The University of New South Wales

Arts

1978 Faculty Handbook
Arms of The University of New South Wales

Granted by the College of Heralds, London
3 March 1952

Heraldic Description of Arms

Argent on a Cross Gules a Lion passant guardant between four Mullets of eight points Or a Chief Sable charged with an open Book proper thereon the word SCIENTIA in letters also Sable.

The lion and the four stars of the Southern Cross on the Cross of St George have reference to the State of New South Wales which brought the University into being; the open book with SCIENTIA across its page reminds us of its original purpose. Beneath the shield is the motto 'Manu et Mente', which is the motto of the Sydney Technical College, from which the University has developed. The motto is not an integral part of the Grant of Arms and could be changed at will; but it was the opinion of the University Council that the relationship with the parent institution should in some way be recorded.
The University of New South Wales

Arts

1978
Faculty Handbook
The address of the University of New South Wales is:

PO Box 1, Kensington,
New South Wales, Australia 2033

Telephone: (02) 663 0351
Telegraph: UNITECH, SYDNEY
Telex AA26054

The University of New South Wales Library has catalogued this work as follows:

UNIVERSITY OF NEW SOUTH WALES
Faculty of Arts
Handbook.
Annual. Kensington.

University of New South Wales—Faculty of Arts—Periodicals

Subjects, courses and any arrangements for courses including staff allocated, as stated in the Calendar or any Handbook or any other publication, announcement or advice of the University, are an expression of intent only and are not to be taken as a firm offer or undertaking. The University reserves the right to discontinue or vary such subjects, courses, arrangements or staff allocations at any time without notice.
Information in this Handbook has been brought up to date as at 12 September 1977, but may be amended without notice by the University Council.

General Information

To obtain the maximum benefit from your studies you should make an effort to learn what facilities the University offers, to investigate the best methods of study and to discover as much as possible about the course for which you are enrolled.

This Handbook has been specially designed as a detailed source of reference for you in all matters related to your Faculty. The General Information Section is intended to help you put the Faculty into perspective with the University as a whole, to introduce you to some of the services available to students and to note some of the most important rules and procedures.

For fuller details about the University and its activities you should consult the University Calendar.

Now, see the following pages for other general information which may be of value to you.

Some people who can help you

Note: All phone numbers below are University extension numbers. If you are outside the University, dial 6630351 and ask for the extension or dial 662—and then the extension number. This prefix should only be used when you are certain of the extension that you require. Callers using 662 cannot be transferred to any other number.

If you are experiencing difficulties in adjusting to the requirements of the University, you will probably need advice. The best people to talk to on matters relating to progress in studies are your tutors and lecturers. If your problem lies outside this area, there are many other people with specialized knowledge and skills who may be able to help you.

The Deputy Registrar (Student Services), Mr. Peter O'Brien, and his Administrative Assistant, Mr. Stephen Briand, are located on the first floor of the Chancellery. They will help students who need advice and who have problems and are not sure whom they should see. As well as dealing with general enquiries they are especially concerned with the problems of physically handicapped and disabled students and those in need of financial assistance. The latter students should see Mr. Briand. Enquire at room 148E, phone 2482 (general enquiries) or 3164 (financial assistance).

The Assistant Registrar (Examinations and Student Records Section), Mr. John Warr, is located on the ground floor of the Chancellery. Assistance can also be obtained from the Senior Administrative Officer, Mr. Ross Woodham. For particular enquiries regarding the Student Records Unit, including illness and other matters affecting performance in examinations, academic statements, graduation ceremonies, prizes, release of examination results and variations to enrolment programs, contact Mr. Jack Morrison, phone 3711. For information regarding examinations, including examination timetables and clash of examinations, contact Mr. John Grigg, phone 2143.

The Assistant Registrar (Admissions and Higher Degrees Section), Mr. Jack Hill, is located on the ground floor of the Chancellery. For particular enquiries regarding undergraduate courses phone Mr. John Beauchamp on 3319. General enquiries should be directed to 3711.
The Adviser for Prospective Students, Mrs Fay Lindsay, is located on the ground floor of the Chancellery and is available for personal interview. For an appointment phone 3453.

The Assistant Registrar (Student Employment and Scholarships), Mr Jack Foley, is located on the ground floor of the Chancellery. Enquiries should be directed to 2086 (undergraduate scholarships), 2525 (graduate scholarships), and 3259 (employment).

The Housing Officer, Mrs Judy Hay, is located in the Student Amenities and Recreation Unit in Hut B at the foot of Basser Steps. For assistance in obtaining suitable lodgings phone 3260.

The Student Health Unit is located in Hut E on College Road. The Director is Dr Max Naplhal. For medical aid phone 2679 or 3275.

The Student Counselling and Research Unit is located at the foot of Basser Steps. The Head is Mr George Gray. For assistance with educational or vocational problems ring 3681, 3685 or 2696 for an appointment.

The University Librarian is Mr Allan Horton. Library enquiries should be directed to 2048.

The Chaplaincy Centre is located in Hut F at the foot of Basser Steps. For spiritual aid phone Anglican—2684; Catholic—2379; Church of Christ—2683; The Uniting Church—2683; Seventh Day AdventisI—2683; Jewish—3273; Baptist—398 4065.

The Students' Union is located on the second floor of Stage III of the University Union where the SU full-time President, Education Vice-President or Director of Overseas Students are available to discuss any problems you might have. In addition the SU offers a range of diverse services including legal advice (full-time solicitor available), clubs and societies services, second-hand bookshop (buy or sell), new records/tapes at discount, food shop (The Nuthouse), a professional nursery-kindergarten House at Pooh Corner, a typesetting service, electronic calculators (bulk purchasing), AUS insurance (including health), an information referral centre (the Infakt Bus), a bail fund and publications such as Tharunka, Orientation Magazine, Concessions Book and counter-course handbooks. For information about these phone 2929.

### Calendar of Dates

#### 1978

| Session 1 | 6 March to 14 May
| (14 weeks) | May Recess: 15 May to 21 May
|           | 22 May to 18 June
| Monday    | Examinations begin
| 19 June   | Examinations end
| Friday    | Midyear Recess: 19 June to 23 July
| 1 July    | 24 July to 27 August
|           | August Recess: 28 August to 3 September
|           | 4 September to 5 November
|           | Study Recess: 6 November to 12 November
| Monday    | Examinations begin
| 13 November | Examinations end
| Friday    | 2 December
| 2 December |

**January**

| Monday 2 | New Year's Day—Public Holiday
| Friday 6 | Last day for application for review of results of annual examinations
| Monday 9 | Publication of timetable for deferred examinations
| Friday 13 | Last day for acceptance of applications by Admissions Office for transfer to another course within the University
| Monday 30 | Australia Day—Public Holiday
| Tuesday 31 | Deferred examinations begin

**February**

| Saturday 4 | Deferred examinations end
| Friday 17 | Deferred examination results available
| Monday 20 | Enrolment period begins for new students and students repeating first year
| Wednesday 22 | Last day for application for review of deferred examination results
| Friday 24 | Last day for students who have completed requirements for Pass degrees to advise the Registrar they are proceeding to an Honours degree or do not wish to take out their degree for any reason
| Monday 27 | Enrolment period begins for second and later year students

Organization of the University

Rapid development has been characteristic of the University of New South Wales since it was first incorporated by an Act of Parliament in 1949, under the name of the New South Wales University of Technology.

In 1977 the University had 18,520 students and over 4,000 staff who worked in more than eighty buildings. These figures include staff and students at Broken Hill (W. S. and L. B. Robinson University College), Duntroon (the Faculty of Military Studies) and Jervis Bay.

The Council

The chief governing body of the University is the Council which has the responsibility of making all major decisions regarding its policy, conduct and welfare.

The Council consists of 43 members from the State Parliament, industry and commerce, agriculture, the trade unions, professional bodies, the staff, the students and the graduates of the University.

The Council meets six times per year and its members also serve on special committees dealing with, for example, academic matters, finance, buildings and equipment, personnel matters, student affairs and public relations.

The Chairman of the Council is the Chancellor, the Hon. Mr. Justice Samuels, and the Deputy Chancellor is Dr F. M. Mathews.

The Professorial Board

The Professorial Board is one of the two chief academic units within the University and includes all the professors from the various faculties. It deliberates on all questions such as matriculation requirements, the content of courses, the arrangement of syllabuses, the appointment of examiners and the conditions for graduate degrees. Its recommendations on these and similar matters are presented to Council for its consideration and adoption.

The Faculties/Boards of Study

The Dean, who is also a professor, is the executive head of the Faculty or Board of Study. Members of each Faculty or Board meet regularly to consider matters pertaining to their own areas of study and research, the result of their deliberations being then submitted to the Professorial Board.

The term ‘faculty’ is used in two distinct senses in the University. Sometimes it is used to refer to the group of Schools comprising the Faculty, and at others to the deliberative body of academic members of the Schools within the Faculty.

The eleven Faculties are Applied Science, Architecture, Arts, Biological Sciences, Commerce, Engineering, Law, Medicine,
Military Studies, Professional Studies and Science together with the Australian Graduate School of Management. In addition, the Board of Studies in General Education fulfils a function similar to that of the faculties. The Board of Studies in Science and Mathematics, which was established to facilitate the joint academic administration of the Science and Mathematics degree course by the Faculties of Biological Sciences and Science, considers and reports to the Professorial Board on all matters relating to studies, lectures and examinations in the science course.

The Schools

Once courses of study have been approved they come under the control of the individual Schools (eg the School of Chemistry, the School of Mathematics). The Head of the School in which you are studying is the person in this academic structure with whom you will be most directly concerned.

Executive Officers

As chief executive officer of the University the Vice-Chancellor and Principal, Professor Rupert Myers, is charged with managing and supervising the administrative, financial and other activities of the University.

He is assisted in this task by three Pro-Vice-Chancellors, Professor John Thornton, Professor Rex Vowels and Professor Albert Willis; the Deans and the three heads of the administrative divisions.

General Administration

The administration of general matters within the University comes mainly within the province of the Registrar, Mr Keith Jennings, the Bursar, Mr Tom Daly, and the Business Manager (Property), Mr R. K. Fletcher.

The Registrar's Division is concerned chiefly with academic matters such as the admission of students, and the administration of examinations as well as the various student services (health, employment, amenities, and counselling).

The Bursar's Division is concerned with the financial details of the day-to-day administration and matters to do with staff appointments, promotions, etc.

Identification of Subjects by Numbers

For information concerning the identifying number of each subject taught in this faculty as well as the full list of identifying numbers and subjects taught in the University, turn to the first page of the section Subject Descriptions. This list is also published in the Calendar.

Textbook Lists

Textbook lists are no longer published in the Faculty handbooks. Separate lists are issued early in the year and are available at key points on the campus.

General Studies Program

Almost all undergraduates in faculties other than Arts and Law are required to complete a General Studies program. The Department of General Studies within the Board of Studies in General Education publishes its own Handbook which is available free of charge. All enquiries about General Studies should be made to the General Studies Office, Room G55, Morven Brown Building, phone 3476.

Student Representation on Council and Faculties/Boards

Three members of the University Council may be students elected by students. All students who are not full-time members of staff are eligible to stand for a two-year term of office. The students who are elected to the Council are eligible for election to the Committees of Council.

Students proceeding to a degree or a graduate diploma may elect members for appointment by the Council to their Faculty/Board. Elections are for a one-year term of office.

Open Faculty/Board Meetings

If you wish you may attend a Faculty/Board meeting. You should seek advice at the office of the Faculty whose meeting you wish to attend, as different faculties have their own rules for the conduct of open meetings.

Award of the University Medal

The University may award a bronze medal to undergraduate students who have achieved highly distinguished merit on completion of their final year.

Student Services and Activities

The University Library

The University Libraries are mostly situated on the upper campus. The library buildings house the Undergraduate Library on Level 3, the Social Sciences and Humanities Library on Level 4, the Physical Sciences Library on Level 7 and the Law Library on Level 8. The Biomedical Library is in the western end of the Mathews Building and is closely associated with libraries in the teaching hospitals of the University.

There are also library services at other centres: The Water Reference Library situated at Manly Vale (phone 948 0261) which is closely associated with the Physical Sciences Library.
The library at the Broken Hill Division in the W. S. and L. B. Robinson University College building. Phone Broken Hill 6022.

The library at the Royal Military College, Duntroon, ACT, serving the Faculty of Military Studies. Phone (062) 73 0427.

Each library provides reference and lending services to staff and students and each of the libraries on the Kensington campus is open throughout the year during day and evening periods. The exact hours of opening vary during the course of the academic year.

Staff and students normally use a machine-readable identification card to borrow from the University libraries. For students, a current union card is acceptable. Staff must apply to the library for a library card.

Accommodation

Residential Colleges

There are seven residential colleges on campus. Each college offers accommodation in a distinctive environment which varies from college to college, as do facilities and fees. A brief description of each college is given below, and further information may be obtained directly from the individual colleges. In addition to basic residence fees, most colleges make minor additional charges for such items as registration fees, caution money or power charges. Intending students should lodge applications before the end of October in the year prior to the one in which they seek admission. Most colleges require a personal interview as part of the application procedure.

The Kensington Colleges

The Kensington Colleges comprise Basser College, Goldstein College, and Philip Baxter College. They house 450 men and women students, as well as staff members. Fees are payable on a session basis. Apply in writing to the Master, PO Box 24, Kensington, NSW 2033.

International House

International House accommodates 154 students from Australia and up to twenty other countries. Preference is given to more senior undergraduates and graduate students. Apply in writing to the Warden, International House, PO Box 88, Kensington, NSW 2033.

New College

This Church of England College is open to all students without regard to race or religion. It has accommodation for approximately 220 students and is co-educational. Enquiries should be addressed to the Master, New College, Anzac Parade, Kensington, NSW 2033.

Shalom College

Shalom College provides accommodation for 86 men and women students. Non-resident membership is available to students who wish to avail themselves of the Kosher dining room and tutorial facilities. Apply in writing to the Master, Shalom College, The University of New South Wales, PO Box 1, Kensington, NSW 2033.

Warrane College

Warrane College provides accommodation for 200 men and is open to students of all ages, backgrounds and beliefs. A comprehensive tutorial program is offered along with a wide variety of activities and opportunities to meet informally with members of the University staff. Non-resident membership is available to male students who wish to participate in College activities and make use of its facilities. Warrane is directed by the International Catholic lay association Opus Dei. Apply in writing to the Master, Warrane College, PO Box 123, Kensington, NSW 2033.

Creston Residence

Creston, associated with Warrane College, offers residence for 25 full-time undergraduate and graduate women students of all nationalities and denominations. It is directed by the Women's Section of Opus Dei, a Catholic lay association. Further information: The Principal, 36 High Street, Randwick, NSW 2031.

Other Accommodation

Off-campus Accommodation

Students requiring other than College accommodation may contact the Housing Officer in the Student Amenities and Recreation Unit for assistance in obtaining suitable lodging in the way of full board, room with cooking facilities, flats, houses, share flats, etc. Extensive listings of all varieties of housing are kept up-to-date throughout the year and during vacations.

No appointment is necessary but there may be some delay in February and March. The Housing staff are always happy to discuss any aspect of accommodation.

Special pamphlets on accommodation, lists of estate agents and hints on house-hunting are available on request.

Location: The Student Accommodation Service is located in Hut B, near the foot of Basser Steps. Phone 663 0351, extension 3260.

Student Employment and Scholarships

The Student Employment and Scholarships Unit offers assistance with career employment for final year students and graduates of the University. This service includes the mailing of regular job vacancy notices to registered students, and a Careers Library containing information on various careers and employers.
Careers advice and assistance are also available to undergraduates. Students undertaking courses in Applied Science or Engineering which require course-related industrial or professional training experience are assisted to find such employment over the long vacation. Information and advice regarding cadetships, undergraduate and graduate scholarships is also available.

The service is located in Room G19 of the Chancellery.

Phone extension 3259 for employment and careers advice, extension 2525 for details of graduate awards and grants, and extension 2086 for undergraduate scholarship, cadetship and industrial training information.

Student Health

A student health clinic and first aid centre is situated within the University. It is staffed by three qualified medical practitioners, assisted by two nursing sisters. The medical service, although therapeutic, is not intended to entirely replace private or community health services. Thus, where chronic or continuing conditions are revealed or suspected, the student may be referred to a private practitioner or to an appropriate hospital for specialist opinion and/or treatment. The health service is not responsible for fees incurred in these instances. The service is confidential and students are encouraged to attend for advice on matters pertaining to health.

The service is available to all enrolled students by appointment, free of charge, between 9 am and 5 pm Mondays to Fridays. For staff members, immunizations as well as first aid service in the case of injury or illness on the campus are available.

The centre is located in Hut E on the northern side of the campus in College Road at the foot of Basser Steps.

Appointments may be made by calling at the centre or by telephoning extension 2679 or 3275 during the above hours.

The Family Planning Association of NSW conducts clinics at the Student Health Unit and at the adjacent Prince of Wales Hospital. These clinics are open to staff and students and appointments may be made for the Student Health Unit clinic by telephoning 698 9499, or for The Prince of Wales Hospital clinics by telephoning 399 0111.

Student Counselling and Research

The Student Counselling and Research Unit provides individual and group counselling for all students—prospective, established and graduate. Self-help programs are also available. Opportunities are provided for parents and others concerned with student progress to see members of the counselling staff.

The service which is free, informal and personal is designed to help students with planning and decision making, and a wide variety of concerns and worries which may be affecting personal, educational and vocational aspects of their lives.

The Unit pursues research into factors affecting student performance, and the published results of its research and experience are helpful in improving University and other counselling services, and the quality of student life.

Counselling appointments may be arranged during sessions and recesses between 9 am and 7 pm. Phone 663 0351, extension 3681, 3685 and 2696, or call at the Unit which is located at the foot of Basser Steps. Urgent interviews are possible on a walk-in basis between 9 am and 5 pm. Group counselling programs are offered both day and evening between 9 am and 9 pm by special arrangement. Self-help programs are arranged to suit the student’s time and convenience.

Student Amenities and Recreation

In general the Student Amenities and Recreation Unit seeks ways to promote the physical, social and educational development of students through their leisure time activities and to provide some services essential to their day-to-day University life.

The Unit provides, for example, a recreational program for students and staff at the Physical Education and Recreation Centre; negotiates with the Public Transport Commission of NSW on student travel concessions and supplies concession forms for bus, rail, ferries and planes; assists students with off-campus housing; makes bookings for use of sports facilities; and, in consultation with the Sports Association, assists various recognized clubs.

The Unit is located in Hut B at the foot of Basser Steps. The various services may be contacted by phone on the following extensions: Recreation Program 3271; Travel 2617; Accommodation 3260; Ground Bookings 2235; Sports Association 2673.

Physical Education and Recreation Centre

The Student Amenities and Recreation Unit provides a recreational program for students and staff at the Physical Education and Recreation Centre. The Centre consists of eight squash courts and a main building, the latter containing a large gymnasium and practice rooms for fencing, table tennis, judo, weight-lifting, karate and jazz ballet, also a physical fitness testing room. The recreational program includes intramurals, teaching/coaching, camping, and fitness testing. The Centre is located on the lower campus adjacent to High Street. The Supervisor at PERC may be contacted on extension 3271.
The Sports Association

The Sports Association caters for a variety of competitive sports for both men and women. Membership is compulsory at $6 per year for all registered students and is open to all members of staff and graduates of the University.

The Sports Association office is situated in Hut G, near the bottom of Basser Steps, and the control of the Sports Association is vested in the General Committee. The Executive Officer of the Sports Association may be contacted on extension 2673.

Student Travel Concessions

The Student Amenities and Recreation Unit arranges distribution of bus, rail and ferry concessions. For the peak period during the week preceding and the first week of Session 1, distribution is at a location to be decided. Students should watch for notices around the campus announcing the distribution centre.

For the rest of the year students seeking authorization for travel concessions, including planes, should enquire at SARU, Hut B, (extension 2617) or the Enquiry Desk, Chancellery, (extension 2251).

The University Union

The University Union provides the facilities students, staff and graduates require in their daily University life and thus an opportunity for them to know and understand one another through associations outside the lecture room, the library and other places of work.

The Union is housed in three buildings near the entrance to the Kensington Campus from Anzac Parade. These are the Roundhouse, The Blockhouse (Stage 2) and the Squarehouse (Stage 3). Membership of the Union is compulsory at $45 per year for all registered students and is open to all members of staff and graduates of the University.

The full range of facilities provided by the Union includes a cafeteria service and other dining facilities, a large shopping centre, cloak room, banking and hairdressing facilities, showers, a women's lounge, common, games, reading, meeting, music, practice, craft and dark rooms. Photocopying, sign printing, and stencil cutting services are also available. The Union also sponsors special concerts (including lunchtime concerts) and conducts courses in many facets of the arts including weaving, photography, creative dance and yoga. Exhibitions are held in the John Clark Gallery.

Full information concerning courses is contained in a booklet obtainable from the Union's Program Department.

The University Union should not be confused with the Students' Union or Students' Representative Council (as it is known in some other universities). This latter body has a representative function and is the instrument whereby student attitudes and opinions are crystallized and presented to the University and the community.

The Students' Union

The Students' Union is run by students and represents them on and off campus. Presidential elections are by popular vote and all students who have completed two years at the University are eligible for election.

A full-time President, elected each year by popular ballot, directs the entire administration of the Students' Union and its activities, through the permanent Administrative Officer.

Other full-time officers include the Education Vice-President who works towards the implementation of Student Union education policy and in assisting students with problems they may encounter in the University; Director of Overseas Students who deals with specific problems these students may encounter while in Australia.

Both are elected by students with the latter elected by overseas students.

Membership is compulsory at $14 per annum for full-time students and $11 for part-time students.

The activities of the Students' Union include:
1. Infakt: a student-run information referral service. If you want someone to talk to or need help of any kind see the people at Infakt located in the bus at the foot of Basser Steps.
2. A casual employment service.
3. Organization of Orientation Week.
4. Organization of Foundation Day.
6. Publication of the student paper Tharunka.
7. A free legal service run by a qualified lawyer employed by the Students' Union Council.
8. Students' Union Record Shop which sells discount records and tapes.
9. The Nuthouse which deals in bulk and health foods.
10. Secondhand Bookshop for cheap texts.
11. Clubs and societies which receive money from the Students' Union through CASOC (Clubs and Societies on Campus).
12. The sale of electronic calculators and accessories at discount rates.
The Students' Union is affiliated with the Australian Union of Students (AUS) which represents students on the national level.

The Students' Union is located on the second floor, Stage 3, the Union.

Chaplaincy Centre

This service is provided for the benefit of students and staff of various religious and spiritual beliefs. Chaplains are in attendance at the University at regular times. A Chapel is also available for use by all denominations. For further details, turn to page 2.

Tertiary Education Assistance Scheme

Under this scheme, which is financed by the Commonwealth Government, assistance is available for full-time study in approved courses, to students who are not bonded and who are permanent residents of Australia, subject to a means test on a non-competitive basis.

Students in the following types of university courses are eligible for assistance:

• Undergraduate and graduate degree courses
• Graduate diplomas
• Approved combined Bachelor degree courses
• Master's qualifying courses

Benefits (as at 30 June 1977)

Means-tested Living Allowance The maximum rates of living allowances are $1,250 per annum for students living at home and $1,976 per annum for students living away from home. The maximum rate for independent students is $2,236 per annum. The maximum rates of living allowance will be paid where the adjusted family income is equal to or less than $3,200 per annum. The adjusted family income is assessed by subtracting from the gross income of both parents their business expenses and an amount of $450 for each dependent child other than the student.

When the adjusted family income exceeds $3,200 the amount of living allowance will be reduced by $250 for every $10 of income.

A concession may be made where there are other children in the family undertaking tertiary education with scholarship assistance from schemes other than the Tertiary Education Assistance Scheme of less than $150 pa.

Students qualifying for living allowance will also receive the following allowances where appropriate:

Incidentals Allowance The Incidentals Allowance of $100 is designed to help the student meet the cost of those fees which have not been abolished: the Students' Union, University Union and Sports Association fees, and other expenses associated with their studies.

Travel Allowance Students whose home is in the country may be reimbursed the cost of three return trips per year, during vacation time.

Dependants' Allowance This is made up of allowances of $29 per week for a dependent spouse and $7.50 per week for each child.
How to Apply

1977 Higher School Certificate candidates and tertiary students receiving an allowance were sent forms last October. Other students may obtain forms from the Admissions Section or the Student Employment and Scholarships Unit, or from the Regional Director, Department of Education, 323 Castlereagh Street, Sydney, NSW 2000 (phone 218 8800). The administrative closing date for 1978 applications is 31 October 1977.

Scholarships, Cadetships, Prizes

1. Undergraduate Scholarships In addition to finance provided under the Commonwealth Government’s Tertiary Education Assistance Scheme there are a number of scholarships, cadetships, prizes and other forms of assistance available to undergraduate students. Details of procedures for application for these awards are contained in the Calendar.

There are also special scholarships not administered by the University, information about which may be obtained from the School office.

Further information and advice regarding scholarships is available from the Student Employment and Scholarships Unit in the Chancellery Building.

2. Graduate Awards An honours degree is generally an essential requirement for gaining one of the many graduate scholarships which are available at the University. Therefore gifted students should not neglect the opportunity to qualify for honours and thus become eligible for an award.

Details of graduate awards are contained in the University Calendar.

Other Financial Assistance

In addition to the Tertiary Education Assistance Scheme financed by the Commonwealth Government the following forms of assistance are available.

1. Deferral of Payment of Fees Deferrals may be granted for a short period, usually one month, without the imposition of a late fee penalty, provided the deferment is requested prior to the due date for fee payments.

2. Short Term Cash Loans Donations from the Students’ Union, the University Union and other sources have made funds available for urgent cash loans not exceeding $100. These loans are normally repayable within one month.

3. Early in 1973 the Commonwealth Government made funds available to the University to provide loans to students in financial difficulty. The loans are to provide for living allowances and other approved expenses associated with attendance at University. Repayment usually commences after graduation or upon withdrawal from the course. Students are required to enter into a formal agreement with the University to repay the loan.

From the same source students who are in extremely difficult financial circumstances may apply for assistance by way of a non-repayable grant. In order to qualify for a grant a student must generally show that the financial difficulty has arisen from exceptional misfortune.

In all cases assistance is limited to students with reasonable academic records and whose financial circumstances warrant assistance.

Enquiries about all forms of financial assistance should be made at the office of the Deputy Registrar (Student Services), Room 148E, in the Chancellery.

Financial Assistance to Aboriginal Students

Financial assistance is available from a number of sources to help Aboriginal students. Apart from the Commonwealth Government’s Tertiary Education Assistance Scheme there is a Commonwealth Aboriginal Study Grant Scheme. Furthermore, the University may assist Aboriginal students with some essential living expenses in exceptional circumstances.

All enquiries relating to this scheme should be made at the office of the Deputy Registrar (Student Services), Room 148E, in the Chancellery.

Fund for Physically Handicapped and Disabled Students

The University has a small fund (started by a generous gift from a member of the staff who wishes to remain anonymous) available for projects of benefit to handicapped and disabled students. Enquiries should be made at the office of the Deputy Registrar (Student Services), Room 148E, in the Chancellery.

Rules and Procedures

The University, in common with other large organizations, has some agreed ways of doing things in order to operate for the benefit of all members. The rules and procedures listed below will affect you at some time or another. In some cases there are penalties (eg fines or exclusion from examinations) for failure to observe these procedures and therefore they should be read with care.
Admission

Where can I get information about admission?

The Admissions Office, located in the Chancellery on the upper campus, provides information for students on admission requirements, undergraduate and graduate courses and enrolment procedures. The Admissions Office is open from 9 am to 5 pm Monday to Friday (excluding the lunch hour 1 pm to 2 pm). During enrolment the office is also open for some part of the evening.

The Office provides information about special admission (including mature age entry), admission with advanced standing and admission on overseas qualifications. The Office also receives applications from students who wish to transfer from one course to another, resume their studies after an absence of twelve months or more, or seek any concession in relation to a course in which they are enrolled. It is essential that the closing dates for lodgment of applications are adhered to. For further details see the sections below on Enrolment and Fees.

Applications for admission to undergraduate courses from students who do not satisfy the requirements for admission (see section on Requirements for Admission), from students seeking admission with advanced standing, and from students who have a record of failure at another university, are referred by the Admissions Office to the Admissions Committee of the Professorial Board.

Students seeking to register as higher degree candidates should first consult the Head of the School in which they wish to register. An application is then lodged on a standard form and the Admissions Office, after obtaining a recommendation from the Head of School, refers the application to the appropriate Faculty or Board of Studies Higher Degree Committee.

Details of the procedure to be followed by students seeking entry to first year undergraduate degree courses at the University may be obtained from the Admissions Office or the Metropolitan Universities Admissions Centre.

How do I qualify for admission?

In order to enter an undergraduate course you must qualify for matriculation to the University, and be selected for admission to the faculty or course you wish to enter. Full details of matriculation and admission requirements are contained in a pamphlet obtainable at the Admissions Office and in the Calendar.

Enrolment

How do I enrol?

All students, except those enrolling in graduate research degrees (see below), must lodge an authorized enrolment form with the Cashier on the day the enrolling officer signs the form or on the day their General Studies electives are approved if their course requires this.

All students, except those enrolling in graduate research degrees and those exempted (see below), should on that day also either pay the required fees or lodge an enrolment voucher or other appropriate authority.

What happens if I am unable to pay fees at the time of enrolment?

If you are unable to pay fees by the due date you may apply in writing to the Deputy Registrar (Student Services) for an extension of time which may be granted in extenuating circumstances.

If a student is unable to pay the fees the enrolment form must still be lodged with the Cashier and the student will be issued with a nil receipt. The student is then indebted to the University and must pay the fees by the end of the second week of the session for which enrolment is being effected. Penalties apply if fees are paid after that time (see Fees below). Payment may be made through the mail in which case it is important that the student registration number be given accurately.

New Undergraduate Enrolments

Persons who are applying for entry in 1978 must lodge an application for selection with the Metropolitan Universities Admissions Centre, PO Box 7049, GPO, Sydney 2001, by 1 October 1977.

Those who are selected will be required to complete enrolment at a specified appointment time before the start of Session 1. Compulsory fees must be paid on the day of the appointment. In special circumstances, however, and provided class places are still available, students may be allowed to complete enrolment after the prescribed week, subject to the payment of a penalty (see page 15).

Application forms and details of the application procedures may be obtained from the Admissions Office.

Re-enrolment

Students who are continuing courses (or returning after approved leave of absence) should enrol through the appropriate School in accordance with the procedures set out in the current Enrolment Procedures booklet, available from the Admissions Office and from School offices. Those who have completed part of a course and have been absent without leave need to apply for entry through the Metropolitan Universities Admissions Centre, PO Box 7049, GPO, Sydney 2001, by 1 October 1977.

Restrictions Upon Re-enrolling

Students enrolled for the first time in any undergraduate course in the University who failed more than half their program in...
Students re-enrolling in research degrees should lodge the Re-enrollment Research Students for the purpose of calculating a student's program, all subjects receive from the Registrar. re-enrol but should follow the written instructions they will re-enrol. Those required to re-enrol may claim a refund of fees if prescribed as part of their course; and students required by the Re-enrolment Committee to show cause should not attempt to re-enrol but should follow the written instructions they will receive from the Registrar.

For the purpose of calculating a student's program, all subjects taken during the year, including repeat subjects, are counted.

New Research Students

Students enrolling for the first time in graduate research degrees will receive an enrolment form by post. They have two weeks from the date of offer of registration in which to lodge the enrolment form with the Cashier and pay the appropriate fees. Completion of enrolment after that date will incur a penalty (see below).

Re-enrolling Research Students

Students re-enrolling in research degrees should lodge the enrolment form with the Cashier as soon as possible but no later than the end of the second week of Session 1. Completion of enrolment after that date will incur a penalty (see below).

Submission of Graduate Thesis or Project Report at Commencement of Session 1

A candidate who has completed all the work for a graduate degree except for the submission of a thesis or project report is required to re-enrol and pay fees as outlined above unless the thesis or project report is submitted by the end of the second week of Session 1 in which case the candidate is not required to re-enrol. Those required to re-enrol may claim a refund of fees if able to withdraw (see below).

Miscellaneous Subject Enrolments

Students may be permitted to enrol for miscellaneous subjects (i.e., as students not proceeding to a degree or diploma) provided the Head of the School offering the subject considers it will be of benefit and there is accommodation available. Only in exceptional cases will subjects taken in this way count towards a degree or diploma. Students who are under exclusion may not be enrolled in miscellaneous subjects which may be counted towards courses from which they have been excluded.

Students seeking to enrol in miscellaneous subjects should obtain a letter of approval from the Head of the appropriate School or his representative permitting them to enrol in the subject concerned. The letter should be given to the enrolling officer at the time of enrolment.

For details of the locations and hours for enrolment see Enrolment Procedures 1978, a free booklet obtainable from your School or Faculty Office or from the Admissions Office.

Final Dates for Completion of Enrolments

No enrolments for courses extending over the whole year or for Session 1 only will be accepted from new students after the end of the second week of Session 1 (17 March 1978) except with the express approval of the Deputy Registrar (Student Services) and the Heads of the Schools concerned. No later year enrolments for courses extending over the whole year or for Session 1 only will be accepted after the end of the fourth week of Session 1 (31 March 1978) except with the express approval of the Deputy Registrar (Student Services) and the Heads of Schools concerned.

How do assisted students (e.g., scholarship holders) enrol?

Scholarship holders or sponsored students who have an enrolment voucher or letter of authority from their sponsor should present it at the time of enrolment. Such vouchers and authorities are generally issued by the NSW Department of Education and the NSW Public Service. They are not always issued in time and students who expect to receive an enrolment voucher or other appropriate authority but have not done so must pay the fees (and arrange a refund later). Such vouchers and authorities are not the responsibility of the University and their late receipt is not to be assumed as automatically exempting a student from the requirements of enrolling and paying fees.

What special rules apply if I wish to be considered for admission with advanced standing?

If you make application to register as a candidate for any degree or other award granted by the University you may be admitted to the course of study with such standing on the basis of previous attainments as may be determined by the Professorial Board. For complete details regarding 'Admission with Advanced Standing' consult the University Calendar.

Can I transfer from one course to another?

To transfer from one course to another you must apply on an application form obtainable from the Admissions Office by 13 January. If your application is successful you are required to comply with the enrolment procedures for the year/stage of the new course and, unless otherwise instructed, you should present the letter granting transfer to the enrolling officer. If you intend to transfer, you should also inform the enrolling officer of the school in which you were enrolled in 1977.
Can I change my course program?

If you wish to seek approval to substitute one subject for another, or add one or more subjects to your program or discontinue part or all of your program, you must make an application to the Registrar through the Head of the School responsible for the course on forms available from School offices or at the Enquiry Desk in the main entrance of the Chancellery. The Registrar will inform you of the decision. Application to enrol in additional subjects must be submitted by the end of the fourth week of Session 1.

It is emphasized that failure to sit for examinations in any subject in which you are enrolled will be regarded as failure to satisfy the examiners in that subject unless written approval to withdraw without failure has been obtained from the Registrar.

Withdrawal from subjects

Courses

1. Students withdrawing from courses (see also Subjects, below) are required to notify the Registrar in writing.

For details see the Calendar.

Subjects

2. Students are permitted to withdraw from subjects without being regarded as having failed, provided they apply by the dates indicated.

First Year Students (ie enrolled for the first time in any undergraduate course at the University)

1. one-session subjects: the end of the eighth week of that session (28 April or 15 September).
2. double-session subjects: the end of the second week of Session 2 (4 August).

Other Students

1. one-session subjects: the end of the fourth week of that session (31 March or 8 August);
2. double-session subjects: the end of the eleventh week from the start of Session 1 (19 May).

How do I enrol after an absence of twelve months or more?

If you have had a leave of absence for twelve months and wish to resume your course you should follow the instructions about re-enrolling given in the letter granting your leave of absence. If you do not fully understand or have lost these instructions, then you should contact the Admissions Office before October in the year preceding the one in which you wish to resume your course.

If you have not obtained leave of absence from your course and have not been enrolled in the course over the past twelve months or more, then you should apply for admission to the course through the Metropolitan Universities Admission Centre before 1 October in the year preceding that in which you wish to resume studies.

Are there any restrictions upon students re-enrolling?

The University Council has adopted the following rules governing re-enrolment with the object of requiring students with a record of failure to show cause why they should be allowed to re-enrol and retain valuable class places.

First-year Rule

1. A student enrolled for the first time in any undergraduate course in the University shall be required to show cause why he/she should be allowed to continue the course if that student fails more than half the program in which he/she is enrolled. In order that students may calculate half their program, the weighting of subjects in each course is defined in Schedule A, which may be varied from time to time by the Professorial Board.

Repeated-failure Rule

2. A student shall be required to show cause why he/she should be allowed to repeat a subject which that student has failed more than once. Where the subject is prescribed as part of the student's course he/she shall also be required to show cause why he/she should be allowed to continue that course. Failure in a deferred examination as well as in the initial examination counts for the purposes of this rule as one failure.

General Rule

3. The Re-enrolment Committee may, on the recommenda-
tion of the relevant faculty or board of studies, review the academic progress of any student. If that student's academic record seems to demonstrate, in the opinion of the Committee, the student's lack of fitness to pursue a subject or subjects and/or a course or courses, the Committee may require that student to show cause why he/she should be allowed to re-enrol in such subject(s) and/or course(s).

The Session-unit System

4. (1) A student who infringes the provisions of Rules 1, or 2, at the end of Session 1 of any year will not be required to show cause at that time but will be allowed to repeat the subject(s) (if offered) and/or continue the course in Session 2 of that year, subject to the rules of progression in that course.

(2) Such a student will be required to show cause at the end of the year, except that a student who has infringed Rule 2, at the end of Session 1, repeats the subject(s) in question in Session 2, and passes it/them, will not be required to show cause on account of any such subject.

*For details of Schedule A see Restrictions upon Students Re-enrolling in the University Calendar
Exemption from Rules by Faculties

5. (1) A faculty or board of studies examination committee may, in special circumstances, exempt a student from some or all of the provisions of Rules 1. and 2.

(2) Such a student will not be required to show cause under such provisions and will be notified accordingly by the Registrar.

'Showing Cause'

6. (1) A student wishing to show cause must apply for special permission to re-enrol. Application should be made on the form available from the Examinations and Student Records Section and must be lodged with the Registrar by the dates published annually by the Registrar. A late application may be accepted at the discretion of the University.

(2) Each application shall be considered by the Re-enrolment Committee which shall determine whether the cause shown is adequate to justify the granting of permission to re-enrol.

Appeal

7. (1) Any student who is excluded by the Re-enrolment Committee from a course and/or subject(s) under the provisions of the Rules may appeal to an Appeal Committee constituted by Council for this purpose with the following membership:

A Pro-Vice-Chancellor nominated by the Vice-Chancellor who shall be Chairman.

The Chairman of the Professorial Board, or if he is unable to serve, a member of the Professorial Board, nominated by the Chairman of the Professorial Board, or when the Chairman of the Professorial Board is unable to make a nomination, nominated by the Vice-Chairman.

One of the category of members of the Council elected by the graduates of the University, nominated by the Vice-Chancellor.

The decision of the Committee shall be final.

(2) The notification to any student of a decision by the Re-enrolment Committee to exclude him/her from re-enrolling in a course and/or subject(s) shall indicate that the student may appeal against that decision to the Appeal Committee. In lodging such an appeal with the Registrar the student should provide a complete statement of all grounds on which the appeal is based.

(3) The Appeal Committee shall determine the appeal after consideration of the student’s academic record, his/her application for special permission to re-enrol, and the stated grounds of appeal. In exceptional circumstances, the Appeal Committee may require the student to appear in person.

Exclusion

8. (1) A student who is required to show cause under the provisions of Rules 1. or 3. and either does not attempt to show cause or does not receive special permission to re-enrol from the Re-enrolment Committee (or the Appeal Committee on appeal) shall be excluded from re-enrolling in the subject(s) and course(s) on account of which he was required to show cause. Where the subjects failed are prescribed as part of any other course (or courses) he/she shall not be allowed to enrol in any such course.

(2) A student who is required to show cause under the provisions of Rule 2. and either does not attempt to show cause or does not receive special permission to re-enrol from the Re-enrolment Committee (or the Appeal Committee on appeal) shall be excluded from re-enrolling in any subject he/she has failed twice. Where the subject failed is prescribed as part of the student’s course he/she shall also be excluded from that course. Where the subject failed is prescribed as part of any other course (or courses) he/she shall not be allowed to enrol in any such course(s).

(3) A student excluded from a course or courses under the provisions of (1) or (2) may not enrol as a miscellaneous student in subjects which may be counted towards any such course.

Re-admission after Exclusion

9. (1) An excluded student may apply for re-admission after the period of exclusion has expired.

(2) (a) Applications for re-admission to a course should be made to the Metropolitan Universities Admission Centre before the closing date for normal applications in the year prior to which re-admission is sought. Such applications will be considered by the Admissions Committee of the relevant Faculty or Board.

(b) An application for re-admission to a subject should be made to the Registrar before 30 November in the year prior to which re-admission is sought. Such applications will be considered by the relevant Head of School.

An application should include evidence that the circumstances which were deemed to operate against satisfactory performance at the time of exclusion are no longer operative or are reduced in intensity and/or evidence of action taken (including enrolment in course(s)) to improve an applicant’s capacity to resume studies at the University.

Applications for re-admission to a course or subject that are unsuccessful (see 9. (2) (a), (b) respectively) will be reconsidered automatically by the Re-enrolment Committee of the Professorial Board. The decision of the Committee will be final.

10. If students fail a subject at the examinations in any year or session and re-enrol in the same course in the following year or session they must include in their program of studies for that year or session the subject which they failed. This requirement will not be applicable if the subject is not offered the following year or session; is not a compulsory component of a particular
course; or if there is some other cause which is acceptable to the Professorial Board, for not immediately repeating the failed subject.

Restrictions and Definitions

11. (1) These rules do not apply to students enrolled in programs leading to a higher degree or graduate diploma.

(2) A subject is defined as a unit of instruction identified by a distinctive subject number.

How do I apply for admission to degree or diploma?

If your current program will enable you to complete all requirements for a degree or diploma, including industrial training where necessary, you should complete the form Submission of Details Associated with Graduation by the dates shown in the Calendar of Dates and on the Notification of Examination Results. The forms are available from the Enquiry Counter at the Chancellery and will be mailed to all potential graduates.

The completion and submission of the form ensures that:
1. the correct spelling and sequence of names is recorded on the degree certificate.
2. any previous academic qualifications are shown in the graduation ceremony program.
3. all correspondence relating to the ceremony is forwarded to the correct address. Note: If notifying change of address after the form has been submitted an additional form Final Year Students' Graduation: Change of Address Advice should be submitted.

If you meet all the requirements, the degree or diploma will be conferred without the necessity for further action by you. Students should advise the Registrar, in writing, if they do not wish to have the degree or diploma conferred for any reason, including the decision to proceed to an honours degree. This advice should reach the Registrar no later than 24 July for students completing at the end of Session 1, and 24 February for those completing at the end of Session 2 to ensure that the degree is not conferred.

Fees*

Fees and penalties quoted are current at the time of publication but may be amended by the University Council without notice.

Do I have to pay fees for tuition?

No tuition fees are charged.

What other fees and charges are payable?

Apart from the tuition fees (above) there are other fees and charges which include those charges raised to finance the expenses incurred in operating student activities such as the University Union, the Students’ Union, the Sports Association and the Physical Education and Recreation Centre. Penalties are also incurred if a student fails to complete procedures as required. Charges may also be payable, sometimes in the form of a deposit, for the hiring of kits of equipment which are lent to students for their personal use during attendance in certain subjects. Accommodation charges, costs of subsistence on excursions, field work etc. and for hospital residence (medical students) are payable in appropriate circumstances.

How much is my contribution to student activities and services on campus?

All students (with the exceptions noted below) will be required to pay the following fees if enrolling for a program involving two sessions. Those enrolling for only one session will pay one-half of the Student Activities Fees, and the full University union entrance fee, if applicable.

University Union, $25 entrance fee. payable on first enrolment.

Student Activities Fees

University Union, $45 annual subscription
Sport Association, $6 annual subscription
Students’ Union:
Students enrolling in full-time courses, $14 annual subscription
Students enrolling in part-time courses and miscellaneous subjects, $11 annual subscription
Miscellaneous. $25 annual fee.

The fee is used to finance expenses generally of a capital nature relating to student activities. Funds are allocated to the various student bodies for projects recommended by the Student Affairs Committee and approved by the University Council.

Are fees charged for examinations?

Generally there are no charges associated with examinations; however, two special examination fees are applied:
Examinations conducted under special circumstances—for each subject $11
Review of examination result—for each subject $11

What penalties exist for late payment of fees?

The following additional charges will be made in 1977 when fees are paid late:
1. Failure to lodge enrolment form according to enrolment procedure $20
2. Payment of fees after end of second week of session $20
3. Payment of fees after end of fourth week of session $40

Penalties 1. and 2. or 1. and 3. may accumulate.

* Fees quoted are current at the time of publication and may be amended by the Council without notice.
Who is exempt from payment of fees?

1. Life members of University Union, Sports Association, and Students' Union are exempt from the relevant fee or fees.

2. Students enrolled in courses classified as External are exempt from all Student Activities Fees and the University Union entrance fee.

3. University Union fees and subscriptions may be waived by the Deputy Registrar (Student Services) for students enrolled in graduate courses in which the academic requirements require no attendance on the Kensington campus.

4. Students who while enrolled at and attending another university (or other tertiary institution as approved by the Vice-Chancellor) in a degree or diploma course are given approval to enrol at the University of New South Wales but only in a miscellaneous subject or subjects to be credited towards the degrees or diplomas for which they are enrolled elsewhere are exempt from all Student Activities Fees and the University Union entrance fee.

5. Undergraduate students of a recognized university outside Australia who attend the University of New South Wales with the permission of the Dean of the appropriate faculty and of the Head of the appropriate school or department to take part as miscellaneous students in an academic program relevant to their regular studies and approved by the authorities of their own institution are exempt from all Student Activities Fees and the University Union entrance fee.

6. Graduate students not in attendance at the University and who are enrolling in a project only, other than for the first time, are exempt from all Student Activities Fees.

7. Graduate students resubmitting a thesis or project only are exempt from all Student Activities Fees.

8. All Student Activities Fees, for one or more sessions may be waived by the Deputy Registrar (Student Services) for graduate students who are given formal permission to pursue their studies away from the Kensington campus for one or more sessions.

Is exemption from membership possible?

The Registrar is empowered to grant exemption from membership of the Students' Union and the Sports Association to students who have a genuine religious objection to such membership, subject to payment of the prescribed fees to the University.

Locations and Hours of Cashier

Cashier's Offices are open during the enrolment periods. Details of locations and hours are listed in Enrolment Procedures 1978, a free booklet obtainable from your School or Faculty Office or from the Admissions Office.

Will I receive any refund if I withdraw from a course?

Yes. The following rules apply:

1. If you withdraw from courses you are required to notify the Registrar in writing.
2. Where notice of withdrawal from a course is received by the Registrar before the first day of Session 1 a refund of all fees paid will be made. After that time only a partial refund will be made. See the Calendar for details.

What happens If I fail to pay the prescribed fees or charges?

If you fail to pay prescribed fees or charges or become otherwise indebted to the University and you fail to make a satisfactory settlement of your indebtedness upon receipt of due notice then you cease to be entitled to the use of University facilities. You will not be permitted to register for a further session, to attend classes or examinations, or be granted any official credentials. In the case of a student enrolled for Session 1 only or for Sessions 1 and 2 this disbarment applies if any portion of fees is outstanding after the end of the eighth week of Session 1 (28 April 1978). In the case of a student enrolled for Session 2 only, this disbarment applies if any portion of fees is outstanding after the end of the sixth week of Session 2 (1 September 1978).

In special cases the Registrar may grant exemption from disqualifications referred to in the preceding paragraph upon receipt of a written statement setting out all relevant circumstances.

Can I get an extension of time to pay?

If you apply before the due date and extenuating circumstances exist, an extension of time may be granted. Apply to the Deputy Registrar (Student Services).

Examinations

When are examinations held?

Examinations for Session 2 and for Full Year subjects are held in November/December. Examinations for Session 1 subjects
are held during the Midyear Recess. Provisional timetables indicating the dates and times of examinations and notices of the location of examinations are posted on the University notice boards on the campus, including the Western Grounds Area. Final timetables indicating the dates, times, locations and authorized aids are available for students two weeks before the end of each session. You must advise the Examinations Unit (the Chancellery) of any clash in examinations. Details of dates are published in the Calendar of Dates (see pages 2-4 for May/June and October/November).

Misreading of the timetable is not an acceptable excuse for failure to attend an examination.

In the assessment of your progress in University courses, consideration may be given to work in laboratory and class exercises and to any term or other tests given throughout the year as well as to the results of written examinations.

How are examination passes graded?

Passes are graded: High Distinction, Distinction, Credit and Pass. Satisfactory indicates the satisfactory completion of a subject for which graded passes are not available. A Pass Conceded may be granted to a student whose mark in a subject is slightly below the standard required for a pass but whose overall satisfactory performance warrants this concession.

A Terminating Pass may be granted where the mark for the subject is below the required standard. A terminating pass will not permit a student to progress further in the subject or to enrol in any other subject for which a pass in the subject is a co-requisite or prerequisite. A student given a terminating pass may attempt a deferred examination, if available, to improve his performance but should he fail in such attempt, the terminating pass shall stand.

When are examination results available?

Final examination results will be posted to your term address (which can be altered up to 30 November) or to your vacation address (fill in a form obtainable at the Information Desk, Chancellery, also by 30 November). Results are also posted on School notice boards and in the foyer of the Sir John Clancy Auditorium. No examination results are given by telephone.

Can examinations results be reviewed?

Examination results may be reviewed for a fee of $11 a subject, which is refundable in the event of an error being discovered. This review consists mainly of ensuring that all questions attempted have been marked and of checking the total of the marks awarded. Applications for review must be submitted on the appropriate form to the Examinations and Student Records Section together with the necessary fee by the dates printed on the reverse side of Notification of Results.

Are allowances made if students are sick before or during an examination?

A student who through serious illness or other cause outside his control is unable to attend an examination is required to bring the circumstances (supported by a medical certificate or other evidence) to the notice of the Registrar not later than seven days after the date of the examination.

A student who believes that his performance in a subject has been affected by serious illness during the year or by other cause outside his control, and who desires these circumstances to be taken into consideration in determining his standing, is required to bring the circumstances (supported by a medical certificate or other evidence) to the notice of the Registrar as soon as the circumstances are known but not later than seven days after the date of the examination.

A student who attempts an examination, yet claims that his performance is prejudiced by sickness on the day of the examination must notify the Registrar or Examination Supervisor before, during, or immediately after the examination, and may be required to submit to medical examination.

When submitting a request for consideration candidates are required to give details of their registration number, address, course, specialization, year or stage, full or part-time and subject number, title and date of the examination affected.

A student suffering from a physical disability which puts him at a disadvantage in written examinations should apply to the Assistant Registrar, Examinations and Student Records Section (Ground Floor, the Chancellery) immediately the disability is known. If necessary, special arrangements will be made to meet the student’s requirements.

Use of electronic calculators

Where the use of electronic calculators has been approved by a faculty or school, examiners may permit their use in examinations. Authorized electronic calculators are battery operated with the minimum operations of addition, subtraction, multiplication and division and are of a type in common use by university students. They are not provided by the University, although some schools may make them available in special circumstances.

Compulsory Industrial Training

Examinations including deferred examinations will not be permitted away from the campus unless the candidate is engaged on compulsory industrial training. Candidates must advise the Officer-in-Charge, Examinations Unit, immediately the location of the industrial training is known. Special forms for this purpose are available at the Enquiry Desk, the Chancellery.

Arrival at Examinations

Examination Rooms will be open to students 25 minutes before the commencement of the examination. Candidates are requested to be in their places at least 15 minutes before the
commencement to hear announcements. The examination paper will be available for reading 10 minutes before commencement.

Use of Translation Dictionaries

All answers must be in English unless otherwise directed. Foreign students who have the written approval of the Assistant Registrar may use standard translation dictionaries. Dictionaries should be presented for approval, not later than 14 days before the commencement of the examination period.

How are examinations conducted?

Examinations are conducted in accordance with the following rules and procedure:

1. Candidates are required to obey any instruction given by an examination supervisor for the proper conduct of the examination.
2. Candidates are required to be in their places in the examination room not less than 10 minutes before the time for commencement.
3. No bag, writing paper, blotting paper, manuscript or book, other than a specified aid, is to be brought into the examination room.
4. No candidate shall be admitted to an examination after 30 minutes from the time of commencement of the examination.
5. No candidate shall be permitted to leave the examination room before the expiry of 30 minutes from the time the examination commences.
6. No candidate shall be re-admitted to the examination room after he has left it unless during the full period of his absence he has been under approved supervision.
7. A candidate shall not by any improper means obtain, or endeavour to obtain, assistance in his work, give, or endeavour to give, assistance to any other candidate, or commit any breach of good order.
8. Smoking is not permitted during the course of examinations.
9. A candidate who commits any infringement of the rules governing examinations is liable to disqualification at the particular examination, to immediate expulsion from the examination room, and to such further penalty as may be determined in accordance with the By-laws.

Under what circumstances are deferred examinations granted?

Deferred examinations may be granted in the following cases:

1. When a student through illness or some other acceptable circumstance has been prevented from taking the annual examination or has been placed at a serious disadvantage during the annual examinations.
2. To help resolve a doubt as to whether a student has reached the required standard in a subject.
3. To allow a student by further study to reach the required standard in a subject.
4. Where a student's progression or graduation is inhibited by his failure in one subject only, a deferred examination may be granted notwithstanding his failure otherwise to qualify for this concession.

In the Faculties of Arts, Commerce and Law special circumstances apply in the granting of deferred examinations. Details in each circumstance are given in the section Faculty Information in the respective handbooks for these faculties, or in the Calendar.

Deferred examinations must be taken at the centre at which the student is enrolled, unless he has been sent on compulsory industrial training to a remote country centre or interstate. In this case the student must advise the Registrar, on a form available from his school or the Information Desk, the Chancellery, of relevant particulars, before leaving for his destination, in anticipation that deferred examination papers may have to be forwarded to him. Normally, the student will be directed to the nearest university for the conduct of the deferred examination.

What is a Conceded Deferred Examination?

A conceded deferred examination may be granted to a student where the mark in the subject is below the standard at which deferred examinations have been granted in the subject but whose overall performance warrants such a concession.

Change in the deferred examination system from March 1978

The system of formal deferred examinations administered by the Registrar's Division will be abolished from 1 March 1978. Schools and Faculties may carry out whatever additional assessment may be considered appropriate, including assessment or additional assessment on medical or compassionate grounds.

Can I buy copies of previous examination papers?

Yes—for 5c each from the University Union's Upper Campus Shop in the Commerce Building.

Essays

Should I list my sources?

Students are expected to acknowledge the sources of ideas and expressions that they use in essays. To provide adequate documentation is not only an indication of academic honesty but also a courtesy enabling the marker to consult your sources with ease. Failure to do so may constitute plagiarism which is subject to a charge of academic misconduct.
General Information

Student Conduct on Campus

Is there a detailed code of rules related to the general conduct of students?

No. The University has not considered it necessary to formulate a detailed code of rules relating to the general conduct of students.

However, now that you have become a member of the University you should understand that this involves an undertaking on your part to observe its rules, by-laws and other requirements, and to pay due regard to any instructions conveyed by any officer of the University.

What are the rules related to attendance at classes?

You are expected to be regular and punctual in attendance at all classes in the course or subject in which you are enrolled. All applications for exemption from attendance at lectures or practical classes must be made in writing to the Registrar.

In the case of illness or of absence for some other unavoidable cause you may be excused by the Registrar for non-attendance at classes for a period not more than one month or, on the recommendation of the Dean of the appropriate Faculty, for a longer period.

Leave of Absence

Applications for leave of absence from lectures should be addressed to the Registrar and, where applicable, should be accompanied by a medical certificate. If examinations have been missed, this should be stated in the application.

If you attend less than 80 per cent of their possible classes, you may be refused permission to sit for the examination in that subject.

Why is my University Union card important?

All students enrolled for courses leading to degrees and/or diplomas, except those exempt from fees, are issued with a University Union membership card. Your card must be carried during attendance at the University and shown on request.

The number appearing on the front of the card above your name is your student registration number used in the University’s records. This number should be quoted in all correspondence.

The card must be presented when borrowing from the University libraries, when applying for travel concessions and when notifying a change of address. It must also be presented when paying fees on re-enrolment each year when it will be made valid for the year and returned. Failure to present the card could result in some inconvenience in completing re-enrolment.

If you lose your Union card it is important to notify the University Union as soon as possible.

New students will be issued with University Union cards on enrolment.

Why should I inform the University if I change my address?

If you change your address you should notify the Student Records Section of the Registrar’s Division as soon as possible. Failure to do this could lead to important correspondence (including examination results) not reaching you. The University cannot accept responsibility if official communications fail to reach students who have not notified their change of address. Change of Address Advice Forms are available at Faculty and School offices and at the Enquiry Desk on the Ground Floor of the Chancellery Building.

All communications from the University, including examination results, will be sent to the session address. Change of address advice will be accepted up to 30 November, except for final-year students wishing to change their Submission of Details Associated with Graduation form. Changes to this form will be accepted up to a date four weeks before the student’s graduation ceremony.

Will the University release information to third parties without my permission?

In general, no. The University treats examination results and information it receives from a student as confidential and will not reveal such information to third parties without the permission of the student except at the discretion of senior officers in circumstances considered of benefit to the student and when it is either impossible or impracticable to gain the student’s prior permission. This happens rarely. This policy is considered so important that it often involves officers of the University in very difficult situations, for example, when they must refuse to reveal the address of a student to parents or other relatives.

In spite of the policy, there are sometimes accusations made that the University has revealed information, including addresses (especially to insurance companies).

All students should be aware that students’ addresses are eagerly sought by various commercial agents and that sometimes tricks are used to obtain them. For example, from time to time people claiming to be from the University telephone students or their families and ask for information (usually another student’s address) which is often given, unsuspectingly. There is evidence that this is a technique used by commercial agents.
It would be generally helpful if students (and their families and friends) are cautious in revealing information, making it a practice to ask the name, position, and telephone extension of any caller claiming to be from the University and, if suspicious, returning the call to the extension given.

How are student records kept up to date?

Enrolment details forms will be sent to all students on 28 April and 15 September. It is not necessary to return these forms unless any information recorded therein is incorrect. Amended forms must be returned to the Examinations and Student Records Section within fourteen days. Amendments notified after the closing date will not be accepted unless exceptional circumstances exist and approval is obtained from the Registrar. Amended forms returned to the Registrar will be acknowledged in writing within 14 days.

Is there any rule related to the ownership of students' work?

Yes. The University reserves the right to retain at its own discretion the original or one copy of any drawings, models, designs, plans and specifications, essays, theses or other work executed by you as part of your courses, or submitted for any award or competition conducted by the University.

Can I get a permit to park on campus?

Only a limited amount of parking is available on campus. Copies of the University's parking rules may be obtained on application to Room 240, Chancellery Building.

Lost Property?

All enquiries concerning lost property should be made to the Superintendent on extension 3580 or to the Lost Property Office at the Union.

Notices

Official University notices are displayed on the notice boards and students are expected to be acquainted with the notices which concern them. These boards are in the Biological Sciences Building, the Mathews Building, the Chancellery (lower ground floor), Central Lecture Block, Dalton Building (Chemistry), Electrical Engineering Building, Main Building (Physics and Mining Engineering) and in the Western Grounds Area.

Notices are placed on the University notice boards each month detailing forthcoming important dates. Any change to the Calendar of Dates is included in these notices.

Appeals

Section 5(c) of Chapter III of the By-laws provides: 'Any person affected by a decision of any member of the Professorial Board (other than the Vice-Chancellor) in respect of breach of discipline or misconduct may appeal to the Vice-Chancellor, and in the case of disciplinary action by the Vice-Chancellor, whether on appeal or otherwise, to the Council'.

The Calendar

Please consult the Calendar if you want a more detailed account of the information contained in this section.

Vice-Chancellor's Official Welcome to New Students

All students initially enrolling in the University are officially welcomed by the Vice-Chancellor and Principal at the following times:

Full-time Students
In the Faculties of Architecture, Arts, Biological Sciences, Commerce, Law:
Monday 27 February 1978
11 am in the Clancy Auditorium

In the Faculties of Applied Science, Engineering, Medicine, Professional Studies, Science, and the Board of Studies in Science and Mathematics:
Tuesday 28 February 1978
11 am in the Clancy Auditorium

Part-time Students
Tuesday 28 February 1978
6.30 pm in the Clancy Auditorium

Meeting for Parents of New Students

Friday 3 March 1978
7.30 pm in the Clancy Auditorium

Further Information

Where can I get further information concerning courses, admission requirements, scholarships and enrolment procedure?

General

Any student who requires information on the application of these rules or any service which the University offers, may make enquiries from the Admissions Office, the Student Counselling Unit or the Registrar.
Preface

This Handbook is primarily for undergraduate students in the Faculty of Arts and aims to provide in convenient form information concerning the Faculty, the requirements for the degree of Bachelor of Arts and the subject matter of the different courses offered, including text and principal reference books.

An endeavour has been made to provide answers to those problems which students are most likely to encounter. It is important that each student in the Faculty becomes well acquainted with the information presented here. If problems remain unanswered, enquiries may be referred to the Faculty office, Room G1, which is situated on the ground floor of the Morven Brown Building (Arts), near the top of Basser Steps.

It is possible that changes may be made affecting the information presented in this Handbook, especially concerning subjects offered and prescribed reading. Students are strongly advised to consult frequently the notice-boards of the different Schools as well as the official notice-boards of the University, to keep abreast of any changes as well as to keep informed of pertinent announcements from time to time.

Students requiring information or advice concerning enrolment, the structure of their degree requirements, progression within their degree program, change of program or any other general administrative matters should see Dr I. D. Black, Executive Assistant to the Dean of the Faculty of Arts, or Mr R. R. Karrer, Administrative Assistant.

Matters concerning subject content and subject requirements should be discussed with the appropriate Schools.
Staff

Comprises Schools of Drama, English, French, German, History, History and Philosophy of Science, Philosophy, Political Science, Russian, Sociology, Spanish and Latin American Studies. The following Schools are members of the Faculty: Economics, Mathematics and Psychology.

Dean
Professor F. K. Crowley

Chairman
Professor C. R. Bell

Executive Assistant
Dr I. D. Black

Administrative Assistant
René Roger Karrer, BA N.S.W.

Research Assistant
Jacqueline Ilbery, BA N.S.W.

Senior Lecturers
Victor Eugene Emeljanow, MA N.Z., PhD Stan.
Oliver Fiala, BA MEd DipEd Syd., PhD Colorado, MACE
Philip Edward Parsons, BA W.Aust., MA PhD Camb.
Marie-Louise Mathilde Thiersch, MA Adel., PhD N.S.W.

Faculty Information

In the Faculty of Arts undergraduate courses to Honours level are offered in the fields of Drama, Economic History, Economics, English, French, Geography, German, History, History and Philosophy of Science, Industrial Relations, Mathematics (Pure and Applied), Philosophy, Political Science, Psychology, Russian, Sociology, Spanish and Latin American Studies, and Statistics.

The undergraduate courses offered lead to the degree of Bachelor of Arts (BA) at either Pass or Honours level.

Undergraduate courses leading to the double degrees of Bachelor of Arts and Bachelor of Laws and of Bachelor of Arts and Bachelor of Engineering are also offered. Information about these combined degrees is contained in the handbooks of the Faculties of Law and Engineering.

The graduate courses offered for qualified students lead to the degree of Master of Arts (MA) (pass or honours), or Doctor of Philosophy (PhD). In addition, the Faculty may recommend the award of the degree of Doctor of Letters (DLitt) for an original contribution of distinguished merit to Letters. Not all Schools are offering the MA degree at Pass and Honours level. Prospective graduate students should seek further information from the Head of the School concerned.

Details of the conditions governing the award of these graduate degrees and diplomas and details of graduate courses are given later in this handbook.

Faculty of Arts Enrolment Procedures

All students re-enrolling in 1978 should obtain a copy of the free booklet Enrolment Procedures 1978 available from School Offices and the Admissions Office. This booklet provides detailed information on enrolment procedures and fees, enrolment timetables by Faculty and course, enrolment in miscellaneous subjects, locations and hours of Cashiers and late enrolments.

Faculty of Arts Library Facilities

Although any of the University Libraries may meet specific needs, staff and students of the Faculty of Arts are mainly served by the Social Sciences and Humanities Library and the Undergraduate Library.

The Social Sciences and Humanities Library

This library is designed to serve the specialized reference and research needs of staff, graduate students and senior Undergraduate students.

All students are welcome to use the library and to borrow books from it. The main entrance to the Social Sciences and Humanities Library can be reached by taking the lift to Level 4 of the library building.

Social Sciences & Humanities Librarian Alan Walker
The Undergraduate Library
This library caters for the library needs of first and second year students and other groups where large numbers require mass teaching. It provides a reader education program and reader assistance service aimed at teaching students the basic principles of finding information.

Services of particular interest to undergraduates and academic staff are:
- The Open Reserve Section, housing books and other materials which are required reading.
- The Audio-Visual Section, containing cassette tapes, mainy lectures and other spoken word material. The Audio-Visual Section has wired study carrels and cassette players for student use.

Undergraduate Librarian

Pat Howard

Student Clubs and Societies

Students have the opportunity of joining a wide range of clubs and societies. Many of these are affiliated with the Students' Union. There are numerous religious, social and cultural clubs and also many sporting clubs which are affiliated with the Sports Association.

Clubs and societies seeking to use the name of the University in their title, or seeking University recognition, must submit their constitutions either to the Students' Union or the Sports Association if they wish to be affiliated with either of these bodies, or to the Registrar for approval by the University Council.

Historical Society
The Historical Society was formed to assist students of History to develop an interest in the subject outside their formal studies.

In pursuit of this objective the Society presents guest speakers, holds film showings, and holds cocktail parties, and arranges other functions. It is hoped, this year, to expand the programme to include as wide a variety of activities as possible to cater for the interests of as many students as possible.

All students and staff in the School of History are members of the Historical Society, and with the payment of a small activities fee qualify to attend social functions either at a reduced price or no charge at all.

Please address all enquiries to the School of History, or to: The Secretary, UNSW Historical Society, School of History, The University of New South Wales, PO Box 1, Kensington, NSW 2033.

Regular meetings of the Historical Society are held in the History Seminar Room (350) in the Morven Brown Building. All students are welcome to attend.

Dramsoc (University of NSW Dramatic Society)
Dramsoc is one of the oldest of the University Societies and in recent time has enjoyed a period of rapid growth. We hope to have a most comprehensive program of plays, play-readings, and revues. We wish to encourage many active new members. For further information write to: Dramsoc, 55 Carrington Rd, Randwick, NSW 2031, or telephone: 398 4794.

The French Society
The main aim of the French Society is to afford students the opportunity of expressing their interests in French language and culture. This is being done presently through a wide range of social activities including dinners, wine and cheese soirées, films, a play production and so on. Possibilities for enjoying French language and culture are endless but depend on the initiative and motivation of students of the School.

The Society is also oriented to developing informal relations between students and staff. Frank discussion has helped establish in the School a friendly and informal atmosphere.

Pre-term enquiries should be addressed to the French Society through the School of French.

Socratic Society
The purpose of the Socratic Society is to promote discussion on controversial and intellectually stimulating topics.

The Society has no views, except that discussion is a good thing: its members have a diversity of views and find that its seminars and meetings provide an excellent opportunity to express them.

Membership of the Society is not in any way limited to one School or Faculty and the matters discussed cover a very wide field. The Society organises regular public meetings, private meetings and seminars.

Further information may be obtained from the School of Philosophy.

The English Society
Concerned to provide the opportunity for interesting discussions on all types of literature, the English Society, the literary society of the University, meets frequently during term, at intervals of a fortnight or less. With a predominantly student membership, the society engages in informal meetings, generally taking the form of a short paper followed by discussion. Wine and supper are provided at each meeting. Topics for papers are by no means confined to writers on the English syllabus, nor
are speakers all drawn from the University of New South Wales.

Further information may be obtained from Professor R. G. Geering (School of English), extension 2246.

The German Society

The German Society aims to provide an opportunity for students and members of staff with an interest in things German to meet each other and exchange views.

The Society organizes a varied program of film nights, dinners, excursions, talks, and other social gatherings.

Further details may be obtained from the Secretary of the School of German.

Scientia

Scientia is the Society of the School of History and Philosophy of Science. Its aims are to develop interest in history and philosophy of science, both in general and as an academic discipline, to further the unification of the sciences and the humanities, and to provide an opportunity for informal meetings of staff and students. Activities centre on a program of lectures by visiting speakers and seminars at which members' papers are read and discussed.

Membership is open to all members of the University and is free to students enrolled in courses in the School of History and Philosophy of Science.

The Geographical Society

It is hoped that students taking geography as a subject will participate in the activities organized by the Geographical Society. The Society is relatively new and is therefore open to new ideas and to people who are concerned with fostering an interest in the subject. Lectures and informal discussion groups are organized so that students can have the opportunity of listening to experts in the various fields of geography.

Social activities have always been an important part of the Society and they have provided more than adequate opportunities for students to get to know each other and for students and staff to improve communications.

The Psychology Society

The Psychology Society aims to provide activities both educational and social for students of psychology, and, more generally, to act as an intermediary body between students and staff. While psychology is one of the most popular subjects available to Arts students, many students have only a vague conception of psychology and are unsure where their courses will lead them.

One of the aims of the Psychology Society is to provide information relevant to these matters. Last year a highly successful careers seminar was held, in which speakers from various areas of psychological practice discussed requirements and opportunities in their respective fields. In a School so large it is difficult to develop a meaningful degree of personal contact between students of different years and students and staff. The Society attempts to provide opportunities for such contact, to foster staff-student relations and to act in the interest of psychology students as a whole. Accordingly, we hope to include such items as staff-student luncheons, informal discussions and theatre parties. On the educational side there are film showings and occasional talks and seminars (eg on careers, course requirements, etc). An activities fee enables the committee to meet any of the finances needed to support its functions.

Financial Assistance to Students

The scholarships and prizes listed below are available to students whose courses appear in this handbook. Each faculty handbook contains in its Faculty Information section the scholarships and prizes available within that faculty. The General Information section of the Calendar contains a comprehensive list of scholarships and prizes offered throughout the University.
Scholarships

Undergraduate Scholarships

As well as the assistance mentioned earlier in this Handbook (see General Information: Financial Assistance to Students) there are a number of scholarships available to students. What follows is an outline only. Full information may be obtained from the Student Employment and Scholarships Unit, located on the Ground Floor of the Chancellery.

Unless otherwise indicated in footnotes, applications for the following scholarships should be made to the Registrar by 14 January each year.

Science

Mathematics

Olivetti Australia Pty Ltd $600 pa 2 years subject to satisfactory progress Eligibility for admission to third year of the full-time course leading to the degree of Bachelor of Arts or Bachelor of Science majoring in Mathematics or Statistics.

*Apply to The Secretary, Bursary Endowment Board, Box 7077, GPO, Sydney 2001 immediately after sitting for HSC.
Graduate Scholarships

Applications for scholarships should be made in triplicate on the required form, and sent to the Registrar by 31 October. Eligibility depends on such factors as the applicant holding an honours degree or equivalent qualification, or having relevant experience. Students completing the final year of a course may apply. Those under bond should disclose this fact. Awards are tenable for one year, and may be renewed for a maximum of two years for a Masters and 3 to 4 years for a PhD degree. Renewal each year is subject to satisfactory progress. Any exceptions from these requirements are indicated.

Application forms and further information are available from the Student Employment and Scholarships Unit, which is located on the ground floor of the Chancellory. This Unit produces the booklet Graduate Awards, and also provides information on additional scholarships which may become available from time to time, mainly from funds provided by organizations sponsoring research projects.

Where possible, the scholarships are listed in order of the schools within the faculty.

The Degree of Bachelor of Arts

The basic unit of instruction in the Faculty of Arts is a session unit of fourteen weeks. In addition, some Schools of the Faculty offer 1. double units, in which a candidate receives credit for two units or none on the completion of the second unit at the end of Session 2 and 2. 28-week units, which span both sessions of a calendar year, but which count as only one unit towards the degree.

Units designed by Schools of the Faculty primarily for students in their first and second session of study are termed Level I units. Units designed for students in their third, fourth, fifth and sixth sessions of study are termed Upper Level units. Upper Level units designed primarily for students wishing to proceed to the Special Honours degree are termed Advanced Level units. Units designed for Special Honours degree candidates in their seventh and eighth sessions of study are termed Honours Level units.

Students will enrol for both sessions of the calendar year at the beginning of Session 1 but they may amend their enrolment prior to the beginning of Session 2.

Course Structures

1. Pass Degree

The regulations governing course structures for the Pass Degree are to be found under Rules 10 to 13 below. The normal progression for a pass degree is:

Year 1 8 Level I units (usually made up of 4 subjects)
Year 2 6 Upper Level units
Year 3 4 Upper Level units

However, the sequence may be varied so long as it complies with the Rules (see next section) governing the award of the degree.

Major sequences available in the Faculty are listed in Schedule B. A major sequence is an approved sequence of at least four Upper Level units, normally taken over the third, fourth, fifth and sixth sessions of study.

Before enrolling in a unit, students should make sure they have satisfied the prerequisites and/or co-requisites specified at the beginning of the description of each unit. A prerequisite unit must have been completed before enrolment; a co-requisite unit must be taken concurrently with the unit chosen, unless it has been completed previously.

2. Special Honours Degree

The regulations governing the Special Honours Degree are to be found under Rules 20 to 23 below. The normal progression for a special honours degree is as follows:

Year 1 8 Level I units (usually made up of 4 subjects)
Year 2 2 Advanced Level units in the subject in which the student is specializing, together with 2 Upper Level units in one of the other subjects already passed at Level I
Year 3 4 units in the student's special subject (normally Advance Level units)
Year 4 2 Honours Level units

The above sequence may be varied within the Rules (see next section) but students are advised to consult the Head of the School of their special subject and/or the Executive Assistant to the Dean of the Faculty of Arts.
early in the planning of their courses. Students contemplating a combined Special Honours Degree in two schools should note particularly the requirements of Rule 22.

The attention of students wishing to proceed to this degree is drawn particularly to the requirement that they must satisfy the prerequisites laid down by each School for admission to Honours Level. Such students should consult the School or Schools concerned to discuss their program before enrolling in their third session of study.

Prerequisites for admission to Honours Level may consist of:

1. Advanced Level units;
2. Units or sub-units in other Schools.

Western European Studies

Although the Faculty of Arts does not offer a major in Western European Studies, the following units are grouped together in this handbook in order to draw the attention of students wishing to specialize in this area in their major subject to the wide range of 'support' units available in other schools. Students are reminded that the regulations for the BA degree allow them great flexibility in their choice of Upper Level units to supplement their major subject.

Tabular Key

The following is the key to information about each subject: F (Full year, ie both sessions); S1 (Session 1); S2 (Session 2).

Rules Governing the Award of the Degree of Bachelor of Arts

General

1. The degree of Bachelor of Arts may be conferred as a Pass Degree, as a General Honours Degree, or as a Special Honours Degree in one or two Schools. There shall be three classes of Honours, namely, Class I, Class II in two Divisions, and Class III.

2. No person shall be permitted to enrol in any qualifying unit for the Degree of Bachelor of Arts at the same time as he is enrolled for any other degree or diploma in this University or elsewhere except in the case of recognized combined degrees.

3. A candidate for the Degree of Bachelor of Arts shall enrol for at least three units in each of the first and second sessions of the first year of study. A candidate may not enrol for more than four units in any one session.

4. Enrolment in a unit shall be conditional on the candidate's meeting the prerequisites and co-requisites prescribed for that unit.

5. A candidate who has
   (1) attended such lectures, seminars and tutorials as are prescribed for a unit;
   (2) performed satisfactorily such exercises, laboratory work, essays and thesis as may be prescribed in a unit;
   (3) passed such examinations as may be prescribed for a unit,
   shall be regarded as having completed that unit.

6. Subject to provisions of Rules 2 and 7, a candidate may be permitted to complete concurrently at another university not more than three courses or six units and to count such courses or units towards the Degree provided that permission shall not be granted under this clause to complete courses or units from another university which are taken by way of external study or which are available at the University of New South Wales.

7. An applicant seeking advanced standing or a candidate wishing to take courses at another University shall first submit in writing to Faculty a statement of the courses or units for which he seeks credit or which he wishes to complete at the other university together with a list of the remaining units that he proposes to complete within the Faculty in order to qualify for the degree. Faculty shall then determine the courses or units, if any, for which credit is to be granted or the courses or units which the applicant may complete at the other university and count towards the degree, and shall also determine the remainder of the applicant's program within the Faculty.

8. (1) Upon sufficient cause being shown in a particular case or cases Faculty may vary the requirements of any of these rules. Any request for variation of Rule 20 shall be accompanied by a letter from the Head or Heads of Schools concerned supporting the proposed variation.

(2) A candidate enrolled in the combined Arts/Law course who successfully completes all subjects and units prescribed for the first three years of the course (including the correct sequences of Arts units) shall be eligible for the award of the pass degree of Bachelor of Arts. Any such candidate who wishes to proceed to the Honours degree of Bachelor of Arts shall complete such additional work as may be prescribed by the Head or Heads of Schools concerned and approved by Faculty.
9. Faculty shall determine the standing in relation to these rules of candidates who first enrolled before 1 January 1975 and who wish to re-enrol after that date.

Pass Degree

10. A candidate shall complete over no fewer than six sessions eighteen of the units listed in Schedule A.

11. Of the eighteen units which a candidate shall complete:

1. four shall be Upper Level units comprising a major sequence chosen from those listed in Schedule B;
2. (2) no more than ten shall be Level I units;
3. no more than two Level I units and six Upper Level units shall be taken in one subject.

12. Units offered by other faculties or boards of studies which do not correspond to session units in the Faculty of Arts and sub-units offered at Upper Level within the Faculty of Arts may also be counted towards the total of eighteen units specified in Rule 10. Faculty shall determine the value of such units in terms of fractions of a session unit.

13. Faculty may consider the award of the degree to a student who, over at least six sessions of study, has completed sixteen units, provided:

1. that he has satisfied the other requirements for the degree;
2. that he has completed at least four Advanced Level units.

General Honours Degree

14. A candidate for the General Honours Degree shall complete twenty-two units over no fewer than eight sessions of study.

15. Eighteen of the twenty-two units shall be completed under Rules 1. to 13. If, on completing these units the candidate has obtained a pass at credit level or better in at least five Upper Level units, he may apply to Faculty for acceptance as a General Honours Degree candidate.

16. The remaining four units shall be Advanced Level units and shall be completed within two sessions. A candidate may seek permission from a Head of School to undertake Honours Level units in place of one or more of these additional Advanced Level units.

17. The four additional units shall be completed with a pass at credit level or better.

18. Faculty shall determine the class of Honours to be awarded on the basis of the candidate’s academic record.

19. Where a candidate for General Honours fails to reach credit level in these four additional units, he may proceed to graduation with a Pass Degree.

Special Honours Degree

20. A student who wishes to proceed to Honours Level shall have completed sixteen units including no more than eight Level I units under Rules 1.-13. above and have satisfied the prerequisites laid down by the School or Schools concerned.

21. In the seventh and eighth sessions of study, a candidate shall complete two Honours Level units and any other work set by the relevant School. These two units together shall be regarded as comprising a double unit and a final grade shall be determined only at the end of the eighth session of study.

22. The Special Honours Degree may also be taken as a Combined Special Honours Degree in two Schools. Students wishing to proceed to the Combined Special Honours Degree shall normally be required to undertake a program in their fifth and sixth sessions of study consisting of two Advanced Level units (or their equivalent) in each of the two subjects concerned (in special circumstances, a student may be permitted by the Executive Sub-committee of Faculty to enrol in an additional unit or units), followed in the seventh and eight sessions of study by one Honours Level unit in each School and such other work as the two Heads of Schools may jointly require, such program be approved by Faculty through its Executive Sub-committee.*

23. In special circumstances a person on whom the Pass Degree of Bachelor of Arts has been conferred may be admitted by Faculty to candidacy for the Special Honours Degree with credit for all units completed if during his studies for the Pass Degree he has satisfied the prerequisites for proceeding to Honours Level laid down by the School or Schools concerned.

*Students who wish to proceed to the Combined Special Honours Degree must consult the Heads of Schools concerned at the latest before the end of their fourth session of study as the prerequisite units required for entry to the Combined Honours Levels units may differ from those required from the ordinary Special Honours Degree.
Undergraduate Study

Courses available for the Degree of Bachelor of Arts

Schedule A

The following is a list of units available for study in the Faculty of Arts. The list shows details of prerequisites, co-requisites and exclusions (units which cannot be taken in addition to the unit listed).

Intending Honours students should examine carefully the prerequisites for admission to the Honours year. These are set out in more detail in the Subject Descriptions in this handbook.

Tabular Key

The following is the key to the information supplied about each subject in the table below: F (Full year, i.e. both sessions); S1 (Session 1); S2 (Session 2); SS (single session, i.e. one only); I, II, III (Levels I, II, III); U (Upper Level); A (Advanced Level); H (Honours Level); Hpw (Hours per week).

*For the purpose of BA Rule 11(c) the subjects Pure Mathematics, Applied Mathematics, Statistics, and Theoretical Mechanics are regarded as distinct subjects. 4th year Honours studies are available in each of these subjects and intending students should consult with the appropriate Head of Department early in their course.

††For any listed unit an appropriate higher unit may be substituted.

***If a unit in this column is counted the corresponding unit in the first column may not be counted.

**Entry to General Mathematics IA is allowed only with permission of the Head of the School of Mathematics, and that permission will be given only to students who do not qualify to enter unit 10.021B.

†| **10.1113 (10.1213) and 10.1114 (10.1214) together replace 10.111B (10.121B), 10.2111 (10.2211) and 10.2112 (10.2212) together replace 10.211A (10.221A).**

‡| **When counted as a Level II unit, unit value is one-third; when counted as a Level III unit, unit value is one-quarter.**

††| **For any listed unit an appropriate higher unit may be substituted.**

*| **If a unit in this column is counted the corresponding unit in the first column may not be counted.**

1. Admission to Higher Pure Mathematics II normally requires completion of 10.011 Higher Mathematics I; students who gain a superior pass in 10.001 Mathematics I may, subject to the approval of the Head of the School of Mathematics, be permitted to proceed to Higher Pure Mathematics II units.

2. Students aiming at Honours in Pure Mathematics must take 10.121A, 10.121C, 10.1213, 10.1214, either 10.2211 or 10.2111 and either 10.2212 or 10.2112.

**Students wishing to attempt Higher Level III units should consult with the School of Mathematics prior to enrolment. Pre- and co-requisites may be varied in special circumstances with the permission of the Head of the School of Mathematics.**

***Students will not normally be permitted to attempt a Level III Pure Mathematics unit unless they have completed at least two Level II units from 10.111A, 10.111B, 10.1114, 10.2111 and 10.2112 and are concurrently attempting the remaining unit.**

* Or equivalent qualifications as determined by the School.

N.B. **52.162, 52.172** and **52.182** will be timetabled at the same time.

*Upper Level status in Philosophy consists in 1. being in second or later year of university study, and 2. having taken and passed at least one Level I Philosophy unit. If the unit is composed of two half-units, these must have been passed in the same session. The prerequisite may be waived in certain cases by the School.

</table>

*These Advanced Level units are reserved for approved potential Psychology Honours candidates who must have completed 12.001 Psychology I, 12.052, 12.062 and 12.152 at an average level of Credit or better.

1. Approved potential Honours candidates must include 12.153 and 12.163 in their 3rd Year Program if intending to take the Research alternative in Psychology IV or 12.163 if intending to take the Course Work alternative. Admission to Psychology IV additionally requires an average of Credit or better grade in the 8 Psychology half-units of the 3rd Year Program.

2. Pass Course students who have completed 12.001 (an Advanced Pass is required), 12.052, 12.062, and 12.152 may enrol in up to 8 of Psychology III half-units.

3. Pass Course students who have completed 12.001 and 12.122 (a Credit grade is required) may enrol in up to 4 of Psychology III half-units chosen from 12.173, 12.303, 12.373, 12.413, 12.503, 12.523, 12.553 and 12.623.

4. Not all Psychology III half-units will necessarily be offered in each year.

</table>

*Students who have passed 65.211 or 65.261 will have 4½ hours per week less.

†A student who has passed 65.201, 65.221 or 65.271 and is enrolled concurrently in any two of 65.300, 65.301, 65.310, 65.311, 65.320, 65.321, 65.330, 65.331 will have a total of 8½ hours per week. If enrolled concurrently in any two of 65.350, 65.351, 65.360, 65.361, 65.370, 65.371, 65.380, 65.381 the student will have a total of 10½ hours per week.
Schedule B

Major Sequences in the Bachelor of Arts Degree

General definition of a major sequence
Except as shown below, a major sequence is an approved sequence of at least four Upper Level or Advanced Level units (or their equivalent in double or fractional units), in one subject, following completion of two units at Level I.

The Upper Level and/or Advanced Level units of a major sequence are normally taken over the third, fourth, fifth and sixth sessions of study.

Exceptions and additions
1. Major sequences other than indicated above may be approved by Faculty in special cases.

2. History
An alternative major sequence in History may be obtained by taking at least two History double units in the degree and two other approved units. Details of approved Level I units may be obtained from the School; Upper Level units may include one or two Upper Level units of Economic History, or 65.242 Spain and Latin America 1400-1818 and/or 65.243 Latin America 1810-1975, plus 64.630 Germany since 1945 (with approval of Head of School). (This provision is currently under discussion: arrangements for 1978 are available on request from the School of History.)

3. History and Philosophy of Science
A major sequence in History and Philosophy of Science may also be obtained by taking at least four H.P.S. units in the degree and additional approved units to make a total of at least six units. Any two Level I units in Schedule A may be taken.

Approved Upper Level units include: one or two units made up of the following half-units in Philosophy: (Predicate Logic; Descartes; British Empiricism; Greek Philosophy I: Thales to Plato; Scientific Method: Foundations of Mathematics; Philosophy; Spinoza and Leibniz; Set Theory; Model Theory; Utopias); 53.206 Sociology IIIB (with the option Science Technology and Society); 15.695 Quantitative Methods in Historical Analysis; 15.753 Science, Society and Economic Development; 15.703 The Origins of Modern Economics; 15.713 Economic Thought from Karl Marx to John Maynard Keynes; with permission of the Head of the School, one or two units of an approved science.

4. Industrial Relations
A major sequence consists of any four Upper Level or Advanced Level Industrial Relations units for which the student is eligible, following completion of 15.511 Industrial Relations IA and 15.011 Economics IB.

5. Philosophy
62.203 The Freudian Revolution, 62.213 Marxism and Science and 62.503 Philosophy of Science may be counted as Upper Level units in a major sequence in Philosophy.

6. Psychology
A major in Psychology is obtained by the completion of no less than 6 units in Psychology subjects. A single major in Psychology may be completed in two ways:

A Year 1: 12.001 (an Advanced pass is required) (= 2 units), + Year 2: 12.052, 12.062 and 12.152 (= 2 units), + Year 3: four Psychology III half-units (= 2 units).

B Year 1: 12.001 (= 2 units), + Year 2: 12.122 (a Credit grade is required) (= 2 units), + Year 3: four Psychology III half-units chosen from 12.173, 12.303, 12.373, 12.413, 12.503, 12.523, 12.553 and 12.623 (= 2 units).

A double major in Psychology involves four Psychology III half-units additional to the four required for a single major in the third year of Psychology. The double major is available to Pass students proceeding through A above as well as to approval potential Honours IV students (ie students who have achieved an average Credit or better grading at the completion of 12.001, 12.052, 12.062 and 12.152). A double major in Psychology is not available to students proceeding through B above.

7. Mathematics†
In the second year of their course students should complete the Level II units* 10.111A, 10.111B, 10.111C, 10.111D and 10.2111, 10.2112 (or the Higher equivalents 10.121A, 10.121B, 10.121C and 10.2211, 10.2212).

In third year the student should take four Level III mathematics units**. Students should consider the merits of combining courses in Pure Mathematics, Applied Mathematics, Theoretical Mechanics and Statistics, in accordance with their future interests. The units 10.1111, 10.1112, 10.1121, 10.1127, 10.1128, are particularly recommended for students intending to teach.

†For the purpose of BA Rule 11(c), Applied Mathematics, Pure Mathematics, Statistics and Theoretical and Applied Mechanics are regarded as distinct subjects.

*Three Level II Mathematics units are equivalent to two (2) Upper Level Arts units.

**Four Level III Mathematics units are equivalent to two (2) Upper Level Arts units.
Complementary units should be chosen in accordance with Faculty rules.

Students wishing to specialize and major in Pure Mathematics, Applied Mathematics, Theoretical Mechanics or Theory of Statistics, should consult the School of Mathematics regarding minimum course requirements. Senior members of the staff of the School of Mathematics are available for consultation by students who wish to discuss their courses.

8. Quantitative Methods
   For the purpose of BA Rule 11C, Quantitative Methods are regarded as distinct subjects from Economics.

9. Sociology
   Certain options offered by other Schools can be taken by students enrolling in Upper Level units in Sociology with approval of the Head of School.

   These options are available from the schools of:
   (1) History and Philosophy of Science
   (2) Spanish and Latin American Studies
   (3) French
   (4) Economics
   (5) German
   (6) Industrial Relations

   Students should consult with the School at the beginning of the year.
Graduate Study

At the graduate level the degrees of Doctor of Philosophy and Master of Arts are offered in most schools of the Faculty.

The Faculty of Arts offers two kinds of graduate work leading to the award of the degree of Master of Arts: the Honours MA, which is primarily awarded for a written thesis, is intended chiefly for graduates engaged in research; while the Pass MA, in which there is more emphasis upon course-work and formal instruction, is intended for graduates who wish to expand and extend their undergraduate knowledge by further intensive training with less emphasis upon original research work.

The conditions for the award of these degrees are set out later.

Masters Degree Courses at Pass Level

English

In addition to the Master of Arts (Honours), the School of English offers courses leading to the pass degree of Master of Arts (part-time course).

Candidates for the award of the degree must complete two courses (one in each of two years). Each course involves approximately sixty hours of seminars, together with such supplementary study of criticism, research-materials and methods as may be prescribed from time to time. Candidates are expected to undertake wide reading in preparation for each seminar and must, as required, write essays and prepare papers to be presented at the seminars. Assessment is based on these essays and papers as well as on examinations to be taken at the end of each session or the end of the year.

All students are required to attend a seminar, held every second week, on literary history or on problems of literary criticism common to all periods.

Not all courses are available in any one year; and on the evidence of studies previously undertaken by the candidate as part of an undergraduate program or otherwise, the Head of the School may direct a candidate to take or not to take a particular course as part of his/her MA program.
The courses from which students are required to select subjects for study are:

50.501G Linguistic History and Theory.
50.502G Australian Literature—Nineteenth Century.
50.503G Mediaeval English Literature.
50.504G Major Australian Writers of the Twentieth Century.
50.505G English Fiction of the Later Nineteenth and Earlier Twentieth Centuries.
50.506G English Literature of the Seventeenth Century.
50.507G Shakespeare.
50.508G The Classical Background of English Literature.

51.507G Millenarian Movements
51.508G Industrialization and Culture

**German**

In addition to the Master of Arts (Honours), the School of German also offers a course leading to the pass degree of Master of Arts (part-time course).

The course consists of two units, 64.501G and 64.502G, which may be taken either concurrently (in one year) or consecutively (in two successive years). In each unit candidates are required to attend two 21-hour seminar courses on literature or linguistics and a staff-student seminar on critical method, and to undertake such practical language work as the School considers necessary. In addition, a short thesis 64.500G of approximately 20,000 words on a literary or linguistic topic must be submitted.

**History**

In addition to the Master of Arts (Honours), the School of History offers courses leading to the award of the pass degree of Master of Arts.

Candidates for the award of the degree must complete, over a minimum of two years, four seminar courses from the options offered, each of which consists of twenty eight hours of seminars, and in addition one compulsory session length seminar (51.501G), also consisting of twenty eight hours of seminars. Candidates also must submit a thesis of 15,000 to 20,000 words on a topic suitable to the School.

51.501G is available each year. In 1978 the following courses are taught:

51.500G Thesis
51.501G Perceptions of the Past
51.504G The Nature of Crisis Situations in Modern European History
51.505G Historical Origins of the Modern Middle East
51.506G Conflict and Consensus in Modern Australia from 1890

51.507G Advanced Mathematical Analysis of Data
51.508G Seiches and Tides
51.481G Essay

**Mathematics**

The School of Mathematics offers courses leading to the award of the pass degree of Master of Arts.

Candidates must complete over a period of at least four sessions eight courses chosen from those listed below, or from the MStats courses, or from the pass MA degree courses offered by the School of Philosophy over a period of at least four sessions. The courses 10.181G, 10.182G, 10.183G and 10.184G must be included in the eight. The choice of courses must be approved by the Head of School, and candidates must submit an essay (10.481G) on an approved topic.

In addition, the Head of the School of Mathematics may prescribe as co-requisites other courses in the School of Mathematics which he deems appropriate in each individual case.

The degree is intended for practising teachers. The prerequisites include the DipEd or equivalent qualification.

The School of Mathematics expects to offer not fewer than two of the following courses in each session.

**Philosophy**

In addition to the Master of Arts (Honours), the School of Philosophy also offers courses leading to the award of the pass degree of Master of Arts.

A course is offered in Formal Logic, with some applications to Linguistics and to Computing, for suitably qualified graduates in Arts with a major in Philosophy or majors in related fields, and adequate undergraduate philosophical training.

Candidates complete a course of lectures and seminars over four sessions part-time, taking two separate courses in each session. Besides being examined on course work, candidates are required to submit a short thesis embodying the results of their own research.

The following courses are offered, and will normally be taken in the order given. Subject to the approval of the Faculty, candidates who have covered similar subjects in their undergraduate program may be given one or more alternative courses. Under certain circumstances permission may also be given to substitute courses offered by the School of Mathematics.

**Year 1, Session 1**

Conditions for the Award of Higher Degrees

First Degrees

Rules, regulations and conditions for the award of first degrees are set out in the appropriate Faculty Handbooks.

For the list of undergraduate courses and degrees offered see Disciplines of the University: Faculty Table (Undergraduate Study) in the Calendar.

Higher Degrees

The following is the list of higher degrees and graduate diplomas of the University, together with the publication in which the conditions for the award appear.

For the list of graduate degrees by research and course work, arranged in faculty order, see Disciplines of the University: Faculty Table (Graduate Study) in the Calendar.

For the statements Preparation and Submission of Project Reports and Theses for Higher Degrees and Policy with respect to the use of Higher Degree Theses see the Calendar.

### Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be granted by the Council on the recommendation of the Professorial Board to a candidate who has made an original and significant contribution to knowledge and who has satisfied the following requirements:

#### Qualifications

2. A candidate for registration for the degree of Doctor of Philosophy shall:

   (1) hold an honours degree from the University of New South Wales; or

   (2) hold an honours degree of equivalent standing from another approved university; or

   (3) if he holds a degree without honours from the University of New South Wales or other approved university, have achieved by subsequent work and study a standard recognised by the appropriate Faculty or Board of Studies as equivalent to honours; or

   (4) in exceptional cases, submit such other evidence of general and professional qualifications as may be approved by the Professorial Board on the recommendation of the Faculty or Board of Studies.

3. When the Faculty or Board of Studies is not satisfied with the qualifications submitted by a candidate, the Faculty or Board of Studies may require him, before he is permitted to register, to undergo such examination or carry out such work as the Faculty or Board of Studies may prescribe.

#### Registration

4. A candidate for registration for a course of study leading to the degree of Doctor of Philosophy shall:

   (1) apply to the Registrar on the prescribed form at least one calendar month before the commencement of the session in which he desires to register; and

   (2) submit with his application a certificate from the head of the University school in which he proposes to study stating that the candidate is a fit person to undertake a course of study and research leading to the degree of Doctor of Philosophy and that the school is willing to undertake the responsibility of supervising the work of the candidate and of reporting to the Faculty or Board of Studies at the end of the course on the merits of the candidate's performance in the prescribed course.

5. Subsequent to registration the candidate shall pursue a program of advanced study and research for at least six academic sessions, save that:

---

### Graduate Diplomas

- **Master of Town Planning**
- **Graduate Diploma**
- **Graduate Diploma in the Faculty of Professional Studies**

**Abbreviation**: MTP, GradDip, DipArchivAdmin, DipEd, DipLib, GradDip

**Calendar/Handbook**: Architecture, Applied Science, Architecture, Engineering, Sciences†

**Faculty**: Science, Professorial Board, Biological Sciences.

**Not available to new students.**

†Faculty of Biological Sciences.
Conditions for the Award of Higher Degrees

(1) A candidate fully engaged in advanced study and research for his degree, who before registration was engaged upon research to the satisfaction of the Faculty or Board of Studies, may be exempted from not more than two academic sessions;

(2) In special circumstances the Faculty or Board of Studies may grant permission for the candidate to spend not more than one calendar year of his program in advanced study and research at another institution provided that his work can be supervised in a manner satisfactory to the Faculty or Board of Studies;

(3) In exceptional cases, the Professorial Board on the recommendation of the Faculty or Board of Studies may grant permission for a candidate to be exempted from not more than two academic sessions.

6. A candidate who is fully engaged in research for the degree shall present himself for examination not later than ten academic sessions from the date of his registration. A candidate not fully engaged in research shall present himself for examination not later than twelve academic sessions from the date of his registration. In special cases an extension of these times may be granted by the Faculty or Board of Studies.

7. The candidate shall be required to devote his whole time to advanced study and research, save that:

(1) the Faculty or Board of Studies may permit a candidate on application to undertake a limited amount of University teaching or outside work which in its judgement will not interfere with the continuous pursuit of the proposed course of advanced study and research;

(2) a member of the full-time staff of the University may be accepted as a part-time candidate for the degree, in which case the Faculty or Board of Studies shall prescribe a minimum period for the duration of the program;

(3) in special circumstances, the Faculty or Board of Studies may, with the concurrence of the Professorial Board, accept as a part-time candidate for the degree a person who is not a member of the full-time staff of the University and is engaged in an occupation which, in its opinion, leaves the candidate substantially free to pursue his program in a school of the University. In such a case the Faculty or Board of Studies shall prescribe for the duration of his program a minimum period which, in its opinion, having regard to the proportion of his time which he is able to devote to the program in the appropriate University school is equivalent to the six sessions ordinarily required.

8. Every candidate shall pursue his program under the direction of a supervisor appointed by the Faculty or Board of Studies from the full-time members of the University staff. The work, other than field work, shall be carried out in a School of the University save that in special cases the Faculty or Board of Studies may permit candidates to conduct their work at other places where special facilities not possessed by the University may be available. Such permission will be granted only if the direction of the work remains wholly under the control of the supervisor.

9. Not later than two academic sessions after registration the candidate shall submit the topic of his research for approval by the Faculty or Board of Studies. After the topic has been approved it may not be changed except with the permission of the Faculty or Board of Studies.

10. A candidate may be required by the Faculty or Board of Studies to attend a formal course of study appropriate to his work.

11. On completing his course of study every candidate must submit a thesis which complies with the following requirements:

(1) the greater proportion of the work described must have been completed subsequent to registration for the PhD degree;

(2) it must be an original and significant contribution to the knowledge of the subject;
(3) It must be written in English except that a candidate in the Faculty of Arts may be required by the Faculty on the recommendation of the supervisor to write the thesis in an appropriate foreign language;
(4) It must reach a satisfactory standard of expression and presentation.

12. The thesis must present the candidate's own account of his research. In special cases work done conjointly with other persons may be accepted, provided the Faculty or Board of Studies is satisfied on the candidate's part in the joint research.

13. Every candidate shall be required to submit with his thesis a short abstract of the thesis comprising not more than 600 words.

The abstract shall indicate:
(1) the problem investigated;
(2) the procedures followed;
(3) the general results obtained;
(4) the major conclusions reached;
but shall not contain any illustrative matter, such as tables, graphs or charts.

14. A candidate may not submit as the main content of his thesis any work or material which he has previously submitted for a university degree or other similar award.

15. The candidate shall give in writing two months' notice of his intention to submit his thesis and such notice shall be accompanied by the appropriate fee.

16. Four copies of the thesis shall be submitted together with a certificate from the supervisor that the candidate has completed the course of study prescribed in his case. The four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.† The candidate may also submit any work he has published whether or not such work is related to the thesis.

17. It shall be understood that the University retains the four copies of the thesis submitted for examination, and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968 the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

18. There shall normally be three examiners of the thesis, appointed by the Professorial Board on the recommendation of the Faculty or Board of Studies, at least one of whom shall be an external examiner.

19. After examining the thesis the examiners may:
(1) decide that the thesis reaches a satisfactory standard; or
(2) recommend that the candidate be required to re-submit his thesis in revised form after a further period of study and/or research; or
(3) recommend without further test that the candidate be not awarded the degree of Doctor of Philosophy.

20. If the thesis reaches the required standard, the examiners shall arrange for the candidate to be examined orally, and, at their discretion, by written papers and/or practical examinations on the subject of the thesis and/or subjects relevant thereto, save that on the recommendation of the examiners the Faculty or Board of Studies may dispense with the oral examination.

21. If the thesis is of satisfactory standard but the candidate fails to satisfy the examiners at the oral or other examinations, the examiners may recommend the University to permit
the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by them but not exceeding eighteen months.

22. At the conclusion of the examination, the examiners will submit to the Faculty or Board of Studies a concise report on the merits of the thesis and on the examination results, and the Faculty or Board of Studies shall recommend whether or not the candidate may be admitted to the degree.

23. A candidate shall be required to pay such fees as may be determined from time to time by the council.

1. An application to register as a candidate for the degree of Master of Arts shall be made on the prescribed form which shall be lodged with the Registrar at least one full calendar month before the commencement of the session in which the candidate desires to register.

2. A candidate for the degree shall be registered in one of the following Schools of the Faculty of Arts: Drama, Economics, English, French, Geography, German, History, History and Philosophy of Science, Mathematics†, Philosophy, Political Science, Psychology, Russian, Sociology, Spanish.

3. The degree shall be awarded in two grades, namely the Pass degree and the degree with Honours. There shall be two classes of Honours, namely Class I and Class II.

4. A candidate for the Honours degree may not be awarded the Pass degree.

5. (1) Except as provided in sub-section 5. (2) an applicant for registration for the Honours degree of Master of Arts shall have been admitted to the degree of Bachelor of Arts at a standard not below second class honours in the University of New South Wales, or other approved University, in an appropriate School or Department.

(2) Applicants for registration for the Honours degree who are graduates in Arts of this, or other approved university, with a degree at a standard below second class honours shall be required to take a qualifying examination as approved by the Faculty of Arts (hereinafter referred to as 'the Faculty'), and if successful may then apply for registration as a candidate for the Honours degree.

(3) Notwithstanding any other provisions of these conditions the Faculty may, on the recommendation of the Head of the School, require an applicant to demonstrate fitness for registration as a candidate for the Honours degree by carrying out such work and passing such examinations as the Faculty may determine. The Faculty may on the recommendation of the Head of the School concerned require a candidate for the Honours degree to undergo a suitable test in a relevant language, the form of such test to be recommended by the Head of the School concerned.

(4) Every candidate for the Honours degree shall be required to submit three copies of a thesis embodying the results of an original investigation, to take such examinations and to perform such other work as may be prescribed by the Faculty on the recommendation of the Head of the School concerned. A candidate for the Honours degree may not submit as the main content of his thesis any work or material which he has previously submitted for a university degree or other similar award. The Honours thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.*

†The School of Mathematics includes a Department of Statistics.

*See Conditions for the Award of Degrees in the Calendar.
(5) It shall be understood that the University retains three copies of the Honours thesis submitted for examination and may allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968 the University may issue the Honours thesis in whole or in part in photostat or microfilm or other copying medium.

(6) The investigation and other work as provided in paragraph 5, (4) shall be carried out under the direction of a supervisor appointed by the Faculty or under such conditions as the Faculty may determine.

(7) For each candidate for the Honours degree there shall be at least two examiners appointed by the Professorial Board on the recommendation of the Faculty, one of whom shall, if possible, be an external examiner.

(8) Every candidate for the Honours degree shall in the first instance submit his proposed course of study and the subject of his thesis for the approval of the Head of the School concerned.

(9) No candidate shall be considered for the award of the Honours degree until the lapse of three complete sessions from the date from which registration becomes effective, save that in the case of a candidate who has demonstrated exceptional merit this period may, with the approval of the Faculty, be reduced by one session.

**Pass Degree**

6. (1) Unless the Faculty shall otherwise determine, an applicant for registration as a candidate for the Pass degree of Master of Arts shall have been admitted to the degree of Bachelor of Arts in the University of New South Wales or other approved university and shall have taken a major sequence, and passed all necessary examinations, in the subject or subjects, or in a discipline related to the subject or subjects, in which he wishes to work for the Pass degree.

(2) Notwithstanding the provisions of clause 6, (1) the Faculty may, on the recommendation of the Head of the School, require an applicant to demonstrate his eligibility for registration by carrying out such work and passing such examinations as the Faculty may determine.

(3) A candidate for the Pass degree shall attend such classes and seminars as may be prescribed, shall pass the required examinations, and shall complete satisfactorily such written and other work as the Head of School may determine.

(4) No part-time candidate shall be considered for the award of the Pass degree until the lapse of four complete sessions from the date from which registration becomes effective. No full-time candidate shall be considered for the award of the degree until the lapse of two sessions from the date from which registration becomes effective.

7. (1) A graduate in a Faculty other than Arts of this or other approved university may be admitted to registration for the Honours or Pass degree of Master of Arts, with the approval of the Faculty.

(2) In special circumstances a person may be permitted to register as a candidate for the Honours or Pass degree of Master of Arts if he submits evidence of such academic and professional attainments as may be approved by the Faculty on the recommendation of its Higher Degree Committee.

8. In every case, before permitting an applicant to register as a candidate the Faculty shall be satisfied that adequate supervision and facilities are available.

9. No candidate shall, without the approval of the Head of the School concerned, be enrolled as a candidate for the degree of Master of Arts at the same time as he is enrolled for any other degree or diploma in this University or elsewhere.

10. An approved applicant shall pay such fees as may be determined from time to time by the Council.

**At present only the Schools of English, German, History, Mathematics and Philosophy offer courses leading to the Pass degree.**
Subject Descriptions

Identification of Subjects by Numbers

Each of the subjects taught in the University is identifiable both by number and by name. This is a fail-safe measure at the points of enrolment and examination against a student nominating a subject other than the one intended. Subject numbers are allocated by the Assistant Registrar, Examinations and Student Records, and the system of allocation is:

1. The School offering a subject is indicated by the number before the decimal point;

2. If a subject is offered by a Department within a School, the first number after the decimal point identifies that Department;

3. The position of a subject in a sequence is indicated by the third number after the decimal point. For example, 2 would indicate that the subject is the second in a sequence of subjects;

4. Graduate subjects are indicated by the suffix G.

As indicated above, a subject number is required to identify each subject in which a student is to be enrolled and for which a result is to be returned. Where students may take electives within a subject, they should desirably be enrolled initially in the particular elective, and the subject numbers allotted should clearly indicate the elective. Where it is not possible for a student to decide on an elective when enrolling or re-enrolling, and separate examinations are to be held in the electives, Schools should provide to the Examinations and Student Records Section in April (Session 1) and August (Session 2) the names of students taking each elective. Details of the actual dates in April and August are set out in the Calendar of Dates earlier in this volume.

Those subjects taught in each Faculty are listed in full in the handbook of that Faculty, together with the subject description handbook of that Faculty in the section entitled Subject Descriptions.

Textbook lists are no longer published in the Faculty handbooks. Separate lists are issued early in the year and are available at key points on the campus.

The identifying numbers for each School are set out below.

Information Key

The following is the key to information supplied about some subjects listed below: S1 (Session 1); S2 (Session 2); F (Full year); UVal (Unit Value); Hpw (Hours per week).

Biology

Undergraduate Study

The first course in Biology comprises units 17.031 and 17.021.

No more than four units from the subjects listed under Biology in Schedule A in this handbook may be included in a student's program for the Degree of Bachelor of Arts.

17.031 Cell Biology S1 L2T4
Prerequisites: HSC Exam Grade Required
2 unit Science (any strand) or 1, 2 or 3
4 unit Science (any strands) or 1, 2 or 3

Basic cell structure; membranes, organelles, prokaryotic and eukaryotic cells; cellular locomotion; basic biological molecules; enzymes; structure and metabolic roles, cellular compartmentalization and enzyme function; diffusion, osmosis and active transport; theories of inheritance, linkage, gene interaction, sex determination, mutation, selection and evolution; information transfer and protein synthesis.

Requirements for Practical Work
A list of equipment required for practical work is posted on the notice board in the ground floor of the Biological Sciences Building. Students must purchase this material before the first practical class.

17.021 Biology of Higher Organisms S2 L2T4
Prerequisite: 17.031.

Maintenance of the organism; gas exchange systems in plants and animals; transport inside organisms; uptake, digestion, absorption; enzymes; structure and function. Photosynthesis: process and structural relationships; metabolic systems, energy yields and pathways.

Developing organisms: sexual reproduction in plants and animals, general life cycle patterns; cell development and differentiation in flowering plants and mammals.

Control and co-ordination in organisms: organisms and water, uptake and effects; control mechanisms, urinary systems and kidney structure and function. Stimuli and responses: plant hormones, hormones in vertebrate animals, muscle activity and muscle structure, eye structure and vision mechanism; ear structure and hearing mechanism; nerves, central nervous system, nerve action, brain structure and functioning.

17.012 General Ecology S2 L2T4
Prerequisites: 17.001 or 17.011 and 17.021 or 17.031 and 17.021.

Evolution and environmental selection in the Australian continent; geological, palaeoclimatological, biogeographical and historical background. Functional organization of ecosystems: energy budgets, hydrological and biogeochemical cycles. Integrated structure and function of ecosystems, including cropping and management of natural resources. Aspects of microbial ecology. Students are required to attend a field camp as an integral part of the course.

43.101 Introductory Genetics S2 L2T4
Prerequisites: 17.001 or 17.011 and 17.021 or 17.031 and 17.021.

Various aspects of molecular, organismal and population genetics, including: meiotic and non-meiotic recombination, genome variations, mutagens and mutation rates, cytoplasmic inheritance, gene function, genetic code, gene structure, collinearity of polynucleotide and polypeptide, control of gene action, genes and development, population genetics, genetics and improvement of plants and animals.

43.111 Flowering Plants S1 L2T4
Prerequisites: 17.001 or 17.011 and 17.021 or 17.031 and 17.021.

Vegetative and floral morphology of Angiosperms; special reference to variations in morphology, elements of biological classification, nomenclature and identification of native plants. Weekend field work is part of the course.

43.112 Plant Taxonomy S2 L2T4
Prerequisite: 43.111. Co-requisite: 43.101.

The assessment, analysis and presentation of data for classifying plants both at the specific and superspecific level; the emphasis is on vascular plants. Field work is part of the course.

43.131 Fungi and Man S1 L2T4
Prerequisites: 17.001 or 17.011 and 17.021 or 17.031 and 17.021.

An introduction to the biology and taxonomy of fungi and a study of their economic importance to man. Includes: fungi as pathogens of plants and animals; use of fungi as food and in the production of useful chemical products; medical uses of fungi, including drugs and hallucinogens; degradation of organic matter, particularly in soils and of timber; interaction of fungi with other organisms; chemical control of fungi.

43.132 Mycology and Plant Pathology S2 L2T4
Prerequisite: 43.131.

A detailed study of the fungi, including both saprophytic and plant pathogenic species. Includes: hyphal structure and ultrastructure; morphology and taxonomy of members of major taxonomic groups; spore liberation, dispersal, deposition, germination, infection and the establishment of host-pathogen relationship; morphogenesis of vegetative and fruiting structures; cytology, genetics; ecological considerations of fungi in specialized habitats, survival mechanisms and methods of control of plant pathogens.

[These units alternate each year. 43.112 is available in 1978. ]
The major taxa of the Plant Kingdom with emphasis on the green plants. The evolution of basic vegetative structures, reproductive structures and genetic systems are studied. Field work is part of the course.

A comparative study of the Chordata, including morphology, systematics and phylogeny. Practical work to illustrate the lecture course. Obligatory field camp.

A comparative study of the major invertebrate phyla with emphasis on morphology, systematics and phylogeny. Practical work to illustrate the lecture course. Obligatory field camp.

Prerequisites: 17.001 or 17.011 and 17.021.

Statistical methods and their application to biological data: introduction to probability; the binomial, poisson, negative binomial, normal distributions; student’s t, \( x^2 \) and variance ratio tests of significance based on the above distributions; the analysis of variance of orthogonal and some non-orthogonal designs; linear regression and correlation. Non-linear and multiple regression. Introductory factorial analysis. Experimental design. Non-parametric statistics, including tests based on \( x^2 \), the Kruskal-Wallis test, Fisher’s exact probability test and rank correlation methods.

Prerequisites: 17.001 or 17.011 and 17.021 or 17.031 and 17.021.

Prerequisites: 2.121, 2.131 and 10.001. 10.011 or 10.021.

Thermodynamics: first, second and third laws of thermodynamics; statistical mechanical treatment of thermodynamic properties; applications of thermodynamics: chemical equilibria, phase equilibria, solutions of non-electrolytes and electrolytes, electrochemical cells.

Kinetics: order and molecularity; effect of temperature on reaction rates; elementary reaction rate theory.

Surface chemistry and colloids: adsorption, properties of dispersions; macromolecules and association colloids.

Prerequisites: 2.121, 2.131 and 10.001, 10.011 or 10.021.

Prerequisites: 2.121, 2.131 and 10.001, 10.011 or 10.021.

Prerequisites: 2.121, 2.131 and 10.001, 10.011 or 10.021.

The major taxa of the Plant Kingdom with emphasis on the green plants. The evolution of basic vegetative structures, reproductive structures and genetic systems are studied. Field work is part of the course.

A comparative study of the Chordata, including morphology, systematics and phylogeny. Practical work to illustrate the lecture course. Obligatory field camp.

A comparative study of the major invertebrate phyla with emphasis on morphology, systematics and phylogeny. Practical work to illustrate the lecture course. Obligatory field camp.

A comparative study of the major taxa of the Plant Kingdom with emphasis on the evolution of basic vegetative structures, reproductive structures and genetic systems. Field work is part of the course.

A comparative study of the major invertebrate phyla with emphasis on morphology, systematics and phylogeny. Practical work to illustrate the lecture course. Obligatory field camp.

A comparative study of the Chordata, including morphology, systematics and phylogeny. Practical work to illustrate the lecture course. Obligatory field camp.
**2.002B Organic Chemistry**

*Prerequisite: 2.131.*

Chemistry of the more important functional groups; aliphatic hydrocarbons, monocyclic aromatic hydrocarbons, halides, alcohols, phenols, aldehydes, ketones, ethers, carboxylic acids and their derivatives, nitro compounds, amines and sulphanic acids.

**2.042C Inorganic Chemistry**

*Prerequisites: 2.121 and 2.131.*

Chemistry of the non-metals including B, C, Si, N, P, S, Se, Te, halogens, and noble gases. Chemistry of the metals of groups IA, IIA, and Al. Typical ionic, giant-molecule and close-packed structures. Transition metal chemistry, including variable oxidation states, paramagnetism, Werner's theory, isomerism of six- and four-coordinate complexes, chelation, stabilization of valency states. Physical methods of molecular structure determination. Chemistry of Fe, Co, Ni, Cu, Ag, Au.

**6.620 Introduction to Computing Science**

*Prerequisite: 10.001. Excluded: 6.600, 6.601A, 6.021D.*

An introduction to computing science for those students who intend to take more than one subject in this area. *Introduction to programming:* design and correctness of algorithms and data structures; programming in a high level algorithmic language which provides simple, high level program control and data structuring facilities. *Introduction to dynamic data structures.* *Introduction to computer organization:* simple machine architecture. Introduction to operating systems and computing machinery.

---

**Drama*  

**Undergraduate Study**

Drama courses offered within the Faculty of Arts are not primarily intended to equip a student for the profession of theatre. The National Institute of Dramatic Art, established in the University, is concerned with vocational training, and the Old Tote Theatre Company with the practice of the theatre arts. The School of Drama is concerned with the history and evaluation of those arts. Practical work is undertaken in the School, not in order that students may achieve proficiency as actors or directors, but in order that they may acquire a fuller understanding of the theatre.

**Level 1 units**

**57.101 World Drama 1**  
*S1*

Together with 57.102, a survey of world drama. The development of the theatre from the Greeks through the nineteenth century; drama as a theatrical form and the art of the stage as an expression of society. Additional lectures are included on stage and theatre design, and on music in the theatre. Tutorials concentrate on the theatrical aspects of the plays studied.

*Prerequisites and co-requisites may be waived in exceptional circumstances and at the discretion of the School.*
57.102 World Drama 2  
Prerequisite: 57.101.

Theatrical developments in the twentieth century. Contemporary trends in drama and theatre; lectures include segments on Japanese Theatre and television. Tutorials concentrate on the theatrical aspects of the plays studied.

Upper Level units

57.103 The Play In Performance  
Prerequisite: 57.102.

The verbal, visual and physical language of the theatre and the interpretation of the play text by the actor, director and designer: an intensive study of select plays representative of open stage forms, the realist stage, and modern experiment.

57.146 Theatre Arts in Education  
Prerequisite: 57.502.

A study of the theatre arts in education, fundamentals of movement, oral interpretation of text and stage design. Study of developments in Children’s Theatre, the Reader’s Theatre and Theatre-in-Education movements.

57.125 Form and Idea in Drama, 1900-1950  
Prerequisite: 57.103.

Evolution of content and form of plays selected from the first half of the century. Ideas of reality and the philosophy of existentialism as they appear in drama and as the basic concepts of ‘a poetry of the theatre’. Shaw, Ibsen, Strindberg, Pirandello, Camus, Sartre, Lorca, O’Casey, Synge, Yeats, Eliot, Frisch and Lowell.

57.135 Film One  
Prerequisite: 57.103.

Films by selected directors are studied with special reference to the history of film and the development of style and film language in the cinema from 1896 to the present.

57.501 Elizabethan and Jacobean Theatre and Drama  
Prerequisite: 57.103.

Performance conditions and dramatic forms in the English theatre during the later sixteenth and early seventeenth centuries.

57.506 Drama and Theatre in Germany  
Prerequisite: 57.103.

Drama and theatre in Germany, with special emphasis on the eighteenth century.

57.145 Australian Drama and Theatre  
Prerequisite: 57.103.

Representative Australian drama from the late nineteenth century to the present, with special emphasis on the theatrical context. Contemporary theatrical forms and their accessibility to Australian dramatists.

57.155 Radio Drama  
Prerequisite: 57.103.

The technique of radio drama and its relevance to the theatre and to literature.

57.136 Film 2  
Prerequisite: 57.135.

A number of feature films are examined in depth. Stress is on the study of filmed plays and the problem of adaptation of either plays or novels. Practical exercises.

57.126 Form and Idea in Drama from 1950  
Prerequisite: 57.125.

Representative works of recent years and their theoretical background. The theatrical ideas of such theorists as Appia, Craig, the German Expressionists, Meyerhold, Barrault, Artaud, and Peter Brook. The plays to be considered are chosen according to the individual interests of the students.

57.502 The Uses of Drama  
Prerequisite: 57.103.

Drama as a communicative and creative process and its implications for teaching; introduction to psycho- and sociodrama concepts. Tutorial work in improvisations, games and role-taking.

57.503 Drama in Teaching  
Prerequisite: 57.146.

A practically-oriented course on improvisational drama in education, with small teams of students undertaking supervised workshop sessions in schools. Seminars and demonstration classes are conducted.

57.156 Classical French Theatre  
Prerequisite: 57.103.

The dramatic theory, practice and stage conventions of tragedy and comedy in seventeenth century France, with special reference to the plays of Corneille, Racine and Molière.

57.137 Film 3  
Prerequisite: 57.136.

After Film 1, an historical survey, and Film 2, a study of selected directors and genres, Film 3 will be devoted to the in-depth study of a number of film theories. The validity and usefulness of some of these theories shall be checked against a number of selected films.
57.507 Contemporary Theatre S2
Prerequisite: 57.103.

An investigation of contemporary theatre utilizing dramatic scripts and documents of the last ten years. Students are expected to make extensive use of such theatre journals as The Drama Review, Plays and Players, Theatre Quarterly and Gambit. Also students work with unpublished material by Australian and overseas authors.

Texts in 1978 are drawn from the works of the following authors: Alan Ayckbourn, Howard Barker, Howard Brenton, Christopher Hampton, David Hare, Simon Gray, Peter Nicholls, Charles Marowitz, Sam Shepard, Michael Weller, Snoo Wilson, Stephen Poliakoff all of which are available in Methuen, Calder, Faber and Penguin paperbacks.

57.515 Puppetry S2
Prerequisite: 57.103.

A history of puppet forms, traditions and texts in the European theatre from mediaeval times to the present, with special studies of the conventions and techniques of the Japanese, Chinese and Indonesian puppet theatres and their traditional plays.

Advanced Level units

Following a semester course of study in the critical assessment of the dramatic text and its performance, a series of three semester courses is devoted to the close examination of dramatic texts in terms of their style, their structure, and their appropriate theatre form. A co-requisite of the last two of these semester courses (which are offered as a double unit) is a double unit course in dramatic construction. All Advanced Level courses require participation in experiments directed to problems of dramatic style.

57.531 Dramatic Criticism 1
Prerequisite: 57.102 at Credit Level or better.

This subject includes 57.103 plus: The principles, problems and history of dramatic criticism, with attention to Shakespearean criticism and to the development of theatre criticism in the 19th and 20th centuries.

57.532 Stage, Style and Structure 1: Aspects of Classicism S2
Prerequisite: 57.531.

Students enrolling in this subject must also include 1 Upper Level unit of their choice.

In 1978 studies are offered in Greek theatre and Aristotelian theory; the French neo-classic theatre; neo-classic theory and the well-made play.

57.533 Stage, Style and Structure 2 F
Prerequisite: 57.532. Co-requisite: 57.534.

Students enrolling in this subject must also include 1 Upper Level unit in each session other than 57.103.

Aspects of Realism

In 1978 studies are offered in German and English bourgeois domestic drama; Stanislavsky and the practical application of his system; the American realistic cinema of the 1930's.

Aspects of Romanticism

In 1978 studies are offered in Gothic drama: symbolism and expressionism in the theatre and cinema.

57.534 Dramatic Construction F
Prerequisite: 57.532. Co-requisite: 57.533.

Students enrolling in this subject must also include 1 Upper Level unit in each session other than 57.103.

A study of the elements of playwriting.

Honours Level unit

57.526 Drama Honours
Prerequisites: 57.533 and 57.534.

Studies in contemporary film and theatre, including the Australian theatre, are undertaken and students are required to write a thesis on a topic largely of their own choice.

Economic History

Undergraduate Study

Level I units

15.701 Economic History IA (Arts)—European Economy and Society to 1800
The economic development of medieval Europe, the interaction of population growth, migration, agriculture expansion, technology, industry and trade. Demographic crisis and the consequences of a declining population in the later Middle Ages. The expansion of Europe 1500-1700 with reference to the relative decline of the Mediterranean and Eastern Europe and the emergence of an Atlantic economy; discoveries, colonization and overseas trade; agrarian change and the emergence of mercantile capitalism.
Arts

15.711 Economic History IB (Arts)—European Industrialization in a Nationalistic Framework
Prerequisite: 15.701.

Agrarian change and industrial growth; the industrial revolution in Britain and Belgium; the paradox of French development; the unification and rise of Imperial Germany; the modernization of Tsarist Russia; Europe’s less developed economies and mass emigration; European imperialism and the origins of the First World War.

15.601 Economic History IA—The Making of Modern Economic Society
The forces that have determined the pattern and course of economic development in the twentieth century. The historical background to the contemporary economic world. A basic scheme is provided as the framework within which a variety of material is analysed, and such major economies as Japan, America and Britain are considered in some detail. The economic history of Australia and its present position in the world economy is treated as an important part of the framework, as is the relationship between successful development and the process of underdevelopment. Students are expected to use a variety of material as the basis of their understanding of present day economic society.

15.611 Economic History IIB—Australian Economic Development in the Twentieth Century
Prerequisite: 15.601.
The development of the Australian economy from the Long Boom and the deep depression at the end of the nineteenth century to the present day. Topics: a general overview of Australian economic development and its main features; economic fluctuations and their consequences, especially the Great Depression of the 1930s; the rise of Australian economic institutions; changes in the philosophy of development and the role of the State; the impact of war on the Australian economy; the growth of manufacturing and the creation of an industrial base; problems of the rural sector; and changes in the Australian standard of living. Throughout the course particular attention is given to Australia’s changing economic relations with other countries.

Upper Level units

In order to enrol in an Upper Level unit, a candidate must have passed any four Level I units, and completed any specific prerequisite unit or units listed.

15.622 American Economic and Social Development before the Civil War
Economic and social life in Colonial America: land, labour and capital. The impact of the American Revolution and an economic interpretation of the Constitution. The growth of regional differences in the US: analysis of the slave plantation economy in the South; the development of manufacturing enterprises in the North-East; and the influence of the migration West upon American growth. Other subjects include: the role of the State in stimulating economic development; innovations in transportation and in manufacturing production; and the response of the American worker to industrialization.

15.662 Economic and Social Change in the United States since the Civil War
Prerequisite: 15.622.

Agrarian protest movements; industrial concentration and combination; American business leaders in the late nineteenth century; the American standard of living prior to the First World War. Immigration and the development of unionism 1890-1950. Problems of twentieth century agriculture; the 1920’s; cause of, and responses to, the Great Depression. Demographic changes since 1880; the role of the Negro in American economic life; the concept of an American ‘working class’. Business interests and war; government intervention and the American ‘welfare state’.

15.692 Theories and Models in Economic History
Prerequisite: 15.711 or 15.611.

An introductory course designed to give students an outline of the main traditions of economic analysis and relationships between economic theory and economic history. Emphasis is placed on types of economic theory most suited to the study of economic change. Discussion of key macro-economic relationships is built on micro-economic foundations and concentrates upon production relations. Various approaches to the study of growth and development. Quantitative techniques for historians. Students are encouraged to relate economic theory and quantitative techniques to problems in economic history.

15.676 Australian Economic Development in the Nineteenth Century
Prerequisite: 15.011 or 15.711 or 15.611.
The basic features of the growth of the colonial economies up to Federation. Areas of special attention include: the consequences of the European conquest of the South Pacific and South-East Asia; the growth of trade, capital and labour markets, the impact of imperial policy; the effects of the Gold Rushes and the long boom; the causes and effects of major economic fluctuations; class structure; demographic change; and regional differences. Australia’s relationship with the international economy, and some longer-run consequences of growth in this period, are discussed.

15.678 Transformation of the Japanese Economy
Prerequisite: 15.011 or 15.692 and 15.601 or 15.711.

Growth and sectoral change in the Tokugawa economy; cities, handicrafts and population. The low-level equilibrium trap. Dynamics of the Meiji Restoration, government, trade, development. The interpretation of ‘relative backwardness’, 1880-1914. Classical models and capitalist development. The economic history of political change during the inter-war years. Capitalism and colonies. ‘Economic miracle’ and structural change; exports, the yen and the international economy.

15.643 British Imperialism in the Nineteenth and Twentieth Centuries
Prerequisite: 15.601 or 15.711.

Theories of imperialism; informal empire and the mid-nineteenth century imperialism of free trade; overseas investment, the Great Depression and the ‘Scramble for Africa’; the South Africa war; the British colonial system in the twentieth century.
in Africa, Malaysia and the Pacific: trusteeship, paternalism and economic development; the colonial crisis of the 1930's: did colonies pay? social aspects and acculturation; the colonial economies 1945 to 1980: the struggle for independence.

15.653 Aspects of British Economic and Social Change 1740-1850
British economy and society during the industrial revolution; population growth and socio-economic change; the agricultural revolution; labour and capital supply in industrialization; industrial growth and the factory system; war and the economy, 1756-1815; social change and social movements; urbanization; the treatment of poverty; the role of the state; the standard of living question.

15.655 British Imperialism in the Seventeenth and Eighteenth Centuries
Prerequisite: 15.601 or 15.701 or 51.511.
Seventeenth century ideas about trade and colonies, the mercantilist State and imperial expansion; chartered companies; imperialism in America, the Caribbean, West Africa and the East Indies; the Atlantic economy and the economics of the slave trade; racism and imperialism; the eighteenth century colonial system; India under Company rule; British imperialism and the Industrial Revolution.

15.663 Economic Change in Modern India 1750-1950
An explanation of the elements of stagnation and areas of change in the Indian economy from 1750 to the present day. Trends in population output, national income, international trade and other economic indicators are studied. The impact of land tenure systems, economic policies and social structure on the course of economic development in India.

15.665 Economic and Social History of Modern Germany
Prerequisites: 15.711 or 15.601 or 64.501 or 64.521 or 51.511.
The development of German economy and society: the agrarian economy of the eighteenth century and the east-west division of Germany; the impact of the French Revolution and Napoleonic Wars on the agrarian and industrial structures of Germany; economy and society during the period 1815-1848; modern industrialization after 1850, agrarian change, internal migration and the rise of the labour movement, 1873-1914; the Weimar economy and the Great Depression; Nazi policy and recovery; the war economy; and post-war developments in the East and West Germany economies.

15.673 The Chinese Economy 1700-1949
A sectoral analysis of the Chinese economy, including geography, population, agriculture, industry, trade (domestic and foreign), foreign investment, and the role of the state. Three main themes: the reasons why China did not experience an 'industrial revolution' prior to the arrival of already-industrialized nations; the net impact of imperialism on China; and the relationship between these themes and the political revolution that culminated in Liberation in 1949.

15.675 Economy of China since 1949
The evolution, structure and working of the Chinese economy since 1949. Developments in the area of economic planning, agrarian organization and in the industrial sector are considered in detail. Attention is also given to the role of ideology in Chinese economic life, and the significance of China in the world economy.

15.683 The Economic History of Russia since 1861
Prerequisite: 15.011 or 15.692.
Relative and absolute 'backwardness' in Russia in 1850s. Emancipation, agriculture and industry; the growth of social differentiation. Planning under the Tsars; Witte and his economic system. Industry in the 1890s. Capitalism, class formation and the intellectuals. The revolution of 1917. Pragmatism and ideology; the period of War Communism. The problem of capital; the New Economic Policy and the economic debates of the 1920s. Solutions; collectivization, industry and planning. Invasion, war and recovery. Imperialism and international economic policy in the post-war years. Planning and the New Economics. Convergence?

15.685 Introduction to Econometric History
Prerequisites: 15.611 or 15.711.
A survey of major topics in econometric history, including 'counterfactual' economic history, the slavery debates, technological change in Britain and America, railroads and British economic growth, development models in Japanese and Chinese history, and Australian-European models of migration. A critical examination is made of the assumptions of econometric historians. Students are introduced to elementary statistical techniques and have an opportunity to use the computer.

15.695 Quantitative Methods in Historical Analysis
The course introduces students to the statistical concepts and methods most frequently encountered in economic and social history. The aim is two-fold: (a) to illustrate the application of basic statistical techniques to historical problems, and (b) to aid critical analysis of the quantitative data encountered in history texts.

15.703 The Origins of Modern Economics
The development of classical economic thought from its scholastic origins to the writings of John Stuart Mill. Contributions to economic analysis, and policy of David Hume, Adam Smith, Quesnay, Ricardo, Matthew, Senior and Mill. Impact of classical economics on later developments in economic thinking as well as on the economic policy of some countries.

15.713 Economic Thought from Karl Marx to John Maynard Keynes
Prerequisite: 15.703 or 15.011 or 15.692.
Economic thought from Marx to Keynes. Emphasis is placed on the main personalities, the intellectual and social climate of the period, and the lasting impact of the work of Marx, Jevons, Walras, Menger, Wieser, Böhm Bawerk, Pareto, Marshall, Wicksell, Pigou and Keynes on the future development of the discipline.
15.753 Science, Society and Economic Development

The rise of modern science and its relationship to other cultural movements; the growth of applied science after 1700; science and technology in the Industrial Revolution; industrial research; analysis of models designed to link science and education with modern economic development. Students are expected to participate in detailed case studies.

Honours Level units

In order to enrol in an Honours Level unit, a candidate must have completed 1. at least two Advanced Level units at credit level or better in economic history, and 2. either 15.011 or 15.692.

A student who has passed 15.011 may only enrol in 15.692 with permission from the Head of the Department of Economic History.

15.704 and 15.714 Economic History IV A + IV B (Arts) (double unit)

1. Special Subject—British Economy and Society 1870-1940

12. Approaches to Economics and Social History
The perspectives, themes and tools involved in the study of modern economic and social history. Shows that the historian concentrates upon particular problems and methods of analysis which define the subject of history as a discipline in its own right. One function of the course is to provide a degree of unity to the varied knowledge gained by students in other economic history courses; another is to allow students to come to grips with important problems of a general nature.

3. Seminar In Research Methods

4. Thesis
Honours students in their final year are required to prepare a thesis of not more than 20,000 words which must be submitted before the final examinations in November. The thesis topic must be approved by the Head of the Department of Economic History before the end of the August recess in the year preceding the candidate’s entry into the 7th and 8th sessions of study.

†A candidate may be allowed by the Head of the Department of Economic History to substitute an Upper or Advanced Level Unit in place of this subject.
Economics

Undergraduate Study

Level I units

15.001 Economics IA
Microeconomic analysis as related to some aspects of the Australian economy, including the concept of market demand, the theory of costs and production, supply and demand analysis, the determination of exchange rates, the effects of taxes, tariffs, subsidies and quotas, price and output determination under competitive and other market structures, an introduction to distribution theory and the application of economic analysis to contemporary problems.

15.011 Economics IB
Prerequisite: 15.001.
Macroeconomic analysis as related to some aspects of the Australian economy, including national income and product, money and banking, consumption, investment, liquidity preference, the Keynesian model of income determination and economic growth.

15.411 Quantitative Methods A
Prerequisite: HSC 2 unit Mathematics. Co-requisite: 15.001.
Matrix Algebra: Matrices in economics, operations with matrices; matrix inverse; determinants and solutions of linear equations.
Calculus: Sets; functions and relations; the concept of a limit and continuity; the derivative of a function; tangents; maxima and minima; technique of integration; area and definite integral.
Applications of the above concepts and methods in accounting and economics is emphasized.

15.421 Quantitative Methods B
Prerequisite: 15.411. Co-requisite: 15.011.
Frequency distributions, measures of central tendency, dispersion and skewness, introduction to probability theory, the binomial distribution, the normal distribution, estimation of population parameters and confidence intervals, hypothesis tests, the t distribution.

Upper Level units

In order to enrol in an Upper Level unit, a candidate must have passed any four Level I Arts units, and completed any specific prerequisite unit or units listed.

15.062 Economics IID
Prerequisite: 15.011.
Unemployment and inflation; goals of macroeconomic policy; introduction to monetary, fiscal and incomes policies; money, credit and financial institutions; monetary policy in Australia; theory of fiscal policy; fiscal policy in Australia; and Commonwealth-State financial relations.

15.072 Economics IIE
Prerequisite: 15.011.
The application of microeconomic theory to consumption, production, market structures, welfare and international trade.

15.263 Economics IID
Prerequisite: 15.062 or 15.012.
Economics IID consists of any two of the following session units:

15.043 The Soviet Economy
Not offered in 1978.
How basic economic problems are solved in the contemporary Soviet economy within a socialist institutional framework. The emphasis is on analysis of the actual operation of the Soviet economy and an assessment of the extent to which and the efficiency with which it meets its own stated goals. For comparative, illustrative and analytical purposes reference is also made to other Soviet socialist countries, including Yugoslavia.

15.053 Economic Development
The gap between the welfare of the rich and the poor nations. Earlier theories of development as a basis for an appreciation of the various economic and non-economic theories of under-development, such as social and technological dualism, balanced and unbalanced growth, structural change and development. The general principles and techniques of development planning and their application in particular countries.

15.082 Labour Economics
The theory of the labour market and applications to the Australian situation, including labour supply and demand, with emphasis on structural changes in the labour force and the effects of technology and migration; work-leisure preferences and job satisfaction; unemployment and underemployment; wage theory and practice, with reference to market forces, collective bargaining and government regulation; the Australian arbitration system, and its interaction with other wage determinants; wage differentials.

15.092 The Political Economy of Contemporary Capitalism
The main features of modern capitalism and an appraisal of the applicability of orthodox economic theory to the explanation of these characteristics. A survey of the various critiques of modern capitalism, including institutionalist, Marxist and neo-Marxist analyses. Reference will be made to features of Australian capitalism and their origins and explanations.
15.123 Regional and Urban Economics
Not available 1978.

The theory of urban and regional economics and its policy implications. Topics: regional income and growth, location theory, urban land values and structure, urban growth, the economics of city size, urban transportation and fiscal problems.

15.163 Industrial Organization and Policy
An analysis of the structure of industry; inter-relationships between the role of the business firm and industrial structure; multi-national corporations; factors affecting size-structure and performance such as economies of scale; barriers to entry, vertical integration, diversification and mergers, patents, the development and transmission of technology; industrial policy in Australia with special reference to competition policy, foreign investment and mergers, and some specific industry policies (such as on motor vehicles, electronics, steel, petroleum).

15.203 Japanese Economic Policy
The postwar Japanese economy and economic policy, including an analysis of the postwar economy in historical perspective; Japanese long-term economic planning, and the nature of principal economic policies such as agricultural, industrial, monetary and fiscal.

15.273 Economics IIIE
Prerequisite: 15.072 plus HSC 2 unit mathematics or equivalent mathematical knowledge.

Consists of a core unit, 15.103 International Economics, and one of Public Finance, Economic Development or Japanese International Economic Relations.

15.103 International Economics
Basic theory and empirical evidence relating to international trade and investment tariffs and other impediments to trade, the balance of international payments, exchange rates and international monetary problems. Long-term and more recent developments in international trade and the effects of regional trading arrangements. Australian policies in the light of developments in the world economy.

15.083 Public Finance
General aspects of public sector expenditure and its financing with special reference to Australia, including the role of government in the economy; principles and types of public expenditure; tax sharing and revenue systems; economic and welfare aspects of different types of taxes and social service systems; inflation and tax indexation; loan finance and the public debt; fiscal policy, the Budget and the economy.

15.213 Japanese International Economic Relations
Japan's international trade, investment and balance of payments policies. Present and anticipated problems relating to external economic policies, including alternative strategies for international economic relations.

15.412 Quantitative Economic Techniques A
Prerequisite: 15.421 or 10.001.
The nature, purpose and construction of index numbers. Simple and multiple regression analysis with applications in economics. Breakdown of the classical assumptions and introduction to specification errors.

15.422 Quantitative Economic Techniques B
Prerequisite: 15.412.
Input-output analysis and linear programming, optimization methods, and dynamic economic models, with applications. Applied aspects of econometric methods using cross-section and time series data. Applications are in the areas of consumption, demand, investment and production. Introduction to simultaneous equations and simple macro-econometric models.

15.467 Measurement of Income Inequality
Prerequisite: 15.422.
Provides a systematic treatment of the conceptual framework as well as practical problems of measurement of income inequality and poverty. Emphasis on the use of Australian income data. Knowledge of mathematics and statistics beyond the second year university level is not required. Topics: well-known income distribution functions; the Lorenz curve and its properties; welfare implications of inequality measures; measurement of intensity of poverty; use of Lorenz curve analysis in problems of direct and indirect taxation and Government expenditure; international comparison of poverty and inequality.

Advanced Level units

In order to enrol in an Advanced Level unit, a candidate must have passed four Level I Arts units, including at least one at Credit Level or better, in addition to completing any specific prerequisites unit or units listed.

15.012 Economics IIA
Prerequisite: Credit in 15.011 or the consent of the Head of Department.
Microeconomic theory, including consumer theory, production theory, types of competition, market stability and international trade.

15.032 Economics IIB
Prerequisite: Credit in 15.012 or consent of the Head of Department.
General equilibrium theory and welfare economics.
15.052 Economics IIC  
Prerequisite: Credit in 15.011 or consent of the Head of Department.

Extensions to the Keynesian model of income determination to include the government and overseas sectors and a more detailed examination of both demand and supply functions; money and financial institutions; an introduction to dynamic economics.

15.013 Economics IIIA  
Prerequisite: Credit or better in 15.052 or consent of the Head of the Department.

Macroeconomic theory and policy, including an introduction to the theory of economic policy, the structure and dynamic characteristics of macro-models, recent developments in monetary theory and policy, theories of inflation and policy in a dynamic setting. The theory of economic growth.

15.033 Economics IIIB  
Prerequisite: Credit in 15.013 and 15.032 or consent of the Head of Department.

International trade and investment, tariffs and other restrictions, the balance of payments, external balance, the international monetary system.

15.173 Research Methods and Methodology  
Prerequisite: 15.013. For students planning to take Economics Honours.

The nature of scientific method, the scope of economics and its relation to other social sciences and ethics. Theory construction and validation in economics. Strengths and limitations of econometrics in the specification and validation of economic hypotheses. Computer programming for economic research. FORTRAN syntax and programming style with applications in economics. Bibliographic methods and literature overview.

Honours Level units

15.044 Economic Honours (Arts)  

15.054 Economic Honours (Arts)  
Prerequisites: 15.012, 15.032, 15.052, 15.013, 15.033, 15.173, all Credit.

These two units are a double unit, consisting of advanced topics in macroeconomics including monetary economics and international economics as well as advance topics in microeconomics including welfare economics and a thesis. Students enrolled in this double unit are required to attend regular seminars in Session 2 at which each student will present a seminar on the topic of his thesis.

Note: Students are expected to do a substantial amount of work on their thesis before the commencement of the academic year. They must have a topic approved by the Head of the School of Economics before the end of the August Recess in the year preceding their entry into Economics IV.

English

Undergraduate Study

English is not a compulsory subject within the Faculty of Arts; the courses are therefore planned for students who have both a genuine interest in the subject and some special ability in it, including an ability to write English without obvious error. The prerequisite is 2 unit or 3 unit English (grade 1, 2 or 3) in the Higher School Certificate Examination, or an equivalent acceptable to the University.

Students who wish to take an Honours degree in English are strongly advised to include in their program courses in a foreign language.

A major sequence in English is 50.511 English IA or 50.521 English IB; 50.512 English IIA; 50.513 English IIIA. Honours students, however, are required in their second and third years to follow the sequence 50.532 English IIC; 50.513 English IIIA and 50.523 English IIB. Pass students may, in addition, take 50.522 English IIB; and pass students not proceeding to IIIA may take 50.522 English IIB instead of IIIA.

It will be assumed that all students before beginning the course have read a standard history of English literature and are familiar with the main outlines of English history and with the terminology of traditional English grammar (as used, for example, J. R. Bernard, A Short Guide to Traditional Grammar, Sydney University Press, 1975); and the right is reserved to examine on those.

Each prescribed text must be read before the lectures on it are given. In each part of the English I lecture courses, the texts will be taken in roughly chronological order.

Level I units

English I

Students take either English IA, 50.51, or English IB, 50.521. The B course is strongly recommended to students whose reading at school has been mainly confined to modern literature.

50.511 English IA

The course consists of:
(i) an introduction to twentieth-century literature through the study of selected plays, novels and poems; 2 lectures and one tutorial a week;
(ii) language and earlier literature; 1 lecture a week.

50.521 English IB

The course consists of:
(i) the study of texts representing the principal kinds, and development, in English literature of (a) drama, (b) the novel, (c) poetry; 2 lectures and one tutorial a week;
(ii) language and earlier literature; 1 lecture a week.
Upper Level units

50.512 English IIA
Prerequisite: 50.511 English IA or 50.521 English IB.

The course deals with nineteenth-century literature in English, together with Shakespeare's "Histories".

Background Reading

Prose
Jane Austen, Dickens, Emily Bronte, Thoreau, Melville, George Eliot, James.

Poetry
Blake, Wordsworth, Coleridge, Byron, Keats, Whitman, Tennyson, Browning, Arnold.

Drama
Wilde, and selected plays by the major poets.

50.522 English IIB
Prerequisite: 50.511 English IA or 50.521 English IB.

The course consists of:
(i) a study of Language theory, and its relation to literary criticism;
(ii) a study of Middle English literature based principally on Chaucer; the miracle plays, and selected romances.

50.513 English IIIA
Prerequisite: 50.512 English IIA or 50.532 English IIC.

The course deals with the poetry of Milton and Dryden and eighteenth-century literature, together with Shakespeare's Tragedies.

The following authors are studied:
Milton; Dryden: Pope; Gay; Swift; Defoe, Richardson, Fielding, Smollett, Sterne, Goldsmith; Johnson and Boswell; together with selected plays by Vanbrugh, Farquhar, Goldsmith and Sheridan.

Advanced Level units

50.532 English IIC
Prerequisite: 50.511 English IA or 50.521 English IB, at Credit Level or better.

This course must be taken by students wishing to proceed to an Honours degree in English.

The course consists of:
(i) the work set down for 50.512 English IIA;
(ii) an introduction to Old and Middle English Language and Literature;
(iii) twentieth-century American Literature.

50.523 English IIIB
Prerequisite: 50.532 English IIC at Credit Level or better.
Co-requisite: 50.513 English IIIA.

This course must be taken by students wishing to proceed to an Honours degree in English.

The course consists of:
(i) a study of Elizabethan literature, covering the following: Lyly, Peele, Kyd, Marlowe, Greene; Shakespeare (early plays, Comedies and "Problem Plays"); the poetry of Wyatt, Sidney, Spenser, Shakespeare and Raleigh; and prose, with special reference to Gascoigne, Sidney, Lyly, Lodge, Nashe and Deloney.
(ii) Old and Middle English literature.

Honours Level units

Students take either 50.514 (IVA) or 50.524 (IVB).

50.514 English IVA
Prerequisites: Both 50.513 English IIIA and 50.523 English IIIB at Credit Level or better.

The course deals with:
(i) seventeenth-century English literature;
(ii) the materials and methods of literary scholarship.

(i) (a) Drama
Selected plays by Jonson, Chapman, Marston, Tourneur, Webster, Middleton, Beaumont and Fletcher; Shakespeare ("Romances" and Henry VIII); Massinger, Ford, Shirley; Dryden, O'way, Etherege, Wycherley, Congreve.

(b) Poetry
Jonson, Donne, Herbert, Vaughan, Crashaw, Traherne; Herrick and the Cavaliers; Milton; Marvell; Butler; Rochester.

(c) Prose
Selected prose by Bacon, Donne, Burton, Milton, Browne, Bunyan, Walton, Pepys and Evelyn; and selected works of prose-fiction.

50.524 English IVB
Prerequisites: Both 50.513 English IIIA and 50.523 English IIIB at Credit Level or better.

The course consists of:
(i) an advanced study of Old and Middle English literature;
(ii) an introduction to Linguistics.

Graduate Study

50.501G Linguistic History and Theory*
For graduates who have satisfactorily completed some coursework, at the undergraduate level, in the history of English and in phonetic and grammatical theory.

*Probably not available in 1978.
Part I History
A diachronic survey of the earlier forms of the language, based largely on texts drawn from Old, Middle and Early Modern English literature; the structure of English at each successive linguistic period; major developments in lexis, phonology, accidence and syntax; changing methods of linguistic analysis.

Part II Theory
A synchronic account of contemporary English: a structural analysis of the language on various levels, from the phonetic to the semantic; and main types of linguistic theory of the last few decades (a survey of linguistic theory from Ferdinand de Saussure to the Transformationalists in America and the Firth "School" in Britain).

50.502G Australian Literature—Nineteenth Century*
A study of fiction and poetry, centred on the following authors: Tucker, Kingsley, Clarke, Boldrewood, Furphy, Lawson, Harpur, Kendall, Gordon, Paterson, Brennan, O'Dowd.

50.503G Mediaeval English Literature*
A study of Mediaeval English Literature, especially verse and prose of the fourteenth century. The course will pay attention to the development of such literary forms as the lyric, the romance and the drama, to the conventions of dream literature and to the currents of thought exemplified by the fourteenth-century mystics.

Students' reading will be so directed as to emphasize the achievements of the major writers such as Chaucer and Langland.

50.504G Major Australian Writers of the Twentieth Century
A detailed study of some of the most important Australian writing of the first half of the twentieth century, centred on the works of Henry Handel Richardson, Martin Boyd, Christina Stead, Patrick White, Hal Porter, Kenneth Slessor, R. D. Fitzgerald, Judith Wright, Douglas Stewart, A. D. Hope and James McAuley.

50.505G English Fiction of the Later Nineteenth and Earlier Twentieth Centuries*
A study of the theory of the novel and chosen novels in the period 1875-1925.

The following novels are among those studied: Meredith, The Egoist; Hardy, Far From the Madding Crowd; James, The Awkward Age, What Maisie Knew, The Golden Bowl; Butler, Erewhon, The Way of All Flesh; Moore, Esther Waters, The Brook Keith, Heloise and Abelard; Conrad, Nostromo, Under Western Eyes.

50.506G English Literature of the Earlier Seventeenth Century
A study of Drama (tragedies by Jonson, Heywood, Chapman, Webster, Tourneur, Middleton, Beaumont and Fletcher, Ford); Poetry (Donne's "Divine Poems", Herbert, Vaughan, and Milton's Paradise Regained); and Prose [Donne [selected Sermons], Milton [selected tracts], Browne [Religio Medici], Bunyan [Grace Abounding]].

50.507G Shakespeare
A critical study of some twelve or fifteen plays, including many not often found in undergraduate pass courses (e.g. Titus Andronicus, early comedies, King John, All's Well, Troilus and Cressida, Timon of Athens, Coriolanus, Cymbeline, and Henry VIII) together with a brief survey of the state of Shakespeare scholarship today (Shakespeare's life and times; the canon; schools of criticism; and, particularly, the problems of establishing the text).

50.508G The Classical Background of English Literature
A study of chosen classical authors in translation, including Greek and Roman drama; Greek and Roman Poetry; ancient Greek and Roman drama, and ancient literature; and theories of rhetoric and prose style.

French

Undergraduate Study
Courses offered by the School are made up of studies in three areas: the French language; French literature and thought; French civilization and society.

Some study of each is included in all courses, so as to give students a balanced picture of the French contribution, both past and present, to world culture. The three areas are correlated as closely as possible in each year through the simultaneous study of the language, literature, intellectual and socio-political history of a given period. Most classes are of the seminar or tutorial type, and formal examinations are replaced wherever possible by continuous assessment. A system of electives makes it possible from second year onwards for students to choose the areas in which they wish to specialize.

The emphasis in the teaching of the language is on helping students to acquire a command of everyday modern French, and French is the language mainly used in all courses. An attempt is made to integrate the various linguistic skills of understanding, speaking, reading and writing through correlated programs involving the use of audio-visual aids, oral practice in tutorials and in the language laboratory, and later in discussion groups on issues of contemporary interest, as well as a wide variety of written exercises. Courses are also offered in stylistics and linguistics, both pure and applied.

*Probably not available in 1978.
In the sections of the syllabus devoted to literature, training is given from first year onwards in the techniques of literary analysis and criticism through the close study of individual texts. In later years, more general methodological questions are raised concerning the various ways in which literature may be approached.

Students' attention is drawn in all courses to the wealth of ideas to be found in French literature, and they are actively encouraged to express their opinions on the value of these ideas and their relevance to present-day problems. The French preoccupation with psychological analysis, moral, philosophical, sociological and political problems, the exploration of human relationships and fundamental questions related to the human condition receive special attention. At the same time, important literary works are studied in depth with a view to investigating purely aesthetic problems and the working of the creative imagination.

Note
The School offers two courses designed mainly for students from other Schools: 56.521 and 56.162. The Level I unit 56.511 is also open to students from any School in the Faculty, as well as from other faculties, in addition to 56.521.

Subject Details
The following is the key to the information about each subject published beside the title: F (Full year, ie both sessions); UVal (Unit Value); Hpw (Hours per week); S1 (Session 1); S2 (Session 2); T (Terminating subject).

Level I units

56.501 French IA—Introductory French
This unit is offered in 1978.

56.511 Contemporary French Language, Literature and Civilization, F UVAl2
Prerequisite: 3 unit French (grade 1, 2, 3 or 4) or 2 unit French (grade 1, 2 or 3) at the Higher School Certificate, or equivalent qualifications. (Equivalence to be determined by the School of French on application.)

1. Language
Sessions 1 and 2:
A series of integrated tutorials and language laboratory sessions designed to develop skills in understanding, speaking and writing everyday modern French, and to relate the study of the language to life in contemporary French society.

Note: (1) After a preliminary test which takes place in the first week of session, students are placed in tutorial groups and advised as to which grammar book they will be required to obtain.

(2) Students intending to continue French beyond the first year are advised to purchase Le Petit Robert, Société du Nouveau Littére.

2. Literature and Thought
Session 1: (1) Modern theatre as a tragi-comic expression of man's sense of alienation in a changing world.
Session 2: (2) A study of modern short stories dealing with individual freedom and social responsibility. (3) An introduction to the themes and techniques of modern French poetry through a study of selected poems.

3. Civilization and Society
Session 1: The cinema as an expression of modern French civilization. (A series of films raising various social and moral issues are screened, followed by seminars analysing their themes and artistic form. Discussion is in French.)

56.521 French Language F UVAl1 3Hpw T
Prerequisite: As for 56.511.

For students from the Faculty of Arts (other than those taking 56.511) or from other faculties who wish to develop skills in spoken and written French.

Integrated tutorials and language laboratory sessions devoted to practical language work, and also, through the texts studied and subjects discussed, introduces students to aspects of contemporary French civilization.

Note: This is a terminating subject.

Upper Level units

56.502 French IIA—Intermediate French F UVAl2
Prerequisite: 56.501 and the satisfactory completion of vacation assignment.

1. Language.
An intensive study of French language. (Session 1: 4 hours per week; Session 2: 3 hours per week).

2. Literature and Thought.
Session 1: French theatre and poetry from 1900. (2 hours per week).

Session 2: Modern French Fiction. (2 hours per week). Survey of French literature and thought from the 17th Century to the present time. (1 hour per week).

56.512 Enlightenment, Romanticism, Realism F UVAl2
Prerequisite: 56.511.

1. Core Language Course: Integrated grammatical, oral-aural and written work in contemporary French.

2. Electives.
Session 1. Any three of the following:
(1) Voltaire.
(2) Eighteenth Century narrative works: Montesquieu, Diderot.
(3) Social history of the 18th and 19th Centuries.
(4) Language elective.
Subject Descriptions

Session 2. Any three of the following:

(1) The treatment of social issues in the 19th Century novel: Balzac and Zola.
(2) Romanticism.
(3) Rousseau.
(4) Language elective.

56.162 Recent Political and Sociological Speculation by French Intellectuals S2 3Hpw
Prerequisite: Any four level one units and 2 unit French (grade 1, 2 or 3) at the Higher School Certificate (or equivalent qualifications).

For students proposing to major in other subjects who wish to study some important aspects of contemporary French thought. It does not form part of a major sequence in French, and cannot be taken instead of 56.512, although it may be taken in addition to it (or to other Upper Level units) provided the School gives its permission.

Lectures and discussions are in English, though the texts studied are in French. Assistance with reading the texts is provided in tutorial groups.

1. 'Idées actuelles.'
2. Literary views of feminist issues.

The course should be of particular interest to students of the School of Sociology, Political Science and Philosophy.

56.103 Modern France A S1 6Hpw
Prerequisite: 56.512 or 56.532; or with permission of the School 56.502 or 56.522.

1. Core Language Course.
   (1) The comparative stylistics of English and French.
   (2) French syntax.
   (3) Oral practice discussion groups on issues of contemporary interest.

2. Electives.
   Any three of the following:
   (1) Rimbaud.
   (2) Flaubert.
   (3) Language.
   (4) Political theatre.
   (5) One of the options offered in 56.153.

56.104 Modern France B S2 6Hpw
Prerequisite: 56.512 or 56.532; or with permission of the School 56.502 or 56.522.

1. Core Language Course.
   (1) The comparative stylistics of English and French.
   (2) French syntax.
   (3) Oral practice discussion groups on issues of contemporary interest.

2. Electives.
   Any three of the following:
   (1) Surrealism.
   (2) Literary views of feminist issues (not available for students taking 56.162).
   (3) Socio-political aspects of France since 1870.
   (4) One of the options offered in 56.154.
   (5) Language.

56.153 Renaissance France S1 6Hpw
3 Hpw for students taking 56.103
Prerequisite: 56.512 or 56.532; or with permission of the School 56.502 or 56.522.

1. Language.
   The core language component of 56.103 (if this course is not being taken concurrently).

2. Electives.
   Any two of the following:
   (1) Montaigne, Rabelais.
   (2) Marot, Ronsard.
   (3) Renaissance Civilisation. Rabelais.

56.154 Classical France S2 6Hpw
3 Hpw for students taking 56.104
Prerequisite: 56.512 or 56.532; or with permission of the School 56.502 or 56.522.

1. Language.
   The core language component of 56.104 (if this course is not being taken concurrently).

2. Electives.
   Any two of the following:
   (1) Tragedy: Corneille, Racine.
   (2) Comedy: Corneille, Molére.
   (3) Novel: Lafayette, Scarron, Cyrano de Bergerac.

Advanced Level units

56.522 French IIA (Advanced) F 7Hpw
Prerequisite: A credit level pass or better in 56.501.

The course consists of 56.502 with an additional seminar on Molère, Voltaire and Nerval. (1 hour per week)

56.532 Enlightenment, Romanticism, Realism (Advanced) F 8Hpw
Prerequisite: A Credit Level Pass or better (or, at the discretion of the School, a good Pass) in 56.511.
As for 56.512 with an additional seminar on eighteenth century theatre and nineteenth century poetry.

Session 1: Beaumarchais and Marivaux.

Session 2: Nerval.

56.163 Modern France A (Advanced) S1 7½ Hpw
Prerequisite: A Credit Level Pass or better (or, at the discretion of the School, a good Pass) in 56.532 or 56.522; or, in exceptional circumstances, 56.512 or 56.502 with special permission of the School.

The course consists of 56.103 with an additional seminar on Apollinaire.

56.164 Modern France B (Advanced) S2 7½ Hpw
Prerequisite: 56.163.

The course consists of 56.104 with an additional seminar on the poetry of Verlaine.

56.173 Renaissance France (Advanced) S1 7½ Hpw
4½ Hpw for students taking 56.183
Prerequisite: A Credit Level Pass or better (or, at the discretion of the School, a good Pass) in 56.532 or 56.522; or, in exceptional circumstances, 56.512 or 56.502 with special permission of the School.

The course consists of 56.153 with an additional seminar on linguistic theory and its relevance to an understanding of the French language.

56.174 Classical France (Advanced) S2 7½ Hpw
4½ Hpw for students taking 56.184
Prerequisite: 56.173.

The course consists of 56.154, with an additional seminar on modern linguistic theory.

Honours Level unit

56.505 French Honours F 8Hpw
Prerequisite: A Credit Level Pass or better in 56.163, 56.164, 56.173 and 56.174 if French is being taken alone at the Honours Level, or in any two of 56.163, 56.164, 56.173 and 56.174 if French is being taken at the Honours Level with another subject.

The course consists of the following seminars:
1. Advanced work in language (both sessions).
2. 18th Century controversies (one session).
3. The creative writings of J.-J. Rousseau (one session).
5. Study of selected masterpieces (both sessions).

In addition, a short thesis must be submitted. The thesis is to be written in French on an approved subject.

Geography

Undergraduate Study

Geography is the study of variations from place to place on the earth's surface arising from the spatial relationships of the phenomena which make up man's world. Particular emphasis in human geography is placed on the spatial organization of human activities, especially within urban systems.

Students achieving graded passes may elect to study Honours Geography at the end of second year with the approval of the Head of School. Attention is drawn to the detailed notes and specification of sequences below.

Notes
1. Students taking one or more Upper or Advanced Level units from Groups B or C as part of an Approved sequence in Geography must attend a field camp of up to five days' duration. Satisfactory completion of all requirements associated with the work camp is necessary before credit is given for all such subjects taken in the same session as the field work camp. Normally two field camps are offered — one for Group B units and one for Group C units, details of which are available at the beginning of the academic year. The choice of the field camp to be attended is subject to the approval of the Head of School in the light of the student's enrolment.

2. Normally an Advanced Level unit consists of the Upper Level unit of the same name with additional work.

With permission of the Head of School, it is possible to convert an Upper Level unit already completed to an Advanced Level unit by undertaking additional work.

3. Students not taking Honours but with a Graded Pass in 27.812 or 27.811 may be admitted to Advanced Level units with the approval of the Head of School.

4. The listed requirements for entry to Year 4 are the minimum required by the School. Attention is drawn to Rule 13 of the Rules Governing the Award of the Degree of Bachelor of Arts. If a student is likely to invoke this rule, it is advisable to substitute an additional Advanced Level unit for one Upper Level unit. See also Note 2 above.

Approved Sequences

Pass Major: Two Level I units plus at least four Upper Level units.

Special Honours in Geography only*. Two level I units plus three Upper Level units plus three Advanced Level units (normally including 27.880) plus two Honours Level units including 27.890.

Special Honours in Geography and another School*. Two Level I units plus two Upper Level units plus at least two Advanced Level units plus one Honours Level unit from Geography, to be selected from 27.891, 27.892 or 27.893, and such additional work as shall be required by the Head of the School.

*See Note 4.
Level I units

27.801 Introduction to Physical Geography
Prerequisite: None.

The mechanism of the physical environment, with particular reference to Australia and to the Sydney region. Geologic controls of landform development; fluvial, slope and coastal processes and their landforms; cyclic and equilibrium approaches to landform studies. Global energy and atmospheric circulation; weather and climate in Australia and the Sydney region. The hydrologic cycle; processes and factors of soil formation and soil profile development. The ecosystem; controls of vegetation in the Sydney region.

Laboratory classes: the study and use of topographic maps, geological maps, and air photographs; the use of climatic data and the weather map; soil description; basic cartographic methods. Two field tutorials, equivalent to 16 tutorial hours, are a compulsory part of the course. Students must provide basic drawing equipment.

27.802 Introduction to Human Geography
Prerequisite: None.

Focus is on the relationships between man and the environment, their spatial consequences and the resulting regional structures that have emerged on the earth's surface. Basic concepts and methods for studying the spatial organization of human activities are discussed, particularly as they relate to patterns of location and distribution, to the flows, movements and linkages between places and activities, and to the processes operating that give rise to variations from place to place, particularly between urban and rural areas. Australian and South-East Asian examples are used where relevant.

Laboratory classes: Presentation and description of geographical data, analysis of spatial patterns, together with appropriate statistical exercises. A compulsory field excursion equivalent to eight tutorial hours.

Upper Level units

Group A

27.811 Physical Geography
Prerequisite: 27.813.

Laboratory classes: climatic analysis and mapping, and analysis of natural landscapes, including airphoto interpretation, together with appropriate statistical exercises.

27.812 Human Geography
Prerequisite: 27.813.

Emphasis is on the urbanization process in underdeveloped and industrialized societies. Theories, concepts and principles relating to the location, size and spacing of settlements, the economic and social structure of urban areas, and city-region relationships. Geographical perspectives on contemporary urban problems: particularly those associated with the concentration of people and activities between regions and within cities. Spatial variations in housing, employment and service provision are emphasized.

Laboratory classes: Case studies, methods of analysis and practical applications in the local region. A compulsory field excursion equivalent to 16 tutorial hours.

27.813 Geographic Methods
Prerequisites: 27.801 and 27.802*.

An introductory course in statistical procedures as used in both human and physical geography, including: measures of dispersion; measures of spatial distribution; time series; probability distributions; samples and estimates; hypothesis testing; correlation and regression; tests for distribution in space.

Group B*

27.820 Location Studies
Prerequisite: 27.812 and 27.813 or 15.072.

Transport costs and location: the spatial distribution of resources and markets and the effects on the location of the firm. Patterns of industrial and residential location. Agglomeration economics and the effect on location patterns. Location patterns in underdeveloped countries. Location policies and problems in capitalist and centrally-planned economies.

27.821 Marketing Geography
Prerequisite: 27.812 and 27.813 or 15.072.

The relationship between consumer spatial behaviour and the pattern of location of marketing establishments. Organization and operation of the marketing function with emphasis upon the pattern of consumer oriented enterprises and the structure of market areas in intra-urban areas. Spatial behaviour of consumers including search and decision processes. Workshop seminars on term project, analytical techniques and issues raised in lectures.

27.822 Transportation Geography
Prerequisite: 27.812 and 27.813 or 15.072.

The analysis of the transportation system in terms of its relationships with economic and geographic indicators. Focus on network analysis, flows studies, modal systems, circulation theory, impact studies, transport and economic development, and the urban transportation problem.

*In special cases, the Head of School may give permission for 27.801 to be taken as a co-requisite for this course.
†See Notes 1. and 2.
†Offered for the last time in 1976.
Laboratory classes involve practical application of pertinent methodology, and seminars stress the consideration of major problem areas in transportation in Australia.

27.823 Urban Geography
Prerequisite: 27.812 and 27.813.

The geography of cities in the context of economic and cultural systems, social and political processes, and historical perspectives. Topics: foundations of urban geography; the city in underdeveloped countries and planned economies; the city as an ecosystem; problems of urban size; growth centres and urban planning; interurban and intrasurban movement and linkages; urban residential preferences and spatial differentiation; urban environmental quality and the perceived urban environment. Weekly seminars, and laboratory and fieldwork of a practical nature to include urban survey techniques.

27.840 Agricultural Geography
Prerequisite: 27.812 and 27.813 or 15.603 or 53.204 or 51.542.

Physical, economic, political, and other cultural factors involved in origin and change of agricultural landscapes. Spatial patterns of agriculture as the result of individual and group decisions. Innovation diffusion as the process of farming change. Problems of agricultural modernization in South East Asia. Planning in rural areas, especially the impact on agriculture of competing land uses. Examples mainly drawn from Australasia.

Workshop/seminar classes include treatment of methods of inquiry into agricultural geographical problems and discussion of selected topics.

27.841 Population Geography
Prerequisite: 27.812 and 27.813 or 53.204.

Population growth and contrasts in growth patterns between underdeveloped, modernizing and developed countries. Growth dynamics and their relation to physical and human resources.

The demographic transition as a unifying theme. Population densities in urban and rural areas: case studies are drawn mainly from Western Europe, Southeast Asia and Australia. Social and economic factors in international and internal migration. Spatial interaction between the populations of rural areas and cities, and between cities. Fertility and mortality variations within and between regions, countries and cities. Urbanization of population. Stable and stationary population theory. World population problems. Workshop tutorials are concerned with session projects.

27.842 Social Geography
Prerequisite: 27.812 and 27.813 or 53.204.

The relationship of spatial and social structures in rural and urban contexts. Emphasis on social processes producing spatial patterns with themes such as 'community', 'neighbourhood', urbanization, social deprivation, inequality, segregation of minorities, and the results of social area studies. Cultural influences in the rate and form of urbanization. Rurality and urbanism as 'ways of life'. Relation of overseas experience to Australian society.

Workshop sessions include treatment of census data handling, questionnaire construction, interviewing, and participant observation and other unobtrusive techniques, plus discussion of selected topics.

27.824 Spatial Population Analysis
Prerequisites: 27.812 and 27.813.

Population growth and structure in an urban and regional context. The components and processes of population change: fertility, mortality and migration set within the framework of demographic transition theory. Theories of migration and mobility and of optimal populations. Demographic and social indicators for urban and regional analysis and their implications for disparities in living conditions, residential differentiation and regional growth. The adjustment of immigrant and migrant populations to the urban environment.

27.825 Urban Activity Systems
Prerequisites: 27.812 and 27.813.

Interaction in time and space within cities and between regions. Relationships between transportation, mobility and the environment structure of groups and individuals. Problems of accessibility to a wide range of activities, including services and employment. Patterns of flow, transaction and linkage between economic activities. Topics include: the journey-to-work, shopping and travel behaviour, contact networks, and the optimal location of facilities.

27.826 Urban and Regional Development
Prerequisites: 27.812 and 27.813.

Processes of change in the distribution of settlement and economic activity at the regional and metropolitan scales, with special attention to urban and regional development in Australia. Topics include: regional balance and polarization, industrial concentration and linkages; dispersal and relocation of manufacturing and services; growth centres and regional multipliers; changes in the inner city and the urban fringe. Problems of resource allocation and equity, and regional policies and strategies for urban and regional development. Approaches to urban and regional analysis and definition of regional indicators.

27.827 Environment and Behaviour
Prerequisites: 27.812 and 27.813.

The recent developments in environmental geography, particularly those relating to spatial perception. Topics include: the development of human landscapes, learning and diffusion processes, the perception, evaluation and response to environmental hazards and variations in environmental quality, mental maps, the nature of externalities, conflict, and decision-making in the context of equity and spatial justice. Concepts, principles and methods are stressed and examples are drawn from rural and urban settings.

27.828 Australian Environment and Land Resources
Prerequisite: 27.812 and 27.813.

Regional patterns of natural land and water resources of Australia. Climatic, geomorphic, soil and biotic factors affecting past, present and potential modes of land use and stability of primary production. Conditions of the physical

†Offered for the first time in 1978.
‡Offered for the last time in 1978, subject to availability of staff.
§Offered for the first time in 1979, subject to availability of staff.
environment which favour or impede productive utilization and further development of land, marine, freshwater and energy resources under a changing technology. Problems of avoiding degradation of land quality and natural ecosystems. Case studies from distinctive environmental settings in Australia. Laboratory/workshop sessions include the study of maps and air photographs of typical environments: local environmental problems are investigated in the field.

Group C†

27.860 Landform Studies
Prerequisite: 27.811 and 27.813.
The study of landforms, with particular reference to Australian examples. Geomorphic regions. Planation surfaces and processes and associated weathering features. The evolutionary and dynamic approaches to landforms, with particular reference to fluvial landforms. Coastal processes and forms. Desert landforms. Landforms as evidence of climatic change.

27.862 Australian Environment and Land Resources
Prerequisite: 27.811 and 27.813.
For subject description, see 27.862 in Group B.

27.863 Soils, the Ecosystem and Man
Prerequisite: 27.811 and 27.813.
Soils as an expression of endogenic and external factors and of physical and biological controls, and as a bridge between the physical environment and man’s use of the land. Materials and properties of soils. Soils in the ecosystem; interrelationships between soil and climatic, biotic and geomorphic features of the environment. Constraints imposed by soil properties on land use, in both rural and urban settings. Man’s effect on the soil, and its consequences, eg soil pollution, disturbance of soil-moisture and nutrient cycles, soil depletion and erosion.

These themes will be co-ordinated in the study of regional examples in Australia and South-East Asia. There are laboratory workshops, field excursions and group projects.

Advanced Level units

Group A

27.880 Advanced Geographic Methods
Prerequisites: Graded passes in 27.813, and in 27.811 or 27.812.
Additional quantitative research techniques normally taken by intending Honours students in their third year. Research organization; computing including Fortran; collection and organization of data; statistical description; hypothesis testing and sampling; simple and multiple association analysis; non-parametric methods.

Group B†

27.830 Location Studies (Advanced)¶
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.820 Location Studies, with additional and more advanced work.

27.831 Marketing Geography (Advanced)¶
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.821 Marketing Geography with additional work on periodic markets, experimental design and scaling techniques.

27.832 Transportation Geography (Advanced)¶
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.822 Transportation Geography with additional and more advanced work.

27.833 Urban Geography (Advanced)¶
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.823 Urban Geography with additional and more advanced work.

27.834 Spatial Population Analysis (Advanced)§
Prerequisites: Graded passes in 27.812 and 27.813.
Additional and more advanced work relating to the content of 27.824.

27.835 Urban Activity Systems (Advanced)§
Prerequisites: Graded passes in 27.812 and 27.813.
Additional and more advanced work relating to the content of 27.825.

27.836 Urban and Regional Development (Advanced)§
Prerequisites: Graded passes in 27.812 and 27.813.
Additional and more advanced work relating to the content of 27.826.

27.837 Environment and Behaviour (Advanced)§
Prerequisites: Graded passes in 27.812 and 27.813.
Additional and more advanced work relating to the content of 27.827.

†See Notes 1. and 2.
‡See Notes 1. 2. and 3.
§Offered for the last time in 1978.
¶Offered for the first time in 1979, subject to availability of staff.
27.850 Agricultural Geography (Advanced)‡
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.840 Agricultural Geography with additional lecture/ tutorial, especially relating to agricultural change in Australia.

27.851 Population Geography (Advanced)‡
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.841 Population Geography with additional and more advanced work on techniques of spatial population analysis.

27.852 Social Geography (Advanced)††
Prerequisites: Graded passes in 27.812 and 27.813.
As for 27.842 Social Geography with additional and more advanced work.

27.872 Australian Environment and Land Resources (Advanced)$
Prerequisites: Graded passes in 27.812 and 27.813.
Additional and more advanced work relating to the content of 27.862.

Group C†

27.870 Landform Studies (Advanced)
Prerequisites: Graded passes in 27.811 and 27.813.
As for 27.860 Landform Studies, with additional and more advanced work, including selected studies of geomorphic processes and of man’s influence on those processes.

27.872 Australian Environment and Land Resources (Advanced)
Prerequisites: Graded passes in 27.811 and 27.813.
As for 27.862 Australian Environment and Land Resources plus further study based on additional seminars and reading. Additional topics include 1. environmental bases for reserving land and water resources for forestry, water supply, wildlife protection, and recreation, and 2. conflicting demands in regional resource development.

27.873 Soils, the Ecosystem and Man (Advanced)
Prerequisites: Graded passes in 27.811 and 27.813.
As for 27.863 Soils, the Ecosystem and Man, with additional and more advanced work.

Honours Level units

27.890 Thesis and Associated Seminars
Prerequisites: Graded passes in 3 Advanced Level units in Geography. Co-requisite: 27.891 or 27.892 or 27.893.

Honours students in their final year are required to prepare a thesis of not more than 20,000 words and to attend a series of seminars on their thesis and supporting topics. The thesis topic must be approved by the Head of the School during the second half of the year preceding entry into the final year, while the thesis must be submitted before the examination period in November of the final year. It is expected that research work for the thesis is undertaken during the summer vacation preceding the final year.

27.891 Honours Economic Geography‡
Prerequisites: Graded passes in 3 Advanced Level units in Geography. Co-requisite: 27.890.
Approaches to the study of the space economy with emphasis on spatial problems of economic growth and development. Problems raised are viewed from a planning perspective.

27.892 Honours Human Geography‡
Prerequisites: Graded passes in 3 Advanced Level units in Geography. Co-requisite: 27.890.
Changing view of the man-land theme within human geography in the twentieth century. The decline and resurrection of humanistic perspectives. The impact of quantification and theory-building. The above themes are developed through consideration of such substantive areas as population-resource relationships; urbanism; environmental perception, social problems and social change.

27.893 Honours Physical Geography
Prerequisites: Graded passes in 3 Advanced Level units in Geography. Co-requisite: 27.890.
Advanced studies in a branch of physical geography appropriate to the area of research chosen for the thesis.

27.894 Honours Urban Geography†
Prerequisites: Graded passes in 3 Advanced Level subjects in Geography. Co-requisite: 27.890.
Approaches to the study of the urban environment and the changing nature of urban geography. The impact of quantification and problems of theory building are stressed. Concern is with the individual in increasingly complex urban and regional environments. Problems and issues discussed are viewed from a policy perspective.

27.895 Honours Social Geography†
Prerequisites: Graded passes in 3 Advanced Level subjects in Geography. Co-requisite: 27.890.
Changing views of social geography in the twentieth century. The decline and resurrection of humanistic perspectives in geography. The impact of quantification and problems of theory building are stressed. The above themes are developed through consideration of such substantive areas as population-resource relationships; urbanism; social problems and social change; urban and rural relationships.

†Offered for the last time in 1978.
††Offered for the last time in 1978, subject to availability of staff.
§Offered for the last time in 1978, subject to availability of staff.
See Notes 1, 2, and 3.
§§Offered for the first time in 1979.
Applied Geology

Undergraduate Study

25.011 Geology I

Physical Geology
The origins, structure and main surface features of the earth; geological cycle—processes of erosion, transportation, sedimentation and lithification. Surface and sub-surface water. Weathering, lakes, rivers, glacial phenomena. Vulcanism, earthquakes, orogenesis and epeirogenesis, integrated theory of plate tectonics and continental drift.

Crystallography and Mineralogy

Petrology
Field occurrence, lithological characteristics and structural relationships of igneous, sedimentary and metamorphic rocks. Introduction to coal, oil and ore deposits.

Stratigraphy and Palaeontology
Basic principles of stratigraphy; introductory palaeontology. The geological time scale. The geological history of the Australian continent and more specifically that of New South Wales in introductory outline.

Practical Work
Preparation and interpretation of geological maps and sections. Map reading and use of simple geological instruments. Study of simple crystal forms and symmetry. Applied stereoscopic projection. Identification and description of common minerals and rocks in hand specimen. Recognition and description of examples of important fossil groups. Supplemented by three field tutorials, attendance at which is compulsory.

25.151 Geoscience IA

For students who do not intend studying geology beyond first year, and who do not possess the prerequisites for Geoscience IA.

Physical Geology

Crystallography and Mineralogy

Petrology
Field occurrence, lithological characteristics and structural relationships of igneous, sedimentary and metamorphic rocks. Coal, oil and ore deposits.

Stratigraphy and Palaeontology
Basic principles of stratigraphy; introductory palaeontology. The geological time scale. The geological history of the Australian continent and more specifically that of New South Wales in introductory outline.

Practical Work
Preparation and interpretation of geological maps and sections. Map reading and use of simple geological instruments. Study of simple crystal forms and symmetry. Identification and description of common minerals and rocks in hand specimen. Recognition and description of examples of important fossil groups. Supplemented by two half day and two full day field tutorials, attendance at all of which is compulsory.

25.161 Geoscience IB

For students who do not intend studying geology beyond first year, and who do not possess the prerequisites for Geoscience 1A.

Physical Geology
The origins, structure and main surface features of the earth. Processes of erosion, transportation, sedimentation and lithification. Surface and sub-surface water. Weathering, glacial phenomena, geomorphology under different climatic regimes. Vulcanism, earthquakes, mountain building. Outlines of plate tectonic theory.

Crystallography and Mineralogy

Petrology
Field occurrence, lithological characteristics and structural relationships of igneous, sedimentary and metamorphic rocks. Introduction to economic mineral deposits.

Stratigraphy and Palaeontology
Basic principles of stratigraphy and palaeontology. The geological time scale. The geological history of the Australian continent and of New South Wales in introductory outline.

Practical Work
Interpretation of geological maps and sections. Map reading and use of simple geological instruments. Study of simple crystal forms. Identification and description of common minerals and rocks. Recognition and description of examples of important fossil groups. Supplemented by two half day and two full day field tutorials, attendance at all of which is compulsory.

25.012 Geology IIA

Structural Geology
Origin, classification and description of structures in sedimentary, igneous, and metamorphic rocks. Stereographic projection of structural elements, and analysis of simple fracture and fold systems. Tectonics.
Arts

Mineralogy, Igneous and Metamorphic Petrology

Practical Work
Mesoscopic and microscopic examination of rock forming and ore minerals, igneous and metamorphic rocks.

Photogeology
The use of air photos for geological mapping and geomorphic evaluation of land. Techniques and principles of photo interpretation, multiband photography; landform genesis and photo interpretation of folds, faults, joints, bedding, limestone, intrusive igneous rocks, volcanics, alluvial fans and terraces, slopes, landslides, coastal and tropical landforms; relations between geology, drainage, soil and vegetation; orebody expression, gossans, colouration halos.

25.022 Geology IIB
Stratigraphy and Palaeontology

Stratigraphy
Flow regime and bedding forms including flume experiments, sedimentary structures. Modern and ancient environments of deposition: fluvial, deltaic coastal, shelf, slope and deep sea environments. The facies concept. Stratigraphic principles. Fold Belts, geosynclines and their interpretation by plate tectonics models. Stratigraphic and structural development of a fold belt (Lachlan Fold Belt) and an intracratonic basin (Sydney Basin).

Palaeontology
Morphology and stratigraphic distribution of the Protozoa. Porifera, Coelenterata, Bryozoa, Brachiopoda and Mollusca. Practical examination of representative fossils from each phyla.

All units offered by the School of German (with the exception of 64.501 German IA, 64.504 German Honours, 64.630 Germany since 1945, and 64.640 The Persecution and Destruction of German Jewry 1933-1945, which are double units) are twenty-eight week units.

Possible sequences in the School of German (M = major sequence).

Level I units

64.501 German IA—Introductory German
This subject of 6 hours per week is intended to provide students who have no previous knowledge of the language with a sound basis of spoken and written German and to introduce them to German literature and culture. Students wishing to proceed to German IIA must successfully complete a study program during the long vacation prior to enrolment.

64.511 German IB
Prerequisite: HSC 2 Unit or 3 Unit German (Grades 1, 2 or 3) or 2 Unit A (Grades 1 or 2) or equivalent qualifications. Co-requisite: 64.521.

Three hours per week practical language work

64.521 German IC
Prerequisite: as for 64.511. Co-requisite: 64.511.

Three hours per week: a survey of German literature and history of the period 1770 to 1830, and a detailed study of selected literary texts.
Upper Level units

64.502 German IIA
Prerequisite: 64.501. Co-requisite: (for Arts students only) 64.522.
Three hours per week practical language work. Students wishing to proceed to 64.503 German IIA must successfully complete a study program during the long vacation prior to enrolment.

64.512 German IIA (Advanced)
As for 64.502 German IIA, but with an additional hour per week advanced language work.

64.522 German IIB
Prerequisite: 64.501. Co-requisite: 64.502.
Three hours per week: a survey of German literature and history of the period 1770 to 1830, and a detailed study of selected literary texts.

64.532 German IIC
Prerequisite: 64.511.
Two hours per week practical language work plus one hour per week to be chosen from the list of options in language, literature and history offered by the School each year.
Note: Native German speakers who have passed 64.511 German IB and 64.521 German IC may not enrol in 64.532 German IIC or 64.503 German IIA.

64.542 German IID
Prerequisite: 64.511 and 64.521. Co-requisite: (except for native German speakers) 64.532.
Three hours per week selected from the list of options in language, literature and history offered each year by the School.

Options for 1978
1. German Literature and History 1830-1918 (2 hours per week: compulsory for students majoring in German).
2. Seminars in Language, Literature and History (2 hours per week).

First seven weeks
(1) Der Faust-Stoff vom Volksbuch bis Goethe
(2) Literatur und Politik im Werk Georg Büchners
(3) Der deutsche Vormärz
(4) Contrastive German-English Grammar

Second seven weeks
(5) Holderlin's Poetry and his Novel Hyperion
(6) Annette von Droste-Hulshoff's Die Judenbuche — an Introduction to Critical Method
(7) The Early Writings of Karl Marx
(8) Das deutsche Lustspiel

Third seven weeks
(9) Selected Prose Works of E. T. A. Hoffmann
(10) Gottfried Keller and the Problems of Realism
(11) An Introduction to 19th Century German Philosophy
(12) Geschichte der DDR

Fourth seven weeks
(13) Fontane and the 'Novel of Society'
(14) Großstadtlyrik vom Naturalismus bis zur Gegenwart
(15) The Later Novels of Hermann Hesse
(16) German Lexicology

C. German Language and Literature 1150-1550 (1 hour per week)

D. Advanced German for Native Speakers (1 hour per week)

64.552 German IIB (Advanced)
As for 64.542 German IIB, but with an additional hour per week selected from the list of options.

64.562 German IIE
Prerequisite: 64.511 and 64.521. Co-requisite: 64.542.
Two additional hours per week selected from the options listed under 64.542 German IID.

64.572 German IIE (Advanced)
As for 64.562, but with an additional hour per week selected from the list of options.

64.503 German IIIA
Prerequisite: 64.502 or 64.532.
Two hours per week practical language work plus one hour per week to be chosen from the list of options in language, literature and history offered by the School.

64.513 German IIIB
Prerequisite: 64.502 or 64.532. Co-requisite: (except for native German speakers) 64.503.
Three hours per week selected from the list of options under 64.542 German IID.

64.523 German IIIB (Advanced)
As for 64.513 German IIIB, but with an additional hour per week selected from the list of options.

64.533 German IVIC
Prerequisite: 64.502 or 64.532. Co-requisite: 64.513.
Two additional hours per week selected from the options listed under 64.542 German IID.
64.610 German Literature and Society
Prerequisite: Approval to enrol in this unit should be obtained from the School of German.

Upper Level unit. One two-hour seminar-discussion weekly. For students with no knowledge of German who wish to study some of the most significant works of German literature. The texts to be studied have been chosen with a view to their social and political relevance, and this aspect will be stressed in seminar discussions.

64.620 German Reading Course
Prerequisite: Approval to enrol in this unit should be obtained from the School of German.

Upper Level unit. Two hours per week for students in the humanities, presuming no previous knowledge of German. The basic aim of the course is to enable potential honours and research students in the humanities to read and translate source material in their field of specialization. To this end an intensive exposition of the linguistic structures of German is given, plus practical training in translation into English from a range of relevant publications.

64.630 Germany since 1945
Approval to enrol in this subject should be obtained from the School of German.

Not offered in 1978.

Upper Level double unit. Two lectures per week and one tutorial. The subject is taught in English and requires no knowledge of German. It may, with the approval of the School of History, be counted towards a major sequence in History.

The main topics: the war aims of the Allies and the breakdown of German Fascism (1941-45); the period of occupation, the Cold War, the Berlin crisis, and the division of Germany (1945-49); the founding and development of the Federal Republic of Germany and the German Democratic Republic (1949-1976)—a comparative analysis of their political, sociocultural and economic systems.

64.640 The Persecution and Destruction of European Jewry 1933-1945
Approval to enrol in this subject should be obtained from the School of German.

Upper Level double unit. Two lectures per week and one tutorial. The subject is taught in English and requires no knowledge of German. It may, with the approval of the School of History, be counted towards a major sequence in History.

A description and analysis of the fate of European Jewry under Fascist rule. The history of Antisemitism, the individual phases and aims of the persecution of the Jews under the Nazis in Germany and in German occupied countries. An analysis of the causes, development, function and consequences of the policy of genocide. A consideration of the reactions of the Jewish minority and the attitude of society in general.

*Except in special circumstances, students enrolled in this subject may not also enrol in 54.262, The Government and Politics of Germany and Italy.
64.650 An Introduction to the Historical Study of the Germanic Languages
Prerequisite: Two units of English or a foreign language.
Approval to enrol in this unit should be obtained from the School of German.

Upper Level unit. One two-hour tutorial per week. The subject is taught in English and requires no previous knowledge of German.

Aims to give an introduction to the philology of the Germanic languages, based on: 1. the history of the subject in the 19th Century (Bopp, Rask, Grimm, Verner, etc); 2. the methods employed in comparative and historical linguistics; 3. a detailed study of texts in relevant languages.

64.680 The Paris Commune of 1871
Prerequisite: 56.511 or 51.511 or 51.593 or 54.901 or 53.104.
Upper Level unit. One two-hour seminar per week.
Consists of two parts: 1. Historical analysis of the Paris Revolution of March-May 1871; emphasis on communal constitution and its governmental and administrative functioning as an example of a revolutionary democracy (council system). 2. Discussion of various socio-political interpretations and explanatory models; emphasis on the theory of the state and the transitional stage of post-revolutionary society; special consideration is given to 'Marxist' interpretations (Marx/Engels, Bakunin, Lenin, Kautsky).

Graduate Study*

64.500G 64.501G 64.502G
Master of Arts (Pass)
The two units, 64.501G and 64.502G, may be taken either concurrently (in one year) or consecutively (in two successive years). In each unit candidates are required to attend two 21-hour seminar courses on literature or linguistics and a staff-student seminar on critical method, and to undertake such practical language work as the School considers necessary. In addition, a short thesis 64.500G of approximately 20,000 words on a literary or linguistic topic must be submitted.

History

Undergraduate Study

The School of History offers a variety of Level I, Upper Level and Advanced Level units, giving students a wide choice of options at all levels. All subjects are concerned with aspects of modern history, and are, in the main, related to periods and themes in Asian, Australian, British, European and American History. Attention is paid to general theories and problems of historical explanation as well as to the techniques of writing history, and to the variety of approaches to specific historical problems relevant to the particular courses.

Pass students in each of the three undergraduate years are required to attend two lectures and one tutorial each week, while intending Honours students attend additional seminars in their second and third years and devote a fourth, additional year to special honours work, which includes the writing of a thesis. Most of the students' working time, however, will be spent in the University library, reading the books prescribed for the course, preparing papers to be read at tutorials and seminars, and writing the required essays.

The basic division within the units offered by the School of History is between those offered at Level I, and those available at Upper Level. The prerequisite for admission to an Upper Level unit is a Pass in a Level I double unit in the School of History, or its equivalent. At Level I, certain basic skills are taught in relation to the writing and referencing of papers and essays, which are then taken for granted in Upper Level courses. At the same time, in Level I units students are introduced to approaches, techniques and requirements and are expected to build on these foundations a more mature and refined handling of their subject, and to develop their own techniques for coping with the widening variety and increasing volume of source materials to which they will be introduced; they are also encouraged to extend their own initiatives in relation to the historical enquiries in which they are engaged. A much greater proficiency in all these respects is required of intending honours students, and especially of those who wish to further their studies by becoming graduate students working towards the MA or PhD degree.

The minimum number of units for a major in the School of History is six. Pass students in the School of History may take no more than one Level I double unit, no more than four double units altogether, and no more than two Upper Level units in the School of History simultaneously.

51.510 History IA—Tradition and Transformation in Asia
The structure and values of three pre-modern Asian societies (the Middle East, India and Vietnam) and their modern revolutionary or non-revolutionary transformations, together with certain historiographical theories concerning the nature of traditional societies and change. Topics include: tribal and peasant societies; classical philosophies; popular religion; social organization (especially the family and the position of women); cultural encounter; the impact of the west.

51.511 History IB—The Emergence of Modern Europe, 1500—c. 1850
Some of the main formative influences in European history from the 16th to the mid-19th century. Three themes:

*See Graduate Study earlier in this Handbook.
51.521 History IC—Australia In the Nineteenth Century

The colonial period of Australian history from the arrival of the first fleet to the federation of the six colonies. Social, cultural and political developments. Major historiographical themes and problems.

Session 1: Towards Self-Government.
Topics include: the British background; the convicts; the Macquarie era; the pastoral expansion; the emergence of Australian literature; immigration; gold; responsible government.

Session 2: Towards Nationhood.
Topics include: life in the cities/country; urbanization; technological advance; aborigines; the education debate; colonial culture; colonial liberalism; racism; the federal movement; the end of colonialism.

Upper Level units

51.533 History IIA—Modern South Asia

Prerequisites: 51.510 or 51.511 or 51.521 or equivalent qualifications as determined by the School of History.

The social and political developments that have occurred in the Indian sub-continent since its initial encounter with the Modern West in the mid-18th Century.

Session 1: (a) The organization of traditional Indian society in the 18th century; the breakdown of that society under the impact of the West in the form of the European trading companies and its subsequent conquest by the British. (b) The social and political innovations of the British Raj and the response thereto of the different elements in Indian society—in terms of both socio-economic and ideological adoption. (c) The beginnings of a new nationalist basis for the political integration of the region over the period 1885-1917.

Session 2: (a) The independence struggle against the Raj; decolonization and partition of the subcontinent into two nation-states India and Pakistan and the social developments influencing and accompanying these events 1918-1948. (b) Independent South Asia in the contemporary world: Congress India—its political system and the stresses imposed thereupon by socio-economic developments since 1949, its foreign relations; Pakistan as an Islamic state: its unstable political system, oscillating between democracy and authoritarianism; its failure to contain Bengali separatism; its foreign relations. (c) The subcontinent: Perspectives, 1976: The problems facing the incumbent regimes in India, Bangladesh and Pakistan; alternative political forces in the region.

51.542 History IIB—Australia in the Twentieth Century

Prerequisites: 51.510 or 51.511 or 51.521 or equivalent qualifications as determined by the School of History.

Major themes in Australian social and political history since 1900.

Session 1: The years 1900-1939.

Session 2: The period from 1939 to the present.

51.562 History IID—Southeast Asian History

Prerequisites: 51.510 or 51.511 or 51.521 or equivalent qualifications as determined by the School of History.

Session 1: Southeast Asian Societies, and the European Impact.
The major features of the societies of Southeast Asia up to the early 20th century. Their historical development, religions, and political and economic structures, and the changes occurring with the advent of the Europeans. Emphasis on developments in the 19th century.

Session 2: Nationalism, Revolution and Independence.
The social changes, and the development and nature of nationalist movements in Southeast Asian societies during and after colonial rule in the 20th century. Includes Indonesia, Malaysia, Thailand and Cambodia.

51.572 History IIE—A History of the United States

Prerequisites: 51.510 or 51.511 or 51.521 or equivalent qualifications as determined by the School of History.
The modern historical development of the United States. Although some consideration will be given to the history of the country during the colonial period, the main emphasis of the course is upon political, social and economic developments since 1776; how, why, when and with what results thirteen English Colonies were consolidated into the single, powerful, industrial nation of today. Part 1: 1760-1877; Part 2: 1877-1974.

51.592 History IIG—Britain since 1780

Prerequisites: 51.510 or 51.511 or 51.521 or equivalent qualifications as determined by the School of History.

Certain major themes in the political, social, and economic history of Britain since 1760. The industrial and demographic revolutions, the growth of democracy and the evolution of the Westminster system of Government, the emergence and development of class consciousness and political radicalism, the growth of institutions of social control, social welfare and local government, changes in patterns of religion, morality, recreation, and family life, Anglo-Irish relations, and changes since the mid-eighteenth century in the role and significance of Britain in international affairs.

51.593 History III—Modern Europe

Prerequisites: 51.510 or 51.511 or 51.521 or equivalent qualifications as determined by the School.

Society, Politics and Ideology in 20th Century.

Four main sections: 1. The European states at the turn of the century: The challenge to the established order. 2. The breakdown of the International and domestic order, World War I and its aftermath. 3. The Totalitarian challenge in the 1930's and World War II. 4. Europe after World War II: West vs East?

Advanced Level units

Students should note that Upper Level units listed are incorporated within Advanced Level units and separate enrolment is not required.
51.602 Muslim India (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.532, plus
A series of seminars on the Political, Social and Economic History of the Muslims of South Asia, with special reference to the nineteenth and twentieth centuries. Investigates the pre-colonial structure of the Muslim community, and its responses to colonialism and modernization during British rule and later.

51.603 Indian History (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.532, plus
Two equal parts: 1. India, and 2. Pakistan and Bangladesh. A series of seminars which examine the roots of social and political conflict in South Asia over the period 1947-1974, and the manner in which this conflict was reflected in politics in the region.

51.620 Change and Continuity in France 1789-1871
Prerequisites: 51.510(Cr) or 51.111(Cr) or 51.521(Cr).
51.593 plus a series of seminars which deal with the revolutionary tradition in France between 1789 and the Paris Commune. Besides examining the history of French revolutions themselves, it analyses the social and political changes they brought about, and the elements of continuity in French social and political life which survived them.

51.630 The Australian People in Three Wars (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.542, plus
The varying responses of the Australian people to the challenge of war. The changing nature of Australian society. Responses at home to the First and Second World Wars and to the Vietnam war; the story of the troops in the field is touched on only incidentally, as it affects the situation in Australia. Themes include conscription, women at war, the role of the press and the treatment of dissidents.

51.633 The American Revolution and the Federal Constitution 1784-1789 (Advanced)
Prerequisites: 51.510(Cr), 51.511(Cr) or 51.521(Cr).
51.572, plus
A series of seminars on the American Revolution and its aftermath from 1764 to 1798. Topics include English and colonial society on the eve of Independence, the importance of economic, political, religious and intellectual factors in bringing about the Revolution; the role of the crowd, Loyalism, the impact of slavery on the founding of the U.S., and the response of Indian societies to the revolutionary and post-revolutionary society.

51.634 Immigration and Ethnicity in United States History 1880-1930 (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.572, plus

51.640 Literature and Society in Twentieth Century Australia (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.542, plus
Theories of cultural growth in Australia and arguments about the role of literature in a new society. The nature and reception of popular culture in Australia. Prior grounding in Australian literature or literary criticism is not required.

51.642 South East Asian History (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.652, plus
Revolution and Counter-Revolution in Indonesia. A study of the forces for and against the political, social and economic transformation of Indonesian society in the 20th century.

51.682 Social History and the British Industrial Revolution (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.592, plus
A series of seminars introducing students to the discipline of social history through the study of a cluster of problems related to the origins and character of industrialization in Britain. Historiographically, the course explores the ways in which social history, as a sub-discipline, has made a specific contribution to the study of the Industrial Revolution. An integrated program of topics which seeks to relate change and continuity in various aspects of British society. Demographic, political, religious, recreational etc—to patterns of economic growth and development in the period c 1760-1840.

51.692 Weimar—and Nazi Germany (Advanced)
Prerequisites: 51.510(Cr) or 51.511(Cr) or 51.521(Cr).
51.593, plus
A series of Seminars on Germany between the wars. The introductory part deals with the collapse of Kaiser Germany at the end of World War I. The greatly polarized political life of Weimar Germany is analyzed in part two. The collapse of Weimar Germany and Hitler’s rise to power, Hitler’s domestic policies.

Honours Level units

51.703 History Honours
Prerequisites: three Advanced Level units (Cr).
A Honours students in their final year are required to prepare a thesis of not more than 20,000 words, which must be submitted before the Final Examinations in November.
B Students are required to take Historiography (History IVA) and one of such optional courses as notified by the School of History, in December 1977.
Graduate Study

51.500G Thesis

51.501G Perceptions of the Past
The changing interpretations of a significant historical figure (Gandhi), an institution (slavery in the U.S.) and a period of history (Australia in the 1890s) provides the context for the discussion of the problems of writing and evaluating history.

51.504G The Nature of Crisis Situations in Modern European History
A series of seminars on major social upheavals in Europe over the last century. Discussion of revolutions from the political left and coups from the right. Topics include the Paris Commune of 1870/1, the Russian and German Socialists' Revolutions 1917/8, Hitler's Beer Hall Putsch and the Spanish Civil War.

51.505G Historical Origins of the Modern Middle East
Historical phenomena which have helped to shape the modern Middle East: Topics include: the rise of Islam; the Classical Age of Islam; religious, social and sex divisions within Muslim society; the Diaspora and Zionism; European colonialism in the Middle East; Arab nationalism; Pan-Arabism; oil politics; the creation of Israel; Arab-Israeli conflict.

51.506G Conflict and Consensus in Modern Australia from 1890
A study of consensus and division in Australian society since about 1890. Includes topics such as nationalism, class conflict, laborism, liberalization, communism, anti-communism, religion and sectarianism. Discussion centres on the place of group conflicts and institutional and ideological consensus in the shaping of modern Australia.

51.507G Millenarian Movements
Cosmic Change and Revolutionary Legitimacy: Protest Politics amongst pre-Modern Tribesmen and Peasants. Millenarian Movements in Cultures with a Linear Concept of Time; Millenarian Movements in Cultures with a Cyclical Concept of Time: The Millenarian-Modern Dichotomy: an heuristic device or a reflection of a fundamental discontinuity in the evolution of societies?

51.508G Industrialization and Culture
With special, but not exclusive, reference to the English experience, the relationships between industrialization and culture are explored: the ways in which such things as rapid and sustained economic growth, urbanization, technological progress, work differentiation and specialization, and factory production, influence those more or less integrated systems of knowledge, beliefs and assumption, norms, values, and the symbols and institutions arising therefrom, through which individuals and social groups interpret reality and make sense of existence.

Involves the historical investigation of links between 1. industrialization and the breakdown of traditional patterns of community, 2. the cultural concomitants of sustained economic growth, 3. industrialization and political culture, 4. industrialization and recreational culture, 5. industrialization and cultural pluralism and mass culture in a modern industrial society.

History and Philosophy of Science

Undergraduate Study

The division in educational curricula between science and the humanities obscures the fact that throughout history the natural sciences have been an integral component of general intellectual and cultural development. Until the nineteenth century, for example, the term 'philosophy' included science. It is no accident that science has flourished in times and places of dynamic cultural life.

The HPS units in the Faculty of Arts have two broad aims: 1. to acquaint students generally with the relationship between science and cultural development and 2. to place science and technology in their social context. Since science and technology are among the most powerful agents of social change the world has seen, an examination of their sociological, political, economic and environmental impacts in the modern industrial and post-industrial societies is an important new development in the School's activities.

Two pairs of wide-ranging units are offered in first year, one concerned with the history of cosmology and the other with the seventeenth-century scientific and intellectual revolutions. Both pairs serve, in a different way, as a general introduction to HPS. While it is anticipated that as a rule both units of one or other pair will be taken, students may, if they wish, combine one unit of one pair with one unit of the other pair, or simply include a single unit in their program. Students taking both units of a pair may, with special permission of the Head of School, have the Session 1 unit assessed with the Session 2 unit at the end of the academic year.

A variety of Upper Level units are offered. A number of units are of general interest and serve to complement courses offered by other Schools, such as Philosophy, Sociology and History. Other units are designed for students interested primarily in learning something of the history and social relations of the sciences and the principles of the philosophy and methodology of science. The only prerequisite for the more general units is the completion of four approved units. Other units have additional prerequisites as specified.
Besides the pass courses the School offers sequences leading to the Special Honours degree in the subject and participates in the provision of courses leading to Combined Honours degrees. Because of its many-sided character, HPS can be combined with most subjects in the Faculty of Arts in programs for the Combined Honours degree.

Employment opportunities for graduates in HPS are to be found in teaching, science reporting, curatorial work in museums, and in positions in industry and the public service concerned with science policy and the administration of science and technology.

**Level I units**

62.201 The Modern History of Western Cosmology
The evolution of ideas about the structure and history of the universe at large, from the seventeenth century to the present. The genesis of contemporary theories including the speculations of investigators such as Wright, Kant and Herschel on the origin and structure of the Milky Way island universe; Newton’s system of the world; the mysterious planetary objects of Kepler; Galileo’s crusade for the Copernican world system; the confrontation between theology and cosmology, faith and reason.

62.202 The History of Ancient and Renaissance Cosmology
The development of man’s knowledge and understanding of the cosmos from the Babylonian genesis to the Copernican revolution. The emergence of ideas on earth- and sun-centred systems of the world from speculations in mythology, astrology and astronomy about the motions of the planets; Presocratic and Pythagorean concepts; Plato and the 'problem of the planets'; the metaphysics and cosmology of Aristotle; Ptolemaic astronomy; Oriental and Arabian cosmology and the synthesis of Aristotelian cosmology and Christian doctrine; the Copernican revolution and its influence on the development of Western thought.

62.211 The Seventeenth Century Intellectual Revolution
The intellectual revolution, centred upon science of the seventeenth and early eighteenth centuries which led on to the Enlightenment. The Medieval and Renaissance background. Bacon and Baconianism; empiricism; experimentation and the virtues; the idea of progress. The mechanization of the world picture: Descartes and Cartesianism; rationalism; the revival of atomism; materialism. The Copernican Revolution. Locke. Hobbes.

62.212 The Cultural Impact of the Seventeenth Scientific Revolution
Newton and Newtonianism; the 'New Philosophy'; the implications of the new dynamics and astronomy; the mathematicalization of science. Science and religion: the decline of superstition and the growth of scepticism; the physico-theologists; deism and the argument from design. General topics: philosophy and methodology of science; the problem of certainty; literature, language and science; the battle of the ancients and moderns; the advent of the Age of Reason.

**Upper Level units**

62.203 The Freudian Revolution
Prerequisite: 62.243 or 62.273 or 62.263 or 62.503 or 62.513 or by permission of Head of School.

After a brief survey of nineteenth-century conceptions of psychology and psychiatry, the subject traces the founding and development of psychoanalysis by Sigmund Freud and his associates. The reception of psychoanalytic theory by both the scientific community and the general public is considered, with particular attention to: the status of psychoanalysis as a science and its relation to other sciences; the development of alternative depth psychologies; and the application of psychoanalytic concepts in fields such as anthropology, history, literary criticism, and social and political theory.

62.213 Marxism and Science
Prerequisite: 62.253 or 62.503 or 62.513 or one Upper Level HPS unit together with one of the following: 52.193 or 52.373 or 52.383 or 54.302; or by permission of Head of School.

Weekly seminars and directed readings on Marxism and science. Topics: Marxist interpretations of scientific knowledge and its development; the claims of Marxism to be a science, the critique of non-Marxist philosophies of science and the nature and function of ideology in relation to scientific knowledge.

62.223 The Discovery of Time
Prerequisite: Completion of four Arts or other units approved by the School of History and Philosophy of Science.

The evolution of ideas concerning the age and history of the earth, devoting particular attention to the period from the seventeenth century to the present. Consideration is given to such questions as changing attitudes towards the authority of the scriptures, social theories, the concept of Nature, the rise of the Romantic Movement and the important growth of historical consciousness that occurred during the eighteenth and nineteenth centuries, the intention being to provide an understanding of the intellectual setting within which geological theories and ideas about time developed.

62.242 Introduction to the History of Ideas
Prerequisite: Any four Level I Arts units.

The discipline of the history of ideas. The development of the study of the History of Ideas from the founding of the History of Ideas Club at Johns Hopkins in 1923. The relation of the History of Ideas to other disciplines such as History, Philosophy, History and Philosophy of Science, and Literature. An examination of the various kinds and roles of ideas in history. Ideas as characterizing periods and movements, Ideas as general metaphors and conceptual models. A detailed study of some examples selected from: Deism, Great Chain of Being, Materialism, Nature, Progress, Reason, Utilitarianism, Social Darwinism, Romanticism.
62.243  The Darwinian Revolution
Prerequisite: Completion of four Arts or other approved units.

A study of the scientific, philosophical and social antecedents and consequences of Darwin's theory of evolution. The prevailing ideas in biology before Darwin are studied in the context of the general climate of ideas to show why the revolution that the theory effected in biology resulted in changes in such diverse fields of thought as religion, literature, political theory, ethics and the social and behavioural sciences.

62.253  The Social History of Science from the French Revolution to the Second World War
Prerequisite: Completion of four Arts or other approved units.

The development of the scientific movement, in its social and cultural context, from the French Revolution to the 1930s. The course includes consideration of the different national contexts of the scientific movement; its relations with the State, with the universities and other teaching institutions, and with the professions of medicine and engineering; the communications system in science and the nature and functions of scientific societies; the effects of science on technology and of technology on science; the institutionalization and professionalization of science.

62.283  The History of Theories of Generation and Heredity
Prerequisite: Completion of four Arts or other approved units, including two units of HPS or two units of an approved science.

The development of theories relating to generation and heredity, with special reference to the interplay of scientific, social and ideological factors. The subject is largely concerned with the period from 1830 to 1930. Topics: the cell theory; sexual and asexual reproduction; embryology; the theory of spontaneous generation and its overthrow; Mendel and his predecessors; the rise of classical genetics and the background to the Synthetic Theory of evolution; molecular biology and DNA.

62.293  Science and the Strategy of War and Peace
Aims to give historical perspective to the impact of science and technology on the art of war from Leonardo da Vinci to contemporary problems of nuclear disarmament and the arms race. The main emphasis is upon the intellectual challenges, social consequences and moral dilemmas posed by twentieth century developments in the mechanization of warfare, communications, surveillance and physical, chemical, nuclear and biological weaponry; the early history of the atomic scientists and the nuclear age; Einstein and Russell and the anti-war movement; the role of the military industrial complex; the dynamics of the arms race and its limitation; the technological elaboration of armaments in the 1960s; the opportunity cost of military expenditure.

62.503  The Philosophy of Science
Prerequisite: Completion of four Arts or other approved units, including two units of HPS or two units of Philosophy, or one unit of HPS plus one unit of Philosophy, or two units of an approved science.

A general introduction to some of the more fundamental problems of the philosophy of science, emphasizing the nature, composition, and structure of scientific theories, and of the relations between theoretical statements and observational data.

The logic of theory construction; the logical structure of theories; the status of scientific laws; the roles of regulative principles, correspondence rules, and methodological directives; the function of model's and analogies; the nature of scientific explanation; the status of theoretical entities; the principles of theory establishment and rejection; the axiology and apologetics of science; the dynamics of scientific change, including the structure of scientific revolutions.

Examples selected from the history of the sciences illustrating the philosophical issues examined. Elementary mathematical logic.
62.513 History of the Philosophy and Methodology of Science

Prerequisites: Completion of four Arts or other approved units, including two units of HPS or two units of Philosophy, or one unit of HPS plus one unit of Philosophy.

The development of ideas concerning the nature and methods of the sciences from antiquity to the present day: Platonism and Aristotelianism; Descartes, Leibniz and Continental rationalism; Bacon, Locke, Berkeley, Hume and British empiricism; Kant and Kantians; Herschel, Whewell, Mill and the revival of inductivism; Comte, Mach and nineteenth-century positivism; Peirce, James and pragmatism; Poincaré and conventionalism; Duhem and instrumentalism; Meyerson and realism; Einstein and the relativists; Eddington's selective subjectivism; Bridgman and operationalism; the Vienna Circle and logical positivism; Carnap and positivist reductionism; Popper and falsificationism. Hesse and modelism; Feyerabend and methodological anarchism.

Advanced Level units

62.523 Advanced HPS A

Prerequisite: Completion of twelve Arts or other approved units, including at least two HPS units at Credit Level or better, unless otherwise determined by the Head of School.

Two approved Upper Level units together with additional work in the philosophy and/or methodology of science as determined by the Head of School.

62.533 Advanced HPS B

Prerequisite: Completion of at least two Level I units in mathematics or an approved science. Co-requisite: Advanced HPS A.

Two approved Upper Level units together with additional work in history and philosophy of science as determined by the Head of School.

Honours Level units

62.604 HPS (Honours)

In addition to general Faculties requirements, the prerequisite for admission as a candidate for Combined Special Honours is the completion of 62.523 Advanced HPS A at Credit Level or better, and for Special Honours completion of 62.523 Advanced HPS A and 62.533 Advanced HPS B at Credit Level or better.

The Honours course comprises a number of two-hour seminars of one session duration, arranged into two groups as follows:

1. General Subjects
   (1) Historiography of Science.
   (2) Honours Philosophy of Science.

2. Special Subjects
   To be determined.

Special Honours candidates take two general subjects, together with either two of the special subjects or (with the approval of the Head of the School) an Upper Level unit not previously completed, and, in addition, complete a bibliographical exercise and present a thesis. Combined Special Honours candidates take two subjects, including at least one of the general subjects, as determined by the Head of School, and, in addition, complete a bibliographical exercise and present a thesis.

The program of students taking 62.604 as the whole or part of an MA Qualifying Course is determined by the Head of School. In all cases the program, in addition to other components, includes at least two fourth year subjects and either a thesis or a substantial research paper or papers.

Industrial Relations

Undergraduate Study

15.511 Industrial Relations IIA

Level I units

A multi-disciplinary introduction to a range of important concepts and issues in industrial relations. The political, social, economic, legal, historical and psychological aspects of the evolution and operation of modern employer/employee relations. Material is drawn from both Australian and overseas experience. Topics covered include the nature and implications of: strikes, lockouts and other forms of industrial conflict and alienation; the structure and policies of State and Federal trade unions, the State labor councils and such peak organizations as the Australian Council of Trade Unions and the Australian Council of Salaried Professional Associations; the employer industrial relations function and the structure and policies of employer associations; processes of work rule determination, such as collective bargaining, mediation, conciliation and compulsory arbitration; labour movements; and the role of the various arbitration tribunals and government instrumentalities with respect to industrial relations.

Upper Level units

15.525 Industrial Relations IIB

The development and operation of industrial relations systems overseas, with special attention to their relevance and applicability to the Australian context. Topics covered include: the
role of trade unions, employer bodies and government labour policies; the nature of industrial conflict and procedures utilised for its resolution; and evaluation of alternative systems of labour-management relations at the plant, industry and national level.

Specific countries studied include the United States, England, France, Germany, India, Singapore and Japan.

15.528 Industrial Relations IIA (Honours)
For students in the Industrial Relations Honours program; includes the content of 15.525, with an additional two hour seminar each week providing a more advanced treatment of industrial relations issues in particular countries.

15.526 Industrial Relations IIB
The structure, policies and operation of institutions important to the Australian industrial relations systems. Topics: the origins and operation of the Australian Conciliation and Arbitration Commission and other industrial relations tribunals operating at the national level; the origins and operation of the State industrial tribunals, including the New South Wales Industrial Commission, and the Victorian and Tasmanian wages boards; the origins, evolution and structure of Australian trade unionism; trade union non-industrial activities (green bans, economic enterprises, etc.); amalgamation and other forms of institutional rationalization; union and management industrial relations training/education; the employer industrial relations and personnel function, and the origin and operation of employer associations; the industrial relations role of non-industrial bodies such as Women's Electoral Lobby Secret Ballot Society, etc; the functions of government instrumentalities and the impact of government policies; the role of governments as employers and public sector unionism; and the role in Australia of international bodies such as the International Labor Office, the Organization for Economic Cooperation and Development, and the International Confederation of Free Trade Unions.

15.529 Industrial Relations IIIB (Honours)
For students in the Industrial Relations Honours program. Includes the content of 15.526, with an additional two hour seminar each week providing a more advanced treatment of the structure and policies of institutions important to the Australian industrial relations system.

15.534 Industrial Relations IIIA
Methods and procedures in industrial relations conflict resolution. A number of techniques are examined from Australian and overseas experience, including collective bargaining, productivity bargaining, conciliation, mediation and compulsory, voluntary and final offer arbitration. Each of these procedures is examined with respect to their: form and character; acceptability to employers, unions, government policy and public interest; effectiveness in conflict resolution and attitude change; legal, cultural, economic, social and political implications; and relevance to grievance issues in contrast to the determination of work rules in an agreement/agreement context.

This subject aims to draw on a range of simulation exercise material, case studies from Australia and overseas, and films of conflict resolution procedures in operation.

15.538 Industrial Relations IIIA (Honours)
For students in the Industrial Relations Honours program. Includes the content of 15.534, with an additional two hour seminar each week providing a more advanced treatment of theory and procedures in arbitration, bargaining, conciliation and mediation.

15.535 Industrial Relations IIIB
Contemporary issues in Industrial Relations. Aims to integrate material covered in earlier courses with contemporary developments in Australian industrial relations. Draws on material generated from recent industrial relations research to examine a limited number of topics in depth. Small seminar groups are constituted; each with a set list of topics to be treated. These could cover such areas as: union amalgamation; incomes policy; manpower policy; productivity bargaining; worker participation; flexi-time and the shorter hours movement; developments in industrial relations legislation; multinationals and industrial relations; penal sanctions; labour market discrimination; or trade union training and education.

15.539 Industrial Relations IIIB (Honours)
For students in the Industrial Relations Honours program. Principles, procedures, techniques and data sources used for research in the field of industrial relations.

15.580 Industrial Relations IV (Honours)
For students in the Industrial Relations Honours program. A thesis and six seminars: 1. Comparative Industrial Relations Developed Countries; 2. Industrial Relations Case Studies A and 3. Industrial Relations Project Seminar A, offered in first session; and in second session 4. Comparative Industrial Relations—Less Developed Countries, 5. Industrial Relations Case Studies B and 6. Industrial Relations Project Seminar B.

1. Comparative Industrial Relations: Developed Countries
A comparative analysis of industrial relations issues in a number of overseas countries in advanced stages of industrialization. The origins, evolution, structure, operation, problems and philosophy of industrial relations in the United Kingdom, the Soviet Union, and countries in North America and Western Europe.

2. Industrial Relations Case Studies A
A series of case studies to highlight a range of industrial relations issues at the plant or local level. Students also prepare their own case study for seminar presentation.

3. Industrial Relations Project Seminar A
An individual program of study for an in-depth examination of an established body of industrial relations literature. Subject to the availability of appropriate supervision, topics can be drawn from the mainstream of industrial relations literature or from the component disciplines including labour economics, industrial psychology, industrial law, industrial sociology and labour history.

4. Comparative Industrial Relations: Less Developed Countries
A comparative analysis of industrial relations issues in a number of countries at early and intermediate stages of economic development; the development of industrial labour
forces; the evolution and functioning of institutions important to industrial relations; the role of government in labour markets; and the emergence of alternate patterns of labour-management relations.

5. Industrial Relations Case Studies B
A series of case studies to highlight a range of industrial relations issues at the industry and national level. Students also prepare their own case study for seminar presentation.

6. Industrial Relations Project Seminar B
An individual program of study for an in-depth examination of an established body of industrial relations literature. Subject to the availability of appropriate supervision, topics can be drawn from the mainstream of industrial relations literature or from the component disciplines including labour economics, industrial psychology, industrial law, industrial sociology and labour history.

7. Thesis

15.555 Labour Market Economics
The economics of the labour market. The theory of labour market operations and evaluates this in the light of a range of research evidence from Australia and overseas. Topics: the supply of labour, including work-leisure trade-offs, hours of work, occupational choice and participation rates; demand for labour by the firm and industry with evaluation of the marginal productivity doctrine; unemployment, the identification problem, Phillips Curve and manpower policy issues; underemployment in developed and less developed countries; labour mobility and migration; theory and structure of wages including the economic philosophy, history, and machinry of Australian wage determination, wage differentials, minimum wages and earnings drift; wages and incomes policies; and the economic theory and impact of trade unions including influence on GNP shares, relative wages, hours of work, employment and resource allocation.

15.556 Manpower Policy
May be offered in alternate years.

The origins, evolution and operation of Australian manpower policy, compared and contrasted with policies overseas. A range of issues in the development and deployment of human resources, including: human capital theory and its application; training, retraining and work assistance schemes; mobility programs, covering industrial, geographical and vocational labour mobility; occupational choice theory and practice; the nature and manpower implications of various forms of unemployment, including structural, frictional, seasonal and disguised or hidden unemployment; manpower projections and manpower planning, at the enterprise and national level; and labour market discrimination.

15.557 Wages and Incomes Policy
May be offered in alternate years.

The relationships between movements in wage and salary incomes to desired economic objectives. The formulation and administration of wages and incomes policies, and the role of trade unions, employers and government institutions. Overseas experience is examined to derive implications for Australian practices, institutions and policies. Topics: the evolution of wage concepts and standards; wage structure, relativities and differentials; trade union pushfulness and product pricing decisions; earnings drift; and principles and criteria for wage fixation, including capacity to pay, 'needs' elements, productivity gearing, minimum and social wage levels and manpower issues.

15.565 Industrial Relations Sociology
The sociological aspects of employer-employee relations and industrial work. This subject draws on major sociological views and theories to examine a range of industrial relations issues, including: job satisfaction, dissatisfaction and worker alienation; the role of money as a motivator in the job context; the nature and impact of bureaucracies in industrial relations; social aspects of occupation and retirement; work group identification and affiliation; social aspects of labour market operation, wages and unemployment; and attitudes to work.

15.566 Industrial Conflict
May be offered in alternate years.

The nature and significance of conflict in industrial relations situations. The theories of Marx, Dunlop, Parsons, Darensford and others and assesses their applicability to a range of industrial relations issues, including: the dimensions of conflict; the functional and dysfunctional nature of industrial conflict; the debate between the 'order' and 'conflict' views of society; the relationship between conflict and the formation of 'classes' in society; the relationship between industrial and political conflict; the regulation of conflict and its institutionalization; and the role of the State in conflict resolution and regulation.

15.567 Social Aspects of Work and Unionism
May be offered in alternate years.

The application of sociological principles to the study of trade unions and to the examination of the changing nature of work in industrial society. Topics covered include: authority structures in work situations; job redesign and enrichment; occupational structures; bureaucracy and democracy in trade unions; professionalism and the growth of white collar unionism; the social role of trade unions; worker and management attitudes to industrial relations issues; and discrimination and prejudice in the work context.

15.571 Industrial Relations Theory
May be offered in alternate years.

The theoretical treatment of the origins, evolution and operation of industrial relations systems. A range of explanations for labour movements, covering: the origin and development of trade unions; the goals and ideologies of labour institutions; the reasons for union participation; and the social and economic impact of trade unions.

Theories studied include: Bakunin's 'scientific' anarchism; Brentano's theory of Gulics and Unions; the ideas of Marx, Engels and Lenin, the Webo's concepts of Industrial Democracy; Tannenbaum's philosophy of labour; Commons' 'extension of the market'; Perlman and scarcely consciousness; Polyanyi's 'double movement'; and Kerr, Dunlop, Harbison and Myers, and the convergence theory. This course further examines the Dunlop system's approach to industrial relations theory, and the contributions of Walker and others. It also treats the government 'interventionist' model, covering the ties between labour organizations and pro-labour political parties in less developed countries.
15.572 Industrial Democracy
May be offered in alternate years.

Different forms of worker involvement in management decision-making in Australia, Western Europe, Yugoslavia and North America. Topics include: concepts of industrial democracy, such as joint consultation; worker participation in management; industrial co-determination and worker self-management; contemporary theories of industrial democracy; West Germany's co-determination system; Sweden's model of 'disciplined' democracy in industry; joint consultation in British industry; worker self-management in industrial enterprises in Yugoslavia; and Scanlon Plans and other forms of union-management cooperation in the United States and Canada; and collective bargaining as an exercise in industrial democracy in the United Kingdom and the United States.

15.576 Labour History
May be offered in alternate years.

The origins and evolution in Australia to 1940 of labour movements, trade unions, employer bodies, conciliation and arbitration tribunals and other institutions important to the industrial relations system. Comparative attention is given to appropriate movements overseas.

15.574 Industrial Relations Methods
May be offered in alternate years.

Designed to enable evaluation and acquisition of methods and skills utilized in industrial relations practice. Topics: the content and character of industrial awards and agreements; the preparation of logs of claim; industrial advocacy; tactics and techniques of negotiating and bargaining; data sources for wage, employment, productivity and other material important in industrial relations practice; and conciliation and arbitration procedures.

15.575 Industrial Relations Research Methodology
Principles, procedures, techniques and data sources used for research in the field of industrial relations.

#### Mathematics

While Mathematics as a major study is usually taken in the Science and Mathematics Course, it may also be taken in the Faculty of Arts.

---

**Undergraduate Study†**

**First Year Mathematics**

**Level I units**

**10.001 Mathematics I**

Calculus, analysis, analytic geometry, linear algebra, an introduction to abstract algebra, elementary computing.

*Note*

This is the standard subject and is generally selected by students who intend to pursue further studies in mathematics. For entry into 10.001 Mathematics I, students are required to have passed HSC 2 unit Mathematics at grade 1 or 2, or 3 unit Mathematics at grade 1, 2, 3 or grade 4 at a standard acceptable to the Professorial Board, or 4 unit Mathematics at grade 1, 2, 3 or 4, or grade 5 at a standard acceptable to the Professorial Board.

**10.011 Higher Mathematics I (Day course only)**

Calculus, analysis, analytic geometry, linear algebra, an introduction to abstract algebra, elementary computing.

The same purpose as 10.001, but is aimed at the more mathematically able students, including those who may wish to take an honours degree in mathematics. Covers all the material in 10.001, plus other topics, at greater depth and sophistication. Intended for students who have obtained high marks in the 3 unit mathematics course of the Higher School Certificate as well as for those who have taken the 4 unit course. The basic part of the subject assumes a thorough knowledge of the 3 unit course; special provision will be made for students entering with 4 unit Mathematics.

While it is expected that students aiming at the Honours Level in mathematics will take this subject, it is equally valuable for any mathematically able student whose course requires a considerable amount of mathematics.

**10.021A General Mathematics IA**

Number Systems (including absolute value, inequalities, surds, etc); coordinate geometry; polynomials, quadratics; concept of the function; trigonometric functions, logarithmic and indicial functions and their laws of operation; introduction to differentiation and integration with simple applications.

**10.021B General Mathematics IB**

Functions (and their inverses), limits, asymptotes, continuity; differentiation and applications; integration, the definite integral and applications; inverse trigonometric functions; the logarithmic and exponential functions and applications; sequences and series; mathematical induction; the Binomial Theorem and applications; introduction to probability theory; introduction to 3-dimensional geometry; introduction to linear algebra.

†When a unit is listed as a prerequisite or co-requisite, the appropriate higher unit may be substituted.

*Entry to General Mathematics IA is allowed only with the permission of the Head of the School of Mathematics, and that permission will be given only to students who do not qualify to enter General Mathematics IB.
Subject Descriptions

10.021C General Mathematics IC
Techniques for integration, improper integrals; Taylor's Theorem; first order differential equations and applications; introduction to multivariable calculus; conics; finite sets; probability; vectors, matrices and linear equations.

10.021B and 10.021C is the usual course for students who do not intend studying mathematics beyond first year but whose studies require some knowledge of basic mathematical ideas and techniques.

For entry into 10.021B General Mathematics IB students are required to have passed HSC 2 unit Mathematics at Grade 1 or 2, or 3 at a standard acceptable to the Professorial Board, or 3 unit Mathematics at Grade 1, 2, 3 or 4, or 5 at a standard acceptable to the Professorial Board, or 4 unit Mathematics at any grade, or a pass in 10.021A General Mathematics IA. Entry into 10.021C General Mathematics IC requires a pass in 10.021B General Mathematics IB. However, students who select these units should weigh seriously the implications of their choice because no further mathematical units are normally available. Students with meritorious performance in 10.021C may be permitted to proceed to a certain limited number of second-year mathematics subjects intended for biologists and chemical engineers.

Higher Level Mathematics
Many subjects in the School are offered at two levels. The Higher Level caters for students with superior mathematical ability. Where both levels are offered, the highest grade awarded in the Ordinary Level is Credit, except in exceptional cases.

Honours Courses in Mathematics
There are four separate fourth year honours courses: 10.123 Pure Mathematics IV, 10.223 Applied Mathematics IV, 10.323 Theory of Statistics IV and 10.423 Theoretical Mechanics IV.

The four-year course for an honours degree is intended primarily for professional pure mathematicians, statisticians or applied mathematicians, but will prove of interest also to intending specialists in mathematical areas of social sciences, physical sciences, and engineering. The minimum requirements for each honours course are given below but students seeking an honours degree in mathematics are advised to choose units or courses in mathematics according to their individual interests in consultation with senior members of staff of the School.

1. Honours Course in Pure Mathematics
In second year the student should attempt 10.121A, 10.121B, 10.121C Higher Pure Mathematics II, and 10.2211, 10.2212 Higher Applied Mathematics II. In third year the student should attempt 10.122A, 10.122B, 10.122C and 10.122E Higher Pure Mathematics III.

In all cases complementary units or subjects must be chosen in accordance with Faculty rules.

Since entry to Fourth Year is only with approval of the Head of School, students should discuss their third year programs with a Professor of the Department of Pure Mathematics. In special circumstances additional prerequisites may be required, or some of those listed may be waived.

2. Honours Course in Applied Mathematics
Students entering second year should attempt units 10.2211, 10.2212 and 10.221D Higher Applied Mathematics II, 10.121A and 10.121B, 10.121C Higher Pure Mathematics II, and at least two other higher level mathematics units.

In third year students should attempt 10.222A, 10.222C and 10.222M Higher Applied Mathematics III and at least two other level III mathematics units at least one of which must not be Pure Mathematics. The unit 10.1229 Higher Pure Mathematics III is to be recommended.

Since entry to Fourth Year is only with approval of the Head of School, students should discuss their third year programs with a Professor of the Department of Applied Mathematics. In special circumstances additional prerequisites may be required, or some of those listed may be waived.

3. Honours Course in Statistics
In second year the student should take 10.321A and 10.321B Higher Theory of Statistics II, 10.111A and 10.1114 Pure Mathematics II, or 10.121A and 10.1213, 10.1214 Higher Pure Mathematics II, and 10.2111, 10.2112 Applied Mathematics II or 10.2211, 10.2212 Higher Applied Mathematics II, the student is strongly recommended to take also 6.600 Introduction to Computers, or 6.620 Introduction to Computer Science (for students planning to take Level III Computer Science units).

In third year a student should take four of the five units 10.322A, B, C, D, E, together with three other Mathematics or Computer Science units (eg from 10.222L/10.212L, 10.1122/10.122A, 10.122B/10.1128, 10.1129, 10.122E/10.1125, 10.1125, 6.602C).

In all cases complementary units or subjects must be chosen in accordance with Faculty rules.

Since entry to Fourth Year is only with approval of the Head of School, students should discuss their third year programs with a Professor of the Department of Statistics. In special circumstances additional prerequisites may be required, or some of those listed may be waived.

4. Honours Course in Theoretical Mechanics
In second year the student should attempt 10.2211, 10.2212, 10.421B, 10.421A, 10.121A (or 10.111A) and 10.1213, 10.1214.

In third year the student should attempt 10.442D, 10.442B, 10.422A and 10.222C plus at least two units chosen from 10.412A, 10.222A, or 10.212A, 10.221D or 10.211D (could be taken in 2nd year), 10.122B, 10.122E or (10.1125 and 10.1126).

In the fourth year students take advanced lectures on mechanics and its applications together with lectures on mathematical techniques. Subjects from other Departments or Schools are also usually prescribed.

Since entry to Fourth Year is only with approval of the Head of School, students should discuss their third year programs with a Professor of the Department of Theoretical Mechanics. In special circumstances additional prerequisites may be required, or some of those listed may be waived.

Students with Low Mathematical Qualifications
The School of Mathematics arranges a Bridging Course in Mathematics for those students intending to enrol in Mathematics I and who have inadequate mathematical background. The Bridging Course covers the gap between 2 unit and 3 unit Mathematics and is a very useful refresher course generally. The course will be held at the University during the period January to February 1978.
Arts

Attention is also directed to the Calculus Bridging Course given over the University of N.S.W. Radio Station VL2UV. The radio course explains the ideas of Calculus and assumes no previous knowledge of the subject.

Conversion Course in Mathematics

A Conversion Course in Mathematics is to take place in January/February, 1978. The conversion course is designed to assist new students who have not satisfied the prerequisites for enrolment in First Year Mathematics when it is a compulsory subject of their prospective degree course. Students who successfully undertake the conversion course will be considered to have satisfied these prerequisites.

The course is an intensive one beginning just after the notification of the HSC results and runs for about 5½ weeks, i.e. almost to the first year enrolment period. Examinations are held during the conversion course to assess the improved levels of attainment in Mathematics.

Mathematics Prizes

There are prizes available for certain courses in the School of Mathematics. They are open to all Kensington students proceeding to an undergraduate degree or diploma but will not be awarded if there is no candidate of sufficient merit. An award of $25 and a suitably inscribed certificate are available in the following subjects: Mathematics I, Higher Mathematics I, Higher Pure Mathematics II, Higher Applied Mathematics II, Higher Pure Mathematics III, Higher Applied Mathematics III.

Similarly, there are prizes of up to $50 available in Theory of Statistics subjects.

Upper Level units

10.041* Introduction to Applied Mathematics
Co-requisite: 10.001.

Combinatorial mathematics, finite differences, games and networks, hydrostatics, mathematical models.

Level II units

10.111A Pure Mathematics II—Linear Algebra
Prerequisite: 10.001.

10.1111 Pure Mathematics II—Group Theory
Prerequisite: 10.001. Co-requisites: 10.111A, 10.1113, 10.1114, 10.2111, 10.2112.
Mathematical systems, groups, determination of small groups, homomorphisms and normal subgroups.

10.1112 Pure Mathematics II—Geometry
Prerequisite: 10.001. Co-requisite: 10.1111.

Elementary concepts of Euclidean, affine and projective geometries.

10.1113 Pure Mathematics II—Multivariable Calculus
Prerequisite: 10.001.

Multiple integrals, partial differentiation. Analysis of real valued functions of one and several variables.

10.1114 Pure Mathematics II—Complex Analysis
Prerequisite: 10.001.

Analytic functions, Taylor and Laurent series, integrals. Cauchy's Theorem, residues, evaluation of certain real integrals.

10.121A Higher Pure Mathematics II—Algebra
Prerequisite: 10.011.

10.121C Higher Pure Mathematics II—Number Theory and Geometry
Prerequisite: 10.011. Co-requisites: 10.121A, 10.1213, 10.1214, 10.2111 or 10.2111 and 10.2212 or 10.2112.

Galois fields, quadratic reciprocity, quadratic forms, continued fractions, number theoretic functions, axioms for a geometry, affine geometry. Desargues' theorem, projective geometry.

10.1214 Higher Pure Mathematics II—Multivariable Calculus
Prerequisite: 10.011.

As for 10.1113 but in greater depth.

10.2111 Applied Mathematics II—Vector Calculus
Prerequisite: 10.001.

Vector fields; divergence, gradient, curl of a vector; line, surface, and volume integrals. Gauss' and Stokes' theorems. Curvilinear coordinates.

*Not offered 1978.
10.2112 Applied Mathematics II—Mathematical Methods for Differential Equations
Prerequisite: 10.001.

10.211D Applied Mathematics—Introduction to Optimization Theory and its Applications
Prerequisite: 10.001.
Linear programming: The standard problem, basic solutions, fundamental theorem, simplex tableau, initial solution, unbounded and multiple solutions; degeneracy, duality, dual simplex method, post optimal analysis, integer linear programming. Applications of linear programming, including diet, allocation and transport problems. Brief introduction to non-linear programming. Simple numerical methods.

10.2211 Higher Applied Mathematics II—Vector Analysis
Prerequisite: 10.011 or 10.001 Dist.
As for 10.211 but in greater depth.

10.2212 Higher Applied Mathematics II—Mathematical Methods for Differential Equations
Prerequisite: 10.2211.
As for 10.2112 but in greater depth.

10.221D Higher Applied Mathematics II—Introduction to Optimization Theory and its Applications
Prerequisite: 10.011 or 10.001 Dist.
Linear Programming: The standard problem, basic solutions, fundamental theorem, simplex tableau, initial solution, unbounded and multiple solutions, degeneracy, duality, dual simplex method, post optimal analysis, integer linear programming. Applications of linear programming, including diet, allocation and transport problems. Brief introduction to non-linear programming. Simple numerical methods.

10.411B Theoretical Mechanics II—Principles of Theoretical Mechanics
Prerequisites: 10.001, 1.001, or 10.041 or 5.010. Co-requisites: 10.211, 10.2112, 10.1113.
Revision of vectors, kinematics of particles and rigid bodies. Dynamics of particles including simple harmonic and projectile motion. Systems of particles: conservation principles, collisions, rocket motion, the catenary. Work and energy. Rotating frames; moments of inertia.
Elementary problems derived from continuum mechanics including conservation laws, one-dimensional fluid flow, extension and bending of beams.

10.421A Higher Theoretical Mechanics II—Hydrodynamics
Prerequisite: 10.011 or 10.001 Dist. Co-requisites: 10.421B, 10.1114.
As for 10.411A but in greater depth.

10.421B Higher Theoretical Mechanics II—Principles of Theoretical Mechanics
Prerequisites: 10.011, 1.001, or 10.041 or 5.010. Co-requisites: 10.2211, 10.2212, 10.1113.
As for 10.411B but in greater depth.

Level III units

10.112C Pure Mathematics III—Differential Geometry
Prerequisites: 10.111A, 10.1113. Co-requisites: ***.

10.1121 Pure Mathematics III—Number Theory
Prerequisites: ***.
Euclidean algorithm, congruences, sums of squares, diophantine equations.

10.1122 Pure Mathematics III—Algebra
Prerequisite: 10.111A. Co-requisite: 10.1111.
Rings, polynomials, fields.

10.411A Theoretical Mechanics II—Hydrodynamics
Prerequisite: 10.001. Co-requisites: 10.411B or 1.012, 10.1114.
10.1123 Pure Mathematics III—Set Theory
Prerequisites: 
Intuitive and axiomatic Set Theory. Cardinal and ordinal numbers. The axiom of choice.

10.1124 Pure Mathematics III—Combinatorial Topology
Prerequisites: 
Elementary combinatorial topology of surfaces.

10.1125 Pure Mathematics III—Ordinary Differential Equations
Prerequisites: 
Systems of ordinary differential equations; variations of constants formula; stability; Poincaré space; Lyapunov’s direct method.

10.1126 Pure Mathematics III—Partial Differential Equations
Prerequisites: 10.1113, 10.1114. Co-requisite: 10.1125.
Systems of partial differential equations; characteristic surfaces; classifications; Cauchy problem; Dirichlet and Neumann problems; the maximum principle; Poisson’s formula; conformal mapping.

10.1127 Pure Mathematics III—History of Mathematics
Prerequisites: 10.111A, 10.1113, 10.1114, 10.2111, 10.2112.
Topics from the History of Mathematics, with emphasis on the development of those ideas and techniques used in undergraduate courses. Students are expected to read widely and to present written material based on their readings.

10.1128 Pure Mathematics III—Foundations of Calculus
Prerequisites: 

10.1129 Pure Mathematics III—Real Analysis
Prerequisites: 10.2112, 10.1129.
Taylor’s Theorem. Sequences and series of functions and applications. Metric spaces and the contraction mapping principle. Fourier Series.

10.122A Higher Pure Mathematics III—Algebra
Prerequisite: 10.121A.
Field theory and theory of rings and modules.

10.122B Higher Pure Mathematics III—Integration and Functional Analysis
Prerequisite: 10.1213.
Lebesgue integration; Fourier series; normed vector spaces; Hilbert spaces; measure theory.

10.122C Higher Pure Mathematics III—Topology and Differential Geometry
Prerequisites: 10.121A, 10.1213.
The axiom of choice, metric and topological spaces, compactness. Compact surfaces, triangulations, geodesics, Gauss-Bonnet theorem.

10.122E Higher Pure Mathematics III—Complex Analysis and Differential Equations
Prerequisites: 10.1213, 10.1214.
Analytic continuation; entire and meromorphic functions; elliptic functions; normal families and further advanced topics in complex analysis. Existence and uniqueness theorems for ordinary differential equations; linear systems; qualitative theory of autonomous systems; equations on manifolds.

10.212A Applied Mathematics III—Numerical Analysis
Prerequisites: 10.111A, 10.2111, 10.2112.

10.212L Applied Mathematics III—Optimization Methods
Prerequisites: 10.2111, 10.2112, 10.111A, 10.1113.
Unconstrained multivariables search procedures; including steepest descent, D-F-P method, Hooka and Jeeves method. Constrained optimization; including convexity, Lagrange multipliers, Kuhn-Tucker conditions, duality, simple constrained search methods, penalty functions. Special methods; including geometric programming, separable programming, branch and bound. Applications of these methods to resource allocation, production problems, capital investment and economic models.

10.212M Applied Mathematics III—Optimal Control Theory
Prerequisites: 10.2111, 10.2112, 10.111A, 10.1113, 10.1114.
Optimal control of systems described by difference equations, continuous-time dynamic programming, calculus of variations, Pontryagin maximum principle, stochastic decision processes. Applications of control theory to resource allocation, control of production, investment, inventory, and advertising, and to models of the economy.

*** Students are not normally permitted to attempt a Level III Pure Mathematics unit unless they have completed at least two Level II units from 10.111A, 10.1113, 10.1114, 10.2111 and 10.2112, and are concurrently attempting the remaining unit.

Note: 10.1113 (10.1213) and 10.1114 (10.1214) together replace 10.111B (10.121B). 10.2111 (10.2211) and 10.2112 (10.2212) together replace 10.211A (10.221A).
Physical Oceanography

10.222A Higher Applied Mathematics III—Numerical Analysis

Prerequisites: 10.2111 or 10.2112 Dist., 10.2212 or 10.2112 Dist., 10.1211 or 10.1111 Dist.

As for 10.212A but in greater depth.

10.222B Theoretical Mechanics III—Continuum Mechanics

Prerequisites: 10.2111, 10.2112, 10.111A, 10.1113, 10.1114. Co-requisite: 10.411A or 10.112 or 1.913.

10.222C Higher Applied Mathematics III—Maxwell’s Equations and Special Relativity

Prerequisites: 10.2211 or 10.2111 Dist., 10.2222 or 10.2222 Dist., 10.1213 or 10.1113 Dist., 10.1214 or 10.1114 Dist., 1.001.

Electrostatic and quasi-static magnetic fields: mathematical formulation of basic laws, field equations; methods of solution, general theorems, polarization, energy and mechanical forces. Electromagnetic fields: Maxwell’s equations, Poynting theorem, Maxwell stress tensor, electromagnetic momentum and radiation pressure, electromagnetic potentials, radiation, vector wave equation, solutions, cavity resonators, waveguides.

Relativity: relativistic kinematics, dynamics and electrodynamics. Radiation from moving charges, radiation damping.

10.222F Higher Applied Mathematics III—Quantum Mechanics

Prerequisites: 10.2211 or 10.2111 Dist., 10.2222 or 10.2222 Dist., 10.1211 or 10.1111 Dist., 10.1214 or 10.1114 Dist.

10.222G Higher Applied Mathematics III—Optimization Methods

Prerequisites: 10.2211 or 10.2111 Dist., 10.2222 or 10.2222 Dist., 10.1211 or 10.1111 Dist., 10.1214 or 10.1114 Dist.

As for 10.212L but in greater depth.

10.222H Higher Applied Mathematics III—Optimal Control Theory

Prerequisites: 10.2211 or 10.2111 Dist., 10.2222 or 10.2222 Dist., 10.1211 or 10.1111 Dist., 10.1214 or 10.1114 Dist.

As for 10.212M but in greater depth.

10.412A Theoretical Mechanics III—Dynamical and Physical Oceanography

Prerequisites: 10.2111, 10.2112, 1.001. It is recommended that one of the following be taken concurrently: 10.411A or 1.012 or 1.913.

A The physical properties of the oceans and their measurement, including: salinity, temperature, density, dynamic heights. Currents, waves and tides.

B Theoretical models of current and waves.

Up to seven days field/laboratory work per year.
numerical analysis; mathematics of economic models and of economic prediction; stability theory of differential and differential-difference equations; stochastic processes; statistical mechanics; quantum physics; astro-physics. With permission of the Head of Department, the subject may also include advanced lecture courses given by other Departments or Schools.

10.423 Theoretical Mechanics IV
An honours program consisting of the preparation of an undergraduate thesis together with advanced lecture courses on topics chosen from fluid mechanics, solid mechanics, planetary science and special mathematical and numerical techniques applied to partial differential equations. With the permission of the Head of Department, the subject may also include advanced lecture courses given by other Departments or Schools on topics such as optimal control theory, optimization theory, thermodynamics, numerical analysis or statistics.

Statistics

10.311A Theory of Statistics II—Probability and Random Variables
Prerequisites: 10.001 or 10.021C(Cr).

10.311B Theory of Statistics II—Basic Inference
Prerequisite: 10.311A.

Point estimation (moments, maximum likelihood, minimum \( \chi^2 \), etc.). Confidence interval estimation, exact and approximate. Elementary Neyman-Pearson theory of tests of significance, standard significance tests. Regression (including curvilinear) on a single fixed variable.

Prerequisite: 10.001.

10.311A at greater depth and covering a slightly wider field.

10.321B Higher Theory of Statistics II—Basic Inference
Prerequisite: 10.321A.

As for 10.311B at greater depth, and covering a slightly wider field.

10.331 Statistics SS
Prerequisite: 10.001 or 10.021C(Cr).

The theory of probability, with finite, discrete and continuous sample spaces. The standard elementary univariate distributions: binomial, Poisson and normal; an introduction to multivariate distributions. Standard sampling distributions, including those of \( \chi^2 \), t and F. Estimation by moments and maximum likelihood (including sampling variance formulae, and regression); confidence interval estimation. The standard tests of significance based on the above distributions, with a discussion of power where appropriate. Experimental design; fixed, random and mixed models, involving multiple comparisons and estimation of variance components.

Prerequisites: 10.311A, 10.111A, 10.1113, 10.1114, 10.2112.

10.312B Theory of Statistics III—Experimental Design (Applications) and Sampling
Prerequisite: 10.311B or 10.331 (normally (Cr)).

10.312C Theory of Statistics III—Experimental Design (Theory)
Prerequisites: 10.311B, 10.111A, 10.1113, 10.1114, 10.2112. Co-requisites: 10.312B, plus any two Level III Pure Mathematics or Applied Mathematics or Theoretical Mechanics units.

Prerequisites: 10.311A, 10.111A, 10.1113, 10.1114, 10.2112.

10.312E Theory of Statistics III—Statistical Inference
Prerequisites: 10.311B, 10.111A, 10.1113, 10.1114, 10.2112. Co-requisites: Any two Level III Pure Mathematics or Applied Mathematics or Theoretical Mechanics units.

§Subject to a sufficient enrolment, the evening course for 10.311A is run at 3½ hours per week throughout the year.

Note: 10.1113 (10.1213) and 10.1114 (10.1214) together replace 10.111B (10.121B), 10.2111 (10.2211) and 10.2112 (10.2212) together replace 10.211A (10.221A).
Subject Descriptions

Prerequisites: 10.321A, 10.111A, 10.1113, 10.1114, 10.2112.
As for 10.312A, but in greater depth.

10.322B Higher Theory of Statistics III—Experimental Design (Applications) and Sampling
Prerequisites: 10.321B, 10.111A, 10.1113, 10.1114, 10.2112.
As for 10.312B, but in greater depth.

Prerequisites: 10.321B, 10.111A, 10.1113, 10.1114, 10.2112. Co-
requisites: 10.322B plus any two Level III Pure Mathematics or Applied Mathematics or Theoretical Mechanics units.
As for 10.312C, but in greater depth.

Prerequisites: 10.321A, 10.111A, 10.1113, 10.1114, 10.2112.
As for 10.312D, but in greater depth.

10.322E Higher Theory of Statistics III—Statistical Inference
Prerequisites: 10.321B, 10.111A, 10.1113, 10.1114, 10.2112. Co-
requisites: Any two Level III Pure Mathematics or Applied Mathematics or Theoretical Mechanics units.
As for 10.312E but in greater depth.

10.323 Theory of Statistics IV (Honours)

Graduate Study

10.062G Advanced Mathematics General
For research workers throughout the University requiring employment of advanced mathematics. Topics vary from year to year according to demand and interest.

10.073G Advanced Mathematical Analysis of Data
Develops aspects of transform, representation and distribution theory and applies them to the processing and evaluation of discrete sample values of one and two-dimensional functions. 1. Pulse and ramp functions (sine, Gaussian, diffraction, error, sine integral, etc). 2. Schwartz distributions (Heaviside, delta, sign, etc; Fourier test function; Gibbs phenomenon; generalised limits). 3. Spectral and other properties of functions and distributions (time and band limited functions). 4. General nature of transforms (substitution, orthogonal, Fourier, Hilbert, and singular kernels). 5. Sampling of functions (sampling interval, truncation effects, cotabular functions, fold frequency, aliasing.) 6. Filters and windows: noisy data; implications of smoothing; measure of roughness. 7. Representation of functions (Fourier, Chebychev, Lagrange, etc. Sampling Theorem and the alias.) 8. Interpolation in one and two dimensions (truncation errors, plotting or profiles and contours).

10.181G Advanced Analysis
Functions and relations. Continuous functions on compact intervals; least upper bound and greatest lower bound, review of derivatives; the Riemann integral; sets of measure zero and the Cantor set; characterization of integrable functions, the Fundamental Theorem of Calculus; sequences of reals—lim sup, lim inf, Cauchy sequences; Bolzano-Weiestrass and the Cauchy Principle of Convergence; sequences of functions; pointwise convergence, need for uniform convergence; Cauchy sequences of functions; interchange of various limit operations; pointwise uniform and mean convergence of Fourier series; Cauchy sequences in the mean; need for Lebesgue integral; construction of the reals via Cauchy sequences; completions in general.

10.182G Characters and Crystals
Aims to show that the concepts of group, field and vector space are central to algebra and have application in other branches of mathematics and elsewhere. Topics covered to be selected from: Elementary concepts, subgroups, cosets, Lagrange's theorem, conjugacy, normality, factor groups and Sylow's theorem illustrated by examples from both finite and infinite group theory.

Field extensions as vector spaces. Relationship between field extensions and classical constructibility problems (eg trisection of angles). The Galois group of a normal extension of the rationals. Soluble groups and relationship to solvability of equations.

10.183G Geometry
Axiomatic treatment of projective planes up to Desargue's theorem. Pappus theorem and co-ordinatizability: Projective space of three dimensions, including deduction of Desargue's theorem from the Incidence axioms. Quadric surfaces. The 27 lines and their symmetry groups. Hyperbolic geometry (eg upper half plane) and elliptic geometry will be given as examples. Affine geometry. The projective and affine groups. The Euclidean regular solids and their symmetry groups. Symmetries of 'wall paper' designs.

Notes: 10.1113 (10.1213) and 10.1114 (10.1214) together replace 10.111B (10.121B), 10.2111 (10.2211) and 10.2112 (10.2212) together replace 10.211A (10.221A).

10.184G Number Theory
Prime numbers, facts and conjectures, the Riemann zeta function, multiplicative functions and their generating functions.

Quadratic number fields, the unique factorization property, Pell's equation, the law of quadratic reciprocity, sums of squares, Fermat's last theorem.

Irrational and transcendental numbers, rational approximations, continued fractions.

10.185G Distributions
Physics, the δ-function and its derivatives; Fourier transform of 1; the classical operational calculus; principal values of divergent integrals; test functions; Schwartz distributions; convergence of distributions; differentiation of distributions; convergence of Fourier series; distributions solution of differential equations; convolutions; fundamental solutions of the classical partial differential equations; elliptic partial differential equations; Fourier transforms; general solutions of partial differential equations.

10.186G Hilbert Space
Vector spaces of functions; inner product spaces; completeness; Hilbert spaces; isomorphisms of Hilbert space; orthogonality of systems and bases; weak convergence; bounded linear functionals and operators; spectrum; compact operators; integral equations; Fredholm alternative; Hermitian, normal and unitary operators; spectral theory of Hermitian operators; unbounded operators; eigenfunction expansions; applications to partial differential equations.

10.187G History of Mathematics
Major advances in mathematics since the Renaissance, with an emphasis on the period from 1815 to 1939. The evolution of mathematical concepts in various cultures.

10.188G Topology
Classification of compact surfaces; Winding numbers; Brouwer Fixed Point Theorem; Ham Sandwich Theorem; vector fields on surfaces; critical points on surface; network topology; boundaries and coboundaries.

10.189G Seminar in Mathematics Education
Each student submits a paper for discussion, usually on the teaching of a certain topic.

10.190G Graph Theory and Combinatorics

Combinatorial mathematics. Basic tools: permutations, combinations, generating functions, partitions, recurrence relations, difference equations, inclusion-exclusion. Block designs, Hadamard Matrices and finite geometries. Applications including the dimer problem, the Ising model, telephone switching networks and algebraic coding theory. Polya counting theory with applications to enumerating isomers, trees, random walks on lattices, etc. Efficient algorithms to be compared with enumerative search methods.

10.191G Mathematics Education A
A seminar course centred around the questions Why? and What? as related to curriculum development and teaching of Mathematics.

10.192G Mathematics Education B
A seminar course centred around the question How? as related to curriculum development and teaching of Mathematics.

10.281G Mathematical Methods
Orthogonal systems of functions; completeness; (Legendre, Bessel, Hermite, Tchebycheff functions); integral equations (Hilbert-Schmidt theory); calculus of variations: Euler's necessary conditions; Dirichlet's problem; differential operators; Green's functions; eigenfunction expansions; Sturm-Liouville theory; vibrating rods, plates and membranes; continuous spectra: Schrödinger equations.

10.282G Mathematics of Optimization
Linear programming; elements of game theory; nonlinear programming; multistage decision problems and dynamic programming; introduction to optimal control; applications.

10.283G Quantum Mechanics
Development of Schrödinger equation; interpretation of wave functions, solutions of bound state problems using methods of partial differential equations for simple potentials; square wells, harmonic oscillator, hydrogen atom; transformation theory; Schrödinger equation in momentum space; commutation relations; harmonic oscillator via creation and destruction operators; quantum theory of angular momentum; spin; addition of angular momenta; simple problems of energy levels and transitions treated by perturbation theory and group theory.

10.284G Relativity and Cosmology
Cartesian tensors, general tensors, covariant derivatives; Riemann-Christoffel curvature tensor; Christoffel symbols; geodesics; motivation for special relativity; Lorentz transformation; mass, momentum and energy; energy-momentum tensor; principle of equivalence; Einstein's law of gravitation; spherically symmetric metrics; Schwarzschild's solution; cosmological principle; static universes; evolutionary universes; steady state universe; observational cosmology.

10.372G Statistics and Experimental Design
The concepts of random variables, means, variances, the common tests and confidence intervals based on the normal distribution, some simple analyses of variance.

Comparative Experiments: Requirements of a good experiment, assumptions underlying the conventional models of standard designs and their analysis, purpose of randomization; how the physical circumstances of an experiment are
related to its formal model on which its analysis is based; the internal estimate of error obtained from the variation left after accounting for all sources of systematic variation, these points illustrated by considering in some detail the fully randomized design, the randomized block design, the $2^k$ factorial fully randomized design, and the fully randomized design with one concomitant variable.

Survey Sampling: the distinction between a survey sample and an experiment planned to compare a set of treatments, and how it affects the inferences that may be made; simple random sampling, stratified random sampling.

10.381G Experimental Design I
Modified designs for fixed effects models. Incomplete and balanced incomplete block designs. Confounding and fractional replication. Randomization theory. Multiple comparisons.

10.382G Experimental Design II
Extensive treatment of random and mixed models. Combinatorial structure of designs, cross-over and lattice designs, response surfaces.

10.383G Stochastic Processes

10.384G Time Series

10.385G Multivariate Analysis I
Likelihood ratio tests for means, variances and structure. Discriminant, principal component, canonical and factor analysis.

10.386G Multivariate Analysis II
The general linear hypothesis and analysis of dispersion. Tests based on roots, distribution theory.

10.387G Non-Experimental Statistics
Simple, stratified and systematic random sampling. Estimation of proportions, ratios, and sample sizes. Multi-stage sampling.

10.388G Sequential Analysis
The sequential probability ratio test—OC and ASN functions. General theory of sequential tests. Sequential estimation.

10.389G Non-Parametric Methods

10.390G Statistical Inference
Decision theory. General theory of estimation and hypothesis testing.

10.391G Special Topic A
To be arranged, eg biological statistics, further work on order statistics, population statistics, non-linear programming, discrete distribution theory.

10.392G Project

10.393G Special Topic B
To be arranged, eg biological statistics, advanced order statistics, population statistics, non-linear programming, discrete distribution theory and other topics.

10.401G Seiches and Tides

10.481G Essay

Philosophy

Undergraduate Study

The study of philosophy is partly the study of perennial problems of common interest to everyone; for example, the foundations of morality, the grounds of religious belief, the source and reliability of knowledge, and the relation between body and mind. Philosophy also lends itself to and illuminates other fields of study. Consequently units in philosophy are designed to make it possible for students to pursue a philosophical interest related to their other interests.

**First Enrolment in Philosophy**

New students will normally enrol in

52.103 Introductory Philosophy A (Session 1).
52.104 Introductory Philosophy B (Session 2).

Each of these has 1-unit value.

Students who do not take Philosophy in Session 1 may, however, still qualify for admission to Upper Level work by passing 52.104 Introductory Philosophy B in Session 2.

Students in their second or later year of study may proceed to Upper Level work after passing 52.103 Introductory Philosophy A alone.

**Upper and Advanced Level**

Students may not proceed to Upper Level work in Philosophy in their first year of study in the Faculty. Students in later years may proceed to Upper Level work after passing two Level I half-units (or one Level I unit) in either session.

At Upper Level, Philosophy is presented in session-length 'half-units', some dealing with particular philosophical topics and others capable of being taken in sequences to give more sustained treatments of larger areas. This arrangement makes it possible to offer a wide range of half-units from which students may select freely, subject only to certain stipulations regarding prerequisites.

In certain circumstances the prerequisites specified for units or half-units within this list may be waived; for example, in the case of students who have already studied similar material in other Schools, or who wish to take isolated units or half-units relevant to another discipline without counting them as part of a Philosophy sequence. Students who feel they have a case for a concession of this kind should consult the School.

A major sequence in Philosophy is a sequence containing at least eight half-units (four units) at Upper Level. It is anticipated that Pass students taking a Philosophy major will normally enrol in two half-units in each session after completing relevant Level I studies. Besides the half-units offered by the School of Philosophy, the units

62.203 The Freudian Revolution;
62.213 Marxism and Science;
62.503 Philosophy of Science
taught by the School of History and Philosophy of Science, may be counted towards a Philosophy major sequence as Upper Level units (each equivalent to two Philosophy half-units).

**Selection of Units**

Although students at Upper Level have a wide choice of units, they are recommended to plan a sequence of mutually relevant ones, taking into account the prerequisites of those they may wish to take later. Tabulated Information and School recommendations are available at the School, and students needing assistance should consult the School personally.

**Honours**

The Honours double unit in Philosophy is designed for those who intend to devote themselves wholly to the subject. Students who wish to enrol in it are required to have completed Upper Level or Advanced Level units or half-units from among those that may be counted towards a major sequence in Philosophy, to a total of 6 units, with a good overall credit record and indications of ability at Distinction level or better; and at least 4 further units at Upper or Advanced Level.

It is intended that the student's degree of specialization shall increase throughout his/her course: in his/her fifth and sixth sessions the intending Honours student should expect to devote the greater part of his/her program to Philosophy, to a maximum of 2½ units in each session.

**Level I units**

52.103 Introductory Philosophy A
Prerequisite: None.

An introductory course in philosophy.

Topics include: some arguments for the immortality of the soul; the problem of personal identity; the nature of Freud's theory of dream interpretation, whether scientific or non-scientific; objectivity, subjectivity and ideology.

52.104 Introductory Philosophy B
Prerequisite: None.

A further introductory course in philosophy.

Topics include: the logician's approach to language, reasoning and belief, the rise of modern scepticism and problems about the source of our knowledge; the nature of moral problems; deduction in modern formal logic and related problems of the ambiguity of natural languages.

**Upper Level units**

52.153 Predicate Logic
Prerequisite: 52.162.

A system of natural deduction is presented for the first order predicate calculus, including identity and definite descriptions. Emphasis is upon construction of formal derivations, methods of showing the invalidity of formal arguments, and the evaluation of informal arguments by symbolization.

52.163 Descartes
Prerequisite: Upper Level status in Philosophy**.

The main issues raised in the philosophy of Descartes and their importance for the development of modern philosophy. Emphasis is on the cogito ergo sum argument, the Cartesian method and the search for rational certainty, his theory of ideas, the body-mind problem, and his account of freedom.

52.173 British Empiricism
Prerequisite: Upper Level status in Philosophy**.

A survey of the empiricist tradition with special concentration on Locke and Berkeley.
52.183 Greek Philosophy: Thales to Plato
Prerequisite: Upper Level status in Philosophy**.

The leading ideas of the Greek philosophers from Thales to Plato, with special reference to the Pre-Socratics.

52.193 Scientific Method
Prerequisite: Upper Level status in Philosophy**.

The nature of empirical knowledge as exemplified in the physical and social sciences and in history, with emphasis on the concept of explanation, the nature of induction and scientific laws, counterfactual statements, and the paradoxes of confirmation.

52.203 Classical Political Philosophy
Prerequisite: Upper Level status in Philosophy**. Not available to students who have already taken 52.182.

The basis of political society, its various functions and its relation to the individuals in it, investigated through the works of a number of historically central philosophers. Topics include the theory of a social contract, the establishment of political rights and obligations, and the relation of moral and political concerns within a political society.

52.213 Sartre
Prerequisite: 52.163 or 52.493.

An examination of Sartre’s account of freedom, relations between persons and his social theory.

52.223 Foundations of Mathematics
Prerequisite: 52.153.

A selection of problems concerning the foundations of Mathematics including the following topics: Non-Euclidean Geometry and consistency proofs, Axiomatisms, Antinomies of naive set theory, Logicism, Intuitionism, Formalism, Gödel’s Incompleteness result.

52.233 Argument.
Prerequisite: Upper Level status in Philosophy**.

A theoretical study of practical argumentation in the courtroom, politics and everyday life as compared with argument in logic, mathematics and theoretical science. Confirmation and probability, authority, testimony, precedent; rules of debate; criteria of validity; problem of mechanism of practical arguments; logical rationalism and scepticism.

52.263 Philosophy of Psychology
Prerequisite: 52.193.

A critical examination of some aspects of fundamental theory of psychology, with special emphasis on classical and contemporary behaviourism and behaviourist orientated psychology, and on the general conceptions of ‘behaviour’ and ‘purpose’.

While Psychology I is not a prerequisite for this course, a preparatory survey of the introductory chapters of J. O. Whittaker’s Psychology is of value to students.

52.273 Aesthetics
Prerequisite: Upper Level status in Philosophy**.

An examination of the central concepts, types of judgment and theories occurring in the fields of aesthetics, art criticism and literary criticism.

52.283 Philosophical Study of Woman
Prerequisite: Upper Level status in Philosophy**.

A discussion of crucial structures involved in women’s situation.

52.293 Plato’s Later Dialogues
Prerequisite: 52.463 Plato's Theory of Forms (or, by permission, a course covering similar material.)

A course centered around some of Plato’s later dialogues, the Theaetetus and Sophist in particular.

52.303 Spinoza and Leibniz
Prerequisite: 52.163.

The main issues raised in the philosophy of the two great seventeenth century rationalists, with emphasis upon the development of their metaphysical systems in response to unresolved problems in the philosophy of Descartes and to contemporary scientific thinking. Their ethical views.

52.323 Set Theory
Prerequisite: 52.153 or 26.812 or 10.001 or 10.011 or 10.021.

An axiomatic development of Zermelo-Fraenkel set theory, including a construction of the natural numbers, equinumerosity, ordinal and cardinal numbers, the axiom of choice and some of its consequences.

52.333 Philosophy of Perception
Prerequisite: 52.163 or 51.173.

What it is that we are directly aware of when we perceive something. Emphasis on twentieth-century sense-data theories and their critics.

52.343 Privacy and Other Minds
Prerequisite: 52.163 and either 52.173 or 52.243.

An introduction to the questions of (a) whether there is anything that a person can know which it is logically impossible for anybody else to know, (b) whether it is logically possible that anybody should speak a language that cannot be understood by anybody else, and (c) how we come to understand another person’s mind.

**Upper Level status in Philosophy consists in 1. being in second or later year of university study, and 2. having taken and passed at least one Level I Philosophy unit. If the unit is composed of two half-units, these must have been passed in the same session. The prerequisites may be waived in certain cases by the School.
52.353 History of Modern Logic
Prerequisite: 52.153.
Not offered in 1978.
A historical treatment of selected topics in logic since Boole, with particular reference to Frege, Russell and Wiitgenstein.

52.373 Philosophical Foundations of Marx's Thought
Prerequisite: Upper Level status in Philosophy**.
A discussion of the basics of Marx's historical materialism and dialectical materialism.

52.393 History of Traditional Logic
Prerequisite: 52.153.
Not offered in 1978.
A historical treatment of selected topics in logic before 1850, including: the traditional theory of deduction; the rhetorical tradition; topics and fallacies; the medieval theory of terms: traditional treatments of modality; logic in India and China.

52.403 Model Theory
Prerequisite: 52.323 or 10.1123.
The metamathematics of the predicate calculus from the point of view of model theory. Topics include the deduction theorem, consistency, completeness, theories with equality, prenex normal forms, categoricity and second order theories.

52.413 Reading Option A
Admission by permission, to suitable students with good passes in at least two half-units at Upper Level. A course of individually supervised reading and assignments on an approved topic not otherwise offered.

52.423 Seminar A
Admission by permission, based on a student's performance in Upper Level units. Topics vary and are influenced by student requests. Possible topics include: Contemporary Ethics; Logical Atomism; Wittgenstein; Theories of the Emotions.

52.433 Seminar B
As for 52.433 Seminar A.

52.443 Seminar C
As for 52.433 Seminar A.

52.453 Reading Option B
As for 52.413 Reading Option A.

52.463 Introduction to Transformational Grammar
Prerequisite: Any Level I unit.
Transformational grammar from the beginning: its history, goals, theory, and practice. The emphasis is on understanding and constructing arguments for one transformational system over another.

52.473 Semantics of Natural Language
Prerequisite: 52.153 or 52.463.
A study of recent developments in that area which is the common concern of linguistics, logic and the philosophy of language. Topics include the goals of linguistic theory, the relevance of formal logic to natural language, and truth, meaning, and presupposition in natural language.

52.483 Plato's Theory of Forms
Prerequisite: Upper Level status in Philosophy**.
(Not available to students who have taken a similar course at first level.)
A study of some dialogues of Plato, with special attention to Socratic definition and Plato's Theory of Forms.

52.503 Utopias
Prerequisite: Upper Level status in Philosophy**; and 52.182 or 52.203.
Not offered in 1978.
Traces the various developments in utopian theory by studying the acknowledged classics in the field, eg Edward Bellamy's Looking Backward, William Morris's News from Nowhere, and examining the arguments of the critics of Utopia, eg Karl Marx, Karl Popper. The practical details of utopian settlements, especially those created in the 'New World', like Robert Owens' New Heaven and the Rappite community's Harmony. This course is conducted through seminars and assessed by essays.

52.513 Social and Political Philosophy
Prerequisite: Upper Level Status in Philosophy** and 52.182 or 52.203.
Largely through contemporary writings, including a number of journal articles, the course examines such notions as justice, liability, responsibility, coercion, rights and punishment and the issues surrounding these notions.

52.523 Classical Ethical Theories
Prerequisite: Upper Level Status in Philosophy**.
A survey of some central and quite influential works in the history and development of moral philosophy. Comparison of certain aspects of these moral theories, comparison of the varying approaches taken by these philosophers, and the development of certain ideas through these philosophers. Most attention, however, is directed towards examining and understanding each theory in itself.

**Upper Level status in Philosophy consists in 1. being in second or later year of university study, and 2. having taken and passed at least one Level I Philosophy unit. If the unit is composed of two half-units, these must have been passed in the same session. The prerequisite may be waived in certain cases by the School.
52.533 Contemporary Ethics
Prerequisite: 52.523*

Not offered in 1978.

A survey of some central themes in contemporary ethical theory (beginning with G. E. Moore), focusing primarily on questions concerning the use, meanings, and logic of moral terms and concepts.

52.543 The Philosophy of Love
Prerequisite: 52.163 or 52.173 or 52.263.

Four main topics:

1. The distinction between eros and agape. This, together with the cognate distinctions between desire and love and between lust and love, is considered with an emphasis on Plato, St. Paul, St. Augustine, St. Thomas Aquinas, and Luther. Ovid, Lucretius and Freud are given secondary consideration in this section (Freud on genital and narcissistic love).

2. The relation between love and reason. This, together with the relation between love and will, is studied mainly in Plato, St. Augustine and St. Thomas. Freud is given secondary consideration.

3. Union and separation. This is studied mainly in Plato, St. Augustine, Piotinus. Secondary consideration will be given to St. Teresa, Hegel and McTaggart and Freud.

4. Courtly and romantic love. The attachment to the unattainable which is treated in various texts from the troubadours to the modern novel and film.

52.553 Contemporary Moral Issues
Prerequisite: Upper Level status in Philosophy**.

Investigation and discussion of a number of contemporary moral issues such as abortion, prejudice and discrimination, privacy, war and civil disobedience, punishment, and sexual morality.

52.563 Hume
Prerequisite: Upper Level status in Philosophy**. Not available to students who have already taken 52.152.

A study of Hume's epistemology, his discussion of arguments for the existence of God, free will and the basis of morals.

52.573 Psychoanalysis—Freud and Lacan
Prerequisite: Upper Level status in Philosophy**.

A discussion of psychoanalytic theory, particularly for what it shows about the relation between the individual and the social or between subjects and ideology.

52.583 Theories, Values and Education
Prerequisite: Upper Level status in Philosophy**.

The nature of theories of education, and the contributions to them of philosophy, psychology, and sociology; values in education and the social sciences; the justification of an ordering of educational goals.

Honours Level unit

52.504 Philosophy Honours

Admission is subject to completion of Upper Level or Advanced Level units or half-units, from among those that may be counted towards a major sequence in Philosophy, to a total of 6 units, with a good overall credit record and indications of ability at Distinction level or better; and at least 4 further units at Upper or Advanced level.

The course consists of the writing of a research thesis under supervision and two seminars.

In 1978 the following seminars are offered: 1. Philosophy of Language, in the works of Russell, Strawson, Austin, Quine, Chomsky and others. 2. Kant: a study in particular of his metaphysics and epistemology. (Prerequisites: 52.173, 52.303.) 3. Topics in Logic: (Prerequisite: 52.403.) 4. Contemporary Ethics. (Prerequisite: 52.513 or 52.533 or 52.553.)

Graduate Study

52.501G Set Theory

An advanced treatment of Zermelo-Fraenkel set theory.

52.502G Formal Linguistics

Not available in 1978.

The theory of formal grammars, and their application to natural and artificial languages; finite-state grammars, stochastic models and the theory of information; context-freedom and context-dependence; meaning; generators and acceptors; formal dialogue.

52.503G Model Theory

The metamathematics of the predicate calculus from the point of view of model theory; a more advanced treatment of the topics covered in the undergraduate course in model theory.

52.504G Automata and Computation

Not available in 1978.

The theory of automata; Turing's theorem and its extensions; machine languages and programming languages; mechanical decision and semi-decision.

52.505G Metamathematics

Not available in 1978.

Formal number theory, recursive functions, Godel's theorem, decidability.

**Upper Level status in Philosophy consists in 1. having been in second or later year of university study, and 2. having taken and passed at least one Level I Philosophy unit. If the unit is composed of two half-units, these must have been passed in the same session. The prerequisite may be waived in certain cases by the School.

*May be waived with the consent of the lecturer.
52.506G Modal Logic
Not available in 1978.
An introduction to the logic of necessity and possibility.

52.507G Non-Standard Logics
Not available in 1978.
A treatment of certain formalizations of the logic of time, tense and entailment.

52.508G Topics in Logic
Not available in 1978.
Designed to familiarize students with the main trends in contemporary logic. A selection of topics from the current literature, including the logic of questions and imperatives.

1.011 Higher Physics I
Prerequisite: Science Faculty Entrance.
For students of all Faculties except Medicine and Architecture who have a good secondary school record and who wish to do a more challenging course.
As for 1.001 with additional topics: space physics, mechanical properties of real materials, rotational dynamics, physics of biological systems, AC and charged particle dynamics, physics of energy resources and conversion.

Level II units

1.012 Mechanics and Thermal Physics S1 L3T2
Prerequisites: 1.001, 10.001. Co-requisite: 10.211A.
Properties of solids and liquids, elasticity, hydrostatics, hydrodynamics, damped and forced vibrations, resonance, coupled systems, normal modes, Fourier analysis, waves, group velocity, reflection and transmission at a boundary.
Kinetic theory, Maxwell velocity distribution, transport coefficients, first and second laws of thermodynamics, thermodynamic functions, simple applications, microscopic approach to thermodynamics, Boltzmann probability.
Additional material is studied for the award of Distinction/High Distinction.

1.022 Electromagnetism and Modern Physics S2 L3T2
Prerequisites: 1.001, 10.001. Co-requisite: 10.211A.
Electrostatics in vacuum and in dielectrics, Gauss' law, current density, magnetostatics in vacuum and in magnetic materials, electromagnetic induction, displacement current, Maxwell's equations, simple solutions, applications.
Special theory of relativity, Lorentz transformation, simultaneity relativistic mass, momentum and energy, formalism of wave mechanics, Schrodinger's equation, simple solutions, hydrogen atom, spectra, electron spin, selection rules, exclusion principle, Zeeman effect, molecules.
Additional material is studied for the award of Distinction/High Distinction.

1.032 Laboratory FT3
Prerequisites: 1.001, 10.001.
Alternating current circuits, complex impedance, resonance, mutual inductance, introductory electronics, diode characteristics and circuits, power supplies, transistor characteristics, single stage and coupled amplifiers, experiments using AC circuits. Experimental investigations in a choice of areas including radioactivity, spectroscopy, properties of materials, Hall effect, nuclear magnetic resonance, photography, vacuum systems.
Political Science

Undergraduate Study

Teaching in the School of Political Science is concerned with the study of political ideas, institutions and activity in such a way as to encourage a critical understanding of the problems and processes of government and politics in different societies and at different times, and of some of the main theories that have been developed to account for, and sometimes advocate, these governmental forms and actions.

Level I units

Students are reminded that under Arts Faculty rules no more than two Level I units may be taken in any one subject. Students wishing to proceed to upper level units in Political Science should note that from 1978, the prerequisite will be 54.904; or 54.901 and one of 54.902 or 54.903.

54.904 Political Science I

Exclusion: 54.901.
Plato to Marx; selected political theorists. Australian politics; parties, parliaments, constitutions, public policy, political culture.

54.901 Australian Politics

Prerequisite: 54.902 or 54.903. Exclusion: 54.904.
An introductory study of Australian politics: parties, parliaments, constitutions, public policy, political culture.

Upper Level units

54.202 Selected Political Theorists

Prerequisite: Two first year units including 54.901*.
Lectures/tutorials on a miscellany of past and present political theorists. The course content varies from year to year but ranges widely from the 14th to the 20th century; eg the course has included Marsilius of Padua, Sir Thomas More, Vico, Saint-Simon, Tocqueville, Proudhon, Jefferson, Sorel, J. S. Mill. Reading lists are given by lecturers prior to their own lectures on specific thinkers.

54.212 Politics of the U.S.S.R.

Prerequisite: Two first year units including 54.901*.
The three main periods into which Soviet political history is conventionally divided: the pre-Stalinist period from the revolution to the late 1920s, from the late 1920s to Stalin's death in 1953, and the post-Stalinist period to the present.

54.222 Politics of the U.S.

Prerequisite: Two first year units including 54.901*.
A general view of US politics with particular emphasis on major institutions and long-term issues.

54.232 Politics of China

Prerequisite: Two first year units including 54.901*.
An introductory study of Chinese Politics with special attention to political issues, values, and the conflicts of interests in policy making. Includes the development and nature of communism in China, economics and development strategy, education and culture, defence and foreign policy.

54.242 British Government

Prerequisite: Two first year units including 54.901*.
The structure of politics and decision-making in Britain.

54.252 International Relations

Prerequisite: Two first year units including 54.901*.
The nature of the international political system, the problem of conflict and war between nations, and the more important ways in which this conflict has been, and may be, contained.

54.272 Comparative Foreign Policy

Prerequisite: Two first year units including 54.901*.
Foreign policy, the components in the making of foreign policy, and some of the basic strategies available in foreign policy. The foreign policies of a number of particular countries.

54.292 Politics and the Media

Prerequisite: Two first year units including 54.901*, or Sociology 53.103 and 53.104.
Relations between the media and political life. Analyses of media organizations and media styles. Consideration of 'image', 'communication', 'influence', 'sociodrama', 'political agenda'. The context is Australian.

54.203 Introduction to African Politics

Prerequisite: Two first year units including 54.901* (both at levels satisfactory to the School).
A survey of the general political (and related) characteristics of the continent. Includes the following topics: kinship, race, class, state-formation, early states, colonialism, independence movements, party systems, military government, and modernization.

*After 1979 the prerequisite for upper level units will be 54.904; or 54.901 and one of 54.902 or 54.903. Credit where applicable.
54.213 Public Policy Making
Prerequisite: Two first year units including 54.901*.
The problems of administering government and the problems of
decision making. Models of decision making are discussed;
for example legal-rational, incremental, 'muddling through',
and the systems models as well as some theoretical material
on bureaucracy (Weber, Blau, Simon, March).
Areas of public policy in Australia are looked into and prob-
lems peculiar to Australia, arising for example from our federal
structure and the nature of local government and comparisons
made with similar areas in the United States and the United
Kingdom and in some instances France and Scandinavia (eg
education, urban policy, health and welfare, statutory corpora-
tions, bureaucratic responsiveness and open government).
Similarities between public bureaucracy and decision making
and private bureaucracy and decision making, multinational
corporations and the extent of governmental involvement and
support for the private sector.

54.223 Analytical Political Theory
Prerequisite: Two first year units including 54.901* (both at
levels satisfactory to the School.)
A survey of the basic ideas implicated in political thought
and action. The emphasis is not upon history, but upon logic.
The concepts discussed include order, sovereignty, federalism,
liberty, authority, justice, equality, fraternity, law, toleration,
rights, ideology and related notions.

54.302 Marxism
Prerequisite: Two first year units (Cr) including 54.901*.
Topics: the Hegelian and 'Young Hegelian' background, the
dialectic, the materialist conception of history, the theory of
social class and of class conflict, the theory of the state
and of the dictatorship of the proletariat.

54.322 British Government: B
Prerequisite: Two first year units (Cr) including 54.901*.
The nature and character of the British Labour Party.

54.332 Federalism: An Australian Perspective
Prerequisite: Two first year units (Cr) including 54.901*.
The nature and character of Australian federalism.

54.342 International Security
Prerequisite: Two first year units (Cr) including 54.901*. Co-
requisite: 54.252.
The nature and meaning of 'security' in the international
context. The more important avenues or areas of endeavour
currently being canvassed to strengthen international security.

54.352 Plato and Machiavelli
Prerequisite: Two first year units (Cr) including 54.901*.
Plato's Republic and The Prince and Discourses of Machia-
velli, and other works by these authors. At the end of the
seminars some time is spent on points of comparison and
contrast.

54.372 Australian Foreign Policy
Prerequisites: Two first year units (Cr) including 54.901*. Co-
requisites: 54.272 or 54.252.
An examination of the foreign policy making and implementing
processes in Australia; traditions, assumptions and percep-
tions; actors and audiences; interests and issues; incentives and
constraints.

54.382 Political Theory
Prerequisite: Two first year units (Cr) including 54.901*.
The methodology of political theory analysis and the historiog-
raphy of political thought: tradition and political ideas, original-
ity and influence, intention, relevance, political theory and
the history of political ideas, literary style and political
imperative.

54.392 Aspects of Australian Political Culture
Prerequisite: Two first year Political Science units (Cr) includ-
ing 54.901* or History 51.521 (Cr).
An examination in an Australian context of theories of political
culture, political symbolism, political legitimacy, social 'types'
and administrative 'styles'.

54.601 Politics of the USSR: B
Prerequisite: Two first year units (Cr) including 54.901*. Co-
requisite: 54.212.
Major issues in the interpretation of Soviet politics, such as
interest group theory, post-Stalin mechanisms of social
control, the totalitarian model and its critics, hypotheses about
the future of the Soviet political system.

54.602 Politics of the US: B
Prerequisite: Two first year units (Cr) including 54.901*. Co-
requisite: 54.222.
This unit builds on the pass level unit, applying it to current
issues and problems. Case studies are examined.

54.605 Administration and Decision Making:
A Comparative Perspective
Prerequisite: Two first year units (Cr) including 54.901*; and
54.213.
Session 1: Takes Australia as the locus for studying problems
of decision making in government; areas such as open govern-
ment, intergovernmental relations, local government and the
differences between the workings of the public sector and the
private sector are looked at. Session 2: The problems of
administrating government and of decision making are
examined either in developing countries or in Western
developed countries according to the interests of the students.

*After 1978 the prerequisite for upper level units will be 54.904; or
54.901 and one of 54.902 or 54.903. Credit where applicable.
§§Not offered in 1978.
54.606 Politics of Indonesian Society
Prerequisite: Two first year units (Cr) including 54.901*.
Indonesian political economy.

54.607 Chinese Political Thought
Prerequisite: Two first year units (Cr) including 54.901*.
Examines the Confucianist and Anti-Confucianist ideas in pre-China (221 B.C.) and these ideas since the 1898 reform, concentrating on the nature of their disputes.

54.609 Theories of Revolution
Prerequisite: Two first year units (Cr) including 54.901*.
Concerned with 1. an analysis of the concept ‘revolution’ as distinguished from such related phenomena as revolt, rebellion, coup d'etat; 2. a review of some major classical and modern theories of revolution; and 3. an examination of some historical revolutions in the light of these theories.

54.611 Late Mediaeval and Early Renaissance
Political Theories: Italy and England
Prerequisite: Two first year units (Cr) including 54.901*.
Two or three thinkers from each country are treated and points of contrast and comparison made among them. The thinkers studied may include John of Salisbury, Marsilius of Padua, Henry Bracton, Poggio Bracciolini, Sir John Fortescue, Niccolo Machiavelli, Sir Thomas More.

Advanced Level units

Available for students intending to take a special Honours degree in Political Science (and others who have satisfied the prerequisites).

Intending Honours students should plan their programs in consultation with the Head of School or the Course Advisor.

Each Advanced Level unit consists of work in a 1-unit Upper Level course, plus such additional work as is prescribed by the Head of School (normally consisting of advanced seminar work on a topic related to the subject of the Upper Level course).

54.401 Political Science Advanced: A
Prerequisite: Credit or better in all preceding Political Science units including 54.901, and 54.902 or 54.903*.
Consists of work in any Upper Level 1 unit and such additional seminar work as is prescribed by the Head of School.

54.402 Political Science Advanced: B
Prerequisite: Credit or better in all preceding Political Science units including 54.901, and 54.902 or 54.903*.
Consists of work in any Upper Level 1 unit and such additional seminar work as is prescribed by the Head of School.

54.403 Political Science Advanced: C
Prerequisite: Credit or better in all preceding Political Science units including 54.901, and 54.902 or 54.903*.
Consists of work in any Upper Level 1 unit and such additional seminar work as is prescribed by the Head of School.

54.404 Political Science Advanced: D
Prerequisite: Credit or better in all preceding Political Science units including 54.901, and 54.902 or 54.903*.
Consists of work in any Upper Level 1 unit and such additional seminar work as is prescribed by the Head of School.

Honours Level units

54.801 Political Science (Honours)
Prerequisites: The minimum program of study in the School of Political Science for a student intending to take a Special Honours degree is the four Advanced Level units in Political Science plus two of the Upper Level 1-unit courses.

Students intending to proceed to the award of an Honours degree in Political Science would normally enrol in the following units:

Year 1: Two level 1 units in Political Science including Australian politics.
Year 2: 54.401 and 54.402 plus any Upper Level 1 unit.
Year 3: 54.403 and 54.404 plus any Upper Level 1 unit.
Year 4: 54.801 (double unit).

The prerequisite for entry to 4th Year Honours is a pass at Credit Level or better in all the Political Science units taken in the preceding three years, subject in special cases to the discretion of the Head of School.

Intending Honours students should plan their programs in consultation with the Head of School or the Course Advisor.

Students are required: 1. To undertake an original piece of work extending throughout the year and to submit a thesis based upon it. 2. To complete the course on Theory and Method and a number of the following options during the year:

Options:
1. Problems of international order; 2. Literature and politics; 3. Australian politics and Australian culture; 4. Chinese communism. These options are subject to the availability of staff to teach them. Reading lists for these options are issued by the lecturers.

*After 1978 the prerequisite for upper level units will be 54.904; or 54.901 and one of 54.902 or 54.903. Credit where applicable.
Psychology

The study of psychology as a formal discipline in undergraduate courses is traditional in Australian Universities. Psychology as a subject is concerned with the systematic study of human behaviour and associated mental processes. The School of Psychology offers psychology as a major subject in the full-time Arts Course, in the three and four year programs of the Science and Mathematics Course, and also offers a full-time undergraduate professional degree course in psychology in the Faculty of Biological Sciences.

In the Arts Course, Psychology may be studied as a major sequence in accordance with Schedule B. Students who wish to proceed to Honours in Psychology should refer to the requirements set out in Schedule A.

Prizes in Psychology

The Australian Psychological Society Prize in Psychology is awarded annually to a fourth-year student. The Society also awards annually two-years Student Subscriberships to the Australian Journal of Psychology to two outstanding second-year students.

The Staff Prize in Psychology is awarded annually to the best second-year student.

Undergraduate Study

Level I unit

12.001 Psychology I

An introduction to the content and methods of psychology as a behavioural science, with emphasis on the biological and social bases of behaviour, relationships to the environment, and individual differences.

The course includes training in methods of psychological enquiry, and the use of elementary statistical procedures.

Upper Level unit

12.122 Psychology II (Pass)

Prerequisite: 12.001.

Lectures are offered in four parts: in the sequence learning personality development, individual differences and social behaviour, and learning.

Tutorials involve practical work, and discussion of material covered in the lectures.

The section concerned with individual differences involves some statistics, covering the fundamentals of hypothesis testing.

Advanced Level units

12.052 Basic Psychological Processes II

Prerequisite: 12.001 with Advanced Pass.

The basic phenomena of behaviour and experience in a biological context.

12.062 Complex Psychological Processes II

Prerequisite: 12.001 with Advanced Pass.

Students select for concentrated study two areas from visual perception, social bases of behaviour, and information processing and cognitive functioning.

12.152 Research Methods II

Prerequisite: 12.001 with Advanced Pass.

General introduction to the design and analysis of experiments; hypothesis testing, estimation, power analysis; general treatment of simple univariate procedures; correlation and regression.

12.153 Research Methods IIIA

Prerequisites: 12.052, 12.062, 12.152.

Analysis of variance for single factor and multifactor designs. Fixed, random, and mixed models. Test procedures for planned and post-hoc contrasts defined on parameters of fixed and mixed models. General principles of experimental design.

12.163 Research Methods IIIB

Prerequisites: 12.052, 12.062, 12.152 and 12.153.

For students who intend to undertake a research thesis in Psychology IV, and is concerned with data analysis using the SPSS and PSY systems of computer programs and with the statistical bases of these programs.

12.173 Psychological Issues III

Prerequisites: 12.122(Cr) or 12.052, 12.062, 12.152.

Contemporary research problems in psychology.

12.253 Learning IIIA

Prerequisites: 12.052, 12.062, 12.152.

The operations and processes in classical and operant conditioning.

12.263 Learning IIIB

Prerequisites: 12.052, 12.062, 12.152 and 12.253.

Enduring issues in conditioning and learning set in their contemporary and historical contexts. Issues include: conditions of reinforcement, anticipatory responding, distribution of practice, and 'attentional-perceptual' phenomena.
12.303 Personality IIIA
Prerequisites: 12.122 (Cr) or 12.052, 12.062, 12.152.

Personality dynamics and structure. The practical work involves an exploration of student-chosen topics within designated areas of personality.

12.313 Personality IIIB
Prerequisites: 12.052, 12.062, 12.152 and 12.303.

The psychology of interpersonal relationships and transactions, and the development of personality with special reference to experimental and social determinants. The practical work requires students to participate in groups.

12.323 Motivation IIIA
Prerequisites: 12.052, 12.062, 12.152.

The ethology, psychology and neurophysiology of motivational states and processes, including aggression, thirst, hunger, attachment, and addictions.

12.373 Psychological Assessment (Testing) IIIA
Prerequisites: 12.122(Cr) or 12.052, 12.062, 12.152.

Principles and techniques of psychological assessment. Types of tests and their application in selection and allocation procedures.

12.383 Psychological Assessment (Psychometric Theory) IIIB*
Prerequisites: 12.052, 12.062, 12.152.

12.413 Physiological Psychology IIIA
Prerequisites: 12.122 (Cr) or 12.052, 12.062, 12.152.

Elementary neurophysiology, neuropharmacology, and neuroanatomy. Brain control of eating, aggression, copulation, memory, language and functional disorders.

12.423 Physiological Psychology IIIB
Prerequisites: 12.052, 12.062, 12.152 and 12.413.

12.453 Human Information Processing IIIA
Prerequisites: 12.052, 12.062, 12.152.

The stages involved in the reception of stimulus information from the environment, its analysis, storage, and translation into responses. Particular emphasis is given to the processes which have the effect of reducing the amount of information to be subsequently stored or further processed. Special attention is also given to the comprehension, storage and utilization of semantic information.

12.463 Human Information Processing IIIB*
Prerequisites: 12.052, 12.062, 12.152 and 12.453.

12.473 Perception IIIA*
Prerequisites: 12.052, 12.062, 12.152.

The characteristics and processes of visual perception. Topics include the basic requirement for visual perception and the relative contributions of the observer and the stimulus in a range of visual situations.

12.483 Perception IIIB
Prerequisites: 12.052, 12.062, 12.152.

Man in a spatial environment. A study of the organization and stability of the visual world with particular reference to the constancies, object movement, eye movement and locomotion.

12.503 Social Psychology IIIA
Prerequisites: 12.122 (Cr) or 12.052, 12.062, 12.152.

Theoretical models involving roles, reference groups, norms, social balance and interdependence, empirical literature in the areas of attitudes, attraction, influence, helping and communication, and the main research methods in experimental social psychology in both the laboratory and the field.

12.513 Social Psychology IIIB

Current concepts, and developments in the analysis of social behaviour.

12.523 Environmental Psychology III
Prerequisites: 12.122(Cr) or 12.052, 12.062, 12.152. Excluded: 12.513.

The effects of population, technology and urbanization on social change are studied with special reference to individual functioning and the quality of life. The measurement of social change is treated in practical exercises.

12.553 Developmental Psychology IIIA
Prerequisites: 12.122 (Cr) or 12.052, 12.062, 12.152.

An introduction to the study of cognitive development set loosely within the framework of Piagetian theory. Topics include: the development of perception with special reference to the nativism/empiricism issue; the development of operational thought with emphasis on its origins in sensori-motor intelligence; the development of language and its relationship to the development of thought; and the development of reading.

12.563 Developmental Psychology IIIB*
Prerequisites: 12.052, 12.062, 12.152.

*Not offered in 1976.
12.603 Abnormal Psychology IIIA
Prerequisites: 12.052, 12.062, 12.152.
Conflict, anxiety and avoidance behaviour. Anti-social behaviour, psychosomatic disorders, brain pathology, mental deficiency, schizophrenia, depression, sexual anomalies, methods of diagnosis and treatment.

12.613 Abnormal Psychology IIIB
Prerequisites: 12.052, 12.062, 12.152 and 12.603.
Techniques and findings of experimental psychopathology. Measurement and assessment problems relating to description and prediction in the field of abnormal behaviour. Evaluation of treatment and intervention programs.

12.623 Guidance and Counselling III
Prerequisites: 12.122 (Cr) or 12.052, 12.062, 12.152.
A review of significant therapeutic approaches from Freud to the present day, and their implied views of man. The sources of the theories of, for example, Freud, Miller and Dollard. Ellis, Rogers, Perls, and Janov. The concluding section of the course is concerned with problems in evaluating the effects of psychotherapy.

12.653 Industrial Psychology III
Prerequisites: 12.052, 12.062, 12.152.
The role of the psychologist in industry. Problems of power, authority and control. Theories of human nature and motivation, and their use by industrial psychologists.

12.663 Ergonomics III
Prerequisites: 12.052, 12.062, 12.152.
Aspects of human performance relevant to work design. The principles involved in designing the environment in general, and work in particular, to suit man's capabilities.

12.703 Psychological Techniques III*
Prerequisites: 12.052, 12.062, 12.152 and 12.373.
A restricted unit for potential Psychology IV students approved by the Head of School.
Observation and other forms of appraisal, eg, ratings, interviewing, testing and reporting on assembled data about individuals.

12.713 Behaviour Control and Modification III
Prerequisites: 12.052, 12.062, 12.152.

12.733 Laboratory Instrumentation III*
Prerequisites: 12.052, 12.062, 12.152.
A restricted unit for potential Psychology IV students approved by the Head of School.
Use of laboratory equipment, and experimental techniques in Psychology. Care of laboratory animals. Basic electricity and elementary circuit design. Audio and visual perception equipment, and techniques for manipulating auditory and visual factors in experiments.

Honours Level units

12.025 Psychology IV (Honours Course Work)
Prerequisites: 12.001, 12.052, 12.062, 12.152, 12.153 and 7 other Psychology Advanced half-units at an average level of Credit or better.
Course work, practicum, project and readings to be determined in consultation with the Head of School.

12.035 Psychology IV (Honours)
Prerequisites: 12.001, 12.052, 12.062, 12.152, 12.153, 12.163 and 6 other Psychology Advanced half-units at an average level of Credit or better.
Research and thesis, course work and readings to be determined in consultation with the Head of School.

Russian

Undergraduate Study

Courses offered by the School cover the language, literature and culture of the Russian people from the eleventh century to the present day.
This year five Pass courses are offered: Russian IA, Russian IB, Russian IIA, Russian IIB and Russian IIIA.

*Not offered in 1976.
Level I units

59.501 Russian IA (Double unit)

Unless the Head of School rules otherwise in special cases, a course available only to students who have not qualified to enter Russian IB.

The course aims at providing students with a sound elementary knowledge of spoken and written Russian as a basis for further intensive language study in Russian IIA. Students who pass at the annual examination and wish to continue their study of the language are required to complete a program of written exercises and prescribed reading during the long vacation. Admission to Russian IIA is dependent on the satisfactory completion of this program.

Russian IA is a semi-intensive course, with a total of seven hours of instruction per week, consisting of two lectures, four tutorials and one session in the language laboratory. An equal amount of time should be devoted to preparation and private study if the course is to be pursued successfully.

59.511 Russian IB

For students who have reached grade 1, 2 or 3 of the 2 or 3 unit course in Russian, at the HSC Exam, or who, in the opinion of the Head of School, possess an equivalent knowledge of the language.

1. Language

Three hours of instruction per week, devoted to prose translation into and from Russian, study of Russian grammar, free composition and practice in spoken Russian.

2. Literature

Two lectures per week. The texts to be studied are:
A Two plays by A. P. Chekhov,
B short stories by A. S. Pushkin, L. N. Tolstoi, L. N. Andreev,
C short stories by Soviet writers.

Upper Level units

59.502 Russian IIA

For students who have passed 59.501 Russian IA and who have completed the prescribed vacation reading and exercises. In addition to further intensive language work, there is a study of literary texts.

1. Language

Three lectures, two tutorials and one session in the language laboratory per week. The lectures deal with analysis and translation into English of selected passages from prescribed texts and prose translation into Russian; the tutorials and language laboratory session are devoted to intensive drills in spoken and written Russian.

2. Literature

One lecture per week. The texts studied are:
A Two plays by A. P. Chekhov,
B short stories by A. S. Pushkin, L. N. Tolstoi, L. N. Andreev,
C short stories by Soviet writers.

59.512 Russian IIB

For students who have passed 59.511 Russian IB.

1. Language

Three hours of instruction per week, devoted to prose translation into and from Russian, study of Russian grammar, free composition and practice in spoken Russian.

2. Literature

Two lectures per week. The texts to be studied are:
A Short stories by A. P. Chekhov, N. V. Gogol', A. S. Pushkin, M. E. Saltykov-Shchedrin
B Four contemporary stories
C Selections from the following poets: A. Akhmatova, A. Blok, M. Lermontov, N. Nekrasov, A. Pushkin and F. Tyutchev

59.513 Russian IIIA

For students who have passed either 59.502 Russian IIA or 59.512 Russian IIB and who have completed the prescribed vacation reading and exercises.

1. Language

One lecture and two tutorials per week. The lecture deals with prose translation into Russian; the tutorials are devoted to a study of advanced Russian grammar, syntax and free composition and to practice in spoken Russian (reading, dictation and conversation).

2. Literature

Four lectures per week. Areas of study:
A A. S. Pushkin,
B F. M. Dostoevskii,
C L. N. Tolstoi and
D a selection of Soviet films.

Sociology

Undergraduate Study

The major aim of sociology, as taught by the School, is to impart a critical understanding of society. In particular, this involves three teaching objectives:

1. Developing a critical sense towards social reality and human behaviour.
2. Developing skills for the collection and interpretation of social data.
3. Developing a 'sociological imagination', i.e. sensitivity to the relations between social phenomena and human action.
Level I units

53.103 Introduction to Contemporary Industrial Society (1 unit)
An introduction to three issues prominent in the study of contemporary industrial society, i.e. work, inequality, and socialization, studied in the context of both theory and empirical evidence. Students are expected to present written and oral assignments during the session.

53.104 Introduction to Social Theory (1 unit)
An introduction to sociology that focuses on the thought of four seminal theorists, the work of Marx, Weber, Durkheim and Simmel in some detail. Students are expected to examine salient aspects of these writings and present written and oral assignments during the session.

Upper Level units

53.201 Methods of Social Investigation A (½ unit)
Excluded: 53.501.
One two-hour seminar per week.
Introduces students to the commonly used techniques of data collection and analysis. Students are expected to achieve a reasonable level of competence in the manipulation of data. Assessment depends on the completion of written tutorial exercises and of a research project. In the first session, emphasis is on a historical review of empirical sociology, theory formulation and verification, and techniques for collecting, recording, and organizing information.

53.202 Comparative Industrial Societies A (½ unit)
Excluded: 53.501.
One two-hour seminar per week.
A comparative study of the major structures and processes of advanced industrial societies (Britain, USA, Western Europe, Australia, the State socialist countries, USSR, and the Comecon countries). Emphasis on theories and research studies of the relationship between industrial economy, the organization of work, class structure, the nature of the state, the growth of cities, the growth of bureaucracy, and utopian responses to industrial societies.
Topics:
1. The state and society in an industrial economy.
2. Urbanization.
3. The growth of bureaucracy.

53.207 Social Anthropology A (½ unit)
One two-hour seminar per week.
Anthropological perspectives on people and society, and an examination of the dynamics of universally relevant institutions. The material presented combines theoretical discussion and empirical data from small-scale societies.

53.208 Methods of Social Investigation B (½ unit)
Prerequisite: 53.201.
The use of qualitative and quantitative data in hypothesis testing. Problems of reliability and validity. Alternatives to empiricism. Students are required to complete a research project (commenced in first session) and to submit a report for assessment.

53.209 Comparative Industrial Societies B (½ unit)
Prerequisite: 53.202.
A continuation and extension of the major themes, theories and studies introduced in Session 1.
Topics:
1. Work.
2. Inequalities.
3. Futures and Utopias.

53.210 Social Anthropology B—Anthropological perspectives on modernization (½ unit)
Excluded: 53.502 and 53.209.
Prerequisite: 53.207.
A major objective is to analyse the contribution and limitations of the anthropological approach to modernization. Stress is placed on the development of a humanistic approach to theoretical issues in modernization, and on the analysis of social processes from the perspective of non-western geographic-cultural units (e.g., Australian Aborigines, peoples of Latin America, and Pacific).

Advanced Level units

53.501 Sociology IIA (Advanced) (1 unit)
Prerequisite: 53.103 and 53.104. (At a level determined by the School.)
Two compulsory sections:
1. 53.201 or 53.202 or 53.207.
and
2. (1) Marxism and social theory, or
(2) Theories of social inequality.
(1) Marxism and social theory: A weekly seminar, dealing with a detailed study of Marx's own works, contemporary developments and extensions of the Marxist tradition, and the relation of Marxism to the general body of sociological theory.
(2) Theories of social inequality: A weekly seminar, dealing with a detailed study of the major approaches to social inequality. The seminar focuses on pre-industrial, as well as industrial societies, and considers such topics as race, caste, slavery, sex, class.
53.502 Sociology IIB (Advanced) (1 unit)
Prerequisite: 53.501.

Two compulsory sections:
1. 53.208 or 53.209 or 53.210.
and
2. An advanced treatment of either Marxism and Social Theory or Theories of Social Inequality (being a continuation of the topic studied in 53.501).

Upper Level units

53.305 Sociology IIIA (1 unit)
Excluded: 53.507, 53.508.

1. Social Inquiry A.
2. An option chosen from a list of substantive areas of sociological interest.

Each part of the course involves a two-hour weekly seminar, with written work and oral presentations throughout the year.

1. Social Inquiry A consists of a number of choices in a variety of topics relevant to recent developments in sociological theory and research.

2. Options available in 1978 are expected to include:
Sociology of Deviance; Social Attitudes: Sociology of Interpersonal Relations A; Women and Society; Medicine and Society; Urban Sociology A; Film and Society; Race Relations A; Sociology of Literature and Drama A; Sociology of Migration A; Plural Societies and Developing Countries A; Sociology of the Family A; Law and Society A; and Topics in Social Anthropology A.

Note
Certain options offered by other Schools in the Faculty of Arts can be taken by students enrolled in either 53.305 (or 307) or 53.306 (53.308) and will be credited towards degree requirements, with the approval of the Head of the School of Sociology.

Prerequisites are the same as for 53.305, 53.306, 53.307 and 53.308. These options are available also in the Schools of History and Philosophy of Science, Spanish and Latin American Studies, French, Economics, German, and Industrial Relations.

(1) Sociology of Deviance
The characteristics of social deviance. Theories of deviant behaviour. Types of deviants and aspects of social and criminal deviance. Social control and development of corrective treatment.

(2) Social Attitudes
The role of personality differences in influencing the relations people adopt to societal institutions. The reciprocal effects of societal institutions on the formation of personality. Due to topic's wide range only one or two personality types and one or two sub-sets of society are stressed. An intensive treatment of the personality and attitude correlates of:
• working class membership;
• political preference;
• authoritarianism and alienation.

(3) Sociology of Interpersonal Relations A
It has long been recognized by both sociologists and psychologists that the crucial determinants of individual identity are to be found in the web of 'primary' relations which surround the individual.

An attempt to examine the structure and consequences of these primary relations: the interpersonal dynamics of the family and its relation to the 'self'; the form of social exchanges between such dyadic pairs as husband-wife, parent-child, peer-peer, romantic lovers etc.

Examination of these dyads involves a consideration of the process of privatization, the structure of expectations, the types of reciprocity, the nature of dyadic cohesion, the nature of dyadic transactions, the nature of interpersonal communication, and the processes of the development of a 'self'.

(4) Women and Society
A study of the social role of women. Sex as a factor in social stratification. Discrimination against women in education, politics, work and the law. The concepts of the 'dual role' and the 'feminine character'. Feminist movements and theories of women's literature.

(5) Medicine and Society
Five sub-sections: (a) basic relationships between the disciplines of sociology, medicine, social psychiatry and anthropology; (b) the reciprocal nature of patient-healer relationships; (c) the hospital as a small community; (d) the organization of medical and health services on a comparative basis, including some medical politics; (e) aspects of methodology and a search for unifying conceptual structures.

(6) Urban Sociology A
The study of urban environments and the forms of urban social structures which accompany them. Emphasis is laid on social values as shapers of urban regions and on the social identity, social change and power aspects in urban environments.

Includes a research project concerned with collecting information about some aspect of urban life.

(7) Film and Society
Film represents a formalization of the symbolic interchange that makes up the culture of a society. Film as an industry, a cultural extension and as a communication system. Opportunities for the production by students of films of their own devising, as well as analysis and discussion of current movies. Students are expected to attend movies related to the course.

(8) Race Relations A
The study of inter-group relations based on 'racial' and 'ethnic' differences. The developments and character of 'racist' theories. Racial prejudice: its origins and nature. The history and structure of racial discrimination in modern societies.
The objective of the course is to introduce students to current 
1. A further optional choice from a list of substantive areas of 
2. The range of topics embraces area courses in Latin American 
3. Discussions of such topics as order and justice in society; 
4. The history and structure of race relations in Australia; an 
5. A detailed study of particular novels and plays written in 
6. Takes a wide-ranging look at some sociological aspects of 
7. The culture, structure and organization of overseas Asians; 

53.308 Sociology IIIIB (1 unit)

Prerequisite: 53.305.

1. Social Inquiry B.
2. A further optional choice from a list of substantive areas of 
3. Social Inquiry B consists of one two-hour seminar per week. 

philosophical and political debates about the procedures, 
standards and status of social inquiry.

2. Options available in 1978 are expected to include: Criminology; Science, Technology and Society; Sociology of Religion B; Urban Sociology B; Race Relations B; Sociology of Literature and Drama B; Work, Leisure and Society; Plural Societies and Developing Countries B; Sociology of the Family B; Law and Society B; and topics in Social Anthropology B

(1) Criminology

(2) Science, Technology and Society
(a) The nature of science—Interaction between growth of science, the process of research, and society.
(b) Social influences on the nature and development of science.
(c) The invention-innovation process.
(d) Society's control over science.
(e) The impact of science and technology on society.
(f) Science, technology and war.

(3) Urban Sociology B
Follows on the theoretical background acquired in Urban Sociology A concentrating on metropolitan problems in Australia, with special attention to Sydney metropolitan area. Probes into access to benefits in the city and the attempts at informal organization by ethnic groups of citizen participation demands against the formal organizational structure of the metropolis.

A research project into some aspects of urban life forms part of the course.

(4) Race Relations B
The history and structure of race relations in Australia; an analysis of Aboriginal society, the history of black/white confrontation, the development of Aboriginal organization and action.

(5) Sociology of Literature and Drama B
A detailed study of particular novels and plays written in several industrial societies in the 19th and 20th centuries, in conjunction with a study of the social theories of industrialization and modernization.

(6) Work, Leisure and Society
Takes a wide-ranging look at some sociological aspects of work and leisure—in particular, the way that societal assumptions about these two notions help determine the shape of many social institutions.

(7) Plural Societies and Developing Countries B
The culture, structure and organization of overseas Asians; ethnic minority problems in industrialized and traditional societies; the relationship between minorities and central governments before and after independence; current events such as absorption of Vietnamese refugees in Australia and the USA.
(8) Sociology of the Family B
Follows on the theoretical frameworks studied in Part A, with specific application to Australian family studies. Family in Australian history, the role of the family in migration; ideas of national character, values and beliefs about the meaning of marriage and family. Conjugal roles; family and work; family and class; ethnicity and religion in family relationships; family law and social welfare policies; family and community.

(9) Law and Society B (see Law and Society A)
(10) Topics in Social Anthropology B (see Topics in Social Anthropology A)
Both (9) and (10) are an extension of the Session 1. See outline above.

53.307 Sociology IIIC (1 unit)
Excluded: 53.507, 53.508.
Prerequisites: 2nd Year Sociology. Co-requisite: 53.305.
1. Social Inquiry A. A choice not already being taken as part of Section A of 53.305.
2. An option not already being taken as part of Section B of 53.305.

53.308 Sociology IIID (1 unit)
Excluded: 53.507, 53.508.
Prerequisites: 2nd Year Sociology and 53.307. Co-requisite: 53.306.
1. Social Inquiry B. A choice not already taken or being taken in 53.305 or 53.307.
2. An option not already taken or being taken in 53.305 or 53.307.

Advanced Level units
These units are primarily for prospective honors candidates. The content of these units will be based on the same range of subject matter as Sociology IIIA and Sociology IIIB.

53.507 Sociology IIIE (Advanced) (1 unit)
Excluded: 53.307, 53.308.
Prerequisite: 53.501, 53.502 (both at levels satisfactory to the School).
Consists of an option not otherwise taken from 53.305, and in addition students are required to select two weekly seminars.
In 1977 available seminars are expected to include: Advanced Sociological Research A; Advanced Computing and Statistics A; Australian Social Thought A; Psychoanalysis and Society A; Sociology of Knowledge A; Contemporary European Social Thought A;
or approved options, with additional work chosen from 53.305 and not already taken or being taken.
Students should check with School about final details at beginning of the year.

53.508 Sociology IIIF (Advanced) (1 unit)
Excluded: 53.307, 53.308.
Prerequisite: 53.501, 53.502, 53.507 (at a level satisfactory to the School).
Consists of an option not otherwise taken from 53.306, and in addition students are required to select two weekly seminars.
In 1977 available seminars are expected to include: Advanced Sociological Research B; Advanced Computing and Statistics B; Australian Social Thought B; Psychoanalysis and Society B; Sociology of Knowledge B; Contemporary European Social Thought B;
or approved options, with additional work chosen from 53.305 and not already taken or being taken.
Students should check with School about final details at beginning of the year.

Honours Level unit
53.525 Sociology (Honours)
Prerequisites: Satisfactory performance in 53.507 and 53.508.
Students are required to participate in two honours level seminars and to submit a dissertation based on their own research.

Spanish and Latin American Studies
The School of Spanish and Latin American studies offers courses in the language, literature and history of Spain and Latin America. These are divided into two main sequences: one for Spanish speakers, and the other for non-Spanish speakers.

Spanish Speakers: Wherever possible, classes for these students are given in Spanish. In the first year the emphasis falls on literature although some history is also studied. In the second year, courses on history continue while students may choose between courses in linguistics or literature. During the first two years, advanced language instruction is given to those students who, although fluent speakers of Spanish, experience difficulties in writing. In their third year, students may opt to specialize in one or two of literature, history and linguistics.
Non-Spanish Speakers: These students may begin their studies in the School at the introductory or intermediate level, depending on their existing knowledge of the language. In both cases, the first two years of study concentrate on the acquisition of basic language skills. In addition, the study of literature and history is introduced at this level. In the third year the intensive language program continues, but greater emphasis is placed on history and literature, students being offered the choice of specializing in one or other of the two disciplines.

All students in the School may continue their studies up to Fourth Year Honours Level, provided they have performed satisfactorily in previous years.

In addition, courses are available in Latin American history to students not enrolled in the language and literature program. These courses are taught in English and meet requirements of certain other Schools in the Faculty as listed in the Handbook.

Textbook lists for all subjects are available from the Secretary of the School and from distribution centres on campus.

Undergraduate Study

Level I units

65.100 Spanish and Latin American Studies IA
  Introductory Spanish (Double unit)
  For students who have little or no knowledge of Spanish. Intended to give students a sound basis of spoken and written Spanish and to introduce them to the history and culture of Spain and Latin America.

  1. Language
  Four hours per week tutorials; one hour per week laboratory. In both sessions the Spanish language is studied intensively.

  2. History and Society (one hour per week)
  Session 1: Lectures on the history and culture of Spain.
  Session 2: Lectures on the history and culture of Latin America.

65.110 Spanish and Latin American Studies IB
  (Double unit)
  For students already fluent in Spanish. Students with previous knowledge of the language will be admitted into this or the following unit at the discretion of the School.

  1. Literature (two hours per week)
  Session 1: A survey of major works of modern Spanish Literature.
  Session 2: A survey of major works of Golden Age Spanish Literature.

  2. History and Society (one hour per week)
  Session 1: Lectures on the history and culture of Spain.
  Session 2: Lectures on the history and culture of Latin America.

65.120 Spanish and Latin American Studies IC
  (Double unit)
  For students who already have a basic command of Spanish. Students with an existing knowledge of Spanish will be admitted to this or the previous unit at the discretion of the School.

  1. Language
  Three and a half hours per week tutorial; one hour laboratory. In both sessions the language is studied intensively.

  2. History and Society (one hour per week)
  Session 1: Lectures on the history and culture of Spain.
  Session 2: Lectures on the history and culture of Latin America.

Upper Level units

Students of Spanish who know at the beginning of their second year that they will wish to specialize in history in their third year, must enrol in units 65.240 (HE) and 65.241 (IIF), in addition to other courses offered at Second Year Level.

65.200 Spanish and Latin American Studies IIA
  Prerequisite: 65.100 (IA).

  1. Language
  As for 65.200 (IIA)

  2. History and Society (one hour per week)
  Contemporary Society in Latin America.

  3. Literature (one hour per week)
  An introduction to literary studies through modern Spanish American texts.

65.201 Spanish and Latin American Studies IIB
  Prerequisite: 65.200 (IIA).

  1. Language: As for 65.200 (IIA)

  2. History and Society (one hour per week)
  An introduction to literary studies through modern Spanish American texts.

Advanced Level units

Students who have satisfactorily completed 65.100 (IA) and who wish to proceed to Fourth Year Honours Level in Spanish must enrol in 65.250 (IIIA Advanced) and 65.251 (IIIB Advanced). However, these Advanced Units are also open to students who simply wish to study more Spanish at Second Year level. See also Note to Upper Level Units above.
65.250 Spanish and Latin American Studies IIA (Advanced)
Prerequisite: 65.100 IA.
As for 65.200 (IIA) plus composition through literature: seven and a half hours per week total.

65.251 Spanish and Latin American Studies IIB (Advanced)
Prerequisite: 65.250 (IIA Advanced).
As for 65.201 (IIB) plus composition through literature: seven and a half hours per week total.

Upper Level units
Students of Spanish who know that they will wish to specialize in history in their third year must enrol in 65.240 (HE) and 65.241 (IIF), in addition to other courses offered at Second Year level.

65.210 Spanish and Latin American Studies IIC
Prerequisite: 65.110 IB.
In addition to literature students choose to study either history or linguistics.
1. Literature (two hours per week)
A survey of Modern Spanish American Literature.
2. Linguistics (one hour per week)
An introduction to linguistics with special reference to Spanish.
3. History and Society (one hour per week)
Spain in the 19th and 20th centuries.

65.211 Spanish and Latin American Studies IID
Prerequisite: 65.210 (IIC).
In addition to literature students choose to study either history or linguistics.
1. Literature (two hours per week)
Spanish American literature from the chronicles of discovery and conquest to modernism.
2. Linguistics (one hour per week)
As for 65.210 (IIC).
3. History and Society (one hour per week)
Contemporary Society in Latin America.

Advanced Level units
Students who have satisfactorily completed 65.110 (IB) and who wish to proceed to Fourth Year Honours Level must enrol in 65.260 (IIC Advanced) and 65.261 (IID Advanced). However, these units are also open to students who simply wish to study more Spanish at Second Year Level. See also note to Upper Level Units above.

65.260 Spanish and Latin American Studies IIC (Advanced)
Prerequisite: 65.110 (IB).
As for 65.210 (IIC), plus seminar on the writer and society in Modern Spanish America. Four hours per week total.

65.261 Spanish and Latin American Studies IID (Advanced)
Prerequisite: 65.260 (IIC Advanced).
As for 65.211 (IID), plus introduction to modern literary movements. Four hours per week total.

Upper Level units
65.240 Spanish and Latin American Studies IIE
Prerequisite: Level I studies in any one of the following disciplines: Spanish, Political Science, History, Economic History, Sociology. Other students may be admitted by the School.
Spain and Latin America: 1400-1810. Three hours per week lectures; one hour tutorial.
The relationship between Spain and its empire in America: the development of the social, political and economic institutions of the colonies.
This unit must be taken by students who intend to specialize in history in their third year of studies in the School of Spanish. A major sequence in the School in this specialisation would be as follows: 65.100 (IA) or 65.110 (IB) or 65.120 (IC), 65.200 (IIA) and 65.201 (IIIB) or 65.210 (IIC) and 65.211 (IID) or 65.220 (IIG) and 65.221 (IIFH), 65.240 (IIE) and 65.241 (IIIF), 65.300 (IIIA) and 65.301 (IIIB) or 65.320 (IIIC) and 65.321 (IIIH).
This unit is taught in English and is offered for students with Level I studies in one of the social sciences. It may be counted as a unit in a sequence of units taken in the School of History or as part of a unit in the School of Sociology.

65.241 Spanish and Latin American Studies IIF
Prerequisite: Level I studies in any one of the following disciplines: Spanish, Political Science, History, Economic History, Sociology. Other students may be admitted to the unit by the School.
Latin America: 1810-1977. Three hours per week lectures; one hour tutorial.
The reasons why the nations of Latin America, having gained independence from Spanish and Portuguese rule, became enmeshed in other networks of economic and political dependence and how they attempted to extricate themselves from them.
For further general information, see notes to 65.240 (IIE) above.
65.200  Spanish and Latin American Studies IIG  
Prerequisite: 65.120 (IC).

Students of Spanish who know that they will wish to specialize in history in their third year must enrol in 65.240 (IIE) and 65.241 (IIF), in addition to other courses offered at Second Year level.

1. Language (four and a half hours per week)  
An intensive study of the Spanish language.

2. History and Society (one hour per week)  
Spain in the 19th and 20th centuries.

3. Literature (one hour per week)  
An introduction to literary studies through modern Spanish American texts.

Upper Level units  
Pass degree students who have passed 65.201 (IIB), and 65.211 (IID), or 65.251 (IIB Advanced), or 65.261 (IID Advanced) and who wish to specialize in literature should enrol for the first session in either 65.300 (IIIA) or 65.310 (IIIC) and for the second session in either 65.301 (IIB) or 65.311 (IID).

Pass degree students who have passed 65.201 (IIB), 65.211 (IID), 65.251 (IIB Advanced), or 65.261 (IID Advanced) and both 65.240 (IIE) and 65.241 (IIF) and who wish to specialize in history must enrol in 65.300 (IIIA) and 65.301 (IIB) and take the history seminar in each of these units.

Students who have not passed 65.240 (IIE) and 65.241 (IIF) but who wish to specialize in history must seek the permission of the School to be admitted into the history seminars of 65.300 (IIIA) and 65.301 (IIB). Such students must also be enrolled concurrently in 65.240 (IIE) and 65.241 (IIF).

65.221  Spanish and Latin American Studies IIH  
Prerequisite: 65.220 (IIG).

1. Language (four and a half hours per week)  
An intensive study of the Spanish language.

2. History and Society (one hour per week)  
Contemporary Society in Latin America.

3. Literature (one hour per week)  
An introduction to literary studies through modern Spanish American texts.

Advanced Level units  
Students who have passed 65.120 (IC) and who wish to proceed to Fourth Year Honours Level must enrol in 65.270 (IIG Advanced) and 65.271 (IIF Advanced). However, these units are also open to students who simply wish to study more Spanish at Second Year Level. See also note to 65.220 (IIG) above.

65.270  Spanish and Latin American Studies IIG (Advanced)  
Prerequisite: 65.120 (IC).

As for 65.220 (IIG), plus composition through literature as for 65.250 (IIG Advanced): seven and a half hours per week total.

65.271  Spanish and Latin American Studies IIH (Advanced)  
As for 65.221 (IIG), plus composition through literature as for 65.251 (IIF Advanced): seven and a half hours per week total.

65.300  Spanish and Latin American Studies IIIA  
Prerequisite: any of 65.201 (IIB), 65.251 (IIB Advanced), 65.211 (IID), 65.261 (IID Advanced).

1. Language (for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced): four and a half hours per week.
An intensive study of the Spanish language.

2. Literature and History (two hours per week)  
Either
(1) (for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)): A Survey of Modern Spanish literature.
Or
(2) (for students who have passed 65.211 (IID) or 65.261 (IID Advanced)): A Critical Study of Major Works of Spanish literature.
Or
(3) History (additional prerequisites: 65.240 (IIE) and 65.241 (IIF)): Nineteenth Century Latin America.

65.301  Spanish and Latin American Studies IIIB  
Prerequisite: 65.300 (IIIA) or 65.310 (IIIC).

1. Language for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)  
As for 65.300 (IIIA).

2. Literature and History (two hours per week)  
Either
(1) (for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)): A Survey of Spanish Golden Age Literature.
Or
(2) (for students who have passed 65.211 (IID) or 65.261 (IID Advanced)): A Critical Study of Major Works of Modern Spanish Literature.
Or
(3) History (additional prerequisites: 65.240 (IIE) and 65.241 (IIF)): The Cuban Revolution.
65.310 Spanish and Latin American Studies IIIC
Prerequisite: any one of 65.201 (IIB), 65.251 (IIB Advanced), 65.211 (IID), 65.261 (IID Advanced).

1. Language (for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)): As for 65.300 (III A).

2. Literature and Linguistics (two hours per week)
   (1) [for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)]: A Survey of Modern Spanish American literature.
   (2) [for students who have passed 66.211 (IID) or 65.261 (IID Advanced)]:
      Either
      Or

65.311 Spanish and Latin American Studies IIID
Prerequisite: 65.300 (III A) or 65.310 (IIIC).

1. Language (for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)): As for 65.300 (III A).

2. Literature and Linguistics (two hours per week)
   (1) [for students who have passed 65.201 (IIB) or 65.251 (IIB Advanced)]: Spanish American Literature from the chronicles of discovery and conquest to modernism.
   (2) [for students who have passed 65.211 (IID) or 65.261 (IID Advanced)]:
      Either
      Or
      Linguistics: Sociolinguistics with reference to Spanish.

65.320 Spanish and Latin American Studies III G
Prerequisite: 65.221 (III H) or 65.271 (III H Advanced).

1. Language (four and a half hours per week)
   Advanced study of the Spanish language.

2. Literature and History (two hours per week)
   Either
   (1) A Survey of Modern Spanish Literature.
   Or
   (2) History [additional prerequisites: 65.240 (III E) and 65.241 (III F)]: Nineteenth Century Latin America.

65.321 Spanish and Latin American Studies III H
Prerequisites: 65.320 (III G) or 65.330 (III J).

1. Language: As for 65.320 (III G)

2. Literature and History (two hours per week)
   Either
   (1) A Survey of Spanish Golden Age Literature.
   Or
   (2) History [additional prerequisites: 65.240 (III E) and 65.241 (III F)]: The Cuban Revolution.

65.330 Spanish and Latin American Studies III J
Prerequisite: 65.221 (III H) or 65.271 (III H Advanced).

1. Language: As for 65.320 (III G)

2. Literature (two hours per week)
   A Survey of Modern Spanish American Literature.

65.331 Spanish and Latin American Studies III K
Prerequisite: 65.320 (III G) or 65.330 (III J).

1. Language:

Advanced Level units

The following eight units are designed for students wishing to proceed to Fourth Year Honours Level. However, they are also open to students who simply wish to study more Spanish at third-year level.

Students wishing to enrol in these units but who have not completed the second-year advanced work which forms the prerequisite for enrolment may be admitted at the discretion of the School, provided that they complete all outstanding Level II advanced work concurrently with enrolment in these units.

Intending Fourth Year Honours students must enrol in one of the following combinations of units:

1. Candidates for single special honours should, if they have passed 65.251 (III B Advanced) or 65.261 (III D Advanced), enrol in units 65.350 (III B Advanced), 65.351 (III B Advanced), 65.360 (III C Advanced) and 65.361 (III D Advanced). If they have passed 65.271 (III H Advanced), they should enrol in 65.370 (III I Advanced), 65.371 (III I Advanced), 65.380 (III J Advanced) and 65.381 (III K Advanced).

2. Candidates for combined special honours should, if they have passed 65.251 (III B Advanced) or 65.261 (III D Advanced), enrol in the Session 1 in either 65.350 (III B Advanced) or 65.360 (III C Advanced) and in the Session 2 in either 65.351 (III B Advanced) or 65.361 (III D Advanced). If they have passed 65.271 (III H Advanced), they should enrol in the Session 1 in either 65.370 (III I Advanced) or 65.380 (III J Advanced), and in the Session 2 in either 65.371 (III I Advanced) or 65.381 (III K Advanced).
65.350 Spanish and Latin American Studies IIIA (Advanced)
Prerequisite: satisfactory performance in 65.250 (IIA Advanced) and 65.261 (IIB Advanced). 
As for 65.300 (IIIA), plus one of the following (one extra hour per week):
1. Seminar on critical methods for students specializing in literature.
2. Project for students specializing in history.

65.351 Spanish and Latin American Studies IIIB (Advanced)
Prerequisite: 65.350 (IIIA Advanced) or 65.360 (IIIC Advanced). 
As for 65.301 (IIIB), plus as for 65.350 (IIIA Advanced).

65.360 Spanish and Latin American Studies IIIC (Advanced)
Prerequisite: satisfactory performance in 65.250 (IIA Advanced) and 65.261 (IIB Advanced). 
As for 65.310 (IIIC), plus one of the following (one extra hour per week):
1. Seminar on critical methods for students specializing in literature.
2. Project for students specializing in linguistics.

65.361 Spanish and Latin American Studies IIID (Advanced)
Prerequisite: 65.350 (IIIA Advanced) or 65.360 (IIIC Advanced). 
As for 65.311 (IIID), plus as for 65.360 (IIIC Advanced).

65.370 Spanish and Latin American Studies IIIG (Advanced)
Prerequisite: satisfactory performance in 65.270 (IIIG Advanced) and 65.271 (IIH Advanced). 
As for 65.320 (IIIG), plus one of the following (one extra hour per week):
1. Seminar on critical methods for students specializing in literature.
2. Project for students specializing in history.

65.371 Spanish and Latin American Studies IIIH (Advanced)
Prerequisite: 65.370 (IIIG Advanced) or 65.380 (IIIJ Advanced). 
As for 65.321 (IIIH), plus as for 65.370 (IIIG Advanced).

65.380 Spanish and Latin American Studies IIIJ (Advanced)
Prerequisite: satisfactory performance in 65.270 (IIIG Advanced) and 65.271 (IIH Advanced). 
As for 65.330 (IIJJ), plus seminar on critical methods (one extra hour per week).

65.381 Spanish and Latin American Studies IIJK (Advanced)
Prerequisite: 65.370 (IIIG Advanced) or 65.380 (IIIJ Advanced). 
As for 65.331 (IIJK), plus as for 65.380 (IIIJ Advanced).

Honours Level units

65.400 Spanish and Latin American Studies (Honours)
Prerequisite for candidates for the single special honours degree: satisfactory performance in either all of 65.350 (IIIA Advanced), 65.351 (IIIB Advanced), 65.360 (IIIC Advanced) and 65.361 (IIID Advanced) or all of 65.370 (IIIG Advanced), 65.371 (IIIH Advanced), 65.380 (IIIJ Advanced) and 65.381 (IIJK Advanced). 
Prerequisite for candidates for a combined special honours degree: one of 65.350 (IIIA Advanced), 65.360 (IIIC Advanced), 65.370 (IIIG Advanced), 65.380 (IIIJ Advanced) and one of 65.351 (IIIB Advanced), 65.361 (IIID Advanced), 65.371 (IIIH Advanced), 65.381 (IIJK Advanced).

1. Language (for students who in their second year of Spanish studies passed 65.250 (IIA Advanced) and 65.251 (IIIB Advanced) or 65.270 (IIIG Advanced) and 65.271 (IIH Advanced)): Advanced study of the Spanish Language.

2. Literature, Linguistics, Thought and History 
Four special subjects in Spanish and Spanish American Studies.

Candidates for a combined special honours degree shall normally study only two subjects.

Special subjects will be chosen by students in consultation with the staff of the School, with the following exception: Students specializing in literature and who in their second year of Spanish studies passed 65.250 (IIA Advanced) and 65.251 (IIIB Advanced) or 65.270 (IIIG Advanced) and 65.271 (IIH Advanced) must offer a seminar on major works of Spanish Literature, plus one of the following:

Either

or
2. (if they are candidates for combined special honours) one special subject of their choice.

A short thesis written in Spanish shall normally be prepared on one of the special subjects.
This timetable is subject to alteration. Students should consult Faculty and School noticeboards for changes, lecture locations prior to enrolment and for subjects not listed. In general, subjects are arranged in alphabetical order, under the heading of the School concerned.

</table>
This Handbook has been specially designed as a source of reference for you and will prove useful for consultation throughout the year.

For fuller details about the University—its organization, staff membership, description of disciplines, scholarships, prizes, and so on, you should consult the Calendar.

The Calendar and Handbooks also contain a summary list of higher degrees as well as the conditions for their award applicable to each volume.

For detailed information about courses, subjects and requirements of a particular faculty you should consult the relevant Faculty Handbook.

Separate Handbooks are published for the Faculties of Applied Science, Architecture, Arts, Commerce, Engineering, Law, Medicine, Professional Studies, Science (including Biological Sciences and the Board of Studies in Science and Mathematics), the Australian Graduate School of Management (AGSM) and the Board of Studies in General Education.

The Calendar and Handbooks are available from the Cashier's Office. The Calendar costs $3.50 (plus postage and packing, 90 cents). The Handbooks vary in cost. Applied Science, Arts, Commerce, Engineering, Professional Studies and Sciences are $2.50. Architecture, Law, Medicine and AGSM are $1.50. Postage is 40c in each case. The exception is General Studies, which is free.
