of four years full-time study. It enables students to combine the broad range of offerings available in the BA with the focused study of the visual arts and visual culture provided by the BArtTh. The co-major in Contextual Studies in the BArtTh develops students’ careers-related skills and experiences and the Art and Design Theory major provides depth of knowledge about art and design, both in historical and contemporary contexts. The BA component of the degree offers a wide range of complementary humanities and social science studies. Graduates will be prepared for employment in the arts and cultural industries.

Program Objectives and Learning Outcomes

On completion of this program, students will have attained a sound knowledge base in Art Theory and also their chosen Arts specialisation/s.

Program Structure

Please refer to the ‘Academic Rules’ below for program requirements and structure.

For information on courses available within the Art Theory and Arts components of this combined degree program, students may also wish to refer to the following program entries:

4803 Bachelor of Art Theory
3400 Bachelor of Arts

Academic Rules

1. Students must complete a program of study of 192 units of credit, of which:
   a) at least 90 units of credit must be obtained in courses offered by the College of Fine Arts;
   b) at least 84 units of credit must be obtained in courses approved for the Bachelor of Arts degree (excluding those offered by the College of Fine Arts); and
   c) 18 units of credit in electives.

2. The BArtTh component of the combined degree must include:
   a) a major in art and design theory, consisting of 60 units of credit in approved courses [see Art Theory Table A in the BArtTh section]. The major in Art and Design Theory must include the following Level 1 courses: SAHT1101 Mapping the Modern, SAHT1102 Mapping the Postmodern, SAHT1211 Theories of the Image and SAHT1212 Theories of Art History and Culture; and
   b) a student must complete 30 units of credit in courses approved as Art Theory Contextual Studies [see Art Theory Table B in the BArtTh section], which must include SAHT1221 Contexts for Art.

3. Of the units of credit obtained in courses approved for the BA degree (excluding those offered by the College of Fine Arts):
   a) between 24 and 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit in any one sequence of study;

### 4807 Bachelor of Art Theory Bachelor of Social Science

**BArtTh BSocSc**

**Typical Duration**
4 years

**Minimum UOC for Award**
192 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**
The BArtTh BSocSc degree is the equivalent of four years of full-time study and enables students to combine the social science and policy studies available in the BSocSc with the study of the visual arts and culture, and art administration provided in the BArtTh. Graduates will be prepared for careers or postgraduate research studies in policy and administrative areas within the rapidly developing arts and culture industries. The professional contexts courses of the BArtTh and BSocSc will enable students to develop career-related skills and experiences, while the theoretical/historical contexts subjects in the BArtTh and the social science courses in the BSocSc will provide depth of knowledge about the arts and society.

Students undertaking this combined degree program complete the core requirements of both the Bachelor of Art Theory and the Bachelor of Social Science degrees, together with an approved major sequence.

**Program Objectives and Learning Outcomes**
On completion of this program, students will have attained a sound knowledge base in both Art Theory and Social Science.

**Program Structure**
Please refer to the ‘Academic Rules’ below for program requirements and structure.

For information on courses available within the Art Theory and Social Science components of this combined degree program, students may also wish to refer to the following program entries:

- 4803 Bachelor of Art Theory
- 3420 Bachelor of Social Science

### Academic Rules

1. Students must complete a program of study carrying 192 units of credit of which:

   a) at least 90 units of credit must be obtained in courses offered by the College of Fine Arts;

   b) at least 90 units of credit must be obtained in courses offered by the Faculty of Arts and Social Sciences.

2. The BArtTh component of the combined degree must include:

   a) a major (60 units of credit) in Art & Design Theory, which must include the following Level 1 courses: SAHT1101 Mapping the Modern, SAHT1021 Mapping the Postmodern, SAHT1211 Theories of the Image and SAHT1212 Theories of Art History and Culture; and

   b) Contextual Studies (30 units of credit).

3. The BSocSc component of the combined degree must include:

   a) the following core courses of 48 units of credit in the BSocSc program:

      | Course Code | Course Title |
      |-------------|--------------|
      | SLP1000     | Social Science and Policy OR |
      | SLP1002     | Research Policy Analysis |
      | SLP1001     | Research Information Management |
      | SLM2000     | Political Economy and the State |
      | SLP2001     | Applied Social Research 1 |
      | SLP2002     | Policy Analysis Case Studies |
      | SLP3000     | Social Theory and Policy Analysis |
      | SLP3001     | Applied Social Research 2 |
      | SLP3002     | Social Science and Policy Project |

   b) a major sequence in one of the following areas -

      - AUST Australian Studies
      - COMD Development Studies
      - ECON Economics/ Economic History
      - Environmental Studies
      - EURO European Studies
      - GEOH/S Geography/ Geology
      - HIST History
      - HPSC History & Philosophy of Science
      - MFT Media/Theatre and Performance Studies
      - MGMT International Business/ Industrial Relations/ Human Resources Management
      - PECON Political Economy
      - PHIIL Philosophy
      - POLS Politics and International Studies
      - PSYC Psychology
      - SOCA Sociology and Anthropology
      - SPAN Spanish and Latin American Studies
      - WOMS Women’s and Gender Studies

4. Students who satisfy the normal prerequisites for the BArtTh(Hons) or the BSocSc(Hons) may qualify for Honours in either of these programs by completing an additional year of study (48 units of credit).

---

### 4703 Bachelor of Art Theory Bachelor of Laws

**BArtTh LLB**

The course is a five year full-time degree leading to the award of the two degrees of Bachelor of Art Theory and Bachelor of Laws (BArtTh LLB).

The Program Authority for this combined program is the Faculty of Law.

For full details of this program, please refer to the Faculty of Law section in this Handbook.

Program Description
The Bachelor of Digital Media (BDM) is the equivalent of three years full-time study, designed to meet industry demand for creative practitioners and content developers who possess multiple skills and breadth of knowledge in interactive media, sound, web design, digital imaging, 3D modelling, animation, critical and creative thinking within the domain of digital media. The BDM offers students strong fundamentals combined with creative development and flexibility in the later stages of the program to shape the nature of their core studies.

Program Objectives and Learning Outcomes
The Bachelor of Digital Media aims to produce creative content developers with sound technical skills and the ability to work creatively and collaboratively across diverse media.

Graduates will be key players in the arts, digital media, entertainment and internet-based media with strengths in creative design and technical innovation.

Program Structure
The degree of Bachelor of Digital Media is awarded as a Pass degree at the completion of three years full-time study. An Honours degree is available through the completion of an additional year of study in the Honours program.

General Education Requirements
Students are required as part of their studies, to complete 12 units of credit in General Education courses or their equivalent. General Education courses, normally taken at Kensington campus, contribute to the broad educational objectives of the degree. No more than 3 UOC may be taken from COFA General Education courses.

For further information on available courses, please refer to the General Education section in this Handbook.

Honours
BDM Honours is a program of higher level study available to BDM students who wish to undertake research in Digital Media, extending into an Honours fourth year. BDM students, after consultation with lecturers, should apply for entry to the program by the end of Session 4 but no later than Session 5. For entry to Honours, a student must have achieved a Distinction average in 48 UOC of core courses from Years 2 and 3.

In the Honours year, students undertake a research program in Digital Media. Each student is allocated a supervisor. Honours students are expected to perform at a satisfactory level throughout the program. The course is full-time. The body of work undertaken will be presented and assessed in exhibition form, accompanied by the presentation of a research paper relating to the student’s studio practice.

Academic Rules
1. For the Pass degree, a student must complete and pass 144 units of credit.
2. A degree must contain a major in Digital Media defined as 78 units of credit in approved courses [see Digital Media Table A].
3. A student must complete 30 units of credit in courses approved as Digital Media Contextual Studies [see Digital Media Table B].
4. A student must complete 12 units of credit in General Education.
5. A student must complete 24 units of credit in electives.
6. No more than 60 units of credit in Level 1 courses will be counted toward the degree, with a minimum of 24 units of credit in Level 1 courses being successfully completed prior to undertaking Upper Level courses.
7. To be eligible to graduate with Honours, a student must complete all requirements of the Pass degree (see above) and complete an additional 48 units of credit over the equivalent of 1 year full-time.

a) Entry from completed 3rd year (without having graduated):
   - To be eligible for entry to Honours a student must have achieved a distinction average in 48 UOC in Digital Media core courses in years two and three. Students will normally nominate at the end of year 2 but must nominate no later than the end of year 3, and must complete a course in research practices in art and design prior to entry to the Honours program.
   - Applicants for a degree at pass level (i.e. without Honours) may be permitted to enrol in Honours with credit for all courses in the program prior to Honours. In this case applicants must satisfy the prerequisites for entry to the Honours or the equivalent of those prerequisites.

8. The Honours year consists of:
   a) an Honours Paper outlining studio research practice;
   b) Honours Studio Practice, which shall lead to an exhibition of work;
   and
   c) attendance at such seminars, lectures and classes as shall be required.

Honours is awarded in the following classes: Honours Class 1, Honours Class 2 Division 1 and Honours Class 2 Division 2. The class of Honours awarded shall be determined on the following weightings: Honours Studio Practice 75%, Honours Paper 25%. Honours is not awarded where the weighted mark is less than 65.

Online Courses offered by COFA Online

COFA Online offers to quality and engaging fully online courses in art and design to students from all faculties at UNSW. This is made possible through courses offered at both general education and elective level. It is also possible that students from external universities and education institutions, both in Australia and overseas, to enrol and take part in the courses. Students who enrol in online courses are contacted via their UNSW email accounts with all administrative details for the courses they have chosen.

New online courses are added each session, so please check the COFA Online website for updates on new course offerings: www.cofa.unsw.edu.au/online

146 UNSW UNDERGRADUATE HANDBOOK
Elective Courses for Undergraduate Programs

Students may choose electives from the courses listed below that are offered by the College of Fine Arts. It is also possible to choose electives from other faculties of the University. All other courses (i.e. core courses of degrees) offered at the College of Fine Arts may be available to be undertaken as electives as well. Advice should be sought from the relevant Program Authority if you wish to take courses that are not listed in this section of the Handbook as electives.

Timetable constraints and availability of staff do not allow all courses to be offered every year, although endeavours are made to offer the full range over a 3 year period.

Please note that same courses have prerequisites and/or need to be completed in sequential order (i.e. SOMA3615 Sound Media 2 must be completed before SOMA3551 Sound Media 3).

Art Education Electives

Contexts and Diversity
SAED2474 Art Education and the Primary School
SAED2475 Multicultural Contexts
SAED2477 Art Education and the Environment
SAED2478 Art Education and Aboriginal Studies
SAED2479 Dialogues and Communities
SAED2480 The Art Museum and Art Education

Media and Communications
SAED2481 Media and Communication Contexts for Art and Design
SAED4471 Visual Arts Workshop 2

Politics, Practices and Education
SAED2471 Histories of Australian Education
SAED2472 Creativity in Art and Design Education
SAED2473 Seminar in Art Education
SAED4472 Independent Study in Art, Design and Education
SAED4473 Politics and Identity in Art and Design Education
SAED4474 Dilemmas of Praxis: The State, the School and the Educator

Art History and Theory Electives

The Western Tradition
SAHT2111 Theories of the Image
SAHT2211 Eurocentred Visions: Grand Narratives in Western Art
SAHT2224 Art and Biogenetics: Breeding the Body Beautiful
SAHT2601 The Art of Ancient Cultures
SAHT2606 The Painting of Modern Life: French and English Painting in Focus
SAHT2612 Art and Its Others: Interdisciplinarity in Contemporary Art
SAHT3211 Art After Postmodernism

Australian Art History
SAHT2214 Approaches to Australian Art

Cross Cultural Studies
SAHT2212 Art and Cultural Difference
SAHT2633 Peripheral Visions: Perspectives of Colonial and Post Colonial Art

Critical and Cultural Theory
SAHT2222 Memory and Self
SAHT2227 Fashion History and Theory
SAHT2641 Modern Aesthetics: From the Enlightenment to the 21st Century
SAHT2642 Art, Gender, Sexuality and the Body
SAHT2643 Pornography, Art and Politics
SAHT3212 Art and Everyday Life
SAHT3213 Museum Studies: Exhibitions, Collections and Material Culture

Media Studies
SAHT2649 Creative Writing for Artists
SAHT2661 Experimental Film and Video since the 1960s
SAHT2663 Avant-Garde Cinema: 1900-1950
SAHT2665 After Modern Sculpture: Installation, Structures and Spaces
SAHT2674 A History of Drawing
SAHT3613 Digital Theory and Aesthetics
SAHT3614 Screen Culture
SAHT3669 Critical Theories of Photography

A Message from the Dean
Welcome to the Faculty of Commerce and Economics at the University of New South Wales – one of Australia’s leading universities. After fifty years of dynamic growth, UNSW has a reputation for excellence, sustained innovation, scholarship, research and practical application; and the Faculty of Commerce and Economics plays an important role in maintaining this reputation.

The Faculty attracts high-achieving students from across the region, with strength, depth and quality across eight teaching and research units. Through excellence in scholarship we aim to enhance the capability of our students and staff to add value to the organisations, professions and communities in which they aspire to leadership roles.

The Faculty values its close relationships with industry and the professions, ensuring a high demand for our graduates, many of whom are now leaders in industry, government, politics and academia.

The Faculty is committed to supporting its students throughout their learning experience. We have a wide range of support services, including an Educational Development Unit, a Faculty Student Centre to assist with administrative matters, and Undergraduate and Postgraduate Advisors in each school. Together we aim to offer you a rewarding and stimulating environment in which to pursue your studies. I wish you every success.

Greg Whittred
Dean
Faculty of Commerce and Economics
Faculty Information and Assistance

Who Can Help?
If you require advice about enrolment, degree requirements, progression within programs or any other general matters, contact the Faculty of Commerce and Economics Student Centre, Ground Floor, John Goodsell Building; telephone (02) 9385 3187, fax (02) 9313 7767, email ugfce@unsw.edu.au.

Office Hours:
During Orientation week, Week 1 and Week 2 of session:
Monday – Thursday 9.00am – 6.30pm
Friday 9.00am – 5.00 pm
Other weeks:
Monday – Friday 9.00am – 5.00pm
For specific information and advice about academic course content, contact the appropriate schools/teaching units.

The Faculty of Commerce and Economics Website
Please refer to the Faculty website for further information: www.fce.unsw.edu.au

Course Descriptions
Descriptions of courses offered in 2006 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Computer Information
The Faculty has a number of laboratories located in the Quadrangle and John Goodsell Buildings, all of which are equipped with Pentium machines. More detailed information is available in the Faculty ‘Student IT Resource Handbook’ or on the Faculty website.

Education Development Unit
In pursuit of the FCE’s vision to be the leading business faculty in the Asian region, the Education Development Unit (EDU) provides support, development and leadership for both staff and students in the area of education quality and innovation.

The EDU supports all FCE students in the development and enhancement of their academic skills, by providing a range of strategies including:

- Transition program - Prior to commencement of studies, a one-day program is offered to all FCE undergraduate students to prepare them for the first important weeks at university by developing knowledge of individual learning styles and deeper learning approaches to academic subjects.
- Orientation programs – Offered for both undergraduate and postgraduate programs, orientation introduces students to teaching and learning approaches, learning expectations, strategies for successful study in the Faculty and provides opportunities to meet Faculty staff and students.
- Discipline-specific resources and activities – The EDU works with academic staff from different disciplines to develop workshops and resources relevant to specific disciplines.
- Academic skills workshops – Provided throughout each session, these workshops are free and specifically for FCE students. Topics include referencing, reading critically, essay and report writing, case analysis, presentation skills, working in groups, and exam preparation.
- Resources and handouts – Available both in print and online, resources include handouts on academic skills and a range of other topics for FCE students.
- Consultations – Confidential individual or small group consultations regarding any learning issues are offered to all FCE students.

FCE students visiting the EDU may wish to talk to staff about their learning, their language needs and improving their academic performance. Students can collect or borrow appropriate support materials, find out about workshops or make appointments for a one-hour consultation.

For further information, visit the EDU website at http://education.fce.unsw.edu.au, or drop in at the EDU Learning Assistance Centre, Room 2039, level 2, South Wing, Quadrangle Building or phone: (02) 9385 5384.

Assumed Knowledge
The Bachelor of Commerce, Bachelor of Commerce in Marketing, Tourism and Hospitality Management, Bachelor of Economics, Bachelor of Science in Information Systems, Bachelor of Science in Business Information Technology and all combined programs offered by the Faculty assume students to have achieved a prescribed standard in Mathematics at the Higher School Certificate or equivalent. More details are available from the Admissions Office.

Course Timetables
Undergraduate course timetables are available to re-enrolling students via the Faculty website before the end of the current year of study. New undergraduate students are allocated individual course timetables for their first session enrolment at the time of enrolling.

Enrolment Procedures
Interested applicants to the Faculty of Commerce and Economics should contact the Faculty of Commerce and Economics Student Centre or the Admissions Office.

New students are informed of enrolment procedures after they have received an offer.

All re-enrolling UNSW students are emailed information with regards to enrolment appointments to enable them to enrol online using myUNSW.

Examinations
Additional information on examinations and assessment, rules and restrictions, is included in the front of this Handbook.

For courses under the control of the various schools in FCE, the published grade will be determined on the basis of a composite mark which will include, on a weighted basis, the results of the final examination, other prescribed examinations, essays and assignments. The exact method of weighting the components of the composite mark may differ from course to course, but students are advised of the weighting at the commencement of each session.

Supplementary Examinations
Students may be required to sit for an oral and/or written supplementary examination, which will normally be held in the two weeks preceding the commencement of Session 2 or in December/January. In general, this opportunity will only be offered to a student who has been prevented from taking an end of session examination or who has been placed at a serious disadvantage during the examination and whose circumstances have improved considerably in the period since the examination was held.

Students are advised not to undertake programs with which they cannot cope adequately and re-enrolling students are encouraged to seek the advice of enrolling officers in the faculty on this matter.

Use of Calculators
The Faculty of Commerce and Economics has resolved to advise all students to equip themselves with a portable electronic calculator, preferably one which possesses, in addition to the four basic arithmetic functions, those involving discounting and present value calculations. These calculators should be a valuable study aid in expediting the routine aspects of assigned practical exercises throughout the year in many courses. Such calculators may also be permitted, subject to the discretion of individual examiners, in examinations for courses taught in the Faculty.

Schools and Disciplines
The Faculty of Commerce and Economics includes the Schools of Accounting, Actuarial Studies, Banking and Finance, Business Law and Taxation, Economics, Organisation and Management, Information Systems, Technology and Management, and Marketing.

School of Accounting
Head of School: Professor Wai Fong Chua
Administrative Officer: Colin Withers

Accounting is concerned with the provision of information for the management of economic resources and activities by means of measurement, communication and interpretation of financial data; with the development of information systems; and with the financial accountability and management of business and public enterprises. By economic resources, we mean both tangible and intangible resources.
Accounting information is increasingly used to manage intangible resources such as an organisation’s knowledge base, its supplier/customer relationships, its brands etc.

Accounting lies at the head of economic exchange, whether conducted in physical or electronic markets. It enables students to comprehend many of the fundamental principles, processes and outcomes of business, thereby equipping students for a wide range of careers in businesses (from chartered accounting, management consulting, provision of financial services to general management). Graduates are employed not only as accountants, but also as entrepreneurs, entertainment promoters, treasurers, chief financial officers, etc.

The School of Accounting offers undergraduate programs leading to a Bachelor of Commerce with either a single major in Accounting (8 accounting courses) or a double major (7 accounting courses). The most popular double majors are with Finance, Information Systems, Business Law and Taxation.

The School of Accounting at UNSW is internationally renowned for its innovative and high-quality teaching at both undergraduate and graduate levels. Our teachers have won national teaching awards as well as Vice-Chancellor Teaching Awards. Classes involve students in an interactive and thought-provoking learning environment. We also increasingly use the web as a learning tool and our courses are constantly revised to meet new challenges in a globalised and digitised world. We expose our students to e-business, encourage them to understand the links between business strategy and processes, offer advanced courses in assurance and business risk, and help them appreciate global influences on financial reporting and management.

---

**Actuarial Studies**

**Head:** Professor Michael Sherris  
**Administrative Assistant:** Bindya Subba

Actuarial Studies involves the application of quantitative, economic and financial models and analysis to long term financial management particularly in life insurance, general insurance, health insurance and superannuation, as well as in other financial services. The actuarial courses cover the models used to quantify and manage risks such as survival, birth, marriage, sickness, retirement, accident, fire, flood, asset default and asset value fluctuations and to study their financial effect on the obligations of insurance companies, benefit plans and other financial security systems. The courses provide the foundations for actuarial practice in the pricing, reserving, investment, and financial management of life insurance, general insurance superannuation and pension funds. The actuarial program of study also aims to develop the use of judgement and to provide the necessary combination of mathematical, statistical, accounting, economic, financial, demographic, analytical and modelling skills for a rewarding career in the financial services industry.

The Bachelor of Commerce allows students to combine a major in Actuarial Studies with a major or minor in a broad range of other disciplines including business economics, business statistics, business strategy and economic management, economic history, financial economics, human resource management, management, taxation, modern languages, accounting, finance, international business, business law, information systems, marketing, and industrial relations. The Actuarial Studies program also provides students who meet the required standards with the opportunity to apply for exemptions from some or all of the Part I examinations of the Institute of Actuaries of Australia and entry into the actuarial profession. The Actuarial Studies Co-op Scholarship Program provides industry experience integrated with the academic requirements for the Bachelor of Commerce.

The courses are quantitative and intellectually demanding. They require a very strong ability and interest in mathematics and statistics and their applications to business. Success as a professional actuary also requires problem solving skills, reasoning, well-rounded business skills and an ability to communicate complex ideas in simple terms.

Actuaries are employed by insurance companies, superannuation funds, banks, and governments and also practise as consulting actuaries. The financial rewards from an actuarial career compare very well with other professions and employment prospects are very good. To qualify as an actuary, students must complete the examinations of one or more of the professional bodies which regulate all commercial activity. The study of commerce has always included an examination of the laws which govern its operation and it is the role of the School of Business Law and Taxation to provide a range of courses addressing areas of law relevant to students in the Faculty of Commerce and Economics.

The School of Banking and Finance offers four-year scholarship programs in Finance Honours. The Finance Honours program includes a total of fifteen months industrial training. Entry is gained through the Co-op selection process. For further details on Co-op scholarships, see your high school careers advisor or contact the UNSW Co-op Program Office, telephone (02) 9385 5116, website: www.co-op.unsw.edu.au

---

**School of Business Law and Taxation**

**Head of School:** Professor Andrew Terry  
**Administrative Assistant:** Bibi Moore

Law and commerce are inextricably intertwined. The entire fabric of commerce is woven from a complex legal regime, judicial and statutory, which regulates all commercial activity. The study of commerce has always included an examination of the laws which govern its operation and it is the role of the School of Business Law and Taxation to provide a range of courses addressing areas of law relevant to students in the Faculty of Commerce and Economics.

The courses offered by the School fall into three broad categories: ‘foundation’ courses which expose students from all disciplines in the faculty to a broad general education in the legal environment and regulation of commerce; ‘professional’ courses which are recognised by the CPA Australia and the Institute of Chartered Accountants in Australia.
for admission to those bodies; and ‘specialist’ business law and taxation courses relevant to disciplinary streams within the Faculty.

The School’s mission is different to that of a law school – it is driven by an audience which is trained for commercial rather than legal practice. The School’s focus is on teaching and research which is contemporary, relevant and innovative, and which adds value to the disparate disciplines which comprise ‘commerce’.

At the undergraduate level, the School offers co-majors in Business Law and in Taxation.

School of Economics

Head of School: Professor William Schworm

Administrative Officers: Clea Bye, Nadine Caasley, Jenny Reeks and Catriona Reid

The School of Economics offers full-time and part-time courses leading to the degrees of Bachelor of Commerce and Bachelor of Economics with specialisations in economics, econometrics, economic history, financial economics, business strategy & economic management, business statistics and business economics.

The School undertakes the majority of teaching in the Bachelor of Economics program and an important part of the Bachelor of Commerce core. The study of economics, as part of the BCom degree, has built up a reputation of combining an excellent academic standard with practicality and flexibility. Our offerings in the BCom give students the utmost amount of choice so they can select options that complement their career paths. Students can proceed with a minor or single major in business strategy & economic management, financial economics, business economics, business statistics or economic history, or they may combine two of these as a double major or any one with other disciplines of the faculty as a double major.

The Bachelor of Economics program gives a solid grounding in economic analysis and quantitative techniques. It allows students to do a single major in economics, econometrics, economic history or financial economics or any of these may be combined with each other or other disciplines of the faculty as a double major.

The core requirements of the Bachelor of Economics program comprise three years of training in modern economic analysis, instruction in quantitative methods and techniques, an in-depth analysis of economics or econometrics and, in most cases, some exposure to economic history. The specialisation in economics provides a basic training in economics which is suitable for a wide range of careers in the private and public sectors of the economy.

In both the Bachelor of Economics and the economics specialisations in the Bachelor of Commerce, students who have a good academic record are encouraged to apply for enrolment in the Honours program. This requires an additional year of study. Students who wish to become professional economists, econometricians or economic historians are strongly advised to take the Honours course. Potential Honours students should discuss this option with the Honours Coordinator at the School of Economics.

School of Information Systems, Technology and Management

Head of School: Professor Graham Low

Administrative Officers: Tricia Hartley

Information Systems (IS) involves the planning, analysis, design and maintenance of computerised systems used to process information in commerce, industry, government and research organisations. Information Technology (IT) is the underlying mechanism that controls these systems. Information Systems and Information Technology are indispensable to the operations of most modern organisations. In an information systems course, you will study how information systems are planned, analysed, designed, operated and managed. Throughout the program you will develop conceptual and practical skills relating to the way in which computer systems are used within organisations.

Graduates often follow careers as programmers, analysts, business analysts, information technology specialists, data administrators, EDP auditors, e-commerce specialists and web managers.

Degrees offered by the School of Information Systems, Technology and Management:

1. Bachelor of Commerce majoring in Information Systems (program 3502, plan code INFSA13502): This degree is tailored for those more interested in IS and management aspects of the discipline. With this degree you can combine IS and another Commerce discipline such as accounting, marketing, actuarial studies or finance. Note that transfers are possible at the School’s discretion to or from the Co-op scholarship program (ISM) as defined below.

2. Bachelor of Science in Information Systems (program 3979): This program is designed for those more interested in the use and application of IS and IT in a commercial environment. The program is structured and includes courses from many disciplines including Information Systems, Information Technology and Management, Computer Science, Mathematics, as well as Commerce and Economics courses. Note that transfers are possible at the School’s discretion to or from the Co-op scholarship program (BIT) as defined below.

Co-op Scholarships

The UNSW Co-op Program offers four-year scholarship programs in Information Systems and Information Technology. These programs include three six-month industrial training periods. Entry is gained through the scholarship selection process.

3. Bachelor of Commerce majoring in Information Systems and Management (program 3502, plan code INFSF13502). ISM is a generalist business degree that concentrates on the application of IS to business management and decision-making. In addition to completing a major study in the discipline of Information Systems, a minor may be chosen from a number of offerings in the Faculty of Commerce and Economics.

4. Bachelor of Science majoring in Business Information Technology (program 3971). BIT focuses on technical knowledge and theory for the application of IT and IS in a commercial environment. The program is structured and includes courses from many disciplines including Information Systems, Information Technology and Management, Computer Science, Mathematics, as well as Commerce and Economics courses.

For further details on Co-op scholarships see your high school careers advisor or contact the UNSW Co-op Program Office, telephone (02) 9385 5116, website: www.co-op.web.unsw.edu.au/

School of Marketing

Head of School: Professor Paul Patterson

Administrative Officer: Nadia Withers

Marketing is a dynamic management discipline concerned with exchange processes in competitive markets. It is of critical importance in all sectors of the economy, including local and international businesses and profit-making and non-profit making organisations. The business function of marketing seeks to identify the needs and wants of customers, determine potential target markets, design appropriate products and services, develop pricing strategies, communicate this offering to customers and distribute it to the marketplace. A wider goal of marketing is to create an organisation-wide ethos that is responsive to customer needs, aware of competitive forces and builds on core strengths of the organisation.

Graduates find careers in product and brand management, service quality management, new product planning, international marketing, logistics and distribution, sales and purchasing, advertising, direct marketing and public relations, marketing research, management consultancy and e-business. General management training programs and popular training programs are also popular with graduates. Graduates find their skills are in heavy demand across both public and private sectors, nationally and internationally. Professional accreditation has been given to graduates of our programs by the Australian Market and Social Research Society. There are also affiliations with professional organisations such as the Advertising Federation of Australia, the Australian Marketing Institute, the Australian Direct Marketing Association and the Australian Customer Service Association.

Undergraduate Marketing: The School of Marketing offers undergraduate programs leading to the award of the degree of Bachelor of Commerce and Bachelor of Economics. An intellectually rigorous approach is combined with a desire for practical relevance. This entails drawing not only on the general field of marketing but also the related disciplines of economics, finance, psychology, sociology, business law, and statistics. Relevance is achieved through case studies, applied exercises and the business experience of teaching staff. The Honours year deals with more advanced themes in marketing and students are required to submit a well-researched thesis.

Undergraduate Services Marketing – Tourism and Hospitality: A specialist four-year undergraduate degree program in Services Marketing - Tourism and Hospitality is available within the School. This program adds tourism and hospitality management courses to the full range of marketing courses but with a broader service industry focus. These additional courses include tourism policy and planning, human resource management, tourism and hospitality law, entrepreneurship in services, services marketing and facilities management for hotels, resorts and restaurants. Students receive practical training at an approved training college and are required
to complete at least 250 hours of industry work experience as part of the program, adding to the richness of the degree. Graduates will find careers in a range of service industries including major hotels, resorts, airlines and tourism, both in general management as well as in marketing.

The Centre for Applied Marketing (CAM): The Centre for Applied Marketing is a joint research centre between the School of Marketing, Faculty of Commerce and Economics and the Marketing cluster at the Australian Graduate School of Management. The Centre was established to act as a bridge with Australian industry. The Centre promotes and undertakes both pure and applied research in a range of marketing spheres. The Centre also provides customised in-house marketing training programs to leading Australian companies.

The Sustainable Tourism Cooperative Research Centre (STCRC): This is a national research body which brings together federal and state governments, the travel and tourism industry, and sixteen (16) Australian universities. STCRC provides funding for research on impacts, management and future directions for tourism. The research ranges across economic, environmental, social, marketing and policy aspects of tourism. One of the three major STCRC research themes, the "Sustainable Destinations" Program, is coordinated from UNSW.

School of Organisation and Management

Head of School: Associate Professor Lucy Taks
Administrative Officer: Terry O’Callaghan

The School of Organisation and Management was formed on 1 July 2004 by the merger of the School of Industrial Relations and Organisational Behaviour and the School of International Business. Consequently course codes which previously started with IROB and IBUS are now under the MGMT prefix.

The school offers three distinct disciplinary streams to Honours level: Human Resource Management, International Business and Industrial Relations. It also offers a disciplinary stream in Management.

The specialisation in Human Resource Management provides a strong applied and theoretical grounding in all aspects of the management of people in paid employment. The School’s programs are designed to provide both the breadth required for successful career mobility in the “HR” field and the opportunity to acquire advanced, applied knowledge in specialised human resource functions, including staff planning, recruitment, selection and development, training, gender equity, employee motivation and performance management, remuneration management, superannuation, employment law, workplace negotiation, international and cross-cultural human resource management, and occupational health and safety. These areas are increasingly being influenced by wider corporate strategy and business plans and are often seen as the key to enhancing organisational performance. Accordingly, the School’s programs place a strong emphasis on the strategic aspects and importance of human resource planning, policy and practice. The program in Human Resource Management provides a solid career basis for those involved in, or contemplating becoming involved in, managing people in paid employment.

The Industrial Relations program focuses on the processes, relationships, institutions and public policies associated with paid employment in contemporary society. As well as equipping students with a solid working knowledge of all key institutional players, namely trade unions, management, employer organisations and industrial tribunals and government, “IR” courses are designed to furnish a detailed and practical understanding of current employment relations issues, developments and practices. The specialisation in Industrial Relations provides knowledge and skills suitable for a wide range of careers in employment relations areas, such as industrial advocacy or research with trade unions and employer organisations, as well as careers as industrial relations or labour policy specialists with government bodies and international labour organisations. Recent changes to industrial relations policies, including a growing focus on the ‘micro’ or workplace issues, have increased the demand for industrial relations expertise at all levels of corporate management.

International Business is a rapidly growing field of study dealing with the development, strategy, and management of multinational enterprises in the global context of complex and dynamic business environments. Besides the study of multinational enterprises, the field necessarily includes business context studies and culture and communications, including language studies. Doing business and making decisions internationally involves greater complexity and is much more challenging compared to decision making restricted to the domestic context. Special knowledge and skills are required to be successful at international business. Strategic decisions have to be made about which countries to operate in and whether or not to export or license, whether to set up a new facility, establish a joint venture or acquire an existing business and how to sustain competitiveness internationally. Critical issues requiring analysis and judgement at the international level include global strategy, country risk, business negotiations, cultural difference, and performance measurement and evaluation.

The Management specialisation examines the processes, conceptual expertise and work functions involved in managing people and organisations effectively. Broadly, management is concerned with building and developing relationships between people and organisations, formulating goals, designing organisational structures, fostering innovation, controlling resources and facilitating productive activities. Rather than focusing purely on the tasks, roles or functions of managers, this specialisation examines the complex relations between power, people and resources that are the key challenges to effective management. Theories and predictions concerning new organisational forms, future business trends, international strategy, and more effective management practices are studied in addition to established knowledge in the discipline. The overall objective is to equip future managers to apply knowledge and skill effectively to the complex problems facing organisations in today’s dynamic global environment.

Professional Recognition of Programs

The degree programs offered by the Faculty of Commerce and Economics are recognised by professional organisations in accordance with the details set out below. If you are unable to fit these courses in as part of your degree requirements, you may have to enrol in additional classes on a non-award basis.

Australian Computer Society (ACS)

The School of Information Systems, Technology and Management programs are accredited by the Australian Computer Society (www.acs.org.au).

Programs accredited to the level of Professional by the Australian Computer Society:

Bachelor of Commerce (Information Systems) including Honours and combined degrees
Bachelor of Commerce (Information Systems and Management) including Honours and combined degrees
Bachelor of Science (Information Systems) including Honours and combined degrees
Bachelor of Science (Business Information Technology) including Honours and combined degrees

Bachelor of Commerce (Information Systems)

The basis of accreditation is:

Satisfactory completion of the following core courses:
INFS1602 Computer Information Systems
INFS1603 Business Data Management
INFS2603 Systems Analysis and Design
INFS2607 Business Data Networks
and:
Satisfactory completion of at least another 24 units of credit in level 2 or 3 courses in Information Systems with a minimum of 12 units of credit at level 3.
Satisfying the full requirements for completion of the program.

Bachelor of Commerce (Information Systems and Management)

The basis of accreditation is:

Satisfactory completion of the following core courses:
INFS1602 Computer Information Systems
INFS1603 Business Data Management
INFS2603 Systems Analysis and Design
INFS2607 Business Data Networks
INFS2791 Industrial Training A
INFS3792 Industrial Training B
INFS4793 Industrial Training C
INFS5604 Information Technology Management

and:
Satisfactory completion of at least another 12 units of credit in Information Systems courses at Honours level.
Satisfactory completion of at least another 18 units of credit in level 3 or 4 courses in Information Systems.
Satisfying the full requirements for completion of the program.
Bachelor of Science (Information Systems)
The basis of accreditation is:
Satisfactory completion of the following core courses:
INFS1602 Computer Information Systems
INFS1603 Business Data Management
INFS2603 Systems Analysis and Design
INFS2604 Business Data Networks
INFS2609 Software Implementation
INFS3605 Implementation Workshop
INFS3606 Telecommunications for Electronic Commerce
INFS3608 Advanced Database Systems
and:
Satisfactory completion of at least another 12 units of credit courses in Information Systems with a minimum of 6 units of credit at level 3.
Satisfactory completion of all other requirements of the program.

Bachelor of Science (Business Information Technology)
The basis of accreditation is:
Satisfactory completion of the following core courses:
INFS1602 Computer Information Systems
INFS1603 Business Data Management
INFS2603 Systems Analysis and Design
INFS2604 Business Data Networks
INFS2609 Software Implementation
INFS2691 Industrial Training 1
INFS3605 Implementation Workshop
INFS3606 Industrial Training 2
INFS3606 Telecommunications for Electronic Commerce
INFS3608 Advanced Database Systems
INFS4693 Industrial Training 3
and:
Satisfactory completion of at least another 12 units of credit in level 3 or 4 courses in Information Systems.
Satisfactory completion of at least another 42 units of credit of INFS courses with a minimum of 6 units of credit at Honours level.
Satisfactory completion of all other requirements of the program.

Conditions of accreditation
Each course is accredited as a whole course and the accreditation may not be extended to students who are granted advanced standing, credit(s) or exemption(s) by the institution. A course undertaken by a student granted advanced standing, credit(s) or exemption(s) will only be regarded as the accredited course where, in the opinion of the Society, credit(s) or exemption(s) are given for equivalent subjects (particularly in terms of Information Technology content) taken at an equivalent educational level and at an institution of equivalent academic standing.

Australian Human Resource Institute (AHRI)
The following HR qualifications offered by the Faculty of Commerce and Economics have been accredited the National Accreditation Committee (NAC) of the Australian Human Resources Institute.
Bachelor of Commerce major Human Resource Management
Bachelor of Economics major Human Resource Management
Bachelor of Arts major Human Resource Management
Bachelor of Social Science major Human Resource Management
Combined Bachelor of Arts/Bachelor of Commerce major Human Resource Management
Master of Commerce with specialisation in Human Resource Management
Accreditation is granted for a period of three years from December 2004 to December 2007. For more information, please refer to the website: www.amr.com.au

The Australian Institute of Banking and Finance (AIBF)
The educational requirements for Associateship will be satisfied on completion of a University degree program specialising in Banking and Finance which includes a management, a marketing and four banking and finance courses.
The educational requirements for Senior Associateship will be satisfied on completion of a University degree program specialising in Banking and Finance which includes a management, a marketing and four banking and finance courses and employment in the Australia/New Zealand banking and finance industry for at least two years.
Graduates who have met the academic, but not the work experience, requirements for Senior Associate, qualify for Associate membership.

Students are advised to contact the AIBF for current requirements: www.aibf.com.au

Australian Market and Social Research Society (AMRSRS)
Undergraduate marketing students at UNSW are able to obtain the Certificate of Market Research if they have successfully completed a number of approved courses. The Certificate of the AMRSRS is widely recognised by government and industry as a measure of competence in market research.
To qualify for the Certificate, undergraduate students must complete and pass the following courses:
MARK1012 Marketing Fundamentals
MARK2051 Consumer Behaviour
MARK2052 Marketing Research
MARK2054 Market Analysis
Students who have successfully completed the required courses at UNSW must complete the application form which is available from the School of Marketing Office or contact The Australian Market and Social Research Society (AMRSRS), telephone (02) 9566 3102, fax (02) 9571 5944, website www.amsrs.com.au. Further information is also available from the Professional Associations section in the Marketing Careers website: www.marketing.unsw.edu.au

Australian Securities and Investment Commission (ASIC)
The Bachelor of Commerce (Finance) from the School of Banking and Finance at UNSW provides PS146 Tier qualifications in the following areas:
Financial Planning
Securities
Superannuation
Superannuation
General Insurance
Life Insurance
Generic Knowledge Skills
FINS1612 Capital Markets & Institutions, FINS2624 Portfolio Management, FINS2643 Wealth Management, FINS3637 Wealth Management Advice, ECON3114 Superannuation & Retirement Benefits.

Chartered Secretaries Australia (CSA)
CSA is the professional association for 10,000 company secretaries and corporate managers in Australia. It also operates as the Australian Division of the International Institute of Chartered Secretaries and Administrators to which most CSA members also belong.
CSA accredits courses which, if completed, count towards the academic requirements of both professional associations. For details of accredited courses and student membership, please contact Dr John Nelson, National Education Manager, CSA, 70 Castlereagh Street, Sydney, telephone (02) 9223 5744, email info@CSAust.com, website www.csaust.com.au

CMA Australia
CMA Australia has accepted UNSW as an approved tertiary institution for the purpose of its membership qualifications.
Associate membership of CPA Australia requires an accredited undergraduate degree with a major in accounting and in the case of UNSW, the completion of the courses listed below.
If you are unable to fit these courses in as part of your degree requirements, you may have to enrol in additional classes as non-award.

The Institute of Actuaries of Australia

The UNSW actuarial program is fully accredited by the Institute of Actuaries of Australia and recognised for exemptions by the Institute of Actuaries (London) for the Core Technical subjects. The following courses at UNSW correspond to the Part I and Part II subjects of the IAAust professional examinations:

<table>

</tbody>
</table>

Students wishing to apply for exemption from the Part I professional examinations must achieve above average performance in the relevant courses. It is recommended that students who intend to complete all of the Part I professional actuarial subjects enrol in MATH1151 Mathematics for Actuarial Studies and Finance 1A and MATH1251 Mathematics for Actuarial Studies and Finance 1B in Year 1. ECON1101 Microeconomics 1 and ECON2102 Macroeconomics 2 may satisfy exemption requirements for Subject 107.

For students completing a combined BSc BCom, MATH2801 Theory of Statistics and MATH2831 Linear Models may also satisfy exemption requirements for Subject 101.

Qualification as an Associate of the Institute of Actuaries of Australia (IAAA) is attained on completion of the Part I examinations in Years 1 to II. Qualification as a Fellow of the Institute of Actuaries of Australia (IIA) requires the completion of subjects in Parts I, II and III of the professional actuarial examinations.

The syllabus of the Part I courses is covered in the undergraduate Bachelor of Commerce program as listed above.

A sample program, including options designed to cover all of the professional Part I Courses of the Institute of Actuaries of Australia, is as follows:

**Year 1**

**Session One**

- ACCT1501 Accounting and Financial Management 1A
- ECON1101 Microeconomics 1
- MATH1151 Mathematics for Actuarial Studies & Finance 1A
- Option*

*This option should normally be a course towards the co-major or minor or a computing course.

**Session Two**

- ACCT1511 Accounting and Financial Management 1B
- ECON1102 Microeconomics 1
- MAI1H251 Mathematics for Actuarial Studies & Finance 1B
- ACTL1001 Actuarial Studies and Commerce

**Year 2**

**Session One**

- ACTL2001 Financial Mathematics
- ACTL2002 Probability and Statistics for Actuaries

**Session Two**

- ACCT2503 Stochastic Models for Actuarial Applications
- FINS1613 Business Finance
- ACTL2542 Corporate Financial Reporting and Analysis

**Year 3**

**Session One**

- ACTL3001 Actuarial Statistics
- ACTL3002 Life Insurance and Superannuation Models
- Option

**Session Two**

- AC.1L3003 Life Insurance Models
- ACTL3004 Financial Economics for Insurance and Superannuation
- Option

Part II of the professional examinations is studied after graduating or in an Honours year and consists of the Institute Actuarial Control Cycle subjects. No exemptions are available from the Part III examinations. Two subjects are completed by distance education through the Institute of Actuaries of Australia, usually on a part-time basis after completing the Part I and Part II subjects. Part III consists of four half-year subjects completed by distance education through the Institute of Actuaries of Australia usually on a part time basis after completing the Part I and II subjects. Two of these subjects (Module 1: Investments; and Module 4: Commercial Actuarial Practice) are compulsory. In Modules 2 and 3 students select subjects in one specialty area of practice: Life Insurance; General Insurance; Superannuation & Planned Savings; and Investment Management & Finance.

The Faculty of Actuaries and the Institute of Actuaries in the UK offer exemptions from the equivalent subjects in their syllabus if students have obtained exemption through the Institute of Actuaries of Australia. This covers only Part I subjects. However, Fellows of the Institute of Actuaries of Australia can obtain Fellowship of the Institute of Actuaries (London) if they wish to practice in the UK or Europe.

Students who have completed an actuarial studies major and obtained exemptions from the Part I subjects of the Institute of Actuaries of Australia can apply for waivers of some of the examinations of the Society of Actuaries (North America). Fellows of the Institute of Actuaries of Australia can apply for admission as an Associate of the Society of Actuaries if they wish to practise in North America.

Fellowship of the Institute of Actuaries of Australia (FIAA) is recognised by local actuarial societies in Hong Kong, Singapore, Malaysia, New Zealand and Japan. The actuarial societies in Hong Kong, Singapore and Malaysia do not conduct their own examinations. For more information, please go to Institute’s website at www.actuaries.asn.au

The Institute of Chartered Accountants in Australia (ICAA)

Graduates who have completed an accredited undergraduate degree with a major in accounting are eligible under the Institute’s admission requirements to enter the ‘CA Program’ leading to membership, provided they have in the case of UNSW included in their program the following courses. If you are unable to fit these courses in as part of your degree requirements, you may have to enrol in additional classes as non-award.

- ACCT2522 Management Accounting: Process Improvement and Innovation
- ACCT2542 Corporate Financial Reporting and Analysis
- ACCT3563 Issues in Financial Reporting and Analysis or ACCT3573 Issues in Financial Reporting and Analysis (Honours)
- ACCT3583 Stakeholder Value Management or ACCT3593 Stakeholder Value Management (Honours)
- AC.1L3708 Auditing and Assurance Services or ACCT3718 Auditing and Assurance Services (Honours)
- FINS1613 Business Finance
- LEGT1711 Legal Environment of Commerce
Program Rules and Information

3502 Bachelor of Commerce

BCom

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description

The Bachelor of Commerce program allows students to develop an understanding of institutional structures and processes supporting global commerce and disciplinary skills and perspectives relevant to commerce. Students will also develop professional competences and ethical perspectives relevant to practice in global contexts.

Program Objectives and Learning Outcomes

The objectives of the Bachelor of Commerce (BCom) are:

- To develop understanding of institutional structures and processes supporting global commerce;
- To develop disciplinary skills and perspectives relevant to global commerce;
- To develop professional competences and ethical perspectives relevant to practice in global contexts;
- To develop understandings of alternative ways in which knowledge can be created and effectively deployed;
- To develop capacities for life-long learning and the negotiation of change.

Program Structure

The program normally consists of 144 units of credit to be completed over a period of three academic years or six 14-week sessions, with the exception of programs with an Industrial Training component which consist of 192 units of credit over four academic years or eight 14-week sessions.

Except in exceptional circumstances, a student must enrol in a minimum of 6 units per session and will not be permitted to enrol in more than 24 units per session.

There are 36 units of common Level 1 core courses as follows:

- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ACCT1501 Accounting & Financial Management 1A (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- ACCT1511 Accounting & Financial Management 1B (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)

Note: Students in Actuarial Studies programs substitute approved Mathematics courses for professional recognition for ECON1202 and ECON1203.

General Education Requirements

Students in this program must complete 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption). For further information, please refer to the General Education section in this Handbook.

Please note that students enrolled in programs within the Faculty of Commerce and Economics cannot take General Education courses offered by the Faculty of Commerce and Economics.

Honours

Upon completion of first or second years of a full-time program or the corresponding stages of a part-time program, a candidate may make a written application to the Head of School concerned for permission to enrol for an Honours degree. When such permission is granted but a candidate’s later performance is unsatisfactory, permission to continue as an Honours student may be withdrawn and the student may proceed to an appropriate Pass degree.

A person who has graduated with a Pass degree of Bachelor of Commerce can not be admitted to candidature for the Honours degree of Bachelor of Commerce, except with special permission on the recommendation of the Head of the School.

Academic Rules

Rule 1 - Pass a Course

A candidate must pass all courses in order to be awarded a Pass degree.

Rule 2 - Disciplinary Minors

Students not completing the requirements of two majors in the Bachelor of Commerce degree must complete a ‘disciplinary minor’ in a discipline other than their major. A ‘disciplinary minor’ is defined as four approved session courses, or equivalent value for courses taught outside the Faculty, of which no more than 12 units of credit may be first year courses.

Rule 3 - Transfer Between Degrees

Candidates are admitted to the Bachelor of Commerce, the Bachelor of Commerce in Marketing, Tourism and Hospitality Management, the Bachelor of Commerce/Bachelor of Science or the Bachelor of Economics program. There is no automatic transfer between these programs. Candidates who wish to transfer between these programs must reapply through UAC if they are a local student or the UNSW Admissions Office if they are International students.

Rule 4 - Assessable Hours

Normal workload expectations for each degree are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

Rule 5 - Passing in a Course

Where, in the following rules, reference is made to the requirement that a candidate shall pass a course, the requirement shall be construed as meaning that the candidate shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of the School concerned.

Rule 6 - Normal Program

The program leading to the award of the degree of Bachelor of Commerce normally consists of 144 units of credit to be completed over a period of three academic years or six 14-week sessions, with the exception of programs with an Industrial Training component which consist of 192 units of credit over four academic years or eight 14-week sessions. Except in exceptional circumstances, a student must enrol in a minimum of 6 units per session and will not be permitted to enrol in more than 24 units per session.

There are 36 units of common Level 1 core courses as follows:

- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ACCT1501 Accounting & Financial Management 1A (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- ACCT1511 Accounting & Financial Management 1B (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)

Note: Students in Actuarial Studies programs substitute approved Mathematics courses for professional recognition for ECON1202 and ECON1203.

General Education Requirements

Students in this program must complete 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption). For further information, please refer to the General Education section in this Handbook.

Please note that students enrolled in programs within the Faculty of Commerce and Economics cannot take General Education courses offered by the Faculty of Commerce and Economics.

Honours

Upon completion of first or second years of a full-time program or the corresponding stages of a part-time program, a candidate may make a written application to the Head of School concerned for permission to enrol for an Honours degree. When such permission is granted but a candidate’s later performance is unsatisfactory, permission to continue as an Honours student may be withdrawn and the student may proceed to an appropriate Pass degree.

A person who has graduated with a Pass degree of Bachelor of Commerce can not be admitted to candidature for the Honours degree of Bachelor of Commerce, except with special permission on the recommendation of the Head of the School.

Academic Rules

Rule 1 - Pass a Course

A candidate must pass all courses in order to be awarded a Pass degree.

Rule 2 - Disciplinary Minors

Students not completing the requirements of two majors in the Bachelor of Commerce degree must complete a ‘disciplinary minor’ in a discipline other than their major. A ‘disciplinary minor’ is defined as four approved session courses, or equivalent value for courses taught outside the Faculty, of which no more than 12 units of credit may be first year courses.

Rule 3 - Transfer Between Degrees

Candidates are admitted to the Bachelor of Commerce, the Bachelor of Commerce in Marketing, Tourism and Hospitality Management, the Bachelor of Commerce/Bachelor of Science or the Bachelor of Economics program. There is no automatic transfer between these programs. Candidates who wish to transfer between these programs must reapply through UAC if they are a local student or the UNSW Admissions Office if they are International students.

Rule 4 - Assessable Hours

Normal workload expectations for each degree are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

Rule 5 - Passing in a Course

Where, in the following rules, reference is made to the requirement that a candidate shall pass a course, the requirement shall be construed as meaning that the candidate shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of the School concerned.

Rule 6 - Normal Program

The program leading to the award of the degree of Bachelor of Commerce normally consists of 144 units of credit to be completed over a period of three academic years or six 14-week sessions, with the exception of programs with an Industrial Training component which consist of 192 units of credit over four academic years or eight 14-week sessions. Except in exceptional circumstances, a student must enrol in a minimum of 6 units per session and will not be permitted to enrol in more than 24 units per session.

There are 36 units of common Level 1 core courses as follows:

- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ACCT1501 Accounting & Financial Management 1A (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- ACCT1511 Accounting & Financial Management 1B (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)

Note: Students in Actuarial Studies programs substitute approved Mathematics courses for professional recognition for ECON1202 and ECON1203.
Rule 8 - Nomination of Plan
A student must nominate on the enrolment form the specialisation intended when enrolling for the first year. A candidate may change from one plan to another but not more than once per year. The change requires the approval of the program authority and unless it is a transfer between a Pass and an Honours program, the change must be completed before enrolment is finalised for the particular year.

Rule 9 - Academic Program Requirements: BCom 3502
To complete the requirements for the award of the degree of Bachelor of Commerce:

1. For the Pass degree, a student must complete and pass 144 units of credit, which shall include:
   1.1 36 units of common Level 1 core courses as follows:
   ACCT1501 Accounting & Financial Management 1A
   ACCT1511 Accounting & Financial Management 1B
   ECON1101 Microeconomics 1
   ECON1102 Macroeconomics 1
   ECON1202 Quantitative Methods A* 
   ECON1203 Quantitative Methods B* 
   *Students in Actuarial Studies programs substitute approved Mathematics courses for professional recognition for ECON1202 and ECON1203.
   1.2 (a) satisfactory completion of a minimum of 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption). Combined undergraduate degrees offered with another faculty and leading to the award of two degrees satisfy this requirement (12 units of credit in General Education) within the program.
   (b) undertake an additional 56 hours of study which examines the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. The Bachelor of Commerce fulfills this requirement as part of the normal program curriculum.
   1.3 either a major of at least 48 units in an approved disciplinary stream and a minor of 24 units of approved session courses of which no more than 12 units may be Level 1 courses (excluding Industrial Training components when included in program requirements); or
   1.4 a double major of 64 units, consisting of 42 units from each of two approved disciplinary streams (excluding Industrial Training components when included in program requirements).

2. A student cannot:
   2.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances:
   2.2 substitute more than 6 units of mainstream courses offered by other faculties towards General Education requirements.
   2.3 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.
   2.4 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances:
   2.5 exceed the prescribed number of credit points in the Pass degree component.

3. A student enrolled in a Co-op program must satisfactorily complete the industrial training components specified in the program requirements,

4. For the Honours degree, a student must complete a further 48 units in an approved disciplinary stream.

4.1 Honours may be taken in one disciplinary stream only

4.2 The additional units, comprising specified courses from the relevant disciplinary stream and a thesis, must be completed in two sessions following the completion of the Pass degree component.

4.3 Honours degree will not be awarded if academic performance is below the prescribed level.

4.4 Except when recommended to the contrary by the relevant Head of School, a student intending to enter the Honours year must:
   4.4.1 satisfy the Pass degree requirements and obtain a minimum average of 70% in Level 2 and Level 3 courses of the relevant disciplinary stream in the Pass degree component;
   4.4.2 pass all courses in the Pass degree component at first attempt.

4.5 Except with the special permission of the program authority on the recommendation of the relevant Heads of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidature for the Honours degree of Bachelor of Commerce.

5. Approved disciplinary streams are listed hereafter:

Approved Disciplinary Streams (Pass)
Accounting
Accounting Co-op Program

Actuarial Studies
Actuarial Studies Co-op Program
Business Economics
Business Strategy and Economics Management
Business Statistics
Business Law
Economic History
Finance
Finance Co-op Program
Financial Economics
Human Resource Management
Industrial Relations
Information Systems
Information Systems and Management Co-op Program
International Business
Management
Marketing
Marketing Co-op Program
Modern Languages*
Taxes
Tourism and Hospitality Management*
* Not available as a single major, but as a co-major only
# Available only as a co-major integrated program with Marketing (program code 3571)

Approved Disciplinary Streams (Honours)
To the end of fourth year:
Accounting
Actuarial Studies
Business Economics
Business Strategy and Economics Management
Finance
Financial Economics
Human Resource Management
Industrial Relations
Information Systems
International Business
Marketing
Taxation

Rule 10 - Honours Degree
Upon completion of first or second years of a full-time program or the corresponding stages of a part-time program, a candidate may make a written application to the Head of School concerned for permission to enrol for an Honours degree. When such permission is granted but a candidate's later performance is unsatisfactory, permission to continue as an Honours student may be withdrawn and the student may proceed to an appropriate Pass degree.

A person on whom the Pass degree of Bachelor of Commerce has been conferred shall not be admitted to candidature for the Honours degree of Bachelor of Commerce, except with special permission on the recommendation of the Head of the School.

Rule 11 - Credit for Courses Passed at Another University
Subject to the University rules governing admission with advanced standing, courses passed at another university may be counted towards fulfilling the requirements of the degree but, in general, not more than four courses studied for a year or equivalent which are already counted for another degree may be counted towards the requirements for the Bachelor of Commerce. Advanced standing will not normally be granted for courses completed more than 7 years before the date of admission of the applicant, except with the approval of the Head of the School.

Rule 12 - Options
Subject to the requirements of the individual programs, students may choose a maximum of 2 options from any approved course taught by any other UNSW faculties. Approval must be sought from the program authority to count courses as options. Apart from service courses for other faculties, all courses taught by the Faculty of Commerce and Economics will be automatically approved as options, but no course can be counted both as an option and as a prescribed course. Heads of the Schools may, in exceptional circumstances, vary courses in prescribed programs.

Rule 13 - Order of Progression of Courses
It is expected students shall undertake core courses in the equivalent of their first year. It is expected failed courses will be repeated in the first session in which they are next offered.
Rule 14 - Prerequisite and Corequisite Requirements

Except in exceptional circumstances, a candidate shall not enrol in any course without having satisfied the prescribed prerequisite or corequisite requirements.

Professional Recognition

Australian Computer Society (ACS)

Programs accredited to the level of Professional by the Australian Computer Society include:

- Bachelor of Commerce (Information Systems) including Honours and double degrees
- Bachelor of Commerce (Information Systems and Management) including Honours and double degrees

For more information, please refer to ‘Professional Recognition of Programs’ in the preceding section.

The Institute of Actuaries of Australia

The profession of Actuary is one of the oldest in the financial world. It is highly regarded and requires the completion of, or exemption from, professional examinations. Fellows of The Institute of Actuaries of Australia, the Institute of Actuaries or Faculty of Actuaries (UK), or the Society of Actuaries (North America) can practise as actuaries in Australia.

Students intending to enter the actuarial profession should normally have completed 4-unit mathematics or obtained a high mark in 3-unit mathematics and should be aiming to obtain an average of at least 70% mark in their University studies. Experience has shown that the higher your UAI or equivalent, the better your chances of success in meeting the standard for exemption from the professional actuarial examinations (95 and above is often recommended). To obtain maximum professional actuarial course exemptions, ACTL2001, ACTL2002, ACTL2003 ACTL3001, ACTL3002, ACTL3003 and ACTL3004 should be completed as well as ACCT2542, ECON2101/ECON2102 and FIN8161.

CPA Australia

CPA Australia has accepted this University as an approved tertiary institution for the purpose of its membership qualifications. Associate membership of this association requires an accredited undergraduate degree with a major in accounting.

The Institute of Chartered Accountants in Australia

Graduates who have completed the Bachelor of Commerce degree program are eligible under the Institute’s new admission requirements to enter the ‘CA Program’ leading to membership. The specific courses to be included have been reduced by the Institute to the following 6 core areas: Financial Accounting, Management Accounting, Finance, Auditing, Australian Commercial and Corporate Law, & Australian Taxation Law. To qualify for the Certificate, undergraduate students must complete and pass the following courses:

- MKK1012 Marketing Fundamentals
- MKK2051 Consumer Behaviour
- MKK2052 Marketing Research
- MKK2054 Market Analysis

For further information, please refer to ‘Professional Recognition of Programs’ in the preceding section.

Australian Securities and Investment Commission (ASIC)

The Bachelor of Commerce (Finance) from the School of Banking and Finance at UNSW provides PS146 Tier qualifications in the following areas:

- Financial Planning
- Securities
- Managed Investments
- Superannuation
- General Insurance
- Life Insurance
- Generic Knowledge Skills

providing the following courses are completed:

- FINS1612 Capital Markets & Institutions, FIN9264 Portfolio Management,
- FINS2643 Wealth Management, FINS3637 Wealth Management Advice,
- ECON3114 Superannuation & Retirement Benefits.

Australian Human Resource Institute (AHRI)

The Australian Human Resources Institute (AHRI) is the national association representing human resource and people management professionals. AHRI leads the direction and fosters the growth of the HR profession through actively setting standards and building the capability of the profession.

Through its international affiliations and its close association with industry and academia, AHRI ensures that its members are given access to a soundly-based professional recognition framework. For more information, please refer to the website: www.ahri.com.au

Co-op Scholarships

The Co-op Program at UNSW provides outstanding scholars with the opportunity of combining the requirements of the Bachelor of Commerce degree with industrial training experience. Entry to this program is at first year only and through the selection procedures administered by the Co-op Program Office. For further information, see: www.co-op.unsw.edu.au

3543 Bachelor of Economics

BeC

Typical Duration

3 years

Minimum UOC for Award

144 units of credit

Typical UOC per Session

24 units of credit

Program Description

The Bachelor of Economics program allows students to develop an understanding of institutional structures and processes supporting global commerce and disciplinary skills and perspectives relevant to commerce. Students will also develop professional competences and ethical perspectives relevant to practice in global contexts.

Program Objectives and Learning Outcomes

The objectives of the Bachelor of Economics are:

- To develop understanding of institutional structures and processes supporting global commerce;
• To develop disciplinary skills and perspectives relevant to global commerce;
• To develop professional competences and ethical perspectives relevant to practice in global contexts;
• To develop understandings of alternative ways in which knowledge can be created and effectively deployed;
• To develop capacities for life-long learning and the negotiation of change.

Program Structure
For the Bachelor of Economics Pass degree, a student must complete and pass 144 units of credit, which shall include:

36 units of common Level 1 core courses as follows:
- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ACC11301 Accounting & Financial Management 1A (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- ACC1T11 Microeconomic Management 1B (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)

General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.

Honours
Upon completion of third year of a full-time program or the corresponding stages of a part-time program, a candidate may make a written application to the Honours Coordinator concerned for permission to enrol for an Honours degree.

Academic Rules
Rule 1 - Pass and Honours Degrees
The degree of Bachelor of Economics may be conferred as a Pass degree or as an Honours degree. There shall be three classes of Honours, namely Class 1, Class 2 in two Divisions and Class 3. In cases of superior academic performance throughout the program, the Pass degree will be conferred with Distinction.

Rule 2 - Disciplinary Minors
All students satisfying the requirements of the Bachelor of Economics degree automatically satisfy ‘disciplinary minor’ requirements. A ‘disciplinary minor’ is defined as four approved session courses, or equivalent value for courses taught outside the Faculty, of which no more than 12 units of credit may be first year courses.

Rule 3 - Transfer Between Degrees
Candidates are admitted to the Bachelor of Commerce, the Bachelor of Commerce in Marketing, Tourism and Hospitality Management, the Bachelor of Commerce/Bachelor of Science or the Bachelor of Economics program. There is no automatic transfer between these programs. Candidates who wish to transfer between these programs must reapply through UAC if they are a local student or the UNSW Admissions Office if they are International students.

Rule 4 - Assessable Hours
Normal workload expectations for each degree are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

Rule 5 - Passing in a Course
Where, in the following rules, reference is made to the requirement that a candidate shall pass a course, the requirement shall be construed as meaning that the candidate shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of the School concerned.

Rule 6 - Normal Program
The program leading to the award of the degree of Bachelor of Economics normally consists of 144 units of credit to be completed over a period of three academic years or six 14-week sessions. Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session and will not be permitted to enrol in more than 24 units.

Rule 7 - Minimum Time for Completion
(a) The minimum time for completing the requirements for the degrees of Bachelor of Commerce or Bachelor of Economics at Pass level is normally six sessions full-time or 12 sessions part-time, unless the student is enrolled in a Co-op program in which case the minimum time for completion is eight sessions full-time.
(b) For the Bachelor of Commerce in Marketing, Tourism and Hospitality Management program at Pass level, the minimum time for completion is eight sessions full-time.

Rule 8 - Nomination of Plan
A student must nominate on the enrolment form the specialisation intended when enrolling for the first year. A candidate may change from one plan to another but not more than once per year. The change requires the approval of the program authority and unless it is a transfer between a Pass and an Honours program, the change must be completed before enrolment is finalised for the particular year.

Rule 9 - Academic Program Requirements: BEc 3543
To complete the requirements for the degree of Bachelor of Economics:
1. For the Pass degree, a student must complete and pass 144 units of credit, which shall include:
2. 36 units of common Level 1 core courses as follows:
- ACC1T11 Accounting & Financial Management 1A (6 UOC)
- ACC1T12 Accounting & Financial Management 1B (6 UOC)
- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ECON1103 Macroeconomics 1 (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)
- ECON1204 Quantitative Methods B (6 UOC)
- Econometrics (6 UOC)
3. (a) satisfactory completion of a minimum of 12 units of credit in General Education courses or their equivalent (unless otherwise entitled to exemption). Combined undergraduate degrees offered with another faculty and leading to the award of two degrees satisfy this requirement (12 units of credit in General Education) within the program.
(b) undertake an additional 56 hours of study which examines the purposes and consequences of their university education and which fosters socially, ethically and professionally responsible behaviour. The Bachelor of Economics fulfills this requirement as part of the normal program curriculum.
4. A student cannot count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances.
4.1 substitute more than 6 units of mainstream courses offered by other faculties towards General Education requirements.
4.2 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.
5. Each student must include the following in their degree program:
5.1 either a major of at least 60 units in the Economics, Econometrics, Financial Economics or Economic History disciplinary streams (including units taken as core studies where applicable);
5.2 or a double major of 90 units, with at least 48 units in one of the Economics, Econometrics, Financial Economics or Economic History disciplinary streams, and at least 42 units in another approved disciplinary stream.
6. In addition to the Pass degree requirements the award of a degree with Honours requires:
6.1 the completion of at least 60 units (single major) or 48 units (double major) in the Economics, Econometrics, Financial Economics or Economic History disciplinary streams specified as necessary preparation for fourth year studies, and
6.2 the completion of four specified courses in fourth year and a thesis that is the equivalent of two courses. Honours studies may proceed in more than one disciplinary stream prior to fourth year. In the fourth year, Honours may be taken in the Economics, Econometrics or Economic History disciplinary streams only, or a combined Honours program in Economics and Econometrics may be taken.
7. Approved disciplinary streams are listed hereafter:
Approved Disciplinary Streams (Pass)
- Accounting
- Actuarial Studies
- Asian Studies
- Business Law
- Economics
- Econometrics
Program Description

The Bachelor of Commerce in Services Marketing - Tourism and Hospitality is a four-year full-time degree that prepares graduates for management positions in a wide variety of careers in the rapidly growing service industry.

Its strengths are its rigorous grounding in services marketing, tourism and hospitality management, accounting and business statistics; its hands-on industry training and employment experience; and its development of students’ leadership, management and communication skills. In addition, the degree includes a full major in marketing from one of Australia’s leading university marketing programs. This opens up not only an important niche specialisation in tourism and hospitality, but a further range of employment options in the field of marketing in a wide range of service industries.

Entry is by academic achievement and a short interview. Successful applicants are typically in the top decile of their state high school grading. The interview explores applicants’ leadership potential, communication skills and commitment to a career in the tourism industry, and may be conducted on campus or by video.

Program Objectives and Learning Outcomes

Students who have completed the program will have a rigorous grounding in tourism and hospitality management, accounting, economics and business statistics; hands-on industry training and employment experience; and have developed leadership, management and communication skills.

General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.

Please note that students enrolled in programs within the Faculty of Commerce and Economics cannot take General Education courses offered by that Faculty.

Honours
For the Honours degree, a student must complete a further 48 units in a disciplinary stream that the student has chosen as a co-major in the Pass degree component.

For additional details, please refer to the Academic Rules section below.

Academic Rules
To complete the requirements for the award of the degree of Bachelor of Commerce in Services Marketing - Tourism and Hospitality:

Rule 1
1. For the Pass degree, a student must complete and pass 192 units of credit, which shall include:
   1.1 36 units of common Level 1 core courses as follows:
   ACCT1501 Accounting and Financial Management 1A
   ACCT1511 Accounting and Financial Management 1B
   ECON1101 Microeconomics 1
   ECON1102 Macroeconomics 1
   ECON1202 Quantitative Methods A
   ECON1203 Quantitative Methods B
   1.2 12 units of General Education courses in accordance with University rules and Faculty of Commerce and Economics policy.
   1.3 a double major of 96 units, consisting of 42 units from the Marketing disciplinary stream and 54 units from the Tourism and Hospitality Management disciplinary stream;
   1.3.1 6 units of approved industry training course, based on minimum of 250 hours of employment (SERV2003);
   1.3.2 6 units of ECON2117 Economics and Tourism or LEGT3001 Legal Aspects of Tourism;
   1.4 Either
   a. A third major of 42 units in an approved major offered in the Bachelor of Commerce program
   or
   b. 42 units of approved electives including a minimum of 24 units of Commerce and Economics, subject to Rule 2.1

Rule 2
2. A student cannot:
   2.1 count more than 48 units of Level 1 core and electives courses towards their degree except in exceptional circumstances;
   2.2 attempt General Education courses until 42 units of mainstream courses have been attempted;
   2.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
   2.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

Rule 3
3. For the Honours degree, a student must complete a further 48 units in a disciplinary stream that the student has chosen as a co-major in the Pass degree component.

3.1 Honours may be taken in one disciplinary stream only.
3.2 The additional units, comprising specified courses from the relevant disciplinary stream and a thesis, must be completed in two sessions following the completion of the Pass degree component.
3.3 The Honours degree will not be awarded if academic performance is below the prescribed level.
3.4.1 satisfy the Pass degree requirements and obtain a minimum average of 70% in Level 2 and Level 3 courses of the relevant disciplinary stream in the Pass degree component and
3.4.2 pass all courses in the Pass degree component at first attempt.
3.5 Except with the special permission of the course authority on the recommendation of the relevant Heads of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidacy for the Honours degree of Bachelor of Commerce.

Rule 4
4. Approved disciplinary streams are listed below:

Approved Disciplinary Streams (Pass)
- Services, Tourism and Hospitality
- Marketing
- Offered in the BCom program

Approved Disciplinary Streams (Honours)
- Disciplinary Honours offered in the Bachelor of Commerce, after completion of the requirements of the Pass degree co-major.

3979 Bachelor of Science in Information Systems

BSc

Typical Duration
3 years

Minimum UOC for Award
144 units of credit
Typical UOC per Session
24 units of credit

Program Description
The Bachelor of Science in Information Systems degree is a highly prized qualification which provides business skills along with a specialisation in information systems and technology. The program is intended to develop conceptual and practical skills. After an introductory first stage, students will learn about systems design, databases, communications and commercial programming in parallel with computer science, mathematics and management accounting courses.

Program Objectives and Learning Outcomes
The program is intended to develop conceptual and practical skills.

Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.

Please note that students enrolled in programs within the Faculty of Commerce and Economics cannot take General Education courses offered by that Faculty.

Academic Rules

Pass degree requirements

Conditions for the Award of the Degree:

1. A student must complete 144 units of credit including 12 units of General Education.
2. The degree must contain a major sequence of study as set out in the program below.
3. A student must complete no more than 60 units in Level I courses from at least three schools.
4. No student may commence Level II courses until 24 Level I units have been successfully completed.
5. A student must complete a minimum of 84 units of credit from Science schools.*
6. For entry to Honours, a student must complete at least 24 units at Level III in the relevant Major sequence and have the permission of the Head of School.

Program Objectives and Learning Outcomes

This four stage course teaches Information Systems Theory and Practice and provides industrial training linked to that teaching. The three industrial training periods in the course are each of approximately six months duration, running from January of Stages 2 and 4, and July of Stage 3 of the program.

Program Structure

3971 Bachelor of Science in Business Information Technology

BSc

Typical Duration

4 years

Minimum UOC for Award

192 units of credit

Typical UOC per Session

24 units of credit

Program Description

This program is available only to students admitted through the scholarship selection procedures administered by the UNSW Co-op Program office.

The BSc (BIT) is a four-year degree program for which Honours may be awarded. It is a four year linked education program leading to the award of the qualification Bachelor of Science in Business Information Technology.

The program shares three core disciplinary areas: Information Systems, Accounting and Computer Science.

The BIT program has been designed in conjunction with Information Systems and Information Technology industry professionals to provide for the needs of Australian businesses. The program combines the requirements for the award of the degree with 18 months of coordinated industrial experience at three different organisations (24 weeks at each). Industrial Training extends outside university sessions. A scholarship is payable from funds donated by the sponsoring organisations.

Consideration for entry to the course may proceed only on the basis of an application directly to Co-op program Office at the University of New South Wales and application through UAC.

Students who are academically acceptable for the BIT Degree Program, but who are not offered a scholarship position, should consider registering for first stage entry into the BSc (BIT) 3979 program. If BIT Scholarships become available at the end of Stage 1, students undertaking the BSc (IS) 3979 program may be offered an interview and a transfer into the BSc (BIT) 3971 co-operative Scholarship Degree Program.

INFS4811 Knowledge Management Systems and Technology (6 UOC)
**Program Description**

The Faculty of Commerce and Economics in conjunction with the Faculty of Arts and Social Sciences offers the combined Bachelor of Commerce Bachelor of Arts.

This is a five-year program combining the strengths and flexibility of each single degree program. It is expected that the combined degree program will appeal to students wanting, in particular, a strong, focused and highly regarded business program that is complemented by a humanities discipline - chosen out of personal interest or with a particular career objective in mind.

With approval, students with an excellent academic record may also enrol in an additional Honours year in the Bachelor of Commerce.

The combined Bachelor of Commerce Bachelor of Arts is a five-year (240 units of credit) degree program. The Bachelor of Commerce Bachelor of Arts program consists of 22 Commerce and Economics courses (132 units of credit) and 18 Arts and Social Science courses (108 units of credit). Students will typically enrol in 48 units of credit per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

**Program Objectives and Learning Outcomes**

**Bachelor of Commerce**

The objectives of the Bachelor of Commerce are:

- To develop understanding of institutional structures and processes supporting global commerce;
- To develop disciplinary skills and perspectives relevant to global commerce;
- To develop professional competences and ethical perspectives relevant to practice in global contexts;
- To develop understandings of alternative ways in which knowledge can be created and effectively deployed;
- To develop capacities for life-long learning and the negotiation of change.

**Bachelor of Arts**

An Arts degree is a pathway through a wealth of knowledge in the humanities and social sciences. Its objective is to stimulate students intellectually; to immerse them in worlds of learning; and to graduate them as citizens with strong written and oral communications skills, the capacity to research, criticise and reflect, and the ability to work independently and collaboratively.

**Program Structure**

**Year 2-5**

In Years 2, 3, 4 and 5 students take a total of 4 Commerce and Economics courses (24 UOC), 4 Arts and Social Sciences courses (24 UOC) each year.

**Academic Rules**

Rules relating to the award of the degree of Bachelor of Commerce shall apply wherever relevant to students enrolled in the combined Bachelor of Commerce Bachelor of Arts.

This is a five-year (240 units of credit) degree program. The Bachelor of Commerce Bachelor of Arts program consists of 22 Commerce and Economics courses (132 units of credit) and 18 Arts and Social Sciences courses (108 units of credit). Students will typically enrol in 48 units of credit per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

**Rules Relating to the Bachelor of Commerce Component**

1. Each student must include the following in their degree program:
   - 1.1 either a major of at least 48 units of credit in an approved disciplinary stream (see below) and a minor of at least 24 units of credit from a different discipline; or

**3525 Bachelor of Commerce Bachelor of Arts**

**BCom BA**

**Typical Duration**

5 years

**Minimum UOC for Award**

**Professional Recognition**

**Australian Computer Society (ACS)**

The Bachelor of Science in Information Systems is accredited to the level of Professional by the Australian Computer Society:

For more information, please refer to ‘Professional Recognition of Programs’ in the preceding section.
1.2 A double major of 84 units of credit consisting of 42 units of credit from two approved disciplinary streams.

The remaining Commerce and Economics course or credit requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.

2. Approved Disciplinary Streams (Pass):

Accounting
Actuarial Studies
Business Economics
Business Statistics
Business Strategy & Economic Management
Business Law
Economic History
Financial Economics
Finance
Human Resource Management
Industrial Relations
Information Systems
International Business
Management
Marketing
Taxation

3. Candidates for Honours must complete one year of study additional to the minimum of five years required for the BCom BA at Pass level. Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:

3.1 the completion of at least 48 units of credit (single major) or 42 units of credit (double major) in a disciplinary stream specified as necessary preparation for Honours year studies, and

3.2 the completion of four specified courses (24 units of credit) in Year 4 in one of these disciplines, and a thesis (48 units of credit).

4. Approved Disciplinary Streams (Honours):

To the end of sixth year:
Accounting
Finance
Human Resource Management
Industrial Relations
Information Systems
Marketing
Taxation

Rules Relating to the Bachelor of Arts Component

1. Of the 108 units of credit in Arts and Social Sciences required for the combined degree:

(a) none may be from courses offered by the Faculty of Commerce and Economics;

(b) at least 24 and no more than 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit offered by any one school, department, unit or Interdisciplinary Program; and

(c) no more than 54 units of credit in total may be from any one school, department, unit or Interdisciplinary program within the Faculty of Arts and Social Sciences.

2. Each student must complete a major sequence (42 units of credit) in one of the following areas within the Faculty of Arts and Social Sciences:

Australian Studies
Chinese Studies
Development Studies
Education
English
Environment Studies
European Studies
Film and Theatre
French
German Studies
Greek (Modern)
History
History and Philosophy of Science
Indonesian Studies
Japanese Studies
Korean Studies
Linguistics

Music
Political Economy
Philosophy
Policy Studies
Politics and International Relations
Russian Studies
Sociology and Anthropology
Spanish and Latin American Studies
Women’s and Gender Studies

*For complete listing of specialisations please refer to online handbook.
Honours

Candidates for Honours must complete one year of study additional to the minimum of five years required for the BCom BSocSc at Pass level.

Honours in Commerce

Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:

1. The completion of at least 48 units of credit (single major) or 42 units of credit (double major) in a disciplinary stream specified as necessary preparation for Honours year studies, and
2. The completion of four specified courses in Honours year in one of these disciplines, and a thesis that is the equivalent of two courses.

Honours in Social Science

Students wishing to take the Bachelor of Social Science at Honours level must consult the Head of School of Social Science and Policy.

Academic Rules

Rules relating to the award of the degree of Bachelor of Commerce, shall apply wherever relevant to candidates for the course of Bachelor of Commerce/Bachelor of Social Science.

This is a five-year degree program (240 units of credit). Both the Bachelor of Commerce Bachelor of Social Science degree consists of 22 Commerce and Economics courses (132 units of credit), which include the core Year 1 Commerce and Economics courses, 18 Arts and Social Science courses (108 units of credit) including 8 which must be in Social Science and Policy. Students will typically enrol in 48 units of credit of courses per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

Rules Relating to the Bachelor of Commerce Component

1. Each student must include the following in their degree program:
   1.1 either a major of at least 48 units of credit in an approved disciplinary stream (see below) and a minor of at least 24 units of credit from a different discipline; or
   1.2 a double major of 84 units of credit consisting of at least 42 units of credit in each of the (two) approved disciplinary streams.

The remaining Commerce and Economics course or units of credit requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.

2. Approved Disciplinary Streams (Pass):

- Accounting
- Actuarial Studies
- Business Economics
- Business Statistics
- Business Strategy & Economic Management
- Business Law
- Economic History
- Financial Economics
- Finance
- Human Resource Management
- Industrial Relations
- Information Systems
- International Business
- Management
- Marketing
- Taxation

3. Candidates for Honours must complete one year of study additional to the minimum of five years required for the BCom BSocSc at Pass level. Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:

3.1 the completion of at least 48 units of credit (single major) or 42 units of credit (double major) in a disciplinary stream specified as necessary preparation for Honours year studies, and
3.2 the completion of four specified courses in Honours year in one of these disciplines, and a thesis that is the equivalent of two courses.

4. Approved Disciplinary Streams (Honours):

To the end of sixth year:
• develop a working knowledge of scientific methods of investigation;
• encourage curiosity and creative imagination and an appreciation of the role of speculation in the selection and solution of problems, the construction of hypotheses, and the design of experiments;
• develop an appreciation of scientific criteria and a concern for objectivity and precision;
• develop confidence and skill in formulating problems and in treating both qualitative and quantitative data;
• develop the ability and disposition to think logically, to communicate clearly by written and oral means, and to read critically and with understanding;
• develop the habit of seeking and recognising relationships between phenomena, principles, theories, conceptual frameworks and problems;
• promote understanding of the significance of science, technology, economics and social factors in modern society, and of the contributions they can make in improving material conditions;
• provide opportunities for the development of students' motivations and social maturity, and an awareness of their capabilities in relation to a choice of career which will be fruitful to themselves and to society;
• provide opportunity to study science in combination with other disciplines.

Program Structure

Core Courses

All students must complete the following courses:

- ACCT1501 Accounting & Financial Management 1A (6 UOC)
- ACCT1511 Accounting & Financial Management 1B (6 UOC)
- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)

6 units of credit of First Year mathematics courses as specified for the appropriate Science program and:

At least 6 units of credit of Statistics selected from:

- ACTL2002 Probability & Statistics for Actuaries (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)
- MA1H1041 Statistics for Life & Social Sciences (6 UOC)
- MATH2801 Theory of Statistics (6 UOC)
- MATH2841 Statistics 3B (6 UOC)
- MATH2901 Higher Theory of Statistics (6 UOC)
- PSYC2001 Research Methods 2 (6 UOC)

or alternatives Statistics courses approved by the program advisor.

All students in the combined degree program must complete at least 12 units of credit of courses from Commerce and at least 12 units of credit of courses from an approved Science program within the first 2 sessions of full-time enrolment (or within the first 48 units of credit of courses completed).

Within the first 4 sessions of full-time study (or the first 96 units of credit completed), all students must complete at least 36 units of credit of courses from an approved Science program and 36 units of credit of courses taught by the Faculty of Commerce and Economics, including compulsory courses listed above.

Honours

Candidates for Honours must complete one year of study additional to the minimum required for the BCom BSc at Pass Level.

Honours in Commerce

Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. For the rules relating to Honours in Commerce, please refer to the program entry for 3502 Bachelor of Commerce.

Honours in the Science

Candidates for Honours in the Science component of the combined degree program will need to undertake an additional year of study as prescribed by the relevant school, and to fulfill prerequisite conditions for undertaking Honours as listed for each approved major. Students who wish to undertake Honours in Science should consult the Head of the School in which they wish to undertake Honours prior to their third year of study.

Academic Rules

Entry to the course will be by quota with the admission requirements being not less than those for the degree with the highest requirements (currently the Bachelor of Commerce degree) and also with the HSC admission requirements for the Bachelor of Science (3970). There is no automatic transfer between Bachelor of Science or Bachelor of Commerce and Bachelor of Commerce Bachelor of Science programs. Students may apply to transfer between these programs through UAC if they are local students and through the UNSW Admissions Office if they are International students.

For the award of the degrees of BCom BSc, the following requirements must be satisfied:

- Completion of 192 units of credit including:
  - At least 84 units of credit from the courses offered by the Faculty of Commerce and Economics and 84 units of credit from courses for the BSc.
  - Completion of the required courses for a major in one of the approved areas of study in the Faculty of Commerce and Economics, as listed in this Handbook. Students are unable to take a modern language as a major stream.
  - Completion of the required courses for a major in one approved Science discipline. Available majors for the science component are listed in Table A in the Science section of the Handbook. A Computer Science major may only be undertaken with the permission of the School of Computer Science and Engineering.

At the discretion of the program authority, variations to course requirements within individual programs may be approved.

Rules Relating to the Bachelor of Commerce Component

1. Each student must complete the core courses listed above and the requirements listed for a single major in an approved Disciplinary Stream under Rule 9 for the BCom degree. The remaining units of credit required to satisfy the Commerce component may be chosen from any other undergraduate courses taught by the Faculty of Commerce and Economics.

2. Candidates for Honours must complete one year of study additional to the minimum required for the BCom BSc at Pass Level. Students wishing to take the Bachelor of Commerce at Honours level must consult the Head of School in which they wish to study for Honours. In addition to the Commerce degree requirements, the award with a degree of Honours requires:

- 2.1 the completion of a major of at least 48 units of credit in a disciplinary stream specified as necessary preparation for Honours year studies, and

- 2.2 the completion of a program prescribed for an approved disciplinary stream in the Honours year. Approved disciplinary streams (Honours) are listed under Rule 9 for BCom in the Faculty of Commerce and Economics section of this Handbook.

3. In the Commerce/Science degree Students can do no more than 6/7 Commerce Level 1 courses.

Rules Relating to the Bachelor of Science Component

4. Of the minimum 84 units of credit in courses related to an approved program of study in Science for the combined degree:

- 4.1 None may be from courses offered by the Faculty of Commerce and Economics.

- 4.2 Students must complete 24 units of credit of level 1 courses offered by Science schools. No more than 18 units of credits of level 1 can be from any one course area.

- 4.3 Students must complete the prescribed courses for an approved major as listed in Table A of the Science Handbook or with approval, Computer Science. Remaining courses to make up the minimum 84 units of credit in Science courses should be selected from the relevant optional courses as listed for each eligible Science program in Table A.

3526 Bachelor of Economics Bachelor of Arts

BEC BA

Typical Duration

5 years

Minimum UOC for Award

240 units of credit
Typical UOC per Session
24 units of credit

Program Description
The Faculty of Commerce and Economics in conjunction with the Faculty of Arts and Social Sciences offers the combined Bachelor of Economics Bachelor of Arts.

This is a five-year program combining the strengths and flexibility of each single degree program. It is expected that these combined degree program will appeal to students wanting, in particular, a strong, focused and highly regarded business program that is complemented by a humanities discipline - chosen out of personal interest or with a particular career objective in mind.

With approval, students with an excellent academic record may also enrol in an additional Honours year in the Bachelor of Economics degree. The combined Bachelor of Economics Bachelor of Arts is a five-year (240 units of credit) degree program. The Bachelor of Economics Bachelor of Arts program consists of 22 Commerce and Economics courses (132 units of credit) and 18 Arts and Social Science courses (108 units of credit). Students will typically enrol in 48 units of credit per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

Program Objectives and Learning Outcomes
Bachelor of Economics
The objectives of the Bachelor of Economics are:

- To develop understanding of institutional structures and processes supporting global commerce;
- To develop disciplinary skills and perspectives relevant to global commerce;
- To develop professional competences and ethical perspectives relevant to practice in global contexts;
- To develop understandings of alternative ways in which knowledge can be created and effectively deployed;
- To develop capacities for life-long learning and the negotiation of change.

Bachelor of Arts
An Arts degree is a pathway through a wealth of knowledge in the humanities and social sciences. Its objective is to stimulate students intellectually; to immerse them in worlds of learning; and to graduate them as citizens with strong written and oral communications skills, the capacity to research, critique and reflect, and the ability to work independently and collaboratively.

Program Structure
Year 1 (48 units of credit)
ECON1101 Microeconomics 1 (6 UOC)
ECON1102 Macroeconomics 1 (6 UOC)
ACCT1501 Accounting & Financial Management 1A (6 UOC)
ECON1202 Quantitative Methods A (6 UOC)
ACCT1511 Accounting & Financial Management 1B (6 UOC)
ECON1203 Quantitative Methods B (6 UOC)
Level 1 Arts and Social Science courses (12 UOC)

Years 2-5
In Years 2, 3, 4 and 5 students take a total of 4 Commerce and Economics courses (24 units of credit), 4 Arts and Social Sciences courses (24 units of credit) each year.

Honours
Candidates for Honours must complete one year of study additional to the minimum of five years required for the BEd BA at Pass level. Students wishing to take the Bachelor of Economics at Honours level must consult the Head of School and/or Head of Department in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:

1. The completion of at least 60 units of credit (single major) or 48 units of credit (double major) in Economics, Econometrics or Economic History disciplinary streams specified as necessary preparation for Honours year studies, and
2. The completion of four specified courses in the Honours year (24 units of credit), and a thesis that is the equivalent of 24 units of credit.

Honours studies may proceed in more than one disciplinary stream prior to the Honours year. In the Honours year, Honours may be taken in the Economics, Econometrics or Economic History disciplinary streams, or a combined Honours program in Economics and Econometrics may be taken.

Academic Rules

Rules relating to the award of the degree of Bachelor of Economics shall apply wherever relevant to students enrolled in the combined Bachelor of Economics Bachelor of Arts.

This is a five-year (240 units of credit) degree program. The Bachelor of Economics Bachelor of Arts program consists of 22 Commerce and Economics courses (132 units of credit) and 18 Arts and Social Sciences courses (108 units of credit). Students will typically enrol in 48 units of credit per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

Rules Relating to the Bachelor of Economics Component
1. Each student must include the following in their degree program:
   1.1 either a major of at least ten courses (60 units of credit) in Economics, Econometrics or Economic History disciplinary stream (including courses taken as core studies); or
   1.2 a double major of fifteen courses (90 units of credit), with at least eight courses (48 units of credit) in one of the Economics, Econometrics or Economic History disciplinary streams and at least seven courses (42 units of credit) in another approved disciplinary stream.

   The remaining Commerce and Economics course or credit requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.

2. Approved Disciplinary Streams (Pass):
   - Accounting
   - Asian Studies
   - Business Law
   - Economics
   - Econometrics
   - Econometrics/Econometrics
   - Economic History
   - Finance
   - Financial Economics
   - Human Resource Management
   - Industrial Relations
   - Information Systems
   - International Business
   - Management
   - Marketing
   - Taxation
   
   #Available as a co-major integrated program with Economics only

3. Candidates for Honours must complete one year of study additional to the minimum of five years required for the BEd BA at Pass level. Students wishing to take the Bachelor of Economics at Honours level must consult the Head of School and/or Head of Department in which they wish to study for Honours. In addition to the Pass degree requirements the award with a degree of Honours requires:
   3.1 the completion of at least 60 units of credit (single major) or 48 units of credit (double major) in Economics, Econometrics or Economic History disciplinary streams specified as necessary preparation for Honours year studies, and
   3.2 the completion of four specified courses in the Honours year (24 units of credit), and a thesis that is the equivalent of 24 units of credit.

   Honours studies may proceed in more than one disciplinary stream prior to the Honours year. In the Honours year, Honours may be taken in the Economics, Econometrics or Economic History disciplinary streams, or a combined Honours program in Economics and Econometrics may be taken.

4. Approved Disciplinary Streams (Honours):
   - Economics
   - Econometrics
   - Econometrics/Econometrics
   - Economic History

Rules Relating to the Bachelor of Arts Component
1. Of the 108 units of credit in Arts and Social Sciences required for the combined degree:
   (a) none may be from courses offered by the Faculty of Commerce and Economics;
(b) at least 24 and no more than 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 units of credit offered by any one School, Department, Unit or Interdisciplinary Program; and (c) no more than 54 units of credit in total may be from any one School, Department, Unit or Interdisciplinary Program within the Faculty of Arts and Social Sciences.

2. Each student must complete a major sequence (42 units of credit) in one of the following areas within the Faculty of Arts and Social Sciences:

Australian Studies
Chinese Studies
Development Studies
Education
English
Environment Studies
European Studies
Film and Theatre
French
German Studies
Greek (Modern)
History
History and Philosophy of Science

3528 Bachelor of Economics Bachelor of Social Science

BSc BSocSc

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The Faculty of Commerce and Economics in conjunction with the Faculty of Arts and Social Sciences offers the combined Bachelor of Economics/ Bachelor of Social Science.

This is a five-year program combining the strengths and flexibility of each single degree program. It is expected that this combined program will appeal to students wanting, in particular, a strong, focused and highly regarded business course that is complemented by a program of study in social research and policy analysis.

With approval, students with an excellent academic record may also enrol in an additional Honours year in the Bachelor of Economics or Bachelor of Social Science degree.

Bachelor of Arts
An Arts degree is a pathway through a wealth of knowledge in the humanities and social sciences. Its objective is to stimulate students intellectually; to immerse them in worlds of learning; and to graduate them as citizens with strong written and oral communications skills, the capacity to research, criticise and reflect, and the ability to work independently and collaboratively.

Program Structure

Year 1
- ECON1101 Microeconomics 1 (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- ACCT1501 Accounting & Financial Management 1A (6 UOC)
- SLSP1000 Social Science & Policy (6 UOC)

Year 2-5

In Years 2, 3, 4 and 5 students take a total of 4 Commerce and Economics courses (24 units of credit), 4 Arts and Social Sciences courses (24 units of credit) each year, including (in total) at least 36 units of credit from Social Science and Policy in the approved sequence as outlined in rules 11 and 12 for the Bachelor of Social Science degree.

Honours
Candidates for Honours must complete one year of study additional to the minimum of five years required for the BSc BSocSc at Pass level.

Honours in Economics
In addition to the Pass degree requirements the award with a degree of Honours requires:

1. The completion of at least 60 units of credit (single major) or 48 units of credit (double major) in Economics, Econometrics, Economic History or Financial Economics disciplinary streams specified as necessary preparation for Honours year studies, and
2. The completion of four specified courses in the Honours year in one of these disciplines, and a thesis that is the equivalent of two courses.

Honours in Social Science
Students wishing to take the Bachelor of Social Science at Honours level must consult the Head of School of Social Science and Policy.

Academic Rules
Rules relating to the award of the degree of Bachelor of Economics, shall apply wherever relevant to candidates for the course of Bachelor of Economics Bachelor of Social Science.

This is a five-year degree program (240 units of credit). The Bachelor of Economics Bachelor of Social Science degree consists of 22 Commerce and Economics courses (132 units of credit), which include the core Year 1 Commerce and Economics courses, 18 Arts and Social Science courses (108 units of credit) including 8 which must be in Social Science and Policy. Students will typically enrol in 48 units of credit of courses per year.

Students may be admitted direct to the program in Year 1 or can apply for admission in Years 2 or 3.

Rules Relating to the Bachelor of Economics Component

1. Each student must include the following in their degree program: 1.1 either a major of at least 60 units of credit in Economics, Econometrics, Economic History, or Financial Economics (including courses taken as core studies); or 1.2 a double major of 90 units of credit consisting of at least 48 units of credit in one of Economics, Econometrics, Economic History or Financial Economics disciplinary streams, and at least 42 units of credit in another disciplinary stream.

The remaining Commerce and Economics course or credit point requirements not required for a major sequence and not Year 1 core courses, as prescribed, if any, may be chosen from any other courses offered by the Faculty of Commerce and Economics.

2. Approved Disciplinary Streams (Pass):

Accounting
Asian Studies*
Business Law
Economics
Econometrics
Economic History
Financial Economics
Finance
Human Resource Management
Industrial Relations
Information Systems
International Business
Management
Marketing
Taxation

*Required for Accounting major

Accounting Honours
This program is available to the end of Year 3 only for BSc students and to the end of fourth year for BCom students only.

Required to Year 4
ACCT3735 Issues in Financial Reporting and Analysis (Honours)
ACCT3593 Stakeholder Value Management (Honours)
ACCT3718 Auditing and Assurance Services (Honours)

Year 4
ACCT4794 Thesis (Accounting)
ACCT4809 Current Developments in Auditing Research
ACCT4851 Current Developments in Accounting Research –Financial
ACCT4852 Current Developments in Accounting Research –Managerial
ACCT4897 Seminar in Research Methodology

Accounting Co-op Program
This program is available as a single major or combined with Finance or Business Economics in the BCom degree only.

4. Approved Disciplinary Streams (Honours):
To the end of sixth year:
Economics
Econometrics
Econometrics and Econometrics
Economic History

Rules Relating to the Bachelor of Social Science Component
1. Of the 108 units of credit in Arts and Social Sciences required for the combined degree:
(a) none may be from courses offered by the Faculty of Commerce and Economics;
(b) at least 24 and no more than 36 units of credit must be obtained in Level 1 courses, including no more than 12 Level 1 credit points offered by any one school, department, unit or Interdisciplinary Program;
(c) level 1 courses must include SLSP1000 and SLSP1001 (12 units of credit) offered by the School of Social Science and Policy; and
(d) no more than 54 units of credit in total may be from any one school, department, unit or Interdisciplinary Program within the Faculty of Arts and Social Sciences;
(e) 48 units of credit must be taken as the approved stream as specified in List F for the Bachelor of Social Science degree, excluding those streams offered by the Faculty of Commerce and Economics.

2. Candidates for Honours in Social Science must complete one year of study additional to the minimum of five years required for the BSc/BSoSc at Pass level. Students wishing to take the Bachelor of Social Science at Honours level must consult the Head of School of Social Science and Policy.

Plan Rules and Information
Select sufficient courses to make up minor, co-major or single major requirements, or select single courses as options, as appropriate. Refer to the preceding section which lists the rules governing the award of degrees for details. Refer to the ‘Course Descriptions’ section of this Handbook for further details such as course prerequisites.

Accounting
Course ID  Course Name
ACCT1501  Accounting and Financial Management 1A*
ACCT1511  Accounting and Financial Management 1B*
ACCT2522  Management Accounting: Process Improvement and Innovation*
ACCT2542  Corporate Financial Reporting and Analysis*
ACCT3563  Issues in Financial Reporting and Analysis *
ACCT3573  Issues in Financial Reporting and Analysis (Honours)*
ACCT3583  Stakeholder Value Management
ACCT3585  E-Business: Strategy and Processes
ACCT3593  Stakeholder Value Management (Honours)
ACCT3601  Global Financial Reporting and Analysis
ACCT3610  Financial Statement Analysis
ACCT3708  Auditing and Assurance Services
ACCT3718  Auditing and Assurance Services (Honours)
ACCT4820  Management Accounting Issues and International Best Practice
FINS3626  International Corporate Governance

Actuarial Studies
Core required:
The actuarial major requires students to substitute approved Mathematics courses in place of ECON1202 and ECON1203 as 1st year core courses. Students will normally be required to complete:
MATH1131  Mathematics for Actuarial Studies and Finance 1A
MATH1251  Mathematics for Actuarial Studies and Finance 1B
unless approval from the Head of Actuarial Studies is obtained.

Required
ACTL1001  Actuarial Studies and Commerce
ACTL2001  Financial Mathematics
ACL2002  Probability and Statistics for Actuaries
ACTL2003  Stochastic Models for Actuarial Applications

To satisfy minimum requirements for an actuarial studies minor, all courses from the required list must be completed.
Options
ACTL3001 Actuarial Statistics
ACTL3002 Life Insurance and Superannuation Models
ACTL3003 Insurance Risk Models
ACTL3004 Financial Economics for Insurance and Superannuation
ACTL3005 Superannuation and Retirement Benefits

To obtain maximum actuarial professional examination exemptions, the first four options should be completed along with ACCT2542, ECON2101 and FINS1613.

Rules Governing the Award of the Degree of Bachelor of Commerce (Actuarial Studies Co-op)

Rule 1 – Pass Degree
The degree of Bachelor of Commerce (Actuarial Studies Co-op) may be conferred as a Pass degree. In cases of superior academic performance throughout the course, the Pass degree will be conferred with Distinction.

Rule 2 – Disciplinary Minors
Students not completing the requirements of a double major in the program must choose options so that they complete a ‘disciplinary minor’ in a discipline other than Actuarial Studies. A ‘disciplinary minor’ is defined as four approved session courses to the value of 24 units of credit, or equivalent value for courses taught outside the faculty, of which no more than 12 units may be first year courses.

Rule 3 – Entry and Continuation Conditions

3.1 Entry to the program is conditional upon:
   a. meeting the entry requirements for the Bachelor of Commerce
   b. the selection process for Co-op Scholarships

3.2 Except in exceptional circumstances, continuation in the program is conditional upon meeting the performance standards required to maintain the Co-op Scholarship.

Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce generalist degree program.

Rule 4 – Assessable Hours

4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

4.2 Industrial Training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based for the duration of the course.

Rule 5 – Passing in a Course

Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of School concerned.

Rule 6 – Normal Program

This program leading to the award of the degree of Bachelor of Commerce (Actuarial Studies Co-op) comprises 192 units of credit to be completed over a period of four academic years.

Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session and will not be permitted to enrol for more than 24 units other than in the first session of Year 2 when Industrial Training 1 is completed along with 24 units of credit during the session.

Except in exceptional circumstances, students are required to undertake the Industrial Training Courses (having met all prerequisites) at the following times:

Industrial Training 1 at the commencement of the first half of their second year
Industrial Training 2 in the second half of their third year
Industrial Training 3 in the first half of their fourth year

Rule 7 – Minimum Time for Completion

The minimum time for completing the requirements for the degree is normally eight sessions full-time.

Rule 8 – Academic Program Requirements

To complete the requirements for the award of the degree a student must complete and pass 192 units of credit which shall include:

8.1 The compulsory courses set out in the program requirements.

8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics.

8.3 Either:

8.3.1 a major of at least 48 units in Actuarial Studies, in addition to Industrial Training units, and a minor in another approved disciplinary stream; or

8.3.2 a major of at least 42 units in Actuarial Studies, in addition to Industrial Training and a second major of 42 units in another approved disciplinary stream.

8.4 A student cannot:

8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;

8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;

8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;

8.4.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

Asian Studies (BEC students only)

This major is available only as a co-major integrated with the program in Economics.

Required

(i) Students must enrol in and pass enough language units to reach a standard equivalent to intermediate level. If a student has satisfactory HSC competence in the language this will require two courses, if not four. In the case of the Japanese language, students entering without HSC competence should enrol in four consecutive core units of Japanese beginning with JAPN1000 Japanese Communication 1A. Students entering the Japanese language program with HSC, or above, competence will be admitted to a suitable level, subject to a placement test.
(ii) Students must enrol in and pass at least six units relating to a particular country or group of countries as approved by the Head of School. These may include language courses and must include at least two economics courses, one of which may be ECON2305 Modern Asian Economic History.

**Business Economics (BCom students only)**

**Required**
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1

**Options** (may be selected from List A or List B)
To satisfy either single or double major requirements, at least two Options must be chosen from List B.

- **List A**
  - ECON2101 Microeconomics 2
  - ECON2102 Macroeconomics 2
  - ECON2103 Business and Government
  - ECON2104 Applied Macroeconomics
  - ECON2105 Economics of Corporations
  - ECON2107 The Economics of Information and Technology
  - ECON2109 Economics of Natural Resources
  - ECON2111 Globalisation
  - ECON2112 Game Theory and Business Strategy
  - ECON2113 Economics of e-Commerce
  - ECON2116 Economics of Japanese Business & Government
  - ECON2117 Economics of Tourism
  - ECON2127 Environmental Economics
  - ECON2206 Introductory Econometrics
  - ECON2305 Modern Asian Economic History
  - ECON2313 Australian Economic Development
  - ECON2322 European Integration

- **List B**
  - ECON2207 Econometric Methods
  - ECON3101 Markets and Public Choice
  - ECON3104 International Macroeconomics
  - ECON3106 Public Finance
  - ECON3107 Economics of Finance
  - ECON3109 Economic Growth, Technology and Structural Change
  - ECON3110 Development Economics
  - ECON3112 The Newly Industrialising Economies of East Asia
  - ECON3113 Economic Development in ASEAN Countries
  - ECON3114 Superannuation and Retirement Benefits
  - ECON3116 International Economics
  - ECON3119 Political Economy
  - ECON3120 Economic Reasoning
  - ECON3121 Managerial Economics
  - ECON3202 Mathematical Economics
  - ECON3203 Econometric Theory
  - ECON3204 Econometric Model Building
  - ECON3206 Financial Econometrics

**Business Economics Honours (BCom students only)**

**Year 4**

**Required**
- ECON4100 Advanced Economic Analysis
- ECON4127 Economics Thesis

Plus three further courses from:
- ECON4101 International Trade
- ECON4102 Industrial Organisation
- ECON4103 Business Cycles And Growth
- ECON4104 Economics of Labour Markets
- ECON4105 Seminar in Research Methods
- ECON4106 Policy Evaluation Methods
- ECON4201 Applied Econometrics

In certain circumstances and with the permission of the Head of School, one course from List B of the Economics disciplinary stream, or a 4th year course from any school in FCE may be substituted for one of the Fourth Year Honours options.

For each course the UOC is 6, except ECON4127 for which the UOC is 24.

**Business Law**

This stream is not available as a single major, but as a co-major only. This stream is not available with the co-major in Taxation.

**Required**
- LEGT1711 Legal Environment of Commerce
- LEGT2721 Business Transactions
- LEGT1741 Business Entities

**Options**
Four courses from the following list:
- LEGT2791 International Business Law
- LEGT2712 Business, Ethics and the Law
- LEGT1731 Marketing and Distribution Law
- LEGT2732 Franchising
- LEGT2751 Business Taxation
- LEGT2761 Law of Banking and Finance
- LEGT2771 Information Technology Law
- LEGT2781 Regulation of Government Agencies
- LEGT2756 International Business Taxation
- LEGT3757 Corporate Law, Tax and Strategy
- LEGT2744 Corporate Fraud and Crime
- LEGT4721 Special Topic in Business Law

**Note:** Other courses offered by the School of Business Law and Taxation may be substituted for the optional courses listed above with approval of the Head of School.

**Business Statistics (BCom students only)**

**Required**
- ECON1202 Quantitative Methods A
- ECON1203 Quantitative Methods B

**Options** (may be selected from List A or List B)
To satisfy either single or double major requirements, at least two Options must be chosen from List B.

- **List A**
  - ECON2206 Introductory Econometrics
  - ECON2208 Operations Research
  - ECON2209 Business Forecasting

- **List B**
  - ECON2307 Econometric Methods
  - ECON2315 Statistics for Econometrics
  - ECON3202 Mathematical Economics
  - ECON3203 Econometric Theory
  - ECON3206 Financial Econometrics

**Business Strategy & Economic Management (BCom students only)**

**Required**
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1
- ECON2101 Microeconomics 2
- ECON2105 Economics of Corporations
- ECON2112 Game Theory and Business Strategy
- ECON3121 Managerial Economics

**Options**
- ACCT2522 Management Accounting: Process Improvement and Innovation
- ECON2102 Macroeconomics 2
- ECON2103 Business and Government
- ECON2104 Applied Macroeconomics
- ECON2107 The Economics of Information and Technology
- ECON2113 Economics of e-Commerce
- ECON2116 Economics of Japanese Business & Government
- ECON2206 Introductory Econometrics
- ECON2207 Econometric Methods
- ECON2208 Operations Research
- ECON2209 Business Forecasting
- ECON3101 Markets and Public Choice
- ECON3106 Public Finance
- INF53603 Business Intelligence Systems
- INF53685 Electronic Commerce Management
- MARK3071 International and Global Marketing
- MARK3082 Strategic Marketing Management
- MGMT2101 International Business and Multinational Enterprises
- MGMT3101 International Business Strategy
- MGMT3724 Strategic Human Resource 1 Management
Business Strategy and Economic Management Honours (BCom students only)

Year 4

Required
ECON4127 Economics Thesis
ECON4102 Industrial Organisation

Plus three further courses from:
ECON4100 Advanced Economic Analysis
ECON4101 International Trade
ECON4103 Business Cycles and Growth
ECON4201 Applied Econometrics
ECON4104 Economics of Labour Markets
ECON4105 Seminar in Research Methods
ECON4106 Policy Evaluation Methods

In certain circumstances and with the permission of the Head of School, one third year option course from any school in the FCE, may be substituted for one of the Fourth Year Honours options.

For each course the UOC is 6, except ECON4127 for which the UOC is 24.

Economics (BSc students only)

Required
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1
ECON1201 Microeconomics 2
ECON1202 Macroeconomics 2
ECON2206 Introductory Econometrics
ECON2207 Econometric Methods

Options (may be selected from List A or List B)

To satisfy single major requirements, students must do three Options from List B.

To satisfy double major requirements, at least two Options must be chosen from List B.

List A
ECON2103 Business and Government
ECON2104 Applied Macroeconomics
ECON2105 Economics of Corporations
ECON2107 The Economics of Information and Technology
ECON2109 Economics of Natural Resources
ECON2111 Globalisation
ECON2112 Game Theory and Business Strategy
ECON2113 Economics of e-Commerce
ECON2116 Economics of Japanese Business & Government
ECON2117 Economics of Tourism
ECON2127 Environmental Economics
ECON2305 Modern Asian Economic History
ECON2313 Australian Economic Development
ECON2322 European Integration
ECON3106 Public Finance
ECON3112 The Newly Industrialising Economies of East Asia
ECON3113 Economic Development in ASEAN Countries
ECON3119 Political Economy

List B
ECON3101 Markets and Public Choice
ECON3104 International Macroeconomics
ECON3107 Economics of Finance
ECON3109 Economic Growth, Technology & Structural Change
ECON3110 Development Economics
ECON3114 Superannuation and Retirement Benefits
ECON3116 International Economics
ECON3120 Economic Reasoning
ECON3121 Managerial Economics
ECON3202 Mathematical Economics
ECON3204 Econometric Model Building
ECON3205 Econometric Theory
ECON3206 Financial Econometrics

Economics Honours (BSc students only)

Year 4

Required
ECON4100 Advanced Economic Analysis
ECON4127 Economics Thesis

Plus three further courses from:
ECON4101 International Trade
ECON4102 Industrial Organisation
ECON4103 Business Cycles and Growth
ECON4104 Economics of Labour Markets
ECON4106 Policy Evaluation Methods
ECON4201 Applied Econometrics

In certain circumstances and with the permission of the Head of School, one course from List B of the Economics disciplinary stream may be substituted for one of the Fourth Year Honours options.

Econometrics (BSc students only)

Required (for single major)
ECON1202 Quantitative Methods A
ECON1204 Advanced Econometric Theory
ECON4100 Advanced Economic Analysis
ECON4202 Advanced Econometric Theory
ECON4227 Thesis (Econometrics)

Required (for double major)
ECON1202 Quantitative Methods A
ECON1203 Quantitative Methods B
ECON2101 Microeconomics 2
ECON2102 Macroeconomics 2
ECON2206 Introductory Econometrics
ECON2207 Econometric Methods
ECON2215 Statistics for Econometrics
ECON3203 Econometric Theory

Options
ECON2208 Operations Research
ECON2209 Business Forecasting
ECON3202 Mathematical Economics
ECON3204 Econometric Model Building
ECON3206 Financial Econometrics

Econometrics Honours (BSc students only)

Year 4

Required
ECON4100 Advanced Economic Analysis
ECON4201 Applied Econometrics

Plus one option from the Economics Fourth Year Honours options list.

Economics/Econometrics (BSc students only)

Required
ECON1101 Microeconomics 1
ECON1102 Macroeconomics 1
ECON1201 Microeconomics 2
ECON1202 Macroeconomics 2
ECON2206 Introductory Econometrics
ECON2207 Econometric Methods
ECON2215 Statistics for Econometrics
ECON3203 Econometric Theory

Options
ECON2208 Operations Research
ECON2209 Business Forecasting
ECON3202 Mathematical Economics
ECON3204 Econometric Model Building
ECON3206 Financial Econometrics

Economics/Econometrics Honours (BSc students only)

Year 4

Required
ECON4100 Advanced Economic Analysis
ECON4201 Applied Econometrics

Plus at least one option in Econometrics (from the list below), and at least three options in Economics (List B).

Options
At least one of:
ECON2208 Operations Research
ECON2209 Business Forecasting
ECON3202 Mathematical Economics
ECON3204 Econometric Model Building
ECON3206 Financial Econometrics
ECON4202 Advanced Econometric Theory
ECON4227 Thesis (Econometrics)

Plus one option from the Economics Fourth Year Honours options list.

**Economic History (BCom students only)**

**Required**
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1

**Options**
- ECON1301 Australia in the Global Economy
- ECON1302 Australia and the Asia-Pacific Economies
- ECON2305 Modern Asian Economic History
- ECON2313 Australian Economic Development
- ECON2319 Economic & Social Policy in Australia Since Federation
- ECON2321 Growth and Development of International Business
- ECON2322 European Integration

**Economic History (BEc students only)**

**Required**
- ECON1101 Microeconomics 1
- ECON1102 Macroeconomics 1
- ECON2101 Microeconomics 2
- ECON2102 Macroeconomics 2
- ECON2206 Introductory Econometrics

**Options**
- ECON1301 Australia in the Global Economy
- ECON1302 Australia and the Asia-Pacific Economies
- ECON2305 Modern Asian Economic History
- ECON2313 Australian Economic Development
- ECON2319 Economic & Social Policy in Australia Since Federation
- ECON2321 Growth and Development of International Business
- ECON2322 European Integration

**Economic History Honours (BEc students only)**

**Year 4**

**Required**
- ECON4321 Economic History for Honours
- ECON4327 Thesis (Economic History)

**Financial Economics (BCom and BEc students)**

**Required**
- ECON2101 Microeconomics 2
- ECON2107 Economics of Finance
- ECON2206 Introductory Econometrics
- ECON2209 Business Forecasting
- ECON3206 Financial Econometrics
- FINS1612 Capital Markets & Institutions

**Options**
- ECON2102 Macroeconomics 2
- ECON2104 Applied Macroeconomics
- ECON2112 Game Theory and Business Strategy
- ECON2207 Econometric Methods
- ECON2208 Operations Research
- ECON2215 Statistics for Econometrics
- ECON3101 Markets and Public Choice
- ECON3104 International Macroeconomics
- ECON3114 Superannuation and Retirement Benefits
- ECON3202 Mathematical Economics
- ECON3203 Econometric Theory
- ECON3204 Econometric Model Building
- FINS1613 Business Finance
- FINS2622 Emerging Capital Markets

**Financial Economics Honours (BCom students only)**

**Year 4**

**Required**
- ECON4127 Economic Thesis

Plus four further courses from:
- ECON4100 Advanced Economic Analysis
- ECON4101 International Trade
- ECON4102 Industrial Organisation
- ECON4103 Business Cycles and Growth
- ECON4104 Economics of Labour Markets
- ECON4106 Policy Evaluation Methods

**Finance**

**Required**
- FINS1612 Capital Markets and Institutions
- FINS1613 Business Finance
- FINS2624 Portfolio Management
- FINS3616 International Business Finance

Students specialising in Finance only or Finance and another discipline should take the above four compulsory Finance courses in the first two years (first year and first semester of the second year) so that they can complete as many Finance courses as possible in the area of Banking, Corporate Finance, Investment Management, International Finance, Risk Management and Financial Analysis during their second and third years. To meet minor requirements, students must complete FINS1613 and 3 other required or optional courses.

**Year 1**
- FINS1612 Capital Markets and Institutions
- FINS1613 Business Finance

**Year 2**
- FINS2624 Portfolio Management
- FINS3616 International Business Finance

And optional Finance courses from the list below, in the areas of:
- Banking
- Corporate Finance
- Investment Management
- International Finance
- Risk Management
- Financial Analysis

**Year 3**

Optional Finance courses from the list below, in the areas of:
- Banking
- Corporate Finance
- Investment Management
- International Finance
- Risk Management
- Financial Analysis

To satisfy single major requirements, at least three options must be chosen from the following options. To satisfy double major requirements, at least two options must be chosen from the following list.

**Options**
- FINS2622 Emerging Capital Markets
- FINS2643 Wealth Management
- FINS3623 Venture Capital
- FINS3625 Applied Corporate Finance
- FINS3626 International Corporate Governance
- FINS3630 Bank Finance Management
- FINS3631 Risk and Insurance
- FINS3633 Real Estate Finance
- FINS3634 Credit Analysis and Lending
- FINS3635 Options, Futures and Risk Management
- FINS3636 Interest Rate Risk Management
- FINS3637 Wealth Management Advice
- FINS3640 Investment Management Modelling
- FINS3641 Security Analysis and Valuation
- FINS3642 Strategies for Investment Management
- FINS3650 International Banking
- FINS3651 International Financial Services
- FINS3775 Research Methods in Finance

**Finance Honours**

This program is available to the end of Year 3 only for BEc students and to the end of fourth year for BCom students only.

**Required**
- Prior to Year 4
- FINS1612 Capital Markets and Institutions
- FINS1613 Business Finance
- FINS2624 Portfolio Management
- FINS3616 International Business Finance
- FINS3775 Research Methods in Finance

**Year 4**

**Session One**

Three compulsory courses:
- FINS4774 Financial Decision Making Under Uncertainty
- FINS4776 Advanced Topics in Asset Pricing
- FINS4779 Research Methods in Finance 2
Finance (Honours) Co-op Program

This program is available only to students admitted through the scholarship selection procedures administered by the Co-op Program Office. Entry to the program is at first year only.

This is a four-year Honours degree program combining the requirements of the BCom with 15 months of coordinated industrial experience.* Industrial training extends outside university sessions.

Year 1

Session One
ACCT1501 Accounting and Financial Management 1A
ECON1101 Microeconomics 1
ECON1202 Quantitative Methods A
FINS1612 Capital Markets and Institutions

Session Two
ACCT1511 Accounting and Financial Management 1B
ECON1102 Microeconomics 1
ECON1203 Quantitative Methods B
FINS1613 Business Finance

Year 2

Summer Session
FINS2100 Industrial Training 1 (12 weeks)

Session One
FINS2624 Portfolio Management
FINS Option
Option

Session Two
FINS3616 International Business Finance
FINS Option
Option
General Education

Year 3

Session One
FINS3100 Industrial Training 2 (24 weeks)
FINS3775 Research Methods in Finance 1
Option

Session Two
FINS3200 Industrial Training 3 (24 weeks)
General Education
FINS Option

Year 4

Session One
FINS4774 Financial Decision Making Under Uncertainty
FINS4776 Advanced Topics in Asset Pricing
FINS4779 Research Methods in Finance 2
Finance Honours Elective Course

Session Two
FINS4795 Thesis

With the approval of the Head of School, students who fail to meet the performance requirements for Honours may substitute approved Banking and Finance and other courses for Level 4 courses and be awarded a Co-op Pass degree.

Rule 2 - Disciplinary Minors

It is not possible for students to complete the requirements of two majors in the Bachelor of Commerce (Hons) Finance Co-op degree and they must therefore choose options so that they complete equivalent to a ‘disciplinary minor’ in a discipline other than their finance major. A “disciplinary minor” is defined as four approved session courses, or equivalent value for courses taught outside the Faculty, of no more than 12 units of credit to be first year courses.

Rule 3 – Entry and Continuation Conditions

3.1 Entry to the program is conditional upon:

a. meeting the entry requirements for the Bachelor of Commerce degree
b. the selection process for Finance Co-op Scholarships

3.2 Except in exceptional circumstances, continuation in the program is conditional on meeting the performance standards required to maintain the Co-op Scholarship. Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce degree program and the relevant requirements.

3.3 Students must achieve a minimum average mark of 70% in Banking and Finance courses to remain in the program.

Rule 4 - Assessable Hours

4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

4.2 Industrial Training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based during the duration of the course, and program requirements as determined for placement.

Rule 5 – Passing in a Course

Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of the School concerned.

Rule 6 - Normal Program

The program leading to the award of the degree of Bachelor of Commerce (Hons) Finance Co-op comprises 192 units of credit to be completed over a period of four academic years. Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session and will not be permitted to enrol in more than 24 units.

Except in exceptional circumstances, students are required to undertake the Industrial Training Courses at the following times during the degree program:

- Industrial Training 1 in the summer between first and second year
- Industrial Training 2 in the first half of their third year
- Industrial Training 3 in the second half of their third year

Rule 7 - Minimum Time for Completion

The minimum time for completing the requirements for the degree of Bachelor of Commerce (Hons) Finance Co-op is eight sessions full-time and Industrial Training.

Rule 8 - Academic Program Requirements: BCom 3502

To complete the requirements for the award of the degree of Bachelor of Commerce (Hons) Finance Co-op a student must complete and pass 192 units of credit which shall include:

8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other that the Faculty of Commerce and Economics.
8.3 A major of at least 48 units in Finance (which must be passed at an average distinction level) in Level 1-3 courses, in addition to Industrial Training units, and a minor in another approved disciplinary stream.
8.4 A student cannot:

8.4.1 count more than 60 units of Level 1 core and elective courses towards their degree unless in exceptional circumstances;
8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;
8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
8.4.4 count a mainstream course offered by faculties other than the Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

**Rule 9 - Honours Degree**

9.1 Honours may be taken in Banking and Finance only.

9.1.1 Students who achieve the performance standard for the Co-op Finance Honours Degree program at the conclusion of Stage 3, must complete the Level 4 requirements in Stage 4, or transfer to the standard BCom pass degree.

9.2 Honours degrees will not be awarded if academic performance is below the prescribed level.

9.3 Except in exceptional circumstances and with the approval of the Head of School to continue in the Honours program students must:

9.3.1 achieve a minimum average mark of 75% in Banking and Finance courses taken in years 1, 2 and 3 of the program, and

9.3.2 pass all components of the program at the first attempt.

9.4 Students who fail to meet the performance requirements for Honours:

9.4.1 may substitute approved Banking and Finance or other courses within the Faculty of Commerce and Economics (students wishing to undertake a major in accounting must have the approval of the Head of School of Accounting) for Level 4 courses and be awarded a Co-op Pass degree, and

9.4.2 shall not be permitted to enrol in Financial Decision Making Under Uncertainty, Advanced Topics in Asset Pricing, Research Methods in Finance 2, Advanced Topics in Corporate Finance, Recent Developments in Banking Research, Special Topics in Finance and Thesis (Finance).

**Human Resource Management**

The minimum requirements for a major in Human Resource Management are the required courses, two courses from List A, and one course from List B and one course from either List A or List B.

To meet the requirements for a minor, students must complete the three required courses and one option.

**Required**

- MGMT1701 Industrial Relations
- MGMT1712 Management of Organisations
- MGMT2728 Human Resource Management

**Options**

**List A**

- MGMT3702 International Human Resource Management Practice
- MGMT3724 Strategic Human Resource Management
- MGMT3728 Managing Pay and Performance
- MGMT3729 Managing Workplace Training

**List B**

- MGMT1702 Labour Organisation
- MGMT1702 Industrial Law*
- MGMT2704 International Employment Relations*
- MGMT2704 Social Organisation of Work
- MGMT2715 Labour History*
- MGMT2724 Health and Safety at Work
- MGMT3705 Management and Employment Relations
- MGMT3706 Industrial Relations Policies and Processes*
- MGMT3721 Negotiation, Bargaining and Advocacy
- MGMT3729 Managing Workplace Training
- MGMT3730 Human Resource Management

* Please consult School timetable for availability.

**Human Resource Management Honours (BCom students only)**

The minimum requirements for a major at Honours level in Human Resource Management are the required courses listed below, one course from List A above, one course from List B above, plus the Year 4 required courses listed below.

**Required**

- MGMT1701 Industrial Relations
- MGMT1712 Management of Organisations
- MGMT2718 Human Resource Management
- MGMT3708 Philosophy and Research Methods in Employment and Management*

* Please consult School timetable for availability.

- MGMT3708 is a prerequisite for Year 4 Honours and should normally be taken in the session preceding the Honours year.

**Industrial Relations Honours**

This program is available to the end of Year 3 only for BEc students and to the end of Year 4 for BCom students only.

The minimum requirements for a major at Honours level in Industrial Relations are the required courses listed below, one course from List A above, one course from List B above, plus the year 4 required courses listed below.

**Required**

- MGMT1701 Industrial Relations
- MGMT1702 Labour Organisation*
- MGMT2702 Industrial Law
- MGMT3708 Philosophy and Research Methods in Employment and Management*

*MGMT3708 is a prerequisite for Year 4 Honours and should normally be taken in the session preceding the Honours year.

**Information Systems**

**Required**

- INF51602 Computer Information Systems
- INF51603 Business Data Management
- INF52603 Systems Analysis and Design
- INF52607 Business Data Networks

**Options**

- INF52609 Software Implementation
- INF52611 Requirements Elicitation
- INF53603 Business Intelligence Systems
- INF53604 Information Technology Management
- INF53605 Implementation Workshop
- INF53606 Telecommunications for Electronic Commerce
- INF53608 Advanced Database Systems
INF3611 Design Workshop
INF3622 Distributed Application Design and Implementation*
INF3623 Multimedia Systems Design*
INF3685 Electronic Commerce Management

Year 4
**Required**
- INF4795 Thesis Part A (Information Systems)
- INF4796 Thesis Part B (Information Systems)
- INF4886 Research Topics in 1 Information Systems
- INF4887 Research Topics in 2 Information Systems

**Options**
- Two options must be chosen from:
  - INF4774 Information Systems Security
  - INF4805 Information Systems Auditing
  - INF4810 Advanced Data Management
  - INF4811 Knowledge Management Systems and Technology
  - INF4848 Information Systems Project Management
  - INF4853 Information Systems Management
  - INF4891 Decision Support Systems
  - INF4893 Special Topic in Information Systems and Management

**Information Systems and Management Co-op Program**

This program is available only to students admitted through the scholarship selection procedures administered by the Co-op Program Office. Entry to the program is at first year only.

This is a four-year Honours degree program combining the requirements of the BCom with 18 months of coordinated industrial experience.* Industrial training extends outside university sessions.

**Required**
- INF1602 Computer Information Systems
- INF1603 Business Data Management
- INF2603 Systems Analysis and Design
- INF2607 Business Data Networks
- INF3604 Information Technology Management
- INF4886 Research Topics in Information Systems 1
- INF4887 Research Topics in Information Systems 2
- INF4795 Thesis A
- INF4796 Thesis B
- INF3792 Industrial Training A
- INF3793 Industrial Training B
- INF3794 Industrial Training C

**Options**
- INF2609 Software Implementation
- INF2611 Requirements Elicitation
- INF3603 Business Intelligence Systems
- INF3605 Implementation Workshop
- INF3606 Telecommunications for Electronic Commerce
- INF3608 Advanced Database Systems
- INF3611 Design Workshop
- INF3685 Electronic Commerce Management

**Honours Options**
- Two options must be chosen from:
  - INF4774 Information Systems Security
  - INF4805 Information Systems Auditing
  - INF4810 Advanced Data Management
  - INF4811 Knowledge Management Systems and Technology
  - INF4848 Information Systems Project Management
  - INF4853 Information Systems Management
  - INF4891 Decision Support Systems
  - INF4893 Special Topic in Information Systems and Management

* With the approval of the Head of School, students who fail to meet the performance requirements for Honours may substitute an approved selection of Information Systems courses for level 4 courses and will be awarded a Pass degree.

**Rule 2 – Disciplinary Minors**

As this is a single major, students must choose options so that they complete a ‘disciplinary minor’ in a discipline other than Information Systems. A ‘disciplinary minor’ is defined as four approved session courses to the value of 24 units of credit, or equivalent value for courses taught outside the faculty, of which no more than 12 units may be first year courses.

**Rule 3 – Entry and Continuation Conditions**

3.1 Entry to the program is conditional upon:
- a. meeting the entry requirements for the Bachelor of Commerce
- b. the selection process for Co-op Scholarships

3.2 Except in exceptional circumstances, continuation in the program is conditional upon meeting the performance standards required to maintain the Co-op Scholarship.

Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce generalist degree program.

**Rule 4 – Assessable Hours**

4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

4.2 Industrial Training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based for the duration of the course.

**Rule 5 – Passing in a Course**

Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of School concerned.

**Program Structure: Information Systems and Management Co-op Program**

**Rule 6 – Normal Program**

This program leading to the award of the degree of Bachelor of Commerce in Information Systems and Management comprises 192 units of credit to be completed over a period of four academic years.

Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session, and will not be permitted to enrol for more than 24 units.

Except in exceptional circumstances, students are required to undertake the Industrial Training Courses (having met all prerequisites) at the following times:
- Industrial Training A in the first half of their second year
- Industrial Training B in the second half of their third year
- Industrial Training C in the first half of their fourth year

**Rule 7 – Minimum Time for Completion**

The minimum time for completing the requirements for the degree is normally eight sessions full-time.

**Rule 8 – Academic Program Requirements**

To complete the requirements for the award of the degree a student must complete and pass 192 units of credit which shall include:

8.1 The compulsory courses set out in the program requirements.

8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics.

8.3 A major of at least 48 units in Information Systems in Level 1–3 courses, in addition to Industrial Training units, and a minor in another approved disciplinary stream

8.4 A student cannot:

8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;

8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;

8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;

8.4.4 count a mainstream course offered by another faculty as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.
Rule 9 – Honours

9.1 Honours may be taken in Information Systems and Management only.
9.2 Honours degree will not be awarded if academic performance is below the prescribed level.
9.3 Except in exceptional circumstances and with the approval of the Head of School to continue in the Honours program students must;
9.3.1 achieve a minimum average of 70% in Information Systems courses taken in years 2 and 3 of the program, and
9.3.2 pass all components in the program at the first attempt.
9.4 Students who fail to meet the performance requirements for Honours;
9.4.1 may substitute approved Information Systems courses for level 4 courses and be awarded a Pass degree and,
9.4.2 shall not be permitted to enrol in Thesis A, Thesis B, Research Topics in Information Systems 2 and further Honours options.

International Business

This program is available as a single major and co-major in the BCom (Pass) and as a co-major in the BSc (Pass) degrees. To satisfy minimum requirements for an International Business minor, students must take MGMT1101 & MGMT1102 plus 2 MGMT Options (excluding language options).

Required

- MGMT1101 Global Business Environment
- MGMT1102 Managing Across Cultures
- MGMT2101 International Business and Multinational Operations
- MGMT3101 International Business Strategy
- MGMT3102 Asia-Pacific Business

Options

At least one option must be chosen from List A

**List A**

- MGMT2106 Comparative Management Systems in East Asia
- MGMT2110 Alliance Management and International Co-operation*
- MGMT3103 Global Stakeholder Management*

* Please consult the School of Organisation and Management course timetable for availability.

**List B**

- MGMT1001 Communicating in Business
- MGMT2105 Chinese Business Enterprise
- ECON2105 Economics of Corporations
- ECON2111 Globalisation
- ECON2322 European Integration
- FINS1612 Capital Markets and Institutions
- HNS2622 Emerging Capital Markets
- LEGT1732 Franchising
- MGMT2703 International Employment Relations
- JAPN1000 Japanese Communication 1A#

Note:

1. Other modern languages may be taken as List B options: please see Modern Languages stream.
2. Students may count relevant courses offered in the Faculty of Arts and Sciences as List B options with the approval of the Head of School.

# For students with no Japanese. Students with HSC or equivalent competence will be enrolled at a suitable level course, subject to the results of a placement test.

International Business Honours

**Session One**

- MGMT4101 Applied Research Methods in International Business
- MGMT4102 Advances in International Business Theory
- MGMT4103 Research Seminar in International Business
- MGMT4501 Research Thesis Part A

**Session Two**

- MGMT4502 Research Thesis Part B (18 UOC)
- MGMT4104 Contemporary Res. Topic in International Business

Management

To meet minor requirements students must complete MGMT1001, MGMT1002, one course from List A and one from List B

Required

- MGMT1001 Fundamentals of Management
- MGMT1002 Managing Organisational Behaviour
- MGMT2001 Managing Innovation and Organisational Change
- MGMT2002 Managing Business Communication
- MGMT3001 Managing Business Strategy*

* Please consult the School of Organisation and Management course timetable for availability.

Options

At least one option must be chosen from List A.

**List A**

- ACG12522 Management Accounting: Process Improvement & Innovation
- ACCT3583 Stakeholder Value Management
- ECON2112 Game Theory & Business Strategy
- MGMT1102 Managing Across Cultures
- MGMT2703 International Employment Relations
- MGMT2718 Human Resource Management
- MARK1012 Marketing Fundamentals

**List B**

- ACCT3585 E-Business: Strategy and Processes
- ECON2105 Economics of Corporations
- ECON3121 Managerial Economics
- FINS1612 Capital Markets and Institutions
- FINS1613 Business Finance
- INF5602 Computer Information Systems
- LEGT1711 Legal Environment of Commerce
- LEGT2712 Business, Ethics & the Law

Management Honours

MGMT3708 is a prerequisite for all Year 4 Honours students and should be completed in Session 2, preceding the commencement of an Honours year.

The minimum requirements for Year 4 Management Honours are completion of a major or co-major in Management, required coursework and a 20,000 word thesis.

Marketing

**Required**

- MARK1012 Marketing Fundamentals
- MARK2051 Consumer Behaviour
- MARK2052 Marketing Research
- MARK2053 Marketing Communications & Promotions Management
- MARK2054 Market Analysis
- MARK3081 Distribution Strategy and Retail Channels
- MARK3082 Strategic Marketing Management

**Options**

- MARK1014 Customer Relationship Management
- MARK2055 Services Marketing Management
- MARK3071 International & Global Marketing
- MARK3072 Advanced Consumer Behaviour
- MARK3091 New Product & New Service Development
- MARK3092 Brand Management

Marketing Honours

This program is available to the end of Year 4 for BCom students only.

**Year 4**

**Required**

- MARK7204 Thesis (Marketing) Part A
- MARK7210 Business Research Methods in Marketing
- MARK7211 Research Seminar in Marketing
- MARK7212 Advanced Quantitative Methods in Marketing
- MARK7213 Contemporary Research Methods in Marketing
- MARK7205 Thesis (Marketing) Part B

Marketing Co-op Program

Entry to the program is at first year only and through the scholarship selection procedures administered by the Co-op Program Office. This is a four-year degree program.
Year 1

Session One
ACCT1501 Accounting and Financial Management 1A (core)
ECON1101 Microeconomics (core)
ECON1202 Quantitative Methods A (core)
MARK1012 Marketing Fundamentals (core)

Session Two
ACCT1111 Accounting and Financial Management 1B (core)
ECON1102 Macroeconomics (core)
ECON123 Quantitative Methods B (core)
Elective 1

Year 2

Session One
MARK2999 Industrial Training 1 (core)
MARK2031 Consumer Behaviour (core)
MARK2052 Market Research (core)

Session Two
MARK2053 Marketing Communications & Promotions Management (core)
MARK2054 Market Analysis (core)
Elective 2
6 UOC of General Education

Year 3

Session One
MARK3081 Distribution Strategy & Retail Channels (core)
Elective 3
Elective 4
Elective 5

Session Two
MARK3999 Industrial Training 2 (core)
Elective 6

Year 4

Session One
MARK4999 Industrial Training 3 (core)
6 UOC of General Education

Session Two
MARK3082 Strategic Marketing Management (core)
Elective 7
Elective 8
Elective 9

Rules Governing the Award of the Degree of Bachelor of Commerce (Marketing Co-op)

Rule 1 – Pass Degree
The degree of Bachelor of Commerce (Marketing Co-op) may be conferred as a Pass degree. In cases of superior academic performance throughout the course, the Pass degree will be conferred with Distinction.

Rule 2 – Disciplinary Minors
Students not completing the requirements of a double major in the program must choose options so that they complete a ‘disciplinary minor’ in a discipline other than Marketing. A ‘disciplinary minor’ is defined as four approved session courses to the value of 24 units of credit, or equivalent for courses taught outside the faculty, of which no more than 10 units may be first year courses.

Rule 3 – Entry and Continuation Conditions
3.1 Entry to the program is conditional upon:
   a. meeting the entry requirements for the Bachelor of Commerce
   b. the selection process for Co-op Scholarships

3.2 Except in exceptional circumstances, continuation in the program is conditional upon meeting the performance standards required to maintain the Co-op Scholarship. Students who lose their scholarship and are therefore excluded from continuing in the program will be transferred to a Bachelor of Commerce generalist degree program.

Rule 4 – Assessable Hours
4.1 On Campus Courses: Normal workload expectations for courses run in “on campus” mode are a minimum of 25 hours per-session per unit of credit, including class contact hours, preparation and time spent on all assessable work.

4.2 Industrial training: Normal workload expectations for industrial training courses are a minimum of the normal working hours per week for the site at which the student is based for the duration of the course.

Rule 5 – Passing in a Course
Where, in the following rules, reference is made to the requirement that a student shall pass a course, the requirement shall be construed as meaning that the student shall complete assignments, laboratory work, other set work and an examination or examinations by the prescribed dates to the satisfaction of the Head of School concerned.

Program Structure: Marketing Co-op Program

Rule 6 – Normal Program
This program leading to the award of the degree of Bachelor of Commerce (Marketing Co-op) comprises 192 units of credit to be completed over a period of four academic years.

Except in exceptional circumstances, a student must enrol in a minimum of 12 units per session, and will not be permitted to enrol in more than 24 units per session.

Except in exceptional circumstances, students are required to undertake the Industrial Training Courses (having met all prerequisites) at the following times:
- Industrial Training 1 at the commencement of the first half of their second year
- Industrial Training 2 in the second half of their third year
- Industrial Training 3 in the first half of their fourth year

Rule 7 – Minimum Time for Completion
The minimum time for completing the requirements for the degree is normally eight sessions full-time.

Rule 8 – Academic Program Requirements
To complete the requirements for the award of the degree a student must complete and pass 192 units of credit which shall include:

8.1 The compulsory courses set out in the program requirements.
8.2 12 units of approved General Education courses offered by faculties other than the Faculty of Commerce and Economics
8.3 Either:
8.3.1 a major of at least 48 units in Marketing, in addition to Industrial Training units, and a minor in another approved disciplinary stream; or
8.3.2 a major of at least 42 units in Marketing, in addition to Industrial training units and a second major of 42 units in another approved disciplinary stream.
8.4 A student cannot:
8.4.1 count more than 60 units of Level 1 core and electives courses towards their degree unless in exceptional circumstances;
8.4.2 attempt General Education courses until they have attempted 48 units of mainstream courses;
8.4.3 count mainstream courses offered by other faculties as substitutes for General Education courses towards more than 6 units of General Education requirements;
8.4.4 count a mainstream course offered by faculties other than Faculty of Commerce and Economics both as a substitute for a Commerce and Economics option and as a substitute for a General Education elective.

Rule 9 – Honours
9.1 For the Honours degree, a student must complete a further 48 units in Marketing.
9.2 Honours may be taken in Marketing only.
9.3 The additional units, comprising specified courses from the Marketing Honours program and a thesis, must be completed in two sessions following the completion of the Pass degree component.
9.4 The Honours degree will not be awarded if academic performance is below the prescribed level.
9.5 Except in exceptional circumstances, and with the approval of the Head of School to continue in the Honours program, students must:
   a. satisfy the Pass degree requirements and achieve a minimum average of 70% in Marketing courses taken in level 2 and level 3 courses of the program, and
   b. pass all components in the program at the first attempt.
9.6 Except with the special permission of the program authority on the recommendation of the Head of School, a person on whom the Pass degree of Bachelor of Commerce or equivalent has been conferred shall not be admitted to candidature for the Honours degree.

**Modern Languages**
Language programs available: Chinese, French, German, Greek (Modern), Indonesian, Italian, Japanese, Korean, Russian, Spanish.

Programs in Modern Languages are not available as a single major, but as a co-major only. However, language programs are not available as a co-major with Asian Studies, Business Law & Taxation, Japanese Studies, Korean Studies, another language or language studies.

To obtain a major, students must complete 42 units of credit in one language program offered by the Faculty of Arts and Social Sciences. Modern Languages is not available as a minor.

**Services Marketing - Tourism and Hospitality (BCom students only)**
This program is available only as a co-major integrated program with Marketing and only to those students admitted to the Bachelor of Commerce in Services Marketing – Tourism and Hospitality degree (program code 3571).

**Program Structure**

### Year 1

**Session One**
- ECON1101 Microeconomics 1 (6 UOC)
- ACCT1501 Accounting & Financial Management IA (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- SERV1100 Tourism and Hospitality Operational Studies (6 UOC)

**Session Two**
- SERV1001 Fundamentals of Tourism (6 UOC)
- ECON1102 Macroeconomics 1 (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)
- MARK1012 Marketing Fundamentals (6 UOC)

### Year 2

**Session One**
- SERV2001 Destination Marketing (6 UOC)
- ACCT1511 Accounting & Financial Management IB (6 UOC)
- MARK2035 Services Marketing and Management (6 UOC)

**Session Two**
- SERV2002 Services Operations Management (6 UOC)
- MARK2053 Marketing, Communications, & Promotions Management (6 UOC)
- SERV2003 Service Industry Project (6 UOC)
- Option (6 UOC)

### Year 3

**Session One**
- MARK2052 Marketing Research (6 UOC)
- LEGT3001 Legal Aspects of Tourism (6 UOC)
- ECON2117 Economics of Tourism (6 UOC)
- Option (6 UOC)

**Session Two**
- MARK2054 Market Analysis (6 UOC)
- MKMV3001 Managing People for Service advantage (6 UOC)
- Option (6 UOC)

### Year 4

**Session One**
- SERV4001 Strategic Management in Tourism and Hospitality (6 UOC)
- Option (6 UOC)

**Session Two**
- SERV4003 Tourism Policy and Planning (6 UOC)
- MARK3082 Strategic Marketing Management (6 UOC)
- Option (6 UOC)

**Electives**
- SERV2004 Event Management (6 UOC)*
- SERV2005 Managing Customer Service Experience (6 UOC)*

*Please consult School timetable for availability.

**Taxation**
This program is not available as a single major, or as a double major. This program is not available with the major or a minor in Business Law.

**Required Courses**
- LEGT1711 Legal Environment of Commerce
- LEGT2721 Business Transactions
- LEGT2751 Business Taxation
- LEGT3752 Capital Gains Tax
- LEGT3755 Taxation of Business Entities

Two options to be chosen from List A

**List A**
Two courses from the following list:
- LEGT2756 International Business Taxation
- LEGT3753 GST & FBT
- LEGT3757 Corporate Tax Strategy
- LEGT3758 Taxation of Financial Products

One further option to be chosen from either List A or List B

**List B**
- LEGT2741 Business Entities
- ACCT2542 Corporate Financial Reporting and Analysis
- AL.IL1005 Superannuation and Retirement Benefits
- ECON3106 Public Finance

**Note:** Other courses offered by the School of Business Law and Taxation may be substituted for the optional courses listed above with approval of the Head of School.

**Taxation Honours**
Honours level work may be undertaken as part of the four-year Honours program. The Honours program provides additional training in the discipline and in research methods relevant to the discipline. Students intending to undertake fourth year Honours are advised to enrol in one of the Honours options shown below in the third year.

Fourth year Honours is open to all high achieving internal and external students. Students are required to enrol in LEGT4726 Research Methods in Taxation in session one and LEGT4900 Taxation Honours Thesis in both Session One and Session Two.

### Year 4

**Required**
- LEGT4722 Special Topic in Taxation
- LEGT4725 Contemporary Issues in Taxation
- LEGT4726 Research Methods in Taxation
- LEGT4900 Taxation Honours Thesis

**Options**
One option to be chosen from the following courses
- LEGT3753 GST & FBT
- LEGT2756 International Business Taxation
- LEGT3757 Corporate Tax Strategy
- LEGT3758 Taxation of Financial Products
A Message from the Dean
This Handbook describes the many undergraduate programs available in the Faculty of Engineering at UNSW. There is a very wide choice of programs, plans and electives and we therefore suggest you spend some time reading the Handbook carefully.

Whatever program you consider, it will be managed by one of our ten schools. Each school will have an advisor who can help you plan your program.

In addition to the individual programs you can broaden your University experience by taking one of the wide range of combined programs which combine the BE with BSc, BA, LLB and BCom degrees. A Master of Biomedical Engineering may be studied concurrently with several of the BE programs.

The Faculty of Engineering is dedicated to scholarship and research and to the facilitation of student learning. The academic staff are engaged in research and engineering practice, most of which is in collaboration with industry. This engagement with the frontiers of engineering and the related sciences ensures that students are familiar with the latest developments. In later years many students are able to participate in the work of the research teams in the Faculty.

The Faculty is a major part of the international dimension of UNSW, we welcome many international students and also encourage local students to take part of their program at an overseas university. We have strong links with major research universities throughout the world.

Students are encouraged to play an active role in all the University has to offer. There are many student led projects and other activities which can enhance your experience as a student at UNSW.

Brendon Parker
Dean
Faculty of Engineering
School of Computer Science and Engineering

3645 Computer Engineering 209
3647 Bioinformatics 211
3648 Software Engineering 212
3978 Computer Science 213

Combined/Concurrent Degree Programs

3726 Computer Engineering/Bachelor of Science 215
3722 Computer Engineering/Bachelor of Arts 215
3715 Computer Engineering/Bachelor of Commerce 216
3728 Computer Engineering/Master of Biomedical Engineering 216
3755 Bioinformatics/Bachelor of Science 217
3756 Bioinformatics/Bachelor of Arts 218
3715 Bioinformatics/Bachelor of Commerce 219
3757 Bioinformatics/Master of Biomedical Engineering 220
3651 Software Engineering/Bachelor of Science 221
3652 Software Engineering/Bachelor of Arts 222
3653 Software Engineering/Bachelor of Commerce 223
3749 Software Engineering/Master of Biomedical Engineering 223
3983 Computer Science/Bachelor of Science 224

3138 Bachelor of Engineering (Materials Science)/Master of Biomedical Engineering 261
3683 Bachelor of Engineering (Mechanical Engineering)/Master of Biomedical Engineering 261
3688 Bachelor of Engineering (Mechatronic Engineering)/Master of Biomedical Engineering 261
3749 Bachelor of Engineering (Software Engineering)/Master of Biomedical Engineering 261
3723 Bachelor of Engineering (Telecommunications Engineering)/Master of Biomedical Engineering 261

Faculty Information and Assistance
The entry for the Faculty of Engineering is divided into separate sections for each school/unit. Before reading ‘Rules for Progression and the Award of Degrees’, you must read the general information at the front of this Faculty entry and then read the opening sections for each of the schools within the Faculty. These sections cover all degrees and diplomas offered by the Faculty. Detailed information on each course then appears under Course Descriptions at the end of this Handbook, which includes pre-requisite details, class hours, units of credit, etc.

You will find that almost any program of study you wish to undertake has courses from other schools, and even other faculties. This means that, in your engineering program, courses are listed from other schools in the Faculty of Engineering, each with its own identifying code, as well as from the school in which you are planning to study. If, for example, this is Mechanical and Manufacturing Engineering (MECH), all the courses for Mechanical and Manufacturing Engineering are described in the section for that school. As Mechanical and Manufacturing Engineering also includes Aerospace Engineering (AERO), Manufacturing Engineering and Management (MANF), Mechatronic Engineering (MTRN) and Naval Architecture (NAV), these courses are also included with the school.

For a full list of courses offered by the University refer to the Online Handbook at www.handbook.unsw.edu.au or visit the Faculty website and refer to the relevant school.

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

Who Can Help?
This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Engineering.

If you require advice about enrolment, degree requirements, progression within programs, course content and requirements, contact the appropriate school representative listed below:

Faculty of Engineering, Dean's Office
Ms Donna Bailey, Room 603, Building K17
Tel: (02) 9385 6437

School of Chemical Engineering and Industrial Chemistry
Ms Vanessa Werfel, Room 314, Applied Science Building
Tel: (02) 9385 4777

School of Civil and Environmental Engineering
Ms Karene Irvine, Room 406, Civil Engineering Building

Graduate School of Biomedical Engineering
School Office, 5th Floor, Samuels Building
Tel: (02) 9385 3917

Important: As changes may be made to information provided in this Handbook, students should frequently consult the official noticeboards of the schools, the University and the Online Handbook at www.handbook.unsw.edu.au

The Faculty of Engineering Website
www.eng.unsw.edu.au

This Faculty of Engineering website provides information about programs, courses, research interests, news and current events. The website also contains links to all the schools, units, centres and affiliated research institutes of the Faculty, as well as staff and student information resources.

Entrance Requirements
Students with a UAI (or equivalent) greater than 85 will be considered for admission based on performance in their Australian Year 12 studies and/or tertiary or post-secondary qualifications and/or overseas qualifications equivalent to Australian studies. Students eligible to apply to UNSW via UAC and with ranks in the range 75-84.99 apply for entry through Multiple Criteria Entry (MCE). Other international applicants apply directly to UNSW.

For further details about Multiple Criteria Entry, please refer to the website www.eng.unsw.edu.au/multiplecriteria/2005

General Education Requirements
Students must satisfy the General Education requirements. This is usually 12 UOC taken in the second and third years of their studies. If a student is in a combined degree program with a reduced General Education requirement and then reverts to the single degree program, the usual General Education requirements for that program apply.

Each Faculty has responsibility for deciding what courses can be counted towards the General Education requirement for their students. The Faculty of Engineering is committed to providing the widest range of choice of General Education electives for its students. It strongly encourages students to make the best use of this flexibility. Please contact your School Office for further information on General Education electives available to you.

For a more detailed explanation of the requirements and objectives of General Education and a guide to the choice of specific courses, students should refer to the General Education section in this Handbook or the Online Handbook at www.handbook.unsw.edu.au.

Re-enrolment Procedures
All current students are able to re-enrol via the web using myUNSW. This means that, in most cases, students will be able to enrol and drop classes without the need to fill in forms or attend their program office.

Further information, including details on how and when to enrol for 2006 using myUNSW, is available via myUNSW (http://my.unsw.edu.au). It is the responsibility of students to enrol in a program consistent with the rules governing re-enrolment and admission to the degree.

Faculty Centres
ARC Centre of Excellence in Advanced Silicon Photovoltaics and Photonics
**Silicon wafer-based ('first generation') photovoltaic approaches,** applying the group's leadership in both laboratory and commercial technologies to the key issues facing photovoltaics over the coming decade.

- Silicon thin-film ('second generation') approaches.
- ‘Third generation’ photovoltaic approaches, capable of performance higher than single junctions, continuing the highly assessed program being conducted within the SRC for Third Generation Photovoltaics.
- Silicon photonics, including the development of high-efficiency silicon-based light emitters and high speed modulators for microelectronics.

The first three strands address issues relevant to the PV industry over the next 20 years, while the fourth applies insights and technology developed in our PV work to the broader microelectronics area.

**Professional Institutions**

1. **Institution of Engineers Australia**

The professional body for engineering in Australia is Institution of Engineers Australia, which has as its first objective the promotion of the science and practice of engineering in all its branches. Institution of Engineers Australia has its national headquarters in Canberra and functions through a series of divisions, the local one being the Sydney Division. Within each division are branches representing the main interests within the profession, e.g. civil, mechanical, electrical, engineering management and environmental engineering.

Students of an approved school of engineering may join the Institution as a student member. Student members receive the monthly publications *Engineers Australia* and *Student News* and have access to other publications at preferential rates.

Student members are invited to participate in the Excellence Award for Work Experience, the National Young Engineer of the Year Award and to avail themselves of other Engineers Australia services including the Mentor Scheme and industrial experience guidance.

For more information and membership application forms, contact Institution of Engineers Australia, Sydney Division, 1st Floor, 118 Alfred Street, Milsons Point 2061, telephone (02) 8923 7100, website www.ieaust.org.au

2. **The Institution of Surveyors, Australia and the Spatial Sciences Institute, Australia**

During their undergraduate years, students in the Surveying and Spatial Information Systems program are encouraged to take the first steps in joining in the activities of the professional bodies which represent them: the Institution of Surveyors and the Spatial Sciences Institute. The aims of the bodies are to promote scientific, technical and educational aspects of Surveying and Spatial Information Systems and to maintain high professional standards of practice and conduct. Student members receive the journals of the Institutes and *Azimuth*, which is published by the NSW Division of the Institution. Membership also entitles the student to attend all meetings of the Institution and to attend the annual SSI Congress at a special concessional rate. Membership application forms are available at the Office of Surveying and Spatial Information Systems and from the Institution Office, Third Floor, Guild House, 363 Pitt Street, Sydney 2000. Websites: www.ieaust.org.au and www.spatialsciences.org.au

3. **The Association of Professional Engineers, Scientists and Managers, Australia**

APESMA is a professional organisation that represents the industrial interests of its members with a major focus on providing advice and assistance on employment related matters, including individual representation and improving salaries and conditions for professional engineers, scientists and managers.

Students are invited to become affiliate members (free of charge) of the Association while they are studying. This membership gives students access to information and advice on industrial experience, salary rates for graduates and contracts of employment. Student members receive *The Student Update*, a publication designed specifically for students, three times a year. This gives students some practical insight into aspects of the workplace to which they may not have given much thought, in particular the employment issues that affect them as professional engineers. More information and student membership application forms can be obtained from APESMA, Level 1, 491 Kent Street, Sydney 2000, telephone: 9263 6500, website www.apesma.asn.au

**Summary of Programs**

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

**Full-time Programs**

The Faculty of Engineering offers the following full-time undergraduate programs:

**Bachelor of Engineering BE**

in:
- Aerospace Engineering 3710
- Bioinformatics 3647
- Chemical Engineering 3040
- Civil Engineering 3620
- Computer Engineering 3645
- Electrical Engineering 3640
- Environmental Engineering 3625
- Industrial Chemistry 3100
- Manufacturing Engineering and Management 3710
- Mechanical Engineering 3710
- Mechatronic Engineering 3710
- Mining Engineering 3140
- Naval Architecture 3710
- Petroleum Engineering 3045
- Photonics Engineering 3644
- Photovoltaics & Solar Energy 3642
- Renewable Energy Engineering 3657
- Software Engineering 3648
- Surveying and Spatial Information Systems 3741
- Telecommunications 3643

**Bachelor of Science BSc**

- Computer Science 3978
- Food Science and Technology 3040
- Food Science and Technology (Honours) 3065

**Bachelor of Science (Technology) BSc(Tech)**

- Chemical Engineering 3050
- Food Science and Technology 3070
- Industrial Chemistry 3110

**Combined Degree Programs**

Full-time programs are available for the award of the following degrees:

**Bachelor of Engineering Bachelor of Science BE BSc**

(5 years duration) in:
- Aerospace engineering 3711
- Bioinformatics 3755
- Chemical Engineering 3042
- Civil Engineering 3730
- Computer Engineering 3726
- Electrical Engineering 3725
- Environmental Engineering 3735
- Industrial Chemistry 3102
- Manufacturing Engineering and Management 3711
- Mechanical Engineering 3711
- Mechatronic Engineering 3711
- Mining Engineering 3142
- Naval Architecture 3711
- Petroleum Engineering 3047
- Photonic Engineering 3644
- Photovoltaics and Solar Energy 3655
Renewable Energy Engineering 3658
Software Engineering 3651
Surveying and Spatial Information Systems 3746
Telecommunications 3641
Bachelor of Engineering Bachelor of Arts BE BA (5 years duration) in:
Aerospace Engineering 3712
Bioinformatics 3756
Chemical Engineering 3043
Civil Engineering 3621
Computer Engineering 3722
Electrical Engineering 3720
Environmental Engineering 3626
Industrial Chemistry 3103
Manufacturing Engineering and Management 3712
Mechanical Engineering 3712
Mechatronic Engineering 3712
Mining Engineering 3144
Naval Architecture 3712
Photovoltaics and Solar Energy 3656
Software Engineering 3652
Surveying and Spatial Information Systems 3747
Telecommunications 3646
Bachelor of Engineering Bachelor of Commerce BE BCom (5 years duration) in:
Software Engineering 3653
(5.5 years duration) in:
Bioinformatics Engineering 3715
Chemical Engineering 3715
Civil Engineering 3715
Computer Engineering 3715
Electrical Engineering 3715
Environmental Engineering 3715
Industrial Chemistry 3715
Manufacturing Engineering and Management 3715
Mechanical Engineering 3715
Mechatronic Engineering 3715
Mining Engineering 3715
Petroleum Engineering 3715
Photonics Engineering 3715
Photovoltaics & Solar Energy 3715
Renewable Energy Engineering 3715
Surveying and Spatial Information Systems 3715
Telecommunications 3715
Bachelor of Engineering Bachelor of Laws BE LLB (6 years duration) in:
Civil Engineering 4775
Environmental Engineering 4777
Bachelor of Engineering Bachelor of Engineering BE BE (5 years duration) in:
Civil Engineering and Mining Engineering 3146
Civil Engineering and Environmental Engineering 3631
Bachelor of Science Bachelor of Science BSc BSc (4 years duration) in:
Computer Science 3983
Bachelor of Science Bachelor of Arts BSc BA (4 years duration) in:
Computer Science 3968
Bachelor of Science Bachelor of Digital Media BSc BDM (4 years duration) in:
Computer Science and Digital Media 3982
Bachelor of Engineering Master of Engineering (BE ME) or Master of Science (BE MSc) Admission Guidelines: An applicant for the BE ME or BE MSc program should, at the time of application, be enrolled in the 4.5-year fast-track Faculty of Engineering BE MEngSc program and have just completed the requirements for the BE component at a minimum of Honours Class 2 or equivalent. Applications to transfer to the ME or MSc degree should be made to the Registrar.

Period of Candidature for ME MSc Degree: The normal period is three academic sessions (full-time). In special cases, this can be reduced by up to two academic sessions. The maximum period of registration is six academic sessions (full-time). It is expected that such candidates complete the entire BE ME or BE MSc program in 5 years (which includes a Summer Session in their 5th year), and that they would be enrolled on a full-time basis.

Coursework: Candidates who have completed the BE component of the BE MEngSc program (and who have hence successfully completed 12 units of credit of postgraduate coursework in their 4th year of study) are considered to have fully satisfied the Faculty of Engineering requirement for ME or MSc coursework.

Award of ME MSc Degree: As for the standard research ME or MSc program. That is, the award of the ME or MSc degree is on the basis of a thesis which embodies the result of an investigation, or design, or engineering development.

Fast-Track Programs Bachelor of Engineering Master of Engineering Science BE MEngSc Students may undertake a 4.5-year (10 semesters) full-time fast-track program leading to the awards of a Bachelor of Engineering and a Master of Engineering Science in an approved discipline (see below) of the Faculty of Engineering.

In the School of Computer Science and Engineering this program is the Bachelor of Engineering and Master of Information Technology. The purpose of the program is to offer an accelerated completion of a postgraduate coursework program in engineering to high achieving students. The program will be fully accredited and will provide students with in-depth specialist training to facilitate employment in discipline specific consulting practices and other specialist areas of the profession. The fast-track program structure will thus encourage completion of a first postgraduate coursework program, and lay the groundwork for lifelong learning.

(4 1/2 years duration) in:
Bioinformatics 3647
Chemical Engineering 3040
Civil Engineering 3620
Computer Engineering 3645
Electrical Engineering 3640
Environmental Engineering 3625
Industrial Chemistry 3100
Manufacturing Engineering & Management 3710
Mechanical Engineering 3710
Mechatronic Engineering 3710
Mining Engineering 3140
Software Engineering 3648
Surveying and Spatial Information Systems 3741
Telecommunications 3643

Fast-Track Programs Bachelor of Engineering Master of Commerce These programs are no longer offered to commencing students. Students who enrolled prior to 2004 only are eligible to do these programs. Please contact your School Office if you require further information.

Concurrent Degree Programs Full-time programs are available for the award of the following degrees:
Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE Students may undertake a five-year full-time program leading to the awards of a Bachelor of Engineering (in an approved discipline) and a Master of Biomedical Engineering. The purpose of a program is to offer accelerated completion of a postgraduate coursework program to high-achieving students. Students are required to maintain a Credit average in the first three years in order to continue enrolment in the postgraduate component of the program.

(5 years duration) in:
Bioinformatics 3757
Chemical Engineering 3048
Computer Engineering 3728
Electrical Engineering 3727
Materials Science 3138
Mechanical Engineering 3683
Mechatronic Engineering 3688
Software Engineering 3749
Telecommunications 3723
UNSW Co-op Program

The UNSW Co-op Program is a scholarship program set up by industry and the University of New South Wales, which provides money and industry training for selected undergraduate students in disciplines in Commerce, Science and Engineering.

Applicants should have achieved a particular academic standard (UAI 95.7 or equivalent), however, if you are expecting a UAI of at least 93.8, it would still be worth applying. Students are selected as Co-op Scholars largely on the basis of their personal skills, leadership potential and motivation, as well as their non-academic achievements.

Applications close the end of September each year with interviews held at UNSW at the beginning of December. For more details see your School Careers Adviser or contact the UNSW Co-op Program office on (02) 9385 5116 or visit www.co-op.unsw.edu.au

Transfer Programs

Students transferring to UNSW after successful completion of part of an engineering degree program at an Australian university would normally be admitted with advanced standing into the degree programs offered by the Faculty of Engineering.

Students who have completed part of an undergraduate program in one school may apply through UAC for a transfer to a program in another school of the Faculty with credit for relevant courses completed. However, as there are significant differences in the various programs, students are not necessarily granted exemption from the same number of courses as they have completed in the program to which the transfer is made. Enrolment quotas apply to undergraduate programs and the number of places available for transfer is limited and offers will be made on a competitive basis.

Formal advanced standing procedures apply for entry into the following Bachelor of Engineering (BE) programs at the UNSW with full credit.

BE in Aerospace Engineering

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four-year degree program at any Australian tertiary institution may be admitted to Years 3 and 4 of the program leading to the Bachelor of Engineering degree in Aerospace Engineering. The proviso is that Head of the School is satisfied that the courses studied at the other institution are equivalent, and he gives his recommendation.

BE in Naval Architecture

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four-year degree program at any Australian tertiary institution may be admitted to Years 3 and 4 of the program leading to the Bachelor of Engineering degree in Naval Architecture. The proviso is that Head of the School is satisfied that the courses studied at the other institution are equivalent, and he gives his recommendation.

Rules for Progression and the Award of Degrees

Access to Exam Information

Students in the Faculty of Engineering may request access to their own final examination scripts and may request consultation with the examiner on their performance provided that a written application is made to the program authority no later than fifteen working days after the date of official release of results.

Bachelor of Engineering Program Rules

1. The Bachelor of Engineering is awarded following the completion of a minimum of 192 units of credit.
2. The specific requirements for the Bachelor of Engineering in the various disciplines are set out in the relevant sections in this Handbook.
3. The degree may be awarded with Honours, based upon the overall performance in the program and in accordance with Faculty and School policies. Honours are awarded in the following classes – Class 1, Class 2 Division 1, Class 2 Division 2.
4. The standard duration of the program is four years, or eight sessions, of full-time study each comprising 24 units of credit. Students may undertake the program over a longer period on the basis of part-time study.
5. Each student is required to complete a minimum of 60 days of approved experience in industry prior to graduation.
6. General Education electives may only be attempted after the student has attempted at least 24 units of credit.

Bachelor of Engineering Bachelor of Science Program Rules

To qualify for the Bachelor of Engineering and the Bachelor of Science a student must complete successfully courses that total at least 240 units of credit and include:

(a) in the Faculty of Engineering:
   - courses making up a full 4-year engineering program described in the degree requirements for the BE specialisation for which the student is enrolled; and
(b) in the Faculty of Science:
   - at least 102 units of credit comprising a major in an approved disciplinary stream described in Table A of the Science Handbook, or a major in Computer Science; and
(c) at least 60 days of approved Industrial Training (required for the award of the BE degree).

Exclusions

The following combined degree combinations are specifically excluded:

BE in Computer Engineering BSc in Computer Science
BE in Software Engineering BSc in Computer Science

Requirements for the BE and BSc degrees with Honours

(a) BE with Honours

On completion of the requirements for the combined degrees a student may qualify for the award of the BE degree with Honours in accordance with the rules for the BE program of specialisation and the Faculty of Engineering rules for calculation of the grade of Honours (1st Class Honours: a weighted average of 70% or greater; 2nd Class Honours Division i: a weighted average of 65% or greater; a student being awarded the highest grade of Honours for which they qualify).

(b) BSc with Honours

On completion of the requirements for the combined degrees a student may be qualified to enrol in an Honours program in the Bachelor of Science and to qualify for the award of the BSc with Honours after successfully completing an additional year of study (48 UOC) as specified in the rules of the Faculty of Science.

Programs of study

The programs of study which may be taken for the degrees of Bachelor of Engineering and Bachelor of Science are governed by the normal rules for award of the BE and BSc in the Faculty of Engineering and the Faculty of Science respectively, which specify:

(i) units of credit;
(ii) corequisites, prerequisites, assumed knowledge;
(iii) the structure of the degree program; and
(iv) any special conditions.

Award of the degrees

(i) A candidate for the award of the degrees of Bachelor of Engineering or Bachelor of Science as part of a combined degree program shall not be eligible to be awarded either degree until he or she has completed both degree requirements.
(ii) A student who completes the requirements for both the BE and BSc degrees shall receive at graduation a separate testamur for each of the degrees.
(iii) A student may apply to discontinue the combined BE BSc programs and elect to complete either the BE or BSc degree in accordance with the rules governing award of that degree. Following discontinuation of one of the programs (BE or BSc), courses which count toward that program may not in general count toward the remaining single degree unless they meet the single degree requirements in their own right.

Administration of the programs

(i) A student’s general program will be administered by the Faculty of Engineering and delegated to administration by the school governing the Engineering specialisation.
(ii) Students’ programs will be administered by the Faculty of Science for the BSc component of the program and by the Faculty of Engineering for the BE part of the program.

(iii) The Faculty of Science and the Faculty of Engineering shall jointly exercise authority in any matter concerning the combined programs not otherwise covered by these rules.

Enrolment

(i) An application to enrol as a candidate for the combined program shall be made through the UAC, or on the prescribed form for international students which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(ii) The candidate shall be enrolled as either a full-time or part-time student.

General Education

Students are enrolled in combined undergraduate programs, leading to the award of two degrees, each in a different faculty, and therefore meet their General Education requirements.

Program structure

Contained in the University Handbook are typical program structures for each of the schools within the Faculty of Engineering, and for the Faculty of Science. The programs may be varied by students according to the rules governing electives, prerequisites and corequisites and progression within each program. Subject to pre and corequisites and progression rules, students may take courses at any time during the program; it is the responsibility of each student to ensure that the rules governing award of the degrees have been met and that the program of study in each session of enrolment is feasible with regards to progression and timetabling.

Admission Requirements

(i) Local HSC students: Local students apply through the UAC. Students admitted to the combined program will have to meet the requirement for entry to the combined program, which ensures that the requirements for entry to both the BSc and the relevant BE program are met (i.e. the higher of the two requirements has to be met).

(ii) International students: International students will be assigned an equivalent rank to enable their performance to be compared to that of local HSC students, using criteria determined by the Admissions Office.

Students have to apply to the Admissions Office using the application forms (paper or electronic) provided for the purpose. International students completing Year 12 in Australia apply directly to the UAC. An admission requirement similar to that for local students will have to be met.

(iii) Admission to later stages of the program: Students may be admitted to the combined degree program having satisfied part of the requirements for either the BSc or the BE component of the degree (or part of the requirements for both), either at UNSW or at another institution. Students will be admitted on the basis of an equivalent rank, determined by the Admissions Office, equivalent to that required for local HSC students in the year of entry. Students will be offered advanced standing in accordance with normal practice for the BE and BSc degrees. Students will apply using the procedures appropriate for either local HSC students or international students (above).

Bachelor of Engineering Master of Engineering Science Program Rules

1. The minimum duration of the program is 4.5 years (including a summer semester at the end of the 4th year) leading to the award of the two degrees Bachelor of Engineering (BE) and Master of Engineering Science (MEngSc). In the School of Computer Science and Engineering, the award is Bachelor of Engineering (BE) and Master of Information Technology (MIT).

2. Students must study all courses in the sequence approved by the Faculty of Engineering and are not permitted to enrol in any graduate course until the first six semesters of the program are successfully completed.

3. A minimum average of 65% in the first 3 years of the BE program is required for consideration for entry to the fast track degree program.

4. Honours grading for the BE degree will be based on performance in the first 4 years of study, with course weightings in accordance with School guidelines. The 12 units of credit of graduate coursework undertaken in Year 4 are thus counted for both degrees.

5. Normal Student Contributions/Fees apply to the first 8 semesters of the program (including the 12 units of credit of MEngSc courses completed in Year 4) consistent with other undergraduate programs within the Faculty. Fees for the remaining 36 units of credit of the MEngSc program will be 75% of the current fee for the standard 48 units of credit MEngSc.

Faculty Rules for Progression

Progression in all undergraduate programs in the Faculty of Engineering is permitted by course. However:

1. Programs will continue to be stated and timetabled by year or stage and it cannot be guaranteed that non-standard programs can be completed in the minimum number of years. Students are not permitted to enrol in courses with clashing timetables.

2. Students must satisfy the relevant prerequisite and corequisite requirements. This will usually necessitate students completing or attempting all courses of a particular year or stage before proceeding to a course in the next part of a program. Further details are available from schools.

A prerequisite course is one which must be completed prior to enrolment in the course for which it is prescribed.

A corequisite course is one which must either be completed successfully before or be studied concurrently with the course for which it is prescribed.

3. Only in exceptional circumstances will students be allowed to enrol in a program containing courses from more than two consecutive years of the program or totalling more than 27 units of credit. Students repeating courses will be expected to choose a program that includes previously failed courses and limits their units of credit. Details of these limits are available from School offices and may only be exceeded with the express permission of the Head of School. A failed elective may be replaced by another elective.

4. Notwithstanding the above, before students can enrol in any non-standard programs, such program must meet with the approval of the Head of School. A non-standard program is one which involves enrolment in courses from more than one year or stage, or comprises courses which are not normally included in the program for a particular year.

For Academic Standing rules please refer to the General University Rules and Student Information section in this Handbook.

Honours

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTU/ DY support is available for the combined degree program including the Honours level.

Industrial Experience Requirements

All students must complete at least 60 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

Program Revision

Following any program revision, students whose progression is normal are entitled to complete under the version of the program that applied when they first enrolled. Alternatively, they may transfer to the revised program with credit for all courses completed at the time the revised program is introduced.

Program Rules and Information

Faculty of Engineering – All Schools

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.
3715 Bachelor of Engineering Bachelor of Commerce

BE BCom

Typical Duration
3.5 years

Minimum UOC for Award
264 units of credit

Typical UOC per Session
24 units of credit

Program Description

The Faculty of Engineering and the Faculty of Commerce and Economics offer a combined degree program which qualifies students for two degrees after five and a half years of successful study: the Bachelor of Engineering (potentially with Honours) and the Bachelor of Commerce (for which an Honours program requires an additional 48 UOC). This combined degree is offered in the following Engineering disciplines:

Bioinformatics Engineering
Chemical Engineering
Civil Engineering
Computer Engineering
Electrical Engineering
Environmental Engineering
Industrial Chemistry
Manufacturing Engineering and Management
Mechanical Engineering
Mechatronic Engineering
Mining Engineering
Petroleum Engineering
Photonics Engineering
Photovoltaics & Solar Energy
Renewable Energy Engineering
Software Engineering (program code 3653)
Surveying and Spatial Information Systems
Telecommunications

Requirements for the Bachelor of Engineering and the Bachelor of Commerce degrees

To qualify for the Bachelor of Engineering and the Bachelor of Commerce a student must complete successfully courses that total at least 264 units of credit and include:

(a) in the Faculty of Engineering:
   • courses making up at least 168 units of credit described in the degree requirements for the BE specialisation for which the student is enrolled; and
(b) in the Faculty of Commerce:
   • at least 96 units of credit comprising a major of at least 48 units of credit in an approved disciplinary stream and a minor of 24 units of credit of approved session courses of which no more than 12 units may be level 1 courses; prescribed level 1 introductory courses; or suitable electives to make up the full 96 UOC; and
(c) at least 60 days of approved Industrial Training (required for the award of the BE degree).

Administration of the Programs

(i) A student's general program will be administered by the Faculty of Engineering and delegated to administration by the school governing the engineering specialisation.
(ii) Students' programs will be administered by the Faculty of Commerce and Economics for the BCom component of the program and by the Faculty of Engineering for the BE part of the program.
(iii) The Faculty of Commerce and Economics and the Faculty of Engineering shall jointly exercise authority in any matter concerning the combined programs not otherwise covered by these rules.

Enrolment

(i) An application to enrol as a candidate for the combined program shall be made through UAC to the following programs:
   BE in Software Engineering BCom 425028(HECS), 445028 (FEE)
   BE in all other programs BCom 425029(HECS), 445029(FEE),
   or on the prescribed form for international students which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(ii) The candidate shall be enrolled as either a full-time or part-time student.

Program Objectives and Learning Outcomes

The program is intended for potential engineers who wish to become more aware of economic and social aspects of the engineering profession, and skilled in technical management. It is expected that those taking this program would progress to entrepreneurial and managerial roles. A full range of commerce and engineering careers will still be open to those who qualify with both components of the combined degree program.

Most engineers progress to technical management roles, and these programs will strengthen the commerce background in addition to providing the engineering skills. Increasingly, engineers also find employment in the commercial sector, and the combined programs will provide a good background for those entering banking, consultancy etc. Students wishing to enter the purely commercial sector will benefit from technical and numerate strengths obtained as part of the engineering program.

Program Structure

Stage 1

Session One
Science & Engineering courses (24 UOC)

Session Two
Science & Engineering courses (24 UOC)

Stage 2

Session One
Science & Engineering courses (24 UOC)

Session Two
Commerce courses (24 UOC)

Stage 3

Session One
Commerce courses (24 UOC)

Session Two
Science & Engineering courses (24 UOC)

Stage 4

Session One
Science & Engineering courses (12 UOC)

Commerce courses (12 UOC)

Session Two
Science & Engineering courses (12 UOC)

Commerce courses (12 UOC)

Stage 5

Session One
Science & Engineering courses (24 UOC)

Session Two
Science & Engineering courses (24 UOC)

Stage 6

Commerce courses 24 units of credit

Honours

(a) BE with Honours

On completion of the requirements for the combined degrees a student may qualify for the award of the BE degree with Honours in accordance with the rules for the BE program of specialisation and the Faculty of Engineering rules for calculation of the grade of Honours (1st Class Honours: a weighted average of 75% or greater; 2nd Class Honours Division i: a weighted average of 70% or greater; 2nd Class Honours Division ii: a weighted average of 65% or greater, a student being awarded the highest grade of Honours for which they qualify).

(b) BCom with Honours

On completion of the requirements for the combined degrees a student may be qualified to enrol in an Honours program in the Bachelor of Commerce and to qualify for the award of the BCom with Honours after successfully completing an additional year of study (48 UOC) as specified in the rules of the Faculty of Commerce.

Academic Rules

The programs of study which may be taken for the degrees of Bachelor of Engineering and Bachelor of Commerce are governed by the normal
rules for award of the BE and BCom in the Faculty of Engineering and the Faculty of Commerce respectively, which specify:

(i) units of credit;
(ii) corequisites, prerequisites, assumed knowledge;
(iii) the structure of the degree program; and
(iv) any special conditions.

Award of the Degrees

(i) A student who completes the requirements for both the BE and BCom degrees shall receive at graduation a separate testamur for each of the degrees.
(ii) A student may apply to discontinue the combined BE BCom programs and elect to complete either the BE or BCom degree in accordance with the rules governing award of that degree. Following discontinuation of one of the programs (BE or BCom), courses which count toward that program will not in general count toward the remaining single degree unless they meet the single degree requirements in their own right.

School of Chemical Engineering and Industrial Chemistry

Head of School: Associate Professor Michael Brungs

Administrative Officer: Vivienne Brennan

Director, Teaching and Learning: Associate Professor Vicki Chen

The School offers a Bachelor of Engineering in both Chemical Engineering and Industrial Chemistry, together with a Bachelor of Science in Food Science and Technology. The duration of these degree programs is four years full-time. Six year part-time programs in Chemical Engineering and Industrial Chemistry are also available, leading to a Bachelor of Science (Technology). The School also offers a Bachelor of Science (Honours) in Food Science and Technology and a 3 year Bachelor of Science (Food Science and Nutrition major) program.

The Bachelor of Engineering degrees are accredited by the Institution of Engineers Australia and the Royal Chemical Institute. The Bachelor of Engineering in Chemical Engineering is also accredited by the Institution of Chemical Engineers (UK). Graduates of both Food Science and Technology programs qualify for membership of the Australian Institute of Food Science and Technology, the US Institute of Food Technologists and may qualify for membership of the Royal Australian Chemical Institute.

Combined degree programs are also available for suitably qualified students. These are the Bachelor of Engineering Bachelor of Science and the Bachelor of Engineering Bachelor of Arts. Also available are Bachelor of Engineering Bachelor of Commerce. A concurrent Bachelor of Engineering Master of Biomedical Engineering is also available in Chemical Engineering. The School offers a fast-track program over 4.5 years full-time, the Bachelor of Engineering and Master of Engineering Science (BE EngSc) which allows flexibility of choice between formal coursework and project work and also a 5 year BE ME or MSc (Chem Eng).

Chemical Engineering is the application of the principles of the physical sciences, together with the principles of economics and human relations, to fields in which matter undergoes a change in state, energy content or composition. The chemical engineer is generally responsible for the design, construction and operation of plant and equipment used in the chemical processing industries. Chemical Engineers are employed in a very wide range of industries including the chemical, minerals, pharmaceutical, food and energy industries. Many chemical engineers work in environmental management, research and development business, management and computer applications.

Industrial chemists have a strong foundation in the basic sciences, particularly chemistry, in addition to their engineering skills. Their roles range from solving problems in forefront research areas, to the successful operation of Australia’s manufacturing industry. Industrial chemists characterise and select raw materials, develop environmentally responsible routes for the production of commodity materials and chemicals, control chemical plan and processes and verify the quality of the product. Industrial chemists are capable of fulfilling a multiplicity of roles as research scientists, development chemists, technical representatives and as plant/company managers.

Food Science and Technology involves an understanding of the basic sciences and the application of this knowledge to food manufacture from the point of production, through handling, processing, preservation, distribution and marketing, up to consumption and utilisation by consumers. It is concerned with food processes, commodities, composition and quality (including sensory properties, safety and nutritional value). The study of Food Science and Technology integrates many scientific disciplines. Its bases are in chemistry, physics, biochemistry, microbiology, and molecular biology. The challenges are to increase the availability, variety, quality and quantity of foods economically and in line with the needs of the world population. The Australian industry has a major role to play in supplying high quality foods to overseas markets and there is a national and international demand for professionally trained people prepared to accept responsibility for the production, quality and safety of this food. The programs provide basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources, and communication and in areas such as dietetics after further training.

For the award of Honours, students need to have distinguished themselves in the formal work, in other assignments as directed by the Head of the School, and in the final year project, for which a thesis is required. It is compulsory that, before completion of the program, students in both the Chemical Engineering and Industrial Chemistry full-time programs must obtain a minimum of twelve weeks professionally oriented or industrial experience. Students in the part-time programs in Chemical Engineering and Industrial Chemistry must complete an approved program of industrial experience of not less than twelve months prior to the award of the degree.

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

3040 Chemical Engineering (Full-time)

Bachelor of Engineering BE

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description

This program extends over four years and students study full-time during the day for twenty-eight weeks of each year (excluding examination and recess periods).

The Director of Teaching and Learning may approve various program patterns involving full-time or part-time study.

This program is also available as a combined degree program with BE (Chem Eng) BSc (program 3042), BE (Chem Eng) BA, (program 3043), BE(Chem Eng) BCom, program 3715, the concurrent degree BE (Chem Eng) MBiomedE, (program 3048), and the fast track program BE(Chem Eng) MEngSc, (program 3040), plan CEIC13040). For more information, please contact Director, Teaching and Learning.

General Education (3 UOC)

General Education
Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

Honours
For the award of Honours in the Chemical Engineering and Industrial Chemistry programs, students need to have distinguished themselves in the formal work, in other assignments as directed by the Head of the School, and in the final year project, for which a thesis is required.

Academic Rules
For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience Requirements
It is compulsory that, before completion of the program, students in both the Chemical Engineering and Industrial Chemistry full-time programs must obtain a minimum of twelve weeks professionally oriented or industrial experience. Students in the part-time programs in Chemical Engineering and Industrial Chemistry must complete an approved program of industrial experience of not less than twelve months prior to the award of the degree.

Further Requirements
Students are expected to possess a calculator having exponential capabilities, however, more advanced calculators and personal computers, will be found useful. In examinations, students may be required to use calculators supplied by the University, so that no student will have an unfair advantage over another. Further information may be obtained from the Head of School.

Students of both Chemical Engineering and Industrial Chemistry are advised to have a copy of Perry J H Ed. Chemical Engineers Handbook 6th Ed. McGraw-Hill. This book is used extensively for most courses and units. Certain courses and units do not have specified textbooks and in these cases reference books are used or printed notes supplied.

If you are required to complete a varied program of physics or maths in your first year (i.e. General Maths or Fundamentals of Physics), then students are not permitted to undertake studies in higher options of other courses.

Professional Recognition
Successful completion of the BE degree program is accepted by the Institution of Chemical Engineers, the Institution of Engineers, Australia, and Royal Australian Chemical Institute as sufficient academic qualification for corporate membership.

### 3050 Chemical Engineering (Part-time)

**Bachelor of Science (Technology) BSc(Tech)**

**Typical Duration**
6 years

**Minimum UOC for Award**
144 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**
Six year part-time program leading to the award of the degree of Bachelor of Science (Technology) in Chemical Engineering is intended for students who are employed in relevant industries and who wish to prepare for a degree mainly by part-time attendance. They consist of the first 3 years of the respective full-time program, but undertaken over a six year period.

As part of the requirements for the award of the BSc(Tech) degree, students are required to complete an approved program of industrial training of not less than one year prior to the award of the degree. Industrial training should normally be completed concurrently with attendance in the program, but with the approval of the Head of School, may be completed after completion of the prescribed program of study.

Students who qualify for the award of the BSc(Tech) degree and who wish to proceed to the award of a BSc or BE degree will normally be required to complete further work which will involve at least one year of full-time attendance.

Further details of part time programs can be obtained from the Director of Teaching and Learning.

**Program Structure**
The structure of this part-time program is similar to the full-time program (BE Chemical Engineering 3040) only over a longer period. Please refer to the 3040 Chemical Engineering program entry for more information.

**Academic Rules**
For academic rules relating to this program, please refer to the entry for the full-time program (BE Chemical Engineering 3040) and contact the Faculty of Engineering for more information.

Note that as part of the requirements for the award of the BSc(Tech) degree, students are required to complete an approved program of industrial training of not less than one year prior to the award of the degree or with the approval of the Head of School, may be completed after completion of the prescribed program of study.

### 3060 Food Science and Technology (Full-time)

**Bachelor of Science BSc**

**Typical Duration**
4 years

**Minimum UOC for Award**
192 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**
This program is designed to provide depth and breadth in the relevant physical and biological sciences on which food science and technology is based. It is strongly recommended that students obtain, before the completion of the program and during recess periods, as much
professionally oriented or industrial experience as possible. The BSc program in Food Science and Technology (3060) is Pass or Honours, determined by academic performance in Stages 2-4.

Program Structure

Year 1
BIO1201 Molecules, Cells and Genes (6 UOC)
FOOD1120 Introduction to Food Science (6 UOC)
FOOD1130 The Food Industry (6 UOC)
MAT1101 Mathematics for Life Sciences (6 UOC)
MAHT1041 Statistics for Life and Social Sciences (6 UOC)
PHYS1111 Fundamentals of Physics (6 UOC)

And ONE of the following courses:

CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
CHEM1031 Higher Chemistry 1C (6 UOC)

And ONE of the following courses:

CHEM1021 Fundamentals of Chemistry 1B (6 UOC)
CHEM1041 Higher Chemistry 1D (6 UOC)

Year 2
CHEM2921 Food Chemistry 1 (6 UOC)
FOOD1230 Food Choice (6 UOC)
FOOD2220 Nutrition (6 UOC)
MICR2201 Fundamentals of Microbiology and Immunology (6 UOC)
BIOL2181 Fundamentals of Biochemistry (6 UOC)
BIOL2291 Fundamentals of Molecular Biology (6 UOC)

General Education courses (12 UOC)

Year 3
CHEM3811 Food Chemistry 2 (6 UOC)
FOOD1360 Food Processing Principles (6 UOC)
FOOD1370 Food Preservation: Principles and Applications (6 UOC)
FOOD1380 Unit Operations in Food Processing (6 UOC)
FOOD1390 Product Design and Development (6 UOC)
FOOD2320 Food Microbiology (6 UOC)
FOOD2330 Quality Assurance and Control (6 UOC)
FOOD2340 Food Safety (6 UOC)

Year 4
Stream A
FOOD3400 Industry Liaison* (6 UOC)

And ONE of the following courses:

FOOD1400 Project (6 UOC)
FOOD1480 Minor Project (6 UOC)

Plus a combination of electives to total 30 or 36 units of credit from the following list.

BIO1J01 Biotechnology A (6 UOC)
BIO1J21 Biotechnology B (6 UOC)
BIO1J31 Commercial Biotechnology (6 UOC)
ECON1101 Microeconomics 1 (6 UOC)
ECON1102 Macroeconomics 1 (6 UOC)
FOOD1470 Postharvest Technology of Food (6 UOC)
FOOD1490 Advanced Food Chemistry (6 UOC)
FOOD3230 Forensic Food Science (6 UOC)
FOOD2480 Advanced Food Microbiology (6 UOC)
FOOD2490 Analytical Microbiology (6 UOC)
FOOD3440 Advanced Nutrition (6 UOC)
FOOD3450 Advanced Food Processing (6 UOC)
INF1603 Business Data Management (6 UOC)
MAKK1012 Marketing Fundamentals (6 UOC)
PHHP2101 Physiology 1A (6 UOC)
PHHP2201 Physiology 1B (6 UOC)

Or such other electives as approved by the School. FOOD courses taken within the School must total at least 36 units of credit.

Please note FOOD1470 and FOOD2490 will not be offered in 2006.

Stream B: Industry Module Program

FOOD3400 Industry Liaison* (6 UOC)
FOOD5410 Industry Practicum (24 UOC)
Plus Electives (18 UOC)

*During Stage 4 of the program, excursions are made to various food industries. Detailed reports of some of these visits may be required.

General Education Requirements

Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.

For further information, please refer to the General Education section in this Handbook.

Academic Rules

For academic requirements relating to this program, please refer to Program Structure and contact the School of Chemical Engineering and Industrial Chemistry for more information.

Further Information

During the program, excursions are made to various food industries. Detailed reports of some of these visits may be required.

Professional Recognition

Graduates of this program qualify for membership of the Australian Institute of Food Science and Technology, the US Institute of Food Technologists, and may qualify for membership of the Royal Australian Chemical Institute.

The program provides basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources and food wastes, and communication, and in areas such as dietetics after further training.

3065 Honours in Food Science

Bachelor of Science (Honours) BSc(Hons)

Typical Duration
1 year

Minimum UOC for Award
48 units of credit

Typical UOC per Session
24 units of credit

Program Description

This is a one-year full-time Honours program in Food Science. It is designed to provide extensive research training in some aspects of Food Science and Technology at undergraduate level. The research orientation of the program, compared to the Graduate Diploma, facilitates entry into a research higher degree (MSc/PhD) upon completion of Honours at a satisfactory level.

Entry to the program requires satisfactory completion of a Bachelor degree, or equivalent, in an area considered relevant to Food Science and Technology. Students who have completed a four year Bachelor program, in which Honours has already been awarded, are specifically excluded.

The major component of the program is an extensive research project, conducted throughout one year of full-time study. Candidates also take 6 units of credit of courses within the School, or such other courses as approved by the program coordinator. Honours is awarded on the basis of performance in the research project and satisfactory completion of coursework.

Program Structure

Compulsory Courses

FOOD9410 Honours Research Project (21 UOC) HOUXXXXX*

*Courses offered in Food Science and Technology or as approved by the program coordinator and dependent upon the background of the candidate. Units of credit for coursework courses may be concentrated in one session.

Academic Rules

For academic requirements relating to this program, please refer to Program Structure and contact the School of Chemical Engineering and Industrial Chemistry for more information.

3070 Food Science and Technology (Part-time)

Bachelor of Science (Technology) BSc(Tech)

Typical Duration
6 years

Minimum UOC for Award
144 units of credit
Typical UOC per Session
24 units of credit

Program Description
This program is designed for students who are employed in the food processing industries. It extends over six part-time years of study, and leads to the award of the degree of Bachelor of Science (Technology). Students are required to complete an approved program of industrial training of not less than twelve months prior to the award of the degree. Industrial training should normally be undertaken concurrently with attendance in the program, but with the approval of the Head of Department may be completed after completion of the prescribed program of study.

The program covers the same subject matter as the first three years of the full-time program: 3060. For the first two years students follow a common program in which general biology is taken, and thereafter specialise in the biological sciences, which are fundamental to the study of food science and technology. The courses of Stages 3, 4, 5 and 6 may be available only in daytime classes, and substantial daytime release from industry may be required. Students who have completed the requirements of this program and have qualified for the award of the degree of Bachelor of Science (Technology) may proceed to the award of the degree of Bachelor of Science by attending for one full-time year and completing the courses listed in Year 4 of the full-time program. Students desiring to proceed to the award of a BSc degree must apply to the Head of the Department not later than 31 December of the year in which the sixth stage is completed.

General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.

For further information, please refer to the General Education section in this Handbook.

Academic Rules
For academic requirements relating to this program, please refer to Program Structure and contact the School of Chemical Engineering and Industrial Chemistry for more information.

Professional Recognition
Graduates of this program qualify for membership of the Australian Institute of Food Science and Technology, the US Institute of Food Technologists, and may qualify for membership of the Royal Australian Chemical Institute.

The program provides basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources and food wastes, and communication, and in areas such as dietetics after further training.

3100 Industrial Chemistry (Full-time)

Bachelor of Engineering BE

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
Industrial Chemistry is a four-year professional program that is concerned with the application of science and technology to the chemical industry.

Successful completion of the program is accepted by the Royal Australian Chemical Institute and the Institution of Engineers, Australia as sufficient academic qualification for full corporate membership.

The Director of Teaching and Learning may approve various program patterns involving full-time and part-time study.

This program can form part of combined degrees with BE (Ind Chem) BSc (program 3102), BE (Ind Chem)/BA (program 3103), BE (Ind Chem)/BCom (Program 3175) and also the fast-track program BE (Ind Chem)/MEngSc (plan CEIC13100). For more details contact the Director of Teaching and Learning, School of Chemical Engineering & Industrial Chemistry.

Industrial Experience
Students are required to complete an approved program of industrial training of not less than one year prior to the award of the degree. Industrial training should normally be completed concurrently with attendance in the program, but with the approval of the Head of School, may be completed after completion of the prescribed program of study.

3042 Chemical Engineering/Bachelor of Science

Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The combined program of five years full-time study enables a student in the school to qualify for the award of the two degrees of Bachelor of Engineering and Bachelor of Science (BE BSc). Graduates from this course will have a broader range of complementary computing and engineering skills that will greatly enhance both their employment and career prospects. The School of Chemical Engineering and Industrial Chemistry administers the program.

Program Structure

Year 1
CEIC1020 Introduction to Chemical Engineering (6 UOC)
CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
CHEM1021 Fundamentals of Chemistry 1B (6 UOC)
COMP1011 Computing 1A (6 UOC)
COMP1021 Computing 1B (6 UOC)
MATH1131 Mathematics 1A (6 UOC)
MATH1231 Mathematics 1B (6 UOC)

And ONE of the following courses:
PHYS1111 Fundamentals of Physics (6 UOC)
PHYS1169 Physics 1 (Chem, Mech, Min Eng) (6 UOC)

Year 2
CEIC2011 Instrumental Analysis - Theory (3 UOC)
CEIC2110 Material & Energy Balances (3 UOC)
CHEM2120 Fluid Flow (3 UOC)
CEIC2130 Heat Transfer (3 UOC)
CHEN2030 Chemical Engineering Laboratory 1 (3 UOC)
CHEN2061 Introduction to Process Chemistry 1 (6 UOC)
CHEN2062 Introduction to Process Chemistry 2 (3 UOC)
CHEN2140 Mass Transfer (3 UOC)
COMP2011 Data Organisation (6 UOC)
MATH1081 Discrete Mathematics (6 UOC)
MATH2020 Mathematics 2A (3 UOC)
MATH2030 Mathematics 2B (3 UOC)
MATH2899 Applied Statistics for Chemical Engineers (6 UOC)

Year 3
CEIC3010 Reaction Engineering (4 UOC)
CEIC3070 Process Control (4 UOC)
CEIC3110 Thermodynamics (3 UOC)
CEIC4103 Professional Electives (3 UOC)
CHEN3021 Systems Modelling & Analysis (3 UOC)
CHEN3022 Process Modelling & Optimisation (3 UOC)
CHEN3031 Advanced Transport Phenomena (3 UOC)
CHEN3062 Particles, Separation, Heat Exchangers and Pressure Vessels (6 UOC)
CHEN3065 Plant and Equipment Design (4 UOC)
CHEN3080 Chemical Engineering Practice 2 (3 UOC)
COMP2021 Digital System Structures (6 UOC)
COMP2041 Software Construction: Techniques and Tools (6 UOC)

Year 4
CEIC2012 Instrumental Analysis - Practical (3 UOC)
CEIC4104 Professional Electives (3 UOC)
CHEN3067 Process Design & Economics (3 UOC)
CHEN3068 Process Design & Safety (3 UOC)
Honours
For the award of Honours in the Chemical Engineering and Industrial Chemistry programs, students need to have distinguished themselves in the formal work, in other assignments as directed by the Head of the School, and in the final year project, for which a thesis is required.

Academic Rules
For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience Requirements
It is compulsory that, before completion of the program, students in both the Chemical Engineering and Industrial Chemistry full-time programs must obtain a minimum of twelve weeks professionally oriented or industrial experience. Students in the part-time programs in Chemical Engineering and Industrial Chemistry must complete an approved program of industrial experience of not less than twelve months prior to the award of the degree.

Further Requirements
Students are expected to possess a calculator having exponential capabilities, however, more advanced calculators and personal computers, will be found useful. In examinations, students may be required to use calculators supplied by the University, so that no student will have an unfair advantage over another. Further information may be obtained from the Head of School.

Students of both Chemical Engineering and Industrial Chemistry are advised to have a copy of Perry J H Ed. Chemical Engineers Handbook 6th Ed. McGraw-Hill. This book is used extensively for most courses and units. Certain courses and units do not have specified textbooks and in these cases reference books are used or printed notes supplied. If you are required to complete a varied program of physics or maths in your first year (i.e. General Maths or Fundamentals of Physics), then students are not permitted to undertake studies in higher options of other courses.

Professional Recognition
Successful completion of the BE degree program is accepted by the Institution of Chemical Engineers, the Institution of Engineers, Australia, and Royal Australian Chemical Institute as sufficient academic qualification for corporate membership.

3043 Chemical Engineering/Bachelor of Arts
Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
3 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The combined program of five years full-time study enables a student in the school to qualify for the award of the degrees of Bachelor of Engineering and Bachelor of Arts. Since Engineering and Arts programs can have a common content, such as mathematics and physics, approximately two additional sessions of study are required to gain the additional qualifications of Bachelor of Arts. In general this additional study is taken concurrently with the BE program and both can be completed within 10 sessions.

The program is open to all students who satisfy both the Chemical Engineering and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a credit or higher average or permission from the Head of School.

The BE BA programs are administered by the School of Chemical Engineering. The School requires the student to obtain the approval of the Faculty of Arts and Social Sciences for the BA components of their program. The School of Chemical Engineering must approve the final program timetable.

Program Structure
For the Program Structure, please refer to the Academic Rules below and contact the Faculty of Engineering for more information.

Honours
For the award of Honours in the Chemical Engineering and Industrial Chemistry programs, students need to have distinguished themselves in the formal work, in other assignments as directed by the Head of the School, and in the final year project, for which a thesis is required.

Academic Rules
1. Students must complete 60 units of credit in the BA program with no more than 24 units of credit obtained at Level 1 (i.e. courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one sequence of study.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - European Studies
   - Environmental Studies
   - Film
   - French
   - German Studies
   - Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology & Anthropology
   - Spanish & Latin American Studies
   - Theatre & Performance Studies
   - Women’s and Gender Studies

*Students completing an Environmental Studies major sequence must complete, in addition to the 30 Upper Level units of credit specified, 6 level 1 units of credit in an approved course. Students must also complete a minor sequence of 24 units of credit on one of the other areas listed above.

3. Except for courses completed as part of the Environmental Studies major sequence, no more than 12 units of credit may be obtained from courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE programs can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of the program 3040 BE in Chemical Engineering or 3100 BE in Industrial Chemistry except that they are exempt from the General Education requirement of the BE BSc program. However, students will not be eligible for graduation for the BE

**Academic Rules**

For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

**Industrial Experience Requirements**

All students must complete at least 60 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.
3103 Industrial Chemistry/Bachelor of Arts

Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

The combined program of five years full-time study enables a student in the school to qualify for the award of the degrees of Bachelor of Engineering and Bachelor of Arts. Since Engineering and Arts programs can have common content, such as mathematics and physics, ordinarily only two additional sessions of study are required to gain the additional qualifications of Bachelor of Arts. In general this additional study is taken concurrently with the BE program and both can be completed within 10 sessions.

This program is open to all students who satisfy both the Industrial Chemistry and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a credit or higher average or from permission by the Head of School.

The BE BA programs are administered by the School of Industrial Chemistry. The School requires the student to obtain the approval of the Faculty of Arts and Social Sciences for the BA components of their program. The School of Industrial Chemistry must approve the final program timetable.

Program Structure

Please refer to the Academic Rules below and contact the School of Industrial Chemistry and the Faculty of Arts and Social Sciences for information on the Program Structure.

Academic Rules

1. Students must complete 60 units of credit in the BA program with no more than 24 units of credit obtained at Level 1 (i.e. courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one sequence of study.

2. Students must complete a major sequence (42 units of credit in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - European Studies
   - Environmental Studies*
   - Film
   - German Studies
   - Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology & Anthropology
   - Spanish & Latin American Studies
   - Theatre & Performance Studies
   - Women's and Gender Studies

* Students completing an Environmental Studies major sequence must complete, in addition to the 30 Upper Level units of credit specified, 6 Level 1 units of credit in an approved course. Students must also complete a minor sequence of 24 units of credit on one of the other areas listed above.

3. Except for courses completed as part of the Environmental Studies major sequences, no more than 12 units of credit may be obtained from subjects in the BA program which are offered by Schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE programs can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of the program 3100 BE in Industrial Chemistry except that they are exempt from the General Studies requirement of the BA program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BSc program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of an Honours year. It should be noted that entry into a particular BA Honours program will require completion of courses additional to those specified under rules 1–4.

8. The total units of credit in the combined program is 5 x 48 = 240.

For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience Requirements

All students must complete at least 60 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

3715 Industrial Chemistry/Bachelor of Commerce

BE BCom

Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook. Information about the program structure can be found in the Online Handbook program entry for 3715 BE BCom under the area of specialisation Industrial Chemistry.

Fast Track Programs with Master of Engineering Science

3040 Chemical Engineering/Master of Engineering Science

Plan CEICL13040

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the awards of a Bachelor of Engineering and a Master of Engineering in Chemical Engineering.

Students undertake the first three years (6 semesters) of the BE program in Chemical Engineering. Subject to satisfying a minimum performance over these three years (see ‘Rules for Progression and the Award of Degrees’), they:

(a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year;

(b) undertake 12 units of credit of project/thesis work over the Summer (9th) semester; and

(c) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

Students need to apply, at the end of Year 3, to the Director of Teaching and Learning for entry into the program. The School of Chemical Engineering and Industrial Chemistry administers the program.

Stage 1 to Stage 3

Same as program 3040
Six year full-time programs 4775 and 4777 leading to the award of Graduate Thesis (4 UOC), (3 UOC), Environmental Management 1 (3 UOC), and Design Project (6 UOC).

Five year full-time programs 3621 and 3626 leading to the award of Special Research Project Practice (6 UOC), (9 UOC), (9 UOC), Design Project (7 UOC), and Process Design B (3 UOC).

Five and one half year full-time programs 3715 leading to the award of Special Research Project Practice (6 UOC), Management and Plant Operation (9 UOC), and Special Research Project Practice (9 UOC).

Four and one half year full-time programs 3620 and 3625 leading to the award of Research Project Theory (6 UOC), (4 UOC), (3 UOC), and Process Design B (3 UOC).

The Centre for Water and Waste Technology is located within the School of Environmental Engineering. The School comprises specialist staff with a broad spectrum of expertise across the disciplines of Civil and Environmental Engineering.

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering in Industrial Chemistry. Students undertake the first three years (6 semesters) in the School of Civil and Environmental Engineering. Subject to satisfying a minimum performance over these three years (see ‘Rules for Progression and the Award of Degrees’), they may undertake 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) undertake 12 units of credit of project/thesis work over the summer (9th) semester; and (c) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

Students need to apply, at the end of Year 3, to the Director of Teaching and Learning for entry into the program. The School of Chemical Engineering and Industrial Chemistry administers the program.

Stage 1 to Stage 3

Same as program 3100

Total Units of Credit: 24 each Stage

Stage 4

CEIC4070 Automation Science (4 UOC), (6 UOC), (6 UOC), CHEN4031 Environmental Management 1 (3 UOC), and Design Project (8 UOC).

Stage 5 (Summer Semester)

CEIC8320 Graduate Thesis (12 UOC).

Stage 5 (Session 1)

4 postgraduate elective courses, totalling 24 UOC.

3100 Industrial Chemistry/Master of Engineering Science

Plan CEICL13100

Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering in Industrial Chemistry. Students undertake the first three years (6 semesters) of the BE program in Industrial Chemistry. Subject to satisfying a minimum performance over these three years (see ‘Rules for Progression and the Award of Degrees’), they may undertake 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) undertake 12 units of credit of project/thesis work over the summer (9th) semester; and (c) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

Students need to apply, at the end of Year 3, to the Director of Teaching and Learning for entry into the program. The School of Chemical Engineering and Industrial Chemistry administers the program.

Stage 1 to Stage 3

Same as program 3100

Total Units of Credit: 24 each Stage

Stage 4

CEIC4070 Automation Science (4 UOC), (6 UOC), (6 UOC), CHEN4031 Environmental Management 1 (3 UOC), and Design Project (8 UOC).

Stage 5 (Summer Semester)

CEIC8320 Graduate Thesis (12 UOC).

Stage 5 (Session 1)

4 CEIC8XXX postgraduate courses totalling 24 UOC.

School of Civil and Environmental Engineering

Head of School: Professor NJ Ashbolt
Senior Administrative Officer: Ms KM Irvine
Executive Assistant: Vacant

The School undertakes teaching and research in the specialist disciplines of engineering construction and management, geotechnical engineering, structural engineering, transport engineering, water engineering and environmental engineering. The School comprises specialist staff with a broad spectrum of expertise across the disciplines of Civil and Environmental Engineering.

The Centre for Water and Waste Technology is located within the School. In addition to extensive laboratory facilities on the Kensington campus, the School operates the Heavy Structures Laboratory at Govett Street, Randwick, and the Water Research Laboratory at King Street, Manly Vale. The latter complex houses the School’s Water Reference Library.

The School offers programs 3620 and 3625 leading to the award of degrees of Bachelor of Engineering in Civil Engineering (BE) and Bachelor of Engineering in Environmental Engineering (BE), at Pass or Honours level. In the Civil Engineering program, students may elect to major in structural engineering, geotechnical engineering, transport engineering, water engineering or engineering construction and management. These programs can be taken on a four year full-time basis, on a part-time basis or on a combined full-time/part-time basis subject to the approval of the Head of School. Intending part-time students are advised that all courses are offered only in the day-time. Part-time students will normally take two years for each equivalent full-time year. Alternatively, the programs may be taken in a sandwich form in which a student, after completing the first year of the program on a full-time basis, gains industrial experience during one or more periods of employment by taking leave of absence for an entire academic year.

The School also offers a range of combined degree programs which combine the Bachelor of Engineering degrees in Civil or Environmental Engineering with a range of other undergraduate degree programs and postgraduate degrees in engineering and other disciplines. These combined degree programs provide students with the opportunity to broaden their education and to complete two degrees with a significant saving in time. The combined degree programs include:

Five year full-time programs 3146 leading to the award of the degrees of Bachelor of Engineering in Civil Engineering and Bachelor of Engineering in Mining Engineering (BE BE), and 3631 leading to the degrees of Bachelor of Engineering in Civil Engineering and Bachelor of Engineering in Environmental Engineering (BE BE).

Five year full-time programs 3730 and 3735 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, and Bachelor of Science (BE BSc).

Five year full-time programs 3621 and 3626 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, and Bachelor of Arts (BE BA).

Five and one half year full-time programs 3715 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering and Bachelor of Commerce (BE BCom).

Four and one half year full-time programs 3620 and 3625 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, with 8612 Master of Engineering Science.

Six year full-time programs 4775 and 4777 leading to the award of the degrees of Bachelor of Engineering in Civil and Environmental Engineering, respectively, and Bachelor of Laws (BE LLB).

The broad objective of the School's undergraduate programs is to develop well-educated graduates with the basic skills, attributes and knowledge required to practise as professional engineers. The desired skills are those that enable graduates to be problem solvers; critical thinkers; life long learners; good communicators; team players; independent investigators; effective managers; self-motivated; and economically, environmentally and socially aware.

It is intended that these attributes are developed in students at the same time that they gain knowledge in a broad range of disciplines. In addition, an objective of the programs is to provide the skills and knowledge in a social context. Integrating courses in each year of each program (the Engineering Practice courses) have been introduced to achieve this objective.

Honours

Honours is awarded to students who have achieved above average results and who undertake an Honours thesis in their final year. A weighted average is calculated for each student. A different weighting factor for each year of the program is applied to the marks in each course by units of credit as follows:

Year 1 x 1
Year 2 x 2
Year 3 x 4
Year 4 x 5

Although Industrial training is now part of course CVEN4126 it is assigned a further nominal value of 3 units of credit in Year 4 in the Honours calculation. For combined degree programs, only the marks obtained in the standard Civil or Environmental Engineering courses are used in the calculation. A weighted average mark in the range of 65–69 will result in a recommendation for Honours 2/2. A weighted average mark in the range of 70–74 will result in a recommendation for Honours 2/1.

The School of Chemical Engineering and Industrial Chemistry administers the program. Students need to apply, at the end of Year 3, to the Director of Teaching and Learning for entry into the program. The School of Chemical Engineering and Industrial Chemistry administers the program.

Stage 1 to Stage 3

Same as program 3100

Total Units of Credit: 24 each Stage

Stage 4

CEIC4070 Automation Science (4 UOC), (6 UOC), (6 UOC), CHEN4031 Environmental Management 1 (3 UOC), and Design Project (8 UOC).

Stage 5 (Summer Semester)

CEIC8320 Graduate Thesis (12 UOC).

Stage 5 (Session 1)

4 CEIC8XXX postgraduate courses totalling 24 UOC.
A weighted average mark of 75 and above will result in a recommendation for Honours 1.

Professional Recognition
Both the BE in Civil Engineering and the BE in Environmental Engineering are fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

Industrial Experience
Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least 60 days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study.

Computing Requirements
Information regarding recommended computing equipment for the programs offered by the School is available on the website www.civeng.unsw.edu.au/currentstudents/general/computing/

Program Objectives and Learning Outcomes
The broad objective of the School's undergraduate programs is to develop well-educated graduates with the basic skills, attributes and knowledge required to practise as professional engineers. The desired skills are those that enable graduates to be problem solvers; critical thinkers; life long learners; good communicators; team players; independent investigators; effective managers; self-motivated; and economically, environmentally and socially aware.

It is intended that these attributes are developed in students at the same time that they gain knowledge in a broad range of disciplines. In addition, an objective of the programs is to provide the skills and knowledge in a social context. Integrating courses in each year of each program (the Engineering Practice courses) have been introduced to achieve this objective.

Program Structure
Plan CVEN13620
Year 1
CVEN1021 Civil Engineering Practice 1A (4 UOC)
CVEN1022 Civil Engineering Practice 1B (6 UOC)
CVEN1023 Statics (4 UOC)
CVEN1024 Dynamics (4 UOC)
CVEN1025 Computing (4 UOC)
CVEN1026 Engineering Materials 1 (4 UOC)
PHYS1279 Physics 1 (Civil Engineering) (4 UOC)
And ONE of the following courses:
CHEM1011 Fundamentals of Chemistry 1A (b UOC)
CHEM1031 Higher Chemistry 1C (6 UOC)
And ONE of the following courses:
MATH1131 Mathematics 1A (6 UOC)
MAHIH141 Higher Mathematics 1A (6 UOC)
And ONE of the following courses:
MATH1231 Mathematics 1B (6 UOC)
MAHIH1241 Higher Mathematics 1B (6 UOC)
Year 2
CVEN2022 Civil Engineering Practice 2 (3 UOC)
CVEN2023 Mechanics of Solids (3 UOC)
CVEN2025 Engineering Computations 1 (3 UOC)
CVEN2026 Engineering Materials 2 (3 UOC)
CVEN2125 Systems Engineering (3 UOC)
CVEN2126 Engineering Construction 1 (3 UOC)
CVEN2222 Geotechnical Engineering 1 (3 UOC)
CVEN2322 Structural Engineering 1 (6 UOC)
CVEN2525 Intro to Water Engineering (3 UOC)
GMAT0442 Surveying for Civil Engineers (3 UOC)
GMAT0491 Survey Camp (3 UOC)
MATH2019 Engineering Mathematics 2CE (6 UOC)
General Education (6 UOC)
Year 3
CVEN3023 Civil Engineering Practice 3A (3 UOC)
CVEN3024 Civil Engineering Practice 3B (3 UOC)
CVEN3025 Engineering Computations 2 (3 UOC)
CVEN3125 Engineering Construction 2 (3 UOC)
CVEN3126 Engineering Management 1 (3 UOC)
CVEN3222 Geotechnical Engineering 2 (3 UOC)
CVEN3223 Geotechnical Engineering 3 (3 UOC)
CVEN3322 Structural Engineering 2 (6 UOC)
CVEN3324 Structural Engineering 3 (3 UOC)
CVEN3438 Transport Planning and Environment (3 UOC)
CVEN3448 Transport Engineering (3 UOC)
CVEN3526 Water Resources Engineering (3 UOC)
CVEN3527 Water Engineering (3 UOC)
General Education (6 UOC)
Year 4
Session One
Students achieving a School weighted average mark exceeding 62 (calculated from all courses in Years 1 to 3 of the BE program) are eligible to undertake an Honours thesis in Year 4 (CVEN4000 in S1 and CVEN4001 in S2).
CVEN4126 Engineering Management 2 (3 UOC)
CVEN4225 Geotechnical Engineering 4 (3 UOC)
CVEN4323 Structural Engineering 4 (3 UOC)
CVEN4526 Water and Wastewater Treatment (3 UOC)
Plus TWO of the following four electives:
CVEN4000 Honours Thesis Part A (6 UOC)
CVEN4027 Civil Engineering Practice 4A (6 UOC)
CVEN4028 Civil Engineering Practice 4B (6 UOC)
CVEN4029 Civil Engineering Practice 4C (6 UOC)
Session Two
All students not undertaking the Honours thesis are required to select two majors. Students undertaking the Honours thesis are required to undertake one major plus at least 8 units of credit of electives taken from one other discipline area. To complete a major, all three 4 units of credit elective subjects (listed for each discipline below) must be undertaken.
CVEN4001 Honours Thesis Part B (4 UOC)
Construction and Management Major
CVEN4139 Advanced Construction and Project Management (4 UOC)
CVEN4149 Professional Level Project Management Tools and Skills (4 UOC)
CVEN4159 Advanced Construction Technology and Engineering (4 UOC)

Geotechnical Engineering Major
CVEN4279 Rock and Slope Engineering (4 UOC)
CVEN4289 Site Investigations and Dam Engineering (4 UOC)
CVEN4299 Advanced Topics in Geotechnical Engineering (4 UOC)

Structural Engineering Major
CVEN4339 Design of Bridges (4 UOC)
CVEN4349 Special Topics in Concrete, Steel and Composite Structures (4 UOC)
CVEN4359 Structural Analysis and Finite Elements (4 UOC)

Transport Engineering Major
CVEN4439 Transport Operations and Systems Design (4 UOC)
CVEN4449 Traffic Management and Control (4 UOC)
CVEN4459 Transport and Environment (4 UOC)

Water Engineering Major
CVEN4539 Advanced Water Quality and Treatment (4 UOC)
CVEN4549 Advanced Catchment and Coastal Processes (4 UOC)
CVEN4559 Advanced Water Engineering (4 UOC)

The School offers a range of specialist plans in the civil engineering program, which are available to high achieving students. Basically students complete most of the requirements of the standard plan CVEN13620 with specialist replacements for some courses in Years 2, 3 and especially Year 4 of the program. Students achieving a School weighted average mark of less than 65 (calculated from all courses in Years 1 to 3 of the BE program) are ineligible to continue in the plan and must transfer into and complete the standard Year 4 of the academic plan CVEN1A3620.

CVENJS3620 Civil and Structural Engineering Plan
Year 2
Replace CVEN2022 with CVEN2032 Civil/ Structural Engineering Practice 2

Year 3
Replace CVEN3023 with CVEN3032 Civil /Structural Engineering Practice 3A
Replace CVEN3024 with CVEN3033 Civil/ Structural Engineering Practice 3B

Year 4
Replace CVEN4526 with CVEN4324 Structural Engineering Case Study
CVEN4339, CVEN4349 and CVEN4359 are compulsory

CVENKS3620 Civil and Geotechnical Engineering Plan
Year 2
Replace CVEN2022 with CVEN2062 Civil/Geotechnical Engineering Practice 2

Year 3
Replace CVEN3023 with CVEN3062 Civil/Geotechnical Engineering Practice 3A
Replace CVEN3024 with CVEN3063 Civil/Geotechnical Engineering Practice 3B

Year 4
Replace CVEN4526 with CVEN4226 Engineering Geology and Geotechnical Models
CVEN4279, CVEN4289 and CVEN4289 are compulsory

CVENLS3620 Civil Engineering and Project Management Plan
Year 2
Same as CVEN1A3620

Year 3
Replace CVEN3023 with CVEN3012 Civil Engineering and Project Management Practice 3A
Replace CVEN3024 with CVEN3013 Civil Engineering and Project Management Practice 3B
Replace CVEN3438 with CVEN3127 Management of Projects

Year 4
Replace CVEN4526 with CVEN4127 Planning and Control of Projects
CVEN4139, CVEN4149 and CVEN4159 are compulsory

CVENMS3620 Civil and Transport Engineering Plan
Year 2
Same as CVEN1A3620

Year 3
Replace CVEN3023 with CVEN3042 Civil/Transport Engineering Practice 3A
Replace CVEN3024 with CVEN3043 Civil/Transport Engineering Practice 3B

Year 4
Replace CVEN4526 with CVEN4421 Transport Engineering 2
CVEN4439, CVEN4449 and CVEN4459 are compulsory

CVENNS3620 Civil, Water and Coastal Engineering Plan
Year 2
Replace CVEN2022 with CVEN2052 Civil/Water Engineering Practice 2

Year 3
Replace CVEN3023 with CVEN3052 Civil/Water Engineering Practice 3A
Replace CVEN3024 with CVEN3053 Civil/Water Engineering Practice 3B
Replace CVEN3125 with CVEN3528 Sustainable Catchment and Coastal Systems

Year 4
Replace CVEN4126 with CVEN4533 Transport and Fate of Pollutants
CVEN4539, CVEN4549 and CVEN4559 are compulsory

General Education
Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

Honours
Honours is awarded to students who have achieved above average results and who undertake an Honours Thesis in their Final Year. A School weighted average mark is calculated for each student. A different weighting factor for each year of the program is applied to the marks in each course by units of credit as follows:
Year 1 x 1
General Education x 2
Year 2 x 2
Year 3 x 4
Year 4 x 5

Industrial training is assigned a nominal value of 3 units of credit in Year 4 in the Honours calculation. For combined degree programs only the marks obtained in the standard Civil or Environmental Engineering courses are used in the calculation.

A School weighted average mark in the range of 65.0-69.9 will result in a recommendation for Honours 2/2. A School weighted average mark in the range of 70.0-74.9 will result in a recommendation for Honours 2/1. A School weighted average mark of 75.00 and above will result in a recommendation for Honours 1.

Academic Rules
For program rules relating to the Bachelor of Engineering and General Rules for Progression, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience
Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study. Students who have had suitable experience in industry prior to commencement may qualify for exemption from completing further industrail training.

Computing Requirements
For information about computing requirements, please refer to the School website: www.civeng.unsw.edu.au/currentstudents/general/computing

Professional Recognition
The BE in Civil Engineering is fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission
to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

### 3625 Environmental Engineering

**Bachelor of Engineering BE**

**Typical Duration**
4 years

**Minimum UOC for Award**
192 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**

Environmental engineers are concerned with the environmental impact of engineering activities. They apply their broad knowledge of engineering and environmental processes in identifying environmental problems and in devising effective solutions to them. They also coordinate the activities of specialist groups such as biologists, ecologists and geologists within major projects. The discipline of environmental engineering embraces parts of civil engineering, with emphasis on management, systems design, water, geotechnical and transport engineering, together with aspects of chemical engineering, applied and biological sciences and environmental studies.

The School also offers the combined degrees BE (Civil Eng)/BE (Env Eng) (program 3631), BE (Env Eng)/BA (program 3626), BE (Env Eng)/BSc (program 3735), BE (Env Eng)/BCom (program 3715) BE (Env Eng/LLB (Law) (program 4777) and also the fast track program BE/MEngSc (plan CVENH13625).

**Program Objectives and Learning Outcomes**

The broad objective of the School's undergraduate programs is to develop well-educated graduates with the basic skills, attributes and knowledge required to practise as professional engineers. The desired skills are those that enable graduates to be problem solvers; critical thinkers; life long learners; good communicators; team players; independent investigators; effective managers; self-motivated; and economically, environmentally and socially aware.

It is intended that these attributes are developed in students at the same time that they gain knowledge in a broad range of disciplines. In addition, an objective of the programs is to provide the skills and knowledge in a social context. Integrating courses in each year of each program (the Engineering Practice courses) have been introduced to achieve this objective.

**Program Structure**

#### Year 1
- **CVEN1023** Statics (4 UOC)
- **CVEN1024** Dynamics (4 UOC)
- **CVEN1025** Computing (4 UOC)
- **CVEN1026** Engineering Materials 1 (4 UOC)
- **CVEN1531** Introduction to Water and Atmospheric Chemistry (4 UOC)
- **CVEN1721** Environmental Engineering Practice 1A (4 UOC)
- **CVEN1722** Environmental Engineering Practice 1B (6 UOC)

And ONE of the following courses:
- **MATH1131** Mathematics 1A (6 UOC)
- **MAH1141** Higher Mathematics 1A (6 UOC)

And ONE of the following courses:
- **MATH1231** Mathematics 1B (6 UOC)
- **MATH1241** Higher Mathematics 1B (6 UOC)

And ONE of the following courses:
- **CHEM1011** Fundamentals of Chemistry 1A (6 UOC)
- **CHEM1031** Higher Chemistry 1C (6 UOC)

#### Year 2
- **BIOS1101** Evolutionary and Functional Biology (6 UOC)
- **CEIC0001** Mass Transfer and Material Balances (3 UOC)
- **CVEN2023** Mechanics of Solids (3 UOC)
- **CVEN2025** Engineering Computations 1 (3 UOC)
- **CVEN2125** Systems Engineering (3 UOC)
- **CVEN2222** Geotechnical Engineering 1 (3 UOC)
- **CVEN2525** Introduction to Water Engineering (3 UOC)
- **CVEN2722** Environmental Engineering Practice 2 (3 UOC)
- **GEOG1711** Planet Earth (3 UOC)
- **GMA0753** Introduction to Spatial Information Systems (3 UOC)
- **INDC4120** Chemistry of the Industrial Environment (3 UOC)
- **MATH2019** Engineering Mathematics 2CE (6 UOC)
- **General Education** (6 UOC)

**Year 3**

- **BIOS3301** Population and Community Ecology for Environmental Engineers (3 UOC)
- **CEIC0050** Atmospheric Process Chemistry (3 UOC)
- **CVEN3025** Engineering Computations 2 (3 UOC)
- **CVEN3126** Engineering Management 1 (3 UOC)
- **CVEN3222** Geotechnical Engineering 2 (3 UOC)
- **CVEN3223** Geotechnical Engineering 3 (3 UOC)
- **CVEN3438** Transport Planning and Environment (3 UOC)
- **CVEN3526** Water Resources Engineering (3 UOC)
- **CVEN3527** Water Engineering (3 UOC)
- **CVEN3531** Aquatic Chemistry (3 UOC)
- **CVEN3724** Environmental Engineering Practice 3A (3 UOC)
- **CVEN3725** Environmental Engineering Practice 3B (3 UOC)
- **CVEN3726** Environmental Policy (3 UOC)
- **CVEN3727** Waste Management (3 UOC)
- **General Education** (6 UOC)

**Year 4**

**Session One**

Students achieving a School weighted average mark exceeding 62 (calculated from all subjects in years 1 to 3 of the BE Program) are eligible to undertake an Honours thesis in Year 4 (CVEN4000 in S1 and CVEN4001 in S2).

- **CVEN4126** Engineering Management 2 (3 UOC)
- **CVEN4225** Geotechnical Engineering 4 (3 UOC)
- **CVEN4526** Water and Wastewater Treatment (3 UOC)
- **CVEN4533** Transport & Fate of Pollutants (3 UOC)

Plus TWO of the following four electives:
- **CVEN4000** Honours Thesis Part A (6 UOC)
- **CVEN4727** Environmental Engineering Practice 4A (6 UOC)
- **CVEN4728** Environmental Engineering Practice 4B (6 UOC)
- **CVEN4729** Environmental Engineering Practice 4C (6 UOC)

**Session Two**

All students not undertaking the Honours thesis are required to select two majors. Students undertaking the Honours thesis are required to undertake one major plus at least 8 units of credit of electives taken from one other discipline area. To complete a major, all three 4 units of credit elective courses (listed for each discipline below) must be undertaken.

- **CVEN4001** Honours Thesis Part B (4 UOC)

**Geotechnical Engineering Major**

- **CVEN4269** Environmental Geotechnics (4 UOC)
- **CVEN4289** Site Investigations and Dam Engineering (4 UOC)

Plus ONE of the following two electives:
- **CVEN4279** Rock and Slope Engineering (4 UOC)
- **CVEN4299** Advanced Topics in Geotechnical Engineering (4 UOC)

**Transport Engineering Major**

- **CVEN4439** Transport Operations and Systems Design (4 UOC)
- **CVEN4449** Traffic Management and Control (4 UOC)
- **CVEN4459** Transport and Environment (4 UOC)

**Water Engineering Major**

- **CVEN4539** Advanced Water Quality and Treatment (4 UOC)
- **CVEN4549** Advanced Catchment and Coastal Processes (4 UOC)
- **CVEN4569** Advanced Environmental Systems (4 UOC)

**Chemical Engineering Major**

- **CEIC3010** Reaction Engineering (4 UOC)
- **CHEN2062** Introduction to Process Chemistry 2 (3 UOC)
- **CEIC3070** Process Control (4 UOC)

**Geography Major**

Any TWO of the following three courses:
- **Geography Major**
  - **GEOH3711** Coastal Resource Management (6 UOC)
  - **GEOG3731** Geomorphology (6 UOC)
  - **GEOG3761** Environmental Change (6 UOC)

The School offers a range of specialist plans in the Environmental Engineering program which are available to high achieving students. Basically students complete most of the requirements of the standard...
plan CVENBS3625 with specialist replacements for some courses in Years 2, 3 and especially Year 4 of the program. Students achieving a School weighted average mark of less than 65 (calculated from all courses in Years 1 to 3 of the BE program) are ineligible to continue in the plan and must transfer into and complete the standard Year 4 of the academic plan CVENB13625.

**CVENPS3625 Environmental and Geotechnical Engineering Plan**

**Year 2**
Replace CVEN2722 with CVEN2732 Environmental/Geotechnical Engineering Practice 2

**Year 3**
Replace CVEN3438 with CVEN3225 Geotechnical Mapping and Logging
Replace CVEN3723 with CVEN3733 Environmental/Geotechnical Engineering Practice 3A
Replace CVEN3724 with CVEN3734 Environmental/Geotechnical Engineering Practice 3B

**Year 4**
Replace CVEN4126 with CVEN4226 Engineering Geology and Geotechnical Models
CVEN4269, CVEN4279 and CVEN4289 are compulsory.

**CVENQS3625 Environmental and Transport Engineering Plan**

**Year 2**
Same as CVENB13625

**Year 3**
Replace CVEN3531 with CVEN3448 Transport Engineering
Replace CVEN3723 with CVEN3743 Environmental/Transport Engineering Practice 3A
Replace CVEN3724 with CVEN3744 Environmental/Transport Engineering Practice 3B

**Year 4**
replace CVEN4126 with CVEN4421 Transport Engineering 2
CVEN4439, CVEN4449 and CVEN4459 are compulsory

**CVENRS3625 Environmental, Water and Waste Engineering Plan**

**Year 2**
Replace CVEN2722 with CVEN2752 Environmental/Water Engineering Practice 2

**Year 3**
Replace CEIC0050 with CVEN3526 Sustainable Catchment and Coastal Systems
Replace CVEN3723 with CVEN3753 Environmental/Water Engineering Practice 3A
Replace CVEN3724 with CVEN3754 Environmental/Water Engineering Practice 3B

**Year 4**
Replace CVEN4126 with CVEN4528 Surf, Water and Groundwater Environments
CVEN4539, CVEN4549 and CVEN4569 are compulsory

**CVENQS3625 Environmental and Transport Engineering Plan**

**Year 2**
Same as CVENB13625

**Year 3**
Replace CVEN3531 with CVEN3448 Transport Engineering
Replace CVEN3723 with CVEN3743 Environmental/Transport Engineering Practice 3A
Replace CVEN3724 with CVEN3744 Environmental/Transport Engineering Practice 3B

**Year 4**
replace CVEN4126 with CVEN4421 Transport Engineering 2
CVEN4439, CVEN4449 and CVEN4459 are compulsory

**CVENQG3625 Environmental and Geotechnical Engineering Plan**

**Year 2**
Same as CVENB13625

**Year 3**
Replace CVEN3531 with CVEN3448 Transport Engineering
Replace CVEN3723 with CVEN3743 Environmental/Transport Engineering Practice 3A
Replace CVEN3724 with CVEN3744 Environmental/Transport Engineering Practice 3B

**Year 4**
Replace CVEN4126 with CVEN4421 Transport Engineering 2
CVEN4439, CVEN4449 and CVEN4459 are compulsory

**CVENB13625 Environmental Plan**

**Year 2**
Replace CVEN2722 with CVEN2752 Environmental/Water Engineering Practice 2

**Year 3**
Replace CEIC0050 with CVEN3526 Sustainable Catchment and Coastal Systems
Replace CVEN3723 with CVEN3753 Environmental/Water Engineering Practice 3A
Replace CVEN3724 with CVEN3754 Environmental/Water Engineering Practice 3B

**Year 4**
Replace CVEN4126 with CVEN4528 Surf, Water and Groundwater Environments
CVEN4539, CVEN4549 and CVEN4569 are compulsory

**General Education**

Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

**Honours**

Honours is awarded to students who have achieved above average results and who undertake an Honours Thesis in their Final Year. A School weighted average mark is calculated for each student. A different weighting factor for each year of the program is applied to the marks in each course by units of credit as follows:

- Year 1: 1.0
- General Education: 2.0
- Year 2: 2.0
- Year 3: 4.0
- Year 4: 5.0

Industrial training is assigned a nominal value of 3 units of credit in Year 4 in the Honours calculation. For combined degree programs only the marks obtained in the standard Civil or Environmental Engineering courses are used in the calculation.

A School weighted average mark in the range of 65.0-69.9 will result in a recommendation for Honours 2/2.

A School weighted average mark in the range of 70.0-74.9 will result in a recommendation for Honours 2/1.

A School weighted average mark above 75.00 will result in a recommendation for Honours 1.

---

### Academic Rules

For program rules relating to the Bachelor of Engineering and General Rules for Progression, please refer to the ‘Rules for Progression and Award of Degrees under Faculty Information and Assistance’ in this Handbook.

### Industrial Experience

Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study. Students who have had suitable experience in industry prior to commencement may qualify for exemption from completing further industrial training.

### Professional Recognition

The BE in Environmental Engineering is fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

### Computing Requirements

For information about computing requirements, please refer to the School website: [www.civeng.unsw.edu.au/currentstudents/general/computing](http://www.civeng.unsw.edu.au/currentstudents/general/computing)

### 3730 Civil Engineering/Bachelor of Science

**Bachelor of Engineering Bachelor of Science BE BSc**

**Typical Duration**

5 years

**Minimum UOC for Award**

240 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

Students may seek to undertake a five-year full-time combined program leading to the award of the degrees of Bachelor of Engineering in Civil Engineering and Bachelor of Science (BE BSc). The School of Civil and Environmental Engineering administers the program. Students should seek advice from the School Office.

With the combined degree program, students can add their choice of a Science, Mathematics or Computer Science program to the standard, professionally accredited Civil Engineering program offered by the School of Civil and Environmental Engineering.

The School of Civil and Environmental Engineering is the academic unit responsible for the program. The School will consult with the Faculty of Science in approving the BSc component of the program.

Students must satisfy admission requirements for both the BE in Civil Engineering and BSc programs or may transfer from the BE in Civil Engineering program after completion of at least one year, if they have a Credit or higher average.

Course credits can accrue simultaneously for both component degrees where there is an overlap of courses from the Civil Engineering program and Science program.

### Program Structure

**CVENA13730 + Science Plan**

**Year 1**

All the Year 1 courses in the Civil Engineering program.

**Year 2**

The Year 2 courses in the Civil Engineering program except that 12 units of credit of Science courses are substituted for CVEN2222, CVEN2022 and General Education.

**Year 3**

Science courses to total at least 36 units of credit and CVEN2222, CVEN2022, CVEN3025, CVEN3125

**Year 4**

Science courses to total at least 18 units of credit and CVEN3126, CVEN3222, CVEN3223, CVEN3322, CVEN3324, CVEN3438, CVEN3448, CVEN3526, CVEN3527.
Year 5
Science courses to total at least 6 units of credit in S1 in lieu of one civil engineering major (12 units of credit). Otherwise standard Year 4 program in Civil Engineering.

The degrees of Bachelor of Engineering and Bachelor of Science may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class 1 and Class 2 in two divisions. The award and grade of Honours in the BE are made in recognition of superior performance throughout the program with a greater weighting on courses in the later years. The BSc can be awarded Honours on the successful completion of an Honours year. It should be noted that entry into a particular Honours program might require completion of additional courses.

**Academic Rules**

1. The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Engineering and Bachelor of Science (BE BSc).

2. The five years of the program include at least 108 units of credit in the Science program and a minimum of 240 units of credit in total.

3. The 108 Science program units of credit must include a minimum of 36 and a maximum of 48 level 1 units of credit and all courses prescribed in a specific program as outlined in the Science section in this Handbook must be completed. A major sequence (42 units of credit of Level 2 and 3 courses with at least 18 units of credit of Level 3 courses) in a Science discipline is also a requirement of the Science program.

4. Students must satisfy the normal prerequisites for entry to Bachelor of Science Program and to individual courses therein. Also, students must satisfy the normal prerequisites for entry to Civil Engineering and to individual courses therein.

5. Students desiring to enrol in the BSc degree program at Honours level are not able to complete the program in five years and must obtain approval from the School of Civil and Environmental Engineering and the Faculty of Science for their programs. With the approval of the relevant school and of the Head of the School of Civil and Environmental Engineering, a student may follow a standard Honours program in the Science program which can be completed by an additional year of study.

6. The degrees of Bachelors of Engineering and Bachelor of Science are not awarded until the completion of the full five-year program.

7. Students contemplating enrolling in this program should consult fully with the Faculty of Science and with the School of Civil and Environmental Engineering before enrolment.

8. There will be a testamur for each degree in the combined program.

9. Students must complete the full requirements of the BE in Civil Engineering (code 3620) except that:
   a) CVEN3023 and CVEN3024 are exempted;   
   b) the General Education requirement is exempted; and   
   c) a final year engineering major (12 units of credit) is exempted.

10. Group A and Group B courses listed in Rule 12 below will count towards satisfying requirements of both rules 2 and 9 above. The courses in Group B may not satisfy requirements for progression within science programs.

11. Students may apply for exemption from the requirements of Rule 9 for the courses listed in Rule 12 below in Group B on the basis of courses/requirements in parentheses.

12. Exemptions will be granted for the courses in Group C below with respect to Rule 9 on the basis of the requirements within parentheses.

**Group A**

MATH1131 or MATH1141, MATH1231 or MATH1241, CHEM1011 or CHEM101J, PHYS1279

**Group B**

PHYS1279 (PHYS121), CHEM1011 (CHEM1021), MATH2019 (at least 12 units of credit of non-statistics level II mathematics), CVEN2025 (at least 3 units of credit of level II Statistics).

**Group C**

CVEN3025 (at least 3 units of credit of level III Applied Mathematics).

13. Students wishing to major in Physics must consult with the School of Physics and the School of Civil & Environmental Engineering in regards to choice of courses.

14. A typical structure of a combined Engineering/Science program is set out above in the Program Structure section. Subject to timetable restrictions, the full range of Science programs is available to Civil Engineering students.

15. The total units of credit in the program is 240.

**Industrial Experience**

Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study. Students who have had suitable experience in industry prior to commencement may qualify for exemption from completing further industrial training.

**Computing Requirements**

For information about computing requirements, please refer to the School website: [www.civeng.unsw.edu.au/currentstudents/general/computing](http://www.civeng.unsw.edu.au/currentstudents/general/computing)

**Professional Recognition**

The BE in Civil Engineering is fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

---

**3621 Civil Engineering/Bachelor of Arts**

**Bachelor of Engineering Bachelor of Arts BE BA**

**Typical Duration**

5 years

**Minimum UOC for Award**

240 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

With this combined degree program, students can add their choice of an Arts program to the standard, professionally accredited Civil Engineering (3620) program offered by the School of Civil and Environmental Engineering. It provides flexibility in the choice of courses within the full Arts program and enables students to gain a broad education in Arts and Social Sciences, as well as specialised studies in Civil Engineering. Because Engineering and Arts programs can have a common content, such as mathematics and physics, two additional sessions of study is required to gain the additional qualification of Bachelor of Arts. In general, this additional study is taken concurrently with the BE program and both can be completed in ten sessions.

**Eligibility**

The program is open to all students who satisfy both the Civil Engineering (3620) and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a credit or higher average. Transfer after the second year may result in students taking more than minimum time to complete the combined program.

**Organisation**

The BE BA program is administered by the School of Civil and Environmental Engineering. The School will consult with the Faculty of Arts and Social Sciences in approving the BA component of the program. The School of Civil and Environmental Engineering must approve the final program and timetable.

Students should start discussing their program with representatives of the School and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Arts program that they wish to undertake. The Arts and Social Sciences section in this Handbook describes the options. There are no special rules on what courses should be included in each year. Students should schedule the Arts and Engineering components to suit their preferences, while meeting the constraints of timetables and prerequisites.

**Program Objectives and Learning Outcomes**

The broad objective of the School’s undergraduate programs is to develop well-educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers. The desired skills are those that enable graduates to be problem solvers; critical thinkers; life long learners; good communicators; team players; independent investigators; effective managers; self-motivated; and economically, environmentally and socially aware.
It is intended that these attributes are developed in students at the same time that they gain knowledge in a broad range of disciplines. In addition, an objective of the programs is to provide the skills and knowledge in a social context. Integrating courses in each year of each program (the Engineering Practice courses) have been introduced to achieve this objective.

Program Structure
CVENA13621 and Arts Plan
Please refer to the Academic Rules below and contact the School of Civil and Environmental Engineering for information on the Program Structure of this degree.

Computing Requirements
For information about computing requirements, please refer to the School website: www.civeng.unsw.edu.au/currentstudents/general/computing

Honours
Honours is awarded to students who have achieved above average results and who undertake an Honours Thesis in their Final Year. A School weighted average mark is calculated for each student. A different weighting factor for each year of the program is applied to the marks in each course by units of credit as follows:

- Year 1 x 1
- Year 2 x 2
- Year 3 x 4
- Year 4 x 5

Industrial training is assigned a nominal value of 3 units of credit in Year 4 in the Honours calculation. For combined degree programs only the marks obtained in the standard Civil or Environmental Engineering courses are used in the calculation. A School weighted average mark in the range of 65.0-69.9 will result in a recommendation for Honours 2/2. A weighted average mark in the range of 70.0-74.9 will result in a recommendation for Honours 2/1. A weighted average mark of 75.0 and above will result in a recommendation for Honours 1.

Academic Rules
1. Students must complete 60 units of credit in the BA program, with no more than 24 units of credit obtained at Level 1 (i.e. in courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one sequence of study.
2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - European Studies
   - Film
   - French
   - German Studies
   - Greek
   - History
   - History & Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology and Anthropology
   - Spanish & Latin American Studies
   - Theatre & Performance Studies
   - Women’s and Gender Studies
3. Except for courses completed as part of the major sequence, no more than 12 units of credit may be obtained from courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.
4. No course included for credit in the BE program can be included in the 60 units of credit required at Rule 1 for the BA program.
5. Students must complete the full requirements of Program 3620 BE in Civil Engineering except that they are exempt from the General Education requirements of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA program have been successfully completed.
6. Students who complete the requirements for the BA program and the first two years of the BE program may proceed to graduation with the degree of Bachelor of Arts.
7. Students may be awarded Honours in the BA by successful completion of Honours year. It should be noted that entry into a particular BA Honours program might require completion of courses additional to those specified under Rules 1-4.
8. The total units of credit in the program is 240
For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ under Faculty Information and Assistance in this Handbook.

Industrial Experience
Industrial experience is an integral part of the program. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study. Students who have had suitable experience in industry prior to commencement may qualify for exemption from completing further industrial training.

Professional Recognition
The BE in Civil Engineering is fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

3715 Civil Engineering/Bachelor of Commerce
BE BCom
Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.

4775 Civil Engineering/Bachelor of Laws
Bachelor of Engineering Bachelor of Laws BE LLB
CVENA14775 and Laws Plan
This program provides students with professional qualifications in areas of very great importance to the community. The program is attractive to students who have in mind a career involving construction or general engineering and the law. Most large developments raise a formidable range of legal issues and there is a need for highly qualified personnel who are able to understand both the engineering and the legal dimensions of development, both in Australia and overseas.

The Faculty of Law administers this program. For full details, see the entry under the Faculty of Law in this Handbook.

3146 Civil Engineering/Mining Engineering
Bachelor of Engineering Bachelor of Engineering BE BE
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
Students may enrol directly into Program 3146 or apply to transfer from Program 3620 (Civil Engineering) any time before the commencement of Year 4. The first three years of the combined degree program are identical to program 3620. The first three years is administered by the School of Civil & Environmental Engineering, with the final two years administered by the School of Mining Engineering. Students aim to complete the mining requirements in four additional sessions.

Students considering this option should discuss the above arrangements with the relevant program authorities.
Program Structure

Plans CVENAD3146 and MINEFD3146 (Full-time program)

Year 1
CVEN1021 Civil Engineering Practice 1A (4 UOC)
CVEN1022 Civil Engineering Practice 1B (6 UOC)
CVEN1023 Statics (4 UOC)
CVEN1024 Dynamics (4 UOC)
CVEN1025 Computing (4 UOC)
CVEN1026 Engineering Materials 1 (4 UOC)
PHYS1279 Physics 1 (Civil Engineering) (4 UOC)
And one of the following courses:
CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
CHEM1013 Higher Chemistry 1C (6 UOC)
And one of the following courses:
MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
And one of the following courses:
MA1H1231 Mathematics 1B (6 UOC)
MA1H1241 Higher Mathematics 1B (6 UOC)
Total hours per week - Session 1: 20
Total hours per week - Session 2: 20
Total units of credit: 48

Year 2
CVEN2022 Civil Engineering Practice 2 (3 UOC)
CVEN2023 Mechanics of Solids (3 UOC)
CVEN2025 Engineering Computations 1 (3 UOC)
CVEN2026 Engineering Materials 2 (3 UOC)
CVEN2125 Systems Engineering (3 UOC)
CVEN2126 Engineering Construction 1 (3 UOC)
CVEN2222 Geotechnical Engineering 1 (3 UOC)
CVEN2322 Structural Engineering 1 (6 UOC)
CVEN2525 Introduction to Water Engineering (3 UOC)
GMAT0442 Surveying for Civil Engineers (3 UOC)
MA1O0491 Survey Camp (3 UOC)
MATH2019 Engineering Mathematics 2CE (6 UOC)
General Education (6 UOC)
Total Hours per week - Session 1: 20
Total hours per week - Session 2: 20
Total units of credit: 48

Year 3
CVEN3023 Civil Engineering Practice 3A (3 UOC)
CVEN3024 Civil Engineering Practice 3B (3 UOC)
CVEN3025 Engineering Computations 2 (3 UOC)
CVEN3125 Engineering Construction 2 (3 UOC)
CVEN3126 Geotechnical Engineering Management 1 (3 UOC)
CVEN3222 Geotechnical Engineering 2 (3 UOC)
CVEN3223 Geotechnical Engineering 3 (3 UOC)
CVEN3322 Structural Engineering 2 (6 UOC)
CVEN3324 Structural Engineering 3 (3 UOC)
CVEN3438 Transport Planning and Environment (3 UOC)
CVEN3448 Transport Engineering (3 UOC)
CVEN3526 Water Resources Engineering (3 UOC)
CVEN3527 Water Engineering (3 UOC)
General Education (6 UOC)
Total hours per week - Session 1: 22
Total hours per week - Session 2: 22
Total units of credit: 48

Year 4
Session One
CVEN4225 Geotechnical Engineering 4 (3 UOC)
MINE4310 Coal Mining Systems (6 UOC)
MINE4320 Metal Mining Systems (6 UOC)
Choose one of the following courses:
CVEN4126 Engineering Management 2 (3 UOC)
CVEN4323 Structural Engineering 4 (3 UOC)
CVEN4526 Water and Wastewater Treatment (3 UOC)
Choose one of the following courses:
CVEN4027 Civil Engineering Practice 4A (6 UOC)
CVEN4028 Civil Engineering Practice 4B (6 UOC)
CVEN4029 Civil Engineering Practice 4C (6 UOC)
Total hours per week Session 1: 18
Total units of credit: 24

Session Two
Choose one major comprising 12 units of credit

Construction and Management Major
CVEN4139 Advanced Construction Project Management (4 UOC)
CVEN4149 Professional Level Project Management Tools and Skills (4 UOC)
CVEN4159 Advanced Construction Technology and Engineering (4 UOC)

Structural Engineering Major
CVEN4339 Design of Bridges (4 UOC)
CVEN4349 Special Topics in Concrete, Steel and Composite Structures (4 UOC)
CVEN4359 Structural Analysis and Finite Elements (4 UOC)

Transport Engineering
CVEN4439 Transport Operations and Systems Design (4 UOC)
CVEN4449 Traffic Management and Control (4 UOC)
CVEN4459 Transport and Environment (4 UOC)

Water Engineering Major
CVEN4539 Advanced Water Quality and Treatment (4 UOC)
CVEN4549 Advanced Catchment and Coastal Processes (4 UOC)
CVEN4559 Advanced Water Engineering (4 UOC)

MINE3500 Mine Workplace Environment (6 UOC)
MINE3710 Mine Economics and Business Systems (6 UOC)
Total hours per week Session 2: 21
Total units of credit: 24

Year 5
MINE4210 Mine Planning (6 UOC)
MINE4300 Geotechnical Engineering (6 UOC)
MINE4410 Industry Applications (6 UOC)
MINE4420 Thesis A (6 UOC)
MINE4500 Sustainable Mining Practices (3 UOC)
MINE4700 Mining Law (6 UOC)
And one of the following courses:
MINE4220 Coal Mine Design and Evaluation Project (9 UOC)
MINE4230 Metal Mine Design and Evaluation Project (9 UOC)
MINE4240 Mine Design and Evaluation (9 UOC)
And choose two from the following three electives:
MINE4800 Mine Simulation and Modelling (3 UOC)
MINE4805 Mineral Process Technology (3 UOC)
MINE4810 Comp Methods in Geomechanics (3 UOC)

Academic Rules
For program rules relating to the Bachelor of Engineering and General Rules for Progression, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

3631 Civil Engineering/Environmental Engineering

Bachelor of Engineering Bachelor of Engineering BE BE
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
The program provides students with professional qualifications in areas of great importance to the community. The program is attractive to students who have in mind a career involving environmental issues and infrastructure development. The School of Civil and Environmental Engineering administers the program.

<td>Industrial training is assigned a nominal value of 3 units of credit in Year 4 in the Honours calculation. For combined degree programs only the marks obtained in the standard Civil and Environmental Engineering courses are used in the calculation. A weighted average mark in the range of 65.0-69.9 will result in a recommendation for Honours 2/2. A weighted average mark in the range of 70.0-74.9 will result in a recommendation for Honours 2/1. A weighted average mark of 75.0 and above will result in a recommendation for Honours 1.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Academic Rules
1. Students must satisfy the normal program and course prerequisites for Environmental Engineering and Civil Engineering.
2. The degrees of Bachelor of Engineering may be conferred as Pass or Honours degrees. There are two classes of Honours, Class 1, and Class 2, in two divisions. The award and grade of Honours are made in recognition of superior performance throughout the program with greater weighting on courses in the later years. The course can lead to the award of the University Medal in either Civil or Environmental Engineering.
3. There will be a testamur for each degree in the combined program.
4. Students must satisfy admission requirements for both the BE in Civil and Environmental Engineering for direct admission or may transfer from either the Civil or the Environmental BE program after completion of the first year with a weighted average mark of 65 or greater.
5. The total units of credit in the program is 240

Industrial Experience
Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study. Students who have had suitable experience in industry prior to commencement may qualify for exemption from completing further industrial training.

Computing Requirements
For information about computing requirements, please refer to the School website: www.civeng.unsw.edu.au/currentstudents/general/computing

Professional Recognition
Both the BE in Civil Engineering and the BE in Environmental Engineering are fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

3735 Environmental Engineering/Bachelor of Science
Bachelor of Engineering Bachelor of Science BE BSc
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
Students may seek to undertake a five-year full-time combined program leading to the award of the degree of Bachelor of Engineering in Environmental Engineering and Bachelor of Science (BE BSc). The School of Civil and Environmental Engineering administers the program.
With the combined degree program, students can add their choice of a Science, Mathematics or Computer Science program to the standard, professionally accredited Environmental Engineering program offered by the School of Civil and Environmental Engineering.
The School of Civil and Environmental Engineering is the academic unit responsible for the program. The School will consult with the Faculty of Science in approving the BSc component of the program.
Students must satisfy admission requirements for both the BE in Environmental Engineering and BSc programs or may transfer from the BE in Environmental Engineering program after completion of at least one year if they have a credit or higher average.
Course credits can accrue simultaneously for both component degrees where there is an overlap of courses from the Environmental Engineering program and the Science Program.

Program Objectives and Learning Outcomes
The broad objective of the School’s undergraduate programs is to develop well-educated graduates with the basic skills, attributes and knowledge required to practise as professional engineers. The desired skills are those that enable graduates to be problem solvers; critical thinkers; life long learners; good communicators; team players; independent investigators; effective managers; self-motivated; and economically, environmentally and socially aware.
Students will be able to combine this with the skills learnt from the Science portion of the combined degree.

Program Structure
CVENB13735 and Science Plan

Year 1
All the year 1 courses in the Environmental Engineering course

Year 2
The year 2 courses in the Environmental Engineering program, except that 12 units of credit of Science courses are substituted for CVEN2222, CVEN2722 and General Education.

Year 3
Science courses to total at least 36 units of credit and CVEN2222, CVEN2722, CVEN3025, CVEN3126

Year 4
Science courses to total at least 24 units of credit and BIOS3301, CECE0050, CVEN3222, CVEN3223, CVEN3526, CVEN3527, CVEN3531 and CVEN 3726

Year 5
Science courses to total at least 12 units of credit in S2 in lieu of one environmental engineering major (12 units of credit) and CVEN3438 and CVEN3725 in lieu of one of CVEN4727, CVEN4728 or CVEN4729 in S1. Otherwise the Standard Year 4 program in Environmental Engineering.
The degrees of Bachelor of Engineering and Bachelor of Science may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class 1 and Class 2 in two divisions. The award and grade of Honours in the BE are made in recognition of superior performance throughout the program with a greater weighting on courses in the later years. The BSc can be awarded Honours on the successful completion of an Honours year. It should be noted that entry into a particular Honours program might require completion of additional courses.

Academic Rules
1. The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Engineering and Bachelor of Science (BE BSc).
2. The five years of the program include at least 108 units of credit in the Science program and a minimum of 240 units of credit in total.
3. The 108 Science program units of credit must include a minimum of 36 and a maximum of 48 level 1 units of credit and all courses prescribed in a specific program as outlined in the Science section in this Handbook must be completed.
4. Students must satisfy the normal prerequisites for entry to Bachelor of Science Program and to individual courses therein. Also, students must satisfy the normal prerequisites for entry to Environmental Engineering and to individual courses therein.
5. Students desiring to enrol in the BSc degree program at Honours level are not able to complete the program in five years and must obtain approval from the School of Civil and Environmental Engineering and the Faculty of Science for their programs. With the approval of the relevant school and of the Head of the School of Civil and Environmental Engineering, a student may follow a standard Honours program in the Science program which can be completed by an additional year of study.
6. The degrees of Bachelors of Engineering and Bachelor of Science are not awarded until the completion of the full five-year program.
7. Students contemplating enrolling in this program should consult fully with the Faculty of Science and with the School of Civil and Environmental Engineering before enrolment.
8. There will be a testamur for each degree in the combined program.
9. Students must complete the full requirements of the BE in Environmental Engineering (code 3625) except that:
   a) CVEN3723 and CVEN3724 are exempted;
   b) the General Education requirement is exempted;
   c) a final year engineering major (12 units of credit) is exempted; and
   d) final year engineering electives are to be selected from the Geotechnical, Transport, Water and Chemical Engineering majors.
10. Group A and Group B courses below will count towards satisfying requirements of both rules 2 and 9 above. The courses in Group B may not satisfy requirements for progression within science programs.
11. Students may apply for exemption from the requirements of Rule 9 for the courses listed in Rule 12 below Group B on the basis of courses/requirements in parentheses.

12. Exemptions will be granted for the courses in Group C below with respect to Rule 9 on the basis of the requirements within parentheses.

**Group A**
CHEM1011, CHEM1031, MATH1131 or MATH1141, MATH1231 or MATH1241, BIOS1101

**Group B**
CVEN1531 (CHEM1021), MATH2019 (at least 12 units of credit of non-statistics level II mathematics), CVEN2025 (at least 3 units of credit of level II Statistics), GEOS1711 (GEOS1721), BIOS3301 (BIOS3111).

**Group C**
CVEN3025 (at least 3 units of credit of level III applied mathematics).

13. Students wishing to major in Physics must consult with the School of Physics and the School of Civil & Environmental Engineering in regards to choice of courses.

14. A typical structure of a combined Engineering/Science program is set out above in the Program Structure section. Subject to timetable restrictions, the full range of Science programs is available to Environmental Engineering students.

15. The total units of credit in the program is 240.

**Industrial Experience**
Industrial experience is an integral part of the program. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study. Students who have had suitable experience in industry prior to commencement may qualify for exemption from completing further industrial training.

**Further Requirements**
The School of Civil and Environmental Engineering is the academic unit responsible for the program. The School will consult with the Faculty of Science in approving the BSc component of the program. Students must satisfy admission requirements for both the BE in Environmental Engineering and BSc programs or may transfer from the BE in Environmental Engineering program after completion of at least one year if they have a credit or higher average.

Course credits can accrue simultaneously for both component degrees where there is an overlap of courses from the Environmental Engineering program and Science and Mathematics programs.

**Computing Requirements**
For information about computing requirements, please refer to the School website: [www.civeng.unsw.edu.au/currentstudents/general/computing](http://www.civeng.unsw.edu.au/currentstudents/general/computing)

**Professional Recognition**
The BE in Environmental Engineering is fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

### 3626 Environmental Engineering/Bachelor of Arts

**Bachelor of Engineering Bachelor of Arts BE BArts**

**Typical Duration**
3 years

**Minimum UOC for Award**
240 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**
With this combined degree program, students can add their choice of an Arts program to the standard, professionally accredited Environmental Engineering (3625) program offered by the School of Civil and Environmental Engineering. It provides flexibility in the choice of courses within the full Arts program and enables students to gain a broad education in Arts and Social Sciences, as well as specialised studies in Environmental Engineering.

Because Engineering and Arts programs can have a common content, such as mathematics and physics, two additional sessions of study is required to gain the additional qualification of Bachelor of Arts. In general, this additional study is taken concurrently with the BE program and both can be completed in ten sessions.

**Eligibility**
The program is open to all students who satisfy both the Environmental Engineering (3625) and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a credit or higher average. Transfer after the second year may result in students taking more than minimum time to complete the combined program.

The BE BA program is administered by the School of Civil and Environmental Engineering. The School will consult with the Faculty of Arts and Social Sciences in approving the BA component of the program. The final program and timetable must be approved by the School of Civil and Environmental Engineering.

Students should start discussing their program with representatives of the School and the Faculty of Arts and Social Sciences as early as possible. Students should themselves determine the Arts program that they wish to undertake. The Arts and Social Sciences section in this Handbook describes the options. There are no special rules on what courses should be included in each year. Students should schedule the Arts and Engineering components to suit their preferences, while meeting the constraints of timetables and prerequisites.

Students will need to refer to the Faculty of Arts and Social Sciences section in this Handbook.

**Program Structure**

**CVENB13626 and Arts Plan**
Please contact the School of Civil and Environmental Engineering and the Faculty of Arts for the Program Structure of this combined degree.

**Honours**
Honours is awarded to students who have achieved above average results and who undertake an Honours Thesis in their Final Year. A School weighted average is calculated for each student. A different weighting factor for each year of the program is applied to the marks in each course by units of credit as follows:

- Year 1 x 1
- Year 2 x 2
- Year 3 x 4
- Year 4 x 5

**Academic Rules**

1. Students must complete 60 units of credit in the BA program, with no more than 24 units of credit obtained at Level 1 (ie in courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school or department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - European Studies
   - Film
   - French
   - German Studies
   - Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
Policy Studies
Political Economy
Politics and International Relations
Russian Studies
Sociology and Anthropology
Spanish & Latin American Studies
Theatre & Performance Studies
Women's and Gender Studies

3. Except for courses completed as part of the major sequence, no more than 12 units of credit may be obtained from courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE program can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of Program 3625 in Environmental Engineering except that they are exempt from the General Education requirements of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA program have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of Honours year. It should be noted that entry into a particular BA Honours program might require completion of courses additional to those specified under Rules 1-4.

8. The total units of credit in the program is 240.

For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ under Faculty Information and Assistance in this Handbook.

Industrial Experience
Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete at least sixty days of approved industrial experience. Students are strongly recommended to gain as much industrial experience as possible during the session breaks throughout their period of study.

Professional Recognition
Both the BE in Civil Engineering and the BE in Environmental Engineering are fully accredited by the Institution of Engineers, Australia, meeting the examination requirements for admission to graduate and corporate membership of the Institution. Substantial or complete recognition is accorded to the BE programs by overseas engineering institutions.

Computing Requirements
For information about computing requirements, please refer to the School website: www.civeng.unsw.edu.au/currentstudents/general/computing

3715 Environmental Engineering/Bachelor of Commerce
BE BCom
Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.

4777 Environmental Engineering/Bachelor of Laws
Bachelor of Engineering Bachelor of Laws BE LLB
CVENB14777 and Laws Plan
This program provides students with professional qualifications in areas of very great importance to the community. The program is attractive to students who have in mind a career involving environmental issues, engineering and the law. Most large developments raise a formidable range of legal issues, and there is a need for highly qualified personnel who are able to understand both the engineering and the legal dimensions of development, both in Australia and overseas.

The Faculty of Law administers this program. For full details, see entry under the Faculty of Law in this Handbook.

Fast-Track Programs with Master of Engineering Science

3620 Civil Engineering/Master of Engineering Science – Plan CVENG13620
Bachelor of Engineering Master of Engineering Science BE MEngSc

3625 Environmental Engineering/Master of Engineering Science – Plan CVENH13625
Bachelor of Engineering Master of Engineering Science BE MEngSc

Students may undertake a 4.5 year full-time fast-track program leading to the awards of either Bachelor of Engineering in Civil Engineering or Environmental Engineering and Master of Engineering Science.

Program of Study
Students undertake the first three years of the standard BE program in either Civil or Environmental Engineering. Subject to satisfying a minimum performance over these three years they (a) complete standard S1 program of Year 4 without Honours thesis (b) substitute 12 units of credit of the standard Year 4 BE degree program with a School approved 12 units of credit of graduate coursework in their Year 4; (c) undertake a 12 units of credit of project/thesis work over the Summer (9th) Semester; and (d) undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year) in the following areas:

It may not be possible to complete a specialisation in all sub disciplines in this fast-track mode.

School of Computer Science and Engineering

Head of School: Professor PJ Compton
Associate Head of School: Associate Professor WH Wilson
Student Office Manager: Miss CJ Nock
Undergraduate Program Directors: Dr A Mahidadia (Computer Engineering)
Associate Professor S Parameswaran (Computer Engineering)
Associate Professor K Robinson (Software Engineering)
Associate Professor A Hoffmann (Computer Science)
Dr TD Lambert (Computer Science & Computer Science Honours)
Dr B Gaeta (Bioinformatics)

The School of Computer Science and Engineering and the School of Electrical Engineering and Telecommunications have joint responsibility for the curriculum of the Computer Engineering program.

The staff of the School of Computer Science and Engineering is grouped into research groups of Architecture, Artificial Intelligence, Computer Networks, Computer Systems, Database and Software Engineering. Courses in these areas are offered to students taking major studies in Computer Science or Computer Engineering, while introductory-level computing courses are available more generally to students studying Science, Arts or Engineering. Computer Science has links with discrete mathematics, which furnishes the theory behind the algorithms that computer software implements, and electrical engineering, which supplies the present technology underlying physical computing devices.

The School of Computer Science and Engineering, together with the School of Electrical Engineering and Telecommunications, jointly administers the BE Computer Engineering 3645. The BE Software Engineering 3648 is jointly managed with the School of Information Systems. The BE MBiomedE programs 3728, 3749, and 3757 are managed in conjunction with the Graduate School of Biomedical Engineering. The Bachelor of Engineering Bioinformatics 3647 is offered in collaboration with the Faculty of Science.

The School of Computer Science and Engineering also offers the program Bachelor of Science Computer Science 3978. Computer Science is offered as a major in the combined BE BSc programs, BSc BA, BSc BSc, BSc LLB and more recently, BSc BDigMed. It is offered as a minor in the program, BSc (Science and Mathematics) 3970. The School also offers a major sequence in computing within the BA 3400 and BSoSc 3420.

For a description of the combined BE BSc programs, see the entries in this Handbook for the Schools conducting the Engineering major. Majors in the program 3978 are also offered in Computer Science and Psychology, Computer Science and Geography, and Computer Science and Philosophy. For the BA degree program, see the Arts and Social Sciences section in this Handbook and for the BSc LLB program, see the Law section in this Handbook. For the BSc BA and BSc BSc, see the Science entry in this Handbook. For the BSc BCom, see the Commerce entry in this Handbook.

Computing Requirements

Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

General Education Courses

It may not be possible for computing students to enrol in General Education courses which are similar in content to the courses offered in their respective degree program. For a comprehensive list, please refer to the CSE website: www.cse.unsw.edu.au/school/teaching/courses/gened.html

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

Bachelor of Engineering BE

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description

The School of Computer Science and Engineering and the School of Electrical Engineering and Telecommunications have joint responsibility for the curriculum of the Computer Engineering program.

The staff of the School of Computer Science and Engineering is grouped into research groups of Architecture, Artificial Intelligence, Computer Systems, Database and Software Engineering. Courses in these areas are offered to students taking major studies in Computer Science or Computer Engineering, while introductory-level computing courses are available more generally to students studying Science, Arts or Engineering. Computer Science has links with discrete mathematics, which furnishes the theory behind the algorithms that computer software implements, and electrical engineering, which supplies the present technology underlying physical computing devices.

Program Structure

Plan COMP813645

Year 1

- ELEC1011 Electrical Engineering 1 (6 UOC)
- MA1H1081 Discrete Mathematics (6 UOC)
- PHYS1131 Higher Physics 1A (6 UOC)
- PHYS1231 Higher Physics 1B (6 UOC)
- And ONE of the following courses:
  - COMP1011 Computing 1A (6 UOC)
  - COMP1711 Higher Computing 1A (6 UOC)
- And ONE of the following courses:
  - COMP1021 Computing 1B (6 UOC)
  - COMP1721 Higher Computing 1B (6 UOC)
- And ONE of the following courses:
  - MATH1131 Mathematics 1A (6 UOC)
  - MATH1141 Higher Mathematics 1A (6 UOC)
- And ONE of the following courses:
  - MATH1231 Mathematics 1B (6 UOC)
  - MATH1241 Higher Mathematics 1B (6 UOC)

Year 2

- ACC70003 Introduction to Accounting Principles (3 UOC)
- COMP2121 Microprocessors and Interfacing (6 UOC)
- COMP3111 Software Engineering (6 UOC)
- COMP5322 Digital Circuits and Systems (6 UOC)
- ELEC2031 Circuits and Systems (3 UOC)
- ELEC2032 Electronics and Systems (3 UOC)
- MATH2859 Probability, Statistics and Information (3 UOC)
- And ONE of the following courses:
  - COMP2011 Data Organisation (6 UOC)
  - COMP2711 Higher Data Organisation (6 UOC)
- And ONE of the following courses:
  - MATH2510 Real Analysis (3 UOC)
  - MATH2610 Higher Real Analysis (3 UOC)
- And ONE of the following courses:
  - MATH2520 Complex Analysis (3 UOC)
  - MATH2620 Higher Complex Analysis (3 UOC)
- Plus General Education (6 UOC)
Year 3

COMP3211 Computer Architecture (6 UOC)
COMP3711 Software Project Management (6 UOC)
ELEC3006 Electronics A (6 UOC)
EELE3013 Telecommunication Systems 1 (6 UOC)

And ONE of the following courses:

COMP2231 Operating Systems (6 UOC)
COMP2891 Extended Operating Systems (6 UOC)

And ONE of the following courses:

COMP3120 Introduction to Algorithms (3 UOC)
MA1259 Linear Algebra for Engineers (3 UOC)

Plus 2 Electives (12 UOC)
Plus General Education (3 UOC)

Year 4

COMP4910 Thesis Part A (3 UOC)
COMP4911 Thesis Part B (3 UOC)
COMP4920 Professional Issues and Ethics (3 UOC)

Plus 4 Electives (24 UOC)

Plus General Education (3 UOC)

Elective Courses

1. The Program Director must approve the program selected by each student. Not all electives are offered in each session. Students are advised each year of the timetable of available electives. It may be possible to substitute other electives run by the participating schools, apart from those listed below, but this is not permitted if it unduly restricts the range of courses studied overall.

2. Electives for Stages 3 and 4 total 36 units of credit (6 courses of 6 units of credit, or equivalent) and are selected from Groups N, S, CE3, CE4, and D (see below), with these restrictions:

   i) At least 6 units of credit must be taken from Group N.
   ii) At least 12 units of credit must be taken from Group CE4.
   iii) At most 12 units of credit may be counted from Group S.

Group N Networks Electives

And ONE of the following courses:

COMP3331 Computer Networks and Applications (6 UOC)
COMP3991 Extended Computer Networks and Applications (6 UOC)
ELEL3018 Data Networks 1 (6 UOC)
TELE4332 Data Networks 2 (6 UOC)

Group S Science Electives

MATH2301 Mathematical Computing (6 UOC)
MA1240 Finite Mathematics (3 UOC)
MATH3411 Information, Codes and Ciphers (6 UOC)
PHYS2010 Mechanics (3 UOC)
PHYS2020 Computational Physics (3 UOC)
PHYS2040 Quantum Physics (3 UOC)

Group CE3 Level-3 Computer Engineering Electives

COMP3141 Software System Design and Implementation (6 UOC)
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3014 Systems and Control 1 (6 UOC)
ELEL3016 Electronics B (6 UOC)
TELE301 Switching System Design (6 UOC)
EELE3305 Network Management (6 UOC)
COMP3131 Programming Languages and Compilers (6 UOC)
COMP3151 Foundations ofConcurrency (6 UOC)
COMP3161 Concepts of Programming Languages (6 UOC)
COMP3111 Database Systems (6 UOC)
COMP3411 Artificial Intelligence (6 UOC)
COMP3421 Computer Graphics (6 UOC)
COMP3431 Robotic Software Architecture (6 UOC)
COMP3441 Cryptography and Security (6 UOC)
COMP3511 Human Computer Interaction (6 UOC)

Group CE4 Level-4 Computer Engineering Electives

COMP4001 Object-Oriented Software Development (6 UOC)
COMP4003 Industrial Software Development (6 UOC)
COMP4132 Advanced Functional Programming (6 UOC)
COMP4133 Advanced Compiler Construction (6 UOC)
COMP4151 Algorithm Verification (6 UOC)
COMP4211 Advanced Architectures and Algorithms (6 UOC)
COMP4411 Experimental Robotics (6 UOC)
COMP4412 Introduction to Modal Logic (6 UOC)
COMP4415 First-order Logic (6 UOC)
COMP4416 Intelligent Agents (6 UOC)
COMP4418 Knowledge Representation (6 UOC)
COMP4511 User Interface Design and Construction (6 UOC)
COMP9116 Software System Development Using the B-Method and B-Toolkit (6 UOC)
COMP9117 Software Architecture (6 UOC)
COMP9242 Advanced Operating Systems (6 UOC)
COMP9243 Distributed Systems (6 UOC)
COMP9414 Next Generation Database Systems (6 UOC)
COMP9315 Database Systems Implementation (6 UOC)
COMP9318 Data Warehousing & Data Mining (6 UOC)
COMP9321 E-Commerce Systems Implementation (6 UOC)
COMP9332 Network Routing and Switching (6 UOC)
COMP9333 Advanced Computer Networks (6 UOC)
COMP9334 Systems Capacity Planning (6 UOC)
COMP9417 Machine Learning (6 UOC)
COMP9444 Neural Networks (6 UOC)
COMP9515 Patta Recognition (6 UOC)
COMP9517 Computer Vision (6 UOC)
COMP9519 Multimedia Authoring (6 UOC)
COMP9790 Principles of Global Navigation (6 UOC)
ELEC4503 Electronics C (6 UOC)
ELEC4522 Microelectronics Design and Technology (6 UOC)
ELEC4544 Speech & Audio Processing (6 UOC)
ELEC4570 Digital Image Processing Systems (6 UOC)
SOLA3540 Applied Photovoltaics (6 UOC)
TELE4313 Optical Communications (6 UOC)
TELE4323 Digital Modulation and Coding (6 UOC)
TELE4333 Wireless Data Communication Systems (6 UOC)
TELE4343 Source Coding and Compression (6 UOC)
TELE4352 Data Networks 2 (6 UOC)
TELE4353 Mobile and Satellite Communication Systems (6 UOC)
TELE4354 Network Management (6 UOC)
TELE4363 Telecommunications Systems 2 (6 UOC)
TELE9357 Advanced Networking (6 UOC)

And ONE of the following courses:

COMP9231 Integrated Digital Systems (6 UOC)
ELEC4532 Integrated Digital Systems (6 UOC)

General Education Requirements

Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies. For further information, please refer to General Education section in this Handbook.

It may not be possible for computing students to enrol in General Education courses which are similar in content to the courses offered in their respective degree program. For a comprehensive list, please refer to the CSE website: www.cse.unsw.edu.au/school/teaching/courses/gened.html

Honours

Honours will be awarded to students who have achieved superior grades in courses over the whole program including the successful completion of a thesis at sufficient standard. Weighted average marks required for Honours grades are given below:
The School of Computer Science and Engineering uses an internal method for calculating this average, the information provided by New South Student is not used for this purpose.

Honours Class 1: WA greater than or equal to 75
Honours Class 2: Division 1: WA equal to 70 up to and including 74
Division 2: WA equal to 65 up to and including 69

Academic Rules

For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.
Industrial Training
All students in the BE in Computer Engineering, Bioinformatics Engineering and Software Engineering programs must complete at least 60 days of approved Industrial Training before the end of Year 4.

Computing Requirements
Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

Further Requirements
1. A HSC Maths mark of 145-150 is required in Maths Extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI >97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.

Professional Recognition
The Institution of Engineers, Australia
The professional body for engineering in Australia is the Institution of Engineers, Australia (IEAust), which has as its first objective the promotion of the science and practice of engineering in all its branches. The IEAust has its national headquarters in Canberra and functions through a series of divisions, the local one being the Sydney Division. Within each division are branches representing the main interests within the profession, e.g. civil, mechanical, electrical, engineering management and environmental engineering.

Students of an approved school of engineering may join the Institution as a student member (StudIEAust). Student members receive the monthly publication Engineers Australia. Enquiries should be directed to the Transactions which contains articles on a particular branch of engineering.

Student members are invited to participate in the Excellence Award for Work Experience, the National Young Engineer of the Year Award and to avail themselves of other IEAust services including the Mentor Scheme and industrial experience guidance.

For more information and membership application forms, contact the Institution of Engineers, Australia, Sydney Division, 1st Floor, 118 Alfred Street, Milsons Point 2061, telephone 8923 7100, website www.ieaust.org.au

3647 Bioinformatics
Bachelor of Engineering BE
Typical Duration
4 years
Minimum UOC for Award
192 units of credit
Typical UOC per Session
24 units of credit

Program Description
The School of Computer Science and Engineering and the Faculty of Science jointly administer the Bioinformatics program. Day-to-day administration is conducted through the Computer Science and Engineering Student Office, to which enquiries should be directed.

The stages of the program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements. Approval should be obtained for changes.

The School also offers the combined degrees BE (Bioinformatics)/BA (program 3756), BE (Bioinformatics)/BSc (program 3755), the concurrent degree BE (Bioinformatics)/MBiomedE (program 3757), and also the fast-track program BE/MEngSc (plan BINF13647).

Program Structure
Plan COMPB13647

Year 1
BINF1001 Bioinformatics 1 (6 UOC)
BIOS1201 Molecules, Cells and Genes (6 UOC)
And ONE of the following courses:
BIOC3201 Principles of Molecular Biology (Advanced) (6 UOC)
COMP2041 Software Construction: Techniques and Tools (6 UOC)
LIFE2101 Introductory Biochemistry & Microbiology (6 UOC)
MATH1081 Discrete Mathematics (6 UOC)
And ONE of the following courses:
BINF2001 Bioinformatics 2 (6 UOC)
COMP2201 Principles of Molecular Biology (Advanced) (6 UOC)
COMP2711 Higher Computing 1A (6 UOC)
And ONE of the following courses:
MAC1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
And ONE of the following courses:
MATH1231 Mathematics 1B (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)

Year 2
BINF3001 Bioinformatics 2 (6 UOC)
COMP3201 Principles of Molecular Biology (Advanced) (6 UOC)
COMP3204 Software Construction: Techniques and Tools (6 UOC)
LIFE2101 Introductory Biochemistry & Microbiology (6 UOC)
MATH1081 Discrete Mathematics (6 UOC)
And ONE of the following courses:
BINF3202 Genetics (6 UOC)
BINF3262 Genetics (Advanced Level) (6 UOC)
And ONE of the following courses:
COMP3011 Data Organisation (6 UOC)
COMP3711 Higher Data Organisation (6 UOC)
And ONE of the following courses:
MATH2801 Theory of Statistics (6 UOC)
MATH2901 Higher Theory of Statistics (6 UOC)

Year 3
BINF3002 Bioinformatics 3 (6 UOC)
BIOC3312 Molecular Biology of Nucleic Acids (6 UOC)
COMP3311 Database Systems (6 UOC)
COMP3711 Software Project Management (6 UOC)
And ONE of the following courses:
COMP3312 Algorithms and Programming Techniques (6 UOC)
COMP3621 Extended Algorithms and Programming Techniques (6 UOC)
3 Electives (2 Year 3 electives in S1 and 1 Year 3 elective in S2. At least one from Life Science and one from COMP/MATH) (18 UOC)

General Education
(3 UOC)

Year 4
BINF4910 Thesis Part A (3 UOC)
BINF4911 Thesis Part B (12 UOC)
BINF4920 Professional Issues and Ethics for Bioinformatics (3 UOC)
3 electives (at least one from Life Science and one from COMP/MATH) (18 UOC)

General Education
(9 UOC)

Electives for Stages 3 and 4 total 42 units of credit and are selected from the lists below:

Year 3 Electives
BIOC3311 Molecular Biology of Proteins (6 UOC)
BIOC3315 Human Genetics and Variation (6 UOC)
BIOC3281 Recombinant DNA Techniques (6 UOC)
BIOC3291 Genes, Genomes & Evolution (6 UOC)
BIOT3011 The Biotechnology A (6 UOC)
BIOT3061 Biopharmaceuticals (6 UOC)
COMP2121 Microprocessors and Interfacing (6 UOC)
COMP3111 Software Engineering (6 UOC)
COMP3411 Artificial Intelligence (6 UOC)
COMP3431 Robotic Software Architecture (6 UOC)
And ONE of the following courses:
COMP3231 Operating Systems (6 UOC)
COMP3891 Extended Operating Systems (6 UOC)
And ONE of the following courses:

**COMP3331** Computer Networks and Applications (6 UOC)
**COMP3931** Extended Computer Networks and Applications (6 UOC)

And ONE of the following courses:

**MATH2831** Linear Models (6 UOC)
**MATH2931** Higher Linear Models (6 UOC)

**Year 4 Electives**

**BIU13071** Commercial Biotechnology (6 UOC)
**COMP3151** Foundations of Concurrency (6 UOC)
**COMP3222** Digital Circuits and Systems (6 UOC)
**COMP3511** Human Computer Interaction (6 UOC)
**COMP4511** User Interface Design and Construction (6 UOC)
**COMP9243** Distributed Systems (6 UOC)
**COMP9351** Next Generation Database Systems (6 UOC)
**COMP9318** Data Warehousing & Data Mining (6 UOC)
**COMP9333** Advanced Computer Networks (6 UOC)
**COMP9417** Machine Learning (6 UOC)
**COMP9444** Neural Networks (6 UOC)
**MATH3621** Statistical Modelling and Computing (6 UOC)
**MATH3801** Microbial Physiology (6 UOC)
**MATH3821** Microbial Genetics (6 UOC)

And ONE of the following courses:

**MATH3801** Probability and Stochastic Processes (6 UOC)
**MATH3901** Higher Probability and Stochastic Processes (6 UOC)

And ONE of the following courses:

**MATH3811** Statistical Inference (6 UOC)
**MATH3911** Higher Statistical Inference (6 UOC)

Other elective courses are as follows:

- **MICR3011** Microbial Physiology (6 UOC)
- **MICR3021** Microbial Genetics (6 UOC)

- **MICR3021** Microbial Genetics (6 UOC)

**Computing Requirements**

Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

**Professional Recognition**

The Institution of Engineers, Australia

The professional body for engineering in Australia is the Institution of Engineers, Australia (IEAust), which has as its first objective the promotion of the science and practice of engineering in all its branches.

The IEAust has its national headquarters in Canberra and functions through a series of divisions, the local one being the Sydney Division. Within each division are branches representing the main interests within the profession, e.g., civil, mechanical, electrical, engineering management and environmental engineering.

Students of an approved school of engineering may join the Institution as a student member (StudentAust). Student members receive the monthly publication Engineers Australia and for a small fee they also receive the transactions that contains articles on a particular branch of engineering.

Student members are invited to participate in the Excellence Award for Work Experience, the National Young Engineer of the Year Award and to avail themselves of other IEAust services including the Mentor Scheme and industrial experience guidance.

Honours

Honours will be awarded to students who have achieved superior grades in courses over the whole program including the successful completion of a thesis at a sufficient standard. Weighted average marks required for Honours grades are given below. The School of Computer Science and Engineering uses an internal method for calculating this average, the information provided by New South Student is not used for this purpose.

Honours Class 1: WA greater than or equal to 75
Honours Class 2: Division 1: WA equal to 70 up to and including 74
Division 2: WA equal to 65 up to and including 69

Academic Rules

For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Training Requirements

All students in the BE in Computer Engineering, Bioinformatics Engineering and Software Engineering programs must complete at least 60 days of approved Industrial Training before the end of Year 4.

Computing Requirements

Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

Professional Recognition

The Institution of Engineers, Australia

The professional body for engineering in Australia is the Institution of Engineers, Australia (IEAust), which has as its first objective the promotion of the science and practice of engineering in all its branches.
And ONE of the following courses:

COMP1021 Computing 1B (6 UOC)
COMP1721 Higher Computing 1B (6 UOC)

And ONE of the following courses:

MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)

And ONE of the following courses:

MATH1231 Mathematics 1B (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)

Plus Electives (18 UOC)

Computer Science has mathematics and computing courses in year 1, representing five out of eight courses for a full-time student. Electives are chosen from areas such as Physics, Information Systems, Chemistry, Philosophy, Psychology, Geography, and Economics.

Year 2

COMP2121 Microprocessors and Interfacing (6 UOC)
COMP2041 Software Construction: Techniques and Tools (6 UOC)
COMP2920 Professional Issues and Ethics (3 UOC)

And ONE of the following courses:

COMP2011 Data Organisation (6 UOC)
COMP2711 Higher Data Organisation (6 UOC)
Electives (21 UOC)
General Education (6 UOC)

Four of the ten courses in Year 2 comprise core computing. The remainder are electives. Common electives include mathematics (many choices), psychology, geography, biology, chemistry, physics, economics, arts, more first-year courses (maximum 12 UOC), material that follows on from first-year electives and information systems.

Year 3

COMP3111 Software Engineering (6 UOC)
Level 3/4 Computer Science Electives (24 UOC)
General Education
Electives (12 UOC)

Between five and seven computing courses (selected from available Level 3 and 4 courses) are taken in Year 3. Students proceeding to the Honours year must take at least six Level 3 courses in computing or other disciplines.

Level 3 Computing Electives

COMP3131 Programming Languages and Compilers (6 UOC)
COMP3141 Software System Design and Implementation (6 UOC)
COMP3151 Foundations of Concurrency (6 UOC)
COMP3161 Concepts of Programming Languages (6 UOC)
COMP3211 Computer Architecture (6 UOC)
COMP3222 Digital Circuits and Systems (6 UOC)
COMP3311 Database Systems (6 UOC)
COMP3411 Artificial Intelligence (6 UOC)
COMP3421 Computer Graphics (6 UOC)
COMP3431 Robotic Software Architecture (6 UOC)
COMP3441 Cryptography and Security (6 UOC)
COMP3511 Human Computer Interaction (6 UOC)

One of the following:

COMP3121 Algorithms and Programming Techniques (6 UOC)
COMP3821 Extended Algorithms and Programming Techniques (6 UOC)

One of the following:

COMP3231 Operating Systems (6 UOC)
COMP3891 Extended Operating Systems (6 UOC)

One of the following:

COMP3331 Computer Networks and Applications (6 UOC)
COMP3993 Extended Computer Networks and Applications (6 UOC)

Level 4 Computing Electives

COMP4001 Object-Oriented Software Development (6 UOC)
COMP4003 Industrial Software Development (6 UOC)
COMP4133 Advanced Compiler Construction (6 UOC)
COMP4151 Algorithm Verification (6 UOC)
COMP4418 Knowledge Representation (6 UOC)
COMP4511 User Interface Design and Construction (6 UOC)
COMP3931 Next Generation Database Systems (6 UOC)
COMP9231 Integrated Digital Systems (6 UOC)
COMP9243 Distributed Systems (6 UOC)
COMP9318 Data Warehousing & Data Mining (6 UOC)

COMP9321 E-Commerce Systems Implementation Infrastructure (6 UOC)
COMP9332 Network Routing and Switching (6 UOC)
COMP9333 Advanced Computer Networks (6 UOC)
COMP9334 Systems Capacity Planning (6 UOC)
COMP9417 Machine Learning (6 UOC)
COMP9444 Neural Networks (6 UOC)
COMP9515 Pattern Recognition (6 UOC)
COMP9517 Computer Vision (6 UOC)
COMP9519 Multimedia Authoring (6 UOC)

COMP9790 Principles of Global Navigation Satellite System (GNSS) Positioning (6 UOC)

COMP9791 Modern Navigation & Positioning Technologies (6 UOC)

With the approval of the Program Director, students in this program wishing to fulfil the requirements for a major in a second discipline, as well as the Computer Science requirements, may substitute a course from the other discipline for one of the Level 3/4 Computer Science courses. Students who have met the required prerequisites may also select electives from COMP4XXX and COMP9XXX courses.

General Education Requirements

Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies. For further information, please refer to the General Education section in this Handbook.

It may not be possible for computing students to enrol in General Education courses which are similar in content to the courses offered in their respective degree program. For a comprehensive list, please refer to the CSE website: www.cse.unsw.edu.au/school/teaching/courses/gened.html

Honours

Year 4 Honours (Optional) COMP4H3978

Computer Science Honours takes one year full-time or two years of part-time study.

Normally, students are expected to have attained an average mark of 65 (according to NewSouth Student calculations) to qualify for entry to the Honours year. Students who do not meet this expectation may be admitted in special circumstances. Students who have graduated with a three-year computer science degree from UNSW or another university can apply for admission to Honours. Application forms are available from the Student Office of Computer Science and Engineering in K17 G01. Detailed information about the program is available at the Honours website at: www.cse.unsw.edu.au/~cs4914

COMP4910 Thesis Part A (3 UOC)
COMP4911 Thesis Part B (15 UOC)

Computing Electives

Level 3/4 Computer Science Courses (subject to approval) (12 UOC)
Level 4 Computer Science Courses (subject to approval) (18 UOC)

Computer ScienceHonours students must at least complete 18UOC Level 4 elective courses. Students may substitute level 4 courses from other schools with the permission of the Program Director.

Academic Rules

Please refer to Program Structure for the Academic Requirements relating to this program.

1. A HSC Maths mark of 145-150 is required in Maths Extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI > 97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1021 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.
4. Students may take COMP3111 Software Engineering in either semester.
5. Electives, COMP electives and General Education courses may be allocated between first and second semesters according to the student's preference, but the total units of credit per semester should be 24. COMP3111 is offered in both semesters.
Computing Requirements
Information regarding recommended computing equipment and software for the program is available from the School of Computer Science Engineering Student Office.

3726 Computer Engineering/Bachelor of Science
Bachelor of Engineering Bachelor of Science BE BSc
Typical Duration
3 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
With this combined degree program students can add a science program to the standard, professionally accredited engineering program BE in Computer Engineering offered by the School of Computer Science & Engineering. All science majors within program 3970 are available. Students who achieve a creditable performance, 65CR average after one or two years of their Computer Engineering program, may apply to transfer to the combined BE in Computer Engineering/BSc program.

There are no special rules on what to include in each year. Students should schedule the science and engineering components to suit their preferences while meeting the constraints of timetables and prerequisites. The Faculty of Science section in this Handbook describes the options and the School of Computer Science and Engineering Student Office can supply sample programs showing what previous students have arranged.

In addition to the BE program, students must complete a minimum of 60 units of credit in Science courses, including a major sequence in an approved area. The Science office must approve the Science component while the School of Computer Science & Engineering will approve the final program and schedule.

In the Faculty of Engineering, Honours are awarded for superior performance in the standard program. In the Faculty of Science, the award of Honours requires a separate program involving at least one further year of study.

Program Objectives and Learning Outcomes
Combined Degree Programs - Computer Engineering

Students in Computer Engineering who maintain a high average performance may qualify for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged. The degrees referred to here are the Bachelor of Engineering (Computer Engineering)/Bachelor of Arts BE BA and the Bachelor of Engineering (Computer Engineering)/Bachelor of Science BE BSc. Students wishing to gain a degree at Honours level in Arts or Science as part of their combined degree program shall meet all the relevant requirements of the Faculty concerned and of the appropriate schools.

Students wishing to enrol in, transfer into, or continue in a combined program shall have complied with all the requirements for prerequisite study, sequencing and academic attainment (a credit average, i.e. 65%) of both the program authorities concerned.

Students who commence a combined program, but subsequently do not wish to proceed with both areas of study, or who fail to maintain a credit average performance, should revert to a single degree program with appropriate credit for courses completed.

Students in a combined degree program are exempt from all General Education requirements. However, if the student reverts to the single degree program, the usual General Education requirements for that program apply.

There will be a testamur for each part of the combined degree program.

Students who complete the BE program first may proceed to graduation with the degree of Bachelor of Engineering in the usual way.

Program Structure
Plan COMPB13726

Please refer to the program entry for 3645 BE in Computer Engineering and contact the School of Computer Science and Engineering and the Faculty of Science for more information.

Honours
Honours will be awarded to students who have achieved superior grades in courses over the whole program including the successful completion of a thesis at sufficient standard. Weighted average marks required for Honours grades are given below: The School of Computer Science and Engineering uses an internal method for calculating this average, the information provided by New South Student is not used for this purpose.

Honours Class 1: WA greater than or equal to 75
Honours Class 2: Division 1: WA equal to 70 up to and including 74
Division 2: WA equal to 65 up to and including 69

Academic Rules
For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Training
All students in the BE in Computer Engineering, Bioinformatics Engineering and Software Engineering programs must complete at least 60 days of approved Industrial Training before the end of Year 4.

Further Requirements
1. A HSC Maths mark of 145-150 is required in Maths Extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI >97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.

Computing Requirements
Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

Professional Recognition
The Institution of Engineers, Australia and the Australian Computer Society.

For more information, please refer to ‘Professional Recognition’ in the program entry for 3645 Computer Engineering.

3722 Computer Engineering/Bachelor of Arts
Bachelor of Engineering Bachelor of Arts BE BA
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
Anyone who meets the entry requirements for both Computer Engineering and Arts is eligible for the combined program. Students may enter directly in first year or may apply to transfer from the normal Engineering program later, although with late transfer it might not be possible to complete the program in minimum time.

The BE in Computer Engineering BA combined program requires the completion of 240 UOC, including at least 60 UOC of Arts courses, and must contain a major sequence of 42 UOC at stages 2 and 3 in a single Arts discipline. Students in this combined program are exempt from the General Education requirement. The major Arts discipline may not be Computer Science.

The Faculty of Arts and Social Sciences must approve the Arts component while the School of Computer Science & Engineering will approve the final program and schedule.

In the Faculty of Engineering, Honours are awarded for superior performance in the standard program. In the Faculty of Arts, the award of Honours requires a separate program involving at least one further year of study.

Further Requirements
1. A HSC Maths mark of 145-150 is required in Maths Extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI >97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.

Computing Requirements
Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

Professional Recognition

3755 Biinformatics/Bachelor of Science

Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration

5 years

Minimum UOC for Award

240 units of credit

Typical UOC per Session

24 units of credit

Program Description

The combined Bachelor of Engineering in Bioinformatics/Bachelor of Science program allows students to study additional Science courses in their Bioinformatics program to gain a broader understanding of the various scientific disciplines that contribute to Bioinformatics (such as mathematics, statistics and chemistry) or constitute major application areas of bioinformatics (for example, medical sciences or biotechnology).

Students must meet the entry requirements for the BE (Bioinformatics) program and the Bachelor of Science program, and must complete the courses and electives required by the Bioinformatics program (3647) as well as 60 additional units of credit in Science courses, including an approved major sequence of 42 UOC at Stages 2 and 3. Combined programs are exempt from the General Education requirement. Approved majors are listed in Table A of the BSc program (3970).

The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and overall program requirements. The School of Computer Science and Engineering Student Office can supply examples of specific combined programs.

Program Structure

Plan BINFB13755

Year 1

BINF1001 Biinformatics 1 (6 UOC)
BIOS1201 Molecules, Cells and Genes (6 UOC)

And one of the following courses:

BIOS1101 Evolutionary and Functional Biology (6 UOC)
CHEM1021 Fundamentals of Chemistry 1B (6 UOC)
CHEM1041 Higher Chemistry 1D (6 UOC)

And one of the following courses:

CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
CHEM1031 Higher Chemistry 1C (6 UOC)

And one of the following courses:

COMP1011 Computing 1A (6 UOC)
COMP1711 Higher Computing 1A (6 UOC)

And one of the following courses:

COMP1021 Computing 1B (6 UOC)
COMP1721 Higher Computing 1B (6 UOC)

And one of the following courses:

MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)

And one of the following courses:
Mathematics 1B (6 UOC)
Math1241 Higher Mathematics 1B (6 UOC)

Year 2
BI0C2201 Principles of Molecular Biology (Advanced) (6 UOC)
COMP2041 Software Construction: Techniques and Tools (6 UOC)
LH1J3101 Introductory Biotechnology & Microbiology (6 UOC)
MATH1081 Discrete Mathematics (6 UOC)
And ONE of the following courses:
BI0S2021 Genetics (6 UOC)
BI0S2621 Genetics (Advanced Level) (6 UOC)
And ONE of the following courses:
MATH2801 Theory of Statistics (6 UOC)
MATH2901 Higher Theory of Statistics (6 UOC)
Plus 2 Science majors level 1 or 2 (6 UOC S1 and 6 UOC S2)

Year 3
BINF2001 Bioinformatics 2 (6 UOC)
BI0C3121 Molecular Biology of Nucleic Acids (6 UOC)
COMP3311 Database Systems (6 UOC)
And ONE of the following courses:
COMP2011 Data Organisation (6 UOC)
COMP2711 Higher Data Organisation (6 UOC)
Plus 2 Science majors level 2 (6 UOC S1 and 6 UOC S2)
Plus 1 Year 3 elective (6 UOC)
Plus 2 General Education Courses (6 UOC)

Year 4
BINF3001 Bioinformatics 3 (6 UOC)
BINF4920 Professional Issues and Ethics for Bioinformatics (3 UOC)
COMP3711 Software Project Management (6 UOC)
And one of the following courses:
COMP3121 Algorithms and Programming Techniques (6 UOC)
COMP3821 Extended Algorithms and Programming Techniques (6 UOC)
Plus 4 level 3 Science majors (24 UOC)
Plus 1 Year 3 elective (6 UOC)
Overall electives in Stages 3 and 4 must include at least one computer science and one life science elective.

Year 5
BINF4910 Thesis Part A (3 UOC)
BINF4911 Thesis Part B (12 UOC)
Plus 2 Level 3 Science majors (12 UOC)
Plus 3 Year’s 3/4/5 electives (18 UOC)

Year 3 and 4 Electives
BI0C3111 Molecular Biology of Proteins (6 UOC)
BI0C3151 Human Genetics and Variation (6 UOC)
BI0C3281 Recombinant DNA Techniques (6 UOC)
BI0C3291 Genes, Genomes & Evolution (6 UOC)
BIOT3011 Biotechnology A (6 UOC)
BIOT3061 Biopharmaceuticals (6 UOC)
COMP2121 Microprocessors and Interfacing (6 UOC)
COMP3311 Software Engineering (6 UOC)
COMP3411 Artificial Intelligence (6 UOC)
MICR3021 Microbial Genetics (6 UOC)
One of the following:
COMP3531 Computer Networks and Applications (6 UOC)
COMP3931 Extended Computer Networks and Applications (6 UOC)

Year 5 Electives
BI0U3071 Commercial Biotechnology (6 UOC)
COMP3151 Foundations of Concurrency (6 UOC)
COMP3222 Digital Circuits and Systems (6 UOC)
COMP3511 Human Computer Interaction (6 UOC)
COMP3931 Next Generation Database Systems (6 UOC)
COMP3958 Data Warehousing & Data Mining (6 UOC)
COMP3933 Advanced Computer Networks (6 UOC)
COMP3947 Machine Learning (6 UOC)
COMP4944 Neural Networks (6 UOC)
BI0H3621 Statistical Modelling and Computing (6 UOC)
MICR3011 Microbial Physiology (6 UOC)
Level 3 MATH electives and other COMP3/4/9 electives may also be considered. Electives must include at least one life science and at least one COMP course.

General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually taken in second and third year studies. For further information, please refer to the General Education section in this Handbook.

Honours
Honours will be awarded to students who have achieved superior grades in courses over the whole program including the successful completion of a thesis at sufficient standard. Weighted average marks required for Honours grades are given below. The School of Computer Science and Engineering uses an internal method for calculating this average, the information provided by New South Student is not used for this purpose.

Honours Class 1: WA greater than or equal to 75
Honours Class 2: Division 1: WA equal to 70 up to and including 74
Division 2: WA equal to 65 up to and including 69

Academic Rules
For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Training
All students in the BE in Computer Engineering, Bioinformatics Engineering and Software Engineering programs must complete at least 60 days of approved Industrial Training before the end of Year 4.

Further Requirements
1. A HSC Maths mark of 145-150 is required in Maths extension 1 or a mark of 186-200 in Maths Extension 2 or a UAI > 97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.

Computing Requirements
Information regarding recommended computing equipment and software for the program is available from the School of Computer Science and Engineering Student Office.

Career Information
The Institution of Engineers, Australia
For more information, please refer to ‘Professional Recognition’ in the program entry for 3647 Bioinformatics.

3756 Bioinformatics/Bachelor of Arts
Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
Students qualify for the award of the two degrees of Bachelor of Engineering (Bioinformatics) and Bachelor of Arts. This cross-disciplinary program allows students to add their choice of Arts major to the standard Bioinformatics program and obtain the broader education offered by Arts and Social Sciences.

Students must meet the entry requirements for the BE (Bioinformatics) program and the Bachelor of Arts program, and must complete the courses and electives required by the Bioinformatics program (3647) as well as 60 additional units of credit in arts courses, including an approved major sequence of 42UOC at stages 2 and 3. Approved majors are given in List A of the Bachelor of Arts (3400) program. Combined programs are exempt from the General Education requirement.
The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and overall program requirements. The School of Computer Science and Engineering Student Office can supply examples of specific programs.

Program Structure
Plan BINF13756

Year 1
BINF1001 Bioinformatics 1
BIOS1201 Molecules, Cells and Genes
And ONE of the following courses:
BIOS1111 Evolutionary and Functional Biology
CHEM1021 Fundamentals of Chemistry 1B
CHEM1041 Higher Chemistry 1D
And ONE of the following courses:
CHEM1011 Fundamentals of Chemistry 1A
CHEM1031 Higher Chemistry 1C
And ONE of the following courses:
COMP1011 Computing 1A
COMP1711 Higher Computing 1A
And ONE of the following courses:
COMP1021 Computing 1B
COMP1721 Higher Computing 1B
And ONE of the following courses:
MATH1131 Mathematics 1A
MATH1141 Higher Mathematics 1A
And ONE of the following courses:
MATH1231 Mathematics 1B
MATH1241 Higher Mathematics 1B

Year 2
BIOC2201 Principles of Molecular Biology (Advanced)
COMP2041 Software Construction: Techniques and Tools
LIFE2101 Introductory Biochemistry & Microbiology
MATH1081 Discrete Mathematics
And ONE of the following courses:
BIOS2021 Genetics
BIOS2621 Genetics (Advanced Level)
And ONE of the following courses:
MATH2801 Theory of Statistics
MATH2901 Higher Theory of Statistics
Plus 2 Arts major level 1 (6 UOC S1 and 6 UOC S2)

Year 3
BINF2001 Bioinformatics 2
BIOC3121 Molecular Biology of Nucleic Acids
COMP3311 Database Systems
And ONE of the following courses:
COMP2011 Data Organisation
COMP2711 Higher Data Organisation
Plus Arts major level 2
Plus Arts major level 2 or Arts elective
Plus 2 Year 3 electives (12 UOC)

Year 4
BINF3001 Bioinformatics 3
BINF4920 Professional Issues and Ethics for Bioinformatics
COMP3711 Software Project Management
And one of the following courses:
COMP3121 Algorithms and Programming Techniques
COMP3821 Extended Algorithms and Programming Techniques
2 Arts major level 2 (12 UOC)
2 Arts major level 2 or Arts elective (12 UOC)
Level 3 elective (6 UOC)

Note: Overall electives in stages 3 and 4 must include at least one computer science elective and one life science elective.

Year 5
BINF4910 Thesis Part A (3 UOC)
BINF4911 Thesis Part B (12 UOC)

Plus 2 level 3 Arts major (12 UOC)
Plus 3 Years 3 or 4 or 5 electives (18 UOC)

Years 3 and 4 Electives
BIOC3111 Molecular Biology of Proteins (6 UOC)
BIOC3151 Human Genetics and Variation (6 UOC)
BIOC3201 Recombinant DNA Techniques (6 UOC)
BIOC3291 Genes, Genomes & Evolution (6 UOC)

Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The BE (Bioinformatics)/Master of Biomedical Engineering concurrent degree program is offered jointly through the School of Computer Science and Engineering, the Faculty of Science and the Graduate School of Biomedical Engineering. The combined Bachelor of Engineering in Bioinformatics/Master of Biomedical Engineering program allows students to combine the software engineering/molecular biology focus of bioinformatics with the broader engineering and medical emphases of the biomedical engineering program.

Students who are enrolled in a joint program are expected to maintain a Credit (65%) average across courses taken from each of the composite programs. Students who fail to meet this condition will be counselled about their suitability to remain in the combined program.

The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and overall program requirements.

Program Structure
Plan BINA613757

Year 1
- BINF1001 Bioinformatics 1 (6 UOC)
- BIOS1201 Molecules, Cells and Genes (6 UOC)
- And ONE of the following courses:
  - COMP1011 Computing 1A (6 UOC)
  - COMP1711 Higher Computing 1A (6 UOC)
- And ONE of the following courses:
  - COMP1712 Computing 1B (6 UOC) OR COMP1721 Higher Computing 1B (6 UOC)
- And ONE of the following courses:
  - MATH1131 Mathematics 1A (6 UOC)
  - MATH2131 Higher Mathematics 1B (6 UOC)
- And ONE of the following courses:
  - CHEM1001 Fundamentals of Chemistry 1A (6 UOC)
  - CHEM2101 Higher Chemistry 1A (6 UOC)

Year 2
- BINF2001 Bioinformatics 2 (6 UOC)
- BIOL2201 Principles of Molecular Biology (Advanced) (6 UOC)
- BIOM2010 Biomedical Engineering Practice (3 UOC)
- COMP2041 Software Construction: Techniques and Tools (6 UOC)
- COMP3711 Software Project Management (6 UOC)
- LIFE2101 Introductory Biochemistry & Microbiology (6 UOC)
- MA110900 Discrete Mathematics for Electrical Engineers (3 UOC)
- And ONE of the following courses:
  - COMP2011 Data Organisation (6 UOC)
  - COMP2711 Higher Data Organisation (6 UOC)

And ONE of the following courses:
- MATH2801 Theory of Statistics (6 UOC)
- MA119001 Higher Theory of Statistics (6 UOC)
- General Education (3 UOC)

Year 3
- BINF3001 Bioinformatics 3 (6 UOC)
- BIOL3121 Molecular Biology of Nucleic Acids (6 UOC)
- COMP3311 Database Systems (6 UOC)
- And ONE of the following courses:
  - COMP3121 Algorithms and Programming Techniques (6 UOC)
  - COMP3821 Extended Algorithms and Programming Techniques (6 UOC)

Year 4
- BIOM3021 Genetics (6 UOC)
- BIOM2621 Genetics (Advanced Level) (6 UOC)
- 2 BIOM 9XXX Biomedical Engineering electives (12 UOC each)

And ONE of the following courses:
- MATH2311 Linear Models (6 UOC)
- MATH2931 Higher Linear Models (6 UOC)

Year 5
- BIOM5904 Thesis Part B (12 UOC)
- BIOM9410 Regulatory Req of Biomed Tech (6 UOC)
- BIOM9XXX or COMP9XXX 1 Biomedical engineering elective+ (12 UOC)
- And ONE of the following courses:
  - BIOM9913 Project Report (12 UOC)
  - COMPS41 or COMP3998 Industrial Training (6 UOC)

Level 3 MATH electives and other level 3/4/9 COMP electives may be also considered. Electives must include at least two life science electives and at least two COMP or MATH electives.
Recommended Biomedical Engineering Electives:

- BIOM9027 Medical Imaging (6 UOC)
- BIOM9332 Biocompatibility (6 UOC)
- BIOM9420 Clinical Laboratory Science (6 UOC)
- BIOM9440 Biomedical Practical Measures (6 UOC)
- BIOM9430 Clinical Information Systems (6 UOC)
- BIOM9613 Medical Instrumentation (6 UOC)

Note that the BE (Bioinformatics) program allows a variation in standard prerequisites for some courses. Bioinformatics students who want to enrol in these courses will need to request manual enrolment after consultation with the program authority.

General Education Requirements

UNSW wants all students to develop skills in a broad range of areas, not just in their specific study discipline, and so students in all degrees are required to undertake a number of general studies courses outside their discipline. It may not be possible for Bioinformatics Engineering students to enrol in general education courses that are similar in content to the courses offered in the Bioinformatics Engineering degree.

For a comprehensive list, please refer to the CSE website: www.cse.unsw.edu.au/undergrad/current/gened.html

Academic Rules

For academic requirements relating to this program, please refer to Program Structure and contact the School of Computer Science and Engineering for more information.

Industrial Training Requirement

At least 60 days of approved industrial training must be completed before graduation. Industrial Training should be concurrent with enrolment and is best accumulated in the summer recesses at the end of Years 2 and 3, but must be completed by the end of Year 4. Opportunities exist for 6 months industrial placement in Year 3.

Further Requirements

Assumed Knowledge

Assumed knowledge for Mathematics (MATH1131); students will be expected to have achieved the equivalent of a combined mark of at least 100 in HSC Mathematics and HSC Mathematics Extension 1. Failure to meet this required knowledge means that General Mathematics (MATH1011) will have to be taken first. Assumed knowledge for English: at least band 3 in 2 Unit Standard English.

Professional Recognition

Accreditation will be sought from Engineers Australia and the Australian Computing Society.

Career Opportunities

Data analysis and software development in drug companies, biotechnology companies and medical and biological research institutes. Graduates from this course will also be well trained to take up careers in other areas of computational data analysis, such as in banks and insurance companies. They could also pursue careers in other more general areas of computing.

3651 Software Engineering/Bachelor of Science

Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration

3 years

Minimum UOC for Award

240 units of credit

Typical UOC per Session

24 units of credit

Program Description

The stages of a generic combined program are shown below. It should be noted that it is possible to adapt the program by moving courses, subject to prerequisite requirements and the overall requirements given under Academic Rules below.

Day to day administration of this program is conducted through the Computer Science and Engineering Student Office, to which enquiries should be directed.
The major Science discipline may not be Computer Science.

Students who are enrolled in a combined program are expected to maintain a credit (65% or higher) average across courses taken from each of the composite programs. Students who fail to meet this condition will be counselled about their suitability to remain in the combined program. Refer to the School of Computer Science and Engineering website for examples of specific SE/Science programs: [www.cse.unsw.edu.au/seng](http://www.cse.unsw.edu.au/seng)

**Industrial Training Requirements**

All students in the BE in Computer Engineering, Bioinformatics Engineering and Software Engineering programs must complete at least 60 days of approved Industrial Training before the end of Year 4.

**Further Requirements**

1. A HSC Maths mark of 145-150 is required in 2 & 3 units Maths or 186-200 in 3 & 4 units Maths or a UAI > 97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.
4. The chosen courses must form a major sequence of 42 units of credit at stages 2 and 3.
5. To satisfy prerequisites it may be necessary to use a different arrangement of courses than shown above.
6. All students in the BE/BSc Software Engineering/Science program must complete at least 60 days of approved Industrial Training before the end of Year 5 to fulfill the requirements of SENG4903 in stage 5.

**Professional Recognition**

The Institution of Engineers, Australia

For more information, please refer to ‘Professional Recognition’ in the program entry for 3648 Software Engineering.

---

**3652 Software Engineering/Bachelor of Arts**

**Bachelor of Engineering Bachelor of Arts BE BA**

**Typical Duration**

**Academic Rules**

The BE (Software Engineering)/BA combined program requires the completion of 240 units of credit, including at least 60UOC (Units of Credit) of Arts courses, and must contain a major sequence of 42UOC at stages 2 and 3 in a single Arts discipline. To satisfy the requirement of the combined program, the free electives and the General Education electives of the standard Software Engineering program are assigned to Arts electives. Combined Programs are exempt from the General Education requirement.

The major Arts discipline may not be Computer Science.

Students who are enrolled in a combined program are expected to maintain a credit (65% or higher) average across courses taken from each of the composite programs. Students who fail to meet this condition will be counselled about their suitability to remain in the combined program.

The stages of a generic combined program are shown above. In general, it will be necessary to adapt the program by moving courses to meet the requirements of particular Arts majors. This generic program can accommodate 72 units of credit of Arts electives.

Refer to the School of Computer Science and Engineering website for examples of specific SE/Arts programs: [www.cse.unsw.edu.au/seng](http://www.cse.unsw.edu.au/seng)

The Faculty of Arts and Social Science should approve all Arts programs.

**Further Requirements**

1. An HSC Maths mark of 145-150 is required in 2 & 3 Unit Maths or 186-200 in 3 & 4 Unit Maths or a UAI >97 in order to do COMP1711.
2. A mark of at least 75DN is required in COMP1011 or COMP1711 in order to do COMP1721.
3. A mark of at least 75DN is required in COMP1021 or COMP1721 in order to do COMP2711.
4. The chosen courses must form a major sequence of 42 UOC.
5. To satisfy prerequisites it may be necessary to use a different arrangement of courses than shown above.
6. To accommodate particular sequences of Arts electives it may be necessary to change the distribution of SE electives between stages 3, 4 and 5.
7. All students in the BE/BA Software Engineering/Arts program must complete at least 60 days of approved Industrial Training before the end of Year 5 to fulfill the requirements of SENG4903 in Stage 5.
Please Note
1. The above staging of the program represents one possible sequence of courses. The staging of the courses may be modified, subject to prerequisites and timetabling. In particular, the FCE and SE electives may be redistributed.
2. Further information regarding SE electives can be found at www.cse.unsw.edu.au/seng

Academic Rules
The Bachelor of Engineering in Software Engineering Bachelor of Commerce combined program requires the following:

- At least 96 units of credit from the courses offered by the Faculty of Commerce and Economics (FCE) including: ACCT 1501, ACCT1511, ECON1101, ECON1102, and...
- Completion of a major of at least 48 units of credit in an FCE approved disciplinary stream and a minor of 24 units of credit in INFS courses of which no more than 12 units of credit may be Level 1 courses.
- No more than 60 units of credit of Level 1 FCE courses.
- 6 units of credit of first year mathematics courses as required for the Software Engineering program, and at least 6 units of credit in statistics and mathematics chosen from ECON1203, MATH1041, MATH1111, MATH1141, MATH1200, MATH1285, MATH2811, MATH2841, or alternative statistics and mathematics courses approved by the program advisor.

Students who are enrolled in a combined program are expected to maintain a Credit (65% or higher) average across courses taken from each of the composite programs. Students who fail to meet this condition will be counselled about their suitability to remain in the combined program.

The stages of a generic combined program are shown above. In general, it will be necessary to adapt the program by undertaking courses to meet the requirements of particular Commerce majors. This generic program accommodates 96 UOC of courses from FCE.

The Faculty of Commerce and Economics should approve the BCom program.

3749 Software Engineering/Master of Biomedical Engineering

Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The BE (Software Engineering)/Master of Biomedical Engineering concurrent degree program is offered jointly through the School of Computer Science and Engineering and the Graduate School of Biomedical Engineering. Students who are enrolled in a joint program are expected to maintain a Credit (65%) average across courses taken from each of the composite programs.

Program Structure
Plan SENG413749

Year 1
BIOC2010 Biomedical Engineering Practice (3 UOC)
INFS1603 Business Data Management (6 UOC)
INFS1611 Requirements Engineering (3 UOC)
MATH1081 Discrete Mathematics (6 UOC)
MATH2400 Finite Mathematics (3 UOC)
SENG1011 Software Engineering Workshop 1 (6 UOC)
And ONE of the following courses:
COMP1011 Computing 1A (6 UOC)
COMP1711 Higher Computing 1A (6 UOC)
COMP1721 Higher Computing 1B (6 UOC)
And ONE of the following courses:
INFS1603 Business Data Networks (6 UOC)

SENG3020 Software Engineering Workshop 3B (3 UOC)
SE Electives (24 UOC)

Stage 4
Faculty of Commerce & Economics Electives (48 UOC)

Stage 5
SENG4910 Thesis Part A (6 UOC)
SENG4911 Thesis Part B (12 UOC)
SENG4921 Professional Issues and Ethics (6 UOC)
Software Engineering Electives (24 UOC)

At least 3 UOC of the Software Engineering electives must be chosen from INFS courses.

Further information regarding SE electives can be found at www.cse.unsw.edu.au/seng
3983 Computer Science/Bachelor of Science

Bachelor of Science Bachelor of Science (Computer Science) BSc BSc

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description

With this combined degree program, students can add a Science program to the standard, professionally accredited BSc in Computer Science program offered by the School of Computer Science and Engineering. All Science majors within program 3970 are available.

Students who meet the entry requirements for the Bsc in Computer Science program 3978 and for the Bachelor of Science program 3970 may apply to enter the combined Bachelor of Science Bachelor of Science (Computer Science) program.

Students should schedule the Science and Computer Science components to suit their preferences while meeting constraints of timetables and prerequisites. The Science Faculty section in this Handbook describes the Science options and the School of Computer Science and Engineering Student Office can supply sample programs indicating what previous students have arranged.

In addition to the BSc in Computer Science program 3978, students must complete a minimum of 84 units of credit in Science courses, including a major sequence in an approved area. The Science office must approve the Science component while the School of Computer Science and Engineering will approve the final program and schedule.

The award of Honours in either the Science or the Computer Science program requires at least one further year of study.

Students wishing to gain a degree at Honours level as part of their combined degree program shall meet all the relevant requirements of the faculty concerned and of the appropriate schools. Such students may enrol for the Honours year only on the recommendation of both the program authorities concerned.

Program Structure

Plan COMPA13983

Year 1

Sample Program:

Choose ONE of the following courses:

- COMP1011 Computing 1A
- COMP1711 Higher Computing 1A

And ONE of the following courses:

- COMP1021 Computing 1B
- COMP1721 Higher Computing 1B

Other

And ONE of the following courses:

- MATH1131 Mathematics 1A
- MAIH1341 Higher Mathematics 1A

And ONE of the following courses:

- MAIH1231 Mathematics 1B
- MAIH1241 Higher Mathematics 1B

Plus Science Electives, Level 1 (24 UOC)

Year 2

- COMP2121 Microprocessors and Interfacing
- COMP2041 Software Construction: Techniques and Tools
- MATH1081 Discrete Mathematics

And ONE of the following courses:

- COMP2011 Data Organisation
- COMP2711 Higher Data Organisation

Plus Science Electives, Level 2 (24 UOC)

Year 3

- COMP3111 Software Engineering

Plus Level 3/4 Computer Science Electives (18 UOC)

Plus Science Electives, Levels 2 & 3 (24 UOC)

General Education Requirements

UNSW wants all students to develop skills in a broad range of areas, not just in their specific study discipline, and so students in all degrees are required to undertake a number of general studies courses outside their discipline. It may not be possible for Computer Engineering students to enrol in general education courses that are similar in content to the courses offered in the Computer Engineering degree. For a comprehensive list, please refer to the CSE website: www.cse.unsw.edu.au/undergrad/current/gened.html

Academic Rules

For academic requirements relating to this program, please refer to Program Structure and contact the School Office for more information.
Year 4
COMP2920  Professional Issues and Ethics  (3 UOC)
Plus Level 3/4 Computer Science Electives  (6 UOC)
Plus Other Computer Science Electives  (6 UOC)
Plus Science Electives, Levels 2 & 3  (12 UOC)
Plus Electives  (15 UOC)
General Education Courses  (6 UOC)

External courses which may be included here and count towards the 84 UOC Computer Science electives, include: MATH2301, MATH3411/3301, TELE3013, PHYS1601 & 2601 and any of ELEC1011, 2031, 2032, 2042, 3004, 3006, 3014, 3016, 3017, 3041, 4042, 4412, 4413, 4503, 4522 and 4532.

General Education Requirements
Students in this program may also need to satisfy the General Education requirements. It may not be possible for computing students to enrol in General Education courses which are similar in content to the courses offered in their respective degree program. For a comprehensive list, please refer to the CSE website: www.cse.unsw.edu.au/school/teaching/courses/gened.html

Academic Rules
For academic requirements relating to this program, please refer to Program Structure and contact the School of Computer Science and Engineering for more information.

3968 Computer Science/Bachelor of Arts
Bachelor of Science Bachelor of Arts BSc BA

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The double degree of BSc (Computer Science) BA normally requires an additional stage of study, and enables students to complete the requirements of the BSc (Computer Science) and a school, department, or program of the Faculty of Arts and Social Sciences.

For admission to the program, students must satisfy the entry requirements for both the BSc (Computer Science) and the Faculty of Arts and Social Sciences. Students in this program must complete 192 units of credit of study. Students are required to undertake courses totalling 84 units of credit from the Science component and also 84 units of credit from the Arts component of which 42 units of credit would be from an approved major sequence (refer to Lists A and B in the rules for program 3400 Bachelor of Arts, in the Faculty of Arts and Social Science section of this Handbook). The remaining 24 units of credit may be taken from either area.

Students should enrol in at least 24 Level 1 units of credit and no more than 36 Level 1 within the Arts component of the program. Of these, no more than 12 units of credit can be taken in any one school or department.

The award of Honours in either the Arts or Social Sciences or the Computer Science component requires at least a further year of study, and the Honours year is subject to the admission requirements of the corresponding Arts and Social Sciences program or the Honours program in Computer Science. The School of Computer Science and Engineering administers this degree.

The specific requirements for the BSc Computer Science are described in the Engineering section of the Handbook, under program code 3978 BSc Computer Science.

Program Structure
Plan COMPA13968

Year 1
MATH1081  Discrete Mathematics  (6 UOC)
And ONE of the following courses:
COMP1011  Computing 1A  (6 UOC)
COMP1711  Higher Computing 1A  (6 UOC)
And ONE of the following courses:
COMP1021  Computing 1B  (6 UOC)
COMP1721  Higher Computing 1B  (6 UOC)
And ONE of the following courses:
MATH1131  Mathematics 1A  (6 UOC)
MATH1141  Higher Mathematics 1A  (6 UOC)

Year 2
COMP2121  Microprocessors and Interfacing  (6 UOC)
COMP2041  Software Construction: Techniques and Tools  (6 UOC)
COMP2920  Professional Issues and Ethics  (3 UOC)
And ONE of the following courses:
MATH1231  Mathematics 1B  (6 UOC)
MATH1241  Higher Mathematics 1B  (6 UOC)

Year 3
COMP3111  Software Engineering  (6 UOC)
And ONE of the following courses:
COMP2041  Software Construction: Techniques and Tools  (6 UOC)

3982 Computer Science/Bachelor of Digital Media
Bachelor of Science Bachelor of Digital Media BSc BDM

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The double degree of BSc (Computer Science) BDM combined program provides both a technical and creative foundation to the development and use of computer graphics. It also allows specialisation in the final semester in either the technical or creative strand of computer graphics and associated fields.

Program Structure
Plan COMPA13982
Plan DIGMA13982

Year 1
Sample Program:
SOMA1600  Language of Digital Media  (6 UOC)
SOMA1604  Introduction to Digital Media  (6 UOC)
SOMA1608  Digital Composite 1  (6 UOC)
SOMA2602  Sound Media 1  (6 UOC)
MATH1081  Discrete Mathematics  (6 UOC)
And ONE of the following courses:
COMP1011  Computing 1A  (6 UOC)
COMP1711  Higher Computing 1A  (6 UOC)
And ONE of the following courses:
COMP1021  Computing 1B  (6 UOC)
COMP1721  Higher Computing 1B  (6 UOC)
And ONE of the following courses:
MATH1131  Mathematics 1A  (6 UOC)
MATH1141  Higher Mathematics 1A  (6 UOC)

Year 2
COMP2041  Software Construction: Techniques and Tools  (6 UOC)
MATH2400  Finite Mathematics  (3 UOC)
MATH2859  Probability, Statistics & Information  (3 UOC)
SOMA1603  Digital Video 1  (6 UOC)
SOMA2607  Multimedia 1  (6 UOC)
SOMA2609  3D Graphics & Modelling 1  (6 UOC)
And ONE of the following courses:
COMP2041  Software Construction: Techniques and Tools  (6 UOC)
COMP2711  Higher Data Organisation  (6 UOC)
Students undertake the first three years (6 semesters) of the BE program in Computer Engineering. Subject to satisfying 75% over Years 2 and 3 (see Rules for Progression and the Award of Degrees), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) they undertake a 12 units of credit of project/thesis work over the summer (9th) semester; and (c) they undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

3647 Biinformatics/Master of Engineering Science – Plan BINFL13647

Bachelor of Engineering Master of Engineering Science Science – Plan BINFL13647

Students may undertake 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering Science in Computer Engineering. Students undertake the first three years (6 semesters) of the BE program in Computer Engineering. Subject to satisfying 75% over Years 2 and 3 (see Rules for Progression and the Award of Degrees), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) they undertake a 12 units of credit of project/thesis work over the summer (9th) semester; and (c) they undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

3648 Software Engineering/Master of Engineering Science – Plan SENGL13648

Bachelor of Engineering Master of Engineering Science Science – Plan SENGL13648

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the award of a Bachelor of Engineering and a Master of Engineering Science in Software Engineering. Students undertake the first three years (6 semesters) of the BE program in Software Engineering. Subject to satisfying 75% over years 2 and 3 (see ‘Rules for Progression and the Award of Degrees’), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) they undertake a 12 units of credit of project/thesis work over the summer (9th) semester; and (c) they undertake 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

School of Electrical Engineering and Telecommunications

Head of School: Professor BG Celler

Director of Academic Studies: Associate Professor E Ambikairajah

Administrative Officers: Ms. G. Fong

The School comprises several discipline areas indicating shared research interests and teaching commitments: Telecommunications; Signal Processing; Energy Systems; Microelectronics; Photonics; Systems and Control. Electrical Engineering and Telecommunications has close links with the pure sciences and mathematics. Its technology is changing rapidly and the School’s teaching and research programs are constantly being updated to meet the challenges of present and future needs.

The School offers undergraduate and graduate training in all branches of the professions of electrical engineering and telecommunications. Our degree programs are accredited by the Institution of Engineers, Australia, as meeting the requirements for admission to graduate membership. The School is also associated with the Australian Photonics Co-operative Research Centre which conducts research into optical fibre communication devices and technology.

A very vibrant Co-op program is offered for Electrical Engineering and Telecommunications students. Co-operative scholarships are funded by Australia’s premier industries.

The undergraduate curricula are progressively revised to provide flexible training to suit the future needs of students. Individual student needs can be further met by substitution provisions within the programs.

Combined Degree Programs

Combined degree programs lead to the award of the Bachelor of Engineering in either Electrical Engineering or Telecommunications, combined with a Bachelor degree in Arts or Science (usually Computer Science, Mathematics or Physics). There is a fast-track degree available which leads to the awards of Bachelor of Engineering in either Electrical Engineering or Telecommunications and Master of Engineering Science. With the Graduate School of Biomedical Engineering, there is also available a concurrent degree program leading to the award of Bachelor of Engineering/Master of Biomedical Engineering. Students who are in combined degree programs must maintain a Credit average performance (i.e. 65% weighted average mark) in order to stay in the program.

Guidelines for Substitution of Courses

To suit the special abilities or needs of individual students, a limited number of course substitutions is permitted within each program. Any such substitution must have prior approval of the Head of School.

1. The substituted course is of at least the same length and level as the prescribed course.

2. Core courses are normally substituted with courses covering similar material.
3. Students may substitute for two of the Professional Electives, courses of suitable level and difficulty from areas relevant to the profession of Electrical Engineering. One of these substitutions may be a Year 3 elective from within the School. Substitution of one postgraduate course within the School is permitted, provided that the student has passed Year 3 Electrical Engineering and Telecommunications courses at an adequate level and a similar course is not offered at the undergraduate level.

4. Substitution is not permitted if it unduly restricts the range of courses studied to only one area of electrical engineering or computer systems.

5. Substitution is normally not permitted in Year 1 or Year 2.

Guide to Industrial Training Requirement

Each student is personally responsible for ensuring the completion of the full 60 days compulsory industrial training prescribed as part of the requirements for the award of the degree. Industrial training should be concurrent with enrolment and is best accumulated in the summer recesses at the end of Years 2 and 3, but must be completed by the end of Year 4.

Students should be involved in general work with professional engineers and take an active part in their work in the design of simple equipment, solving of engineering problems, or any other work which is relevant to the profession of engineering.

At the end of each period of employment every student must submit a report, typically 2000-3000 words, summarising the work done; the training received and including a description of the organisation of the company.

Industrial training will be assessed as a compulsory part of the course ELEC4011 Ethics and Electrical Engineering Practice. Students must complete the industrial training requirement in order to receive a completed assessment for this course.

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

3640 Electrical Engineering
Bachelor of Engineering BE

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description

The School offers undergraduate and graduate training in all branches of the professions of electrical engineering and telecommunications. The Degree programs are accredited by The Institution of Engineers, Australia as meeting the requirements for admission to graduate membership. The School is also associated with the Australian Photonics Co-operative Research Centre which conducts research into Optical Fibre communication devices and technology.

A very vibrant Co-op program is offered for Electrical Engineering and Telecommunications students. Co-operative scholarships are funded by Australia’s premier industries.

Options within Electrical Engineering include: Telecommunications, Photonics, Systems & Control, Energy Systems, Microelectronics, Signal Processing.

The undergraduate curricula are being progressively revised to provide flexible training to suit the future needs of students. Individual student needs can be further met by substitution provisions within the programs.

Program Structure

Year 1

Session One

ELEC1010 Introduction to Electrical Engineering (3 UOC)
ELLC1011 Electrical Engineering 1 (6 UOC)
MATH1090 Discrete Mathematics for Electrical Engineers (3 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
PHYS1131 Higher Physics 1A (6 UOC)

Session Two

COMP1091 Solving Problems with Software (6 UOC)
ELEC1041 Digital Circuits (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)
PHYS1231 Higher Physics 1B (6 UOC)

Note: MATH1141 and MATH1241 may be taken at the ordinary level (MATH1131 and MATH1231).

Year 2

Session One

COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
MATH2131 Higher Several Variable Calculus (6 UOC)
PHYS2939 Physics 2 (Electrical Engineering) (3 UOC)

Session Two

ELEC2015 Electromagnetic Applications (3 UOC)
ELLC2032 Electronics and Systems (3 UOC)
ELEC2042 Real Time Instrumentation (3 UOC)
MATH2509 Linear Algebra for Engineers (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)

And TWO General Education courses in Session 1 and TWO General Education courses in Session 2.

Note: MATH2620 and MATH2111 may be taken at the ordinary level (MATH2520 and MATH2101).

Year 3

Session One

ELEC2041 Microprocessors & Interfacing (6 UOC)
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3005 Electric Energy 1 (6 UOC)
ELEC3006 Electronics A (6 UOC)

Session Two

ELEC3014 Systems and Control 1 (6 UOC)
ELEC3017 Electrical Engineering Design (6 UOC)

TWO Electives from the following:

COMP2011 Data Organisation (6 UOC)
ELLC3013 Electric Energy 2 (6 UOC)
ELEC3016 Electronics B (6 UOC)
ELLC3041 Real Time Engineering (6 UOC)
TELE3013 Telecommunication Systems 1 (6 UOC)
TELE3018 Data Networks 1 (6 UOC)

Students who intend to major in particular disciplines should note that certain Year 3 elective courses may be prerequisites for the Professional Electives they choose in Year 4. COMP2011 may be taken at the higher level (COMP2711).

Year 4

Session One

ELEC4010 Project Management for Professional Services (3 UOC)
ELEC4910 Thesis Part A (3 UOC)

And THREE Professional Electives

Session Two

ELEC4011 Ethics & Elec. Eng. Practice (3 UOC)
ELLC4911 Thesis Part B (9 UOC)

And TWO Professional Electives

Note: The Thesis may only be taken by students with an Honours-level weighted average at the end of Year 3. Other students enrol in the Group Thesis (ELEC4914 and ELEC4915).

Students who intend to major in particular disciplines should note that certain Year 3 elective courses may be prerequisites for the Professional Electives they choose in Year 4.

COMP2031 may be taken at the higher level (COMP2711).

Professional Electives

Microelectronics

ELEC4503 Electronics C (6 UOC)
ELEC4522 Microelectronics Design and Technology (6 UOC)
ELEC4532 Integrated Digital Systems (6 UOC)

Systems and Control

ELEC4412 Control of Continuous-time Systems (6 UOC)
ELEC4413 Control of Discrete-time Systems (6 UOC)
Energy Systems
ELEC4205 Electrical Energy Systems (6 UOC)
ELEC4216 Electrical Drive Systems (6 UOC)
ELEC4240 Power Electronics (6 UOC)
SOLA3540 Applied Photovoltaics (6 UOC)

Signal Processing
ELEC4042 Signal Processing 2 (6 UOC)
ELEC4483 Biomedical Instrumentation, Measurement and Design (6 UOC)

Telecommunications
IELE4313 Optical Communications (6 UOC)
IELE4323 Digital Modulation and Coding (6 UOC)
IELE4333 Wireless Data Communication Systems (6 UOC)
IELE4343 Source Coding and Compression (6 UOC)
IELE4352 Data Networks 2 (6 UOC)
IELE4353 Mobile and Satellite Communication Systems (6 UOC)
IELE4354 Network Management (6 UOC)
IELE4363 Telecommunications Systems 2 (6 UOC)

Computer Systems
COMP3111 Software Engineering (6 UOC)
COMP3211 Computer Architecture (6 UOC)
COMP3231 Operating Systems (6 UOC)
COMP3311 Database Systems (6 UOC)
COMP4111 Artificial Intelligence (6 UOC)
MAHI4111 Information, Codes and Ciphers (6 UOC)

Business Administration
ELEC4444 New Business Creation (6 UOC)

Professional Elective courses in Computer Systems area require either COMP2011 or COMP2021 as a prerequisite.

Because of timetabled clashes, not all combinations of courses are possible.

The program selected by each student must be approved by the Head of School. Not all electives are offered each session, nor is the full range available to part-time students. Students are advised each year of the timetable of available electives.

General Education
Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate's performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules
For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Training
Each student is personally responsible for ensuring the completion of the full 60 days compulsory industrial training prescribed as part of the requirements for the award of the degree. Industrial Training should be concurrent with enrolment and is best accumulated in the summer recesses at the end of Years 2 and 3, but must be completed by the end of Year 4.

Students should in general work with professional engineers and take an active part in their work in the design of simple equipment, solving of engineering problems, or any other work which is relevant to the profession of Engineering.

At the end of each period of employment every student must submit a report, typically 2000-3000 words, summarising the work done, the training received and including a description of the organisation of the company.

Industrial Training will be assessed as a compulsory part of the course ELEC4011 Ethics and Electrical Engineering Practice. Students must complete the industrial training requirement in order to receive a completed assessment for this course.

Part-time Programs
After completing Year 1 full-time, it is possible for students to progress with a program which has a part-time load (less than 18 units of credit in any session). Very few undergraduate courses are offered in the evenings and students need to be able to attend classes as the timetable demands. Formal part-time programs, that provide courses at times suited to part-time students, are not offered.

Further Information
Guidelines for Substitution of Courses
To suit the special abilities or needs of individual students a limited number of course substitutions is permitted within each program. Any such substitution must have prior approval of the Head of School.

1. The substituted course is of at least the same length and level as the prescribed course.
2. Core courses are normally substituted with courses covering similar material.
3. Students may substitute for two of the Professional Electives, courses of suitable level and difficulty from areas relevant to the profession of Electrical Engineering. One of these substitutions may be a Year 3 elective from within the School. Substitution of one postgraduate course within the School is permitted, provided that the student has passed Year 3 Electrical Engineering and Telecommunications courses at an adequate level and a similar course is not offered at the undergraduate level.
4. Substitution is not permitted if it unduly restricts the range of courses studied to only one area of electrical engineering or computer systems.
5. Substitution is normally not permitted in Year 1 or Year 2.

Computing Requirements
Information regarding recommended computing equipment for the courses offered by the School is available from the School Office or the School's computer resources website.

3643 Telecommunications

The undergraduate curricula are being progressively revised to provide flexible training to suit the future needs of students. Individual student needs can be further met by substitution provisions within the programs.
## Program Structure

### Year 1

**Session One**
- ELEC1011 Electrical Engineering 1 (6 UOC)
- MATH1090 Discrete Mathematics for Electrical Engineers (3 UOC)
- MAH1141 Higher Mathematics 1A (6 UOC)
- PHYS1131 Higher Physics 1A (6 UOC)
- TELE1010 Introduction to Telecommunications (3 UOC)

**Session Two**
- COMP1091 Solving Problems with Software (6 UOC)
- ELEC1041 Digital Circuits (6 UOC)
- MATH1241 Higher Mathematics 1B (6 UOC)
- PHYS1231 Higher Physics 1B (6 UOC)

*Note: MATH1141 and MATH1241 may be taken at the ordinary level (MATH1131 and MATH1231).*

### Year 2

**Session One**
- COMP2091 Computing 2 (6 UOC)
- ELEC2031 Circuits and Systems (3 UOC)
- ELEC2041 Microprocessors & Interfacing (6 UOC)
- MATH2111 Higher Several Variable Calculus (6 UOC)
- MATH2829 Probability, Statistics and Information (3 UOC)

**Session Two**
- ELEC2032 Electronics and Systems (3 UOC)
- ELEC2042 Real Time Instrumentation (3 UOC)
- MAH2209 Linear Algebra for Engineers (3 UOC)
- MATH2620 Higher Complex Analysis (6 UOC)
- TELE3018 Data Networks 1 (6 UOC)

Two General Education courses (3 UOC)

*Note: MATH2620 and MATH2111 may be taken at the ordinary level (MATH2520 and MATH2011).*

### Year 3

**Session One**
- ELEC3006 Electronics A (6 UOC)
- PHYS2939 Physics 2 (Electrical Engineering) (6 UOC)
- ITEL3013 Telecommunication Systems 1 (6 UOC)
- TELE4352 Data Networks 2 (6 UOC)

One General Education course (3 UOC)

**Session Two**
- ITEL3004 Signal Processing and Transform Methods (6 UOC)
- ELEC3017 Electrical Engineering Design (6 UOC)
- TELE3015 High Freq Electromagnetics (3 UOC)

One General Education course (3 UOC)

One Elective from the following:
- COMP2011 Data Organisation (6 UOC)
- ELEC3014 Systems and Control 1 (6 UOC)
- ELEC3016 Electronics B (6 UOC)
- ELEC3041 Real Time Engineering (6 UOC)

*Notes: Students who intend to major in particular disciplines should note that certain Year 3 elective courses may be prerequisites for the Professional Electives they choose in Year 4.*

COMP2011 may be taken at the higher level (COMP2711)

### Year 4

**Session One**
- ELEC4010 Project Management for Professional Services (3 UOC)
- ITEL4354 Network Management (6 UOC)
- TELE4363 Telecommunications Systems 2 (6 UOC)
- TELE4910 Thesis Part A (3 UOC)

ONE Professional Elective (6 UOC)

**Session Two**
- ELEC4011 Ethics and Electrical Engineering Practice (3 UOC)
- ITEL4911 Thesis Part B (9 UOC)

TWO Professional Electives (12 UOC)

*Note: The Thesis is taken by students with an Honours-level weighted average at the end of Year 3. Other students enrol in the Group Thesis (TELE4914 and TELE4915).*

### Professional Electives

**Microelectronics**
- ELEC4503 Electronics C (6 UOC)
- ELEC4522 Microelectronics Design and Technology (6 UOC)
- ELEC4532 Integrated Digital Systems (6 UOC)

### Systems & Control
- ELEC4412 Control of Continuous-time Systems (6 UOC)
- ELEC4413 Control of Discrete-time Systems (6 UOC)

### Signal Processing
- ELEC4042 Signal Processing 2 (6 UOC)
- ELEC4483 Biomedical Instrumentation, Measurement and Design (6 UOC)

### Telecommunications
- ITEL4313 Optical Communications (6 UOC)
- ITEL4323 Digital Modulation and Coding (6 UOC)
- ITEL4333 Wireless Data Communication Systems (6 UOC)
- ITEL4352 Data Networks 2 (6 UOC)
- ITEL4343 Source Coding and Compression (6 UOC)
- ITEL4353 Mobile and Satellite Communication Systems (6 UOC)
- ITEL4354 Network Management (6 UOC)
- ITEL4363 Telecommunications Systems 2 (6 UOC)

*Note: ITEL4363, ITEL4352 and ITEL4354 are Core courses for BE in Telecommunications students.*

### Computer Systems
- COMP3111 Software Engineering (6 UOC)
- COMP3211 Computer Architecture (6 UOC)
- COMP3231 Operating Systems (6 UOC)
- COMP3311 Database Systems (6 UOC)
- COMP3411 Artificial Intelligence (6 UOC)
- MAH3411 Information, Codes and Ciphers (6 UOC)

### Business Administration
- ELEC4444 New Business Creation (6 UOC)

Professional Elective courses in the Computer Systems area require either COMP2011 or COMP2021 as a prerequisite.

Because of timetabling clashes, not all combinations of courses are possible. The program selected by each student must be approved by the Head of School. Not all electives are offered each session, nor is the full range available to part-time students. Students are advised each year of the timetable of available electives.

### General Education

Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

### Honours

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate School concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

### Academic Rules

3644 Photonic Engineering
Bachelor of Engineering BE
Typical Duration
4 years
Minimum UOC for Award
192 units of credit
Typical UOC per Session
24 units of credit

Program Description
The School offers undergraduate and graduate training in all branches of the professions of electrical engineering and telecommunications. The Degree programs are accredited by The Institution of Engineers, Australia as meeting the requirements for admission to graduate membership. The School is also associated with the Australian Photonics Co-operative Research Centre which conducts research into Optical Fibre communication devices and technology.

A very vibrant Co-op program is offered for Electrical Engineering and Telecommunications students. Co-operative scholarships are funded by Australia’s premier industries.

Options within Electrical Engineering include: Telecommunications, Photonics, Systems & Control, Energy Systems, Microelectronics, Signal Processing.

The undergraduate curricula are being progressively revised to provide flexible training to suit the future needs of students. Individual student needs can be further met by substitution provisions within the programs.

Program Structure
Year 1
Session One
ELEC1011 Electrical Engineering I (6 UOC)
MATH1190 Discrete Mathematics for Electrical Engineers (3 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
PHTN1010 Introduction to Photonics (3 UOC)
PHYS1131 Higher Physics 1A (6 UOC)

Session Two
COMP1091 Solving Problems with Software (6 UOC)
ELEC1041 Digital Circuits (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)
PHYS1231 Higher Physics 1B (6 UOC)

Note: MATH1131 and MATH1241 may be taken at the ordinary level (MATH1131 and MATH1231)

Year 2
Session One
COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
MATH2111 Higher Several Variable Calculus (6 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)
PHYS2050 Laser and Spectroscopy Lab (3 UOC)
PHYS2040 Quantum Physics (3 UOC)

Session Two
ELEC2032 Electronics and Systems (3 UOC)
ELEC2042 Real Time Instrumentation (3 UOC)
MATH2121 Higher Mathematical Methods for Differential Equations (3 UOC)
MATH2830 Linear Algebra for Engineers (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
PHYS2005 Electromagnetism (3 UOC)
PHYS2010 General Education (6 UOC)

Note: MATH2111, MATH2620 and MATH2121 may be taken at the ordinary level (MATH2101, MATH2520 and MATH2120)

Year 3
Session One
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3006 Electronics A (6 UOC)
PHYS3030 Electromagnetism (Advanced) (3 UOC)
PHYS3570 Laser and Spectroscopy Lab (3 UOC)
One 6UOC General Education Courses needs to be taken in Year 3 Session 1.

Session Two
ELEC3017 Electrical Engineering Design (6 UOC)
PHYS3060 Advanced Optics (3 UOC)
PHYS3310 Physics of Solid State Devices (3 UOC)
ELEC3013 Telecommunication Systems 1 (6 UOC)
6 UOC electives from the following courses:
COMP2011 Data Organisation (6 UOC)
ELEC2041 Microprocessors & Interfacing (6 UOC)
ELEC3014 Systems and Control 1 (6 UOC)
PHYS3010 Quantum Mechanics (Advanced) (3 UOC)
PHYS3080 Solid State Physics (3 UOC)
TELE3018 Data Networks 1 (6 UOC)

Notes: The elective courses ELEC2041, PHYS3010 and PHYS3080 are scheduled in Session 1 only. In this case the General Education elective can be moved to Session 2.

PHYS3030 may be taken at the ordinary level (PHYS3230).

Year 4
Session One
ELEC4010 Project Management for Professional Services (3 UOC)
ELEC4011 Ethics and Electrical Engineering Practice (3 UOC)
PHYS4979 Photonic Devices (6 UOC)
PHYS4980 Solid State Physics (6 UOC)
TELE4313 Optical Communications (6 UOC)
One Professional Elective (6 UOC)

Session Two
ELEC4011 Ethics and Electrical Engineering Practice (3 UOC)
ELEC4911 Thesis Part B (9 UOC)
Two Professional Electives (12UOC)

Notes: The Thesis may only be taken by students with an Honours level weighted average at the end of Year 3. Other students should enrol in the Group Thesis (ELEC4914 and ELEC4915).

Students who intend to major in particular disciplines should note that certain Year 3 elective courses may be prerequisites for the Professional Electives they choose in Year 4.
Further Information

Guidelines for Substitution of Courses
To suit the special abilities or needs of individual students a limited number of course substitutions is permitted within each program. Any such substitution must have prior approval of the Head of School.

1. The substituted course is of at least the same length and level as the prescribed course.
2. Core courses are normally substituted with courses covering similar material.
3. Students may substitute for two of the Professional Electives, courses of suitable level and difficulty from areas relevant to the profession of Electrical Engineering. One of these substitutions may be a Year 3 elective from within the School. Substitution of one postgraduate course within the School is permitted, provided that the student has passed Year 3 Electrical Engineering and Telecommunications courses at an adequate level and a similar course is not offered at the undergraduate level.
4. Substitution is not permitted if it unduly restricts the range of courses studied to only one area of electrical engineering or computer systems.
5. Substitution if normally not permitted in Year 1 and Year 2.

Computer Requirements
Information regarding recommended computing equipment for the courses offered by the School is available from the School Office or the School’s computer resource website.

3725 Electrical Engineering/Bachelor of Science
Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
Combined degree programs lead to the award of the Bachelor of Engineering in either Electrical Engineering or Telecommunications, combined with a Bachelor degree in Arts or Science (usually Computer Science, Mathematics or Physics). Students who are in the combined degrees program must maintain a credit average performance (i.e. 65% weighted average mark) in order to stay in the program. These programs qualify candidates for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged.

Program Structure
Year 1
As for Program 3640

Year 2
Session One
COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
ELEC2041 Microprocessors & Interfacing (6 UOC)
MATH2111 Higher Several Variable Calculus (6 UOC)
PHYS2939 Physics 2 (Electrical Engineering) (3 UOC)

Session Two
Science Elective/Core
ELEC2015 Electromagnetic Applications (3 UOC)
ELEC2032 Electronics and Systems (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)

Notes: The Core/Elective course will be PHYS2999 for Science with a Physics major, COMP2011 or COMP2711 & COMP2041 for Computer Science, and is a free elective for either Science with a Mathematics major.

For a Science Major other than Computer Science, COMP1021 can be moved to Session 2 to enable a Session 1 elective to be taken.

MATH2620 and MATH2111 may be taken at the ordinary level (MATH2520 and MATH2011).
Further Information

Guidelines for Substitution of Courses
For ‘Guidelines for Substitution of Courses’, please refer to the program entry for 3640 Electrical Engineering.

3720 Electrical Engineering/Bachelor of Arts

Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

Combined degree programs lead to the award of the Bachelor of Engineering in either Electrical Engineering or Telecommunications, combined with a Bachelor degree in Arts or Science (usually Computer Science, Mathematics or Physics). Students who are in the combined degrees program must maintain a credit average performance (i.e. 65% weighted average mark) in order to stay in the program.

These programs qualify candidates for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged.

All combined degree programs are administered by the School of Electrical Engineering and Telecommunications.

Program Structure

Year 1
As for Program 3640

Year 2
Session One
COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
ELEC2041 Microprocessors & Interfacing (6 UOC)
MATH2111 Higher Several Variable Calculus (6 UOC)
PHYS2959 Physics 2 (Electrical Engineering) (3 UOC)

Session Two
Arts Elective/Core
Arts Elective
ELEC2015 Electromagnetic Applications (3 UOC)
ELEC2032 Electronics and Systems (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)

Note: COMP2091 can be moved to Session 2 to enable a Session 1 elective to be taken. MATH2620 and MATH2111 may be taken at the ordinary level (MATH2520 and MATH2111); COMP1091 and COMP2091 may be taken at the ordinary level (COMP1711 and COMP1721).

Year 3
Session One
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3005 Electric Energy 1 (6 UOC)
ELEC3006 Electronics A (6 UOC)
Year 2 Arts Elective

Session Two
ELEC2042 Real Time Instrumentation (3 UOC)
ELEC3014 Systems and Control 1 (6 UOC)
ELEC3017 Electrical Engineering Design (6 UOC)
MATH2509 Linear Algebra for Engineers (3 UOC)
One ELEC Elective (Year 3)

Year 4
Session One
Four Year 3 Arts Electives

Session Two
One Year 3 Arts Elective
One ELEC Elective (Year 3)
Two Electives [Art, ELEC (Year 3)]
Note: ELEC (Year 3) electives are chosen from the Year 3 Elective list for 3640. It will be possible to delay/advance elective by 1 or more session to enable as flexible a choice as possible, providing the structure of the program (i.e. units of credit in each session) is maintained, and that ultimately all required core and elective courses are taken.

Year 5
As for Year 4 of Program 3640

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate's performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules
1. Students must complete 60 units of credit in the BA program with no more than 24 units of credit obtained at Level 1 (i.e. subjects designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school of department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - Environmental Studies*
   - European Studies
   - Film
   - French
   - German Studies
   - Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology & Anthropology
   - Spanish & Latin American Studies
   - Theatre & Performance Studies
   - Women's and Gender Studies

   *Students completing an Environmental Studies major sequence must complete, in addition to the 30 upper level units of credit specified, 6 level 1 units of credit in an approved course. Students must also complete a minor sequence of 24 units of credit on one of the other areas listed above.

3. Except for courses completed as part of the Environmental Studies major sequences, no more than 12 units of credit may be obtained from subjects in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No subject included for credit in the BE programs can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of the program 3640 BE in Electrical Engineering except that they are exempt from the General Education requirement of the BE BSc program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE BA program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of an Honours year. It should be noted that entry into a particular BA Honours program will require completion of courses additional to those specified under rules 1-4.

8. The total units of credit in the combined program is 5 x 48 = 240. For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ in this Handbook.

Industrial Training
Each student is personally responsible for ensuring the completion of the full 60 days compulsory industrial training prescribed as part of the requirements for the award of the degree. Industrial training should be concurrent with enrolment and is best accumulated in the summer recesses at the end of Years 2 and 3, but must be completed by the end of Year 4.

Students should be involved in general work with professional engineers and take an active part in their work in the design of simple equipment, solving of engineering problems, or any other work which is relevant to the profession of engineering.

At the end of each period of employment every student must submit a report, typically 2000-3000 words, summarising the work done, the training received and including a description of the organisation of the company.

Industrial training will be assessed as a compulsory part of the course ELEC4011 Ethics and Electrical Engineering Practice. Students must complete the industrial training requirement in order to receive a completed assessment for this course.

Further Information
Computing Requirements
Information regarding recommended computing equipment for the courses offered by the School is available from the School Office or the School’s computer resources website.

Guidelines for Substitution of Courses
For ‘Guidelines for Substitution of Courses’, please refer to the program entry for 3640 Electrical Engineering.

3715 Electrical Engineering/Bachelor of Commerce
BE BCom
Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook. Information about the program structure can be found in the Online Handbook program entry for 3715 BE BCom under the area of specialisation Electrical Engineering.

3727 Electrical Engineering/Master of Biomedical Engineering
Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE
Typical Duration
3 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
A Bachelor of Engineering degree in Electrical Engineering and a Master of Biomedical Engineering degree (BE MBiomedE) can both be completed in five years of concurrent study. Students must maintain a 65% Credit average to retain their enrolment in MBiomedE.
Program Structure

Year 1

Session One
BIOM1101 Professional Biomedical Studies (3 UOC)
ELEC1011 Electrical Engineering 1 (6 UOC)
MAIH1990 Discrete Mathematics for Electrical Engineers (3 UOC)
PHYS1131 Higher Physics 1A (6 UOC)
and ONE of the following courses:
MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)

Session Two
BIOM2010 Biomedical Engineering Practice (3 UOC)
CHEM1817 Chemistry 1ME (3 UOC)
COMP1991 Solving Problems with Software (6 UOC)
PHYS1231 Higher Physics 1B (6 UOC)
and ONE of the following courses:
MATH2131 Mathematics 1B (6 UOC)
MATH2141 Higher Mathematics 1B (6 UOC)

Year 2

Session One
BIOM9420 Clinical Laboratory Science (6 UOC)
COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
MAIH2011 Several Variable Calculus (6 UOC)
PHYS2939 Physics 2 (Electrical Engineering) (3 UOC)

Session Two
ELEC1041 Digital Circuits (6 UOC)
ELEC2015 Electromagnetic Applications (3 UOC)
ELEC2032 Electronics and Systems (3 UOC)
MATH2509 Linear Algebra for Engineers (3 UOC)
MATH2659 Probability, Statistics and Information (3 UOC)
and ONE of the following courses:
MATH2520 Complex Analysis (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
General Education (3 UOC)

Year 3

Session One
ELEC2041 Microprocessors & Interfacing (6 UOC)
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3006 Electronics A (6 UOC)
ELEC4010 Project Management for Professional Services (3 UOC)
General Education (3 UOC)

Session Two
ELEC2042 Real Time Instrumentation (3 UOC)
ELEC3014 Systems and Control 1 (6 UOC)
ELEC3017 Electrical Engineering Design (6 UOC)
ELEC4011 Ethics and Electrical Engineering Practice (3 UOC)
Plus one Biomedical Engineering Elective (6 UOC)

Year 4

Session One
BIOM9430 Electromedical Standards (6 UOC)
ELEC3005 Electric Energy 1 (6 UOC)
PHYS2101 Physiology 1A (6 UOC)
Plus one Biomedical Engineering Elective (6 UOC)

Session Two
BIOM5910 Thesis Part A (6 UOC)
ELEC4483 Biomedical Instrumentation, Measurement and Design (6 UOC)
PHYS2201 Physiology 1B (6 UOC)
Plus one Electrical Engineering Elective from Stage 3 List (6 UOC)

Year 5

Session One
BIOM5911 Thesis Part B (6 UOC)
Two Biomedical Engineering Electives (12 UOC)
One Electrical Engineering Professional Elective (6 UOC)

Session Two
BIOM9410 Regulatory Req of Biomed Tech (6 UOC)
BIOM9913 Project Report (12 UOC)
Plus one Electrical Engineering Elective from Stage 3 List (6 UOC)

Preferred Biomedical Engineering Electives

Session Two
BIOM9027 Medical Imaging (6 UOC)

Other Biomedical Engineering Electives

Session One
BIOM9060 Biomedical Systems Analysis (6 UOC)
BIOM9510 Introductory Biomechanics (6 UOC)
BIOM9701 Dynamics of the Cardiovascular System (6 UOC)
SESC9451 Experimental Biomechanics (6 UOC)

Session Two
ANAT2511 Fundamentals of Anatomy (6 UOC)
BIOM9321 Physiological Fluid Mechanics (6 UOC)
BIOM9432 Biocompatibility (6 UOC)
BIOM9440 Biomedical Practical Measures (6 UOC)
BIOM9450 Clinical Information Systems (6 UOC)
BIOM9541 Mechanics of the Human Body (6 UOC)
BIOM9551 Biomechanics of Physical Rehabilitation (6 UOC)
BIOM9561 Mechanical Properties of Biomaterials (6 UOC)

Electrical Engineering & Telecommunications Stage 3 Elective List

Electronics
ELEC3016 Electronics B (6 UOC)

Energy Systems
ELEC3015 Electric Energy 2 (6 UOC)

Control
ELEC3014 Systems and Control 1 (6 UOC)
ELEC3041 Real Time Engineering (6 UOC)

Telecommunications
TELE3013 Telecommunication Systems 1 (6 UOC)
TELE3018 Data Networks 1 (6 UOC)

Computer Systems
COMP2021 Digital System Structures (6 UOC)
COMP2711 Higher Data Organisation (6 UOC)

Electrical Engineering & Telecommunications Professional Electives

Electronics
ELEC4503 Electronics C (6 UOC)
ELEC4522 Microelectronics Design and Technology (6 UOC)
ELEC4532 Integrated Digital Systems (6 UOC)

Control
ELEC4412 Control of Continuous-time Systems (6 UOC)
ELEC4413 Control of Discrete-time Systems (6 UOC)

Energy Systems
ELEC4205 Electrical Energy Systems (6 UOC)
ELEC4216 Electrical Drive Systems (6 UOC)
ELEC4240 Power Electronics (6 UOC)
SOLA3540 Applied Photovoltaics (6 UOC)

Signal Processing
ELEC4042 Signal Processing 2 (6 UOC)
ELEC4483 Biomedical Instrumentation, Measurement and Design (6 UOC)

Business Administration
ELEC4444 New Business Creation (6 UOC)

Telecommunications
TELE4313 Optical Communications (6 UOC)
TELE4323 Digital Modulation and Coding (6 UOC)
TELE4333 Wireless Data Communication Systems (6 UOC)
TELE4343 Source Coding and Compression (6 UOC)
TELE4352 Data Networks 2 (6 UOC)
TELE4353 Mobile and Satellite Communication Systems (6 UOC)
TELE4354 Network Management (6 UOC)
TELE4363 Telecommunications Systems 2 (6 UOC)

Computer Systems
COMP3231 Operating Systems (6 UOC)
COMP3411 Artificial Intelligence (6 UOC)
COMP3111 Software Engineering (6 UOC)
COMP3211 Computer Architecture (6 UOC)
COMP3311 Database Systems (6 UOC)
MATH3411 Information, Codes and Ciphers (6 UOC)
General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.

Each Faculty has responsibility for deciding what courses are able to be counted towards the General Education requirement for their students. The Faculty of Engineering is committed to providing the widest range of choice of general education electives for its students. It strongly encourages students to make the best use of this flexibility. Please contact your School Office for further information on General Education electives available to you.

For further information, please refer to the General Education section in this Handbook.

Academic Rules
For academic requirements relating to this program, please refer to Program Structure and contact the School of Electrical Engineering and Telecommunications for more information.

3641 Telecommunications/Bachelor of Science
Bachelor of Engineering Bachelor of Science BE BSc
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
Combined degree programs lead to the award of the Bachelor of Engineering in either Electrical Engineering or Telecommunications, combined with a Bachelor degree in Arts or Science (usually Computer Science, Mathematics or Physics). Students who are in the combined degrees program must maintain a credit average performance (i.e. 65% weighted average mark) in order to stay in the program.

These programs qualify candidates for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged.

Program Structure
Year 1
As for Program 3643
Year 2
Session One
COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
ELEC2041 Microprocessors & Interfacing (6 UOC)
MATH2111 Higher Several Variable Calculus (6 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)

Session Two
ELEC2032 Electronics and Systems (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
TELE3018 Data Networks 1 (6 UOC)
Science Core/Elective (6 UOC)
Science Elective (6 UOC)

Notes: The Core/Elective subject will be PHYS2999 for Science with a Physics major, COMP2011 or COMP2711 and COMP2041 for Computer Science, and is a free elective for either Science with a Mathematics major. For a Science Major other than Computer Science, COMP1021 can be moved to Session 2 to enable a Session 1 elective to be taken. MATH2620 and MATH2111 may be taken at the ordinary level (MATH2520 and MATH2011).

Year 3
Session One
ELEC2042 Real Time Instrumentation (3 UOC)
ELEC3006 Electronics A (6 UOC)
PHYS2939 Physics 2 (Electrical Engineering) (3 UOC)
TELE3013 Telecommunication Systems 1 (6 UOC)
TELE4352 Data Networks 2 (6 UOC)

Session Two
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3017 Electrical Engineering Design (6 UOC)
MATH2509 Linear Algebra for Engineers (3 UOC)
HILE3013 High Freq Electromagnetics (3 UOC)
Science Elective (6 UOC)

Year 4
Session One
FOUR Year 3 Science Electives (24 UOC)

Session Two
ELEC3041 Real Time Engineering (6 UOC)
THREE Year 3/4 Science Electives (18 UOC)

Note: It will be possible to delay/advance electives by 1 or more sessions to enable as flexible a choice as possible, providing the structure of the program (i.e. units of credit in each session) is maintained, and that ultimately all required core and elective courses are taken.

Year 5
As for Year 4 of Program 3643.

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate's performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules
For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Training Requirements
Each student is personally responsible for ensuring the completion of the full 60 days compulsory industrial training prescribed as part of the requirements for the award of the degree. Industrial training should be concurrent with enrolment and is best accumulated in the summer recesses at the end of Years 2 and 3, but must be completed by the end of Year 4.

Students should be involved in general work with professional engineers and take an active part in their work in the design of simple equipment, solving of engineering problems, or any other work which is relevant to the profession of engineering.

At the end of each period of employment every student must submit a report, typically 2000-3000 words, summarising the work done, the training received and including a description of the organisation of the company.

Industrial training will be assessed as a compulsory part of the course ELEC4011 Ethics and Electrical Engineering Practice. Students must complete the industrial training requirement in order to receive a completed assessment for this course.

Further Information
Computing Requirements
Information regarding recommended computing equipment for the courses offered by the School is available from the School Office or the School’s computer resources website.

Guidelines for Substitution of Courses
For ‘Guidelines for Substitution of Courses’, please refer to the program entry for 3643 Telecommunications.
3646 Telecommunications/Bachelor of Arts

Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
Combined degree programs lead to the award of the Bachelor of Engineering in either Electrical Engineering or Telecommunications, combined with a Bachelor degree in Arts or Science (usually Computer Science, Mathematics or Physics). Students who are in the combined degrees program must maintain a Credit average performance (i.e. 65% weighted average mark) in order to stay in the program.

These programs qualify candidates for the award of two degrees in five years of combined full-time study in which the requirements of the degrees have been merged.

All combined degree programs are administered by the School of Electrical Engineering and Telecommunications.

Program Structure
Year 1
As for Program 3643

Year 2
Session One
COMP2091 Computing 2 (6 UOC)
ELEC2031 Circuits and Systems (3 UOC)
ELEC2041 Microprocessors & Interfacing (6 UOC)
MATH2111 Higher Several Variable Calculus (6 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)

Session Two
ELEC2032 Electronics and Systems (3 UOC)
MATH2620 Higher Complex Analysis (3 UOC)
TELE3018 Data Networks 1 (6 UOC)
Arts/Science Elective (6 UOC)
Arts Elective (6 UOC)

Note: The Elective/Core subject will be PHYS2999 for Science with a Physics major, COMP2011 or COMP2711 & COMP2041 for Computer Science, and a free elective for either Science with a Mathematics major or Arts.

For Arts, or a Science Major other than Computer Science, COMP1021 can be moved to Session 2 to enable a Session 1 elective to be taken. MATH2620 and MATH2111 may be taken at the ordinary level (MATH2520 and MATH2011).

Year 3
Session One
ELEC2042 Real Time Instrumentation (3 UOC)
ELEL3006 Electronics A (6 UOC)
PHYS2939 Physics 2 (Electrical Engineering) (3 UOC)
TELE3013 Telecommunication Systems 1 (6 UOC)
TELE4352 Data Networks 2 (6 UOC)

Session Two
ELEC3004 Signal Processing and Transform Methods (6 UOC)

Arts/Elective (6 UOC)

Year 4
Session One
FOUR Year 3 Arts Electives (24 UOC)

Session Two
ELEC3041 Real Time Engineering (6 UOC)
THREE Year 3/4 Arts Electives (18 UOC)

Note: It will be possible to delay/advance electives by 1 or more sessions to enable as flexible a choice as possible, providing the structure of the program (i.e. units of credit in each session) is maintained, and that ultimately all required core and elective courses are taken.

Year 5
As for Year 4 of Program 3643.

Academic Rules
For Arts, in addition to the BE course, students must complete 60 units of credit offered by the Arts faculty, comprising a major sequence within Arts.

General Education is not required for a combined degree program, with the exception of the BE MBiomedE program. A mathematics major is not normally permitted for the BA. The BE BSc combined degree is more appropriate for this.

There will be a testamur for each part of a combined degree program. Testamurs for the BE BA, the BE BSc and the BE MBiomedE are awarded at a single graduation ceremony.

3715 Telecommunications/Bachelor of Commerce

BE BCom

Academic Rules

For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

3715 Photonic Engineering/Bachelor of Commerce

BE BCom

Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook. Information about the program structure can be found in the Online Handbook program entry for 3715 BE BCom under the area of specialisation Photonic Engineering.

Fast Track Programs with Master of Engineering Science

3640 Electrical Engineering/Master of Engineering Science – Plan ELEC13640
Bachelor of Engineering Master of Engineering Science BE MEng Sc

3643 Telecommunications/Master of Engineering Science – Plan TELE13643
Bachelor of Engineering Master of Engineering Science BE MEng Sc

Students may undertake a 4.5 years (10 semesters) full-time fast-track program leading to the awards of a Bachelor of Engineering and a Master of Engineering Science in Electrical Engineering or Telecommunications. Students undertake the first three years (6 semesters) of the BE program in Electrical Engineering or Telecommunications. Subject to satisfying a minimum performance over these three years (see Rules for progression and the Award of Degrees), they (a) substitute 12 units of credit of the standard 4th year BE degree program with a School approved 12 units of credit of graduate coursework in their 4th year; (b) undertake a 12 units of credit of graduate coursework in the 4th year; (c) undertake a 24 units of credit of graduate coursework in the 10th semester (first half of their 5th year).

School of Mechanical and Manufacturing Engineering (incorporating Aerospace Engineering, Mechatronic Engineering and Naval Architecture)

Head of School: Professor H Kaebernick
Executive Assistant to Head of School: Associate Professor P Mathew
Administrative Officer: Mrs G Jance

The School offers a Bachelor of Engineering program with plans in Aerospace Engineering, Manufacturing Engineering and Management, Mechanical Engineering, Mechatronic Engineering and Naval Architecture. Also offered are combined degree programs with Science or Arts, and Bachelor/Master degree programs with Biomedical Engineering or Engineering Science.
No formal part-time programs are offered by the School. However, it is possible for students to undertake studies with a reduced load of courses. Students intending to take a reduced load are advised that very few undergraduate courses are offered in the evening.

Summary of Programs and Plans

The plans under program 3710, which lead to the award of the degree of Bachelor of Engineering (BE), are designed to provide the appropriate academic training for the professional engineer in the fields of Aerospace Engineering, Manufacturing Engineering and Management, Mechanical Engineering, Mechanatronic Engineering and Naval Architecture. The first two years of these plans are identical, whilst the third and fourth years of the plans contain a number of common courses. Elective courses provide for a limited degree of specialisation in the fourth year of the Mechanical Engineering and Mechanatronic Engineering plans. The Aerospace Engineering, Manufacturing Engineering and Management, and Naval Architecture plans do not have elective components. Each student is required to submit a thesis at the end of the final year and to present a seminar on the topic of the thesis.

The School also offers combined programs with Science (3711) or Arts (3712) leading to the award of the degrees of Bachelor of Engineering and Bachelor of Science (BE BSc) and Bachelor of Engineering and Bachelor of Arts (BE BA) respectively. These combined programs enable students to major in the areas of Computer Science, Materials Science, Mathematics, Physics, Statistics or another relevant field, in addition to studying their chosen Engineering plan.

The School, in addition, offers combined programs with Commerce (3715) under the faculty with the following areas of specialisations – Manufacturing Engineering and Management, Mechanical Engineering and Mechanatronic Engineering, leading to the award of the degrees of Bachelor of Engineering and Bachelor of Commerce. For rules for progression in this program, the student's attention is directed to the ‘Faculty Rules of Progression’ for program 3715 contained in this Handbook.

Bachelor/Masters programs are also available. After five years of study, Mechanical and Mechanatronic Engineering students may obtain a Bachelor of Engineering/Master of Biomedical Engineering (BE MBiomedE) degree. After four and a half years of study, Manufacturing Engineering and Management, Mechanical Engineering and Mechanatronic Engineering students may obtain a Bachelor of Engineering/Master of Engineering Science (BE MEngSc) degree.

Industrial Experience

Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete a total of 60 working days of industrial experience. A written report describing this experience is a requirement to passing the common, fourth year course MECH4001, Communications for Professional Engineers.

Recognition

The Institution of Engineers, Australia, recognises the degree of BE in any of the undergraduate programs offered by the School as meeting the examination requirements for admission to graduate and corporate membership. Substantial or complete recognition is accorded to the BE degree programs by overseas engineering institutions.

The award of the BE degree in Aerospace Engineering is recognised by the Royal Aeronautical Society as giving exemption from the formal examination requirements for corporate membership. Advancement from graduate membership to associate membership grade is awarded on a case by case basis after a further period of some years of professional experience.

The award of the BE degree in Naval Architecture is recognised by the Royal Institution of Naval Architects (RINA), London, as the academic qualification for corporate membership of that body.

Program Progression Guidelines

The student's attention is directed to the ‘Faculty Rules for Progression’ under ‘Rules for Progression and Award of Degrees’ in this Handbook. In addition, the following points should be noted:

- A student who is faced with compiling a timetable comprising courses from two academic years must give preference to courses from the lower year.

General Education

For students taking the Manufacturing Engineering and Management plan, the accounting courses GENC1001, GENC1002 or GENC1003 should not be chosen as they partially duplicate core course ACC79003.

Thesis Arrangements

- The course MECH4001 Communications for Professional Engineers must only be taken in conjunction with either MECH4003 Thesis A or MECH4004 Thesis B.

- MECH4003 and MECH4004 must be undertaken in two consecutive sessions which are the final two sessions of candidature.

- A student must not be enrolled in more than 24 units of credit in any session involving MECH4003 and MECH4004.

- A single thesis project is commenced in MECH4003 and completed in MECH4004. MECH4004 carries the mark for the thesis project.

- MECH4003 is graded satisfactory (SY) / failure (FN). If a student receives a failure (FN) in MECH4003, a student cannot proceed with MECH4004.

- If the project is abandoned during MECH4004, or if MECH4004 is failed, then the satisfactory (SY) for MECH4003 is changed to failure (FN). To complete the degree, a completely new topic must be chosen and the student must enrol again in both MECH4003 and MECH4004. (For BE MBiomedE students, read BIOMS5001 instead of MECH4003 and BIOM5002 instead of MECH4004)

Programs and Plans

UNSW terminology uses the concept of “plans” within “programs”. Most students are in one plan within a program. For example, a BE mechanical engineering student in program 3710 is in plan MECHA13710. The fifth character “A” indicates the “standard” plan. Other examples are:

- BE: Aerospace Engineering AEROA13710
- BE: Mechanical Engineering MTRNA13710

Combined degree BE BA and BE BSc students and BE MBiomedE students are in two plans simultaneously throughout their five years; one engineering and the other arts, science or biomedical engineering respectively. For example:

- BE Manufacturing Engineering/BA French major MANFA13712 and FREN13712
- BE Naval Architecture/BSc Physics major NAVLA13711 and PHYS13111
- BE Mechanical Engineering/MBiomedE MTRNA133688 and BIOMA13688

The BE degree is only completed after five years.

BE MEngSc students are in the standard single degree plan and program for the first three years. In fourth year they transfer to a special plan within the same program. For example:

- BE Mechatronic Engineering/MBiomedEng MTRNA13710 (Years 1–3), MTRNL13710 (Year 4).

The BE degree is completed after four years. In fifth year they transfer to the appropriate postgraduate program described in the Postgraduate Handbook.

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

3710 Bachelor of Engineering BE

Aerospace Engineering (plan AEROA13710)

Manufacturing Engineering and Management (plan MANFA13710)

Mechanical Engineering (plan MECHA13710)

Mechatronic Engineering (plan MTRNA13710)

Naval Architecture (plan NAVLA13710)

Typical Duration

4 years

Minimum UOC for Award

192 units of credit

Typical UOC per Session

24 units of credit

Program Description

The plans under program 3710, which lead to the award of the degree of Bachelor of Engineering (BE), are designed to provide the appropriate academic training for the professional engineer in the fields of Aerospace Engineering, Manufacturing Engineering and Management, Mechanical
### Programs and Plans

The University's New South Solutions computer software uses the concept of "planning" within its programs. Most students are in one plan within a program. For example, a BE mechanical engineering student in program 3710 is in plan MECHA13710. The fifth character "A" indicates the "standard" plan. Other examples are: BE Aerospace engineering AEROA13710; BE Manufacturing Engineering and Management MANFA13710; BE Mechatronic Engineering MTRNA1310; BE Naval Architecture NAVLA13710.

Double degree BE BA, BE BSc and BE BiomedE students are in two plans simultaneously throughout their five years; one engineering and the other arts, science or biomedical engineering respectively. For example BE Manufacturing Engineering/BA French major MANFA13712 and FREN13712 BE Mechatronic Engineering/BiomedE MTRNA13688 and BIOMA13688.

The Be degree is only completed after five years.

Double degree BE MEngSc students are in the standard degree plan and program for the first three years. In fourth year they transfer to a special plan within the same program. For example:

BE Mechatronic Engineering/MEngSc MTRNA13710 (years 1-3), MTRNL13170 (year 4).

The degree is completed after four years. In fifth year they transfer to the appropriate postgraduate program described in the Postgraduate Handbook.

### Aerospace Engineering (plan AEROA13710)

#### Years 3 and 4

The Aerospace Engineering plan covers the analysis, design and operation of aircraft and spacecraft. Graduates work mainly on the design and manufacture of flight vehicles, their operation with major or satellite airways and research for civil and military aerospace organisations. Owing to the international nature of the aerospace industry, the topics studied cover a similar area and, in general, to the same depth of understanding as professional training programs in aerospace in other industrial countries. The aerospace industry is one of Australia’s major exporters of high value added manufactured goods.

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four year degree program at any Australasian tertiary institution may be admitted to Years 3 and 4 of the plan leading to the Bachelor of Engineering degree in Aerospace Engineering. The proviso is that the Head of the School is satisfied that the courses studied at the other institution are equivalent and gives their recommendation.

### Manufacturing Engineering and Management (plan MANFA13710)

#### Years 3 and 4

The Manufacturing Engineering and Management plan is designed for students with engineering ability whose interests lie in the planning, development and control of manufacturing or service operations. In the Manufacturing Engineering and Management courses, the problems associated with the practical economics of manufacturing operations are stressed. The aim is to provide students with the education necessary to carry out an industrial job and to examine it critically in the light of economic efficiency.

Traditional engineering programs do not embrace the problems which are characteristic of Manufacturing Engineering and Management. These programs include the analysis of a product to ensure satisfactory functioning with respect to methods and sequence of manufacturing operations; the disposition of buildings and of equipment within them to permit efficient handling of materials; the avoidance of bottle necks; the related problems of quality and cost control, testing and inspection;
labour and personnel relations; and, finally, the problem of distribution and sales.

The financial and economic aspects are studied as the problem in manufacturing has not been solved until the final translation of the product into money has been accomplished successfully. While it is not intended to develop an expert in accounting practice or economics, it is intended to produce an engineer with an appreciation of the problems of cost and one who can apply considerations of ultimate economy to all industrial problems. The techniques of operations research may be applied here, where mathematical models of real-life situations are constructed and manipulated to yield optimal solutions as guides to management.

An engineer trained in Manufacturing Engineering and Management may initially be employed in any of the following major areas of industrial activity: industrial economic analysis; planning and control of production; product and process design; methods engineering; operations research.

**Mechanical Engineering (plan MECHA13710)**

**Years 3 and 4**

The Mechanical Engineering plan provides a versatile, comprehensive coverage of areas involving the conception and design of machinery and mechanical plant, the supervision of its construction, operation and maintenance, the planning and supervision of large engineering projects, and general engineering management. Due to its wide range, a number of options are provided as Technical Elective courses in the final year. These are preferentially linked to provide a direction appropriate to the needs of Australian industry and to the specific interests of students, although some flexibility is available if required. Typical fields which may be encompassed by the plan include building services, computer-aided design, power generation, energy and environmental systems, gas and liquid handling, bio-mechanics, materials handling, control systems, and transport. An emphasis is placed on the application of engineering science, development and management in these fields.

**Mechatronic Engineering Technical Electives**

24 units of credit of Technical Elective courses are required. They may be selected from the postgraduate list of courses of the School or from Years 3 and 4 courses from other plans run by the School. Prerequisite and corequisite requirements must be satisfied. Approval is required for the selection of any course from outside the School. Due to staff availability and to demand, it is likely that not all of the Technical Electives will be always on offer. Students are advised in November which Technical Electives will be offered in the following year.

**Mechatronic Engineering (plan MTRNA13710)**

**Years 3 and 4**

The Mechatronic Engineering plan provides the student with the ability to acquire a hybrid range of skills based on mechanics, electronics and computing. Whilst there is a comprehensive coverage of mechanical engineering and design areas, the plan enables a deeper understanding of the principles supporting the conception, design, construction, maintenance, integration and repair of intelligent machines. Typical examples of these machines are robots, white goods, cameras, automated test equipment and transport vehicles.

Typical fields which may be encompassed by the plan include building services, computer controlled plant, manufacturing, robotics and materials handling. An emphasis is placed on the application of engineering science, development and management in these fields.

List given below. Included must be at least one of COMP3111, COMP3331 or ELEC3041. However they may, with approval, be selected from the postgraduate list of courses of the School or from other undergraduate plans run by the School. Prerequisite and corequisite requirements must be satisfied.

Approval is required for the selection of any course from outside the School.

Due to staff availability and to demand, it is likely that not all of the Technical Electives listed will be always on offer. Students are advised in November which Technical Electives will be offered in the following year.

Naval Architecture (plan NAVLA13710)

Years 3 and 4

Naval Architecture is the branch of engineering which is concerned with the design, building and utilisation of all types of ships and marine vehicles.

Naval architects must be conversant with a wide variety of skills, including most forms of engineering and architecture. This is because a ship or a boat must be a completely self-sufficient vehicle containing a number of systems and able to withstand the loads from the sea. Yachts, fishing boats, ferries, catamarans and pleasure craft are just a few of the types of vessels that are studied during the program.

The Faculty has approved an arrangement whereby students who satisfy the requirements of the first two years of a Mechanical Engineering four year degree program at any Australasian tertiary institution may be admitted to Years 3 and 4 of the program leading to the Bachelor of Engineering degree in Naval Architecture. The proviso is that the Head of the School is satisfied that the courses studied at the other institution are equivalent and give their recommendation.

Honours

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: Special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules

For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Program Progression Guidelines

The student’s attention is directed to the ‘Rules for Progression & the Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook. In addition, the following points should be noted:

A student who is faced with compiling a timetable comprising courses from two academic years must give preference to courses from the lower year.

Thesis Arrangements

The course MECH4001 Communications for Professional Engineers must only be taken in conjunction with either MECH4003 Thesis A or MECH4004 Thesis B.

MECH4003 and MECH4004 must be undertaken in two consecutive sessions which are the final two sessions of candidature.

A student must not be enrolled in more than 24 units of credit in any session involving MECH4003 and MECH4004.

A single thesis project is commenced in MECH4003 and completed in MECH4004. MECH4004 carries the mark for the thesis project.

MECH4003 is graded satisfactory (SY) or failure (FN). If a student receives a failure (FN) in MECH4003, a student cannot proceed with MECH4004.

If the project is abandoned during MECH4004, or if MECH4004 is failed, then the satisfactory (SY) for MECH4003 is changed to failure (FN). To complete the degree, a completely new topic must be chosen and the student must enrol again in both MECH4003 and MECH4004. (For BE Biomedical students, read BIOM5001 instead of MECH4003 and BIOM5002 instead of MECH4004)

Industrial Experience Requirements

Industrial experience is an integral part of the programs. This can be taken within Australia or overseas. Students must complete a total of sixty working days of industrial experience. A written report describing this experience is a requirement to passing the common, fourth year course MECH4004, Communications for Professional Engineers.

Professional Recognition

The Institution of Engineers, Australia, recognises the degree of BE in any of the undergraduate programs offered by the School as meeting the examination requirements for admission to graduate and corporate membership. Substantial or complete recognition is accorded to the BE degree programs by overseas engineering institutions.

The award of the BE degree in Aerospace Engineering is recognised by the Royal Aeronautical Society as giving exemption from the formal examination requirements for corporate membership. Advancement from graduate membership to associate membership grade is awarded on a case by case basis after a further period of some years of professional experience.

The award of the BE degree in Naval Architecture is recognised by the Royal Institution of Naval Architects (RINA), London, as the academic qualification for corporate membership of that body.

General Education

For students taking the Manufacturing Engineering and Management plan, the accounting courses GENC1001, GENC1002 or GENC1003 should not be chosen as they partially duplicate course course ACCT9003.
### 3711 Bachelor of Engineering Bachelor of Science BE BSc

**Aerospace Engineering (plan AEROA13711 + Science plan)**
- Manufacturing Engineering and Management (plan MANFA13711 + Science plan)
- Mechanical Engineering (plan MECHA13711 + Science plan)
- Mechatronic Engineering (plan MTRNA13711 + Science plan)
- Naval Architecture (plan NAVLA13711 + Science plan)

**Typical Duration**
- 5 years

**Minimum UOC for Award**
- 240 units of credit with a minimum of 102 units of credit from Science Faculty

**Typical UOC per Session**
- 24 units of credit

**Program Description**
The combined degree program of five years full-time study enables a student to qualify for the degrees of Bachelor of Engineering and Bachelor of Science (BE BSc). Every session of the program contains only the standard 24 Units of Credit of courses and hence workload should not be greater than in a single degree program. The combined degree program is administered by the School of Mechanical and Manufacturing Engineering.

For the Bachelor of Science the student selects a second plan based on an approved major sequence of courses. A major sequence is defined to comprise 42 Units of Credit of courses at Levels 2 and 3 with at least 18 Units of Credit being at Level 3. Overall, in the combined degree program, at least 84 units of credit must be taught by Science.

In some BSc majors, science courses specific to engineering degrees, e.g. PHYS1169 Physics 1CME, MATH2029 Engineering Mathematics 2A, will be exchanged for courses within that major.

The general layout for the combined degree is given below. Detailed outlines for each combination of engineering and science are available from the School.

Students who commence the program and do not complete the Engineering component may take out a BSc degree on completion of all Science requirements. Similarly, students not wishing to complete the BSc degree, may transfer to a plan under that degree program and be given appropriate credit for courses satisfactorily completed.

**Plans within this program:**
- **Aerospace Engineering** (plan AEROA13711 + Science plan)
- **Manufacturing Engineering and Management** (plan MANFA13711 + Science plan)
- **Mechanical Engineering** (plan MECHA13711 + Science plan)
- **Mechatronic Engineering** (plan MTRNA13711 + Science plan)
- **Naval Architecture** (plan NAVLA13711 + Science plan)

### Program Structure

#### Year 1
- **CHEM1817** Chemistry 1ME (3 UOC)
- **MAPP1110** Introduction to Manufacturing (6 UOC)
- **MATH1131** Mathematics 1A (6 UOC)
- **MATH1231** Mathematics 1B (6 UOC)
- **MATS9520** Engineering Materials (3 UOC)
- **MECH1120** Design and the Engineering Profession (3 UOC)
- **MECH1500** Computing 1M (3 UOC)
- **PHYS1169** Physics 1 (CheM, Mech, Min Eng) (6 UOC)
- Plus 12 units of credits of Science courses

#### Year 2
- **MATH2029** Engineering Mathematics 2A (6 UOC)
- **MATH2039** Engineering Mathematics 2B (6 UOC)
- **MATH2889** Statistics SM (3 UOC)
- **MECH1300** Engineering Mechanics 1 (6 UOC)
- **MECH1400** Mechanics of Solids 1 (6 UOC)
- **MECH2611** Fluid Mechanics A (3 UOC)
- **MECH2612** Fluid Mechanics B (3 UOC)

**MECH2711** Thermodynamics A (3 UOC)
**MECH2712** Thermodynamics B (3 UOC)
Plus 12 units of credit of Science courses.

#### Year 3
- **ELEC0807** Electrical Engineering 1E (6 UOC)
- **MECH2101** Machine Design A (3 UOC)
- **MECH2102** Machine Design B (3 UOC)
- **MECH2300** Engineering Mechanics 2 (3 UOC)
- **MECH2411** Mechanics of Solids 2A (3 UOC)
- **MECH2412** Mechanics of Solids 2B (3 UOC)
- **MECH3000** Professional Responsibilities (3 UOC)
Plus 24 units of credit of Science courses.

#### Year 4
- **S1 Year 3 engineering plan, less 6 units of credit General Education (18 UOC)
- **MECH3000** Professional Responsibilities (3 UOC)
- **S2 Year 3 engineering plan, less General Education & (18 UOC)
- **S2 Year 4 engineering plan, 24 units of credit. (18 UOC)

**Academic Rules**
For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

### 3712 Bachelor of Engineering Bachelor of Arts BE BA

**Aerospace Engineering (plan AEROA13712 + Arts plan)**
- **Manufacturing Engineering and Management (plan MANFA13712 + Arts plan)**
- **Mechanical Engineering (plan MECHA13712 + Arts plan)**
- **Mechatronic Engineering (plan MTRNA13712 + Arts plan)**
- **Naval Architecture (plan NAVLA13712 + Arts plan)**

**Typical Duration**
- 5 years

**Minimum UOC for Award**
- 240 units of credit

**Typical UOC per Session**
- 24 units of credit

**Program Description**
With this combined degree program students can add their choice of an Arts plan to a professionally accredited engineering plan in Aerospace Engineering, Manufacturing Engineering and Management, Mechanical Engineering, Mechatronic Engineering or Naval Architecture. Thus every session of the combined degree program contains only the standard 24 Units of Credit of courses and hence the workload should not be greater than in a single degree program. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program later, although with late transfer it might not be possible to complete the course in minimum time. In this case the student will have to prescribe their own engineering plan following discussion with the School. The full range of Arts plans is available.

Because the Engineering and Arts plans have common content, such as mathematics and physics, only one more year of study is required to gain the additional qualification of Bachelor of Arts.

**Program Objectives and Learning Outcomes**
Please contact the School of Mechanical & Manufacturing Engineering and the Faculty of Arts for information on the Program Objectives and Learning Outcomes.

**Program Structure**
Plans within this program:
Program Structure
Biomedical Engineering Electives
For a full list of Biomedical Engineering Electives, refer to the Graduate School of Biomedical Engineering in the Postgraduate Handbook.

Year 1
BIOM1001  Professional Biomedical Studies  (3 UOC)
BIOM2010  Biomedical Engineering Practice  (3 UOC)
CHEM1817  Chemistry 1ME  (3 UOC)
MANF1130  Introduction to Manufacturing  (6 UOC)
MATH1131  Mathematics 1A  (6 UOC)
MATH1231  Mathematics 1B  (6 UOC)
MECH1120  Design and the Engineering Profession  (3 UOC)
MECH1300  Engineering Mechanics 1  (6 UOC)
MECH1400  Mechanics of Solids 1  (6 UOC)
PHYS1169  Physics 1 (Chem, Mech, Min Eng)  (6 UOC)

Year 2
BIOM9420  Clinical Laboratory Science  (6 UOC)
ELEC0807  Electrical Engineering 1E  (6 UOC)
MATH2029  Engineering Mathematics 2A  (6 UOC)
MATH2039  Engineering Mathematics 2B  (3 UOC)
MATH2839  Statistics SM  (3 UOC)
MATS9520  Engineering Materials  (3 UOC)
MECH1500  Computing 1M  (3 UOC)
MECH2411  Mechanics of Solids 2A  (3 UOC)
MECH2412  Mechanics of Solids 2B  (3 UOC)
MECH2611  Fluid Mechanics A  (3 UOC)
MECH2612  Fluid Mechanics B  (3 UOC)
MECH2711  Thermodynamics A  (3 UOC)
MECH2712  Thermodynamics B  (3 UOC)

Year 3
ANAT2511  Fundamentals of Anatomy  (6 UOC)
MECH2101  Machine Design A  (3 UOC)
MECH2102  Machine Design B  (3 UOC)
MECH2300  Engineering Mechanics 2  (3 UOC)
MECH3203  Engineering Experimentation A  (3 UOC)
MECH3204  Engineering Experimentation B  (3 UOC)
MECH3211  Linear Systems Analysis  (3 UOC)
MECH3300  Engineering Mechanics 3  (3 UOC)

MECH3520  Programming & Numerical Methods  (3 UOC)
MECH3601  Thermofluid System Design  (3 UOC)
MECH3602  Advanced Thermodynamics  (3 UOC)
MENG2121  Principles of Control  (12 UOC)
1 Biomedical Engineering Elective  (6 UOC)

Year 4
BIOM5001  Thesis Part A  (6 UOC)
MANF4430  Management for Engineers  (6 UOC)
MECH3101  Machine Systems Design A  (3 UOC)
MECH3102  Machine Systems Design B  (3 UOC)
MECH3400  Mechanics of Solids 3  (3 UOC)
MECH4001  Communications for Professional Engineers  (3 UOC)
PHHP2221  Principles of Physiology A  (6 UOC)
PHHP2221  Principles of Physiology B  (6 UOC)
1 Biomedical Engineering Elective  (6 UOC)
1 Mechanical Engineering Technical  (6UOC)

Year 5
BIOM5002  Thesis Part B  (9 UOC)
BIOM9410  Regulatory Req of Biomed Tech  (6 UOC)
MECH3000  Professional Responsibilities  (3 UOC)
Biomedical Engineering Electives  (24 UOC)
General Education Electives  (6 UOC)

Masters Thesis
Masters Thesis BIOM9913 Project Report can be taken instead of 12 UOC of Biomedical Engineering Electives.

General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually 6 UOC taken in the final year of studies.
Each Faculty has responsibility for deciding what courses are able to be counted towards the General Education requirement for their students. The Faculty of Engineering is committed to providing the widest range of choice of general education electives for its students. It strongly encourages students to make the best use of this flexibility. Please contact

3715 Mechanical, Manufacturing or Mechatronic Engineering/Bachelor of Commerce
BE BCom
Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.

3683 Mechanical Engineering/ Master of Biomedical Engineering
Bachelor of Engineering Master of Biomedical Engineering BE MBiomedE
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
A Bachelor of Engineering degree in Mechanical Engineering and a Master of Biomedical Engineering degree (BE MBiomedE) can both be completed in five years of concurrent study.

Academic Rules
Eligibility
Anyone who meets the entry requirements for both Engineering and Arts is eligible for the combined program.

Rules
1. In addition to their chosen engineering plan, students must complete a major sequence approved arts plan containing at least 60 units of credit of courses.
Mathematics majors are not usually permitted. BE BSc combined degrees are more appropriate for this.
2. There will be a testamur for each part of the combined degree program.
3. Students who complete the BE program first may proceed to graduation with the degree of Bachelor of Engineering in the usual way provided they have also completed 12 Units of Credit in General Education.

Further Information
Organisation
The BE BA program is administered by the School of Mechanical and Manufacturing Engineering.
Students should start discussing their program with representatives of the School and the Faculty of Arts and Social Sciences as soon as possible - preferably well before enrolment. Enquiries should be directed to the Executive Assistant to the Dean of the Faculty of Arts and Social Sciences.

There are no special rules on what to include in each year. Students should work out for themselves the arts program they would like to add to their chosen engineering plan. The Arts and Social Sciences Faculty section in this Handbook describes the options, and the School of Mechanical and Manufacturing Engineering can supply sample plans showing what previous students have arranged. Although the Arts and Social Sciences Faculty section in this Handbook lists courses from the Faculties of Engineering and Science, it is not permissible for BE BA students to include these courses.

The arts component must be approved by the Faculty of Arts and Social Sciences.
The final program and schedule must be approved by the School.
your School Office for further information on General Education electives available to you.

For further information, please refer to the General Education section in this Handbook.

Academic Rules
For academic requirements relating to this program, please refer to Program Structure and contact the School of Mechanical and Manufacturing Engineering for more information.

3688 Mechatronic Engineering/Master of Biomedical Engineering

Bachelor of Engineering Master of Master of Biomedical Engineering BE MBiomedE

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
A Bachelor of Engineering degree in Mechatronic Engineering and a Master of Biomedical Engineering degree (BE MBiomedE) can both be completed in five years of concurrent study.

Program Structure

Year 1
BIOM1001 Professional Biomedical Studies (3 UOC)
BIOM2010 Biomedical Engineering Practice (3 UOC)
CHEM1817 Chemistry 1ME (3 UOC)

Biomedical Engineering Electives (12UOC)
Mtrn Technical Elective (6 UOC)
General Education Electives (6 UOC)

Masters Thesis
Masters Thesis BIOM9913 Project Report can be taken instead of 12 UOC of Biomedical Engineering electives.

Biomedical Engineering Electives
For a full list of Biomedical Engineering Electives, refer to the Graduate School of Biomedical Engineering in the Postgraduate Handbook.

General Education Requirements
Students in this program need to satisfy the General Education requirements of 6 units of credit which is taken in the final of the studies. For further information, please refer to the General Education section in this Handbook.

Each Faculty has responsibility for deciding what courses are able to be counted towards the General Education requirement for their students. The Faculty of Engineering is committed to providing the widest range of choice of general education electives for its students. It strongly encourages students to make the best use of this flexibility. Please contact your School Office for further information on General Education electives available to you.

Academic Rules
For academic requirements relating to this program, please refer to Program Structure and contact the School of Mechanical and Manufacturing Engineering for more information.

Fast-Track Program with Master of Engineering Science

3710 Bachelor of Engineering/8710 Master of Engineering Science
BE MEngSc
A Bachelor of Engineering degree in Manufacturing Engineering and Management, in Mechanical Engineering, or in Mechatronic Engineering, and a Master of Engineering Science degree (BE MEngSc) can both be completed in four and a half years of study.

Students undertake the first three years (6 sessions) of the standard BE plan in Manufacturing Engineering and Management, in Mechanical Engineering, or in Mechatronic Engineering. Subject to satisfying a minimum performance requirement over these three years (see below), they (a) substitute 12 units of credit of the standard Year 4 BE degree plan with 12 units of credit of approved postgraduate coursework in their fourth year, (b) they undertake 12 units of credit of project/thesis work over the Summer (9th) Session, and (c) they undertake 24 units of credit of postgraduate coursework in the 10th session (first half of their fifth year).

There will be a testamur for each degree. The degree of Bachelor of Engineering will be awarded on the satisfactory completion of the first eight sessions.

Admission Requirements
Admission to the BE MEngSc will require a credit grade average by the end of Year 3.

3710 Manufacturing Engineering and Management
Years 1, 2 and 3 (plan MANFA13710)
Students in Years 1 and 2 are enrolled in the standard single degree Manufacturing Engineering and Management plan MANFA13710 within program 3710.
Year 4 (plan MANF13710)

In Year 4, students transfer to the special plan MANF13710 within program 3710. Compared to the standard plan for Session 1 of Year 4, the postgraduate course MANF9471 Manufacturing Strategy is substituted for MANF4440 Strategic Manufacturing Management and for MANF4500 Computers in Manufacturing 2. In Session 2, the postgraduate course MANF9340 Factory Automation is substituted for MANF4300 Design of Manufacturing Facilities 2.

8710 Manufacturing Engineering and Management

After Year 4, students, having completed their engineering program, change to MEngSc program 8710.

**Summer Session between Year 4 and Year 5**

Students undertake a 12 UOC project, MANF9010.

**Year 5**

24 UOC of courses are selected from the School's postgraduate courses. It is suggested that consideration be given to the courses making up the Manufacturing Engineering and Management specialisation plans outlined in the Postgraduate Handbook. Attribution of a specialisation on the Master of Engineering Science testamur may not be possible if project MANF9010 has been taken instead of certain courses. Consult the School for direction on this matter.

### 3710 Mechanical Engineering

*Years 1, 2 and 3 (plan MECH13710)*

Students in Years 1 and 2 are enrolled in the standard single degree Mechanical Engineering plan MECH13710 within program 3710.

**Year 4 (plan MECH13710)**

In Year 4, students transfer to the special plan MECH13710 within program 3710. This plan requires that a minimum of 12 units of credit of postgraduate courses must be selected as part of the 24 units of credit Technical Electives requirement. Typically this means that a minimum of 12 units of credit of MECH9*** courses are selected.

**8710 Mechanical Engineering**

After Year 4, students, having completed their engineering program, change to MEngSc program 8710.

**Summer Session between Year 4 and Year 5**

Students undertake a 12 UOC project, MCH9010.

**Year 5**

24 UOC of courses are selected from the School's postgraduate courses. It is suggested that consideration be given to the courses making up the Mechanical specialisation plans outlined in the Postgraduate Handbook.

### 3710 Mechatronic Engineering

*Years 1, 2 and 3 (plan MTRN13710)*

Students in Years 1 and 2 are enrolled in the standard single degree Mechatronic Engineering plan MTRN13710 within program 3710.

**Year 4 (plan MTRN13710)**

In Year 4, students transfer to the special plan MTRN13710 within program 3710. This plan requires that a minimum of 12 units of credit of postgraduate courses must be selected as part of the 18 units of credit Technical Electives requirement. Typically this means that a minimum of 12 units of credit of MTRN9*** courses are selected.

**8710 Mechatronic Engineering**

After Year 4, students, having completed their engineering program, change to MEngSc program 8710.

### School of Mining Engineering

**Head of School:** Professor BK Hebblewhite

**Director - Undergraduate Studies:** Dr Paul Hagan

**Administrative Assistants:** Mrs Carol Bell, Mrs Kim Russell

Mining Engineering offers a diverse range of career path options, high salary levels and excellent opportunities for career progression. This is because it is a global profession that encompasses a wide range of activities involving people, technology, equipment, financial resources, community and government.

Mining Engineering is concerned with the safe, economic and environmentally sustainable recovery, processing and marketing of mineral resources from the earth. The Mining Engineering degree program includes elements from other disciplines including geology, metallurgy, commerce, economics and management. This means that graduates possessing knowledge of mining processes within this framework are very versatile and can progress rapidly both within the mining industry and in those sectors affiliated to the industry.

Career opportunities exist in areas such as operations and project management, and technical design at mine sites; corporate management within mining organisations; engineering design, geotechnical engineering, environmental engineering, risk management and technology developments with consultants, research organisations and equipment manufacturers; specialist mining software design and development with IT organisations; mine planning and design, financial evaluation and feasibility studies with merchant banks, stock brokers, mining organisations and consultants; policy formulation, administration and regulation with government; as well as opportunities in quarrying, tunnelling for infrastructure development in urban areas, education and training.

Mining engineering is an international profession with the major mining companies operating in many parts of South East Asia, Africa, South and North America and Europe. Our graduates have the flexibility and opportunity to travel in their work if they so desire. Mining Engineering graduates are trained to be versatile, adaptable and responsive to change in a physically and mentally challenging career.

Further details can be found at our website at www.mining.unsw.edu.au.

### School of Mechanical Engineering

**Head of School:** Professor BK Hebblewhite

**Director - Undergraduate Studies:** Dr Paul Hagan

Our graduates have the flexibility and opportunity to travel in their work if they so desire. Mining Engineering graduates are trained to be versatile, adaptable and responsive to change in a physically and mentally challenging career.

Further details can be found at our website at www.mining.unsw.edu.au.

The School offers a four year full-time program in Mining Engineering leading to the award of the degree of Bachelor of Engineering at Pass or Honours level. A five year combined degree program is also available with Civil Engineering, Science or Arts.

After graduation, mining engineers who choose to develop careers in operations management gain further practical experience to obtain a Mine Manager's Certificate of Competency, in either Coal or Metalliferous Mining.

Formal arrangements are in place with the University of Newcastle and the University of Tasmania for students who have completed a specified program to be admitted with advanced standing to Year 3 of the program at UNSW. Recognition of students from other institutions or graduates of other disciplines may also be considered for advanced standing to the program.

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

### 3140 Mining Engineering

**Bachelor of Engineering BE**

**Typical Duration:**

4 years

**Minimum UOC for Award:**

192 units of credit
Typical UOC per Session
24 units of credit

Program Description
Year 1 of the program includes courses that cover the sciences to provide the foundation for many of the engineering courses offered in Year 2. Year 3 is largely devoted to fundamental courses in mining engineering while Year 4 provides advanced instruction in aspects essential for all mining engineers. In addition, the fourth year offers a range of electives that allow students to supplement their studies with a minor specialisation. A number of General Education courses are also prescribed in the program. In keeping with the international career opportunities, students are encouraged to undertake a foreign culture/language course as a General Education elective.

An important requirement in the fourth year is for students to undertake personal research or a study project in mining or minerals engineering for which they are required to submit a dissertation for examination. High achieving students who have maintained a Distinction average grade can also choose to undertake a research project in Years 2 and 3 of the program.

For the award of Honours at the conclusion of the program, students will need to have distinguished themselves in the formal course work, in other assignments as directed by the Head of School and in the final year research project. Some courses in the program require students to attend field trips as part of the learning process. This provides an opportunity for students to gain immediate practical insight into the application of the theoretical concepts presented in courses.

In the undergraduate program, it is compulsory for students to gain practical experience in the mining industry during successive long recesses. A minimum of 80 days needs to be completed on which a student must submit a report and give a presentation on the experience before graduation. The School assists students as much as possible in securing suitable vacation employment.

Program Objectives and Learning Outcomes
The School offers a four year full-time program in Mining Engineering leading to the award of the degree of Bachelor of Engineering at Pass or Honours level. A five year combined degree program is also available in Civil Engineering, in Science, and in Arts.

After graduation, mining engineers who choose to develop careers in operations management gain further practical experience to obtain a Mine Manager’s Certificate of Competency, in either Coal or Metalliferous Mining.

Formal arrangements are in place with the University of Newcastle and the University of Tasmania for students who have satisfactorily completed a specified program to be admitted with advanced standing to Year 3 of the program at UNSW. Recognition of students from other institutions or graduates of other disciplines may also be considered for advanced standing to the program.

Program Structure
Year 1
C.1H1M1817 Chemistry 1ME (3 UOC)
GEOS1111 Fundamentals of Geology (6 UOC)
MATH1131 Mathematics 1A (6 UOC)
MATH1231 Mathematics 1B (6 UOC)
MATS9410 Materials for Mining Engineers (3 UOC)
MINE1010 Introduction to Mining Engineering (6 UOC)
MINE1020 Mining Industry Practice (6 UOC)
MINE1300 Applied Mechanics (6 UOC)
PHYS1169 Physics 1 (Chem, Mech, Min Eng) (6 UOC)

Year 2
ELEC0809 Electrical Engineering 1C (3 UOC)
GMAT0443 Surveying for Mining Engineers (3 UOC)
MATH2029 Engineering Mathematics 2A (6 UOC)
MATH2039 Engineering Mathematics 2B (3 UOC)
MINE2010 Mining Project Development (6 UOC)
MINE2310 Structural Mechanics (6 UOC)
MINE2320 Mining Stress Analysis (3 UOC)
MINE2300 Fluids & Thermodynamics (6 UOC)
MINE2700 Mining Data Analysis (3 UOC)

Year 3
GEOS5300 Mine Geology (3 UOC)
MINE3210 Resource Mining Control System (3 UOC)
MINE3300 Mining Geomechanics (6 UOC)
MINE3410 Coal Mining Systems (6 UOC)
MINE3420 Metal Mining Systems (6 UOC)
MINE3500 Mine Workplace Environment (6 UOC)
MINE3610 Excavation Engineering (6 UOC)
MINE3620 Mine Infrastructure & Services (3 UOC)
MINE3710 Mine Economics and Business Systems (6 UOC)
MINE3800 Mineral Processing (3 UOC)

Year 4
MINE4210 Mine Planning (6 UOC)
MINE4220 Coal Mine Design and Evaluation Project (9 UOC)
MINE4230 Metal Mine Design and Evaluation Project (9 UOC)
MINE4240 Mine Design and Evaluation (9 UOC)
MINE4300 Geotechnical Engineering (6 UOC)
MINE4410 Industry Applications (6 UOC)
MINE4420 Thesis A (6 UOC)
MINE4500 Sustainable Mining Practices (3 UOC)
MINE4700 Mining Law (6 UOC)

General Education Electives (select one)
MINE4800 Mine Simulation and Modelling (3 UOC)
MINE4805 Mineral Process Technology (3 UOC)
MINE4810 Comp Methods in Geomechanics (3 UOC)

General Education Requirements
Please refer to the General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its deleagated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules
For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience Requirements
All students must complete at least 80 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.
Professional Recognition
The award of the BE degree in Mining Engineering from UNSW is a recognised tertiary qualification required for corporate membership of the Australasian Institution of Mining and Metallurgy (AusIMM). On completion of the degree, a Mining Engineer may apply for Graduate Membership of the AusIMM. Following three years relevant experience after graduation, graduates may apply for Corporate Membership of the Institute. The BE degree in Mining Engineering is also required in some jurisdictions to obtain the statutory qualification of Mine Manager.

3142 Mining Engineering/Bachelor of Science

Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
This option is available to students wishing to supplement their Mining Engineering degree with courses from the Faculty of Science. The minimum time to complete this combined program is five years. The selection of specialisations in the Science component is quite flexible. It is important, however, that students discuss their interests with the relevant program authorities as programs may need to be individually tailored to suit each student. Also, students must undertake the BSc in accordance with the requirements for the award of a BSc degree. There may be restrictions on course availability due to timetabling constraints.

A more structured program is available in the BE(Mining)/BSc(Computer Science) program. This combination is an excellent choice for students who have a strong computing interest. Details of this program are available from the School of Mining Engineering. Please note that there may be a minimum UAI requirement for entry to the combined BE BSc degree. Please contact the School of Mining Engineering for information regarding this combined degree.

Program Structure
Please contact the School of Mining Engineering for information regarding the Program Structure.

Academic Rules
For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

3144 Mining Engineering/Bachelor of Arts

Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
A wide range of options are available in this 5 year combined degree. The Bachelor of Arts degree must be completed in accordance with the requirements for the award of a BA. Students interested in this combined degree must discuss their planned program with the individual program Authorities. There may be restrictions on course availability due to timetabling constraints.

Please note that there may be a minimum UAI requirement for entry to the combined BE/BA degree. Please contact the School of Mining Engineering for more information.

Program Structure
Please contact the School of Mining Engineering and the Faculty of Arts for information on the Program Structure.

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules
These combined programs of five years full-time study enable students in the School to qualify for the award of the degrees of Bachelor of Engineering and Bachelor of Arts. With these programs students can add their choice of an Arts major to the standard professionally accredited Mining Engineering program. It provides flexibility in course choice within the full Arts program and enables students to obtain the broader education offered by the Arts and Social Sciences. Since Engineering and Arts programs can have a common content, such as mathematics and physics, approximately two additional sessions of study are required to gain the additional qualifications of Bachelor of Arts. In general, this additional study is taken concurrently with the BE program and both can be completed within 10 sessions.

The programs are open to all students who satisfy both the Mining Engineering and Arts entry conditions. Students may enter directly in Year 1 or may apply to transfer from the normal engineering program after completion of at least one year if they have a credit or higher average or permission from the Head of School.

The BE BA programs are administered by the School of Mining Engineering. The School requires the student to obtain the approval of the Faculty of Arts and Social Sciences for the BA components of their program. The School of Mining Engineering must approve the final program timetable.

1. Students must complete 60 units of credit in the BA program with no more than 24 units of credit obtained at Level 1 (i.e. subjects designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school of department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - Environmental Studies
   - European Studies
   - Film
   - French
   - German Studies
   - Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology & Anthropology
   - Spanish & Latin American Studies
   - Theatre & Performance Studies
   - Women's and Gender Studies
3. Except for courses completed as part of the Environmental Studies major sequences, no more than 12 units of credit may be obtained from courses in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE programs can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students must complete the full requirements of the program 3140 BE in Mining Engineering except that they are exempt from the General Education requirement of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE BA program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of an Honours year. It should be noted that entry into a particular BA Honours program will require completion of courses additional to those specified under rules 1-4.

8. The total units of credit in the combined program is 5 x 48 = 240.

Industrial Experience Requirements
All students must complete at least 80 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

3715 Mining Engineering/Bachelor of Commerce
BE BCom
Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.

3146 Civil Engineering/Mining Engineering
Bachelor of Engineering Bachelor of Engineering BE BE
Students initially enrol in courses in the Bachelor of Engineering (Civil Engineering) program 3620 which is administered by the School of Civil Engineering. The first three and one half years of the combined degree program are therefore identical to the 3620 program. After completing six sessions in the 3620 program, students may apply to enter the Bachelor of Engineering in Mining Engineering program 3146 which is administered by the School of Mining Engineering and aim to complete the mining requirements in four additional sessions. Students considering this option should discuss the above arrangements with the relevant program authorities.

For more information, please refer to the entry under the School of Civil and Environmental Engineering in this Handbook.

Fast Track Program with Master of Engineering Science
3140 Mining Engineering/Master of Engineering Science – Plan MINEP13140
Bachelor of Engineering Master of Engineering Science BE MEngSc
Students may undertake a four and one half years (10 semesters) full-time combined program leading to the awards of a Bachelor of Engineering and a Master of Engineering in Mining Engineering.

Students undertake the first three years (six semesters) of the BE program in Mining Engineering, Subject to satisfying a minimum performance over these three years (see “Rules for Progression and the Award of Degrees”), they must (a) substitute 12 UOC in the standard Yr4 BE degree program with a School approved 12 UOC of graduate coursework in their 4th year; (b) undertake a 12 UOC project/thesis work over the Summer (9th)

Semester; and (c) undertake 24 UOC of graduate coursework in the tenth semester (first half of their 5th year).

Year 1 to Year 3

Year 5 Session 1
During Session 1, students undertake four 6 UOC Mining MEngSc courses according to their specialisation and subject to timetabling constraints.

School of Petroleum Engineering
Director: Professor WV Pinczewski
Petroleum Engineering is a specialised engineering discipline which prepares graduates for careers in the oil and gas industries. Its related operations apply physical, mathematical and engineering principles to identify and solve problems associated with exploration, exploitation, drilling, production and all the related economic and management problems associated with the recovery of hydrocarbons and alternative sources of energy from deep beneath the earth’s surface.

The School of Petroleum Engineering offers both undergraduate and postgraduate programs as well as open learning programs on the Internet leading to the award of Graduate Diploma, Graduate Certificate and Master of Engineering Science degrees in Petroleum Engineering.

The undergraduate program for the award of a Bachelor of Engineering in Petroleum Engineering requires four years of full-time study. This degree is fully accredited and recognised internationally.

Entry is normally into Year 1 of the program. Students who satisfy the requirements of other full-time engineering degree programs at UNSW or any other Australian tertiary institution may be admitted into Year 2 or Year 3 of the undergraduate Petroleum Engineering program. These students will need to complete an appropriately modified Year 2 or Year 3 of the program as the case demands. The same requirements apply to students from accredited tertiary institutions in other countries. The award of Honours in the Petroleum Engineering program requires students to have distinguished themselves in the formal work, as well as in related assignments and industrial training periods as advised by the Director of Undergraduate Studies of the School.
**3045 Petroleum Engineering**

**Bachelor of Engineering BE**

**Program Description**
The undergraduate program for the award of a Bachelor of Engineering in Petroleum Engineering requires four years of full-time study. This degree is fully accredited and recognised internationally.

Entry is normally into Year 1 of the program. Students who satisfy the requirements of other full-time engineering degree programs at UNSW or any other Australian tertiary institution may be admitted into Year 2 or Year 3 of the undergraduate Petroleum Engineering program. These students will need to complete an appropriately modified Year 2 or Year 3 of the program as the case demands. The same requirements apply to students from accredited tertiary institutions in other countries. The award of Honours in the Petroleum Engineering program requires students to have distinguished themselves in the formal work, as well as in related assignments and industrial training periods as advised by the Director of Undergraduate Studies of the School.

This program extends over four years and students study full-time during the day for 28 weeks of each year (excluding examinations and recess periods).

Successful completion of the BE degree program is accepted by the Institution of Engineers Australia, and the Institution of Chemical Engineers as sufficient academic qualification for corporate membership. The Director of Undergraduate Studies may approve various program patterns involving full-time or part-time studies.

**Program Objectives and Learning Outcomes**
Petroleum Engineering is a specialised engineering discipline which prepares graduates for careers in the oil and gas industries. Its related operations apply physical, mathematical and engineering principles to identify and solve problems associated with exploration, exploitation, drilling, production and all the related economic and management problems associated with the recovery of hydrocarbons and alternative sources of energy from deep beneath the earth's surface.

**General Education Requirements**

Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

**Honours**

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate's performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Arts and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

**Academic Rules**
For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

**Industrial Experience Requirements**
All students must complete at least 60 working days of approved industrial experience (or professional practice in the case of Surveying and Spatial Information Systems students) prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.
3047 Petroleum Engineering/Bachelor of Science

Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration
3 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

Students may seek to undertake a five-year full-time combined program leading to the award of the degree of Bachelor of Engineering in Petroleum Engineering and Bachelor of Science (BE BSc).

The School of Petroleum Engineering is the academic unit responsible for the program. All programs must be approved by both the Faculty of Engineering and the Faculty of Science. The School will consult with the Faculty of Science in approving the BSc component of the program.

Students must satisfy admission requirements for both the BE in Petroleum Engineering and BSc programs.

Program Structure

With the combined degree program, students complete a full, professionally accredited 4-year Engineering program (which includes Science courses) and add an additional 5th year to augment the Science component of the combined degree program. In all, a minimum of 102 units of credit of science courses must be taken with the combined program, which must include a Science major defined in Table A in the Science Handbook, or an approved major in Computer Science where this is permitted.

Academic Rules

For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

3715 Petroleum Engineering/Bachelor of Commerce

BE BCom

Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.

School of Photovoltaic and Renewable Energy Engineering

Head of School: Dr R.P. Corkish
Director of Academic Studies: Scientia Professor S.R. Wenzham
Director of Research: Scientia Professor M.A. Green
Undergraduate Coordinator: Dr J.E. Cotter
Postgraduate Coordinator: Dr A.B. Sproul
Research Coordinator: A/Prof A. G. Aberle
Student Administration Manager: Ms. T. Burns

The need for the School of Photovoltaic and Renewable Energy Engineering has arisen due to rapid growth and evolution in the photovoltaic industry in recent years, with considerable demand by industry for UNSW developed technologies and appropriately trained engineers across the entire photovoltaic and renewable energy sectors. It originally comprised three centres established by the Australian Research Council: the Photovoltaics Special Research Centre, the Key Centre for Teaching and Research in Photovoltaic Engineering, and the Special Research Centre for Third Generation Photovoltaics. However, in 2003, the UNSW Centre of Excellence for Advanced Silicon Photovoltaics and Photonics was established merging the three centres into one.

The School offers undergraduate and postgraduate training encompassing all aspects of the photovoltaic and renewable energy sectors. Innovative teaching techniques have been developed to enhance the learning environment. UNSW academics in the photovoltaic field have been consistently ranked amongst the leaders worldwide through international peer review. This team has held the world record for silicon solar cell efficiencies for almost two decades and has been responsible for developing the most successfully commercialised new photovoltaic technology internationally throughout the same period.

*Please note: The School is in the process of obtaining approval for a BE in Renewable Energy Engineering / Bachelor of Arts. Please see the School Office if you would like to know more about this proposed program.

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

3642 Photovoltaics and Solar Energy

Bachelor of Engineering BE

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description

The undergraduate engineering degree in Photovoltaics (PV) and Solar Energy was established in 2000 and is a four-year full-time program. It is the first of its kind internationally and won the Education and Awareness Award at the 2004 Energy and Water Green Globe Awards held by the Department of Energy, Utilities and Sustainability. The program has been established in response to rapid growth in the industry in recent years in both manufacturing capacity and job creation. In 2004 global manufacturing of solar cells expanded by 67% - growth reminiscent of the electronics industry in the booming 1980s.

The program includes training in technology development, manufacturing, quality control, reliability and lifecycle analysis, cell interconnection and encapsulation, a range of solar cell applications, system design, maintenance and fault diagnosis, marketing, policy development and the use of other renewable energy technologies. Considerable emphasis is placed on gaining hands-on experience of working with PV devices, modules and systems.

Second Area of Specialisation

The cross-disciplinary nature of photovoltaics and renewable energy applications necessitates many PV engineers possessing broad engineering backgrounds or else working in teams with other engineers. A good example is the UNSW Solar Car Project involving PV engineers, electronics engineers, control engineers, mechanical engineers, chemical engineers, power engineers, biomedical engineers, computer engineers, and communications engineers, etc. Therefore it is important for photovoltaic engineers to have a broader understanding of other engineering disciplines.

A unique feature of this program is that in Year 2, students have the opportunity to select one of ten possible strands to complement their education in Photovoltaics and Solar Energy. Each strand comprises 18 units of credit with the opportunity to subsequently select additional electives in the corresponding area in the final two years, subject to the approval of the Undergraduate Coordinator. The strands available are...
Program Objectives and Learning Outcomes
The broad objective of the program is to produce well educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers. The program aims to produce graduates that are self-motivated, lifelong learners; critical thinkers; problem solvers; independent investigators; team players; good communicators; effective managers; and are environmentally, socially and ethically responsible. More specifically, the School hopes to train and educate engineers to cater for the needs of the rapidly growing and evolving photovoltaics industry.

Students in each course are assessed by way of assignments, tutorials, laboratory/project work and formal examinations. In a small number of courses/projects students are also assessed on their communication, leadership skills and project management through seminar presentations, reports and their demonstrated ability to manage a group/project.

Program Structure
Plan SOLAA13642

Year 1
ELEC1011 Electrical Engineering 1 (6 UOC)
ELEC1041 Digital Circuits (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)
PHYS1131 Higher Physics 1A (6 UOC)
PHYS1231 Higher Physics 1B (6 UOC)
SOLA1050 Introduction to Photovoltaics, Solar Energy and Computing 1 (6 UOC)
SOLA1051 Introduction to Photovoltaics, Solar Energy and Computing 2 (6 UOC)
SOLA1060 Chemical Processes for Renewable Energy Systems (3 UOC)

Note: MATH1141 and MATH1241 may be taken at the lower level (MATH1131 and MATH1231).

Year 2
MATH2120 Mathematical Methods for Differential Equations (3 UOC)
MATH2859 Probability, Statistics and Information (3 UOC)
SOLA2020 Photovoltaic Technology and Manufacturing (6 UOC)
SOLA2051 Project in Photovoltaics and Solar Energy 1 (6 UOC)
SOLA2052 Project in Photovoltaics and Solar Energy 2 (6 UOC)
SOLA2053 Sustainable & Renewable Energy Technologies (6 UOC)
SOLA2060 Introduction to Electronic Devices (3 UOC)
Selected Strand (12 UOC)
General Education Elective (3 UOC)

Note: SOLA2060 is offered every second year and will not be offered in 2006.

Year 3
ELEC2031 Circuits and Systems (3 UOC)
SOLA3010 Photovoltaics in the Built Environment (6 UOC)
SOLA3507 Solar Cells (6 UOC)
SOLA3540 Applied Photovoltaics (6 UOC)
Professional Electives (18 UOC)
Selected Strand (continued) (6 UOC)
General Education (3 UOC)

Note: SOLA3507 is offered every second year and will not be offered in 2006.

Year 4
ELEC4010 Project Management for Professional Services (3 UOC)
ELEC4011 Ethics and Electrical Engineering Practice (3 UOC)
SOLA4910 Thesis Part A (6 UOC)
SOLA4911 Thesis Part B (6 UOC)
SOLA4012 Grid-Connected Photovoltaic Systems (6 UOC)
Professional Electives (12 UOC)
General Education elective (6 UOC)

Notes: Where students have a weighted average mark (WAM) less than 65, they should enrol in the group thesis SOLA4914 and SOLA4915.
SOLA4012 is offered every second year and will not be offered in 2006.

Years 2 & 3 Strand Options
Please note that the strands listed below are subject to change and may not be available every year.

Strand 1 Computing
Choose one of the following courses:
COMP1011 Computing 1A (6 UOC)
COMP1711 Higher Computing 1A (6 UOC)
And choose one of the following courses:
COMP1021 Computing 1B (6 UOC)
COMP1721 Higher Computing 1B (6 UOC)
And choose from the following to complete the strand:
COMP3111 Software Engineering (6 UOC)
ELEC2041 Microprocessors & Interfacing (6 UOC)
Or one of the following courses:
COMP2011 Data Organisation (6 UOC)
SOLa2711 Higher Data Organisation (6 UOC)

Note: Students must choose whether to take Computing 1A, Computing 1B and Data Organisation at the ordinary or higher level.

Strand 2 Electronics
ELEC2032 Electronics and Systems (3 UOC)
ELEC3042 Real Time Instrumentation (3 UOC)
ELEC3006 Electronics A (6 UOC)
And choose from the following to complete the strand:
ELEC3017 Electrical Engineering Design (6 UOC)
ELEC4240 Power Electronics (6 UOC)
ELEC4503 Electronics C (6 UOC)
ELEC4522 Microelectronics Design and Technology (6 UOC)

Strand 3 Electric Energy
ELEC2015 Electromagnetic Applications (3 UOC)
ELEC3005 Electric Energy 1 (6 UOC)
MATH2011 Several Variable Calculus (6 UOC)
PHYS2939 Physics 2 (Electrical Engineering) (6 UOC)

Strand 4 Communications and Control
ELEC2032 Electronics and Systems (3 UOC)
ELEC2042 Real Time Instrumentation (3 UOC)
MATH2011 Several Variable Calculus (6 UOC)
And choose from the following to complete the strand:
ELEC3004 Signal Processing and Transform Methods (6 UOC)
ELEC3014 Systems and Control 1 (6 UOC)
ELEC3013 Telecommunication Systems 1 (6 UOC)

Strand 5 Mathematics
MATH2011 Several Variable Calculus (6 UOC)
MATH2509 Linear Algebra for Engineers (3 UOC)
MATH2520 Complex Analysis (3 UOC)
And choose one from the following to complete the strand:
MATH3041 Mathematical Modelling (6 UOC)
MATH3121 Mathematical Methods (6 UOC)
MATH3241 Fluid Dynamics (6 UOC)
MATH3261 Atmosphere-Ocean Dynamics (6 UOC)

Strand 6 Mechanical Engineering
METH2611 Fluid Mechanics A (3 UOC)
MECH2612 Fluid Mechanics B (3 UOC)
METH2711 Thermodynamics A (3 UOC)
MECH2712 Thermodynamics B (3 UOC)
And choose from the following to complete the strand:
MECH3601 Thermofluid System Design (3 UOC)
MECH3602 Advanced Thermodynamics (3 UOC)
MECH9720 Solar Thermal Energy Design (6 UOC)
MECH9740 Power Plant Engineering (6 UOC)

Strand 7 Civil Engineering
CVEN1021 Civil Engineering Practice 1A (4 UOC)
CVEN1023 Statics (4 UOC)
CVEN1026 Engineering Materials 1 (4 UOC)
CVEN2021 Mechanics of Solids (3 UOC)
CVEN2026 Engineering Materials 2 (3 UOC)

Strand 8 Chemical Engineering
CEIC1020 Introduction to Chemical Engineering (6 UOC)
CHEC2110 Material & Energy Balances (3 UOC)
CEIC2120 Fluid Flow (3 UOC)
CEIC2130 Heat Transfer (3 UOC)
CEIC3110 Thermodynamics (3 UOC)
Strand 9 Physics
MATH2011 Several Variable Calculus (6 UOC)
PHYS2040 Quantum Physics (3 UOC)
PHYS2060 Thermal Physics (3 UOC)

And choose from the following to complete the strand:
PHYS3010 Quantum Mechanics (Advanced) (3 UOC)
PHYS3020 Statistical Physics (3 UOC)
PHYS3080 Solid State Physics (3 UOC)
PHYS3210 Quantum Mechanics (3 UOC)
PHYS3310 Physics of Solid State Devices (3 UOC)
PHYS3770 Laser and Spectroscopy Lab (3 UOC)

PHYS3080 has PHYS3010 or PHYS3210 and PHYS3020 as co-requisites
PHYS3310 has PHYS3080 as a pre-requisite

Strand 10 Faculty of the Built Environment
BENV1072 Design for Energy Efficiency (6 UOC)

And choose from the following to complete the strand:
BLDG1211 Construction Technology 1A (6 UOC)
BLDG1212 Construction Technology 1B (6 UOC)
BLDG1212 requires completion of BLDG1211 - Construction Technology 1A

Professional Electives for Years 3 & 4
Because of timetable clashes not all combinations or courses are possible

Academic Rules
For program rules relating to the Bachelor of Engineering, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience Requirements
All students must complete at least 60 working days of approved industrial experience prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

3657 Renewable Energy Engineering
Bachelor of Engineering BE

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
This program commenced in 2003 and is a four year full-time program. Discussions on course content have been held with Australian manufacturers, major end-users, the former NSW Sustainable Energy Development Authority, the Australian CRC for Renewable Energy and the industry representative association, Solar Energy Industries Association of Australia. All these organisations have representatives on the Advisory Committee established for the School of Photovoltaic and Renewable Energy Engineering.

Consultation has also taken place as necessary with other schools within UNSW. In particular, the plans for this program have been developed in collaboration with the School of Mechanical Engineering, the School of Electrical Engineering and Telecommunications and the Faculty of the Built Environment. All of these schools will be offering courses within the new program.

Approximately half the material for this new program is in common with the program in Photovoltaics and Solar Energy. However, this new program in Renewable Energy Engineering encompasses a wider range of renewable energy technologies and their use. These include electricity generation from solar thermal systems, photovoltaics, wind turbines, biomass, tidal energy, geothermal systems, and also includes the important areas of solar architecture and the design of energy efficient housing.

Program Objectives and Learning Outcomes
The broad objective of the program is to produce well educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers. The program aims to produce graduates that are self-motivated; lifelong learners; critical thinkers; problem solvers; independent investigators; team players; good communicators; effective managers; and are environmentally, socially and ethically responsible. More specifically, the School hopes to train and educate engineers to cater for the needs of the rapidly growing and evolving renewable energy industry.

Students in each course are assessed by way of assignments, tutorials, laboratory/project work and formal examinations. In a small number of courses/projects students are also assessed on their communication, leadership skills and project management through seminar presentations, reports and their demonstrated ability to manage a group/project.

Program Structure

Year 1

ELEC1011 Electrical Engineering 1 (6 UOC)
LLLC1041 Digital Circuits (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)
PHYS1131 Higher Physics 1A (6 UOC)
PHYS1231 Higher Physics 1B (6 UOC)
SOLA1055 Introduction to Renewable Energy Technologies 1 (6 UOC)
SOLA1056 Introduction to Renewable Energy Technologies 2 (3 UOC)
SOLA1060 Chemical Processes for Renewable Energy Systems (3 UOC)

General Education
Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate's performance in the final year courses and thesis project.

Note: The following courses are offered every second year and will not be offered in 2006. SOLA5051, SOLA5053, SOLA5054, SOLA5055, SOLA5056.

Electives can also be chosen from the courses listed as electives for Electrical Engineering, Mechanical Engineering, Civil Engineering, Environmental Engineering, Computer Science and Engineering and Chemical Engineering for which appropriate prerequisite requirements have been satisfied and which conform to the credit point requirements. Approval to substitute these electives for SOLA professional electives must be sought from the Undergraduate Coordinator. Substitutions will be restricted to a maximum of two.

The program selected by each student must be approved by the Head of School. Not all electives are available each session or each year, nor is the full range available to part-time students. Students are advised each year of the timetable of available electives. Substitution is not permitted if it unduly restricts the range of subjects studied to only one area of Photovoltaic Engineering.

The following courses are offered every second year and will not be offered in 2006. SOLA5051, SOLA5053, SOLA5054, SOLA5055, SOLA5056.
Industrial Experience Requirements

All students must complete at least 60 working days of approved industrial experience prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

3655 Photovoltaics and Solar Energy/Bachelor of Science

Bachelor of Engineering Bachelor of Science BE BSc

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

Students may seek to undertake a five-year full-time combined program leading to the award of the degrees of Bachelor of Engineering in Photovoltaics and Solar Energy and a Bachelor of Science (BE BSc). Students complete a full professionally accredited 4-year Engineering program (which includes Science courses) and add an additional 5th year to augment the Science component of the combined degree program.

Program Objectives and Learning Outcomes

The broad objective of the program is to produce well educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers.

The program aims to produce graduates that are self-motivated; lifelong learners; critical thinkers; problem solvers; independent investigators; team players; good communicators; effective managers; and are environmentally, socially and ethically responsible. More specifically, the School hopes to train and educate engineers to cater for the needs of the rapidly growing and evolving photovoltaics industry.

Students in each course are assessed by way of assignments, tutorials, laboratory/project work and formal examinations. In a small number of courses/projects students are also assessed on their communication, leadership skills and project management through seminar presentations, reports and their demonstrated ability to manage a group/project.

Offering the Photovoltaics and Solar Energy Engineering program in combination with a Bachelor of Science, enables students with broader interests to simultaneously pursue a second degree which will extend their skill set and knowledge beyond the professionally oriented engineering program.

Program Structure

Plan SOLA13655

Students should start discussing their program with representatives of the Faculty of Science as soon as possible, preferably well before enrolment in Year 2. Enquiries should be directed to the Executive Officer in the Science Student Centre, or the Associate Dean for Student Affairs in the Faculty of Science.

Students should work out for themselves the Science program they would like to add to the Photovoltaics and Solar Energy Engineering program. The Faculty of Science section in this Handbook describes the options. There are no special rules on what to include in each year. Students should schedule the Science and Engineering components to suit their preferences while meeting the constraints of timetables and prerequisites.

The Science component must be approved by the Faculty of Science. The final program and schedule must be approved by the School of Photovoltaic and Renewable Energy Engineering.

Honours

(a) BE with Honours

On completion of the requirements for the combined degree a student may qualify for the award of the BE degree with Honours in accordance with the rules for the BE in Photovoltaics and Solar Energy Engineering and the Faculty of Engineering rules for calculation of the grade of Honours (1st Class Honours: a weighted average of 75% or greater; 2nd Class Honours Division 1: a weighted average of 70% or greater; 2nd Class Honours Division 2: a weighted average of 65% or greater, a student being awarded the highest grade of Honours for which they qualify).
Courses making up a full 4-year engineering program described at least 102 units of credit comprising a major in an approved reports and their demonstrated ability to manage a group/project. of courses/projects students are also assessed on their communication, laboratory/project work and formal examinations. In a small number Students in each course are assessed by way of assignments, tutorials, and their disciplinary stream described in the Science section of this Handbook, or a major in Computer Science; and (c) At least 60 days of approved industrial training (required for the award of the BE degree) To meet these requirements, as part of their BE in Photovoltaics and Solar Energy program, students need to complete a strand offered within the Faculty of Science. Please see a list of strands in the program entry for 3642 BE in Photovoltaics and Solar Energy in this Handbook.

3656 Photovoltaics and Solar Energy/Bachelor of Arts

Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

With this combined degree program, students can add their choice of Arts program to the standard Engineering program offered by the School of Photovoltaic and Renewable Energy Engineering. The full range of Arts courses is available. Because the Engineering and Arts programs have many common objectives and content, such as mathematics and physics, only one more year of study is normally required to gain the additional qualification of Bachelor of Arts.

Students should start discussing their program with the Faculty of Arts and Social Sciences office as soon as possible, preferably well before enrolment in Year 2. Students should work out for themselves the Arts program they would like to add to their chosen Engineering program. The Faculty of Arts and Social Sciences section in this Handbook describes the options. The Arts component must be approved by the Faculty of Arts and Social Sciences. The final program and schedule must be approved by the School of Photovoltaic and Renewable Energy Engineering.

Program Objectives and Learning Outcomes

The broad objective of the program is to produce well educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers. The program aims to produce graduates that are self-motivated; lifelong learners; critical thinkers; problem solvers; independent investigators; team players; good communicators; effective managers; and are environmentally, socially and ethically responsible. More specifically, the School hopes to train and educate engineers to cater for the needs of the rapidly growing and evolving photovoltaics industry.

Students in each course are assessed by way of assignments, tutorials, laboratory/project work and formal examinations. In a small number of courses/projects students are also assessed on their communication, leadership skills and project management through seminar presentations, reports and their demonstrated ability to manage a group/project.

Offering the Photovoltaics and Solar Energy Engineering program in combination with a Bachelor of Arts, enables students with broader interests to simultaneously pursue a second degree which will extend their skill set and knowledge beyond the professionally oriented engineering program.

Program Structure

This program comprises five years of full-time study where, in addition to the BE program, students must complete 60 units of credit comprising a major sequence offered by the Faculty of Arts and Social Sciences. Students must apply through UAC for admission into or transfer to this combined program. There are no special rules on what to include in each year. Students should schedule the Arts and Engineering components to suit their preferences while meeting the constraints of timetables and prerequisites. Students who commence this program but subsequently do not wish to proceed with both areas of study, should apply in writing to the Program Authority for permission to revert to the single degree program.

Please contact the School of Photovoltaic and Renewable Energy Engineering and the Faculty of Arts and Social Sciences for more information.

Honours

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program; special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA, the award of the BA degree at Honours level requires two additional sessions of study. Students wishing to gain a degree at Honours level in Arts as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate School in the Faculty of Arts and Social Sciences.

AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules

1. In additional to the BE program, students must complete 60 units of credit in the BA program with no more than 24 units of credit obtained at Level 1 (i.e. in courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school of department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas: Australian Studies Chinese Studies Development Studies Education English Environmental Studies* European Studies Film French German Studies Greek History History and Philosophy of Science Indonesian Studies Japanese Studies Korean Studies Linguistics Media, Culture & Technology Music Philosophy Policy Studies Political Economy Politics and International Relations Russian Studies Sociology & Anthropology Spanish & Latin American Studies Theatre & Performance Studies Women's and Gender Studies
Students completing an Environmental Studies major sequence must complete, in addition to the 30 Upper Level units of credit specified, 6 level 3 units of credit in an approved course. Students must also complete a minor sequence of 24 units of credit on one of the other areas listed above.

3. Except for courses completed as part of the Environmental Studies major sequences, no more than 12 units of credit may be obtained from subjects in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE program can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students are exempt from the General Education requirement of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE BA program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of an Honours year. It should be noted that entry into a particular BA Honours program will require completion of courses additional to those specified under rules 1-4.

8. The total units of credit in the combined program is 5 x 48 = 240.

There will be a separate testamur for each part of the combined degree program.

For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ under Faculty Information and Assistance in this Handbook.

Industrial Experience Requirements
All students must complete at least 60 working days of approved industrial experience prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of industrial employment at a standard approved by the University.

3715 Photovoltaics & Solar Energy/Bachelor of Commerce
BE BCom
Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.

3658 Renewable Energy Engineering/Bachelor of Science
Bachelor of Engineering Bachelor of Science BE BSc
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
Students may seek to undertake a five-year full-time combined program leading to the award of two degrees, a Bachelor of Engineering in Renewable Energy Engineering, and a Bachelor of Science (BE BSc). The program is administered by the School of Photovoltaic and Renewable Energy Engineering, however students should seek advice from the Faculty of Science regarding the science component of their program. All programs must be approved by both the School of Photovoltaic and Renewable Energy Engineering and the Faculty of Science.

Program Objectives and Learning Outcomes
The broad objective of the program is to produce well educated graduates with the basic skills, attributes and knowledge required to practice as professional engineers. The program aims to produce graduates that are self-motivated, lifelong learners; critical thinkers; problem solvers; independent investigators; team players; good communicators; effective managers; and are environmentally, socially and ethically responsible. More specifically, the School hopes to train and educate engineers to cater for the needs of the rapidly growing and evolving photovoltaics industry.

Students in each course are assessed by way of assignments, tutorials, laboratory/project work and formal examinations. In a small number of courses/projects students are also assessed on their communication, leadership skills and project management through seminar presentations, reports and their demonstrated ability to manage a group/project.

Offering the Renewable Energy Engineering program in combination with a Bachelor of Science, enables students with broader interests to simultaneously pursue a second degree which will extend their skill set and knowledge beyond the professionally oriented engineering program.

Program Structure
With the combined degree program, students complete a full, professionally accredited 4-year Engineering program (which includes Science courses) and add an additional 5th year to augment the Science component of the combined degree program. In all, a minimum of 102 Units of Credit of Science courses must be taken within the combined program, which must include a Science Major defined in Table A in the Science Handbook, or an approved Major in Computer Science where this is permitted (Computer Science may not be combined with any other computing degree).

For Renewable Energy Engineering students to meet this criteria, they are required to substitute 12 units of credit of approved Science courses for SOLA5050 and SOLA5051 which form part of the standard Renewable Energy Engineering (3657) program.

Approved science courses include any course that forms part of the Maths or Physics strand in the Photovoltaics and Solar Energy (3642) program. Students will then have the opportunity to take SOLA5050 and SOLA5051 in their 3rd or 4th year as a professional elective. Students will need to complete Course Substitution Forms for these substitutions which are available from the School Office.

Award of the Degrees
(i) A student who completes the requirements for both the BE and BSc degrees shall receive at graduation a separate testamur for each of the degrees.
(ii) Both testamurs will be awarded at the same graduation ceremony.
(iii) A student may apply to discontinue the combined BE BSc programs and elect to complete either the BE or the BSc degree in accordance with the rules governing award of that degree. Following the discontinuation of one of the programs (BE or BSc), courses which count toward that program will not in general count toward the remaining single degree unless they meet the single degree requirements in their own right.

Enrolment
(i) An application to enrol as a candidate for the combined program shall be made through UAC or on the prescribed form for international students which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(ii) The candidate shall be enrolled as either a full-time or part-time student.

Honours
BE with Honours:
On completion of the requirements for the combined degree a student may qualify for the award of the BE degree with Honours in accordance with the rules for the BE program of specialisation and the Faculty of Engineering rules for calculation of the grade of Honours (1st Class Honours: a weighted average of 75% or greater; 2nd Class Honours Division i: a weighted average of 70% or greater; 2nd Class Honours Division ii: a weighted average of 65% or greater, a student being awarded the highest grade of Honours for which they qualify).

BSc with Honours:
On completion of the requirements for the combined degree a student may be qualified to enrol in an Honours program in the Bachelor of Science and to qualify for the award of the BSc with Honours after successfully completing an additional year of study (48 UOC) as specified in the rules of the Faculty of Science.

Academic Rules
For academic requirements relating to this program, please refer to Program Structure and contact the School of Photovoltaic and Renewable Energy Engineering for more information.
An education in surveying deals with topics such as satellite positioning, geodesy, mapping, survey测量technologies and computations, as applied to applications such as engineering and cadastral surveying, and land management and development in general. With the selection of the appropriate elective courses, a graduate may choose instead to specialise in Spatial Information Systems (SIS), a fast moving IT area. Topics include computing, databases, geographic information systems, GPS technologies, digital mapping, remote sensing and image analysis. SIS applications include land information and resource management, navigation, and telematics.

### 3741 Bachelor of Engineering in Surveying & SIS

The BE in Surveying and SIS is a four year full-time degree program. This program aims to prepare a graduate for a broad range of career opportunities in the various branches of surveying and the numerous SIS disciplines. To this end, the program covers general scientific and IT principles, as well as specialised surveying and SIS topics. This specialisation is provided through the provision of a wide range of elective courses offered in the third and fourth year of the program.

The degree of BE in Surveying and SIS is recognised by the Board of Surveyors of NSW as meeting the requirements for entry as a candidate to become a Registered Surveyor. The degree is also recognised by the Institution of Surveyors, New South Wales, the Spatial Sciences Institute and the Institution of Engineers Australia, for admission as corporate members.

### 3746 Bachelor of Engineering in Surveying & SIS / Bachelor of Science

This combined degree program of five years full-time study enables a student to qualify for the award of the two degrees of Bachelor of Science and Bachelor of Engineering in Surveying & SIS. This program is open to all students who satisfy both the Surveying & SIS and Science entry conditions.

The program is designed for those wishing to broaden their career options.

### 3747 Bachelor of Engineering in Surveying & SIS / Bachelor of Arts

With this combined five year degree program, students can add their choice of an Arts major to the standard, professionally accredited engineering program offered by the School of Surveying and Spatial Information Systems. The program is open to all students who satisfy both the Engineering and Arts entry conditions. The program provides flexibility in the choice of courses within the full Arts program, and enables students to gain a broad education in Arts and Social Sciences, as well as undertake specialised studies in Surveying and SIS.

### 3715 Bachelor of Engineering in Surveying & SIS/Bachelor of Commerce

This combined degree of five ½ years full-time study enables a student to qualify for the award of the two degrees Bachelor of Engineering and Bachelor of Commerce. Please refer to full details under Program Rules and Information in this Handbook.

### 3741 Bachelor of Engineering in Surveying & SIS / Master of Engineering Science

Students may undertake a five year full-time fast-track program leading to the award of the degrees of BE in Surveying & SIS and a Masters of Engineering Science. The aim of the program is to offer an accelerated postgraduate coursework program to high achieving students. In addition to the undergraduate BE degree, graduates receive in-depth specialist training to facilitate employment in discipline specific consulting practices and other specialised disciplines. There is a testamur awarded for each degree. The BE degree will be awarded on the satisfactory completion of the first four years of the program.

### Professional Practice / Industrial Experience

Students are required to complete at least 60 days of Professional Practice experience in each of the above programs.

**Please note:** Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.

### 3741 Surveying and Spatial Information Systems

**Bachelor of Engineering BE**

**Typical Duration**

4 years

**Minimum UOC for Award**

192 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

The BE in Surveying and SIS is a four year, full time degree program. This program aims to prepare a graduate for a broad range of career opportunities in the various branches of Surveying and the numerous SIS disciplines. To this end the program covers general scientific and IT principles, as well as specialised Surveying and Spatial Information topics.

Specialisation is provided through the provision of elective courses offered in the third and fourth year of the program.

The degree of BE in Surveying and SIS is recognised by the Board of Surveying and Spatial Information of New South Wales as meeting the requirements for entry as a candidate to become a Registered Surveyor. The degree is also recognised by the Institution of Surveyors, New South Wales, the Spatial Sciences Institute and the Institution of Engineers Australia, for admission as corporate members.

**Program Objectives and Learning Outcomes**

Please contact the School of Surveying & Spatial Information Systems for information on the Program Objectives and Learning Outcomes.

**Program Structure**

**Year 1**

- **GMAT1100** Principles of Surveying (6 UOC)
- **GMAT1150** Survey Methods & Computations (6 UOC)
- **GMAI1200** Visualisation of Spatial Data (6 UOC)
- **GMAT1300** Computing Applications in Geomatics (6 UOC)
- **GMAI1400** Land Studies in Geomatics (6 UOC)
- **PHYS1100** Physics 1 (Geomatic Engineering) (6 UOC)

And one of the following courses:

- **MATH1131** Mathematics 1A (6 UOC)
- **MATH1141** Higher Mathematics 1A (6 UOC)

And one of the following courses:

- **MATH1231** Mathematics 1B (6 UOC)
- **MATH1241** Higher Mathematics 1B (6 UOC)

**Year 2**

- **GMAT2100** Electronic Surveying Instrumentation: Principles & Practice (6 UOC)
- **GMAT2110** Electronic & GPS Positioning Technologies (6 UOC)
- **GMAT2200** Geographic Information Systems & CAD (6 UOC)
- **GMAI2300** Analysis of Observations (3 UOC)
- **GMAT2350** Computing for Spatial Information Sciences (3 UOC)
- **GMAI2700** Geometry of Coordinate Reference Systems (6 UOC)
<table>

</table>

*Note:* PHYS2969 may not be offered every year. It can be done in Year 2 or 3.

### Year 3
The program structure for Years 3 and 4 of the program depends on the electives chosen by students.

- **GMAT3200** Geospatial Information Techniques and Applications (6 UOC)
- **GMAT3400** Cadastral Surveying 1 (3 UOC)
- **GMAT3410** Land Economics & Valuation (3 UOC)
- **GMAT3500** Photogrammetry and Remote Sensing (6 UOC)
- **GMAT3150** Field Projects (6 UOC)
- **General Education courses** (6 UOC)
- **Session 1 Electives** (12 UOC)
- **Session 2 Electives** (6 UOC)

#### Electives: Session One
- **BENV2901** City Planning Today (3 UOC)
- **COMP1011** Computing 1A (6 UOC)
- **CVEN0646** Water and Wastewater Engineering (3 UOC)
- **GMAT1100** Surveying Applications (6 UOC)
- **MATH1081** Discrete Mathematics (6 UOC)

#### Electives: Session Two
- **COMP1011** Computing 1A (6 UOC)
- **COMP1021** Computing 1B (6 UOC)
- **COMP2011** Data Organisation (6 UOC)
- **CVEN0656** Soil & Pavement Engineering (3 UOC)
- **GMAT3450** Cadastral Surveying 2 (3 UOC)
- **MATH1081** Discrete Mathematics (6 UOC)

### Year 4
- **GMAT4000** Thesis Part A (3 UOC)
- **GMAT4001** Thesis Part B (9 UOC)
- **GMAT4700** Project Management 1 (3 UOC)
- **GMAT4750** Project Management 2 (3 UOC)
- **GMAT4850** Surveying and Spatial Information Systems for Sustainability (3 UOC)

#### Session 1 Electives
- **GMAT4900** Principles of Global Navigation Satellite System (GNSS) Positioning (6 UOC)
- **GMAT4910** Modern Navigation & Positioning Technologies (6 UOC)
- **GMAT9211** Introduction to Geodesy (6 UOC)
- **MINE3410** Coal Mining Systems (6 UOC)
- **PLAN1122** Development Processes (6 UOC)
- **PLAN2111** Economics of Planning and Development (6 UOC)

#### Electives
Any remaining Year 3 electives and

- **GEOH3911** Environmental Impact Assessment (6 UOC)
- **GMAT4100** Project in Surveying and SIS (6 UOC)
- **GMAT4400** Land Management & Development Project 1 (6 UOC)
- **GMAT4410** Land Subdivision & Development (3 UOC)
- **GMAT4450** Land Management & Development Project 2 (6 UOC)
- **GMAT4900** Principles of Global Navigation Satellite System (GNSS) Positioning (6 UOC)

#### Session 2 Electives
- **GMAT4910** Modern Navigation & Positioning Technologies (6 UOC)
- **GMAT9211** Introduction to Geodesy (6 UOC)
- **MINE3410** Coal Mining Systems (6 UOC)
- **PLAN1122** Development Processes (6 UOC)
- **PLAN2111** Economics of Planning and Development (6 UOC)

The following electives 5 HPW, 6UOC courses may be chosen once COMP1011, COMP1021 and MATH1081 have been completed:

- **COMP2021** Digital System Structures (6 UOC)
- **COMP2041** Software Construction: Techniques and Tools (6 UOC)
- **COMP2411** Logic and Logic Programming (6 UOC)
- **COMP3111** Software Engineering (6 UOC)
- **COMP3121** Algorithms and Programming Techniques (6 UOC)
- **COMP3131** Programming Languages and Compilers (6 UOC)
- **COMP3211** Computer Architecture (6 UOC)
- **COMP3221** Microprocessors and Embedded Systems (6 UOC)
- **COMP3231** Operating Systems (6 UOC)
- **COMP3311** Database Systems (6 UOC)
- **COMP3331** Computer Networks and Applications (6 UOC)
- **COMP3411** Artificial Intelligence (6 UOC)
- **COMP3511** Human Computer Interaction (6 UOC)

and other electives with the approval of the Head of School.

The School has available a list of suggested subject selections for course streams in Cadastral Surveying and Land Development as well as GPS and Geographic Information Systems. Please contact the School Office.

**Total HPW Session 1 & 2 depends on electives chosen**

**Total units of credit:** 48

### General Education
Please refer to General Education Requirements under ‘Faculty Information and Assistance’ in this Handbook.

### Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

### Academic Rules
For program rules relating to the Bachelor of Engineering, please refer to the 'Rules for Progression and Award of Degrees' under 'Faculty Information and Assistance' in this Handbook.

### Industrial Experience Requirements
All students must complete at least 60 working days of approved professional practice prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of professional practice at a standard approved by the University.

### Field Excursions
Students may have to complete a number of field projects as part of their program and are expected to complete all necessary fieldwork for any course. They must be prepared to pay all the appropriate costs associated with these field projects, and must be in attendance at all scheduled examinations, except in exceptional circumstances.

### Professional Recognition
The degree of BE in Surveying and Spatial Information Systems is recognised by the Board of Surveying and Spatial Information of New South Wales as meeting requirements for entry as a candidate to become a Registered Surveyor in New South Wales. The degree is recognised by the Institution of Surveyors, New South Wales, the Spatial Sciences Institute, and the Institute of Engineers Australia (IEAust.) for admission as corporate members.

Students wishing to become Registered Surveyors after graduation are advised to gain practical experience under a Registered Surveyor during their program. Details are obtainable from the Registrar, Board of Surveying and Spatial Information of NSW, P.O. Box 143, Bathurst NSW 2795.

### 3746 Surveying and Spatial Information Systems/Bachelor of Science

#### Bachelor of Engineering Bachelor of Science BE BSc

- **Typical Duration:** 5 years
- **Minimum UOC for Award:** 240 units of credit
- **Typical UOC per Session:** 24 units of credit

#### Program Description
This combined degree program of five years full-time study enables a student to qualify for the award of the two degrees of Bachelor of Engineering in Surveying & SIS and Bachelor of Science. This program is open to all students who satisfy both the Surveying & SIS and Science entry conditions.

The program is designed for those wishing to broaden their career options.

#### Program Structure

##### Year 1

**Session One**

- **COMP1011** Computing 1A (6 UOC)
- **GMAT1100** Principles of Surveying (6 UOC)
- **PHYS1189** Physics 1 (Geomatic Engineering) (6 UOC)
And ONE of the following courses:
MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)

Session Two
COMP1021 Computing 1B (6 UOC)
MATH1150 Survey Methods & Computations (6 UOC)

And ONE of the following courses:
MATH1231 Mathematics 1B (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)
and Year 1 GMAT elective either
GMAT1400 Land Studies in Geomatics (6 UOC)

or
GMAT1200 Visualisation of Spatial Data (6 UOC)

Year 2
Session One
GMAT2100 Electronic Surveying Instrumentation: Principles & Practice (6 UOC)
GMAT2700 Geometry of Coordinate Reference Systems (6 UOC)
MATH1081 Discrete Mathematics (6 UOC)
MATH2289 Statistics 5U (3 UOC)
PHYS2969 Physics of Measurement (Geomatic Engineering) (3 UOC)

Session Two
COMP2011 Data Organisation (6 UOC)
GMAT2110 Electronic & GPS Positioning Technologies (6 UOC)
GMAT2200 Geographic Information Systems & CAD (6 UOC)
GMAT2300 Analysis of Observations (3 UOC)
and Year 2 free elective
Year 3
Session One
GMAT3200 Geospatial Information Techniques and Applications (6 UOC)
GMAT3400 Cadastral Surveying 1 (3 UOC)
COMP2xxx (a level 2 computing elective)

Year 3 electives
CVEN6646 Water and Wastewater Engineering (3 UOC)
GMAT3100 Surveying Applications (6 UOC)
General Education course/s

Year 4
Session One
GMAT4700 Surveying and Spatial Information Systems for Sustainability (3 UOC)
GMAT4850 Surveying and Spatial Information Systems for Sustainability (3 UOC)
COMP3 (a level 3 computing elective)

Year 4 GMAT electives from:
GMAT4400 Land Management & Development Project 1 (6 UOC)
GMAT4410 Land Subdivision & Development (3 UOC)
GMAT4900 Principles of Global Navigation Satellite System (GNSS) Positioning (6 UOC)

Session Two
GMAT4750 Project Management 2 (3 UOC)
COMP3XXX (a level 3 computing elective) and Year 4 GMAT electives from:
GMAT4020 Project in Surveying and SIS (6 UOC)
GMAT4450 Land Management & Development Project 2 (6 UOC)
GMAT4910 Modern Navigation & Positioning Technologies (6 UOC)
GMAT1921 Introduction to Geodesy (6 UOC)

Year 5
Session One
GMAT14000 Thesis Part A (3 UOC)
COMP3 (2 level 3 Comp Science & Engineering electives totalling 12 units of credit)
Year 5 electives (totalling 9 units of credit)

Session Two
GMAT4001 Thesis Part B (9 UOC)
COMP3XXX (a level 3 Comp Scie & Eng. elective), and Year 5 electives (9 units of credit).

Year 5 electives may be chosen from any of the remaining GMAT Year 4 electives or COMP level 3 or 4 courses.

Other arrangements of electives are possible with the approval of the Head of School.

Honours
In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate’s performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

Academic Rules
For academic rules relating to the combined degree Bachelor of Engineering Bachelor of Science, please refer to the ‘Rules for Progression and Award of Degrees’ under ‘Faculty Information and Assistance’ in this Handbook.

Industrial Experience Requirements
All students must complete at least 60 working days of approved professional practice prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of profession practice at a standard approved by the University.

Field Excursions
Students may require to complete a number of field projects as part of their program and are expected to complete all necessary fieldwork for any course. They must be prepared to pay all the appropriate costs associated with these field projects, and must be in attendance at all scheduled examinations, except in exceptional circumstances.

Professional Recognition
The degree of BE in Surveying and Spatial Information Systems is recognised by the Board of Surveying and Spatial Information of New South Wales as meeting requirements for entry as a candidate to become a Registered Surveyor in New South Wales. The degree is recognised by the Institution of Surveyors, New South Wales, the Spatial Sciences Institute, and the Institution of Engineers Australia (IEAust.) for admission as corporate members.

Students wishing to become Registered Surveyors after graduation are advised to gain practical experience under a Registered Surveyor during their program. Details are obtainable from the Registrar, Board of Surveying and Spatial Information of NSW, P.O. Box 143, Bathurst NSW 2795.

3747 Surveying and Spatial Information Systems/Bachelor of Arts

Bachelor of Engineering Bachelor of Arts BE BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
With this combined five year degree program, students can add their choice of an Arts major to the standard, professionally accredited
engineering program offered by the School of Surveying and Spatial Information Systems. The program is open to all students who satisfy both the Engineering and Arts entry conditions. The program provides flexibility in the choice of courses within the full Arts program and enables students to gain a broad education in Arts and Social Sciences, as well as to engage in specialised studies in Surveying and Spatial Information Systems.

**Program Structure**

The program is administered by the School of Surveying and Spatial Information Systems.

Students should start discussing their program with representatives of the School and the Faculty of Arts and Social Sciences as soon as possible, preferably well before enrolment. Students should work out for themselves the BA program they would like to add to their Surveying and Spatial Information Systems program. The Faculty of Arts and Social Sciences section in this Handbook describes the options, and the School of Surveying and Spatial Information Systems can supply sample programs.

There are no special rules on what to include in each year. Students should schedule the Arts and Surveying and Spatial Information Systems components to suit their preferences whilst meeting the constraints of timetables and prerequisites.

The Arts component must be approved by the Faculty of Arts and Social Sciences.

The final program and schedule must be approved by the School of Surveying and Spatial Information Systems.

**Honours**

In the Bachelor of Engineering degree programs the same formal program is offered to both Pass students and to those aiming at Honours. Honours will be awarded for meritorious performance over the program: special attention is paid to a candidate's performance in the final year courses and thesis project.

In the cases of combined degrees, such as the BE BA or the BE BSc, the award of the BA or BSc degree at Honours level requires two additional sessions of study.

Students wishing to gain a degree at Honours level in Arts or in Science as part of their combined degree program must meet all the relevant requirements of the Faculty of Arts and Social Sciences or the Faculty of Science and of the appropriate school concerned. Students may enrol for the Honours year only on the recommendation of the Head of their School in the Faculty of Engineering and with the approval of the Head of the appropriate Arts or Science School. For Honours in Science, approval must also be sought from the Science Cross Faculty Standing Committee or its delegated authorities. AUSTUDY support is available for the combined degree program including the Honours level.

**Academic Rules**

1. In addition to the BE program, students must complete 60 units of credit in the BE program with no more than 24 units of credit obtained at Level 1 (i.e. in courses designed for students in their first year of study). Of these 24 Level 1 units of credit, no more than 12 units of credit may be from any one school of department.

2. Students must complete a major sequence (42 units of credit) in one of the following areas:
   - Australian Studies
   - Chinese Studies
   - Development Studies
   - Education
   - English
   - Environmental Studies*
   - European Studies
   - Film
   - French
   - German Studies
   - Greek
   - History
   - History and Philosophy of Science
   - Indonesian Studies
   - Japanese Studies
   - Korean Studies
   - Linguistics
   - Media, Culture & Technology
   - Music
   - Philosophy
   - Policy Studies
   - Political Economy
   - Politics and International Relations
   - Russian Studies
   - Sociology & Anthropology
   - Spanish & Latin American Studies
   - Theatre & Performance Studies
   - Women's and Gender Studies

   *Students completing an Environmental Studies major sequence must complete, in addition to the 10 Upper Level units of credit specified, 6 level 1 units of credit in an approved course. Students must also complete a minor sequence of 24 units of credit on one of the other areas listed above.

3. Except for courses completed as part of the Environmental Studies major sequences, no more than 12 units of credit may be obtained from subjects in the BA program which are offered by schools outside the Faculty of Arts and Social Sciences.

4. No course included for credit in the BE program can be included in the 60 units of credit required at Rule 1 for the BA program.

5. Students are exempt from the General Education requirement of the BE program. However, students will not be eligible for graduation for the BE until a minimum of 12 units of credit of the BA have been successfully completed.

6. Students who complete the requirements for the BA program and the first two years of the BE BA program may proceed to graduation with the degree of Bachelor of Arts.

7. Students may be awarded Honours in the BA by successful completion of an Honours year. It should be noted that entry into a particular BA Honours program will require completion of courses additional to those specified under rules 1-4.

8. The total units of credit in the combined program is 5 x 48 = 240.

There will be a separate testamur for each part of the combined degree program.

For academic rules relating to the Bachelor of Engineering component of this combined program, please refer to the ‘Rules for Progression and Award of Degrees’ under Faculty Information and Assistance in this Handbook.

**Industrial Experience Requirements**

All students must complete at least 60 working days of approved professional practice prior to enrolment in the final year of their program. The award of the degree is dependent on the completion of the requisite periods of professional practice at a standard approved by the University.

**Field Excursions**

Students may have to complete a number of field projects as part of their program and are expected to complete all necessary fieldwork for any course. They must be prepared to pay all the appropriate costs associated with these field projects, and must be in attendance at all scheduled examinations, except in exceptional circumstances.

**Professional Recognition**

The degree of BE in Surveying and Spatial Information Systems is recognised by the Board of Surveying and Spatial Information of New South Wales as meeting requirements for entry as a candidate to become a Registered Surveyor in New South Wales. The degree is recognised by the Institution of Surveyors New South Wales, the Spatial Sciences Institute, and the Institution of Engineers Australia (IEAust.) for admission as corporate members.

Students wishing to become Registered Surveyors after graduation are advised to gain practical experience under a Registered Surveyor during their program. Details are obtainable from the Registrar, Board of Surveying and Spatial Information of NSW, P.O. Box 143, Bathurst NSW 2795.

**3715 Surveying & Spatial Information Systems/Bachelor of Commerce**

**BE BCom**

Please refer to the program entry for 3715 Bachelor of Engineering Bachelor of Commerce under ‘Program Rules and Information’ in this Handbook.
Bachelor of Engineering Master of Biomedical Engineering
BE MBiomedE

Please contact Biomedical Engineering or go to the Biomedical Engineering website (www.gsbme.unsw.edu.au) for specific information on the concurrent degrees.

3757 Bachelor of Engineering (Biometrics)/Master of Biomedical Engineering
3048 Bachelor of Engineering (Chemical Engineering)/Master of Biomedical Engineering
3728 Bachelor of Engineering (Computer Engineering)/Master of Biomedical Engineering
3727 Bachelor of Engineering (Electrical Engineering)/Master of Biomedical Engineering
3138 Bachelor of Engineering (Materials Science)/Master of Biomedical Engineering
3683 Bachelor of Engineering (Mechanical Engineering)/Master of Biomedical Engineering
3688 Bachelor of Engineering (Mechatronic Engineering)/Master of Biomedical Engineering
3749 Bachelor of Engineering(Software Engineering)/Master of Biomedical Engineering
3723 Bachelor of Engineering(Telecommunications Engineering)/Master of Biomedical Engineering

Courses offered in each program can be found listed under the relevant undergraduate teaching school.

Further Study
Postgraduate coursework programs in Biomedical Engineering are also offered. These are the Master of Biomedical Engineering, the Master of Engineering Science in Biomedical Engineering, and the Graduate Diploma in Biomedical Engineering.

Biomedical Engineering research programs offerings are the Master of Science, Master of Engineering and PhD. Research areas can be found listed in the Postgraduate Handbook or on the school website: www.gsbme.unsw.edu.au

Please note: Most undergraduate programs in the Faculty of Engineering are currently under revision, subject to approval by the University Council. Students commencing in 2006 should refer to the Online Handbook (www.handbook.unsw.edu.au) for up-to-date information about program structures.
A Message from the Dean
Welcome to the UNSW Law Faculty. The Law Faculty is committed to teaching and scholarly excellence within a setting of social responsibility. We are also dedicated to preserving the highest levels of student satisfaction in their legal and taxation education.

A Distinctive Faculty
The UNSW Law Faculty has a number of important distinguishing features. The Faculty believes that intellectual and social development is best honed when student views are recognised, appreciated and shared. The Law School, from its inception, began a new tradition of teaching in Australia: interactive teaching and learning in small groups. This mode has since become a model in other law faculties as well. We believe that teaching in small groups of around 40 students stimulates the educational process. The result is a more robust and sharpened learning environment that helps students to develop superior powers of legal analysis.

Our Tax School, Atax, offers a unique distance education program in taxation that is consistent with small group teaching. Our specialised legal centres provide hands-on small group interaction in which students can learn about human rights, indigenous legal rights, constitutional and comparative law, and financial, consumer and youth law. Our library staff further complement small group teaching with their own strong backgrounds in research and service. Last, but not least, our law student representatives actively engage in Law Faculty governance on key committees and in day-to-day administration of Faculty affairs.

An Educational and Professional Environment
Legal education at UNSW reflects two parallel traditions. It combines the tradition of a university education with the professional education of lawyers and those engaged in the taxation profession. While these two traditions are sometimes viewed as disparate, the UNSW Law Faculty treats them as complementary, indeed as mutually reinforcing. We stress the virtue of exploring and applying ideas both as a matter of intellectual inquiry and in applying legal principles to diverse social contexts.

We also hold that a legal education is intended to expose students to social responsibility in its diverse manifestations. We recognise such social responsibility variously, such as by requiring students to participate in the work of the Kingsford Legal Centre (the Faculty’s community legal centre).

We believe, too, that social and legal institutions are mirrored in diversity, not in the pre-emptive interests of any one social group to the exclusion of all others. The UNSW Law Faculty provides education in human rights and consumer law. It also does so in corporate and commercial law. Legal education is a tapestry of difference, not of monolithic uniformity.

We invite you to join us at the UNSW Law Faculty. We challenge you to question tried and tested ideas. We encourage you to study through discourse and to learn by example. Legal education at UNSW is concerned, not only with higher values, but also with applying them in an ethical, coherent and ultimately, sustainable manner.

Leon Trakman, SJD (Harvard)
Dean and Professor of Law

School of Law

Information and Assistance

Who Can Help?
If you require advice about enrolment, degree requirements, progression within programs or information about course content and requirements, contact the School of Law Student Administration Office.
Please refer to the School of Law homepage for timetables and general information: www.law.unsw.edu.au

Advanced Standing
The policy of the School of Law is to grant credit for courses which have been successfully completed in another School of Law where those courses, in the opinion of the School, are equivalent in content and depth to comparable courses at UNSW. Applicants who have completed a full law degree in another country are normally granted credit equivalent to one third of the UNSW degree. All matters regarding credit are at the discretion of the School.

Computing Information
The School of Law manages a multimedia computer laboratory equipped with 26 PCs for instructional purposes. In addition, law students have access to two multimedia computer workspaces which contain 15 networked computers and smart-card controlled laser printers. Research students have access to two dedicated computer workspaces equipped with 21 multimedia computers and printing facilities. The School maintains a World Wide Web server, a CD-ROM server and a document scanning and Character Recognition facility. All students have access to a range of research tools from the computer desktops including email, online and CD-ROM based national and international legal databases, library catalogues and World Wide Web access. For more information, please refer to the booklet ‘IT Resources for Students’ or visit the website at www.law.unsw.edu.au

Course Descriptions
Descriptions of courses offered in 2006 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at www.handbook.unsw.edu.au

Enrolment Procedures
Continuing Students
Continuing students should follow the procedures publicised at the end of the year.

New Students
New students are informed of enrolment procedures at the time of offer.

Full-time Status
The majority of Law programs are full-time and require attendance at classes four days per week. Students are reminded that a full-time program is intended for students who devote the principal part of their available time to their program. Any additional commitment, in the form of paid work, training for sport at a significant level of achievement or voluntary work in community organisations, is bound to have an effect on a student’s work. Past experience shows that additional commitments beyond 10–15 hours per week almost invariably have an adverse effect on student performance and in some cases have led directly to failure. Students are strongly advised that, if an outside commitment of this order is likely to be maintained consistently over a session, the commitment should be discussed in advance with the Associate Dean (Undergraduate). It should be noted, however, that it is the individual teachers who determine whether outside commitments should constitute grounds for consideration in meeting the requirements of particular courses.

Part-time Status
Students undertaking the part-time program for Bachelor of Laws are expected to attend classes on two afternoons per week during the academic year, usually between 2pm and 6pm on Day 1 and 2pm to 6pm on Day 2.

General Education Requirements
Law students enrolled in the Bachelor of Jurisprudence Bachelor of Laws program must complete General Education requirements. All other law students are deemed to have satisfied the General Education requirement. Detailed information about General Education courses is available in the General Education section of this Handbook.

Guidelines for Maximum Workload
The sequence of study for each program is set out under ‘Program Rules and Information’ in this section of the Handbook. Any student wishing to vary their program (law or non-law) by enrolling in a reduced program or in courses which do not conform to the normal sequence, must seek approval from the Associate Dean (Undergraduate). Undergraduate students wishing to overload must submit an ‘Overload Request’ form at the Student Administration Enquiry Counter. Permission can only be given on the basis of a written application in advance of the relevant session.

Rules for Progression
The School of Law uses a range of assessment methods to assess students. These vary from course to course and include formal examinations, take-home examinations, research projects, class participation, essays and moots (mock trials). Progression in programs is generally dependent on the successful completion of prerequisites and corequisites for courses as listed in the schedules of courses for each program. Students are required to have completed 84 units of credit of core Law courses before enrolling in any elective course.
Summary of Programs

The following programs are available:

Law Programs

Bachelor of Laws (three years full-time), this program is available only to graduates or graduands – program code 4790

Bachelor of Laws (six years part-time), this program is only available to graduates and people over 21 years of age who have completed the University Preparation Program to the requisite standard – program code 4791

Jurisprudence Program

Bachelor of Jurisprudence (three years full-time), this program is only available as part of the combined Juris/Law program. Students unable to complete the requirements for the combined degree may apply to graduate with a Juris.

Combined Programs

Bachelor of Architecture and Bachelor of Laws (seven years full-time) – program code 4705

Bachelor of Art Theory and Bachelor of Laws (five years full-time) – program code 4703

Bachelor of Arts and Bachelor of Laws (five years full-time) – program code 4760

Bachelor of Arts (Media and Communications) and Bachelor of Laws (five years full-time) – program code 4764

Bachelor of Commerce and Bachelor of Laws (five years full-time) – program code 4731

Bachelor of Economics and Bachelor of Laws (five years full-time) – program code 4744

Bachelor of Engineering and Bachelor of Laws (six years full-time) – program codes 4775 and 4777

Bachelor of International Studies and Bachelor of Laws (six years full-time) – program code 4765

Bachelor of Jurisprudence and Bachelor of Laws (five years full-time) – program code 4780

Bachelor of Planning and Bachelor of Laws (seven years full-time) – program code 4707

Bachelor of Science and Bachelor of Laws (five years full-time) – program code 4770

Bachelor of Social Science and Bachelor of Laws (five years full-time) – program code 4761

Bachelor of Social Work and Bachelor of Laws (six years full-time) – program code 4785

Admission to Combined Programs

Students who satisfy the entry requirements may enter the combined programs directly in Year 1. Alternatively, students may apply to transfer into a combined law degree after the completion of one year of study (48 units of credit). Admission is based on a combination of UAI score and tertiary results.

Program Transfers: Students enrolled in combined law programs who discover they have made a wrong choice of program should consult a student advisor in the School of Law as soon as possible. It is sometimes possible to effect changes without seriously affecting progress in the new program; the earlier the change can be made, the easier the transition.

Program Rules and Information

School of Law

4790 Bachelor of Laws (Full-time)

LLB

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description

This program enables students who have already completed another degree to obtain the Bachelor of Laws degree.

1. Duration/Award:
The program is a three-year full-time program leading to the award of Bachelor of Laws (LLB).

2. Entry Requirement:
The program is available to graduates or graduands of another Faculty of UNSW or another approved university.

3. Attendance Requirement:
This program is full-time and requires attendance at classes for four days per week. A part-time version of this program is available for those students who are unable to study full-time (see program 4791).
Program Objectives and Learning Outcomes

Students will acquire a sound knowledge base in the discipline of Law due to their completion of a sequence of core courses and a wide range of elective courses.

Program Structure

Approved Sequence

There is no assumed knowledge requirement for entry to Faculty of Law courses but students must study law courses in an approved sequence. An approved sequence of courses for the program is set out below; other sequences may be approved in special circumstances.

Year 1

Session One

LAW1001 Criminal Law 1 (6 UOC)
LAW1052 Foundations of Law (6 UOC)
LAW1071 Contracts 1 (3 UOC)
LAW2140 Public Law (3 UOC)
LAW6210 Law, Lawyers and Society (6 UOC)

Session Two

LAW1011 Criminal Law 2 (6 UOC)
LAW1061 Torts (6 UOC)
LAW1072 Contracts 2 (6 UOC)
LAW2160 Administrative Law (6 UOC)

Year 2

LAW2150 Property, Equity and Trusts 1 (6 UOC)
LAW2152 Property and Equity 2 (6 UOC)
LAW2153 Federal Constitutional Law (6 UOC)
LAW2311 Litigation 1 (6 UOC)
LAW2321 Litigation 2 (6 UOC)
LAWS4010 Business Associations 1 (6 UOC)
LAWS7420 Advanced Legal Research (2 UOC)
Law elective (4 UOC)

Plus ONE of the following courses
LAW6320 Legal Theory (6 UOC)
LAW682U Law and Social Theory (6 UOC)

Year 3

Law electives (48 UOC)

Total Units 144 UOC

Academic Rules

Rules Relating to the Bachelor of Laws Program and the Bachelor of Jurisprudence Program

1. (1) The Bachelor of Laws degree may be conferred on the completion of any of the following programs:
   (a) Bachelor of Laws
   (b) Bachelor of Architecture and Bachelor of Laws
   (c) Bachelor of Arts and Bachelor of Laws
   (d) Bachelor of Arts (Asian Studies) and Bachelor of Laws
   (e) Bachelor of Arts (Media and Communications) and Bachelor of Laws
   (f) Bachelor of Art Theory and Bachelor of Laws
   (g) Bachelor of Commerce and Bachelor of Laws
   (h) Bachelor of Economics and Bachelor of Laws
   (i) Bachelor of Engineering and Bachelor of Laws
   (j) Bachelor of International Studies and Bachelor of Laws
   (k) Bachelor of Jurisprudence and Bachelor of Laws
   (l) Bachelor of Science and Bachelor of Laws
   (m) Bachelor of Social Science and Bachelor of Laws
   (n) Bachelor of Social Work and Bachelor of Laws
   (o) Bachelor of Planning and Bachelor of Laws

1. (2) The programs set out in paragraphs (b) to (o) of subrule (1) hereof are referred to in these Rules as ‘combined programs’, and shall be programs of full-time study of not less than five years’ duration.

1. (3) The program leading to the award of the degree of Bachelor of Laws (otherwise than as part of a combined program) shall be either:
   (a) a program of part-time study which (unless otherwise approved by the Faculty for special reasons) shall be of not less than six years’ duration; or
   (b) a program of full-time study of not less than three years’ duration, but no student shall be eligible to enrol in such a program unless he or she is a graduate or graduand of any Faculty of the University or another university approved by the Faculty, or has other qualifications or experience deemed acceptable by the Faculty.

2. No person shall be permitted to enrol in any program in the Faculty of Law at the same time as he or she is enrolled for any other degree or diploma in the University or elsewhere, except as may be necessary to complete the requirements of a combined program, or with the approval of the Faculty.

3. Where, in these Rules, reference is made to the requirement that a candidate shall complete a program, the requirement shall be construed as meaning that the candidate shall:
   (1) attend such lectures, seminars, tutorials or other classes, and such court sessions, offices or institutions as may be described in that program, and maintain a satisfactory standard of preparation for and participation in such classes and activities;
   (2) perform satisfactorily in such exercises, essays, theses and other work (whether written, oral or practical) as may be prescribed in that program and undertake any prescribed reading related to that program; and
   (3) attain a satisfactory standard in the examination or examinations, and such other means of assessment of a candidate’s results in that program as the Faculty may prescribe.

4. The Faculty of Law shall specify a number of units of credit in respect of each Law course for which credit is given in the award of the degree of Bachelor of Jurisprudence or the degree of Bachelor of Laws (whether taken separately or as part of a combined program). On completion of the course, a candidate shall be credited with the specified number of points.

5. (1) Compulsory Courses

In the case of the Bachelor of Laws degree program credit shall be given for the courses set out in the following table, each of which shall, unless otherwise determined by the Faculty, carry the number of units of credit (if any) specified.

and any other courses specified by the Faculty.

5.4 Postgraduate Electives Available to Undergraduates

The Faculty has determined that, with the permission of the Associate Dean and the course teacher, undergraduate students may enrol in one or more courses offered in the Master of Laws by coursework degree. The units of credit so earned shall be the same as are specified in the Course Descriptions for the Master of Laws.

General guidelines: Students may apply to enrol in an LLM course provided they:

- have completed all compulsory courses;
- have completed any prerequisites;
- are within the last two years of their program;
- have no failures in the last two years;

Such courses shall be taken in a sequence approved by the Faculty.

6. Bachelor of Laws: A candidate for the award of the degree of Bachelor of Laws (whether taken as part of a combined program or as a separate degree) shall complete:

6.1 all of the courses prescribed in Rule 5 under the heading ‘Compulsory Courses’, totalling 92 units of credit,

6.2 selected courses from the courses prescribed in Rule 5 under the heading ‘Elective Courses’ so as to comply with Rule 7,

6.3 such Legal Research and Writing Programs, Prescribed Readings in Law, Moot Court Work and other work as the Faculty may require.

7. (1) Total Units of Credit: A candidate for the award of the degree of Bachelor of Laws shall complete Elective Courses prescribed in Rule 6 to the extent necessary to bring his or her total units of credit for Compulsory and Elective Law Courses to:

(a) Total: 144 UOC (Core: 92 UOC; Electives: 52 UOC)

- Bachelor of Architecture Bachelor of Laws
- Bachelor of Engineering (Civil) Bachelor of Laws
- Bachelor of Engineering (Environmental) Bachelor of Laws
- Bachelor of Town Planning Bachelor of Laws
- Bachelor of Laws

(b) Total: 144 - 150 UOC (Core: 92 UOC; Electives: 52 - 58 UOC)

- Bachelor of Social Work Bachelor of Laws

(c) Total: 150 UOC (Core: 92 UOC; Electives: 58 UOC)

- Bachelor of Social Science Bachelor of Laws

(d) Total: 156 UOC (Core: 92 UOC; Electives: 64 UOC)

- Bachelor of Arts Bachelor of Laws
- Bachelor of Commerce Bachelor of Laws
- Bachelor of Economics Bachelor of Laws

(e) Total: 150 UOC (Core: 92 UOC; Electives: 56 - 60 UOC; Research Project 2 UOC)

- Bachelor of Art Theory Bachelor of Laws
- Bachelor of Science Bachelor of Laws

(f) Total: 156 - 174 UOC (Core: 92 UOC; Electives: 64 - 82 UOC)

- Bachelor of Jurisprudence Bachelor of Laws

7. (2) Approval: A candidate’s choice of Elective Courses shall require the approval of the Faculty.

8. Combined Program: A candidate for the award of the degree of Bachelor of Laws as part of a combined program shall not be eligible to be awarded that degree until he or she has completed the additional requirements applicable to the other degree.

9. Bachelor of Jurisprudence/Bachelor of Laws: In the case of the combined program leading to the award of the degrees of Bachelor of Jurisprudence and Bachelor of Laws, the requirement for the award of the Bachelor of Jurisprudence degree shall be:

(i) Completion of all requirements of the Bachelor of Laws degree program (including Law courses totalling not less than 156 units of credit).

(ii) Completion of a minimum of 54 units of credit in courses in another Faculty or Faculties comprising (unless specially approved by the Faculty) a major sequence of three years’ study comprising 42 units of credit, plus an additional first year course comprising 12 units of credit. Unless he or she obtains special permission from the relevant Head of School, a
A student shall be bound by any requirements as to course prerequisites normally applicable to a course in another Faculty.

(iii) Completion of electives totalling 24 units of credit of electives selected from either the Faculty of Law or another Faculty.

(iv) Completion of General Education courses totalling 6 units of credit.

(v) A candidate shall obtain the approval of the Faculty of Law for the selection, and sequence of study, of courses in other Faculties. In approving such courses, the Faculty shall have regard to the contribution the study of such courses may reasonably be expected to make to the development of the candidate's capacity as a lawyer and understanding of the law.

10. Bachelor of Jurisprudence: The requirement for the award of the Bachelor of Jurisprudence degree shall be:

(i) completion of a program of full-time study of not less than three years' duration comprising law courses totalling not less than 78 units of credit and including the following compulsory courses totalling 54 units of credit:

   **Year 1**
   - LAWS1052 Foundations of Law: 6 UOC
   - LAWS1061 Torts: 6 UOC
   - LAWS1071 Contracts 1: 6 UOC
   - LAWS1072 Contracts 2: 3 UOC
   - LAWS2140 Public Law - 3 UOC

   **Year 2**
   - LAWS1001 Criminal Law 1: 6 UOC
   - LAWS1011 Criminal Law 2: 6 UOC
   - LAWS2160 Administrative Law: 6 UOC
   - LAWS56210 Law, Lawyers & Society: 6 UOC

   **Year 3**
   - LAWS8320 Legal Theory: 6 UOC
   - or
   - LAWS8820 Law and Social Theory: 6 UOC

(ii) Completion of a minimum of 54 units of credit of courses in another faculty or faculties comprising (unless specially approved by the Faculty) a major sequence of three years' study comprising 42 units of credit, plus an additional first year course comprising 12 units of credit. The candidate shall be bound by any requirements as to course prerequisites normally applicable to a course in another faculty.

(iii) Completion of General Education courses totalling 12 units of credit.

(iv) A candidate shall obtain the approval of the Faculty of Law for the selection, and sequence of study, of courses in other faculties. In approving such courses, the Faculty shall have regard to the contribution the study of such courses may reasonably be expected to make to the development of the candidate’s capacity as a lawyer and understanding of the law.

11. Part-Time Study: A student shall not be enrolled as a part-time student unless he or she satisfies the Faculty that his or her special circumstances preclude full-time study, and that his or her previous experience and/or study make it appropriate to admit him or her to part-time study for the award of the degree of Bachelor of Laws as a separate degree.

12. Faculty: In these Rules, unless the contrary is indicated, ‘the Faculty’ means the Faculty of Law.

4791 Bachelor of Laws (Part-time)

**LLB**

**Typical Duration**
6 years part-time

**Minimum UOC for Award**
144 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**
This program enables students who have already completed another degree to obtain the Bachelor of Laws degree on a part-time study basis. The program covers all the foundation areas of Law in theory and practice.

**Duration/Award**
The program is a six-year part-time program leading to the award of Bachelor of Laws and satisfies academic requirements for admission to practice.

**Entry Requirements**
The program is only available to graduates and people over 21 years of age who have completed the University Preparation Program. The program is not available to people who proceed directly from the Higher School Certificate.

**Attendance Requirements**
The program involves attendance at the Kensington campus on two afternoons a week.

**Electives**
The courses of the LLB degree program are set out in Rule 5 of the Academic Rules, please refer to entry for 4790 Bachelor of Laws. However, it will not be possible to provide the full range of electives at times convenient to part-time students.

**Approved Sequence of Study**
Students must study law courses in an approved sequence. An approved sequence of courses for the program is set out below; other sequences may be approved in special circumstances.

**Transfer to the Full-Time Program**
Students enrolled in program 4791 (part-time) are eligible to apply to transfer to 4790 (full-time) after completing 48 units of credit in the part-time program.

**Program Objectives and Learning Outcomes**
This program aims to provide students with a firm foundation of knowledge relating to the theory and practice of Law.

**Program Structure**

**Year 1**

1. **Session One**

   - LAWS1052 Foundations of Law: 6 UOC
   - LAWS1061 Torts: 6 UOC
   - LAWS1072 Contracts 2: 3 UOC
   - LAWS2140 Public Law: 3 UOC

2. **Session Two**
   - LAWS1061 Torts: 6 UOC
   - LAWS1072 Contracts 2: 6 UOC

**Year 2**

- LAWS1001 Criminal Law 1: 6 UOC
- LAWS1011 Criminal Law 2: 6 UOC
- LAWS2160 Administrative Law: 6 UOC
- LAWS56210 Law, Lawyers & Society: 6 UOC

**Year 3**

- LAWS1081 Property, Equity, and Trusts 1: 6 UOC
- LAWS1082 Property, Equity, and Trusts 2: 6 UOC
- LAWS2311 Litigation 1: 6 UOC
- LAWS2321 Litigation 2: 6 UOC

**Year 4**

- LAWS2150 Federal Constitutional Law: 6 UOC
- LAWS4010 Business Associations 1: 6 UOC
- LAWS7420 Advanced Legal Research: 2 UOC
- Law electives: 4 UOC

**Year 5**

- Law electives: 24 UOC

**Year 6**

- Law electives: 24 UOC

**Academic Rules**
For Academic Rules relating to the Bachelor of Laws program, please refer to the entry for 4790 Bachelor of Laws.
4780 Bachelor of Jurisprudence Bachelor of Laws
BJuris LLB

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
This program combines the professional Bachelor of Law (LLB) program with the Bachelor of Jurisprudence (BJuris).

The BJuris degree is available either as part of the combined Jurisprudence/Law program or as an "exit degree" for students who decide after admission not to proceed with an LLB degree. It is not available as a separate pass degree for admission purposes. Students wishing to graduate with a BJuris must satisfy the requirements as listed in Rule 10 of the Academic Rules (see refer to the entry for 4790 Bachelor of Laws).

The Bachelor of Jurisprudence, unlike the LLB degree, is not designed to provide a qualification for the professional practice of law. It provides a basic knowledge of law, an opportunity to study selected legal courses of special interest, and significant study in other faculties. Various combinations of non-law courses are possible and the program may be moulded to meet various vocational ends, eg for industrial officers or advocates, public servants, business executives or law librarians.

Teaching methods in Law courses are the same as in the LLB program.

Duration/Awards
The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Jurisprudence and Bachelor of Laws (BJuris LLB).

Assumed Knowledge
Students must satisfy any assumed knowledge requirements (but not general Faculty assumed knowledge requirements) for courses studied in other faculties.

Non-Law Courses
The non-law courses shall include, unless otherwise approved, a major sequence of 42 units of credit approved by the faculty offering the major sequence. There is an additional requirement of 12 units of credit of non-law courses.

Students are required to obtain the approval of the Faculty of Law for their proposed program of non-law courses and the order in which they are to be studied. In approving such courses, the Faculty shall have regard to the contribution the study of such courses may reasonably be expected to make to the development of his or her capacity as a lawyer and understanding of the law.

BJuris
Candidates may be awarded the degree of Bachelor of Jurisprudence subject to satisfying the requirements as listed in Rule 10 of the Academic Rules, including satisfaction of General Education requirements for the single pass degree (12 units of credit).

Approved Sequence of Study:
Students must study non-law courses in a sequence approved by the non-law faculty and the Faculty of Law, and law courses in a sequence approved by the Faculty of Law. Approved sequences for each combined program are given below; other sequences may be approved under special circumstances.

Program Objectives and Learning Outcomes
On completion of this combined degree program, students should have attained a basic knowledge of the theory and practice of law.

Program Structure
Year 1
Session One
- LAWS1052 Foundations of Law (6 UOC)
- LAWS1071 Contracts 1 (3 UOC)
- LAWS2140 Public Law (3 UOC)
- Non-Law Major Sequence Year 1 (2 x 6 UOC) (12 UOC)

Session Two
- LAWS1061 Torts (6 UOC)
- LAWS1072 Contracts 2 (6 UOC)
- Additional Non-Law Courses (2 x 6 UOC) (12 UOC)

Year 2
- LAWS1001 Criminal Law 1 (6 UOC)
- LAWS1011 Criminal Law 2 (6 UOC)
- LAWS1081 Property, Equity and Trusts 1 (6 UOC)
- LAWS1082 Property and Equity 2 (6 UOC)
- LAWS2160 Administrative Law (6 UOC)
- LAWS6210 Law, Lawyers and Society (6 UOC)
- Non-law Major Sequence Year 2 (12 UOC)

Year 3
- LAWS2150 Federal Constitutional Law (6 UOC)
- LAWS4010 Business Associations 1 (6 UOC)
- Non-Law Major Sequence Year 3 (24 UOC)
- General Education courses (6 UOC)
- Plus ONE of the following courses:
  - LAWS8320 Legal Theory (6 UOC)
  - LAWS8820 Law and Social Theory (6 UOC)

Year 4
- LAWS2311 Litigation 1 (6 UOC)
- LAWS2321 Litigation 2 (6 UOC)
- LAWS7420 Advanced Legal Research (2 UOC)
- Law electives (16 UOC)
- Law or non-law electives (18 UOC)

Year 5
- Law electives (18 UOC)

General Education Requirements
Candidates for the BJuris LLB must complete 6 units of credit of General Education. BJuris LLB is the only combined law degree which has a General Education requirement.

For further information, please refer to General Education section in this Handbook.

Academic Rules
For Academic Rules relating to the Bachelor of Laws program, please refer to the entry for 4790 Bachelor of Laws.

Faculty of Arts & Social Sciences and Faculty of Law

4760 Bachelor of Arts Bachelor of Laws
BA LLB

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit
Program Description
This program gives students the maximum freedom to follow their interests in the Faculty of Arts and Social Sciences. The Law courses satisfy the requirements for the award of the professional LLB degree.

Areas of specialisation for the Bachelor of Arts include: Australian Studies, Chinese Studies, Cognitive Science, Development Studies, Education, English, Environmental Studies, European Studies, Film, French, German Studies, Greek (Modern), History, History and Philosophy of Science, Indonesian Studies, Italian, Japanese Studies, Jewish Studies, Korean Studies, Linguistics, Media, Culture and Technology, Music, Philosophy, Political Economy, Politics and International Relations, Russian Studies, Policy Studies, Sociology and Anthropology, Spanish and Latin American Studies, Theatre & Performance Studies, Women's and Gender Studies.  

Assumed Knowledge
Students must satisfy the normal assumed knowledge requirements for entry to the Faculty of Arts and Social Sciences, and to individual courses in that faculty.

Program Objectives and Learning Outcomes
In a world where people increasingly have a number of career shifts in their lifetime, humanities and social science graduates possess a unique combination of intellectual and analytical skills which can be readily transferred from one occupation to another. Someone planning a career in policy making, diplomacy, international relations or legal practice will find the BA LLB an excellent preparation.

Law Courses

| Core courses | 92 UOC |
| Electives (8 courses x 8 UOC) | 64 UOC |

The core courses are taken in a specified sequence during Years 1 to 4, see approved sequence of study below.

After completing the majority of the core courses students are eligible to enrol in electives in Years 4 and 5. For a list of approved Law electives, please refer to the Academic Rules section in the entry for 4790 Bachelor of Laws.

Arts & Social Science Courses

Students must complete a total of 84 units of credit of approved Arts & Social Sciences courses from at least three schools or programs. The 84 UOC must include:

- Plan/major sequence from one school or program | 42 UOC |
- at least two upper level courses from other schools or programs | 12 UOC |
- other courses approved by the Faculty of Arts & Social Sciences | 30 UOC |

A few majors, e.g. Jewish Studies, comprise only 36 UOC. Students selecting such a major will bring their total UOC to 84 by completing an additional 6 UOC course approved by the Faculty of Arts & Social Sciences.

Arts & Social Science Specialisations

For details of the available specialisations and approved major sequences, please refer to Lists A & B of the Academic Rules in the program entry for 3400 Bachelor of Arts (see Arts and Social Sciences entry in this Handbook).

Sequence of Study

Students must study Arts courses in a sequence approved by the Faculty of Arts & Social Sciences and Law courses in a sequence approved by the School of Law. Other sequences may be approved under special circumstances.

Graduation

Students who find they are unable to complete the combined degree may apply to transfer to the single BA program with credit for all courses completed.

General Education Requirements

Students enrolled in combined law degrees are not required to complete General Education courses.

Honours

Students wishing to take the BA degree program at Honours level must obtain prior approval from the relevant schools in the Faculty of Arts and Social Sciences and the Faculty of Law. At least one and possibly two additional years of study are required. Alternatively students may consider...
4761 Bachelor of Social Science Bachelor of Laws
BSocSc LLB
Typical Duration
3 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit
Program Description
This program provides an opportunity to obtain two degrees of professional importance to the public sector, community service, business and law practice. In addition, the student has the option to work towards a research career in a variety of disciplines.
Duration/Award
The program is of five years full-time study leading to the award of the two degrees of Bachelor of Social Science and Bachelor of Laws (BSocSc LLB).
Assumed Knowledge
Students must satisfy the normal assumed knowledge requirements entry to the Faculty of Arts and Social Sciences, and to individual courses in that faculty.
BSocSc
Students not wishing to proceed to the combined degree BSocSc LLB, may transfer to the BSocSc degree program with credit for all courses completed.
BSocSc Core Courses
The first three years of the program includes the Bachelor of Social Science core program totalling 48 units of credit.
Arts & Social Science Major
1. Students must also complete an approved major sequence in the Faculty of Arts and Social Sciences. The major sequence must be taken in one of the following schools:, Economics/Economic History, Film, Geography, Geology, History, History and Philosophy of Science, Human Resource Management, Industrial Relations & Organisational Behaviour, International Business, Philosophy, Politics & International Relations, Psychology, Sociology & Anthropology, Spanish and Latin American Studies (History), Theatre & Performance Studies.
2. Most major sequences are made up of 42 units of credit; however some require only 36 units of credit. If a 36 unit of credit major is selected, students will be expected to make up the 6 unit of credit shortfall by completing either an additional elective approved by the Faculty of Arts & Social Sciences or by completing an additional law elective. (This will bring the total units of credit of law electives to 64)
Program Objectives and Learning Outcomes
At completion of this program, students will have attained a sound knowledge base in the fields of both Law and Social Science.
Program Structure
Approved Sequence of Study
Students must study Social Science courses in a sequence approved by the Faculty of Arts and Social Science and Law courses in a sequence approved by the Faculty of Law. An approved sequence is given below; other sequences may be approved under special circumstances.

4764 Bachelor of Arts (Media & Communications) Bachelor of Laws

BA(Media) LLB

Typical Duration
3 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
This program combines the professional Bachelor of Laws with the Bachelor of Arts (Media and Communications).

The Bachelor of Arts (Media and Communications) emphasises new computer-based multimedia skills and focuses on Australian media industries in relation to globalisation. The degree is vocationally relevant in its orientation and all students are given significant practical experience in new computer-based multimedia communications technologies. It aims to develop in students a sophisticated understanding of the history, scope and socio-cultural impact of new media technologies, and of the debates that have accompanied their development and use. Second, it offers extensive experience in the production of new media content appropriate for employment in the contemporary media. This degree combination would be of interest to students interested in becoming media lawyers, or in the fields of broadcast media (video-based, multi-media production and post production; research, administration and policy analysis for private corporations, telecommunications companies and government departments.

Program Objectives and Learning Outcomes
In addition to studying eight courses in the Media and Communications core program, students complete six courses from List A of the Faculty of Arts and Social Sciences, to permit them to study a second field in depth. Years 1 and 2 cover multimedia writing and production and contextual media studies. Year 3 consolidates the program’s emphasis on production and analytical skills. This grounding enables students to interpret, create and apply the products of the new media not only in the context of the mass information and entertainment industries, but also in a variety of other public and private sector areas such as education, on-the-job training and specialised information services.

Program Structure
| Law courses | 156 UOC |
| Arts & Social Science Courses | 84 UOC |
| **Total** | **240 UOC** |

Approved Sequence of Study:
The program is structured to allow concurrent study in the two degrees in the first three years with the last two years dedicated to completing the Law component of the LLB.

Students must study Arts courses in a sequence approved by the Faculty of Arts and Social Sciences and Law courses in a sequence approved by the Faculty of Law. Prior to enrolling in electives students are expected to have completed the majority of the core courses.

The approved sequence of study is given below. Other sequences may be approved under special circumstances.

Year 1

**Session One**
LAW2102 Foundations of Law (6 UOC)
MDCM1000 New Media Technologies A (6 UOC)
Arts School List A - Level 1 (6 UOC)
Arts School List A - Level 1 (6 UOC)

**Session Two**
MDCM1001 New Media Technologies B (6 UOC)
LAW2503 Interns (6 UOC)
Arts School List A - Level 1 (6 UOC)
Arts School List A - Level 1 (6 UOC)

**Year 2**

**Session One**
LAW2103 Criminal Law 1 (6 UOC)
LAW2503 Criminal Law 2 (6 UOC)

**Session Two**
LAW1072 Contracts 1 (3 UOC)

General Education Requirements
Students enrolled in a combined law degree are not required to complete General Education courses.

Honours
Honours in the BA Program: Students wishing to take the BA(Media) degree program at Honours level must obtain prior approval from the relevant schools in the Faculty of Arts and Social Sciences and the Faculty of Law. At least one and possibly two additional years of study are required. Alternatively students may consider completing the BA degree program at Honours level (4 years) and then seeking admission to the three year LLB degree program for graduates.

4765 Bachelor of International Studies Bachelor of Laws

BlnSt LLB
Program Description
This program provides an opportunity to obtain two degrees of professional importance to the public sector, community service, business and law practice. The Law courses satisfy the requirements for the award of the professional LLB degree. The International Studies component provides the knowledge and skills essential for understanding and working in the rapidly changing global environment.

The BInSt LLB degree may be taken in one of five areas of specialisation – Asian Studies, Development Studies, European Studies, Global Studies or Language Studies. Features of the degree program include:

- a core sequence of courses in International Studies;
- a choice of one area of concentration from five distinct and integrated programs of study;
- language study;
- access to 12 months study at one of a select group of the best international universities;
- full credit towards the BInSt degree for courses completed overseas;
- financial assistance towards a 12-month period of overseas study.

Program Objectives and Learning Outcomes
This program combines a law degree with one of five international studies streams: Asian Studies, Development Studies, European Studies, Globalisation and Languages. The structure of the program differs between the streams but each includes a combination of humanities and social science courses. An overseas study period of two semesters in either the third or fourth year is an essential component of the program - prerequisite to this is satisfactory progress towards the degree in first and second years of study.

- INST3900 INST compulsory course – Level 4 (6 UOC)
- LAWS1082 Property and Equity 2 (6 UOC)

**Note:** Years 5 and 6 are the same for all five plans.

---

**General Education Requirements**

Students enrolled in combined law degrees are not required to complete General Education courses.

**Honours**

The BInSt component is available at Honours level. To qualify for the award of the degree at Honours level a student must have obtained 138 UOC in approved courses, satisfied the appropriate prerequisites for entry into the Honours level program, and have obtained a further 48 units of credit in an approved Honours program. The Honours degree is awarded in three classes (Class I, Class II in two Divisions, and Class III). Students who fail to obtain one of these classes may proceed to graduate with a Pass degree.
## 4785 Bachelor of Social Work Bachelor of Laws

### BSW LLB

**Typical Duration**  
6 years

**Minimum UOC for Award**  
288 units of credit

**Typical UOC per Session**  
24 units of credit

### Program Description

This six year full-time program qualifies students for the professional practice of both social work and law.

### Duration/Award

The program is a six year full-time combined program leading to the award of the two degrees of Bachelor of Social Work and Bachelor of Laws (BSW LLB).

### Assumed Knowledge

There are no general assumed knowledge requirements for the Social Work program but students must study Social Work courses in a sequence approved by the Faculty of Arts and Social Sciences.

### BSW

The degree of Bachelor of Social Work is not awarded until the completion of the full six year program, but students unable to complete the full program may apply for advanced standing in the Faculty of Arts and Social Sciences Social Work program.

### Law or Non-Law Electives

Students may complete 6 units of credit in either law or non-law electives.

### Approved Sequence of Study

Students must study social work courses in a sequence approved by the Faculty of Arts & Social Sciences and law courses in a sequence approved by the Faculty of Law. The approved standard sequence of study is detailed below under ‘Program Structure’. Other sequences may be approved under special circumstances.

### Pre-2001 Program

The following structure is for commencing students and for those who entered the program from 2001. There are different program requirements for students who entered the program prior to 2001.

### Criminal Record Checks

It is a requirement that students who are undertaking placements in certain government departments and related organisations undergo a criminal record check.

### Program Objectives and Learning Outcomes

Graduates will be equipped with the knowledge and skills to work in a variety of emerging areas which require an understanding of the law, social work theory and practice and a commitment to social justice. Such areas include consumer protection, tenancy obligations and entitlements, land rights, child custody and family property disputes, social security and welfare rights.

Faculty of the Built Environment and Faculty of Law

4705 Bachelor of Architecture Bachelor of Laws

BArch LLB

Typical Duration

7 years

Minimum UOC for Award

336 units of credit

Typical UOC per Session

24 units of credit

Program Description

This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Architecture program offered by the Faculty of the Built Environment.

In terms of career prospects, employers could include law firms specialising in construction law, related government departments and regulatory bodies and architectural practices.

Duration/Award

The program is a seven year full-time combined program leading to the award of the two degrees of Bachelor of Architecture and Bachelor of Laws (BArch LLB). Students may complete the program in 6.5 years or 13 sessions of study if they carry out Work Experience over the summer breaks. This would mean that the enrolment for one session would be 48 units of credit which includes the 24 units of credit for work experience. Because the Architecture program contains a percentage of open electives which can be replaced by law courses, the combined program requires only three additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BArch program and both can be completed in thirteen sessions. It is considered to have a significant workload throughout these thirteen sessions.

Completion Requirements

From Year 2 both degrees must be studied concurrently with the expectation they students complete the full seven year program prior to graduating with the two degrees. It is not permissible for students enrolled in the combined Law degree program to graduate from the LLB degree until they have completed requirements for the non-Law degree.

Entry Requirements

The combined program is open to students who satisfy both the Architecture and Law entry conditions. Students may enter directly in Year 1 or may apply to transfer from the Architecture Program after the completion of one year if they have achieved a distinction or higher average. All applications for transfer must be registered with the University Admissions Centre. Transfer after the second year may result in the student taking more than the minimum time to complete the combined degree.

Organisation

The BArch LLB program is administered by the Faculty of Law. The Faculty requires the student to obtain approval of the Faculty of Built Environment, Architecture Program for the Architecture courses. The final program and timetable must be approved by the Head of the Architecture Program in the Faculty of the Built Environment.

Program Objectives and Learning Outcomes

At the completion of this program, students will have obtained a sound knowledge base in the fields of both Architecture and Law.

Program Structure

Approved Sequence of Study:

Students must complete Year 1 (48 units of credit) of the Architecture program before attempting any courses from the Law program. In subsequent years students must study architecture courses in a sequence approved by the Faculty of the Built Environment and law courses in a sequence approved by the School of Law. An approved sequence is detailed below. Other sequences may be approved under special circumstances.

Honours

Honours in Architecture: The degree of Bachelor of Architecture is awarded at either pass or Honours level. Honours is calculated on the basis of 192 units of credit from the Architecture Program and the 72 units of credit concurrently studied from the Law Program. These core law courses are considered in the same manner as Faculty electives for the purposes of the Honours calculation. The combined total units of credit is taken from student performance over 264 units of credit for the purpose of calculating Honours in Architecture.

Academic Rules

For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to the program entry for 4790 Bachelor of Laws.

1. The degrees Bachelor of Architecture and Bachelor of Laws are awarded at either pass or Honours level (BArch only) after the successful completion of a minimum of 192 units of credit from the Architecture Program and 144 units of credit from the Laws Program.

2. To fulfill these requirements, students must complete:
   - 168 units of core courses in Architecture, being all those prescribed in the faculty regulations for this program,
   - 24 units of work experience completed after Year 1 and before Year 5 as prescribed in the faculty regulations for this program,
   - 92 units of core courses in Law, being all those prescribed in the faculty regulations for this program,
   - 52 units of program electives in Law, selected in accordance with the faculty regulations for this program.

3. The standard duration of the program is 7 years consisting of 13 semesters of full-time study (24 units of credit per semester) plus 1 semester of required work experience.

4. Each student is required to undertake 24 weeks of approved off-campus activity in the pursuit of architectural work experience after Year 1 and before entering Year 5.

5. Law units may not be taken until after the student has completed 48 units of credit of the BArch Program.

4707 Bachelor of Planning Bachelor of Laws

BPlan LLB

Typical Duration
7 years

Minimum UOC for Award
336 units of credit

Typical UOC per Session
24 units of credit

Program Description
This program provides an opportunity to obtain two professional degrees. It allows students to add the professionally recognised Law program to the professionally accredited Planning program offered by the Faculty of the Built Environment.

Duration/Award
The program is a seven year full-time combined program leading to the award of the two degrees of Bachelor of Planning and Bachelor of Laws (BPlan LLB).

Because the Planning program contains a percentage of open electives which can be replaced by Law courses, the combined program requires only four additional sessions of study to gain both qualifications. In general, this study is taken concurrently with the BPlan program and both can be completed in a minimum of seven years, consisting of twelve academic sessions (six years), plus two sessions of compulsory Work Experience. This compares with the five-year BPlan program, which consists of eight academic sessions and two sessions (12 months) of compulsory Work Experience.

Although Work Experience is normally undertaken after the completion of five academic sessions, BPlan LLB students may elect to undertake the one year (two sessions) of compulsory Work Experience required for the award of the single BPlan degree after the completion of their BPlan and LLB coursework.

In addition, students may undertake the compulsory Work Experience in flexible ways (subject to the approval of the Planning and Urban Development Program), thereby reducing the overall length of the BPlan LLB Program.

Completion Requirements
From Year 2, both degrees must be studied concurrently with the expectation they students complete the full seven year program prior to graduating with the two degrees. It is not permissible for students enrolled in the combined Law degree program to graduate from the LLB degree until they have completed requirements for the non-Law degree.

Entry Requirements
The combined program is open to students who satisfy both the Planning and Law entry conditions. Students may enter directly in Year 1 or may apply to transfer from the Planning program after the completion of one year. Entry on this basis is competitive and is based on a combination of UAI and tertiary results. Transfer after the second year may result in the student taking more than the minimum time to complete the combined degree.

Organisation
The BPlan LLB course is administered by the Faculty of Law. The Faculty requires the student to obtain approval of the Planning and Urban Development Program in the School of the Built Environment for the Planning components of their program. The final program and timetable must be approved by the Head of the Planning and Urban Development Program.

Approved Sequence of Study
Students must complete Year 1 (48 units of credit) of the Planning program before attempting any courses from the Law program. In subsequent years students must study Planning courses in the sequence approved by the Faculty of the Built Environment and Law courses in a sequence approved by the School of Law. The approved sequence of study is detailed below.

Program Objectives and LearningOutcomes
On completion of this program, students will have attained a sound knowledge base in the fields of both Law and Planning.

Program Structure

Year 1

Session One

BENV1141 Computers and Information Technology (3 UOC)
GEOS1701 Environmental Systems and Processes (6 UOC)
PLAN1011 Urban Society (6 UOC)
PLAN1101 Understanding Design (6 UOC)

**Note:** Students are required to undertake 24 weeks of approved off-campus activity in the pursuit of architectural work experience after Year 1 and before entering Year 5. This may be carried out in a minimum of eight week components during summer breaks.

**Honours**

The degree of Bachelor of Planning is awarded at either at Pass or Honours level. The award of Honours is calculated on the basis of 144 of credit from the Planning program and 48 units of credit concurrently studied from the Law program. These law courses are considered in the same manner as Faculty of the Built Environment electives for the purposes of the Honours calculation. The combined total units of credit is taken from student performance over 192 units of credit for the purpose of calculating Honours in Planning.

**Academic Rules**

For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to the program entry for 4790 Bachelor of Laws.

1. The degrees Bachelor of Planning and Bachelor of Laws are awarded at either Pass or Honours level (BPlan only) after the successful completion of a minimum of 192 units of credit from the Planning Program and 144 units of credit from the Laws Program.

2. To fulfill these requirements, students must complete:
   - 144 units of core courses in Planning (including nominated electives), being all those prescribed in the faculty regulations for this program.
   - 48 units of work experience as prescribed in the faculty regulations for this program.
   - 92 units of core courses in Law, being all those prescribed in the faculty regulations for this program.
   - 52 units of program electives in Law, selected in accordance with the faculty regulations for this program.

3. The standard duration of the program is 7 years consisting of 12 semesters of full-time study (24 units of credit per semester) plus 2 sessions of required work experience.

4. The standard duration of the program is 7 years, consisting of 12 sessions of full-time study (24 units of credit per session) plus 2 sessions of required work experience.

5. Law units may not be taken until after the student has completed 48 units of credit of the BPlan Program.

**Faculty of Commerce & Economics and Faculty of Law**

**4733 Bachelor of Commerce Bachelor of Laws**

**BCom LLB**

**Typical Duration**

5 years

**Minimum UOC for Award**

240 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

This program provides an opportunity to obtain two degrees of professional importance to business, administration and commercial law practice.

**Duration/Award**

The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Commerce and Bachelor of Laws (BCom/LLB).

**Distinction**

The BCom degree may be awarded with Distinction where a student has achieved a weighted average mark (WAM) of at least 75% in the UNSW courses completed as part of that degree.
Transferring Majors (Plans)
Students must nominate a major (plan code) at enrolment. Subsequent transfers to another major may be possible subject to the approval of both faculties.

Graduation
Candidates enrolled in the combined degree programs may be awarded the degree of BCom after the completion of specified requirements. Full details are given in the ‘Academic Rules’.

Commerce & Economics Courses
Apart from service courses for other faculties, and unless specified as from which discipline they must be chosen, commerce & economics options may be chosen from any course taught by the Faculty of Commerce and Economics according to the requirements for the selected Commerce major. (The usual course prerequisites, corequisites and exclusions apply). No course can be counted both as an option and as a prescribed course.

Approved Sequence of Study
Students must study commerce and economics courses in a sequence approved by the Faculty of Commerce and Economics and law courses in a sequence approved by the Faculty of Law. Approved sequences for each combined program are given below; other sequences may be approved under special circumstances.

Program Objectives and Learning Outcomes
At the completion of this program, students will have obtained a sound knowledge base in the disciplines of both Commerce and Law.

Program Structure
Total units of credit requirements
- Law compulsory courses: 92 UOC
- Law elective courses: 64 UOC
- Approved Commerce courses: 84 UOC

The single major requirement for the BCom is 48 UOC.

PLANS (Majors)
Accounting (program 4733, plan code ACCTA14733)

Year 1
Session One
- ACCT1501 Accounting and Financial Management 1A (6 UOC)
- ECON1101 Microeconomics 1 (6 UOC)
- ECON1202 Quantitative Methods A (6 UOC)
- LAWS1012 Foundations of Law (6 UOC)

Session Two
- ACCT1511 Accounting and Financial Management 1B (6 UOC)
- ECON1102 Microeconomics 1 (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)
- LAWS1016 Contracts 1 (6 UOC)

Year 2
Session One
- Commerce & Economics Elective 1 (6 UOC)
- ACCT2522 Management Accounting: Process Improvement & Innovation (6 UOC)
- LAWS1001 Criminal Law 1 (6 UOC)
- LAWS1071 Contracts 1 (3 UOC)
- LAWS2140 Public Law (3 UOC)

Session Two
- Commerce & Economics Elective 2 (6 UOC)
- ACCT2542 Corporate Financial Reporting & Analysis (6 UOC)
- LAWS1011 Criminal Law 2 (6 UOC)
- LAWS1072 Contracts 2 (6 UOC)

Year 3
Session One
- Accounting Option 1 (6 UOC)
- ACCT3563 Issues in Financial Reporting & Analysis (6 UOC)
- LAWS1081 Property, Equity and Trusts 1 (6 UOC)
- LAWS2160 Administrative Law (6 UOC)

Session Two
- Accounting Option 2 (6 UOC)
- ACCT3583 Stakeholder Value Management (6 UOC)
- LAWS1082 Property and Equity 2 (6 UOC)
- LAWS56210 Law, Lawyers and Society (6 UOC)

Year 4
Session One
- LAWS2510 Federal Constitutional Law (6 UOC)
- LAWS2311 Litigation 1 (6 UOC)
- LAWS4010 Business Associations 1 (6 UOC)
- LAWS86320 Legal Theory (6 UOC)
- LAWS8820 Law and Social Theory (6 UOC)

Session Two
- LAWS2321 Litigation 2 (6 UOC)
- LAWS7420 Advanced Legal Research (2 UOC)
- Law electives (2 x 8 UOC) (16 UOC)

Year 5
Law electives (48 UOC)

Notes:
- LEGT: Students enrolled in either the BCom LLB are not permitted to enrol in courses from the School of Business Law and Taxation (LEGT).
- Commerce electives can be taken from any courses taught by the Faculty of Commerce and Economics (except LEGT) providing the requirements have been met. Details can be found in the Course Descriptions section of this Handbook.

Professional Recognition: Students wishing to obtain CPA/CA accreditation should choose INFS1602 and FINS1613 as their Commerce and Economics Electives. Please note INFS1602 is no longer mandatory for the CA accreditation.

Accounting Options
- ACCT1501 Accounting and Financial Management 1A (6 UOC)
- ECON1101 Microeconomics 1 (6 UOC)
- LAWS1012 Foundations of Law (6 UOC)
- LAWS1001 Criminal Law 1 (6 UOC)
- LAWS1071 Contracts 1 (3 UOC)
- LAWS2140 Public Law (3 UOC)

Accounting is available at Honours level. Please refer to the ‘Honours’ section below.

Actuarial Studies (program 4733, plan code ACTLB14733)

Year 1
Session One
- ACCT1501 Accounting and Financial Management 1A (6 UOC)
- ECON1101 Microeconomics 1 (6 UOC)
- LAWS1012 Foundations of Law (6 UOC)
- LAWS1001 Criminal Law 1 (6 UOC)
- LAWS1071 Contracts 1 (3 UOC)
- LAWS2140 Public Law (3 UOC)

Session Two
- ACCT1511 Accounting and Financial Management 1B (6 UOC)
- ECON1102 Microeconomics 1 (6 UOC)
- ECON1203 Quantitative Methods B (6 UOC)
- LAWS1016 Contracts 1 (6 UOC)

Year 2
Session One
- ACTL1001 Actuarial Studies and Commerce (6 UOC)
- ECON1102 Microeconomics 1 (6 UOC)
- LAWS1061 Torts (6 UOC)

Session Two
- ACTL1001 Actuarial Studies and Commerce (6 UOC)
- ECON1102 Microeconomics 1 (6 UOC)
- LAWS1061 Torts (6 UOC)

Year 3
Session One
- ACTL2001 Financial Mathematics (6 UOC)
- ACTL2002 Probability and Statistics for Actuaries (6 UOC)
- LAWS1001 Criminal Law 1 (6 UOC)
- LAWS1071 Contracts 1 (3 UOC)
- LAWS2140 Public Law (3 UOC)

Session Two
- ACTL2003 Stochastic Models for Actuarial Applications (6 UOC)
- ACCT1511 Accounting & Financial Management 1B (6 UOC)
- LAWS1011 Criminal Law 2 (6 UOC)
- LAWS1072 Contracts 2 (6 UOC)

Year 4
Session One
- ACTL3003 Insurance Risk Models (6 UOC)
- ACTL3004 Financial Economics for Insurance and Superannuation (6 UOC)
LAWS1081 Property, Equity and Trusts 1 (6 UOC)
LAWS2160 Administrative Law (6 UOC)

Session Two
ACTL3003 Insurance Risk Models (6 UOC)
ACTL3004 Financial Economics for Insurance and Superannuation (6 UOC)
LAWS1082 Property and Equity 2 (6 UOC)
LAWS6210 Law, Lawyers and Society (6 UOC)

Year 4
Session One
LAWS2150 Federal Constitutional Law (6 UOC)
LAWS2511 Litigation 1 (6 UOC)
LAWS4010 Business Associations 1 (6 UOC)
plus ONE of the following courses:
LAWS8320 Legal Theory (6 UOC)
LAWS8820 Law and Social Theory (6 UOC)

Session Two
LAWS2321 Litigation 2 (6 UOC)
LAWS7420 Advanced Legal Research (2 UOC)
2 Law Electives (16 UOC)

Year 5
Law electives totalling 48 units of credit

Note: The combined Commerce/Law program in Actuarial Studies allows students to complete an actuarial major but does NOT enable them to complete all the courses equivalent to Part I and Part II subjects of the professional body “The Institute of Actuaries of Australia”. The program allows students to complete 6 (out of a total of 8) Part I professional actuarial courses.

Actuarial Studies is available at Honours level. Please refer to the ‘Honours’ section below.

Business Economics (program 4733, plan code ECON14733)

Year 1
Session One
ACCT1501 Accounting and Financial Management 1A (6 UOC)
ECON1101 Microeconomics 1 (6 UOC)
ECON1202 Quantitative Methods A (6 UOC)
LAWS1052 Foundations of Law (6 UOC)

Session Two
ALC1151 Accounting and Financial Management 1B (6 UOC)
ECON1102 Microeconomics 1 (6 UOC)
ECON1203 Quantitative Methods B (6 UOC)
LAWS1061 Torts (6 UOC)

Year 2
Session One
LAWS1001 Criminal Law 1 (6 UOC)
LAWS1071 Contracts 1 (3 UOC)
LAWS2140 Public Law (3 UOC)
Economics Elective 1 (6 UOC)
Economics Elective 2 (6 UOC)

Session Two
LAWS1011 Criminal Law 2 (6 UOC)
LAWS1072 Contracts 2 (3 UOC)
Economics Elective 3 (6 UOC)
Economics Elective 4 (6 UOC)

Year 3
Session One
LAWS1081 Property, Equity and Trusts 1 (6 UOC)
LAWS2160 Administrative Law (6 UOC)
Economics Elective 3 (6 UOC)
Economics Elective 4 (6 UOC)

Session Two
LAWS1082 Property and Equity 2 (6 UOC)
LAWS6210 Law, Lawyers and Society (6 UOC)
Commerce/Economics Option 1 (6 UOC)
Commerce/Economics Option 2 (6 UOC)

Year 4
Session One
LAWS2150 Federal Constitutional Law (6 UOC)
LAWS2311 Litigation 1 (6 UOC)
LAWS4010 Business Associations 1 (6 UOC)

Plus ONE of the following courses:
LAWS8320 Legal Theory (6 UOC)
LAWS8820 Law and Social Theory (6 UOC)

Session Two
LAWS2321 Litigation 2 (6 UOC)
LAWS7420 Advanced Legal Research (2 UOC)
Law electives (16 UOC)

Year 5
Law electives totalling 48 units of credit.

Note: Law students may not take any law courses offered by the School of Business Law & Taxation (LEGT)

PLEASE NOTE that six Economics electives are to be selected from the electives below, two electives must be from List B.

List A
ECON2101 Microeconomics 2 S1
ECON2102 Macroeconomics 2 S2
ECON2103 Business and Government S2

**Session Two**

LAW2321 Litigation 2 (6 UOC)
LAW57420 Advanced Legal Research (2 UOC)
Law electives (16 UOC)

**Year 5**

Law electives totalling 48 units of credit.

**Marketing Electives**

MARK1014 Customer Relationship Management
MARK2055 Services Marketing Management
MARK3071 International & Global Marketing
MARK3072 Advanced Consumer Behaviour
MARK3091 New Product & New Service Development
MARK3092 Brand Management

Marketing is available at Honours level. Please refer to the ‘Honours’ section below.
General Education Requirements

Students enrolled in combined law degrees are not required to complete General Education courses. However, if a student wishes to graduate with their BCom degree after 3 years, they are required to complete 12 UOC of General Education from faculties other than Law and Commerce as well as the required Law and Commerce courses for years 1-3.

Honours

The BCom degree is available with Honours. This normally requires an extra year of study between Years 3 and 4. Students interested in undertaking Honours should consult with the relevant School Office at the end of Year 1.

Notwithstanding the above regulations, students undertaking the combined Bachelor of Commerce at Honours level may be awarded the degree of Bachelor of Commerce at Honours level once they have completed the Honours year and the requirements of the first three years of the combined Bachelor of Commerce at Honours Level.

Candidates for Honours in the Commerce degree course must complete one year additional to the minimum of five years required for the Commerce/Law program at Pass level.

The requirements relating to Honours in the BCom degree courses are noted at the end of the program for each specialisation. Students ordinarily will interpolate an Honours year between Years 3 and 4 of the combined course.

Academic Rules

For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to entry for program 4790 Bachelor of Laws.

Rules Relating to the Bachelor of Commerce/Bachelor of Laws Program and the Bachelor of Economics/Bachelor of Law Program

The rules as set out in other sections of this Handbook, shall apply wherever relevant to candidates for the program of Bachelor of Commerce Bachelor of Laws and Bachelor of Economics Bachelor of Laws.

BCom and BEd: Candidates for the combined Commerce/Law or Economics/Law degree program may be awarded the degree of BCom or BEd either when they have successfully completed the entire combined program or, for students enrolling from 1996, when they have completed the requirements for the award of the first three years of the combined Bachelor of Commerce or Bachelor of Economics/Bachelor of Laws program – as set out in the program outline – and subject to satisfaction of General Education requirements for the single pass degree.

Concessions apply in deciding when students enrolled prior to 1995 who have not completed the requirements of the combined degree have nevertheless completed the requirements of the BCom or BEd. Please consult earlier faculty handbooks for the appropriate ‘Rules relating to the award of the degree of Bachelor of Commerce or Bachelor of Economics prior to the completion of the Combined Degree’.

Honours: Notwithstanding the above regulations, students undertaking the combined Bachelor of Commerce or Bachelor of Economics at Honours level/Bachelor of Laws program may be awarded the degree of Bachelor of Commerce or Bachelor of Economics at Honours level once they have completed the Honours year and the requirements of the first three years of the combined Bachelor of Commerce or Bachelor of Economics at Honours Level/Bachelor of Laws program.

Candidates for Honours in the Commerce or Economics degree course must complete one year additional to the minimum of five years required for the Commerce/Law program at Pass level.

The requirements relating to Honours in the BCom and BEd degree courses are noted at the end of the program for each specialisation. Students ordinarily will interpolate an Honours year between Years 3 and 4 of the combined course.

Commerce and Economics Options: Options may be chosen from any offered by the Faculty of Commerce and Economics except for (i) LEGT courses, (ii) service courses for other faculties. Prerequisites apply. No course can be counted both as an option and as a prescribed course.

4744 Bachelor of Economics Bachelor of Laws

BEd LLB

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

The Bachelor of Laws degree may be combined with a Bachelor of Economics specialising in Economics, Econometrics or Financial Economics.

Program Objectives and Learning Outcomes

This program provides an opportunity to obtain two degrees of professional importance to business, administration and commercial law practice. At the completion of this program students will have obtained a sound knowledge base in the disciplines of both Economics and Law.

Program Structure

Duration/Award:
The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Economics and Bachelor of Laws (BEd LLB).

Distinction:
The BEd degree may be awarded with Distinction where a student has achieved a weighted average mark (WAM) of at least 75% in the UNSW courses completed as part of that degree.

Transferring Majors (Plans):
Students must nominate a major (plan code) at enrolment. Subsequent transfers to another major may be possible subject to the approval of both Faculties.

Graduation:
Candidates enrolled in the combined degree program BEd/LLB may be awarded the degree of BEd after the completion of specified requirements. Full details are given in the ‘Rules Relating to the Award of Degrees’.

Commerce & Economics courses:
Apart from service courses for other faculties, and unless specified as from which discipline they must be chosen, Commerce and Economics options may be chosen from any taught by the Faculty of Commerce and Economics except for those offered by the School of Business Law and Taxation (LEGT). No course can be counted both as an option and as a prescribed course.

Approved Sequence of Study:
Students must study commerce and economics courses in a sequence approved by the School of Economics and law courses in a sequence approved by the School of Law. Specifically, all or the majority of law core courses must be completed prior to enrolling in law electives. Approved sequences for each combined program are given below; other sequences may be approved under special circumstances.

Total Unit Requirements

Law compulsory courses - 92UOC
Law elective courses - 64UOC
Approved economic courses - 84UOC including the first year compulsory core courses

The single major requirement for the BEd is 60 UOC. Students enrolling in the BEd/LLB complete 60 UOC towards a major and 24 UOC of other approved Commerce & Economics courses including the compulsory first year core courses.

PLANS (Majors)
The following specialisations (majors) are available within the Bachelor of Laws Bachelor of Economics degree: Economics Econometrics Financial Economics.

For details of the recommended sequence of courses in each Economics major, please refer to the following plans.

Economics (program 4744, plan code ECONA14744)

Year 1

Session One

ACCT1101 Accounting and Financial Management 1A (6 UOC)
ECON1101 Microeconomics 1 (6 UOC)
ECON1202 Quantitative Methods A (6 UOC)
LAW5102 Foundations of Law (6 UOC)

Session Two

ACCT1101 Accounting and Financial Management 1B (6 UOC)
ECON1101 Microeconomics 1 (6 UOC)
Faculty of Engineering and Faculty of Law

4775 Bachelor of Engineering in Civil Engineering Bachelor of Laws

BE LLB

Typical Duration
6 years

Minimum UOC for Award
288 units of credit

Typical UOC per Session
24 units of credit

Program Description
This program will provide students with professional qualifications in areas of great importance to the community. The program will prove attractive to students who have in mind a career involving constructive developments.

Most large construction projects raise a formidable range of legal issues, and there appears to be a need for highly qualified personnel who are able to understand both the engineering and the legal dimensions of such projects, both in Australia and overseas.

Duration/Award
The program is a six year full-time combined program leading to the award of the two degrees of Bachelor of Engineering and Bachelor of Laws (BE LLB). There will be a testamur for each degree in the combined program with both degrees being conferred at the completion of the full six-year program.

Assumed Knowledge
A prescribed standard in mathematics for entry to the Faculty of Engineering and to individual courses in that faculty. Further details are available in the UAC Guide.

Bachelor of Engineering
Students who decide not to continue in the LLB may complete the BE but must contact the Head of School of Civil and Environmental Engineering for any credit towards advanced standing in the BE of completed law courses.

Program Objectives and Learning Outcomes
At the completion of this program, students will have obtained a sound knowledge base in the fields of both Civil Engineering and Law.

Program Structure
Approved Sequence of Study:
Students must study engineering courses in a sequence approved by the Faculty of Engineering and law courses in a sequence approved by the Faculty of Law. Other sequences may be approved under special circumstances.

Year 1

Session One
CVEN1021 Civil Engineering Practice 1A (4 UOC)
CVEN1023 Statistics (4 UOC)
CVEN1025 Computing (4 UOC)
LAWS1052 Foundations of Law (6 UOC)

Plus ONE of the following courses:
MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)

Session Two
CVEN1024 Dynamics (4 UOC)
CVEN1026 Engineering Materials 1 (4 UOC)
Law Electives (24 UOC)

Notes:
All students NOT undertaking an Honours thesis are required to select at least one major or 12 units of credit of Engineering electives. Students undertaking the Honours thesis are required to undertake at least 8 units of credit of Engineering electives. Students must complete a thesis to be considered for Honours in Engineering.

Honours
The degree of Bachelor of Engineering may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class I, and Class II in two divisions. The award and grade of Honours are made in recognition of superior performance throughout the program with greater weighting on courses in the later years.

Students must complete a Civil Engineering thesis to be considered for Honours in Engineering.

Academic Rules
For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to the program entry for 4790 Bachelor of Laws.

4777 Bachelor of Engineering in Environmental Engineering Bachelor of Laws BE LLB

Typical Duration
6 years

Minimum UOC for Award
288 units of credit

Typical UOC per Session
24 units of credit

Program Description
This program will provide students with professional qualifications in areas of great importance to the community. The program will prove attractive to students who have in mind a career involving environmental issues or engineering.

Employment could be with a law firm specialising in environmental law or a regulatory body such as the Environmental Protection Authority.

Assumed Knowledge
A prescribed standard in mathematics for entry to the Faculty of Engineering and to individual courses in that faculty. Further details are available in the UAC Guide.

Bachelor of Engineering
Students who decide not to continue in the LLB may complete the BE but must contact the Head of School of Civil and Environmental Engineering for any credit towards advanced standing in the BE of completed law courses.

Program Objectives and Learning Outcomes
At the completion of this program, students will have obtained a sound knowledge base in the fields of both Environmental Engineering and Law.

Program Structure
Approved Sequence of Study:
Students must study engineering courses in a sequence approved by the Faculty of Engineering and law courses in a sequence approved by the Faculty of Law. An approved sequence appears below.
Year 1
Session One
LAW1052 Foundations of Law (6 UOC)
CVEN1023 Statistics (4 UOC)
CVEN1025 Computing (4 UOC)
CVEN1721 Environmental Engineering Practice 1A (4 UOC)
Plus one of the following:
CHEM1011 Fundamentals of Chemistry A or
CHEM1031 Higher Chemistry C (6 UOC)

Session Two
LAW1061 Iorts (6 UOC)
CVEN1024 Dynamics (4 UOC)
CVEN1026 Engineering Materials 1 (4 UOC)
CVEN1531 Introduction to Water and Atmospheric Chemistry (4 UOC)
Plus one of the following courses:
MATH1131 Mathematics 1A or
MATH1141 Higher Mathematics 1A (6 UOC)

Year 2
Session One
LHL0011 Mass Transfer and Material Balance (3 UOC)
CVEN2023 Mechanics of Solids (3 UOC)
CVEN2025 Engineering Computations 1 (3 UOC)
CVEN2222 Geotechnical Engineering 1 (3 UOC)
GMAT0753 Introduction to Spatial Information Systems (3 UOC)
INFL4120 Chemistry of the Industrial Environment (3 UOC)
LAW1071 Contracts 1 (3 UOC)
LAW2140 Public Law (3 UOC)
Plus one of the following courses:
MATH1231 Mathematics 1B, or
MATH1241 Higher Mathematics 1B (6 UOC)

Year 3
Session One
LHL0030 Atmospheric & Process Chemistry (3 UOC)
CVEN3222 Geotechnical Engineering 2 (3 UOC)
CVEN3438 Transport and the Environment (3 UOC)
CVEN3526 Water Resources Engineering (3 UOC)
LAW3001 Criminal Law 1 (6 UOC)
LAW5620 Law, Lawyers & Society (6 UOC)

Session Two
BIOU3301 Population and Community Ecology (3 UOC)
CVEN3126 Engineering Management 1 (3 UOC)
CVEN3223 Geotechnical Engineering 3 (3 UOC)
CVEN3527 Water Engineering (3 UOC)
CVEN3531 Principles and Applications of Aquatic Chemistry (3 UOC)
CVEN3726 Environmental Policy, Law and Economics (3 UOC)
MAIH2019 Engineering Mathematics 2CE (6 UOC)

Year 4
Session One
CVEN3025 Engineering Computations 2 (3 UOC)
CVEN3725 Waste Management (3 UOC)
CVEN4126 Engineering Management 2 (3 UOC)
CVEN4225 Geotechnical Engineering 4 (3 UOC)
CVEN4526 Water and Wastewater Treatment (3 UOC)
CVEN4533 Transport and Fate of Pollutants (3 UOC)
Plus one of the following courses:
CVEN4000 Honours Thesis Part A (6 UOC)
CVEN4727 Environmental Engineering Practice 4A (6 UOC)
CVEN4728 Environmental Engineering Practice 4B (6 UOC)
CVEN4729 Environmental Engineering Practice 4C (6 UOC)

Session Two
LAW52160 Administrative Law (6 UOC)
LAW56210 Law, Lawyers and Society (6 UOC)
Environmental Engineering Electives (12 UOC)

Year 5
Session One
LAW1081 Property, Equity and Trusts 1 (6 UOC)
LAW2311 Litigation 1 (6 UOC)
LAW54010 Business Associations 1 (6 UOC)
Plus one of the following courses:
LAW8320 Legal Theory (6 UOC)
LAW8820 Law and Social Theory (6 UOC)

Session Two
LAW1082 Property and Equity 2 (6 UOC)
LAW2315 Federal Constitutional Law (6 UOC)
LAW23122 Litigation 2 (6 UOC)
LAW7420 Advanced Legal Research (2 UOC)
Law Elective (4 UOC)

Year 6
Session One
Law Electives (24 UOC)

Session Two
Law Electives (24 UOC)

Total Units of Credit Requirements
Law courses 144 UOC
Engineering courses 144 UOC

Honours
Honours in Engineering: The degree of Bachelor of Engineering may be conferred as a Pass degree or as an Honours degree. There are two classes of Honours, Class I, and Class II in two divisions. The award and grade of Honours are made in recognition of superior performance throughout the program with greater weighting on courses in the later years. Students must complete an Environmental Engineering thesis to be considered for Honours in Engineering.

Academic Rules
For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to the program entry for 4790 Bachelor of Laws.

Faculty of Science and Faculty of Law
4770 Bachelor of Science Bachelor of Laws
BSc LLB
Typical Duration
5 years
Minimum UOC for Award
240 units of credit
Typical UOC per Session
24 units of credit

Program Description
This program combines the professional LLB program with the large number of majors offered within the Faculty of Science. The Science programs provide opportunities for students to prepare themselves for careers in research, technology, science, mathematics and education, or areas of management or public policy which involve the use of science or mathematics.

Major Sequence
(i) Students may select any major from those offered by the Faculty of Science, or a major in Computer Science or Information Systems which are administered by the School of Computer Science and Engineering and the Faculty of Commerce and Economics. (See separate entry.)
(ii) Students should discuss their choice of major with the Science Student Centre prior to enrolment.
(iii) For the majority of majors students are required to complete only 2 law courses in Year 1. For the Psychology major students are required to complete 5. (See separate entry.)

Duration/Award
The program is a five year full-time combined program leading to the award of the two degrees of Bachelor of Science and Bachelor of Laws (BSc LLB).
Assumed Knowledge
Students must satisfy the normal assumed knowledge requirements for entry to the Faculty of Science and to individual courses in that Faculty.

BSc
The degree of Bachelor of Science is not awarded until the completion of the full five-year program, but students unable to complete the full program may apply for advanced standing in the Bachelor of Science degree.

Science Courses
Students must complete a minimum of 84 units of credit, including the requirements of one of the majors outlined in Table A in the Science section of the Handbook or a major in Computer Science. In all cases students must include 24 to 36 units of credit of Level 1 courses.

Law or Science Electives
In addition to the prescribed units of credit of law courses and science courses there is the option to complete 8 units of credit of either law or science electives. Students can satisfy this requirement by completing either a law elective (8 units of credit) or an elective approved by the Faculty of Science (6 units of credit) plus a Law Research Project (2 units of credit).

Approved Sequence of Study:
Students must study Science courses in a sequence approved by the Faculty of Science and Law courses in a sequence approved by the Faculty of Law. A typical structure of a combined Science/Law program is set out below. Subject to timetable restrictions, the full range of Science majors are normally available to Law students. The sequence for Computer Science and Psychology majors is detailed separately.

Program Objectives and Learning Outcomes
At the completion of this program, students will have obtained a sound knowledge base in the disciplines of both Science and Law.

Program Structure
Bachelor of Science/Bachelor of Laws
For all plans other than Computer Science major or Psychology.

Year 1
Session One
LAWS1052 Foundations of Law (6 UOC)
Science courses (Level 1) (12 UOC)
Other approved Science course (Level 1) (6 UOC)

Session Two
LAWS1061 Torts (6 UOC)
Science courses (Level 1) (12 UOC)
Other approved Science course - Level 1 (6 UOC)

Year 2
Session One
LAWS1001 Criminal Law 1 (6 UOC)
LAWS1071 Contracts 1 (3 UOC)
LAWS2140 Public Law (3 UOC)
Science courses (12 UOC)

Session Two
LAWS1011 Criminal Law 2 (6 UOC)
LAWS1072 Contracts 2 (6 UOC)
Science courses (12 UOC)

Year 3
Session One
LAWS1081 Property, Equity and Trusts 1 (6 UOC)
LAWS2160 Administrative Law (6 UOC)
Science courses (12 UOC)

Session Two
LAWS1082 Property and Equity 2 (6 UOC)
LAWS6210 Law, Lawyers and Society (6 UOC)
Science courses (12 UOC)

Year 4
Session One
LAWS2150 Federal Constitutional Law (6 UOC)
LAWS2311 Litigation 1 (6 UOC)
LAWS4010 Business Associations 1 (6 UOC)
Plus ONE of the following courses:
LAWS58320 Legal Theory (6 UOC)
LAWS58820 Law and Social Theory (6 UOC)

Session Two
LAWS2321 Litigation 2 (6 UOC)
LAWS7420 Advanced Legal Research (2 UOC)
Plus:
Law electives (8 UOC)
Law or Science electives (8 UOC)

For the Law or Science elective you can select either:
1 Science elective (6 UOC) + Law Research Project (2 UOC), or 1 Law elective (8 UOC).

Year 5
Session One
Law electives (24 UOC)

Session Two
Law electives (24 UOC)

Bachelor of Science Bachelor of Laws with Major in Computer Science (program 4770, plan code COMPA14770) Students interested in this major should consult fully with the Student Office of Computer Science and Engineering prior to enrolment.

Year 1 (Computer Science Major)
Session One
LAWS1052 Foundations of Law (6 UOC)
MATH1081 Discrete Mathematics (6 UOC)
Plus ONE of the following courses:
COMP1711 Higher Computing 1A (6 UOC)
COMP1011 Computing 1A (6 UOC)
Plus ONE of the following courses:
MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)

Session Two
LAWS1061 Torts (6 UOC)
Science elective (6 UOC)
Plus ONE of the following courses:
COMP1021 Computing 1B (6 UOC)
COMP1721 Higher Computing 1B (6 UOC)
Plus ONE of the following courses:
MATH1231 Mathematics 1B (6 UOC)
MATH1241 Higher Mathematics 1B (6 UOC)

Year 2 (Computer Science Major)
Session One
LAWS1001 Criminal Law 1 (6 UOC)
LAWS1071 Contracts 1 (3 UOC)
COMPA14770 Data Organisation (3 UOC)
LAWS2140 Public Law (3 UOC)

Session Two
LAWS1011 Criminal Law 2 (6 UOC)
LAWS1072 Contracts 2 (6 UOC)
Science elective (6 UOC)

Year 3 (Computer Science Major)
Session One
LAWS1081 Property, Equity and Trusts 1 (6 UOC)
LAWS2160 Administrative Law (6 UOC)
Science courses including advanced computing electives (12 UOC)
Session Two
- LAWS6210 Law, Lawyers and Society (6 UOC)
- LAWS1082 Property and Equity 2 (6 UOC)
- Science courses including advanced computing electives (12 UOC)

Year 4 (Computer Science Major)

Session One
- LAWS2150 Federal Constitutional Law (6 UOC)
- LAWS2311 Litigation 1 (6 UOC)
- LAWS4010 Business Associations 1 (6 UOC)
- Law elective (8 UOC)
- Plus ONE of the following courses:
  - LAWS8320 Legal Theory (6 UOC)
  - LAWS8820 Law and Social Theory (6 UOC)

Session Two
- LAWS2321 Litigation 2 (6 UOC)
- LAWS7420 Advanced Legal Research (2 UOC)
- Law or Science elective (8 UOC)
- Plus ONE of the following courses:
  - LAWS8320 Legal Theory (6 UOC)
  - LAWS8820 Law and Social Theory (6 UOC)

Year 5 (Computer Science Major)

Session One
- Law electives (24 UOC)

Session Two
- Law electives (24 UOC)

Bachelor of Science Bachelor of Laws with Major in Psychology (program 4770, plan code PSYCA14770)

Year 1 (Psychology Major)

Session One
- LAWS1052 Foundations of Law (6 UOC)
- LAWS1071 Contracts 1 (3 UOC)
- LAWS2140 Public Law (3 UOC)
- PSYC1001 Psychology 1A (6 UOC)
- Science course (Level 1) (6 UOC)

Session Two
- LAWS1061 Laws of Evidence (6 UOC)
- LAWS1072 Contracts 2 (6 UOC)
- PSYC2001 Psychology 1B (6 UOC)
- Science course (Level 1) (6 UOC)

Honours: Students interested in completing Honours must contact the School of Psychology at the end of Year 1.

Year 2 (Psychology Major)

Session One
- LAWS1001 Criminal Law 1 (6 UOC)
- LAWS2160 Administrative Law (6 UOC)
- PSYC2001 Research Methods 2 (6 UOC)
- Psychology course - 1 x Level 2 (6 UOC)

Session Two
- LAWS1011 Criminal Law 2 (6 UOC)
- LAWS6210 Law, Lawyers and Society (6 UOC)
- Psychology course - 2 x Level 2 (12 UOC)

Year 3 (Psychology Major)

Session One
- LAWS1081 Property, Equity and Trusts 1 (6 UOC)
- PSYC3001 Research Methods 3A (6 UOC)
- Psychology course - 1 x Level 3 (6 UOC)
- Science course (Level 1) (6 UOC)

Session Two
- LAWS1082 Property and Equity 2 (6 UOC)
- Psychology course - 2 x Level 3 (12 UOC)
- Science course (Level 1) (6 UOC)

Year 4 (Psychology Major)

Session One
- LAWS2150 Federal Constitutional Law (6 UOC)
- LAWS2311 Litigation 1 (6 UOC)
- Law electives (8 UOC)

Honours in Science: Students wishing to complete the BSc degree program at Honours level must obtain prior approval from the Faculty of Science and the Faculty of Law. A standard Honours program in Science requires an additional year of study. Alternatively, students may consider completing a BSc degree program at Honours level (4 years) and then seek admission to the three year LLB degree program for graduates.

Academic Rules

For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to the program entry for 4790 Bachelor of Laws.

College of Fine Arts and Faculty of Law

4703 Bachelor of Art Theory Bachelor of Laws

BArtTh LLB

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description

Students undertaking this combined degree program complete the core requirements of both the Bachelor of Art Theory and the Bachelor of Laws. The combined degree allows students to undertake a focused study in the visual arts and culture.

Students completing the BArtTh LLB are likely to gain employment in Arts or Law, but broader opportunities exist for careers in arts management and policy. The professional contexts courses of the BArtTh will enable students to develop career-related skills and experiences and the theoretical/historical contexts courses will provide depth of knowledge about the arts.

Assumed Knowledge

Students must satisfy the normal assumed knowledge requirements for entry to the Faculty of the College of Fine Arts (COFA) and to individual courses in that Faculty.

Program Objectives and Learning Outcomes

At the completion of this program, students will have obtained a sound knowledge base in the fields of both Art Theory and Law.
Program Structure

Program Structure 240 UOC

Law courses 150 UOC
COFA courses 90 UOC

Law Courses 150 UOC
Core courses 92 UOC (17 courses)
Electives 56 UOC (7 x 8 UOC courses)
Law Research Project (Year 4) 2 UOC

The core courses are taken in a specified sequence during Years 1 to 4. Details are given below. After completing the majority of the core courses students are eligible to enrol in electives in Years 4 and 5.

COFA Courses 90 UOC
Art & Design Theory major 60 UOC (10 x 6 UOC)
Contextual Studies 30 UOC (5 x 6 UOC).

Art Theory Plans and Courses

Sequence of Study

For details of the Art Theory study plan and available courses, please refer to the entry for program 4803, the Bachelor of Art Theory in the College of Fine Arts section in this Handbook.

Students must study Art Theory courses in a sequence approved by the College of Fine Arts and law courses in a sequence approved by the School of Law. A direct link to the standard sequence of study is detailed below. Other sequences may be approved under special circumstances.

Year 1

Session One
LAWS1052 Foundations of Law (6 UOC)
SAHT1101 Mapping the Modern (6 UOC)
SAHT1211 Theories of the Image (6 UOC)
SAHT1221 Contexts for Art (6 UOC)

Session Two
LAWS1061 Torts (6 UOC)
SAHT1102 Mapping the Postmodern (6 UOC)
SAHT1212 Theories of Art History and Culture (6 UOC)
Art Theory Contextual Studies Course (6 UOC)

Note: Students who wish to take the BArtTh degree program at Honours level must consult with the Head of School of Art Theory at the end of Year 1.

Year 2

Session One
LAWS1001 Criminal Law 1 (6 UOC)
LAWS1071 Contracts 1 (3 UOC)
LAWS2140 Public Law (3 UOC)
Art Theory Major Course (6 UOC)
Art Theory Major Course (6 UOC)

Session Two
LAWS1011 Criminal Law 2 (6 UOC)
LAWS1072 Contracts 2 (6 UOC)
Art Theory Contextual Studies Course (6 UOC)
Art Theory Major Course (6 UOC)

Year 3

Session One
LAWS1081 Property, Equity and Trusts 1 (6 UOC)
LAWS2160 Administrative Law (6 UOC)
Art Theory Major Course (6 UOC)
Art Theory Contextual Studies Course (6 UOC)

Session Two
LAWS1082 Property and Equity 2 (6 UOC)
LAWS6e210 Law, Lawyers and Society (6 UOC)
Art Theory Contextual Studies Course (6 UOC)
Art Theory Major Course (6 UOC)

Year 4

Session One
LAWS2150 Federal Constitutional Law (6 UOC)
LAWS2311 Litigation 1 (6 UOC)
LAWS4010 Business Associations 1 (6 UOC)
Plus ONE of the following courses:
LAW58320 Legal Theory (6 UOC)
LAW58820 Law and Social Theory (6 UOC)

Session Two
LAW52321 Litigation 2 (6 UOC)
LAW57420 Advanced Legal Research (2 UOC)
LAW52421 Law Research Project (2 UOC)
Law Elective (8 UOC)
Art Theory Major Course (6 UOC)

Year 5

Session One
Law Electives (3 x 8UOC) (24 UOC)

Session Two
Law Electives (3 x 8UOC) (24 UOC)

General Education Requirements

Students enrolled in combined law degrees are not required to complete General Education courses.

Honours

Honours in Art Theory: Students who wish to take the BArtTh degree program at Honours level must consult with the Head of School of Art Theory at the end of Year 1.

Academic Rules

For Academic Rules relating to the Bachelor of Laws component of this combined degree program, please refer to the program entry for 4790 Bachelor of Laws.

Atax (Australian Taxation Studies Program)

Information and Assistance

Atax delivers tax education across Australia and overseas. It aims to educate tax professionals from all sectors of the tax profession – accounting and legal majors, in the tax groups of large and medium sized corporations, in smaller accounting and law firms and in the Tax Office, State Government Treasury Departments and Revenue Offices. The Atax programs have been developed through intensive consultation with a wide range of experts with interest in both the accounting and legal professions and within UNSW.

Who Can Help?

General correspondence and telephone enquiries relating to student and program administration should be directed to:
Atax Student Services Office
Telephone: (02) 9385 9333
Email: atax@unsw.edu.au
Fax: (02) 9385 9380
Postal Address:
Atax
The University of New South Wales
UNSW Sydney NSW 2052
Australia

Contact details for Academic and General Staff can be found in the Atax Student Guide or on the Atax website: www.atax.unsw.edu.au/contact/

Academic Support

A range of different academic support services is provided by Atax through the Academic Support Coordinator. These include support packages on general study skills and basic grammar and writing skills.

Atax recognises students come to the Bachelor of Taxation program with a broad range of backgrounds. We are responsive to the diverse needs of students. Atax provides both formal and informal academic support options.

Two audio conferences are conducted each semester. These are intended for new students, although continuing students are also welcome to participate. These Audio Conferences provide an opportunity for students to discuss general study skills and examination preparation issues in a relatively informal environment. Students are also encouraged to refer to the UNSW Learning Centre (www.lc.unsw.edu.au) and Atax Student Guide.

The Academic Support Coordinator is regularly available for informal consultation and can direct students to appropriate resources and services. Additional support services are provided through the UNSW Learning Centre.
Centre and other units. The Atax Academic Support Coordinator is the primary contact person for students seeking access to such services. The Student Services Office is able to provide contact details.

**Enrolment Procedures**

Enrolment procedures for Atax programs vary slightly from conventional mode programs. Closing dates are usually much earlier and students should refer to information distributed by the Atax Student Services and Atax website prior to the commencement of each semester.

**Sources of Information**

It is important that students familiarise themselves with various documents and sources of information available.

These include:
- the Atax Website (www.atax.unsw.edu.au)
- the Atax Student Guide

**Atax Website**

You can access the Atax website at www.atax.unsw.edu.au. In addition to general information about Atax, program and course information is available. The website also includes details of conferences and special events, links to individual lecturers’ web pages, relevant research links and Atax Library Online.

**Atax Student Guide**

The Atax Student Guide provides ready access to the basics of Atax administration and contains other study resource materials. This guide provides an essential reference point for the Atax student, with contact lists, enrolment information, calendar of events, assessment procedures, and a Library Guide.

**Orientation**

Orientation sessions for new students are usually held in most Australian cities prior to the commencement of each semester. Study Materials will be dispatched to students prior to Orientation. Orientation serves both academic and administrative purposes, as well as giving students the opportunity to meet lecturers and fellow students.

It is expected that all new students will attend their local Orientation.

**Flexible Distance Delivery**

Students can study from anywhere in Australia or overseas without attending campus lectures. All Atax students are supported with comprehensive, high-quality written Study Materials. Atax has Learning Centres in 22 locations across Australia and its flexible distance education framework incorporates a variety of modes of teaching to effectively deliver the Atax programs.

Students may find the learning environment differs significantly from traditional campus-based study. Students should refer to the Atax Student Guide (provided with Study Materials) or visit www.atax.unsw.edu.au for full information regarding the facilities available:
- Learning Centres
- Study Materials
- Audio Conferences
- Web Course Tools (WebCT)
- Regional Classes*
- Informal Study Groups

* a one-day face to face class in capital cities across Australia.

**Library Services**

Library staff can provide you with telephone support that will assist you to make the most of the wide range of online resources and reference materials available. They can also assist you to access reference materials from a diverse range of sources. Additional information may be found in the Atax Student Guide in the ‘Library Guide’ section. Refer also to Atax Library Online at www.atax.unsw.edu.au or contact the Atax library staff directly: Librarian, telephone (02) 9385 9327 or Library Assistant, telephone (02) 9385 9312.

**Summary of Programs**

**Program Titles and Codes**

Program code: 4620
Program title: Bachelor of Taxation
Qualification Abreviation: BTax

**Program Rules and Information**

**4620 Bachelor of Taxation**

**BTax**

**Typical Duration**

3 years full-time

**Minimum UOC for Award**

144 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

The Bachelor of Taxation Degree commenced in 1991 and was the first university undergraduate tax degree offered in Australia. The Bachelor of Taxation can be studied over three years full-time with four courses (or equivalent units of credit) per semester, or six years part-time with two courses (or equivalent) per semester. It is based on the equivalent of 24 courses, of 6 units of credit per course, including 16 core and 8 electives. Some UNSW General Education courses carry only half the credits (3 units of credit) and workload of mainstream courses. Enrolment in such courses could increase the total number of courses to 26.

Students who wish to meet professional accounting entry requirements must study the accounting courses indicated by the Institute of Chartered Accountants in Australia (ICAA) and CPA Australia. (See ‘Particular Requirements for Accounting Professional Entry’)

**Admission Requirements**

Entry to the program is competitive. In assessing applications, the Admissions Committee takes into account the following factors:
- educational achievement
- work experience
- evidence of the ability to handle complex technical issues
- evidence of commitment and motivation
- referees’ reports, if provided

The normal minimum qualification for admission to the program is NSW matriculation (HSC) or equivalent Year 12 qualifications or completion and award of Certificate IV or Associate Diploma or Advanced Diploma in Accounting or equivalent from a TAFE. Consideration will be given to mature age students with extensive technical experience. Students who do not meet Year 12 or TAFE entry requirements may gain entry after completing a University Preparation Program (UPP).

Applications who are not sponsored in their study by the Tax Office must apply via UAC.

**Occupational Destination of Graduates**

Atax graduates are leading fulfilling careers in all parts of private and public practice. They are employed by accounting and legal majors, in the tax groups of large and medium sized corporations, in smaller accounting and law firms and in the Federal Treasury, Tax Office, State Government Treasury Departments and Revenue Offices.

The accounting stream of the Bachelor of Taxation Degree has been considered as satisfying the prescribed qualifications criterion of INCOME TAX REGULATION 156 for registration with the Tax Agents’ Board.
Program Objectives and Learning Outcomes
The objectives of the Bachelor of Taxation are to provide students with:

- a broad-based education in all areas relevant to taxation (including law, accounting, economics and computing) as well as a vocationally specific education;
- knowledge of the basic structure of the Australian tax system, of the essential concepts that underpin taxation, and of the Income Tax Assessment Act and related Acts;
- knowledge of accounting and reporting information, processes and systems, and the integration of such knowledge with the tax system;
- knowledge of legal concepts and principles involved in areas such as contract law, commercial law, administrative law, litigation, company law, banking and finance, property, trusts and equity, and the integration of such knowledge with the tax system;
- skills of statutory interpretation and case analysis;
- skills in organising and solving complex problems by the collection, analysis and application of relevant laws, rules, standards or other information;
- skills of oral and written communication, of negotiation and of advocacy;
- the ability to apply the processes of critical reasoning in evaluating the broad institutional and economic outcomes of tax decisions, including an application of major economic, organisational and information processing concepts;
- the ability to judge appropriate standards of ethical behaviour in their dealings with clients, customers and tax administrators in the tax profession; and
- an awareness of the role of liberal studies as part of a general university education through, in part, the critical analysis of their own professional culture and by exposure in all courses to the broad traditions of critical inquiry.

Program Structure
To complete the Bachelor of Taxation, students are required to do a total of 24-26 courses (or 25-27 if commenced prior to 1999):

- 16 (17 if prior to 1999) compulsory courses
- 2 special category courses
- 4 elective courses
- 2-4 General Education courses to a total of 12 units of credit

Required
ATAX0001 Basic Tax Law and Process (6 UOC)
ATAX0002 Computer Information Systems (6 UOC)
ATAX0003 Microeconomics and the Australian Tax System (6 UOC)
ATAX0004 Framework of Commercial Law (6 UOC)
ATAX0005 Accounting 1 (6 UOC)
ATAX0006 Tax Administration (6 UOC)
ATAX0008 Principles of Capital Gains Taxation (6 UOC)
ATAX0009 Law of Companies, Trusts and Partnerships (6 UOC)
ATAX0010 Accounting 2 (6 UOC)
ATAX0011 Macroeconomics, Government and the Economy (6 UOC)
ATAX0013 Taxation of Companies, Trusts and Partnerships (6 UOC)
ATAX0014 Tax Policy Framework (6 UOC)
AIAU0015 Intermediate Financial Accounting (6 UOC)
AIAU0016 Critical Perspectives and Ethics (6 UOC)
ATAX0017 Tax Accounting Systems (6 UOC)
ATAX0018 Tax Litigation (6 UOC)

Special Category Courses
Two of the following special category courses must be completed:
ATAX0020 Introduction to Australian International Taxation (6 UOC)
AIAU0022 GST: Design and Structure (6 UOC)
ATAX0023 Principles of GST Law (6 UOC)
ATAX0053 Accounting for Complex Structures and Instruments (6 UOC)

Elective Courses
Four of the following elective courses must be completed:
ATAX0022 GST: Design and Structure (6 UOC)
ATAX0023 Principles of GST Law (6 UOC)
ATAX0055 Taxation of Property Transactions (6 UOC)
ATAX0057 Business Finance (6 UOC)
ATAX0058 Quantitative Analysis (6 UOC)
ATAX0059 Management Accounting (6 UOC)
AIAU0060 Auditing and Assurance Services (6 UOC)
ATAX0605 Taxation of Trusts (6 UOC)
ATAX0607 Taxation of Corporate Finance (6 UOC)
ATAX0610 Taxation of Superannuation (6 UOC)
ATAX0614 Selected Problems in Stamp Duty (6 UOC)
ATAX0615 Taxation of Industry and Technology (6 UOC)
ATAX0625 Taxation of Employee Remuneration (6 UOC)
ATAX0626 Taxation and Investment Regulation in China (6 UOC)

Courses designated ATAX06## are postgraduate courses offered at the undergraduate level. They are only available at an advanced stage of the program and only to students who satisfy the relevant course authority they are capable of coping with the demands of the course.

Prerequisites in Courses
ATAX0001 Basic Tax Law and Process for:
ATAX0008 Principles of Capital Gains Taxation
ATAX0009 Law of Companies, Trusts and Partnerships
ATAX0016 Critical Perspectives and Ethics
ATAX0017 Tax Accounting Systems
AIAU0018 Tax Litigation
ATAX0020 Introduction to Australian International Taxation
AIAU0022 GST: Design and Structure
ATAX0023 Principles of GST Law
ATAX0003 Microeconomics and the Australian Tax System for:
ATAX0014 Tax Policy Framework
ATAX0057 Business Finance
ATAX0005 Accounting 1 for:
ATAX0010 Accounting 2
ATAX0017 Tax Accounting Systems
ATAX0006 Tax Administration for:
AIAU0018 Tax Litigation
ATAX0008 Principles of Capital Gains Taxation (or equivalent) for:
ATAX0035 Taxation of Property Transactions
ATAX0009 Law of Companies, Trusts and Partnerships for:
AIAU0013 Taxation of Companies, Trusts and Partnerships
ATAX0020 Introduction to Australian International Taxation
ATAX0010 Accounting 2 for:
ATAX0015 Intermediate Financial Accounting
ATAX0057 Business Finance
AIAU0059 Management Accounting
ATAX0015 Intermediate Financial Accounting for:
ATAX0053 Accounting for Complex Structures and Instruments
ATAX0060 Auditing and Assurance Services
ATAX0023 Principles of Goods and Services Tax Law (or equivalent) for:
ATAX0055 Taxation of Property Transactions
ATAX0058 Quantitative Analysis for
AIAU0057 Business Finance
Particular Requirements for Accounting Professional Entry

Students wanting to gain accounting admission must study the following:

A1AX0053 Accounting for Complex Structures and Instruments (6 UOC)

Also one of the following three other special category courses must be chosen:

A1AX0020 Introduction to Australian International Taxation (6 UOC)
A1AX0022 GST: Design and Structure (6 UOC)
A1AX0023 Principles of GST Law (6 UOC)

Finally, three of the four general electives must be accounting courses. The following three elective courses must be chosen:

A1AX0057 Business Finance (6 UOC)
A1AX0059 Management Accounting (6 UOC)
A1AX0060 Auditing and Assurance Services (6 UOC)

Hence in practice the only decision to be made for students seeking professional accounting entry is between A1AX0020, A1AX0022 and A1AX0023, which are general electives and in the General Education area.

However, Atax also recommends that A1AX0058 be studied as the extra general elective before attempting A1AX0057. As requirements change from time to time, students should check any updates or changes to requirements later in their degree program.

General Education Requirements

Students enrolled in this program must also satisfy the University’s General Education requirements.

Twelve units of credit of General Education must be successfully completed. General Education requirements may, with the prior approval of the BTax Convener, be fulfilled by completion of courses offered in other faculties within UNSW or at other universities. Some of these courses have lower credit value and workload than Atax courses.

Academic Rules

Assessment Policy

The Board of Studies in Taxation has resolved that, in order to pass a course, candidates for the Bachelor of Taxation should obtain:

1. 50% or more of the total marks available in the course and
2. A minimum of 40% of the marks available for the final examination in the course.

Bachelor of Taxation Degree with Distinction

The Assessment Committee of the Board of Studies in Taxation may award the Bachelor of Taxation degree with Distinction when a student satisfies the condition of a 75% weighted average mark (WAM) attained over the student’s degree.

Bachelor of Taxation Degree with Merit

For students who entered the Bachelor of Taxation program prior to 2003, the Assessment Committee of the Board of Studies in Taxation may award the Bachelor of Taxation Degree with Merit when a student satisfies the following conditions:

• a 70% average is attained over the student’s best prescribed merit award number of courses presented for the degree (see table below); and
• the student does not have more than two failures throughout the program.

Provided that where, in the opinion of the Examiners at the Assessment Committee, ‘exceptional circumstances’ exist the Assessment Committee may award the degree with Merit even though a student has not attained a 70% average and/or has three failures throughout the program.

Prescribed merit award number of courses table

Students enrolled in BTax prior to 2003 and therefore eligible for award of either the BTax with Merit or the BTax with Distinction have the option of taking one or the other award.

Exemption Policy/Advanced Standing

Students accepted for enrolment into the Bachelor of Taxation Degree may apply for advanced standing (exemptions from study of particular courses) by completing the form Course Exemption/Advanced Standing. This is available for download from the Atax website at www.atax.unsw.edu.au/students/forms.

Maximum exemption for the BTax is for eight courses of 6 units of credit. The policy on advanced standing for BTax can be accessed via the Atax website at www.atax.unsw.edu.au/study/exemptions.htm#btaxpol

7280 Associate Diploma in Taxation

AssocDipTax

2.5 years full-time

The Associate Diploma in Taxation is not available to students commencing undergraduate study in 2002 or later. For information on this program please refer to www.atax.unsw.edu.au

Non-Award (Single Course), Cross-Institutional and Cross-Group (Faculty) Enrolments

Introduction and Overview

Non-Award enrolments are enrolments in courses or a sequence of courses, which do not lead to, nor (normally) count towards, a formal award of UNSW.

Non-Award study with Atax may count towards Continuing Professional Education (CPE), Continuing Professional Development (CPD) and Continuing Legal Education (CLE) requirements for Chartered Accountants and lawyers respectively.

There are several categories of Non-Award enrolment:

1. Voluntary course enrolment – where the student is taking the course either out of interest or to develop professional competence in an area of specialisation.
2. Cross-Institutional enrolment – where the student enrols in a UNSW course for credit towards an award at another tertiary institution, at which the student is concurrently enrolled.
3. Cross-Group enrolment – where a student from another group (faculty) of UNSW applies to study an Atax course. Written confirmation is required from the other group stating that the course will be credited towards the award.
4. Where an Atax student wishes to enrol in a course at another institution for credit towards their UNSW award, any such courses must be of similar content and level to the corresponding Atax course and specific reasons for the request are required. Atax will normally approve this type of enrolment in special circumstances only. Students are required to complete the normal enrolment procedure at UNSW in order to have the course credited towards their degree.

Cross-Institutional Enrolment Procedures

Procedures for an Atax student entering into a cross-institutional scheme are as follows:

1. Forward full details of the course, including unit of credit value, assessment and content, to the Atax Student Services Office. Outline why you consider the circumstances to be special and indicate the Atax course for which it would be substituted.
2. Your application will then be considered and you will receive written advice regarding its success or otherwise.
3. Make an application to the host institution, presenting approval from Atax (check with the host institution for appropriate procedures).
4. Notify Atax of acceptance by the host institution.
5. Forward a certified copy of the official result (mark and grade) from the course studied at the host institution to Atax once the course assessment has been finalised.

Cross-Group Enrolment Procedures

Students intending to:

• add/vary Atax courses to/in a program of study from another Group or School within UNSW; or
• add/vary courses from another Group or School within UNSW, to an Atax program;

are strongly advised to contact the Atax Student Services Office so transition arrangements can be effected smoothly. You must ascertain the availability of particular courses and the semesters in which they will be offered. You should arrange for your program authority to provide written approval that the Cross-Group course will be credited to your award program. Also arrangements for delivery/collection of study materials and associated support need to be communicated.

Students based in the Law School in UNSW are regarded as falling within these arrangements.
A Message from the Dean

It is my pleasure to welcome you to the Faculty of Medicine at the University of New South Wales. I would like to focus on who we are and what we stand for. An underlying principle at UNSW, and especially in the Faculty of Medicine, is the link between teaching and research. Our staff tell us that they want to work with us because they have the opportunity to pursue their research and to teach. In addition, many of our staff are doctors and other health care professionals who make major contributions to the delivery of clinical care, particularly in the public hospital system. As well as our full-time salaried staff, more than a thousand doctors attached to hospitals and working in the communities have unpaid conjoint appointments with us and make enormous contributions to teaching and research.

UNSW Medicine has a strong presence at the Kensington campus. In addition, staff and students are based in teaching hospitals in Sydney, Wollongong and regional and rural areas, especially Albury/Wodonga, Wagga Wagga, Coffs Harbour and Port Macquarie.

The Undergraduate Program in Medicine is a central focus. We also have undergraduate programs in Health and Exercise Science, and in Medical Science. There is a diverse array of postgraduate coursework programs such as the Masters in Public Health. Postgraduate research focuses on research masters, PhD and MD programs in all of the clinical, basic science and social science disciplines.

Our students are another rich resource in the Faculty. There is a broad mix of students from many backgrounds and metropolitan, rural and international students are all represented in large numbers. Our teaching and learning methods encourage a student-centred approach and acknowledgement that our staff and our students are our two richest resources.

We remain committed to a learning environment where research and teaching are closely intertwined and where we have close relationships with the healthcare system.

Once again, welcome to the Faculty of Medicine. I hope that you will find the information that you need by browsing through these pages. Should you wish to ask a more specific question, do not hesitate to contact the Faculty Office.

Professor Richard Henry
Acting Dean

**Faculty of Medicine Website**

The Faculty of Medicine's website address is [www.med.unsw.edu.au](http://www.med.unsw.edu.au)

This website provides information about programs, courses, research interests, news and current events. The website also contains links to all the schools, units, centres and the affiliated research institutes of the Faculty, as well as staff, student and alumni information resources. The Faculty maintains many PC and Macintosh computer laboratories for student access, both on campus and in the Faculty's teaching hospitals. Students can access the web, email, MS Office and educational applications from these computers.

**Course Descriptions**

Descriptions of courses offered in 2006 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at [www.handbook.unsw.edu.au](http://www.handbook.unsw.edu.au)

**The Faculty**

The Faculty of Medicine was established when the NSW Government accepted a proposal of the Murray Committee of Inquiry into the Future of Australian Universities and announced in December, 1957, that a second medical school in NSW would be established within the re-named University of New South Wales.

The Faculty's first students enrolled in 1961 and 25 of these graduated from the six-year program in 1966. A five-year undergraduate curriculum was introduced in 1974. Although this was a highly successful curriculum, a number of changes in both the hospital and health systems indicated the need for the Faculty to extend the program to a six-year curriculum in 1988. 2004 saw the beginning of a new six year Medicine program designed to suit the needs of 21st century graduates.

The Faculty of Medicine consists of all members of the academic staff, both full-time academics as well as conjoint and adjunct appointees from teaching hospitals, student representatives and other persons nominated by the Faculty. The Presiding Member is elected biennially from the professors and associate professors of the Faculty.

The Dean is the principal channel of communication between the Faculty and the University on administrative matters. The Dean and the Faculty are supported by a number of committees, some of which perform administrative tasks, while many assist in maintaining a constant review of the curriculum and the objectives of medical education.

**Goals of the Faculty**

The primary mission of the Faculty is the pursuit of excellence in medical and biomedical education within a scholarly environment of research and discovery.

**Application Procedures**

Details on application for entry into UNSW medicine programs for both local students and international students can be found on the Faculty's website at [www.med.unsw.edu.au](http://www.med.unsw.edu.au)

**Selection into the Medicine Program**

The Faculty of Medicine implemented new admissions criteria for entry into the UNSW medicine programs from 2003 for both local and international students. Students are selected on the basis of academic merit, results of the Undergraduate Medicine and Health Sciences Admission Test (UMAT) and performance at an interview. Some international applicants are exempt from sitting UMAT due to their place of residence. Further details of the selection process can be found on the Faculty's website at [www.med.unsw.edu.au](http://www.med.unsw.edu.au)

**International Students**

International applicants may only compete for entry as either fee-paying students or as holders of a scholarship awarded by the Australian Government. Enquiries regarding admission of international students should be directed either to UNSW International (tel: +61 2 9385 6996, email: internationaloffice@unsw.edu.au, website: [www.international.unsw.edu.au](http://www.international.unsw.edu.au)) or the Admissions Officer, Faculty of Medicine, at the University of New South Wales, Sydney NSW 2052, Australia. Enquiries regarding Australian Government scholarship holders should be directed to the local Australian Diplomatic Mission or see [www.ausaid.gov.au](http://www.ausaid.gov.au)

**Admission of Indigenous Students**

The Faculty may admit suitably qualified Aboriginal and Torres Strait Islander people. A pre-Medicine program, run for one month, is part of the preparation and selection processes for indigenous students applying for the Medicine program. Further information regarding the admission criteria may be obtained from the Faculty's Indigenous Health Unit on (02) 9385 3677.

**Admission of Disadvantaged Students (ACCESS Scheme)**

The Faculty may admit, within quota, a number of students whose education has been disadvantaged over a two-year period by circumstances beyond their control. Further information may be obtained from the Admissions Officer on (02) 9385 3089.

**Rural Student Entry Scheme**

The Faculty sets aside places in its Medicine program intake each year for students of rural origin who are able to demonstrate to the Faculty that they meet a number of selection criteria. The scheme is designed for high school, undergraduate and graduate students. It is expected that students who gain entry via the Rural Student Entry Scheme will be allocated to a rural hospital and undertake the majority of their final three years in rural hospitals. Further information may be obtained from the Faculty's Rural Health Unit on (02) 9385 3250 or the website [www.rural.med.unsw.edu.au](http://www.rural.med.unsw.edu.au)

**Assumed Knowledge**

There are no prerequisites for entry into the new Medicine program. However there is assumed knowledge of English. Assumed knowledge is a level of achievement at the HSC (or equivalent) considered desirable for successful study in a program or first year course. Students who do not have the assumed level of knowledge are not prevented from enrolling, but may be placed at a considerable disadvantage. It is assumed that upon enrolment students have an adequate command of English language and communication skills.

**Costs in Addition to Fees**

In all UNSW medicine programs, there are costs in addition to fees. The following is an estimate, based on students' experience, of the expenditure which is likely to be incurred over the full length of the program. The amounts quoted are subject to some variation.

<table>

*One long white coat is required for use in practical classes and one short coat for use in the hospitals.*

**Advice to Students on Computing Requirements and Email Policy**

For details on computer recommendations and specifications see the IT Requirements for UNSW Students policy at: [www.its.unsw.edu.au/policies/policies_home.html](http://www.its.unsw.edu.au/policies/policies_home.html)

All official email from the Faculty of Medicine will be sent to students' UNSW email accounts. It is expected that all UNSW students will either routinely check their UNSW email account or have their UNSW email account forwarded to another email address. Information about managing your UNSW email account can be obtained from: [www.disconnect.unsw.edu.au](http://www.disconnect.unsw.edu.au)

**Attendance at, and Residence in, Hospitals**

From Year 1, students attend hospitals for clinical teaching. For Years 1 to 3 (Year 4 from 2007), students are allocated to a large teaching hospital in Sydney known as their “home hospital”. During the final three years, students are required to undertake some terms in hospitals other than their home hospital. These terms are in other hospitals in Sydney and also in selected larger country hospitals. It is expected that students who gain entry via the Rural Student Entry Scheme will be allocated to a rural hospital and undertake at least 12 months of their final two years in rural hospitals. Other local students may have the option or be required to undertake at least 12 months of studies in rural hospitals. International students are not usually given this option of undertaking an extended placement in rural hospitals. However all students should expect at least 4 weeks in a rural rotation. The Faculty will always consider the personal preferences of students in their allocation to home hospitals and to other hospitals on rotation. However, the Faculty reserves the right to allocate students to hospitals that are not their first preference. Students

*One long white coat is required for use in practical classes and one short coat for use in the hospitals.*

**Advice to Students on Computing Requirements and Email Policy**

For details on computer recommendations and specifications see the IT Requirements for UNSW Students policy at: [www.its.unsw.edu.au/policies/policies_home.html](http://www.its.unsw.edu.au/policies/policies_home.html)

All official email from the Faculty of Medicine will be sent to students’ UNSW email accounts. It is expected that all UNSW students will either routinely check their UNSW email account or have their UNSW email account forwarded to another email address. Information about managing your UNSW email account can be obtained from: [www.disconnect.unsw.edu.au](http://www.disconnect.unsw.edu.au)

**Attendance at, and Residence in, Hospitals**

From Year 1, students attend hospitals for clinical teaching. For Years 1 to 3 (Year 4 from 2007), students are allocated to a large teaching hospital in Sydney known as their “home hospital”. During the final three years, students are required to undertake some terms in hospitals other than their home hospital. These terms are in other hospitals in Sydney and also in selected larger country hospitals. It is expected that students who gain entry via the Rural Student Entry Scheme will be allocated to a rural hospital and undertake at least 12 months of their final two years in rural hospitals. Other local students may have the option or be required to undertake at least 12 months of studies in rural hospitals. International students are not usually given this option of undertaking an extended placement in rural hospitals. However all students should expect at least 4 weeks in a rural rotation. The Faculty will always consider the personal preferences of students in their allocation to home hospitals and to other hospitals on rotation. However, the Faculty reserves the right to allocate students to hospitals that are not their first preference. Students
considering applying for entry into a UNSW medicine program must take this into consideration and be willing to undertake their training in a range of clinical and health care facilities. The Faculty’s policy on ‘Allocation of Students to Clinical Locations’ can be found on the website at www.med.unsw.edu.au

Intern Placement and Registration

Each medical graduate seeking registration as a medical practitioner in NSW must complete a period as an intern in a hospital or institution approved by the NSW Medical Board. Before taking up an intern appointment, a graduate must obtain a certificate of conditional registration from the Medical Board. Intern placement is the responsibility of the Postgraduate Medical Council of the NSW Department of Health. Information concerning intern placement and conditional registration is issued to each student by the Office of the Dean during the final year. Information may also be obtained from:

Internship: The Postgraduate Medical Council, Gladesville Hospital Campus, Victoria Road, Gladesville NSW 2111, Tel: 9817 0551 or see www.pmc.nsw.org.au

Registration: The Registrar, Medical Board of New South Wales, Gladesville Hospital Campus, off Punt Road, Gladesville, Tel: 9879 6799 or see www.nswmb.org.au

Part-time Training and Deferment of Internship

The NSW Medical Board has no objection, in principle, to interns undertaking up to one-half of their internship on a reduced daily hours basis, or deferring internship in limited circumstances. Interns considering these options should contact the Board for further details.

Criminal Record Check

The NSW Department of Health has a policy that all students undertaking clinical placements or who require access in any capacity to facilities operated by the Department (this includes all the Teaching Hospitals used by UNSW in its Medicine programs) must undergo a criminal record check prior to employment or placement in any capacity in the NSW Health System. The check is conducted by the NSW Police Service and is coordinated by the Department of Health and the University. Further details are available on the Faculty’s website at www.med.unsw.edu.au

Clinical placement in the NSW Health System is a substantial and essential element in all UNSW medicine programs. Students who fail to satisfy the requirements of this check at any point during their enrolment in a UNSW medicine program will be excluded from the program. Depending upon the circumstances at the time, students may be eligible to transfer to another program of the University.

Working with Children

Under the Commission for Children and Young People Act 1998 and the Child Protection (Prohibited Employment) Act 1998, students who as part of their enrolment are required to have direct contact with children must declare whether they are a ‘prohibited person’, that is whether they have been convicted of a serious sex offence. It is an offence for a ‘prohibited person’ to work with children.

Clinical placement in Paediatrics is an essential element in all UNSW medicine programs. Any student who is a ‘Prohibited Person’ at any point during their enrolment in a UNSW medicine program will be excluded from the program. Depending upon the circumstances at the time, students may be eligible to transfer to another program of the University.

Students with Blood-borne Viruses and Immunisation for Students

In order to be enrolled in any UNSW medicine programs, students must agree to comply with the Faculty’s Immunisation and Blood-borne Viruses Policy, which aims to minimise the risk of medical students contracting or spreading an infectious disease or blood-borne virus, such as HIV, Hepatitis B or C. Students must also be registered with the NSW Medical Board. Registrants with the Board (including student registrants) who undertake, or could reasonably be expected to undertake, exposure-prone procedures have a professional responsibility to take appropriate steps to know their infective status in relation to blood-borne viruses. All students in all UNSW medicine programs could ordinarily be expected to undertake exposure-prone procedures and all students in the programs must know their infective status. A registrant (student) who is aware he or she has a blood-borne virus infection must not undertake exposure-prone procedures.

Any infectious student who knowingly undertakes an exposure-prone procedure or any student who in any other way endangers the health of patients will be reported to the Medical Board’s Impaired Practitioner Program. This may result in registration being withdrawn, which will result in expulsion from UNSW Medicine and the Medicine programs. Such a student would also be subject to the University’s Student Misconduct procedures and may further be liable to criminal prosecution if a blood-borne virus is knowingly transmitted.

The Immunisation and Blood-borne Viruses Policy of the Faculty of Medicine is found on the website at www.med.unsw.edu.au. Students are required to sign a statement indicating that they have read and agree to comply with this policy at the time of enrolment.

Registration with the NSW Medical Board

Under the Medical Practice Act, all medical students in NSW must be registered with the Board as a prerequisite to undertaking a course of medical study at a medical school in the State. Applications for registration are completed on initial enrolment and upgraded annually. Further details are available on the Board’s website at www.nswmb.org.au

Special Consideration

In order to ensure that students experiencing difficulties which may in turn affect the successful completion of their course assessment are seen and assisted by the Student Affairs Coordinator, a set of guidelines has been established to provide the framework within which the process and operation of a preliminary consideration regime will operate.

These guidelines are publicised in relevant student literature including the Handbook, ensuring that all students in the MBB5 program are aware of the availability of assistance and of the details of the process.

Please note: This process does not prevent or discourage a student from discussing their circumstances with the Course Coordinator. Further, these guidelines are intended to be preliminary to the operation of the UNSW Special Consideration Policy. Students may at any time prefer to rely on the provisions of that policy.

Guidelines:

A. Students with a temporary or reversible medical problem or social situation which has impaired their capacity to prepare for or sit for an assessment. Students should approach the Student Affairs Coordinator to explain their situation as soon as possible.

(1) The Student Affairs Coordinator may require a medical certificate or other documentation to support the claim.

(2) The Student Affairs Coordinator will advise the student whether s/he will support their application for special consideration to the Assessment Review Group should it need to be considered.

(3) If special consideration is granted and the student chooses to sit the assessment, the assessment would be marked in the usual way.

(4) If the student passes the assessment, then the matter will be taken no further.

(5) If the student fails the assessment, the Student Affairs Coordinator will attend the relevant Assessment Review Group meeting and present the case for special consideration.

(6) If the Assessment Review Group supports the Student Affairs Coordinator’s view that special consideration should be granted, the student will be allowed to re-sit the assessment without penalty, that is as though the next assessment was the first time that the student had attempted the assessment.

(7) No upward grading of a mark will occur – if a student passes the assessment at which s/he was eligible for special consideration the mark received will stand and will not be up-graded.

Please note that for special consideration to be granted in this category, there needs to be a belief that the problem leading to the granting of special consideration will have resolved significantly by the time of further assessment.

B. Where a problem occurs during an assessment.

(1) Where this occurs, the Student Affairs Coordinator should be notified at the earliest possible time and within 48 hours of the assessment, unless there are exceptional circumstances.

(2) If the opinion of the Student Affairs Coordinator is that the student was moderately or significantly impaired during the assessment, the Student Affairs Coordinator will represent this opinion at the meeting of the Assessment Review Group.

(3) If the student was able to complete a significant proportion of the examination prior to the acute event occurring, it may be possible to base the student mark on the proportion of the examination completed prior to the problem.
(4) In other situations the total mark obtained by the student may be the only mark that it is possible to derive.
(5) If the student obtains a passing performance, then that could be regarded as the student's mark.
(6) If the student failed that assessment s/he would be allowed to re-sit a subsequent assessment as though this were their first attempt.

**Student Photographs and Identification Badges**

In Year 1 of all UNSW medicine programs, each student is required to be photographed during the first session. These photographs are required for School and Faculty purposes. Hospitals also photograph students to produce identification badges, which must be worn in the hospitals.

**Special Note on Working as a Doctor**

Working as a doctor is both physically and emotionally demanding. They are exposed to stress and disease. If intending applicants have any concerns about these issues or if they are aware of any reason (such as a chronic illness, a disability or a criminal conviction) or any impairment that might make it difficult to gain medical student registration with the NSW Medical Board or to practise as a doctor after graduating from UNSW, they are urged to speak about these important matters in confidence with one of our independent Faculty advisers. To arrange this, telephone the Faculty's Student Affairs Coordinator on (02) 9385 3547.

**Faculty Student Organisations**

The University of NSW Medical Society (Medsoc)
The University of New South Wales Medical Society (Medsoc) is the representative body of the medical students of the University. Further information can be found on the website at: [www.medsoc.org.au](http://www.medsoc.org.au)

Rural Allied Health & Medical Society (RAHMS)
The Rural Allied Health and Medical Society (RAHMS) is a club for allied health and medical students at UNSW from rural, urban and international backgrounds with an interest in rural, indigenous and international health issues. For further information, contact the Rural Health Unit on (02) 9385 3250 or visit their website on [http://rural.med.unsw.edu.au/ruhms](http://rural.med.unsw.edu.au/ruhms)

**Clinical Learning Environments**

**South Eastern Sydney and Illawarra Area Health Service**

**The Prince Henry/The Prince of Wales Hospitals**

Barker Street, Randwick 2031
Tel: (02) 9382 2222, Fax: (02) 9382 2233

The Prince Henry and The Prince of Wales Hospitals were joined under a common management in 1961 to form the principal teaching hospitals for the Medical School of the University of NSW. The Prince of Wales Hospital has recently undergone a period of major redevelopment to enable all acute services to be accommodated on the Randwick Campus, which it shares with the Sydney Children's Hospital, the Royal Hospital for Women and the Prince of Wales Private Hospital.

The Prince Henry and Prince of Wales Hospitals currently cover all specialties and sub-specialities. In addition, statewide services provided include: Hyperbaric Medicine Unit, Spinal Injuries, Lithotripsy, HIV Special Unit and the Albion Street Centre.

**Sydney Children's Hospital**

High Street, Randwick 2031
Tel: (02) 9382 1111, Fax: (02) 9382 1777

This is a paediatric tertiary referral hospital serving the whole of the state, one of three such children's hospitals in NSW and is located at the Randwick campus. It has close links through specialist and resident staff with other teaching and associated hospitals. It provides a complete range of paediatric services and has strong links with complementary adult services at Prince Henry and Prince of Wales Hospitals. There are also strong links with community-based child health services and local private practitioners.

**The Royal Hospital for Women**

Barker Street, Randwick 2031
Tel: (02) 9382 6111, Fax: (02) 9382 6513

The Royal Hospital for Women is the University's principal teaching hospital in obstetrics and gynaecology.

There are approximately 4,000 births annually and over 6,500 gynaecological procedures. It is a specialist hospital for obstetrics and gynaecology and includes a department of neonatal paediatrics. The Hospital has established the Department of Endo-Gynaecology and the Natural Therapies Unit, where natural products are actively researched. The first baby health clinic in NSW, the forerunner of today's Early Childhood Health Centres, was established here in 1906. The State's first Antenatal Clinic was also started at the Royal Hospital for Women in 1912.

The Hospital's Department of Medical Imaging has an international reputation for research and development of ultrasound technique and equipment in obstetrics as does the Gynaecological Oncology Centre, for its work on ovarian cancer and gynaecological malignancy.

**The St George Hospital & Community Health Service**

Gray Street, Kogarah 2217
Tel: (02) 9350 1111, Fax: (02) 9350 3999

The St George Hospital & Community Health Service is one of Sydney's busiest principal referral hospitals. Designated as a major Trauma Service, the hospital accepts referrals from outside its immediate area as well as serving a local district population of approximately 225,000 (of whom more than 25% were born overseas). It has the busiest Emergency Department in metropolitan Sydney. It is a state-of-the-art hospital which covers all general areas of medicine (excluding heart and liver transplants).

A Private Hospital is located adjacent to the campus.

**The St Vincent's Hospital**

Victoria Street, Darlington 2010
Tel: (02) 8382 1111, Fax: (02) 8382 4142

St Vincent's Hospital is a principal referral hospital operated by the Sisters of Charity. It is an acute general hospital with highly developed specialist units in adult medicine and surgery and diagnostic services. The Hospital provides referral services for NSW and Australia and services for the local community. Specialty services at the Hospital include cardiac transplantation, bone marrow transplantation, a Cancer Care Centre which provides an integrated approach to the management of malignancy, a comprehensive AIDS service and a specialist Palliative Care Institute (Sacred Heart Hospice). Extensive primary and secondary services are also provided to meet the needs of the local community and these include medical, surgical, geriatric and drug and alcohol services.

St Vincent's is part of the integrated campus of the Sisters of Charity which comprises St Vincent's Private Hospital, the Garvan Institute of Medical Research, the Victor Chang Cardiac Research Institute, St Vincent's Clinic and the Centre for Immunology.

**Calvary Hospital Kogarah Inc**

91 Rocky Point Road, Kogarah 2217
PO Box 261 Kogarah 1485
Tel: (02) 9587 8333, Fax: (02) 9587 1421

Calvary Hospital Kogarah Inc is an Affiliated Health Organisation conducted by the Sisters of the Little Company of Mary. The Hospital was opened in 1966 and provides multidisciplinary palliative care services for 80 inpatients and day-only admissions. The Hospital has a 20-bed Geriatric Rehabilitation Unit, full multidisciplinary team and therapy gymnasium.

There is a Community Palliative Care Team offering holistic, family-oriented care to people with terminal illnesses within the South Eastern Sydney Area Health Service who choose to live at home. An Outpatient Pain Clinic is available at Calvary for these and other patients. Calvary staff offer a consultative service to nursing homes and private hospitals.

**The Langton Centre**

Corner Nobbs and South Dowling Streets, Surry Hills 2010
Tel: (02) 9332 8777, Fax: (02) 9332 28700

The Langton Centre is a specialist agency for the treatment of addictions. The Centre provides medication detoxification, group and individual counselling, and medical and psychological interventions for dependent drug users. The Centre operates a methadone maintenance clinic and a needle and syringe exchange program.

**St Luke's Hospital Complex**

18 Roslyn Street, Potts Point 2011
Tel: (02) 9356 0200, Fax: (02) 9357 2334

St Luke's Hospital Complex, provides acute hospital, nursing home and aged care services. St Luke's (Private) Hospital is a 108 bed acute General Hospital providing comprehensive surgical, medical and rehabilitation care. Facilities include operating theatres, an intensive care unit, a day surgery/procedures unit, endoscopy unit, telemetry/sleep studies unit,
rehabilitation unit including hydrotherapy pool and diagnostic radiology service, including CT Scan. It also has a purpose built Day Rehabilitation and Injury Management Centre.

Shellharbour Hospital
The Shellharbour Hospital has 150 beds and provides emergency, medical, surgical, obstetric and psychiatric services.

Shoalhaven Hospital
Shoalhaven Hospital is a 143 bed, level 4, district hospital for the Shoalhaven region, providing emergency, elective orthopaedic and plastic surgery, medical, ICU, obstetric, gynaecologic, paediatric, neonatal care as well as rehabilitation services.

Sutherland Hospital Caringbah
Kingsway, Caringbah 2229
Tel: (02) 9540 7111, Fax: (02) 9540 7197
The Sutherland Hospital Caringbah, was founded in 1958. It is a general medical, surgical and obstetric hospital, with various sub-specialties. There are also psychiatric and rehabilitation, oncology and day surgery units, a paediatric ward, and a busy emergency department. Based in the rapidly expanding South Eastern suburbs, the hospital serves an approximate population of 200,000.

Sydney Hospital and Sydney Eye Hospital
Macquarie Street, Sydney 2000
Tel: (02) 9382 7111, Fax: (02) 9382 7320
Sydney Hospital and Sydney Eye Hospital has an Accident and Emergency Service. It provides inpatient and outpatient services in general medicine, general surgery, orthopaedics, ENT, hand surgery, and ophthalmology (including the Lions Eye Bank and Save Sight Institute), Sydney Artificial Eyes, Sydney Sexual Health Centre, Kirketon Road Centre in Kings Cross and the Langton Centre in Surry Hills.

War Memorial Hospital Waverley
125 Birrell Street, Waverley 2024
Tel: (02) 9369 0100, Fax: (02) 9387 7018
War Memorial Hospital, Waverley, is under the governance of the Uniting Church. The hospital runs a geriatric rehabilitation and assessment unit, a rehabilitation outpatient service, a short stay residential respite unit, a day care unit - which provides services for both frail and dementia clients and non-English speaking background groups - and podiatry outpatient services. A hydrotherapy pool supports the inpatient rehabilitation services. The War Memorial Hospital also supports an aged care assessment team, a number of specialist clinics and services, and provides office accommodation for the Waverley Community Team.

Wollongong Hospital
Wollongong Hospital is the major teaching and referral hospital for the Illawarra Area. It provides emergency care, specialist medical and surgical services, intensive care and major diagnostic, maternal and paediatric services for patients referred from throughout the Illawarra. The Wollongong and Port Kembla Hospitals provide complementary services with all acute services located at the Wollongong Hospital.
The Port Kembla Hospital comprises 52 beds for Rehabilitation and Psychiatry Services, and the Wollongong Hospital with 240 beds provides a full range of tertiary services.

Corrections Health Service
Long Bay Correctional Centre
Anzac Parade, Little Bay, 2036
Tel: (02) 9289 2977, Fax: (02) 9311 3005
CHS provides and coordinates a comprehensive range of health services for people in custody within the NSW Correctional System. Major clinical programs include General Practice and Primary Health Care, General Medicine/Surgery, Mental Health Programs, Drug and Alcohol Services, Population Health, Indigenous People’s Health Services, Dental and Imaging Services.

The Sydney South Western Area Health Service
Website: www.swsahs.nsw.gov.au
Liverpool Hospital
Elizabeth St, Liverpool, 2170
Tel: (02) 9282 3000, Fax: (02) 6318
The SWSCS is centred at Liverpool Hospital (600 beds), a principal tertiary referral hospital for the South Western Sydney Area Health Service (SWSAHS). It provides services in all the sub-specialties of internal medicine, general surgery including orthopaedics and plastic surgery, pathology and imaging. It has a Brain Injury Centre and a Cancer Therapy Centre which includes rehabilitation and palliative care.

Bankstown-Lidcombe Hospital
Eldridge Rd, Bankstown, 2200
Tel: (02) 9722 8000, Fax: (02) 9722 8570
This is a major metropolitan acute general hospital providing 454 beds and caters for approximately 30,000 inpatient separations per year. The hospital offers services such as general medicine and surgery, obstetrics, paediatrics, emergency, intensive care, day surgery, endoscopy, psychiatry, neonatology, pathology and imaging.

The Greater Southern Health Service
Wagga Wagga Base Hospital
PO Box 159, Wagga Wagga NSW 2650
Tel: (02) 6938 6666, Fax: (02) 6921 8243
Website: www.gmahs.nsw.gov.au
Wagga Wagga Base Hospital is a 220 bed acute regional hospital and has specialists in most major disciplines (medicine, paediatrics, surgery, orthopaedics, anaesthetics, obstetrics and gynaecology, ENT, ophthalmology, geriatrics, rehabilitation, psychiatry and emergency medicine). The Base Hospital is a significant teaching hospital boasting registrars in medicine, surgery, orthopaedics, anaesthetics, obstetrics and gynaecology and is a primary allocation centre.

Albury Base Hospital
PO Box 326, Albury NSW 2640
Tel: (02) 6058 4444, Fax: (02) 6058 4504
Albury Base Hospital is a modern 155 bed facility providing specialist services to the Albury–Wodonga and the surrounding parts of southwestern NSW and northeastern Victoria. The hospital is the designated regional trauma centre for the region, with a catchment population of approximately 150,000 people. The hospital has a suitably appointed and staffed intensive care unit and emergency department, both of which are accredited for training by many of the Specialist Medical Colleges.

Wodonga Regional Health Service
PO. Box 156, Wodonga, VIC 3689
Tel: (02) 6051 7111, Fax: (02) 6051 7477
The Wodonga Regional Health Service is located in the rural city of Wodonga. Together with the border city of Albury, the Albury-Wodonga district is home to over 90,000 people. The Health Service provides a range of hospital and community health services including Obstetrics, General Medicine, General Surgery, Acute Care, Paediatrics, Emergency, Mental Health, Medical Imaging and Aged, Rehabilitation and Allied Health care.

Griffith Base Hospital
PO Box 1013, Griffith NSW 2680
Tel: (02) 6962 8333 Fax: (02) 6964 1587
Griffith Base Hospital is a 92 bed Base Hospital providing a range of acute specialist services including Emergency Medicine, General Medicine, General Surgery, Paediatric Medicine, Rehabilitation Medicine, ENT, Urology, Paediatric Surgery, Oncology, Obstetrics, Intensive Care, Respiratory Medicine and Rheumatology.

The North Coast Area Health Service
Coffs Harbour Health Campus
Pacific Highway, Coffs Harbour, 2450
Tel: (02) 6656 7000, Fax: (02) 6656 7010
The new Coffs Harbour Health Campus was opened in November 2001 with capacity for 202 beds and a floor area of approximately 25,800 square metres. Services in the new facility are clustered around the needs of defined groups of patients and clients in four distinct Care Centres, namely the Family Care Centre, the Medical and Therapeutic Care Centre, the Critical and Surgical Care Centre, and the Mental and General Well-being Centre.

Port Macquarie Base Hospital
Wrights Road, Port Macquarie 2444
Tel: (02) 6581 2000, Fax: (02) 6580 1110
Port Macquarie Base Hospital was the first privately operated and owned hospital in Australia. This 161 bed hospital opened its doors to the public in November 1994 and is a comprehensive referral hospital for both public and private patients of Port Macquarie and surrounding areas. The hospital provides a 24 hour accident and emergency service; general surgery; orthopaedic surgery; vascular surgery; gynaecology; obstetrics; urology;
ear, nose and throat surgery; renal medicine; oncology; cardiology; thoracic medicine; general medicine; paediatric and neo-natal medicine; psychiatry and emergency medicine. The hospital has been accredited by the Medical Association/Colleges of Physicians, Surgeons, Obstetrics and Gynaecology, Orthopaedics and Psychiatry.

Kempsey District Hospital
River Street Kempsey, Tel: (02) 6652 6155, Fax: (02) 6563 1557
Kempsey Campus Coordinator – Dr Leo Smith – Tel: (02) 6562 6188.
This 106 bed acute general hospital provides emergency services, medicine, surgery, psychiatry, rehabilitation and obstetrics. Durri Aboriginal Medical Service, located in the Kempsey CBD, is a new state of the art facility providing primary health care for indigenous people.

Clinical Learning Environments (Private)
Prince of Wales Private Hospital
Barker Street, Randwick 2031
Tel: (02) 9650 4000  Fax: (02) 9650 4695
St. George Private Hospital
1 South Street, Kogarah 2217
Tel: (02) 9598 5555  Fax: (02) 9598 5000
St. Vincent’s Private Hospital
406 Victoria Street, Darlinghurst 2010
Tel: (02) 8382 7111  Fax: (02) 8382 7334

Faculty Units, Centres and Affiliated Institutes
The Bioanalytical Mass Spectrometry Facility
The Bioanalytical Mass Spectrometry Facility (BMSF) is a UNSW beach-head facility providing research support to investigators on this campus and affiliated teaching hospitals. The BMSF is a major facility for molecular characterisation for the Faculties of Medicine, Science and Engineering at UNSW. The facility is equipped to world class standards enabling all types of mass spectrometry to help answer questions posed by researchers and clinicians. The BMSF is both a research and research-support facility engaged in several areas of study. There are three main overlapping areas of research: large molecule analysis including proteomics, small molecule biomarker research including the monitoring of damage, repair and the cellular changes associated with aging and inflammatory disease, and development of instrumentation and technology for mass spectrometry. The facility offers an analytical service and delivers courses on mass spectrometry and allied topics. The BMSF is in partnership with the Australian Proteome Analysis Facility (Macquarie University) which is funded under the Major National Research Facility Scheme. More information on the BMSF can be obtained at www.bmsf.unsw.edu.au

Centre for Health Informatics
The Centre for Health Informatics (CHI) engages in research, development and commercialisation of advanced information and communication technologies for health care delivery. Further information can be obtained at: www.chi.unsw.edu.au

The Centre conducts research and development in 4 broad areas:
• Evidence-based Decision Support - Developing technologies to provide on-line access to clinically relevant information to support decision making by clinicians and consumers.
• Clinical Communications - Understanding how communication fundamentally supports the process of health care delivery, its role in producing errors, and how new technologies can be used to improve communication.
• Home Telecare - uses information, communications, measurement and monitoring technologies to evaluate health status and deliver health care services to the home from a distance to improve clinical outcomes and allow the elderly and the chronically ill to stay at home longer.
• Evaluation - Assessing the effectiveness of new information and communication technologies in improving health outcomes and delivery.

Postgraduate courses in Health Informatics are offered within Masters degrees in the School of Public Health & Community Medicine.

Centre for Clinical Governance Research in Health
Since 1991, the Centre for Clinical Governance Research in Health has undertaken research and evaluation projects on health sector issues. Its core interest is to investigate issues of policy, governance and leadership in the health sector. The Centre is involved in conducting original research into clinical governance issues, providing a scholarly capability by which to evaluate health sector policies, programs and projects, and contributing to undergraduate medical, postgraduate health services management, and public health and doctoral education. Further information is available at www.med.unsw.edu.au/clingov

Centre for Vascular Research
The Centre for Vascular Research is a multidisciplinary organisation focusing on the causation and treatment of occlusive vascular disease and other pathologies with vascular components. This includes projects on angiogenesis in tumour growth and inflammation. The Centre has laboratories in the John Curtin School of Medical Research at the ANU and the Department of Biochemistry and Molecular Biology, Monash University in addition to UNSW on campus and at Prince of Wales Hospital and St George Clinical School. Details of the Centre, structure, group leaders, research directions and opportunities for undergraduate and postgraduate students are available at www.crv.net.au

Children's Cancer Institute Australia for Medical Research
Children's Cancer Institute Australia for Medical Research is an independent institute affiliated with the Faculty of Medicine, UNSW. The Institute was established in 1976 and occupies a 5 storey complex at the southern end of the Sydney Children's Hospital as well as a number of labs and offices in a nearby building. With staff numbers exceeding 120, including Honours and postgraduate scholars of the University, the Institute undertakes laboratory research on malignant disease in children. Research work is organised into seven programs: experimental therapeutics, molecular diagnostics, molecular carcinogenesis, leukemia biology, stem cell biology, iron metabolism and ination and Australian Cancer Research Foundation Drug Discovery Program. The Institute is the only independent medical research institute in the country focusing solely on research into the nature, origin, cause and treatment of childhood cancers (particularly leukemia and neuroblastoma).

Garvan Institute of Medical Research
The Garvan Institute of Medical Research has a staff of 280 including 45 PhD and MD scholars. The Institute is structured into six major research programs - arthritis and asthma, bone and mineral, cancer, neurobiology, metabolism and diabetes and psychiatric disorders - which are funded through program and Project grants from the National Health and Medical Research Council. Located at the St Vincent's Hospital Campus, the Garvan Institute focuses on the molecular basis of health and disease, integrating a range of basic laboratory based research approaches together with extensive clinical research. Further information is available at www.garvan.org.au

National Centre in HIV Epidemiology and Clinical Research
The National Centre in HIV Epidemiology and Clinical Research (NCHECR) is recognised worldwide as a leader in HIV/AIDS research. The NCHECR undertakes research into HIV/AIDS that focuses on epidemiology, clinical research and clinical trials, in collaboration with other research centres, government departments, the pharmaceutical industry, community groups, health clinics and general practitioners. The priorities of the NCHECR include surveillance and monitoring of HIV infection and AIDS, epidemiological studies of transmission and disease progression, identification of social and behavioural factors affecting HIV disease and the establishment of Australia as a primary site for clinical trials of HIV therapy. As an extension of its role in HIV/AIDS, the Centre also carries out epidemiological and clinical research into other blood borne viruses, particularly Hepatitis C and sexually transmitted infections. Another significant area is the NCHECR’s contribution to international clinical research and provision of research expertise and training to countries of the Asia-Pacific region. Recently the Centre has increased it role in the development and testing of novel vaccines for HIV. More information can be obtained from the Centre’s website: www.med.unsw.edu.au/nchecr

National Perinatal Statistics Unit
The National Perinatal Statistics Unit (NPSU) is a collaborating unit of the Australian Institute of Health and Welfare based at the University of NSW. The NPSU is located on the Randwick Hospital Campus within the School of Women's and Children's Health. The NPSU maintains national perinatal and reproductive health data collections based upon

MEDICINE 303
data supplied by the States and Territories. An assisted conception data collection is also held based upon data supplied by IVF and GIFT Units from Australia and New Zealand. The NPSU in collaboration with States and Territories and various professional, government, non-government and consumer groups are involved in the continuing development of national reproductive and perinatal health data systems. The NPSU’s objectives are to monitor and interpret national reproductive and perinatal health data, to conduct teaching and research in perinatal and reproductive health and research in perinatal and reproductive health.

National Drug and Alcohol Research Centre
The National Drug and Alcohol Research Centre (NDARC) was established at UNSW in May, 1986 and officially opened in November, 1987. It is funded by the Commonwealth Government as part of the National Drug Strategy (formerly, the National Campaign Against Drug Abuse). NDARC is situated on the UNSW Randwick campus in the eastern suburbs of Sydney. The centre is multidisciplinary and collaborates with medical, psychology, social science and other schools of the University, and with other institutions and individuals in Australia and overseas. The overall mission of NDARC is: by research and related activities to contribute to the minimisation of the harmful consequences of alcohol and other drugs used in Australia by increasing the effectiveness of the Australian treatment response to drug-related problems. Further information is available at http://ndarc.med.unsw.edu.au

Prince of Wales Medical Research Institute
The Prince of Wales Medical Research Institute is an independent institute affiliated with the University. Since its opening in 1993, it has grown to become one of the largest aggregates of research nationally on the functions and disorders of the brain and nervous system. It has a staff of more than 100. In 2003, it established the Mayne Clinical Research Imaging Centre based on a 3T machine. Major lines of research include human sensation and motor cortex function, balance and movement; autonomic nervous system; nervous system morphology (brain “atlases”); Alzheimer’s, Parkinson’s and other neurodegenerative diseases; macular degeneration and blindness; clinical neurophysiology; nerve and spinal cord injury; child injury; chronic pain; and role of endroids in maintaining or altering functions of the nervous system. For further information visit the Institute’s website at: www.powmri.edu.au

Simpson Centre for Health Services Research
The Simpson Centre is a NSW Government funded Research Centre with a strong history of applied research and health service innovation. The genesis of the Simpson Centre was in response to increasing pressure for practical solutions to improve acute services. This has now expanded to include research across traditional boundaries linking acute medical and community based health care delivery. The principal objectives of the Simpson Centre are to: innovate, evaluate research and develop health service systems; disseminate research results and facilitate implementation of validated service innovation. This approach also incorporates examination of cultural and psychosocial factors influencing service delivery and utilisation.

Skin and Cancer Foundation Australia
The Skin and Cancer Foundation was established in 1978 and is affiliated with St. Vincent's Hospital. A broad range of clinics is devoted to the diagnosis and treatment of skin cancer, psoriasis, contact dermatitis, vitiligo and pigmented skin lesions. There is a large dermatopathology service. Clinical trials as well as research in occupational dermatoses and histopathology are pursued. The Foundation provides sunscreen testing and irrraniy testing for new products. The Foundation has a Westmead branch which provides sunscreen testing and irritancy testing for new products as well as being the main centre for dermatological surgery.

Victor Chang Cardiac Research Institute
The VCRI was established in 1994 to honour the vision and memory of the late Dr Victor Chang. It is a member of the St Vincent's Hospital Campus. It aims to conduct the highest quality fundamental research into cardiovascular diseases, with a major emphasis on the prevention, diagnosis and treatment of heart muscle diseases. It currently has active research programs in molecular cardiology relating to the mechanisms of cardioc hypertrophy and signal transduction; developmental biology, gene regulation and enzyme research; the genetics of cardiovascular diseases; cardiac arrhythmias and mechanics; transplantation biology; vascular bioengineering, and the pathophysiology of cardiac ischaemia and coronary restenosis.

Rural Health Unit
The Rural Health Unit was established in 1995 to help address the chronic shortage of doctors in rural areas. Since this time the Unit has seen a rapid growth in personnel and student activities. The principal areas of responsibility of the Rural Health Unit are:

- administration of special entry schemes, such as the Rural Students Entry Scheme (RSES);
- promoting Medicine and allied health to rural high school students;
- administration and support of RAHMS, the Rural Allied Health & Medical Society;
- supporting rural students in Medicine;
- encouraging and supporting students who are interested in pursuing a career in rural health;
- promoting rural health through various avenues, eg. the media and lobbying to the government; scholarships, cadetships, bursaries;
- promoting rural health as a viable alternative to urban based medical practice;
- providing a forum for communication between metropolitan and rural health professionals, eg. workshops;
- conducting research into rural health issues and rural curriculum in the Medicine program; and
- supporting current students of the School of Rural Health and promoting the School to pre-clinical UNSW based students which will increase the opportunities for rural clinical learning.

For more information please visit the Rural Health Unit website http://rural.med.unsw.edu.au

Indigenous Health Unit
The Indigenous Health Unit works in close collaboration with the Rural Health Unit to:

- promote Medicine to school-age and mature Indigenous students;
- administer the Indigenous Entry into Medicine scheme, including the Pre-Medicine program, a preparation to the medical course;
- select students;
- support students throughout their course;
- develop appropriate curricula (in consultation with Indigenous communities);
- develop partnerships with Indigenous communities;
- coordinate teaching in Indigenous Health to all students within Medicine;
- conduct research into Indigenous Health and assist in building the capacity of others to undertake such research.

Program Rules and Information
The Faculty of Medicine introduced an innovative six year undergraduate Medicine program (3802 New Medicine program) that commenced for Year 1 students in 2004. Information below is provided both for this new program and for the existing 3801 Medicine program.

3802 Medicine Program

Bachelor of Medicine Bachelor of Surgery MB BS

Typical Duration
6 years

Minimum UOC for Award
288 units of credit

Typical UOC per Session
24 units of credit

Program Description
This six-year program leads to the award of the degrees Bachelor of Medicine and Bachelor of Surgery - MB BS. This double degree, which is in effect a single degree, may be awarded with Honours Class 1; Honours Class 2, Division I; Honours Class 2, Division II; or at Pass level. The award of Honours is determined on the basis of a student’s performance throughout the six year program, obtained by using the weighted mark for specified assessments in the three phases of the program.
Students who have achieved a high standard in their studies may undertake a one year program of supervised research leading to the award of the BSc(Med) Honours. For details, please refer to the program entry for 3831 Bachelor of Science (Medicine) Honours.

Program Objectives and Learning Outcomes

The objectives of the medicine program are:

- to establish an integrated, interconnected and organised medical knowledge base as a platform for a professional and personal life of learning through experience;
- to develop effective interactions with oneself through reflection; interaction with others through communication; and interaction with information and learning resources through information literacy and critical analysis;
- to develop a set of personal attributes and skills appropriate to the professional practice of Medicine.

These objectives have been translated into a set of educational outcomes; these being eight desired capabilities in graduates of the Medicine program, grouped as follows:

**Applied Knowledge and Skills**

1. Using basic and clinical sciences in medical practice
2. Understanding the social determinants of health and disease
3. Patient assessment and management
4. Effective communication
5. Working as a member of a team
6. Self directed learning and critical evaluation skills
7. Understanding and acting in an ethical and socially responsible manner
8. Development as a reflective practitioner

**Personal Attributes**

**Program Structure**

The duration of the Medicine program is normally 6 years. It has a modular structure comprising a series of fully integrated courses studied over 27 teaching periods, each of 8 weeks duration. There are 4 teaching periods in Years 1-3 (Teaching Periods 1-4). There are five teaching periods (Summer Teaching Period and Teaching Periods 1-4) in years 4-6. The commencement dates of Teaching Periods 1 and 3 correspond to the beginning dates of the standard UNSW Sessions 1 and 2 respectively, and the Summer Teaching Period generally commences on the first Monday in January. Teaching is integrated across discipline areas. Courses usually correspond to an 8-week module, rather than the sessional arrangement applicable to most UNSW courses. However, in general the standard UNSW program load of 48 units of credit (UOC) per year will apply, with most 8-week courses being treated as 10 UOC.

As part of the program, students are required to satisfy the University’s General Education requirements. Please see General Education below.

The program is organised into three phases. **Phase 1** includes an initial Foundations course, followed by 8 x 8 week courses focussing on basic medical sciences in relation to the human life cycle; social, ethical and legal issues related to health care; and early experience in clinical or other health-related environments. During this phase, students will undertake a variety of learning activities involving students from different stages of the program working collaboratively in small groups.

**Phase 2** consists of a minimum of 4 x 8-week courses, with increased clinical content and an emphasis on correlation between prior and current learning.

**Phase 3** consists of a minimum of 9 x 8-week courses with a clinical focus, but still includes relevant content from the basic medical sciences and the social sciences. The sequence of courses in Phase 1 is fixed, but in later phases students will have increasing flexibility to tailor the sequence and content of the courses they undertake to match their interests and needs.

In all phases of the program, students will be required to travel to various clinical environments associated with UNSW, which will be the predominant locations for learning in Phases 2 and 3. These locations include Clinical Schools associated with StVincent’s Hospital, Darlinghurst; St George Hospital, Kogarah; the Randwick Campus Hospitals, various locations in the South Western Sydney Clinical School based around Liverpool; and the School of Rural Health, which has campuses in the Greater Murray and Mid-North coast areas. Throughout the program, students may be attached to multiple sites, which will typically include at least 8 weeks in a non-metropolitan setting.

After completing Phase 1, and typically in Phase 2, students will undertake an Independent Learning Project, equivalent to 3 courses, which unless otherwise negotiated, will be taken consecutively over 4 teaching periods, during which students should also complete 12 UOC of elective courses in a faculty or faculties other than Medicine. This project will offer scope for in-depth study in a variety of possible settings, ranging from laboratory-based work in the biomedical sciences, audits of clinical practice, to-for example - projects dealing with cross-cultural issues or health economics, which may be taken outside the Faculty of Medicine.

Students wishing to undertake a full year of research will be able to enrol in the BSc (Med) Honours program 3831. These students will be exempt from undertaking the Independent Learning Project and will thus complete the combined program over 28 teaching periods in approximately 6.5 years. Exemption from the Independent Learning Project will also be granted to students who have previously completed a research Honours program or higher research degree, or a Master degree with a significant research component, or who can otherwise demonstrate acceptable evidence of independent study or research at a tertiary level. These students will complete the Medicine program over 24 teaching periods.

**General Education Requirements**

As part of the program, students are required to complete 12 UOC of General Education courses (unless exempt under UNSW rules) which may be available as sessional courses or in block mode. Students are also required to undertake 12 UOC of elective courses in a faculty or faculties other than Medicine.

For information on available courses, please refer to the General Education section in this Handbook.
Honours
Award of Honours
This will be calculated on the basis of a weighted mark for specified assessments in the three phases of the program, together with the marks obtained in General Education courses and courses undertaken outside the Faculty of Medicine.

Please note: To be eligible for Honours, students must achieve a grade of Credit or better in the Independent Learning Project, unless they have been exempt from undertaking the project.

The Faculty Assessment Review Group considers the ranked list of students and their marks and decides the cut-off marks for the award of Honours at the various levels. Neither the percentage of the students obtaining Honours at the various levels nor the cut-off marks are predetermined, and the Faculty Assessment Review Group makes its own assessment of the level of academic attainment indicated by the overall program mark.

Relative Weighting Within Phases

Phase 1
End-of-Block Examinations (cumulative) 2
End-of-Phase Examination 1
Portfolio Assessment 2
Clinical & Communication Skills Examination 1

Phase 2
Clinical Examination 3
Portfolio Assessment 3
Project Marks (best 4 if more than 4) 2

Phase 3
Clinical Module Assessments (best 8) 1
Portfolio Assessment 1
Clinical and Correlation Examination 2

Relative Weighting of Phases and Other Components

Phase 1 = 6
Phase 2 = 4
Phase 3 = 8
General Education courses = 1
Additional courses from other Faculties = 1

Academic Rules

Rules of Progression
Assessment in this program is capability based, requiring students to demonstrate their ongoing development with respect to the eight areas of capability. Progression will not be based solely on satisfactory completion of individual courses, nor will it correspond solely to annual stages. Full details are available on the Faculty of Medicine website.

3841 Combined Arts and Medicine Program

Bachelor of Arts Bachelor of Medicine Bachelor of Surgery
BA MB BS

Typical Duration
7 years

Minimum UOC for Award
336 units of credit

Typical UOC per Session
24 units of credit

Program Description
The Arts/Medicine program is an alternative program of study in which, over a seven-year period, a student may complete the degree of Bachelor of Arts, together with the degrees of Bachelor of Medicine and Bachelor of Surgery. A limited number of places is available in this program and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake the program should contact the Office of the Dean as soon as possible after receiving their offer of a place in the Medicine Program. Selection of students for the Arts/Medicine program is made approximately two weeks before commencement of Session 1, although students may apply to transfer from the Medicine 3802 program to Arts/Medicine 3841 at the end of Year 1.

Program Objectives and Learning Outcomes
The Arts/Medicine program is intended for those students who wish to continue their interest and studies in the Arts and Social Sciences during their medical studies.

For the Program Objectives of the MBBS component of the Arts/Medicine program, please refer to the program entry for 3802 Medicine in this Handbook.

Program Structure

Over a period of seven years, students will be required to fulfil the requirements of the MB BS degree program as well as 66 units of credit in courses offered by the schools/departments/programs within the Faculty of Arts & Social Sciences, including an approved major sequence. A major sequence equals 42 units of credit (usually 12 at Level 1 and 30 at upper level).

For the Program Structure of the MB BS component of the Arts/Medicine program, please refer to the program entry for 3802 Medicine program.

Honours

Students who have completed the combined Arts/Medicine program are eligible for the award of Honours in the MB BS degree program, based on the weighted mark for specified assessments in the three phases of the MB BS program, together with the marks obtained in the best 24 UOC undertaken in the Faculty of Arts & Social Sciences.

Relative Weighting of Phases and other Components

Phase 1 = 6
Phase 2 = 4
Phase 3 = 8
Arts Courses (best 24 UOC) = 2

For further details on Honours, please refer to the program entry for 3802 Medicine program.

Academic Rules

Students in the BA MB BS program will not be required to complete General Education courses or other courses outside the Faculty of Medicine. They will usually complete the requirements for the BA after 4 years. Upon rejoining the Medicine program, they will undertake a short clinical skills refresher course. Students wishing to undertake a full year of research in Arts will be able to enrol in a BA Honours program. Subject to the sequence of courses taken during Phase 2, these students may be exempt from undertaking the Independent Learning Project and could complete the combined program in approximately 7.5 years.

For academic rules and requirements relating to the MB BS component of the Arts/Medicine program, please refer to the program entry for 3802 Medicine in this Handbook.

3801 Medicine Program – for continuing students only

Bachelor of Science (Medicine) Bachelor of Medicine
Bachelor of Surgery
BSc(Med) MB BS

Please note: This program is not available to commencing students. Details below are provided for the reference of continuing students only. Prospective students should refer instead to the new Medicine program 3802.

Typical Duration
6 years

Minimum UOC for Award
288 units of credit

Typical UOC per Session
24 units of credit

Program Description
This six-year program leads to the award of the degrees of Bachelor of Science (Medicine), Bachelor of Medicine, Bachelor of Surgery - BSc (Med) MB BS.

These degrees, which are in effect a single degree, may be awarded with Honours Class 1; Honours Class II, Division I; Honours Class II, Division II or at Pass level. The award of honours is determined on the basis of a student’s performance throughout the six year program, and is usually obtained by using the weighted average mark for each year, calculated by weighting the courses according to units of credit.
On completion of Year 3 of the six-year program, students also qualify for the degree of Bachelor of Science (Medicine). Students would not ordinarily be awarded the BSc(Med) until the completion of the requirements for the award of the MB BS. However, students who have completed the requirements for the award of the BSc(Med) and are leaving the Medicine Program 3801 (BSc(Med) MB BS), either through their own decision to withdraw or upon exclusion by the University, are eligible to be awarded the BSc(Med) degree at that stage.

Students who have achieved a high standard in their studies may undertake an additional one year program of supervised research leading to the award of the BSc(Med) Honours. For details, please refer to the program description for 3831 BSc(Med) Honours.

Program Objectives and Learning Outcomes

The objectives of the Medicine program are:

1. To produce a graduate with knowledge of medical and behavioural sciences sufficient to understand the scientific basis of medicine and to go forward with medicine as it develops further.
2. To provide a graduate with the flexibility of outlook and training necessary to progress to any field of endeavour in medicine or related disciplines.
3. To provide education in clinical methods and patient care in the main branches of medicine and surgery so that the graduate could undertake patient care under supervision at the level of an intern.
4. To help the graduates understand professional and ethical principles and to be at all times mindful of the individual's obligations to patients, colleagues and the community.

Program Structure

Year 1
Year 1 is not being offered in 2006

Year 2
Year 2 is not being offered in 2006

Year 3
Year 3 is not being offered in 2006

Year 4
Year 4 of the program is primarily based in the teaching hospitals and comprises 6 terms totalling 39 weeks. Of these weeks, 36 will be spent in hospitals and 3 will be spent on campus. For their time in hospitals, students will work as part of a health-care delivery team. The students' responsibilities as part of that team will be increased gradually as new skills are acquired. The philosophy inherent in education by attachment to a hospital team is important. Learning 'on the job' exposes students to real clinical situations incorporating both the medical and social implications of disease and allows the continued development of counselling skills. Thus, students will learn that hospital care should be linked to continuing care in the community, and that there is much emphasis in modern medicine on rehabilitation to maximise patients' chances of resuming their normal role in society. Reading about pathological processes, combined with team discussion of problem patients, provides the ideal environment for the retention of new knowledge.

The teaching of Population Health and Community Medicine is integrated with clinical studies in the teaching hospitals and is a part of the campus teaching program. The Pathology course comprises a component of didactic teaching within the framework of the common campus program and a major hospital-based component taught through a tutorial program.

The course of Clinical Pharmacology (Therapeutics) is introduced during the common campus program and reinforced during discussions of patient management as part of student attachments to clinical units. At the commencement of fourth year, each student will receive a syllabus containing details of the integrated program for Clinical Studies, Pathology, Clinical Pharmacology and Population Health and Community Medicine.

Rules of Progression

Students will be required to pass each of four separate segments of the assessment, namely: a pass in the Population Health and Community Medicine continuous assessment, a pass in the Pathology viva and project report (as a combined mark), a pass in a Short Case clinical examination, and a pass in the combined written papers.

Students who have not completed the General Education components of the Medicine program and who otherwise are eligible to progress to Year 5 are not allowed to progress until they have satisfied such requirements.

The medicine course in Year 4 is conducted over both sessions. The UOC indicated below is for a single session only.

MDSG4001 Integrated Clinical and Community Studies (24 UOC)

Preparation for Year 6 Elective Term

Arrangements for Elective attachments in Year 6 must be made by the students. Students should commence these arrangements in Year 4, especially those wishing to undertake attachments overseas. See course description for MFA6001 under Year 6, below.

Year 5
Year 5 in 2006 is comprised of five teaching periods, each of eight weeks. In (2008 and beyond, the Elective will be undertaken in Year 6.) In the first four Teaching Periods students rotate through blocks of teaching in obstetrics and gynaecology, paediatrics, psychiatry, geriatrics, general practice and subspecialties, rather than studying the courses concurrently. For this purpose students are allocated to a particular group (A, B, C, or D) and will follow the program of that group for the year.

The courses studied in Year 5 are:

MFA6001 Geriatrics/General Practice/Subspecialties (10 UOC)
OBST5001 Obstetrics and Gynaecology (10 UOC)
PAED5101 Paediatrics (10 UOC)
PSYM5001 Psychiatry (10 UOC)
MFA5003 Elective (8 UOC)

Assessment and Rules of Progression

The work of each rotating block is assessed during or towards the end of the block. Students will be required to pass all five courses before progressing to Year 6. Course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5-4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5. A student who fails two terms or more will be required to repeat all Year 5 courses.

Sequence of Blocks - Group A

Summer Teaching Period: (8 weeks) Paediatrics
Teaching Period 1 (8 weeks) Obstetrics and Gynaecology
Teaching Period 2 (8 weeks) Psychiatry
Teaching Period 3 (8 weeks) Geriatrics/General Practice/Subspecialties
Teaching Period 4 (8 weeks) Elective

Sequence of Blocks - Group B

Summer Teaching Period (8 weeks) Obstetrics and Gynaecology
Teaching Period 1 (8 weeks) Paediatrics
Teaching Period 2 (8 weeks) Geriatrics/General Practice/Subspecialties
Teaching Period 3 (8 weeks) Psychiatry
Teaching Period 4 (8 weeks) Elective

Sequence of Blocks - Group C

Summer Teaching Period (8 weeks) Psychiatry
Teaching Period 1 (8 weeks) Geriatrics/General Practice/Subspecialties
Teaching Period 2 (8 weeks) Paediatrics
Teaching Period 3 (8 weeks) Obstetrics and Gynaecology
Teaching Period 4 (8 weeks) Elective

Sequence of Blocks - Group D

Summer Teaching Period (8 weeks) Geriatrics/General Practice/Subspecialties
Teaching Period 1 (8 weeks) Psychiatry
Teaching Period 2 (8 weeks) Obstetrics and Gynaecology
Teaching Period 3 (8 weeks) Paediatrics
Teaching Period 4 (8 weeks) Elective

Year 6

The first term for Year 6 in 2006 is an Elective term (MFAC6001) of 8 weeks. The remaining five terms totalling 32 weeks are devoted to the course Integrated Clinical Studies 6 (MDSG6001) of which 30 weeks is based in the Teaching Hospitals and 2 weeks will be spent on campus. MDSG6001 is conducted over both sessions. The UOC indicated below for this course is for a single session only.

MDSG6001 Integrated Clinical Studies 6 (22 UOC)
MFA6001 Final Year Elective Term (4 UOC)

Academic Rules

Supplementary Assessment

Details of assessment requirements are contained in the sections on particular years and courses in the program. The following regulations
relate to supplementary assessment, which apply to all years of the Medicine program.

Course examiners may, in the time between the sitting of an assessment and the meeting of the Assessment Committee, require students to present themselves for further assessment to resolve any doubts as to a student’s performance. After the Assessment Committee meets further assessment may be given to allow the Assessment Committee to resolve a doubt. In Years 4 and 6 such additional assessment is usually undertaken in December. Such further assessment may be given when students, through illness or some other acceptable circumstances, have been prevented from taking one or more of the assessments or have been disadvantaged during the assessment.

In Year 5, course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5-4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5-4. Further assessment may not be granted when the composite mark accurately reflects failure to achieve the required standard of knowledge and understanding of the course.

### 3840 Combined Arts and Medicine Program – for continuing students only

**Bachelor of Arts Bachelor of Science (Medicine)**

**Bachelor of Medicine Bachelor of Surgery**

**BA BSc(Med) MB BS**

*Please note: This program is not available to commencing students. Details below are provided for the reference of continuing students only. Prospective students should refer instead to the new Medicine program 3841.*

**Typical Duration**

7 years

**Minimum UOC for Award**

336 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

The Arts/Medicine program is an alternative program of study, in which, over a seven-year program a student may complete the degree of Bachelor of Arts, with the degrees Bachelor of Science/Medicine, Bachelor of Medicine and Bachelor of Surgery. The Arts/Medicine program is intended for those students who wish to continue their interest and studies in the Arts during their medical studies.

Over a period of seven years, students will be required to fulfil the requirements of the BSc(Med) MB BS degree program as well as 60 units of credit in courses offered by the Schools/Departments/Programs within the Faculty of Arts (including an approved major sequence).

Students who have completed the combined Arts/Medicine degree program are eligible for the award of Honours in the BSc(Med) MB BS degree program, based on weighted performance in courses (excluding those courses not in the normal Medicine program) throughout the combined program. The award of Honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the program in accordance with the rules applying to the Medicine program 3801.

**Program Objectives and Learning Outcomes**

Program objectives are addressed under the entry for the Medicine program 3801.

**Program Structure**

Students are required to undertake all BSc(Med) MB BS courses plus 60 units of credit from the Faculty of Arts (including a major sequence) during Years 1 to 3. A major sequence equals 42 units of credit (usually 12 at Level 1 and 30 at upper level).

For details of available Faculty of Arts specialisations and courses, please refer to the entry for the Bachelor of Arts program 3400.

**Program Structure**

**Year 1**

Year 1 is not being offered in 2006.

**Year 2**

Year 2 is not being offered in 2006.

**Year 3**

Year 3 is not being offered in 2006.

**Year 4**

Upper Level Arts major sequence plus additional Arts courses (48 UOC)

**Year 5**

Students join Year 4 of the Medicine program.

### Honours

**Ranking for the Award of Honours (Program Codes 3801, 3821 and 3840)**

Students are ranked on the basis of their performance throughout the undergraduate Medicine program. An overall program mark is calculated for each student using the following procedure:

1. A weighted average mark for each year of the program is determined. This year mark is obtained by weighting each of the courses in the year, according to the units of credit. The course weights for each of the years of the program are shown in Table 1 below.

2. The overall program mark is determined by applying the year weightings listed in Table 2 to the weighted year marks.

3. If a student were required to sit for a supplementary assessment (other than for medical reasons or other exceptional circumstances) the course mark used is that awarded for the original assessment.

4. If a student were required to repeat a year (other than for medical reasons or other exceptional circumstances), the weighted year mark used is that obtained at the first attempt.

5. In the calculation of the average weighted program mark for BSc MB BS students, the aggregate mark for the Science component is calculated as a weighted aggregate of all courses counted towards the Science degree. The course weights are as follows:

   - Level I courses weighted by a factor equal to 0.0625 per course, except General Mathematics, Fundamental of Physics and Life Science Physics (0.05 per course) and Higher Chemistry and Higher Mathematics (0.07 per course).
   - Level II courses weighted by 0.1875 per course.
   - Level III courses weighted by 0.25 per course.
   - Level IV courses (Honours) not counted.

The three years of BSc component of the BSc MB BS program are treated as equivalent to the first two years of the MB BS program and therefore have a total year weight of 6 relative to the MB BS year weightings.

There is a limit set of 50 for the best possible score in the first year of the BSc component to put all students, whether or not they undertake Higher Mathematics or Physics, on the same footing. Only the best 144 units of credit in the BSc component are considered in calculating the ranked score.

6. Honours calculation for students undertaking the BA BSc(Med) MB BS program is the same as for the BSc(Med) MB BS program, i.e. the courses in the BA component are not counted.

7. Provision is made for students admitted with advanced standing and/or exemptions in certain courses not to be penalised in the calculation of rankings.

**Award of Honours**

1. The Faculty Year 6 Assessment Review Group considers the ranked list of students and their marks and decides the cut-off marks for the award of Honours at the various levels.

2. Neither the percentage of the students obtaining Honours at the various levels nor the cut-off marks are predetermined, and the Committee makes its own assessment of the level of academic attainment indicated by the overall program mark.

3. As a guide, the distribution of the awards of Honours in 2004 was:

   - **Class I Honours**
     - Program Mark: 72.49% – 80.33%
     - Number of Awards: 21
     - Percent of graduands: 11.5%

   - **Class II Div. 1**
     - Program Mark: 68.84% – 72.37%
     - Number of Awards: 29
     - Percent of graduands: 15.8%
*Class II Div. II*

Program Mark: 66.33% - 68.70%
Number of Awards: 23
Percent of graduands: 12.6%

**Table 1: Course Weights Within Years (Six Year Program)**

**Year 1**
- Anatomy: 12
- Introductory Clinical and Behavioural Studies: 8
- Biology for Medical Students: 4
- Biochemistry for Medical Students: 12

**Year 2**
- Medical Biochemistry and Genetics: 8
- Anatomy 2: 14
- Medical Physiology 1: 16
- Human Behaviour: 6

**Year 3**
- Microbiology for Medical Students: 8
- Pathology: 10
- Medical Physiology 2: 8
- Medical Pharmacology: 10
- Clinical Studies 3: 8
- Medical Ethics and Health Law: 4

**Year 4**
- Integrated Clinical and Community Studies: 48

**Year 5**
- Obstetrics & Gynaecology: 12
- Paediatrics: 12
- Psychiatry: 12
- Geriatrics/General Practice/Subspecialties: 12

**Year 6**
- Integrated Clinical Studies 6: 44

### 3831 Bachelor of Science (Medicine) Honours

**BSc(Med)Hons**

**Typical Duration**
1 year

**Minimum UOC for Award**
48 units of credit

**Typical UOC per Session**
24 units of credit

**Program Description**

This is a one-year research program offered to students in the six-year Medicine program who have completed the first three years of the six-year Medicine programs 3801 or 3802, or at least the first four years of the seven-year Arts/Medicine programs 3840 or 3841. It is not available to commencing students. For candidates in the programs 3801, 3802, 3840 and 3841.

1.(a) Undergraduates who have successfully completed at least the first three years of the six-year Medicine programs 3801 or 3802, or at least the first four years of the seven-year Arts/Medicine programs 3840 or 3841 may enrol for the degree of BSc(Med)Hons in one of the following programs: Anatomy, Biochemistry, Microbiology, Pharmacology, Physiology, Psychology or in any other program approved by the BSc(Med)Hons Committee provided that the candidate’s performance in the subject area has been of a high standard.

(b) A student may register as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of the School concerned and the BSc(Med)Hons Committee.

2.(a) Medical graduates may enrol for the degree of BSc(Med)Hons in any course approved by the BSc(Med)Hons Committee provided that their performance in the subject area has been of a high standard.

(b) A graduate may be registered as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of the School concerned and the BSc(Med)Hons Committee.

3. The program for each candidate shall be designed to introduce the student to research in the appropriate discipline and shall consist of such formal and special work and any examinations prescribed by the BSc(Med)Hons Committee.

**Enrolment/Progression**

1. The Faculty Administrative Officer will arrange the transfer of enrolment after the BSc(Med)Hons Committee has approved the application.

2. Students will be formally reviewed by members of the Committee twice per year. A mid-year verbal report and discussion will take place between the student, supervisors and Committee covering progress in meeting the aims of the research project and any problems encountered by the student and supervisors.

**Assessment Guidelines**

1. The BSc(Med)Hons Committee determines the assessments for the program on the advice of the supervisors and two assessors who are external to the supervisor and at least one being external to the School of enrolment.

2. The compulsory components of the assessment include a thesis, an essay or literature review, two seminar presentations and a supervisors’ report.

3. Candidates must take part in the activities of the program by participating in seminars, by presenting of essays or literature reviews and other prescribed activities.

4. A thesis is compulsory and forms a major part of the assessment. The thesis must be typed and suitable for subsequent binding if required. The typescript length of the thesis is normally no more than 20,000 words.

5. Candidates are required to present their research projects in the two seminar presentations organised by the BSc(Med)Hons Committee. For students studying overseas, a computer-generated presentation will be requested in lieu of the mid-year seminar and the members of the Committee will have the right to ask questions of the student by phone or email after viewing the presentation.

6. It is desirable that candidates take part in the activities of the school by participation in seminars and other prescribed activities.

7. The degree of BSc(Med)Hons may be awarded in the following grades: Honours Class I; Honours Class II, Division I; Honours Class II, Division II or no award made.

### 3850 Bachelor of Science in Health and Sports Science

**BSc**

*Please note: This program is not available to commencing students. Details below are provided for the reference of continuing students only. Prospective students should refer instead to the new program 3870.*
Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Authority

Program Description
The program offers a comprehensive education in the area of health and exercise with a focus on the use of physical activity as preventative and rehabilitative therapy. Students can choose to specialise in one of three areas of focus: cardiac, musculoskeletal, or neuromuscular rehabilitation. Four years of full-time study, or the part-time equivalent, leads to the award of a Bachelor of Science (in Health and Exercise Science). The Faculty Assessment Review group may award Honours to students who perform throughout the program with merit. The level of performance required for such award will be determined by the Assessment Review Group. Part-time students undertake a reduced program subject to the availability of courses. A total of 192 units of credit must be successfully completed for the award of this degree. Graduates may expect to find employment in sports medicine clinics, rehabilitation clinics and hospitals, Commonwealth, State and Local Government departments, sports academies and institutes, professional organisations, sporting associations, universities, corporate health, private practice, and gymnastics and fitness centres. In addition, it is expected that graduates become members of the professional body the Australian Association of Exercise and Sports Science.

Program Objectives and Learning Outcomes
The degree is committed to excellence in teaching in the exercise sciences and in exercise clinical training. The degree is designed to enable students to:

• develop a thorough understanding of the relationship between physical activity and health
• develop a broad range of communication skills and an ability to work as a member and a leader of a team
• develop advanced problem solving skills and a capacity for critical thinking
• attain competencies in conducting a broad range of exercise-based clinical tests
• attain skills and detailed clinical knowledge relevant to cardiac, musculoskeletal, or neuromuscular rehabilitation

Program Structure
Stage 1 introduces students to the core science that will serve as a foundation for the following years. Courses include anatomy, histology, chemistry, biology, and psychology. Students will be introduced to the exercise area through three courses: exercise science, lifestyle and health and exercise behavioural science. Stage 2 of the program begins to focus on human physiology, pathology, biochemistry, functional anatomy and exercise physiology while building on the scientific principles acquired in Stage 1. Stage 3 of this multidisciplinary program moves the student towards an integrated understanding of health and exercise and includes courses such as advanced exercise physiology, exercise and health, biomechanics, motor control, cardiac rehabilitation, special populations and clinical movement studies. Stage 4 continues to develop multi-disciplinary expertise through use of specialized courses and a wide range of electives. Electives include courses in clinical exercise physiology, movement rehabilitation, neuromuscular rehabilitation, nutrients and exercise, musculoskeletal diseases and professional practice. Extensive industry experience is a key component of this final year with students participating in practicums in the University’s Healthy Lifestyle Clinic and external (including hospital) placements. Understanding of scientific method is an important component of this program and all students will take a research methods course in Stage 4. Courses offer a mixture of traditional and interactive/case study approaches to learning. General Education is a requirement of all undergraduate courses at this university and can be taken in Stages 2 and 3.

Stage 1 – not being offered in 2006
Stage 2
Session One
ANAT3131 Functional Anatomy 1 (6 UOC)
BIOC2181 Fundamentals of Biochemistry (6 UOC)
PHPH2501 Physiology for Health and Sports Science A (6 UOC)
General Education courses (6 UOC)

Session Two
ANAT3141 Functional Anatomy 2 (6 UOC)
PA1H2201 Processes in Disease (6 UOC)
PHPH2502 Physiology for Health and Sports Science B (6 UOC)
PHPH2503 Exercise Physiology (6 UOC)

Stage 3
Session One
General Education courses (6 UOC)
Plus a further 6 credit points from:
PHPH3211 Cardiorespiratory and Exercise Physiology (6 UOC)
PHPH3502 Skeletal Muscle in Health and Exercise (6 UOC)

Session Two
FOOD3330 Nutrition for Sports Science (6 UOC)
Plus a further 6 credit points from:
BIOC2291 Fundamentals of Molecular Biology (6 UOC)
PATH3207 Musculoskeletal Diseases (6 UOC)
PHPH3131 Neurophysiology (6 UOC)
PSY1101 Psychology 1B (6 UOC)
SCOM2014 Science Communication (6 UOC)

Stage 4
Session One
HESM4501 Research Methods in Physical Activity (6 UOC)
HESC4511 Practicum A (6 UOC)
Electives courses (12 UOC)

Session Two
HESM4321 Practicum B (6 UOC)
elective courses (18 UOC)

Stage 4 Electives
Session One
PHCM9516 Introduction to Public Health (4 UOC)
PHPH3211 Cardiorespiratory and Exercise Physiology (6 UOC)
PHPH3502 Skeletal Muscle in Health and Exercise (6 UOC)
HESC4531 Movement Rehabilitation A (6 UOC)

Session Two
BIOC3261 Human Biochemistry (6 UOC)
FOOD3440 Advanced Nutrition (6 UOC)
PATH3207 Musculoskeletal Diseases (6 UOC)
PHLM9516 Introduction to Public Health (4 UOC)
PHPH3131 Neurophysiology (6 UOC)
SCOM2014 Science Communication (6 UOC)

Notes on Stage 4
Electives: Students must select 6 UOC in session 1 and 12 UOC in session 2 from the available electives. In addition, they must select a further 6 UOC of electives in each of session 1 and session 2 so as to provide a total of 48 units of credit in Stage 4. The latter may be any appropriate UNSW courses for which they have satisfied prerequisites, but for the purposes of achieving professional accreditation, students are strongly encouraged to select courses from those listed.

General Education Requirements
Students in this program must also satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

Academic Rules
For the requirements and regulations governing the Bachelor of Health and Sports Science, please refer to Program Structure section above.

3870 Bachelor of Science in Health and Exercise Science

BSc

Typical Duration
4 years
Program Description

The program offers a comprehensive education in the area of health and exercise with a focus on the use of physical activity as preventative and rehabilitative therapy. Students can choose to specialise in one of three areas of focus: cardiac, musculoskeletal, or neuromuscular rehabilitation. Four years of full-time study, or the part-time equivalent, leads to the award of a Bachelor of Science (in Health and Exercise Science). The Faculty Assessment Review Group may award Honours to students who perform throughout the program with merit. The level of performance required for such award will be determined by the Assessment Review Group. Part-time students undertake a reduced program, subject to the availability of courses. A total of 192 units of credit must be successfully completed for the award of this degree. Graduates may expect to gain employment in sport medicine clinics, rehabilitation clinics and hospitals, Commonwealth, State and Local Government departments, sports academies and institutes, professional organisations, sporting associations, universities, corporate health, private practice, and gyms and fitness centres. In addition to the expected that graduates become members of the professional body: Australian Association of Exercise and Sports Science.

Program Objectives and Learning Outcomes

The degree is committed to excellence in teaching in the exercise sciences and in exercise clinical training. The degree is designed to enable students to:

- develop a thorough understanding of the relationship between physical activity and health
- develop a broad range of communication skills and an ability to work as a member and a leader of a team
- develop advanced problem solving skills and a capacity for critical thinking
- attain competencies in conducting a broad range of exercise-based clinical tests
- attain skills and detailed clinical knowledge relevant to cardiac, musculoskeletal, or neuromuscular rehabilitation

Program Structure

Stage 1 introduces students to the core science that will serve as a foundation for the following years. Courses include anatomy, histology, chemistry, biology, and psychology. Students will be introduced to the exercise area through three courses: exercise science, lifestyle and health, and exercise behavioural science. Stage 2 of the program begins to focus on human physiology, pathology, biochemistry, functional anatomy, and exercise physiology while building on the scientific principles acquired in Stage 1. Stage 3 of this multidisciplinary program moves the student towards an integrated understanding of health and exercise and includes courses such as advanced exercise physiology, exercise and health, biomechanics, motor control, cardiac rehabilitation, special populations, and clinical movement studies. Stage 4 continues to develop multi-disciplinary expertise through use of specialized courses and a wide range of electives. Electives include courses in clinical exercise physiology, movement rehabilitation, neuromuscular rehabilitation, nutrients and exercise, musculoskeletal diseases, and professional practice. Extensive industry experience is a key component of this final year with students participating in practicums in the University’s Healthy Lifestyle Clinic and external (including hospital) placements. * new courses (some other courses will have minor modifications such as name change, etc.)

** offering of electives dependent on student numbers

**Notes on Stage 4**

Electives: Students must select 6 UOC in session 1 and 12 UOC in session 2 from the available electives. In addition, they must select a further 6 UOC of electives in each of session 1 and session 2 so as to provide a total of 48 units of credit in Stage 4. The latter may be any appropriate UNSW courses for which they have satisfied prerequisites.

**General Education Requirements**

Students in this program must also satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

**Academic Rules**

For the requirements and regulations governing the Bachelor of Health and Exercise Science, please refer to Program Structure section above.
Faculty of Science

A Message from the Dean

We live in amazing times. Science and technology have extended the reach of our senses way beyond the edge of the map of human experience. We can now hear a single electron change orbit inside an atom. We can see into the outer reaches of the universe; feel movements deep inside the Earth’s crust; reach back far into the ancient past; and eavesdrop on events inside a living cell. And we can meet and interact with other people in virtual communities that exist in virtual worlds.

When you study science with us at UNSW, you will be at the leading edge of this exciting revolution. You will learn how to learn, how to follow your curiosity about the world and the way it ticks, and you will acquire a tool-kit of knowledge and skills to equip you to step out into what we hope will be a lifetime of satisfying work.

This section of the Handbook covers the courses and programs available for study in science and provides a framework of the rules and regulations. Staff in the schools of the Faculty and the Science Student Centre are available to help you with administrative matters, course selection and career directions, and with any difficulties you may encounter in your studies.

We encourage you to explore the full diversity of opportunities on offer, to specialise on the one hand and yet gain an appreciation of scholarship in other areas. It is important that you learn to think creatively and critically, and to work with others in order to resolve complex problems.

We wish you every success at UNSW. We hope that the time that you spend with us, as valued members of our community, will be happy, stimulating and productive and that in future years you will look back on “the UNSW experience” as one which set you on the path to fulfilling your career and lifestyle aspirations.

We believe that tomorrow’s leaders will be drawn more and more from the ranks of science. We invite you to join us and let us help to make sense of this amazing world and prepare you to play your important part in a future that promises to be more amazing still.

Science Program 316
3970 Bachelor of Science 317
Advanced Science Programs 318
3972 Advanced Science 318
3973 Advanced Science in Medical Physics 319
3986 Advanced Science in Mathematics and Finance 319

Environmental Science 319
3988 Bachelor of Environmental Science 319

Media and Communications 320
3993 Bachelor of Science (Communication) 320
3994 Bachelor of Science (Media and Communications) 321

Medical Science 322
3991 Bachelor of Medical Science 322

Specialist Degrees

Aviation 323
3980 Bachelor of Aviation (Flying stream) 323
3981 Bachelor of Aviation (Management stream) 323

Biotechnology 324
3052 Bachelor of Science in Biotechnology 324

Materials Science and Engineering 325
3135 Bachelor of Engineering 325
3136 Physical Metallurgy Plan 326
3137 Process Metallurgy Plan 326
3138 Materials Engineering Plan 326
3139 Ceramic Engineering Plan 326

3030 Bachelor of Science (Technology) in Ceramics 327
3130 Bachelor of Science (Technology) in Metallurgy 327
3138 Bachelor of Engineering/Master of Biomedical Engineering Program 328

Nanotechnology 329
3617 Bachelor of Science in Nanotechnology 329

Optometry 330
3950 Bachelor of Optometry 330
3952 Bachelor of Optometry Bachelor of Science 330

Psychology 331
3432 Bachelor of Psychology 331

Innovation Management 332
3451 Diploma of Innovation Management 332

Combined Degree Programs

Faculty of Arts & Social Sciences and the Faculty of Science 333
3930 Science/Arts 333
3931 Advanced Science/Arts 333
3935 Science/Social Science 333
Plan Rules and Information

Table A: Majors Plans for the Bachelor of Science (3970) Program and Combined BSc Programs

Study Plans in Advanced Science

Anatomy
Biochemistry
Biological Science
Ecology
Biotechnology
Chemistry:
  - Medical Chemistry
Food Science and Technology
Genetics
Geoscience
Marine and Coastal Studies
Materials Science
Mathematics:
  - Applied Mathematics
  - Mathematics and Computer Science
Statistics
Mathematics and Finance
Physical Oceanography/Meteorology
Pure Mathematics
Medical Physics
Microbiology and Immunology:
  - Microbiology
Medical Microbiology and Immunology
Molecular Biology
Neuroscience
Physics:
  - Physics
  - Physics and Astronomy
  - Physics with Computer Science
Engineering Physics
Physiology and Pharmacology:
  - Physiology
  - Pharmacology
Psychology

Faculty Information and Assistance

General Information

Science programs are built from the wide range of science and technology-based courses available across UNSW.

These programs are divided into two types: the general ‘Science’ and ‘Advanced Science’ programs, and a range of ‘Vocational Science Programs’ oriented more toward professional or industry-based careers. These programs, and the courses which they are composed of, are described in more detail under ‘Program Rules and Information’. However, the information that follows in this section applies equally to both types of program.

Educational and academic activities at UNSW are organised and administered in faculties. The Faculty of Science is focused towards providing teaching and research in the sciences. Other faculties, including Engineering, Medicine, Arts and Social Sciences, and Commerce and Economics, also make a major contribution to activities in the sciences.

The basic educational building blocks in the sciences are the courses which students take. These courses are drawn together into majors, minors, and study plans providing coherent development of specific disciplines, and these programs are in turn drawn together to form degrees or programs. These majors, minors, and study plans are listed in the contents pages and are described in detail in this section of the Handbook.

Who Can Help?

This section of the Handbook is designed as a detailed source of information in all matters related to the Faculty of Science.

If you require advice about enrolment, degree requirements, progression within programs or any other general matters, contact the Science Student Centre, Robert Webster Building: tel: (02) 9385 6125, fax: (02) 9385 6127 or email: SSO@unsw.edu.au

The office is staffed between 9am and 5pm from Monday to Friday, but this may vary during non-session times.

For information and advice about course content and requirements, contact the appropriate schools/teaching units as indicated in the course descriptions.

The Faculty of Science Website

Please refer to the Faculty of Science website for further information: www.science.unsw.edu.au

Course Descriptions

Descriptions of courses offered in 2006 can be found in alphabetical order by the course code at the back of this Handbook or in the Online Handbook at: www.handbook.unsw.edu.au

Computing Information

Within the Faculty of Science, each of the schools manages or has access to undergraduate computing laboratories equipped with a combination of X-terminals, PCs and Macintoshes. These are connected through the campus-wide network, and are used extensively in undergraduate teaching and in providing email access to all students. This is provided through local and often specialised facilities and through access to regional and national centres. The systems accessible range from PCs to supercomputers together with the associated peripherals and support personnel. For further information on computing, please contact the school office.

Enrolment Procedures

New students will receive enrolment information with their offer of a place in their chosen program.

All students re-enrolling in 2006 should enrol via myUNSW during appointed enrolment periods. Information regarding enrolling online is available from UNSW Student Central, the Science Student Centre or via the web: https://my.unsw.edu.au

The course timetable for second and later years for the Science and the Advanced Science programs is available in late October/early November from the Science Student Centre, in the Robert Webster Building. All re-enrolling students should collect one of these timetables. Students who expect to complete the requirements for their degree in 2006 or are proceeding to Honours will also need to collect form SM2006. This form
is to be completed and returned to the Science Student Centre by early January, after students receive their results.

Students not enrolling before the first day of Session 1 have no guarantee that a place is available in the courses offered in that year. This is particularly important for courses where laboratory space is limited. Students should be aware that some courses may require a field trip which may involve personal costs to the student. Consult individual course authorities for details. Quotas may apply to certain programs and courses and students should consult with program and course authorities for details.

Admission
For applicants applying for admission to UNSW through the Universities Admissions Centre (UAC), this section lists the UAC codes which correspond to the Science programs offered by UNSW.

For admission requirements for Science programs please refer to the appropriate entry in the current UAC Guide or refer to the UAC website: www.uac.edu.au

429000 Science
This is applicable to study in a wide range of Science areas in the Bachelor of Science program 3970, as indicated by the majors outlined in Table A under ‘Plan Rules and Information’.

429003 Science (Communication)
This is applicable to study in a wide range of Science areas in conjunction with a Science Communication stream in the Bachelor of Science (Communication) program 3993. The majors available are the same as for 3970, with the exception of Philosophy, and History and Philosophy of Science.

429004 Science (Media and Communications)
This is applicable to study in a wide range of Science areas, in conjunction with a Media and Communications stream, in the Bachelor of Science (Media and Communications) program 3994. The majors available are the same as for 3970, with the exception of Philosophy, and History and Philosophy of Science.

429007 Medical Science
This is applicable to study in the Bachelor of Medical Science program 3991, as outlined in the ‘Program Rules and Information’ section in this Handbook.

429008 Environmental Science
This is applicable to study in the Bachelor of Environmental Science program 3988, as outlined in the ‘Program Rules and Information’ section in this Handbook.

429013 Advanced Science
This is applicable to study in areas of biological science, behavioural science, chemistry, mathematics and physics in the program 3972 as outlined in the Advanced Science study plan descriptions under ‘Plans Rules and Information’.

This is also applicable to study in program 3986 (Mathematics and Finance) as outlined in the Study Plan description.

The number of places available each year in the Advanced Science programs is limited and this is reflected in a higher UAI. The minimum UAI for these programs is 90.

429016/429017 This is applicable to study Aviation (Flying or Management) in programs 3980/3981.

429018 This is applicable to study Biotechnology in program 3052.

429025 This is applicable to study Optometry/Science in program 3952.

429026 This is applicable to study Psychology in program 3432, leading to a Bachelor of Psychology.

429011 This is applicable to study Nanotechnology in program 3617.

425001 This is applicable to study a number of Materials Science and Engineering plans in physical and process metallurgy, ceramic and materials engineering.

* Entry to the plan in Advanced Mathematics is by invitation only.

General Rules and Requirements

General Education Requirements

The University requires all students to complete a selection of General Education courses. The General Education Program is an integral part of all UNSW undergraduate programs and gives students the opportunity to...
address some of the key questions they will face as individuals, citizens and professionals.

Students in the Science programs must complete General Education courses totalling 12 units of credit plus an additional 56 hours of study which fosters acceptance of professional and ethical action and social responsibility. See the ‘General Education’ section within this Handbook for a description of General Education course categories.

1. Mainstream courses may be substituted for General Education, but only with the approval of the Associate Dean (Student Affairs). Only 6 units of credit from mainstream courses may be substituted for General Education. Students may also only count a maximum of 6 units of credit of General Education courses from a single faculty.*
2. Students have the freedom to choose their General Education courses, according to the General Education requirements and restrictions detailed in the General Education section at the beginning of this Handbook.
3. Students enrolled in combined degrees are normally exempt from the General Education requirement.

* Please refer to the General Education section of this Handbook for further information on substitution.

Prerequisites, Corequisites and Excluded Courses

All programs are governed by basic conditions or rules that specify what a student needs to complete in order to qualify for a degree. Normally a student will study a mixture of compulsory and elective courses.

Compulsory or core courses are ones that must be studied, usually at the stage specified in the program. Often one compulsory course is a prerequisite for another that comes later.

Elective courses are ones that a student chooses in accordance with his or her own interests, subject to meeting prerequisites and corequisites, and capacity in the course. Some electives may have to be taken from a specified list.

Where a choice of courses is available in a program, students must take care to satisfy prerequisites and corequisites and not complete excluded courses.

Prerequisites are courses that must be satisfactorily completed before a student can progress to a later course. Prerequisites are specified in the course descriptions later in this Handbook and students without a necessary prerequisite for a course will be blocked from enrolment in that course.

Corequisites are courses that must either be completed successfully before, or studied concurrently with, the course for which it is prescribed.

Excluded courses are ones that cannot be counted towards the degree qualification.

Credit Transfer

Students admitted to programs administered by the Faculty of Science (including the Science component of combined degrees) may be granted credit for previous studies. All applications for credit transfer are subject to the following conditions:

1. Where students transfer from another tertiary institution, they shall not in general be granted standing in the course that is superior to that which they attained at the institution from which they transferred.
2. Only courses completed within ten years from the commencement of the UNSW degree will be eligible for transfer credit.
3. The credit granted to students admitted to a program administered by the Faculty of Science based upon any completed degrees or awards held by the applicant may not exceed the amount that will permit the applicant to qualify for the degree by completing the requirements for the latter half of the degree.
4. The credit granted to students admitted to a program administered by the Faculty of Science based upon a partially completed degree or award held by the applicant may not exceed the amount that will permit the applicant to qualify for the degree by completing the requirements for the final year of the degree (excluding Honours).
5. The credit granted to students admitted to a combined degree with the Faculty of Science may not exceed the amount that will permit the applicant to qualify for the science component of the combined degree by completing the science courses from the latter half of the Science component of the degree.
6. Students who have been awarded the degree of Bachelor at Pass level may be permitted to enroll for the award of the degree at Honours level with credit for all courses completed if, during the studies for the Pass degree, they have satisfied the prerequisites for entry to the Honours program determined by the school concerned.

Applicants should note that eligibility for transfer credit in a Science program does not guarantee admission to that program.

Study Load

Students may not undertake a study load of more than 24 units of credit in any session (including General Education). This can be exceeded only in exceptional circumstances by students with an excellent academic record and requires the permission of the Associate Dean (Student Affairs). Students with external commitments, such as part-time employment in excess of ten hours per week, should take fewer courses each session. External commitments will not to be taken into consideration in relation to such matters as extensions of time for submission of written work or failure to attend examinations (which may, for some courses, be scheduled on Saturday mornings). Students not on good academic standing will be notified in writing and may be required to show why they should be allowed to continue in the program or may be given a restricted program.

Students wishing to take courses additional to those required for the award should be aware that the relevant courses may attract an additional fee, payable up-front, as non award courses.

Academic Standing

A level of academic standing will be assigned to students at the end of each main session. These levels are defined as: Good Standing (the student’s current progress is deemed satisfactory), Referall, Probation 1, Probation 2, Suspension, Probation 3 and Exclusion. Movement between levels is based on progress, measured by proportion of load passed. The Program Authority assigns an advisor to each student not in good standing. Continued poor progress can lead to suspension (one year with automatic readmission) or exclusion (two years without automatic readmission). For further information please see ‘General University Rules & Student Information’ earlier in this Handbook.

Progression through Advanced Science, Environmental Science and Medical Science programs is subject to academic performance. Students enrolled in these programs are required to attain an average of 65 or higher each session of their program.

Program and Course Quotas

Quotas are imposed on some programs and courses (usually because of class size constraints related to space). Where quotas are imposed, students’ eligibility to enrol will be assessed on academic merit or on the basis of the requirements of the program of study in which the student is enrolled.

Summary of Programs

The main aims of these Science programs may be summarised as providing opportunities for students to prepare themselves for careers in research, technology, science, mathematics and education, or areas of management or public policy which involve the use of science or mathematics.

The programs (3970, 3991, 3993, 3994) lead to the award of the degree of Bachelor of Science (BSc) at Pass level on the completion of a three-stage program, taking three years of full-time study. A student who completes the program with a high standard of achievement may be permitted to continue to a fourth year in order to take an Honours degree.

The Advanced Science programs (3972, 3986) and the Bachelor of Environmental Science (3988) lead to the award of Bachelor of Science (BSc) on the completion of a four stage program, at Honours or Pass level (level of award and Honours is based on academic performance), taking four years of full-time study. Depending on their program of study, students in their fourth year undertake either a research Honours program or a program of coursework and research.

The time specified (three or four years) is the minimum time required for completion of each program. Students may complete program requirements over a longer period of time or as part-time candidates. Students contemplating part-time study should note that with few exceptions classes are offered in the day only. This applies even at first year level and means that it is not possible to complete studies by evening classes alone.

Science Program (3970)

The three-year Science program has been designed for students who seek a ‘generalist’ degree in which there is a large element of choice. A student can combine courses from two or more Science disciplines, or take courses from outside the Science disciplines.
Advanced Science Programs (3972, 3986)
This program differs from the standard Bachelor of Science program (3970) in that it includes advanced level courses, an Honours year and options tailored to an individual's aptitude and interests.
A feature of the Advanced Science program is the requirement that all students enrol in and complete a specified study plan in a particular discipline or specialisation.

Environmental Science Program (3988)
This is a four-year degree leading to a Bachelor of Environmental Science. A student must complete the core in Environmental Science plus a specialisation in one of the approved disciplines.

Bachelor of Science (Communication) Program (3993)
Bachelor of Science (Media and Communications) Program (3994)
These are three-year Science programs in which students must complete courses in a Communication or Media Studies stream and either a major or two minors in Science. Subject to certain conditions, a student may be permitted to continue into a fourth year to complete an Honours degree.

Medical Science Program (3991)
This is a three-year degree based on structured study plans leading to a Bachelor of Medical Science. Subject to certain conditions, a student may be permitted to continue into a fourth year to complete an Honours degree.

Combined Degree Programs
In these programs, Science is combined with studies in another faculty (e.g. Engineering, Law, Arts and Social Sciences etc.). The basic requirement from Science is that a student should complete at least 84 units of credit in Science including a major selected from Table A.

Courses
Typically, each program requires study of a number of prescribed core courses and elective courses at specified stages or levels to ensure a sound basis in the discipline. Each course is assigned a "Level", which corresponds to the defined stages for each program. There are limits on the number of Level I courses that can be studied in a program (please refer to individual program descriptions). Students are not normally allowed to enrol in courses at a given level before reaching the corresponding stage of the program. Levels are:

- Level I: Stage 1
- Level II: Stage 2
- Level III: Stage 2 or 3
- Level IV: Stage 3 (also Stage 4 in some Advanced Science programs)
- Level V: Stage 4 (or Honours year)

Program Rules and Information

3970 Bachelor of Science

BSc

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description
The three-year Science degree has been designed for students who seek a 'generalist' degree in which there is a large element of choice. A student can combine courses from 2 or more Science disciplines, or take courses from outside the Science disciplines.
The basic rules for the degree are set out in the following sections under Program Objectives and Academic Rules. Students in the Science program need to ensure that they complete at least one Major and either a second Major or a Minor sequence. At least 84 units of credit (out of a total of 144) must be taken from Science. The remainder may be in another Faculty. Subject to certain conditions, a student may be permitted to continue into a fourth year to complete an Honours degree.

Program Objectives and Learning Outcomes
This program has been designed to:
- develop and sustain an interest in and knowledge of Science.
- develop a working knowledge of scientific methods of investigation.
- encourage curiosity and creative imagination and an appreciation of the role of speculation in the selection and solution of problems, the construction of hypotheses, and the design of experiments.
- develop an appreciation of scientific criteria and a concern for objectivity and precision.
- develop confidence and skill in formulating problems and in treating both qualitative and quantitative data.
- develop the ability and disposition to think logically, to communicate clearly by written and oral means, and to read critically and with understanding.
- develop the habit of seeking and recognising relationships between phenomena, principles, theories, conceptual frameworks and problems.
- promote understanding of the significance of science, technology, economics and social factors in modern society, and of the contributions they can make in improving material conditions.
- provide opportunities for the development of students' motivations and social maturity, and an awareness of their capabilities in relation to a choice of career which will be fruitful to themselves and to society.
- provide opportunity to study science in combination with other disciplines.

Program Structure
Majors and Minors
For information regarding course requirements for majors and minors, please consult Table A (Majors) and Table B (Minors) under 'Plan Rules and Information' following in this Handbook, or contact the Science Student Centre for further details.

Elective Courses
Students enrolled in any Science degree may normally only take as electives any courses (subject to satisfying prerequisites) which are specified as electives for their degree, or available within a major or minor in program 3970.

Graduation and Majors
In order to graduate, students must satisfy requirements for the award by passing all the courses and requirements specified for their program. Students who complete requirements will be awarded the degree of Bachelor of Science at Pass or Honours level with a major in the area of specialisation (usually indicated by the name of the major). The award will appear on the testamur as:
- Bachelor of Science in (name of major)
- Bachelor of Science with Honours in (name of Honours specialisation)

General Education Requirements
Students in this program must also satisfy the University's General Education requirements. For further information, please refer to the General Education section in this Handbook.

Academic Rules
Conditions for the Award of the Degree
1. A student must complete 144 units of credit including 12 units of General Education.
2. The degree must contain a Major sequence of study and either a second Major or a Minor sequence.
3. A student must complete at least 36 units and no more than 60 units in Level I courses from at least three schools.
4. A student must complete at least 24 units at Level I from Science Schools (defined as schools in the Science Faculty plus those in other faculties that currently provide programs under the authority of the Faculty of Science).
5. No student may commence Level II courses until 24 Level I units have been successfully completed.
6. No more than 18 Level I units of credit in any one subject area may be counted towards the completion of the degree.
7. A student must complete a minimum of 84 units of credit from Science Schools (defined as Schools in the Science Faculty plus those in other Faculties that currently provide programs under the authority of the Faculty of Science).
8. Progression to Stage 4 Honours is subject to academic performance. Students seeking to enrol in Honours are required to have the permission of the Head of School, to have completed all the requirements for Stages 1, 2 and 3 of the BSc and to have satisfied prerequisite requirements as specified. All General Education must also have been completed. Students who have not qualified for the BSc at Pass level will not be permitted to enrol in Honours.

9. A Major sequence is defined as: at least 42 units at Level II and III in a single discipline or area of study, including at least 18 units at Level III.

10. A Minor sequence is defined as: 24 units of credit at Level II or III. The Minor may either consist of courses available within but not taken as part of a Major or may be a sequence as defined in Table B.

11. Where a student does Majors in two cognate areas that have courses in common, a student may be permitted to have up to 12 units at Level II and 6 units at Level III be counted towards each Major sequence.

---

3972 Advanced Science

Bachelor of Science BSc

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
The Bachelor of Science (Advanced Science) program is designed to cater for the specific abilities and interests of talented students with a UAI (Universities Admissions Index) above 90.00.

A feature of the design of the Advanced Science programs is the requirement that all students enrol in a specific study plan on commencement of the program.

Each study plan is designed to link courses in such a way that a coherent pattern of study is achieved in a specific discipline or specialisation.

A wide choice of study plans, designed to meet specific aims and objectives, is available. Most study plans are identified with a particular school or discipline (e.g. Anatomy, Chemistry), but some are multidisciplinary (e.g. Mathematics and Computer Science).

Note: Some courses and plans are only available in the Advanced Science programs. e.g. Mathematics and Finance, Neuroscience, Physics and Astronomy, etc.

This program differs from the standard Bachelor of Science program (3970) as it includes advanced level courses, an Honours year and options tailored to an individual's aptitude and interests.

Program Objectives and Learning Outcomes
This program aims to provide students with a working knowledge of areas of scientific investigation in order to place them at the forefront of research and discovery in the many rapidly developing areas of science.

Program Structure

Conditions for the Completion of the Advanced Science Program

- A student must complete 144 units of credit including 12 units of General Education in Stages 1-3 and a 48 unit Honours sequence at Stage 4.
- The degree must contain a study plan as specified for each Advanced Science program in this section of the Handbook
- A student must complete at least 36 units of credit and no more than 48 units of credit in Level I courses except where specified in a particular program.
- A student must complete before the end of Stage 3 at least two 3 units of credit courses taken from 'Table X', given below.
- No student may normally commence Level II courses until 24 Level I units have been successfully completed unless approved by the Program Authority.
- Progression to Stages 3 and 4 is subject to academic performance. A student will be required to have attained an average of 65 or higher in courses relevant to the major area and cognate subjects in each prior stage.
- Progression to Stage 4 Honours is subject to academic performance. Students seeking to enrol in Honours are required to have the permission of the Head of School, to have completed all the requirements for Stages 1, 2 and 3 of the BSc (Adv Sci) and to have satisfied prerequisite requirements as specified. Students who have not met the Stages 1, 2 and 3 requirements will not be permitted to enrol in Honours.

Study Plans Available in Advanced Science

- Advanced Mathematics (by invitation only)
- Anatomy
- Applied Mathematics
- Biochemistry
- Biological Science
- Biotechnology
- Chemistry
- Ecology
- Food Science and Technology
- Genetics
- Geosciences
- Marine and Coastal Studies
- Materials Science
- Mathematics and Computer Science
- Mathematics and Finance (program 3986)
- Medical Chemistry
- Medical Microbiology and Immunology
- Microbiology
- Molecular Biology
- Neuroscience
- Pharmacology
- Physical Oceanography/Meteorology
- Physics
- Physics and Astronomy
- Physics and Computing
- Physiology
- Psychology
- Pure Mathematics
- Statistics

For information regarding course requirements for study plans, please consult Study Plans in Advanced Science under 'Plan Rules and Information' section following in this Handbook, or contact the Science Student Office for further details.

General Education Requirements

Students in this program must also satisfy the University's General Education requirements. For further information, please refer to the General Education section in this Handbook.

Academic Rules

See also ‘Conditions for the Completion of the Advanced Science Program’ above.

Rules on Progression and Transfer in the Advanced Science Programs

1. Transferring Study Plans

Students must apply in writing to transfer between study plans within each of the Advanced Science programs. Applications are assessed on academic performance and approval is subject to places being available in the nominated study plan.

2. Accelerated Progression in Advanced Science Programs

There is provision for exceptionally talented students to take higher level courses in Stage 1. Contact the Science Student Centre for details.

3. Progression to Stage 4 Honours in Advanced Science

Progression to Stage 4 is subject to academic performance. Students seeking to enrol in a Stage 4 Honours are required to have the approval of the Head of School and normally will be required:

- to have completed the requirements for Stages 1, 2 and 3 of the specific study plan and to have satisfied prerequisite requirements as specified in that study plan. All General Education also must have been completed;
- to have attained an average of 65 or higher in each stage of the program.
Students should also seek the guidance of the appropriate Head of School at an early stage of study to ensure that the study plan being followed is best suited to lead to the Year 4 Honours.

In addition, admission to a particular Stage 4 Honours is subject to appropriate research and supervision resources being available. Quotas may be imposed for entry in any year, in which case admission will be determined on academic merit.

Students who do not attain an average or 65 or higher in Stage 3 of their program are normally required to transfer to the Science program (3970) and take out the BSc award at Pass level.

4. Transfers from Advanced Science to the Science Program

Students enrolled in the Advanced Science programs (program codes 3972, 3986) who wish to take out the BSc award at Pass level and without proceeding to Stage 4 are required to transfer to the Science program (3970).

Applications to transfer should be lodged no later than the census date for the session in which the student expects to satisfy requirements. Students applying after that date may not be able to graduate in the next round of graduation ceremonies. The application should state the 3970 major in which the student wishes to be enrolled.

Students must satisfy all requirements for the designated Science (3970) major in order to qualify for the award of the BSc. Further information regarding the transfer from the Advanced Science program to majors that are available in the Science program is available through the Science Student Centre.

Students entering Year 3 or Stage 4 of a combined degree program will need to consult with the Science Student Centre.

5. Elective Courses

Students enrolled in any Science program may normally only take as electives any courses (subject to satisfying prerequisites) which are specified as electives for their degree, or available within a major or minor in program 3970.

6. Graduation and Study Plans

In order to graduate, students must satisfy requirements for the award by passing all courses and the requirements specified for their program. Students who complete requirements will be awarded the degree of Bachelor of Science at Honours or Pass level with a major in the area of specialisation (usually indicated by the name of the major or study plan, except that for some Honours candidates the name of the Honours specialisation will appear).

Students who successfully complete Stage 4 of their program will be considered for the award of Honours. The following scale generally applies to Honours gradings and, depending on the structure of the program, is based either on performance in the Stage 4 Honours or on performance over the whole 4 stages of the program:

- Honours Class 1 - mark or weighted average of 85 or greater
- Honours Class 2 Division 1 - mark or weighted average from 75 to 84
- Honours Class 2 Division 2 - mark or weighted average from 65 to 74
- Honours Class 3 or Pass - mark or weighted average below 65

The award will appear on the testamur as:

Bachelor of Science with Honours in (name of specialisation)

3973 Advanced Science in Medical Physics

Bachelor of Science BSc

Note: Not available to commencing students in 2006

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
This Bachelor of Science (Advanced Science) degree program has a specialisation in Medical Physics. Medical Physics is the application of physics to diagnosis, treatment and prevention of human disease and disability. There is a continuing demand for professional physicists in this area as new physical techniques are rapidly translated into new medical instruments. There is an increasing demand for health physicists in industry and the public service to monitor environmental and occupational sources of radiation and other hazards.

Program Objectives and Learning Outcomes
This program aims to provide an essential strong background in conventional physics including electronics and computing, a general background in the biological sciences and some specialised knowledge in biophysics and medical physics.

Program Structure
Please refer to program entry for 3972 Advanced Science for 'Conditions for Completion of the Advanced Science Program'.

For information regarding program requirements for Medical Physics 3973 please refer to the ‘Plan Rules and Information’ section following in this Handbook.

General Education Requirements
Students in this program must satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

Honours
Honours may be awarded in this program. The basis is a suitably weighted performance over the last three stages of this four-year advanced science degree.

Academic Rules
For academic rules relating to this program, please refer to the program entry for 3972 Advanced Science.

3986 Advanced Science in Mathematics and Finance

Bachelor of Science BSc

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
This Bachelor of Science (Advanced Science) degree program has a specialisation in Mathematics and Finance. The Mathematics and Finance plan is a four-year plan in which Honours may be awarded on the basis of a weighted average mark of all courses studied in the plan.

Note: Students applying through UAC should choose Advanced Science in their preferences. On admission, students will be transferred to this program on request.

Program Structure
Please refer to program entry for 3972 Advanced Science for ‘Conditions for Completion of the Advanced Science Program’.

For information regarding program requirements for the Mathematics and Finance 3986 please refer to the ‘Plan Rules and Information’ section following in this Handbook.

General Education Requirements
Students in this program must satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

Academic Rules
For academic rules relating to this program, please refer to the program entry for 3972 Advanced Science.

3988 Bachelor of Environmental Science

BEnvSc

Typical Duration
4 years
Program Description

The Environmental Science program contains a core sequence of compulsory courses and a choice of disciplinary specialisations. The specialisations include: Biology, Chemistry, Geography, Earth Science, Marine Biology, Microbiology and Oceanography. Students will need to select a specialisation early in their programs.

Program Objectives and Learning Outcomes

The aim of the program is to provide a strong education in the skills and knowledge necessary to work or carry out research as an environmental scientist. In their final year, students carry out a major independent research project and may also do advanced coursework.

The BEnSc is designed as a four-year (full-time) program. There is also an opportunity for students to combine the BEnSc with a Bachelor of Arts by taking a five-year program. Students who are unable to complete the BEnSc may transfer to the three-year Bachelor of Science and graduate with a BSc with a major in one of the environmental areas.

Program Structure

Stage 1

BIOS1101 Evolutionary and Functional Biology (6 UOC)
CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
ENV5101 Environmental Science 1 (6 UOC)
GEOS1211 Environmental Earth Science (6 UOC)
GEOS1701 Environmental Systems and Processes (6 UOC)
MAH11041 Statistics for Life and Social Sciences* (6 UOC)
And 12 units of credit in one or more of the discipline specialisations

*Note: Students who choose the Oceanography specialisation take MATH1231, NOT MAH11041.

Stage 2

ECON1107 Elements of Environmental Economics (6 UOC)
ENV5203U The Human Environment (6 UOC)
ENV52801 Aspects of Environmental Policy and Law (6 UOC)
And one of the following courses:

BEES2041 Data Analysis for Life and Earth Sciences (6 UOC)
MATH2301 Mathematical Computing (6 UOC)
MAH12841 Statistics SS (6 UOC)
Plus General Education courses (6 UOC)
18 units of credit in Level 2 courses of the discipline specialisation.

Stage 3

BIOS3071 Conservation Biology and Biodiversity (6 UOC)
CHEM3901 Environmental Toxicology (6 UOC)
GEOH3911 Environmental Impact Assessment (6 UOC)
Plus General Education courses (6 UOC)
24 units of credit in Level 3 courses of the discipline specialisation.

Stage 4

Environmental Honours stream relevant to discipline specialisation.

For entry to Honours, a student must have the permission of the relevant Head of School.

Disciplinary Specialisations

Biology

Level 1 BIOS1201
Level 2 BIOS2011, BEES2041, plus at least 6 units of credit from:
BIOS2031, BIOS2031, BIOS2061
Level 3 BIOS3061, BIOS3111 plus further 6 units of credit from
Level 3 BIOS

Chemistry

Level 1 CHEM1021 or CHEM1041, MAH11041
Level 2 CHEM2041, plus 12 units of credit from CHEM2011, CHEM2021, CHEM2031
Level 3 CHEM3041, CHEM3311, plus 6 units of credit from:
CHEM3011, CHEM3021, CHEM3031
plus 6 UOC of Level 2 Chemistry

Note: Students in the Chemistry specialisation take CHEM3111, NOT CHEM3901

Earth Science (formerly Geology)

Level 1 GEOS1111
Level 2 18 units of credit from GEOS2171, GEOS2181, GEOS2291, GEOS2071, GEOS2721
Level 3 GEOS3131, GEOS3281, plus further 6 units of credit from
Level 3 GEOS

Geography

Level 1 GEOH1601
Level 2 GEOS2711, GEOS2721 plus further 6 units of credit from
Level 3 Geography
Level 3 GEOS3761 plus further 12 units of credit from
Level 3 Geography

Marine Biology

Level 1 BIOS1201, CHEM1021
Level 2 BIOC2201, BIOS2011, MICR2011, MICR2201
Level 3 BIOT3081, MICR3071 plus 6 units of credit from
Level 3 Microbiology

Oceanography

Level 1 MATH1231*, PHYS1121, PHYS1221
Level 2 MATH2841, MATH2101, MATH2120, MATH2240,
PHYS2810
Level 3 MAH12301, MAH1321, MAH13241, MAH13261

Note: In all specialisations students may take more advanced versions of courses where these exist.

General Education Requirements

Students in this program must also satisfy the General Education requirements. This is 12 UOC, usually taken in second and third year studies, as indicated in the Program Structure.

For further information, please refer to the General Education section in this Handbook. Students in Environmental Science need to be aware that there are a number of General Education courses which they are excluded from taking, and are advised to consult the BEES Student Office.

Academic Rules

Conditions for the Award of the Environmental Science Degree

• A student must complete 144 units of credit including 12 units of General Education in Stages 1-3 and 48 unit Honours sequence at Stage 4.
• The degree must contain the core in Environmental Science plus a specialisation in one discipline.
• A student must complete at least 36 units of credit and no more than 60 units of credit in Level 1 courses.
• No student may normally commence Level 2 courses until 24 units of credit Level 1 have been successfully completed unless approved by the program adviser or Associate Dean.
• Progression to Stages 3 and 4 is subject to academic performance. A student will be required to have attained an average of 65 or higher in courses relevant to the major area and cognate subjects in each prior stage.
• Progression to Stage 4 Honours is subject to academic performance. Students seeking to enrol in Honours are required to have the permission of the Head of School, to have completed all the requirements for Stages 1, 2 and 3 of the BEnSc and to have satisfied prerequisite requirements as specified. All General Education must also have been completed. Students who have not qualified for the BEnSc at Pass level will not be permitted to enrol in Honours.

3993 Bachelor of Science (Communication) BSc(Comm)

Typical Duration

3 years

Minimum UOC for Award

144 units of credit
Typical UOC per Session
24 units of credit

Program Description
Science Communication is designed to serve students interested in a career in the human and social aspects of science, from entrepreneurship in biotechnology to science journalism and advising on environmental policy to teaching science to the public. Offered for the first time in 2000, the program leads to a three-year Pass or four-year Honours degree. It provides students with a strong grounding in science together with conceptual insights and practical skills in communication. Students address large scale issues, like the role of science in society, as they impact on small scale interactions, such as a conversation between a patient and her doctor. This scope of concerns makes the degree a highly interdisciplinary undertaking for the student who likes to marry theory with practice.

Program Objectives and Learning Outcomes
Please visit the Science Communication website for information on Program Objectives and the Learning Outcomes:  [www.scom.unsw.edu.au](http://www.scom.unsw.edu.au)

Program Structure
Science Communication electives consist of SCOM courses that are not part of the degree program's core as well as selected courses outside SCOM that address key aspects of human, organisational, and mass communication. They can be from Psychology, Marketing, Sociology, Media and Communication, Geography, Safety Science, or like fields, but they may not be from a student's major or minor area of study. A SCOM elective must be approved by the Science Communication Program Office.

Stage 1
SCOM1101 Science, Technology and Society (6 UOC)
SCOM1021 Introduction to Science Communication (6 UOC)
24 units of credit from two Science schools
Electives totalling 12 units of credit

Stage 2
SCOM2U21 Professional Science Communication (6 UOC)
And ONE of the following courses:
HPSC2400 Knowledge and Power (6UOC)
HPSC2500 Environment, Technology and Politics (6UOC)
HPSC2850 Information Technology, Politics and the Media (6UOC) *(not offered in 2006)*
Electives in Communication totalling 6 units of credit
18-24 units of credit in a Science Major or 2 Minors (as required by Major or Minors)
Further electives to give a total of 42 units of credit for Stage 2
Plus General Education (6 UOC)

Stage 3
SCOM3011 Communicating Science: Theory and Practice (6 UOC)
SCOM3021 Science Communication Internship (6 UOC)
Electives in Communication totalling 6 units of credit
24 units of credit in a Science Major or Minors (continued from Stage 2)
Plus General Education (6 UOC)

Honours
Please contact the Faculty of Science for information on Honours studies.

Academic Rules
1. A student must complete 144 units of credit including 12 units of credit of General Education.
2. The degree must contain a Communication major sequence and either a second major drawn from those approved with the BSc (excluding those from the Schools of Philosophy and History and Philosophy of Science) or two approved minor sequences.
3. A student must complete at least 36 and no more than 60 units of credit in Level I courses from at least three schools.
4. A student must complete at least 24 units of credit at Level I from Science Schools (as defined in the rules attached to the conditions for the award of the BSc excluding the Schools of Philosophy and History and Philosophy of Science).
5. No student may commence Level II courses until 24 Level I units of credit have been successfully completed.

6. A student must complete a minimum of 84 units of credit from Science schools (see 4 above).
7. Progression to Stage 4 Honours is subject to academic performance. Students seeking to enrol in Honours are required to have the permission of the Head of School. To complete all the requirements for Stages 1, 2 and 3 of the BSc (Comm) and to have satisfied prerequisite requirements as specified. All General Education must also have been completed. Students who have not qualified for the BSc (Comm) at Pass level will not be permitted to enrol in Honours.

3994 Bachelor of Science (Media & Communications)

BSc(Media)

Typical Duration
3 years

Minimum UOC for Award
144 units of credit

Typical UOC per Session
24 units of credit

Program Description
The Science Media and Communications program leads to a three-year Pass or four-year Honours degree. It is aimed at producing students who have a strong grounding in science together with conceptual and practical skills in media and communication studies. Students gain creative, practical experience with digital media in the production of audiovisual and multimedia works in an advanced multimedia laboratory, together with an understanding of the history and social impacts of media technologies. This focus is combined with a Major or two Minors in Science.

Program Objectives and Learning Outcomes
Please visit the website of the School of Media, Film and Theatre in the Faculty of Arts and Social Sciences for information regarding the Program Objectives and Learning Outcomes, as they teach the core program of multimedia courses - [http://media.arts.unsw.edu.au/media/index.html](http://media.arts.unsw.edu.au/media/index.html)

Program Structure
Stage 1
MDCM1000 New Media Technologies A (6 UOC)
MDCM1001 New Media Technologies B (6 UOC)
24 units of credit from two Science Schools
Electives totalling 12 units of credit

Stage 2
MDCM2000 Researching and Writing for New Media (6 UOC)
MDCM2002 Media Production (6 UOC)
MDCM2003 Multimedia Production (6 UOC)
18-24 units of credit in a Science Major or 2 Minors (as required by Major or Minors)
Further electives to give a total of 42 units of credit for Stage 2
Plus General Education (6 UOC)

Stage 3
MDCM3000 Media Forms (6 UOC)
MDCM3002 Advanced Media Production (6 UOC)
MDCM3003 Multimedia Production in Industry Contexts (6 UOC)
24 units of credit in a Science Major or Minors (continued from Stage 2)
Plus General Education (6 UOC)

General Education Requirements
Students in this program must also satisfy the General Education requirements. This is usually 12 UOC taken in second and third year studies.
For further information, please refer to the General Education section in this Handbook.

Honours
Please contact the Faculty of Science for information on Honours studies.

Academic Rules
1. A student must complete 144 units of credit including 12 units of credit of General Education.
The degree must contain a Media and Communications major sequence and either a second major drawn from those approved within the BSc excluding those from the Schools of Philosophy and History and Philosophy of Science or two approved minor sequences.

A student must complete at least 36 units of credit and no more than 60 units of credit in Level 1 courses from at least three Schools.

A student must complete at least 24 units of credit at Level 1 from Science schools (as defined in the conditions for the award of the BSc excluding the Schools of Philosophy and History and Philosophy of Science).

No student may normally commence Level 2 courses until 24 Level 1 units of credit have been successfully completed.

6. A student must complete a minimum of 84 units of credit from Science schools (see 4 above).

Progression to Stage 4 Honours is subject to academic performance. Students seeking to enrol in Honours are required to have the permission of the Head or Honours Coordinator of the appropriate School. Students who successfully complete Stage 4 of their program will be considered for the award of Honours. Students taking MICR2011 are encouraged enrol in BIOS2621 (or BIOS2621). The prerequisite course, MICR2201 maybe waived with the permission of the course authority.

Note: Students anticipating doing fourth year Honours program should contact the relevant head of school for advice.

Stage 3
Courses totalling 42 units of credit from the following subject areas: Anatomy, Biochemistry and Molecular Biology, Genetics, Microbiology, Immunology, Pathology, Physiology & Pharmacology, Psychology, Biotechnology. Students must nominate a major discipline by taking at least 18 units of credit at level 3 in one of these subject areas and fulfilling other course requirements specified for that major.

General Education courses totalling 6 units of credit

General Education Requirements
Students in this program must satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

Honours
Stage 4
Honours may be taken in the major discipline, subject to progress at credit level through the program. Intending Honours students should consult the Head or Honours Coordinator of the appropriate School. Students who successfully complete Stage 4 of their program will be considered for the award of Honours.

Academic Rules

Conditions for the Award of the Medical Science Degree

- A student must complete 144 units of credit including 12 units of General Education in Stages 1-3.
- Honours is available to suitably qualified students and consists of a 48 unit of credit Honours sequence at Stage 4.
- The degree must contain a sequence of study as specified in the program description.
- A student must complete at least 36 units and no more than 48 units in Level 1 courses.
- A student must complete before the end of Stage 3 the two 3 unit courses SCIF1110 and SCIF2220.
- No student may normally commence Level 2 courses until 24 Level 1 units have been successfully completed unless approved by the Head of School.
- Progression to Stages 3 and 4 is subject to academic performance. A student will be required to have attained an average of 65 or higher in courses relevant to the major area and cognate subjects in each prior stage.
- Progression to Stage 4 Honours is subject to academic performance. Students seeking to enrol in Honours are required to have the permission of the Head of School, to have completed all the requirements for Stages 1, 2 and 3 of the BMedSci and to have satisfied prerequisite requirements as specified. All General Education must also have been completed. Students who have not qualified for the BMedSci at Pass level will not be permitted to enrol in Honours.

Program Structure

Stage 1
BIOS1101 Evolutionary and Functional Biology (6 UOC)
BIOS1201 Molecules, Cells and Genes (6 UOC)
CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
CHEM1021 Fundamentals of Chemistry 1B (6 UOC)
CHEM1041 Higher Chemistry 1D (6 UOC)
PLUS 6 units of credit from:
MATH1031 Mathematics for Life Sciences (6 UOC)
MATH1041 Statistics for Life and Social Sciences (6 UOC)
MATH1131 Mathematics 1A (6 UOC)
MATH1141 Higher Mathematics 1A (6 UOC)
SCIF1110 Perspectives in Medical Science 1 (3 UOC)

One General Education course totalling 3 units of credit.

Elective courses totalling 12 units of credit offered by the following Schools: Computer Science, Mathematics, Physics, History and Philosophy of Science, Psychology.

Stage 2
SCIF2220 Perspectives in Medical Science 2 (3 UOC)

Courses totalling at least 36 units of credit from the following: ANAT2111, ANAT2241, ANAT2341, ANAT2601, ANAT2611, BIOC2101* or BIOC2181, BIOC2201* or BIOC2291, MICR2011**, MICR2201, PHPH2101, PHPH2201, PHPH2H01, PATH2201, BIOS2621 or BIOS2621

One General Education course totalling 3 units of credit.

Elective courses totalling 6 units of credit from the above courses or from the following areas: Biological Science, Chemistry, Computing, Mathematics, Physics, Psychology, History and Philosophy of Science.

*Students are encouraged to enrol in the more advanced biochemistry courses, and should note that BIOC2101 and BIOC2201 are prerequisites in many Stage 3 courses

**Students taking MICR2011 are encouraged enrol in BIOS2621 (or BIOS2621). The prerequisite course, MICR2201 maybe waived with the permission of the course authority.

Program Objectives and Learning Outcomes

Students enrolled in this program will have the opportunity to undertake a fourth year that involves a research program leading to an Honours degree.

Program Structure

Stage 1
BIOS1101 Evolutionary and Functional Biology (6 U.L.C.)
BIOS1201 Molecules, Cells and Genes (6 U.O.C.)
CHEM1011 Fundamentals of Chemistry 1A (6 U.O.C.)
CHEM1031 Higher Chemistry 1C (6 U.O.C.)
CHEM1021 Fundamentals of Chemistry 1B (6 U.O.C.)
CHEM1041 Higher Chemistry 1D (6 U.O.C.)
PLUS 6 units of credit from:
MATH1031 Mathematics for Life Sciences (6 U.O.C.)
MATH1041 Statistics for Life and Social Sciences (6 U.O.C.)
MATH1131 Mathematics 1A (6 U.O.C.)
MATH1141 Higher Mathematics 1A (6 U.O.C.)
SCIF1110 Perspectives in Medical Science 1 (3 U.O.C.)
## Specialist Degrees

### 3980 Bachelor of Aviation (Flying stream)

**BAv**

**Typical Duration**
3 years

**Minimum UOC for Award**
144 units of credit

**Typical UOC per Session**
24 units of credit

### Program Description

The degree of Bachelor of Aviation is offered by the Faculty of Science with input from the Faculty of Engineering.

The aim of this program is to provide an opportunity for students to prepare for a career in the aviation industry. Program 3980 is a Flying stream which allows students the opportunity for flight training. A Management stream is also offered which prepares students more specifically for careers in the managerial sector of the aviation industry - for this Management stream, please refer to program entry for 3981 Bachelor of Aviation (Management stream).

Both streams consist of a core courses selected from the faculties offering the program together with a range of options. The Flying stream additionally includes flight training to a minimum level of Commercial Pilots Licence (CPL) with additional flight training options available dependent upon student progress and requirements. It should be noted that due to the block training nature of the flight training program, teaching periods might not correspond to standard academic sessions.

### Program Objectives and Learning Outcomes

This program aims to prepare students for a career in flying, as a pilot.

### 3981 Bachelor of Aviation (Management stream)

**BAv**

**Typical Duration**
3 years

**Minimum UOC for Award**
144 units of credit

**Typical UOC per Session**
24 units of credit

### Program Description

The degree of Bachelor of Aviation is offered by the Faculty of Science with input from the Faculty of Engineering.

The aim of this program is to provide an opportunity for students to prepare for a career in the aviation industry. Program 3981 is a Managerial stream which prepares students more specifically for careers in the managerial sector of the aviation industry. A Flying stream, which incorporates flight training, is also available - please refer to program 3980 in this Online Handbook.

Both streams consist of core courses selected from the Faculties offering the program together with a range of options. The Managerial stream offers a selection of courses designed to provide students with a broad base of knowledge in managing the operational aspects of the aviation industry.

### Program Objectives and Learning Outcomes

This program aims to prepare students for a career in the managerial sector of the aviation industry.

### General Education Requirements

Students in this program must satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

### Academic Rules

A total of 144 units of credit including 12 units of credit of General Education (see above) are required for the completion of the Bachelor of Aviation (3 year degree).
Biotechnology can be defined as the use of various biological processes to make products and perform services. In biotechnology, living cells and biochemical macromolecules such as proteins, DNA and RNA are applied in a rapidly expanding range of activities of direct benefit to society. Biotechnology is used for the production of pharmaceuticals, food and industrial chemicals, in the development of improved crops and livestock, for farming, for environmental clean-up, and in forensics. Modern biotechnology makes practical use of the most recent scientific advances in areas such as molecular genetics and molecular cell biology.

The development of recombinant DNA technology has resulted in the ability to create, modify and improve industrial organisms and to produce large quantities of any useful protein. Based on this technology, biopharmaceuticals including hormones, vaccines, anti-hypertensive agents, anti-inflammatory agents and new therapies for the treatment of cancer are being developed with the potential to revolutionise medicine. The sequencing of the human genome and the rapid emergence of high-throughput genomic and proteomic techniques is resulting in a surge of new drug targets. Translation of this advanced knowledge into useful therapies and improved medical practices requires the application of biotechnology.

Microorganisms and viruses are being modified for use in controlling plant and animal diseases and pests. Diagnostic kits are being developed for use in forensic science and in product identification and quality control. Genetic improvements in agriculture, plants and animals are becoming a reality, as is the control of inborn genetic disorders in humans. The ability to treat diseased and injured organs with replacement cells and tissues generated outside of the body is advancing rapidly.

Bioprocesses are also used for environmental remediation, for the extraction of minerals from low-grade ores, and for the development of novel processes to treat waste and degrade recalcitrant molecules. Environmental biotechnology is an area of vital importance for our increasingly polluted planet.

The future for expansion in all the above areas is immense. Our ability to cope with many medical, environmental, agricultural and manufacturing problems in the 21st century will depend heavily on advances in biotechnology.

This program leads to the award of a Bachelor of Science Degree over four years full-time study, with Honours for students who perform with merit.

**Program Objectives and Learning Outcomes**

The Biotechnology program aims to provide a comprehensive education in all aspects of modern biotechnology.

**Program Structure**

**Stage 1**

**BIOC1201** Molecules, Cells and Genes (6 UOC)
**BIU1101** Introductory Biotechnology (6 UOC)
**CHEM1011** Fundamentals of Chemistry 1A (6 UOC)
**CHEM1021** Fundamentals of Chemistry 1B (6 UOC)
**MATH1031** Mathematics for Life Sciences (6 UOC)
**MATH1041** Statistics for Life and Social Sciences (6 UOC)

**Electives courses totalling 12 UOC recommended.**

**Note:** One of the following courses/combinations may be substituted for MATH1031 and MATH1041:

- MATH1111 General Mathematics 1B (6 UOC)
- or
- MATH1121 Mathematics 1A (6 UOC)
- or
- MATH1141 Higher Mathematics 1A (6 UOC)
- or
- MATH1241 Higher Mathematics 1B (6 UOC)

**Stage 2**

**BIOC2101** Principles of Biochemistry (Advanced) (6 UOC)
**BIOC2201** Principles of Molecular Biology (Advanced) (6 UOC)
**BIOC2621** Genetics (Advanced Level) (6 UOC)
**MICR2011** Microbiology 1 (6 UOC)
**MICR2201** Fundamentals of Microbiology and Immunology (6 UOC)

**General Education courses** (6 UOC)

**PLUS 12 UOC from:**

**BIOC2011** Evolutionary and Physiological Ecology (6 UOC)
**CHEM2021** Organic Chemistry (6 UOC)
**CHEM2041** Chemical and Spectroscopic Analysis (6 UOC)
**PHYP2101** Physiology 1A (6 UOC)

**Stage 3**

**BIOC3121** Molecular Biology of Nucleic Acids (6 UOC)
**BIOT3011** Biotechnology A (6 UOC)
**BIOT3021** Biotechnology B (6 UOC)
**BIU13061** Biopharmaceuticals (6 UOC)

**General Education courses** (6 UOC)

**PLUS one of the following MICR courses:**

**MICR3041** Immunology 1 (6 UOC)
**MICR3641** Immunology 1 (Advanced) (6 UOC)

**PLUS an additional 12 UOC to be selected from the following:**

**BIOC3111** Molecular Biology of Proteins (6 UOC)
**BIOC3271** Molecular Cell Biology (6 UOC)
**BIOC3281** Recombinant DNA Techniques and Eukaryotic Molecular Biology (6 UOC)
**BIOT3081** Environmental Biotechnology (6 UOC)
**MICR3021** Microbial Genetics* (6 UOC)
General Education Requirements

The University requires all students to complete a coherent sequence of General Education courses. The General Education Program is an integral part of the BSc Biotechnology course and gives students the opportunity to address some of the key questions they will face as individuals, citizens and professionals. A total of 12 units of credit in General Education course(s) is required.

For further information, please refer to the General Education section in this Handbook.

Academic Rules

Progression and Exclusion

Students whose performance is unsatisfactory will be notified in writing and asked to show at the end of the academic year why they should remain in their course of study. Any student who fails a course twice, or is deemed to be making unsatisfactory progress, will be considered as having poor academic standing.

Unsatisfactory progress may include:

- failure to achieve an average of 65 or higher in courses attempted in an academic year;
- failing to pass courses totalling at least 24 units of credit in one year;
- failing to complete the requirements for Stage 1 of the program in the first two years of study.

Students not on good academic standing will be notified by the University or Faculty in writing. Notified students will be assessed in accordance with the University’s procedures. Failure to respond accordingly can result in exclusion from a course, the program, or transfer to the Science and Mathematics program (3970), provided that the progression requirements in that course have been met. Also see the section on progression and exclusion (‘Restrictions on Students Re-enrolling’) in the Student Guide.

Progression to Stage 4 Honours

Progression to Stage 4 is subject to academic performance. Students seeking to enrol in a Stage 4 Honours program are required to have the approval of the Head of School and normally will be required:

- to have completed the requirements for Stages 1, 2 and 3 of the program and to have completed all General Education courses;
- to have attained an average of 65 or higher in each Stage of the program.

Students who do not attain an average of 65 or higher in Stage 3 of the program are normally required to transfer to the Science and Mathematics program (3970) and take out the BSc award at Pass level.

Note: Please refer to Program Structure above for rules relating to program requirements.

Career Outcomes

Graduates in Biotechnology will be able to find employment in industries and other organisations involved with drug development, biopharmaceutical production, food processing as well as agricultural and environmental biotechnology.

3135 Materials Science and Engineering

Bachelor of Engineering BE

Typical Duration

4 years

Minimum UOC for Award

192 units of credit

Typical UOC per Session

24 units of credit

Program Description

The field of Materials Science and Engineering offers unlimited possibilities for innovation and development. Attention is being focused on developing and processing metals, ceramics, polymers and composites with improved properties.

The activities of the materials engineer range from materials production, including their extraction from ores and their refining, to the design, development, processing and recycling of materials for use in aerospace, transportation, electronics, energy conversion and biomedical systems. Advanced materials can provide a major competitive advantage in virtually every part of a country’s manufacturing industry. Because Australia is a country rich in minerals, materials science has been designated as a priority area for research and development. Examples of recent and significant developments include the emergence of environmentally friendly and economical metal processing methods, advanced surface coatings, biomedical materials, electrical ceramics, engineering polymers, and advanced composites.

The School of Materials Science and Engineering provides education and training for students to prepare them for a significant and important career in the materials and other industries.

The School of Materials Science and Engineering is in a good position to provide the increased numbers of graduates necessary for development of these new initiatives in materials. It is the only school in Australia that offers professional courses in ceramic engineering, metallurgical engineering and materials engineering as well as providing postgraduate specialisation in these fields.

The School is extremely well equipped with a wide range of advanced computing, thermal analysis, mechanical testing, X-ray and optical and electron microscopy facilities.

The School offers a four-year full-time BE program (3135) with four different plans, and related five-year full-time combined degree program leading to BE/MBiomedE (3136). In addition, six year part-time BSc(Tech) programs are also offered in Ceramics (3030) and Metallurgy (3130).

Program Structure

Plans under program 3135 all of which lead to the award of Bachelor of Engineering (BE) provide appropriate preparation for a professional Physical Metallurgical Engineer (plan MATSE13135), Process Metallurgical Engineer (plan MATSG13135), Materials Engineer (plan MATSH13135) and Ceramic Engineer (plan MATSJ13135). The first two years of all plans are identical and the third and fourth years contain a number of common courses. Students can change their selection among the study plans up to the end of Session 1 of the third year.

Each study plan provides a range of electives in the particular study specialisation concerned. In addition, a limited number of electives can be chosen from other plans.

Concurrent programs are also available with Bachelor of Engineering/ Masters programs in either Commerce (3128) or Biomedical Engineering (3138). To enter program 3128, students start in BE program 3135 and study their academic plan to the end of third year. They then transfer in year 4 to BE Program 3128 and in their 5th year, study under the Master of Commerce program 8400 to obtain the award of Bachelor of Engineering/ Master of Commerce (BEMCom). Similarly, in program 3138, students can study an academic plan within the Bachelor of Engineering program 3135 and then, in the 5th year, study under the Master of Biomedical Engineering Program 3749 to obtain the award of Bachelor of Engineering/ Master of Biomedical Engineering (BE/MBiomedE).

The following structure is applicable to all plans within the Bachelor of Engineering Single Degree Program

Plan MA1SE13135 BE in Physical Metallurgy
Plan MA1SG13135 BE in Process Metallurgy
Plan MA1SH13135 BE in Materials Engineering
Plan MA1SJ13135 BE in Ceramic Engineering

Stage 1 of all plans

CHEM1011 Fundamentals of Chemistry 1A (6 UOC)
CHEM1021 Fundamentals of Chemistry 1B (6 UOC)
MATH1131 Mathematics 1A (6 UOC)
MATH1231 Mathematics 1B (6 UOC)
MATH1021 Computing in Materials Science (3 UOC)
MATS1111 Materials Science 1 (3 UOC)
MECH1030 Engineering Drawing and Solid Modelling (3 UOC)
MECHO440 Engineering Statics (3 UOC)
PHYS1121 Physics 1A (6 UOC)
PHYS1221 Physics 1B (6 UOC)
Stage 2 of all plans

CHEM2718  Physical Chemistry for Materials Science and Engineering (3 UOC)
MATH2049  Mathematics and Statistics for Materials Science A (3 UOC)
MATH2059  Mathematics for Materials Science B (3 UOC)
MA1S1002  Microstructure Analysis (3 UOC)
MA1S1092  Materials and Design 1 (3 UOC)
MA1S1112  Phase Equilibria (3 UOC)
MA1S1142  Crystallography and X-Ray Diffraction (3 UOC)
MA1S1532  Materials Engineering 1B (6 UOC)
MA1S1172  Physical Properties of Materials (3 UOC)
MA1S232  Materials Engineering 1A (3 UOC)
MA1S1262  Mechanical Properties of Materials (6 UOC)
MA1S282  Thermodynamic Materials (6 UOC)
General Education course (3 UOC)

Stage 3 of all plans

MA1S103  Diffusion and Kinetics (3 UOC)
MA1S244  Materials Industry Management A (6 UOC)
MA1S213  Ceramic Materials (3 UOC)
MA1S343  Polymer Science and Engineering (3 UOC)
MA1S403  Physical Metallurgy (3 UOC)
MA1S503  Materials Processing (6 UOC)
MA1S113  Materials Engineering Laboratory (3 UOC)
MA1S5323  Modelling in Materials Engineering I (3 UOC)
Plus Professional Electives totalling 12 UOC
General Education courses (6 UOC)

Stage 4 of all plans

MA1S343  Materials Industry Management B (3 UOC)
MA1S1534  Design Project (3 UOC)
MA1S464  Professional Communication and Presentation (3 UOC)
MA1S3624  Materials Engineering Project (18 UOC)
(9 UOC per session over two sessions)
Plus Professional Electives totalling 18 UOC
or
MA1S3724  Materials Engineering Project (24 UOC)
(12 UOC per session over two sessions)
Plus Professional Electives totalling 12 UOC
General Education courses (6 UOC)

Elective Components (Stage 4)

The following courses have particular objectives, but specific topics are chosen by students for study and research.

MA1S244  Materials Industry Management A (6 UOC)
MA1S354  Design Project (3 UOC)
MA1S464  Professional Communication and Presentation (3 UOC)
MA1S3624  Materials Engineering Project (18 UOC)
(9 UOC per session over two sessions)
MA1S3724  Materials Engineering Projects (24 UOC)
(12 UOC per session over two sessions)

Physical Metallurgy - Plan MATSE13135

The Physical Metallurgy plan is designed to produce graduates with training appropriate to both the metal and product manufacturing industries. The profession is very broad and includes careers in metal manufacturing companies, product manufacturing companies (e.g., white goods, automotive, aircraft), utilities, airline overhaul and maintenance operations, consulting companies and research organisations. Graduates may be employed in production, technical control and development, quality assurance, technical marketing and management. Physical Metallurgy is introduced comprehensively in Stages 3 and 4 by a number of professional electives. Students also undertake a materials design project and a substantial thesis project. Students may complete the first one or two years of their degree at their local university engineering school and then transfer with advanced standing to UNSW.

Physical Metallurgy Professional Electives:

MA1S1214  Welding and Other Joining Processes (3 UOC)
MA1S1414  Surface Treatment and Wear (3 UOC)
MA1S3064  Composite Materials (3 UOC)
MA1S4064  Thermomechanical Processing (3 UOC)
MA1S4084  Specialty Alloys (3 UOC)
MA1S5424  Modelling in Materials Engineering (3 UOC)
NANO3420  Fabrication of Nanostructured Devices (3 UOC)

Process Metallurgy - Plan MATSG13135

The Process Metallurgy plan is designed to produce graduates with training appropriate to the primary metallurgy industry. The profession is very broad and affords opportunities for involvement in many specialist activities in production, technical control or development, in metal or mineral producing industries.

Process Metallurgical Engineering is introduced in Stages 3 and 4 by a number of professional electives and a thesis project. During the program, visits are made to various metallurgical works and students are required to submit reports on some of these. Students may complete the first one or two years of their degree at their local university engineering school and then transfer with advanced standing to UNSW.

Process Metallurgy Professional Electives:

FUEL0040  Fuel Engineering for Materials Processing (3 UOC)
INDC3070  Instrumentation and Process Control (3 UOC)
MA1S3594  Pollution Control in Materials Processing (3 UOC)
MA1S5424  Modelling in Materials Engineering 2 (3 UOC)
MA1S524  Pyrometallurgy 2 – Casting (3 UOC)
MINE3800  Mineral Processing (3 UOC)

Materials Engineering - Plan MATSH13135

The Materials Engineering plan provides a versatile, comprehensive coverage of areas involving: a) the conception and application of properties of materials for use in engineering, structural and specialty needs necessary in the design and development of specific components, b) supervision of manufacturing, c) evaluation and certification of specifications and characteristics, d) production of new, novel and value-added products, e) research, and f) general engineering and project management. The range of Professional Electives and selection of Technical Electives in Years 3 and 4 provide a direction appropriate to the needs of the Australian industry, and to the specific interests of students, together with a degree of flexibility if required. Typical fields which may be encompassed by the plan include steel and non-ferrous metals/alloys production, polymers and composites industry, building materials, civil engineering applications, transport, electrical/electronic industry, biomaterials/biodevices, Australian defence needs: Army, Navy, Airforce, plus the national research laboratories. Due emphasis is placed on collaborating with other appropriate fields of engineering and science disciplines.

Materials Engineering Professional Electives:

MA1S1414  Surface Treatment and Wear (3 UOC)
MA1S2294  Mech. And Thermal Properties of Ceramics (3 UOC)
MA1S2314  Glass-Based Ceramics (3 UOC)
MA1S3064  Composite Materials (3 UOC)
MA1S3574  Polymer Engineering 2 (3 UOC)
MA1S5424  Modelling in Materials Engineering 2 (3 UOC)
NANO3420  Fabrication of Nanostructured Devices (3 UOC)

Ceramic Engineering - Plan MATSJ13135

UNSW offers the only degree specialisation in Ceramic Engineering in Australia. The Ceramic Engineering plan is designed to produce graduates with expertise appropriate to the ceramic manufacturing industries, which include structural ceramics, advanced engineering ceramics, electronic ceramics, whiteware, glass manufacturing and refractories. Graduates are employed in a diverse range of areas including production, research and technical development, quality assurance, technical marketing, consulting and management. In addition to recognition of the degree by the Institute of Engineers Australia, graduates in Ceramic Engineering are also eligible for membership of the Institute of Ceramics of Great Britain, the Royal Australian Chemical Institute and the National Institute of Ceramic Engineers USA.

Ceramic Engineering is introduced comprehensively in Stages 3 and 4 of the program by a number of professional electives which include visits to various ceramic manufacturing plants, a design project and a thesis research project. Students may complete the first one or two years of their degree at their local university engineering school and then transfer with advanced standing to UNSW.

Ceramic Engineering Professional Electives:

FUEL0040  Fuel Engineering for Materials Processing (3 UOC)
MA1S2203  Physico-Chemical Ceramics Laboratory (3 UOC)
MA1S2263  Sintering of Ceramics (3 UOC)
MA1S2294  Mech. And Thermal Properties of Ceramics (3 UOC)
MA1S2314  Glass-Based Ceramics (3 UOC)
MA1S3574  Polymer Engineering 2 (3 UOC)
MA1S5424  Modelling in Materials Engineering 2 (3 UOC)
NANO3420  Fabrication of Nanostructured Devices (3 UOC)

General Education Requirements

Students in this program must also satisfy the General Education requirements. This is 12 UOC, usually taken in second and third year studies.
For further information, please refer to the General Education section in this Handbook.

**Academic Rules**

Please refer to Program Structure and the School of Materials Science & Engineering for the academic requirements relating to this program.

**Industrial Experience Requirement**

All students are required to have gained at least 12 weeks of approved industrial experience before graduation and to have submitted satisfactory reports on such work. Industrial experience is usually obtained during a long vacation at the end of stages 2 and 3.

**Professional Recognition**

The Institution of Engineers Australia recognises the degree of BE in any of the 4 undergraduate plans as meeting the examination requirements for admission to graduate and corporate membership. Similarly, substantial or complete recognition is accorded to the BE degree programs by overseas engineering institutions.

Graduates in Ceramic Engineering are also eligible for membership of the Institute of Ceramics of Great Britain, the Royal Australian Chemical Institute and the National Institute of Ceramic Engineers USA.

### 3030 Ceramics

**Bachelor of Science (Technology) BSc(Tech)**

**Typical Duration**

6 years part-time

**Minimum UOC for Award**

144 units of credit

**Typical UOC per Session**

18 units of credit

**Program Description**

*Please note: This program is currently under review. For confirmation of program details, please contact the School of Materials Science.*

Program 3030 is designed for students who are employed in the ceramics industry. It extends over six part-time years of study. The courses in Stages 3, 4, 5 and 6 normally are available only at daytime classes and one day or more of release from industry per week may be required.

The program leads to the Bachelor of Science (Technology) award. It covers the same courses as the first three years of the corresponding full-time BE program 3135. The first four years of study correspond to the first two years of program 3135. Stages 5 and 6 are the same as the third year of the 3135 program ceramic engineering plan.

Students are required to complete an approved program of industrial training of not less than twelve months prior to the award of the degree. Industrial training normally should be completed concurrently with attendance of the program, but with approval of the Head of School may be completed after completion of the prescribed course of study.

**Program Objectives and Learning Outcomes**

On completion of this program, students will have attained a sound knowledge base in the field of Ceramics.

**Total UOC:** 240

**Academic rules:**

Students in this program must satisfy the University's General Education requirements. For further information, please refer to the General Education section in this Handbook.

**Area of study:**

Students can change their selection of study plans up to the end of Session 1 of the third year. Courses pertaining to the MBiomedE component of the program are done in each of the 5 stages of the program.

Note: ‘Year 1, 2, 3’ etc represents Stage 1, 2, 3 etc of the program, as it would be taken in a normal course of full-time study.

**Stage 1 all plans:**

### 3617 Nanotechnology

**Bachelor of Science BSc**

**Typical Duration**

4 years

**Minimum UOC for Award**

192 units of credit

**Typical UOC per Session**

24 units of credit

**Program Description**

This program in Nanotechnology offers a comprehensive education in the emerging field, which represents an important development in the evolution of scientific understanding, with profound implications for the new economy.

Nanotechnology provides the potential to create new manufacturing sectors from our ability to observe, characterise and manipulate the atomic and molecular structure of materials which form the basis of the bio-, communications, information and environmental technologies.

This program will lead to the award of a Bachelor of Science in Nanotechnology over four years of full-time study, with Honours for students who perform with merit. At present, the principal entry point into this degree will be at first year level. Students will normally be expected to complete each stage before proceeding to the next stage. A total of 192 units of credit must be completed for the award of this degree.

**Program Objectives and Learning Outcomes**

On completion of this program, students will have attained a comprehensive knowledge base in the field of nanotechnology.

**Program Structure**

3952 Bachelor of Optometry Bachelor of Science

BOptom BSc

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
Optometry combines the theoretical discipline of vision science with the clinical art of primary eye care. Vision science includes the optics of lenses, the physiology of the eye, the psychophysics of vision and the neuroscience of the brain. Optometry includes the diagnosis and management of ocular disease, the dispensing of spectacles and contact lenses, the management of people with special needs (children, low vision), sports vision and vision in the workplace.

The School of Optometry and Vision Science offers a five-year full-time combined BOptom BSc program. Graduates of this program will be able to register as an optometrist in Australia. The degree is also recognised in New Zealand and in most parts of Asia. Job opportunities in this field are excellent and are expected to remain excellent given the high visual demands in the modern computer-based workplace, and the aging population in Australia.

An innovative feature of this program is its alternate entry mechanism. Local students who do not achieve the cut-off UAI or equivalent for direct entry into the Optometry program can apply for one of approximately 25 transfer positions. Students wishing to apply for transfer into the BOptom BSc (3952) program will 1) be completing at the end of the year Stage 1 of the Bachelor of Science (3970) Vision Science study plan (including recommended courses), 2) have completed the UMAT exam held in July during Stage 1 of their BSc program and 3) should achieve a minimum performance level of Distinction (75%) in both Stage 1 Vision Science courses (VISN1211 and VISN1231). Students meeting these requirements will be ranked using an algorithm that includes their UAI or equivalent, their WAM achieved at the end of Stage 1 of their BSc (3970) Vision Science study plan and their UMAT result. To be competitive for transfer selection students would need an entry UAI or equivalent of at least 90.

Program Objectives and Learning Outcomes
This program aims to provide a strong knowledge base in the field of optometry.

General Education Requirements

6 units of credit to be completed in Stage 3

Academic Rules

1. The program is a five-year full-time combined program leading to the award of the two degrees of Bachelor of Optometry and Bachelor of Science (BOptom BSc).
2. The five years of the program include at least 111 units of credit in the Science program (3970) and a minimum of 240 units of credit in total.
3. The 111 Science program units of credit must include 48 Level 1 units of credit.
4. The degrees of Bachelor of Optometry and Bachelor of Science are not awarded until the completion of the full five-year program.
5. There will be a testamur for each degree in the combined program.

Program Description

Psychology is a discipline of both scientific research and applied practice. As a science, psychology is concerned with the study of behaviour and its underlying mental and neural processes. Topics of study include learning, memory, cognition, perception, motivation, life-span development, personality, social interactions, and abnormal psychology. Psychology has many areas of application, especially in clinical, correctional, counselling, educational, and organisational settings. In addition, people with training in psychology pursue careers in academic research, health research, developmental disabilities and rehabilitation, ergonomics, occupational health and safety, personnel selection, training, and management; vocational guidance, and marketing.

Program Objectives and Learning Outcomes

The four-stage full-time program leads to the degree of Bachelor of Psychology. The degree is designed to provide the student with (1) a sound understanding of psychological theory, research skills, and psychological techniques, (2) psychology elective studies in areas of individual interest, (3) supporting studies in science disciplines, and (4) the opportunity to study courses in other faculties including Arts and Social Sciences, and Commerce and Economics.

Stage 3
PSYC3001 Research Methods 3A (6 UOC)
PSYC3011 Research Methods 3B (6 UOC)
General Education (6 UOC)
PLUS ONE course from EACH of the following 3 elective groups and two other Level III Psychology courses:*

Advanced Perceptual/Cognitive
PSYC3151 Cognition and Skill (6 UOC)
PSYC3211 Cognitive Science (6 UOC)
PSYC3221 Vision and Brain (6 UOC)
PSYC3311 The Psychology of Language (6 UOC)
PSYC3321 Cognitive Development (6 UOC)

Advanced Biological
PSYC3051 Physiological Psychology (6 UOC)
PSYC3241 Psychobiology of Memory and Motivation (6 UOC)

Advanced Social
PSYC3121 Social Psychology (6 UOC)
PSYC3271 Personality and Individual Differences (6 UOC)
PSYC3281 Interpersonal Behaviour (6 UOC)

Stage 4
PSYC4053 Psychology 4A (24 UOC)
PSYC4063 Psychology 4B (24 UOC)

*Note: Not all level III Psychology elective courses are necessarily offered each year.

General Education Requirements
Students in this program must satisfy the University’s General Education requirements. For further information, please refer to the General Education section in this Handbook.

Academic Rules
In order to graduate students must satisfy requirements for the award by passing all courses specified for the degree.

The final grading for the degree is based on performance in all Psychology courses excluding PSYC1001, PSYC1011 and PSYC1021 taken over the four stages. The degree may be awarded at either Pass level or with Honours.

Study Load
This is a four-stage full-time program. In any one year students must enrol in the full load specified for a particular stage. Only in exceptional circumstances will students be allowed to enrol in a reduced program for a stage, and this requires the permission of the Head of School of Psychology.

Academic Standing
Students will be required to maintain a high level of performance for progression. Any student who fails to achieve an average of 65 percent or higher in psychology courses taken in any stage (based on the first attempt result for each course) will be deemed to be failing below that level of performance. This will be drawn to the attention of the student and they may be interviewed by the Head of School (or nominee) to discuss the reasons for poor performance. This interview may lead to a recommendation to undertake special studies to assist learning. Students whose performance remains below the required level at the end of Stage 2 or 3, or remains on poor academic standing, may be required to transfer to the Bachelor of Science or another degree and/or to show cause why such transfer should not be required.

Registration as a Psychologist
In order to become a member of the professional body, the Australian Psychological Society (APS), and for registration as a psychologist in New South Wales, students first need a university bachelor degree which includes four years of approved training in psychology. The BPychol degree provides four years of approved training in psychology. Students must also follow this by completing an accredited 5th and 6th year academic degree such as one of the Master of Psychology Degrees (Clinical, Forensic, Organisational) or a combined Doctor of Philosophy/ Master of Psychology Degree as offered by this University. An alternative of two years of supervised experience in professional practice may be undertaken for registration as a psychologist in NSW.
Note: For the award of the Diploma in Innovation Management, students must complete all courses in the study plan. Students that take BIOT3071 and BIOT3091 courses as part of their BSc program must complete Innovation in Practice courses at a sufficient UOC level to meet the total 36 UOC requirement for the award of the Diploma.

Academic Rules
Please contact the Faculty of Science for information.

Combined Degree Programs

Faculty of Arts & Social Sciences and the Faculty of Science

3930 Science/Arts

Bachelor of Science Bachelor of Arts BSc BA

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit

Program Description
This combined degree program, the Bachelor of Science Bachelor of Arts, enables students to complete a major sequence from those available in Science and in the Faculty of Arts and Social Sciences.

Note: Majors in Philosophy and History & Philosophy of Science may not be taken as part of the Science component. The typical duration of this program is four years full-time.

For admission to the program, students must satisfy the entry requirements to Science as well as to the Faculty of Arts and Social Sciences. This degree program is administered by the Faculty of Science.

Program Objectives and Learning Outcomes
Please refer to the program objectives as listed for the Bachelor of Science program 3970 and the Bachelor of Arts program 3400.

Program Structure

Program Requirements
This program requires the successful completion of 192 units of credit in an approved sequence of study.

Students are required to undertake courses totalling 84 units of credit from both the Science and the Arts components of this combined degree. The remaining 24 units of credit may be from either area. In addition students must complete an approved major sequence of at least 42 units of credit. Students should enrol in at least 24 Level 1 units of credit and no more than 36 Level 1 units of credit in both the Science and the Arts components of the program. No more than 12 units of credit can be taken in any one school or department, for the arts component and 18 UOC in any school for the science component.

Selecting Majors
For information on available Science majors, please refer to the program entry 3970 Bachelor of Science and Table A in this Handbook or contact the Science Student Centre on campus.

For information on available Arts majors, please refer to the program entry 3400 Bachelor of Arts in the Arts and Social Sciences section in this Handbook or contact the Faculty of Arts and Social Sciences Office on Campus.

Academic Rules
For program rules and requirements, please refer to the Program Structure section above.

Note: Students seeking to complete the Science component of a combined degree would normally be expected to complete a minimum of 84 units of credit in Science courses at Levels I–III, including a major as specified for program 3970. It may be difficult to undertake some plans as part of combined degree structures due to timetable constraints. Students may not enrol in the Honours Year until they have satisfied all requirements for both the Science and Arts components of the degree.

3931 Advanced Science/Arts

Bachelor of Science Bachelor of Arts BSc BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The combined Advanced Science/Arts program enables students to complete a study plan in Advanced Science, in addition to a major sequence in the Faculty of Arts and Social Sciences. The duration of the degree program is normally five years full-time.

For admission to this program, students must satisfy the entry requirements to Advanced Science as well as to the Faculty of Arts and Social Sciences. This degree program is administered by the Faculty of Science.

Program Objectives and Learning Outcomes
On completion of this program, students will have attained a sound knowledge base in both their Advanced Science and Arts specialisations.

Program Structure
The total units of credit required for this program is 240. Students are required to undertake 96 units of credit for the Advanced Science component of this degree program and 84 units of credit for the Arts component, including an approved Arts major sequence of 42 units of credit. The remaining 12 units of credit may be from either area. A further 48 units of credit constitutes the Stage 4 Honours sequence of the Advanced Science study plan.

Students should enrol in at least 24 Level 1 units of credit and no more than 36 Level 1 units of credit in both the Advanced Science and the Arts component of the program. No more than 12 units of credit can be taken in any one school or department in the Arts component of the program and 18 units of credit from any one school in the Science component.

Selecting Advanced Science Study Plans and Arts Majors
For information on available Advanced Science study plans, please refer to the ‘Plan Rules and Information’ section following in this Handbook or contact the Science Student Centre on campus.

For information on available Arts majors, please refer to the program entry 3400 Bachelor of Arts in the Faculty of Arts and Social Sciences section in this Handbook or contact the Faculty of Arts and Social Sciences Office on Campus.

Academic Rules
Please refer to Program Structure above.

Note: Students seeking to complete the Advanced Science component of this combined degree program would normally be expected to complete the full Stage 4 Honours sequence for the study plan in which they are enrolled. In practice, it may be difficult to undertake some study plans as part of combined degree structures and students may be restricted in the number of Advanced Science courses that they can undertake. Where these are insufficient to allow the student to complete the recommended study plan, students are advised to consult the relevant Head of School.

3935 Science/Social Science

Bachelor of Science Bachelor of Social Science BSc BSocSc

Typical Duration
4 years

Minimum UOC for Award
192 units of credit

Typical UOC per Session
24 units of credit
Program Description
This combined degree program, the Bachelor of Science Bachelor of Social Science, enables students to complete a major sequence from those available in Science and a specialisation in Social Science within the Faculty of Arts and Social Sciences.

The typical duration of this program is 4 years full-time.

For admission to the program, students must satisfy the entry requirements to Science as well as to the Faculty of Arts and Social Sciences.

This degree program is administered by Faculty of Science.

Program Objectives and Learning Outcomes
Please refer to the program objectives as listed for the Bachelor of Science (BSc) program 3970 and the Bachelor of Social Science (BSoSc) program 3420.

Program Structure
Program Requirements
This program requires the successful completion of 192 units of credit in an approved sequence of study.

In addition to the minimum requirements of the BSc program (84 units of credit), students must complete a major as listed in Table A in the ‘Plan Rules and Information’ section of this Handbook as well as a minimum of 84 units of credit in the Faculty of Arts and Social Sciences.

This includes the Social Science core program of 48 units of credit.

Social Science Core Program (48 UOC)

SLSP1000 Social Science and Policy (6 UOC)

SLSP1002 Introduction to Policy Analysis (6 UOC)

SLSP1001 Research and Information Management (6 UOC)

SLSP2000 Political Economy and the State (6 UOC)

SLSP2001 Applied Social Research 1 (6 UOC)

SLSP2002 Policy Analysis Case Studies (6 UOC)

SLSP3000 Social Theory and Policy Analysis (6 UOC)

SLSP3001 Applied Social Research 2 (6 UOC)

SLSP3002 Social Science and Policy Project (6 UOC)

An additional 36 units of credit from an approved sequence in a particular Social Science discipline.

Note: Students may complete a major (42 units of credit) in a Social Science discipline by completing an additional elective course as part of the remaining 24 units of credit required for this combined degree program.

Selecting Science and Social Science Majors
For information on available Science majors, please refer to Table A in the ‘Plan Rules and Information’ section of this Handbook or contact the Science Student Centre on campus.

For information on available Social Science majors, please refer to the program entry for 3420 Bachelor of Social Science in the Arts and Social Sciences section in this Handbook or contact the Faculty of Arts and Social Sciences Office on campus.

Academic Rules
For program rules and requirements, please refer to the Program Structure section above.

Note: Students seeking to complete the Science component of a combined degree would normally be expected to complete a minimum of 84 units of credit in Science courses at Levels I–III, including a major as specified for program 3970. It may be difficult to undertake some plans as part of combined degree structures due to timetable constraints.

Students may not enrol in the Honours Year until they have satisfied all requirements for both the Science and Social Science components of the degree.

3936 Advanced Science/Social Science
Bachelor of Science Bachelor of Social Science BSc BSoSc

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The combined Advanced Science/Social Science program enables students to complete a Study Plan in Advanced Science, in addition to a program of study in Social Science offered by the Faculty of Arts and Social Sciences.

The duration of this combined degree program is normally five years full-time.

For admission to this program, students must satisfy the entry requirements to Advanced Science as well as to the Faculty of Arts and Social Sciences.

This degree is administered by the Faculty of Science.

Program Objectives and Learning Outcomes
On completion of this program, students will have attained a sound knowledge base in both their Advanced Science specialisation and Social Science.

Program Structure
The total units of credit required for this program is 240.

Students are required to undertake 96 units of credit for the Advanced Science component of this degree program and 84 units of credit for the Social Science component which includes the Social Science core program of 48 units of credit:

Social Science Core Program

One of the following courses:

SLSP1000 Social Science and Policy (6 UOC)

SLSP1001 Research and Information Management (6 UOC)

SLSP2000 Political Economy and the State (6 UOC)

SLSP2001 Applied Social Research 1 (6 UOC)

SLSP2002 Policy Analysis Case Studies (6 UOC)

SLSP3000 Social Theory and Policy Analysis (6 UOC)

SLSP3001 Applied Social Research 2 (6 UOC)

SLSP3002 Social Science and Policy Project (6 UOC)

An additional 36 units of credit from an approved sequence in a particular Social Science discipline.

Note: Students may complete a major (42 UOC) in a Social Science discipline by completing an additional elective course as part of the remaining 24 units of credit required for this combined degree program.
3932 Bachelor of Environmental Science Bachelor of Arts
BEnvSc BA

Typical Duration
5 years

Minimum UOC for Award
240 units of credit

Typical UOC per Session
24 units of credit

Program Description
The combined degree requires a minimum of five years to complete. To satisfy requirements for Environmental Science, a student must complete the coursework in the ENVS core and a discipline specialisation, as well as a 24 units of credit independent research project. Refer to Environmental Science Program 3988 for further details on core courses and specialisations.

Students must complete a minimum of 84 units of credit in courses offered by the Faculty of Arts and Social Sciences, including an approved major sequence of 42 units of credit. Students should enrol in at least 24 Level 1 units of credit and no more than 36 Level 1 units of credit within the Arts component of the program. Of these, no more than 12 units of credit can be taken in any one school or department.

This degree is administered by the Faculty of Science.

Program Structure
Selecting Environmental Science Specialisations and Arts Majors
For information on available specialisations within Environmental Science as well as required core coursework, please refer to the program entry for 3988 Bachelor of Environmental Science or contact the Science Student Centre.

For information on available Arts majors, please refer to the program entry 3400 Bachelor of Arts in the Faculty of Arts and Social Sciences section in this Handbook or contact the Faculty of Arts and Social Sciences Office on campus.

Academic Rules
Please refer to Program Structure or contact the Faculty of Science for the academic requirements relating to this program.

*List not exhaustive but representative of our knowledge-to-date. Students are advised to seek advice from the program authority to ensure that their major and Science courses meet the requirements for the BScBEd degree and are recognised as teaching disciplines by DET.

#Some disciplines are recognised as multiple teaching disciplines by DET.
courses in the third year (18 UOC) which include one theory elective, introductory teaching methods and teaching experience; and 42 UOC in fourth year, which include educational theory, practice teaching, teaching method, and professional courses.

vi) At least 84 UOC from Science schools.

vii) A maximum total of 10 Level 1 courses (60 UOC).

viii) A total of 192 UOC. Provided all requirements for Science and Education are met, students may complete the balance by choosing courses from the Majors and Schools identified in Tables A and B.

Note:
(a) Upper level Physics and Chemistry courses require completion of at least 12 units of credit of first year Mathematics. Some level three physics courses require a further 6 UOC of level II Mathematics.
(b) For entry to Honours (fourth year) in one of the science disciplines, at least 24 UOC need to be taken at Level III in the discipline, and approval needs to be obtained from the head of the relevant science school.
B) Students wishing to become Mathematics teachers, or graduate in Mathematics, will be required to:

i) Complete 60 UOC in Mathematics. These Mathematics courses must be chosen so as to fulfill the requirements for a Mathematics major in the science degree program 3970, and include the courses MATH3560 ‘History of Mathematics’ and MATH3570 ‘Foundations of Calculus’.

ii) Complete at least 6 UOC of computing courses, which can be taken from a variety of different schools in the university.

iii) Complete 78 UOC in Education. The normal pattern is two courses in the first year (12 UOC), one course in second year (6 UOC), and two courses (teaching method (6 UOC) and practice teaching (6 UOC)) in third year, and 48 UOC in fourth year, which include educational theory, practice teaching, teaching method, and professional courses.

iv) A total of 192 UOC. Provided all requirements for Mathematics and Education are met, students may complete the balance by choosing courses from the Majors and Schools identified in Tables A and B.

Note:
(a) All prospective Mathematics teachers need to do the BScBEd combined degree. They can no longer (from 2000) do the BABEd degree.
(b) In stage 4, there is the opportunity to do Computer Studies Method if 24 UOC of computing have been completed.

Academic Rules
Please refer to Program Structure for the Academic Requirements relating to this program. Please refer to the School of Education for information on required courses and program structure for each teaching discipline.

Plan Rules and Information

Table A

Major Plans for the Bachelor of Science (3970) program and Combined BSc Programs

How to Read this Table

New Students

When you have decided which major(s) you want to study, you should enrol in the courses listed for Stage 1. In some majors there is only a small number of specified Stage 1 courses and you should choose additional courses to enrol in, such that you have a full program (24 units of credit per session). These additional courses (electives) may come from any available Level I courses from the subject areas within Table A or Table B.

Students who are unsure which major to choose may enrol in an ‘undeclared plan’. The purpose of an undeclared plan is to cover a combination of Level I courses to enable a student to enter a variety of majors. Students are advised to choose a major before commencing Stage 2.

Continuing Students

Students who have completed Stage 1 should select specified courses listed for their major(s) in Stage 2 and Stage 3. Note that these are the minimum requirements for majors and students may take additional courses in the same area provided they also complete a minor and General Education requirements.

Notes:

1. Some of the courses listed in the later stages of a major may have prerequisites in an earlier stage or corequisites to be taken at the same time. It is important to check the course descriptions found in the rear of this Handbook for details.

2. Courses listed for Stage 1 are recommended courses. It is important to note that many of these courses may be required as prerequisites for courses required for later stages.

3. Mathematics Courses:

(a) Many courses in Mathematics are offered at two levels. The higher level courses cater for students with greater mathematical ability and/or a higher level of prior knowledge. Courses listed in Table A are all at the ordinary level. Students with suitable qualifications are encouraged to enrol in the corresponding higher level courses which are listed in the rear of this Handbook (see MATH11#### courses). In cases where there is a higher course, students should note that the proportion of Distinction and High Distinction grades is lower in the corresponding ordinary level course.

(b) MATH2060 may be omitted from the Mathematics major if the professional education requirement is being met in the other discipline of a double major or double degree.

(c) Students majoring in Mathematics are strongly recommended to take MATH2301 or an equivalent course in practical numerical computing.

4. Chemistry at Level I is offered at two levels. The higher level courses cater for students with greater chemical ability and/or a higher level of prior knowledge. Students with the required background are strongly encouraged to enrol in the higher level courses (CHEM1301 Higher Chemistry 1C and CHEM1041 Higher Chemistry 1D).

5. Students are advised that Mathematics or Physics courses totalling 6 units of credit are recommended for all programs.

6. BIOC2191 and BIOC2291 may be substituted for BIOC2101 and BIOC2201 respectively (but only with the permission of the Head of School). A minimum grade of Credit (65%) in BIOC2191 and BIOC2291 will normally be required for entry into Level III Biochemistry courses.

7. Students wishing to do Honours will need to consult with the appropriate school at the end of Stage 2 of their program.

| Chemistry                          | Dr G Moran                        | CHEM1011 or CHEM1031  
CHEM1021 or CHEM1041  
12 UOC from Level I  
Mathematics,  
6 UOC from Level I Physics | 18 UOC from: CHEM2011, CHEM2021, CHEM2031 or CHEM2839, CHEM2041  
Plus a further 6 UOC from Level II/III Chemistry (taken in either Stage 2 or Stage 3) | 18 UOC from Level III Chemistry of which 12 UOC must be from: CHEM3011, CHEM3021, CHEM3031, CHEM3041 |
| Ecology                            | BEES Student Office               | BIOS1101, BIOS1201, GEOS1701, MATH1041  
Also recommended: BIOS1301 | BEES2041, BIOS2011  
Plus 6 UOC from: BIOS2031, BIOS2051, BIOS2061, GEOS2071, GEOS2711, GEOS2821 | 24 UOC from: BIOS3011, BIOS3061, BIOS3071, BIOS3081, BIOS3111, BIOS3601, BIOS3161, GEOS3761, GEOH3911 |
| Environmental Earth Science       | BEES Student Office               | GEOS1701, BIOS1101, GEOS1111, GEOS1211  
Also recommended: BIOS1301 | BEES2041, GEOS2721  
Plus 6 units to credit from Level II GEOS courses | GEOH3911, GEOS3281  
Plus 12 UOC from Level III GEOS courses |
| Food Science and Nutrition         | Prof G Fleet                      | BIOS1201, CHEM1011, CHEM1021, FOOD1120, FOOD1130, MATH1041  
Also recommended: MATH1031, PHYS1111 | BIOC2181, FOOD3230, FOOD3220  
Also recommended: BIOC2291, CHEM2921, FOOD1230, MICR2201, PHPH2101, PHPH2201 | FOOD1370, FOOD3440  
Plus 12 UOC from: FOOD1390, FOOD2330, FOOD2340, FOOD2350  
Also recommended: CHEM3811 |
| Genetics                           | BABS Student Office               | BIOS1101, BIOS1201, CHEM1011 or CHEM1031  
CHEM1021 or CHEM1041  
MATH1031, MATH1041 | BIOS2021 or BIOS2621  
Plus 12 UOC from: BIOC2101, BIOC2201, BEES2041*, MICR2011  
(*BEES2041 or an approved COMP or MATH course). | A total of 24 UOC: BIOC3151, BIOC3291  
Plus 6 or 12 UOC from: BIOC3121, MICR3021  
Plus 0 or 6 UOC from: BIO3071, BIOT3061 |
| Geography (Human)                  | BEES Student Office               | GEOH1601, GEOS1701, SLSPI001 or MATH1041 | SLSP2001, GEOH2001  
Plus 12 UOC from Level II GEOH courses | GEOH3101 or GEOH3111  
Plus 18 UOC from Level III GEOH courses |
| Geography (Physical)               | BEES Student Office               | GEOH1601, GEOS1701, MATH1041  
Also recommended: BIOS1301 | 24 Level II UOC: BEES2041  
Plus GEOS2711 &/or GEOS2721  
Plus further UOC from Level II GEOS | Choose 24 UOC from: GEOS3731, GEOS3761, GEOS3811, GEOS3821, GEOS4721, GEOH3911, GEOH3921 |
| Geology                            | BEES Student Office               | GEOS1111, GEOS1211 | BEES2041, GEOS2171, GEOS2181  
Plus 6 UOC from: GEOS2071, GEOS2291, GEOS2721 | GEOS3131, GEOS3141  
Plus 12 UOC from Level III GEOS courses |
| History and Philosophy of Science  | Dr A Corones                      | Up to 12 UOC from: HPSC1100, HPSC1200, HPSC1400, HPSC1500 | 24 UOC from Level II History and Philosophy of Science, including at least 12 UOC from: HPSC2100, HPSC2150, HPSC2200, HPSC2300, HPSC2400, HPSC2500, HPSC2550 | 18 UOC from Level III History and Philosophy of Science |
| Marine Science (Marine Biology)    | BEES Student Office               | BIOS1101, BIOS1201  
Also recommended: MATH1041 | MSCI2001, MSCI6200, BIOS2031, MICR2201 | MSCI3001, BIOS3081, BIOS3091, MICR3071 |
| Marine Science (Marine Geology)    | BEES Student Office               | GEOS1111, GEOS1211 | MSCI2001, MSCI6200, GEOS2181, GEOS2721 | MSCI3001, GEOS3731  
Plus 6 UOC from: GEOS3141, GEOS3281  
Plus 6 UOC from Level III GEOS courses. |
