Subjects, courses and any arrangements for courses including staff allocated as stated in this Handbook are an expression of intent only. The University reserves the right to discontinue or vary arrangements at any time without notice. Information has been brought up to date as at 1 November 1997, but may be amended without notice by the University Council.

CREDIT POINTS – IMPORTANT NOTE

From 1996, UNSW introduced a university wide credit point system for all subjects offered to both undergraduate and postgraduate students. The system means that a subject will have the same credit point value irrespective of which faculty’s course it is counting towards. Students are able to determine the value of subjects taken from other faculties when planning their programs of study. The student load for a subject is calculated by dividing the credit point value of a subject by the total credit points required for the program for that year of the course. Student load is used to determine both HECS and overseas student fees. Students who take more than the standard load for that year of a course will pay more HECS.

Old subject measures have been replaced by new university credit points. Every effort has been made to ensure the accuracy of the credit point values shown for all subjects. However, if any inconsistencies between old and new credit point measures cause concern, students are advised to check with their faculty office for clarification before making 1998 subject selections based on the credit points shown in this handbook.

Welcome to the Faculty of Arts and Social Sciences at UNSW. Whether you are entering a University for the first time as an undergraduate student, returning for postgraduate work some years after graduation or commencing a research degree, I hope you have a stimulating and enjoyable experience at UNSW.

Most new students have some concerns about whether they will get employment after graduation and whether that employment will provide them with a satisfying career. An Arts and Social Science degree is less of a vocational qualification than many other areas of study in a university but it is nevertheless highly valued in the community. Arts and Social Science graduates are to be found in a broad range of occupations in both the public and private sectors. Indeed, many prominent people holding responsible positions across a wide range of occupations have an Arts degree as their first University qualification. No other course of study provides you with the same combination of broad intellectual growth and specific skills of research, analysis, and the ability to write clearly and concisely. In a world where people increasingly have a number of career shifts in their lifetime, the Arts and Social Science graduate possesses a unique combination of broad intellectual and analytical skills which can be readily transferred from one occupation to another.

In the Faculty of Arts and Social Sciences at UNSW, we pride ourselves on the quality of our teaching and our research. We offer a wide range of disciplines and areas of study and the flexibility to enable students to tailor courses to their personal interests. I urge you to seek advice from your lecturers and from the Faculty administrative staff at all stages of your study.

If you are entering the Faculty as an undergraduate, I would urge you to consider continuing your study into a fourth honours year. For students who excel in their chosen field of study, a fourth year is both personally rewarding and of considerable career advantage. A major part of the honours year is a research thesis in which you will sharpen your research, analytical and writing skills and in the process develop skills and expertise in considerable demand in the workplace.

It is important that you set personal goals for your University study. I hope that you aim high with ambitious goals, that your studies are intellectually exciting and that your experience of the University is enjoyable.

John Ingleson
Dean, Arts and Social Sciences
The academic year is divided into two sessions, each containing 14 weeks for teaching. Between the two sessions there is a break of approximately six weeks, which includes a one-week study period, two weeks for examinations, and three weeks recess. There is also a short recess of one week within each session.

Session 1 commences on the Monday nearest 1 March.

This Handbook is divided into two main sections comprising undergraduate study and graduate study. Initially, course outlines are presented in each section, providing a guide to the degrees within organisational units. This is followed by a full listing of subject descriptions in each section, which provide full details of subject content, contacts and session/prerequisite details.

As changes may be made to information provided in this Handbook, students should frequently consult the noticeboards of the schools and the official noticeboards of the University.

Arts Subject Timetable

The timetable for Arts subjects is published in a separate booklet and will be distributed to new students on final enrolment. Later year students will receive a copy of the timetable with their provisional forms, which will be distributed before the end of the current year of study. Other students enrolling in Arts subjects may refer to a copy at the Faculty of Arts and Social Sciences Office, Room G1, Morven Brown Building.

Students in Years 2, 3 and 4 are reminded that alterations to the published timetable are occasionally made before the beginning of session. A check should be made with the appropriate school/department during late February for times of Upper Level subjects.

Re-enrolment Procedures

Re-enrolling students must collect a re-enrolment kit from the Arts and Social Sciences Faculty Office (MB G1) in November each year. The provisional enrolment form it contains must be returned by the second last week of December and will ensure that you are correctly and speedily enrolled for the new academic year in February. Students who submit incorrect or incomplete forms will need to attend an enrolment session at the Faculty Office in late January or early February. Students who have not submitted their provisional enrolment form will not be permitted to enrol until a later date and may become liable for a late fee.

Students who fail to complete subjects carrying at least 60 credit points in any year may be required to 'show cause' under Rule 3 of the University's re-enrolment regulations as to why they should be permitted to proceed with their studies.

Progression

Subjects taught within the Faculty are divided into Level 1 (first year) subjects and Upper Level (second and third year) subjects. Students who have only completed 90 credit points will be required to complete a further 30 Level 1 credit points concurrently with a second year program.

Overseas Study

Students are encouraged to undertake a period of relevant overseas study within their degree. Students (including those admitted with Advanced Standing) must have completed at least 120 credit points in subjects offered within the Faculty before overseas leave will be approved.

Financial Assistance for Overseas Study

There are a number of scholarships and bursaries available for exchange students who need assistance with travel and living expenses. For more information, contact the Coordinator of Student Exchange Programs at the International Student Centre.

Arts and Social Sciences students who are unsuccessful in their application for scholarship funds from the University, are eligible to apply for assistance from the Faculty. For further details, contact Wendy Jones, telephone 9385 1443.
Textbooks

Text and reference books are not listed in this Handbook. The University publishes a separate Text and Recommended Book List for each faculty, which is available free of charge from the Faculty Office, Room G1, Morven Brown Building from January each year.

Library Facilities

Although any of the University Libraries may meet specific needs, staff and students of the Faculty of Arts and Social Sciences are mainly served by the Social Sciences and Humanities Library.

The Social Sciences and Humanities Library

This library is designed to serve the specialised reference and research needs of staff, graduate students and undergraduate students.

All students are welcome to use the library and to borrow books from it. The Social Sciences and Humanities Library occupies Level 3 and 4 of the library building. The main services and information desk are on Level 3.

Undergraduate Services

The Open Reserve Section houses books and other materials which are required reading. Lecture cassettes are also available. Study Kits, which are collections of required readings, are available for purchase from Unicopy, Level 2.

The multimedia resources service on Level 3 includes multimedia items, videos, cassette tapes and newspapers.

Photocopying facilities are available at Unicopy, the main photocopying area on Level 2; in each of the special subject libraries; and in Open Reserve. Change and assistance are available from Unicopy staff on Level 2.

Library tours are available at the beginning of Session I and self-guided tours are available throughout the year.

Technical Resources Centre

The TRC assists teaching and research by providing technical support including computing and audio visual facilities and materials.

Two language laboratories are located on the first floor of the Morven Brown Building. One laboratory is for language teaching and the other is available for self-access. There is also a self-access video laboratory and three classrooms equipped for audio visual assisted teaching.

Located on the lower ground floor are three computer teaching laboratories which are also available to students on a 24 hours 7 days a week basis.

A fourth computer laboratory is situated on Western Grounds to service the Schools of Education Studies and Social Work.

Computing at UNSW

The Division of Information Services (DIS) encompasses information technology and the University Library at UNSW.

Specific University information which is frequently updated is available on the World Wide Web (WWW) in the UNSW home page at http://www.unsw.edu.au.

The Faculty has four computer laboratories equipped with a range of software, including word processing, spreadsheets, database and foreign language programs. Help is available from computer support officers.

The Faculty of Arts and Social Sciences maintains its own WEB Server which provides information to prospective students as well as course outlines and course materials for current students.

A new fully equipped multimedia teaching laboratory was completed in 1997 to support the new Bachelor of Arts (Media and Communications) course.

Student Clubs and Societies

Students have the opportunity of joining a wide range of clubs and societies. Many of these are affiliated with the Students' Union. There are numerous religious, social and cultural clubs and also many sporting clubs which are affiliated with the Sports Association.

Clubs and societies seeking to use the name of the University in their title, or seeking University recognition, must submit their constitutions to either the Students' Union or the Sports Association if they wish to be affiliated with either of these bodies, or to the Registrar for approval by the University Council.

For information about the following Societies see under each School's entry in the Subject Descriptions section:

- The Chinese Language and Cultural Society
- The Collegium Musicum Choir of UNSW
- The English Society
- The French Society
- The Geographical Society
- The German Society
- The History Students Association
- The Indonesian Study Society
- The Mundo Latino Society
- The Psychological Society
- The Scientia Society
- The Socratic Society (School of Philosophy)
- The Student Association of Social Sciences
Student Representatives

Each year a number of student members are elected to the Faculty to represent all students studying Arts subjects. These students have full voting rights at Faculty meetings and committees and hence a direct input in decisions affecting Arts students.

Student representatives can be contacted through the Arts and Social Sciences Faculty Office, Room G1, Morven Brown Building.

Students With Disabilities

The University of New South Wales has a policy of equal opportunity in education and seeks wherever possible to ensure maximum participation of students with disabilities.

The University offers a range of assistance: examination support; specialised equipment; educational support; parking provisions; library assistance.

A Resource Guide for students and staff with disabilities and a map showing wheelchair access is available from the Adviser to Students with Disabilities, the EEO Unit, the Library and the Students' Union.

It is advisable to make contact with the Adviser to Students with Disabilities prior to, or immediately following enrolment, to discuss your support needs.

The Adviser can be contacted on 385 5418 or at Student Services, Quadrangle Building.

General Education Program

UNSW requires that all undergraduate students undertake a structured program in general education as an integral part of studies for their degree. The University believes that a General Education complements the more specialised learning undertaken in a student's chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they highly value graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. As well, over many years graduates of this University have reported that they greatly valued their General Education studies, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden students' understanding of the environment in which they live and work and to enhance their skills of critical analysis.

Objectives of the General Education Program

The following objectives were approved by the Council of the University in December 1994.

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.

2. To enable students to evaluate arguments and information.

3. To empower students to systematically challenge received traditions of knowledge, beliefs and values.

4. To enable students to acquire skills and competencies, including written and spoken communication skills.

5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.

6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.

7. To provide structured opportunities for students from disparate disciplines to interact cooperatively within a learning situation.

8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist subjects offered in those other areas.

9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross- and interdisciplinary connections.

10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education Requirements

The basic General Education requirements are the same for students in all single degree courses. Over the course of a degree program students:

- satisfactorily complete a minimum of 30 credit points of study in General Education subjects or their equivalent;

- undertake an additional fifty-six (56) hours of study which ensures that students examine the purposes and consequences of their education and experience at university, and fosters acceptance of professional and ethical action and social responsibility. This fifty-six hours of study may be distributed throughout the course, or exist as a separate subject, depending on the course.

Because the objectives of General Education require students to explore discipline and paradigm bases other than those of their professional or major disciplinary
specialisation, all students are excluded from counting subjects toward the fulfilment of the General Education requirement, which are similar in content or approach to subjects required in their course.

Faculty Requirements

Each Faculty has responsibility for deciding what subjects are not able to be counted toward the General Education requirement for their students. In most cases, this means that subjects offered by the Faculty in which a student is enrolled, or subjects which are a required part of a course even though offered by another Faculty, are not able to be counted toward the General Education requirement.

Students should consult the Faculty of Arts and Social Sciences General Education booklet for information about what subjects may and may not be taken to fulfil the General Education requirements for each course offered by the Faculty. The General Education booklet is available from the Faculty Office.

Additional information for undergraduate students who first enrolled before 1996

Transitional arrangements
It is intended that no student will be disadvantaged by the change to the new General Education Program. The old Program had specific requirements to complete four session length subjects (or their equivalent) in designated categories A and B. The new General Education Program does not categorise subjects in the same way.

As a result, students who enrolled prior to 1996 will be given full credit for any General Education subjects completed up to the end of Session two 1995. From the summer session of 1995–96, students will be required to satisfy the unfilled portion of their General Education requirement under the terms of the new Program.

The exemption of General Education requirements for some double or combined degree programs will continue to apply for students who enrolled in these exempt courses prior to 1996.

Students Beginning in 1996 or Later

Students who enrol in the Faculty of Arts and Social Sciences for the first time in 1996 or later will begin their General Education program in their second year of study. The rules governing the General Education requirements for these students are set out below.

General Education Rules for Students in Arts and Social Sciences

1. Students are required to obtain 30 credit points in General Education subjects approved for students in the Faculty of Arts and Social Sciences, or in other subjects approved for substitution.

2. At least 7.5 credit points must be obtained in General Education subjects approved for inclusion in the area of 'Science, technology or the built environment', except where a student has completed at least 30 credit points (or the equivalent) in:

   (a) one of the following disciplines: Biological Science (BIOS), Chemistry (CHEM), Computer Science (COMP), Applied Geology (GEOG), Mathematics (MATH), Physics (PHYS), Psychology (PSYC); or

   (b) Geography (GEOG) subjects approved for inclusion in the area of physical geography; or

   (c) Education Studies (EDST) subjects approved for inclusion in the area of educational psychology; or

   (d) other subjects approved for substitution in the area of 'Science, technology or the built environment'.

3. At least 7.5 credit points must be obtained in General Education subjects approved for inclusion in the area of 'Business, commerce or commercially related legal studies', except where a student has completed at least 30 credit points (or the equivalent) in:

   (a) one of the following disciplines: Economics (ECON), Industrial Relations and Organisational Behaviour (IROB); or

   (b) other subjects approved for substitution in the area of 'Business, commerce or commercially related legal studies'.

Exemptions from General Education requirements for some double or combined degree programs will continue in accordance with the rules in force at the time of the student's first enrolment.

Approved General Education Subjects

The list of General Education approved subjects for students in the Faculty of Arts and Social Sciences, together with the lists of subjects approved for inclusion in the areas referred to in rules 2 and 3 above, may be found in the Faculty's General Education booklet.

Substitutions and Exemptions

Students may apply to obtain credit for subjects taught outside the General Education program. Subjects approved for General Education credit will not normally include those taught by Schools located within the Faculty of Arts and Social Sciences. Information concerning the substitution of other university subjects for General Education subjects,
or exemption from some General Education subjects on the basis of previous formal study at tertiary level, is available in the Faculty's General Education booklet.

**Additional Requirement**

The University's requirement that undergraduate programs must include at least 56 hours of study to examine the purposes and consequences of university education and to foster acceptance of professional and ethical action and social responsibility, is met within the rules of each individual course administered by the Faculty of Arts and Social Sciences. In some courses, such as the Bachelor of Social Science (course 3420), this requirement is met entirely by the compulsory core subjects in the degree. In others, such as the Bachelor of Arts (course 3400), the requirement is met partly by the overall structure of the degree and partly by specific subjects (Upper Level subjects with the prefix ARTS) which will be designed for this purpose and introduced in 1999.

Students granted Advanced Standing in 1998 may be required to satisfy the above requirement by completing a subject which has been approved, for this year only, as equivalent to an Upper Level ARTS subject. For 1998, the following subjects will be considered as satisfying the above requirement:

- EDST1302 Ethics and Education (S1)
- HIST2046 Contacts, Cultures, Comparisons: 'Race' and Ethnicity (S2)
- HIST2064 Values and Beliefs in Australian Culture (S2)
- PHIL2418 Ethical Issues (S1)
- SCTS3106 Technology, Sustainable Development and the Third World (S1)
- SCTS3126 Society and Environmental Process (S2)
- SLS2201 Social Research and Policy Analysis (S2)
- SOCC3601 Discipline of the Law (S1)
- SOCI3506 Nationalism, Citizenship and Cultural Identity (S1)
- THFI2020 Censorship and Responsibility in the Performing Arts, Film and Media (S2)

**University Commitment to Equal Opportunity in Education**

As well as recognising its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards her/his maximum potential. The University further commits itself to course design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

**Special Admissions Schemes**

The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment.

**Support of Disadvantaged Students**

The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, the Supportive English Program and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

**Course Content, Curriculum Design, Teaching and Assessment, and Printed Material**

Schools and faculties will monitor course content (including titles), teaching methods, assessment procedures, written material (including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

**Equal Opportunity Adviser Scheme**

The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

**Harassment Policy**

The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.
How to Structure your Degree Program

1. Bachelor of Arts Course 3400

The basic requirements for the degree are:

1. a total of 360 credit points. Each subject offered by the Faculty has a credit point rating, depending on the number of hours taught and the type of subject.

2. 120 credit points obtained in Level 1 subjects ie subjects designed for students in their first year of study. Of these, no more than 30 can be in any one school or department. 60 credit points must be obtained from subjects offered specifically by the Faculty.

3. a major sequence in one of the following:
   - CHIN Chinese
   - EDST Education Studies
   - ENGL English
   - FREN French
   - GERS German Studies
   - GREK Greek, Modern
   - HIST History
   - INDO Indonesian
   - LING Linguistics
   - MUSI Music
   - PHIL Philosophy
   - POLS Political Science
   - RUSS Russian Studies
   - SCTS/HPST Science and Technology Studies
   - SLP Policy Studies
   - SOCC/SOCI Sociology
   - SPAN Spanish and Latin American Studies
   - THFI/FILM Theatre, Film and Dance
   - THST/DANC Theatre, Film and Dance

* A combined major in HIST/HPST also satisfies the major requirement.

A major sequence is an approved progression of subjects in a school, department or program: you will find details under the relevant entry in Subject Descriptions.

4. at least 165 credit points must be gained in subjects offered by schools, departments or programs within the Faculty.

5. at least 165 credit points gained in schools, departments or programs outside the school/department in which you are majoring, so that your program does not become too one-sided.

6. during their second and third years of study, students are also required to complete thirty credit points from the University's General Education Program. These subjects are part of the requirements for the degree and do not incur an additional HECS or fee obligation. For details, see the Faculty's General Education booklet.

How to Choose Your First Year Program

You must include the first year requirements for at least two major sequences in schools or departments within the Faculty of Arts and Social Sciences, as you must complete at least one to qualify for the degree. Find the subjects you need from the corresponding entries in Subject Descriptions: this will normally account for 60 credit points of your first year program. In deciding what other subjects to enrol in, it may be a good idea to look at the section Subject Areas within the Faculty and the index listing Undergraduate Study, to see which subjects best complement the ones you have chosen. These may not necessarily be 'close relations'; for instance, a foreign language may be extremely useful for a history major, and vice versa. Unless you are a part-time student, you should enrol in subjects carrying 120 credit points.

Upper Level and Honours Entry

In structuring your program for second and third year Upper Level, it is essential that you fulfil the requirements for a major sequence in the school(s) or department(s) in which you are specialising. If you have any doubts about them, make sure you consult a member of staff before enrolling in second year. Try to complement your majors with subjects which will provide you with skills and perspectives which
will contribute to a broader and more critical approach to your special areas of interest. Major sequences offered by programs such as AUST Australian Studies are designed to provide this kind of context. Although, in most cases, they cannot be taken as the only major in your degree, they offer an interdisciplinary alternative to a second school-based major, or simply a way of giving more coherence to your other subjects. Comparisons and connections are often the best way of bringing the particular problems of an area of study into clearer focus. Here again, you may find Subject Areas in the Faculty useful; members of staff may be able to recommend particular subjects in other schools which will help you in the direction you wish to take.

While it is desirable that all Upper Level students seek advice on their program from their home school, it is essential for intending Honours students. If you want to proceed to fourth year Honours Level in one or two schools or programs, you should work out a program which fulfills the requirements for Honours Level entry with the Head of School or course Coordinator concerned as early as possible in second year; with Combined Honours (Honours in two schools/programs) in particular, this can avoid many later problems such as missing prerequisites. Details of requirements for Honours entry can be found under the relevant entry in Subject Descriptions.

2. Bachelor of Arts (Media and Communications) Course 3402

The basic requirements for the degree are:
1. a total of 360 credit points. Each subject offered within the degree has a credit point rating, depending on the number of hours taught and the type of subject.
2. 165 credit points in the Media and Communications (MDCM) core program, as follows:

First Year
MDCM1000
MDCM1001

Second Year
MDCM2000
MDCM2001
2 subjects from the elective list*

Third Year
MDCM3000
MDCM3001
1 subject from the elective list*

The elective list may be obtained from the Media and Communications Unit office.

## Total required for BA (Media and Communications) – 360 credit points

A major sequence is an approved progression of subjects in a school, department or program: you will find details under the relevant entry in **Subject Descriptions**.

4. 120 credit points obtained in Level 1 (first year) subjects, including MDCM1000 and MDCM1001, and any first year subjects in your major sequence. No more than 30 credit points can be obtained in first year subjects from any one school, department, unit or program.

5. During their second and third years of study, students are also required to complete subjects from the University's General Education Program carrying the equivalent of thirty credit points. These subjects are part of the requirements for the degree and do not incur additional HECS or fee obligation. For details, see the Faculty's General Education booklet.

### How to Choose Your First Year Program

Enrol in the core subjects MDCM1000 and MDCM1001 (see 2. above); then choose one or more areas from 3. above in which you might like to major, and enrol in the appropriate first year (Level 1) subjects. Then select additional first year subjects to make up a total of 120 credit points. 60 Level 1 credit points must be selected from subjects offered by the Faculty of Arts and Social Sciences.
Upper Level and Honours Entry

In your second and third year, enrol in the prescribed core subjects (see 2. above) and the necessary subjects for your major sequence. The additional credit points should be taken in other Upper Level subjects and in subjects from the University's General Education program. Try to spread your workload evenly over the four sessions of study.

For entry to Honours, you must have satisfied the rules for the pass course with performance at an appropriate level. Places in the Honours program may be limited and competitive entry standards may apply.

Students in the Honours program take two seminars in their first session, one with a theoretical focus and the other involving a practical exercise and written analysis. In the second session two alternative pathways will be available, with some students completing a research thesis and others undertaking a major practical project using computer-based multimedia technologies. Students interested in undertaking an Honours program which includes a major practical project should obtain advice about prerequisites before the end of the second year of their course.

### 3. Bachelor of Arts (Asian Studies)

**Course 3405**

The Bachelor of Arts (Asian Studies) degree is designed as an integrated program combining language, a social science discipline and Asia-related study.

The study of Asian societies and Asian languages is increasingly important for Australia. Australia is located in the Asian region, most of its trade is with Asia and Asian countries are becoming important sources of investment in Australia. They are also becoming important areas for investment by Australian companies. Australia’s future lies in increasing social, economic and political interaction with Asian countries. Graduates who combine proficiency in an Asian language and knowledge of one or more Asian countries with a discipline or professional qualification will be in increasing demand by both private and public employers.

The basic requirements for the degree are:

1. a total of 360 credit points. Each subject offered by the Faculty has a credit point rating, depending on the number of hours taught and the type of subject.

Honours Level

Students are encouraged to consider a fourth Honours year of study. In order to be eligible you must have completed the prerequisites for Honours study in a school or department in the Faculty of Arts and Social Sciences. Each school and department has individual requirements. You should consult the entry in the Handbook for the school or department in which you intend to focus your study. If you are considering proceeding to Honours Level study you should consult the BA (Asian Studies) course adviser before enrolling in your second year in order to ensure that you complete the necessary prerequisites.

The fourth Honours year will consist of a research thesis, within the school or department in which you have completed the Honours prerequisites, and two subjects determined after consultation with the course authority. One of these subjects will normally be within the school or department in which the thesis is being written. The other will be a subject specific to Bachelor of Arts (Asian Studies) students. It may be possible for an advanced language subject to be substituted for the school or department subject.

4. Bachelor of Arts (European Studies) Course 3406

The Bachelor of Arts (European Studies) degree is designed as an integrated program combining the study of European languages, European Studies and a social science discipline. While there is no doubt of Australia's need to intensify its relations with its neighbours in the Asia-Pacific region, our social, cultural and economic ties with Europe remain vital both to our own self-understanding and our future role in both regional and world affairs. Graduates who combine proficiency in a European language and a knowledge of European society and culture with a discipline or professional qualification will enhance their employment prospects in both the public and private sectors.

A student's program for the degree must include:

1. at least 90 credit points in one of the following languages: French, German, Modern Greek, Russian or Spanish.
2. at least 90 credit points in one of the following social sciences: Economic History; Economics; Geography; History; History and Philosophy of Science; Human Resource Management; Industrial Relations; Philosophy; Policy Studies (Social Science and Policy); Political Science; Science, Technology and Society; Sociology, Culture and Communication; Sociology and Social Anthropology.
3. a major sequence in one of the disciplines studied in 1 or 2.
4. a major sequence in European Studies (which permits the substitution of Europe-related subjects in other Schools/Departments up to a total of 30 credit points).
5. Students may proceed to Honours Level in one of the Schools/Departments named in 1 and 2, or to Combined Honours with European Studies, subject to fulfilling the requirements of Rule 13 of the degree regulations in this Handbook.
6. In accordance with Faculty policy, students are encouraged to spend a period of study overseas, which must be approved by Faculty as appropriate to the student's overall program for the degree.

5. Bachelor of Arts (Dance) Bachelor of Education Course 3408

The School of Theatre, Film and Dance offers a four-year full-time double degree for intending specialist dance educators leading to the award of Bachelor of Arts (Dance) Bachelor of Education. The BA(Dance) BEd is a professional double degree which qualifies successful graduates to be recognised as high school teachers with the NSW Department of School Education. The double degree also serves as an ideal basis from which to enter a range of dance and dance education professions.

![Bachelor of Arts (Dance) Bachelor of Education Program Plan](example-only)
Entry to the BA(Dance) BEd program is by audition and satisfactory University academic entry requirements. To qualify for the award of the degree, students must complete subjects to the value of at least 510 credit points, including:

1. the relevant sequences in Dance Theory, Dance Practice, Dance Education and Education as prescribed by the School of Theatre, Film and Dance for the BA(Dance) BEd degree
2. at least 105 credit points drawn from the following major sequences offered within the BA degree: Theatre, English, History, French, German, Indonesian, Japanese, Modern Greek, Spanish
3. 30 credit points in subjects approved by the Faculty in the University's General Education program.

**Second Teaching Subject**

The 105 credit points drawn from the above major sequences function as the students' second teaching subject. Students are strongly advised to familiarise themselves with the Department of School Education's current pattern of employment prospects when choosing both their second teaching subject and the elective subjects within that program.

**Honours Level**

There are two Honours programs, Dance Honours (Research) and Dance Honours (Coursework). Students seeking admission to either of these must have completed 510 credit points as detailed above and achieved a minimum average grade of Credit in dance subjects. Those intending to enrol in the Honours program must seek the permission of the Dance Program Coordinator during their second or third year of study so that an appropriate course of study can be planned.

NB. The Honours (Coursework) program is dependent upon numbers of students and may not run in any given year.

2. 120 credit points in the core subjects of the BSocSc degree program*, each of which carries 15 credit points:

How to Choose Your First Year Program
Enrol in the core subjects SLSP1001 and either SLSP1000 or SLSP1002 (see 2. above); then choose one area from 3. above you would like to major in, and enrol in the appropriate first year (Level 1) subjects. Then select additional subjects to make up a total of 120 credit points. 60 Level 1 credit points must be selected from subjects offered by the Faculty.

Upper Level and Honours Entry
In second and third year, enrol in the prescribed core subjects (see 2. above) and the necessary subjects for your major sequence. The additional credit points should be taken either in the area you chose as a possible second major or in other Upper Level subjects. You must also enrol in the prescribed subjects from the University's General Education program. Try to spread your workload evenly over the four sessions of study.
In addition, students who intend to apply for entry to the Honours year should enrol in SLSP3005 in the third year of study.

For entry to Honours in the BSocSc degree course, you must have demonstrated over the three years of the course that you have reached a sufficient standard, and apply to the Head of School for admission. If you wish to go on to Honours, you should ask staff in the program for advice on planning your course and defining your research interests at an early stage, perhaps during second year.
The BSocSc Honours Degree may be taken in three ways:
1. BSocSc Honours, with a Major in an approved area;
2. Combined BSocSc / approved area Honours. This program is undertaken in cooperation with a school offering a Combined Honours program.
3. BSocSc Honours Economics
For details see the relevant entries under Undergraduate Study: Subject Descriptions (SLSP).
7. Bachelor of Social Science (Asian Studies) Course 3421

The Faculty also offers the degree Bachelor of Social Science (Asian Studies), in which the Bachelor of Social Science core program replaces the major sequence required in the Bachelor of Arts (Asian Studies).

8. Bachelor of Music Course 3425

The School of Music and Music Education offers a Bachelor of Arts (BA) with a major sequence in music and a Bachelor of Music (BMus) degree. The Contextual Studies component requires the completion of subjects totalling 75 credit points from existing subjects offered by the Faculty of Arts and Social Sciences. The General Education component requires subjects totalling 30 credit points from the General Education subjects approved for students in the Faculty of Arts and Social Sciences and an ARTS subject meeting the requirements of Objective 5 of the General Education program.

The BMus (Pass) degree requires a total of 360 credit points and the Honours degree a total of 480 credit points.

Honours Level

MUSI4610 BMus BEd

10. Bachelor of Arts Bachelor of Education Course 4055

The combined degree of BA BEd at pass level is a four-year full-time program for intending secondary school teachers. Students combine academic studies in two approved teaching disciplines (except for Mathematics) with both theoretical and practical aspects of education. If Mathematics is selected as a teaching subject it is not necessary to undertake a second teaching subject. Mathematics students should undertake instead upper level credit point from other Arts subjects. In the final year of the BA BEd course students develop skills in classroom competence and spend eight weeks on supervised teaching practice in an allocated secondary school.

The following structure applies only to students commencing study in 1998. For those who commenced the course prior to 1998 advice should be obtained from the School of Education Studies.

To qualify for the BA BEd at pass level it is necessary to complete at least 480 credit points.

1. Education Studies subjects
EDST1101, 1102 are compulsory Year 1 subjects (30 credit points) EDST1448, 1449 and 1450 (70 credit points) are compulsory Year 4 subjects.

A further 45 credit points must be selected from Education Studies Upper level elective subjects for Years 2, 3 and 4.

2. Teaching Method subjects
Students must complete 35 credit points in approved teaching method subjects (from either two single method subjects or the double Mathematics method subject).

3. Arts Subjects as Preparation for Teaching
Major sequences of at least 105 credit points must be completed in two schools/departments to provide suitable background for teaching the following school subjects. The School of Education Studies can advise on the most appropriate University subjects to provide this background.

Chinese, Drama, Economics/Commerce, English, English as a Second Language (ESL), French, Geography, German, Greek (modern), History, Indonesian, Japanese, Spanish

Alternatively, students wishing to teach Mathematics must complete a major in Mathematics of at least 120 credit points and the remaining Upper level credit points from other Arts subjects.

Students should be aware that certain combinations of teaching subjects may not lead to satisfactory employment opportunities and may result in timetable difficulties in Year 4. For more details, consult the School of Education Studies.

4. Other Arts subjects
The remaining Arts credit points in Years 1 and 2 (30 level 1, 30 Upper level) should be selected from those available in the Faculty of Arts and Social Sciences.

5. General Education subjects
30 credit points must be selected from those approved for students in the Faculty of Arts and Social Sciences.

Honours Level

Students may elect to undertake an honours program in either their fourth or fifth year of study (ie before the intensive teacher preparation year or afterwards). The honours program may be undertaken in either Education or in an Arts discipline. Students with a good credit average in Year 1 are normally invited to undertake additional study in the relevant discipline over Years 2 and 3.
11. Combined Degrees

The Faculty strongly encourages double degree study. The following courses are available to students from other faculties:

- Bachelor of Arts/Bachelor of Laws (4760)
- Bachelor of Arts (Asian Studies)/Bachelor of Laws (4762)
- Bachelor of Commerce/Bachelor of Arts (3525)

Subject Descriptions

Descriptions of all subjects are presented in alphanumeric order within organisational units. For academic advice regarding a particular subject consult with the contact for the subject as listed. A guide to abbreviations and prefixes is included in the chapter 'Handbook Guide', appearing earlier in this book.

Art History and Theory

Subjects in Art History and Theory are offered by the School of Art History and Theory at the College of Fine Arts and taught on the Paddington Campus. There may be a limit on the number of places available to Arts students.

Introduction

An interdisciplinary approach to the study of visual arts and culture is offered in Art History and Theory. These subjects, taken individually or as a major, will provide an intriguing and useful 'toolbox' of strategies for understanding art objects and images. Students have the opportunity to study art from cultural, social, philosophical and historical perspectives.

Subjects offered within the Art History and Theory program include such topics as the construction of Western art history, the idea of the 'artist' in art history and the popular imagination, the relationships of Western to non-Western art, colonial expansion and relationships of cultural centres to colonised margins, distinctions between the mass culture of television, films, the popular press, advertising and the culture of museums. Other issues include the relationship of culture to society and the linkage between vision and science, looking and sexuality. Students may choose subjects which lay foundations for professional practice in art writing and arts-related work. (The School also offers a wide range of electives and General Education subjects which complement the subjects listed below: details of these may be found in the College of Fine Arts and General Education Handbooks.) Art History and Theory subjects are offered at both Level 1 and Upper Level.

Major Sequence

A major sequence consists of 90 credit points in Art Theory subjects offered by the College of Fine Arts (30 Level I and 60 Upper Level credit points).

All subjects are 15 credit points in value. (Some new subjects are offered subject to approval.)

Level 1

ARTH1001
Theories of the Image
Staff Contact: Graham Forsyth
CP15 S1 HPW3

An introduction to ways of understanding and evaluating the making, reception and theoretical understandings of images in our culture. Different cultures and historical periods have treated images in radically different ways with different ways of understanding the way images relate to their producer(s), viewer(s) and to the world. There is also a philosophical concern with the nature of the image, how it is able to have meaning, to represent at all. How are we
able to read images? Is it a natural process or culturally determined? These issues will be addressed by critically examining the different ways of understanding the artistic image in Western and Non-western arts, and in crucial developments in Western art history [including Renaissance perspective, the invention of photography; photo-mechanical reproduction; Modernism and abstraction, and feminist critiques].

**ARTH1003**
**Approaches to Australian Art**
*Staff Contact: Joanna Mendelssohn*
*CP15 S1 HPW3*

This subject introduces some of the preoccupations of Australian art in the years since colonisation. Issues to be discussed include: the notion of the artist as a recorder in the 19th century and a tourist in the 20th; the search for a “Great” Australian artist; national identity and art; links between art and commerce; the idea of “modern” in an Australian context; and attempts to place Australian art in an international context.

**ARTH1005**
**Theories of Art History and Culture**
*Staff Contact: Fay Brauer*
*CP15 S2 HPW3*

This subject is an introduction to art history and cultural analysis. It critically analyses the ways in which art history has been understood and the ways in which art history has mediated and affected how viewers understand artworks. Draws upon and critically assesses the key methodologies of art history and introduces major topics of contemporary debate: questions of influence of social history, distinction between high culture and popular culture, questions of ethnocentrism and feminist critique of art history.

**Upper Level**

**History and Theory Stream**

**ARTH2001**
**Grand Narratives of Western Art**
*Staff Contact: Fay Brauer*
*CP15 S1 HPW3*

*Prerequisite: ARTH1001 and ARTH1005, or special permission*

This subject will critically examine the ‘grand narratives’ which have ordered historical material in Western art and its histories. Such ‘grand narratives’ as ‘classicism’; mimesis; the nature of representations of the environment through such genres as ‘landscape’ and ‘cityscape’, formations of gender, sexuality and the body through images of ‘the nude’; and notions of race as insinuated through such stylistic classifications as ‘orientalism’ and ‘primitivism’ will be critically discussed.

**ARTH2007**
**Art and Cultural Difference**
*Staff Contact: Diane Losche*
*CP15 S2 HPW3*

*Prerequisite: ARTH1001 and ARTH1005, or special permission*

The conceptualisation of difference, diversity and multiplicity, both within and across cultural boundaries, has occupied a central position in the historical trajectory of Art, particularly since the end of World War II. The relationship of theories of ethnicity, gender, race and culture to the complex histories and practices of art will be addressed. These topics will be addressed by critically examining the writings of Adorno, Benjamin, Freud, Irigaray and Marx, as well as theorists and artists of colonial struggle.

**ARTH3001**
**Art and the Culture of ‘Everyday Life’**
*Staff Contact: Graham Forsyth*
*CP15 S2 HPW3*

*Prerequisite: ARTH1001 and ARTH1005, or special permission*

This subject examines the major structures and ways of thinking which have both constituted and transformed the practices of art, and criticism and evaluation of art in an era characterised by the pervasiveness of mass media and the aestheticisation of everyday life. This subject explores the forms and significance of popular culture in the 20th century, focusing on such phenomena as consumerism, mass media, TV and advertising, subcultures, the city and the suburb. The interdisciplinary development of cultural studies provides tools for reading artistic strategies in the light of television, film, computer imaging, the popular press and advertising. The work of theorists such as Jean Baudrillard, Michel de Certeau and Meaghan Morris is applied to these areas and critically examined.
This subject examines different genres of writing on the visual arts, with an emphasis on contemporary practices. Newspaper reviews, journal criticism, scholarly catalogue essays, 'in house' catalogue notes, 'coffee table' art books and collaborative works between artists and writers are studied in terms of their connections to other genres of writing (for example 'journalalese', fictional narrative, descriptive prose). The subject looks at these writings within specific cultural fields and their assumed sets of values. It also demonstrates how such categories play an active role in the shaping and production of meanings in art.

ARTH3101

Contexts, Professions and Practices

Staff Contact: Felicity Fenner
CP15 S1 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission

This subject critically considers the 'professionalisation' of the arts, and the notion of the arts and cultural 'industries'. Students will investigate the nature of employment and practice, drawing on theoretical and case study approaches. They will examine the idea of professional skills, and have the opportunity to practise some skills- and knowledge-based tasks, such as developing exhibition and funding proposals, preparing budgets and reports, developing marketing and promotion strategies, preparing education and/or public programs, and seeking sponsorships.

Professional Context Stream

ARTH2101

Methods of Research and Writing on Art

Staff Contact: Joanna Mendelssohn
CP15 S1 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission

This subject is primarily concerned with the teaching of skills necessary to conduct specific research projects. The focus is on methods of researching primary material as well as locating archival documentation, in order to evaluate and effectively utilise different forms of visual and theoretical 'evidence' for research projects. Topics include field work methods, such as oral history, together with knowledge of indexing procedures, statistical analysis and the utilisation of computer resources, as well as critical methodologies for appraising research material. The subject also includes topics to address the logical construction of 'a valid argument', the rhetorical promises of different genres of writing and the delineation of ideas.

ARTH2103

Genres of Art Writing

Staff Contact: Joanna Mendelssohn
CP15 S2 HPW3
Prerequisite: ARTH1001 and ARTH1005, or special permission

This subject examines different genres of writing on the visual arts, with an emphasis on contemporary practices. Newspaper reviews, journal criticism, scholarly catalogue essays, 'in house' catalogue notes, 'coffee table' art books and collaborative works between artists and writers are studied in terms of their connections to other genres of writing (for example 'journalalese', fictional narrative, descriptive prose). The subject looks at these writings within specific cultural fields and their assumed sets of values. It also demonstrates how such categories play an active role in the shaping and production of meanings in art.

Australian Studies

Coordinator: Associate Professor Elaine Thompson (Political Science)

The study of Australia's culture and institutions is fundamental to gaining an understanding of Australian identity and society.

Subjects offered within the Australian Studies program are designed to provide an interdisciplinary Australian 'context', and are available to all students within the Faculty, and many from outside. Subjects may be studied individually and are all designed to be self-contained. In addition, they form excellent 'extensions' to majors in History, Political Science, Sociology, English, Theatre and Film Studies, and Science and Technology Studies.

Major Sequence

A major sequence is also available, which may be counted as a 'second major' under the BA Degree Rules. It requires the completion of 90 credit points in AUST (Australian Studies) subjects, including 30 Level 1 credit points in AUST (Australian Studies) subjects.

Aboriginal studies are an integral part of Australian Studies. Students are expected to include at least one upper level Aboriginal subject in their major.

It is also possible to substitute 45 credit points from the discipline-based Australian Studies subjects listed under Subject Areas in the Faculty earlier in this handbook. Students should note that no more than two subjects (30 credit points) will be accepted from any one discipline area.
Level I

AUST1000
Australia: The 1890s and 1990s A
Staff Contact: Elaine Thompson
CP15 S1 HPW3
A multi-disciplinary comparative study of Australia in the 1890s and 1990s focusing on the themes of nationalism, gender, race and class, drawing on the perspectives of history, politics and Aboriginal studies.

AUST1001
Australia: The 1890s and 1990s B
Staff Contact: To be advised
CP15 S2 HPW3
A multidisciplinary study of Australian popular culture focusing on the nature of the Australian identity. The subject examines film, television and newspapers, including fictional and non-fictional materials (documentaries, biographies, autobiographies). It draws particularly but not exclusively on the way images of Aborigines and Australian women (both black and white) have been created.

Upper Level subjects available in 1998

AUST2004
Aboriginal Australia: The Pre-Colonial and Colonial Past
Staff Contact: Laura Jane Smith
CP15 S1 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Excluded AUST2002, GENS4521, GENS5527. The subject is distinct from, but complementary to AUST2005, which examines the social issues which affect indigenous Australians today.
Examines pre-colonial Aboriginal Australia in areas such as religion, social organisation and material culture; and the effects of European colonisation from policies of 'protectionism' though to those of 'self-determination'.

AUST2005
Aboriginal Australia: The Post-Colonial Experience
Staff Contact: To be advised
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Excluded AUST2003, GENS4521, GENS5526. The subject is distinct from, but complementary to AUST2004, which examines the social issues which affect indigenous Australians today.
Examines the contemporary issues which affect Australian Aborigines, such as health, education, racism, land rights and law, and the structural position of Aborigines within Australian society.

AUST2108
Gender and Frontier
Staff Contact: Ann McGrath
CP15 S1 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Excluded HIST2034, 51.908. HIST2035, 51.936.
Sexuality, 'race', land, environment and work relations are investigated by comparing Australian with North American experiences. What were the possibilities and delimitations of inter-relations between coloniser and colonised? Why did Australian frontier mythologies and outback legends lack a Pocahontas character? How did the cultural landscape of frontiers shape particular representations of family, masculinity, femininity and 'race'? What were women's experiences of birth and motherhood? This subject also provides a brief introduction to feminist historiographical techniques and opportunities to use biography, autobiography, narrative and to write more self-reflexive histories.

AUST2109
Values and Beliefs in Australian Culture
Staff Contact: Anne O'Brien
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Excluded HIST2064.
Provides an overview of how the beliefs and values systems which have underpinned Australian society over 200 years have contributed to the formation of Australian culture. Analyses the competing contributions of Christianity, secular humanism, liberalism, socialism, labourism, social Darwinism, and civil religions like 'Anzac' to Australian society and culture by focusing on four central themes – gender, class, race and politics. How did those belief and values systems influence the interplay between masculinity and femininity? How did they variously act to reinforce or bridge class difference, to fuel or quench race hatred? How did they shape political values? Examines the impact of non-Christian religions and cultures, the attraction of the 'new Age' and values in the works of key modern imaginative writers.

The subject is concerned with the basic characteristics of life. The chemistry of life is covered with emphasis on the way in which living things construct and break down macromolecules. The way in which the genetic code controls these processes depends to a great extent on the structure and function of cell components, and cell biology is a major component of the subject. The final topic is genetics – the way in which the genetic code is inherited and the ways in which it can be modified.

Cognitive Science

Coordinator: Philip Cam, School of Philosophy

In the last twenty years Cognitive Science has emerged as an exciting and fruitful domain of enquiry in which there is a convergence of interests in a number of disciplines which deal with mind, language, knowledge and intelligence. The Cognitive Science movement is based on a broad consensus that the problems and issues do not belong exclusively to any one discipline, but fall collectively to all of them.

The Cognitive Science Program is designed to complement a School-based major sequence by grouping subjects within the fields of Philosophy, Psychology, Linguistics, and Computer Science, which have special relevance to Cognitive Science. It provides the opportunity for students who undertake one or more of the Level 1 subjects in the relevant disciplines to become acquainted with the broader enterprise of Cognitive Science through participation in the core subject HPST2109 Computers, Brains and Minds, and to build upon that acquaintance in selecting further subjects from the program. Students should take the core subject in their second year of study.

Major Sequence

Entry to the program requires 30 credit points from the Level 1 prerequisite subjects listed below. A major in Cognitive Science requires not less than 60 credit points from the Upper Level subjects listed in the program, including the core subject. If you wish to major in Cognitive Science, these Upper Level subjects may not be counted toward a major sequence in a School or Department. In planning your program for the degree, you should make sure that you meet the prerequisite requirements of individual subjects, unless granted exemption by the subject authority.

Level I Prerequisites: 30 credit points obtained in any of the following subjects:

- BIOS1101 Evolutionary and Functional Biology
- BIOS1201 Cells, Molecules and Genes
- COMP1001 Introduction to Computing
- COMP1011 Computing 1A
- HPST1108 Science: Good, Bad and Bogus. An Introduction to the Philosophy of Science

- PHIL1007 Ways of Knowing and the Nature of Knowledge
- PHIL1009 Points of View: Science, Objectivity and Subjectivity
- PSYC1001 Psychology 1A
- PSYC1011 Psychology 1B

Upper Level

Core subject:

- HPST2109 Computers, Brains and Minds: Foundations of Cognitive Science

plus at least 45 credit points obtained in any of the following subjects:

- COMP2011 Data Organisation
- COMP2031 Concurrent Computing
- COMP3411 Artificial Intelligence
- HPST2118 Body, Mind and Soul: The History and Philosophy of Psychology
- LING1000 The Structure of Language
- LING2500 Theoretical and Descriptive Linguistics
- LING2602 Psycholinguistics
- LING2603 Semantics and Pragmatics
Studies in Comparative Development

Coordinator: Peter Ross, Department of Spanish and Latin American Studies

The program in Studies in Comparative Development is designed to enable students to construct an interdisciplinary major focusing on Comparative Development, and it provides an excellent extension to a major sequence in another social science area. The focus of the program is to develop an analysis of the causes of uneven growth, through history, and to understand the vast differences between today's rich world and poor world.

A major sequence in COMD may be taken as an additional major sequence together with a major from the approved major sequences listed in Rule 11 (4) of the BA Rules. Students are advised that the COMD program is designed to complement, most particularly, a major in Economic History, History, Political Science, Science and Technology Studies, Sociology and Spanish and Latin American Studies. Subjects in the program will also be of considerable interest to students studying languages. Subjects may not be counted towards more than one major sequence.

To complete a major sequence you must take the three compulsory COMD subjects listed below, totalling 45 credit points, and a further 45 points from the other COMD subjects listed below. With the approval of the Coordinator of the COMD program, subjects from other schools may be substituted for 30 of these 45 optional credit points. Many of these subjects will have their own prerequisites, and you must also fulfil Faculty of Arts and Social Sciences requirements concerning your distribution of subjects. Please check school entries for subject descriptions and availability, and consult with the school of your home-based major and the Coordinator of the Studies in Comparative Development program about the best combinations of subjects in your two major sequences.

English

English is a discipline for students with a special interest in literature and language. It is not compulsory within the Faculty of Arts and Social Sciences; the subjects are therefore planned for students who have both a genuine interest in the subject and some special ability in it, including an ability to write good English. It is desirable that students enrolling in English should have obtained one of the following in the New South Wales Higher School Certificate Examination: 3 unit English, (25–50); 2 unit Related English, (60–100); 2 unit General English, (65–100); 2 unit Contemporary English, (75–100).

Students who have successfully completed English at Level I (30 Level I credit points) may enrol in Upper Level English subjects without necessarily pursuing a major in the subject. (Arts and Social Science students are only allowed to count 30 English Level I credit points towards their degree.)
The usual prerequisite for enrolment in an Upper Level English subject is a Pass in two Level I English subjects as specified in the School of English handbook. The choices of subjects in Level I are: ENGL1001 – Ways of Writing: Genre and Factual and Creative Writing (15 credit points), ENGL1002 – Ways of Reading: Theory and Theme (15 credit points), ENGL1004 – Language in Society (15 credit points). A student who has not fulfilled this prerequisite but is interested in one or more of our Upper Level subjects may seek the special permission of the Head of School to have the prerequisite waived. In considering such requests, the School gives strong preference to a candidate with a successful year's work in another language, or a Credit or better in a related discipline.

The English major sequence involves two years' Upper Level study in English.
The major sequence is:

Level I

The UNSW Writers’ Group

The UNSW Writers’ Group is the University’s literary society and provides the opportunity for English students (who are automatically members) and other students to exchange ideas and gather socially outside classes. During session the Group organises events such as talks by visiting speakers, readings, workshops and discussions. Refreshments are usually provided at these meetings and there are occasional dinners with distinguished guests.

Environmental Studies

The Environmental Studies program is designed for students who wish to undertake a major sequence within the BA degree concentrating on the historical, theoretical, and policy implications of the human construction and transformation of the environment. The interdisciplinary major sequence in Environmental Studies must be accompanied by a major sequence in a home-based school or department of the Faculty as specified in the Rules for the BA degree. Particularly appropriate home-based majors to be taken in conjunction with it would be in Philosophy, Political Science, History, Science and Technology Studies, or Sociology. Subjects may not be counted towards more than one major sequence. If you wish to major in Environmental Studies you should make sure that you include in your degree program any necessary prerequisites for the subjects you wish to take. Please check school/department entries for subject descriptions and availability, and consult with the school of your home-based major and the Coordinator of the Environmental Studies program about the best combinations of subjects in your two major sequences.

European Studies

Convenor: John Milfull (Centre for European Studies, MB G64)

Studying Europe is not a 'cultural cringe'; it is an essential part of defining Australia's role as a predominantly "European" country located in the Asia-Pacific. Any attempt to define Australian identity must be based not only on a new relationship with our neighbours, but on a critical understanding of our European heritage and the continuing dialogue with European thought and practice. The momentous changes which are taking place in Eastern and Western Europe will have an extraordinary impact on world developments over the next years, and on the part Australia will play in them.

Subjects offered within the European Studies program are designed to locate School-based studies within an interdisciplinary European context which addresses basic issues and problems in the study of European culture and society, seen from the perspective of current attempts to establish a new role for a united Europe. They focus both on the enormous contribution of the European Enlightenment to our concepts of freedom, humanity and citizenship, and its troubled relationship to the realities of European world domination and power politics. We can learn much from Europe's failures as well as its achievements.

EURO subjects are an ideal complement to majors in history, philosophy, political science and sociology with a European 'focus', or in English or European languages.

Honours

SCTS4200 Combined Honours (Research) in Environmental Studies F
SCTS4201 Combined Honours (Research) in Environmental Studies P/T

Students are advised to consult the Program Coordinator, Paul Brown, Rm LG16, Morven Brown Building, extension 1497, before enrolment, for advice on the most suitable choice of subjects to meet their needs.
Subjects are offered at both Level 1 and Upper Level; they are taught in English, require no previous knowledge of other languages, and are available to all students enrolled in the Faculty.

The program also offers a major sequence, which may be counted as a ‘second major’ under the BA Degree Rules. It requires the completion of six EURO subjects (90 credit points). You may, however, request the Convener to approve the substitution of other appropriate subjects from the European Studies entry under Subject Areas in the Faculty in the Faculty Handbook up to a total of 30 credit points. A major sequence in European Studies is a requirement for the BA (European Studies) degree program (Course 3406), which is described in the introductory section of this handbook.

Students who wish to specialise in European Studies are encouraged to learn a relevant European language; a Combined Honours Program, which requires basic reading competence in one such language, may be undertaken in conjunction with a School/Department of the Faculty.

The European Studies noticeboard is located opposite the Centre for European Studies (MB G64).

**Major Sequence**

A minimum of 90 credit points in European Studies, including at least 60 credit points in Upper Level subjects.

**Honours Level**

European Studies may be taken at Honours Level only as a Combined Honours program (see EURO4500 below).

**Level I**

**EURO1000**

*The New Europe A*

*Staff Contact: John Milfull (MB G64)*

CP15 S1 HPW3

**EURO1001**

*The New Europe B*

*Staff Contact: John Milfull (MB G64)*

CP15 S2 HPW3

*Note/s: Two session-length subjects, which together form the first year of the European Studies major but are also available separately.*

Despite a surprisingly rapid economic recovery after the catastrophe of World War II, Western European nations were increasingly relegated to the status of second-class powers, both politically and ‘morally’, during the years of the Cold War. With moves towards European unification and the disintegration of the Soviet ‘block’, Europe seemed once again to have assumed a central role on the world stage. Yet the euphoria of 1990, which looked forward to a United Europe and the rapid transformation and integration of post-communist societies, has been followed by a severe hangover. The events of the last years and their implications will be discussed, and the problems and prospects confronting the ‘New Europe’ in relation to its past, present and future.

**Upper Level**

**Session One**

**EURO2300**

*The German-Jewish Experience*

*Staff Contact: John Milfull (MB G64)*

CP15 S1 HPW3

*Prerequisite: 90 Level 1 credit points in Arts*

*Note/s: Excluded JWST2103.*

The contribution of ‘Jewish Germans’ to the social, political and cultural life of Germany and Austria from 1900 to 1933. The impact of attempted integration as reflected in the work of Herzl, Schnitzler, Kafka, Buber, Feuchtwanger, Scholem and others; the failure of the German-Jewish ‘symbiosis’ as a basis for discussion of the concepts of assimilation, acculturation, ethnicity, identity and nationality.

**EURO2401**

*Modern Italy since Napoleon*

*Staff Contact: Martyn Lyons (HIST)*

CP15 S1 HPW3

*Prerequisite: 90 Level 1 credit points in Arts*

Surveys Italian history from the creative legacy of Bonaparte to the collapse of the Christian Democrat hegemony and the anti-corruption campaigns of the 1990s. Special attention will be paid to the Risorgimento, as well as to Italy under Fascism. Discusses long-term social problems such as the Mafia, migration, the Mezzogiorno, regionalism and Italy’s uneven economic development. Italy’s relative poverty and the historic fragility of nationalist aspirations will be emphasised, but not at the expense of the “economic miracle”, or Italy’s current role within the EU. Discussion material will include film and literary sources.

**EURO2500**

*The Russian Experience*

*Staff Contacts: Stephen Fortescue (POLS), Ludmila Stern (RUSS)*

CP15 S1 HPW3

*Prerequisite: 90 Level 1 credit points in Arts*

*Note/s: Excluded GENT0705.*

An introduction to the politics, history, thought, language and literature of Russia, which seeks to provide a broader understanding of the Russian past and present and the basis for some predictions for the future, and to signal directions for further study.

Staff Contact: John Milfull (MB G64)
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts
The new metropolises which were the motor and focus of European modernisation exposed masses of people to a profound change, not only in their way of life, but in their perceptions of reality. This subject focuses on 1) the urbanisation of Europe since the 18th century, with particular reference to London, Paris and Berlin; 2) its social and psychological consequences, extending into the present, and 3) representations of life in the "big city" in literature and the visual arts.

Prerequisite: 90 Level 1 credit points in Arts
The social psychology of Fascism and its "aesthetics", the seductive forms in which its inhuman aims were presented to appeal to both classes and individuals. An attempt to explain, through the study of documents, literary texts and film, the attractions of Fascism for broad sectors of European society without whose support and tolerance it could never have retained power, and the implications for our understanding of our own society.

French

Subjects offered by the Department at undergraduate level are made up of studies in the following areas: Language and Linguistics, Literature and Thought, French Civilisation and Society and Francophone Studies.

Language and Linguistics. In language subjects, the emphasis is on helping students to acquire a command of modern French, and French is the language of instruction. Subject content integrates the various linguistic skills of understanding, speaking, reading and writing, through programs involving techniques such as group work, role play, and video. In some subjects language learning is assisted by computer-based activities and the internet. Upper Level language options focus on language analysis with practical work, corrective phonetics, or linguistics. All core language subjects also involve comparative cultural studies.

French Literature and Thought. Training is given from Year 1 onwards in the techniques of literary analysis and criticism through the close study of individual texts, and in various methodological approaches to literature. Periods studied range from the 18th century to the present day. These subjects also examine the relationship between literature and social history. Here again, French is the language of instruction.

French Civilisation and Society. Subjects in this section treat the civilisation and society both of France and of the French speaking world. Although literary texts are sometimes studied, subjects in this category mostly concentrate on ideas and trends of thought pertaining to a particular socio-historical context. In most of the subjects belonging to this category, use is also made of non-literary and media material.

Students are invited to collect from the secretary of the School of Modern Language Studies the French Handbook, containing course descriptions, book lists, sequence of subjects and general information about the Department. Students should also consult the Department noticeboards for all information relating to first meetings, prior to the commencement of the academic year.

Note:
(a) Students should note that a Pass Conceded (PC) in a language subject does not allow progression to higher level language subjects.
(b) Teaching at all levels is normally done in French, and in most subjects all assessment tasks are performed in French. However the Department sometimes offers subjects which are taught and assessed in English; these are open to all students with Upper Level status in the Faculty of Arts and Social Sciences or equivalent. (See below at Upper Level, Options.)

Major Sequence

1. Points: At least 105 credit points, including 30 Level 1 credit points.

2. Core Requirements: For D stream students, the major must include FREN1030.

For C stream students, the major must include FREN2030.

For B stream students, the major must include FREN3011. In certain cases approval may be given to replace FREN3011 with FREN2030 (see note below at Upper Level, Core Subjects).

For A stream students, the major must include FREN3004 plus 1 Upper Level option (see below at Upper Level, Options).

3. Subjects in English: Students may count towards their French major a maximum of 15 credit points obtained in subjects taught in English offered either in the Department, or, as approved by the Head of Department, in other Schools or Programs.

Honours Entry

Honours: For D stream students: at least 135 credit points, including a major sequence, offered in the Department of French (but see note below): students must complete 30 Level 1 credit points (including FREN1030), plus at least 105 Upper Level credit points (which must include FREN3910) at an average grade of Credit or better.

For C stream students: at least 135 credit points, including a major sequence, offered in the Department of French (but see note below): students must complete 30 Level 1 credit points, plus at least 105 Upper Level credit points (which must include FREN2030 and FREN3910) at an average grade of Credit or better.

For A and B stream students: at least 135 credit points, including a major sequence, offered in the Department of French (but see note below): students must complete 30 Level 1 credit points, plus at least 105 Upper Level credit points, including a major sequence, offered in the Department of French (but see note below): students must complete 30 Level 1 credit points, plus at least 105 Upper Level credit points (which must include FREN2030 and FREN3910) at an average grade of Credit or better.
points (which should normally include FREN3910) at an average grade of Credit or better. With permission of the Head of Department, Honours students from A stream may arrange to write their Honours dissertation in English rather than French.

Note: Students proceeding to Single Honours in French may, where there are sound academic reasons for doing so, substitute related subjects in other Schools/Programs, as approved by the Head of Department, for a maximum of 30 of the credit points required.

Combined Honours: As for Single Honours, but with 90 Upper Level credit points for a total of 120 credit points in the Department of French.

Assessment

Most classes are of seminar and tutorial type and most teaching is conducted in French. In core language subjects, students are expected to attain a prescribed proficiency level in each of the major skills, and to satisfy all other assessment required throughout the year. In other subjects, assessment is continuous and, depending on the subject, is based on some combination of class tests, written or oral exposés, essays, or weekly assignments.

The French Society

The main aim of the French Society is to afford students the opportunity of expressing their interests in French language and culture. This is done through a wide range of activities, both cultural (video club, plays, singing group, student newsletter) and social (wine and cheese gatherings, dinners, outings). Possibilities for enjoying French language and culture are endless but depend on the initiative and motivation of students of the Department.

Further Details

Students should note that detailed descriptions of the subjects listed below, including information regarding set textbooks and recommended reading, together with much other general information, are contained in the Department of French Handbook, which is available free of charge from the School Office.

Level 1

Entry to Year 1 is available to students of all proficiency levels in French, from complete beginners to French native speakers. To accommodate such differing backgrounds at various levels, four streams are offered:

1. A stream – FREN1000 French 1A Introductory French, taught during the normal academic year; or FREN1100 French 1A Introductory French (Intensive Mode), taught during the summer recess. Both these subjects are designed for students with little or no knowledge of French.

2. B stream – FREN1010 French 1B Bridging Subject, designed for students with some knowledge of French (eg HSC 2 unit French or HSC 2 unit Z French).

3. C stream – FREN1020 French 1C Language and Culture (15 CP) plus FREN1225 French Literature and Society (15 CP), designed for students with a good knowledge of French (eg HSC 2 unit French at percentile range 81–100 or HSC 3 unit French at percentile range 51–100).

4. D stream – FREN1030 French 1D Language (15 CP) plus FREN1225 French Literature and Society (15 CP), designed for Francophone students with a Baccalauréat or equivalent qualifications.

Students wishing to take French in Year 1 should enrol in the subject which seems appropriate to their qualifications. This enrolment is to be regarded as provisional. Final streaming is determined by the Department after a language test which will take place on Thursday, 26 February 1998. All students except those with no knowledge of French (FREN1000) are required to sit the test.

In order to pass core language subjects, students must attain the prescribed proficiency level in each major skill, as well as satisfying all other assessment requirements.

The Geographical Society
It is hoped that students taking geography as a subject will participate in the activities organised by the Geographical Society. The Society is open to new ideas and to students who are concerned with fostering an interest in geography outside their formal studies. Informal seminars are organised on subjects of interest to geographers.

Social activities have always been an important part of the Society and they have provided more than adequate opportunities for students to get to know each other and for students and staff to improve communications.

Geomatic Engineering

Geomatics is a modern scientific term to describe an integrated approach to the acquisition, analysis, storage, distribution, management and application of spatially referenced data. It embraces the traditional area of surveying and mapping, as well as the comparatively new fields of remote sensing and spatial information systems. Fields of specialisation within Geomatics include:

- Satellite Surveying (position determination techniques using satellite signals);
- Geodesy (determining the mathematical model of the Earth, and its gravity field, and the practice of control network surveying);
- Hydrography (mapping the seabed and waterways for navigation and off-shore resource management);
- Engineering Surveying (precise surveying for engineering projects);
- Cadastral Surveying (knowledge of the laws and practices for survey of property boundaries);
- Land Management and Development (environmental assessment and design for resource management and change of land use);
- Land Information Management (the use of computer-based information systems of spatially related data for planning and administration purposes);
- Geographic Information Systems (GIS) (computer-based information systems for environmental assessment and monitoring);
- Photogrammetry and Remote Sensing (the use of airborne and spaceborne remotely sense images for mapping, monitoring and resource surveys).

The School of Geomatic Engineering offers two Upper Level subjects in the Faculty of Arts and Social Sciences. The subjects (listed below) are of particular interest to students majoring in Environmental Studies or other majors where a knowledge of mapping, geographic information and its analysis is increasingly required. Many decisions made on future developments in the community will affect the environment. To be able to manage these developments, a knowledge of the relative positions of objects and features on the terrain will be required.

Remote Sensing covers the acquisition and analysis of images from space for determining details of features and terrain cover types, and Spatial Information Systems I deals with the management and analysis of spatial data. Excellent facilities are available in the School for these subjects. Students entering these subjects are expected to have mathematical knowledge equivalent to that represented by a score of 60 in HSC 2 Unit Mathematics. Further details can be obtained from the School.

German Studies

The Department of German Studies offers a program of undergraduate study leading to the degree of Bachelor of Arts. There are three streams: for beginners with no previous knowledge of German, for intermediate students who have studied German for the Higher School Certificate (or have equivalent knowledge), and for native speakers. The Department has a flexible entry-point policy which allows students to enrol in the language program that builds on their existing language skills.

Subjects offered in the Department of German Studies have both a language skill orientation as well as a critical knowledge orientation. The primary aims are to provide students with proficiency in spoken and written German on the basis of practical language work and linguistics together with a critical understanding of the development of the German – speaking countries as 'modern' societies that are different from yet similar to our own.

The Department also offers a number of upper level subjects in German history, literature and civilisation taught in English. Students majoring in German Studies are encouraged to focus their work by choosing complementary subjects offered by other schools or programs within the Faculty; in particular LING1000 The Structure of Language.
and LING1500 The Use of Language are strongly recommended. Subjects in German History, Literature and Civilisation may also be taken to complement other major sequences, e.g. in European Studies, History, Political Science, Sociology, Theatre and Film Studies. With approval of the Heads of the respective schools, some of the subjects may be counted as credit towards the major sequences offered by these schools. For further information and details contact the Head of Department.

Teaching and Assessment

All teaching in the Department is carried out in small groups and in German whenever this is practical. There are no formal end of session examinations. Every effort is made to make the assessment of students part of the learning process. Assessment ranges from class tests to essays, take-home tests and/or oral presentations. Oral participation is encouraged through tutorial papers (often linked to the essay to be submitted at the conclusion of a seminar) and other forms of active participation.

The German Society

The German Society is the Department’s active student club. It provides an opportunity for students and members of staff to meet for informal conversation, film nights, dinners, excursions, etc. The Society has mounted successful and entertaining theatrical productions in German. Further details may be obtained from the School’s Student Information Desk.

Further Details

Detailed information on all courses, subjects, textbooks, reading lists and other matters relating to the Department is contained in the Department of German Studies Handbook, available free of charge from the School’s Student Information Desk.

German Language, Literature and Civilisation

Language study and the study of literature and linguistics are integrated so as to reinforce each other. Seminars in the area of German literature and civilisation aim to increase language proficiency and communicative competence; at the same time practical language work involving topics and issues of German socio-cultural history contributes to an increased awareness and understanding of the forces that have shaped the development of modern German society.

Major Sequences

The sequences given below are minimum requirements, students may add further seminars to their programs.

A Stream (Beginners) – 105 credit points required. Year 1: one language subject in each session (GERS1400/1); Year 2: one language and one German Studies subject in each session (GERS2400/1); Year 3: one full-year language subject, one German Studies subject and one seminar in each session (GERS3403, GERS3400 and GERS3401)

Notes:

1. Variations to the above sequences may be approved by the Head of Department.

2. Subjects in the German Studies area in other departments, may be counted towards a major sequence provided that: (a) a substantial proportion of text sources is read in German, (b) there is no substantial duplication with other subjects offered by the Department, and (c) prior approval is obtained from the Head of the Department.

Honours Level Entry

Students should note that for entry into the Honours program an average grade of Credit or better is required in German subjects.

A Stream (Beginners) – Students complete the subjects in the pass program listed above and in addition take – Year 3: Seminars to total 30 credit points. A total of 135 credit points in German is required.

B Stream (HSC or equivalent) – Students complete the subjects in the pass program listed above and in addition take seminars to a total of 30 credit points over two years. A total of 135 credit points in German is required.

Level I

1. GERS1400 S1 Introductory German 1 is designed for students who have no previous knowledge of German.
GERS1401 S2 Introductory German 2 is the sequel to GERS1400.

Subject to approval from the Head of Department, students with some knowledge of German, e.g. Year 10, or 2 Unit Z level, may enrol in this subject.

Greek (Modern)

The basic aims of the subjects offered are to help students to acquire a sound reading knowledge of Greek, a command of basic conversational and written Greek, and an understanding, through the study of Greek literature and history, of the way in which Greek society has developed.

Teaching and Assessment

All teaching in Modern Greek Studies is carried out in small groups except for the Greek Literature and Greek History sections.

Assessment is continuous and ranges from informal class tests to literature and history essays and class oral and written presentations. Oral participation in all classes is also taken into account when determining the final mark.

Note

Students should note that a Pass Conceded (PC) in a language subject does not allow progression to Higher Level Language subjects.

Language of Instruction

Whenever possible, language courses are conducted in Greek. Literature lectures are mostly given in Greek with English explanations of difficult terms and points. The history lectures, however, are mainly given in English.

Note: Students who wish to take Modern Greek should enrol in the subject that seems most appropriate to them. However, the subject Coordinator reserves the right to alter the enrolment, according to the student’s knowledge of the language.

Students intending to pursue advanced Modern Greek Studies can enrol in the Honours program which apart from providing an additional professional qualification offers a gateway to postgraduate studies. During the Honours year, students will complete two coursework components and write an Honours research thesis of between 15,000 and 20,000 words in length. Entry into the Honours program in Modern Greek Studies requires an above average pass (70% or higher) in Modern Greek subjects, as well as a total of 135 credit points in Modern Greek or in approved subjects in either European Studies, or in the School of Modern Language Studies. Intending Honours students are recommended to contact the Head of Department at an early stage in their undergraduate studies to discuss their selection of subjects and their proposal for the Honours research project.

Note: For 1998, entry into the Modern Greek Studies Honours year is by special permission from the Head of Department.

EURO2402
Of Machos and Maidenheads: Sex and Stereotypes in the Mediterranean
Staff Contact: Nina-Maria Potts (GREK)
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts
An interdisciplinary study of some key feminist and gender issues in the Mediterranean Region, including the public/private dichotomy regarding gender roles in urban and rural settings and the central role of women in religious life. Aims to make students aware of cross-cultural factors which affect interaction between the sexes in the Mediterranean Region. To what extent has the European Union had a real impact on women's lives in Greece, Italy and Spain?
Assessment in each subject usually involves one essay and a tutorial contribution. Some subjects also use end of session tests as a form of assessment. For details of assessment in particular subjects, consult the School of History handbook or individual subject guides.

Details of a Major in History, and of the requirements for entry into Honours (4th year), are listed below. Under Faculty rules: (i) a student may complete only two Level 1 History subjects (30 Level 1 credit points), and (ii) for entry into Upper Level subjects in History, students should have completed 30 Level 1 credit points in History or 90 Arts credit points. It should be noted that ARTS1100 may be substituted for 15 first year credit points in history.

The study of History develops important skills in research, interpretation, evaluation of evidence, reasoning and writing. Study at Honours or Postgraduate level further refines these skills and permits students to demonstrate an ability to undertake independent and original research and to communicate the results of this research clearly and persuasively.

### Major Sequences

A major sequence in History consists of at least 105 credit points in subjects offered by the School of History.

Students may also undertake a combined major sequence in History (HIST) and the History and Philosophy of Science and Technology (HPST) by completing 150 credit points as follows: 75 credit points in subjects offered by the School of History, including at least 45 credit points in any of the following subjects – HIST1004, HIST1011, HIST1012, HIST2011, HIST2024, HIST2031, HIST2039, HIST2054, HIST2065, HIST2066, HIST2067, HIST3001; and 75 credit points in any of the following HPST subjects – HPST1106, HPST1107, HPST2107, HPST2108, HPST2117, HPST2128, HPST3106, HPST3108, HPST3119 (HPST3118 may also be counted toward this combined major sequence if approved for this purpose by the Head of the School of Science and Technology Studies).

(The School may grant permission to count 15 credit points obtained in History related subjects offered by other schools or departments.) Arts/Law students should consult the School’s fourth year Honours Coordinator regarding planning their programs in years 1–3 to allow progression to the fourth year Honours History program. For entry to the Honours program, an Arts/Law student is required to obtain 120 credit points in History at credit level or better (including a Pre-Honours Seminar).

**History**

The School of History offers a variety of Level 1 and Upper Level subjects, giving students a wide range of options at all levels. Subjects are mainly concerned with aspects of modern history and related to periods and themes in Australian, Asian, European, Middle Eastern and American history. General theories and problems of historical explanation are also studied, as well as techniques of researching and writing history.

Class contact in most subjects offered is three hours per week. All subjects are of one Session length (14 weeks in Session 1 or Session 2). Level 1 subjects offered in the each of the following fields – Asian, Australian or European history – can be taken separately or as a complementary pair of subjects over two Sessions. (Details of lectures, seminars, tutorials, etc. are available from the School of History; lecture timetables may be consulted at the Faculty of Arts and Social Sciences office, Room G1, Morven Brown Building.) Most of a history student’s working time, however, is spent in the University library or in private study, preparing papers to be read at tutorials and seminars, and writing the required essays.
History Students Association

The History Students Association assists students of History to develop an interest in outside their formal studies. The Association presents guest speakers, holds film and video seminars, and social gatherings.

All students studying with the School of History are automatically members of the History Students Association.

Please address all enquiries to the School of History, or to: The Secretary, UNSW History Students Association, School of History, UNSW, Sydney, NSW 2052.

HIST1003
The Fatal Shore: Aborigines, Immigrants and Convict Society
Staff Contact: Rae Frances, Bruce Scates
CP15 S1 HPW3

Violence and the abuses of sex pervaded early colonial society. Looks at the way violence was used to dispossess Aboriginal people from their land and to establish and maintain convict society. Examines the complex relationships arising from sexuality: sex as a form of currency, domination, negotiation and identity for both Aboriginal people and Europeans. What is the legacy of these brutal beginnings for modern Australia? Are we still marked by the ‘convict stain’? And to what extent did early colonial Australia recreate the class, gender and ethnic inequalities of 18th and 19th century Britain? Also includes an excursion to a historic site in the Sydney region.

HIST1004
Making Australia: The Struggle for a Nation
Staff Contact: Rae Frances, Bruce Scates
CP15 S2 HPW3

The historical context for the making of modern Australia. What is the background to the Mabo debate and the call for an Aboriginal treaty? Where does the Republican Movement find its Australian origins? What do recent stereotypes of masculinity and femininity – eg the Ocker Bloke and the Aussie Sheila – owe to our colonial past? How has history shaped definitions and expressions of sexuality? What are the origins of our current political system? Charts Australia’s development from an isolated colony to an independent nation; from the beginnings of a free society to Australia’s controversial involvement in the Boer War.

HIST1012

EURO1000
New Europe (A)
Staff Contact: Martyn Lyons
CP15 S1 HPW3

EURO1001
New Europe (B)
Staff Contact: Martyn Lyons
CP15 S2 HPW3
Note/s: EURO1000/1001: Two session length subjects which together form the first year of the European Studies major but are also available separately.

Despite a surprisingly rapid economic recovery after the catastrophe of World War II, Western European nations were increasingly relegated to the status of second-class powers, both politically and 'morally', during the years of the Cold War. With moves towards European unification and the disintegration of the Soviet 'block', Europe seemed once again to have assumed a central role on the world stage. Yet the euphoria of 1990, which looked forward to a united Europe and the rapid transformation of post-communist societies, has been followed by a severe hangover. The events of the last years and their implications will be discussed, and the problems and prospects confronting the 'New Europe' in relation to its past, present and future.

Prerequisite: 30 Level 1 credit points in History, or 90 Arts credit points
Note/s: Excluded 51.905. This subject may be counted towards a major sequence in the School of Science and Technology Studies. Analyses radical popular religious movements that envisage an apocalyptic end to the world and its transformation into a perfect new age or a revised golden age. It attempts to explain the causation of such movements in widely diverse human societies. The propensity of such millenarian movements to oscillate between extremes of 'rigorist' puritanism and 'anti-nomian' permissiveness is also investigated. Finally, theories explaining millenarian phenomena and the relationship between millenarian and orthodox religion are reviewed.

Documentary Film and History

CP15 S1 HPW4
Prerequisite: 30 Level 1 credit points in History, or 90 Arts credit points
Note/s: Excluded 51.960.

The mission of the documentary film-maker, like that of the historian, is to order and interpret complex data and issues. All non-fiction films confront problems which derive from the demands of interpreting and validating sources; all are ultimately products of a range of subjective choices in such obvious areas as selecting a subject to editorial techniques and decisions; all are in part the product of the social, political and economic framework in which they are produced; and all are constructed to educate, expose, explore or propagandise, albeit in more or less overt ways. Analysis of such film texts raises important historiographical questions which are often avoided by historians. Provides a critical introduction to the history of documentary films as vehicles for understanding the past.

**Rights and Riots**  
*Staff Contact: Hamish Graham*

To the guillotine! In popular representations of the French Revolution, women appear prominently: as its aristocratic and religious victims; as the allegorical symbols of Liberty and the Republic; and as the elderly knitters whose bloodthirsty cries encouraged the executioners. This Revolution's enduring legacy promoted universal human rights. Yet no republican franchise in 18th and 19th century France acknowledged women's rights to political participation. Why was that? Why did French women acquire the right to vote only in 1944? And why, 50 years later, was the proportion of women among France's elected representatives still less than 6%? This subject suggests ways in which these issues may be addressed, by considering a variety of approaches to the history of women, gender and politics in modern France.

Terms such as the 'Orient' and 'Asia' are spatial and cultural constructs which were devised by Western civilisation to help it understand and colonise a large portion of the world's surface and people. This subject examines the way Western civilisation has conceived the notion of 'Asia'; and how such conceptions have informed the West's engagement of this region. It will trace this engagement from pre-modern times to the present. The subject will concentrate on that space commonly referred to as the 'Far East', namely Northeast Asia, Southeast Asia and South Asia.

How do individual life histories illuminate historical processes? What are the problems and pitfalls in using them? How are autobiographies, biographies and diaries constructed? What insights can psychohistory offer the biographer? To what extent is the historian justified in moving in the 'imaginative territory usually reserved for novelists'? History and Philosophy of Science and Technology

Science and Technology Studies

The School of Science and Technology Studies (STS) offers subjects in two streams: History and Philosophy of Science and Technology (HPST); and Science, Technology, and Society (SCTS). A major sequence in the School may be made up of subjects from both the HPST and the SCTS streams. Subjects may be taken in any order, provided that subject prerequisites are met. Entry to most Upper Level subjects is possible without having studied Level 1 HPST or SCTS subjects.

Subjects in the History and Philosophy of Science and Technology (HPST) stream examine the history of scientific and technological development, the nature and philosophical implications of the knowledge and methods involved in this development, and the historical dynamics of scientific and technological change. HPST subjects make an ideal complement to subjects in intellectual and social history, and philosophy. They employ the methods of the humanities and social sciences to understand the historical, cultural, and social role of science and technology. No previous study of mathematics or science is required.

Major Sequences

A major sequence in the School of STS consists of at least 105 credit points in HPST and/or SCTS subjects, of which no more than 30 credit points may be from Level 1 subjects. A major sequence may therefore consist of 30 Level 1 plus 75 Upper Level credit points, 15 Level 1 plus 90 Upper Level credit points, or 105 Upper Level credit points. By permission of the Head of School, up to 15 credit points obtained in approved Upper Level subjects in other Schools may be counted towards a major sequence in the School of STS.

Students may also undertake a combined major sequence in History (HIST) and the History and Philosophy of Science and Technology (HPST) by completing 150 credit points as follows: 75 credit points in subjects offered by the School of History, including at least 45 credit points in any of the following subjects – HIST1004, HIST1011, HIST1012, HIST2011, HIST2024, HIST2031, HIST2039, HIST2054, HIST2065, HIST2066, HIST2067, HIST3001; and 75 credit points in any of the following HPST subjects – HPST1106, HPST1107, HPST2107, HPST2108, HPST2117, HPST2128, HPST3106, HPST3108, HPST3119 (HPST3118 may also be counted toward this combined major sequence if approved for this purpose by the Head of the School of Science and Technology Studies).

What is science? What are its distinctive characteristics as a form of inquiry? Why are astrology and 'creationism' widely considered to be pseudosciences? A critical consideration of the claims of astrology, psychoanalysis, parapsychology and creation-science provides a vehicle for raising central questions concerning the nature of science, involving issues such as the nature of observation and evidence, theories and laws, explanation and prediction, etc. These questions are placed in an historical context: from the Pre-Socratics to Hume, Kant, and the twentieth-century philosophers Wittgenstein, Popper, and the 'Logical Positivists'.

Industrial Relations and Organisational Behaviour

The School of Industrial Relations and Organisational Behaviour is located in the Faculty of Commerce and Economics. The School offers distinct disciplinary streams in Industrial Relations and Human Resource Management to students within the Faculty of Arts and Social Sciences. Students within the Faculty of Arts and Social Sciences may undertake a major in Industrial Relations or Human Resource Management. It is not possible to major in both streams.

The School’s program of study in industrial relations focuses on the institutions, practices and processes associated with contemporary employment relations. The program is designed on a multi-disciplinary social science basis to foster an appreciation of the many important questions relating to the role of individuals, trade unions, employers and governmental bodies in the world of work.

The specialisation in human resource management provides a strong practical and theoretical grounding in the policies and processes involved in the management of people at work. In a climate of rapid economic change, effective labour management is being seen as a critical component of the operation and strategic planning of both private firms and public sector organisations.

Assessment is by essays, tutorial participation and an end of Session examination. The relative weight of each of these varies from subject to subject and is announced in each subject at the beginning of each Session.

Linguistics
Director: Associate Professor Peter Collins
Administrative Assistant: Maria Oujo
Linguistics, the study of human language, shares areas of interest with a number of other disciplines. Thus not only theoretical and descriptive linguists but also language teachers, psychologists, philosophers, educators, sociologists, neurologists and computer scientists address questions such as: What is the biological basis for language? Is language unique to the human species? How and why do languages change? How do children learn language? What is the meaning of 'meaning'? Can machines talk? As well, linguistics provides a basis for a variety of practical applications, including the teaching and learning of foreign languages, diagnosing and treating language disorders, developing language curricula in schools, improving literacy skills, generating speech by computer, producing 'plain English' documents, and so on.

Students who have successfully completed either or both of the Level 1 Linguistics subjects may enrol in Upper Level Linguistics subjects. A student who has not fulfilled this prerequisite but is interested in a particular Upper Level subject may request the permission of the Director to have the prerequisite waived. In considering such requests, the Director will give preference to a candidate with a successful year's work in another language, or in English, or a credit or better in another related discipline.

Major Sequence
A major sequence in Linguistics requires 30 credit points in Linguistics at Level 1 and 75 credit points in Upper Level subjects. Up to 15 credit points may be substituted from Upper Level English subjects. Students may also count 15 credit points in MODL2000 Cross-Cultural Communication towards a major sequence.

Mathematics

While Mathematics as a major study is usually taken in one of the Science, Advanced Science or Science/Arts courses, it may also be taken within an Arts course.
Students wishing to do an Honours degree in Mathematics or to specialise in one of the disciplines of Applied Mathematics, Pure Mathematics or Statistics must transfer from the Arts course to a Mathematics program within one of the Science, Advanced Science or Science/Arts courses. This should normally be done prior to commencing year 2, but may be possible at the end of year 2 depending on the subjects selected.

First Year Mathematics

MATH1131 and MATH1231 are the standard subjects and are generally selected by students who intend to pursue further studies in Mathematics.
MATH1141 and MATH1241 are aimed at the more mathematically able students. They cover all the material in MATH1131 and MATH1231 at greater depth and sophistication.
MATH1011 and MATH1021 are subjects available for students who do not intend studying Mathematics beyond Level I, but whose studies require some knowledge of basic mathematical ideas and techniques. Only a very limited number of Upper Level Mathematics subjects are available to students who have done MATH1011 and MATH1021.
Higher Level Mathematics

Many subjects in the School are offered at two levels. The Higher level caters for students with superior mathematical ability. Where a prerequisite is mentioned at the ordinary level, the corresponding Higher level subject may be substituted.

Students with Low Mathematical Qualifications

IPACE (of UNSW) organises a Bridging Course in Mathematics which is available for those students intending to enrol in First Year Mathematics who have inadequate mathematical background. The Bridging Course covers the gap between 2 unit and 3 unit Mathematics and is a very useful refresher course generally. The course is held at the university during the period late January to February each year, starting immediately the enrolment period begins.

Media and Communications

Subjects with the prefix MDCM are available only to students who are enrolled in the BA (Media and Communications) degree (course 3402). Students in this degree complete the Media and Communications core program as well as a major sequence in the humanities or social sciences.

The Media and Communications core program gives students a sophisticated understanding of the history, scope and socio-cultural impact of new media technologies, and of the debates that have accompanied their development and use. Important features of this core program are its emphasis on new computer-based multimedia and its focus on Australian media industries in relation to globalisation. The degree is vocationally relevant in its orientation and all students are given a practical experience in new computer-based multimedia communication technologies.

The program’s emphasis on analytical skills is combined with this practical experience to equip students with a thorough knowledge of media and communications as they are currently evolving. This grounding enables them to interpret, apply and adapt the products of new media not only in the context of the mass information and entertainment industries but also in a variety of other public and private sectors areas such as education, on-the-job training and specialised information services.

In addition to the Media and Communications core program, students complete a major in the humanities or social sciences, to permit them to study a related field in depth or to pursue their interests in other areas. Students who proceed to the fourth year of the BA (Media and Communications) course will take two Honours seminars in their first session, one with a theoretical focus and the other involving a practical exercise and written analysis. In the second session two alternative pathways will be available, with some students completing a research thesis and others undertaking a major practical project using computer-based multimedia technologies.

**Modern Language Studies**

The recently formed School of Modern Language Studies has Departments of Chinese and Indonesian, French, German and Russian Studies, Linguistics, Spanish and Latin American Studies, and Modern Greek. Major sequences are offered in all of these languages. One of the School's aims is to develop new subjects within and among various Departments, and the MODL subjects listed below are the first of these. They will be taught by staff members from different Departments of the School and will emphasise cross-cultural comparison.

**Upper Level**

**MODL2000**

**Cross-Cultural Communication**

*Staff Contact: Joëlle Battestini*

*CP15 S2 HPW3*

*Prerequisite: Any Level 1 language subject or equivalent*

Examines the factors which determine our use of verbal and non-verbal language in social interaction in different cultures. The aims are to identify and compare (1) factors which lead to communication breakdown; (2) expressions of formality, politeness and emotion in European and Asian languages. The subject is designed to complement modern language studies offered within the School of Modern Language Studies by developing learners' cross-cultural communication skills. Lectures will be in English with language specific work included in tutorials.

**MODL2001**

*Staff Contact: John Brotherton*

*CP15 S1 HPW3*

*Prerequisite: 90 Arts credit points or equivalent*

In each case, after study of the revolutions themselves, attention will be focused on cultural policy and the role of cinema within this. Two films from each country will be considered: one of them from an earlier phase of the revolution and one from the last decade. Films will be analysed both as reflections of key aspects of the societies that produced them, and from the perspective of their production, in the light of any controversy or repercussions they caused at home or abroad.

   Year 2  MUSI2001 (Music 2B),  MUSI2010 (BA Performance 1)
   Year 3  MUSI3001 (Music 3B),  MUSI3010 (BA Performance 2)

2. The Bachelor of Music degree (BMus). This is a three-year degree course of professional orientation, with provision for honours in a fourth year.

   Course Prerequisites: A satisfactory audition/interview and an acceptable level of attainment in year 12 studies or equivalent.

   Recommended knowledge: Music 2u or 3u or 3u AMEB or equivalent qualification.

3. The combined Bachelor of Music Bachelor of Education (BMus BEd) double degree. This is a four-year integrated double degree for intending specialist music teachers, with provision for honours in a fifth year.

   Course Prerequisites: A satisfactory audition/interview and an acceptable level of attainment in year 12 studies or equivalent.

   Recommended knowledge: Music 2u or 3u or 3u AMEB or equivalent qualification.

4. The Postgraduate Master of Music (Pass), Graduate Diploma in Music, Graduate Certificate in Music, Master of Music (Hons), Master of Music Education (Hons), or PhD degrees, for which the undergraduate degrees listed above are suitable preparation;

5. The full-year course, Fundamentals of Music, which serves as an introductory course in musicianship and musical techniques. This subject is open to all undergraduates and does not have a musical prerequisite.

6. General Education music subjects.

The School of Music and Music Education offers three undergraduate degrees with specialisation in music, i.e., Bachelor of Arts (with a music major), Bachelor of Music, and the double degree Bachelor of Music Bachelor of Education. Entry to the specialist music degrees of BMus and BMus BEd is by audition and University entry score. All undergraduate Music degrees are integrated and compatible and have some elements in common. Each has the potential to equip a student for a wide range of careers in music, music teaching and related occupations. All three degrees can lead to Master's courses and other higher degrees at the University.

The Bachelor of Arts (BA) with a major in Music is a three-year degree designed to develop musicianship and performing skills in association with an exploration of musicology: music history, style, musical perception and analysis, music technology and the study of music in its cultural contexts (ethnomusicology). Students undertaking the BA with a major in Music are expected to continue performance studies and are required to participate in group music-making.

The Bachelor of Arts (BA) permits the combination of music with the widest range of other options in the Faculty of Arts and Social Sciences and in other faculties, including options such as theatre, film and dance, languages, history, philosophy, and psychology. Through double degrees such as the BA LLB or the BSc BA, it may be possible to combine serious music studies with law, science and other degree courses.

Bachelor of Arts students who have completed 2 Unit 1 Music for their HSC or who have AMEB grades lower than 7 (performance) and 6 (musicianship) are encouraged to complete MUSI1103 Fundamentals of Music. Completion of this subject at a required level may provide the means of proceeding to a BA with a major in Music, and may also provide, if combined with a satisfactory audition, a means for subsequent enrolment in the BMus or the BMus BEd.

Consistently good work in the BA with a major in Music and completion of required additional subjects in second and third years may lead to a fourth (honours) year of study, completing a BA (Hons).

The Bachelor of Music (BMus) is a three-year specialist music degree which enables students to develop their musicianship and their musical skills in general in preparation for professional work in music in areas as diverse as performance, private teaching, broadcasting, recording, arts administration, concert planning, music and general arts journalism, arranging and composition. Students undertake studies in musicology and ethnomusicology – including music history, style, musical perception and analysis, music in its cultural contexts – and musical technology, performance, jazz studies and composition. At the same time students have enough flexibility in their course to enable them to combine music studies with substantial work in a related discipline like theatre, film and dance, or in languages, English literature and language, history, philosophy, among others.

Consistently good work in the BMus may lead to a fourth (honours) year of study, completing a BMus (Hons).

The Bachelor of Music Bachelor of Education (BMus BEd) is a four-year specialist double degree in music education which aims to enhance the career prospects of graduating students and to serve the wide range of teaching opportunities open to music graduates. The BMus BEd offers an integrated training in five major areas: Music
Studies, Music Education Studies, Performance Studies, Education Studies, and Contextual Studies. As well as developing many skills in teaching classroom music from early primary to final secondary grades (K–12), the BMus BEd provides a specialist sequence of subjects designed to train conductors and teachers of instrumental and vocal ensembles. A special feature of the BMus BEd is the attention given to music history, aural training and musicianship courses as core units in the first three years of the program. In addition to the thorough grounding provided in Western art music, specialist subjects dealing with music in its cultural contexts (ethnomusicology), musical technology and contemporary pop/jazz styles broaden and enrich the academic and professional capacities of all graduates. Graduates are qualified to teach classroom and instrumental/vocal music from kindergarten to year 12, and are accredited to teach in all Australian states. The final phase of the student’s training involves, in addition to practice teaching sessions in Years 1, 2 and 3 of the course, a ten-week extended internship in practice teaching.

At the end of Year 4, students may be permitted to enter an Honours Year in either Music or Music Education. Students who satisfy the requirements for Honours as well as those for the award of the BMus BEd double degree will graduate with the award BMus BEd (Hons).

University Performance Ensembles – Music studies in the Faculty concentrate on the texts and contexts of music, involve the active development of the student’s musicianship and develop practical abilities. Performance groups run by the School of Music and Music Education include: The Collegium Musicum Choir, The University of New South Wales Orchestra, instrumental chamber groups, a vocal chamber group (The Burgundian Consort), an Early Music Group, Bush Band, Hand Bell Ensemble, Jazz Ensemble and Concert Band.

Apart from providing considerable choices for students majoring in Philosophy, the diversity of Upper Level subjects makes it possible for students majoring in other disciplines to select subjects complementing their main interest.

Level I

There are four Level I subjects:

PHIL1006 Reasoning, Values and Persons (Session 1)
PHIL1007 Ways of Knowing and the Nature of Knowledge (Session 2)
PHIL1008 Ethics and Society (Session 1)
PHIL1009 Points of View: Science, Objectivity and Subjectivity (Session 2)

Each of these has a value of 15 credit points. They can be taken separately, but new students, especially those intending to complete a major sequence in Philosophy, will normally enrol in two – one in each session. However, a student can gain Upper Level status in Philosophy (qualify to enrol in Upper Level subjects) by passing in only one.

Upper Level Study

Students must be in at least Year 2 of study in the Faculty in order to take Upper Level subjects in Philosophy. All Upper Level subjects are single-session subjects. Each consists of 3 hours of classes per week and is worth 15 credit points. Except where special prerequisites are prescribed, subjects can be taken in any sequence. Each subject is designed to be self-contained, but particular groupings of subjects will enable students to pursue sustained treatments of particular areas or of historical developments in the treatment of issues.

In certain circumstances the prerequisites specified for subjects may be waived – for example, in the case of students who have already studied similar material in other schools, or who wish to take isolated subjects relevant to another discipline without counting them as part of a Philosophy sequence. Students who feel they have a case for a concession of this kind should consult the School.
Major Sequence

A major sequence in Philosophy is a sequence of subjects offered by the School carrying at least 105 credit points including no more than 30 credit points in Level I subjects.

Subject to the approval of the School, which considers the individual subjects nominated by a student and the student's overall program in Philosophy, a student may be permitted to count up to 15 points offered outside the School toward a major sequence in Philosophy. For example, the School has, on occasion, allowed students to count particular subjects from the Schools of Science and Technology Studies, Political Science, and Law towards a major sequence in Philosophy. Students who have some interest in counting a subject from outside the School of Philosophy toward a major sequence in Philosophy should consult the School.

Some Philosophy subjects may be counted towards a major sequence in the School of Science and Technology Studies.

Selection of Subjects

Although students at Upper Level have a wide choice of subjects, they are advised to plan a sequence of mutually relevant ones, taking into account the prerequisites of those they may wish to take later. Information and School recommendations are available from the School; and students needing assistance are encouraged to consult the School personally.

Honours Entry

For entry to Philosophy Honours (Research), students must normally have completed 135 credit points in Philosophy, consisting of 15 or 30 points at Level I and the remainder at Upper Level. Students must normally also have a grade average of at least 70 per cent in their Philosophy subjects, including at least one Distinction result. For students commencing university study prior to 1996, their Upper Level subjects must include PHIL3016 Pre-Honours Seminar, and at least 45 credit points chosen from subjects which are primarily oriented toward the history of philosophy, of which at least 15 credit points must be in some area of the history of modern European philosophy. For students commencing university study in 1996 or later, the history of philosophy requirements have been changed: in addition to PHIL3016 Pre-Honours Seminar, students are required to complete the following two subjects (totalling 30 credit points): PHIL2228 Themes in Seventeenth Century Philosophy, and PHIL2229 Themes in Eighteenth Century Philosophy. The School recognises that the particular overall programs of some students enrolling in Combined Honours (Research) might be such as to make it desirable to vary the Philosophy subject requirements for admission – either in terms of the prescribed number of credit points or in terms of the requirement that 30 points be chosen from the specified range of subjects. Students are invited to consult the School about this matter in their particular situations.

Subject to the approval of the School, which considers the individual subjects nominated by a student and the student's overall program in Philosophy, a student may be permitted to count up to 15 credit points offered outside the School toward satisfying the Honours entry requirements.

Students contemplating Honours are urged to seek advice from the School early in their course.

Socratic Society

The Socratic Society is a student-run society which is associated with the School of Philosophy and meets on a regular basis. Its purpose is to promote discussion on topics of philosophical interest.

Level I

The following are Level I subjects with a credit point values as nominated.

PHIL1006
Reasoning, Values, and Persons
Staff Contact: Phillip Staines
CP15 S1 HPW3
A team-taught introduction to philosophical thought and issues through study of traditional and contemporary discussions of four topic areas: philosophical reasoning, ethics and political philosophy, minds, bodies and persons, analysis and argument.

PHIL1007
Ways of Knowing and the Nature of Knowledge
Staff Contact: Stephen Hetherington
CP15 S2 HPW3
This subject is a further team-taught introduction to philosophy. Topics will include: Science and Religion, Knowledge and Evidence, Metaphysics.

PHIL1008
Ethics and Society
Staff Contact: Karyn Lai
CP15 S1 HPW3
This is political philosophy and moral philosophy at the intersection of the political with the personal. When we make decision in important areas like euthanasia, reproductive freedom and reproductive technology, the allocations of health resources, the suppression of smoking and other drugs, censorship, the environment, penal reform and capital punishment, we must balance the rights and duties of the individual with the demands and obligations of society. In this team-taught subject, we consider current debate about the above questions.

PHIL1009
Points of View: Science, Objectivity and Subjectivity
Staff Contact: Neil Harpley
CP15 S2 HPW3
Is the world the way it seems to be? Is there a real world out there or is it all 'in the mind'? This team-taught subject introduces philosophy by examining these questions in relation to science and its claim to objectivity. Does science really provide objective knowledge? Is objective knowledge the same thing as 'value free' knowledge? Along with scientific sorts of knowledge, are there other sorts of knowledge which are more subjective, more a feature of our individual perspectives. Is there such a thing as common everyday knowledge?, as ethical knowledge?, as self-knowledge?

Upper Level

For some subjects, a prerequisite is Upper Level status in Philosophy. This consists in (1) being in Year 2 or later of university study, and (2) having taken and passed at least one Level I Philosophy subject (15 credit points). The prerequisite may be waived by the School in certain cases. The following are Upper Level subjects with credit point values as nominated.

PHIL2106
Logic
Staff Contact: Stephen Hetherington
CP15 S1 HPW3
Prerequisite: Upper level status. Students must be in Year 2 or later of University study. (Students need not have upper level status in Philosophy.)
Note/s: Excluded MATH3400.
This subject is about deductive logic (in particular, propositional logic and predicate logic). Aims to construct - and to understand - a precise, unambiguous, formal language. Many important parts of English are translatable into it, hence many arguments of English are translated into it too. It is a language with which we can better understand the concept of deductive proof.

PHIL2107
Advanced Philosophy of Science
Staff Contact: Michaelis Michael
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School
Note/s: Subject not offered in 1998.

PHIL2108
Ways of Reasoning
Staff Contact: Bill Tarrant
CP15 S1 HPW3
Prerequisite: Upper level status. Students must be in Year 2 or later of University study. (Students need not have upper level status in Philosophy.)
Examines what reasoning and argument really are and how best to engage in them. Material for this subject is drawn from everyday sources, such as newspapers, books and advertisements, including television, as well as some of the brilliant pieces of reasoning in the philosophical tradition. From studying the structure of arguments, the purpose of reasoning, and a number of strong and weak argumentative moves, and from a guided re-evaluation of their own writing, students will be able to improve their critical skills and the presentation of their own arguments.

PHIL2109
Metaphysics (Realisms)
Staff Contact: Stephen Hetherington
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
This subject examines several classic metaphysical questions, some of which are as follows. Is there a real world? What is social reality? What is the nature of possibility? Is this the only possible world? Is there a God? Are there people? Is there free will?
PHIL2116
Scientific Method
Staff Contact: Michaelis Michael
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School

Science has a serious claim to being the major cultural force shaping our world-view. The aim of this subject is to enable us to understand better our own views about science by their historical development. Examines in some depth, the conceptions of science to be found in the writings of Aristotle, Descartes, various Positivists, and some more recent philosophers, with a view to understanding how their conceptions of science and their conceptions of which questions philosophers should ask about science differ from each other and from our own.

PHIL2117
Philosophical Logic
Staff Contact: Michaelis Michael
CP15 S2 HPW3
Prerequisite: PHIL2106 or equivalent, or contact School
Note/s: Subject not offered in 1998.

PHIL2118
Philosophy and Biology
Staff Contact: Michaelis Michael
CP15 S1 HPW3
Prerequisite: Upper level Status in Philosophy or 30 credit points in History and Philosophy of Science and Technology (HPST), or BIOS1011 or BIOS1621
Note/s: Excluded HPST3012, HPST3117.

Our understanding of ourselves is powerfully shaped by our conception of our biological nature. Central in this conception is the idea that we have evolved so the theory of evolution plays an important role in our understanding of ourselves. This subject aims at being an in-depth examination of some of the conceptual and philosophical issues which are raised by evolutionary theory. In particular, we will looking at the explanatory structure of modern evolutionary theory and its relationship to the vexed issue of classification.

PHIL2208
Epistemology (Scepticisms)
Staff Contact: Stephen Hetherington
CP15 S1 HPW3

Note/s: Subject not offered in 1998.

PHIL2209
Epistemology (Knowledge and Justification)
Staff Contact: Stephen Hetherington
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

Epistemology is officially the Theory of Knowledge. One of its most important questions is therefore ‘What is knowledge?’ Answering this generally leads to another question: ‘What is justified belief?’ (For most epistemologists think knowledge is a sort of justified belief.) This subject is built around these questions; we will consider various attempts that epistemologists have made to answer them.

PHIL2215
The Struggle for Human Nature
Staff Contact: Neil Harpley
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Subject not offered in 1998.

PHIL2217
Personal Identity
Staff Contact: Neil Harpley
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy

Controversy about the nature of persons and the criteria for personal identity has usually centred on the questions of whether persons are bodies or are minds and whether the criteria for their identity are physical or psychological. Philosophers have frequently ignored the social dimensions of personhood or, at best, given it only a peripheral place in the discussion. The notion that people are socially constructed will be given due weight and an attempt made to integrate the differing approaches to what it is to be a person.

PHIL2218
Philosophical Foundations of Artificial Intelligence
Staff Contact: Phillip Staines
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy

PHIL2309
The Heritage of Hegel: The Concept of Experience
Staff Contact: Lisabeth During
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Hegel is one of the towering presences in contemporary philosophy. Long recognised as an influence on European philosophy from Marx to Lacan, Derrida and Kristeva, the Hegelian philosophy of identity, difference, subjectivity and desire, is essential to anyone who wants to understand current directions in critical theory. Covers a close reading of the Phenomenology of Spirit, together with selections from Hegel’s lectures on logic. The second half of the subject looks at important readings of Hegel by Derrida, Habermas, Irigaray, etc.

PHIL2316
Philosophy of Religion
Staff Contact: Karyn Lai
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
This subject aims to study the phenomenon of religion, its relation to ways of life, and its construction of stories and myths. Drawing from a variety of religious sources, it analyses the different categories and forms in and through which religious ideals are expressed and justified. Topics covered include arguments for the existence of God, the concept of evil, faith and mysticism, human relation to the natural world, religion and morality, religion and gender, and free will and determinism.

PHIL2407
Contemporary European Philosophy: Vision and Transgression
Staff Contact: Lisabeth During
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
The earliest philosophy attached myth and poetry; the most recent philosophy wonders if it is possible to live without them. The writers studied in this course criticise the moral and the aesthetic values of their culture; they demand new ways of feeling and thinking, new modes of behaviour and language. Their visions are troubling and sometimes violent, but we cannot simply dismiss them. The purpose of this course is to reach a better understanding of the work of Nietzsche, the Surrealists, Bataille and Deleuze, in order to evaluate their critique of modernity; these writers have been chosen because of their impact on current theoretical debates in the social sciences, literature and art. Students will be expected to read critically and be prepared to contribute each week to group discussion.

PHIL2409
Speaking through the Body: Feminism, Psychoanalysis, Literature
Staff Contact: Lisabeth During
CP15 S1 HPW3

PHIL2416
Power, Knowledge and Freedom
Staff Contact: Rosalyn Diprose
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded EURO2400.
In Nietzsche and Foucault we find a powerful critique of philosophical conceptions of knowledge, subjectivity, morality, truth, desire and power. The Nietzschean project, seminal to Foucault, is continued by such maverick figures in contemporary philosophy as Bataille, Artaud and Deleuze, who imagine the relations between the body, freedom and transgression in startling ways.

PHIL2417
Relativism: Cognitive and Moral
Staff Contact: To be advised
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School
Note/s: Subject not offered in 1998.

CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
A range of contemporary ethical issues is discussed. These include: attitudes to other animal species and to the environment; abortion and women’s rights; euthanasia and the allocation of health care resources. The subject also
focuses on some perennial problems in moral philosophy such as public and private morality, intrinsic and instrumental goodness, and absolutism and relativism. A practical approach is adopted with emphasis on philosophical analysis both in the examination of theories and in the formulation of plausible solutions.

PHIL2419
Ethics, Difference and Embodiment

PHIL2519
Introduction to Chinese Philosophy
Staff Contact: Karyn Lai
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded PHIL2520.

Confucianism and Taoism, the two systems of thought originating in China, are studied in this subject. What are the social and political implications of Confucian philosophy? Does the Confucian moral system advocate repression of individualism? What is Tao? Religious concept, metaphysical postulation or theory of (non) action? These are some of the questions which will be dealt with in the subject, which places special emphasis on the categories and assumptions in each of these systems. No previous knowledge of Chinese history or language is assumed.

PHIL2520
Aspects of Chinese Thought
Staff Contact: Karyn Lai
CP15 S2 HPW3
Prerequisite: Upper Level status. Students must be in Year 2 or later of University study. (Students need not have Upper Level status in Philosophy)
Note/s: Excluded PHIL2519.

There are many significant concepts underlying contemporary Chinese thought which have their origin in the classical Chinese schools of thought from pre-Confucian times. This subject critically examines some of these concepts, such as the Confucian jen (humanity) and li (rules of propriety); and the Taoist tao and wu-wei (non-action).

PHIL2606

PHIL2608
Experiencing the Spectacle: From Plato to Virtual Reality
Staff Contact: Rosalyn Diprose
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy or Media & Communications
Note/s: Excluded PHIL2606, 52.273, 52.2260.

Explores philosophical accounts of what is involved in a person's experience of a spectacle (e.g. a painting, a piece of theatre, television or virtual reality). Some philosophers (e.g. Plato) devalue the experience as irrational and different to rational contemplation of an object of knowledge. Others (e.g. Kant) claim the experience can be objective and universal where what I experience is (potentially)
the same as everyone else. Against the common view that the person views the spectacle from a distance and remains unaltered by the experience, Nietzsche, Heidegger and Merleau-Ponty in different ways argue that the spectacle is necessary for creatively opening the person and their world to other possibilities. Emphasis will be on how these thinkers understand the relation between the person and the spectacle with consideration of the implications of their views for understanding the impact of visually based media on our lives.

**Philosophy of Science**

The Philosophy of Science program is designed to provide a coherent sequence of subjects both for students who wish to prepare themselves for undertaking advanced study within the areas of logic, methodology and philosophy of science, and those who merely wish to deepen their comprehension of the subject matter of a major in another field. The program leads towards a core subject, Advanced Philosophy of Science, in the third year. While a second major may be taken in any discipline available, the program is designed in such a way that students can pursue a second major in either Philosophy or Science and Technology Studies.

A major sequence is made up of not less than 90 credit points. Students should note, however, that they may not "double-count" subjects towards a second major and they must satisfy general Faculty regulations. Students must
also meet certain prerequisite requirements within the program. While the program given below is to be taken as normative, variations may be approved by the Coordinator. In particular, students otherwise deemed suitably prepared may be permitted to enter the program in second year, without being required to complete the usual first-year subject.

Suitably qualified students may proceed from the program to a fourth-year honours program in Philosophy or in Science and Technology Studies, or to a joint-honours program in the Schools of Philosophy and Science and Technology Studies. For details, see the school entries under Subject Descriptions.

Political Science

The School of Political Science is concerned with the study of political ideas, institutions and activity. These areas of study are investigated in different ways – historically, logically, empirically and morally. Political Science seeks to encourage a fuller understanding of the problems and processes of political systems in different times and places. To achieve this, emphasis is placed not only upon the study of institutions, but also upon the analysis of a range of theories. These theories may equally underlie and reinforce, or oppose and seek to change, existing structures.

Major Sequence

Any student who wishes to gain a major sequence in Political Science must obtain 30 Level I and at least 75 Upper Level credit points in Political Science subjects. However, it should be noted that ARTS1100 Culture and Tradition will be accepted as part of the Political Science major.

Part-time (Evening) Study

The School of Political Science has organised its subjects to permit students to undertake a Major through part-time study in the evenings (after 6pm). In 1998, 30 Level I credit points and at least one Upper Level subject worth 15 credit points will be available in the evenings in each session.

Students wishing to study in the evenings should be aware that their choice of subjects is, naturally, restricted.

Honours Entry

Any student seeking admission to honours programs in Political Science must obtain a minimum of 135 credit points in Political Science subjects. Where there are sound academic reasons for doing so, the School may permit students to substitute a related subject in other schools/departments/programs for a maximum of 15 of these credit points. Such substitutions require permission of the Head of School and must be at a standard equivalent to that demanded in those subjects offered by the School itself.

In the case of Law students seeking to do honours, substituted subjects worth 30 credit points may be from the Law Faculty with the permission of the Head of School. Normally, however, the 135 credit points required for entry into honours must include 30 Level I credit points at credit level or better in Political Science and at least 45 credit points from Upper Level Political Science POLS3... subjects, entry to which is governed by the prerequisite of Credit or better performance at Level I and indicated as suitable for honours. For students seeking admission to honours, one of the POLS3... subjects must be one of the School’s designated pre-honours subjects. In 1998 POLS3048, Political Satire and Parody is being offered in Session 1 and POLS3027 Liberal Democratic Thought in Session 2. Students who have taken POLS3027, Liberal Democratic Thought, in 1995, as a compulsory pre-honours subject are exempt from the requirement to take POLS3048. Having taken the pre-honours subject students must then be approved by the Head of School for enrolment in the fourth or honours year. A minimum cumulative average of Credit is required for all Political Science Upper Level subjects taken to qualify for honours; and there should be no failures in any Political Science subjects attempted.

The cumulative credit average is calculated by grades. Thus if a student gets a Pass in a POLS subject, a Distinction is needed in another POLS subject to give the Credit average. Students may alternatively undertake a combined honours degree. The Political Science requirement is 120 credit points in Political Science averaging Credit levels, at least 30 credit points from upper level POLS3...subjects carrying Credit prerequisites and indicated as suitable for honours preparation. For students entering honours from 1994 onwards, these 30 credit points must include one of the School’s compulsory pre-honours subjects. When a student undertakes combined honours, special arrangements are made between the relevant Schools who determine, in conjunction with the student, the thesis topic, the subjects undertaken and the supervisors.

Level I

The following are Level I subjects offered in 1998 all of which carry fifteen credit points. Normally students may take only one Level I subject in each session. Students should confirm with the School the Level I offerings as there may be additional subjects or subjects may not be available.

Note: Students cannot credit more than 30 credit points from Level I Political Science subjects towards their degree.

Psychology is a discipline of both scientific research and applied practice. As a science, psychology is concerned with the study of behaviour and its underlying mental and neural processes. Topics of study include learning, memory, cognition, perception, motivation, life-span development, personality, social interactions, and abnormal psychology. Psychology has many areas of application, especially in clinical, correctional, counselling, educational, and organisational settings. In addition, people with training in psychology pursue careers in academic research, health research, developmental disabilities and rehabilitation; ergonomics; occupational health and safety; personnel selection, training, and management; vocational guidance; and marketing.

Psychology may be taken as a major sequence in the Bachelor of Arts and Bachelor of Social Science degree courses. Students who want to complete an Honours program (four years) in Psychology and to qualify professionally will need to apply to transfer to the Bachelor of Science (Psychology) degree course (Course 3431) available through the Board of Studies in Science and Mathematics.

Science, Technology, and Society

Science and Technology Studies

The School of Science and Technology Studies (STS) offers subjects in two streams: History and Philosophy of Science and Technology (HPST); and Science, Technology, and Society (SCTS). A major sequence in the School may be made up of subjects from both the HPST and the SCTS streams. Subjects may be taken in any order, provided that subject prerequisites are met. Entry to most Upper Level subjects is possible without having studied Level 1 HPST or SCTS subjects.

Subjects in the Science, Technology, and Society (SCTS) stream examine the social, economic, and political dimensions of scientific and technological change, especially in the twentieth century. SCTS subjects make an ideal complement to subjects in sociology, political science, and public policy. They employ the methods of the social sciences and humanities to understand the social, cultural, economic, and environmental role of science and technology. No previous study of mathematics or science is required.

Major Sequence

A major sequence in the School of STS consists of at least 105 credit points in HPST and/or SCTS subjects, of which no more than 30 credit points may be from Level 1 subjects. A major sequence may therefore consist of 30 Level 1 plus 75 Upper Level credit points, 15 Level 1 plus 90 Upper Level credit points, or 105 Upper Level credit points. By permission of the Head of School, up to 15 credit points obtained in approved Upper Level subjects in other Schools may be counted towards a major sequence in the School of STS.

Social Science and Policy

The School of Social Science and Policy offers programs in social science and policy studies. These include the core program in the Bachelor of Social Science degree and a major sequence in policy studies in the Bachelor of Arts degree. Combined undergraduate degree programs are also offered that combine the Bachelor of Social Science and the Bachelor of Commerce as well as the Bachelor of Social Science and the Bachelor of Economics.

The programs offered are interdisciplinary, drawing from all the social sciences to achieve an integrated social scientific approach to many of the key issues and problems facing societies today. They encourage and cultivate creativity and a critical perspective and develop skills in conducting research and in the application of social science to the policy process.

Special emphasis is placed on familiarising students with the ways in which social science is put into practice by using case studies drawn from current projects being undertaken or commissioned by governments, non-government and private sector organisations.

The School aims to equip graduates with the skills and knowledge necessary to plan and conduct social research projects and to hold responsible positions in policy analysis and social research in either the public or private sectors.

The Bachelor of Social Science Degree combines a core program of study in social science, policy analysis and research methods with a major study in a particular social science discipline.

The core program aims to provide students with skills in undertaking social research particularly in an applied policy setting. These include written communication skills with particular emphasis on reports, submissions, position papers and proposals; the ability to undertake research and data analysis, both quantitative and qualitative; analysis and critical evaluation of research, arguments and policies; and the use of computers in social research and information processing.

The major study aims to equip students with a knowledge base in one of the social sciences.

In addition, students undertake elective subjects, totalling at least 105 credit points, from the subjects offered in the Faculty of Arts and Social Sciences and subjects carrying the equivalent of 30 credit points chosen from the University's General Education program.

The degree may be taken at pass or honours level. The pass degree is a three year full-time program requiring the completion of 360 credit points including the required general education subjects. Honours students complete, in addition to the pass degree program, an extra year of full-time study or an extra eighteen months of part-time study. To be eligible to enter the honours year students must perform at a credit or better average in both the Social Science and Policy core as well as in their major study.

The Core Program in the Bachelor of Social Science

The core program is a one-hundred-and-twenty credit point sequence consisting of eight subjects taken over three years.

The subjects which make up the sequence are as follows:

The level one subjects must include SLSP1002 Introduction to Policy Analysis and may include either SLSP1000 Introduction to Social Science and Policy or SLSP1001 Introduction to Research and Information Management. The upper level subjects may include any combination of upper level subjects offered by the School of Social Science and Policy subject to satisfaction of prerequisites and up to 15 credit points from approved subjects offered by other schools in the Faculty.

Approved subjects offered by other schools include the following:

- POLS2008 Public Policy Making
- SCTS3109 Society, Technological Hazards and Environmental Management
- SCTS3116 The Political Economy of Energy and Sustainable Development
- SOCI3505 Economic Change and Public Policy

Social Work

Head of School
Dr Diane Barnes

Administrative Officer
Ms Natalie du Gard

Administrative Assistant
Mrs Christine Mangos
At the undergraduate level, the School of Social Work offers courses leading to the award of the degree of Bachelor of Social Work, and of the combined degrees of Bachelor of Social Work/Bachelor of Laws.
Bachelor of Social Work

Professional social work is a worldwide occupation and discipline concerned with helping individuals, families, groups, organisations, communities, and societies to deal with social problems and to develop more satisfying and equitable social conditions generally.

The BSW degree course (4030) is designed to prepare students for the professional practice of social work. It is expected to be undertaken as a four-year full-time program. The Head of School may, however, permit a student who is unable to study full-time to take the course over a longer period not exceeding seven years.

The aim is to produce a social worker who has a general foundation for continuing professional learning, and can undertake independent professional practice at a basic level of competence, utilising relevant knowledge and skills in accordance with the profession's values.

This aim is achieved through developing the student's understanding of:

- normative and factual aspects of the various systems (political, economic, and social) in which people live. This involves teaching materials which give insights into what values people hold, how they attain them, and competing views of what ought to be the situation;
- the nature and extent of social problems and social conditions for people at different stages of the life cycle and in various socio-economic, psycho-social, biological and geographic circumstances;
- policies and services, and various 'helping' occupations, specifically created and maintained to enhance the well-being of people within their society;
- the development of social work as an organised occupation: its history; its relationship to its society; its relationships to social welfare systems and to other 'helping' occupations; its composition and organisation; its various tasks and the knowledge and skills necessary to undertake them; and its new directions for development.

In this first professional qualification, the student gains understanding of the main dimensions of contemporary and future social work practice at the various levels and in the various fields of social work intervention. Features of the course are a problem-solving approach in the first year, and a range of electives on selected aspects of social work in the final two years.

Field Education

An integral aspect of the course is organised learning in the field and this is a basic requirement for the professional recognition of the degree. In the field education subjects, a field instructor, usually in a social welfare agency, is responsible for a student learning to apply the principles of professional practice in an actual practice setting. From halfway through Year 2, a total of 161 seven-hour days are taken up in this way. Thirty-four of these days are scheduled during academic recess periods. A student's three field education placements are in more than one type of practice setting. The settings vary and can include medical, psychiatric, community health, community, family and child welfare, services to disabled groups, services to the aged, services to migrants, income security, and corrective services. Non-government social welfare agencies and agencies at all levels of government are utilised. For some students, their third field education placement may be located outside the Sydney metropolitan area.

The widening range of social work tasks and roles means that a variety of people are suited for social work practice. However, all forms of professional social work require interpersonal skills, a disciplined mind, and adherence to the profession's community service ethic, and social work often involves working with people and organisations under stress and in situations where there is conflict.

Admission to the Course

Entry to the course is on a competitive basis. A small number of students may be admitted to Year 2 of the course if they have completed at least three full Year 1 BA degree course subjects, or their equivalent, including Sociology and Psychology at a level approved by the Faculty's Admissions Committee. These students may be permitted to undertake SOCW8194 Social Work Practice 1: Bridging as a 4 hour per week Session 1 subject in Year 2.

The following indicates the principles on which the School of Social Work accredits other qualifications against its program. These are endorsed by the Australian Association of Social Workers (AASW), the national professional body which accredits our course:

- for candidates having completed two years of a three year Australian Social Welfare degree program, or holding a completed three year Australian Social Welfare degree, and admitted to a four year Social Work degree program, credit will be granted at a minimum of 25%, and normally in the range of 25–50%, of that degree program;
- for candidates having completed one year of a three year Australian Social Welfare degree program and admitted to a four year Social Work degree program, a credit of up to 25% of that degree program;
- for candidates transferring between four years Australian Social Work degree programs, full equivalent credit for comparable subjects (given differences in course structures between universities, year-by-year equivalence is not guaranteed);
- the amount of credit for overseas qualifications will be given on a case by case basis.

Progression

Except with the permission of the Head of School, students may not proceed to the next year of the course until they have fulfilled all the requirements of the previous year.
General Education Requirement

General Education electives totaling 30 credit points must be taken from the General Education program. See the entry headed 'General Education Program' at the front of this Handbook.

Honours

Students will be invited into the Honours program on the basis of the weighted average of the marks they have attained in the subjects in the first five sessions of the Social Work program.

The Honours program begins in Session 2 of the third year of the Social Work curriculum. It consists of two modules, Honours Strand A (SOCW8396) and Honours Strand B (SOCW8496) and an Honours Thesis (SOCW8495). Each of the modules must be completed at a credit level (minimum). Students in the program must maintain a high credit average in all other graded subjects. Having met these criteria, students will take the Thesis, which will be a work of 10,000 – 12,000 words.

Where the Thesis is awarded a grade of Credit or above, the student will graduate with the appropriate class of Honours.

The classes and divisions of Honours are: Class 1; Class 2, Division 1; Class 2, Division 2

SOCW8193 Social Work Practice 1
Staff Contacts: Karen Heycox, Christine Gibson
CP30 FL1 T3

Introduces a number of core themes, practice skills and contemporary issues in social work. Four current practice contexts are used to exemplify the range of knowledge needed for effective social work practice, and to develop an understanding of the diversity of professional interventions.
SOCW8194
Social Work Practice 1 – Bridging
Staff Contacts: Karen Heycox, Christine Gibson
CP20 S1 L1 T3
Introduces a number of core themes, practice skills and contemporary issues in social work. Current practice contexts are used to exemplify the range of knowledge needed for effective social work practice, and to develop an understanding of the diversity of professional interventions. Taken by students with advanced entry or who are enrolled in the SW/Law Degree.

SOCW8203
Human Behaviour 1 – Individual Differences
Staff Contact: Carmen Moran
CP20 F S1 L2 T1, S2 L1 T1
Prerequisite: PSYC1002 or equivalent
The subject takes a biopsychosocial perspective on individual differences in the private and social world. Major theories of human behaviour and development are presented and evaluated for the information they provide on individual differences that influence thoughts, feelings and behaviours. Topics include development across the lifespan, personality, the self, attitudes, persuasion, aggression, stress, affiliation, prosocial behaviour, and behaviour in groups.

SOCW8232
Research Methods 1
Staff Contact: Carmen Moran
CP10 S2 L1 T1
General introduction to the characteristics of scientific method, the research process, research terminology, and types of research. Sampling, review of descriptive statistics, hypothesis testing using one or more samples. Introduces multiple comparison procedures.

SOCW8255
Society, Politics and Culture
Staff Contact: Michael Wearing
CP25 F S1 L2 T2, S2 L1 T1
Prerequisite: 30 credit points of approved Level 1 Sociology
Explores the nature of society and the interplay of structures and culture especially in the Australian context. Further develops the study of social and political theories related to social work. Considers major contested areas to enable students to identify crucial factors in distribution of resources, status and power in the historical and contemporary contexts in Australia and globally. Provides a basis for the study of social policy and the context of practice.

SOCW8291
Social Work Practice 2
Staff Contact: Richard Roberts
CP30 F S1 L1 T2, S2 L1 T3
Prerequisites: SOCW8193 or equivalent; 30 credit points of approved Level 1 Sociology

There are three components to the subject: (i) workshops to develop skills in basic communication in a range of social work contexts, and basic social work interviewing skills focusing on the beginning and ending stages; (ii) conceptual frameworks for understanding social work practice and multidimensional assessment in social work practice; (iii) various models of community work are located and analysed in the contemporary social policy and economic context; selected skills in neighbourhood work, local research, communication, campaigning and meeting procedure are pursued; community work is critiqued within wider welfare practice, in particular issues of power and powerlessness that affect marginalised communities.

SOCW8303
Human Behaviour 2: Physical and Psychological Health
Staff Contact: Elizabeth Fernandez
CP20 F L2 T1
Prerequisite: SOCW8203
Corequisite: SOCW8395
This subject sustains the biopsychosocial perspective adopted in SOCW8203 Human Behaviour 1 – Individual Differences and further explores its utility in illuminating variations in physical and mental health, people’s experiences of illness and outcomes of care they receive. Contributions from medicine, psychology, sociology and social work are used to examine a range of topics: conceptualisations of the body, interaction of body and mind, coping and adaptation, social patterning of health and illness (based on age, sex, class and culture), specific illness conditions, disability, and a range of medico-social issues. Psychological perspectives including psychodynamic, cognitive, behaviourist and humanist approaches, and sociological paradigms drawn from structuralist and interactionist perspectives provide the theoretical frameworks for analysis of these diverse areas of human behaviour.

SOCW8331
Research Methods 2
Staff Contact: Michael Wearing
CP15 S1 L1 T2
Prerequisites: SOCW8232; SOCW8255

SOCW8355
Social Policy 1
Staff Contact: Eileen Baldry
CP20 S2 L2 T1
Prerequisites: SOCW8255; SOCW8291
Builds on the historical, ideological, political and economic background to understanding social arrangements covered in Society, Politics & Culture. Policy analysis frameworks are introduced along with perspectives from various policy theorists and analysts. These are applied in the detailed
discussion and analyses of major policies in policy domains such as health, housing, urban and regional, finance, transport and criminal justice. Comparative policy studies are used in various of these critical analyses.

SOCW8356
Socio-Legal Practice in Social Work Settings
Staff Contact: Christine Gibson
CP20 S2 L1 T1
Explores the legal, professional and ethical opportunities and constraints of social work practice. It includes a consideration of the tensions and dilemmas of socio-legal practice through an examination of social work interventions in selected settings. Attention is paid to legal systems, legal concepts, lawmaking processes, sources of legal assistance and interactions between social workers and lawyers.

SOCW8395
Social Work Practice 3
Staff Contact: Diane Barnes
CP25 F S1 T4, S2 T2
Prerequisite: SOCW8291
Corequisite: SOCW8303
Session 1 provides specialised knowledge needed for social work intervention at the personal level. The two separate but clearly related components are (i) direct practice with individual cases, and (ii) use of the group as a vehicle for change. In both components, the phases of the change process (beginning, middle, end) are addressed, with major emphasis being placed on experiential learning and skills development in addition to theoretical/conceptual understanding. In Session 2, students select one option from a range of elective modules each of which focus on a selected aspect or method of social work practice (e.g., practice in a functional social welfare field like health, legal settings, child and family welfare; in relation to particular population groups such as children, migrants; or specific methods of practice such as family therapy, community work).

SOCW8396
Honours Strand A
Staff Contact: Michael Wearing
CP15 S2 T2
Note/s: Honours Program fully outlined in 'Honours' section under Bachelor of Social Work.
Critical examination of examples of current research in social policy, social work and conjoint fields of scholarship. Advanced consideration is given to the philosophical, theoretical, methodological and practical components of scholarly endeavour. In addition to seminar presentations by researchers, there are instructional sessions which focus on the conceptual, theoretical, and procedural issues arising from the research reviews and research methodology.

SOCW8443
Social Philosophy
Staff Contact: Damian Grace
CP15 S1 L1 T2
Introduces students to the basics of moral philosophy in the first part of the subject and builds upon this in dealing with political philosophy in the second part. Begins with moral theory and moral reasoning and these topics introduce students to some of the central thinkers and the doctrines which have shaped modern understandings of ethics. The ethics of Aristotle, Hume, Kant and Mill are complemented by the work of modern philosophers such as Anscombe, MacIntyre and Baier. Political philosophy begins with a discussion of Hobbes and contrasts his theory with that of Aristotle. Then follow discussions of power, authority, legitimacy, rights and justice in a liberal democracy. Modern philosophers treated include Rawls, Nossick and Finnis.

SOCW8455
Social Policy 2
Staff Contact: Eileen Baldry
CP20 S1 L2 T1.5
Prerequisite: SOCW8355
Building on Society, Politics and Culture and Social Policy 1, this subject introduces students to the social policy processes of formulation, implementation and evaluation. It also covers other more detailed policy analysis frameworks than those presented in Social Policy 1. Processes and elements of the policy analysis framework are utilised to closely examine some social policy domains (e.g., social security, education, employment) as well as the impact of several policies on the patterns of welfare experienced by people within major population groupings (e.g., immigrants, the aged).

SOCW8492
Social Work Practice 4
Staff Contact: Barbara Ferguson
CP30 S1 T4
Prerequisites: SOCW8395; SOCW8381
Students undertake a 2 hour per week segment on social administration in which they are given an introductory overview of management and skills which will inform and guide their participation in subsequent employment whether or not they become administrators. It considers the values, knowledge and skills involved in the design, management, and evaluation of the human service organisations. In the remaining two hours per week students undertake one additional practice elective to complement that taken in SOCW8395.
Honours

SOCW8495
Honours Thesis
Staff Contact: To be advised
CP25 S2 Individual supervision + 6 hours seminars
Prerequisites: Honours Strand A (SOCW8396) and Honours Strand B (SOCW8496), minimum mark of 65 for each of Honours Strand A and Honours Strand B.
High credit average in all graded subjects in the BSW program.
Students work individually on their thesis on a topic acceptable to the Subject Coordinator, attend two 'work-in-progress' workshops and consult with appointed supervisors. The completion of this subject is the submission of an acceptable honours thesis of 10,000-12,000 words at the end of the final year. Students who complete the thesis with a grade of credit or above will graduate with the appropriate classification of honours.

SOCW8496
Honours Strand B
Staff Contact: Carmen Moran
CP15 S1 T2
In addition to workshops on thesis writing, theoretical and methodological issues, the main emphasis in this subject is upon students' development and presentation of work related to their theses.

Field Education

Each student undertakes three placements in the BSW Degree Course. These placements are designed to develop knowledge and skills in different social work methods and to enable students to gain a critical understanding of the values and principles of social work at different levels of intervention. The aim is to provide experience in a range of settings and assist in the integration of theory and development of appropriate professional behaviours.
Each placement involves a student being assigned to a field teacher in a social welfare agency for a particular period of time. During this time the student will undertake work considered appropriate by the agency and university. The university provides expectations and guidelines which are the basis for planning and evaluation of performance.

SOCW8282
Social Work Practice – First Placement
Staff Contact: Karen Heycox
CP15 S2
Prerequisite: SOCW8193
Corequisite: SOCW8291
First placement is located in a wide range of settings. Basic skills and responsibilities of practice and a beginning understanding of working in a welfare organisation are emphasised. This placement occurs in Session II of year 2. Commences in the mid year break with a three week block, then two days per week in Session II and is undertaken concurrently with classroom work (41 days July–October).

SOCW8381
Social Work Practice – Second Placement
Staff Contact: Elizabeth Fernandez
CP30 S1
Prerequisite: SOCW8282
Corequisite: SOCW8395
The focus in this placement will depend on what students have learned in First placement and what they intend to do in Third placement. The placement may be used to develop new areas of knowledge and skill in direct service such as case work and/or group work or, indirect service such as research, community work, and policy/planning. This placement occurs in Session I of year 3. It commences with a four week block during the long vacation and continues for three days per week in Session I and is undertaken concurrently with classroom work (55 days, February–June).

SOCW8481
Social Work Practice – Third Placement
Staff Contact: Lesley Hughes
CP65 S2
Prerequisites: SOCW8492; SOCW8381
Third placement is available in a variety of settings. Placements which are relevant to students' Social Work Practice Electives, and which help prepare them for their future career in Social Work, are offered. This is a 65 day full time placement. It commences in week 1 of Session II of year 4 and ends in week 12 of that Session. The placement includes a university based seminar series. Students are encouraged to undertake placements in regional cities and rural areas of NSW.

Sociology

The School of Sociology offers a broad and diverse program where students may choose subjects in sociology, social anthropology, cultural studies, cultural theory, sociological approaches to communication and policy-related studies. The wide diversity of subjects offered by the School is evident in the description of subjects available in 1998 and 1999.
The School provides two major sequences available to students entering second year in 1999. Either sequence can form a significant part of a Bachelor of Arts or Social Science degree.
An honours degree requires a further year of study after completing the requirements for a pass BA or BSocSc. Honours year students concentrate on research and writing in a specific field of inquiry. Sociology subjects which are offered by the two departments within the School are distinguished by the
first four letters of the subject identifier. Subjects carrying the prefix SOCC are offered by the Department of Sociology, Culture and Communication. Subjects with the prefix SOCI are offered by the Department of Sociology and Social Anthropology.

**Level 1**

First year students must take one first year subject from each of those offered by each department; that is one subject must have a SOCI prefix and the other a SOCC prefix. From 1999 onwards Second Year students must make a choice between the two major sequences.

In first year there are seven introductory sociology subjects from which to make your choice of two, one from each sequence (identified by the prefix SOCI or SOCC).

**Session 1**
- SOCC1231  Introduction to Sociology: Everyday Life
- SOCI11131 Society and the Individual: Basic Concepts

**Session 2**
- SOCC1161  Sexuality
- SOCC1531  Australian Media: Institutions and Representations
- SOCI1232  Australian Society
- SOCI1301  Discovering Anthropology: The Hitchhiker’s Guide

**Summer Session**
- SOCI1831  Australian Giants: Organisations & Society

Administrative inquiries about subjects listed above should be directed to the relevant department.

**Major Sequence**

A major in Sociology comprises two first year subjects as above (30 level 1 credit points) and five upper-level subjects (75 credit points). For students commencing their major sequence in the School of Sociology in First Year 1998, four of those five upper level subjects come from one major sequence and one from subjects contained in the other major sequence; i.e. four SOCI subjects plus one SOCC or four SOCC subjects and one SOCI.

Students who wish to undertake further studies in Sociology may take up to seven upper level sociology subjects (105 upper level credit points).

Except where prerequisites are prescribed, upper level subjects can be taken in any order in both sequences. Each subject is complete and distinct, but particular groupings of subjects may allow students to concentrate on specific areas to suit vocational and/or personal interest.

**Part-time (Evening) Study**

Part-time and evening students are advised that the School teaches selected first year and upper level subjects in the evening. It is possible to complete a major in sociology by attending evening classes.

**Honours Entry**

Students who are achieving good grades are encouraged to plan a four year program leading to an honours degree in sociology. Honours students will have undertaken a more concentrated program in sociology in years two and three. Prior to enrolment in the honours year students will have completed seven upper level subjects in Sociology and have achieved a minimum cumulative average of 70 per cent.

The last year of an honours program in Sociology emphasises the development of research and writing skills and allows a student to achieve greater expertise prior to entering on a career or proceeding to postgraduate research studies.

Sociology students should consult with any of their lecturers during second year of enrolment about the honours year and the subjects to be taken in preparation for that enrolment.

Honours students must choose between the SOCC and SOCI Honours programs. Each program has its own expectation of appropriate preparation for honours. So prospective honours students should design their major accordingly.

For more information, consult the 1998 School Handbook.

**Combined Honours Entry**

Requires 120 credit points, including 30 level 1 credit points, in Sociology at an average of good credit grade or better and the requisite number of credit points at a standard set by the other School in the combined honours program.

**Sociological Society**

The Sociological Society was set up to provide activities educational and social for students enrolled in Sociology. It gives the opportunity for students of different years and staff within the School to meet informally and through activities such as regular meetings, film showings and seminars a propitious and friendly environment is fostered between students and staff.

All students studying with the School of Sociology are automatically members. Address any enquiries to the Sociological Society, School of Sociology, UNSW Sydney NSW 2052.

**Level 1 Subjects**

**Note:** Subjects taught by the Department of Sociology, Culture and Communication start with the prefix SOCC and subjects taught by the Department of Sociology and Social Anthropology start with the prefix SOCI.
Session 1

SOCC1231
Introduction to Sociology: Everyday Life
Staff Contact: Ann Game, Andrew Metcalfe
CP15 S1 HPW3
Note/s: Excluded SOCI1230.

Sociology can make our senses sharper, our passions more knowing and our knowledges more passionate, critical and rigorous. This subject is organised around a range of sociological accounts of everyday life, offering an introduction to sociology and the work of the most famous sociologists at the same time as it teaches students how to test these ideas through an analysis of their own experiences. This dialogue between theory and experience makes ideas come to life while enriching 'ordinary' life with surprise and wonder. Among the theorists are Benjamin, Simmel, Durkheim, Freud, Bachelard, Mead, Barthes, Clement, Sartre, Eliade, Goffman, Bergson.

SOCl1131
Society and the Individual: Basic Concepts
Staff Contact: Clive Kessler
CP15 S1 HPW3

The study of social conditions which shape people's lives and outlook. This includes the analysis of our own immediate social environment as well as the broad field of global forces which impinge on us. Issues covered include culture, social change, power, inequality, work, consumerism and global communications; the relevance of sociological concepts to these issues is examined.

Session 2

SOCC1161
Sexuality
Staff Contact: David Halperin
CP15 S2 HPW3
Note/s: Excluded WOMS1002.

Sexuality examines the historical emergence and cultural construction of 'sexuality' as a category of human thought and experience. How did sexuality come to constitute the innermost truth of the human individual, the core of personal life, the object of social control and governmental regulation? What are the practical consequences of organising our lives and institutions around the notion of sexuality? Emphasis will fall not on the natural 'truths' about sex but on the social meanings attached to it in different cultural contexts.

SOCC1531
Australian Media: Institutions and Representations
Staff Contact: Diana Olsberg
CP15 S2 HPW3

Investigates the role of the media in everyday life and in the construction of us as subjects of Australian society. This subject focuses exclusively on visual forms (television, cinema and advertising) and their specific mediations and representations of the social. By drawing on the work of key social theorists such as Benjamin, de Certeau, Schivelbusch, Barthes, Foucault and Anderson, questions about time, space and movement, the production of meaning, viewing practices, policy discourse and the politics of representation will be explored.

SOCl1232
Australian Society
Staff Contact: Michael Pusey
CP15 S2 HPW3

A basic description and analysis of Australian society. Provides an introduction to sociology and shows how identities and biographies are socially constructed. Topics include: the social impact of age, gender, race and ethnicity on family life; changing families, experience of schooling, friendship intimacy, need and subcultural lifestyles; work, unemployment, leisure, consumption, communities, suburbs, status, class and power.

SOCl301
Discovering Anthropology: The Hitchhiker's Guide
Staff Contact: Grant McCall
CP15 S2 HPW3

An introduction to anthropology. Human origins and the biological basis of being human; linguistics and human language capacity; culture and human experience in archaeology and early history; ethnography and fieldwork; applied anthropology. Explores anthropology's relationship with the other social sciences: their influence upon and their integration within general anthropology as a modern form of human self-understanding.

SOCl831
Australian Giants: Organisations & Society
Staff Contact: Frances Lovejoy
CP15 X1 HPW3

Explores Australia's cultural, economic, social and political landscape to identify and examine those large institutions whose effects on national life and the lives of individuals are profound and extensive. The focus is on the institutions of law, education, health and policy in the public sector and on national and international corporations in the private sector. These issues are explored in the context of Australia's place in the Asia-Pacific region and the force of global communications technology and power to detail the impacts of large organisations on our private lives and social worlds.
Department of Sociology, Culture and Communication

Upper Level Subjects

SOCC2201
Society and Desire
Staff Contact: Vicki Kirby
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
The subject of desire is an especially curious one because it makes us think about the nature of the human condition in its broadest terms. The perception of difference is an erotic process through which we are forged as bodily beings whose very identities are constantly shifting. Explores how our sense of self emerges through a relationship to others.

SOCC2202
Metaphor and Cultural Analysis
Staff Contact: Ann Game
Prerequisite: 30 credit points in Level 1 Sociology

Note/s: Excluded SOCC3595. Subject not offered in 1998.

SOCC2302
Globalisation and Fragmentation
Staff Contact: Michael Humphrey
C15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology

Note/s: Excluded SOCC3596.

Central to the concept of globalisation is the idea of the expansion and development of global capital and the ascendancy of transnational over national forms of economy, society, politics and culture. Globalisation is transforming the character of social boundaries and attachments. Individuals, families, and communities are no longer enclosed in the same way by geography or social worlds. People have become more internationally mobile and so have corporations and whole industries. Global cultures have emerged based on mass communication, media and consumer goods. The subject draws on the work of Appadurai, Friedman, Tilly, Taylor and Hall to explore concepts such as: identity, borders, migration, global communication, global culture, place and displacement, organisation, disorganisation (chaos), sociality and futures.

SOCC2400
Lesbian and Gay Studies
Staff Contact: David Halperin
CP15 S1 HPW3
Prerequisite: 90 Level 1 credit points in Arts

Note/s: Excluded WOMS2400.

An introduction to the interdisciplinary field of lesbian/gay studies. Takes sexuality as a central category of analysis for the study of culture and explores gay-affirmative modes of inquiring into the politics and pleasures of sex. Traces the historical and cultural constitution of sexuality and explores the connections between sex and identity in different times and places. Focuses on issues of contemporary interest to lesbians and gay men, and draws on materials from lesbian and gay popular culture – such as cartoons, music, memoirs, and political polemics – as well as scholarly and critical writings by academic specialists. Particular emphasis on the conceptual problems of defining sexuality, the functioning of sexual norms, the institutions of heterosexuality, the policing of identity and desire, and the creation of strategies of resistance.

SOCC2401
Queer Theory
Staff Contact: David Halperin
CP15 S1 HPW3
Prerequisite: 90 Level 1 credit points in Arts

Note/s: Subject not offered in 1998.

SOCC2501
Embodiment
Staff Contact: Head of Department
C15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology

We are lived bodies inhabiting a world. This subject addresses a range of themes which emerge when we reflect upon ourselves in this way: I am a body; yet I have a body; my body is always in communication with a world; I am both sentient and sensible; I am both bounded and open. Consideration of such themes requires an investigation of theoretical constructs of the social and cultural formations of embodied subjectivity, the relations of consciousness and flesh, habit and inhabitation, the significance of body image, relationality and emotions. Major theorists include Merleau-Ponty, Foucault, Douglas, Turner, Bachelard and Lingis. Case studies such as reproduction, sacred and profane bodies, bodybuilding and anorexia, dissociation and disembodiment, illness, will be used to enable students to reflect upon their own embodied experience, to examine critically everyday and theoretical assumptions, and to develop skills in qualitative analysis.

SOCC2602
Professions: Discipline, Knowledge, Power
Staff Contact: Ann Daniel
CP15 S2 PHW3
Prerequisite: 30 credit points in Level 1 Sociology

Note/s: Subject not offered in 1998.

SOCC2604
Sociology of Economic Life
Staff Contact: Diana Olberg
C15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology

Note/s: Subject not offered in 1998.
SOCC2702
Travel
Staff Contact: Nikos Papastergiadis
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Modern life is increasingly defined by mobility. People, goods, and ideas travel across greater distances and with increasing speed. Has this movement given people greater access to knowledge and space? Are there new barriers and obstacles which limit flow and circulation? Maps the movements and the different paths that are available for migrants, refugees and tourists. The routes of these people and the rootlessness of modern life are explored as a common phenomenon. From this perspective the idea of travel will be seen as a metaphor for rethinking identity and culture.

SOCC2703
Cities
Staff Contact: Nikos Papastergiadis
CP15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Explores the tension between movement and settlement that is characteristic of city life. It focuses on the rapid expansions and contractions of modern cities as they entered the phases of industrialisation and post-industrialisation. It then addresses the phenomena of globalisation of urban culture, the issues of 'living with difference' in the form of race and gender as well as the new techniques of conviviality and surveillance in modern communities. Particular attention will be given to the diverse uses of the camera technology in the representation and regulation of city life.

SOCC2705
Childhood: Culture/Psychoanalytic Theory
CP15 S2 HPW3
Staff Contact: Andrew Metcalfe, Ann Game
Prerequisite: 30 credit points in Level 1 Sociology
Note/s: Excluded SOCC3705. Subject offered in 1999.

SOCC2731
Australian Working Lives
Staff Contact: Diana Olsberg
CP15 S1 HPW3
Note/s: Excluded SOCC1731. Subject not offered in 1998.

SOCC3203
Living and Dying
Staff Contact: Head of Department
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Note/s: Excluded SOCC2203.

Is death the ultimate, immutable other, the incomprehensible and unspeakable limit of existence? Or is death not also integral to life, a condition for life, experienced as impermanence, absence and lack or a creative impulse? This subject investigates the complex and ambiguous relations of life and death by examining different responses to death: how death is managed or exorcised, sought, denied or transcended. Includes discussions of love, ecstasy, grief, sex, laughter, generationality, religion and science. Theoretical perspectives include phenomenology, psychoanalysis, poststructuralism, sociological and anthropological analyses of the social processes surrounding death, and a comparative approach influenced by Buddhist philosophy. Sources include Plato, Eckhart, Freud, Merleau-Ponty, Jung, Winnicott, Levin, Clement, Loy, Abraham and Torok, Rilke, Joyce, Berger.

SOCC3204
Creativity and Knowledge
Staff Contact: Andrew Metcalfe, Ann Game
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Note/s: Excluded SOCC2204.

Brings two elements into conjunction: discussion of the everyday practical skills of 'doing sociology', and discussion of philosophical issues about different approaches to sociology and knowledge. Aims to improve students' analytical skills by making them more aware of the specific qualities of the tools through which academic knowledges are produced. By scrutinising mediations that are normally invisible, the subject emphasises the full-bodied desires – the passions – involved in the generation of knowledges, and uses this awareness to develop rigorous, creative and joyous approaches to sociological analysis. Uses texts by Serres, Barthes, Winnicott, Merleau-Ponty, Blanchot, Cixous, Borges, Plato, Simmel, Irigaray, Steiner and James.

SOCC3205
Word, Spirit and Flesh
Staff Contact: Head of Department
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
This subject is concerned with the life of myth: with the relation between sacred texts and the lived experience of the divine, with the relations between sacred stories, general 'cultures' and mundane life, and with the engagement of the sacred and profane. The authoritative texts chosen as the basis for this exploration are the old and new testaments of the Bible. Stories and concepts from the Bible commonly order and animate lived cultures in contemporary Australia, whether or not people espouse a religion, whether or not they've read the book. Examines the role in ordinary life of a range of key Biblical stories and themes, involving concepts like sacrifice, passion, incarnation, revelation, judgement, apocalypse, communion, grace and redemption. Draws on a wide range of social theorists, including Durkheim, Nietzsche, Bataille, Derrida, Irigaray and Levinas.

SOCC3303
The Space of Terror
Staff Contact: Michael Humphrey
CP15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Note/s: Excluded SOCC2303.
Violence is historically an integral part of social and political processes even though it is often constructed as deviant and from the 'darkside'. Explores contemporary political violence and its relationship to social space, self and community. Looks at the role of violence in defining identity and self. Focuses on contemporary civil wars and ethnic and religious violence. Explores themes such as massacre, 'ethnic cleansing', and martyrdom as ways in which individual death is given collective meaning in the context of the crisis of the nation-state. Explores concepts such as the abject, torture, war, terrorism, trauma, testimony, witnessing, reconciliation and post-violence worlds. Draws on the work of Scarry, Kristeva, Felman, Nordstrom, Massumi, Foucault, Zulaika and Taussig.

SOCC3500
Post-Human Subjects
Staff Contact: Vicki Kirby
CP15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Note/s: Excluded SOCC2500.

The difference between human and machine, or flesh and information, has become increasingly ambiguous in recent years. Many of our assumptions about the limits of human- ness have been challenged by such things as virtual surgery, cybersex and the interventions of reproductive technologies. Investigates the relationship between the biological or physical realities of matter and the cultural representations that are thought to overlay or interpret it. We will explore the nature of the interface between human and machine, reality and representation, body and mind, and Nature and Culture. What is a body? Where does thinking happen? Is the machine a thinking being? How are the markers of human identity (sexual, cultural) made fragile through such reconsiderations? A wide range of social theorists will be consulted, including Serres, Simondon, de Landa, Haraway, Sagan and Margulis.

SOCC3601
Discipline of the Law

SOCC3701
Representations of Aboriginality
Staff Contact: Head of Department
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
Note/s: Excluded SOCC3701.

Explores the representations of Aboriginality in the cultural landscape of Australia. It looks at the historical shift in the representations of the Aboriginal Other from savage and outcast to political and spiritual icon. The subject explores spatiality and identity through the embodiment of culture in the 'natural' world (animal and physical) and cultural artifacts (art, ritual). It looks at the historical (colonial) question of repression and silence and its social and cultural legacies for representation. The internalisation of indigenous consciousness and the use of popular cultural forms (music and video) as vehicles for new representations are also explored.

SOCC3704
Taste and Value
Staff Contact: Gay Hawkins
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology

The play of value is everywhere and inescapable. In the desire for a sense of well-being and the preference for the good and the pleasurable, we experience the necessity of and the imperative to value. In the ordering and enjoyment of everything from our clothes, rooms, meals, lovers we are valuing; making choices, distinctions, practical criticisms and judgements that not only classify the world but also ourselves. This subject is thus about formations of value, ethics, self-discipline, status and identity. Some of the specific areas to be considered include the sense of taste; the intersections between ethical and aesthetic values; ressentiment, distinction and pleasure; cultural theory and metaphors of economy, consumption, commodification and circulation.

SOCC3714
Media, Culture, Policy
Staff Contact: Gay Hawkins
CP15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology

Investigates the histories, processes and politics of media and cultural policy formation in Australia. The aim is to understand how policy operates within the broad fields of cultural production, distribution and consumption. Methods for analysing the policy process will be investigated with a particular emphasis on Michel Foucault's concepts of governmentality, discourse, power, and technologies of the self. Case studies in media and cultural policy will be drawn from the arts, broadcasting, film, museums and new media technologies.

The Experience of the City in Modern Europe
Staff Contact: John Mulfull (MB G64)
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts

The new metropolises which were the motor and focus of European modernisation exposed masses of people to a profound change, not only in their way of life, but in their perceptions of reality. This subject focuses on 1) the urbanisation of Europe since the 18th century, with particular reference to London, Paris and Berlin; 2) its social and psychological consequences, extending into the present, and 3) representations of life in the 'big city' in literature and the visual arts.

The contribution of 'Jewish Germans' to the social, political and cultural life of Germany and Austria from 1900 to 1933. The impact of attempted integration as reflected in the work of Herzl, Schnitzler, Kafka, Buber, Feuchtwanger, Scholem and others; the failure of the German-Jewish 'symbiosis' as a basis for discussion of the concepts of assimilation, acculturation, ethnicity, identity and nationality.

The Attractions of Fascism
Staff Contact: John Mulfull (MB G64)

An attempt to explain, through the study of documents, literary texts and film, the attractions of Fascism for broad sectors of European society without whose support and tolerance it could never have retained power, and the implications for our understanding of our own society.

Research in Sociology
Staff Contact: Ann Daniel
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology or special permission

Students taking this subject will learn about the many ways which sociologists take to explore our social world. The subject begins with a series of lectures and seminars about theory and its integration with method-discovery, analysis and understanding. In the course of these explorations...
students will select and plan a research project. Students can expect to work in small supervised research teams on a feasible topic of their choice and to present a report in a one-day conference in Week 14.

**Fear and Hatred in Everyday Life**  
*Staff Contact: Mira Crouch*  
CP15 S1 HPW3  
*Prerequisite:* 90 Level 1 credit points in Arts  
The subject focuses on acts of social aggression that range from vandalism to group terrorist activities—all ubiquitous features of contemporary urban settings world-wide. Students will explore accounts of such destructive actions and seek ways of analysing them through critical studies of a broad range of works on society, human nature and modern civilisation, selecting from, for example, psychoanalysis, sociobiology, and theories of ‘modernity’. Lecture/seminars and workshops alternate throughout the session.

**SOCI2607**  
**Food, Body and Soul: Magic and Myth for Modern Times**  
*Staff Contact: Mira Crouch*  
CP15 S2 HPW3  
*Prerequisite:* 90 Level 1 credit points in Arts  
Eating is a basic individual and social activity. Food and the way we consume it signify our beliefs concerning health, happiness and human relationships. The subject examines attitudes and practices relevant to food and eating, seeking to uncover their submerged meanings which often connect eating with our hopes, fears and morals. Readings in sociology and anthropology as well as from history and related fields are employed to support analyses of eating habits and beliefs. In student research exercises, information will be drawn from interviews and media material.

**SOCI2701**  
**Culture: The Burdens of Modernity**  
*Staff Contact: Clive Kessler*  
CP15 S2 HPW3

**Media and the Public Sphere**  
*Staff Contact: Paul Jones*  
CP15 S2 HPW3  
*Prerequisite:* 30 credit points in Level 1 Sociology or special permission  
Introduces sociological debates concerning the news media and public policy-making, including especially communications policy. **SOCI3405**  
**Deviant Fieldwork, Data Collection and Analysis**  
*Staff Contact: Frances Lovejoy*  
CP15 X2 HPW3  
*Prerequisite:* 30 credit points in Level 1 Sociology  
Aims to give students specific technical skills in data collection and analysis. Research into sociology of deviance provides particularly interesting methodological problems: How can the subjects be located? Does such research constitute an invasion of privacy? Is it ethical? Will the subjects tell the researcher ‘the truth’? How can such information be verified? and so on.

**SOCI3407**  
**Evaluating Solutions to Social Problems**  
*Staff Contact: Frances Lovejoy*  
CP15 S1 HPW3  
*Prerequisite:* 30 credit points in Level 1 Sociology  
This is a practically oriented subject which will be of particular interest to students intending to work for government or non-profit-based organisations such as welfare service providers, environmental pressure groups, etc. Evaluation techniques enable goals to be formally stated and outcomes evaluated for a wide variety of social programs and funding for social innovations and ongoing programs is increasingly tied to the evaluation process. Students will meet representatives of some groups who have recently used an evaluation, conduct a groups evaluation project, and prepare an individual evaluation on a program, object or organisation.

Staff Contact: Maria Markus
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology or special permission

SOCl3504
Social Power: Theories and Structures

Economic ‘Rationalism’ and Public Policy
Staff Contact: Michael Pusey
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Subject formerly titled State Bureaucracy and Higher Administration.
How does economic change shape our lives? What are its effects on identities, cultures, power structures, and the ‘quality of life’? How do ‘economic rationalism’ and managerialism impact on public policy, higher administration and government? These questions are pursued through topics that include globalisation and the ‘crisis of the state’, the future of the ‘public sphere’ and the public sector, women and the labour market, privatisation, corporatisation, ideology and power, economic journalism and the role of intellectuals in contemporary societies.

SOCl3506
Nationalism, Citizenship and Cultural Identity
Staff Contact: Maria Markus
CP15 S1 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Explores different forms of contemporary nationalism, its main sources, various levels of its construction, and its political employment. Investigates the resurgence of nationalism against the background of globalisation and the connected processes of dislocation and relocation. The focus will be placed on the numerous antinomies resulting from these processes, including that between democratic citizenship and formation of collective and individual identities. Finally, the subject will address some of the theoretical perspectives concerning the potential of multiculturalism for the formation of non-exclusive, open identities.

SOCl3507
Quality of Life in Australia

SOCl3508
Risk and Trust in Modern Societies
Staff Contact: Maria Markus
CP15 S2 HPW3
Prerequisite: 30 Level 1 credit points in Sociology or special permission
Detached from local contexts, mechanisms of risk-production are increasingly impersonal. Responsibility for managing risk is assumed by the same powerful agencies that create it, while traditional structures of risk-containment (such as kinship, locality, and religion) are dissolving. This process poses questions about how people cope with risk and about new forms of social solidarity that might support social trust and confidence.

SOCl3602
Investigating the Modern Family
Staff Contact: Head of Department
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology or special permission
Considers key debates about the family, and offers first hand experience of research procedures for investigating the modern family. Issues: what is the distinctive form of the modern family? in what ways has it changed and is it still changing? what is the relation between family forms and the subordination of women? Methods and evidence on which the theories are based are also examined and opportunity for fieldwork is provided.

SOCl3603
Gender, Work and Employment
Staff Contact: Jocelyn Pixley
CP15 S1 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Excluded WOMS2300.
An examination of gender as a central organising principle of work. Specific topics to be explored include the gendered division of work, the distinction between work and employment and the relation between unpaid and paid work, discrimination in employment, the segregation of the labour market between men and women, the sexuality of organisations, and the future of work.

SOCI3604
Medicine and Society
Staff Contact: Mira Crouch
CP15 S1 HPW3
Prerequisite: 30 credit points in Level 1 Sociology
A consideration of health, illness and medicine as social phenomena. Disease patterns are related to cultural meanings of health and illness. Study of the historical context of medicine aids the analysis of its 'modern' forms and of its practical as well as symbolic significance in individuals' lives. The nature of medical knowledge, the power of the profession and the institutions of health care are critically examined. Theoretical understanding is developed through research into specific topics including AIDS, cancer, mental health and TB. The subject program contains a practical research component.

SOCi3607
Social Movements and Society: Current Debates
Staff Contact: Jocelyn Pixley
CP15 S2 HPW3
Prerequisite: 30 credit points in Level 1 Sociology or special permission

Staff Contact: Mira Crouch
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts, including 15 Level 1 credit points in Sociology
The subject explores Freud's writings on civilisation, culture and society. Work is focused on a limited number of texts; close reading of these is the basis for discussion and analysis that constitute work in class. Emphasis is on a critical understanding of Freud's work, particularly concerning its possible relevance to aspects of social life today: warfare, aggression and violence, our attitudes to death, personal and collective anxieties and unease, the psychological roots of our beliefs, the basis for (and the forces against) human sociality.

Topics include religion and sorcery, chieftainship, relations with the environment and how islanders see themselves in their worlds.

SOCI3706
Pacific Development in a Global Context
Staff Contact: Grant McCall
CP15 S2 HPW3
Prerequisite: 90 Level 1 credit points in Arts
Note/s: Excluded GENT1204.
Surveys the immense expanse of the Pacific Ocean and the contemporary peoples and cultures that live on its rim and in its basin, exploring their cultural and theoretical contributions to contemporary social science. Current Debates in Anthropology
Staff Contact: Grant McCall

Spanish and Latin American Studies

Subjects in Spanish and Latin American Studies (within the School of Modern Language Studies) are available in language, literature, film, history and art. Major sequences may be followed in language and literature and/or history. In the case of language, entry to one of three streams depends on whether a student has no knowledge, some knowledge or an advanced knowledge of the Spanish language. Intensive oral and written language work is an essential element for the elementary and intermediate streams and classes for these, as for the advanced stream, are conducted wherever possible in Spanish. Students intending to major in the Spanish language are encouraged to enrol in first year linguistic subjects. A major in Spanish and Latin American history may be completed with no knowledge of Spanish but a reading knowledge of the language is a prerequisite for entry to the Honours year.

The Mundo Latino Society

All students in the Department of Spanish and Latin American Studies (SLAS) are automatically members of the Mundo Latino Society and membership is free. The Society is organised and run by the students of SLAS. All years are represented on the executive committee, which is elected at the Annual General Meeting at the beginning of each academic year.

Notices about Mundo Latino’s activities are posted on noticeboards around the Arts and Social Sciences building. Typical events are wine and cheese parties, dinners at Spanish restaurants and visits to Spanish language films.

The School of Theatre, Film and Dance is concerned with the theoretical and historical study of theatre, film and, to a lesser extent, television as performance arts. It also offers subjects in dance theory, history and practice. Whilst practical work is undertaken in all areas, this is not in order that students achieve proficiency as performers or directors, but in order that they may develop a critical language for the discussion and analysis of theatre, cinema and dance as performance events and reach a fuller appreciation of the production processes in the respective media.

Major Sequence

Students may take a major sequence, which will consist of no fewer than 105 credit points and normally involve two years' Upper Level study, in 1. Theatre, or 2. Film, or 3. Dance. Alternatively they may take a major sequence which will consist of 165 credit points in 4. Theatre/Film, or 5. Theatre/Dance, or 6. Film/Dance.

The following regulations for major sequences do not necessarily apply in their entirety to students who began Upper Level studies prior to Session 1, 1998. In case of doubt, such students should contact the School.

The School also offers a Bachelor of Arts (Dance) Bachelor of Education (BA(Dance)BEd) program.

Bachelor of Arts (Dance) Bachelor of Education

The BA(Dance)BEd program is a specialist double degree in Dance and Dance Education. Although a wide variety of dance careers is open to graduates, the primary focus of the double degree program is to equip graduates to serve as dance teachers in schools and in the community. The program offers extended study in four major areas (plus the General Education program). Dance Practice offers dance styles classes designed to improve and consolidate students' dance skills. Dance Theory is a sequence of mainly theoretical subjects which provide an intellectual rationale for understanding the subject. Dance Education and Education both give dance a pedagogic context as well as introduce students to educational theories. A major sequence in a second subject area from within the Faculty provides students with their second teaching subject.

The program carries 510 credit points and consists of:

It is imperative, however, that they seek the written authorisation of the Head of School prior to making their enrolment.

### Honours Entry

Qualifications for entry to Year 4 are determined by the School. The minimum requirements, however, for BA students proposing to undertake in 1998 a single Honours degree (by Research or Coursework) in Theatre or Film or Dance are that they must have obtained 135 credit points in the School of Theatre, Film and Dance, or 120 credit points for Combined Honours, and have passed all subjects in the School at an average grade of Credit or better for Coursework and at an average of a good Credit grade (70%) or better for Research Honours. This total must include not only those subjects required for one of the three major sequences, but also, in the case of Honours (Research), any additional prerequisites.

BA students proposing to undertake a single or combined Honours degree (by Research or Coursework) in either Theatre/Film or Theatre/Dance or Film/Dance should consult the School prior to making their enrolment.

BA(Dance)BEd students seeking to undertake Dance Honours (by Research or Coursework) must have completed the 510 credit points as prescribed and achieved a minimum average grade of Credit in dance subjects. Major Sequence

A major sequence in Women’s Studies and Gender Studies may only be taken as an additional major sequence together with a home-based major. It requires the completion of 90 credit points in Women’s Studies and Gender Studies approved subjects (listed below), including at least 15 credit points at Level I. Students may take 30 credit points at Level I if they wish.

Level I

WOMS1001
Introduction to Feminism
Staff Contact: Brigitta Olubas (English)
CP15 S1 HPW3

Introduces students to some key areas of feminist thought and to questions of sex and gender. There will be a focus on questions of representation and on differences and conflicts within feminism.

WOMS1002
Sexuality
Staff Contact: David Halperin (Sociology)
CP15 S2 HPW3

Note/s: Excluded SOCC1161.

Examines the historical emergence and cultural construction of ‘sexuality’ as a category of human thought and experience. How did sexuality come to constitute the innermost truth of the human individual, the core of personal life, the object of social control and governmental regulation? What are the practical consequences of organising our lives and institutions around the notion of sexuality? Emphasis will not fall on the natural ‘truths’ about sex but on the social meanings attached to it in different cultural contexts.

The Faculty of Arts and Social Sciences offers two kinds of graduate work leading to the award of the degree of Master of Arts: the MA at Honours level, which is primarily awarded for a written thesis, is intended chiefly for graduates engaged in research; while the MA at Pass level, in which there is more emphasis upon coursework and formal instruction, is intended for graduates who wish to expand and extend their undergraduate knowledge by further intensive training with less emphasis upon original research work.

In the field of Education several qualifications are available at the graduate level in addition to the PhD degree. Both the Master of Education and the Master of Educational Administration at Honours level are intended for those who wish to undertake a research thesis. The Doctor of Education course involves both advanced coursework and a thesis, while the Master of Education and Master of Educational Administration at Pass level involve coursework subjects only. These qualifications are normally undertaken by candidates who already have experience in education and/or training. Those who wish to undertake a pre-service course in teacher education in order to qualify as a secondary school teacher should enrol in the one year, full-time Diploma in Education course after completing an appropriate Bachelor degree.

The Master of Music at Pass level is a coursework degree offering courses in musicology, ethnomusicology and music education. The Master of Music and the Master of Music Education at Honours level are research degrees.

The Master of Policy Studies degree is offered at Pass level by coursework.

For qualified social workers the School of Social Work offers a Master of Social Work by research and a Master of Social Work by formal coursework with specialisations in Couple and Family Therapy, Equity and Social Administration and International Social Development. In addition, for non-social workers, Masters in Couple and Family Therapy, International Social Development and Equity and Social Administration are offered.

Applicants seeking to gain admission to a graduate course of study within the Faculty of Arts and Social Sciences should initially contact the University’s Student Recruitment Office to obtain the appropriate application form.

The Conditions for the Award of Degrees are set out at the end of this section of the handbook.

Optional Subjects

Session One

HIST5233
Modern China: History and Historiography
Staff Contact: Peter Zarrow
CP20 S1 HPW2 T: Th 6–8

Examines the transformation of China since its initial contacts with Western imperial powers, through a critical examination of seminal historical interpretations. Consideration will be given to aspects of traditional Chinese culture and society, peasant revolutions, nationalism, the rise of communism and development since the revolution of 1949. Emphasis will also be given to historiographical differences between so-called Western and non-Western understandings of continuity and change in China.

HIST5235
De/Constructing History – ‘Japan’
Staff Contact: Hélène Bowen Raddeker
CP20 S1 HPW2 T: M 6–8

This subject looks at how history, in this case the history of Japan, has been constructed. We deconstruct the ‘Japan’ of conventional history texts from the points of view of post/structuralist critiques of the discipline and embark on a search for a Japan with a ‘difference’ via readings of different primary texts – eg translated works of literature, including plays, manga and animé (comics and animation), legends and oral histories. The subject would be of interest to those interested in the theory and practise of History, as well as to Asian/Japan studies specialists; it draws on examples, moreover, from histories of both pre-modern and modern Japan.

Cognitive Science
Available: MA; GradDipArts; GradCertArts
Coordinator: Anthony Corones

Master of Arts
Cognitive Science has recently emerged as an exciting and fruitful domain of scientific inquiry in which there has been a convergence of a number of disciplines including artificial intelligence, psychology, philosophy, linguistics and neuroscience. Since the revolutionary developments in these fields during the 1950s and 1960s, there has come to be a broad consensus that the problems of mind, language, knowledge and perception do not belong exclusively to any one discipline, but fall to all of them. This MA program (course 8225, program 1000) has been established with a view to providing a comprehensive perspective on Cognitive Science, in the same interdisciplinary spirit which is characteristic of the field.

Subject Descriptions
All subjects consist of weekly 2-hour seminars, held over a single session (14 weeks). All subjects carry a weighting of 20 credit points.

Environmental Studies

Available: GradCertArts
Coordinator: Paul Brown

This Graduate Certificate in Environmental Policy (course 7325, program 1030, distance mode 1031) is designed for graduates wishing to learn more about the social and political context of environmental policy making and management. It is highly relevant for those already working in these areas of government or the private sector, and for teachers, educational planners and community service Coordinators. Practitioners concerned with the built environment, such as architects and planners, will also benefit from the course.

The rise of modern environmentalism, the concept and interpretation of ecological sustainability, and the assessment and management of technological risk are central concerns for the certificate.

The prescriptions of international treaties reflect the globalisation of pollution problems, yet the action which flows from these prescriptions requires national and local programs. Increasingly, managers and policy makers must respond using their understanding of ecological sustainability, taking account of a broad range of environmental and social issues.

’Sustainable Development’ is characterised quite differently by various constituencies, putting an onus on decision makers to engage with participatory processes in order to reach agreement about how environmental management for sustainability should proceed.

With this in mind, the certificate aims to equip participants to analyse, negotiate and apply practical and scientific knowledge in the social and policy contexts of their professions.

Entry Requirements

The normal qualification for entry is a four year degree, which can be in any discipline. In appropriate cases, relevant professional experience may be accepted in lieu of formal qualifications.

Course Structure

The certificate consists of two subjects taken in order: SCTS5315 Society, Environmental Policy and Sustainability, and SCTS5316 Environmental and Technological Risk Controversies.

Duration

Classes two hours per week over two fourteen week sessions, in the timeslot 5.30–7.30.

SCTS5315

Society, Environmental Policy and Sustainability
Staff Contact: Paul Brown
CP20 S1 HPW2

Examines the principles of sustainable development in the social, historical and political context within which they’ve been devised, and their application in different spheres and programs of government, industry, institutions, and community groups. Students will engage with the social and historical context of modern environmentalism, science and the environment, the precautionary approach, sustainability and the built environment, and the international agreements and national commitments to ecologically sustainable development. As an outcome, participants will gain practical insights into key environmental issues and the capacity to apply this knowledge to policy making and management problems, and to problems arising in planning and design.

SCTS5316

Environmental and Technological Risk Controversies
Staff Contact: Paul Brown
CP20 S2 HPW2
Prerequisite: SCTS5315 or special permission

This subject takes a case study approach to understanding the social controversies which are frequently associated with resource and technological developments. Students will examine disputes over issues such as resource use and extraction, energy and transport systems, the siting of hazardous facilities, environmental impacts of building materials and agricultural and household products, contaminated sites, and land based sources of marine pollution. Introduces concepts of rationality, forms of knowledge and uncertainty, and questions of risk, trust and fairness. Such insights from the sociology and cultural theory of risk will demonstrate the limitations of explanations grounded in individual cognition and risk perception and so-called NIMBY (not in my backyard) reactions by communities. Participants will be able to develop their own capacity to communicate and negotiate about ‘acceptable risk’ as the issue arises in environmental management, in the workplace and in daily life.

Master of Arts

Subjects offered by the School of History vary from year to year, and reflect the wide interests of the School. Subjects may cover aspects of Australian, Asian, United States or European history, or they may be thematic or cross-cultural. The MA program (course 8225, program 1040) is designed to accommodate the interests of individual candidates who wish to pursue the study of History at advanced level without necessarily undertaking thesis work. Recent graduates have included lawyers, administrators, high school teachers and librarians, and some have become full-time PhD candidates.

History subjects have no prerequisites for students admitted by the Faculty to the MA (Pass), and are available to all students enrolled in the degree program.

Subject Descriptions

All subjects consist of weekly 2-hour seminars, held in the evening over a single session (14 weeks). At present, seminars usually begin at 6 p.m. All subjects carry a weighting of 20 credit points.

Looks at how history, in this case the history of Japan, has been constructed. We deconstruct the ‘Japan’ of conventional history texts from the points of view of post/structuralist critiques of the discipline and embark on a search for a Japan with a ‘difference’ via readings of different primary texts – eg, translated works of literature, including plays, manga and animé (comics and animation), legends and oral histories. Graduate Diploma in Arts
The School of History offers a Graduate Diploma in Arts (course 5525, program 1040). Students choose four subjects from those offered in History in the MA program except HIST5301 and HIST5302.
International Relations

Available: MA; GradDipArts; GradCertArts

Coordinator: Jo-Anne Pemberton

The MA program in International Relations (course 8225, program 1050) is a comprehensive approach to the key subject components which make up this now very significant sub-discipline. The subject matter is drawn from politics, economics, and history and the underlying theme is an understanding of global politics from both theoretical and practical perspectives.

Prerequisites

Students wishing to undertake subjects in International Relations must have the approval of the program Coordinator. They would normally be expected to have undertaken at least 60 credit points or the equivalent in subjects related to International Relations at undergraduate level, with evidence of at least Credit level performance.

Program in International Relations

Students must complete 120 credit points made up as follows:
40 credit points obtained from the two core subjects
80 credit points obtained from four of the elective or optional subjects listed below or 20 of the 80 credit points may be obtained outside of the program, within the Faculty.

Subject Descriptions

Each session-length coursework subject involves participating in one two hour lecture/seminar each week for fourteen weeks and writing at least one substantial research essay. All subjects are worth 20 credit points.

Core Subjects

POLS5120
The International System
Staff Contact: Shirley Scott
CP20 S1 HPW2 T: W 6–8
A study of global politics as a discrete political system. There are four clearly defined steps in the analysis, beginning with the nature, distribution and exercise of power, followed by a study of the clash of interests between the major international actors, an overview of the physical, moral and institutional constraints on the exercise of power and an analysis of the ideological dimensions of global politics.

POLS5122
The International Political Economy
Staff Contact: To be advised
CP20 S1 HPW2 T: Th 6–8
Main theories of international capitalism and the development gap; foreign investment, trade, finance and aid; labour migration and global ecology; transnational corporations, states and international organisations (World Bank, IMF, GATT/WTO); the ‘new world order’ as a new imperialism or guarantor of greater freedom and democracy.

Elective Subjects

Not all of these may be offered in any one year and new or alternative subjects may be offered – consult the Coordinator.

POLS5102
Australia in the World
Staff Contact: To be advised
CP20 S2 HPW2 T: Th 6–8
Note/s: Subject may not be offered in 1998. Consult School.
A study of Australia’s place in the world. Strategic, diplomatic, economic, historical and legal approaches.

POLS5103
Theories of War and Peace
Staff Contact: Jo-Anne Pemberton
CP20 S1 HPW2 T: Tu 6–8
A study of classical and modern theories of war and peace with a specific focus on ethical and legal issues.

POLS5106
Politics and War
Staff Contact: Richard Lucy
CP20 S2 HPW2 T: W 6–8
An examination of models of the origins of war, especially those of Geoffrey Blainey, Paul Huth and John Arquilla. These models will be tested by examining the origins of particular wars. The origins of some of the following wars will be examined: WW1, WW2, earlier global wars, the Korean War, the Vietnam War, the Falklands War, the Iran-Iraq War, the Gulf Wars of 1990–1991, the Arab-Israeli Wars and the wars of the former republic of Yugoslavia. The relation of arms races, the distribution or balance of power and the nationalism to the outbreak of war will also be addressed. Unlike POLS5103, international law is not a major focus.

POLS5108
Regional Order and Security in the Asia Pacific Region
Staff Contact: Fedor Mediansky
CP20 S2 HPW2 T: Th 6–8
Primary focus is on contemporary issues, on the post-Cold War regional environment and on the patterns of convergent and divergent interests of the regional states
of East Asia, North America and Oceania. While the focus is contemporary, the analysis will encompass the enduring historic, strategic, economic as well as the ideological and cultural factors that shape regional interests.

POLS5121
International Institutions
Staff Contact: Michael Wesley
CP20 S2 HPW2 T: M 6–8
Examines selected representative international institutions, particularly in terms of their structure; their activities and procedures; their role in, and contribution to global order; and their viability and future directions. The selection includes the United Nation Organisation itself, one or two specialised agencies and one or two international non-governmental organisations.

POLS5125
International Law
Staff Contact: David Knoll
CP20 S1 HPW2 T: M 6–8
Introduces the student to the foundations, sources and underlying principles of international law and then demonstrates how they are applied in practice. The particular areas of application emphasised are: the law of treaties; sovereignty in theory and practice; the law and the use of force; state succession; and diplomatic immunities and protection. There is an extensive use of case studies.

POLS5126
Nationalism and Ethnicity in International Relations
Staff Contact: Ephraim Nimni
CP20 S2 HPW2 T: Th 6–8
Examines the resurgence of ethnicity and nationalism in the international arena. While the post cold-war international system emphasises the expansion of a market oriented global culture that transcend nation-states' boundaries, the extensive resurgence of ethnic and nationalist movements appears to contradict this globalising trend. The aim of this subject is to examine contrasting interpretations of the resurgence of ethnicity and nationalism in the contemporary world and evaluate the challenge that this resurgence imposes to a world of nation-states.

POLS5127
China's Relations with the World
Staff Contact: You Ji
CP20 S1 HPW2 T: W 6–8
An examination of China's relations with the outside world in the post-Cold War era. Among the topics to be analysed are: the theoretical foundation on which China formulates its foreign policy, China's security perceptions; its current relations with major powers; its arms build-up and the regional response. Through identifying China's common interests with the international community and its problems with Western powers, efforts are made to evaluate China's place in the world. The subject will be issue-oriented, although theoretical analysis will not be ignored.

POLS5113
Research Project
Staff Contacts: Stephen Fortescue/ S1 and Rob Steven/ S2
CP20 S1 or S2
Notes: This project may only be undertaken with the permission of the Head of School and is available only to students enrolled in a full MA program who have achieved distinction level over three completed subjects and demonstrated research capacity. Application forms to undertake this subject are available from the School office and must be lodged for consideration 3 weeks prior to commencement of session.
A 7,000–10,000 word research project on an agreed subject.

Optional Subjects

History of cultural and economic change in East Asia with a focus on the approaches to technological and industrial development which has allowed first Japan and now Korea, Taiwan and mainland China to achieve rapid economic growth. Australia's orientation towards East Asia is also examined, together with the impact which knowledge-intensive high-technology industries, information technology and global economic pressures have had on this relationship.

**Media Education**

Available: MA

Coordinator: Professor Philip Bell

**Master of Arts**

Media and communications are central to the educational experience of all children in modern societies. They are also increasingly relevant to the formal curriculum in both primary and secondary schools. This Masters of Arts program *(course 8225, program 1075)* focuses on current approaches to teaching the media – their social, cultural and political significance, as well as introducing creative, low-technology media production skills, suitable for use in the classroom. Broadcast, print and new digital multimedia are studied within the context of education. No prior formal study of the media is necessary for enrolment.

**Subject Descriptions**

All subjects consist of weekly 2-hour seminars, held in the evening over a single session (14 weeks). At present, seminars usually begin at 6 p.m. All subjects carry a weighting of 20 credit points.

MDCM5001

**New Media, Technology and Education**

*Staff Contact: Philip Bell*
CP20 S1 HPW2 T: Tu 6-8

Considers the changing nature of media, analysing in particular the convergence of digital media and its implications for education and culture. Critically analyses the utopian claims frequently made about new media and introduces ways of teaching about these media in primary and secondary school contexts. Examines the use of new media in education generally and in media education in particular.

MDCM5002

**Teaching Television**

*Staff Contact: Philip Bell*
CP20 S2 HPW2 T: Tu 6-8

Introduces recent approaches to the study of television as a cultural form. The engagement of children with television is approached through studying audiences as active, using television genres/programs by incorporating them into their personal development and social lives. Examines arguments which see television as socially undesirable because of its effects on the vulnerable and its representation of violent or sexually-explicit behaviour, exploring ways by which primary and secondary school students can consider such issues and develop critical competence about the medium generally.

MDCM5003

**Teaching Cinema**

*Staff Contact: Philip Bell*
CP20 S2 HPW2 T: M 6-8

Popular film, including action genres and animation, is studied in relation to students’ experience of ‘movies’ as entertainment. Approaches to analysing and interpreting films are examined by focusing on questions of fantasy and ‘realism’. The visual and aural qualities of the cinema are considered while literary models of film ‘appreciation’ are also evaluated. Ways of encouraging students to create pre-cinematic ‘stories’ are developed (eg cartoon strips, story-boards, collages/montages). The appeal of ‘stars’ and particular genres is used to open up students to engage deeply with the cinema as a cultural form.

MDCM5004

**Media Production in Education**

*Staff Contact: Philip Bell*
CP20 S1 HPW2

*Notes:* Subject not offered in 1998.

Elementary skills in script construction, videography and editing are developed in the context of their utilisation in the classroom. Computer-mediated communication and elements of multimedia production are studied with the aim of developing creative classroom exercises in which students can participate to produce audio-visual or ‘multimedia’ work. It is emphasised that relatively low levels of technology can provide rich classroom resources if used creatively by the teacher.
MDCM5005
Media Advocacy and Public Education
Staff Contact: Philip Bell
CP20 S2 HPW2
Note/s: Subject not offered in 1998.
Develops practical abilities in designing media-based education campaigns (suitable for health, environmental issues, for example). The media are seen as a resource to be utilised in advocating social or behavioural change and as the conduit for public education programs. Cross-cultural issues are considered as well as questions of 'targeting' groups by age, gender and sub-cultural definition. Introduces techniques of qualitative media/social research in the context of public education.

MDCM5006
Research Project
Staff Contact: Philip Bell
CP20 S1 or S2
Note/s: Special permission of Coordinator.
Individual projects are undertaken under supervision. Projects must involve original research and the development of an educationally-relevant media resource, either a finished product (video, CD Rom, booklet, for example) or a script/outline as well as contextualising, theoretical, essay setting out the aims, methods and educational significance of the project.

MDCM5007
Reading Program
Staff Contact: Philip Bell
CP20 S1 or S2
Note/s: Special permission of Coordinator.
Designed to accommodate students' interests not covered in the program. Each student's program is designed in consultation with the Head of the Unit and may be substituted for one elective. The program involves writing a 6,000 word essay under supervision of a relevant staff member.

Theatre, Film and Dance

Available: MA; GradDipArts; GradCertArts
Coordinator: Dr Margaret Williams

Master of Arts

Full-time students complete the Masters degree (course 8225, program 1080) in 1 year. Part-time students normally complete the course in between 2 and 3 years. Students in this course are required to complete six (6) subjects as listed in the Masters program.

Subjects in the Masters degree are designed to offer a wide-ranging program in the study of both the theory and practice of theatre as performing arts, principally in the twentieth century. These subjects are each worth 20 credit points and of one session's duration. Students undertaking this program must complete all 120 credit points within the School of Theatre, Film and Dance.

Entrance Requirements

The normal requirement for entry is at least a BA (Pass) degree of good quality (i.e. with Credit grades or better), preferably with a major in theatre. Graduates who have little or no theatre component in their degree, but who have a major (with Credit grades or better) in a cognate subject area, should be able to demonstrate substantial practical experience in the discipline(s), (e.g. as professional theatre workers, television production staff, teachers offering drama components in their school's curriculum etc).

All subjects are of equal value (20 credit points). Most subjects meet for two hours per week (three in the case of Shakespeare in the Twentieth Century, to allow for film/video screenings. The Directorial Process in the Theatre and Re-viewing the Repertoire: Re-interpreting Plays in Performance). However, those subjects marked with an asterisk will be organised to include one or more optional practical workshops for those students who wish to explore the practical application of the subject. All students in these subjects will attend weekly seminars for the first half of the semester, after which they may choose either the workshop component, or a series of less frequent seminars with extended reading leading to a formal essay.

The workshop option depends on a viable number of students selecting it. Workshop times will be arranged in consultation with students.

All subjects are dependent on staff availability and student enrolments.

Staff Contact: Margaret Williams
CP20 S1 or S2
Note/s: Subject only available with the permission of the School and when suitably qualified supervision is available.

THST5108
Dramaturgy
Staff Contact: Jim Davis
CP20 S1 HPW2 T: W 2–4
Note/s: Subject available only with special permission of the School. Its specialised nature and teaching needs may necessitate the imposition of a severe limitation upon enrolments.

Staff Contact: Rob Jordan
CP20 S1 HPW2 T: W 9.30–11.30

Science and Humanities: Bridging the Two Cultures
Staff Contact: Michael Matthews
CP30 F HPW2
Examination of the practice and theory of some major curriculum reforms in Britain, the US and Denmark that are attempting to bridge the traditional gap between the sciences and humanities. The present crisis in science education in all western countries is considered. A tradition of theoretical debates and curriculum programs that have emphasised a contextual approach to the teaching of science whereby the social, cultural, historical, technological and philosophical dimensions of science are interwoven into the teaching of science will be detailed. Major episodes in the history of science and culture such as Galileo's new physics and Darwin's new biology are investigated. Such basic questions as scientific method, the differences between scientific and non-scientific ways of knowing, science and religion, and the place of history of science in the formulation of a philosophy of science are also considered.

EDST5015
Modes of Thought and their Instructional Implications
Staff Contact: Paul Chandler
CP30 S2 HPW4
Cognition and instruction. The manner in which instructional material is designed and taught can be guided usefully by cognitive theory. Current findings based on schema theory and cognitive load theory suggest that many commonly used instructional techniques are ineffective. The same theories and findings provide alternatives structured to facilitate learning, thinking and problem solving. Procedures for designing instruction that accords with our mental processes, and research techniques to test the effectiveness of novel instructional methods are central issues that are discussed.

Reading Acquisition and Reading Failure
Staff Contact: Robert Elliott
CP30 S1 HPW4
Reviews the research on reading acquisition and reading failure. The importance of phonological awareness and facility at phonologically segmenting, analysing and synthesising the speech stream, is detailed. This skill is crucially related to the ability to decode words by phonological recoding, it probably contributes to poor performance on short-term memory tasks, and, because reading comprehension relies on access to rapidly formed and maintained phonological codes in short-term memory, it results in poor comprehension. This skills-based theory of reading is compared and contrasted with other theories of reading acquisition and reading failure, and its implications for reading instruction are discussed.

EDST5020
Education of Intellectually Gifted Children
Staff Contact: Miraca Gross
CP30 S2 HPW4
The development of the concept of giftedness and the extent to which it is culturally determined is traced. The rationale, selection procedures and structure of programs established for students gifted in music, sport and athletics are compared with those for intellectually and academically gifted students. The development and influence of policies on gifted and talented education are examined, including federal and state government policies and the policies of the political parties, education authorities, teacher unions and parent groups. Students review the research on the traits and competencies of successful teachers of gifted students, and the effects of teaching training and inservice in gifted education. Identification procedures, teaching strategies and program structures which facilitate or impede the full development of high potential are critically examined. Specific attention is paid to the research on the needs and characteristics of gifted students in minority and disadvantaged groups.

Master of Policy Studies Degree
Graduate Diploma in Policy Studies

School of Social Science and Policy

The graduate program

The graduate program in policy studies applies a social science perspective to questions of policy and management in modern organisations. Students acquire a solid grounding in policy analysis and the policy process, and then proceed to specialise in a field of applied policy studies, and to complete a Major Policy Exercise.

The program prepares students for work which requires analytical skills and a practical appreciation of the processes of policy-making and implementation. There is an emphasis placed on developing the skills and perspectives needed for proficient assessment and evaluation, and sensitivity to the effectiveness of programs in their own terms, and in terms of the impact they have on clients, customers and the public.

The program is oriented to the practice of policy, and participants are required to have relevant work experience. This may be in the public sector, unions, business organisations or community bodies.

Duration

The MPS is a coursework degree which takes two sessions full-time or four sessions part-time.

Students who complete the four foundation units of the MPS program (SLSP5001, SLSP5002, SLSP5003, SLSP5004), plus the additional unit SLSP5005 qualify for the Graduate Diploma in Policy Studies.

Staff Contact: Janice Caulfield
CP20 S1 HPW2

Master of Social Work (by Research)

MSW

In addition to writing a thesis for the Master of Social Work degree by research (course 2970) which will embody an original contribution to knowledge in the chosen topic area, a student may be required to take subjects in research methods and/or social theory.

Subject Descriptions

SOCW7790

Community Development

Staff Contact: To be advised
CP12 S1 HPW2

 Begins with a review of the history, background and applications of community development programs in Third World situations. Students then examine a range of case examples which introduce relevant strategies and approaches to local level and organisational change. Alternative models of social and economic planning, administration and service delivery are considered. Particular emphasis is accorded to participative and decision making processes, and to skills in assessment, consultation and planning.

SOCW7791

Preparation For International Practice

Staff Contact: Diane Barnes
CP12 S2 HPW2

Prepares students to function within their own professions in international contexts. It promotes examination of values and motives for engaging in international work in the light of theories of social justice. Students are introduced to the ethnographic method as well as a range of other skills for effective interpersonal communication, community participation and research in crosscultural situations.

SOCW7795

Management of Human and Financial Resources

Staff Contact: Barbara Ferguson
CP12 S2 HPW2

Covers two broad areas. First, the management of human resources, provides an overview of the problems and opportunities which arise in managing people, with special reference to working within international aid organisations. Topics include staff recruitment, selection, development and evaluation. The second area, the management of financial resources seeks to introduce students to some of the conceptual and technical skills required to deal with financial and resource control problems. Topics include preparation and interpretation of budgets and financial reports.
The Politics of International Aid

An introduction to the international aid agencies, their respective structures, roles and relationships with one another. Also provides an introduction to the impact of international economics and international politics on matters relating to international aid. SOCW7813
Program Design and Evaluation in Social Development

Reviews the values, knowledge and skills required to design and evaluate social development programs in the international/cross-cultural contexts. Major topics include cooperation in change, methods of needs assessment, defining outcome objectives, theories of decision making, models of scheduling and implementation, theory and practice of evaluation including development of criteria, data collection and analysis, the ethics and uses of evaluation. Students engage in a program planning and evaluation exercise to apply theory covered in the subject.

SOCW7814
Research Methods

Designed to enhance basic and intermediate skills in research work at a postgraduate level. Develops critical and analytical skills in the reading and summation of literature for a piece of research. Various styles of research methods used in research projects are covered. Both qualitative and quantitative analysis and the use of micro and mainframe computers as they assist in the completion of a project report will be introduced.

SOCW7815
Project

Students undertake a study project with the guidance of a project supervisor. The project requires library and/or empirical research designed to integrate and apply elements of the coursework to the student's particular field of social development work. The project should be an original but limited investigation of approximately 10,000 words.

SOCW7816

There is an emphasis on quantitative and qualitative methods, and the issue of values and the political context of research activity will be explored. Examples of research in the area of therapy will be reviewed, and the special issues in research in the field of therapy outlined. Graduate Diploma in Professional Ethics

Coordinator: Stephen Cohen (Philosophy)
While open to anyone with an interest in the area, this Diploma program (course 5295) has been devised as a response to pressing demands from two quarters: first, from professionals and the professions, who wish to ensure high standards of ethical practice, and to complement the requirements of legal regulation with those of coherent and consistent moral positions; second, from public demand and expectation of higher standards of accountability and responsible conduct from the professions and their practitioners. The course is available by distance-mode (Course 5295, Program 2000), as well as on-campus (Course 5295, Program 1000).

The course consists of the following four subjects:
PHIL5400 Moral Theory and Moral Reasoning
PHIL5401 The Professions and Society
PHIL5402 Ethical Issues in Business and the Professions
PHIL5403 Ethics in Organisations

Duration
The course can be completed in one or two years. Each subject is one session (14 weeks) in length, and the on-campus mode involves class-contact time of one two-hour meeting per week per subject.

Entry Requirements
The normal qualification for entry is a Bachelor's degree or its equivalent from a recognised institution of higher education. Professional experience may be taken into account in cases where an applicant does not possess the appropriate tertiary qualification.

Sequence of Subjects
Students intending to complete the course in one year will enrol in PHIL5400 and PHIL5401 in session 1, and PHIL5402 and PHIL5403 in session 2 of that year. Students intending to complete the course over two years (4 sessions) will typically enrol in PHIL5400 in session 1, PHIL5402 in session 2, PHIL5401 in session 3, and PHIL5403 in session 4.
