Since the dawn of civilization man has sought to endow his environment with physical and spiritual qualities appropriate to his way of life, to explore the limits of his materials and techniques, and in so doing, to create buildings of enduring beauty. In each great culture of the past this search produced a characteristic architecture which was a true reflection of the aspirations and capabilities of its age.

Today's architects and builders face the same age-old problem, but their task is made infinitely more difficult by the complexity of modern requirements and the diversity of new materials and techniques available to them. For the first time in history material progress threatens to outstrip man's visionary powers and to overwhelm his capacity for assimilation.

Within the next twenty years the world must face a gigantic population explosion. Our building industry must undergo a revolution if it is to meet even the most elementary needs of the community, and our search for appropriate building forms must be related to the practical necessities of mass production on a hitherto unprecedented scale. The pressure will be felt in every field of human endeavour, but to the architects and builders of tomorrow it will represent the greatest challenge and the greatest opportunity of all time.

General Information

REQUIREMENTS FOR ADMISSION

For admission to the degree courses in architecture and building, candidates must satisfy one of the following requirements:

(a) Pass the New South Wales Leaving Certificate or University of Sydney Matriculation Examination in at least five approved subjects at the one examination.

(b) Hold a Diploma from the New South Wales Department of Technical Education, or any other technical college which may from time to time be recognised by the University, subject to the Professorial Board being satisfied that the applicant’s qualifications are sufficient for matriculation.

(c) Be a graduate of any approved university or a matriculant of any university whose requirements for entry are, in the opinion of the Professorial Board, comparable with those of the University of New South Wales.

(d) Produce evidence of at least one year’s training at the Royal Military College of Australia or the Royal Australian Air Force College, or evidence of having satisfactorily completed the passing out examination of the Royal Australian Naval College.

The Professorial Board may in special cases declare any person qualified to enter a Faculty as a “provisionally matriculated student” although he has not complied with the requirements outlined above.

Intending applicants are advised to consult the University calendar for details of approved matriculation subjects and conditions governing each of the above categories, or to contact the Admissions Office in the Main Building at Kensington between 9 a.m. and 5 p.m. Telephone 663-0351.

ENROLMENT PROCEDURE

First Enrolments. Application for enrolment in First Year must, wherever possible, be made in person to the Student Enrolment Bureau, Kensington, as soon as the results of the Leaving Certificate Examination are published, but in any event not later than 22nd January.
Country Residents. Country residents who wish to enrol with the University should write to the Registrar, Post Office Box 1, Kensington, for an application form. This form must be returned not later than 22nd January.

Applicants for enrolment with advanced standing, or applicants relying upon overseas examinations for matriculation should lodge an application with the Admissions Office prior to 1st November of the year preceding that in which admission is sought.

First Year Repeats. First Year students who fail all subjects at the annual examinations and who are not granted any deferred examinations must apply for re-enrolment to the Student Enrolment Bureau at the time set out above for first enrolments. Other First Year repeat students must follow the procedure set out below for Later Year Enrolments.

Later Year Enrolments. All students enrolling other than for the first time should enrol through the School of Architecture and Building during the week before the commencement of First Term. Specific dates and times are set aside for various groups, and students are advised to adhere to the enrolment programme.

Conversion Course Enrolments. Enrolment in conversion courses must commence with an application to the Registrar for admission. The applicant will be notified of the subsequent procedure.

Post-Graduate Enrolments. Students enrolling in post-graduate courses which include formal instruction are required to attend the appropriate enrolment centre as prescribed annually in the leaflet “Enrolment Procedure for Students Re-enrolling”.

FEES*

Fees for Undergraduate Courses

Fees for undergraduate courses in Architecture and Building are assessed on a term basis.

A full-time course fee will be charged for any term where more than 15 hours' per week instruction, etc., is involved.

(i) Full-time Course Fee (more than 15 hours' attendance per week) £48 per term
(ii) Part-time Course Fee (over 4 hours' and up to 15 hours' attendance per week) £24 per term
(iii) Part-time Course Fee (4 hours' or less attendance per week) £12 per term

*The fees quoted may be amended by Council without notice. Intending applicants should therefore refer to the current University Calendar before submitting their application for registration.
Fees for Higher Degrees

An approved applicant shall be required to pay the following fees:

(1) A registration fee of £2.

(2) A combined laboratory and supervision fee of—
   (a) £30 p.a. for students in full-time attendance.
   (b) £15 p.a. for students in part-time attendance.
   (c) £10 p.a. for students working externally to the University.

(3) A fee of £15 when submitting the thesis for examination.

Fees for Graduate Diplomas

(i) Registration Fee, £2.

(ii) Award of Diploma Fee, £3.

(iii) Course Fee — calculated on the basis of a term’s attendance at the rate of £2/10/- per hour per week. Thus the fee for a programme requiring an attendance of 24 hours per week for the term is $24 \times £2/10/- = £60$ per term.

Other Fees

Students in any of the above categories are also required to pay the following fees:

Library Fee — Annual Fee, £5.

University of New South Wales Students' Union — Annual Subscription, £2.

University of New South Wales Sports Association — Annual Subscription, £1.

University Union — Annual Subscription, £6.

Payment of Fees

All undergraduate and graduate diploma students are required to attend the School enrolment centre during the prescribed enrolment period for authorisation of course programme. Failure to do so will incur a late fee of £1.

Fees should be paid during the prescribed enrolment period but will be accepted without incurring a late fee during the first two weeks of First
Term. No student is regarded as having completed an enrolment until fees have been paid. Fees will not be accepted (i.e., enrolment cannot be completed) after 31st March except with the express approval of the Registrar.

Students who are unable to pay their fees by the year may pay by the term, in which case fees must be paid within the first two weeks of each term.

Assisted Students.

Scholarship holders or sponsored students who have not received an enrolment voucher or appropriate letter of authority from their sponsor by the enrolment period should complete their enrolment by paying their own fees. A refund will be made when the appropriate voucher or letter of authority is subsequently lodged with the Cashier.

Late Fees

Failure to attend enrolment centre for authorisation of course programme (see above) £1

First Term —
Fees paid from commencement of 3rd week to 31st March £3
Fees paid after 31st March (where approved by the Registrar) £5

Second and Third Terms —
Fees paid in 3rd and 4th weeks of term £3
Fees paid thereafter £5
Late Lodgement of Application for Admission to Examinations (late applications will be accepted for three weeks only after the prescribed dates) £2

Withdrawal from Course

Students withdrawing from a course are required to notify the Registrar in writing. Fees for the course accrue until a written notification is received.

ACADEMIC YEAR

The academic year is divided into three terms of 11, 10 and 9 weeks respectively. The first term commences on the first Monday of March. There is a two-week vacation between First and Second Terms and a three-week vacation between Second and Third Terms. Examinations for students in thirty-week courses are held one week after the cessation of lectures.

ATTENDANCE AT CLASSES

Students are expected to be regular and punctual in attendance at all classes in which they are enrolled. All applications for exemption from attendance must be made in writing to the Registrar.
Where a student has attended less than eighty per cent of the possible classes, he may be refused permission to sit for the examination in that subject.

Application forms for exemption from lectures are available at the Admissions Office and should be lodged there (with a medical certificate where applicable). If term examinations have been missed this fact should be noted in the application.

ANNUAL EXAMINATIONS

The annual examinations take place in November-December for students in 30-week courses, and in September for students in 24-week courses. Students must make application to sit for examinations by a specified date, the procedure being described in the University Calendar. Enquiries should be directed to the Examinations Branch. Examination results are published in the daily press. No results will be given prior to publication and all subsequent enquiries relating to results must be directed to the Registrar.

APPLICATION FOR ADMISSION TO DEGREE OR DIPLOMA

Application for admission to a degree or diploma must be made on the appropriate form by 28th February and 31st March respectively. Applicants should ensure that they have completed all requirements for the degree or diploma, including industrial training where necessary.

ACADEMIC DRESS

Academic dress worn by graduates in Architecture and Building of the University of New South Wales is described below:

Gowns

Degree of Bachelor — The gown worn by graduates holding the degree of Bachelor of Arts in the University of Oxford or the University of Cambridge.

Degree of Master — The gown worn by graduates holding the degree of Master of Arts in the University of Oxford or the University of Cambridge.

Degree of Doctor of Philosophy — Festal gown of black cloth faced with scarlet cloth to a width of 6 inches.

Cap

Degrees of Bachelor, Master, and Doctor of Philosophy:
Black cloth trencher cap.

Hoods

Bachelor of Architecture — Hood of black silk lined with white silk and edged with brick-red-coloured silk.

Bachelor of Building — Hood of black silk lined with grey silk and edged with brick-red-coloured silk.

Master of Architecture — Hood of black silk lined with brick-red-coloured silk and edged to a depth of two inches with white silk.

Master of Building — Hood of black silk lined with brick-red-coloured silk and edged to a depth of two inches with grey silk.

Doctor of Philosophy — Hood of scarlet cloth lined with black silk.
Undergraduate Courses

Undergraduate courses in both Architecture and Building are designed to provide a thorough training in the basic sciences upon which modern building technology depends. These studies lead to scientific and practical analysis of materials and methods used in building design and construction. Special studies are made of acoustics and lighting, and advanced training is provided in structures and in the services and equipment which are vital to the operation of the present-day building.

In the architecture course students are encouraged to develop their creative abilities. Initial appreciation of visual design and colour is followed by advanced work in architectural design, civic architecture and town planning. Studies in the building course place emphasis on subjects dealing with law, management, accounting and finance, but in both cases the content of courses has been designed to maintain a balance between creative and artistic talents on the one hand and practical ability and sound commonsense on the other. In short, both courses are aimed at the production of graduates whose overall knowledge is balanced in such a way that they may accept positions of responsibility immediately their training is complete, or pursue a specialised field of architectural education with a realistic appreciation of its implications in the range of total architecture.

Throughout their training students of both courses share many common subjects and work in close association with one another upon their various assignments. It has been found that this close association of architect and builder during their formative years leads to an understanding of each other's problems which is invaluable in the subsequent practice of their individual but closely related disciplines.

Professional Recognition. The degree of Bachelor of Architecture of the University of New South Wales is fully recognised by the Royal Australian Institute of Architects, the Royal Institute of British Architects, and by the New South Wales Board of Architects for legal registration as an architect in New South Wales. The degree of Bachelor of Building qualifies for membership of the Australian Institute of Builders.

Students are encouraged to join these institutions as student members and thus take part in corporate activities such as meetings, annual conventions and conferences.

In addition to recognition by professional bodies, these degrees are recognised for partial exemptions in many post-graduate courses throughout Australia and Great Britain, and a significant proportion of graduates leave Australia upon completion of their training to pursue specialised courses overseas.

DEGREE COURSE IN ARCHITECTURE — B. ARCH.

The course for a pass degree in architecture may be programmed for a 5, 6 or 7-year timetable, dependent upon the amount of full-time training undertaken by the candidate. Subjects have been grouped to form eight study units, several of which may be taken in pairs by full-time attendance,
or singly by part-time attendance. Units must be undertaken in numerical sequence or, in the case of full-time training, in the following combinations:

<table>
<thead>
<tr>
<th>Study Units</th>
<th>Attendance Pattern</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit No. 1</td>
<td>1 year full-time*</td>
</tr>
<tr>
<td>Unit No. 2</td>
<td>1 year full-time OR 2 years part-time</td>
</tr>
<tr>
<td>Unit No. 3</td>
<td>1 year full-time OR 2 years part-time</td>
</tr>
<tr>
<td>Unit No. 4</td>
<td>1 year part-time</td>
</tr>
<tr>
<td>Unit No. 5</td>
<td>1 year part-time</td>

</tr>
<tr>
<td>Unit No. 7</td>
<td>1 year part-time</td>
</tr>
<tr>
<td>Unit No. 8</td>
<td>1 year part-time</td>
</tr>
</tbody>
</table>

Students may transfer from full-time to part-time training or vice versa upon completion of study units 1 AND 2 or 3 AND 4.

The minimum period for graduation (except for students entering the course with advanced standing) will be five years.

</table>
Final year students will take the four-day en-loge formal final examination in Architectural Design V.

**Special Final Year for Honours.** Students wishing to qualify for honours may, upon successful completion of study unit No. 7, apply to Faculty to enter a special full-time final year. Applicants will be expected to have completed all preceding study units in their course, and to have obtained at least seven credit grades in the annual results of preceding subjects.

Students who are admitted to the special final year for honours but fail to reach honours standard may be awarded a pass degree by Faculty provided that the work submitted meets the requirements for a pass degree.
DEGREE COURSE IN BUILDING — B. BUILD.

The undergraduate course in Building extends over four years, the first three of which require full-time attendance, and the fourth and final year part-time attendance supplementing a period of "on-site" training.

The course is divided into three sections:

(a) Basic academic studies which provide a background of mathematics, physics, history, philosophy, a social science, and English.

(b) Technical subjects which ensure a thorough training in the practical matters of building construction and building trade practices, assembly techniques, materials and equipment.

(c) Administrative subjects related to building enterprises and management including finance, company law, Building Acts and Codes, job organisation, site methods, quantity surveying, estimating, accounting, etc.

The first year of the Building degree course is common with that of the Architecture degree course, and several of the subjects in subsequent years are attended by students from both courses.

CONVERSION COURSE IN ARCHITECTURE

Holders of the A.S.T.C. Diploma of the Department of Technical Education in Architecture may proceed to an appropriate degree by means of a conversion course. The syllabuses of these courses are arranged so that diplomates are given credit for their diploma studies and may satisfy the degree requirements with the minimum of repetition and overlap.

Each application will be considered on its merits, but the minimum requirement to satisfy for a degree in architecture after completing a diploma course are:

- **Conversion Humanities**
  - Hours per week: 4

- 11.176 Architectural Science and Research Thesis*
  - Hours per week: 24 (Term 1)

3. Any two of the following:

- 1.001 Physics
- 7.511/1 Geology
- 8.211 Building Science IIB (Materials for Architects)
- 10.051 Mathematics

  (Terms 2 & 3)

- 11.231 Building Science I
  - Hours per week: 2

  (a) at the completion of his Conversion course he will have had two years' standing as a diplomate;

  (b) he gained a credit or distinction for the research or design thesis in the diploma course;

  (c) he provides evidence to the Faculty that in his professional career he has pursued some aspect of study in Architectural Science and Research which, together with the diploma thesis, is regarded as equivalent to the subject of 11.176 Architectural Science and Research Thesis.

*In special circumstances a student may apply to complete this subject by part-time study over three terms. The holder of a diploma with credit or honours may apply to be exempted from this subject, provided that —
EXTENSION COURSES

The School of Architecture and Building from time to time conducts extension courses in specialist fields of study related to architecture and building. These courses are normally open to qualified members of the various land-use professions, upon payment of a fee appropriate to the length of the particular course. During 1964 the School will offer extension courses in Civic Design and in Administration for Builders.

DIPLOMA COURSES

In 1951 the University undertook to provide instruction on behalf of the Department of Technical Education and a large number of Diploma courses were conducted. Under an agreement reached with the Department in 1959 most of these courses have been withdrawn, but the School of Architecture and Building still conducts diploma courses in Building and Quantity Surveying. Details of these two courses may be obtained upon application to the Head of the School.
Post-Graduate Study

Higher Degrees

Following the award of a first degree in Architecture or Building of the University of New South Wales or other approved university, graduates may apply to register for the degrees of Master of Architecture or Master of Building. In exceptional cases persons may be permitted to register as candidates for the degree of Master if they submit evidence of such general and professional attainments as may be approved by the Professorial Board.

Summary of the Conditions for the Award of a Master's Degree

(1) Every candidate for the degree shall be required to carry out a programme of advanced study, to take such examinations, and to perform such other work as may be prescribed by the Professorial Board. The programme shall include the preparation and submission of a thesis embodying the results of an original investigation or design relative to architecture or building. The candidate may also submit any work published, whether or not such work is related to the thesis.

(2) No candidate shall be considered for the award of the degree until the lapse of six complete terms from the date from which the registration becomes effective, save that in the case of a full-time candidate who has obtained the degree of Bachelor with Honours or who has had previous research experience, this period may, with the approval of the Professorial Board, be reduced by not more than three terms.

(3) For each candidate there shall be two examiners appointed by the Professorial Board, one of whom shall, if possible, be an external examiner.

(4) Every candidate shall submit three copies of the thesis as specified in the University calendar, and it shall be understood that the University retains the three copies of the thesis and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1912-1950, the University may issue the thesis in whole or in part in photostat or micro-film or other copying medium.

Post-Graduate Courses

In the past, the School has concentrated upon its undergraduate courses and upon the broad training necessary for professional recognition. In 1963, it was decided to develop post-graduate courses in a number of fields related to the work of architects. The first of these, a two year part-time course in Landscape Design, leading to the award of a post-graduate Diploma, will be offered in 1965, and it is anticipated that it will be followed by a course in Civic Design. Enquiries regarding post-graduate training should be directed to the Head of the School.
Student Facilities

THE ARCHITECTURE CLUB

Students of the School of Architecture and Building are encouraged to participate in extra-curricular activities through the Architecture Club, of which they automatically become members immediately upon registration. The Club, commonly known as T.A.C., is affiliated with the Australian Architectural Students' Association, with the International Union of Architectural Students, and is currently leading a movement to form a graduate club of architects, artists and sculptors with headquarters in the city.

In addition to sending representatives interstate and overseas, T.A.C. arranges outings, social functions and lectures, and produces both a broadsheet each week and a magazine, “Atelier”, each term. It commands the enthusiastic support of all students, and provides a common interest which is invaluable in creating a school spirit.

THE UNIVERSITY OF NEW SOUTH WALES' STUDENTS' UNION

The Students' Union is the parent student organisation within the University and membership is compulsory for all registered students. It provides a wide range of cultural societies, of social facilities as well as producing a bi-weekly journal. The annual subscription is £2.

SPORTS ASSOCIATION

In December, 1952, the University Council approved the establishment of the Sports Association as the organisation to control and sponsor sporting activities within the University.

Some 20 clubs provide a wide variety of sporting activities. Membership is compulsory for all registered students, the annual subscription being £1.

UNIVERSITY REGIMENT

The University Regiment is organised basically as an infantry battalion. Enrolment is voluntary and recruits sign on for a period of two years, during which 14-day camps are held in January-February. Enquiries should be directed to the Adjutant or Regimental Sergeant-Major, Regimental Headquarters, Day Avenue, Kensington.

SYDNEY UNIVERSITY SQUADRON

The Sydney University Squadron, a Citizen Air Force Unit of the R.A.A.F. is established for voluntary enlistment of one hundred undergraduates of the University of New South Wales and the University of Sydney. Annual training is organised to fit in with faculty activities and consists of lectures on Air Force organisation, law and administration, and appropriate technical and
specialist subjects applicable to the medical, technical, radio, works and administrative flights. Enquiries should be addressed to the Commanding Officer, Sydney University Squadron Headquarters, 8th Floor Dymock’s Building, 428 George Street, Sydney. Tel. 254381, Ext. 18.

RESIDENTIAL COLLEGES

Basser College. Basser College, the first residential college of the university, is situated in High Street, Kensington, and provides accommodation for 210 male students. Residence fees (1964) which include cost of tutorial assistance and full board are:— Registration, £10; House Committee, £5; Room Deposit (refundable), £5; Accommodation, including laundry (yearly rate), £8/15/- per week — three-monthly rate, £10/10/- per week.

Post-Graduate Hall. A limited number of post-graduate students can be accommodated in an annex to Basser College. Fees for post-graduate accommodation are available on application.

Enquiries regarding residential accommodation should be directed to the Master, Basser College, Box 24 P.O., Kensington. Telephone 663 4850 and 663 4836.

LIBRARY

The University Library provides a reference and lending service for staff and students, and is open in term during day and evening sessions. Library services are also available to students at Broadway, Broken Hill, Newcastle and Wollongong.

STUDENT COUNSELLING AND RESEARCH UNIT

The Student Counselling and Research Unit is located at Kensington and is normally open from 9 a.m. to 9 p.m. daily. Students wishing to avail themselves of this advisory service should arrange an appointment by phonning 663 0351 ext. 2600 - 2605.

STUDENT EMPLOYMENT SERVICE

The Student Employment Service offers assistance in finding suitable full-time, casual or vacation employment during university training. It will also advise on Cadetships and permanent career employment. The service is located in the Main Building, Kensington, and is open 9 a.m. - 5 p.m. daily. Telephone 663-0351.

STUDENT HEALTH SERVICE

A free health service under the direction of a qualified medical practitioner is available to all students during office hours. The service is primarily diagnostic and not intended to replace the students’ private doctor or the community health services available. Appointments may be arranged by personal contact or by telephoning 663 0351 ext. 2679.
Scholarships, Bursaries and Cadetships

UNIVERSITY SCHOLARSHIPS

The University offers the following scholarships:

(1) For students who have completed Trade Courses (Department of Technical Education).

Ten scholarships tenable in degree or diploma courses may be awarded annually to students who have completed a trade course and have qualified for admission to a degree or diploma course within three years of the completion of the trade course. The scholarships shall be awarded on the results of the examination qualifying for entrance.

(2) For part-time students who have taken the Qualifying and Matriculation course of the Department of Technical Education.

Ten Scholarships tenable in degree or diploma courses may be awarded annually to part-time students who have taken the Qualifying and Matriculation course of the Department of Technical Education, the awards to be made on the results of the Leaving Certificate Examination.

(3) For candidates at the Leaving Certificate Examination.

Fifteen scholarships tenable in degree or diploma courses may be awarded annually on the results of the Leaving Certificate Examination.

The scholarships shall be awarded under the following conditions:

(a) A scholarship holder shall be eligible for enrolment in the course selected and will be exempt from payment of University course fees during the currency of the scholarship.

(b) A student may hold only one scholarship at a time.

(c) The University shall have the power to withhold the award of any scholarship if the applicants are of insufficient merit.

(d) Any scholarship may be withdrawn if the progress or conduct of the holder is unsatisfactory.

(e) The holder of a scholarship in any course of part-time instruction must be actively engaged in the relevant trade or profession for which the course has been established.
(f) A scholarship that has been forfeited or withdrawn may be offered to another candidate.

(g) Only results obtained in the year in which the scholarship competitions are conducted may be considered.

(h) Scholarships available on the Leaving Certificate Examination will be awarded in order of merit as shown by the highest aggregate marks in six papers, including those specified for the particular scholarships.

(i) Scholarships available to students who have taken the Qualifying and Matriculation course of the Department of Technical Education will be open only to candidates at the Leaving Certificate Examination who have been bona fide part-time students during the year in which they have taken the examination and shall be awarded in order of merit as shown by the highest aggregate marks in five papers.

Applications for these scholarships, on forms obtainable from the Registrar, must be lodged with the Registrar after publication of examination results and the announcement of the award of Commonwealth Scholarships but not later than 31st January each year.

COMMONWEALTH SCHOLARSHIPS

Commonwealth Scholarships are available for first degree or diploma courses which are approved under the Commonwealth Scholarship Scheme. Benefits are available for both pass and honours courses.

Eligibility

Candidates must meet certain requirements in respect of age, residence and academic qualifications as set out below.

Candidates who hold other awards which involve a bond or who already hold a tertiary qualification in one of the courses approved under the Commonwealth Scholarship Scheme are ineligible.

Types of Scholarships

There are three types of scholarships:

(a) Open Entrance Scholarships: These are awarded on the results of the Leaving Certificate Examination to students who are under 25 years of age on 1st January of the year in which the course is commenced and are available for full-time or part-time courses. In general the applicant and both parents must be permanent residents of Australia or its external or trust territories. Scholars who have migrated alone, or with one parent only may be considered as special cases.
(b) Scholarships for the second or later years of a course: Full-time students who have completed at least the first year of their course without failure are eligible to apply.

Part-time students must have completed, without failure, at least the first two years of their part-time course equivalent to one year of full-time study. Applicants who intend to proceed full-time are given preference over those who intend to proceed part-time.

Scholars who have had failures in the first year of a full-time course, or in the first two years of a part-time course, are not eligible for a Second or Third Year scholarship but they may apply for a Fourth Year Scholarship if they have retrieved their failure and maintained satisfactory progress in the second and third years of the course.

Age and residential qualifications are the same as for Open Entrance.

(c) Mature Age Scholarships: Applicants for these scholarships who desire to commence a course must be over the age of 25 years and under the age of 30 years on 1st January of the year for which the scholarship is desired. Applicants who have completed part of the desired course must have been under 30 years of age on 1st January of the year in which they commenced their course, and must be over the age of 25 years on or before 1st January of the year to which their scholarship will be applied.

Candidates must have lived in Australia for at least two years immediately preceding the award of the scholarship, and must intend to remain in this country permanently. Mature age scholars must study on a full-time basis.

Benefits

Scholars receive the following benefits:

(a) tuition fees;
(b) examination fees;
(c) matriculation fees;
(d) degree fees;
(e) other compulsory fees such as Library fee, Union fees, Sports Union fees and non-refundable laboratory fees.

Note: The cost of instruments, books, excursions or accommodation is not covered.

Living Allowance

Full-time students may apply for a Living Allowance, which is subject to a means test. The maximum allowances are £247 p.a. for students living at home and £383/10/- p.a. for students living away from home.

BURSARIES AWARDED BY THE BURSARY ENDOWMENT BOARD

A number of Bursaries tenable at the University are awarded to candidates of merit at the Leaving Certificate Examination whose family income falls within certain limits prescribed by the Bursary Endowment Board.

Applications should be made to the Secretary, Bursary Endowment Board, C/- Department of Education, Bridge Street, Sydney.

COMMONWEALTH SERVICE CADETS

The Commonwealth Public Service each year offers cadetships tenable in certain undergraduate courses at the University in order to enable selected employees in its service to obtain professional qualifications. British subjects with Australian citizenship, under the age of 28 years, are eligible to apply.

During the training period the cadet receives the following salary:

<table>
<thead>
<tr>
<th></th>
<th>Male</th>
<th>Female</th>
</tr>
</thead>
<tbody>
<tr>
<td>Under 18 years</td>
<td>£565 p.a.</td>
<td>£536 p.a.</td>
</tr>
<tr>
<td>At 18 years</td>
<td>£670 p.a.</td>
<td>£597 p.a.</td>
</tr>
<tr>

<td>£858 p.a.</td>
</tr>
<tr>
<td>Rising by one increment</td>
<td>£1,101 p.a.</td>
<td>£913 p.a.</td>
</tr>
</tbody>
</table>

Fees are refunded to the cadet on a proportionate basis according to his salary: a full refund is given up to and including £860 (male), £709 (female) salary rate, a 75 per cent refund at the £941 rate (male), £753 rate (female), a 50 per cent refund at the £991 rate (male), £803 rate (female), and a 25 per cent refund at the £1,046 rate (male) £858 rate (female). No refund thereafter.

Applicants must have passed the Leaving Certificate or equivalent examination with passes in English, Mathematics and Physics, and they will be required to enter into a bond undertaking to remain in the Commonwealth Public Service for a period of up to five years after graduation. Either full-time or part-time courses may be undertaken if available.

Cadetships are available from time to time in the fields of engineering, biochemistry, science and architecture.

Details of vacancies at any one time may be obtained from the University’s Student Employment Officer or the Employment Officer, Commonwealth Public Service Inspector’s Office, 119 Phillip Street, Sydney. Telephone 28 5701.
POST-GRADUATE AWARDS

Byera Hadley Travelling Scholarship

The Byera Hadley Travelling Scholarship is open to graduates in architecture of the University of New South Wales and Associates of the Sydney Technical College. Candidates must be British subjects.

The scholarship is to assist the holder to proceed overseas and remain abroad for not less than one year and not more than three years. Value £600.

Byera Hadley Travel Grant

The Byera Hadley Travel Grant is open to graduates in architecture of the University of Sydney or the University of New South Wales and Associates of The Sydney Technical College. All candidates must be British subjects. The grant is to assist the holder to travel and undertake a course of study. Value £300.

Board of Architects of New South Wales Travelling Scholarships

The Board of Architects of New South Wales offers two scholarships annually to holders of an architecture degree from the University of Sydney or the University of New South Wales, or the diploma in Architecture of the Sydney Technical College, or to architects registered in the State of New South Wales. All candidates must be British subjects.

The scholarships are to assist the holders to proceed overseas and remain abroad for not less than twelve months and not more than three years. Value of each scholarship, £300.

Closing dates for applications and further details are available upon request from the Head of the School.

Sir Manuel Hornibrook Travel Grant

The Sir Manuel Hornibrook Travel Grant is open to Licentiate or Student members of the Australian Institute of Builders, from whom the Council of the Institute may invite applications in each alternate year.

The object of the Travel Grant is to advance the study and practice of building by competition for the award, and by subsequent travel overseas or interstate. The Travel Grant shall be of such value as the Council may from time to time determine.

Further details may be obtained from:

The Secretary,
Australian Institute of Builders, N.S.W. Chapter,
118 Alfred Street,
Milson's Point, N.S.W.
Architecture and Building Undergraduate Subjects

The following brief synopses are intended to outline the scope of individual subjects within the architecture and building undergraduate courses. A list of recommended text and reference books succeeds each subject.

11.011/1 History of Fine Arts A

(A course for students in the Faculty of Architecture)

The lectures in this course are devoted to the history of painting, sculpture and allied arts and will be illustrated by slides of characteristic examples of the major art epochs discussed. The intention is to enable the student to appreciate a work of art in terms of its historical period and the characteristic qualities produced by determining factors of the age. Also it is intended to help him to analyse and appreciate the formal values and intrinsic style of such a work and to enjoy it.

Text Book

Lake & Maillard — *Dictionary of Modern Painting* (Text by various authorities.)

Hitchcock, Henry Russell — *Architecture, 19th and 20th Centuries.*

29
DESIGN

This range of subjects is the core of the syllabus and embodies and applies all the subject matter of the other lectures and studies in the Architecture course. Design includes planning, construction, specialised building techniques, engineering services and equipment, specification, estimating and building job supervision and control.

The whole design course consists of a series of lectures and practical problems in the studio and at home in part-time periods, generally accenting fundamental aesthetic and technical points but with problems interspersed expressly to stimulate imaginative thinking. Throughout the design course, frequent quick esquisse problems are given ranging from the practical to the abstract.

In all problems structure and construction are considered an essential part of design. In many cases special or unusual points in design are required to be substantiated by drawn details of construction. The extent to which competence in structures, construction and other specialist subjects is expected in design at any stage is dependent on the depth reached in these subjects at that stage. Specific problems are set throughout the course to ensure thorough integration in design at the appropriate level of the important related subjects. As often as possible the problems are set on actual sites and involve consideration of environment.

All work is marked by a jury, with class criticism and discussion.

11.111 Design I

A course of illustrated lectures through the year to introduce the student to the field of design, and its importance in man's environment, especially in all his building.

In early lectures, the design elements are discussed and the principles of composition studied mainly as applied to two-dimensional composition. The later and greater part of the first year lecture course is given over to appreciation of visual things from the broad down to detail. The purpose here is twofold: firstly, to observe the application of the above principles, and secondly to provide, as far as possible, a background of visual experience to aid in the students' development in design in general, and in architectural design in particular. From the start emphasis is placed upon the greater importance of the whole over the part, and the contribution made by the parts to the whole.

The visual subjects covered range from natural landscape, through large engineering works, cities, towns and buildings in the landscape; the city; the town; buildings, etc., down to common equipment and hardware.

The practical application of the principles in two-dimensional composition is handled in Architectural Drawing I.
11.112 Design II

Lectures on principles of architectural composition. An introduction to various theories of art and hence to the development of one theory with the purpose of raising the problems involved in all theories. This is followed by a study of various types of architectural designing in the light of the points raised.

Studio exercises are given in the principles of architectural design starting with three-dimensional non-functional compositions progressing to three-dimensional problems with a simple function and finally to small simple architectural design problems.

11.112/1 and 11.112/2 Design II, Parts A and B

The subject 11.112 Design II is taken by part-time students over two years.

11.113 Design III

Lectures on the broad factors influencing architectural design: people, climate, topography, materials, economics, social system, etc. Atmosphere and character. Expression of function, structure and materials. Relationship in massing and details. The importance in architecture of space as well as mass. Design and equipment of external spaces; elementary landscape study. The design of building groups; elementary town design. Architectural problems in “detailing”. Planning and approach to an architectural problem.

Throughout the year the majority of problems are set to free the imagination and to emphasise the primacy in architecture of the overall concept in the realms of purpose, structures, form and character. In these exercises no precision is expected in planning, structure or construction, though the broad planning and structural concepts are expected to be sound.

Two or three problems are given specifically to bring together architectural design and the technical and practical subjects studied separately. These problems involve design under the discipline of realism. Structure, construction, building science, etc., are justified by calculation, detailed drawings or reports, and a problem carried through to working drawings.

Real sites are generally adopted. The essential relationship between building, site and environment is emphasised from the beginning.

At least twelve short esquisse problems are given throughout the year on stimulating and varied topics.

The development of presentation techniques acquired in previous years is encouraged, especially in the conceptual and esquisse design work.

11.113/1 and 11.113/2 Design III, Parts A and B

The subject 11.113 Design III is taken by part-time students over two years.
11.114 Design IV

Studio assignments on the design of buildings progressively becoming more intricate in planning and taken to a somewhat further stage of completeness in overall design, detailed planning and a consideration of structure, construction and materials.

Imaginative approach to all problems is sought. By the end of the year structures are expected to be reasonable in concept, and construction and materials may be required to be clarified in large-scale details.

Some lectures are given on furniture and interior decoration, including the aesthetics of interior finishes, furniture, furnishings, colour and texture, and one or two of the design problems include design experience in this field.

Where possible problems are set for actual sites.

Two or three times a year a seminar, debate or lecture is held on a theoretical or philosophical topic.

11.115 Design V

In the first part of the year problems are undertaken in advanced planning, involving considerable traffic, both vehicular and pedestrian, planning for typical industrial processes, commercial buildings, housing work, etc. Associated questions of economics, structure, mechanical equipment and services are studied. Some of the later problems are given to introduce urban design and some serious study on the design of environment.

Throughout this year the aim is the correlation of all major aspects of the design of buildings, that is practical planning, structure, construction, economy and the provision of fine human environment. Research and practical problems are included, usually relating to improvement and re-development from a planning and architectural point of view, of parts of existing cities, such as Sydney and Newcastle and large country towns.

Civic surveys are made of the actual areas and all relative information is obtained by the students in groups, generally with the support of town planning officials in the city concerned, who indicate the basic economic, social and industrial conditions within which the student may have to re-plan and re-design the particular street or area.

A limited number of visits and criticisms are made by the Professor of Town and Country Planning of the University of Sydney to discuss the work of the students in the principles and problems of civic architecture.

Reference Books (Design I to Design V)

Read, H. — The Meaning of Art.
Rathbone, R. A. — Introduction to Functional Design.
HISTORY OF ARCHITECTURE

This is one of the basic subjects leading to Architectural Design. Students of architecture should obtain some knowledge of past systems of building, use of materials, and the principles of design for purpose and beauty. The subject is treated in a general manner, but certain buildings and other works of construction are examined analytically, the approach being critical rather than archaeological. Research assignments or examinations are required in each term of each year.

11.121 History of Architecture I

A general outline survey of construction and architecture from the earliest times to the present day, related to chronological periods, countries and styles — from ancient Egyptian up to modern contemporary architecture.

11.122 History of Architecture II

Beginning with the Graeco-Roman classic period the pagan precedents of Christian architecture are examined, then the following periods or styles in convenient order: Early Christian, Byzantine, Romanesque and Gothic. The major points for analysis are the abstract beauty of Greek architecture; the building methods and monumental works of the Romans and the rise and evolution of Christian ecclesiastical buildings from Early Christian to Gothic. Analytical consideration will be given to walls, columns, piers, arches, vaults, domes, buttresses, towers, spires, the mediaeval "unit-bay" system of design, decoration, monasteries, castles, manors and other dwellings.
11.123 History of Architecture III

The architecture of Europe from the Renaissance to the present day. Beginning with the revival of antique art in Italy, the course of the Renaissance is traced through Europe to England. The period of revivals, mediaevalism, and the eclectics. The impact of the Industrial Revolution and the emergence of the engineer. New materials and techniques — iron, steel, concrete, glass. The development of town planning.

11.124 History of Architecture IV

The history of architecture in Australia, particularly the evolutionary development of regional architectural expression.

The search for a new architecture in Germany, France and America in the last quarter of the 19th century and its fulfilment in the 20th century. Particular emphasis is placed on developments during the period following the Second World War to the present time.

11.131 Drawing I

The subject encompasses all types of drawing used in the practice of architecture. Practical work in various media is intended to develop perception and observation and skill in delineation. For purposes of teaching and studio arrangements the subject matter is dealt with under three main categories:

Freehand: The range of work covers elementary freehand drawing and includes quick sketching, outdoor sketching, memory drawing and free perspective drawing.

Descriptive Geometry: This subject provides an introduction to general draughtsmanship and consists of lecture-demonstrations, followed by drawing, in the following: exercises in line drawing and plane geometry; lettering; orthographic, isometric, oblique, axonometric projection; theory of perspective, exteriors, interiors, inclined planes; shadows cast by geometrical features and simple architectural subjects on vertical and horizontal planes; shadows in perspective; solid geometry; development of intersections and surfaces; roof developments and layout; graphic symbols.

Architectural: This range of work introduces the student to the conventional forms of architectural drawing: scale drawing, architectural sketching, presentation, rendering, sciagraphy, etc.

The student will have the discipline of drawing and rendering precisely architectural forms that are themselves precise, e.g., one or more of the Orders of Architecture. He will be taught the different drawing techniques of the esquisse, the more formal sketch design, correct presentation, working drawing conventions and indications, detailed drawing, and architectural perspective, techniques and effects in presentation. There will be some elementary exercises in general design.

11.131/1 and 11.131/2 Drawing I, Parts A and B

The subject 11.131 is taken by part-time students over two years. Drawing IA comprises Freehand Drawing and Descriptive Geometry; Drawing IB comprises Architectural Drawing.

11.132 Drawing II

A continuation and extension at a higher level of the methods, media and techniques begun in Drawing I in Freehand and Architectural Drawing, concentrating on architectural sketch presentation.
11.132/1 and 11.132/2 Drawing II, Parts A and B

The subject 11.132 is taken by part-time students over two years.

Drawing IIA comprises Freehand Drawing and Drawing IIB comprises Architectural Drawing.

11.141 Architectural Research

Architectural research is concerned with the study of buildings of architectural merit and of historic significance.

Working in a group the student is called upon to do field investigations and prepare measured drawings. Concurrently with historical research the students prepare submissions which are intended to be lodged with the Mitchell Library.
Each student is also required to conduct an investigation, write a report, and present an address to his fellow students and to take part in general discussion.

11.142 Research Thesis

During this period, the student is encouraged to study some specialised aspect of architectural planning and research, such as the latest developments in structural design or the engineering services of buildings, or specialised planning and equipment of buildings, such as hospitals, schools, etc. Some of this advanced study may be relative to the design projects being carried out under the heading of architectural design and construction, civic architecture or town planning, or the student may, with the approval of the Professor, pursue some avenue in scholarship, such as the literature of architecture, aesthetics or history, or the problems of architectural administration, professional practice, etc. This work will be embodied in a thesis to be submitted by the student within one of the following fields: (a) Architectural Design, (b) Building Science, (c) Administration. Each student has a supervisor to advise on reading, lines of investigation, etc.

CONSTRUCTION

Construction is the study of the material elements and procedures which are involved in the erection of buildings.

From a consideration of the systems of construction in common use in domestic buildings the student progresses to the study of framed, multi-storey and shell buildings.

Visits to factories and buildings under construction are arranged throughout the course.

11.211 Construction I

Practical: Drawn details and contract drawings of work treated in lectures. Methods of transmitting requirements by detail and specification clauses.

Text Books

C.E.B.S. Notes in the Science of Building I — Latest issue.
Local Government Ordinance No. 71 — Sydney Corporation Act By-Laws 51-58 incl.
Sharp, W. — Australian Methods of Building Construction.
Reference Books

McKay, W. B. — *Building Construction* (Vols. I - IV)

De Mare, E. — *New Ways of Building.*
Nield, D. — *Walls and Wall Facing.*
Field, J. E. and Stillman, J. — *Design and Practice of Joinery.*

11.212 Construction II

Practical: Construction details illustrating selected work in lectures. Design of construction elements with specifications. Details of selected work designed in Structures II.

11.212/1 Construction IIA; 11.212/2 Construction IIB

These courses together are similar to 11.212 Construction II but taken over two years on alternate weeks. Construction IIA is the first year section. Construction IIB is the second year section. The examination in Construction II is taken at the end of the second year.

Reference Books

Parker, G. M. — *Materials & Methods of Architectural Construction.*

11.213 Construction III

Practical: Problems involving investigation, design and detail of constructions treated in lectures. Details of selected work designed in Structures III.
11.213/1 Construction IIIA

In addition to 11.213 Construction III, additional studies are included as follows:

(a) Building Techniques and Materials — Investigations and analysis of various construction methods and materials. Survey of building projects, and selected field trips. Research, readings and reports in seminars on architectural uses of new materials and structural systems, industrial prefabrication of component parts of buildings.

(b) Specialist Services — Instruction in the specialist services of the various sub-contractors normally engaged in the execution of building construction projects.

(c) Building Analysis Project — Individual projects are directed toward a study of the functional, structural and equipment relationships for various types of building. Approved projects for analysis are selected by the student and are based on construction in progress, or proposed buildings. Special emphasis is placed on the integration of structural, mechanical and electrical systems with each other and with the architectural scheme.

Reference Books

Crane, T. — Architectural Construction.

Editors of Architectural Record — Architectural Engineering.
Oppenheimer, S. P. — Erecting Structural Steel.
Peurifoy, R. L. — Construction Planning, Equipment and Methods.
Also Reference Books for 11.212 Construction II.

11.214 Construction IV

The study of construction systems and requirements for planning, detail, fabrication and erection for special type buildings. Integration of building function, structure and construction. Analysis of size, time and cost factors to permit selection of best system for given planning requirements. Office and site job control and supervision. Cost control methods. Construction schedules.
STRUCTURES

Structures I to IV are taken by all students. Structures V is taken by those students who elect to do so.

The first four years cover the major portion of the field of structures as it affects the architect and the builder.

Supplementing the theoretical work there will be exercises in structural design and testing work in the Structures Laboratory.

11.221 Structures I

Elements of structural design, equilibrium, graphical and analytical analysis of forces in pin-jointed structures. Simple beams, moments and shear. Simple rivetted and welded joints.

Text Book
Morgan and Williams — Structural Mechanics.

Reference Books
Hirschorn, J. — Materials of Structures I.

11.222 Structures II

11.222/1 Structures IIA: 11.222/2 Structures IIB

These courses together are similar to 11.222 Structures II but taken over two years on alternate weeks. Structures IIA is the first year section. Structures IIB is the second year section. The examination in 11.222 Structures II is taken at the end of the second year.

Text Books
Cassie & Napper — Structure in Building.
Morgan & Williams — Structural Mechanics.

Lucy, Thomas A. — *Practical Design of Structural Members.*
Gaylord & Gaylord — *Design of Steel Structures.*
Norris & Wilbur — *Elementary Structural Analysis.*
Robb, Ian — *Steel Frame Design Examples.*
Steel Designers Manual.

11.224 Structures IV

Design of rigid frames and portals by moment distribution, continuity in frames.

Flat slab and flat plate design applications. Comparison of different design methods. Prestressing in structures. Structural considerations of special type buildings integrated with Construction IV. Problems in foundations and soil mechanics.

11.225 Structures V

Introduction to the plastic theory of steel structures; ultimate strength design of reinforced concrete; principles of design of shell roofs, folded plates and suspended structures.
The study of a selected structure or a constructional system by the student, incorporating the preparation of a study report and construction of a scale model to demonstrate structural design principles.

The selection of a further study by the student as a topic by him for lecturette and class discussion.

**BUILDING SCIENCE**

This subject deals with the application of the methods and findings of science as applied to the problems of the building industry in two principal fields:

1. **Materials.** The properties, uses, testing and selection of materials.
2. **Services.** The analysis of human requirements and methods for their satisfaction in such fields as heating, ventilation, lighting and acoustics.

At the commencement, emphasis is placed on broad general principles, whilst at later stages certain aspects are studied in more detail and at greater depth.

**11.231 Building Science I**

Properties and uses of stone, brick, lime and cement, aggregates, timber and the common metals.

**Text Book**

**Reference Books**

Handisyde, C. C. — *Building Materials*.
Shute, M. A. — *Modern Building Materials*.
Withey, M. A. & Washa, C. W. — *Materials of Construction*.
Knight, B. H. & R. G. — *Builders' Materials*.

**11.232 Building Science IIA**

Revision of energy units. Electromagnetic radiation. Light and colour, ultra-violet and infra-red radiation.

Further study of materials; glass, bitumens, rubber, plastics.
Building Science IIB

This subject is taught in the School of Civil Engineering as 8.211 Materials for Architects.

Text Books
Phillips, R. O. — Sunshne and Shade in Australia.

Reference Books
Billington, N. S. — Thermal Properties of Buildings.
Aronin, J. E. — Climate and Architecture.

11.223 Building Science III
Lighting. The eye and vision, analysis of visual tasks.
Photometry and units. Light sources and light control.
Calculation of illumination and flux, and design of lighting installations.
Natural lighting.

Text Books
British Lighting Council — Interior Lighting Design.
Lawrence, A. — Acoustics in Building.

Reference Books
National Building Studies — Simplified Daylight Tables — H.M.S.O.
Standards Assoc. of Australia — The Artificial Lighting of Buildings.
Knudsen, V. O. & Harris, G. M. — Acoustical Design in Architecture.
Ingerslev, F. — Acoustics in Modern Building Practice.
Parkin, P. H. & Humphreys — Acoustics Noise and Buildings.
11.234 Building Science IV

Building research and research publications. Selected topics of more advanced nature on recent work, by outside specialists where appropriate.

Text Book (Plastics and Laminates)

Couzens, E. G. & Yarsley, V. E. — *Plastics in the Service of Man*.

Reference Books

Building Research Institute, Washington, D. C. — *Plastics in Building*.
Dietz, A. G. H. — *Engineering Laminates*.
McTaggart & Chambers — *Plastic and Building*.

11.241 Building Services A

Principles and practice as controlled by regulation for domestic and commercial building services including drainage, sanitary plumbing, water supply and reticulation, fire services, gas services, hot water service heaters and tanks. Efficiency of units and relative costs are considered.

Text Book

Randerson — *Australian Sanitary Engineering Practice*.

Reference Books

Dept. of Labour & National Service —

(i) *Sanitary Plumbing and Water Supply*.
(ii) *Gasfitting*.
(iii) *Drainage*.

11.242 Building Services B

Design principles and practical requirements of the following services and their application to buildings are studied to provide the architect with sufficient information for sensible selection and inclusion in building projects: heating, ventilating, air-conditioning, electrical services, call systems, fire protection, lifts, steam.

Reference Books

Randerson — *Australian Sanitary Engineering Practice*.
*Westinghouse Lighting Handbook*.
*American Society of Heating and Ventilating Engineering Code*.
Faber, O. — *Heating and Ventilating* (Spon.).
11.311 Specifications

This subject extends over three terms with lectures in first and second terms, and a specification assignment in the third term.

Details of lecture subjects are as follows: Definitions; historical notes; purpose; legal significance; relationship to building contract; types; uses; aids; sources of information; language; format; reproduction; binding; methods of preparation; schedules; abstracts; "Master" and "Standard" specifications; comparative Australian, British and American examples; supplementary general conditions of “Preamble”; specifications of individual “Trades”; specifications for demolitions; alterations, additions and new works, individual and group.

Reference Books

Whiting & York — Specifications.

11.321 Professional Practice

Subjects dealt with include: law of contracts; relationship of contracting parties and the architect; types of contracts; code of ethics; scale of professional charges; engagement and acceptance of instructions; statutory controls (Acts, Ordinances, Regulations, By-laws, etc.); problems of practice; responsibilities of an architect; office administration; financial aspects (accounts, statements, variations, certificates); supervision.

Correspondence; relationship with specialist consultants; reports (property, dilapidations and project); copyright; insurances; litigation; study of articles of agreement.

Reference Books

Rimmer, E. J. — The Law Relating to Architects.
R.A.I.A.: Year Book.

11.322 Architectural Administration

An extension of the subject-matter of Professional Practice concentrating on the business side of the architect’s function. Lectures are given by visiting specialists and cover three main fields: (a) Finance — types, sources and methods of finance; the economics and preparation of financial statements on projected schemes, capital costs, maintenance costs, outgoings, revenue. (b) Law — contract, building and industrial laws and regulations. (c) Management — office and personnel management, accounting methods, record systems, job supervision and control, banking procedure.
11.411 Town Planning

The course consisting of one term of lectures and one term of studio work provides an outline of the aims of town and country planning and its relationship to the techniques of architecture, civil engineering, geography, sociology, land economics and land surveying. The course also is preparatory to the post-graduate Diploma course in Town and Country planning conducted by the University of Sydney. The course touches on the history, theory and practice of town and country planning and includes considerations of traffic and transportation, elements of civic design, the planning of residential areas and principles of regional planning. Emphasis is placed upon the architectural aspects of town planning with particular reference to requirements in community planning, government housing, residential and estate development.

Text Book

Reference Books
Abercrombie, Patrick — *Town and Country Planning.*
Gibberd, Frederick — *Town Design.*
Hiorns, F. R. — *Town Building in History.*
Howard, Ebenezer — *Garden Cities of Tomorrow.*
Mumford, Lewis — *The Culture of Cities.*
Tripp, H. A. — *Town Planning and Road Traffic.*
Winston, Denis — *Sydney’s Great Experiment.*

11.611 Building Trades I

The general purpose of this subject is to familiarise the student with the materials, tools and terms used by the building craftsman and the inter-working of building trades.

Specialist trade teachers give short lectures and demonstrations in the techniques of bricklaying, carpentry and joinery, plastering, plumbing, drainage and painting.

Each student is required to do some practical work which will include: preparation and mixing of materials; setting out work; laying bricks; jointing and bonding; construction of simple timber frames and methods of “building in”; plain cement rendering to wall surface and “running” plaster moulds; identification of fittings used by the drainer and plumber; practical drainpipe laying; soldering and rivetting metal joints; fixing lead flashings; colour mixing; brushwork techniques for applying paint to different surfaces.

11.612 Building Trades II

More advanced work on the trades introduced in Year 1 with emphasis on techniques of workmanship and workshop procedure and practice. Demonstrations, with student participation, of methods of welding and electrical services and fittings. Visits to buildings in course of construction to enable students to observe essential relationships of trades, methods of handling materials and fabrication sequence, provision for “follow on” trades.
11.711 Quantity Surveying A

Instruction in the method of obtaining from plans and specifications and otherwise the quantities of material and labour necessary in the construction of a building and other structures. The use of scales, figures, dimensions, plans, sections, elevations and details in relation to quantities. Techniques used in taking off and billing of quantities.

Text Book

11.721 Estimating A

Methods used for estimating; standard mode of measurement; profit; establishment and other on-cost charges; awards, insurance, taxes, etc.; scale of fees and charges by local and other authorities.

The subject matter for each trade or operation includes: current material prices; schedule of labour units. Memoranda in respect to: weights, mixing proportions and yields of materials, waste allowances, working costs and depreciation of plant, scaffolding, etc.; examples of "building up" the elements of a unit cost for pricing a bill of quantities; topical problems in estimating costs of building works.

Measuring and methods of adjusting variations; grouping of unit items to obtain a bulked cost rate for different structural parts of buildings; comparison of costs for alternative methods of construction related to structural parts of buildings; preparation of preliminary estimates from sketch plans.

11.722 Estimating B

Suitability and capacity of on-site plant; organisation as basis for estimating; inspections and reports on actual building sites; examples of "working up" unit cost rates for the various trades and operations on large building projects; pricing selected bills of quantities in respect of domestic, industrial and commercial buildings; recording and adjusting costs of variations to contracts. More advanced work than that given in Estimating A in respect of comparative costs or alternative methods of construction and detailing.

11.723 Estimating

(A course for Architecture students. The syllabus is based on that of 11.721 Estimating A)

Text Book

Reference Books

Foster, Norman — Construction Estimates from Takeoff to Bid.
11.731 Building Management

Instruction in the basic practice of a builder's organisation. The subject matter includes:

(a) Elements of job supervision, emphasising the importance of technical supervision in respect to details of construction, fabrication sequence, workmanship standards, general trade practice and teamwork for efficient building construction.

(b) Building job organisation, dealing with the fundamentals of on-site building organisation, economic use of materials and methods of fabrication. The main essentials include on-site planning, problems of labour, materials handling, also construction planning and scheduling.

(c) Building plant and equipment, providing a survey of various power tools, machinery and mechanical handling gear used in connection with building and construction costs.

(d) Business management, which is designed to provide a study in the executive management and basic professional practices of a builder's organisation.

Reference Books

Binder Hamlyn & Co. — British Construction Equipment.

11.741 Building Acts and Regulations

Investigations of the Acts, Regulations, By-laws, Codes, etc., which govern and control the design and erection of all classes of building in New South Wales. The lectures deal with:

(a) The method by which the New South Wales Parliament confers powers on various government departments to prepare and police regulations and by-laws, thus controlling building within their jurisdiction;

(b) A general interpretation and knowledge of the contents of the relevant Acts and Regulations.
Newcastle University College

The University has established a University College at Newcastle. The Department of Architecture at Newcastle offers the same facilities for architectural training as does the School of Architecture and Building in Sydney. However, the degree course in Building is not offered at Newcastle.

Further information regarding the course may be obtained from Mr. E. C. Parker, Head of the Department of Architecture, Newcastle University College, Tighe's Hill.
