The Faculty of the Built Environment offers courses that are designed to provide an education and qualification to practice the professions of architecture, building, industrial design, landscape architecture, quantity surveying and town planning. It also provides opportunities for graduate and professional development studies, and for research in and across these and related fields.

Architecture is a dynamic profession which has a profound influence on the way we live and interact with our environment. It is not just about the design and erection of buildings - it is also about how we use them, and about the world we chose to live in. Creativity is the keystone of the profession, but architects must also have soundly based technical knowledge. For those whose interests lie in other areas of architecture, study at the undergraduate level is also available which provides the opportunity for specialisation in a number of architecture related fields.

Modern building is about the organisation and management of people, materials and machinery for projects that may cost up to several hundred million dollars. It is about planning and programming, co-ordination, contracts administration, quality management, industrial relations, cash flows and information technology.

Industrial design involves the design of a whole range of consumer and capital products as diverse as telephones and cranes, gas fires and exhibition centres, toothbrushes and motor cars. Ideally, the industrial designer works as part of a team involving engineering, production and marketing.

Landscape architecture is concerned with the environment as a whole. Its principal focus is the theory and practice of landscape planning, cultural studies and conservation of the environment. Landscape architects seek creative strategies for environmental protection, sustainable development, land-use planning, site design and heritage conservation.

Town planning is a wide-ranging profession which has a major impact on the form and functioning of cities, suburbs, towns and the non-urban environment. Town planners deal with the social aspects of urban and rural life, with the economics of development, and with the appearance and functioning of the environment. They consider the needs and futures of both existing places and newly developing areas.

This handbook provides information on courses of study offered by the Faculty of the Built Environment, at both undergraduate and graduate levels, together with descriptions of subjects available and areas in which research may be undertaken. Those who work in the Faculty are enthusiastic about the courses offered, and feel that these provide challenges and rewards in both the academic and professional spheres. I hope that this is also your experience!

Professor A. Ray Toakley
Dean
The Academic year is divided into two sessions each containing 14 weeks for teaching. There is a recess of approximately six weeks between the two sessions and there are short recesses of one week within each of the sessions.

Session 1 commences on the Monday nearest 1 March.

All Faculties (other than Medicine)

Antony Yarham, BEd Kuring-gai C.A.E., DipEd U.T.S.
This Handbook is divided into two main sections comprising undergraduate study and graduate study. Initially, course outlines are presented in each section, providing a guide to the degrees within organisational units. This is followed by a full listing of subject descriptions in each section, which provide full details of subject content, contacts and session/prerequisite details.

As changes may be made to information provided in this Handbook, students should frequently consult the noticeboards of the schools and the official noticeboards of the University.

Information Key

The following key provides a guide to abbreviations used in this book:

<table>
<thead>
<tr>
<th>Abbreviation</th>
<th>Description</th>

Some People Who Can Help You

If you require advice about enrolment, degree requirements, progression within courses, or any other general faculty matters, contact:

Brian Newell, Senior Administrative Officer, Faculty of the Built Environment, Room 510, Architecture Building, Extension 4771.

For information and advice about subject content and requirements contact the appropriate person below:

Professor John Ballinger, School of Architecture, Room 100, Architecture Building, extn 4786.
Professor James Weirick, School of Landscape Architecture, Room 208, Old Main Building, extn 4844.
Dr Ojars Greste, School of Building, Room 402, Architecture Building, extn 4826.
Professor Alexander Cuthbert, School of Town Planning, Room 205, Old Main Building, extn 4837.
Professor Ray Toakley, Graduate School of the Built Environment, Room 501, Architecture Building, extn 4768.  
John Redmond, Department of Industrial Design, Room 211, Sir Robert Webster Building, extn 4849.

It is University and Faculty policy to promote equal opportunity in education (refer to EEO Policy Statement, University of New South Wales Calendar and the Guide for Students 1990).

Faculty of the Built Environment
Enrolment Procedures

Architecture Degree Course

All students re-enrolling in Architecture courses in 1994 should obtain a copy of the free booklet Architecture Enrolment Procedures 1994 available from the School Office. This booklet provides detailed information on enrolment procedures and enrolment timetable.

Town Planning Degree Course

Before proceeding on practical experience, Town Planning students are required to obtain instruction relating to enrolment procedure from the School of Town Planning office. This particularly applies to students in Years 3 and 4.

Bachelor of Building Degree Course

The Building course is offered on a credit point semester system basis and students are required to enrol for the full year (two semesters) on the dates and at the times shown in the booklet Building Enrolment Procedures 1994.

Students are required to complete 6 months of practical experience as part of their course. Building students who elect to take their industrial program in Session 1 in any year are required to enrol at the beginning of that year.

Enrolment for Session 2 subjects is a preliminary enrolment and accepted subject to the student having obtained the appropriate prerequisites before commencement of that session.

Rules for Progression

Progression in courses offered in the Faculty of the Built Environment is generally dependent on the successful completion of prerequisites and/or co-requisites for subjects as listed in the schedules of subjects for each course.

Where the academic record of students is not of a satisfactory standard, the Head of School may recommend a restricted program. This applies to all undergraduate courses offered by the Faculty.

Library Facilities

Although any of the university libraries may meet specific needs, the staff and students of the Faculty of the Built Environment are served mainly by the Physical Sciences
Library and the Studio Collection housed in the Faculty of the Built Environment. There is also some material still contained in the undergraduate collection located in the Library tower.

**The Physical Sciences Library**

This library, located on Levels 6 and 7 of the Library tower, caters for the information needs of staff, postgraduate students and undergraduates in the pure and applied sciences, engineering and architecture.

Physical Sciences Library materials are listed in the Library's online catalogues, microfiche book finding list or microfiche serials catalogue.

The Library provides reference, reader assistance and reader education services, including interlibrary loan, online search and CD-ROM facilities. Photocopying facilities are also available.

Trained Library staff are always available on Level 7 to assist readers with their enquiries.

Physical Sciences Librarian Rhonda Langford

**Undergraduate Services**

- The undergraduate collection caters for the needs of students in Years 1 and 2 and other groups where large numbers require mass teaching. Levels 3 and 4.
- The Open Reserve section, houses books and other material which are required reading. Level 2.
- The Audio-Visual section, contains multimedia, videos and cassette tapes of lectures. The Audio-Visual section has wired study carrels and cassette players for student use. The map collection is also housed here. Level 3.
- The Reader Education program provides orientation tours and introductory library research method lectures to students.

**Faculty Laboratories**

**Research Laboratories**

The Faculty controls research laboratories situated on campus at Kensington and at the University of New South Wales Research Station, King Street, Randwick. The laboratories have sections equipped for work on environment and climate, materials, model testing, services, lighting and acoustics. Extensive testing and research equipment and workshop facilities are available, including a wind-rain machine, an artificial sky and sun, a structural modelling facility and a structural testing bay. The equipment and facilities of the laboratories are continually being expanded.

Research work and testing programs carried out in the laboratories include:

- Condensation behaviour of double-glazed windows.
- Transfer of heat and moisture through wall elements.
- Penetration of moisture into and through concrete.
- Development of methods of extending the use of solar energy in domestic architecture.
- Study of noise transmission in buildings.
- Investigation of traffic noise measurement, analysis and prediction.
- The effectiveness of artificial luminous environments.

The Building Research Centre is located in the King St. laboratories and offers additional services to the building industry.

**Computing Facilities Laboratory**

The Faculty has a number of computing laboratories, with associated output facilities, available to both undergraduates and postgraduates. A CAD laboratory houses 16 graphics workstations (SUN SPARCstations), an A0 pen plotter, an A3 colour printer and a matrix camera for the production of slides and print film. A general-access PC laboratory contains 30 386-based computers connected to a Novell server and supporting a wide range of software for handling text and graphics applications. The Department of Industrial Design has a high-end CAD facility with a SPARCstation 10 workstation, software and a plotter, used for modelling and design applications. It is expected that by the start of 1994, the Faculty will have a GIS facility comprising two new laboratories with a total of 35 high speed 486-based computers, supporting landscape and urban planning applications as well as general CAD operations. All these facilities are connected to the University's campus-wide network, providing the full range of network facilities for both staff and students.

Active research is underway in the following areas:

- The use of computer graphics and other computing techniques in architectural design and teaching.
- The development and use of management information systems in the building industry.
- Analysis and development of computer methods in land-use planning and design.
- Use of computers in transportation and strategic planning, social analysis and census data interpretation.

**Student Clubs and Societies**

Students have the opportunity of joining a wide range of clubs and societies. Many of these are affiliated with the Students' Union. There are numerous religious, social and cultural clubs and also many sporting clubs which are affiliated with the Sports Association. Within the Faculty are a number of student societies. These include TAC (The Architecture Club), BUGS (Building Undergraduate Society), IDSOC (Industrial Design Society), SOLA (Society of Landscape Architects) and OOPS (Organisation of Planning Students).

Clubs and societies seeking to use the name of the University in their title, or seeking University recognition, must submit their constitutions either to the Students' Union...
or the Sports Association if they wish to be affiliated with either of these bodies, or to the Academic Registrar for approval by the University Council.

Students With Disabilities

The University of New South Wales has a policy of equal opportunity in education and seeks wherever possible to ensure maximum participation of students with disabilities. The University offers a range of assistance: examination support; specialised equipment; educational support; parking provisions; library assistance.

A Resource Guide for students and staff with disabilities and a map showing wheelchair access is available from the Adviser to Students with Disabilities, the EEO Unit, the Library and the Students Union.

It is advisable to make contact with the Adviser to Students with Disabilities prior to, or immediately following enrolment, to discuss your support needs.

The Adviser can be contacted on 6975418 or at Student Services, Quadrangle Building.

General Education Requirement

The University requires that all undergraduate students undertake a structured program in General Education as an integral part of studies for their degree.

Among its objectives, the General Education program provides the opportunity for students to address some of the key questions they will face as individuals, citizens and professionals.

The program requires students to undertake studies in three categories of the program.

The key questions addressed by the Program are:

Category A: The External Context: An introduction in nonspecialist terms to an understanding of the environments in which humans function.

Course requirement: 56 hours
1. How do we, can we, generate wealth? (Australia and the Development of the World Economy)
2. How can we, ought we, distribute wealth, status and power? (Human Inequality)
3. What steps should we take, and what policies should we adopt, in science and technology? (Science and Civilisation)
4. What effects do our wealth generating and technoscientific activities have on the environment? (Ecosystems, Technology and Human Habitation)
5. What are the effects of the new mass media of communications? (Mass Media and Communications)

Category B: The Internal Context of Assumptions And Values: An introduction to, and a critical reflection upon, the cultural bases of knowledge, belief, language, identity and purpose.

Course requirement: 56 hours
1. How do we define ourselves in relation to the larger human community? (The Self and Society)
2. How do our conceptions of human nature and well being influence both individual and social behaviour? (Changing Conceptions of Human Nature and Well-Being)
3. What are the prevailing conceptions of and challenges to human rationality? (The Pursuit of Human Rationality)
4. How do language, images and symbols function as means and media of communications (The Use of Language, Images and Symbols)
5. What is the impact of the computer on human society and culture? (The Computer: Its Impact, Significance and Uses)
6. Which systems of belief and configurations of values are most conducive to the survival and enhancement of the human species and the planet earth? (Beliefs, Values and the Search for Meaning)

Category C. An Introduction To The Design And Responsible Management Of The Human And Planetary Future: An introduction to the development, design and responsible management of the systems over which human beings exercise some influence and control. This category is required only of students in four-year professional and honours programs.

The central question to be addressed by students in a systematic and formal way is: For what purpose or purposes will I use my intellectual skills, my expertise, or my technological prowess?

Will these abilities be used, for example:
- in a creative and innovative way?
- to widen the circle of human participation in the benefits they bring?
- to break down the barriers of exclusion and discrimination?
- to enhance the prospects for survival of the human species?
- to enhance the capacity of the planet earth to sustain life?

There are differing requirements for Category C for students commencing before, in, and after 1988. Students must complete a program of general education in accordance with the requirements in effect when they commenced their degree program. Students Should Consult The Appropriate Course Authority or The Centre for Liberal and General Studies in Morven Brown Building, Room G58.
The Faculty of the Built Environment consists of the School of Architecture, the School of Building, the School of Landscape Architecture, the School of Town Planning and the Graduate School of the Built Environment and the Department of Industrial Design. These schools and this department conduct undergraduate courses in the fields of architecture, industrial design, building, landscape architecture and town planning. The courses provide education and training in the arts and sciences involved in the design and construction of buildings, in the development of cities, in landscape and the development of manufactured products. In addition to professional and vocational training the courses include general education subjects to provide graduates with a broad understanding of the humanities and the social sciences.

School of Architecture

Head of School
Professor John Ballinger

Architecture today is an art, a technology and a business. In the modern building industry the architect is the one person who considers the building as a whole end product: serving a purpose, built of materials using technology, to a cost, for a client, providing an environment of space, light and climate, changing its context by its location and form, conveying artistic meaning.

For small buildings the architect can lead and manage the whole process. As projects become larger and more complex the architect becomes a member of a team, sometimes captain of the team, often just one member but always from the beginning seeing the end product as a whole. From a comprehensive study of the requirements for a building the architect prepares a design concept which is continually adjusted and refined over the life of the project. The architect’s role is one of continual creativity.

The BArch course provides graduates with an understanding of the forces that shape buildings and with the skills to guide those forces to a desired end product.

Bachelor of Architecture Course

Bachelor of Architecture
BArch

This course provides the academic education and practical experience leading to professional qualifications in architecture. It aims to equip students with the theoretical and practical knowledge, skills and techniques needed in the design and construction of buildings.

General Description of the Course

The course requires full time attendance for five years with an additional six months practical experience taken after the end of third year. Theoretical knowledge is covered by lectures in the following seven areas:
1. Architectural Communication
2. Theory of Architecture
3. History of Architecture
4. Architectural Construction
5. Architectural Structures
6. Environment
7. Architectural Practice
Progression through the course is by Design Stages comprising Studio and Seminar components. The first three Design Stages are of one year duration and the final four Design Stages are of one session, or half-year duration. Admission to each Design Stage is subject to completion of a majority of the components of the preceding Design Stage and certain prerequisite lecture subjects.

In the Studios a graded sequence of exercises in the form of projects provides experience in architectural design. Each Studio is accompanied by Seminars which draw on the theoretical material and demonstrate its practical application. The architectural projects designed in the Studios thus provide the means for integrating all aspects of architecture.

In the final four sessions of the course the selection of electives gives students the opportunity to concentrate their study on particular aspects of architecture. Elective subjects are offered according to demand and the availability of staff and resources.

**Students at the end of First Year are required to seek the advice of a course adviser about progression to later years.**

### General Education Requirement

General Education subjects totaling twenty credit points must be taken from Categories A (10 credit points = 56 hours) and B (10 credit points = 56 hours). The Category C requirement of the General Education Program is satisfied as follows:

1. The 28 hour subject GSBE0002 is taken in Year 5;
2. The following subjects include Category C issues: ARCH6105, ARCH6115, ARCH6302, ARCH6501 and ARCH6806.

### Practical Experience

Each student is required to obtain, before enrolling in Year 5, practical experience under a registered architect for a period of six months. The experience is to be recorded in a log book and should conform to the categories required for professional accreditation.

Assessment is only within the terms of the subject ARCH6904 Practical Experience in the Bachelor of Architecture degree course 3260. The School of Architecture takes no responsibility for any assessment or consideration for registration with the Board of Architects of New South Wales or membership of the Royal Australian Institute of Architects.

No other subject may be taken concurrently with practical experience.

### Honours

The Bachelor of Architecture degree may be awarded with Honours based upon the quality of performance in the course and in accordance with current Faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

### Registration and Professional Recognition

The degree of Bachelor of Architecture of the University of New South Wales is recognized by the Board of Architects of New South Wales for the purposes of legal registration. In addition, to become registered the candidate must satisfy the following requirements:

1. Produce evidence of two years' approved practical experience, at least one of which has been subsequent to completion of the course; and 2. Pass a special examination in Architectural Practice.

Graduates with two years' approved practical experience, at least one of which is subsequent to completion of the course, are eligible for Associate Membership of the Royal Australian Institute of Architects.

Students enrolled in the BSc(Arch) program (3265) or the BArch program(3260) are eligible to become Student Members of the Royal Australian Institute of Architects.

The foregoing is a general statement and students are strongly advised to obtain further particulars from the RAIA and the Board of Architects of New South Wales.

**Elective Subjects**

A range of electives will be offered each year selected from the list below. Electives may also be chosen from subjects
3265
Bachelor of Science (Architecture) Course

Bachelor of Science (Architecture)
BSc(Arch)

This course provides architectural education for those whose interests and ambitions lie outside the field of professional practice. It offers an opportunity to select subjects on the basis of a student's individual interests.

General Description of the Course

The course may be completed in three years of full-time study. The first year is taken in common with BArch students. In each of the following three sessions an approved special research programme is undertaken followed by a research project in the final session. A selection of subjects is taken from those offered by the School of Architecture with the option of subjects totalling up to forty five credit points from outside the School. Specializations are provided in the fields of architectural computing, heritage studies, architectural technology, and interior design.

General Education Requirement

General Education subjects totalling twenty credit points must be taken during the course.

Honours

The Bachelor of Science (Architecture) degree may be awarded with honours after the successful completion of a two-semester honours program following the completion of the BSc(Arch) program, and in accordance with current Faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Interior Design Major

This is a structured study program within the BSc(Arch) course specifically tailored to the needs of the student seeking an education to professional qualification level in Interior Design. The common first year of the course is followed by two years of gradually more specialized studies at the completion of which the student is eligible to undertake an Honours year to seek the award of the degree BSc(Arch) Honours in Interior Design.

The Bachelor of Building is a four year full-time course which allows students to specialize for careers in Construction and Project Management, Quantity Surveying, Property Development and Property Management.

This course prepares students for professional and executive employment within one of Australia's largest industries, the construction industry. Careers in a wide variety of areas, in both private enterprise and in the public sector are available to building graduates. More specifically, these include positions as project manager, master builder, construction consultant, building surveyor, building estimator, quantity surveyor, building economist, property manager and building scientist.

**General Description of the Course**

The course is offered on a session basis. Students are required to complete a minimum of eight sessions. The course leads to the award of the degree of Bachelor of Building (BBuild).
The eight sessions of the course are structured as follows:

- sessions 1 to 6 consist of a fixed program of compulsory subjects,
- sessions 7 and 8 consist of electives and a compulsory Thesis.

In a normal session program, this usually results in six subjects requiring 17-18 class hours/week.

Credit points are allocated to all subjects. Usually a subject having one hour of classes per week for one session is rated at one credit point.

To qualify for a Bachelor of Building degree a student must complete a total of 139 credit points as follows:

- All compulsory subjects 109 credit points
- Elective subjects 20 credit points
- General Education subjects 10 credit points
- Industry Program 26 weeks

General Education Requirements

All students are required to satisfy the University's General Education requirements by completing:

- 56 hours of Category A General Education subjects
- 56 hours of Category B General Education subjects

Part of the Category C requirement is met through components of the compulsory subjects: BLDG3005, BLDG1091, BLDG3264 and BLDG1311. The Category C requirement is completed by the subject GSBE0002 (2 credit points).

Progress through the Course

Progression through the course is by subject, provided that:

- the necessary subject prerequisites are completed;
- failed subjects are repeated the next time they are offered.

In the event of failure in one or more subjects, the student may carry the failed subject(s) provided that:

- prerequisite subjects have been completed to the satisfaction of the Head of School;
- the total number of subjects taken at any time does not exceed 7 including General Education; and
- the total contact hours do not exceed 20 per week.

Practical Experience

Prior to graduation, students are required to have gained a minimum of 6 months practical experience by appropriate employment in the building industry.

Qualification for membership of the Australian Institute of Building requires that 80 days of this experience be completed before the start of the final session of the course. The Australian Institute of Quantity Surveyors requires the full 6 months experience to be completed before the start of the final year of the course.

The proposal for employment must be submitted to the Head of the School of Building for approval prior to starting work and students will be required to produce documented evidence of their work experience. In order to formally complete the industry experience requirement, students must enrol in BLDG9999 Building Industry Program or in BLDG9998 Quantity Surveying Industry Program.

Elective Subjects

The availability of elective subjects will depend on the student demand for individual subjects. Subjects listed in this handbook may not necessarily be available in the year or session indicated.

Award of the Degree at Honours Level

The award of honours is based on performance throughout the whole course, without requiring an additional honours program. Honours are determined on the basis of a score which is calculated by weighting more heavily the subjects taken in the later years of the course.

Professional Recognition

The award of the degree, Bachelor of Building, is recognized for admission to membership by:

1. The Australian Institute of Building
2. The Australian Institute of Quantity Surveyors, subject to completion of the following electives in addition to all compulsory subjects:
   - BLDG4006 Construction 6
   - BLDG4274 Commercial Arbitration
   - BLDG4303 Quantity Surveying 3
   - BLDG4313 Building Economics 3
   - BLDG9998 Quantity Surveying Industry Program to be taken as 6 months continuous employment with a Quantity Surveying firm, and to be completed before the start of the final year of the course.
3. The Institution of Surveyors Malaysia, subject to completion of the following electives in addition to all compulsory subjects:
   - BLDG4006 Construction 6
   - BLDG4303 Quantity Surveying 3
   - BLDG4313 Building Economics 3
   - BLDG4274 Commercial Arbitration
4. The Australian Institute of Valuers and Land Economists, subject to the completion of the following electives in addition to all compulsory subjects:
   - BLDG4267 Management 7
   - BLDG4273 Law for Builders 3
   - BLDG4313 Building Economics 3
   - BLDG4390 Property Valuation
   - BLDG4391 Land Economics
   - BLDG4392 Property Development
   - BLDG4393 Management of Buildings

and selection of a thesis topic on Land Economics.

The course is also recognised as an educational qualification for licencing by the Building Services Corporation.

### Department of Industrial Design

#### Head of Department
John Redmond

Industrial design involves the research and design of the whole range of consumer and capital products used by people. Products as diverse as telephones and cranes, gas fires and exhibition systems, toothbrushes and motor cars. Ideally, the industrial designer works as part of a team involving engineering, production and marketing. The industrial designer initially concentrates on establishing the concept as a marketable, produceable, usable and socially responsible product; and subsequently details the human factors (ergonomics), appearance (style) and mode of operation. Frequently the designer becomes involved in the corporate image of companies and their products as well as the graphics of the product's packaging and the associated retail support systems.

The course prepares students for professional and executive employment in areas involving the research, design and development of new manufactured products. Whilst it is anticipated that most graduates will be initially employed in an industrial design capacity either in manufacturing companies or consultancies, it is likely that some graduates may subsequently choose to specialise in
aspects of marketing, engineering, product management or design management.

---

**3385**

**Industrial Design Degree Course**

**Bachelor of Industrial Design (BIndDes)**

The course is an innovative 4 year industry cooperative program comprising approximately 50 percent industrial design and related subjects, 20 percent Faculty of Commerce, School of Marketing subjects and 25 percent engineering design and science subjects. This range of subjects offers graduates the capability to integrate their design work with industrial and commercial objectives, as well as offering a range of career paths.

The course is offered predominantly on a semester basis. Students are required to complete a minimum of eight semesters (sessions) including at least three months of industrial experience, taken either during the academic recesses or upon the completion of the academic part of the course, but in units of not less than one month.

Industrial design and ergonomics subjects make up approximately half the subjects and are taken within the Department. The industrial design studio work emphasises the need to find a balance between the requirements of design, ergonomics, marketing, engineering and production. Social and environmental issues as well as the professional and ethical responsibilities of the designer are also emphasised.

The industrial design subjects link their subject material to certain of the material covered in engineering and marketing subjects. In addition, a link subject (Product Studies Seminar), is given involving industrial design, engineering, production, and marketing disciplines in which product case studies are given and analysed.

Student progression may be subject to review by the Head of Department. If a student fails the industrial design studio subject of a particular stage, he/she would not normally be permitted to take any of the subjects in the next stage until that subject had been satisfactorily repeated.

**Coop education mode**

The course is operated in a coop mode. Selected industrial and commercial companies will have the opportunity to provide practical experience and recess employment to selected students or alternatively to offer scholarships, in which case students will work for the companies in certain of the recesses without additional remuneration. Companies will also be involved in providing briefings, consultations, and evaluations for studio project work.

Three months approved practical experience are a requirement of the course.

**General Education Requirement**

General Education Elective/s totalling 56 hours must be taken from each of Categories A and B of the General Education Program. The times allowed for this in the degree program are shown below. The Category C requirement of the General Education Program is satisfied as follows:

1. The 28 hour subject ARCH0002 is taken in Year 4;
2. The following subjects include Category C issues: IDES1073, IDES2091, IDES2111, IDES2151, IDES2193, IDES3241, IDES4291, IDES4321, IDES4371, IDES4361 and IDES4382.

**Honours**

The Bachelor of Industrial Design degree may be awarded with Honours based upon the quality of performance in the course. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

**Professional Recognition**

The Department will be seeking recognition of the course by the Design Institute of Australia for the eligibility of students enrolled in the course to become student members of the Institute and Licentiates automatically upon graduation.

**Schedule of Subjects**

Credit points generally indicate the numbers of hours per week of student/staff contact for one session.

Students who have not taken physics or science at HSC level, are recommended to take the relevant Unisearch bridging courses, after consultation with the Head of Department.

It should be noted that there will be some variation of order of subjects, as some subjects may, from time to time, not be available in a particular session. The course averages 22 hours per week over the four years and when finalising timetables for any particular year every attempt will be made to keep close to the average number of hours per week, and to the program outlined in this schedule.

Prerequisite: Mathematics either 2unit Mathematics HSC score range 60100, or 3unit Mathematics HSC score range 150, or 4unit Mathematics HSC score range 1100.

Note: The 2unit Mathematics subject cannot be the Mathematics in Society subject.

It should be noted that, subject to the approval of the Faculty of the Built Environment, certain subjects from other Schools of the University may be substituted for the subjects shown.

School of Landscape Architecture

Head of School
Professor James Weirick

Landscape Architecture
Degree Course

Bachelor of Landscape Architecture
BLArch

Landscape Architecture is a design discipline which is concerned with the environment as a whole. Landscape Architecture aims to create and sustain habitats for people and other living things in ways which conserve and celebrate ecological relationships, cultural values and symbolic associations.

The principle focus of Landscape Architecture is the theory and practice of landscape design with a strong emphasis on landscape planning, cultural studies and conservation of the environment.

At the University of New South Wales students are strongly encouraged to consider the study of landscape architecture as both a powerful way of thinking and as education for a specific vocation. On graduating from the course, students should have developed a critical awareness of social and environmental issues, a creative approach to landscape design and landscape planning, and a sound foundation in the technical and professional requirements of Landscape Architecture practice. In addition, the course aims to impress an ethical commitment to care of the environment and a strongly responsible attitude to the wider community.
General Description of the Course

The Bachelor of Landscape Architecture course is of four years duration and requires full-time attendance throughout. Students are introduced to the theory and practice of landscape architecture through an exploration of design principles, graphic techniques, ecological processes and studies of human modification of the environment. As students progress through the course, increasing emphasis is laid upon creative design with particular application to Australian conditions. Projects related to the subject matter of concurrent lectures, and culminate in landscape studies of regional and national significance.

The majority of subjects are taught specifically within the School of Landscape Architecture. However, contact with the students and staff of other Schools is assured by the inclusion of subjects from the Schools of Botany, Geography, Town Planning and the Centre for Liberal and General Studies. Staff from the Schools of Civil Engineering and Geography also provide instruction within the curriculum.

The course seeks the synthesis of knowledge and skills through project-based learning in a sequence of eight Design Studios. Support subjects are grouped into five broad strands: ecology and plant materials; history and theory of landscape architecture; communication skills; landscape planning; design documentation, construction and management.

General Education Requirement

Students are required to complete 56 hours of Category A and 56 hours of Category B Electives. The General Education Category C requirement is met as follows:
1. In Year 3 the subject GSBE0002 is taken;
2. A number of compulsory subjects include Category C issues. These are: LAND1132, LAND1210, LAND2110, LAND2171, LAND3191, LAND3291, LAND4170, LAND4717, LAND4270, LAND3150 and LAND3250.

Practical Experience

Students of the undergraduate course must obtain a total of four months' practical experience prior to graduation, of which a minimum of two months must be in a design office and a minimum of two months must be in landscape industry work. This normally takes the form of employment during long vacations under a landscape architect, landscape contractor or nurseryman. Each student entering upon practical experience must obtain prior approval of the Practical Experience Co-ordinator. Each student must obtain from the employer a statement of experience gained, maintain an accurate record in logbook form and submit a written report describing the work undertaken during the various practical experience components. This practical experience must be obtained prior to enrolling in LAND4270 Landscape Design 6.

Honours

The Bachelor of Landscape Architecture degree may be awarded with Honours based upon the quality of performance in the course and in accordance with current Faculty regulations. Honours are Class 1 or Class 2 Division 1 or Class 2 Division 2.

Professional Recognition

The course is recognized by the Australian Institute of Landscape Architects and graduates holding the BLArch degree may qualify for corporate membership of the institute after a specified period of graduate experience and formal examination.

3380 Landscape Architecture Course

Bachelor of Landscape Architecture
BLArch

The course structure shown below represents the normal pattern of progression which students entering course 3380 are expected to follow. In exceptional circumstances the Head of School may allow variation of the normal pattern, and in such cases progression in individual subjects will be governed by the prerequisites as indicated.

A student may be enrolled concurrently in the subjects of only two consecutive years, but this will not apply to students entering with advanced standing in their first year of attendance or to modifications of the course which are initiated by the School.

Students are required to participate in field exercises and practical construction programs outside the metropolitan area.

* These subjects include a number of lectures and field trips for the purpose of practical observation. Students are expected to make their own transport arrangements for these trips.
School of Town Planning

Head of School
Professor Alexander Cuthbert

3360
Town Planning Course

Bachelor of Town Planning
BTP

Town planning has as its focus the existing and future environment, ranging from small local precincts to metropolitan areas and regions. The town planner's task in this regard is to integrate and coordinate the aims and actions of a large number of government and private organizations and individuals to provide an equitable and efficient distribution of resources. This involves collecting and analysing information, identifying needs, making forecasts, preparing policies, plans and programs for consultation, decision and implementation, exercising development control, evaluating development proposals and evaluating results.

The objectives of the course are to create an awareness of the context in which planning operates, impart knowledge of how planning can influence the community and the physical environment, equip students with the competence to apply this knowledge at different levels in a wide range of situations, create an understanding of the contribution other disciplines can make to planning and vice versa, and develop skills in policy formulation, land use allocation and control, design and communication.

General Description of the Course

The course is of five years' duration and requires full-time attendance throughout Years 1, 2 and 5. Students are required to attend the University on a full-time basis for the first session of Year 3 and for the second session of Year 4, the intervening period being devoted to practical experience.

The course leads to the award of the degree of Bachelor of Town Planning (BTP).

General Education Requirement

Students are required to complete 56 hours (= 4 credit points) of Category A and 56 hours (= 4 credit points) of Category B Electives. The General Education Category C requirement is met as follows:

1. In Year 5 the subject GSBE0002 is taken;
2. A number of compulsory subjects include Category C issues. These are: PLAN1111, PLAN1121, PLAN1131, PLAN1141, PLAN1151, PLAN1161, PLAN1171, PLAN2217 and PLAN2311.

Practical Experience

For the period covered by Session 2 of Year 3 and Session 1 of Year 4 the students must be engaged in approved employment related to the course: for example, in
government planning and housing authorities, in local councils preparing or implementing Local Environment Plans, in private development companies or with planning consultants. The type of employment proposed must be submitted to the Head of the School of Town Planning for approval.

Honours

Honours are awarded in the Bachelor of Town Planning degree course on the basis of quality of performance throughout the whole course and in accordance with current Faculty regulations.

For the purpose of calculating Honours at graduation, the Honours value of each subject is indicated by the credit points associated with that subject. Credit points generally reflect the workload required of students in subjects in which grades are awarded.

Professional Recognition

The course is recognized by the Royal Australian Planning Institute as an academic qualification for corporate membership. The Institute requires that for corporate membership graduates must also have at least one year of practical experience subsequent to graduation.

**Note:** Due to course revisions, there is a transition period during which some subjects may be taught in different sessions than those indicated above, while other subjects may be phased in progressively. Details will be provided prior to enrolment.
Subject Descriptions

Descriptions of all subjects are presented in alphanumeric order within organizational units. For academic advice regarding a particular subject consult with the contact for the subject as listed. A guide to abbreviations and prefixes is included in the chapter 'Handbook Guide', appearing earlier in this book.

General Education Subjects

Categories A and B:
The student is to refer to the General Education Handbook for details of subjects available in these areas.

Category C:

GSBE0002
Social Responsibility and Professional Ethics
Staff Contact: Dr R. Samuels, Architecture School C5
The aim of the subject is to expose students in the Faculty to issues of social responsibility in their future professional activities. This is done by selecting for analysis two case studies. The exchange of information and the affirmation and contestation of values by students is considered as important a part of the learning process as the professional input through lectures. Instruction includes common lectures and small seminar groups made up of students from all schools in the Faculty. Assessment will include individual and collaborative submissions.

Bachelor of Architecture

Core Subjects

Architectural Design Studio
Architectural synthesis is the central function of the design studio, the locus of the application of knowledge gained in the lectures and seminars. The vehicles for study are projects and exercises of increasing depth and complexity covering a wide range of building types. Students are encouraged to seek design solutions which cater for the full range of human needs and aspirations. The studios provide continuing opportunities to consider environmental, social, historic, aesthetic, technical and professional factors affecting architecture and the architect's role in the community.

ARCH6101
Design Studio 1
Staff Contact: School Office C24
Analysis of the natural and built environment to develop an awareness of physical environment and the forces determining built form. An understanding of man's functions, activities and aspirations and of the architects' essentially creative and conceptual role.

Introductory studio focusing on the application of design method through simple three dimensional design exercises culminating in the design of simple, small-scale buildings and an understanding of the parameters of design.

ARCH6102
Design Studio 2
Staff Contact: School Office C30
Prerequisites: ARCH6101, ARCH6501, ARCH6601, ARCH6701, four from ARCH6211, ARCH6311, ARCH6511, ARCH6611, ARCH6711
The design of simple residential and non-residential buildings with few spaces, relatively simple functional relationships for clearly defined and familiar user groups on straightforward sites requiring basic contextual understanding. Integration of basic structural, constructional, servicing and environmental control concepts. The development of design method.

ARCH6103
Design Studio 3
Staff Contact: School Office C30
Prerequisites: ARCH6102, ARCH6502, ARCH6602, ARCH6702, four from ARCH6212, ARCH6312, ARCH6512, ARCH6612, ARCH6712
The design of non-residential projects of moderate complexity and scale with more demanding siting and contextual consideration and more complex and less familiar user needs including some adaptive reuse.

Further emphasis on design method. Development of structure, construction, services, environmental control, building regulations and landscape design. Some group work, but largely individual work.

ARCH6104
Design Studio 4
Staff Contact: School Office C24
Prerequisites: ARCH6103, ARCH6503, ARCH6603, ARCH6703, four from ARCH6213, ARCH6313, ARCH6513, ARCH6613, ARCH6713
The design of small-scale buildings in considerable depth including detailed design of internal and external spaces including material and colour choices, fixtures and fittings, construction detailing, services and environmental control.

ARCH6105
Design Studio 5
Staff Contact: School Office C24
Prerequisites: ARCH6104, ARCH6114, ARCH6514, ARCH6904
The design of a relatively complex and large scale development, incorporating residential, involving a range of user groups. Resolution of conflicting issues such as site constraints, planning controls and building regulations, environmental context and the social role of the
development. Group and individual work with an emphasis on urban design.

ARCH6106
Design Studio 6
Staff Contact: School Office
C24
Prerequisites: ARCH6105, ARCH6115, ARCH6515
Exploration and resolution of relatively complex human activities not necessarily of a familiar pattern for non-residential buildings, with emphasis on integration of structure, construction, services and environmental controls at an advanced level and contemporary technology.

ARCH6107
Design Studio 7
Staff Contact: School Office
C24
Prerequisites: ARCH6106, ARCH6116, ARCH6516, ARCH6906
This subject represents the culmination of the BArch course for all students except those who take the Major Design Project or Research Project. It comprises a design project resolved in depth in all areas of architecture, including architectural design, urban design, interior design, construction, structure, services, acoustics, lighting and practice and management.

ARCH6114
Design Seminar 1
Staff Contact: School Office
C3
Prerequisites: ARCH6103, ARCH6503, ARCH6603, ARCH6703, four from ARCH6213, ARCH6313, ARCH6513, ARCH6613, ARCH6713
Understanding of the relation between building cost and architectural design. Preparation of a cost plan for design project in Design Studio 4.

ARCH6115
Design Seminar 2
Staff Contact: School Office
C3
Prerequisites: ARCH6104, ARCH6114, ARCH6514, ARCH6904
An understanding of the town planning process as a community based contextual system of decision-making directing the physical, social and economic fabric of human settlements. A detailed account of the role and function of environmental studies, planning controls, performance standards, statutory mapping, the development application process, the design review committee and process, the appeal process, the settlement of disputes. Lectures, seminars, case studies associated as appropriate with studio exercises covering community development and urban design issues.

ARCH6116
Design Seminar 3
Staff Contact: School Office
C3
Prerequisites: ARCH6105, ARCH6115, ARCH6515
Understanding of the role of the architect when engaged by a developer. Preparation of a timetable, submissions and reports for a developer client for design project in Design Studio 6.

ARCH6117
Design Seminar 4
Staff Contact: School Office
C3
Prerequisites: ARCH6106, ARCH6116, ARCH6516, ARCH6906
Development and presentation of the theoretical basis of the students own design work in Design Studio 7.

ARCH6127
Major Design Project
Staff Contact: School Office
C30
Prerequisite: By approval
Under supervision of an individual member of staff, with a supportive package of Electives (C24) which are closely related to and form part of the final submission.
The scope and size of this project will have been agreed between the student, his/her supervisor and the School Committee set up to oversee these projects at the start of Year 5 Session 1. Much of the preliminary information gathering, site information, and associated research will have been done in the seminars and architectural research project during Year 5 Session 2.
The end result of this Major Design Project would be a building or a group of buildings of extremely high standard resolved in detail-structure, finishes, furnishings, environmental control, etc.

Architectural Communication
Objectives: To develop skills in oral, written and graphic communication; to introduce students to experimentation with materials and techniques in the context of current architectural thinking, and to expose them to new or less well known techniques and media. To that end, the first year of the course is geared to the development of skills and the later years to more experimental work.

ARCH6201
Architectural Computing 1
Staff Contact: School Office
C6
An introduction to the technology of computing as it pertains to the practice of Architecture and Design. The computer is presented as a tool for storing and manipulating information by means of application programs which model the real-world needs and activities of architects. Emphasis is on the modelling of graphics information, including an introduction to CAD concepts and techniques. Basic principles of technology and programming are explained. Students engage in hands-on computer exercises to consolidate the knowledge gained in the lectures.

ARCH6205
Architectural Computing 2
Staff Contact: School Office
C6
Prerequisite: ARCH6201
Introduction to the techniques and processes of two-dimensional computer-aided drafting for the production
of architectural drawings. Hands-on experience; staged tutorial exercises and self-directed documentation tasks.

ARCH6211
Communication Seminar 1
Staff Contact: School Office
C18
By the end of first year, students will be expected to present their final design project by means of the following: a set of presentation drawings, rendered in colour orthographics, axonometric or isometric, perspective and simple construction drawings as required to explain the project fully. A model, written statement of intent and a verbal presentation to a jury will also be required.

To achieve this, they will receive information and practice in the following: drafting and drawing skills, with instruments and freehand, orthographic projection, axonometric, isometric, perspective, colour theory, rendering techniques, variety of media, model making, library use, study and research skills, scholarly writing, report and letter writing and oral presentation.

ARCH6212
Communication Seminar 2
Staff Contact: School Office
C12
Prerequisites: ARCH6101, ARCH6501, ARCH6601, ARCH6701, four from ARCH6211, ARCH6311, ARCH6511, ARCH6611, ARCH6711

To experiment with a range of dry techniques for presentation. Elementary exercises in two and three dimensional composition in combination with advanced colour theory studies. Architectural model making using various techniques. Observational drawing exercises. Library use, study and research skills.

Use of the computer for simple threedimensional modelling of building form: form analysis; massing; visualization and perspective. Handson tutorial exercises linked to Studio design work. (3 cp segment of whole.)

ARCH6213
Communication Seminar 3
Staff Contact: School Office
C12
Prerequisites: ARCH6102, ARCH6502, ARCH6602, ARCH6702, four from ARCH6212, ARCH6312, ARCH6512, ARCH6612, ARCH6712

To experiment with a range of wet techniques for presentation. Advanced exercises in three dimensional composition and the display of this through two dimensional presentation techniques including overlays and collages. Introduction to architectural and model photography, dark room techniques, and lighting theory. Jury and sales techniques. Advanced exercises in scholarly writing, report and letter writing and oral presentation.

Theory of Architecture

Objective: To provide a theoretical overview of the discipline of architecture and to explain the basis for and the limitations of its concepts, themes and practices.

ARCH6301
Theory of Architecture 1
Staff Contact: School Office
C6
The role of theory; theoretical terms and concepts used in architecture and design; designing as process; human constructs in architecture.

Studies and readings of selected writings and theories in architecture and related disciplines.

ARCH6302
Theory of Architecture 2
Staff Contact: School Office
C6
Prerequisite: ARCH6301
Formulations of the way architects conceive and design; social and behavioural considerations; selected architectural beliefs and values; relational and ordering systems in architecture.

Studies and readings of selected writings and theories in architecture and related disciplines.

ARCH6303
Theory of Architecture 3
Staff Contact: School Office
C6
Prerequisite: ARCH6302
Architectural positions and movements; aesthetic and symbolic aspects of architecture; urban and contextual issues; ethical considerations; criticism and evaluation.

Studies and readings of selected writings and theories in architecture and related disciplines.

ARCH6311
Theory Seminar 1
Staff Contact: School Office
C9
Discussion of and exercises embracing the concepts, themes and practices raised in ARCH6301 Theory of Architecture 1 related to projects in Design Studio 1.

ARCH6312
Theory Seminar 2
Staff Contact: School Office
C9
Prerequisites: ARCH6101, ARCH6501, ARCH6601, ARCH6701, four from ARCH6211, ARCH6311, ARCH6511, ARCH6611, ARCH6711
Discussion of and exercises embracing the concepts, themes and practices raised in ARCH6302 Theory of Architecture 2 related to projects in Design Studio 2.

ARCH6313
Theory Seminar 3
Staff Contact: School Office
C9
Prerequisites: ARCH6102, ARCH6502, ARCH6602, ARCH6702, four from ARCH6212, ARCH6312, ARCH6512, ARCH6612, ARCH6712
Discussion of and exercises embracing the concepts, themes and practices raised in ARCH6103 Theory of Architecture 3 related to projects in Design Studio 3.

History of Architecture

Objective: To provide an overall view of the historical development of architecture, and its achievements within different cultural traditions, with reference, where appropriate, to Australian architecture, with a view to giving
the student a fuller awareness of design, and the objectives and influences that shape it.

ARCH6401
History of Architecture 1
Staff Contact: School Office
C9
Discussion of historical buildings and texts and the tools of the architectural historian, ie formal analyses of buildings, the use of manifestos and texts, and historiographical conventions.

General chronological exploration of selected buildings and architectural practices with emphasis on the range of influences on architecture, eg, cultural institutions and power structures; other arts such as music, painting, theatre; technology and material developments; models of urbanity; history of ideas in architecture.

Discussion and analysis of past definitions of history and architecture examining issues regarding taste, morality, style, continuity and an examination of many of the ideologies and attitudes arising from modernism.

ARCH6402
History of Architecture 2
Staff Contact: School Office
C12
Prerequisite: ARCH6401
A selection of theme units which broach both the conceptual structures and theoretical borders of architecture. Themes for this subject will include Aspects of Classicism; Romantic Classicism and the Picturesque; Craft Traditions and the Vernacular; Rituals in Urban Settlement; historiography.

ARCH6403
History of Architecture 3
Staff Contact: School Office
C12
Prerequisite: ARCH6402
Extends the range of theme units initiated in History of Architecture 2, including the following: Modernity and Modernism; Australia and the Architecture of Western Imperialism; National and Regional Images in Australian Architecture; Power Structures and Popular Culture as Architectonic Forces in The City; Readings on Modern and PostModern Imagery.

Architectural Construction
Objective: To develop breadth and depth in the understanding of the basic rationale governing the construction of buildings. Emphasis is placed upon design decisions which lead firstly to the selection of appropriate constructional systems and then to careful detail design. The theoretical field is mapped in the lecture series with complimentary exercises in practical application pursued in seminars, generally linked to studio projects. Progression is made from the study of the more familiar and small scale building types to that of larger scale buildings of a more complex technological nature.

ARCH6501
Architectural Construction 1
Staff Contact: School Office
C9
Introduction to the principles of architectural construction and their application to the design of simple, small-scale buildings. Architectural construction as a design activity and its relationship to building materials, structure, services, process and regulation. Basic building materials, systems and processes and their historic development. Introduction to materials science. Basic structure, properties, manufacturing techniques, use and performance of materials in building and artifact design. Introduction to construction drawing practice and use of resource materials.

ARCH6502
Architectural Construction 2
Staff Contact: School Office
C12
Prerequisite: ARCH6501
The principles of architectural construction applied to the design of buildings of moderate scale and complexity through a detailed analysis of common constructional systems, their elements, components, assembly methods, detailing, construction processes and regulatory controls. Suitability, application and performance of principal construction materials including timber, masonry, steel and concrete. Durability, movement and moisture control. Resource materials, dimensional co-ordination and construction drawing practice.

ARCH6503
Architectural Construction 3
Staff Contact: School Office
C12
Prerequisite: ARCH6502
The principles of architectural construction applied to the design of complex and large scale buildings. Appropriate construction systems, materials and organisation of the building process. Detailed analysis of junctions and connections between elements, components, materials and finishes. Construction durability, weathering and failure, regulatory controls, fire safety and protection. Rationalised systems, prefabrication, modular co-ordination and construction documentation.

ARCH6511
Construction Seminar 1
Staff Contact: School Office
C12
Exercises in the practical application of materials science and the principles of architectural construction. Emphasis on the exploration of basic building materials, systems and processes, dimensional co-ordination and construction drawing related where possible to Design Studio 1 communication and design projects.

ARCH6512
Construction Seminar 2
Staff Contact: School Office
C9
Prerequisites: ARCH6101, ARCH6501, ARCH6601, ARCH6701, four from ARCH6211, ARCH6311, ARCH6511, ARCH6611, ARCH6711
Exercises in the practical application of the principles of architectural construction to the design of small scale buildings. Emphasis on common constructional systems using timber, masonry, steel and concrete, resource and reference information, dimensional co-ordination and construction drawing practice related where possible to Design Studio 2 design projects.
ARCH6513
Construction Seminar 3
Staff Contact: School Office
Prerequisites: ARCH6102, ARCH6502, ARCH6602, ARCH6702, four from ARCH6212, ARCH6312, ARCH6512, ARCH6612, ARCH6712
Exercises in the practical application of the principles of architectural construction to the design of buildings of moderate scale and complexity. Emphasis on construction detailing as well as the general resolution of constructional systems related where possible to Design Studio 3 design projects.

ARCH6514
Technology Seminar 1
Staff Contact: School Office
Prerequisites: ARCH6103, ARCH6503, ARCH6603, ARCH6703, four from ARCH6213, ARCH6313, ARCH6513, ARCH6613, ARCH6713
Studies in the selection and application of structural and constructional systems, building materials and processes appropriate to Design Studio 4 design projects.
Aspects of climate, thermal, lighting or acoustics will be incorporated into the seminar program, appropriate to the current studio topics.

ARCH6515
Technology Seminar 2
Staff Contact: School Office
Prerequisites: ARCH6104, ARCH6114, ARCH6514, ARCH6904
Studies in the selection and application of structural and constructional systems, building materials and processes appropriate to Design Studio 5 design projects.
Aspects of climate, thermal, lighting or acoustics will be incorporated into the seminar program, appropriate to the current studio topics.

ARCH6516
Technology Seminar 3
Staff Contact: School Office
Prerequisites: ARCH6105, ARCH6115, ARCH6515
Studies in the selection and application of structural and constructional systems, building materials and processes appropriate to Design Studio 6 design projects.
Aspects of climate, thermal, lighting or acoustics will be incorporated into the seminar program, appropriate to the current studio topics.

ARCH6517
Technology Seminar 4
Staff Contact: School Office
Prerequisites: ARCH6106, ARCH6116, ARCH6516, ARCH6906
Studies in the selection and application of structural and constructional systems, building materials and processes appropriate to the Design Studio 7 design project.
Aspects of climate, thermal, lighting or acoustics will be incorporated into the seminar program, appropriate to the current studio topics.

ARCH6601
Architectural Structures 1
Staff Contact: School Office
C6
General introduction to structures, their development and their role; natural and manmade structures.
Basic structural concepts; load, force, flow of force (loadpath); graphical and mathematical resolution of forces, equilibrium; moment (overturning); stability (element, assembly), strength and stiffness, supports and connections; types of loads; stress (tension, compression, shear, bending, torsion), strain, modulus of elasticity.
Basic structural elements and assemblies: cable and arch, strut and column, beam, truss, frame, grid, plate/slab, vault and dome, tent and pneumatic.
Elemental structural behaviour applied to the above: load application, loadpaths, connections, reactions at supports/connections, internal forces (stresses).
Graphical techniques and models as means for structural behaviour studies.

ARCH6602
Architectural Structures 2
Staff Contact: School Office
C6
Prerequisite: ARCH6601
The structural design and analysis process: definition of the structural task in relation to an architectural concept, system options and choice, establishment of loads and loadpaths (stability concept), estimation of loads, structural safety concept; satisfying equilibrium requirements; establishment of external and internal forces; sizing of elements.
Selective study of structural behaviour and application of the structural design and analysis process to simple structural assemblies (post/beam, frame, cable-stayed systems, truss, grid, plate/slab etc.) Graphic techniques and models as means for structural behaviour studies.

ARCH6603
Architectural Structures 3
Staff Contact: School Office
C6
Prerequisite: ARCH6602
Constructional aspects of structures; structural design related to materials (timber, steel, concrete and composites), foundations, connections and joints.
The morphology of structures, structural shape, structural systems; efficiency (the 'lightweight' concept), structural systems for widespanning and high-rise structures, selective studies of structural behaviour.
ARCH6611
Structures Seminar 1
Staff Contact: School Office
C6
Exercises aimed at developing an understanding of basic structural concepts and the fundamental behaviour of structural elements, related where appropriate to Design Studio 1 design projects.

ARCH6612
Structures Seminar 2
Staff Contact: School Office
C6
Prerequisites: ARCH6101, ARCH6501, ARCH6601, ARCH6701, four from ARCH6211, ARCH6311, ARCH6511, ARCH6611, ARCH6711
Exercises in the behaviour, selection, analysis and design of simple structural assemblages, related where appropriate to Design Studio 2 design projects.

ARCH6613
Structures Seminar 3
Staff Contact: School Office
C6
Prerequisites: ARCH6102, ARCH6502, ARCH6602, ARCH6702, four from ARCH6212, ARCH6312, ARCH6512, ARCH6612, ARCH6712
Exercises in the constructional aspects of structures, with particular emphasis on the characteristics of current and evolving structural systems, related where appropriate to Design Studio 3 design projects.

Environment

Objective: To present to students the theory in thermal behaviour, daylight, electric lighting, acoustics and air quality of buildings and the services to buildings in the context of contemporary building design. To present the principles of energy conservation and environmental impact to enable students to develop appropriate design strategies.

ARCH6701
Environment 1
Staff Contact: School Office
C9
Human response to the environment, thermal, visual and acoustic comfort and air quality. Climate and the sunlighting and daylighting of buildings. Subjective and objective assessments of aural, visual and thermal environments and their integration. Laboratory work and field studies.

The building envelope: Thermal performance; principles of heat transfer, solar radiation effects, absorptivity, reflectivity, conduction, thermal gradients, condensation and thermal insulation. Acoustic performance; properties and behaviour of sound, sound transmission loss, external noise levels, selection of building envelope elements. Daylighting performance; traditional methods of daylighting buildings, application of prediction methods, patterns of innovation and change, advanced glazing technologies. Integration of heat, light and sound in building envelope design.
and allocation of space. Application of thermal, lighting and acoustics principles to promote human comfort in buildings.

**Architectural Practice**

Objective: To introduce aspects of professional ethics, management and administration and to develop communication skills relevant to architectural practice.

**ARCH6804**
Architectural Practice 1
**Staff Contact: School Office**
C6
**Prerequisite: ARCH6103**

**ARCH6806**
Architectural Practice 2
**Staff Contact: School Office**
C6
**Prerequisite: ARCH6804**

**ARCH6807**
Architectural Practice 3
**Staff Contact: School Office**
C6
**Prerequisite: ARCH6806**

Introduction to management theory. The structure and organisation of an architectural office; aspects of company and partnership law and insurance. Business principles and management procedures relevant to an architectural office.

**Other Required Studies**

**ARCH6906**
Dissertation
**Staff Contact: School Office**
C18
**Prerequisite: ARCH6914**
A dissertation is a formal and scholarly piece of writing demonstrating a student's ability to thoroughly investigate a selected topic of interest to the student. In order to achieve a high standard, students are encouraged to thoroughly investigate a concise topic; broad surveys tend to result in superficial generalities. At an undergraduate level it is not a requirement to undertake new research, although students wishing to do so will be given encouragement and assistance by the staff. All students will need to develop a bibliography and demonstrate an ability to critically evaluate the data and the interpretive arguments presented. Some may wish to undertake empirical and/or field research into a feasible aspect of the topic, present and analyse the data using some form of statistical analysis, then draw some conclusions. Opportunities occasionally occur for students to work closely with a member of staff on a major research project. In these instances staff will seek out interested students and/or students can approach staff members. The staff member will closely supervise research while expecting some independent contribution from the student, and will guarantee to acknowledge all satisfactory student contributions when tabling and publishing the results.

All work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, include good graphic presentation of relevant data, and be word processed in A4 format. Submissions will normally be about 10,000 words and be submitted by Friday of Week 14.

**ARCH6907**
Major Research Project
**Staff Contact: School Office**
C30
**Prerequisite: By approval**
Under supervision of an individual member of staff, with a supportive package of Electives (C24) which are closely related to and form part of the final submission. Students who have approval to take this subject may be exempt from Dissertation and permitted to make up credit points by taking appropriate electives.

The scope and format of this project will have been agreed between the student, his/her supervisor and the School Committee set up to oversee these projects at the start of Year 5 Session 1. Much of the preliminary information gathering will have been done in the seminars and architectural research project during Year 5 Session 2.

The end result of this project will be a research project of extremely high quality in a discipline related to the study of Architecture and of particular interest to the student.

**ARCH6914**
Research Methodology
**Staff Contact: School Office**
C6
**Prerequisite: ARCH6103**
A core subject which introduces students to the basic empirical and interpretive research methods, explains some research tools and referencing requirements, and
presents a range of research fields currently undertaken within the School. Classes are normally by lecture and small group teaching. Assignments are designed to lead students through the processes of research, and to encourage a self-critical evaluation of the appropriateness of methodologies used and the value of the conclusions to be drawn. Work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, and be word processed in A4 format.

Elective Subjects

ARCH5220
Computer Graphics Programming 1
Staff Contact: School Office
C6
Prerequisite: ARCH6103

Introduction to the fundamentals of interactive computer graphics programming; techniques of computer programming utilising a high-level language; use of graphics library functions; PC graphics; user interaction techniques. Controlled series of programming exercises.

ARCH5221
Computer Graphics Programming 2
Staff Contact: School Office
C12
Prerequisite: ARCH5220

Advanced techniques of interactive computer graphics programming; graphic techniques for user input; menu-based interfaces; colour manipulation; three-dimensional modelling. Design and development of a graphics-based application program.

ARCH5222
Computer Applications 1
Staff Contact: School Office
C12
Prerequisite: ARCH6103

The application of three-dimensional computer graphics techniques to represent built form in Architecture; form description; colour shading techniques; use of multiple light sources; modelling surface textures. Design modelling exercises.

ARCH5223
Computer Applications 2
Staff Contact: School Office
C6
Prerequisite: ARCH6205

The advanced use of CAD in the practice of architecture: threedimensional modelling; presentation techniques; customisation; macros and libraries; system management. Hands-on exercises and office visits.

ARCH5227
Advanced Graphics
Staff Contact: School Office
C6
Prerequisite: ARCH6103

A theoretical and practical study of the relationship between the visual and the plastic arts. Media and material studies. Development of a professional level of performance in adapting graphic theory and techniques to contemporary needs.

ARCH5228
Drawing
Staff Contact: School Office
C6
Prerequisite: ARCH6103

Direct drawing from life and man-made environment to develop technical and perception skills, media studies, gallery visits and drawing theory.

ARCH5229
Painting
Staff Contact: School Office
C6
Prerequisite: ARCH6103

The theory and practice of painting. Figure and ground interaction, colour and media studies. Individual style and thematic development encouraged. Gallery visits.

ARCH5230
Pottery and Ceramics
Staff Contact: School Office
C6
Prerequisite: ARCH6103

Introduction to the geology of ceramic raw materials and their physical and chemical nature. The characteristics of earthenware, stoneware, and porcelain. Glazes, kilns and forming methods. Laboratory and studio; handbuilding, introductory throwing and design in pottery and ceramics.

ARCH5231
Rendering
Staff Contact: School Office
C6
Prerequisite: ARCH6103

Advanced architectural rendering.

ARCH5320
Theory of Form
Staff Contact: School Office
C6
Prerequisite: ARCH6103

The ontological basis and the antinomical qualities of form in the causal sense, reflected in nature, art and architecture. Practical investigation of the antinomical qualities of form with special emphasis on the brief and on the built fabric of contemporary architecture, and practical attempts to identify shortcomings and develop corrective measures.

ARCH5321
Criticism and Evaluation
Staff Contact: School Office
C6
Prerequisite: ARCH6103

The nature, function and value of criticism. Subjective and objective criticism. A short history of architectural criticism, architectural critics, past and present. Discrimination and values in a changing society; fashion, the influence of mass opinion, communication media, advertising, propaganda. Collection of data; establishment and application of critical criteria; effective communication of conclusions; recommendations and feedback. The use of criticism and evaluation during and after the design process. Practical evaluation of examples of architectural criticism, past and present. Criticism of contemporary buildings and projects. Criticism of current work by self and others.
ARCH5322
Imagination
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Architecture built in the image of the cosmic order and of the ideas directing that order. The nature of imagination, analogy and proportion. The meaning of number, of the elements of space and time and of the geometrical order, and this image in architecture. Seminars and practical projects focus on selected case studies.

ARCH5323
Spirit in Architecture
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Spatial symbolism and intellectual intuition, principles, and methods of sacred architecture. Spiritual doctrine reflected in the layout of Judao-Christian architecture with reference to the Architecture of sacred traditions. Seminars and practical projects focus on selected case studies.

ARCH5324
Spatial Construction Studies
Staff Contact: School Office
C6
Prerequisite: ARCH6103
A rigorous and disciplined examination of skilfully, that is artfully, designed works of art. The subject will require students to investigate the physical - spatial and constructional - orders of two buildings with the aim of interpreting/understanding what these orders are and why they are the way they are. The investigations will be based on drawings and models of the chosen buildings (to be made by the students), on appropriate texts and on lectures given during the session. The selection of buildings will be partly based on the availability of good documentation and critical writings. These are necessary in order to achieve the desired level of rigour. Students will be divided into two groups, each group focusing on one of the buildings. A comparison of the two buildings is an important means of initiating discussion and will be one of the aims of the investigation.

ARCH5422
Great Architects
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Detailed study of the theories and work of selected architects throughout history. Normally four architects will be studied, two from the 20th century and two prior to the 20th century.

ARCH5423
The City
Sydney
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Studies of the social and technological systems that determine the form of contemporary cities. Government systems and controls, land and development economics, land use, transport, services. Sydney as a case study.

ARCH5424
Urban Design
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Design Studies in the integration of buildings and groups of buildings in their urban context, and of spaces between buildings, accommodation of pedestrian and vehicular movement, micro-climate.

ARCH5425
Landscape Design
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Aesthetic appreciation of chosen environments both urban and natural. The treatment of spaces between and upon buildings. 'Hard' and 'soft' landscape treatments. Functional uses of open space within the built environment and the design of street furniture.

ARCH5426
The Modern Movement in Architecture
Staff Contact: School Office
C6
Prerequisite: ARCH6103
A detailed illustrated examination of the architecture and architects who make up this movement from 1885-1965 from Chicago to Europe then to USA and Europe. A study of Australian examples of this movement.

ARCH5427
Post Modernism in Architecture
Staff Contact: School Office
C6
Prerequisite: ARCH6103
The rise of Post Modernism as both a reaction to, and a continuation of the Modern Movement. The subject will attempt to define the various aspects of Post Modern architecture to include Deconstruction. Period covered 1964-1991.
Many architects and architectural theorists today are engaged in a critical questioning of widely held yet inadequate beliefs and processes, including unrestrained progress, instrumental reason and social control. These driving social forces have brought about a devaluing of human work and nature that courts ecological disaster and a degrading of our physical environment. Architects may formulate a resistance through careful reflection on: the role of the human faculties of imagination and memory in design and construction; the significance of decorum, of public and private realms and of boundaries in our buildings and cities; and the limits of the architectural profession’s intrusion into all dimensions of life.

The subject will focus on several “cultural” critics, both writers and architects, assessing the value and limitation of their contributions. Investigation will be guided by a vigorous tradition of thought (extending through the nineteenth century to the present) which has defined the word “culture” as an idea of a whole way of life (and conflict) for individuals in a community. This is formulated as a challenge to the dominant values of “society”.

An exploration of contemporary and contrasting styles. Katsura Detached Palace and the Nikko Tōshō-gū were both started in the first half of the seventeenth century. They present two very different design attitudes and together incorporate influences from almost all major forms of earlier Japanese architecture. This subject uses the two buildings as starting points for analysing and assessing the religious, social, and artistic factors which produce a “Japanese aesthetic” including not only buildings but a total environment.

There will be one examination which will take the form of a simple model with explanatory notes.

An examination of recent Australian and overseas art that addresses ideas of place and context and that is situated in the public domain. Art in public places provides opportunities for artists to work with design professionals, and to grapple with historical, social, cultural, environmental and other issues in the creative process. Central to this subject will be an exposé and critique of the prevailing theoretical discourses on urban art that have developed in recent years.

Teaching/learning will be through lectures/tutorials and seminars. Assessment will be continual and will include seminar papers, a written submission and regular contributions to the class.

Readings will be selected related to various twentieth century architects. They will include works of criticism as well as explanatory texts. One architect will be studied each week and readings will address one particular issue relevant to the architect’s theoretical position.

A review of recent developments, current trends and possible future directions in building design, construction systems, detailing and documentation. Case studies, projects, seminars.

The role of the architect in construction planning and management. Preplanning and building technology design for improved performance and management of the building process. Recent developments in constructional and structural engineering. Erection methods and equipment. Construction management and co-ordination of the building process. Building economics and cost planning, case studies, reports, seminars.

Organic materials; the nature of wood and synthetic polymers. Building products and techniques using these materials and their implications including construction, maintenance and deterioration. Industrial visits and laboratory.

Metals, ferrous and non-ferrous, their nature and use. Building products and techniques using these materials and their implications including construction, maintenance and deterioration. Industrial visits and laboratory.
ARCH5620
Conceptual Structural Design
Staff Contact: School Office
C12
Prerequisites: ARCH6103, ARCH6503, ARCH6603
Choice of systems and their behaviour; scale, structural shape as a visual element in architectural design; conceptual design methods and structural shape-finding and shape-determination methods using analytical, model and computer methods. Model and computer laboratory exercises and project.

ARCH5621
Advanced Structural Design
Staff Contact: School Office
C12
Prerequisite: ARCH5620
The behaviour and analysis of indeterminate structures. Computational techniques for indeterminate and other complex structural systems. Structural CAD applications. Architectural/Structural design issues: envelope, structure interaction, structural detailing and structural expression; dynamic loads; new materials and systems; assembly and erection techniques etc.

ARCH5622
Lightweight Structural Design
Staff Contact: School Office
C12
Prerequisites: ARCH6503, ARCH6603, ARCH6104

ARCH5720
Design for Energy Efficiency
Staff Contact: School Office
C6
Prerequisite: ARCH6103
The development of the design of buildings and building types incorporating technological means of energy conservation and generation, use of energy-efficient materials, maintaining ecological balance and developing suitable structural techniques.

ARCH5721
Design of Lighting
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Major factors influencing design and application in buildings. Evaluation of impact of current technologies on lighting using computer simulations, appraisals and model studies. Design project.

ARCH5722
Acoustics Studies
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Experimental investigation and research in a selected aspect of acoustics. Laboratory and field work, methodology of results, development of techniques of application. Laboratory work.

ARCH5723
Applied Environmental Psychology
Staff Contact: School Office
C6
Prerequisite: ARCH6103
Describing with and for people; environmentally benign design; interactions between people and places; spatial behaviours; the meaning of the environment; user satisfaction; post occupancy evaluation.

ARCH5820
Building Economics & Development
Staff Contact: School Office
C6
Prerequisite: ARCH6103
1. The Economy: structure of the economy. History and development of modern economics. 2. Investment investigation in buildings, property (public and private), large scale, small scale. 3. Valuation; statutory valuations, market value, unimproved and improved land depreciation and obsolescence, valuation of improvements, valuation law, land laws. 4. Feasibility; economic models, optimisation, feasibility studies on small-medium-large-scale development and subdivisions. 5. Rationalised Building; dimensional control, component technology, building systems, cost planning. 6. Seminars.

ARCH5821
Project Management
Staff Contact: School Office
C6
Prerequisite: ARCH6103
1. Principles of scientific management and organisation, individual group behaviour, management functions, planning, organising, staffing, directing, coordinating, monitoring, appraisals and evaluation. 2. Operations research techniques; network analysis, multi-activity charting. 3. Decision theory and procedures. 4. Contract and contract documents. 5. Industrial relations, employment. 6. Industrial organisation. 7. Seminars.

ARCH5822
The Architect and the Law
Staff Contact: School Office
C6
Prerequisite: ARCH6103

ARCH5823
Quality Management Concepts
Staff Contact: School Office
C6
Prerequisite: ARCH6806
The basic principles of quality management including quality control, quality assurance and the design of quality systems. Exploration of issues relating to the quality of design and procurement process and of the end product of the construction process. Relevance of Australian standards and professional manuals in quality assurance.
ARCH5824
Quality Management Practice
Staff Contact: School Office
C6
Prerequisites: ARCH5823

Application of the concepts of quality management. Preparation, documentation and evaluation of quality systems. Industrial and site visits.

ARCH5923
Architectural Studies 1
Staff Contact: School Office
C12
Prerequisite: ARCH5914

An elective designed for students wishing to pursue an independent course of study in a field of architecture not falling within the domain of any existing elective. It requires the gathering of data, analysis of that material and reaching a conclusion. Descriptive summaries of published material are not an acceptable alternative to a well argued critical essay. Students are required to present a detailed program of study for approval by the Head of School by the Friday of the first week of the session in which it is intended to enrol in this elective. For special conditions consult the Head of School. The work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, and be word processed in A4 format. Submissions will normally be about 5,000 words and be submitted by Friday of Week 13.

ARCH5924
Architectural Studies 2
Staff Contact: School Office
C12
Prerequisite: ARCH5923

The intellectual and procedural requirements for this subject are as described in ARCH5923. The work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, and be word processed in A4 format. Submissions will normally be about 5,000 words and be submitted by Friday of Week 13.

ARCH5925
Architectural Studies 3
Staff Contact: School Office
C12
Prerequisite: ARCH5924

The intellectual and procedural requirements for this subject are as described in ARCH5923. The work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, include only relevant and properly referenced illustrations, and be word processed in A4 format. Submissions will normally be about 5,000 words and be submitted by Friday of Week 13.

ARCH5950
Industrial Archaeology 1
Staff Contact: School Office
C6
Prerequisite: ARCH5914

The range of industrial sites and individual engineering structures of heritage significance still extant in Sydney. Documentation of sites and structures. The conservation strategies for the protection of industrial sites and engineering structures.

ARCH5951
Industrial Archaeology 2
Staff Contact: School Office
C6
Prerequisite: ARCH5950

The history and development of selected industries in Sydney, including hydraulic power, electricity generation, rail and tram transport and engineering. Techniques of historical research into industrial sites and structures. Field excursions, recording, preparation of listing proposals and the use of statutory regulations for the protection of relevant sites.

ARCH5952
Traditional Technology 1
Staff Contact: School Office
C6
Prerequisite: ARCH6103

The scope of traditional technologies with particular reference to the building technologies of foundry work, blacksmithing, plastering and stained glass manufacture. Methods of recording including sketching, photography and the unstructured interview. The role of the architect in conservation of traditional technologies.

ARCH5953
Traditional Technology 2
Staff Contact: School Office
C6
Prerequisite: ARCH6103

The detailed study of a selected traditional technology. Interview and documentation techniques for recording processes and activities. The role of traditional craftspeople in the conservation of heritage buildings. The assessment of the work of traditional craftspeople and the role of authenticity in conservation.

Students may also, with the approval of the Head of School, select subjects as electives from the BSc(Arch) course.

Bachelor of Science (Architecture)

Core Subjects

ARCH6914
Research Methodology
Staff Contact: School Office
C6
Prerequisite: ARCH6101

A core subject which introduces students to the basic empirical and interpretive research methods, explains some research tools and referencing requirements, and presents a range of research fields currently undertaken within the School. Classes are normally by lecture and small group teaching. Assignments are designed to lead students through the processes of research, and to
Encourage a self-critical evaluation of the appropriateness of methodologies used and the value of the conclusions to be drawn. Work must be written in concise and clear English, apply a consistent and acceptable referencing system, include an up-to-date bibliography, and be word processed in A4 format.

**ARCH5914**
**Special Research Programme 1**  
*Staff Contact: School Office*  
C15  
*Prerequisite:* Head of School's approval  
Introductory programme on a topic area selected by the student in accordance with his or her field of specialisation. Approval of topic by Head of School and supervision by appropriate staff is required. The special research programmes provide the opportunity to practice research methods, planning, organising and conducting and documenting study in the chosen field.

**ARCH5915**
**Special Research Programme 2**  
*Staff Contact: School Office*  
C15  
*Prerequisites:* ARCH5914 or equivalent, Head of School's approval  
Further development of the topic previously selected by the student in ARCH5914. Approval of topic by Head of School and supervision by appropriate staff is required.

**ARCH5916**
**Special Research Programme 3**  
*Staff Contact: School Office*  
C15  
*Prerequisites:* ARCH5915 or equivalent, Head of School's approval  
Culmination of study in topic area previously undertaken in ARCH5914 and ARCH5915. Approval of topic by Head of School and supervision by appropriate staff is required.

**ARCH5917**
**Research project**  
*Staff Contact: School Office*  
C24  
*Prerequisite:* ARCH5916 or equivalent  
This project represents the culmination and integration of knowledge and skill gained in the student's field of specialisation, including social, environmental and ethical aspects. The research project report should be presented in a thesis format.

**ARCH5918**
**Honours Project**  
*Staff Contact: School Office*  
C60  
*Prerequisite:* ARCH5917 or equivalent  
The honours project provides opportunity for advanced study in a particular area of specialisation.

**ARCH5919**
**Honours Project 2**  
*Staff Contact: School Office*  
C60  
*Prerequisite:* ARCH5918  
The honours project provides opportunity for advanced study in a particular area of specialisation.

**ARCH5930**
**Science Seminar 1**  
*Staff Contact: School Office*  
C12  
*Prerequisite:* ARCH6101  
Student preparation of research programmes, methodologies, results and conclusions. Discussion and debate of ethical, environmental and related issues. Exercises in aspects of communication, computing, structures and environmental control.

**ARCH5931**
**Science Seminar 2**  
*Staff Contact: School Office*  
C6  
*Prerequisite:* ARCH5930  
Student presentation of research programs. Discussion and debate of ethical, environmental and related issues. Exercises in architectural construction, particularly relating to building defects and their prevention.

**Core subjects specific to BSc(Arch) Interior Design major**

**ARCH5960**
**Interior Design Studio 1**  
C36  
*Prerequisite:* ARCH6101  
A series of interior design projects dealing predominantly with small to medium scale domestic and commercial interiors interspersed with a number of basic design and colour theory exercises.

**ARCH5961**
**Interior Design Studio 2**  
C36  
*Prerequisite:* ARCH5960  
*Note/s:* Subject not offered in 1994.  
A series of interior design projects dealing with subjects selected from small to large scale community, commercial, heritage, public and semi-public interiors interspersed with a number of basic design and colour theory exercises.

**ARCH5962**
**Interior Design Studio 3**  
C18  
*Prerequisite:* ARCH5961  
*Note/s:* Subject not offered in 1994.  
A subject requiring a very high level of development of a design project selected from predominantly large-scale community, commercial, heritage, public and semi-public interiors.

**ARCH5963**
**Interior Design Research Project**  
C12  
*Prerequisite:* ARCH5961  
*Note/s:* Subject not offered in 1994.  
Research specifically for the Graduation Project submitted for assessment based on the demonstration of a professional level of research and presentation skills.
ARCH5964
Interior Design Graduation Project
C6
Prerequisite: ARCH5963
Note/s: Subject not offered in 1994.
An approved interior design project thoroughly executed from first client contact to at least the completion of all documentation - to a standard accepted as fully professional. To be monitored by means of regular appointments with a supervising member of staff.

ARCH5224
Computer Applications 3
C6
Prerequisite: ARCH5222
Note/s: Subject not offered in 1994.
Advanced techniques in computer aided modeling and visualisation.

ARCH5428
History of Art & Design 1
C6
Prerequisite: ARCH6401
A series of lectures dealing with the cultural significance of art and design throughout history with particular reference to the cultural and artistic heritage of the western world.

ARCH5429
History of Art and Design 2
C6
Prerequisite: ARCH5428
Note/s: Subject not offered in 1994.
A series of lectures devoted to a study of the history of art and design with particular reference to furniture design and interior design of the twentieth century.

ARCH5525
Furniture Design 1
C6
Prerequisite: ARCH6101
A series of research and design projects concentrating on the design and manufacture of furniture and furnishings. Practical work.

ARCH5526
Furniture Design 2
C6
Prerequisite: ARCH5525
Note/s: Subject not offered in 1994.
A series of research and design projects following on from Furniture Design 1 concentrating on the design and manufacture of furniture and furnishings. Practical work.

ARCH5527
Interior Materials
C6
Prerequisite: ARCH6101
Note/s: Subject not offered in 1994.
A series of lectures dealing with the manufacture, properties, characteristics and uses of a range of materials commonly used in interiors.

ARCH5528
Interior Finishes
C6
Prerequisite: ARCH6101
Note/s: Subject not offered in 1994.
A series of lectures dealing with a range of interior finishes.

ARCH5529
Fabric Design
C6
Prerequisite: ARCH6101
Note/s: Subject not offered in 1994.
A series of fabric design projects exploring the history, practice and theory of a wide range of techniques of weaving, dying, printing and use of fabrics used in interiors.

Elective Subjects

ARCH5942
Architectural Computing Seminar
Staff Contact: School Office
C15
Prerequisite: ARCH6205
Handson implementation and application of computing theory. Students are engaged in a selfdirected project involving significant usage of either an existing application program or the development of new software. The aim of this subject is to gain significant exposure to some aspect of architectural computing that is related to the particular interests of the student.

ARCH5943
Theory of Architectural Computing
Staff Contact: School Office
C12
Prerequisite: ARCH6201
A study of the body of knowledge that underlies the application of computers to the theory and practice of architecture. This subject looks initially at traditional approaches to architectural computing including space planning, facilities management, building performance analysis, information systems and operations research. It then extends that understanding to knowledge-based systems and knowledge representation techniques, shape grammars, expert systems and design information systems. Assessment is by means of essays and the preparation and presentation of a seminar paper.

ARCH5944
Information Technology for Architects
Staff Contact: School Office
C12
Prerequisite: ARCH6201
This subject introduces the issues, problems and solutions relating to the creation and distribution of information within architectural practices. It includes topics such as: database systems; interaction with CAD system graphics databases; transmission of data; networking and communication technologies; shared technical databases; establishment of product information standards; conceptual modelling techniques; and design information systems. Assessment is by means of projects and student seminars.
ARCH5945
CAD Management for Architects
Staff Contact: School Office
C12
Prerequisite: ARCH6201
This subject raises the issues relating to the implementation and management of CAD systems in architectural practices. Topics will include: CAD system selection and installation; cost issues (purchase, maintenance, upgrades); political implications within practices; software customisation; resource management; office standards; and training. Assessment is by means of projects and student seminars.

Summer Term Subjects
The following subjects are offered only in Summer Term. Not all subjects may be offered in any year.

ARCH6140
Design 'A'
Staff Contact: School Office
C30
Architectural synthesis is the central function of the design studio. The vehicles for study are projects and exercises of increasing complexity and depth covering a wide range of building types. Students are encouraged to seek design solutions which cater for the full range of human needs and aspirations. The studio provides continuing opportunities to consider the environmental, social, historic, aesthetic, technical and professional factors affecting architecture and the architect's role in the community. Design "A" is concerned with the design of simple residential and non-residential buildings with few spaces, relatively simple functional relationships for clearly defined and familiar user groups on straightforward sites requiring basic contextual understanding. Integration of structural, constructional, servicing and environmental control concepts. Development of the design process. Individual work on a series of design projects of varying complexity and length.

ARCH6340
Theory of Architecture 'A'
Staff Contact: School Office
C15
The object of the subject is to lead to an understanding and application of the principles of design, in particular architectural design. The fundamental purpose of architectural design, the enhancement of life-events by spatial arrangements is illuminated by the logic of the process of designation - aim, possibilities, idea, acts and fulfilment. The exploration of the design process embraces both the physical and non-physical requirements and influences; the measure of the human body and of the collective events of many bodies; the mental and cultural influences operating in such events; the meaning of spatial extensions, directions, closure and order, especially geometric order.

The importance of the relationship between human behaviour and the built environment is introduced with an emphasis upon personal space, community and privacy, and the various characteristics of the public domain. Composition, especially the theory of wholes and parts is examined in the light of unity and multiplicity, continuity and change: principles and conditions applicable either to a single building or, in a much wider context, to the task of fitting a building into its physical and cultural environment.

ARCH6440
History of World Architecture 'A'
Staff Contact: School Office
C15
The role of architectural history. An account of world architecture from the earliest times to the present day, generally but not exclusively following a chronological format, covering such topics as: nomadic lifestyles and the beginnings of civilisation; ancient and mediaeval civilisations in Europe, the Middle East, Asia and the Americas; the growth of Christianity, Islam and the other major religions; the Renaissance and its effects around the world; the Industrial Revolution in Europe and North America; European Imperialism; the architecture of the twentieth century; Australian architecture. Visits to sites in and around Sydney. Seminars and project work.

ARCH5926
Architectural Studies 4
Staff Contact: School Office
C15
An elective designed for students wishing to pursue an independent course of study in a field of architecture not falling specifically within the domain of any other elective. Students wishing to undertake a number of these research subjects are encouraged to think of these subjects as following on from each other and that, together, they form a larger package of academic study.

ARCH5927
Architectural Studies 5
Staff Contact: School Office
C15
An elective designed for students wishing to pursue an independent course of study in a field of architecture not falling specifically within the domain of any other elective. Students wishing to undertake a number of these research subjects are encouraged to think of these subjects as following on from each other and that, together, they form a larger package of academic study.

ARCH5928
Architectural Studies 6
Staff Contact: School Office
C15
An elective designed for students wishing to pursue an independent course of study in a field of architecture not falling specifically within the domain of any other elective. Students wishing to undertake a number of these research subjects are encouraged to think of these subjects as following on from each other and that, together, they form a larger package of academic study.

ARCH5540
Technological Design Development
Staff Contact: School Office
C15
Prerequisite: ARCH6105
This subject will investigate in detail the technological requirements of technology-intensive buildings. Methodology; owners' and managers' requirements. Site, access and foundation constraints; constructional processes; structural systems and materials; cladding and
enclosure; finishing materials and fittings; services (environmental control, lighting, acoustics, transportation and communication); fire and egress constraints; security and building management, etc. The application of the above considerations to aspects of the design development of a schematic proposal for a suitable building. The major vehicle for both teaching and assessment project that has already been taken to a schematic stage; above considerations to aspects of the design development of a schematic proposal for a suitable building. The major stage where potential would be a design project that has already been taken to a schematic stage; it will be the student's task to develop this project to the stage where all building systems have been selected, and where potential conflicts between systems have been resolved to the point where satisfactory details can be prepared. The student brief would contain a statement of user-needs, and a proposed schematic solution; the student would be required to work within the confines of the given proposal, and would not be permitted to re-design the schematic. Site visits.

ARCH5741
Design for Environmental Efficiency
Staff Contact: School Office
C15
This subject aims to bring together the basic knowledge of environmental science gained in the junior years of the Bachelor of Architecture course and develop it in a structured manner which would make it applicable to real design situations. In any balanced design solution there is an equal interplay of the built environment, the natural environment and human participation. An imbalance of any of these factors will result in architectural failure. This subject will investigate real problems in the built environment as we attempt to address the issues of a sustainable environment. Class contact times will include visiting speakers, workshops for sustainable ideas, site visits and debates. Assessment will be based on involvement, participation and the submission of a report related to an area of study.

Building

Year 1
Session 1

BLDG1001
Construction 1 (Domestic Buildings)
Staff Contact: Mr C.D. Smythe
C3 S1 HPW3
Note/s: Compulsory.

Functional requirements and methods of building single family dwellings: brick, brick veneer and timber frame; domestic joinery; staircase construction; finishes; plumbing, drainage and electrical services; methods of setting out and supervision, on site observation and report on house construction.

BLDG1010
Communications and Resource Usage
Staff Contact: Mr J. Kim and Mr D. Lawson
C3 S1 HPW3
Note/s: Compulsory.

Using the library. Accessing information: reading, summarizing and report writing. Organization of and participation in meetings, seminars and lectures. Graphic communication: photography, drafting and detailing.

BLDG1091
Built Environment 1
Staff Contact: Prof J. Haskell
C2 S1 HPW2
Note/s: Compulsory.
The intention is to develop an understanding of the relevance of man's "culture" (that thing which his social, economic, political, religious and physical environment gives rise to) to the nature of buildings and settlements which he devises, and an appreciation of the architecture and building (in particular in terms of materials and construction) of those cultures which can be seen to be providing the line to modern 'western' building from as far back as "the stone ages".

BLDG1111
Building Science 1 (Materials)
Staff Contact: Mr D. Lawson
C4 S1 HPW4
Note/s: Compulsory.

BLDG1170
Mathematics for Builders
Staff Contact: Prof A.R. Toakley
C4 S1 HPW4
Note/s: Compulsory.
Calculus: differentiation and integration; practical applications. Probability: sample spaces and probabilities; probability trees; distribution of random variables; expected value and decision analysis. Statistics: mean, mode, median, standard deviation and variance; normal and binomial distributions; linear regression.

BLDG1261
Management 1 (Management Principles)
Staff Contact: Mr G.E. Levido
C2 S1 HPW2
Note/s: Compulsory.

Session 2

BLDG1002
Construction 2 (Low Rise Domestic)
Staff Contact: Mr C.D. Smythe
C4 S2 HPW4
Prerequisites: BLDG1001, BLDG1010
Note/s: Compulsory
Small multistorey buildings from the functional and construction operation viewpoints. Quality control and supervision. Basement, ground floor and upper floor construction; methods of roofing, waterproofing; joinery; internal finishes; minor construction plant, formwork.
Construction drafting, on-site observation and report on home unit building.

**BLDG1051**  
**Structures 1**  
*Staff Contact: Dr O. Greoste & Mr J. Senogles*  
C3 S2 HPW3  
*Note/s: Compulsory.*

Loads on structures: external and internal forces; free body diagrams; conditions of force and moment equilibrium. Analysis of statically determinate structures; member forces in pin-jointed trusses. Beam section properties; bending moment, shear force and deflection diagrams; stresses in bending and shear. Qualitative structural behaviour of arch, cable, membrane, plate and shell structures; the function of bracing.

**BLDG1151**  
**Building Services 1 (Hydraulics)**  
*Staff Contact: Mr N. Kenny*  
C2 S2 HPW2  
*Note/s: Compulsory.*

Hydraulic services pertaining to small and medium size projects; hot and cold water reticulation; sewer and storm water drainage; sanitary plumbing; introduction to fire fighting equipment and services; regulatory authorities and requirements.

**BLDG1271**  
**Law for Builders 1**  
*Staff Contact: Mr I. George*  
C2 S2 HPW2  
*Note/s: Compulsory.*

Law, including brief outline of sources of law in New South Wales and the system of judicial precedent. General principles of law of contracts. Contractual rights and obligations. Court structures; sale of goods; a general introduction to the law of bankruptcy. General principles of law of agency. Law of partnership.

**BLDG1311**  
**Building Economics 1**  
*Staff Contact: Mr B. Reece*  
C3 S2 HPW3  
*Note/s: Compulsory.*

Introduction to building economics, the interrelationship between the national economy and the building industry; quantitative techniques and the interpretation of economic data, economic principles applied to aspects of the building industry; introductory investment analysis and decision theory.

**PHYS1939**  
**Physics 1 (Building and Design)**  
*Staff Contact: First Year Director*  
C4 S2 HPW4  

Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism: electric and magnetic fields; DC circuits; electromagnetic induction. Sound: wave properties; absorption of sound. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

**Year 2**  
**Session 3**

**BLDG2003**  
**Construction 3 (Framed Building)**  
*Staff Contact: Mr C.D. Smythe*  
C4 S3 HPW4  
*Prerequisites: BLDG1002, BLDG1151*  
*Note/s: Compulsory.*

Study of structural steel and concrete frames; large span factory roofing, precast concrete walling, welding techniques, fire requirements, cladding methods, installation of cranes and machine footings, site works, dewatering, shoring, piling on site observation and report on factory building.

**BLDG2052**  
**Structures 2**  
*Staff Contact: Dr O. Greoste*  
Prerequisites: BLDG1051  
C4 S3 HPW4  
*Note/s: Compulsory.*

**BLDG2262**  
**Management 2 (Planning)**  
*Staff Contact: A/Prof T. Uher*  
C3 S3 HPW3  
*Prerequisite: BLDG1261*  
*Note/s: Compulsory.*

Operation Research techniques and their relevance to building, concept of planning and control, CPM, PERT, Line of Balance, Multactivity Chart, computer applications of CPM. Principles and application of Work Study. Risk analysis, decision making process.

**BLDG2281**  
**Introduction to Computing**  
*Staff Contact: Dr O. Greoste*  
C2 S3 HPW2  
*Note/s: Compulsory.*

Introduction to programming with Pascal; use of spreadsheet, word processor and data base software using personal computers; introduction to operating system functions. Overview of computer hardware and applications software. Awareness of computer use in society and its social impact.

**ACCT9002**  
**Introduction to Accounting B**  
*Staff Contact: School Office*  
S2 L1.5  
*Prerequisite: ACCT9001*  
*Note/s: Architecture - 2 credit points; compulsory for BBuild degree course students.*

Introduces non-commerce students to managerial accounting: long-range planning, budgeting and
responsibility accounting; cost determination, cost control and relevant cost analyses.

SURV0411
Surveying for Builders
Staff Contact: Mr P. Amin
C2 S3 HPW4
Note/s: Compulsory

Session 4

BLDG2112
Building Science 2 (Concrete and Metals)
Staff Contact: Dr N. Gowripalan & Dr S. Bandyopadhyay
C4 S4 HPW4
Note/s: Compulsory.
Concrete technology: cement, aggregates, water and admixtures; properties of fresh concrete; strength considerations; durability, shrinkage and creep; special concretes; nondestructive testing; mix design. Metals in building: structural ferrous alloys; structural and architectural nonferrous alloys; corrosion and protection; welding; types of failure, brittleness fracture, fatigue, creep; impact resistance; tensile properties; hardness; strain hardening. Fire: behaviour of building materials and structures.

BLDG2152
Building Services 2 (Mechanical)
Staff Contact: Mr G. Hogan
C2 S4 HPW2
Prerequisites: PHYS1939, BLDG1151
Note/s: Compulsory.
Ventilation theory; ventilation systems and equipment; refrigeration theory; air conditioning heat loads; air conditioning equipment; electrical equipment; telephones and security; lifts and escalators; detection and fire protection; garbage and incinerators.

BLDG2263
Management 3 (Contracts)
Staff Contact: A/Prof T. Uher & Mr P. Davenport
C3 S4 HPW3
Prerequisite: BLDG2262
Note/s: Compulsory.
Concept of contracting and subcontracting, different options for project delivery. Contract law, building contracts and contract administration, standard forms of contracts, contract claims and disputes, contract negotiation. Principles of insurance, contract insurance, professional negligence.

BLDG2301
Quantitative Surveying 1
Staff Contact: Mr P. Marsden
C4 S4 HPW4
Note/s: Compulsory.
Quantitative surveying; historical background; functions of the quantity surveyor; introduction to Australian Standard Method of Measurement of Building Works, its importance and application; methods of recording dimensions, checking and correlating plans and specifications; principles of measurement and billing; Bill of Quantities format; elementary billing and measurement of basic trades including finishes, brickwork, woodwork, roofing, concrete and groundworks.

ACCT9002
Introduction to Accounting B
Staff Contact: Mr B. Booth
C2 S4 HPW2
Prerequisite: ACCT9001
Note/s: Compulsory.
An introduction for noncommerce students to managerial accounting. Longrange planning, budgeting and responsibility accounting: cost determination, cost control and relevant cost analyses.

Year 3
Session 5

BLDG3004
Construction 4 (Highrise Buildings)
Staff Contact: A/Prof R. Miller & Dr D. Lawson
C4 S5 HPW4
Prerequisites: BLDG2003, BLDG2052
Note/s: Compulsory.
Functional requirements and building techniques of highrise buildings and major building projects; structural systems, enclosure systems and environmental control systems and their interrelation from a building standpoint; various methods and materials commonly used to solve functional demands; comparison of systems of construction, selection of plant and equipment; cranes, hoists, concrete pumps etc.; building loads and load factors; stability of structures and structural components; creep, settlement and other movement; principles of fire protection in highrise projects; cladding in concrete, metal and glass; ceiling and partition systems; integration and co-ordination of services. On site observation and report on high rise building.

BLDG3264
Management 4 (Personnel Management)
Staff Contact: Mr D. Dombkins
C3 S5 HPW3
Prerequisite: BLDG2263
Note/s: Compulsory.
Personnel management, human motivation, employment, industrial relations, employers and employer groups, unions and unionism. Conciliation and arbitration. Site organization (labour aspects), safety management.

BLDG3272
Law for Builders 2
Staff Contact: Mr P. Davenport
C2 S5 HPW2
Prerequisite: BLDG1271
Note/s: Compulsory.
Commercial law; Corporations; Trade practices; Consumer protection; Torts; Remedies; Succession; Local government; Real property; Administrative law.

BLDG3282
Computer Applications in Building
Staff Contact: Dr O. Grieste
C2 S5 HPW2
Prerequisite: BLDG2281
Note/s: Compulsory.

Use of MS-Excel for developing feasibility, estimating, data base and other spreadsheet applications in building; use of MS-Project for project planning. Introduction to relational data file structures. Current hardware, software, and communications developments. Computer applications in quantity surveying, estimating and construction management.

BLDG3302
Quantity Surveying 2
Staff Contact: Mr P. Marsden
C4 S5 HPW4
Prerequisite: BLDG2301
Note/s: Compulsory.

Advanced billing and measurement of structural and services trades; preliminaries, etc in accordance with Standard Method of Measurement of Building Works; contract administration; exercises in variations, cost adjustment and progress claims; relationship between the Specification and the Bill of Quantities.

Session 6

BLDG3005
Construction 5 (Techniques)
Staff Contact: A/Prof R. Miller & Mr D. Lawson
C4 S6 HPW4
Prerequisite: BLDG3004
Note/s: Compulsory.

Specialized building techniques employed on major projects including the use of plant, equipment and various construction systems: excavation equipment, shoring, ground anchorage, pile drivers, formwork, slip form, craneage, concrete handling. Construction methods with minimal impact on the environment. Integrated construction systems. Students undertake onsite studies. Emphasis on method of construction rather than the attributes of the finished product.

BLDG3050
Soil Mechanics for Building
Staff Contact: Dr S. Valliappan
C2 S6 HPW2
Note/s: Compulsory.

The origins and formation of soils; clay mineralogy; classification of soils; soil as an engineering material; site investigation; boring, sampling and insitu testing; shear strength of soils; stress distribution in earth masses; consolidation and settlement; earth pressure calculations; bearing capacity; improvement of soil properties by compaction and stabilization; introduction to foundation design; laboratory testing of soils.

BLDG3265
Management 5 (Project Management)
Staff Contact: Mr G.E. Levado
C3 S6 HPW3
Prerequisite: BLDG3264
Note/s: Compulsory.

BLDG3312
Building Economics 2
Staff Contact: Dr J. Hutcheson
C3 S6 HPW3
Prerequisite: ACCT9002
Note/s: Compulsory.

The business environment; business structures; taxation, depreciation; operating costs; economics of building plant and materials handling systems; financial control in the erection, management and demolition of buildings.

BLDG3321
Estimating 1
Staff Contact: Mr P. Marsden
C2 S6 HPW2
Prerequisite: BLDG2301
Note/s: Compulsory.

Introduction to techniques used by building estimators. Topics include the analysis of costs of material, plant and labour, and the estimation of unit rates; labour and plant scheduling, preliminary items, general and site overheads, the preliminary estimate.

Year 4

Session 7

BLDG4006
Construction 6 (Industrialization and Technological Change)
Staff Contact: A/Prof M. Marosszeky
C2 S7 L2
Prerequisite: BLDG3005
Note/s: Elective.

Factors influencing change in building techniques: technological change in building; implication of level of demand; new products, materials and processes; the regulatory system; the effect of government policy. The implications of changing techniques; the changing structure of work, skills loss, methodologies for coordinating building components; the evaluation of performance, social consequences of industrialization. Teaching centres around case studies of Australian and overseas building techniques, building systems, construction systems, portable buildings and mobile homes.

BLDG4266
Management 6 (Corporate Strategy)
Staff Contact: Dr J. Hutcheson
C2 S7 HPW2
Prerequisite: BLDG3265
Note/s: Elective.

Corporate strategy and the overall general management of an enterprise in the building and development industry, derivation of policy by top management together with planning of policy implementation; tax planning. There is an integration and application of knowledge acquired in previous and concurrent courses. By using case studies students appraise the present position and future prospects of enterprises in the building industry; assess potential risks and opportunities; plan the human and physical resources and activities of the enterprises required to achieve corporate objectives.
BLDG4267
Management 7 (Marketing)
Staff Contact: Dr J. Hutcheson
C3 S7 HPW3
Prerequisite: BLDG3265
Note/s: Elective.
Marketing for builders and developers in the Australian and Pacific environment with particular emphasis on the marketing mix, the relationship between a marketing system and its environment, development of marketing, tactics and strategy, market segmentation and the buyer decision process. Listing, selling and the auction process.

BLDG4273
Law for Builders 3
Staff Contact: Mr I. Morrison
C3 S7 HPW3
Prerequisite: BLDG3272
Note/s: Elective.
Recognition of the significance of different land titles, tenures and interests in land; understand the construction and content of contracts, leases and other forms of agreement required for property dealings and use; develop a familiarity with public and private controls and restrictions on land use and development; appreciate the relationship between planning policies at all levels and the valuation process; a knowledge of the valuation review and determination processes of the Land and Environment Court and similar tribunals; appreciate the requirements for presentation of evidence as an expert witness; acquire a familiarity with major court cases, relevant to a valuer, which establish valuation principles; understand the major objectives of principal New South Wales Acts dealing with real estate or interests therein.

BLDG4313
Building Economics 3
Staff Contact: Dr J. Hutcheson
C2 S7 HPW2
Prerequisite: BLDG3312
Note/s: Elective.
Capital investment analysis; advanced investment evaluation; feasibility studies; financial management and analysis; growth and development; the financial market.

BLDG4322
Estimating 2
Staff Contact: Mr P. Marsden
C2 S7 HPW2
Prerequisite: BLDG3321
Note/s: Elective.
Advanced estimating techniques, competitive tendering, contract cost adjustments; computer techniques applied to estimating.

BLDG4390
Property Valuation
Staff Contact: Mr C.D. Smythe
C3 S7 L3
Note/s: Elective.

BLDG4401
Thesis Preparation
Staff Contact: Mr G. Runeson
C6 S7 HPW2
Note/s: Compulsory.
Thesis research requirements, format, writing style, mode of referencing, information sources, library facilities and thesis topic selection. Students will be required to produce a summary of objectives, a plan for their subsequent thesis research and a preparatory table of contents.

Session 8
BLDG4007
Construction 7 (Special Project)
Staff Contact: Mr G. Levido
S8 L2
Prerequisite: BLDG3005
Note/s: Elective.
The study of special advanced topics in building construction on either a group or individual basis.

BLDG4113
Building Science 3 (Energy and Thermal)
Staff Contact: Mr D. Hassall
C3 S8 HPW3
Note/s: Elective.

BLDG4114
Building Science 4 (Timber)
Staff Contact: Mr D. Lawson
C2 S8 HPW2
Note/s: Elective.
The production and marketing of timber; test methods and properties; stress grading of timber, codes of practice, chemical, physical and biological attack and weathering of timber, protection and preservation; thermal, acoustic and aesthetic properties: factory techniques, plywood, particle board, hardboard, softboard, prefabricated building components, laminated beams.

BLDG4274
Commercial Arbitration
Staff Contact: Mr P. Davenport
C3 S8 HPW3
Prerequisite: BLDG2263
Note/s: Elective.
The nature and function of arbitration in relation to building contract disputes, the parties to arbitration, the arbitrator, his /her duties and powers. Case studies, moot arbitration.

BLDG4284
Building Information Systems
Staff Contact: Dr O. Greste & A/Prof R. Miller
C3 S8 HPW3
Prerequisite: BLDG3282
Note/s: Elective.
The specification, development and use of computer based information systems in the management of building
companies. Information system components, attributes and lifecycle; system and procedure representation tools. Data files structures and access modes; database systems. Information system response, distribution, size and controls; logical and physical design. Computer hardware; communications; local area networks. Case studies of computer systems in building construction and management companies. The subject involves extensive use of microcomputer based database and spreadsheet packages.

**BLDG4303**
*Quantity Surveying 3*
*Staff Contact: Mr P. Marsden*  
*C3 S8 HPW3*
*Prerequisite: BLDG3302*
*Note/s: Elective.*

Functions of the cost planner; liaison with consultants; cost planning techniques including practical exercises; cost control and design economics; professional practice.

**BLDG4391**
*Land Economics*
*Staff Contact: Mr G. Beckett*  
*C3 S8 HPW3*
*Prerequisite: BLDG3312, BLDG4390*
*Note/s: Elective.*

Ability to apply relevant valuation techniques to a broad range of common land use types; acquisition of knowledge of efficient property management techniques; identification of a range of unusual property types which require specialised valuation skills and knowledge and the means of developing such skills and knowledge; knowledge to develop novel valuation techniques for application to specific property types; ability to determine the highest and best use for nominated property types; the application of inspection techniques for broad property types; competency in the use of property valuation and inspection aids; familiarity with resource materials and information sources required to undertake specific types of valuation.

**BLDG4392**
*Property Development*
*Staff Contact: Dr J. Hutcheson*  
*C2 S8 HPW2*
*Prerequisite: BLDG3312*
*Note/s: Elective.*

A total approach to the building process through the four stages of predesign, design, construction and postconstruction. Market research, establishing client's needs, site selection and analysis, feasibility studies and financing methods. Selection and monitoring the work of the design team, preliminary designs, preparation of development applications, cost value analysis, value management, life cycle costing and services integration. Preplanning the building process, utilization of construction and management consultants. Development control during construction and in completion, tenant fitouts and handing over to clients of the completed project.

**BLDG4393**
*Management of Buildings*
*Staff Contact: Dr J. Hutcheson*  
*C2 S8 HPW2*
*Note/s: Elective.*

Maintenance and obsolescence; economics of refurbishment; marketing; tenancy management; building control and security systems; management of commercial, retail, industrial and large scale residential complexes; legal aspects of tenancy management; energy conservation; taxation law and implications.

**Other Subjects**

**BLDG4402**
*Thesis*
*Staff Contact: Mr G. E. Levido*  
*C6 S8*
*Prerequisite: BLDG4401*
*Note/s: Compulsory.*

Results of research on selected Thesis topic, written up in technical report format. The Thesis requires the student to survey the literature on the chosen topic, collect information and data, effectively process and document the research results and draw reasoned conclusions from them.

**BLDG9900**
*Special Programme*
*Staff Contact: Mr G. E. Levido*  
*S7 or 8 HPW2*
*Note/s: Elective.*

This subject, to be presented by visiting lecturers, would allow presentation of subject material not covered elsewhere in the course. The subject is to be presented on an occasional basis; subject content dependent on lecturer.

**BLDG9998**
*Quantity Surveying Industry Program*
*Staff Contact: Mr B. Reece*  
*S2-6*
*Note/s: Compulsory.*

Students proposing to apply for membership in the Australian Institute of Quantity Surveyors after graduation should enrol in this subject rather than BLDG9999. It must be completed before the start of the final year of the course. The Industry Program is to be taken as a six months continuous employment with a professional Quantity Surveying firm or with a firm or building company where quantity surveying activities are undertaken. Students should be under the direct supervision of a corporate member of the Australian Institute of Quantity Surveyors or, where this is not possible, the guidance of a mentor appointed by the Institute. Submission requirements are a daily diary, report and a completed form from the employer.

**BLDG9999**
*Building Industry Program*
*Staff Contact: Mr B. Reece*  
*S18*
*Note/s: Compulsory.*

6 months of approved building industry experience at any time prior to graduation. Qualification for membership of the Australian Institute of Building requires that 80 days of the industry experience be completed prior to the start of the final session of the course. Submission requirements are a daily diary, report and a completed form from the employer.
Industrial Design

Design Studios

IDES1021
Basic Design
Staff Contact: Department Office
C4 S1 L1 T3
The basic elements of two and three dimensional design, and the development of the analytical and communication skills necessary for their understanding. Development of the creative processes concerned with the exploration and manipulation of the elements. Studies are undertaken within the context of art and design.

IDES1031
Design Studio 1
Staff Contact: Department Office
C4 S2 L1 T3
Corequisites: IDES1021
Theoretical and project work to introduce design methodologies and their application to three dimensional design problems.

IDES2161
Industrial Design Studio 2
Staff Contact: Department Office
C10 F L1 T4
Prerequisite: IDES1031
The introduction of industrial design and research methodologies. Studies and projects are undertaken within the context of social, commercial and industrial requirements.

IDES3221
Industrial Design Studio 3
Staff Contact: Department Office
C10 F L1 T4
Prerequisite: IDES2161
Continuation of the theoretical and project work of Industrial Design Studio 2. These two subjects cover examples from the range of major industrial design problems.

IDES4291
Industrial Design Studio 4
Staff Contact: Department Office
C5 S1 L1 T4
Prerequisite: IDES3221
Advanced theoretical and project work taking a particular project to an advanced state of development, preparatory to undertaking the Project.

IDES4301
Project Research
Staff Contact: Department Office
C4 S1 L1 T3
Prerequisite: IDES3221
Product research methodologies and their application to an individual project chosen in conjunction with the School. This work provides the research basis for the Project.

IDES4321
Environmental & Interior Design for Industrial Designers
Staff Contact: Department Office
C2 S1 L1 T2
Prerequisite: IDES2161
Understanding the nature of environmental space and spatial ambience, and the relationship of objects and products to the surrounding space. Environmental and interior design projects.

IDES4351
Project
Staff Contact: Department Office
C12 L1 T11
Prerequisite: IDES3221
Corequisites: IDES4301
A project within the practice areas of industrial design, chosen by the student in consultation with the School at the commencement of Project Research. The project is based upon the research base established in Project Research.

Design Skills

IDES1011
Workshop Technology
Staff Contact: Department Office
S2 L0.5 T1.5
Introduction to workshop techniques involved in the production of models and prototypes. Development of safe working practices using a range of hand tools and basic machining processes.

IDES1041
Visual Thinking & Drawing
Staff Contact: Department Office
C4 S1 L1 T3
The development of the capacity to see and the hand/eye co-ordination skills to record what is seen using a variety of media and methods. The capacity to develop and express visual concepts. The relationship between visual thinking and creative processes.

IDES1051
Geometrical & Mechanical Drawing
Staff Contact: Department Office
C4 S1 L1 T3
Introduction to orthographic drawing with particular reference to the Australian Engineering Drawing Standard. Mechanical projections other than perspective. Descriptive geometry and the analysis and synthesis of form and spatial relationships.

IDES2101
Perspective & Rendering Techniques
Staff Contact: Department Office
C4 S2 L1 T3
Prerequisites: IDES1041 and IDES1051
Review of the major mechanical perspective systems and rendering techniques with particular reference to their applications in product design. Project studies are undertaken within the range of systems and media.
IDES2121
Introduction to Computing
Staff Contact: Department Office
C3 S2 L1 T2

Introduction to the computer with emphasis on its application in industrial design, engineering and information systems. Hardware and software. Experience in the use of equipment and development of basic programming skills.

IDES2171
Computer Aided Design
Staff Contact: Department Office
C4 L2 T2
Prerequisite: IDES2121

Computer aided design and drafting systems and their applications in product development. Mathematical optimization techniques.

IDES3231
Computer Graphic Applications
Staff Contact: Department Office
C4 L2 T2
Prerequisite: IDES2171

Development of Computer Aided Drafting with particular reference to perspective and rendering techniques using computing equipment, as well as the application of computing to other graphic problems.

IDES3281
Photography for Industrial Design
Staff Contact: Department Office
C2 S2 L1 T1
Prerequisite: IDES2161

The theory and practice of colour and black and white photography with particular reference to product and design presentation applications. Projects develop studio and dark room skills.

IDES4311
Graphic Design for Industrial Designers
Staff Contact: Department Office
C3 S1 L1 T2
Prerequisite: IDES1031

The major graphic production processes, and their application in graphic design. Type and typesetting systems. Graphic design projects.

Design Theory

IDES1061
History of Art/Architecture/Design
Staff Contact: Department Office
C1 S1 L1

General overview of the history of art, architecture and design from earliest times to the present, within the context of aesthetic and sociocultural influences.

IDES2091
Design Methodology
Staff Contact: Department Office
C1 2 L1
Prerequisite: IDES1031

Design methodology and its applications in the industrial situation, analysis of problems, strategy planning, the application of research methods. The methods. The problem of problem solving.

IDES2151
Product Studies Seminars
Staff Contact: Department Office
C2 T2
Prerequisite: IDES1031
Corequisites: IDES2161

A series of case studies, in which products and their related systems are analysed for design, engineering, marketing and production factors and qualities. The Seminars are given by panels of staff experts and professional practitioners. The subject is taken during years 2, 3 and 4. Students undertake an assignment based on the Seminars and submit it during Year 4.

IDES3271
Form Theory
Staff Contact: Department Office
C1 S2 L1
Prerequisite: IDES1021

Study of form in nature, art and design. Theories of form. Form organisation, typology, and description.

IDES4331
History of Consumer Products
Staff Contact: Department Office
C0.5 LO.5
Prerequisite: IDES1061
Corequisites: IDES4341

Products as an aspect of our culture/society and commerce/industry from 1750 to the present day. The development of consumer products is examined within the context of the changes taking place in industry and society.

IDES4341
History of Industrial Design
Staff Contact: Department Office
C0.5 LO.5
Prerequisite: IDES1061
Corequisites: IDES4331

This subject is normally taken in conjunction with IDES229 and is a chronological study of the emergency and development of industrial design from 1850 to the present day.

IDES4361
Professional Practice
Staff Contact: Department Office
C1 L1
Prerequisite: IDES2161

Professional practice in industry and on consultancies. Organisation and management of design offices and projects. Professional and ethical responsibilities. Contracts, determination of fees, patents, design registrations, legal responsibilities and liabilities.

IDES4371
Managing Product Innovation and Development
Staff Contact: Department Office
C1 L1
Prerequisite: IDES2091

The problem of integrating innovative product design and development within the overall managerial and financial structure of industry. Australian and overseas case studies.
are given. Particular emphasis is placed on the development of appropriate design management structures and methods for the Australian situation.

**Ergonomics**

IDES1073
Principles of Ergonomics  
*Staff Contact: Department Office*  
C2 S1 L2

Applied anatomy and kinesiology, anthropometrics and application in product and environmental design. Physiological and psychological aspects of ergonomics, work, environment effects, manmachine interface. Principles of ergonomics research methods.

IDES2193
Applied Ergonomics  
*Staff Contact: Department Office*  
C3 L1.5 T1.5  
*Prerequisite: IDES1073*

Analysis of ergonomic requirements within the context of product development. Ergonomic methodology and experimental methods and their application in the product research and development process.

**Industrial Experience**

IDES4391
Industrial Experience  
*Staff Contact: Department Office*  
C2 S2  
*Prerequisite: IDES2161*

Students obtain 3 months of approved practical experience in a design office. The subject may be taken from the end of the second year but at least half of the requirement must be taken from the end of the third year. The subject cannot be taken in units of less than 1 month. The experience is to be recorded in a logbook to be signed by the employer.

**Science and Engineering Subjects**

IDES1082
Engineering Design Mechanics  
*Staff Contact: Department Office*  
C4 S2 L2 T2  
*Prerequisites: MATH1021 and PHYS1939*

IDES2132
Introduction to Materials Science  
*Staff Contact: Department Office*  
C1 S1 L1  
*Prerequisite: PHYS1939*

Structure and properties of major engineering materials, including polymers and timbers. Including materials recognition and design potential.

IDES2142
Mechanics of Solids for Industrial Design  
*Staff Contact: Department Office*  
C3 S1 L2 T1  
*Prerequisite: IDES1082*

IDES2182
Materials and Manufacturing Processes for Industrial Designers A  
*Staff Contact: Department Office*  
C2 L2 T1  
*Prerequisite: IDES2132*

Engineering materials including polymers and timbers and their application in manufacturing processes. The range of processes.

IDES3202
Materials and Manufacturing Process for Industrial Designers B  
*Staff Contact: Department Office*  
C3 S2 L2 T1  
*Prerequisite: IDES2182*

Economics of production processes, design constraints alternate design and manufacturing strategies. Test procedures.

IDES3212
Electrical Engineering for Industrial Design A  
*Staff Contact: Department Office*  
C2 L1.5 TO.5  
*Prerequisite: PHYS1939*

Ohm's law, concepts of AC and DC voltage and current. The basics of transformers, motors and electromechanical product systems. Electromagnetic interference, shielding and earthing.

IDES3252
Electrical Engineering for Industrial Design B  
*Staff Contact: Department Office*  
C2 S2 L1 T1  
*Prerequisite: IDES3212*

IDES3262
Production Design and Technology for Industrial Design  
*Staff Contact: Department Office*  
C2 S2 L1.5 TO.5  

Basic metrology and tolerancing, introduction to plasticity theory and its application to theories for machining and forming, economics of production processes; interaction of machines and tools; principles of process selection; review of major processes, interaction of design, production quantity, materials and processes; value analysis, design constraints. Quality assurance.
IDES4382  
**Production Management for Industrial Design**  
*Staff Contact: Department Office*  
C2 S2 L1.5 TO.5  
**Prerequisite:** IDES2182  
Methods engineering, motion and time study, financial incentives, applications to machine controlled processes, work sampling and data collection. Factory layout. Control of jobbing, repetitive batch and continuous production. Manufacturing organisations, functions, interrelationships and information flow. Sampling techniques in quality control, control charts, quality assurance. Economic objectives of the firm. Economic measure of performance net present value, annual equivalent value and the DCF rate of return (including the incremental rate of return) and their application in the selection and replacement of processes and equipment.

MATH1011  
**General Mathematics 1B**  
*Staff Contact: School of Mathematics First Year Office*  
U1 S1 HPW6  
**Prerequisites:** HSC exam score range required: 2 unit Mathematics (60100) or 2 and 3 unit Mathematics (1150) or 3 and 4 unit Mathematics (1200). (2 unit Mathematics in this instance refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject. It does not refer to the subjects Mathematics in Society or Mathematics in Practice. These numbers may vary from year to year.)  
**Note/s:** Excluded MATH1032, MATH1042, ECON2200, ECON2201, ECON2202.

MATH1021  
**General Mathematics 1C**  
*Staff Contact: School of Mathematics First Year Office*  
U1 S2 HPW6  
**Prerequisite:** MATH1011  
**Note/s:** Excluded MATH1032, MATH1042, ECON2200, ECON2201, ECON2202.

MATH2819  
**Statistics SA**  
*Staff Contact: School Office*  
U1 F HPW2  
**Prerequisite:** MATH1021 or MATH1032  
**Note/s:** Restricted to Science students in programs 6832, 6833 and course 3950.

Probability, random variables, independence. Binomial, Poisson and normal distributions, transformations to normality, estimation of mean and variance, confidence intervals, tests of hypotheses, contingency tables, two sample tests of location, simple and multiple linear regression, analysis of variance for simple models.

PHYS1939  
**Physics 1 (Building and Industrial Design)**  
*Staff Contact: First Year Director*  
Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism: electric and magnetic fields; DC circuits; electromagnetic induction. Sound: wave properties; absorption of sound. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

**Commerce Subjects**

ACCT9001  
**Introduction to Accounting A**  
*Staff Contact: School Office*  
S1 L1.5  
**Note/s:** Architecture - 2 credit points compulsory for BBuild degree course students.  
Introduces non-commodity students to the nature, purpose and conceptual foundation of accounting: information systems including accounting applications, and analysis and use of accounting reports.

ACCT9002  
**Introduction to Accounting B**  
*Staff Contact: School Office*  
S2 L1.5  
**Prerequisite:** ACCT9001  
Introduces non-commerce students to managerial accounting: long-range planning, budgeting and responsibility accounting; cost determination, cost control and relevant cost analyses.

MARK2012  
**Marketing Fundamentals**  
*Staff Contact: School Office*  
S1 L2 T2  
**Prerequisites:** ACCT1511, ECON1102, ECON1203  
**Corequisite:** MARK2032  
This subject provides a conceptual framework for developing and understanding of marketing including the marketing process, marketing environment and marketing planning. It covers product, service, consumer, industrial, global and social aspects of marketing and introduces the marketing mix, market segmentation, positioning and product differentiation.

MARK2032  
**Consumer Behaviour A**  
*Staff Contact: School Office*  
S1 L2 T2  
**Prerequisites:** ACCT1511, ECON1102, ECON1203  
**Corequisite:** MARK2012  
This subject studies in details the internal influences on behaviour as they apply to the consumption process. The course is designed to understand how consumers process information and the emotions and motivations that impact on that process. The focal topics include: the study of cognition, memory, learning, perception, motivation, and the communication process as these relate to marketplace behaviour.
MARK2042
Consumer Behaviour B
Staff Contact: School Office
S2 L2 T2
Prerequisites: MARK2012, MARK2032
This subject studies in detail the external influences on behavior and the role of the marketplace in the sociopolitical system. Topics of study include attitude formation, the impact of reference groups and institutions on marketplace behavior. Specific attention is given to the purchase and consumption situation in terms of individual and group purchase behavior. In the latter particular attention is given to household and organizational buying behavior.

MARK2052
Marketing Research
Staff Contact: School Office
S2 L2 T2
Prerequisite: ECON1203 or approved substitute, MARK2012
This subject examines the sources and types of marketing information relevant to marketing management. Topics include: problem definition and research design; questionnaire design; sampling; data collection; interpretation and reporting; management control of research including briefing, evaluation of proposals and distinction between research results and marketing implications; the use of continuous research; and new developments in market research.

MARK3073
Brand Management
Staff Contact: School Office
S1 L2 T2
Prerequisite: MARK2012, MARK2042
This subject provides an overview of marketing planning for products and services with a focus on planning at the brand level. Marketing concepts such as segmentation, differentiation, positioning and product lifecycle will be re-examined from a strategic perspective. The marketing mix will be expanded to address strategies of new product development, pricing, distribution and promotions management. Case analysis will be introduced to develop strategic thinking.

MARK3083
Strategic Marketing Management
Staff Contact: School Office
S2 L2 T2
Prerequisite: MARK3073
Concepts introduced in previous subjects will be broadened to address issues at the business unit level. Corporate mission, competitive stance of the organization, pricing policies, trade relations, internal marketing and logistics will be addressed. The management of organizational resources such as financial and human resources are considered using, for example, portfolio analysis. Decision support systems are also examined.

General Education Program
12 credit points of General Education Program subject taken throughout the course.

Town Planning

Core Subjects

PLAN1111
Introduction to Planning
Staff Contact: Mr S. Harris
C14 S1
Nature and scope of planning and planning education. Basic planning skills and knowledge. Problem solving techniques. The physical, social, economic and political environment of planning, the methodology of planning, and the activities of planners. Collection, analysis, recording and presentation of information; organisation of problems; preparation of proposals.

PLAN1121
Planning Studies
Staff Contact: A/Prof R. Zehner
C14 S2
Lectures, seminars and projects concerning principles of research related to assessment of the urban environment. Role of planning studies in the planning process, relationship to planning objectives and decision making. Research Methodology: social science research methods. Study design, sampling techniques, questionnaire design, data collection, data analysis using packaged computer programs. Introduction to statistics. Introduction to demographic concepts and methods. Social Science Research and Planning Issues: a series of student-led seminars that focus on topics of importance to planning (e.g., measuring environmental quality, social indicators, social mix, community design and crime) which have been studied from a variety of viewpoints using various research techniques.

PLAN1131
Local Planning 1
Staff Contact: Dr T. Lukovich
C14 S1
Prerequisites: PLAN1111 and PLAN1121
A lecture, seminar and practical exercise program dealing with the principles and practice of planning, from the small scale of housing to the larger scale of urban districts. Factors which influence the shape of urban areas, and which affect the quality of life within them: physical factors (noise, sunlight and shade, microclimate and wind, soils and other site engineering factors, traffic and accessibility, design and aesthetics; socioeconomic factors (demography, ethnicity, and politics). Processes of urban change. Students undertake reading and exercises in integrated planning, are brought to the level at which they will be able to prepare simple local environmental studies, and to assess development applications with a full awareness of the issues to be considered and the implications of their decisions.

PLAN1141
Regional Planning 1
Staff Contact: Dr P. Murphy
C14 S2
Prerequisites: PLAN1111 and PLAN1121
Introduction to major land-use and infrastructure patterns, economic and social processes, in large urbanised and less
urbanised regions; examples of the latter include, respectively, metropolitan Sydney and the far north coast of NSW. Biophysical, social, and economic dimensions of regional systems, and the typical public management issues to which their operation gives rise, are analysed. Regional management is presented as a means of meeting social and economic objectives of the community, both in itself and by providing a policy framework within which local government planning operates. Lecture and tutorial format.

PLAN1151
Planning Law and Administration
Staff Contact: Mr P. Williams
C14 S1
Prerequisites: PLAN1131 and PLAN1141

Theory and practice of techniques and administrative procedures needed to transform policies and details of planning proposals into documents which have legal effect. The subject comprises three parts, Planning Law, Planning Administration and Land Valuation. Planning Law: conceptual/theoretical nature of the law; relationship between the environmental context, the Crown, the parliament and the judiciary; ways in which the laws are made and promulgated, relationship between laws and regulations, the legal concept of property in land, definition of various legal concepts of interests in land, Australian Constitution and legal relationship between Commonwealth and States, particularly in regard to matters affecting land, the place of administrative law. An historical introduction to planning law in Australia. A detailed account of principles and practice of strategic and statutory planning in Australia. State environmental planning policies, regional environmental plans, local environmental plans, the role and function of environmental studies, statutory mapping, the development application process, the appeal process, the settlement of disputes. Planning Administration: administrative context within which planning operates as a function of government, especially the role and function of statutory bodies in the planning and environment area, the administration of the planning function at national, state and local levels, the art of management, administrative theory, personnel administration, the role and responsibility of the professional planner in the public and private sector. Land Valuation: principles and practice of land valuation in Australia. Definitions of value, methods of valuation, the role of the valuer, compensation and betterment.

PLAN1161
Local Planning 2
Staff Contact: Ms S. Thompson
C9 S2
Prerequisites: PLAN1131 and PLAN1151
Corequisites: PLAN1162

The subject focuses on the concept of the humane city and on diversity and difference within urban communities. The subject aims to develop an understanding of the nature of different community groups, their characteristics, special needs and difficulties. Planning policy is critically assessed in terms of its ability to respond to these groups. Practical skills and research approaches are explored; better communication in conflict situations is developed. The subject is undertaken by a series of lectures, site visits, critical readings, practical exercises and seminars.

PLAN1171
Regional Planning 2
Staff Contact: Dr R. Freestone
C9 S1
Prerequisite: PLAN1151 and PLAN1141
Corequisites: PLAN1172

The official and policy issues in metropolitan form and structure, with particular reference to the spatial impacts of economic growth and restructuring. Focus on Sydney in a national and international context. Teaching in lectures, seminars, field-trips and directed research.

PLAN1181
Thesis
Staff Contact: Prof A. Cuthbert
C20 F

A specialized individual study taken under staff supervision with the object of allowing students either to gain knowledge in some aspect of town planning which is not covered in the course or to increase their knowledge of some aspect which has been covered. The study does not require original experimental research for the purpose of discovering new facts or the testing of an hypothesis; neither is it an essay permitting the student's unsupported opinion. The thesis topic is submitted by the student for the approval of the Head of the School of Town Planning at the end of Year 4 of the course and the completed thesis is submitted for examination towards the end of Year 5.

Students participate in seminars on report and thesis writing during Year 5 and present progress reports on their theses at the seminars. The subject is not complete until a bound copy has been submitted.

Related Subjects

PLAN1162
Integrated Planning Project 1
Staff Contact: Ms S. Thompson
C8 S2
Corequisites: PLAN1161

Each year a project is designed which requires knowledge and skills from the several subdisciplines of planning. The general focus is on a selected metropolitan and local urban planning issue. The aim of the project is to further develop skills in the complementarity of knowledge and perspectives typically required to deal with complex problems in the real world. Depending on the topic under investigation, students may be required to attend an offcampus survey camp of up to one week's duration. The project will involve research, analysis, presentations and community liaison.

PLAN1172
Integrated Planning Project 2
Staff Contact: Dr R. Freestone
C10 S1
Corequisites: PLAN1171

Each year a project is designed which requires knowledge and skills from the several subdisciplines of planning. The aim of the project is to further develop skills in the complementarity of knowledge and perspectives typically required to deal with complex problems in the real world. Depending on the topic under investigation, students may be required to attend an offcampus survey camp of up to
one week's duration. The project will involve research, analysis, environmental planning and implementation.

PLAN1301
Practical Experience
Staff Contact: School Office

For the purpose of practical experience covered by Session 2 of Year 3 and Session 1 of Year 4 the student shall be engaged in approved employment related to the course; for example, in government planning and housing authorities, in municipal and shire councils preparing or implementing town and country planning schemes, in private development companies or with planning consultants. The type of employment proposed must be submitted to the Head of the School of Town Planning for approval.

Students are expected to attend a seminar to discuss their experience approximately half way through their year off campus and are required to submit a diary describing and assessing their experience when they enter Year 4, Session 2.

PLAN2111
Professional Practice
Staff Contact: School Office
C2 S2

Planning as a profession, professional standards, ethics, preparing studies and plans, preparing and giving evidence, briefing and consulting, management, corporate planning, continuing education.

PLAN2112
The Development Process
Staff Contact: School Office
C6 S2

Introduction to land development process in N.S.W. Basics of investment analysis, elemental costing and marketing. Society, the market place, land development and the role of town planning.

PLAN2114
History of Town Planning
Staff Contact: Dr R. Freestone
C3 S2

Planning theories and practices in the late 19th and 20th century. The origins and evolution of town planning ideas and ideology in Australia and overseas. Recent planning theories and practices. The material is covered through lectures, projects, discussion seminars and field-trips.

PLAN2212
Transportation Planning
Staff Contact: Dr T. Lukovich
C4 S2

The relationship between the planning and management of transport and the planning and management of land-use and the environment. Transport demand and supply at strategic, tactical and operational levels; networks; policies for the integrated management of precincts, corridors and centres; transport assessment of development applications; environmental assessment of transport proposals. At least one computer application is tested, and there are further assignments and exercises to develop basic skills in analysis.

PLAN2213
Urban Design
Staff Contact: Prof A. Cuthbert
C4 S2

The aim is to develop a greater awareness of the character and quality of our physical surroundings and to provide some knowledge as to how improvements can be made. Slide lectures and site visits are used to illustrate good or interesting developments in Australia and overseas. Townscape elements are studied and performance standards and other controls affecting the appearance are discussed. Small design exercises and, where feasible, at least one bigger project dealing with a real situation are undertaken.

PLAN2215
Engineering A
Staff Contact: School Office
C2 S1

Transport engineering: road hierarchy, road geometry, arterial roads, access streets, intersections, cross sections, road layouts in residential areas, public transport. Traffic and environment: accidents and safety, noise, air pollution. Traffic engineering: characteristics of road vehicle, driver, and road system, levels of performance, traffic management.

PLAN2216
Engineering B
Staff Contact: School Office
C1 S1

The provision of public utilities: town water supplies, sewerage, drainage, flood management, electricity and gas supply, telecommunications, waste disposal.

PLAN2217
Urban Society and Sociology
Staff Contact: A/Prof R. Zehner
C4 S1

A series of lectures and seminars on the relationship between planning and the social structure of urban areas with reference to both social theorists and empirical studies. The origins and concerns of the discipline of sociology and of urban sociology. Urban effects on living patterns. The evaluation of planning objectives and outcomes. Sociological views of the planner's role in contemporary urban society.
PLAN2218
Heritage and Conservation Planning
Staff Contact: Mr S. Harris
C4 S2
Definitions and philosophy of heritage and conservation planning. Setting objectives and formulating policy, criteria for selecting and assessing heritage and conservation areas; planning considerations to protect and enhance the community fabric; legislation and mechanisms for heritage and conservation existing in New South Wales and elsewhere; potential; some effects of heritage and conservation (physical, social, economic); attitudes to heritage and conservation. Case studies of selecting and planning a heritage and/or conservation area.

PLAN2221
Environmental Science 2
Staff Contact: Dr P. Murphy
C3 S1
Introduction to methods used to incorporate consideration of physical environmental variables into the planning process. Environmental impact studies.

PLAN2311
Politics, Power and Policy
Staff Contact: Mr P. Williams
C4 S2
The aim of the subject is to create an understanding of the complex forces and processes (political, ideological, economic etc) which operate in the management of urban areas. Issues covered will include relationships between urban government, politics, planning, the community and various interest groups. Urban theory. The relationship between public policy and planning. The social context of planning. The different social needs within Australian society. The formulation and implementation of policy.

PLAN2321
Planning Law and Administration 2
Staff Contact: Mr P. Williams
C4 S2
The objective of this subject is to provide practical guidance on the operation of the Land and Environment Court, the significance of court judgments and the role of planners. While emphasis is placed on taking steps in plan making, urban design and development control to avoid planning appeals the major concern is with preparing for an appeal, legal research, preparation of evidence, appearing as a professional witness and small group psychology.

PLAN2411
Communication Techniques 1
Staff Contact: Ms S. Thompson
C4 S1
Graphics as an effective communication medium for town planners. Technical information and studio experience in essential skills for creative graphics as a functional tool for communicating factual information to peers and clients. Exercises in basic drawing, drafting and lettering. Photography and visual presentation techniques for brochures and displays are also covered.

PLAN2413
Computers and Information Systems
Staff Contact: A/Prof R. Zehner
C2 S2
Computer use in the planning professions. Components of computers and their interrelationships; time sharing, batch and standalone processing. Exercises using integrated software including data bases, spreadsheets, graphics and word processing. Planning information systems: applications, establishment, maintenance.

PLAN2421
Communication Techniques 2
Staff Contact: Mr S. Harris
C4 S2
The range of non-graphic techniques of planners' information communication: reports and letters language, structure, style; audiovisual presentation video and slide/tape; public speaking telephone, one-to-one, small groups, large meetings; physical models, basic techniques and uses.

PLAN7128
Research Methodology
Staff contact: A/Prof R. Zehner
C6 SS
Social science research methods. Sampling techniques, questionnaire design, interviewing, data processing, use of packaged computer programs. Introductory statistical methods, applications to data.

PLAN7212
Economic Issues in Planning
S2
The market mechanism and market failure. Macroeconomic policy, investment patterns and economic change in cities and regions. Financing urban services and the impact of growth on local government. Economic impacts of development proposals.

Planning Electives
Students are required to select an elective from the topics listed (subject to availability) for the session where such an elective is part of the course program. Students are permitted to select electives offered by other schools subject to approval of the lecturer concerned and the Head of the School of Town Planning.

PLAN3000
Planning Elective
Staff Contact: School Office
C4 F or SS
For initial enrolment only.

PLAN3111
Local Planning 3
Research and design into a topic at the neighbourhood, district or town scale of current concern in planning.

PLAN3112
Regional Planning 3
C4 F or SS
Planning methodology in metropolitan areas; a critical overview and a detailed examination of planning processes, policies and programs for selected areas/functions/institutions.
PLAN3113
Urban Studies
C4 F or SS
An evaluation of the effects of one or more aspects of the urban environment on individuals and/or communities. Emphasis on individual research which expands the student's experience in methodological and substantive areas beyond what is encountered elsewhere in the course.

PLAN3114
Social Planning
C4 F or SS
Planning responsibilities in equalizing resources distribution. Discussion of consensual goal definition and achievement versus social engineering. Popular participation in planning: why, where and how. Methodology and aids to social planning. Policy formulation and case studies. Parts of the program may be presented by and with practitioners in the field and include role playing games and a problem solving essay. Involvement in an area project may be substituted for some of the program.

PLAN3211
Residential Planning
F or SS
Procedures and legal controls over land subdivision in NSW, land studies in terms of climate, terrain, vegetation, slopes, soils, drainage, etc; land development in relation to earthworks, roads, drainage and other utilities; detailed consideration of road and drainage design; subdivision design, land values and land economics. Innovatory designs.

PLAN3212
Rural Planning
C4 F or SS
Original research into a topic of current concern in rural planning.

PLAN3213
Urban Conservation
C4 F or SS
Definitions and philosophy of urban conservation; setting objectives and formulating policy, criteria for selecting and assessing conservation areas; planning consideration to protect and enhance the urban fabric; legislation and mechanisms for urban conservation existing in NSW and elsewhere; potential; some effects of urban conservation (physical, social, economic); attitudes to urban conservation; case study of selecting and planning a conservation area.

PLAN3214
Environmental Psychology
C4 F or SS
The environment considered subjectively and objectively. The individual as a social and psychological rather than a strictly economic being. The significance for decisionmaking, of individual and group values held on the environment (natural and built), from individual decisions on where to live through to government decisions on policy. Forces influencing the formation of these values. The distinction between value held and actual behaviour. The emergence of different viewpoints and resultant conflicts. The role of planning in understanding, anticipating and reconciling such conflicts.

PLAN3216
Transport and Environmental Management
C4 F or SS
The integration of transport and environmental management at the local level.

PLAN3217
Urban Design 2
C4 F or SS
Research into and design of an area, from an urban design perspective.

PLAN3311
Planning Law and Administration 3
C4 F or SS
Aimed at increasing knowledge and awareness of issues in the general areas of Planning Law, Planning Administration and Statutory Planning.

PLAN3414
Computer Applications in Planning 1
C4 F or SS
Computer applications in planning and related fields. An exploration and documentation of available software of use to the planning profession which has not been covered earlier in the course. Students also may develop and document their own planning related software.

PLAN3115
Planning in Developing Countries 1
C4 F or SS
Issues in the planning of cities and regions in developing countries. Seminars, lectures and independent study.

PLAN3116
Planning in Developing Countries 2
C4 F or SS
Supervised independent research on issues in the planning of cities and regions in developing countries.

 Subjects Offered to Other Schools

PLAN7123
Environmental Planning
Staff Contact: School Office
S2 L2

PLAN7124
Environmental Planning
Staff Contact: School Office
S2 L2 T2
The aim of this subject is to provide the student with an understanding of the objectives of environmental planning and how the system operates with particular reference to New South Wales. The nature of planning philosophy, environmental law and administrative structures are the core aspects of the course. Within this framework specific areas of concern are introduced and discussed: the central business district of cities, housing and equity, land-use and transport interaction, urban design, location theory, and urban and rural conservation.

As planning is a temporal concept, historical, contemporary, and future themes are built into the subject. At the completion of the program the student should
understand the environmental planning process and the individual's rights under it.

PLAN7124 is also offered as a half elective (PLAN7123) consisting of the lecture sessions only. Assessment is by written assignment, tutorial paper, and class participation. The assignment is based on the lecture material, and students are also required to prepare a written paper for tutorial discussion.

**PLAN9111**
**Town Planning**
*Staff Contact: Ms S. Thompson*
*S1 L2 T1*

Introduction to the purpose, scope and application of planning. The urban planning process. Objectives and means of planning environmental policies, regional environmental plans, local environmental plans. Problems in planning: equitable distribution of resources. Environment and environmental impact statements. Planning law and administration. Future of cities, housing and transportation.

---

**Landscape Architecture**

**LAND1130**
**Landscape Graphics 1**
*Staff Contact: Ms E. Mossop*
*S1 L2 T2*

Basic techniques of creative drawing with emphasis upon two dimensional graphics, use of pencil techniques. Assorted point media. Basic technical drawing with emphasis on twodimensional graphics. Pencil techniques, drafting conventions, layouts, lettering, instruments and scale presentation. The principles and application of orthographic, axonometric and isometric projection. Development of plan and section drawing techniques.

**LAND1131**
**Introduction to Computer Applications**
*Staff Contact: Ms A. Todd*
*S1 L1 T1*

The use of computers by landscape architects. Necessary knowledge to make full use of opportunities that the computer can provide including time sharing, batch processing and the use of graphic output. Components of the computer and their interrelationships, data processing, file management, use of library programs, interpretation of results, basic programming.

**LAND1132**
**Introduction to Landscape Architecture**
*Staff Contact: Ms H. Evans*
*S1 L1*

Introduction to the discipline of landscape architecture. Outline of the program and its major stands of planning; design and implementation; natural and social sciences; skills (graphic, verbal and written communication). Brief exposure to examples of landscape planning, design and implementation throughout history, both overseas and in Australia. Issues and opportunities for landscape architects.

**LAND1170**
**Design 1**
*Staff Contact: A/Prof F. Thorvaldson; Ms C. Duffy*
*S1 L1 T2*

Basic visual design exploration to appreciate the language of design elements and principles. Investigation into the methods of expression and media used in art and design. Practical exercises in communication of ideas in both two and three dimensional projects. Sketching, painting and construction exercises in both studio work and assignments.

**LAND1210**
**Landscape Analysis**
*Staff Contact: Ms A. Todd; Mr C. Burton*
*S2 L2 T4*

**Prerequisites:** GEOG1051, BIOS3004, GEOL5110, LAND1130

**Notes:** This subject includes a number of lectures and field trips for the purpose of practical observation. Students are expected to make their own transport arrangements for these trips.

Observation and interpretation of both physical and biological environment and their interrelationships. Landscape character through sensory inputs and prehistory. Fundamental characteristics of biological systems, with emphasis on relationships with the physical environment, particularly geology, soils. Survey of Australian plant communities and associated fauna with particular emphasis on the Sydney Region. Recording and presentation techniques associated with landscape surveys, field excursions.

**LAND3151**
**Landscape Management 1**
*Staff Contact: Mr D. Crawford; Ms A. Todd*
*S1 L1 T1*

**Prerequisite:** LAND1210, LAND2110

Basic methods and techniques of resource data collection, analysis and valuation. Emphasis on an ecological approach to the investigation of resources and their management in relation to a range of land use types.

**LAND3252**
**Landscape Management 2**
*Staff Contact: Mr D. Crawford; Ms A. Todd*
*S2 L1 T1*

**Prerequisite:** LAND3151

Planning and management of both natural and cultural landscapes. Historical review of landscape planning and management in Australia and overseas. Examination of a range of landscape management methodologies and processes. Projects will include critical evaluation of three case studies.

**LAND1211**
**Horticulture for Landscape Architects**
*Staff Contact: Ms A. Todd; Mr J. Stowar*
*S2 L1 T1*

**Prerequisite:** BIOS3004

General horticultural study of propagation techniques, current nursery practice, impact of weeds, plant diseases, planting techniques and forestry practice. Plant collecting and identification.
LAND1230
Landscape Graphics 2
Staff Contact: Ms E. Mossop
S2 L2 T2
Prerequisite: LAND1130
Advanced techniques of creative drawing with emphasis on various media. Advanced technical drawing techniques including the use of various media, with emphasis on three-dimensional graphic concepts. Investigation of the basic principles of graphic theory. Application of perspective drawing to landscape architectural works, including landforms and other elements.

LAND1270
Design 2
Staff Contact: A/Prof F. Thorvaldson; Ms C. Duffy
S2 L1 T2
Prerequisite: LAND1170, LAND1130
Design theory and processes of spatial design and composition in both two and three dimensional projects, with references to present day and historical examples. Explorations of the geometry of form and principles of organisation. Development of a definite thought process and sequence of design development using two and three dimensional exercises in selected media. Concepts of abstraction and naturalism. Studio work includes sketching, photography and model making in order to develop conceptual awareness, perceptual sensitivity and visual literacy.

LAND1290
Landscape Materials and Construction
Staff Contact: Ms H. Evans
S2 L1 T2
Materials science: the relationship between the properties and structure of materials. The derivation, conversion or production of materials commonly used in landscape construction. Investigation of structures: elements and systems, loads and structural requirements and basic structural form.

LAND2110
Environmental Sociology for Landscape Architects
Staff Contact: Ms H. Armstrong
S1 L1 T1
Perception of human requirements through behavioural studies, including territoriality and personal space identity. The effect of environmental changes on people. Sociological techniques for understanding user requirements. Post design evaluation. Application of simple statistical methods.

LAND2170
Landscape Design 1
Staff Contact: Ms E. Mossop
S1 L2 T8
Prerequisite: LAND1270, LAND1210, LAND1230 (OR LAND3203)
Basic Design. The interpretation of aesthetic values of sites and environments used in design exercises. Freehand drawing in the field. Applied Design. Logical design process applied to simple landscape design exercises with emphasis on site survey, site analysis and functional analysis. Applied graphic presentation techniques for site survey and analytical drawings.

LAND2171
History of Landscape Architecture
Staff Contact: Ms H. Armstrong; Mr C. Burton
S1 L2
Chronological development of cultural landscapes described by the investigation of philosophical, aesthetic and social aspects of Eastern and Western cultures with an emphasis on the Australian context. Changing attitudes to nature as reflected in land uses. The development of garden design and landscape architecture.

LAND2190
Landscape Technology A
Staff Contact: Ms H. Evans
S1 L1 T2
Prerequisite: LAND1290
Site surveying and mapping techniques. Land surface manipulation including contour planning and basic earthworks. Field work exercises.

LAND2270
Landscape Design 2
Staff Contact: Prof J. Weirick
S2 L2 T8
Prerequisite: LAND2170
Basic Design. Aesthetic appreciation of chosen environments both urban and natural. Graphic communication using selected media. Seminars on design philosophy. Applied Design. An understanding of materials and construction as applied to a range of medium scaled projects with an emphasis on practical relationships between design, use of appropriate materials and construction detailing.

LAND2271
Planting Design
Staff Contact: Ms H. Armstrong
S2 L1 T1
Prerequisite: LAND1211, LAND2170
Plants as design elements; management of plant designs. Plant designs for specific sites; water plants, indoor plants, roof gardens, industrial and reclaimed sites. Observation of existing landscape schemes. Documentation of plant design.

LAND2290
Landscape Technology B
Staff Contact: Ms H. Evans
S2 L1 T2
Prerequisite: LAND2190
Landscape construction methods including documentation of grading, drainage, earthworks and structures. Application of materials in detailed design development.

LAND3130
Research Methods
Staff Contact: Ms A. Todd
S1 L1
Investigation of various research methods with application to study in landscape architecture. Development of the critical logical and stylistic skills involved in researching, writing and presenting essays, thesis, articles, papers and reports.
LAND3170
Landscape Design 3
Staff Contact: Ms H. Evans
S1 L2 T6
Prerequisites: LAND2270, LAND2110, LAND2290
More advanced design exercises within the context of both
natural and urban environments. Emphasis is on gaining a
knowledge of site planning with specific reference to sites
located within the geological areas of the Sydney Region.
Projects are of a large scale and further emphasis is
directed towards consideration of appropriate
environmental management and realisation of required
maintenance ends in relation to design solutions.

LAND3190
Landscape Engineering A
Staff Contact: Mr P. Bliss
S1 L2 T1
Prerequisite: LAND2290, LAND2270
Design and construction techniques related to basic civil
works, including earthworks, hydraulics, municipal
services, urban and rural drainage. Interpretation of
engineering design and development documents. Projects
incorporating detail resolution of civil works.

LAND3191
Professional Practice A
Staff Contact: Ms E. Mossop
S1 L2
Prerequisites: LAND2270, LAND2290
The Landscape Architect’s responsibilities in Law. A study
of the development of Law in Australia. Project procedure,
the stages of a capital development project. Cost planning
and feasibility studies. Construction contracts, including
tender documentation, subcontract conditions and
subconsultative responsibilities. The specification, its
function and styles. A comparative analysis of various
standard contract forms.

LAND3270
Landscape Design 4
Staff Contact: Ms H. Evans
S2 L2 T6
Prerequisite: LAND3170
Experience of dealing with medium to large scale projects
of specific land uses such as schools and residential
subdivisions, in which research is encouraged to assess
environmental impacts, both physical and social. Emphasis
on practical solutions and the preparation of contract
documents including preliminary costing of design
proposals.

LAND3290
Landscape Engineering B
Staff Contact: Mr P. Bliss
S2 L1 T2
Prerequisite: LAND3190, LAND3170
Design and construction techniques related to transport
planning and route alignment. Overview of the principles of
transportation systems including railway permanent ways,
airports, ports and harbours.

LAND3291
Professional Practice B
Staff Contact: Ms H. Evans; Mr P. Knox
S2 L2
Prerequisites: LAND3191, LAND3170
Preparation of contract documentation, including technical
sections. Contract administration and project supervision,
the role of the consultant. Tender evaluation, award of
contracts, site inspections, variation procedure, claims and
certificate issue and general site administration. Practical
completion and final certification. The rights and duties of
the principal and contractor, including the relationship with
consultants. Postcontract activities, maintenance manuals,
appraisal of design and construction, and retention of
records.

LAND4031
Landscape Thesis A
Staff Contact: A/Prof F. Thorvaldson; Ms A. Todd
S1 or S2 HPW10
Prerequisite: LAND3130, LAND3270
A specialized individual study, enabling each student to
gain or extend knowledge and understanding in some
aspect of landscape architecture. The thesis is essentially
evidence of this individual study, under staff supervision,
which is completed as two subjects Landscape Thesis A
followed by Landscape Thesis B, culminating in a written
document deposited in the Faculty library.

The Landscape Thesis A subject allows each student to
carry out the required research, organisation or material,
and writing in order to submit a complete draft of a written
thesis at the end of Session. This one session subject is
graded as either Satisfactory or Fail. The proposed topic
area and title must be submitted and approved by the Head
of the School of Landscape Architecture prior to enrolment
in Landscape Thesis A.

LAND4032
Landscape Thesis B
Staff Contact: A/Prof F. Thorvaldson; Ms A. Todd
S2 or S1 HPW4
Prerequisite: LAND4031
The Landscape Thesis B subject, follows on from
Landscape Thesis A and allows each student to refine the
draft material submitted previously. It also allows the
preparation of illustrative material and completion of all
necessary references and bibliography, before the
submission of the final unbound manuscript for
assessment, usually in week 8. The unbound manuscript
is assessed by at least two readers and returned with
corrections noted (if necessary), so that a bound copy of
the thesis can be lodged with the School by the end of the
Session. This one session subject is graded in accordance
with the normal University grading system, although it
reflects the assessment and worth of the final thesis
document prepared over two sessions in both landscape
Thesis A and Landscape Thesis B.

LAND4170
Landscape Design 5
Staff Contact: Prof J. Weirick
S1 L1 T2
Prerequisites: LAND3270, LAND3250
Investigation of the relationship between design and
planning issues through a major Regional Study.
Preparation of a masterplan for a selected site to be used
in conjunction with Landscape Design 6. Discussions on contemporary environmental planning, design and management issues.

LAND4171
Urban Landscape Design
Staff Contact: Prof J. Weirick; Ms H. Armstrong
S1 L1 T5
Prerequisites: LAND3270
An exploration of the relationships within the fabric of the urban environment including concepts of city functions and the analysis of disparate parts of the city with physical design being the primary focus. Context and place, history and theory are considered as well as analytical techniques. Design studios, lectures and seminars.

LAND4270
Landscape Design 6
Staff Contact: Ms E. Mossop
S2 L2 T10
Prerequisites: LAND4170, Four months approved practical experience
Students are called upon to employ all the knowledge, skill and understanding they have gained in previous years. The graduating design project follows from LAND4170 Landscape Design 5 and involves sketch design, detail design development and construction documentation. Emphasis on professional standard. Graduating project is related to the natural, urban or rural environment.

Landscape Electives for Students of Architecture and Related Disciplines

The following landscape electives require attendance of two hours per week over a period of 14 weeks. They are offered subject to demand and availability of resources, consequently students are advised to contact the School before finalizing their program. Credit point values specifically refer to students of Architecture enrolled in courses 3260 or 3265.

LAND0003
Planting Design Elective
Staff Contact: Prof J. Weirick
C6 S2 L2
The selection and use of plant materials within the built environment with particular reference to visual and ecological considerations.

LAND0004
Urban Landscape Elective
Staff Contact: Prof J. Weirick
C6 S1 L2
The treatment of spaces between and upon buildings 'hard' and 'soft' landscape treatments. Functional uses of open space within the built environment and the design of street furniture.

LAND0005
Recreation Planning Elective
Staff Contact: Prof J. Weirick
C6 S1 L2
Various recommended provisions for open space allocation for recreation are examined and classified in terms of contemporary needs. Specific requirements of a range of recreation facilities are studied in detail and successful Australian and overseas examples evaluated.

Servicing Subjects

Mines

GEOL5110
Geology for Landscape Architecture
Staff Contact: A/Prof A.D. Albani
Minerals and rocks. Igneous, sedimentary and metamorphic rocks; their origin and their relationship with the landscape. Geological structures and their graphic representation. Interpretation of geological maps and sections.

Geography

GEOG1051
Global Environmental Problems and Processes
Staff Contact: Dr I. Prosser
S1 L2 T1
The subject outlines the principles and processes necessary to appreciate the physical background behind major globalscale environmental problems. Principles and processes include the linkages between the lithosphere, hydrosphere and biosphere, atmospheric circulation, energy and radiation balance and ecosystem function. Problems covered are the issues of desertification, deforestation, 'greenhouse', ozone depletion, energy conservation and pollution.
Faculty of the Built Environment
Graduate Enrolment Procedures

All students enrolling in graduate courses should obtain a copy of the free booklet Enrolment Procedures 1994 available from School Offices and the Admissions Office. This booklet provides detailed information on enrolment procedures and fees, enrolment timetables by faculty and course, enrolment in miscellaneous subjects, locations and hours of cashiers and late enrolment.

Higher Degrees - Research

Following the award of a first degree in Architecture, Building, Industrial Design, Landscape Architecture or Town Planning of the University of New South Wales or other approved university, graduates may apply to register for study leading to the award of the degree of:
1. Doctor of Philosophy (available in each School)
2. Master of Architecture
3. Master of Building
4. Master of the Built Environment
5. Master of Industrial Design
6. Master of Landscape Architecture
7. Master of Town Planning
8. Master of Science (available in Architecture and in Town Planning)

For details concerning these degrees see Conditions for the Award of Higher Degrees later in this handbook or write to The Head of School concerned.

Higher Degrees - Coursework

In addition to the facilities available for the pursuit of higher degrees by research, formal courses are offered as follows:
1. Master of Project Management
2. Master of Science (Industrial Design)
3. Master of the Built Environment (Building Conservation)
4. Master of Industrial Design
5. Master of Construction Management
6. Master of Landscape Planning
7. Master of Architecture
8. Master of Real Estate
9. Graduate Diploma in Real Estate
10. Graduate Diploma in Valuation
11. Graduate Diploma in Landscape Planning
12. Graduate Diploma in Town Planning
13. Graduate Diploma in Housing and Neighbourhood Planning.

Duration

Each course is programmed over one year full-time or two years part-time study in the University, involving attendance on two or three evenings per week. Subjects in the Master of Project Management course are normally timetabled on two evenings and one afternoon per week. Subjects in the Master and Diploma of Landscape Planning courses are normally timetabled on three afternoons per week.

The Diploma of Housing and Neighbourhood Planning and the Master of Science (Acoustics) are under review, and no new enrolments in these courses are currently being accepted.
Graduate School of the Built Environment

Head of School
Professor A.R. Toakley

Chair, Graduate School Executive Committee
Dr B.H. Judd

The purpose of the Graduate School is to provide opportunities for inter-disciplinary postgraduate research and advanced study in the area of the built and natural environment across the various disciplines that make up the Faculty of the Built Environment. It offers research degrees at doctoral and masters level as well as a coursework masters degree in Building Conservation. Additional coursework programs in Housing Studies and Urban Design are being planned.

Areas of built-environment research of particular interest to the school include Building and Urban Conservation, Housing Studies, Urban Design, Environment-Behaviour Studies and Facilities Planning and Management. Research students follow a largely self-determined program of study with joint supervision arranged from the wide range of expertise available in the Faculty and, where necessary, from elsewhere in the University.

The School welcomes applications from graduates in disciplines represented in the undergraduate programs of the Faculty of the Built Environment, as well as from graduates in any other relevant discipline. Prospective students are advised to contact the Head of School to discuss their academic interests and objectives before lodging a formal application.

---

1120
Doctor of Philosophy

Doctor of Philosophy
PhD

This is a research degree requiring an original and significant contribution to knowledge in an approved subject.

---

2240
Master of the Built Environment

Master of the Built Environment
MBEnv

This degree is available to part-time and external candidates in addition to full-time candidates. It requires the submission of a thesis embodying the results of an original investigation or design.

---

8130
Master of the Built Environment (Building Conservation) Course

Master of the Built Environment (Building Conservation)
MBEnv

Course Co-ordinator
Mr D.M. Godden

This course consists of graduate work in the major areas of building conservation. It is designed for graduates who wish to specialize in the conservation of the built environment as government or private-sector conservation architects, planners or other heritage specialists. Training is provided for the preparation and critical examination of conservation policies, heritage assessments and management plans for a wide spectrum of heritage precincts, buildings, structures and relics.

Admission Requirements

The conditions governing registration as a candidate for this course are given later in this handbook. In summary, admission is open to applicants who have completed at least a four year full-time university course in an appropriate area of an approved discipline.

In certain cases it may be necessary for applicants to complete a program of preparatory subjects set out by the Higher Degree Committee of the Faculty of the Built Environment, whose decision is influenced by the education and experience of each applicant.

Course Structure

The course is designed to be taken over a minimum of two sessions of full-time study or over four sessions of part-time study. It comprises 120 credit points with each credit point representing approximately 4 hours class contact. Full-time study requires 18 contact hours per week, while part-time study requires 9 hours per week.

A full-time course of study will be introduced in 1994 only if demand is sufficient. On current applications it is expected that the course will be offered on a part-time basis only.

The course is divided into four basic subject groupings plus the Graduate Project. One of the four subject groups is offered in each session for part-time candidates while two are offered in each session for full-time candidates. The Graduate Project, which has a loading of 20 credit points, is commenced in the early part of the course with the majority of work being completed in the latter stages. Both full-time candidates and part-time candidates are to produce two progress reports and participate in one colloquium before the graduate project is submitted. The reports and the colloquium participation will be assessed and are rated at 5 credit points.

Integrated with the subjects in all subject groups there will be a series of site visits and excursions. These will take place in scheduled class hours.

### Department of Industrial Design

**Head of Department**  
John Redmond

### 8146  
Master of Science (Industrial Design) Course

**Master of Science (Industrial Design) MSc(IndDes)**

These courses of graduate study have a common core of subjects in the major areas of industrial design. They are designed for graduates in industrial and environmental design, architecture, engineering, and marketing and business studies who wish to make careers in industrial design or to be involved in industrial design as a part of their career activity, eg, mechanical engineering with industrial design.

The MID degree course is intended for holders of four year industrial design degrees who wish to specialize and develop expertise in particular areas of industrial design. In addition to the common core of subjects, MID degree students are also required to submit a major graduate
project, a design theory report and have a greater choice of electives related to their field of specialization.

The MSc(IndDes) degree course is intended for graduates from design fields related to industrial design, such as architecture or engineering, or for graduates from nondesign areas, such as marketing, who have satisfactorily completed preparatory studies. The course is designed to adapt and apply the students' existing design knowledge and experience to the methodology and practice of industrial design. The project work is less specialized and covers a broad range of industrial design problems. The students are required to submit a minor graduate project. There are additional compulsory subjects in this course, with a more restricted range of electives, closely related to industrial design.

Admission Requirements

The conditions governing registration as a candidate for the MSc(IndDes) degree course are given later in this handbook; see below under Conditions for the Award of Higher Degrees. In summary, admission is open to applicants who have been admitted to an appropriate degree of at least four years' full-time duration, or its equivalent. For the MID degree course, admission is restricted to applicants who have been admitted to a degree with a major in industrial design of at least four years' full-time duration, or its equivalent. Candidates who have completed part or all of the requirements for the award of the degree of the MSc(IndDes) course may elect to apply for admission to the MID degree course, subject to the recommendation of the School and the approval of the Higher Degree Committee of the Faculty of the Built Environment.

In certain cases, particularly for applicants from nondesign undergraduate courses, it is necessary to complete a qualifying program of preparatory units in industrial design, as prescribed by the Higher Degree Committee of the Faculty. These units are selected from appropriate undergraduate courses. The Committee's decision is influenced by the academic and professional experience of each applicant.

Course Structure

The minimum duration of both courses is two sessions of full-time study or four sessions of part-time study. The availability of the full-time and part-time programs of study depends upon student demand and the University’s resources at that time.

The MID degree course comprises 38 credit points. The MSc(IndDes) degree course comprises 3638 credit points. One credit point is normally equivalent to one hour per week for one session. Full-time study normally requires an attendance of approximately 18 hours per week, while part-time study normally requires approximately 9 hours per week for the duration of the course. The project work for both degree courses, part and full-time, is run simultaneously and is staffed according to the requirements of each project.

Most of the work is undertaken within the School, but industrial visits and experience forms an important component of the course.

The program is so arranged that eminent visitors as well as guest lecturers and designers may participate.

To avoid duplication of classes for full-time and part-time students, subjects are timetabled wherever possible on afternoons and evenings. In addition to timetabled commitments, the studios and laboratories are available during normal University hours for industrial design project work. Occasionally students are required to attend professional and industrial visits and lectures at other institutions.

The requirements for the course include an equivalent period of at least four weeks of approved professional or industrial experience. Part-time students with approved employment are exempt from this requirement.

Approved electives**

* 4 week block during recesses. Part-time students in approved employment are exempt.

** Approved electives may be taken from subjects offered in other schools of the University of New South Wales, subject to the approval of the Heads of the Graduate School of the Built Environment and the school offering the subject.

MID electives may be chosen to increase specialist knowledge relevant to the student's theory studies, project report or planned career activities. At least six credits must be taken of which up to four credits may be taken in undergraduate units at half their point value.

MSc(IndDes) electives are taken in approved subjects directly related to the development of the student's industrial design knowledge and skill. At least four credits must be taken of which up to two credits may be taken in undergraduate units at half their point value.

*** Graduates of visually oriented courses, eg architecture, are normally exempt.

Depending upon course requirements, the availability of University staff and Faculty resources, it may be possible to substitute some existing graduate or undergraduate courses in other faculties for certain subjects of the course. This development would be subject to the approval of the Higher Degree Committee of the Faculty of the Built Environment and the Heads of the schools offering the courses. Where the credit point of subjects is increased by substitution of subjects from other schools, the requirement for the stated number of credits in elective subjects is correspondingly reduced.

Approved Electives

School of Architecture

The School of Architecture offers facilities for research and welcomes enquiries from students who wish to pursue programs for the degrees of Master of Architecture (MArch) or Doctor of Philosophy (PhD). Prospective students should consult the Head of School to discuss their research interests prior to making a formal application.

1130

Doctor of Philosophy

Doctor of Philosophy
PhD

This is a research degree requiring an original and significant contribution to knowledge in an approved subject.

2200

Master of Architecture (by Research)

Master of Architecture
MArch

This degree is available to part-time and external candidates in addition to full-time candidates. It requires the submission of a thesis embodying the results of an original investigation or design.

2206

Master of Science (by Research)

Master of Science
MSc

The conditions governing the award of the degree of Master of Science by research are set out in the next section.
8100
Master of Science (Acoustics) Course

Master of Science (Acoustics)
MSc(Acoustics)

This course is currently under review and no new admissions will be made in 1994. Students already enrolled may continue with their studies until completion of the degree. Students should consult pages 61 and 62 of the 1992 Architecture Faculty handbook for details of this course.

8142
Master of Architecture Program

with majors in:
- Architectural Design
- Architectural Computing
- History and Theory of Architecture

Master of Architecture
MArch

This Program provides for graduate study and research in one of several specialised aspects of the discipline of architecture. At the present time, three strands of study are offered to prospective candidates: architectural design; the history and theory of architecture; and architectural computing. The School may, from time to time, adjust the specialist strands that are available, subject to both demand and available staff resources.

The Programs are primarily designed for graduates in architecture and other relevant disciplines who wish to advance their knowledge in these specialised areas as either practitioners, consultants or academics. They are also suitable for specialist members of multi-disciplinary teams in industry or architectural practice.

The degree is awarded as Master of Architecture with a statement on the testamur identifying the area of specialisation undertaken by the candidate.

Admission Requirements

The conditions governing registration as a candidate for the degree of Master of Architecture are described later in this handbook, but the attention of applicants is drawn to the following admission requirements.

Registration is offered to candidates who have been awarded an appropriate degree of Bachelor of minimum 4 years duration from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee). Candidates may, where considered appropriate (including insufficient background in the proposed area of specialisation) be required to undertake a qualifying programme as determined by that Committee.

Those applicants wishing to pursue the architectural design strand of the Course are specifically required to hold a Bachelor of Architecture degree at Honours level and to have had at least 12 months professional practice experience. In addition, all such applicants are required to submit a design portfolio demonstrating the range and quality of their architectural design experience prior to their final acceptance into the Program.

Notwithstanding any other provisions of these conditions, the Committee may require an applicant to demonstrate fitness for registration by carrying out such work and sitting for such examinations, as the committee may determine.

Program Structure

Students undertaking the Program are required to select their area of specialisation before commencement. They must then complete a set of prescribed core subjects in that area of specialisation, supplemented by elective subjects to bring their total credit points to 120 for the degree. Note that each of the general core and elective subjects offered have a credit point value of 10. Most strands, as part of the core component, require the completion of a Graduate Project to the value of 60 credit points, representing half the requirement for the award of the degree. This is not so for the architectural design strand which is centred around two compulsory studio design and research projects (in lieu of the Graduate Research Project), in this case representing two-thirds of the total requirement for the award of the degree.

The degree may be commenced in either Session of the academic year subject to the availability of places in the Programs as well as appropriate subjects being offered at that time. It is normally undertaken over two full-time sessions or four part-time sessions. In general, candidates are required to complete as many core subjects as possible before undertaking their elective options.

Note that where a candidate is required to undertake a Graduate Research Project as part of their area of specialisation, it is normally expected that they would complete the subject GSBE0503 Postgraduate Research and Design Methodology at the beginning of their candidature. Exemptions from this requirement may be granted by the Head of School where candidates can demonstrate prior research experience or the completion of an equivalent subject. Where that is the case, the candidate is required to undertake an approved elective subject in its place.

Notwithstanding the above, work on a Graduate Research Project is always spread over the entire period of candidature as follows: during the first half of the programme (one session for full-time and two sessions for part-time students), candidates are expected to complete one-third of the work on their Graduate Research Project, leading to the presentation of a graduate seminar introducing the topic of the project, outlining current work in the area from the literature and indicating their research strategy; during the second half, candidates must complete that work, leading to the preparation of a Research Thesis and its defense in a second graduate seminar.

Candidates wishing to undertake the architectural design strand on a part-time basis must note that the studio design subjects (Architectural Design Project 1 & 2) must each be undertaken and completed within a single session, even though they represent two-thirds of a session workload.
For each area of specialisation, candidates are required to take each of the prescribed core subjects as listed in the programs given below. These generally make up the bulk of the requirements for the degree. The remaining credit points are then earned by taking electives, generally selected from the recommended list provided for each strand. Notwithstanding that, candidates may, with the permission of the Head of School, undertake electives chosen from among other graduate subjects offered by the Faculty or University. Subject to the same conditions, students may also enrol in undergraduate subjects offered in the University, but only to a maximum contributing a total of 20 credit points calculated at an agreed credit point value as graduate subjects.

Notwithstanding any of the above, the coursework subjects offered in any one academic session will depend on student numbers and interests. Students must therefore plan their programs in consultation with Course Advisers. As a guide, the following table shows the number of credit points that would normally be taken in each Session for a full-time or part-time program, depending on the selected major.

School of Building

The School of Building has active programs of coursework and research studies and welcomes enquiries from students who wish to pursue programs for the degrees of Master of Building (MBuild), Master of Project Management (MPM) (part-time), Master of Construction Management (MCM) (full-time), Master of Real Estate (part-time or full-time), Graduate Diploma of Real Estate (part-time or full-time), Graduate Diploma of Valuation (part-time or full-time) or Doctor of Philosophy (PhD). Graduates of these courses need not necessarily be building graduates. Prospective students should consult the Head of School to discuss their research interests prior to making a formal application.

The School also offers each year a series of short noncredit midcareer courses which are designed to provide ongoing education for experienced members of the building industry.

For further information contact:
Continuing Education Co-ordinator
Dr. J. Hutcheson

1140
Doctor of Philosophy

Doctor of Philosophy
PhD

This is a research degree requiring an original and significant contribution to knowledge in an approved subject.

2210
Master of Building

Master of Building
MBuild

This degree is available to part-time and external candidates in addition to full-time students. It requires the submission of a thesis embodying the results of an original investigation or design relative to building.

8116
Master of Project Management Course

Master of Project Management
MProjMgt

Course Co-ordinator
Mr Jinu Kim

This foursession course has been designed to provide opportunities for advanced study in project management and building economics. It allows for study in two interrelated areas:

1. Planning and management aspects of a design or construction organization, including programming, evaluation, costing, performance feedback, feasibility and management of properties.
2. Operations and control aspects of a design or construction organization, concentrating on estimating and cost analysis, contract or design administration and building economics.

The course aims at attracting the qualified practitioner who wishes to widen his/her knowledge and understanding of construction planning, operation and economics related to project management.

Admission Requirements

The general conditions governing registration as a candidate for the degree Master of Project Management are given later in this handbook but the attention of intending applicants is directed to the following specific requirements:

1. Applicants will have been admitted to the degree of Bachelor of Architecture or Bachelor of Building in the University of New South Wales or an equivalent degree in another approved university and have appropriate industrial experience.
2. Graduates with a Bachelor of Architecture or Engineering or other four year degree, who have appropriate experience in building may be admitted to the course depending on the individual case.
3. Eligible applicants may be required to complete a program of preparatory or concurrent study set out by the Head of the School of Building whose decision will be influenced by the education and experience of each applicant.

Graduate experience and involvement in the building industry is considered an advantage in the selection of candidates.

Course Structure

The Master of Project Management is a formal four session part time degree course comprising 12 subjects. The subject program comprises studies in management, computations, building economics, operations planning, contract law and documentation. A student must successfully complete all the subjects in one session before progressing to the next session. Students with a grade average of Credit or better in their course may choose to write a Project Report to qualify for the degree with honours.

Course Program

Subjects are offered on a four-session cycle. Subjects are normally timetabled on two evenings and one afternoon per week. Except in exceptional circumstances, a student is required to be concurrently enrolled in all subjects in a given session to allow for syllabus integration between subjects.
Session One
BLDG5111 Economics and Project Environment
BLDG5112 Project Management Framework
BLDG5113 Project Management Information Systems

Session Two
BLDG5211 Project Finance
BLDG5212 Human Resources Management
BLDG5213 Project Time Management

Session Three
BLDG5301 Project Feasibility
BLDG5312 Contracts Management
BLDG5313 Quality and Cost Management

Session Four
BLDG5401 Management of Buildings
BLDG5412 Project Integration
BLDG5413 Project Applications in Building

Sessions Five and Six
BLDG5100 Project Report (full-time or part-time)

8125
Master of Construction Management

Master of Construction Management
MConstMgt

Course Co-ordinator
A/Professor Thomas E. Uher

Construction Management comprises all the modern management methodologies directed at the control of time, cost and quality in the design and construction of buildings and other structures.

This two-session full-time full-fee course has been designed to provide opportunities for advanced study in construction technology, project management and building economics. The course aims at improving proficiency of qualified practitioners in the construction industry to meet present and future challenges.

Admission Requirements and Fees
1. Applicants must hold degrees acceptable to the University of New South Wales in either building, civil engineering, architecture, quantity surveying or equivalent and must have appropriate industrial experience.
2. Applicants may proceed directly into the course, or be required to complete prerequisite or corequisite programs of reading or study, with assessed assignments.
3. Applicants from non-English speaking countries must supply a certified statement of results in the IELTS Test or another equivalent recognised test.
4. The tuition fee is $A12,000.

Course Structure
The Master of Construction Management course is a formal one year full-time full-fee degree course comprising two sessions of academic study, up to 6 weeks of industry training and the Project Report. A student must successfully complete all the subjects in the first session before progressing to the second session.

Course Program
Session One
BLDG6151 Construction Methods and Techniques
BLDG6154 Economics in Construction
BLDG6155 Computers in Construction Management
BLDG6253 Construction Planning and Control
BLDG6158 Principles and Practice of Management
BLDG6257 Quantitative Methods in Management

Session Two
BLDG6153 Management of Construction
BLDG6157 Property Management
BLDG6251 International Construction Practice
BLDG6255 Contracts Management and Law
BLDG6256 Cost Planning and Analysis
BLDG6258 Construction Management Applications

Other Subjects
BLDG6150 Industry Training
BLDG6250 Research Report

8128
Master of Real Estate

Master of Real Estate
MRE

Course Co-ordinator
Dr John M. Hutcheson MC

This four-session part-time and two-session full-time course has been designed to provide opportunities for advanced study in Real Estate. It allows for study in five interrelated areas:
1. Valuation of property to an advanced level including rural to specialist valuations.
2. Law with special attention to contracts, consumer protection, land, environment and arbitration.
3. Agency studies, including trust accounting, marketing, property management, finance and tax.
4. Property studies and development including forecasting, investment analysis and development of complex projects.
5. Property economics involving urban economics, planning and land policy.

The course aims at attracting the qualified practitioner who wishes to widen his/her knowledge and understanding of valuation and real property economics.

Admission Requirements
The general conditions governing registration as a candidate for the degree of Master of Real Estate are given later in this handbook but the attention of intending applicants is directed to the following specific requirements:
1. Applicants will have been admitted to the degree of Bachelor of Building, BSc Arch (Hons), Town Planning, Landscape Architecture, Quantity Surveying or Engineering in the University of New South Wales or an
equivalent degree in another approved university and have appropriate industrial experience.

2. University graduates from non-construction disciplines who have appropriate experience in property may be admitted to the course depending on the individual case.

3. Eligible applicants may be required to complete a program of preparatory or concurrent study laid down by the Head of the School of building whose decision will be influenced by the education and experience of each applicant.

Graduate experience and involvement in the property industry is considered an advantage in the selection of candidates.

Fees
This is a full fee paying course. Contact School for details.

Course Structure
The Master of Real Estate is a formal four session part-time or two session full-time degree course comprising 20 subjects. The subject program comprises studies in valuation, law, agency studies, property studies and development and property economics. Students with a grade average of Credit or better in their course may choose to write a thesis to qualify for the degree with honours.

Course Program
Subjects are offered on a four-session cycle. Subjects are normally timetabled on two evenings per week. Except in exceptional circumstances, a student is required to be concurrently enrolled in all subjects in a given session to allow for syllabus integration between subjects.

Session 1
BLDG1101 Valuation 1 (Introduction)
BLDG1102 Real Estate Marketing
BLDG1103 Market Forecasting
BLDG1104 Contracts, Agency & Consumer Protection
BLDG1105 Agency & Trust Accounting

Session 2
BLDG7201 Valuation 2 (Valuation Theory)
BLDG7202 Strata Management
BLDG7203 Property Management
BLDG7204 Land & Environment Law
BLDG7205 Planning & Land Policy

Session 3
BLDG7301 Valuation 3 (Valuation Theory & Practice)
BLDG7302 Valuation 5 (Specialist Valuations)
BLDG7303 Property Development 1
BLDG7304 Arbitration & Litigation
BLDG7305 Urban Economics

Session 4
BLDG7401 Valuation 6 (Rural Utilisation & Valuation)
BLDG7402 Property Development 2
BLDG7403 Property Investment Analysis
BLDG7404 Valuation 4 (Advanced Theory & Practice)
BLDG7405 Organisation, Finance & Tax

5195
Graduate Diploma in Real Estate

Graduate Diploma in Real Estate
GradDipRE

Course Co-ordinator
Dr John M. Hutcheson MC

This four session part-time and two session full-time course has been designed to provide opportunities for advanced study in Real Estate. It allows for study in three interrelated areas:

1. Law with special attention to contracts, consumer protection, land, environment and arbitration.

2. Agency studies, including trust accounting, marketing, property management, finance and tax.

3. Property studies and development including forecasting, investment analysis and development of complex projects.

The course aims at attracting the qualified practitioner who wishes to widen his/her knowledge and understanding of real estate.

Admission Requirements
The general conditions governing registration as a candidate for the degree of Graduate Diploma in Real Estate are given later in this handbook but the attention of intending applicants is directed to the following specific requirements:

1. Applicants will have been admitted to the degree of Bachelor of Building, BSc Arch (Hons), Town Planning, Landscape Architecture, Quantity Surveying or Engineering in the University of New South Wales or an equivalent degree in another approved university and have appropriate industrial experience.

2. University graduates from non-construction disciplines who have appropriate experience in property may be admitted to the course depending on the individual case.

School of Landscape Architecture

The School of Landscape Architecture has an active program of research and advanced study and encourages enquiries from students who wish to pursue graduate education. The degrees Doctor of Philosophy (PhD) and Master of Landscape Architecture are available for those wishing to engage in research. The degrees Master of Landscape Planning (MLP) and Graduate Diploma in Landscape Planning (GradDipLP) are available as course programs. Prospective students should consult the Head of School to discuss their research interests and educational objectives prior to making a formal application.

1160
Doctor of Philosophy

Doctor of Philosophy
PhD

This is a research degree requiring an original and significant contribution to knowledge in an approved subject.

2220
Master of Landscape Architecture

Master of Landscape Architecture
MLArch

This degree is available to part-time and external candidates in addition to full-time candidates. It requires the submission of a thesis embodying the results of an original investigation or design.

8135
Master of Landscape Planning

Master of Landscape Planning
MLP

The course offers advanced education and study opportunities for graduate landscape architects, town planners, surveyors, geographers, engineers, and architects in landscape planning.

The intent is to offer students the opportunity to develop an understanding of the complex relationships between natural environments and expanding human population and to acquire the skills needed for planning and management of emerging landscapes. Principles and concepts from the natural and social sciences along with techniques and methods of geographic information systems, remote sensing and other technologies are emphasized.

Admission Requirements

A four year degree of appropriate standing in landscape architecture, architecture, town planning, surveying, geography or other approved degree in a relevant area of land management or resource and environmental science or a Graduate Diploma in Landscape Planning is required. A qualifying or concurrent program may be required in some cases.

Course Structure

The course will be offered as a full-time program that can be completed in three sessions. To accommodate the practising professionals in the Sydney metropolitan area, the course can also be taken part time and would normally be completed in six sessions or less.

The course is built upon a core of eight required subjects totalling 24 credit points. As far as possible, these core subjects are offered between the times of 2 pm and 9 pm on Monday through Friday to accommodate the working professional. Beyond these core requirements students may select from project alternatives. In all cases the course requires the completion of 36 credit points. This would require the completion of a Landscape Project, Landscape Planning Exercise and/or electives. Topics for Landscape Research Projects and Landscape Projects will be determined in consultation with academic staff of the school.

Graduate Diploma in Landscape Planning

Graduate Diploma
GradDipLP

This course is designed for people who wish to obtain formal qualifications in Landscape Planning through a program in which the emphasis is on completion of subjects. There is no research or independent project requirement.

The intent is as described above for the Master of Landscape Planning course but the program is offered in a more structured setting.

Admission Requirements

A three year degree from an approved university and/or qualifications deemed appropriate by the Higher Degree Committee of the Faculty of the Built Environment is required.

Course Structure

The course is offered as a one year full time, or two year part time program. Students are required to complete a program totalling at least 24 credit points. The required core subjects comprise 21 of these credit points and the remaining 3 credit points are from electives. After successful completion of the course the student may elect to transfer into the Master of Landscape Planning course. This would require the completion of one additional core subjects and a Landscape Research Project or a Landscape Project, a Landscape Planning Exercise and/or electives.

School of Town Planning

Head of School
Professor A.R. Cuthbert

The School of Town Planning has a significant commitment to research and to the training and involvement of postgraduate students in a variety of research areas. The School welcomes enquiries from individuals who wish to pursue the Doctor of Philosophy (PhD), Master of Town Planning (MTP) and Master of Science (Town Planning). Prospective students should contact the Head of School to discuss their research interests prior to making a formal application. Although direct entry into the research degree programs is possible, candidates may be asked to complete qualifying work of one or two sessions duration. Formal conditions governing the award of these degrees are set out later in this Handbook.

Doctor of Philosophy

Doctor of Philosophy
PhD

The Doctor of Philosophy is a research degree on an approved topic which requires an original and significant contribution to knowledge. Students enrol in a Research Seminar program as part of their candidacy.

Master of Town Planning (by research)

Master of Town Planning
MTP

The Master of Town Planning is a research degree awarded on the basis of a thesis which embodies the results of an original investigation. The research program is normally undertaken over a minimum of four sessions, but the period may be reduced in certain circumstances. Students enrol in a Research Seminar program as part of their candidacy.

Admission Requirements

A four year degree (or equivalent) of appropriate standing from an approved university in the field of Town Planning and/or qualifications deemed appropriate by the Higher Degree Committee of the Faculty of the Built Environment.

Professional Recognition

The degree is recognized by the Royal Australian Planning Institute as an academic qualification for corporate membership. The Institute requires that for corporate membership graduates must also have at least one year of practical experience subsequent to graduation.
Course Work
Candidates with a primary degree in a discipline other than Town Planning may be required to complete an additional program of study. The actual program is determined by the Higher Degree Committee of the Faculty of the Built Environment on the recommendation of the Head of the School of Town Planning. Candidates should contact the Head of the School about the guidelines used in formulating such a program.

2335
Master of Science (by Research)
MSc
The Master of Science (Town Planning) is a research degree awarded on the basis of a thesis embodying the results of an original investigation. This degree is designed for students with prior degrees not in planning, who want to undertake masters-level research in the planning field, but do not wish to pursue the MTP. Students enrol in a Research Seminar program as part of their candidacy.

Admission Requirements
A four year degree (or equivalent) of appropriate standing from an approved university and/or qualifications deemed appropriate by the Higher Degree Committee of the Faculty of the Built Environment.

5205
Town Planning Graduate Diploma Course
Graduate Diploma
GradDip
The Graduate Diploma course in Town Planning is tailored to meet the objectives of individual students. It is normally taken as a one year full-time course (or two years part-time) and includes postgraduate coursework, and/or independent study programs to address the needs of particular students.

Admission
An applicant for the Graduate Diploma shall have a degree of a minimum length of three years full-time from an approved institution or have such other qualifications as may be approved by the Higher Degree Committee of the Faculty of the Built Environment.

Course Structure
The course includes three required core subjects, with the remaining content, which may include additional coursework and/or programs of independent study, determined to provide a foundation for postgraduate research in the field.

Core subjects
GSBE0503 Postgraduate Research Design and Methodology
GSBE0504 Quantitative Methods for Built Environment Research
PLAN0851 Research Seminar 1

Individual Programs are defined in consultation with the academic staff of the School and are subject to approval by the Head of the School. Application for exemption from GSBE0504 may be considered by the Head of School for students with appropriate prior experience with statistical techniques and data analysis.
Subject Descriptions

Descriptions of all subjects are presented in alphanumeric order within organizational units.

For academic advice regarding a particular subject consult with the the contact for the subject as listed. A guide to abbreviations and prefixes is included in the chapter 'Handbook Guide', appearing earlier in this book.

Architecture

ARCH7001
Graduate Research Project
Staff Contact: School Office
C60
Prerequisite: Nil.
Corequisites: GSBE0503 (unless exempt by Head of School)

A research project relating to the theory or practice of architecture selected by the student and approved by the Head of the School of Architecture. The research should represent a synthesis of the knowledge and skills that have been acquired during the course of study and will be supervised by a member of the academic staff. Appropriate research methodologies and techniques will be used in all aspects of the work.

The research project is to be completed in two phases: the first phase encompasses one-third of the work and involves the presentation of a graduate seminar introducing the topic of the research, outlining current work in the area from the literature and indicating the proposed research strategy; the second phase, encompassing the remaining two-thirds of the work, leads to the preparation of a written research project and its presentation in a second graduate seminar.

ARCH7101
Architectural Design Project 1
Staff Contact: School Office
C40

Theory, research and studio practice, in the form of graduate research projects in design, applied to general architectural themes of high priority in the contemporary context. After thorough theoretical foundation and research analysis, the theme is adapted to a specific and concrete situation to achieve an architectural synthesis of all relevant influences arising from the physical and human context.

ARCH7102
Architectural Design Project 2
Staff Contact: School Office
C40

Theory, research and studio practice, in the form of graduate research projects in design, applied to general architectural themes of high priority in the contemporary context. After thorough theoretical foundation and research analysis, the theme is adapted to a specific and concrete situation to achieve an architectural synthesis of all relevant influences arising from the physical and human context.

ARCH7201
Computational Design
Staff Contact: School Office
C10

A examination of the theoretical basis of computational design, covering topics such as: design as problem-solving and decision-making; design analysis, simulation and optimisation; theory of form and shape grammars; conceptual modelling; expert systems and knowledge engineering. This subject also touches on the techniques of architectural computing, such as: procedural programming; object-oriented programming; logic programming; expert systems programming; and spreadsheets and databases. Assessment is based on project work and class seminars.

ARCH7202
Computer Graphics Programming
Staff Contact: School Office
C10

A study of the principles and techniques of interactive computer graphics programming using a high-level procedural language. Topics include: procedural language concepts; computer graphics techniques; interactive programming and graphics input; use of graphics libraries; menuing systems; three-dimensional modelling; and colour manipulation. The subject involves a staged series of programming exercises and the development of an interactive graphics-based application.

ARCH7203
Information Technology in Architecture
Staff Contact: School Office
C10
Excluded: ARCH5944 or equivalent

This subject reviews the current state of information technology and its application to the practice of architecture. It includes topics such as: database systems; interaction with CAD system graphics databases; transmission of data; networking and communication technologies; shared technical databases; establishment of product information standards; conceptual modelling techniques; and design information systems. Assessment is by means of projects and student seminars.

ARCH7220
Computer-aided Architectural Drafting
Staff Contact: School Office
C10
Excluded: ARCH6205, ARCH5223 or equivalents.

Introduction to the concepts and techniques of computer-aided drafting with particular reference to architectural communication. The subject deals with both two-dimensional drawing and three-dimensional modelling. The lectures provide a conceptual understanding of computer-aided drafting systems, including both hardware and software aspects. The laboratory segments provide hands-on instruction on how to use a specific example of a drafting system. A set project task reinforces the learning and is used as the vehicle of assessment.
ARCH7221
Computer Modelling and Rendering
Staff Contact: School Office
C10
Excluded: ARCH5222 or equivalent.

Introduction to the concepts and techniques of three-dimensional computer modelling and rendering and their application to the practice of architecture. Topics include: three-dimensional representation of objects and buildings; constructive solid geometry; visualization techniques; ray tracing and radiosity techniques; use of multiple light sources; shading; reflections; transparency; texture mapping and colour manipulation. This subject involves extensive hands-on use of computers, computer laboratory exercises and project work.

ARCH7222
Architectural CAD Management
Staff Contact: School Office
C10
Excluded: ARCH5945 or equivalent

This subject is concerned with the practical implementation and management of CAD systems in the context of architectural practice. Topics will include: CAD system selection and installation; cost issues (purchase, maintenance, upgrades); political implications within practices; software customisation; resource management; office standards; and training. Assessment is by means of projects and student seminars.

ARCH7301
Architecture and the City
Staff Contact: School Office
C10

This subject investigates the historical formation of selected international cities, with attention focussed on past and present theories. Australian developments are studied along with the contributions of Sulman and Boyd. Classes also explore contemporary debates through the projects or writings of the Kriers, Rowe, Rossi et al.

ARCH7302
Theories in History
Staff Contact: School Office
C10

This subject investigates the writings of architectural theorists from Vitruvius to the present. Authors to be studied include Alberti, Quatremère de Quincy, Semper, Loos and Le Corbusier. Interpretations of the texts will be focussed around specific issues critical to modern practice. These will range from broad social concerns, such as the ethical role of the architect, to the qualities of architectural form, such as the relationship of structure to ornament. The aim of the subject is to provide a theoretical foundation capable of responding to the problems we now face.

ARCH7303
Theory and Contemporary Architectural Practice
Staff Contact: School Office
C10

Presents theoretical issues which have arisen in late 20th century practice and criticism, raises a number of ethical issues in relation to architectural practice and their impact on theory, examines the validity of certain architectural positions currently adopted within the architectural profession, and finally discusses prospects for a viable architectural future by reviewing ideas informing both visions for and the projected context of the profession.

ARCH7320
Architectural Theory
Staff Contact: School Office
C10

A general and theoretical approach to synthesis in art and architecture considering sensible and intelligible influences in the context of history and the present age.

ARCH7321
The New Functionalism in Architectural Theory
Staff Contact: School Office
C10

'Form follows function' was the slogan of the Modern Movement in Architecture. This subject reviews the proposition that the movement's work (of architects in both its Empiricist and Rationalist branches) was not functional enough. Implicit in this statement is a revised definition of 'function' developed from the empirical and phenomenological research of the last twenty years and particularly on the development of ecological theory in psychology during that time. It argues that the concept of basic human needs and cognitive needs developed by Abraham Maslow is a sound basis for thinking about the purposes served by the architectural environment.

Building

Master of Project Management

BLDG5100
Project Report
Staff Contact: Mr G.E. Levido

Students with a grade average of Credit or better in their course work may choose to write a Project Report to qualify for the degree with honours. This will require a specialized individual study taken under staff supervision, with the objective of allowing the student to expand knowledge in some aspect of building management.

The Project Report may be taken full-time over one session or part-time over two sessions following the satisfactory completion of all course work subjects. As part of the examination of the Project Report, students will be required to make an oral presentation and defence of the subject matter covered in their report.

BLDG5111
Economics and Project Environment
Staff Contact: Mr G. Runeson & Mr G. Levido
S1 L2 T1

Economic modelling; a model of the Australian economy; economic targets and instruments; fiscal and monetary policies; the structure of the building industry; productivity and competition; land use theory; the structure of the financial market; sources and costs of finance; Political and environmental issues.
BLDG5112
Project Management Framework
Staff Contact: Mr J. Senogles & Mr D. Dombkins
S1 L2 T1
Introduction to general management theories; development of management disciplines and schools of thought; traditional functions of management - organising, planning, monitoring and control; leadership; management communication. Project Management as a discipline in itself; the project life cycle; project organisational design by phase; distinctive attributes and tasks of Project Management; communication on project; communication dysfunctions; development and management of conflict; concepts of uncertainty and risk; project risk identification and analysis.

BLDG5113
Project Management Information Systems
Staff Contact: Dr O. Greste & A/Prof R. Miller
S1 L2 T1
Nature and scope of information for building construction estimating, planning and management. Overview of computer hardware and operating systems; spreadsheet, data base and word processing programs and application areas; design of relational data base structures; data communication and networks; programs for cost estimating, project scheduling, cost monitoring and project information management; CAD overview; computer system specification, selection, installation and operation. The subject involves practical use of various PC packages.

BLDG5211
Project Finance
Staff Contact: Mr B. Reece
S2 L3
Techniques of investment analysis, mainly using the discounted cash flow method. Quantitative methods applying statistical and regression analysis techniques for the purpose of forecasting time series and investigating other data series.

BLDG5212
Human Resources Management
Staff Contact: Mr D. Dombkins
S2 L2 T1

BLDG5213
Project Time Management
Staff Contact: A/Prof T. Uher
S2 L2 T1
Concept of operations analysis; operation research techniques; concept of a model; optimisation. Critical path method; arrow and precedence diagrams; project control time-cost trade-offs; basic overlapping networks; resource allocation and levelling; computer applications of CPM. Work study; line of balance; multiple-activity charting; PERT. Applications of planning techniques.

BLDG5301
Project Feasibility
Staff Contact: Dr J. Hutcheson
S1 L2 T1
A total approach to feasibility studies including market research, establishing client's needs, site selection and analysis, financing methods, preliminary designs, preparation of development applications, life cycle costing. Project risk identification and analysis.

BLDG5312
Contracts Management
Staff Contact: Mr P. Davenport
S1 L2 T1
Selection and preparation of contract documents for management, design and construction of building projects; options for project delivery; procedural and management aspects of alternative forms of contract; analysis of head contracts and subcontracts; contract claims and disputes; international contracting; risk allocation in construction contracts; effective management of tender process. Professional liability.

BLDG5313
Quality & Cost Management
Staff Contact: A/Prof M. Marosszeky & Mr P. Marsden
S1 L2 T1

BLDG5401
Management of Buildings
Staff Contact: Dr J. Hutcheson
S2 L2 T1
Maintenance and obsolescence; economics of refurbishment; marketing; tenancy management; building control and security systems; management of commercial, retail, industrial and large scale residential complexes; legal aspects of tenancy management; energy conservation; taxation law and implications.

BLDG5412
Project Integration
Staff Contact: Mr D. Dombkins
S2 L2 T1
The application of core project management skills to a case study. Students (in groups) will participate in an interactive situational case study. Team building. Feedback will be provided on student personal and group skills in simulated project environment, presentation and project management skills. Proposal planning, crisis management, feedback processes. International project management case studies.

BLDG5413
Project Applications in Building
Staff Contact: Mr J. Kim & Mr D. Dombkins
S1 L2 T1
Project procurement options; initial strategy review; team member selection and briefing; team-building and
partnering; consultant selection and commissioning; other stakeholders and approvals; the design process; project management in the construction process; commissioning tenant fitout and project finalisation; value engineering; project feedback process; strategic and detail planning; scope management.

Master of Construction Management

BLDG6150 Industry Training  
*Staff Contact: A/Prof T. Uher*

Students will be placed on a project for a period and be required to attend inspections of other major construction projects, demonstrations of plant and equipment, and short courses on specific building materials and construction systems.

BLDG6151 Construction Methods and Techniques  
*Staff Contact: A/Prof M. Marosszey*  
S1 L2 T1

Appropriate selection and use of current techniques and systems in all construction phases.

BLDG6153 Management of Construction  
*Staff Contact: Mr J. Kim & Mr J. Senogles*  
S2 L2 T1

Project delivery strategies; Organisation of projects from design to commissioning; Team building and motivation; Design and quality management; Time and value management; Construction site and resources management; Project control systems.

BLDG6154 Economics in Construction  
*Staff Contact: Mr B. Reece & Mr G. Runeson*  
S1 L2 T1

Economics of the construction industry; its interrelationship with national and transnational economics.

BLDG6155 Computers in Construction Management  
*Staff Contact: Dr O Greste*  
S1 L2 T1

Nature and scope of information for building construction estimating, planning and management; overview of computer hardware and software; MSDOS operating system; spreadsheet, data base and word processing programs and application areas; design of data base structures for relational data bases; data communication and networks; programs for cost estimating, network based projects scheduling, cost monitoring, and project management; CAD systems; computer system specification, selection, installation and operation. The subject involves practical use of spreadsheet, data base and word processing packages.

BLDG6157 Property Management  
*Staff Contact: Mr J. Kim*  
S2 L2 T1

Property development process: Evaluation, feasibility study; Preparation, life cycle cost in building; Disposal, marketing; Property investment analysis.

Building management: Tenancy management; Building maintenance; Obsolescence; Economics of refurbishment; Commercial property management; Strata title management; Taxation in property management.

BLDG6158 Principles and Practice of Management  
*Staff Contact: Mr J. Senogles*  
S1 L2 T1

Introduces the general principles of management: Basic management functions; planning process, organizing; control of time, cost and quality. Organisation structure; functional/divisional matrix structures, concepts of management communication; motivation; delegation; team building. Decision theory and risk management.

BLDG6250 Research Report  
*Staff Contact: A/Prof T. Uher*

A specialised individual research study, under staff supervision, into an approved aspect of construction management or a related topic.

BLDG6251 International Construction Practice  
*Staff Contact: Mr D. Dombkins*  
S2 L2 T1

A comparison of construction practices in various nations. The impact of local economic, labour and technical parameters on construction management.

BLDG6253 Construction Planning and Control  
*Staff Contact: A/Prof T. Uher*  
S1 L2 T1

The concept of construction planning and control; planning and control techniques; bar chart, PERT, line of balance, multiple activity chart; computer based planning and control; applications of work study.

BLDG6255 Contracts Management and Law  
*Staff Contact: A/Prof T. Uher & Mr P. Davenport*  
S2 L2 T1

Principles of administration of construction contracts; formation of construction contracts and subcontracts; contract administration of different phases of construction projects; options for project delivery; principles and practice of tendering; analysis of AS21241986, JCCA & B and FIDIC contracts; contract disputes; arbitration, mediation, litigation; contract claims; risk allocation in construction contracts; international contracting.

BLDG6256 Cost Planning and Analysis  
*Staff Contact: Mr P. Marsden*  
S2 L2 T1

An introduction to construction estimating, elemental cost planning, design variables, cost control procedures, feasibility studies and risk management.
BLDG6257
Quantitative Methods in Management
Staff Contact: Mr B. Reece & Mr G. Runeson
S1 L2 T1
Statistical analysis and modelling methods in construction management.

BLDG6258
Construction Management Applications
Staff Contact: Mr N. Yates
S2 L2 T1
The objective of the subject is to expose students to the realities of involvement with a large building or construction project. Detailed analysis of each stage of the project case study: Feasibility, Design and Documentation, PreConstruction, Construction and Commissioning.

Master of Real Estate
Graduate Diploma in Real Estate
Graduate Diploma in Valuation

BLDG7101
Valuation 1 (Introduction)
Staff Contact: Mr K. Gunther
S1 L2
Qualities of the different main investments - classes compared.
Investment opportunities. Property investment and the underlying factors of the market.
Value; Reasons for valuation; Legal interests in properties.
Features of property and the property market. The role of the valuer. Rates of interest and yields (capitalisation rates) Methods of valuation. The role of the valuer, including social and ethical responsibilities to the public.

BLDG7102
Real Estate Marketing
Staff Contact: Dr John M. Hutcheson
S1 L2
Auctioneers & Agents Act & Regulations, documentation, agency agreements, 'code of ethics', conjunction, source of listings, vendor/buyer qualification, listing procedures, pricing, promotion, presenting marketing plans, advertising, enquiries, finance and staffing, negotiating.
Rural property - map reading aerial photography, land titles 'restricted' title, leasing Agricultural Holdings Act.
Auctions - procedures & practice. Tender, sale of plant, franchising, electronic marketing.
Consumer rights and protection, impact of the consumer protection and Free Trade Acts.

BLDG7103
Market Forecasting
Staff Contact: Dr John M. Hutcheson
S1 L1
The marketing mix; The relationship between a marketing system and the environment; Marketing tactics and strategy; market segmentation and the buyer decision process; Listing, selling and the auction process; International marketing; The underlying economic fundamentals of forecasting; Forecasting the economy; Forecasting the property market; Analysing demand and supply patterns of property; Social responsibilities.

BLDG7104
Contracts, Agency & Consumer Protection
Staff Contact: Mr P. Davenport
S1 L2
Current and social issues; the consumer's point of view.

BLDG7105
Agency & Trust Accounting
Staff Contact: Mr F. Kelly
S1 L2
Revision of the role of information systems, accounting systems as information systems, financial management accounting, statements of activity, position and flow, accounting principles, components of accounting systems, assets, liabilities, proprietorship, expenses, revenue, data accumulation, recording, classification, source documents, accounts of prime entry, ledger accounts, trial balances, generation of financial statements, statutory accounts.
The need for analysis, ratio analysis, debit/equity. Trust accounting and trustee obligations. Accounting procedures for the administration of an estate policy. Role of data processing in the administration of a real estate practice. Ethics, duty of care to public, social responsibility.

BLDG7201
Valuation 2 (Valuation Theory)
Staff Contact: Mr K. Gunther
S2 L2
Pre-requisite: Valuation 1
Investment - rates of interest, yields, risk. Yields and property investment. Methods of valuation - comparison, summation, hypothetical development, profits, capitalisation, mortgage/equity. Valuation mathematics and valuation tables; Application of the tables. Terminable income flows; Freehold interests and terminable incomes. Freehold interests and terminable incomes; Simple leasehold valuation. Analysis of simple leasehold valuations; Effect of tax on property income; Valuation of residential properties.

BLDG7202
Strata Management
Staff Contact: Dr John M. Hutcheson
Duties and responsibilities of the licensed strata managing agent to his principal, his customers and the public.
Strata schemes, the body corporate, the developer, managing agents.
Strata meetings - during initial period, the first annual general meeting, annual general meetings, extraordinary general meetings, council meetings.
The Council, the strata roll insurances, related matters. By-laws, disputes procedures. Responsibility to the public, ethical considerations, social relationships.
BLDG7203
Property Management
Staff Contact: Dr John M. Hutcheson
S2 L2
The duties and responsibilities of the licensed real estate agent to this principal, his customers and the public; relevant legislation.
The Landlord and Tenant (Amendment) Act; The Auctioneers & Agents Act and Regulations; Residential Tenancies Tribunal Act; Land & Tenant (Rental Bonds) Act; Management of residential, industrial, commercial, retail property and shopping centres; Lease agreements; Rent reviews; Maintenance, repairs, plant and equipment; Obsolescence, redevelopment; Computer programs; Office management.
Role and impact of resident action groups, customers and the public.

BLDG7204
Land & Environment Law
Staff Contact: Mr P. Williams
S2 L2
Planning, Planning legislation, Environmental planning instruments, Environment - common law - statute - role of public and pressure groups, environmental planning control, environment assessment, heritage legislation.
Land law - public and private, Estates and tenures, Co-ownership, Leases, Easements, Restrictive covenants, Licences, Residential tenancies tribunal.
Alternative models including other countries, Critical perspective, Heritage Law.

BLDG7205
Planning & Land Policy
Staff Contact: Prof A. Cuthbert
S2 L2
The objectives of planning; The history of land use planning in Australia; The achievement of planning objectives; Planning authorities; Planning codes and development plans; Statutory powers of planning authorities; Planning procedures; Control of the development process; Retail development; Commercial development; Industrial and warehouse development; Special development; Environmental impact assessment.
Government intervention in land use matters; Public finance and planning; Political considerations and planning and development; Government control and speculation - laissez-faire or public control; Planning and housing policy; Urban decay and renewal; The problems of the urban fringe; Conservation, preservation, redevelopment.

BLDG7301
Valuation 3 (Valuation Theory & Practice)
Staff Contact: Mr F. Kelly
S3 L2
Prerequisite: Valuation 2
Ground rents; Adjustment of rents to net income. Premiums and the calculation of the same. Surrender and renewal of leases. Life interests. Shortcomings of sinking fund theory. Double sinking fund, sinking fund methods etc.
Discounted cash flow approach and valuation. The valuation of rural properties.

BLDG7302
Valuation 5 (Specialist Valuation)
Staff Contact: Dr John M. Hutcheson
S3 L1
Prerequisites: Valuation 1 & 2
Corequisite: Valuation 3
Petrol filling stations; Hotels and restaurants. Licensed premises; Business valuations. Leisure and recreation properties; Cinemas and theatres. Plant and machinery; Basements; Valuations for insurance. Valuations for mortgages etc; Extractive industries. Ethical, social and environmental aspects of all types of specialist valuations.

BLDG7303
Property Development 1
Staff Contact: Dr John M. Hutcheson
S3 L2
A total approach to the building process through the four stages of predesign, design, construction and post-construction. Market research, establishing client's needs, site selection and analysis, feasibility studies and financing methods.
Selection and monitoring the work of the design team, preliminary designs, preparation of development applications, cost value analysis, value management, life cycle costing and services integration. Preplanning and building process, utilisation of construction and management consultants.
Development control during construction and in completion, tenant fitouts and handing over to clients of the completed project. Social responsibilities of developers.

BLDG7304
Arbitration & Litigation
Staff Contact: Mr P. Davenport
S3 L2
Compensation on acquisition or resumption; Rating and taxing; Professional responsibility; Court procedure and evidence; Role of valuer as expert witness; Arbitration and expert determination; Specific performance. Liability, ethics, self-regulation.

BLDG7305
Urban Economics
Staff Contact: Mr B. Reece
S3 L2
Political economics; Economic advantages and disadvantages of urbanisation; Issues in applying economic theory to urban land; Methods for analysing the economic base in urban areas; Elementary rent models; Rent and transport costs; Business location - access/space model; Residential location - factors other than central access; Tuning of the models of the development process; Intra-urban industrial location; Office location; Density and land value gradients; Inter-urban location; Urban population growth and its effects on urban development; systems of settlements and the emergence of cities as central places.

BLDG7401
Valuation 6 (Rural Utilisation & Valuation)
Staff Contact: Mr G. Kemp
S4 L1
Prerequisites: Valuation 1 & 2
Corequisite: Valuation 3

Land settlement in Australia; Climatic regions; Soils, derivation, classification, improvement and management. Pastures; Crops and marketing systems; Livestock and management. Water and irrigation; Farm costs; Specialised rural enterprises. Rural land tenures; Mapping and aerial photography; Property specifications. Basic units of value; Rural land sales analysis; Improvements - depreciation. Methods of valuation. Landcare total catchment management environmental impacts. Ethics and social responsibilities.

BLDG7402 Property Development 2
Staff Contact: Dr John M. Hutcheson
S4 L2
Prerequisite: Property Development 1
Redevelopment, refurbishment, change in use; Special projects including leisure, hotels, restaurants, petrol stations, one-stop convenience stores, cinemas, theatres, canal developments, rural, mines. Land subdivision.
Revenue and costs; Risk and uncertainty; Supply and demand of subdividable land and development sites; Site assessment and assembly; Development and betterment; The impact of Acts, Regulations, By-laws and planning policies.
Analysing computer programs on the market; Statements of environmental effects; Rectification of contaminated sites.

Environmental sustainability, environmental impact statements.

BLDG7403 Property Investment Analysis
Staff Contact: Dr John M. Hutcheson
S4 L2
Prerequisites: Valuation 1 & 2
Capital investment analysis; Advanced investment evaluation; Financial management and analysis; Growth and development; The financial market; Analysing property investments and portfolios.
Public and private investment; Social issues and directions.

BLDG7404 Valuation 4 (Advanced Theory & Practice)
Staff Contact: Mr G. Beckett
S4 L2

BLDG7405 Organisation, Finance & Tax
Staff Contact: Dr John M. Hutcheson & Mr B. Reece
S4 L2
The property institutes and RESC, professionals (eg. planners, builders, lawyers, engineers, accountants, quantity surveyors, architects etc). The developer, the project manager and the property investor. Capital gains; Land; Income; Fringe benefits tax.

Nature of real estate as an investment; Principles of money and capital markets; Comparison of characteristics of government bonds, shares and real estate, technical aspects of these markets such as yield curves and the concept of market efficiency, and the effect of business cycles.

Characteristics of real estate lenders and alternative fund sources; Analysis of leverage in real estate; Concepts of risk and portfolio analysis; Measuring returns from real estate - the BOMA index.

Code(s) of ethics, efficiency of capital markets, social injustice, negatives of the capitalist societies.

Town Planning

PLAN0111 Introduction to Planning (G)
Staff Contact: Mr S. Harris
SS

PLAN0121 Local Planning 1 (G)
Staff Contact: Dr T. Lukovich
SS
Theories at the local level: neighbourhood and precinct concepts, local community structure, survey and analysis. Subdivision and housing layout, basic transportation planning and management, street design, landscaping, utilities. Practice of planning new neighbourhoods and proposals for conservation and redevelopment.

PLAN0131 Regional Planning 1 (G)
Staff Contact: Dr P. Murphy
SS
Theories at the metropolitan level. Accessibility, equity, economics, politics. Structure and organization, land use and transportation relationships. Forecasting, alternative futures. Incremental decision making. Integrating local and metropolitan planning.

PLAN0141 Planning Law and Administration
Staff Contact: Mr P. Williams
SS
PLAN0151
Local Planning 2 (G)
Staff Contact: Ms S. Thompson
SS
Focus on diversity and difference in the urban environment. Characteristics of community groups; analysis of planning policy and methodology in terms of abilities to respond to diversity and difference.

PLAN0161
Regional Planning 2 (G)
Staff Contact: School Office
SS

PLAN0211
Communications and Public Utilities
SS
Interaction of land use and transportation. Vehicular and pedestrian circulation patterns. Traffic function and capacity of district and neighbourhood roads. Principles and practice of local road construction, water supply, sewage treatment and disposal, and drainage. Local supply of electricity, gas, telephone, and other services.

PLAN0212
Land and Housing Economics
SS

PLAN0213
Urban Sociology
Staff Contact: A/Prof R. Zehner
SS
A sociological approach to the study of urban phenomena. Lectures deal with both methodological and theoretical issues relating to the study of urban social structures. Seminars provide students with the opportunity to examine critically a number of community studies.

PLAN0811
Planning (Special Subject)
Staff Contact: Head of School
C2 SS

PLAN0812
Planning (Special Subject)
Staff Contact: Head of School
C4 SS
Students have the opportunity to pursue a subject of special interest related to planning, depending on staffing resources.

PLAN0851
Research Seminar 1
F or SS

PLAN0852
Research Seminar 2
F or SS

PLAN08
Research Seminar
F or SS
Note/s: Students enrolled in the PhD (Course 1150), MTP (Course 2230), MSc(Town Planning) (Course 2235) and GradDip (Course 5205) are expected to enrol in this subject each year, starting with Research Seminar 1 in their first year, Research Seminar 2 in their second year, and so forth. Those taking the subject as part of a qualifying program must obtain a grade of Credit or higher to be considered for progression to candidacy for a research degree. The seminar presentations of research degree candidates are graded only on a satisfactory/unsatisfactory basis, and contribute to the annual reviews of those students' progress.

A program of supervised independent study in an area of planning in which the student is undertaking, or expects to undertake, research. Students present a seminar on their current or proposed research, take part in discussions at other student seminars, and may be asked to attend comparable postgraduate seminars within the University and at other institutions.

PLAN0911
The Organization of Town Planning
Staff Contact: School Office
SS
Aims, means and consequences of town planning in Australia. Aims of planning: organization of the environment in respect of space and time, interrelationship of functions, equity of resource distribution, human satisfaction, the nature of the planning approach. Means of planning: overview of the planning process, laws related to planning, planning assessment procedures, environmental management at different levels, decision making processes - financiers', firms' and private decisions, changes in public values, public participation, political and economic constraints. Consequences of planning: illustrative case studies, evaluation of planning methodology and procedures.

Landscape Architecture

LAND9001
Landscape Project
Staff Contact: A/Prof F. Thorvaldson
C6 F
A project relating to the practice of landscape architecture selected by the student and approved by the academic staff of the school. The project should represent a synthesis of the knowledge and skills that have been acquired during the course of study and will be supervised by a member of the academic staff. Appropriate methodologies and techniques will be used for assessment, analysis, and evaluation of project parameters.
LAND9002
Landscape Research Project
Staff Contact: A/Prof F. Thorvaldson
C12 F
A research project directed at furthering the body of knowledge relating to the art and science of landscape architecture selected by the student and approved by the academic staff of the school. The research project should be a synthesis of the knowledge and skills acquired during the course of study, and should further the student's knowledge or expertise in a specialized field of study. Emphasis will be placed on continued development of research skills in the areas of data collection, analysis, interpretation and presentation. The research project will be supervised by members of the academic staff of the University.

LAND9213
Land Systems and Management
Staff Contact: Ms A. Todd
C3 S2 L1 T2
An investigation of resources and their management in relation to a range of land use types with an emphasis on an ecological approach. Subject material includes consideration of management of cultural as well as natural landscapes. Studies of specific examples relating to the effects of human impacts are included. Methods of conservation and rehabilitation are considered. Field excursions are included.

LAND9010
Environmental Heritage Studies
Staff Contact: Ms H. Armstrong
C3
An investigation of the concepts of environmental heritage concerning aspects of landscape architecture and conservation issues. The application of environmental heritage in the fields of planning and design. Investigation of case studies of the natural and cultural environment. Projects to investigate problems of planning and managing heritage environments. Methods of conservation analysis with an emphasis on Australian environments and their history.

LAND9111
Landscape Planning
Staff Contact: Mr D. Crawford
C3 S1 L2 T1
Introduction to the discipline of landscape planning. Explores a range of basic methods and techniques for the collection, analysis, and valuation of landscape resource data. Application of this knowledge in the development of simple landscape planning models. Participation in a planning exercise applying these skills and knowledge using simple computing techniques.

LAND9212
Landscape Planning Methods
Staff Contact: Mr D. Crawford
C3 S2 L2 T1
Examination and comparison of a range of landscape planning methods using examples from Australia and overseas. Students conduct research relating to the physical parameters of models for land use evaluation and environmental impact assessment. Participation in planning exercises involving the application of these models using advanced computing techniques.

LAND9212
GIS in Landscape Architecture
Staff Contact: Mr. D. Crawford
C3 S1 L2 T1
Principles of geographic information systems, techniques of data collection, storage analysis, modelling and display. Applications and procedures specific to Landscape Architecture and Landscape Planning. Laboratory exercises using the IDRISI GIS.

LAND9301
Landscape Planning Exercise
Staff Contact: Mr. D. Crawford; A/Prof F. Thorvaldson
C6 S1 T8
Prerequisite: Core subjects of course.
Application of Landscape Planning to a major land resource allocation and management project undertaken as a group exercise.

LAND9214
Visual Landscape Assessment
Staff Contact: A/Prof F. Thorvaldson
C3 S2 L2 T1
Examination of visual analysis, assessment and evaluation techniques and their incorporation into landscape planning models. Research and study of recent Australian and overseas examples of visual resource management programs. Students will undertake visual planning exercises using relevant computer software.

Graduate School of the Built Environment

Not all graduate course subjects are necessarily offered in any one year.

GSBE0001
Conservation Policy and Practice
Staff Contact: Don Godden
CP 5
The contextual system of the heritage and conservation movement. The history of the conservation movement worldwide with special reference to Australia. The place of building conservation, urban conservation and conservation management in the existing cultural milieu. The importance of conserving physical aspects of the past.

GSBE0002
Heritage Legislation
Staff Contact: Don Godden
CP 5
The role of the various professional and voluntary bodies in the conservation movement in Australia, the Heritage Council of NSW, the Heritage Commission of Australia and other bodies. the responsibilities of government authorities pursuant to the Heritage Act of 1977. An examination of legislation at local, state and Federal Government levels.
aimed at protecting items of cultural heritage. Problems associated with enforcing legislation at all levels.

GSBE0004
Cultural Significance
Staff Contact: Don Godden
CP 5
The concept of cultural significance in Australia and other nations. The variation in the concept of cultural significance between nations and within the same nation. Established methodologies for assessing cultural significance. The Venice Charter and the Burra Charter. Principles and processes in the Burra Charter. The development and impact of the State Heritage Inventory Project.

GSBE0005
Historical Processes I / The Built Environment
Staff Contact: Don Godden
CP 10
The major architectural movements in Australia and the principal architects associated with them. The work of the Government Architects from colonisation to the present and their building legacy. The great Australian architects and their impact on the styles of Australian architecture. The underlying social, economic, historic and technological forces which shaped Australian architecture.

GSBE0006
Historical Processes II / Technology
Staff Contact: Don Godden
CP 10
The development of the early technologies for forming wood, stone, earth, brick and metal in Australia. An overview of the properties of the early building materials, methods of working and their effect on architectural form and designs. Effect of the development of steam and electric power on materials-processing technology. The emergence of the age of gas and its impact on lighting, heating and ventilation. the effects of the introduction of hydraulic power, electricity and transport technology and the growth of the city.

GSBE0007
Traditional Building Materials and Technologies
Staff Contact: Don Godden
CP 10
A detailed study of the properties of building materials and their use from colonisation to the second world war. Methods of field and laboratory examination of a wide range of materials. The construction associated with rude timber work, carpentry, joinery and cabinet making. The properties and uses of the ferrous and non-ferrous metals including wrought iron, cast iron, galvanised sheet steel, copper, brass, bronze and aluminium. The techniques of masonry construction and the shaping of stone using manual and power tools. The development of paints and painting technology from the early oil and water based paints to the early plastic paints. Glazing, lead lighting and stained glass manufacture.

GSBE0008
Conservation Technology
Staff Contact: Don Godden
CP 10
The analysis of the causes of the deterioration of a wide range of building materials. Damage caused to masonry, plaster and render by weathering, rising damp and falling damp, and techniques of control. The principal causes of deterioration in timber including insect and fungal attack, methods of inspection and techniques of control. Metal corrosion, its causes and methods of reduction. Techniques used in the repair of damaged metal elements.

GSBE0009
Conservation Research
Staff Contact: Don Godden
CP 10

GSBE0011
Conservation Processes
Staff Contact: Don Godden
CP 5
Methodologies appropriate to the preparation of conservation policies and conservation plans. The principle of preservation, restoration, reconstruction and adaption. The concepts of retaining significance and regaining significance. The structure of conservation policies and conservation plans. The appreciation of conflict in the conservation process; conflict resolution and the place of compromise.

GSBE0012
Adaption, Recycling and Conservation Management
Staff Contact: Don Godden
CP 10
The economics of recycling buildings, structures, precincts and complexes. Building codes which effect recycling. The ethics and politics of the conservation process in recycling. The problems associated with services in traditional buildings and the replacement of significant fabric in meeting building codes and local council requirements. The implementation of conservation policies. Environmental psychology and the role of individuals and interest groups in the conservation process. Social, economic and environmental considerations in the conservation of precincts, buildings, structures and relics. Cultural tourism and its ramifications.

GSBE0014
Graduate Project
Staff Contact: Don Godden
CP 25
An appropriate conservation topic from an associated field including such areas as historical archaeology, documentation, legalisation, economics, technology or a specific building restoration project. The topic of the graduate project is to be chosen in conjunction with the course convenor. Conditions governing the submission of the Graduate Project appear in the calendar.

GSBE0503
Postgraduate Research Design and Methodology
Staff Contact: Prof Jon Lang
CP 10
An introduction to the nature and purpose of research and its role in problem solving and theory in the built environment disciplines. Discussions of various approaches to research. Reliability, validity and other principles of research. A review of the principle research methods and examples of their use. Topic definition, research design, research planning and time management, literature review, data collection and analysis, thesis structure, writing, presentation of research seminars and research papers.

GSBE0504
Quantitative Methods in Built Environment Research
Staff Contact: Dr Murti Durvasula
CP 10

Deals extensively with the methodology of survey research and applications of basic and multi-variate statistical techniques in the analysis of data. Instruction in the uses of the Statistical Package for Social Sciences (SPSS), which aids students in the analysis of data, is also included.

Objectives, methodology and research techniques of ergonomics. Man/machine, interaction, human perception and performance, anthropometrics, product evaluation, the establishment of ergonomic parameters in product design and the application of ergonomics in design, the interrelationship of ergonomics and industrial design in the product development process. Students carry out laboratory experiments related to project work and also contribute to the development of a data bank.

IDES5111
Visual Thinking
Staff Contact:
C2 S1 HPW2

Note/s: Graduates of visually oriented courses, eg architecture, are normally exempt.
Visual language, media, problems and problem solving methods. The relationship between visual thinking and creative processes. Studies are undertaken in two and three dimensions and are developed within the context of art and design.

IDES5124
Business Studies for Industrial Designers
Staff Contact:
C2 S1 HPW2

The theory and practice of business and industrial management, and marketing. Its application in the product development process and the relationship of the process to other business and industrial objectives. Special reference to the Australian industrial context and potential developments resulting from technological and socioeconomic change. Professional practice and the management of design organisations in the general context of business and industrial management.

IDES5131
Industrial Design
Staff Contact:
C4 S1 HPW4
Corequisites: IDES5071 or equivalent.

Industrial design project work intended to integrate the student's previous experience and the course units in preparatory work for the Graduate Project. A part of the course may be undertaken on a group basis.

IDES5141
Industrial Design A
Staff Contact:
C6 S1 or S2 HPW6
Corequisites: IDES5071 or equivalent

Project work designed to introduce industrial design research and studio methodologies. Studies undertaken within a broad range of product areas and related to the concurrent course work.

IDES5152
Manufacturing Technology
Staff Contact:
C2 S1 HPW2

Industrial processes and materials, production costing and changing production economics. Objectives and structures of the engineering professions and their integration with industrial design in the product development process. Students assist in the development of a data bank.
Advanced project work combining the research and practice methodologies of industrial design in product research, development and design, preparatory to undertaking the Graduate Project.

**IDES6171**

**Industrial Experience**

**Staff Contact:**

C2

**Prerequisite:** Enrolment in one of the degrees

A four week period of approved industrial experience undertaken by full-time students in the midyear recess and by part-time students in either the midyear or summer recess. The period is intended to give students first hand interaction with industrial and commercial operations. Normally students are expected to be involved in design activities, however involvement in production, engineering, management and marketing is also considered. Part-time students in approved employment are exempt.

**IDES6181**

**Graduate Project (MSc(IndDes))**

**Staff Contact:**

C8 S2 HPW8

A project within the practice areas of industrial design, proposed by the student in consultation with the School and conducted within an approved methodology; documentation of the methodology, research strategy and techniques, monitoring of the design process, resultant design, and evaluation of the methodology, research and design.
First Degrees

Rules, regulations and conditions for the award of first degrees are set out in the appropriate Faculty Handbooks.

For the list of undergraduate courses and degrees offered see Table of Courses by Faculty (Undergraduate Study) in the Calendar.

The following is the list of higher degrees, graduate diplomas and graduate certificates of the University, together with the publication in which the conditions for the award appear.

Higher Degrees

For details of graduate degrees by research and course work, arranged in faculty order, see UNSW Courses (by faculty) in the Calendar.

*Faculty of Science.  
†Faculty of Biological and Behavioural Sciences.
Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty or board (hereinafter referred to as the Committee) to a candidate who has made an original and significant contribution to knowledge.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment as a candidate for the degree.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be lodged with the Registrar at least one month prior to the date at which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled either as a full-time or a part-time student.

(4) A full-time candidate will present the thesis for examination no earlier than three years and no later than five years from the date of enrolment and a part-time candidate will present the thesis for examination no earlier than four years and no later than six years from the date of enrolment, except with the approval of the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor and where possible a cosupervisor who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

*"School" is used here and elsewhere in these conditions to mean any teaching unit authorised to enrol research students and includes a department where that department is not within a school, a centre given approval by the Academic Board to enrol students, and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.
(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) it must be an original and significant contribution to knowledge of the subject;

(b) the greater proportion of the work described must have been completed subsequent to enrolment for the degree;

(c) it must be written in English except that a candidate in the Faculty of Arts and Social Sciences may be required by the Committee to write a thesis in an appropriate foreign language;

(d) it must reach a satisfactory standard of expression and presentation;

(e) it must consist of an account of the candidate's own research but in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that one of the following:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of school.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the higher degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further work recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further work, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate be permitted to resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of Architectural Design (MArchDes)

(No new candidates will be enrolled in this course from Session Two, 1992)

1. The degree of Master of Architectural Design by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:
   (a) have been awarded the degree of Bachelor of Architecture with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee), and
   (b) have had at least one year's professional practice subsequent to graduation of a kind acceptable to the Committee.

   (2) In exceptional cases an applicant who submits evidence of such academic and/or professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

   (2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

   (4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of full-time candidate or three sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Architecture by Research (MArch), Master of Building (MBuilding), Master of the Built Environment (MBEnv), Master of Landscape Architecture (MLArch) and Master of Town Planning (MTP)

1. The degree of Master of Architecture or Master of Building or Master of the Built Environment or Master of Landscape Architecture or Master of Town Planning by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South
CONDITIONS FOR THE AWARD OF DEGREES

Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such academic and/or professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the head of the school* in which the candidate intends to enrol shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external – not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation or design.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done conjointly with other persons may be accepted, provided the committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree thesis.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

*Or department where a department is not within a school or schools or departments where the research is being undertaken in more than one school or department.
Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this in not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:
   (a) the candidate be awarded the degree without further examination; or
   (b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or
   (c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or
   (d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or
   (e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Architecture (MArch)

1. The degree of Master of Architecture may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced research and study in a selected area of specialisation.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor of minimum 4 years from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee).

(2) Further to (1), candidates wishing to pursue a specialisation in architectural design are required to hold such Bachelors degree in Architecture at Honours level and have had at least one year's professional practice of a kind acceptable to the Committee subsequent to graduation. In addition, in order to gain admission to the program, all such candidates are required to submit and have approved a portfolio which demonstrates the nature and quality of their past architectural design work.

(3) In exceptional cases, an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee, may be permitted to enrol for the degree.

(4) If the Committee is not wholly satisfied with the qualifications held by an applicant, taking due notice of the intended area of specialisation, the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) Along with that formal application, candidates are required to submit a proposed Program of Study, identifying the selected area of specialisation and the proposed sequence of subjects to be taken.

(3) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(4) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(5) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment.

Graduate Research Thesis

4. (1) In general, the Graduate Research Thesis would not be commenced until an adequate grounding in the candidate's area of specialisation has been established through the study of appropriate core and elective subjects.

(2) The work shall be carried out under the direction of a supervisor appointed from the fulltime academic members of the University staff.

(3) The candidate shall give in writing to the Registrar two months notice of intention to submit a Research Thesis.

(4) Three copies of the Research Thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of Research Theses for higher degrees.

(5) It shall be understood that the University reserves the right to retain the three copies of the Research Thesis submitted for examination and is free to allow it to be consulted or borrowed. Subject to the provisions of the Copyright Act 1968, the University may issue the Research Thesis in whole or in part, in microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the Research Thesis, appointed by the Committee.

(2) Arrangements may be made by the School for oral presentation and defence of the Research Thesis as part of the examination.

(3) At the conclusion of the examination, each examiner shall submit to the Committee a concise report on the Research Thesis and shall make one of the following recommendations:

(a) the Research Thesis be noted as satisfactory; or

(b) the Research Thesis be noted as satisfactory subject to minor corrections being made to the satisfaction of the Head of School; or

(c) the Research Thesis be noted as unsatisfactory and the candidate permitted to resubmit it in a revised form after a further period of study and/or research; or

(d) the Research Thesis be noted as unsatisfactory and the candidate be not permitted to resubmit it.

(4) The Committee shall, after considering the examiners' reports, the candidate's results of assessment in the prescribed formal subjects, and their performance in Graduate Seminars, recommend (or otherwise) that the candidate be awarded the degree. If it is decided that the Research Thesis is unsatisfactory, the committee shall determine whether or not the candidate may resubmit it after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of Project Management (MPM)

1. The degree of Master of Project Management by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study. The degree shall be awarded at Pass or Honours level.

Qualifications

2. (1) A candidate for the degrees shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee).

(2) In exceptional cases of an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree at Pass level until the lapse of four academic sessions from the date of enrolment for a candidate undertaking the program at Pass level and eight sessions for a candidate undertaking the program at Honours level. In special cases an extension of these times may be granted by the Committee.

Project Report

4. (1) A candidate who obtains a grade average of Credit or better in the formal subjects in 3. (2) may undertake a project on an approved topic.

(2) The work shall be carried out under the direction of a supervisor appointed from the full-time academic members of the University staff.

(3) The candidate shall given in writing to the Registrar two months notice of intention to submit a report on the project.

(4) Three copies of the project report shall be presented in a form which complies with the requirements of the University for the preparation and submission of project reports for higher degrees.

(5) It shall be understood that the University retains the three copies of the project report submitted for examination and is free to allow the project report to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the project report in whole or in part, in microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the project report, appointed by the Committee.

(2) Arrangements shall be made for oral presentation and defence of the project report as part of the examination.

(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the project report and shall recommend to the Committee that:

(a) the project report be noted as satisfactory; or
(b) the project report be noted as satisfactory subject to minor corrections being made to the satisfaction of the head of the school; or
(c) the project report be noted as unsatisfactory but that the candidate be permitted to resubmit it in a revised form after a further period of study and/or research; or
(d) the project report be noted as unsatisfactory and that the candidate be not permitted to resubmit it.

(4) The Committee shall, after considering the examiners' reports and the candidate's results of assessment in the prescribed formal subjects, recommend that the candidate be awarded the degree at Pass or Honours level. If it is decided that the project report is unsatisfactory the Committee shall determine whether or not the candidate may resubmit it after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Construction Management (MConstMgt)

1. The degree of Master of Construction Management by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee).

(2) In exceptional cases of an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) An approved candidate shall be enrolled in full-time attendance at the University.

(3) A candidate for the degree shall be required to undertake formal subjects, industry training, prepare a report to be assessed by two internal examiners and pass such assessment as prescribed.

(4) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the committee may cancel enrolment or take such other action as it considers appropriate.

(5) No candidate shall be awarded the degree at Pass level until the lapse of two academic sessions from the date of enrolment.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of the Built Environment (Building Conservation) (MBenv), Master of Industrial Design (MID), Master of Science (Acoustics) (MSc(Acoustics)), and Master of Science (Industrial Design) (MSc(IndDes))

1. The degree of Master of the Built Environment (Building Conservation) or Master of Industrial Design or Master of Science (Acoustics) or Master of Science (Building) or Master of Science (Industrial Design) may be awarded by the Council to a candidate who has completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor of four full time years duration (or the part time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such academic and/or professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Project Report

4. (1) A candidate shall also be required to undertake a project on an approved topic.

(2) The work shall be carried out under the direction of a supervisor appointed from the full-time academic members of the University staff.

(3) The candidate shall give in writing to the Registrar two months notice of intention to submit a report on the project.

(4) Three copies of the project report shall be presented in a form which complies with the requirements of the University for the preparation and submission of project reports for higher degrees.

(5) It shall be understood that the University retains the three copies of the project report submitted for examination and is free to allow the project report to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the project report in whole or in part, in microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the project report, appointed by the Committee.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the project report and shall recommend to the Committee that:

(a) the project report be noted as satisfactory; or
(b) the project report be noted as satisfactory subject to minor corrections being made to the satisfaction of the head of the school; or
(c) the project report be noted as unsatisfactory but that the candidate be permitted to resubmit it in a revised form after a further period of study and/or research; or
(d) the project report be noted as unsatisfactory and that the candidate be not permitted to resubmit it.

(3) The Committee shall, after considering the examiners' reports and the candidate's results of assessment in the prescribed formal subjects, recommend whether or not the candidate may be awarded the degree. If it is decided that the project report is unsatisfactory the Committee shall determine whether or not the candidate may resubmit it after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Engineering (ME) and Master of Science (MSc)

1. The degree of Master of Engineering or Master of Science by research may be awarded by the Council on the recommendation of the Higher degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.
(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.
(2) In every case, before permitting a candidate to enrol, the head of the school in which the candidate intends to enrol shall be satisfied that adequate supervision and facilities are available.
(3) An approved candidate shall be enrolled in one of the following categories:
(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external – not in regular attendance at the University and using research facilities external to the University.
(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.
(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.
(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.
(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school*; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

* Or a department where a department is not within a school or schools or departments where the research is being undertaken in more than one school or department.
Master of Engineering (ME), Master of Science (MSc) and Master of Surveying (MSurv) without supervision

1. The degree of Master of Engineering or Master of Science or Master of Surveying without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales with at least three years relevant standing in the case of Honours graduates and four years relevant standing in the case of Pass graduates, and at a level acceptable to the Committee.

Enrolment and Progression

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interest, seek at an early stage the advice of the appropriate head of school (or department) with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.
   (2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
   (3) The thesis shall present an account of the candidate’s own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.
   (4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
   (5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
   (6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
   (2) Before the thesis is submitted to the examiners the head of the school* in which the candidate is enrolled shall certify that it is prima facie worthy of examination.
   (3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:
      (a) the candidate be awarded the degree without further examination; or
      (b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school*;
      (c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or
      (d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

* Or a department where a department is not within a school or schools or departments where the research is being undertaken in more than one school or department.
(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidates shall pay such fees as may be determined from time to time by the Council.

Master of Landscape Planning (MLP)

1. The degree of Master of Landscape Planning by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degrees shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee).

(2) In exceptional cases of an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment.

Project Report

4. (1) All candidates must complete 36 credit points, including either an 18 credit landscape research project or a 9 credit landscape project.

(2) The work shall be carried out under the direction of a supervisor appointed from the full-time academic members of the University staff.

(3) The candidate shall give in writing to the Registrar two months notice of intention to submit a landscape research project report.

(4) Three copies of the project report shall be presented in a form which complies with the requirements of the University for the preparation and submission of project reports for higher degrees.

(5) It shall be understood that the University retains the three copies of the project report submitted for examination and is free to allow the project report to be consulted or borrowed.
Subject to the provisions of the Copyright Act, 1968, the University may issue the project report in whole or in part, in microfilm or other copying medium. A Graduate Diploma may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

**Examination**

5. (1) There shall be not fewer than two examiners of the landscape project report, appointed by the Committee, at least one of whom shall be external to the University.
(2) Arrangements shall be made for oral presentation and defence of the project report as part of the examination.
(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the project report and shall recommend to the Committee that:
(a) the project report be noted as satisfactory; or
(b) the project report be noted as satisfactory subject to minor corrections being made to the satisfaction of the head of the school; or
(c) the project report be noted as unsatisfactory but that the candidate be permitted to resubmit it in a revised form after a further period of study and/or research; or
(d) the project report be noted as unsatisfactory and that the candidate be not permitted to resubmit it.
(4) The Committee shall, after considering the examiners' reports and the candidate's results of assessment in the prescribed formal subjects, recommend that the candidate be awarded the degree at Pass or Honours level. If it is decided that the project report is unsatisfactory the Committee shall determine whether or not the candidate may resubmit it after a further period of study and/or research.

**Fees**

6. A candidate shall pay such fees as may be determined from time to time by the Council.

---

**Master of Real Estate (MRE)**

1. The degree of Master of Real Estate by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study. The degree shall be awarded at Pass or Honours level.

**Qualifications**

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of The Built Environment (hereinafter referred to as the Committee). Candidates will be required to show that they have had adequate training in building construction and computers to cope with the course.
(2) In exceptional cases of an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.

**Enrolment and Progression**

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate who undertakes the course part-time shall be awarded the degree at Pass level until the lapse of four academic sessions from the date of enrolment for a candidate undertaking the program at Pass level and six sessions for a candidate undertaking the program at Honours level. Those students who undertake the course full-time may complete at the Pass level in two sessions and at the Honours level in three sessions.

MRE (Hons)

4. (1) A candidate who obtains a grade average of Credit or better in the formal subjects in 3(2) may undertake a thesis on an approved topic, to be considered for the award of the MRE with Honours.

(2) The work shall be carried out under the direction of a supervisor appointed from the full-time academic members of the University staff. The supervision will be vigorous. Candidates will be required to conduct at least one seminar on their work and have at least one paper published prior to the submission of their thesis. Candidates will be expected to participate in the academic life of the Faculty of The Built Environment.

(3) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(4) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of project reports for higher degrees.

(5) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the project report in whole or in part, in microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee.

(2) Arrangements shall be made for oral presentation and defence of the thesis as part of the examination.

(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the project report and shall recommend to the Committee that:

(a) the thesis be noted as satisfactory, or
(b) the thesis be noted as satisfactory subject to minor corrections being made to the satisfaction of the head of the school, or
(c) the thesis be noted as unsatisfactory but that the candidate be permitted to resubmit it in a revised form after a further period of study and/or research, or
(d) the thesis be noted as unsatisfactory and that the candidate be not permitted to resubmit it.

(4) The Committee shall, after considering the examiners' reports and the candidate's results of assessment in the prescribed formal subjects, recommend that the candidate be awarded the degree at Pass or Honours level. If it is decided that the thesis is unsatisfactory the Committee shall determine whether or not the candidate may resubmit it after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma (Grad Dip)

1. A Graduate Diploma may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.
Qualifications

2. (1) A candidate for the diploma shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee).

(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

Graduate Diploma of Real Estate (GradDipRE)

1. The Graduate Diploma of Real Estate by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee). Candidates will be required to show that they have had adequate training in building construction and computers to cope with the course.

(2) In exceptional cases of an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) An approved candidate shall be enrolled in part or fulltime attendance at the University.

(3) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(4) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the committee may cancel enrolment or take such other action as it considers appropriate.

(5) No candidate shall be awarded the diploma until the lapse of two academic sessions, from the date of enrolment, for full-time students and four sessions for part-time students.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma of Valuation (GradDipVal)

1. The Graduate Diploma of Valuation by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of the Built Environment (hereinafter referred to as the Committee). Candidates will be required to show that they have had adequate training in building construction and computers to cope with the course.

(2) In exceptional cases of an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as it may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) An approved candidate shall be enrolled in part or full-time attendance at the University.

(3) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(4) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the committee may cancel enrolment or take such other action as it considers appropriate.

(5) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment, for full-time students and four sessions for part-time students.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Scholarships and Prizes

The scholarships and prizes listed below are available to students whose courses are listed in this book. Each faculty handbook contains in its Scholarships and Prizes section the scholarships and prizes available with that faculty. The General Information section of the Calendar contains a comprehensive list of scholarships and prizes offered throughout the University. Applicants should note that the awards and conditions are subject to review.

Key:
V Value
T Year/s of Tenure
C Conditions

Scholarships

Undergraduate Scholarships

Listed below is an outline in summary form of undergraduate scholarships available to students. Full information may be obtained from the Student Centre located on the Lower Ground Floor of the Chancellery.

Unless otherwise indicated in footnotes, applications for the following scholarships should be made to the Registrar and Deputy Principal by 14 January each year. Please note that not all of these awards are available every year.

General

Australian Development Corporation
V Tuition fees. Some students may be eligible for airfares and a stipend.
T Determined by normal course duration
C Information should be obtained from Australian Diplomatic Posts. Conditions and entitlements vary depending on the home country. The closing date is normally early in the year before the year of study.

Sam Cracknell Memorial
V Up to $1500 pa payable in fortnightly instalments
T 1 year

C Prior completion of at least 2 years of a degree or diploma course and enrolment in a full-time course during the year of application; academic merit; participation in sport both directly and administratively; and financial need.

Girls Realm Guild
V Up to $1500 pa
T 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
C Available only to female students under 35 years of age who are permanent residents of Australia enrolling in any year of a full-time undergraduate course on the basis of academic merit and financial need.

W.S. and L.B. Robinson
V Up to $6500 pa
T 1 year renewable for the duration of the course subject to satisfactory progress
C Available only to students who have completed their schooling in Broken Hill or whose parents reside in Broken Hill; for a course related to the mining industry. Includes courses in mining engineering, geology, electrical and mechanical engineering, metallurgical process engineering, chemical engineering and
science. Applications close 30 September each year. Apply directly to PO Box 460 Broken Hill NSW 2880

Alumni Association
V Up to $1500 pa
T 1 year with the possibility of renewal
C Available to students enrolled in any year of a full-time course. Candidates must be the children of Alumni of the University of NSW and may be either permanent residents of Australia or international students.

This Handbook has been specifically designed as a source of detailed reference information for first year and re-enrolling undergraduate and postgraduate students. Separate handbooks are published for Applied Science, Arts and Social Sciences, Built Environment, Commerce and Economics, Engineering, Law, Medicine, Professional Studies, Science, the Australian Graduate School of Management, College of Fine Arts, University College (ADFA) and the Centre for Liberal and General Studies. For fuller details about the University – its organisation, staff members, description of disciplines, scholarships and prizes and so on, consult the University Calendar (Summary Volume). For further information on student matters consult the University Student Guide.
