Subjects, courses and any arrangements for courses including staff allocated as stated in this Handbook are an expression of intent only. The University reserves the right to discontinue or vary arrangements at any time without notice. Information has been brought up to date as at 1 November 1995, but may be amended without notice by the University Council.

CREDIT POINTS - IMPORTANT NOTE

From 1996, UNSW is introducing a university wide credit point system for all subjects offered to both undergraduate and postgraduate students. The system will mean that a subject will have the same credit point value irrespective of which faculty's course it is counting towards. Students will be able to determine the value of subjects taken from other faculties when planning their programs of study. The student load for a subject is calculated by dividing the credit point value of a subject by the total credit points required for the standard program that year of the course. Student load is used to determine both HECS and overseas student fees. Students who take more than the standard load for that year of a course will pay more HECS.

Old subject measures have been replaced by new university credit points. Every effort has been made to ensure the accuracy of the credit point values shown for all subjects. However, if any inconsistencies between old and new credit point measures cause concern, students are advised to check with their faculty office for clarification before making 1996 subject selections based on the credit points shown in this handbook.

Welcome to the Faculty of Arts and Social Sciences at UNSW. Whether you are entering a University for the first time as an undergraduate student, returning for postgraduate work some years after graduation or commencing a research degree, I hope you have a stimulating and enjoyable experience at UNSW.

Most new students have some concerns about whether they will get employment after graduation and whether that employment will provide them with a satisfying career. An Arts and Social Science degree is less of a vocational qualification than many other areas of study in a university but it is nevertheless highly valued in the community. Arts and Social Science graduates are to be found in a broad range of occupations in both the public and private sectors. Indeed, many prominent people holding responsible positions across a wide range of occupations have an Arts degree as their first University qualification. No other course of study provides you with the same combination of broad intellectual growth and specific skills of research, analysis, and the ability to write clearly and concisely. In a world where people increasingly have a number of career shifts in their lifetime, the Arts and Social Science graduate possesses a unique combination of broad intellectual and analytical skills which can be readily transferred from one occupation to another.

In the Faculty of Arts and Social Sciences at UNSW, we pride ourselves on the quality of our teaching and our research. We offer a wide range of disciplines and areas of study and the flexibility to enable students to tailor courses to their personal interests. I urge you to seek advice from your lecturers and from the Faculty administrative staff at all stages of your study.

If you are entering the Faculty as an undergraduate, I would urge you to consider continuing your study into a fourth honours year. For students who excel in their chosen field of study, a fourth year is both personally rewarding and of considerable career advantage. A major part of the honours year is a research thesis in which you will sharpen your research, analytical and writing skills and in the process develop skills and expertise in considerable demand in the workplace.

It is important that you set personal goals for your University study. I hope that you aim high with ambitious goals, that your studies are intellectually exciting and that your experience of the University is enjoyable.

John Ingleson
Dean, Arts and Social Sciences

This Handbook is divided into two main sections comprising undergraduate study and graduate study. Initially, course outlines are presented in each section, providing a guide to the degrees within organisational units. This is followed by a full listing of subject descriptions in each section, which provide full details of subject content, contacts and session/prerequisite details.

As changes may be made to information provided in this Handbook, students should frequently consult the noticeboards of the schools and the official noticeboards of the University.

Faculty Information

Arts Subject Timetable

The timetable for Arts subjects is published in a separate booklet and will be distributed to new students on final enrolment. Later year students will receive a copy of the timetable with their provisional forms, which will be distributed before the end of the current year of study. Other students enrolling in Arts subjects may collect a copy from the Faculty of Arts and Social Sciences Office, Room G1, Morven Brown Building.

Students in Years 2, 3 and 4 are reminded that alterations to the published timetable are occasionally made before the beginning of session. A check should be made with the appropriate school/department during late February for times of Upper Level subjects.

Re-enrolment Procedures

Re-enrolling students must collect a re-enrolment kit from the Arts and Social Sciences Faculty Office (MB G1) in November each year. The provisional enrolment form it contains must be returned by the second last week of December and will ensure that you are correctly and speedily enrolled for the new academic year in February. Students who submit incorrect or incomplete forms will need to attend an enrolment session at the Faculty Office in late January or early February. Students who have not submitted their provisional enrolment form will not be permitted to enrol until a later date and may become liable for a late fee.

Students who fail to complete subjects carrying at least 45 credit points in any year may be required to 'show cause' under Rule 3 of the University’s re-enrolment regulations as to why they should be permitted to proceed with their studies.

Textbooks

Text and reference books are not listed in this Handbook. The University publishes a separate Text and Recommended Book List for each faculty, which is available free of charge from the Faculty Office Room G1, Morven Brown Building from January each year.

Library Facilities

Although any of the University Libraries may meet specific needs, staff and students of the Faculty of Arts and Social Sciences and Social Sciences are mainly served by the Social Sciences and Humanities Library.

The Social Sciences and Humanities Library

This library is designed to serve the specialised reference and research needs of staff, graduate students and undergraduate students.

All students are welcome to use the library and to borrow books from it. The Social Sciences and Humanities Library occupies Level 3 and 4 of the library building. The main services and information desk are on Level 3.

Undergraduate Services

The Open Reserve Section houses books and other materials which are required reading. Lecture cassettes are also available. Study Kits, which are collections of required readings, are available for purchase from Unicopy, Level 2.

The multimedia resources service on Level 3 includes multimedia items, videos, cassette tapes and newspapers. Photocopying facilities are available at Unicopy, the main photocopying area on Level 2; in each of the special subject libraries; and in Open Reserve. Change and assistance are available from Unicopy staff on Level 2.

Library tours are available at the beginning of Session I and self-guided tours are available throughout the year.
Technical Resources Centre

The TRC supports teaching and research activities that require technical facilities such as film, video tape, audio tape and computing.

The Language Laboratories are located in the complex on the first floor of the Morven Brown Building, and classrooms equipped for AV-assisted teaching are situated on both the first and second floors.

The Computer Laboratories are managed by the TRC.

Computing at UNSW

The Division of Information Services (DIS) encompasses information technology and the University Library at UNSW.

Specific University information which is frequently updated is available on the World Wide Web (WWW) in the UNSW home page at http://www.unsw.edu.au which has an index to its contents which includes URLs http://www.acsu.unsw.edu.au and http://www.misu.unsw.edu.au. You can access this information from your workstation and in any computing laboratory with access to WWW through Mosaic or Netscape.

The information provided on the WWW includes more details about DIS information technology units such as points of contact for particular areas of responsibility and services provided.

The Faculty has three computer laboratories equipped with a range of software, including word processing, spreadsheets, database and foreign language programs. Help is available from computer support officers. One of the computer laboratories has 24 hour 7 days per week access.

Several subjects are offered that deal with the use of computers in an Arts environment, including a single session First Year subject titled Introduction to Research Methods and Statistics with Computer Applications (SLSP1001) which, depending on the demand on the facilities, is open to all students in the Faculty.

Student Clubs and Societies

Students have the opportunity of joining a wide range of clubs and societies. Many of these are affiliated with the Students’ Union. There are numerous religious, social and cultural clubs and also many sporting clubs which are affiliated with the Sports Association.

Clubs and societies seeking to use the name of the University in their title, or seeking University recognition, must submit their constitutions to either the Students’ Union or the Sports Association if they wish to be affiliated with either of these bodies, or to the Registrar for approval by the University Council.

For information about the following Societies see under each School’s entry in the Subject Descriptions section:

- The Chinese Language and Cultural Society
- The Collegium Musicum Choir of UNSW
- The English Society
- The French Society
- The Geographical Society
- The German Society
- The Hispanic Society
- The History Students Association
- The Indonesian Study Society
- The Psychological Society
- The Scientia Society
- The Socratic Society (School of Philosophy)
- The Student Association of Social Sciences

Student Representatives

Each year six student members are elected to the Faculty to represent all students studying Arts subjects. These students have full voting rights at Faculty meetings and committees and hence a direct input in decisions affecting Arts students.

Student representatives can be contacted through the Arts and Social Sciences Faculty Office, Room G1, Morven Brown Building.

Students With Disabilities

The University of New South Wales has a policy of equal opportunity in education and seeks wherever possible to ensure maximum participation of students with disabilities.

The University offers a range of assistance: examination support; specialised equipment; educational support; parking provisions; library assistance.

A Resource Guide for students and staff with disabilities and a map showing wheelchair access is available from the Adviser to Students with Disabilities, the EEO Unit, the Library and the Students’ Union.

It is advisable to make contact with the Adviser to Students with Disabilities prior to, or immediately following enrolment, to discuss your support needs.

The Adviser can be contacted on 385 5418 or at Student Services, Quadrangle Building.

General Education Program

UNSW requires that all undergraduate students undertake a structured program in General Education as an integral part of studies for their degree. The University believes that a general education complements the more specialised learning undertaken in a student’s chosen field of study and contributes to the flexibility which graduates are increas-
The General Education Program at UNSW intends to both career and personal development.

The General Education Program at UNSW intends to broaden students' understanding of the environment in which they live and work and to enhance their skills of critical analysis.

Objectives of the General Education Program

The following objectives were approved by the Council of the University in December 1994.

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.

2. To enable students to evaluate arguments and information.

3. To empower students to systematically challenge received traditions of knowledge, beliefs and values.

4. To enable students to acquire skills and competencies, including written and spoken communication skills.

5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.

6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.

7. To provide structured opportunities for students from disparate disciplines to co-operatively interact within a learning situation.

8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist subjects offered in those other areas.

9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross- and interdisciplinary connections.

10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education requirements

The basic General Education requirements are the same for students in all courses:

- Four (4) session length subjects carrying 7.5 credit points each or their equivalent in combinations of session length and year long subjects

- An additional fifty-six (56) hours of study which fosters acceptance of professional and ethical action and social responsibility. This fifty-six hours of study may be distributed throughout the course, or exist as a separate subject, depending on the course.

Because the objectives of General Education require students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation, all students are excluded from counting subjects toward the fulfilment of the General Education requirement, which are similar in content or approach to subjects required in their course.

Each Faculty has responsibility for deciding what subjects are not able to be counted towards the General Education requirement for their students. In most cases, this means that subjects offered by the Faculty in which a student is enrolled, or subjects which are a required part of a course even though offered by another Faculty, are not able to be counted toward the General Education requirement.

Students should consult the Faculty of Arts and Social Sciences General Education booklet for detailed information about what subjects may and may not be taken to fulfill the General Education requirements for each course offered by the Faculty. The General Education booklet is freely available from the Faculty Office.

Students Beginning in 1996

Students who enrol in the Faculty of Arts and Social Sciences for the first time in 1996 will begin their General Education program in their second year of study. The rules governing the General Education requirements for these students will be developed during the first half of 1996 and will come into effect at the beginning of 1997.

Students Continuing in 1996

Students who first enrolled in the Faculty in 1995 or earlier will receive credit for the General Education subjects they completed under the rules which applied at that time. They will satisfy the University's new requirements by completing the remaining portion of their General education program under the following rules:

1. Students are required to complete approved General Education subjects carrying 30 credit points, or other subjects approved for substitution.

2. At least 7.5 credit points must be obtained in General Education subjects approved for inclusion in the area of 'Science, technology and the built environment', except where a student has completed at least 30 credit points (or the equivalent) in:

(a) one of the following disciplines: Biological Science (BIOS), Chemistry (CHEM), Computer Science (COMP), Applied Geology (GEOL), Mathematics (MATH), Physics (PHYS), Psychology (PSYCH), or

(b) Geography (GEOG) subjects approved for inclusion in the area of physical geography; or

(c) Education Studies (EDST) subjects approved for inclusion in the area of educational psychology; or

(d) subjects approved for substitution in the area of 'Science, technology and the built environment'.

3. At least 7.5 credit points must be obtained in General Education subjects approved for inclusion in the area of 'Business, commerce and related legal matters', except where a student has completed at least 30 credit points (or the equivalent) in:
(a) one of the following disciplines: Economics (ECON), Industrial Relations and Organisational Behaviour (IROB); or
(b) subjects approved for substitution in the area of 'Business, commerce and related legal matters'.

The exemption from General Education requirements for some double or combined degree programs will continue to apply for students who enrolled in these exempt courses prior to 1996.

Approved General Education Subjects

The list of approved General Education subjects for students in the Faculty of Arts and Social Sciences, together with the lists of subjects approved for inclusion in the areas referred to in rules 2 and 3 above, may be found in the Faculty's General Education booklet.

Substitutions

Students may apply to complete subjects taught outside the General Education program in substitution for those taught within the program. Subjects approved for substitution will not normally include those taught by Schools located within the Faculty of Arts and Social Sciences. Applications for substitution should be lodged at the office of the Associate Dean, room LG16 of the Morven Brown Building.

Equal Opportunity in Education Policy Statement

Under the Federal Racial Discrimination Act (1975), Sex Discrimination Act (1984), Disability Discrimination Act (1992) and the New South Wales Anti-Discrimination Act (1977), the University is required not to discriminate against students or prospective students on the grounds of sex, marital status, pregnancy, race, nationality, national or ethnic origin, colour, homosexuality or disability. Under the University of New South Wales Act (1989), the University declares that it will not discriminate on the grounds of religious or political affiliations, views or beliefs.

University Commitment to Equal Opportunity in Education

As well as recognising its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards her/his maximum potential. The University further commits itself to course design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

Special Admissions Schemes

The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment.

Support of Disadvantaged Students

The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, the Supportive English Program and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

Course Content, Curriculum Design, Teaching and Assessment, and Printed Material

Schools and faculties will monitor course content (including titles), teaching methods, assessment procedures, written material (including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

Equal Opportunity Adviser Scheme

The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

Harassment Policy

The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.
How to Structure your Degree Program

1. Bachelor of Arts Course 3400

The basic requirements for the degree are:

1. a total of 330 credit points. Each subject offered by the Faculty has a credit point rating, depending on the number of hours taught and the type of subject.

2. 120 credit points obtained in Level 1 subjects ie subjects designed for students in their first year of study. Of these, no more than 30 can be in any one school or department. 60 credit points must be obtained from subjects offered specifically by the Faculty.

3. a major sequence in one of the following:

   CHIN Chinese
   ENGL English
   FREN French
   GERS German Studies
   GREK Greek, Modern
   HIST History*
   INDO Indonesian
   LING Linguistics
   MUSI Music
   PHIL Philosophy
   POLS Political Science
   RUSS Russian Studies
   SCTS/HPST Science and Technology Studies*
   SLSP Policy Studies
   SOCI Sociology
   SPAN Spanish and Latin American Studies
   THFI/THST/FILM Theatre and Film Studies

   * A combined program in HIST/HPST also satisfies the major requirement.

A major sequence is an approved progression of subjects in a school, department or program: you will find details under the relevant entry in Subject Descriptions.

4. at least 150 credit points must be gained in subjects offered by schools, departments or programs within the Faculty.

5. at least 150 credit points gained in subjects outside the school/department in which you are majoring, so that your program does not become too one-sided.

6. during their second and third years of study, students are also required to complete thirty credit points from the University's General Education Program. These subjects are part of the requirements for the degree and do not incur an additional HECS or fee obligation. For details, see the Faculty's General Education booklet.

How to Choose Your First Year Program

You must include the first year requirements for at least two major sequences in schools or departments within the Faculty of Arts and Social Sciences, as you must complete at least one to qualify for the degree. Find the subjects you need from the corresponding entries in Subject Descriptions: this will normally account for 60 credit points of your first year program. In deciding what other subjects to enrol in, it may be a good idea to look at the section Subject Areas within the Faculty and the index listing Undergraduate Study, to see which subjects best complement the ones you have chosen. These may not necessarily be 'close relations'; for instance, a foreign language may be extremely useful for a history major, and vice versa. Unless you are a part-time student, you should enrol in subjects carrying 120 credit points.

Upper Level and Honours Entry

In structuring your program for second and third year Upper Level, it is essential that you fulfil the requirements for a major sequence in the school(s) or department(s) in which you are specialising. If you have any doubts about them, make sure you consult a member of staff before enrolling in second year. Try to complement your majors with subjects which will provide you with skills and perspectives which will contribute to a broader and more critical approach to your special areas of interest. Major sequences offered by programs such as AUST Australian Studies are designed to provide this kind of context. Although, in most cases, they cannot be taken as the only major in your degree, they offer an interdisciplinary alternative to a sec-
2. Bachelor of Social Science Course 3420

The basic requirements for the degree are:

1. a total of 330 credit points. Each subject offered by the Faculty has a credit point rating, depending on the number of hours taught and the type of subject.

2. 120 credit points in the core subjects of the BSocSc degree program, each of which carries 15 credit points:

**First Year**
- SLSP1000 Introduction to Social Science and Policy
- SLSP1001 Introduction to Research Methods and Statistics with Computer Applications

**Second Year**
- SLSP2001 Research Methods and Statistical Applications
- SLSP2002 Social Science and Policy Case Studies

**Third Year**
- SLSP3000 Advanced Research Methods
- SLSP3001 Applied Statistics and Computing in the Social Sciences
- SLSP3002 Social Science and Policy Project

- **Essential** for intending Honours students. If you want to proceed to fourth year Honours Level in one or two schools or programs, you should work out a program which fulfills the requirements for Honours Level entry with the Head of School or course co-ordinator concerned as early as possible in second year; with Combined Honours (Honours in two schools/programs) in particular, this can avoid many later problems such as missing prerequisites. Details of requirements for Honours entry can be found under the relevant entry in Subject Descriptions.

- MATH* Mathematics
- PHILO Philosophy
- POLS Political Science
- PSYC Psychology
- SCTS/HPST Science and Technology Studies

A major sequence is an approved progression of subjects in a school or program: you will find details under the relevant entry in Subject Descriptions. If you wish to take your major sequence in an area other than those above, you may apply to the Head of School for special permission.

4. 120 credit points obtained in Level 1 (first year) subjects, including the two core subjects, the first year subjects of your major sequence and two other electives.

5. during their second and third years of study, students are also required to complete subjects from the University's General Education Program carrying the equivalent of thirty credit points. These subjects are part of the requirements for the degree and do not incur an additional HECS or fee obligation. For details, see the Faculty's General Education booklet.

*Students majoring in these subjects must also complete a sequence of 60 credit points in a discipline listed other than Computer Science or Mathematics.
How to Choose Your First Year Program

Enrol in the core subjects SLSP1000 and SLSP1001 (see 2. above); then choose one area from 3. above you would like to major in, and enrol in the appropriate first year (Level 1) subjects. Then select additional subjects to make up a total of 120 credit points. 60 Level 1 credit points must be selected from subjects offered by the Faculty.

Upper Level and Honours Entry

In second and third year, enrol in the prescribed core subjects (see 2. above) and the necessary subjects for your major sequence. The additional credit points should be taken either in the area you chose as a possible second major or in other Upper Level subjects. You must also enrol in the prescribed subjects from the University's General Education program. Try to spread your workload evenly over the four sessions of study.

In addition, students who intend to apply for entry to the Honours year should enrol in SLSP3005 in the third year of study.

3. Bachelor of Music Course 3425

The School of Music and Music Education offers a Bachelor of Arts (BA) with a major sequence in music and a Bachelor of Music (BMus) degree. The BMus signifies a greater degree of specialisation in music than the BA, and provides opportunities for professional development throughout the degree in the areas of musicology, ethnomusicology, performance, composition, music technology and jazz studies. It is also available as an Honours degree.

Entry to the BMus is by audition and University entry score. The sequence of subjects in the BMus allows for specialisation in musicology, performance, composition or jazz studies. The Contextual Studies component requires the completion of subjects totalling 90 credit points from existing subjects offered by the Faculty of Arts and Social Sciences, the Board of Studies in Science and Mathematics and the General Education program. This program satisfies the University’s General Education requirement (see Table 1).

The BMus (Pass) degree requires a total of 300 credit points and the Honours degree a total of 420 credit points.

Honours Level

Prerequisite: Completion of all requirements for the Pass degree with an average of at least Credit level in music subjects.

MUSI4000 Bachelor of Music Honours

4. Bachelor of Music Bachelor of Education Course 3426

The School of Music and Music Education offers a four-year full-time double degree for intending specialist music educators leading to the award of Bachelor of Music Bachelor of Education (BMus BEd). The BMus BEd is a professional double degree which develops skills in five distinct areas of competence. Consolidation of the professional responsibility of music educators plays a central role throughout the music education sequence, and culminates in the 50 day extended period of practice teaching.

Entry to the BMus BEd is by audition and University entry score.

To qualify for the BMus BEd at Pass level, a student must obtain at least 360 credit points normally taken from the five major components listed below:

For entry to Honours in the BSocSc degree course, you must have demonstrated over the three years of the course that you have reached a sufficient standard, and apply to the Head of School for admission. If you wish to go on to Honours, you should ask staff in the program for advice on planning your course and defining your research interests at an early stage, perhaps during second year.

The BSocSc Honours Degree may be taken in three ways:

1. BSocSc Honours, with a Major in an approved area;
2. Combined BSocSc / approved area Honours. This program is undertaken in co-operation with a school offering a Combined Honours program.
3. BSocSc Honours Economics

For details see the relevant entries under Undergraduate Study: Subject Descriptions (SLSP).

Note: In their first year of study, students may not enrol in subjects carrying more than 60 credit points in the Faculty of Commerce and Economics.

2. Music Education (70 credit points): MUSI1600 Music Education 1, MUSI2600 Music Education 2, MUSI3600 Music Education 3, MUSI4600 Music Education 4, and MUSI4601 Extended Practice Teaching.
4. Education Studies (60 credit points): Six subjects (each of 10 credit points) selected from core and elective
subjects offered by the School of Education Studies and School of Teacher Education. School of Education Studies: Core subjects EDST1101 Education Psychology 1 and EDST1102 Social Foundations of Education which are prerequisites for an additional two electives (each of 10 credit points) offered by the School of Education Studies. The Year 4 subject MUSI4226 Special Education is required for NSW Department of School Education teacher registration. At the discretion of the Course Co-ordinator for Music Education, students may be permitted to substitute MUSI4602 Principles and Processes of Music Education (10 credit points) for one of the two School of Education Studies electives.

5. Contextual Studies (60 credit points): Selected from existing subjects offered by the Faculty of Arts and Social Sciences, the Board of Studies in Science and Mathematics and the General Education Program. This program satisfies the University's General Education requirement. For a typical schedule of subjects for the BMus BEd, see Table 2.

**Honours Level**

Prerequisite: Completion of all requirements for the Pass degree with an average of at least Credit in all music (in the case of Honours in music) or music education (in the case of Honours in music education) subjects.

Subject Descriptions

Descriptions of all subjects are presented in alphanumeric order within organisational units. For academic advice regarding a particular subject consult with the contact for the subject as listed. A guide to abbreviations and prefixes is included in the chapter 'Handbook Guide', appearing earlier in this book.

Art Theory

Subjects in Art Theory are offered by the School of Art History and Theory at the College of Fine Arts and taught on the Paddington Campus. There will be a limit on the number of places available to Arts students.

Introduction

While the theorisation of art may be traced back to Plato, Art Theory is a relatively recent university discipline arising from developments in Art History (leading to the emergence of what has been termed 'the New Art History'), the growth of Cultural Studies and the impact of interdisciplinary methodologies upon the arts. As an interdisciplinary subject, Art Theory entails the employment of a diverse range of tools and methodologies in approaching art as a cultural, social, philosophical, as well as historical object.

Subjects offered within the Art Theory program are designed to locate the study of art within such an interdisciplinary context. Topics include: the construction of Western art history, the idea of the ‘artist’ in art history and the popular imagination, the relationships of Western to non-Western art, colonial expansion and relationships of cultural centres to colonised margins, distinctions between the mass culture of television, films, the popular press, advertising and the culture of museums. Other issues include the relationship of culture to society and the linkage between vision and science, looking and sexuality. Subjects are offered at both Level 1 and Upper Level.

Major Sequence

A major sequence consists of 90 credit points in Art Theory subjects offered by the College of Fine Arts (30 Level I and 60 Upper Level credit points).

All subjects are 15 credit points in value.

Level 1

ARTH1001 Theories of the Image

Level 1

ARTH1001 Theories of the Image

Staff Contact: Graham Forsyth
CP15 S1 HPW3

An introduction to ways of understanding and evaluating the making, reception and theoretical understandings of images in our culture. Different cultures and historical periods have treated images in radically different ways, with different ways of understanding the way images relate to their producer(s), viewer(s) and to the world. These issues are addressed by critically examining ways of understanding the artistic image in Western and non-Western arts, and in crucial developments in Western art history.
ARTH1005
Theories of Art History and Culture
Staff Contact: Graham Forsyth
CP15 S2 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
This subject is an introduction to art history and cultural analysis. It critically analyses the ways in which art history has been understood and the ways in which art history has mediated and affected how viewers understand artworks. This subject will critically examine the 'grand narratives' which have ordered historical material in Western art and its histories. Such 'grand narratives' as 'classicism'; mimesis; the nature of representations of the environment through such genres as 'landscape' and 'cityscape'; formations of gender, sexuality and the body through images of 'the nude'; and notions of race as insinuated through such stylistic classifications as 'orientalism' and 'primitivism' will be critically discussed.

ARTH2003
Mythologies of the Artist: A Social History
Staff Contact: Dr David McNeill
CP15 S2 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
Examines the historical and social constructions of the 'artist as subject' within Western culture. Shifts that took place between circa 1400 to 1900 from the artist as craftsperson to inspired creator to alienated genius, are examined in relation to social, cultural and political contexts. A range of positions within Modernism are then considered, such as artist as innovator, visionary, custodian of cultural values, provocateur, social engineer. These positions are related to earlier conceptualisations.

ARTH2005
Images and Issues In Non-Western Art
Staff Contact: Dr Diane Losche
CP15 S1 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
Examines the variety of non-Western cultural forms in Western art via a variety of issues including: is art recognised as an appropriate category to use when looking at particular non-Western cultures? What are the implications of applying the category of art to such forms? What implications do non-Western cultural forms have for theories of culture, art, society, knowledge and power? The issues raised are necessarily interdisciplinary in character and cross domains of knowledge such as anthropology, art, aesthetics, philosophy and history.

ARTH2007
Art and Cultural Difference
Staff Contact: Dr Diane Losche
CP15 S1 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
The conceptualisation of difference, diversity and multiplicity, both within and across cultural boundaries, has occupied a central position in the historical trajectory of Art, particularly since the end of World War II. The relationship of theories of ethnicity, gender, race and culture to the complex histories and practices of art will be addressed. These topics will be addressed by critically examining the writings of Adorno, Benjamin, Freud, Irigaray and Marx, as well as theorists and artists of colonial struggle.

ARTH3001
Art and the Culture of 'Everyday Life'
Staff Contact: Dr Jill Bennett
CP15 S2 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
Looks at the position of art in relation to the proliferation and complexity of mass culture, including the aestheticization of everyday life and the ways in which art's communicative role has been altered by the pervasiveness of mass media. Cultural studies provides tools for reading art in the light of television, film, computer imaging, the popular press and advertising. Also useful are Baudrillard's concept of microhistories, Bakhtin's philosophy of the ordinary, de Certeau's notion of productive consumption, and Baudrillard's theory of the 'spectacle'.

ARTH3003
The Philosophy of Taste
Staff Contact: Graham Forsyth
CP15 S1 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
Examines the major structures and ways of thinking which have constituted and transformed the practices of criticism and evaluation in the modern era and encompasses the social, political, economic and theoretical dimensions of present ways of understanding criticism and evaluation. It begins by examining the discourse on taste and aesthetic value that was so prominent in the 18th century, and concludes with contemporary value discourse (often under the rubric of 'postmodernism').

ARTH3005
Art in History
Staff Contact: Dr Alan Krell
CP15 S2 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
Provides the framework within which the detailed examination of a period or artist or issue can be undertaken. Content and orientation of the subject are intended to reflect the different interests of staff, and may vary from session to session. Examples of options that may be offered: Modern Paintings, Modern Life: Impressionism and Parisian Society; Culture, Psychoanalysis and Revolution: Image and Word in Surrealism; Relativism and the Arts of Fragmentation; Intervar Debates and the Frankfurt School; Soviet Culture: From Stalinization to Perestroika; Cultural Imperi-
Philosophies of History
Staff Contact: Dr David McNeil
CP15 S2 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission
This subject introduces the different ways of conceiving the domain, methods, functions and definition of history. Beginning with an examination of historicism, empiricism and hermeneutics, the subject proceeds to look at various formulations of history in terms of myth, narrative, archaeology and finality. Each of these topics is illuminated by a discussion of theorists including Reid, Comte, Dilthey, Sartre, Barthes, Foucault and Baudrillard. The relevance of their writings to art history is explored.

Australian Studies

Co-ordinator: A/Prof Elaine Thompson (Political Science)
The study of Australia is fundamental to any attempt to define Australian identity and society.
Subjects offered within the Australian Studies program are designed to provide an interdisciplinary Australian 'context', and are available to all students within the Faculty. They form excellent 'extensions' to majors in History, Political Science, Sociology, English, Theatre and Film Studies, and Science and Technology Studies.

Major Sequence

A major sequence is also available, which may be counted as a 'second major' under the BA Degree Rules. It requires the completion of 90 credit points in AUST (Australian Studies) subjects, including 30 Level 1 credit points in AUST (Australian Studies) subjects.
Aboriginal studies are an integral part of Australian Studies. Students are expected to include at least one upper level Aboriginal subject in their major.
It is also possible to substitute 45 credit points from the discipline-based Australian Studies subjects listed under Subject Areas in the Faculty earlier in this handbook.

The Australian City  
Staff Contact: Anne-Marie Willis  
CP15 S2 HPW3  
Prerequisite: 60 Level 1 credit points in Arts  
The cultural fascination with outback imagery and wide open spaces has tended to obscure the fact that since the 1890s Australia has been one of the world's most urbanised nations. Seeks to rectify this by asking questions about the nature of urban experience in Australia from both historical and contemporary perspectives. Themes include: city as metaphor, city and economy, city and politics, colonial settlement, suburbanisation, modern Sydney and contemporary projections for city futures (particularly those that address the ecological crisis). The city is viewed as a subject of intertextual encounter, with material from academic and official discourses, literary, architectural and visual art sources being drawn upon.

**Cognitive Science**

*Co-ordinator: Philip Cam, School of Philosophy*

In the last ten years Cognitive Science has emerged as an
exciting and fruitful domain of enquiry in which there is a
convergence of interests in a number of disciplines which
deal with mind, language, knowledge and intelligence. The
Cognitive Science movement is based on a broad consen-
sus that the problems and issues do not belong exclusively
to any one discipline, but fall collectively to all of them.

The Cognitive Science Program is designed to comple-
ment a School-based major sequence by grouping subjects
within the fields of Philosophy, Psychology, Linguistics, and
Computer Science, which have special relevance to Cog-
nitive Science. It provides the opportunity for students who
undertake one or more of the Level 1 subjects in the
relevant disciplines to become acquainted with the broader
enterprise of Cognitive Science through participation in the
core subject HPST2109 Computers, Brains and Minds, and
to build upon that acquaintance in selecting further subjects
from the program. Students should take the core subject in
their second year of study.

**Major Sequence**

Entry to the program requires 30 credit points from the Level
1 prerequisite subjects listed below. A major in Cognitive
Science requires not less than 60 credit points from the
Upper Level subjects listed in the program, including the
core subject. If you wish to major in Cognitive Science,
these Upper Level subjects may not be counted toward a
major sequence in a School or Department. In planning your
program for the degree, you should make sure that you
meet the prerequisite requirements of individual sub-
jects, unless granted exemption by the subject authority.

**Level 1 Prerequisites:** 30 credit points obtained in any of the
following subjects:

- BIOS1101 Evolutionary and Functional Biology
- BIOS1201 Cells, Molecules and Genes
- COMP1811 Computing 1 Procedural
- COMP1821 Computing 2
- HPST1108 Science: Good, Bad and Bogus. An
  Introduction to the Philosophy of Science
Upper Level

Core subject:

Studies in Comparative Development

Co-ordinators: J.R. Levy, Department of Spanish and Latin American Studies; Peter Ross, Department of Spanish and Latin American Studies

The program in Studies in Comparative Development is designed to enable students to construct an interdisciplinary major focusing on Comparative Development, and it provides an excellent extension to a major sequence in another social science area. The focus of this program is on connections throughout world history, and an investigation of the origins of a rich world and a poor world.

A major sequence in COMD may be taken as an additional major sequence together with a major from the approved major sequences listed in Rule 11 (3) of the BA Rules. Students are advised that the COMD program is designed to complement, most particularly, a major in Economic History, History, Political Science, Science and Technology Studies, Sociology and Spanish and Latin American Studies. Subjects in the program will also be of considerable interest to students studying Economic History or languages. Subjects may not be counted towards more than one major sequence.

To complete a major sequence you must take the three compulsory COMD subjects listed below, totalling 45 credit points, and a further 45 points from the other COMD subjects listed below. With the approval of the co-ordinator of the COMD program, subjects from other schools may be substituted for 30 of these 45 optional credit points. Many of these subjects will have their own prerequisites, and you must also fulfill Faculty of Arts and Social Sciences requirements concerning your distribution of subjects. Please check school entries for subject descriptions and availability, and consult with the school of your home-based major and the co-ordinator of the Studies in Comparative Development program about the best combinations of subjects in your two major sequences.

Economic History

Economic History as a discipline seeks to provide an understanding of the present through the study of economic and social developments in the past. Students majoring in other disciplines and those concerned with area studies will find Economic History subjects that complement their major sequence. In certain circumstances Economic History subjects may also be counted towards a major sequence from another school in the Faculty of Arts and Social Sciences. For details see under schools of Science and Technology Studies and Spanish and Latin American Studies.

Major Sequence

A major sequence consists of at least 90 credit points in subjects offered by the Department of the Economic History, of which no more than 30 credit points may be from Level I subjects.

Level I

Assessment in the Department of Economic History is by essays, tutorial participation and examination. The relative weight of each of these varies from subject to subject and is announced at the beginning of each session.

English

English is a discipline for students with a special interest in literature and language. It is not compulsory within the Faculty of Arts and Social Sciences; the subjects are therefore planned for students who have both a genuine interest in the subject and some special ability in it, including an ability to write good English. It is desirable that students enrolling in English should have obtained one of the following in the New South Wales Higher School Certificate Examination: 3 unit English, (25-50); 2 unit Related English, (60-100); 2 unit General English, (65-100); 2 unit Contemporary English, (75-100).

Students who have successfully completed English at Level I (30 Level I credit points) may enrol in Upper Level English subjects without necessarily pursuing a major in the subject. (Arts and Social Science students are only allowed to count 30 English Level I credit points towards their degree.)

The usual prerequisite for enrolment in an Upper Level English subject is a Pass in two Level I English subjects as specified in the School of English handbook. The choices of subjects in Level I are: ENGL1001 - Ways of Writing: An Introduction to Genre (15 credit points), ENGL1002 - Ways of Reading: Theory and Theme (15 credit points), ENGL1004 - Language in Society (15 credit points). A student who has not fulfilled this prerequisite but is interested in one or more of our Upper Level subjects may seek the special permission of the Head of School to have the prerequisite waived. In considering such requests, the School gives strong preference to a candidate with a successful year's work in another language, or a Credit or better in a related discipline.

English Major

The English major sequence involves two years' Upper Level study in English.

The major sequence is:

Level I

ENGL3503
Texts of Desire: Feminist Perspectives on Popular Fiction
Staff Contact: Suzanne Eggins
CP15 S1 HPW3
Prerequisite: 30 Level I credit points in English or special permission
Explores from a social-semiotic/cultural studies perspective the generic characteristics and social role of popular fiction (especially romance fiction) in the construction and reconstruction of feminities. As texts such as teen romance, Mills and Boon, Jackie Collins etc continue to sell in the millions, feminist theorists have begun exploring questions such as: why women read these texts; what gender roles the texts offer their readers; how the texts construct women as a market. In examining the acquisition of literacy habits by school girls and adult women, the general issue of reading (and reading pedagogy) as gendered, political practice is addressed.

Coursework and seminars and preparation of a thesis. In the first session students are required to choose two subjects. The subjects offered in any one session depend on student demand and staff resources. The choice of subjects varies from year to year. Please refer to the list under the entry for MA, or see the School Handbook.

In the second session students prepare and present a thesis of between 15,000 and 20,000 words based on research conducted on a topic to be chosen in consultation with the Head of School and other members of staff where appropriate. Students are strongly advised to begin such consultation as early as possible. Throughout both sessions students are required to participate in regular Thesis Workshops.

The UNSW Writers' Group

The UNSW Writers' Group is the University's literary society and provides the opportunity for English students (who are automatically members) and other students to exchange ideas and gather socially outside classes. During session the Group organises events such as talks by visiting speakers, readings, workshops and discussions. Refreshments are usually provided at these meetings and there are occasional dinners with distinguished guests.

For further information please contact the School of English, Tel. 385 2298. Communications may be left in the Writers' Group letterbox in the Morven Brown Building, near Room 120/122.

Environmental Studies

The Environmental Studies program is designed for students who wish to undertake a major sequence within the BA degree concentrating on the historical, theoretical, and policy implications of the human construction and transformation of the environment. The interdisciplinary major sequence in Environmental Studies must be accompanied by a major sequence in a home-based school or department of the Faculty as specified in the Rules for the BA degree. Particularly appropriate home-based majors to be taken in conjunction with it would be in Philosophy, Political Science, Science and Technology Studies, or Sociology. Subjects may not be counted towards more than one major sequence. If you wish to major in Environmental Studies you should make sure that you include in your degree program any necessary prerequisites for the subjects you wish to take. Please check school/department entries for subject descriptions and availability, and consult with the school of your home-based major and the Co-ordinator of the Environmental Studies program about the best combinations of subjects in your two major sequences.

Major Sequence

European Studies

Co-ordinator: Dr Jürgen Tampke (HIST)

The study of Europe has gained a new and more direct significance recently. While any attempt to define Australian identity must be based on a critical understanding of our European heritage and the continuing dialogue with European thought and practice, the momentous changes which are taking place in both Eastern and Western Europe
will have an extraordinary impact on world developments over the next years, and on Australia’s role within them.

Subjects offered within the European Studies program are designed to locate School-based studies within an interdisciplinary European ‘context’ which addresses basic issues and problems in the study of European culture and society from the Renaissance to the present. They provide excellent ‘extensions’ to majors in history, philosophy, political science and sociology with a European focus, or in English or European languages. Subjects are offered at both Level 1 and Upper Level; they are taught in English and require no previous foreign language study, and are available to all students enrolled in the Faculty.

The program also offers a major sequence, which may be counted as a ‘second major’ under the BA Degree Rules. It requires the completion of six EURO subjects (90 credit points). You may, however, request the co-ordinator to approve the substitution of other appropriate subjects from the European Studies entry under Subject Areas in the Faculty Handbook up to a total of 30 credit points. Students who wish to specialise in European Studies are encouraged to learn a relevant European language; a Combined Honours Program, which requires basic reading competence in one such language, may be undertaken in conjunction with a School/Department of the Faculty.

Major Sequence

A minimum of 90 credit points in European Studies, including at least 60 credit points in Upper Level subjects.

Honours Level

European Studies may be taken at Honours Level only as a Combined Honours program (see EURO4500 below).

Level I

EURO1000

The New Europe A

Staff Contact: Jürgen Tampke (HIST)

CP15 S1 HPW3

Note/s: Excluded POLS1008.

EURO1001

The New Europe B

Staff Contact: Jürgen Tampke (HIST)

CP15 S2 HPW3

Note/s: Two session-length subjects, which together form the first year of the European Studies major but are also available separately.

Despite a surprisingly rapid economic recovery after the catastrophe of World War II, Western European nations were increasingly relegated to the status of second-class powers, both politically and ‘morally’, during the years of the Cold War. Moves towards European unification and the disintegration of the Soviet ‘block’, Europe seemed once again to have assumed a central role on the world stage. Yet the euphoria of 1990, which looked forward to a United Europe and the rapid transformation of post-communist societies, has been followed by a severe hangover. The events of the last years and their implications will be discussed, and the problems and prospects confronting the ‘New Europe’ in relation to its past, present and future.

Upper Level

EURO2001

Gender, Race, Nature and Reason

Staff Contact: John Milfull (MB G64)

CP15 S1 HPW3

Prerequisite: 60 Level 1 credit points in Arts

Vital concepts like equality, freedom and emancipation seem inseparable from the European ‘Enlightenment’. Yet the following century saw the development of a new and more subtle form of patriarchy, the increasing discrimination and exploitation of colonised peoples and minorities, and the emergence of nationalism and Fascism. The subject will explore a range of texts in literature, music, philosophy and social history from the eighteenth century to the present, and seeks to analyse both the ‘limits of enlightenment’ and the impact of the two central inter-related concepts, nature and reason, that shaped its program.

EURO2002

The Experience of the City in Modern Europe

Staff Contact: John Milfull (MB G64)

CP15 S2 HPW3

Prerequisite: 60 Level 1 credit points in Arts

The new metropolises which were the motor and focus of European modernisation exposed masses of people to a profound change, not only in their way of life, but in their perceptions of reality. This subject focuses on the urbanisation of Europe since the 18th century, with reference to London, Paris and Berlin; its social and psychological consequences, extending into the present; and representations of life in the ‘big city’ in literature and the visual arts.

EURO2105

Recalling Myth. The Oedipus Story in Literature and Film

Staff Contact: Olaf Reinhardt (GERS)

CP15 S1 HPW3

Prerequisite: 60 Level 1 credit points in Arts

Aims to provide an introduction to classical mythology and its extraordinary impact on Western culture. Includes discussion on the nature of myth; a brief outline of the classical myths of creation, the gods and the heroes; and an exemplary study of the Oedipus story as adapted by authors including Sophocles, Seneca, Kleist, Freud, Gide, Pagnol and Pasolini.

It is proposed to use the material generated in this subject to prepare a multimedia program, and students will be encouraged to participate in this process. No computer skills are required; instruction will be given in basic principles of design, techniques and programming in HyperCard.

EURO2106

The German-Jewish Experience
Staff Contact: John Nill (MB G64)
CP15 S2 HPW3
Prerequisite: 60 Level 1 credit points in Arts

The impact of attempted integration as reflected in the work of Herzl, Schnitzler, Kafka, Buber, Feuchtwanger, Arendt, Scholem and others; the failure of the German-Jewish 'symbiosis' as a basis for discussion of the concepts of assimilation, acculturation, ethnicity, identity and nationality.

EURO2301
The Attractions of Fascism
Staff Contact: John Nill (MB G64)
CP15 S1 HPW3
Prerequisite: 60 Level 1 credit points in Arts

The social psychology of Fascism and its aesthetics, the seductive forms in which its inhuman aims were presented to appeal to both classes and individuals. An attempt to explain, through the study of documents and literary texts, the attractions of Fascism for broad sectors of European society without whose support and tolerance it could never have retained power, and the implications for our understanding of our own society.

French

Subjects offered by the Department at undergraduate level are made up of studies in the following areas: Language and Linguistics (Language category), Literature and Thought (Literature category), French and Francophone Studies (Civilization category).

Language and Linguistics. In language subjects, the emphasis is on helping students to acquire a command of modern French, and French is the language of instruction. Subject content integrates the various linguistic skills of understanding, speaking, reading and writing, through programs involving techniques such as group work, role play, and video. In some subjects language learning is assisted by specially designed computer programs. Upper Level language options focus on language analysis with practical work, corrective phonetics, or linguistics. All core language subjects also involve comparative cultural studies.

French Literature and Thought. Training is given from Year 1 onwards in the techniques of literary analysis and criticism through the close study of individual texts, and in various methodological approaches to literature. Periods studied range from the 17th century to the present day. These
subjects also examine the relationship between literature and social history. Here again, French is the language of instruction.

**French Civilization and Society.** Subjects in this section treat the civilization and society both of France and of the French speaking world. Although literary texts are sometimes studied, subjects in this category mostly concentrate on ideas and trends of thought pertaining to a particular socio-historical context. One subject focuses on French-Australian relations since the European discovery of Australia. In most of the subjects belonging to this category, use is also made of non-literary and media material.

Students are invited to collect from the secretary of the Department of French the French Handbook, containing course descriptions, book lists, sequence of subjects and general information about the Department. Students should also consult the Department noticeboards for all information relating to first meetings, prior to the commencement of the academic year.

**Note:**

(a) Students should note that a Pass Conceded (PC) in a language subject does not allow progression to higher level language subjects.

(b) Teaching at all levels is normally done in French, and in most subjects all assessment tasks are performed in French. However the Department sometimes offers subjects which are taught and assessed in English; these are open to all students with Upper Level status in the Faculty of Arts and Social Sciences or equivalent. (See below Upper Level, Options.)

**Major Sequence**

1. **Points:** At least 100 credit points, including 30 Level 1 credit points.

2. **Core Requirements:** For D stream students, the major must include FREN1030.
   For C stream students, the major must include either FREN2021 and FREN2022; or FREN2020 and one of FREN2021 and FREN2022.
   For A or B stream students, the major must include FREN3010. In certain cases approval may be given to replace FREN3010 with FREN2021 and FREN2022 (see note below at Upper Level, Core Subjects). Students who began in the A stream may replace FREN3010 with FREN3011 plus 1 Upper Level option (see below at FREN3011).

3. **Categories:** In addition C and D Stream students are required to do at least one Upper Level option from each of the three categories Language, Literature and Civilization, and (except if seeking to satisfy the conditions for Honours entry — see below) not more than 3 options from any one category.
   B Stream students are required to do at least one Upper Level option from each of two of the three categories Language, Literature and Civilization.

4. **Subjects in English:** Students may count towards their French major a maximum of 15 credit points obtained in subjects taught in English offered either in the Department, or, as approved by the Head of Department, in other Schools or Programs.

**Honours Entry**

Honours: For D stream students: at least 135 credit points, including a major sequence, offered in the Department of French (but see note below): students must complete 30 Level 1 credit points, plus at least 105 Upper Level credit points (which must include FREN1030) at an average grade of Credit or better.

For B and C stream students: at least 135 credit points, including a major sequence, offered in the Department of French (but see note below): students must complete 30 Level 1 credit points, plus at least 105 Upper Level credit points (which must include FREN2021 and FREN2022) at an average grade of Credit or better.

**Note:** Students proceeding to Single Honours in French may, where there are sound academic reasons for doing so, substitute related subjects in other Schools/Programs, as approved by the Head of Department, for a maximum of 30 of the credit points required.

Combined Honours: As for Single Honours, but with 80 Upper Level credit points for a total of 110 credit points in the Department of French.

**Note:** Intending Honours students are strongly advised to include FREN2900 and FREN3900 in their pre-Honours program.

**Assessment**

Most classes are of seminar and tutorial type and most teaching is conducted in French. In core language subjects, students are expected to attain a prescribed proficiency level in each of the major skills, and to satisfy all other assessment required throughout the year. In other subjects, assessment is continuous and, depending on the subject, is based on some combination of class tests, written or oral exposés, essays, or weekly assignments.

**The French Society**

The main aim of the French Society is to afford students the opportunity of expressing their interests in French language and culture. This is done through a wide range of activities, both cultural (video club, plays, singing group, student newsletter) and social (wine and cheese gatherings, dinners, outings). Possibilities for enjoying French language and culture are endless but depend on the initiative and motivation of students of the Department.

**Further Details**

Students should note that detailed descriptions of the subjects listed below, including information regarding set textbooks and recommended reading, together with much other general information, are contained in the Department of French Handbook, which is available free of charge from the Department Office (Morven Brown, room 278).

**Level 1**

Entry to Year 1 is available to students of all proficiency levels in French, from complete beginners to French native
speakers. To accommodate such differing backgrounds at various levels, four streams are offered:

1. A stream - FREN1000 French 1A Introductory French, taught during the normal academic year; or FREN1100 French 1A Introductory French (Intensive Mode), taught during the summer recess. Both these subjects are designed for students with little or no knowledge of French.

2. B stream - FREN1010 French 1B Bridging Subject, designed for students with some knowledge of French (eg HSC 2 unit French or HSC 2 unit Z French).

4. D stream - FREN1030 French 1D Language (plus FREN1220 and FREN1221), designed for Francophone students with a Baccalaureat or equivalent qualifications.

Students wishing to take French in Year 1 should enrol in the subject which seems appropriate to their qualifications. This enrolment is to be regarded as provisional. Final streaming is determined by the Department after a language test which will take place on Thursday, 29 February 1996. All students except those with no knowledge of French (FREN1000) are required to sit the test.

In order to pass core language subjects, students must attain the prescribed proficiency level in each major skill, as well as satisfying all other assessment requirements.

(Part-time enrolment is also possible in some cases.) The research honours program, in which the writing of a thesis is one of the major tasks, is a first step towards postgraduate study. The coursework program is a continuation at a more advanced level, and over a broader range of topics, of the type of study introduced in earlier years.

Geography

Geography is the study of variations from place to place on the earth's surface arising from the spatial relationships of the phenomena which make up the world of humanity. Particular emphasis in human geography is placed on the spatial organisation of human activities, especially within urban systems.

Some subjects in Geography include laboratory and project work involving the use of quantitative techniques. Students may need a calculator. Students may be required to supply some laboratory materials as indicated at the beginning of session.

Where a field tutorial is a compulsory part of a subject, students are required to meet accommodation costs (the School takes steps to keep these to a minimum) and may also be required to contribute towards fares.

Assessment in the School of Geography is normally by a combination of coursework and examinations, although the procedure varies between subjects. Full details are given for all subjects by the principal lecturers concerned at the commencement of each session.

Major Sequence

30 Level 1 and at least 60 Upper Level credit points.

Honours (Research) Entry

Students must satisfy Faculty of Arts and Social Sciences requirements for entry to Honours programs and must have obtained at least 135 credit points in Geography, including 30 Level 1 credit points and must include GEOG2013 or a substitute subject approved by the Head of School. A minimum cumulative average at Credit grade is required for all Upper Level subjects taken.

Combined Honours (Research) Entry

30 Level 1 and at least 75 Upper Level credit points in Geography. A minimum cumulative average at Credit level is required for all Upper Level subjects taken.

The Geographical Society

It is hoped that students taking geography as a subject will participate in the activities organised by the Geographical Society. The Society is open to new ideas and to students who are concerned with fostering an interest in geography outside their formal studies. Informal seminars are organised on subjects of interest to geographers.

Social activities have always been an important part of the Society and they have provided more than adequate opportunities for students to get to know each other and for students and staff to improve communications.

**German Studies**

The Department of German Studies offers a program of undergraduate study leading to the degree of Bachelor of Arts. There are three streams: for beginners with no previous knowledge of German, for intermediate students who have studied German for the Higher School Certificate (or have equivalent knowledge), and for native speakers. The Department has a flexible entry-point policy which allows students to enrol in the language program that builds on their existing language skills.

Subjects offered in the Department of German Studies have both a language skill orientation as well as critical knowledge orientation. The primary aims are to provide students with proficiency in spoken and written German on the basis of practical language work and linguistics together with a critical understanding of the development of the German-speaking countries as 'modern' societies that are different yet similar to our own.

The Department also offers a number of upper level subjects in German history, literature and civilisation taught in English. Students majoring in German Studies are encouraged to focus their work by choosing complementary sub-
jects offered by other schools or programs within the Faculty, in particular LING1000 The Structure of Language and LING1500 The Use of Language are strongly recommended. Subjects in German History, Literature and Civilisation may also be taken to complement other major sequences, e.g. in European Studies, History, Political Science, Sociology, Theatre and Film Studies. With approval of the Heads of the respective schools, some of the subjects may be counted as credit towards the major sequences offered by these schools. For further information and details contact the Head of Department.

Teaching and Assessment

All teaching in the Department is carried out in small groups and in German wherever this is practical. There are no formal end of session examinations. Every effort is made to present assessment to students as part of the learning process. Assessment ranges from informal class tests to essays, take-home tests and/or oral presentations or examinations. Oral participation is encouraged through ‘Referate’ (often linked to the essay to be submitted at the conclusion of a seminar) and other forms of tutorial participation.

The German Society

The German Society is the Department's active student club. It provides an opportunity for students and members of staff to meet for informal conversation, film nights, dinners, excursions, etc. The Society has mounted successful and entertaining theatrical productions in German. Further details may be obtained from the Secretary of the Department of German and Russian Studies.

Further Details

Detailed information on all courses, subjects, textbooks, reading lists and other matters relating to the Department is contained in the Department of German Studies Handbook, available free of charge from the Secretary.

German Language, Literature and Civilisation

Language study and the study of literature and linguistics are integrated so as to reinforce each other. Seminars in the area of German literature and civilisation aim to increase language proficiency and communicative competence; at the same time practical language work involving topics and issues of German socio-cultural history contributes to an increased awareness and understanding of the forces that have shaped the development of modern German society.

Major Sequences

The sequences given below are minimum requirements, students may add further seminars to their programs.

A Stream (Beginners) - 105 credit points required. Year 1: one language subject in each session (GERS1021/2); Year 2: one language and one German Studies subject in each session (2021/2 and 2041/2); Year 3: one language subject, one German Studies A or B subject and one seminar in each session (2041/2, 2141/2 or 3141/2, and 2421/2).

B Stream (HSC or equivalent) — 105 credit points required. Year 1: one language (1121/2) and one German Studies subject in each session (1141/2); Year 2: one language subject and one German Studies A subject in each session (2001 and 2141/2); Year 3: one language subject and one German Studies B subject in each session (3001 and 3141/2).

C Stream (Native Speakers) — 105 credit points required. Year 1: one language and one German Studies subject in each session (1321/2 and 1341/2); Year 2: one German Studies A subject in each session (2141/2) and seminars to a total of 20 credit points (2421/2, 2441/2); Year 3: one German Studies B subject in each session (3141/2) and seminars to a total of 25 credit points (3421/2, 3441/2). Note: Students in this stream need to gain 45 credit points in the seminar program in Years 2 and 3; they may arrange the combination as they wish.

Notes: 1. Variations to the above sequences may be approved by the Head of Department.

2. Subjects in the German Studies area in other departments, or from the Department's subjects in German History, Literature and Civilisation taught in English may also be counted towards a major sequence provided that: (a) a substantial proportion of text sources is read in German, (b) there is no substantial overlapping with other subjects offered by the Department, and (c) prior approval is obtained from the Head of the Department.

Level I

1. GERS1021 S1 Introductory German 1 is designed for students with no previous knowledge of the language.

GERS1022 S2 Introductory German 2 is the sequel to GERS1021. Subject to approval from the Head of Department, students with some knowledge of German, e.g. Year 10, or 2 Unit Z level, may enrol in this subject.

2. GERS1121 S1 Intermediate German 1A is designed for students who have studied German at High School (HSC 2 or 3 Unit German) or have equivalent knowledge.

GERS1122 S2 Intermediate German 2A is the sequel to GERS1121.

German History, Literature and Civilisation (Taught in English)

These subjects require no knowledge of German and are open to all students with Upper Level status in the Faculty of Arts and Social Sciences. They are designed primarily for students who wish to gain an understanding of the history and culture of the German-speaking societies in the 20th century without undertaking a study of the language. Besides offering an ideal extension to the language-based major sequence in German Studies, the subjects offered in ‘German History, Literature and Civilisation’ may be taken to complement other school-based major sequences offered within the Faculty, such as History, Political Science, Sociology or Theatre and Film Studies. With the approval of the heads of the respective schools, some subjects may be counted as credit towards sequences offered by these schools.

Greek (Modern)

The basic aims of the subjects offered are to help students to acquire a sound reading knowledge of Greek, a command of basic conversational and written Greek, and an understanding, through the study of Greek literature and history, of the way in which Greek society has developed.

Teaching and Assessment

All teaching in Modern Greek Studies is carried out in small groups except for the Greek Literature and Greek History sections.

Assessment is continuous and ranges from informal class tests to literature and history essays and class oral and written presentations. Oral participation in all classes is also taken into account when determining the final mark.

Note

Students should note that a Pass Conceded (PC) in a language subject does not allow progression to Higher Level Language subjects.

Language of Instruction

Whenever possible, language courses are conducted in Greek. Literature lectures are mostly given in Greek with English explanations of difficult terms and points. The history lectures, however, are mainly given in English.

Note: Students who wish to take Modern Greek should enrol in the subject that seems most appropriate to them. However, the subject co-ordinator reserves the right to alter the enrolment, according to the student's knowledge of the language.

History

The School of History offers a variety of Level 1 and Upper Level subjects, giving students a wide range of options at all levels. Subjects are mainly concerned with aspects of modern history and related to periods and themes in Australian, Asian, European, Middle Eastern and American history. General theories and problems of historical explanation are also studied, as well as techniques of researching and writing history.

Class contact in most subjects offered is three hours per week. All subjects are of one Session length (14 weeks in Session 1 or Session 2). Level 1 subjects offered in the each of the following fields - Asian, Australian or European history - can be taken separately or as a complementary pair of subjects over two Sessions. However, subjects in Level 1 European or Asian history form a sequence. Thus, Session 2 subjects cannot be taken in isolation without having first completed Session 1 in the same area. (Details of lectures, seminars, tutorials, etc, are available from the School of History; lecture timetables may be consulted at the Faculty of Arts and Social Sciences office, Room G1, Arts Building.) Most of a history student's working time, however, is spent in the University library or in private study, preparing papers to be read at tutorials and seminars, and writing the required essays.

Assessment in each subject usually involves one essay, a tutorial contribution. Some subjects also use examination as a form of assessment. For details of assessment in particular subjects, consult the School of History handbook or individual subject guides.

Details of a Major in History, and of the requirements for entry into Honours (4th year), are listed below. Under Faculty rules: (i) a student may complete only two Level 1 History subjects (30 Level 1 credit points), and (ii) all Upper Level History subjects have prerequisites.

The study of History develops important skills in research, interpretation, evaluation of evidence, reasoning and writing. Study at Honours or postgraduate level further refines these skills and permits students to demonstrate an ability to undertake independent and original research and to communicate the results of this research clearly and persuasively.

Major Sequences

A major sequence in History consists of at least 90 credit points in subjects offered by the School of History. Students may also undertake a combined major sequence in History (HIST) and the History and Philosophy of Science and Technology (HPST) by completing 150 credit points as follows: 75 credit points in subjects offered by the School of History, including at least 45 credit points in any of the following subjects - HIST1004, HIST1011, HIST1012, HIST1013, HIST2011, HIST2024, HIST2031, HIST2039, HIST2054, HIST2065, HIST2066, HIST2067, HIST3001; and 75 credit points in any of the following HPST subjects - HPST1106, HPST1107, HPST2107, HPST2108, HPST2117, HPST2128, HPST3106, HPST3108, HPST3119 (HPST3118 may also be counted toward this combined major sequence if approved for this purpose by the Head of the School of Science and Technology Studies).
Honours Entry

Students must satisfy Faculty of Arts and Social Sciences requirements for entry to Honours programs, and must have obtained, at Credit level or better, at least 135 credit points in the School of History, including 15 credit points in HIST3000 to HIST3007 and not more than 30 Level 1 credit points. (The School may grant permission to count 15 credit points obtained in History subjects offered by other schools or departments.)

History Students Association

The History Students Association assists students of History to develop an interest in outside their formal studies. The Association presents guest speakers, holds film and video seminars, and social gatherings.

All students studying with the School of History are automatically members of the History Students Association.

Please address all enquiries to the School of History, or to: The Secretary, UNSW History Students Association, School of History, UNSW, Sydney, NSW 2052.

Violence and the abuses of sex pervaded early colonial society. Looks at the way violence was used to dispossess Aboriginal people from their land and to establish and maintain convict society. Examines the complex relationships arising from sexuality: sex as a form of currency, domination, negotiation and identity for both Aboriginal people and Europeans. What is the legacy of these brutal beginnings for modern Australia? Are we still marked by the 'convict stain'? And to what extent did early colonial Australia recreate the class, gender and ethnic inequalities of 18th and 19th century Britain? Also includes an excursion to a historic site in the Sydney region.

How has history shaped definitions and expressions of sexuality? What are the origins of our current political system? The Emergence of Modern Europe (A)
Staff Contact: Martyn Lyons
CP15 S1 HPW3
The main influences in the social, economic, political and cultural history of Britain and Europe from medieval times to the 18th century. The main emphasis will be on western Europe (although attention will be paid to the east, too), because there were to be found the most advanced European societies of the period - advanced in an industrial and commercial sense, in the progress they made towards the creation of a unified nation-state, and because they made the earliest transition from the Ancien Régime to a bourgeois society. The changes at work in Early Modern Europe will be treated from a demographic angle, in the development of new patterns of population growth; from a sociological angle, in the development of a 'class society' within the 'society of orders'; from a political angle, in the development of centralised monarchies; from a cultural angle, in the growth of literacy and of a more secular society.

HIST1012

Exploration and Empire: The Pacific and Cultural Contact
Staff Contact: John Gascoigne
CP15 S2 HPW3
Focuses on British and French exploration of the Pacific in the period from the Peace of Paris (1763) to the Treaty of Waitangi (1840). Its principal theme is the reciprocal interaction between European and Pacific cultures as a conse-
quence of exploration and settlement. After an examination of the Polynesian and European background to Pacific exploration, the subject analyses the motives for European exploration in the late eighteenth century. Using, as far as possible, original written and pictorial sources the subject examines the ways in which contact with the Pacific prompted a re-examination of European assumptions about the nature of society. Reciprocally, it also seeks to explore the impact of the West on traditional Pacific cultures.

Finally, theories explaining millenarian phenomena and the relationship between millenarian and orthodox religion are reviewed.

Note/s: Excluded 51.960.
The mission of the documentary film-maker, like that of the historian, is to order and interpret complex data and issues. All non-fiction films confront problems which derive from the demands of interpreting and validating sources; all are ultimately products of a range of subjective choices in such obvious areas as selecting a subject to editorial techniques and decisions; all are in part the product of the social, political and economic framework in which they are produced; and all are constructed to educate, expose, explore or propagandise, albeit in more or less overt ways. Analysis of such film texts raises important historiographical questions which are often avoided by historians. Provides a critical introduction to the history of documentary films as vehicles for understanding the past.

Science and Technology Studies
The School of Science and Technology Studies (STS) offers subjects in two streams: History and Philosophy of Science and Technology (HPST); and Science, Technology, and Society (SCTS). A major sequence in the School may be made up of subjects from both the HPST and the SCTS streams. Subjects may be taken in any order, provided that subject prerequisites are met. Subjects in the History and Philosophy of Science and Technology (HPST) stream examine the history of scientific and technological development, the nature and philosophical implications of the knowledge and methods involved in this development, and the historical dynamics of scientific and technological change. HPST subjects make an ideal complement to subjects in intellectual and social history, and philosophy. They employ the methods of the humanities and social sciences to understand the historical, cultural, and social role of science and technology. No previous study of mathematics or science is required.

What is science? What are its distinctive characteristics as a form of inquiry? Why are astrology and ‘creationism’ widely considered to be pseudosciences? A critical consideration of the claims of astrology, psychoanalysis, parapsychology and creation-science provides a vehicle for raising central questions concerning the nature of science, involving issues such as the nature of observation and evidence, theories and laws, explanation and prediction, etc. These questions are placed in an historical context: from the Pre-Socratics to Hume, Kant, and the twentieth-century philosophers Wittgenstein, Popper, and the ‘Logical Positivists’.

Industrial Relations and Organisational Behaviour

The School of Industrial Relations and Organisational Behaviour is located in the Faculty of Commerce and Economics. The School offers distinct disciplinary streams in Industrial Relations and Human Resource Management to students within the Faculty of Arts and Social Sciences. Students within the Faculty of Arts and Social Sciences may undertake a major in Industrial Relations or Human Resource Management. It is not possible to major in both streams.

The School’s program of study in industrial relations focusses on the institutions, practices and processes associated with contemporary employment relations. The program is designed on a multi-disciplinary social science basis to foster an appreciation of the many important questions relating to the role of individuals, trade unions, employers and governmental bodies in the world of work.

The specialisation in human resource management provides a strong practical and theoretical grounding in the policies and processes involved in the management of people at work. In a climate of rapid economic change, effective labour management is being seen as a critical component of the operation and strategic planning of both private firms and public sector organisations.

Assessment is by essays, tutorial participation and an end of Session examination. The relative weight of each of these varies from subject to subject and is announced in each subject at the beginning of each Session.

Japanese and Korean Studies

In addition to its core language program, the School of Asian Business and Language Studies offers a range of Japanese and Korean language and non-language area studies elective subjects to students studying in the Faculty of Arts and Social Sciences, including courses in Japanese and Korean cultural studies, business and management and technical language.

Subjects in Japanese and Korean language are offered both for students without prior knowledge of the languages and for those with HSC or other Japanese and Korean language studies. Students enrolling in Japanese with no previous knowledge of the languages should enrol in JAPN1000 Japanese Communication 1A and JAPN1001 Japanese Communication 1B or KORE1000 Korean 1A and KORE1001 Korean 1B. For students with HSC or other Japanese and Korean language studies, a multipoint entry system operates and, subject to an individual placement test, students will be allocated to the most suitable subject level.

Note: For students admitted in their first year of studies to JAPN2000 or KORE2000 or higher on the grounds of ability and/or previous study, such subjects will be counted as Level 1 subjects in terms of degree regulations. No student will be permitted to enrol in subjects carrying more than 30 upper level credit points in any School/area of studies under this provision.

Major Sequence in Japanese Studies

A major sequence in Japanese Studies comprises 105 credit points, including 90 credit points from consecutive core Japanese language subjects in List A:

Linguistics

Director: Associate Professor Peter Collins
Secretary: Heather Barker

Linguistics, the study of human language, shares areas of interest with a number of other disciplines. Thus not only theoretical and descriptive linguists but also psychologists, philosophers, educators, sociologists, language teachers, neurologists and computer scientists address questions such as: What is the biological basis for language? Is language unique to the human species? How and why do languages change? How do children learn language? What is the meaning of ‘meaning’? Can machines talk? As well, linguistics provides a basis for a variety of practical applications, including the teaching and learning of foreign languages, diagnosing and treating language disorders such as aphasia and dyslexia, developing language curricula in schools, improving literacy skills, generating speech by computer, producing 'plain English' documents, and so on.

Students who have successfully completed either or both of the Level 1 Linguistics subjects may enrol in Upper Level Linguistics subjects. A student who has not fulfilled this prerequisite but is interested in a particular Upper Level subject may seek the permission of the Director to have the prerequisite waived. In considering such requests, the Unit will give preference to a candidate with a successful year’s work in another language, or in English, or a credit or better in another related discipline.

Major Sequence

A major sequence in Linguistics requires 30 credit points in Linguistics at Level 1 and 60 credit points in Upper Level subjects including 15 credit points from LING2200. Up to 15 credit points may be substituted from Upper Level English subjects.

Mathematics

While Mathematics as a major study is usually taken in the Science and Mathematics course, it may also be taken in the Faculty of Arts and Social Sciences.

First Year Mathematics

MATH1131 and MATH1231 are the standard subjects and are generally selected by students who intend to pursue further studies in mathematics.
MATH1141 and MATH1241 are aimed at the more mathematically able students, including those who may wish to take a degree at Honours level in Mathematics. They cover all the material in MATH1131 and MATH1231 at greater depth and sophistication.
While it is expected that students aiming at Honours level in Mathematics will take these subjects, they are equally valuable for any mathematically able students whose course requires a considerable amount of mathematics.
MATH1011 and MATH1021 are the usual subjects for students who do not intend studying Mathematics beyond Year 1 but whose studies require some knowledge of basic mathematical ideas and techniques.
Students who select the MATH1011 and MATH1021 subjects should weigh seriously the implications of their choice because no further mathematical subjects are normally available. Students with meritorious performance in MATH1021 may be permitted to proceed to a certain limited number of Year 2 mathematics subjects.

Higher Level Mathematics

Many subjects in the School are offered at two levels. The Higher level caters for students with superior mathematical ability. Where a prerequisite is mentioned at the ordinary level, the corresponding Higher level subject may be substituted.

Students with Low Mathematical Qualifications

The School of Mathematics arranges a Bridging Course in Mathematics for those students intending to enrol in First Year Mathematics who have inadequate mathematical background. The Bridging Course covers the gap between 2 unit and 3 unit Mathematics and is a very useful refresher course generally. The course is held at the university during the period January to February each year.

Mathematics Prizes

There are prizes available for certain courses in the School of Mathematics. They are open to students proceeding to an undergraduate degree or diploma at the University but are not awarded if there is no candidate of sufficient merit. Details of these prizes may be found in the section Scholarships and Prizes later in this handbook.

Major Sequences in Mathematics

Note: The major sequences in Mathematics described below apply only to students who commenced an Arts degree prior to 1996. Due to changes in the structure of the Arts degree applying from 1996, the major sequences described below are not applicable to students commencing an Arts degree from 1996. Contact the School of Mathematics Office or Arts Faculty Office for information on the new structure of the major sequences in Mathematics.

It is possible to do a major sequence in Mathematics (General) or in each of the Departments of Pure Mathematics, Applied Mathematics and Statistics. In all cases students must take the subjects Mathematics 1A and 1B (MATH1131 and MATH1231) or Higher Mathematics 1A and 1B (MATH1141 and MATH1241) in Year 1 and it is strongly recommended that they include the Level I subject COMP1811. The subjects required in Years 2 and 3 for the various major sequences are listed below. It should be noted that because of the close interrelations of subjects in the different departments some Level II subjects not from the department offering the particular major sequence must be included in the student's program.

Mathematics (General)

In Year 2 of their course students must take the subjects MATH2011, MATH2120, MATH2501 and MATH2520 (or the Higher equivalents MATH2110, MATH2130, MATH2501, MATH2610 and MATH2620) and in addition further Level II Mathematics (or Statistics) subjects so that the Level II Mathematics subjects total 60 Credit Points.

In Year 3 of their course students must take Level III Mathematics subjects totalling 60 Credit Points.
Pure Mathematics

In Year 2 of their course students must take the subjects MATH2011, MATH2501, MATH2520 and MATH2120 (or the Higher equivalents MATH2601, MATH2610, MATH2620, MATH2110 and MATH2130) and in addition further Level II Mathematics (or Statistics) subjects so that the Level II Mathematics subjects total 60 Credit Points. It is suggested that the further subjects include MATH2400 and MATH2410.

Honours Level Programs in Mathematics

There are three separate Year 4 Honours level programs: MATH4603 Pure Mathematics 4, MATH4103 Applied Mathematics 4 and MATH4903 Theory of Statistics 4.

The four-year program for a degree at Honours level is intended primarily for professional pure mathematicians, statisticians or applied mathematicians, but is of interest also to intending specialists in mathematical areas of social sciences, physical sciences and engineering.

For entry to these Honours Level programs students should complete a major sequence (as indicated above) in the appropriate department. Normally a credit average in the Level III subjects specified is required and some evidence of the ability to undertake independent study. Students must discuss their Level III selection of subjects with the Head of the appropriate Department. For Honours Pure Mathematics some Higher level Mathematics subjects should normally be included at Levels II and III.

Music and Music Education

The School of Music and Music Education offers the following degrees and courses of study:

1. A major sequence and an honours program within the Bachelor of Arts (BA).
2. The Bachelor of Music degree (BMus). This is a three-year degree course of professional orientation, with provision for honours in a fourth year.
3. The combined Bachelor of Music Bachelor of Education (BMus BEd) double degree. This is a four-year integrated double degree for intending specialist music teachers, with provision for honours in a fifth year.
4. The Postgraduate Master of Music (Pass), Graduate Diploma in Music, Graduate Certificate in Music, Master of Music (Hons), Master of Music Education (Hons), or PhD degrees, for which the undergraduate degrees listed above are suitable preparation.
5. Two session-length courses in music in European history (Baroque/Classical and 19th Century/20th Century) and one full-year course, Fundamentals of Music, which serves as an introductory course in musicianship and musical techniques. These subjects are open to all undergraduates and do not have a musical prerequisite.
6. Upper level undergraduate subjects in music which are open to all interested students who have reached an appropriate stage of general university study.
7. General Education music subjects.

The School of Music and Music Education offers three undergraduate degrees with specialisation in music, i.e., Bachelor of Arts (with a music major), Bachelor of Music, and the double degree Bachelor of Music Bachelor of Education. Entry to the specialist music degrees of BMus...
and BMus BEd is by audition and University entry score. All undergraduate Music degrees are integrated and compatible and have some elements in common. Each has the potential to equip a student for a wide range of careers in music, music teaching and related occupations. All three degrees can lead to Master’s courses and other higher degrees at the University.

The Bachelor of Arts (BA) with a major in Music is a three-year degree designed to develop musicianship and performing skills in association with an exploration of musicology: music history, style, musical perception and analysis, music technology and the study of music in its ethnic and social contexts (ethnomusicology). Students undertaking the BA with a major in Music are expected to continue performance studies and are required to participate in group music-making.

The Bachelor of Arts (BA) permits the combination of music with the widest range of other options in the Faculty of Arts and Social Sciences and in other faculties, including options such as Theatre and Film Studies, languages, history, philosophy, and psychology. Through double degrees such as the BA LLB or the BSc BA, it may be possible to combine serious music studies with law, science and other degree courses.

Bachelor of Arts students who have completed 2 Unit 1 Music for their HSC or who have AMEB grades lower than 7 (performance) and 5 (musicianship) are encouraged to complete MUSI1103 Fundamentals of Music. Completion of this subject at a required level may provide the means of proceeding to a BA with a major in Music, and may also provide, if combined with a satisfactory audition, a means for subsequent enrolment in the BMus or the BMus BEd.

Consistently good work in the BA with a major in Music and completion of required additional subjects in second and third years may lead to a fourth (honours) year of study, completing a BA (Hons).

The Bachelor of Music (BMus) is a three-year specialist music degree which enables students to develop their musicianship and their musical skills in general in preparation for professional work in music in areas as diverse as performance, private teaching, broadcasting, recording, arts administration, concert planning, music and general arts journalism, arranging and composition. Students pursue their study with special emphasis on musicology - music history, style, musical perception and analysis, music in its ethnic or social contexts (ethnomusicology) - or on musical technology, performance, jazz studies or composition. At the same time students have enough flexibility in their course to enable them to combine music studies with substantial work in a related discipline like Theatre Studies or in languages, English literature and language, history, philosophy, among others.

Consistently good work in the BMus may lead to a fourth (honours) year of study, completing a BMus (Hons).

The Bachelor of Music Bachelor of Education (BMus BEd) is a four-year specialist double degree in music education which aims to enhance the career prospects of graduating students and to serve the wide range of teaching opportunities open to music graduates. The BMus BEd offers an integrated training in five major areas: Music Studies, Music Education Studies, Performance Studies, Education Studies, and Contextual Studies. As well as developing many skills in teaching classroom music from early primary to final secondary grades (K-12), the BMus BEd provides a specialist sequence of subjects designed to train conductors and teachers of instrumental and vocal ensembles. A special feature of the BMus BEd is the attention given to music history, aural training and musicianship courses as core units in the first three years of the program. In addition to the thorough grounding provided in Western art music, specialist subjects dealing with music in its ethnic and social contexts (ethnomusicology), musical technology and contemporary pop/jazz styles broaden and enrich the academic and professional capacities of all graduates. Graduates are qualified to teach classroom and instrumental/vocal music from kindergarten to year 12, and are accredited to teach in all Australian states. The final phase of the student’s training involves, in addition to practice teaching sessions in Years 1, 2 and 3 of the course, a ten-week extended internship in practice teaching.

At the end of Year 4, students may be permitted to enter an Honours Year in either Music or Music Education. Students who satisfy the requirements for Honours as well as those for the award of the BMus BEd double degree will graduate with the award BMus BEd (Hons).

University Performance Ensembles - Music studies in the Faculty concentrate on the texts or contexts of music, involve the active development of the student’s musicianship and develop practical abilities. Performance groups run by the School of Music and Music Education include: The Collegium Musicum Choir, The University of New South Wales Orchestra, instrumental chamber groups, a vocal chamber group (The Burgundian Consort), an Early Music Group, Bush Band, Hand Bell Ensemble, Jazz Ensemble and Concert Band.

The Collegium Musicum Choir of the University of New South Wales, founded in 1975, is open to all students and staff of the University interested in choral singing. The choir rehearses each Wednesday evening from 4.30-7.30 pm and gives several public concerts each year, often with the Collegium Musicum Orchestra based on the Australia Ensemble, resident at the University of New South Wales. For audition and further details, please phone the School of Music and Music Education on extensions 4871, 4874, 4872 or 4870.

The University of New South Wales Orchestra was founded in 1989 and is open to students and staff of the University with the necessary instrumental performance standards. The orchestra rehearse each Tuesday evening from 6.30-9.00 pm and gives several public concerts each year. For further details, please phone the School of Music and Music Education on extensions 4874, 4871, or 4872.

### Philosophy

Philosophy is a wide-ranging discipline, the scope of which is indicated by the subjects listed below. Apart from providing considerable choices for students majoring in Philosophy, the diversity of Upper Level subjects makes it possible for students majoring in other disciplines to select subjects complementing their main interest.

#### Level 1

There are four Level 1 subjects:

- **PHIL1006** Reasoning, Values and Persons (Session 1)
- **PHIL1007** Ways of Knowing and the Nature of Knowledge (Session 2)
- **PHIL1008** Ethics and Society (Session 1)
- **PHIL1009** Points of View: Science, Objectivity and Subjectivity (Session 2)

Each of these has a value of 15 credit points. They can be taken separately, but new students, especially those intending to complete a major sequence in Philosophy, will normally enrol in two - one in each session. However, a student can gain Upper Level status in Philosophy (qualify to enrol in Upper Level subjects) by passing in only one.

#### Upper Level Study

Students must be in at least Year 2 of study in the Faculty in order to take Upper Level work in Philosophy. All Upper Level subjects are single-session subjects. Each consists of a 3 hour class per week and is worth 15 credit points. Except where special prerequisites are prescribed, subjects can be taken in any sequence. Each subject is designed to be self-contained, but particular groupings of subjects will enable students to pursue sustained treatments of particular areas or of historical developments in the treatment of issues.

In certain circumstances the prerequisites specified for subjects may be waived — for example, in the case of students who have already studied similar material in other schools, or who wish to take isolated subjects relevant to another discipline without counting them as part of a Philosophy sequence. Students who feel they have a case for a concession of this kind should consult the School.

### Major Sequence

A major sequence in Philosophy is a sequence of subjects offered by the School carrying at least 90 credit points including no more than 30 credit points in Level I subjects.

Subject to the approval of the School, which considers the individual subjects nominated by a student and the student's overall program in Philosophy, a student may be permitted to count up to 15 points offered outside the School toward a major sequence in Philosophy. For example, the School has, on occasion, allowed students to count particular subjects from the Schools of Science and Technology Studies, Political Science, and Law towards a major sequence in Philosophy. Students who have some interest in counting a subject from outside the School of Philosophy toward a major sequence in Philosophy should consult the School.

Some Philosophy subjects may be counted towards a major sequence in the School of Science and Technology Studies.

#### Selection of Subjects

Although students at Upper Level have a wide choice of subjects, they are advised to plan a sequence of mutually relevant ones, taking into account the prerequisites of those they may wish to take later. Information and School recommendations are available from the School; and students needing assistance are encouraged to consult the School personally.

### Honours Entry

For entry to Philosophy Honours (Research), students must normally have completed 135 credit points in Philosophy, consisting of 15 or 30 points at Level I and the remainder at Upper Level. Students must normally also have an average of at least 70 per cent in their Philosophy subjects, including at least one Distinction result. For students commencing university study prior to 1996, their Upper Level subjects must include PHIL3016 Pre-Honours Seminar, and at least 45 credit points chosen from subjects which are primarily oriented toward the history of philosophy, of which at least 15 credit points must be in some area of the history of modern European philosophy. For students commencing university study in 1996 or later, the history of philosophy requirements have been changed: in addition to PHIL3016 Pre-Honours Seminar, intending Honours students are required to complete the following two subjects (totaling 30 credit points): PHIL2228 Themes in Seventeenth Century Philosophy, and PHIL2229 Themes in Eighteenth Century Philosophy. There are no other specific subject requirements.

Subjects which satisfy the history of philosophy requirement are the following:

- **PHIL2116** Scientific Method
- **PHIL2208** Epistemology (Scepticism)
- **PHIL2216** The Empiricists*
- **PHIL2226** Twentieth Century Analytic Philosophy
- **PHIL2228** Themes in Seventeenth Century Philosophy*
- **PHIL2229** Themes in Eighteenth Century Philosophy*
- **PHIL2309** The Heritage of Hegel*
PHIL2506 Classical Political Philosophy*
PHIL2507 The Ethics of Plato and Aristotle
PHIL2508 Theories in Moral Philosophy*
PHIL2516 Philosophical Foundations of Marx’s Thought
PHIL2518 Greek Philosophy: Issues in Ethics & Epistemology
PHIL2607 Philosophy and Literature

*Subjects satisfying also the history of modern European philosophy requirement.

For Combined Honours (Research), the requirement is normally 105 credit points in Philosophy, consisting of 15 or 30 points at Level I, and the remainder at Upper Level. Upper Level subjects must include PHIL3016 Pre-Honours Seminar and, for students commencing university study prior to 1996, at least 30 points chosen from subjects which are primarily oriented towards the history of philosophy, of which at least 15 credit points must be in some area of the history of modern European philosophy. For students commencing university study in 1996 or later, the history of philosophy requirements have been changed: in addition to PHIL3016 Pre-Honours Seminar, students are required to complete the following two subjects (totaling 30 credit points): PHIL2228 Themes in Seventeenth Century Philosophy, and PHIL2229 Themes in Eighteenth Century Philosophy. The School recognises that the particular overall programs of some students enrolling in Combined Honours (Research) might be such as to make it desirable to vary the Philosophy subject requirements for admission — either in terms of the prescribed number of credit points or in terms of the requirement that 30 points be chosen from the specified range of subjects. Students are invited to consult the School about this matter in their particular situations.

Subject to the approval of the School, which considers the individual subjects nominated by a student and the student’s overall program in Philosophy, a student may be permitted to count up to 15 credit points offered outside the School toward satisfying the Honours entry requirements. Students contemplating Honours are urged to seek advice from the School early in their course.

Socratic Society

The Socratic Society is a student-run society which is associated with the School of Philosophy and meets on a regular basis. Its purpose is to promote discussion on topics of philosophical interest.

Level I

The following are Level I subjects with a credit point values as nominated.

PHIL1006 Reasoning, Values, and Persons

Staff Contact: Phillip Staines

CP15 S1 HPW3

A team-taught introduction to philosophical thought and issues through study of traditional and contemporary discussions of four topic areas: philosophical reasoning, ethics and political philosophy, minds, bodies and persons; analysis and argument.

PHIL1007 Ways of Knowing and the Nature of Knowledge

Staff Contact: Stephen Hetherington

CP15 S2 HPW3

This subject is a further team-taught introduction to philosophy. Topics will include: Science and Religion, Knowledge and Evidence, Metaphysics.

PHIL1008 Ethics and Society

Staff Contact: Stephen Cohen

CP15 S1 HPW3

This is political philosophy and moral philosophy at the intersection of the political with the personal. When we make decision in important areas like euthanasia, reproductive freedom and reproductive technology, the allocations of health resources, the suppression of smoking and other drugs, censorship, the environment, penal reform and capital punishment, we must balance the rights and duties of the individual with the demands and obligations of society. In this team-taught subject, we consider current debate about the above questions in the light of philosophical theories about — what is ethics; individual morality and duties (the notion of duties to oneself and to others, the fundamental value of respect for persons); public morality and goals (judging actions, laws and policies according to their consequences); and individuals and their rights in the state (theories about rights, justice, and the limits of the state).

PHIL1009 Points of View: Science, Objectivity and Subjectivity

Staff Contact: Michaelis Michael

CP15 S2 HPW3

Is the world the way it seems to be? Is there a real world out there or is it all ‘in the mind’? This team-taught subject introduces philosophy by examining these questions in relation to science and its claim to objectivity. Does science really provide objective knowledge? Is objective knowledge the same thing as ‘value free’ knowledge? Along with scientific sorts of knowledge, are there other sorts of knowledge which are more subjective, more a feature of our individual perspectives. Is there such a thing as common everyday knowledge?, as ethical knowledge?, as self-knowledge? Deals with the following questions: How do hypotheses, observations and evidence function in scientific arguments? What is induction, and what is its place in scientific method? Is there a difference between science and non-science? Are all our observations affected by our personal backgrounds, beliefs and prejudices? If so, does that mean that observation is never objective? What is the relationship between science and ethics? Does evolutionary science teach us what is morally right and wrong? Is the environment intrinsically valuable or should we study it merely so that we can subjugate and manipulate it to our ends?

Upper Level

For some subjects, a prerequisite is Upper Level status in Philosophy. This consists in (1) being in Year 2 or later of university study, and (2) having taken and passed at least one Level I Philosophy subject (15 credit points). The prerequisite may be waived by the School in certain cases.
The following are Upper Level subjects with credit point values as nominated.

PHIL2106

Note/s: Excluded 52.2030 and 52.2031, 52.220, MATH3400.

This subject is about deductive logic (in particular, propositional logic and predicate logic). Aims to construct - and to understand - a precise, unambiguous, formal language. Many important parts of English are translatable into it, hence many arguments of English are translated into it too. It is a language with which we can better understand the concept of deductive proof.

PHIL2107
Advanced Philosophy of Science
Staff Contact: Michaelis Michael
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School

Explores some current issues in the philosophy of the sciences and includes discussion of the role of experiment in science; the cognitive status of theories; explanation; inter-theoretical reduction; reductionism; models and metaphors; the issues of scientific realism and anti-realisms.

PHIL2108
Ways of Reasoning
Staff Contact: To be advised
CP15 S1 HPW3
Prerequisite: Upper level status in Philosophy
Note/s: Excluded 52.233, 52.2010.

Material for this subject is drawn from everyday sources, such as newspapers, books and advertisements, and including television. PHIL2109
Metaphysics (Realisms)
Staff Contact: Stephen Hetherington
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Subject not offered in 1996.

Philosophical and biological issues thrown up by modern biology. These include but are not exhausted by the nature and scientific status of evolutionary theory; the debates over classification of higher taxa; the issue of reduction of biology to more 'basic' sciences; and the ethical implications of biology. This subject is designed to be of interest to students of the humanities and to students of the biological sciences.

PHIL2117
Philosophical Logic
Staff Contact: Michaelis Michael
CP15 S2 HPW3
Prerequisite: PHIL2106 or equivalent, or contact School

Aims to bring out some of the key theoretical and philosophical issues thrown up by modern biology. These include but are not exhausted by the nature and scientific status of evolutionary theory; the debates over classification of higher taxa; the issue of reduction of biology to more 'basic' sciences; and the ethical implications of biology. This subject is designed to be of interest to students of the humanities and to students of the biological sciences.

PHIL2206

Staff Contact: Philip Cam
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.2002, 52.250.

An introduction to some major issues in the field. There are three topics: (1) On relating the Mental to the Physical; (2) Alternative Approaches to the Psychology of Belief and Desire; and (3) The Psychology of Experience and Consciousness.

PHIL2208
Epistemology (Scepticisms)
Staff Contact: Stephen Hetherington
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy

All of us acknowledge that there are things we do not know. But such humility can turn into perplexity when we encounter epistemological sceptics. A sceptic typically denies us either vast amounts of knowledge or justification of some select, but extremely everyday, sorts of apparent knowledge or justification. In short, sceptics argue for surprising denials of knowledge or justification. Examines some historically prominent sceptical ways of thinking, which attack knowledge of, or justified belief in, such areas as: the
external world, the unobserved, linguistic meaning, everything.

PHIL2209
Epistemology (Knowledge and Justification)
Staff Contact: Stephen Hetherington
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

Epistemology is officially the Theory of Knowledge. One of its most important questions is therefore "What is knowledge?" Answering this generally leads to another question: "What is justified belief?" (For most epistemologists think that knowledge is a sort of justified belief.) This subject is built around these questions. We will consider various attempts that epistemologists have made to answer them. Topics include: perception, false belief, defeated evidence, causality, reliability, cognitive responsibility, perspectives.

PHIL2215
The Struggle for Human Nature
Staff Contact: Neil Harpley
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

Note/s: Subject not offered in 1996.

PHIL2217
Personal Identity
Staff Contact: Neil Harpley
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy

Note/s: Excluded 52.2180, 52.232.

Controversy about the nature of persons and the criteria for personal identity has usually centred on the questions of whether persons are bodies or are minds and whether the criteria for their identity are physical or psychological. Philosophers have frequently ignored the social dimensions of personhood or, at best, given it only a peripheral place in the discussion. The notion that people are socially constructed will be given due weight and an attempt made to integrate the differing approaches to what it is to be a person.

PHIL2218
Philosophical Foundations of Artificial Intelligence
Staff Contact: Phillip Staines
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

Note/s: Excluded 52.2025.

Artificial Intelligence: an examination of its assumptions, history, goals, achievements and prospects.

PHIL2219
Topics in Philosophy of Language
Staff Contact: To be advised
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy

Note/s: Might not be offered in 1996 - Consult School.

The subject is divided into two parts. Part I focuses on the relation between words and the world. Here the central topic is theories of truth: the coherence theory, the correspondence theory, the redundancy theory, etc. An important and related topic is theories of reference. Readings include selections from Aristotle, William James, Russell, Kripke and others. Part II focuses on the relation between language and the people that use it. The central concept here is meaning. We investigate such issues as the relation between language and thought, the nature of convention, nature of communication, what sort of knowledge is involved in knowing a language. Readings include fragments from Locke, Descartes, Grice, Austin, Wittgenstein, Lewis, Quine and others.

PHIL2226
Twentieth Century Analytic Philosophy

Staff Contact: Lisabeth During
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

Note/s: Excluded 52.221, 52.3025 in 1988.

In his book The Phenomenology of Mind, Hegel declares that philosophy is not an escape from experience but a form of experience. The life of consciousness is continuous from the simplest bodily reflex to the most sophisticated scientific or cultural reflection. With the Phenomenology as our central reading, we look at different writers since Hegel who demand that philosophic thinking bring itself closer to the texture and qualities of lived experience. Discussion will cover Hegel's predecessors as well as opponents and admirers.

PHIL2316
Philosophy of Religion
Staff Contact: To be advised
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

Drawing from a variety of religious sources, it analyses the different categories and forms in and through which religious ideals are expressed and justified. Topics covered
include arguments for the existence of God, the concept of evil, faith and mysticism, human relation to the natural world, religion and morality, religion and gender, and free will and determinism.

PHIL2407

Staff Contact: Lisabeth During
CP15 S1 HPW3
Prerequisite: Upper Level status is Philosophy
Note/s: Might not be offered in 1996 - Consult School. Excluded 60.014, EURO2400.
An introduction to the 'philosophy' of some influential contemporary thinkers whose relation to philosophy is contested. Readings are drawn from the work of Freud, Kristeva, Benjamin, Breston, Lyotard, Adorno, Bataille, Derrida, Artaud, and Deleuze. Discussion focuses on ideas of rationality, civilization, experience, and violence.

PHIL2409
Speaking through the Body: Feminism, Psychoanalysis, Literature
Staff Contact: Lisabeth During
CP15 S1 HPW3
Prerequisite: Upper Level status is Philosophy
How natural is sex anyway? Do we act the parts of masculine and feminine or do they act us? The language of the body is symbolic; even sexual difference is nothing without its codes. Thus the search for a body that speaks takes us to culture. Explores the idea of sexual polarity or binarism and some influential criticisms or refusals of it. Topics include: transvestitism and gender ambivalence; alternatives to heterosexuality; relations between femininity and language. Readings are taken from the work of Freud, Virginia Woolf, Oscar Wilde, Rousseau, Deleuze and Guattari, Shakespeare, and contemporary feminism.

PHIL2416
Power, Knowledge and Freedom
Staff Contact: Rosalyn Diprose
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Examines the philosophy of Nietzsche and Foucault with particular emphasis on their views about the relation between knowledge on the one hand and subjectivity, power relations and freedom on the other. Issues to be addressed include: truth as a vehicle of power; moral values and responsibility, discipline and the body; the relationship between power and freedom.

PHIL2417
Relativism: Cognitive and Moral
Staff Contact: To be advised

Staff Contact: To be advised
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
A range of contemporary ethical issues is discussed. These include: attitudes to other animal species and to the environment; abortion and women's rights; and euthanasia and the allocation of health care resources. The subject also focuses on some perennial problems in moral philosophy such as public and private morality, intrinsic and instrumental goodness, and absolutism and relativism. A practical approach is adopted with emphasis on philosophical analysis both in the examination of theories and in the formulation of plausible solutions.

PHIL2419
Ethics, Difference and Embodiment
Staff Contact: Rosalyn Diprose
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Explores an approach to ethics originating in ancient Greek thought and developed by 20th Century existential phenomenologists (such as Sartre, de Beauvoir, Merleau-Ponty and Levinas). Rather than asking 'what rules should govern our behaviour', this approach to ethics begins by examining how an embodied 'ethos' (or way of life) is socially constituted, how and why we differ and how we relate to each other. This examination will be directed towards a better understanding of differences (such as cultural and sexual difference), relations (such as love, desire, hate) and principles such as freedom.

PHIL2506
Classical Political Philosophy
Staff Contact: To be advised

Note/s: Excluded 52.523, 52.2230, 52.5232, 52.243.
Examination of three moral theories central in the history and development of moral philosophy. David Hume, Immanuel Kant, and John Stuart Mill present different kinds of moral theories, differing approaches to arriving at a moral theory, and specific theories which are markedly different from each other. Each moral theory is investigated in itself and in comparison with the other two.
PHIL2509

Staff Contact: Stephen Cohen
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.105, 52.2150, 52.241.

Introduction to Chinese Philosophy
Staff Contact: To be advised
CP15 S2 HPW3
Prerequisite: Upper Level status - students must be in Year 2 or later of university study
Confucianism and Taoism, the two systems of thought originating in China, are studied in this subject. What are the social and political implications of Confucian ideas? Does the Confucian moral system advocate repression of individualism? What is Tao? Religious concept, metaphysical postulation or theory of (non) action? These are some of the questions which will be dealt with in the subject, which places special emphasis on the categories and assumptions in each of these systems. No previous knowledge of Chinese history or language is assumed.

PHIL2605
Aesthetics
Staff Contact: Rosalyn Diprose
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.273, 52.2260.
Aesthetics is a branch of philosophy which attempts to define the nature of the work of art and of the aesthetic experience (the experience of the beautiful). This subject will examine how and why philosophers have tended to view art as a threat to rational politics and truth (Plato) or have treated the aesthetic experience as neutral and universal (Kant). Alternative views will be explored through the philosophy of Nietzsche and Heidegger, views which challenge the conventional model of truth, representation and subjectivity and which valorise the aesthetic experience as necessary for creativity and change. Some attention will be given to the implication of these views for an appreciation of contemporary and popular culture.

Philosophy of Science

The Philosophy of Science program is designed to provide a coherent sequence of subjects for students who wish to prepare themselves for undertaking advanced study within the areas of logic, methodology and philosophy of science, or who merely wish to deepen their comprehension of the subject matter of a major in another field. The program leads towards a core subject, Advanced Philosophy of Science, in the third year. While a second major may be taken in any discipline available, the program is designed in such a way that students can pursue a second major in either Philosophy or Science and Technology Studies.

A major sequence is made up of not less than 90 credit points. Students should note, however, that they may not ‘double-count’ subjects towards a second major and they must satisfy general Faculty regulations. Students must also meet certain prerequisite requirements within the program. While the program given below is to be taken as normative, variations may be approved by the Co-ordinator. In particular, students otherwise deemed suitably prepared may be permitted to enter the program in second year, without being required to complete the usual first-year subject.

Suitably qualified students may proceed from the program to a fourth-year honours program in Philosophy or in Science and Technology Studies, or to a joint-honours program in the Schools of Philosophy and Science and Technology Studies. For details, see the school entries under Subject Descriptions.

Political Science

The School of Political Science is concerned with the study of political ideas, institutions and activity. These areas of study are investigated in different ways - historically, logically, empirically and morally. Political Science seeks to encourage a fuller understanding of the problems and processes of political systems in different times and places. To achieve this, emphasis is placed not only upon the study of institutions, but also upon the analysis of a range of theories. These theories may equally underlie and reinforce, or oppose and seek to change, existing structures.

Major Sequence

Any student who wishes to gain a major sequence in Political Science must obtain 90 Level I and at least 60 Level II credit points in Political Science subjects.

Part-time (Evening) Study

The School of Political Science has organised its subjects to permit students to undertake a Major through part-time study in the evenings (after 6pm). In 1996, 15 Level I credit points and at least one Upper Level subject worth 15 credit points will be available in the evenings in each session.

Students wishing to study in the evenings should be aware that their choice of subjects is, naturally, restricted.

Honours Entry

Any student seeking admission to honours programs in Political Science must obtain a minimum of 135 credit points in Political Science subjects. Where there are sound academic reasons for doing so, the School may permit students to substitute a related subject in other schools/departments/programs for a maximum of 15 of these credit points. Such substitutions require permission of the Head of School and must be at a standard equivalent to that demanded in those subjects offered by the School itself. In the case of Law students seeking to do honours, substituted subjects worth 30 credit points may be from the Law Faculty with the permission of the Head of School. Normally, however, the 135 credit points required for entry into honours must include 30 Level I credit points at credit level or better in Political Science and at least 45 credit points from Upper Level Political Science subjects, entry to which is governed by the prerequisite of Credit or better performance at Level I and indicated as suitable for honours. For students seeking admission to honours, one of the POLS3... subjects must include one of the School's designated pre-honours subjects. In 1996 POLS3048, Political Satire and Parody is being offered. Students who have taken POLS3027, Liberal Democratic Thought, as a compulsory pre-honours subject are exempt from the requirement to take POLS3048. Having taken the pre-honours subject students must then be approved by the Head of School for enrolment in the fourth or honours year. A minimum cumulative average of Credit is required for all Political Science Upper Level subjects taken to qualify for honours; and there should be no failures in any Political Science subjects attempted.

The cumulative credit average is calculated by grades. Thus if a student gets a Pass in a POLS subject, a Distinction is needed in another POLS subject to give the Credit average.

Students may alternatively undertake a combined honours degree. The Political Science requirement is 105 credit points in Political Science averaging Credit levels, at least 30 credit points from upper level subjects carrying Credit prerequisites and indicated as suitable for honours preparation. For students entering honours from 1994 onwards, these 30 credit points must include one of the School's compulsory pre-honours subjects. When a student undertakes combined honours, special arrangements are made between the relevant Schools who determine, in conjunction with the student, the thesis topic, the subjects undertaken and the supervisors.

Level I

The following are Level I subjects offered in 1996 all of which carry fifteen credit points. Normally students may take only one Level I subject in each session. Students should confirm with the School the Level I offerings as there may be additional subjects or subjects may not be available. Note: Students CANNOT credit more than 30 credit points from Level I Political Science subjects towards their degree.

Psychology

The School of Psychology is in the Faculty of Biological and Behavioural Sciences.

Head of School: Prof Kevin McConkey
First Year Co-ordinator: Dr Austin Adams
Senior Administrative Officer: Mr Trevor Clulow

Psychology is a discipline of both scientific research and applied practice. As a science, psychology is concerned with the study of behaviour and its underlying mental and neural processes. Topics of study include learning, memory, cognition, perception, motivation, life-span development, personality, social interactions, and abnormal psychology. Psychology has many areas of application, especially in clinical, correctional, counselling, educational, and organisational settings. In addition, people with training in psychology pursue careers in academic research, health research, developmental disabilities and rehabilitation; ergonomics, occupational health and safety; personnel selection, training, and management; vocational guidance; and marketing.

Psychology may be taken as a major sequence in the Bachelor of Arts and Bachelor of Social Science degree courses. Students who want to complete an Honours program (four years) in Psychology and to qualify professionally will need to apply to transfer to the Bachelor of Science (Psychology) degree course (Course 3431), the Bachelor of Science Advanced Science (Biological and Behavioural) degree course (Course 3990) or the Combined Bachelor of Science Advanced (Biological and Behavioural)/Bachelor of Arts degree course (Course 3931) available through the Board of Studies in Science and Mathematics.

Students who are accepted into Arts and Social Science courses in 1996 may apply to the Faculty of Arts and Social Sciences for special exemptions to enable them to qualify for entry into the Psychology Honours Fourth Year. Such exemptions will be granted only to students who have achieved exceptional academic results in their first year of study in Psychology.

Science, Technology, and Society

Science and Technology Studies

The School of Science and Technology Studies (STS) offers subjects in two streams: History and Philosophy of Science and Technology (HPST); and Science, Technology, and Society (SCTS). A major sequence in the School may be made up of subjects from both the HPST and the SCTS streams. Subjects may be taken in any order, provided that subject prerequisites are met. Entry to most Upper Level subjects is possible without having studied Level 1 HPST or SCTS subjects.

Subjects in the Science, Technology, and Society (SCTS) stream examine the social, economic, and political dimensions of scientific and technological change, especially in the twentieth century. SCTS subjects make an ideal complement to subjects in sociology, political science, and public policy. They employ the methods of the social sciences and humanities to understand the social, cultural, economic, and environmental role of science and technology. No previous study of mathematics or science is required.

Major Sequence

A major sequence in the School of STS consists of at least 90 credit points in HPST and/or SCTS subjects, of which no more than 30 credit points may be from Level 1 subjects. A major sequence may therefore consist of 30 Level 1 plus 60 Upper Level credit points, 15 Level 1 plus 75 Upper Level credit points, or 90 Upper Level credit points. By permission of the Head of School, up to 15 credit points obtained in approved Upper Level subjects in other Schools may be counted towards a major sequence in the School of STS.

Social Science and Policy

The School of Social Science and Policy offers programs in social science and policy studies. These include the core program in the Bachelor of Social Science degree and a major sequence in policy studies in the Bachelor of Arts degree.

These programs are interdisciplinary, drawing from all the social sciences and linking them to the policy process. They encourage and cultivate creativity and a critical perspective and develop skills in conducting research.

Special emphasis is placed on familiarising students with the ways in which social science is put into practice by using case studies drawn from current projects being undertaken or commissioned by governments or non-government organisations.

The School aims to equip graduates with the skills and knowledge necessary to plan and conduct social research projects and to hold responsible positions in policy analysis and social research in either the public or private sectors.

The Bachelor of Social Science Degree combines a core program of study in social science, policy analysis and research methods with a major study in a particular social science discipline.

The core program aims to provide students with skills in undertaking social research particularly in an applied policy setting. These include written communication skills with particular emphasis on reports, submissions, position papers and proposals; the ability to undertake research and data analysis, both quantitative and qualitative; analysis and critical evaluation of research, arguments and policies; and the use of computers in social research and information processing.

The major study aims to equip students with a knowledge base in one of the social sciences.

In addition, students undertake elective subjects, totalling 90 credit points, from the subjects offered in the Faculty of Arts and Social Sciences and subjects carrying the equivalent of 30 credit points chosen from the University’s General Education program.

The degree may be taken as pass or honours level. The pass degree is a three year full-time program requiring the completion of 330 credit points including the required general education subjects. Honours students complete, in addition to the pass degree program, an extra year of full-time study or an extra eighteen months of part-time study. To be eligible to enter the honours year students must perform at a credit or better average in both the Social Science and Policy core as well as in their major study.

The Core Program in the Bachelor of Social Science

The core program is a one-hundred-and-twenty credit point sequence consisting of eight subjects taken over three years.

The subjects which make up the sequence are as follows:

Sociology

The School of Sociology comprises two Departments, each of which offers subjects at all levels. Subjects offered by the Department of Sociology, Culture and Communication are indicated by the prefix SOCC; the prefix SOCI indicates subjects offered by the Department of Sociology and Social Anthropology. Completion of any two Level 1 subjects (30 Level 1 credit points) in the School provides an introduction to Sociology and allows entry to all Upper Level subjects in both Departments.

*Note: First year students may choose any of four Level 1 subjects in Session 1 and any one of three Level 1 subjects in Session 2 offered by either Department.

Major Sequence

Students planning a major in Sociology take 2 one session Level 1 subjects (30 Level 1 credit points - either two SOCC or SOCI subjects or one of each) and four or more Upper Level subjects (60 Upper Level credit points) in subsequent years or sessions. After first year, students planning a more intensive study of Sociology may take up to seven one-session Upper Level Sociology subjects (i.e. maximum of 30 Level 1 credit points and 105 Upper Level credit points in Sociology).

A major taken in one Department will include a majority of subjects taught by that Department and may include some subjects offered by the other Department.

Honours Entry

To qualify for entry to honours in either Department (SOCC4000 and SOCI4000) students must have completed 30 Level 1 credit points and 105 credit points in Upper Level Sociology subjects at an average of a good credit grade (70%) or better. Students planning an honours degree should consult their Department during third year about any subjects which honours students are advised to study.

Combined Honours Entry

Requires 120 credit points, including 30 Level 1 credit points, in Sociology at an average of good credit grade or better and the requisite number of Credit Points at a standard set by the other School in the combined honours program.
Department of Sociology, Culture and Communication

In keeping with the diversity of sociological traditions, Sociology, Culture and Communication offers a wide variety of subjects from a range of theoretical perspectives. A common feature of these subjects, however, is a reflexivity about sociological practices and knowledges, an acknowledgement of the sociality of sociological activity. This concern shapes the way we research, teach and generally practise sociology. By simultaneously theorising sociological practices and emphasising the practical bases of sociological theory, we cut across familiar academic divisions between theory, methods and ethics. Most of our subjects combine these concerns. Moreover, this emphasis on practical sociological skills demystifies the abstraction at the heart of most sociological theory, replacing it with practices that are specific, passionate and embodied. It is a sociology open to the students’ own rigorous creativity, emphasising the production of knowledge and the importance of active learning.

SOCC1231
Introduction to Sociology: Everyday Life
Staff Contact: Ann Game, Andrew Metcalfe
CP15 S1 HPW3
Notes/s: Subject formerly titled Sociology, Self, Representation. Excluded SOCC1320.
Sociology can make our senses sharper, our passions more knowing and our knowings more passionate, critical and rigorous. This subject is organised around a range of sociological accounts of everyday life, offering an introduction to sociology and the work of the most famous sociologists at the same time as it offers students a chance to test these ideas through their own experiences. This dialogue between theory and experience makes ideas come to life while enriching ‘ordinary’ life with surprise and wonder. Among the theorists are Benjamin, Simmel, Durkheim, Freud, Bachelard, Mead, Weber, Marx, Cixous and Barthes.

SOCC1431
Post Colonial Worlds
Staff Contact: Michael Humphrey
CP15 S1 HPW3
Notes/s: Subject formerly titled Culture and Imperialism.
Explores the relationship between the European and non-European worlds through a study of the construction of knowledge of ‘the Other’ in sociological and anthropological work. Its aim is to explore the underlying legacy of imperialism in competing cultural representations of the past and present in the Third World. The central themes explored include identity, difference, tradition and space. The subject is about the continuing relationship of local knowledges and metropolitan knowledges.

SOCC1531
Australian Media: Institutions and Representations
Staff Contact: Gay Hawkins
CP15 S2 HPW3
Investigates the role of the media in everyday life and in the construction of us as subjects of Australian Society. It focuses exclusively on visual media (television, cinema and advertising) and their distinctive technologies, industrial forms and textualities. By drawing on the work of key social theorists such as Benjamin, de Certeau, Barthes, Foucault and Anderson questions about viewing practices, the production of meaning, policy discourse and the politics of representation will be explored.

SOCC1631
Cities, Space and Economy
Staff Contact: Ann Game, Gay Hawkins, Michael Humphrey
CP15 HPW3
Notes/s: Subject not offered in 1996.

SOCC1731
Australian Working Lives
Staff Contact: Diana Olisberg
CP15 HPW3

Upper Level Subjects

SOCC2201
Society and Desire
Staff Contact: Ann Game
CP15 S2 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
An introduction to theories of sexual identity and difference first formulated in the psychoanalytic tradition of Freud and Lacan and subsequently reinterpreted by the ‘French Feminists’, including, but not limited to, Luce Irigaray, Hélène Cixous, and Julia Kristeva. It considers their critiques of society and language, as well as the practice of ‘écriture féminine’, in historical, social and cultural contexts, and also looks at issues of translatability and application in a variety of realms.

SOCC2202
Metaphor and Cultural Analysis
Staff Contact: Ann Game, Genevieve Lloyd, Andrew Metcalfe
CP15 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology or 30 Credit Points in Level 1 Philosophy
Notes/s: Subject not offered in 1996. Excluded SOCC13595.

SOCC2203
Living and Dying
Staff Contact: Ann Game, Andrew Metcalfe
CP15 S2 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
Death is the ultimate, immutable other; it is the incomprehensible, unspeakable - the limit to culture. How then do we live our mortality? Investigates different responses to death, and the implications for experiences of life, the relation between life and death, and understanding of the relations between dying and birth and death. Considers various ways in which we manage, exercise and/or attempt to transcend death, and includes discussions of passion, sex, the body, laughter, generationality, love, grief, religion, science and writing. What does it mean to have grace in the face of death? And what does this imply about living, and about how we live? Complex and confronting questions for social and cultural theory will be approached through a focus on experiences and practices of everyday life.
SOCC2204
Performing Sociology
Staff Contact: Andrew Metcalfe, Ann Game
CP15 S1 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
Brings two elements into conjunction: discussion of the everyday practical skills of 'doing sociology', and discussion of philosophical issues about different approaches to sociology and knowledge. Treating academic knowledges as cultural productions open to sociological analysis, it considers the implications of such taken-for-granted practices as writing, reading, teaching, learning, examining, researching, storytelling and organising, and of such mediations as writing, lectures, conferences, journals, textbooks, the body, emotions, universities and disciplines. Aims to improve students' analytical skills by making them more aware of the specific qualities of the tools through which academic knowledges are produced. By scrutinising mediations that are normally invisible, the subject emphasises the full-bodied desires - the passions - involved in the generation of knowledges, and uses this awareness to develop rigorous, creative and joyous approaches to sociological analysis.

SOCC2302
Globalisation and Fragmentation
Staff Contact: Michael Humphrey
CP15 S2 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
Note/s: Excluded SOCI3596.
Looks at the theme of globalisation. Central to the concept is the idea of the expansion and development of global capital and the ascendancy of transnational over national forms of economy, society, politics and culture. A major focus of the subject is World Systems Theory of Immanuel Wallerstein and his critics.

SOCC2303
Violence
Staff Contact: Michael Humphrey
CP15 S2 HPW3

SOCC2702
Travel
Staff Contact: Ann Game, Gay Hawkins, Andrew Metcalfe
CP15 S1 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
Investigates forms of travel, the meaning and experience of travel and formations of desire around travel. It considers theoretical issues about time-space consciousness in forms of movement, storytelling and journeys, home, 'sense of place', travel and subjectivity. Also looks at specific journeys such as pilgrimages, migration and tourism as well as everyday forms of travel like commuting and watching television.

SOCC2703
Cities
Staff Contact: Gay Hawkins, Michael Humphrey
CP15 S2 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
Focuses on experiences and representations of cities. It is concerned with how the city has become the archetypal site and sign of modernity and with how spatiality is now central to the ways cities are lived and imagined. Looks at the city as the site of social transformation in the twentieth century and the tensions between order and disorder. Explores images of the city as the site of liberal and radical utopian dreams as well as the promise and disaster of cities. The changing landscapes of the city will be investigated through a look at examples such as streets, crowds, light/darkness, gardens, museums and shopping malls. The subject draws on a range of visual, literary and sociological material.

SOCC2704
Taste

CP15 S1 HPW3  
Prerequisite: 30 Credits Points in Level 1 Sociology

Note/s: Excluded SOCI3709.

discipline and relations to sociology; human origins and universals; modes of thought; exchange and society; kinship and social order and language.

**Sociological Research Methods**  
*Staff Contact: Frances Lovejoy*  
CP15 S2 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
A critical introduction to the basic principles underlying the art and craft of professional social investigation with primary emphasis on technical and practical considerations of social research.

**SOCl2402**  
**Investigation & Analysis**  
*Staff Contact: Frances Lovejoy*  
CP15 S1 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
This subject is about the way sociological research is done. It aims to introduce students to the fundamental elements of research and foster a critical view of the process, its outcomes and the purposes to which these are put. A number of classic studies in sociology will be examined and, building on this, the research process will be considered in detail and its assumptions analysed. Tutorial work will be organised around group research projects.

**SOCl2501**  
**Encountering Modernity: Sociological Theory**  
*Staff Contact: Maria Markus, Clive Kessler*  
CP15 S1 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
Provides a critical introduction to some of the most influential theoretical traditions (Marx, Weber, Durkheim), tracing their impact upon contemporary debates. Its aim is to ground students’ ability to think critically both about society and about social theories, recognising their assumptions, implications and limitations.

**SOCl2601**  
**Technology, Work & Culture**  
*Staff Contact: Jocelyn Pixley, Paul Jones*

**Social Utopias**  
*Staff Contact: Paul Jones, Jocelyn Pixley*  
CP15 S2 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
Examines some major strands of ‘utopian’ (and dystopian) thinking about social futures, i.e. social forecasting, ‘futurology’ or the sociology of anticipation. Critically discusses social and cultural forms that may (or may not) be indicative of more widespread future developments. Substantive matters include changes in the workplace, (un)employment, the environmental crisis, urban and suburban life, the ‘information super highway’, the ‘global’ economy, women’s employment and new forms of citizenship.

**SOCl2605**  
**Citizenship, Social Policy & Gender**  
*Staff Contact: Michael Bittman, Jocelyn Pixley*  
CP15 S2 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
Since the Great Depression, governments in the industrialised world have been expected to ensure the welfare of their citizens. There are major differences between nations in the way they have approached this goal. How does Australian social policy compare with social policy regimes in other parts of the world? Which social conditions and policies promote a more just and equal society? What steps can be taken to ensure full employment, eradicate poverty, provide income security, good health and a high quality of life for all? What groups are excluded from social citizenship? Has welfare in Australia meant mostly welfare for males? What are the likely future directions for social policy, given the development of new forms of exclusion and the impact of global economic changes of the past two decades?

**SOCl2606**  
**Fear and Hatred in Everyday Life**  
*Staff Contact: Mira Crouch*  
CP15 S1 HPW3  
**Prerequisite:** 60 Level 1 Credit Points in Arts  
The subject focuses on acts of social aggression that range from vandalism to group terrorist activities - all ubiquitous features of contemporary urban settings world-wide. Students will explore accounts of such destructive actions and seek ways of analysing them through critical studies of a broad range of works on society, human nature and modern civilisation, selecting from, for example, psychoanalysis, sociobiology, and theories of ‘modernity’. Lecture/seminars and workshops alternate throughout the Session.

**SOCl2701**  
**Culture: The Burdens of Modernity**  
*Staff Contact: Clive Kessler*  
CP15 S2 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
The question of ‘culture’ and the experience of ‘modernity’ as they appear in the works of a number of social theorists including Marx, Simmel, Freud, Elias, Tocqueville, Veblen and Riesman.

**SOCl2811**  
**Media and the Public Sphere**  
*Staff Contact: Paul Jones, Michael Pusey*  
CP15 S2 HPW3  
**Prerequisite:** 30 Credit Points in Level 1 Sociology  
Introduces sociological debates concerning the news media and public policy-making, including especially communications policy. The central organising theme is the democratic ideal of a public sphere of open discussion. The subject will place Australian debates about the media both in an international context of long-standing sociological concerns about journalistic practices (including news values and ethics) as well as within the local context of current policy concerns about economic rationalism.
Economic Change and Public Policy

Prerequisite: 30 Credit Points in Level 1 Sociology

How does economic change shape our lives? What are its effects on identities, cultures, power structures, and the 'quality of life'? How do 'economic rationalism' and managerialism impact on public policy, higher administration and government? These questions are pursued through topics that include globalisation and the 'crisis of the state', the future of the 'public sphere' and the public sector, women and the labour market, privatisation, corporatisation, ideology and power, economic journalism and the role of intellectuals in contemporary societies.

Nationalism, Citizenship and Cultural Identity

Prerequisite: 30 Credit Points in Level 1 Sociology

Explores different forms of contemporary nationalism, its main sources, various levels of its construction, and its political employment. Investigates the resurgence of nationalism against the background of globalisation and the connected processes of dislocation and relocation. The focus will be placed on the numerous antinomies resulting from these processes, including that between democratic citizenship and formation of collective and individual identities. Finally, the subject will address some of the theoretical perspectives concerning the potential of multiculturalism for the formation of non-exclusive, open identities.

Quality of Life in Australia

Prerequisite: 30 Credit Points in Level 1 Sociology

Investigates the relationship of economic and social contributions of life satisfaction, quality of life and happiness over the life-cycle. Looks at friendship, leisure, income, family, employment, consumption and health, and at different values and constructions that are placed on these factors by individuals, communities, socio-economic groupings and policy makers. Connects with competing understandings of the self and its relation to legal and economic systems and examines the consequences for identity, trust, citizenship, and rights in Australian society.

Critical Reason: Modern Sociological Theories

Prerequisite: 30 Credit Points in Level 1 Sociology

A consideration of some of the most important contemporary debates about the family, together with an opportunity for first hand experience of research procedures for investigating the modern family. Issues: what is the distinctive form of the modern family? in what ways has it changed and is it still changing? what is the relation between family

Social Power: Theories and Structures

Economic Change and Public Policy

Prerequisite: 30 Credit Points in Level 1 Sociology
forms and the subordination of women? and what are the social-psychological outcomes of the patterns of relations and communications which characterise the contemporary family? Methods and evidence on which the theories are based are also examined and opportunity for fieldwork is provided.

**SOCI3603**
**Gender, Work and Employment**
*Staff Contact: Jocelyn Pixley*
CP15 S2 HPW3
*Prerequisite: 30 Credit Points in Level 1 Sociology*

An examination of gender as a central organising principle of work. Specific topics to be explored include the gendered division of work, the distinction between work and employment and the relation between unpaid and paid work, discrimination in employment, the segregation of the labour market between men and women, the sexuality of organisations, and the future of work.

**SOCI3604**
**Medicine and Society**
*Staff Contact: Mira Crouch*
CP15 S2 HPW3
*Prerequisite: 30 Credit Points in Level 1 Sociology*

A consideration of health, illness and medicine as social phenomena. Disease patterns are related to cultural meanings of health and illness. Study of the historical context of medicine aids the analysis of its 'modern' forms and of its practical as well as symbolic significance in individuals' lives. The nature of medical knowledge, the power of the profession and the institutions of health care are critically examined. Theoretical understanding is developed through research into specific topics including AIDS, cancer, mental health and TB. The subject program contains a practical research component.

**SOCI3607**
**Social Movements and Society: Current Debates**
*Staff Contact: Jocelyn Pixley*
CP15 S1 HPW3
*Prerequisite: 30 Credit Points in Level 1 Sociology*

Examines sociological debates about social movements and assesses these approaches in the light of examples of social movements in Australia and elsewhere. The relation of social movements to social change is the key question asked, partly through critical analyses of data on a social movement of students' choice. Movements chosen may range from Feminism, the Gay and Lesbian movements, Environmental, Land Rights or Labour movements to 'fundamentalists', or more organised, specific associations emerging from a broader movement. Involves a research project and consideration of definitional and theoretical problems. What is a social movement? Is this a useful sociological concept or not? How can we say whether some movements are progressive, and/or defensive, while others may be regressive or reactionary?

**SOCI3702**
**Pacific Islands Identities and Cultures**
*Staff Contact: Grant McCall*
CP15 S1 HPW3
*Prerequisite: 60 Credit Points in Arts*

Analyses the traditional cultures of the Pacific Islands, focusing mainly on Polynesia, but using data from Micronesia and Melanesia where appropriate. Provides students with the historical and intellectual context of the study of the Pacific Islands, including the conceptual and theoretical tools needed to comprehend the more than one thousand societies and cultures there. The broad outlines of the waves of human settlers in the region are explored, followed by discussions of specific topics, in selected locales, that best represent the rich diversity of the region. Topics include religion and sorcery, chieftainship, relations with the environment and how islanders see themselves in their worlds.

**SOCI3706**
**Pacific Development in a Global Context**
*Staff Contact: Grant McCall*
CP15 S2 HPW3
*Prerequisite: 60 Credit Points in Arts*

Surveys the immense expanse of the Pacific Ocean and the contemporary peoples and cultures that live on its rim and in its basin, exploring their cultural and theoretical contributions to contemporary social science. Social anthropological materials on contemporary issues in development and change from the Pacific Islands are contrasted with comparable data from selected Pacific rim locales, such as South America, the Philippines and Japan to derive an understanding of the common problems and complex issues of the region, and Australia's role in those affairs. Topics include land tenure, environmental degradation, underdevelopment, cargo cults, cultural adaptation and commercial and military colonialism.

The format generally is a one hour lecture and a two hour seminar. No textbook is planned at this time, but a compilation of readings will be assembled.

SOCI3717
Aboriginal Women
Staff Contact: Grayson Gerrard
CP15 S2 HPW3
Prerequisite: 30 Credit Points in Level 1 Sociology
An overview of Australian Aboriginal women in three time-frames: the pre-colonial, colonial, and contemporary. Women's role in subsistence, social organisation and religion; their colonial role as sex partners, labour, and 'stolen children'; their contemporary situation in relation to domestic violence, the feminist movement and Aboriginal art. Throughout the subject, the question of Aboriginal women's status is examined: their status in pre-colonial society; the effect of colonization on 'the position of women', and their status today.

SOCI4000
Sociology Honours (Research) F
Staff Contact: School Office
Note/s: Intending students are advised to include in their programs at least two of the following subjects: SOCI2301, SOCI2401, SOCI2402, SOCI2501, SOCI2701, SOCI2811, SOCI3607.
Students are required to participate in two subjects approved by the school and a thesis workshop, and to submit a dissertation on their own research.
The requirements for entry to Sociology Honours (Research) are listed at the beginning of the School's entry in this section.

Spanish and Latin American Studies
Subjects in Spanish and Latin American Studies (within the School of Modern Language Studies) are available in language, literature, film, history and art. Major sequences may be followed in language and literature and/or history. In the case of language, entry to one of three streams depends on whether a student has no knowledge, some knowledge or an advanced knowledge of the Spanish language. Intensive oral and written language work is an essential element for the elementary and intermediate streams and classes for these, as for the advanced stream, are conducted wherever possible in Spanish. Students intending to major in the Spanish language are encouraged to enrol in first year linguistic subjects. A major in Spanish and Latin American history may be completed with no knowledge of Spanish but a reading knowledge of the language is a prerequisite for entry to the Honours year.

The Hispania Society
All students in the Department of Spanish and Latin American Studies (SLAS) are automatically members of the Hispania Society and membership is free. The Society is organised and run by the students of SLAS. All years are represented on the executive committee, which is elected at the Annual General Meeting at the beginning of each academic year.
Room 267 of the Arts and Social Sciences building is open as a Common Room to the students of the Department and is used as the headquarters of the Society. Here students can practise Spanish conversation with native speakers or with other students. Notices about Hispania's activities are posted in the Common Room and on noticeboards around the Arts and Social Sciences building.
Typical events are wine and cheese parties, dinners at Spanish restaurants and visits to Spanish language films.

Women’s Studies and Gender Studies

Convenor: Dr Brigitta Olubas (English)

The undergraduate program in Women’s Studies and Gender Studies enables students to construct an interdisciplinary major focusing on feminist issues and issues of gender. It provides an important extension to major sequences in both Arts and the Social Sciences.

The core subjects are designed to develop students’ understanding of the multidisciplinary approaches to important debates in feminist theory and method, and to address some key substantive issues including the relationship between gender and sexual difference, the construction of gender through language and texts, the place of Women’s Studies and Gender Studies in the academy and the intersection between and debates around feminism and theories of race, class, ethnicity, and sexuality.

Major Sequence

A major sequence in Women’s Studies and Gender Studies may only be taken as an additional major sequence together with a home-based major.

The prerequisite for entering the major sequence in Women’s Studies and Gender Studies is 60 Level 1 credit points in the Faculty of Arts and Social Sciences. To complete a major sequence students must successfully complete 60 credit points at upper level from the Women’s Studies and Gender Studies program. At least 30 of these credit points must be made up by any two of the four core subjects (List A - see below). Students may make up the remaining 30 credit points from the core subjects (List A) and/or option subjects, which are designed to complement the core subjects (List B - see below), and a maximum of 15 credit points may be chosen from approved subjects offered by other Schools (List C - see following).

List A: WOMS core subjects (TWO to be offered each year)

Select at least two subjects from this list.

To be offered in 1996:

WOMS2040
Challenges to Feminism: Race, Class, and Sexuality
Staff Contact: Diana Palaversich (Spanish & Latin American Studies)
CP15 S1 HPW3
Prerequisite: 60 Level 1 credit points in Arts
Addresses the question of the diversity of women’s experience from a variety of perspectives, and examines a range of issues including the way power and powerlessness accumulate in work relationships around race, gender and class; the problems of developing a politics of women’s experiences; and differences of race, class, ethnicity and sexuality within feminism.

WOMS2010
Introduction to Feminist Theories
Staff Contact: Brigitta Olubas (English)
CP15 S2 HPW3
Prerequisite: 60 Level 1 credit points in Arts
Introduces students to a range of theoretical approaches to feminism and issues relating to concepts of gender, introducing students to some key concepts in different feminist theories, for example: liberal, radical, and socialist feminisms; post-structuralist and psychoanalytic theories; critiques of mainstream feminism from ‘other’ perspectives, eg of race, ethnicity, class and sexuality; questions of essentialism and identity politics.

To be offered in 1997:

WOMS2030
Language and the Textual Construction of Gender
Staff Contact: Suzanne Eggins (English)
CP15 S1 HPW3
Prerequisite: 60 Level 1 credit points in Arts
Introduces students to an interdisciplinary study of language and textuality, beginning with a focus on social semiotics. Students learn to apply semiotic techniques to analyse the construction of gender roles in everyday interactions and non-literary texts. This is followed by a discussion of performance and gender (with special reference to the theatre) and of the textual construction of femininity and masculinity in contemporary film and literary texts.

WOMS2020
Gender and Sexual Difference
Staff Contact: See convenor
CP15 S2 HPW3
Prerequisite: 60 Level 1 credit points in Arts
Explores questions raised by the ‘nature/nurture’ debate. In focusing on whether sexual difference is socially constructed or essential, it problematizes the question of whether equality or the affirmation/celebration of differences should be the goal of feminism. These issues are pursued through a critical analysis of a number of areas, including biological studies of gender difference; psychological perspectives on sex role development; studies of the relationship between gender, peace, and conflict; and issues of sexuality and desire.

List B: Option subjects

Select no more than two from this list.

These are designed to augment the core subjects by providing interdisciplinary approaches to particular areas, informed by feminist theory and gender issues. We will offer two of these subjects each year, according to staff availability.

To be offered in 1996:

WOMS2200
Texts of Desire: Feminist Perspectives on Popular Fiction
Staff Contact: Suzanne Eggins (English)
CP15 S1 HPW3
Prerequisite: 60 Level 1 credit points in Arts
Note/s: Excluded ENGL3503.
Explores from a social-semiotic/cultural studies perspective the generic characteristics and social role of popular fiction (especially romance fiction) in the construction and reconstruction of femininities. As texts such as teen romance, Mills & Boon, Jackie Collins etc. continue to sell in the millions, feminist theorists have begun exploring questions such as: why women read these texts; what gender roles the texts offer their readers; how the texts construct women experiences; and differences of race, class, ethnicity and sexuality within feminism.
as a market. In examining the acquisition of literacy habits by school girls and adult women, we address the issue of reading (and reading pedagogy) as gendered, political practice.

WOMS2100
Alternative Imaginings/Imagining Alternatives: Women's Narratives from Latin America (in translation)
Staff Contact: Diana Palaversich (Spanish & Latin American Studies)
CP15 S2 HPW3
Prerequisite: 60 Level 1 credit points in Arts
Note/s: Excluded SPAN3334, SPAN3341.

Examines a wide variety of recent narratives composed by Latin American women. Different forms represented are Magical Realism, Autobiographical and Testimonial Writing, various kinds of short fiction, and a novel of dictatorship. Major themes raised in these texts are racial discrimination, class antagonism, gender conflict and fluid sexualities. All texts are read in English translation, and the subject will be accessible to those students with no literary background.

List C: Approved subjects from other Schools

The MMus coursework degree (8226) involves the successful completion of six session-length units. Courses can be taken in any combination of options, but two streams are likely to have particular appeal to musicians teaching in secondary schools or who are involved in the organisation and direction of musical practice and performance in schools or the community. The Australian Studies stream (program 1000) caters for the need of many school music teachers to be able to relate a broad curriculum requirement to specific knowledge and examples. Musicians who are involved in the direction of instrumental groups (orchestras, brass groups, string or woodwind ensemble) or choirs and vocal groups of all sizes as part of their work as school music teachers or by reason of initiatives taken in the wider community are likely to find the Instrumental/Vocal Pedagogy stream (program 1010) particularly useful. This is a cluster of subjects designed to provide a firm theoretical basis for the development of further musical authority and leadership and, at the same time, to make available many opportunities for the reinforcement of practical skills in conducting, rehearsing and teaching ensemble skills to instrumental and choral groups.

Cognitive Science

Available: MA; GradDipArts; GradCertArts
Co-ordinator: Anthony Corones

Master of Arts

Cognitive Science has recently emerged as an exciting and fruitful domain of scientific inquiry in which there has been a convergence of a number of disciplines including artificial intelligence, psychology, philosophy, linguistics and neuroscience. Since the revolutionary developments in these fields during the 1950s and 1960s, there has come to be a broad consensus that the problems of mind, language, knowledge and perception do not belong exclusively to any one discipline, but fall to all of them. This MA program (course 8225, program 1000) has been established with a view to providing a comprehensive perspective on Cognitive Science, in the same interdisciplinary spirit which is characteristic of the field.

Subject Descriptions

All subjects consist of weekly 2-hour seminars, held over a single session (14 weeks). All subjects carry a weighting of 20 credit points.

Environmental Studies

Available: GradCertArts

Co-ordinators: Dr Paul Brown, Associate Professor Gavan McDonell

This Graduate Certificate in Environmental Policy (course 7325, program 1030) is designed for graduates wishing to learn more about the social context of environmental policy making and management. It is highly relevant for those already working in these areas of government or the private sector, and for teachers, educational planners and community service co-ordinators. Practitioners concerned with the built environment, such as architects and planners, will also benefit from the course.

The rise of modern environmentalism, the concept and interpretation of ecological sustainability, and the assessment and management of technological risk are central concerns for the certificate. The prescriptions of international treaties reflect the globalisation of pollution problems, yet the action which flows from these prescriptions requires national and local programs.

Increasingly, managers and policy makers must respond using their understanding of ecological sustainability, taking account of a broad range of environmental and social issues.

'Sustainable Development' is characterised quite differently by various constituencies, putting an onus on decision makers to engage with participatory processes in order to reach agreement about how environmental management for sustainability should proceed.

With this in mind, the certificate aims to equip participants to apply practical knowledge of environmental matters within their professions.

Entry Requirements

The normal qualification for entry is a four year degree, which can be in any discipline. In appropriate cases, relevant professional experience may be accepted in lieu of formal qualifications.

Course Structure

The certificate consists of two subjects taken in order: SCTS5315 Society, Environmental Policy and Sustainability, and SCTS5316 Environmental and Technological Risk Controversies.

Duration

Classes two hours per week over two fourteen week sessions, in the timeslot 5.30-7.30.

SCTS5315
Society, Environmental Policy and Sustainability
Staff Contact: Paul Brown
CP20 S1 HPW2

Examines the principles of sustainable development in the social, historical and political context within which they've been devised, and their application in different spheres and programs of government, industry, institutions, and community groups. Students will engage with the social and historical context of modern environmentalism, science and the environment, the precautionary approach, sustainability and the built environment, and the international agreements and national commitments to ecologically sustainable development. As an outcome, participants will gain practical insights into key environmental issues and the capacity to apply this knowledge to policy making and management problems, and to problems arising in planning and design.

SCTS5316
Environmental and Technological Risk Controversies
Staff Contact: Paul Brown, Gavan McDonell
CP20 S2 HPW2
Prerequisite: SCTS5315 or special permission

This subject takes a case study approach to understanding the social controversies which are frequently associated with resource and technological developments. Students will examine disputes over issues such as resource use and extraction, energy and transport systems, the siting of hazardous facilities, environmental impacts of building materials, and land based sources of marine pollution.

Introduction to concepts of rationality, forms of knowledge and uncertainty, and questions of risk, trust and fairness. Such insights from the sociology and cultural theory of risk will demonstrate the limitations of explanations grounded in individual cognition and risk perception and so-called NIMBY (not in my backyard) reactions by communities. Participants will be able to develop their own capacity to communicate and negotiate about 'acceptable risk' as the issue arises in environmental management, in the workplace and in daily life.

Theatre and Film Studies

Available: MA; GradDipArts; GradCertArts
Co-ordinator: Dr Margaret Williams

Master of Arts

Full-time students complete the Masters degree (course 8225, program 1080) in 1 year. Part-time students normally complete the course in between 2 and 3 years. Students in this course are required to complete six (6) subjects as listed in the Masters program.

Subjects in the Masters degree are designed to offer a wide-ranging program in the study of both the theory and practice of theatre as performing arts, principally in the twentieth century. These subjects are worth 20 credit points and of one session's duration. Students undertaking this program must complete all 120 credit points within the School of Theatre and Film Studies.

Entrance Requirements

The normal requirement for entry is at least a BA (Pass) degree of good quality (i.e. with Credit grades or better), preferably with a major in theatre. Graduates who have little or no theatre component in their degree, but who have a major (with credit grades or better) in a cognate subject area, should be able to demonstrate substantial practical experience in the discipline(s), (e.g. as professional theatre workers, television production staff, teachers offering drama components in their school's curriculum etc).

All subjects are of equal value (20 credit points) Most subjects meet for two hours per week (three in the case of Shakespeare in the Twentieth Century, to allow for film/video screenings, and The Directorial Process in the Theatre). However, those subjects marked with an asterisk will be organised to include one or more optional practical workshops for those students who wish to explore the practical application of the subject. All students will attend weekly seminars for the first half of the semester, after which they may choose either the workshop component, or a series of less frequent seminars with extended reading leading to a formal essay.

The workshop option depends on a viable number of students selecting it. Workshop times will be arranged in consultation with students.

All subjects are dependent on staff availability and student enrolments.

Master of Music Degree, Graduate Diploma in Music and Graduate Certificate in Music

Coursework degrees, graduate diplomas and graduate certificates in Music and Music Education in 1996 will offer new and more flexible possibilities for postgraduate students. Courses can be taken in any combination of options, but two streams are likely to have particular appeal to musicians teaching in secondary schools or who are involved in the organisation and direction of musical practice and performance in schools or the community.

The Australian Studies stream caters for the need of many school music teachers to be able to relate a broad curriculum requirement to specific knowledge and examples. In Session 1 of 1996 they will be able to lay the groundwork for systematic and continuing studies in Australian traditional and popular music with a one-session option entitled An Ethnomusicological Exploration of Australian Traditional and Popular Music (MUSI5104), using principles which can be applied to the study of comparable musics in other cultures. Session 2 will offer an option dealing with the music that came in the baggage of colonial settlers in both Australian and the United States (and, by simple extension, many other countries) and the way that music and its performance adapted to a new environment (MUSI5103 American and Australian Responses to Colonial Environments in Music). You can follow these subjects up in Session 1, 1997, with Traditional and Contemporary Australian Aboriginal Music (MUSI5107) and, in Session 2, with Australian Music in the Twentieth Century (MUSI5125). Completion of these four options would allow you to settle for a Graduate Diploma in Music with a special concentration on Australian Music Studies or you might well decide to take another two subjects (one of them being, if you wish, MUSI5105 The Challenge of Ethnomusicology) in 1998 to qualify for a full Master of Music coursework
degree, with a special and demonstrable strength in the examination of all kinds of music in Australia - and, by an extension of the methods used - anywhere else.

Musicians who are involved in the direction of instrumental groups (orchestras, brass groups, string or woodwind ensemble) or choirs and vocal groups of all sizes as a part of their work as school music teachers or by reason of initiatives taken in the wider community are likely to find the Instrumental/Vocal Pedagogy stream particularly useful. This is a cluster of subjects designed to provide a firm theoretical basis for the development of further musical authority and leadership and, at the same time, to make available many opportunities for the reinforcement of practical skills in conducting, rehearsing and teaching ensemble skills to instrumental and choral groups. Creativity and Music (MUSI5121) in Session 1, 1996 opens this stream, with Musical Performance: Learning Theory and Pedagogy (MUSI5126) providing a soundly based framework for instruction and leadership in performance in Session 2. An option to be presented in Session 1, 1997, offers a clear basis for research in music education (MUSI5122) followed, in Session 2, by a special option entitled Conducting and the Interpretation of Music (MUSI5127). Students can choose to combine these four subjects with another two session-length subjects - one of them could be MUSI5120 Psychology in Music Teaching and Learning in Session 1 of 1998 - in order to qualify for an MMus degree clearly identifiable as representing sustained advanced study in musical teaching and performance direction; or the student may decide to use any four of these subjects as the total qualification for a Graduate Diploma in Music with a special strength in Instrumental/Vocal Pedagogy.

Finding and Assessing Musical Materials 1 (MUSI5300: a guide to research and reference skills) and 2 (MUSI5301), Renaissance Society in its Music (MUSI5112) and Analytic Techniques (MUSI5117) are other subjects that may appeal to students for the purpose of completing an MMus coursework degree.

Please note that any combination of the music subjects offered in the next three years may be used to make up an MMus degree. If you wish to graduate with a Graduate Diploma in Music under the banner of either Australian Studies or Instrumental/Vocal Pedagogy the four subjects you take must be chosen from the prescribed list for those streams. If you opt to complete a Graduate Certificate in Music in either Australian Studies or Instrumental/Vocal Pedagogy you must choose two subjects from the appropriate prescribed list.

If you complete a Graduate Diploma in Music with special attention to Instrumental/Vocal Pedagogy or a comparable list of MMus subjects, including Research in Music Education, plus another two subjects drawn from the Music Education options, the degree will have a special strength in Music Education.

Graduate Program in Policy Studies

The graduate program in policy studies applies a social science perspective to questions of policy and management in modern organisations. Students acquire a solid grounding in policy analysis and the policy process, and then proceed to specialise in a field of applied policy studies, and to complete a Major Policy Exercise.

The program prepares students for work which requires analytical skills and a practical appreciation of the processes of policy-making and implementation. There is an emphasis placed on developing the skills and perspectives needed for proficient assessment and evaluation, and sensitivity to the effectiveness of programs in their own terms, and in terms of the impact they have on clients, customers and the public.

The program is oriented to the practice of policy, and participants are required to have relevant work experience. This may be in the public sector, unions, business organisations or community bodies.

Duration

The MPS is a coursework degree which takes two sessions full-time or four sessions part-time.

Students who complete the four foundation units of the MPS program (SLSP5001, SLSP5002, SLSP5003, SLSP5004), plus the additional unit SLSP5005 qualify for the Graduate Diploma in Policy Studies.

Eligibility for Admission

Applicants should hold a bachelor’s degree in any field from an approved university or college of advanced education and have significant work experience in an area appropriate to the degree program.

Applicants who have completed at least one year (or equivalent) of appropriate study beyond the first degree, may be admitted with a lesser work experience requirement.

In exceptional circumstances applicants may be admitted without a first degree but with general and professional attainments acceptable to the School.

Graduate Diploma in Diplomatic Studies (Course 5290)

Co-ordinator: Tony Palfreeman (Political Science)

Duration

The Diploma is offered as a full time degree over one calendar year.
The Diploma is a professional rather than a research award.
The Diploma program has been designed for those who seek a solid grounding in international affairs, and who need the analytical tools and methodology to understand a world which is not only undergoing rapid transformation but which intrudes more and more starkly into our national and domestic lives.

It will be particularly valuable for those with professional and other interests in diplomacy, conflict management, foreign policy, defence policy, international legal issues, international commerce and journalism.

Prerequisites: Candidates should have obtained a university degree at pass level (or equivalent) in a field relevant to the subjects offered and should have relevant professional work experience.

Candidates need to complete three session-length subjects in session one. In session two students have to complete a full length session subject which has, as an additional subject assessment component, a Policy Submission Paper and an oral examination. Each subject consists of 14 hours of lectures and 14 hours of seminar presentations and discussion. All lectures and seminars take place in the late afternoons or evenings.

In 1996 the four subjects offered are:

POLS5120
The International System
Staff Contact: Tony Palfreeman
CP20 S1 HPW2

A study of global politics as a discrete political system. There are four clearly defined steps in the analysis, beginning with the nature, distribution and exercise of power, followed by a study of the clash of interests between the major international actors; thirdly, an overview of the physical, moral and institutional constraints on the exercise of power; and fourthly, an analysis of the ideological dimensions of global politics. There is a theoretical component of the subject which sets the conceptual framework for analysis, followed by a wide ranging empirical study of the dynamics of global politics.

Assessment: A research paper of about 2,500 words (75%) and an exercise(s) in critical review (25%).

POLS5121
International Institutions
Staff Contact: Jacques Frechette
CP20 S2 HPW2

Examines selected representative international institutions, particularly in terms of their structure; their activities and procedures: the role in, and contribution to global order; and their viability and future directions. The selection will include the United Nations Organisation itself, one or two specialised agencies and one or two international non-governmental organisations.

Assessment: A research paper of about 2,500 words (75%) and an exercise(s) in critical review (25%). In this subject there is an additional assessment component which exists of a policy submission paper of about 4,000 words (to be assessed by the School Assessment Committee) and an oral examination.

Preliminary readings for all subjects will be available at the beginning of the course.

There is an extensive use of case studies.
Assessment: A research paper of about 2,500 words (75%) and an exercise(s) in critical review (25%).

Graduate Diploma in Professional Ethics

Co-ordinator: Stephen Cohen (Philosophy)
While open to anyone with an interest in the area, this Diploma program (course 5295) has been devised as a response to pressing demands from two quarters: first, from professionals and the professions, who wish to ensure high standards of ethical practice, and to complement the requirements of legal regulation with those of coherent and consistent moral positions; second, from public demand and expectation of higher standards of accountability and responsible conduct from the professions and their practitioners.
The course consists of the following four subjects:
PHIL5400 Moral Theory and Moral Reasoning
PHIL5401 The Professions and Society
PHIL5402 Ethical Issues in Business and the Professions
PHIL5403 Ethics in Organisations

Duration
The course can be completed in one or two years. Each subject is one session (14 weeks) in length, and involves class-contact time of one two-hour meeting per week.

Entry Requirements
The normal qualification for entry is a Bachelor’s degree or its equivalent from a recognised institution of higher education. Professional experience may be taken into account in cases where an applicant does not possess the appropriate tertiary qualification.

Sequence of Subjects
Students intending to complete the course in one year will enrol in PHIL5400 and PHIL5401 in session 1, and PHIL5402 and PHIL5403 in session 2 of that year. Students intending to complete the course over two years (4 sessions) will typically enrol in PHIL5400 in session 1, PHIL5402 in session 2, PHIL5401 in session 3, and PHIL5403 in session 4.

*Faculty of Science  
†Faculty of Biological and Behavioural Sciences
Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty or board (hereinafter referred to as the Committee) to a candidate who has made an original and significant contribution to knowledge.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment as a candidate for the degree.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be lodged with the Registrar at least one month prior to the date at which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School* and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled either as a full-time or a part-time student.

(4) A full-time candidate will present the thesis for examination no earlier than three years and no later than five years from the date of enrolment and a part-time candidate will present the thesis for examination no earlier than four years and no later than six years from the date of enrolment, except with the approval of the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor and where possible a co-supervisor who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organization or institution will have a co-supervisor at that institution.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

*School* is used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, a centre given approval by the Academic Board to enrol students, and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.
(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
(3) The thesis shall comply with the following requirements:
   (a) it must be an original and significant contribution to knowledge of the subject;
   (b) the greater proportion of the work described must have been completed subsequent to enrolment for the degree;
   (c) it must be written in English except that a candidate in the Faculty of Arts and Social Sciences may be required by the Committee to write a thesis in an appropriate foreign language;
   (d) it must reach a satisfactory standard of expression and presentation;
   (e) it must consist of an account of the candidate's own research but in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.
(4) The candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work previously published whether or not such work is related to the thesis.
(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.
(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that one of the following:
   (a) The thesis merits the award of the degree.
   (b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of school.
   (c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the higher degree Committee, the thesis would merit the award of the degree.
   (d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to re examination.
   (e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.
(3) If the performance at the further work recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re present the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.
(4) The Committee shall, after consideration of the examiners’ reports and the results of any further work, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate be permitted to resubmit the thesis after a further period of study and/or research.
