  - Study Commitment
As the College of Fine Arts enters its fifth year since joining the University of New South Wales and its twenty first year since its emergence from TAFE, it is reasonable to claim these years as the most important years in the development of tertiary art and design education in Australia.

The fields of design and visual arts, including studies in art theory, art history and art education are now firmly installed in the university sector with degree studies available from bachelor to doctorate across the disciplines.

The College has recently undergone some restructuring in order to provide a school as the 'masthead' for each field of study offered. So there is now a School of Art, a School of Design, a School of Art Education and a School of Art History and Theory. These four schools embody academic staff of the highest calibre possible whose commitment to teaching and research makes CoFA the envy of other art and design institutions. The College is proud of its academic staff, its library, technical and administrative staff and of the service they provide to students. We are also proud of the facilities and equipment which are such an important part of the educational environment.

If you are among the lucky few to gain a place at CoFA either in an undergraduate or postgraduate course, it is the College's sincere wish that your studies will be exciting, your creative experiences will be exhilarating and the friendships made will be long lasting.

K B Reinhard
Dean and Director
The Schools of the College of Fine Arts
The University of New South Wales

The College of Fine Arts consists of four schools divided into a number of related subject study areas through which the subjects and courses of the College are offered.

The School of Art
The School of Art consists of the studies of Painting, Drawing, Printmaking (including etching, lithography, relief and silk screen printing), Photography, Four Dimensional Studies (including film, multi-media computing, sound performance and installation and video), Three Dimensional Studies (including clay, construction, installation and spaces, jewellery and sculpture).

The School of Art Education
This school comprises studies in Art Education.

The School of Art Theory
This school includes studies in art history and theory and art administration.

The School of Design
This school comprises studies in design and ceramics.

The Clement Semmler Library

The Clement Semmler Library is situated above the Ivan Dougherty Gallery. It was named after Dr. Clement Semmler O.B.E., D.Litt., M.A., distinguished writer and critic and past Chairman of the Alexander Mackie College of Advanced Education Council.

The recently expanded and refurbished library supports the teaching, learning and research functions of the College of Fine Arts by providing access to information in all formats through its collections and services.

The collection includes books, periodicals and an extensive range of audio-visual resources including slides, video cassettes and sound recordings. Recent additions in the audio-visual area include videodiscs and artworks on CD-ROM, ensuring that the Library is up to date with the latest media developments to complement teaching in the College.

Students and staff also have access to the resources of the University of New South Wales Libraries at Kensington and St George. A shared library catalogue and online access to the University Libraries’ CD ROM network offers College of Fine Arts students the benefits of networking technology, while in-house indexing of periodicals and audio-visual material enhances access to this material.

A professional reference service is offered and emphasis is placed on assisting users to make best use of the information services available and to gain lasting learning skills.

The Ivan Dougherty Gallery

The Ivan Dougherty Gallery was established in 1977 by the Alexander Mackie College of Advanced Education at 200 Cumberland Street, The Rocks and was named after Major General Sir Ivan Dougherty, Chairman of the first College Council.

When funds were made available to refurbish the Albion Avenue Public School built in 1894, part of the ground floor was developed as the Ivan Dougherty Gallery’s new premises. These were opened on 16 June 1981. In 1991 the Gallery celebrated its 10th anniversary in Paddington.

The purpose of the Gallery is to provide an educational and cultural resource for the students and staff of the College of Fine Arts, The University of New South Wales and the general public. The Gallery mounts ten to twelve group or thematic exhibitions per year of Australian and international contemporary art, occasionally with an historical component incorporating all media and disciplines: painting, sculpture, printmaking, drawing, design, installation, photography, video and time based art.

A forum is organized in conjunction with each exhibition, which facilitates an exchange of ideas between artists, theoreticians, curators and students. In addition, floor talks on the exhibitions are staged in the Gallery for the benefit of students and the wider community.

Committed to stretching the boundaries of current art practice, the Gallery also coordinates Live Actions, a series of events and performances by contemporary Australian performers and performance artists.

Gallery hours: Mon-Fri 10.00 am - 5.00 pm; Sat 1.00 pm - 5.00 pm. Closed public holidays.

The COFA Gallery

The COFA Gallery is the on-campus student gallery of the College of Fine Arts.

The aims of the Gallery are to provide an environment where students can gain professional experience in gallery procedures as exhibitors and where Art Administration students can develop their curatorial and management skills.

The Gallery provides a public space for viewing recent works by students currently undertaking studies in the broad range of studio based courses offered within the College. In the case of competitive or sponsored exhibitions, work by students from other institutions can also form part of the Gallery’s program.

Gallery hours: Mon-Fri 10.00 am - 5.00 pm (during session time only). Closed public holidays.
General Information

The Student & Staff Advisory Service

Counselling
The Counselling service is available free of charge to students and staff experiencing any personal difficulties arising inside or outside the College.

Students and staff present with a range of problems including:

- Financial, e.g. Austudy, loans;
- Administrative, e.g. withdrawal, special consideration, appeals;
- Vocational, e.g. career change, interview skills;
- Academic, e.g. essay writing, seminar presentation, teaching skills, communication;
- Interpersonal relationships; and
- Other stresses which are affecting their ability to fulfill their potential as a student or a member of staff.

All consultations are confidential. If the counsellor is unable to assist, referrals can be made to appropriate persons or organizations.

Support of Disadvantaged Students
The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, the Supportive English Program and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

Course Content, Curriculum Design, Teaching and Assessment, and Printed Material
Schools and faculties will monitor course content (including titles), teaching methods, assessment procedures, written material (including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

Equal Opportunity Adviser Scheme
The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

Harassment Policy
The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.

Equal Opportunity in Education Policy Statement

Under the Federal Racial Discrimination Act (1975), Sex Discrimination Act (1984), Disability Discrimination Act (1992) and the New South Wales Anti-Discrimination Act (1977), the University is required not to discriminate against students or prospective students on the grounds of sex, marital status, pregnancy, race, nationality, national or ethnic origin, colour, homosexuality or disability. Under the University of New South Wales Act (1989), the University declares that it will not discriminate on the grounds of religious or political affiliations, views or beliefs.

University Commitment to Equal Opportunity in Education
As well as recognizing its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards her/his maximum potential. The University further commits itself to course design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

Special Admissions Schemes
The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment.

The Student Association

All students of the College are members of the Student's Association of which the Student Representative Council is the elected executive and is a chapter of The University of New South Wales Student's Guild. The aims of the Association are to provide students with services and facilities that will assist them in dealing with their political, philosophical, academic and practical needs within the College community.

The Association is financed by a compulsory fee collected by the University on behalf of the Association as part of the enrolment procedure and is administered by the Executive and staff.

The Association is involved with the organization of activities that include an on-campus Art Materials Store; an off-campus gallery, Arthaus, lunch time activities (barbecues, films, bands, guest speakers). It supports clubs and societies such as The Temporal Visual Arts Society and the Christian Fellowship and encourages students to involve themselves in interest groups on and off campus.

Through representations on College boards and committees the Association may communicate with the Dean and Director on matters affecting the student body and plays an active role in the decision making process of the College.

### Computing Requirements

3.1 Advice is available from School Offices on the requirements for computing equipment and software for courses. Students undertaking computing studies in any course are responsible for ensuring that they have appropriate backups of their work. Work should not be left on College machines as its security cannot be guaranteed by the College. It should be noted that students who alter or delete another person’s work are committing a criminal offence.

---

### General

1.1 It is the responsibility of the student to complete all requirements of the course in which that student is enrolled in order to qualify for the award.

1.2 It is the student’s responsibility to be acquainted with the contents of official notices displayed from time to time on notice boards designated for this purpose.

### Retention of Students’ Work

The Course

The Bachelor of Fine Arts Course is a three year full-time course of study designed for those who wish to make a career in the visual arts; whether as professional artists or as practitioners in art-related professions.

The course aims:

• to provide an opportunity for students to undertake rigorous and demanding studies at tertiary level from a wide range of approaches and disciplines within the visual arts.
• to provide the opportunity for students to explore aspects of the visual arts through critical examination of the possibilities they offer and by use of available technological resources.
• to encourage students to develop an increased self-motivation and commitment to their studies.
• to provide an environment in which students may develop as far as possible the following characteristics and abilities both during and subsequent to their involvement in the course:
  - an understanding of concepts relevant to aesthetics and the visual arts.
  - an understanding of various media through practice and experimentation with such media.
  - a confidence and competence in decision making, together with an appreciative and informed awareness of viewpoints in the visual arts other than their own.
• to encourage students to realise their own intellectual and creative potential.
• to increase students’ awareness of, and sensitivity to, their environment.

In order to qualify for the award of Bachelor of Fine Arts a student must accrue a total of 360 credit points within a minimum of six and a maximum of twelve academic sessions, and successfully complete certain prescribed subjects.

First Year

Core Subjects

COFA2001
Art History and Theory 1: Mapping the Modern
S1 HPW4 C12

COFA2002
Art History and Theory 2: Mapping the Postmodern
S2 HPW4 C12

For subject outlines see page 51 of this handbook.

Media Art

COFA1101
Media Art IA
S1 HPW3 C10

This subject focuses upon the imaginative translation of thought and experience into two-dimensional and other 'image' forms, and upon the generation of imagery from a wide range of stimuli.

One of the main emphasis will be upon working photographically and with associated processes. Broader methods of image-making such as drawing, three dimensional and time-based approaches will also be addressed, as will questions of intent, content and context, and the development of personal visual languages.

COFA1102
Media Art IB
S1 HPW3 C10

This subject forms an introduction to the imaginative and personal fabrication of form, as well as to the perception and articulation of space, both as a medium in its own right and as the medium in which all perception and plastic experience takes place.

A wide range of media and processes will be explored, not simply those that are explicitly sculptural and three-dimensional, but also, where appropriate two-dimensional or time-based ones.

Issues will be explored related to perceptual and other experience, symbolism and metaphor, narrative and scale, function and identity. This subject will focus on current sculptural and related practices, including installation, work sited on, or deriving from the body, and work devolving from an awareness of materials and process.

COFA1103
Media Art IC
S1 HPW3 C10

This course provides an introduction to the broad range of ways of working that may be described as time-based, or that actively explore time as a plastic medium in its own right.

Ideas tackled might therefore emerge in the form of moving imagery such as film/video and animated or kinetic work in two or three dimensions, along with performance, work based on or involving the use of sound, and other processes such as drawing, writing or photography in which time is an active element.

Students are encouraged to develop a working-practice founded upon their own ideas and experiences, supported by an inventive attitude to a wide spectrum of media.

COFA1104
Media Art ID
S1 HPW2 C8

This subject provides an arena where the various concerns of the rest of the first year Media Art course are brought together to address the complex relationships existing between the student as an individual, their work and ideas, and the living culture of which they are part.

The subject consists firstly of 'forum' sessions, which focus upon the work of particular individuals (practicing artists and others) who participate in these sessions, and secondly of 'integration' sessions. These, through a variety of projects, discussions and other initiatives, concentrate more directly on the individual student and on issues raised by their work, including, as the session progresses, decisions concerning their future subject specialization.

COFA1105
Media Art 2A
S2 HPW3 C10
Prerequisite: COFA1101

This subject is designed to provide a transition from the breadth of experience of the first session, to the increasingly personalised program of subsequent sessions. During this period students will be able to map out with increasing certainty the natural bounds of their own artistic enquiry. This subject consists of a series of projects, which are primarily defined by idea and content, so that a trajectory that is individually stimulating and exploratory may be pursued by each student. The lack of constraint upon medium or dimensionality means students may choose to continue working as diversely and divergently as during the first session, or to concentrate more specifically upon modes of working particular to a chosen major area or study.

COFA1106
Media Art 2B
S2 HPW3 C10
Prerequisite: COFA1102

In this studio based subject the students will begin studies related to their specialized area chosen from the following: Photographic Studies (image technologies/image manipulation), 4D (film, video art, sound/installation/performance), sculpture (object/installation, jewellery/bodyworks, clay).

While each of these may be considered as a self-contained area of study, it is also possible to opt for an interdisciplinary synthesis of the above. In this subject there will be an emphasis on an analysis of the students' conceptual development, the generation of ideas, visual language, acquisition and application of skills, manipulation of materials and interaction with context.
COFA1107
Media Art 2C
S2 HPW3 C10
Prerequisite: COFA1103

This subject consists of a series of workshops based across the School of Media Art, which are designed to extend from and expand upon the basic technical inductions encountered during the first session. Specific and adaptable methodologies and processes will be explored, enabling a more resolved synthesis from the conceptual beginnings of a work to its realisation.

COFA1108
Media Art 2D
S2 HPW2 C8
Prerequisite: COFA1104

This subject provides a continuing arena for tutorial, contextual and personal support. Attention will be paid to a continuing breadth of stimulus and thought, and to specific advice appropriate to the confirmation of students' future directions.

There will be a continuing program of visiting artists and other practitioners, plus projects designed to stimulate awareness and debate.

Such historical contexts as feudalism (with its social hierarchy based upon tenure of land), the development of geographer’s and surveyor’s instruments, the Enclosure Acts and colonisation, particularly of Australia, will provide the framework for such readings of the country. **Honours**

BFA Honours is a course of higher level study available to BFA students who wish to undertake research in Media Art or Studio Art, extending into a fourth honours year.

BFA students, in consultation with lecturers, may apply for entry to the course from the end of Session 4. A prerequisite is normally the attaining of Distinction (DN) in at least two of three studio core subjects in both Sessions 3 and 4 with no previous failures.

Honours students are expected to perform at a superior level, achieving an average of Distinction (DN) in studio subjects in their chosen area in Sessions 5 and 6. Concurrently students would prepare a Preliminary paper researching a topic related to their studio practice each session.

In their fourth Honours year students undertake a supervised research program in their area of Fine Arts specialization. The body of work undertaken would be presented and assessed, in exhibition form. The exhibition would be accompanied by the presentation of a research paper relating to the student’s studio practice or interests. Students would undertake the Graduate Lecture program and Category C General Education subjects during the year.

The course is full-time.

The Course

The Bachelor of Art Education is a four-year full-time degree course designed to meet the community's need for art educators in secondary schools and related institutions.

The course incorporates flexibility in its structure in order that students may develop their individual potential as future art educators in a variety of roles, since secondary art teachers are required to fulfil many and varied responsibilities. They may function essentially as art historians, practical art producers, art education specialists or they may operate within the school situation as generalists whose interests cover the visual arts and crafts and the performing arts, as well as art theory and art history. The opportunity exists within the course for students to specialize in any of these roles.

The course also provides for students who wish to be practising art educators outside the high school area.

It is possible to complete the Bachelor of Art Education with honours.

Students may apply for entry into the honours program at the beginning of session 5, though later year entry can be made under special circumstances. Students must have a fail free record and a distinction average in Core Studies in Art Education in sessions 3, 4, 5 and 6.

The honours program consists of additional coursework in sessions 6, 7 and 8, however students are exempt from the following: Core Options in Education in sessions 6 and 8; History/Theory electives in sessions 6 and 8.

Students are required to complete COFA4015 and COFA4017 in session 5 of their course and COFA4029 in session 6 of their course.

This subject aims to foster an awareness in students of the ideology and philosophies of art museums and an understanding of the educational functions of the museum in the development of a lifelong concept of learning. Students will have the opportunity to apply appropriate instructional methods in the art museum context and systematically investigate the plurality of roles which the museum performs within our society.

COFA4049  
Dilemmas of Praxis: the State, the School and the Educator  
General Education Category C  
S2 HPW2 C8  
Prerequisite: Teaching Internship (ETP)  
This subject utilizes the student’s internship experiences as a platform to explore the ethical, political and pedagogical dilemmas entailed in the School. Students will utilize a range of contemporary perspectives to explore philosophical, sociological and political dilemmas and conflicts in the context of education. Perspectives include Althusser’s ideological state apparatuses; Giddens’ Structuration; Habermas’ communicative action and Foucault’s notion of discourse and difference.

COFA4053  
Politics, Identity and Art Education  
S1 or S2 HPW2 C8  
This subject aims to provide students with opportunities to examine theoretical antecedents and perspectives in cultural studies and culture theory including Adorno, Bourdieu, Clifford, Geertz, Morris, Said, Spivak and Williams and how they relate to the context for art education in Australia.

Cultural theory will be examined as traditions, habits, practices, values and expectations from economic, sociological and critical viewpoints. Students will examine concepts including identity, subjectivity, marginality and post colonialism.

Honours

COFA4051

Subject matter will include introduction to research processes and products, quantitative and qualitative paradigms; the nature of inquiry; knowledge, facts and theory; description, explanation, prediction, causation; research ethics. Research concepts and structures: variability; experimentation; sampling and randomisation; measurement; observation; triangulation; validity and reliability; role of literature. Research methods: experimental and quasi-experimental; ex-post facto; correlational; case studies; surveys; action; fieldwork; historical, philosophical. Design and use of research instruments: surveys; questionnaires; interviews; observation schedules; unobtrusive methods; tests; experiments; scales; simulations; audits. Interpreting and reporting research: description and analysis of data; generalisability; reporting and publishing. Research trends in art education - historical; psychological; socio-cultural; philosophical.

COFA4052  
Theoretical Frameworks in Art Education  
S1 HPW3 C8  
This subject aims to introduce students to the theoretical frameworks which form the basis for the conception of visual arts education as a distinctive field. Theoretical frameworks in art education will be explained as a largely discontinuous collection of histories. These histories are united by ruling paradigms many originating outside of the field in the human sciences, and in the practices of the visual arts. Examples include, psychoanalytical approaches to creativity, anthropological and socio-cultural studies, and cognitive theories.

COFA4053  
Curriculum and Art Education  
S2 HPW3 C8  
This subject will provide students with modernist and post modernist theoretical frameworks of curriculum evaluation and critique. Particular reference will be made to the critical methodologies of Habermas and the genealogical archeology of Foucault as appropriate to an interpretation of the visual arts in education.

COFA4055  
Honours Research Project in Art Education Studies  
S2 C47  
This subject enables students to prepare and complete an Art Education research project in a chosen area of specialisation. Content includes a review of major research paradigms including: historical, descriptive, experimental and philosophical methodologies. Students will complete a research project submitting a thesis/report 10,000 - 15,000 words in length, which identifies an issue or problem of educational significance and demonstrates understanding and appropriate application of selected methodologies to the investigation of the chosen problem.
Course Rules

These rules should be read in conjunction with the Academic Rules of the University as published in the University Calendar.

- where absences in excess of 3 classes occur, students may be given a fail grade (FL).
The Course

The Bachelor of Art Theory BArlTh. is a three year degree, with a 4th honours year, constructed to provide intensive study of art histories and theories, as well as to address the nexus between art theory, art practice and 'the art industry'. It will provide an education for those wishing to find employment as gallery curators, arts administrators, art consultants, art project officers, art writers and critics, as well as for those who wish to 'freelance' as artists/theorists.

NB: Total hours and credit points per session will vary according to elective choice. The sessions that particular core subjects are taught may vary from year to year and may not necessarily be offered in this pattern.
Course Structure

Core Subjects
The Bachelor of Art Theory degree is constructed around an integrated strand of Core Subjects. The Core Subjects provide intensive study in art histories, theories and philosophies as well as the institutional contexts in which art is exhibited, catalogued, published and promoted. Students enrol in three Core subjects each Session, totalling 18 subjects. The sequence of Core Subjects taken is subject to approval by the School.

Prerequisites
COFA6005 Theories of the Image, COFA2001 Art History and Theory 1: Mapping the Modern, COFA6010 Theories of Art History and Culture and COFA2002 Art History and Theory 2: Mapping the Postmodern are prerequisites for the following subjects: COFA6015 Grand Narratives of Western Art, COFA6025 Images and Issues in Non-Western Art, COFA6020 Mythologies of the Artist: A Social History, COFA6030 Art and Cultural Difference, COFA6035 Art and the Culture of ‘Everyday Life’, COFA6040 The Philosophy of Taste, COFA6045 Art in History, COFA6050 Philosophies of History and COFA6060 Research Project.

Elective subjects
Students must complete electives over the degree that total no less than 90 credit points and no more than 100 credit points. Electives can be chosen from Art History/Theory electives (see subject descriptions on pages 21-28 of this Handbook); Studio/Media electives (see subject descriptions on pages 28-30 of this handbook); and approved electives offered by the Faculty of Arts and Social Sciences. Where Studio/Media subjects are chosen, students must complete a strand comprising no less than three electives in a particular subject. Faculty of Arts and Social Sciences subjects may be taken as electives, subject to prerequisite requirements, or as a major sequence, defined as an approved progression of six subjects in a school or program.

General Education
Students are also required to complete two Category A General Studies subjects over Sessions 2 and 3; and two Category B General Studies subjects over Sessions 4 and 5.

Graduating Students' Exhibition
Students are permitted to exhibit in the Graduating Students' Exhibition with a copy of final year Research Papers submitted for display in the Library during the period of the Exhibition.

Honours Entry
Application for entry to BArtTh honours program is normally made at the beginning of Session 4, though later year entry can be made in special circumstances. The honours program consists of additional coursework in Sessions 4, 5 and 6 and a 4th year which consists of two honours seminars and a thesis. (Students must complete General Education C requirements in their 4th year.) Students must have a failure free record in all subjects in all sessions and achieve a credit average in Core subjects in Sessions 1, 2 and 3. In order to be considered for progression to the honours year students must maintain an average of no less than 70% in Core subjects in Sessions 4, 5 and 6.

Core Studies

COFA2001
Art History and Theory 1: Mapping the Modern
Staff Contact: Graham Forsyth
S1 or S2 HPW4 C12
This subject examines the production of art, art theory and art's meanings within a fabric of political, economic and social formations. Commencing with the Enlightenment and finishing with the immediate post-World War One period, Mapping the Modern looks at modernity through industrialisation, colonisation and technology, as well as cultural issues such as Realism, 'Primitivism' and Expressionism.

COFA2002
Art History and Theory 2: Mapping the Postmodern
Staff Contact: Graham Forsyth
S1 or S2 HPW4 C12
Commencing with the politicised art of Stalin's U.S.S.R. and Hitler's Germany, and tracing the transformations in art practice and theory over the post-War period, Mapping the Postmodern will examine the developments within the postwar economy, forms of cultural production, technology and politics. Students will be encouraged to investigate the major moments of aesthetic transformation over this period: performance, installation and environmental, as well as Feminist theories and practices. Issues of gender and sexuality, consumerism, post-colonial culture, computer technology, and the environment will also be addressed.

COFA6005
Theories of the Image
Staff Contact: Graham Forsyth
S1 or S2 HPW3 C15
An introduction to ways of understanding and evaluating the making, reception and theoretical understandings of images in our culture. Different cultures and historical periods have treated images in radically different ways with different ways of understanding the way images relate to their producer(s), viewer(s) and to the world. There is also a philosophical concern with the nature of the image, how it is able to have meaning, to represent at all. How are we able to read images? Is it a natural process or culturally determined? These issues will be addressed by critically examining the different ways of understanding the artistic image in Western and Non-western arts, and in crucial developments in Western art history (including Renaissance perspective, the invention of photography;
A variety of non-western cultural forms have come to constitute a distinct but changing category within the historical trajectory and constitution of Art, especially since the colonial expansion of capitalism. This subject examines that phenomena via a variety of discourse, an appropriate category to use when looking at particular non-western cultures? What are the implications of applying the category of art to such forms? What implications do non-western cultural forms have for theories of culture, art, society, knowledge and power? The issues raised in this subject are necessarily interdisciplinary in character and cross domains of knowledge such as anthropology, art, aesthetics, philosophy and history.

COFA6030
Art and Cultural Difference
COFA6144
Honours level
Staff Contact: Diane Losche
S1 or S2 HPW3 C15
The conceptualisation of difference, diversity and multiplicity, both within and across cultural boundaries, has occupied a central position in the historical trajectory of Art, particularly since the end of World War II and the advent of a variety of neo and postcolonialisms. Topics covered include the relationship of theories of ethnicity, gender, race, class, culture, knowledge and power to the complex history and practices of art. These will be addressed by critically examining Adorno, Benjamin, Freud, Irigaray and Marx, and theorists and artists of colonial struggle such as Kahlo, Rivera, Sartre and Fanon. The implications for art of such contemporary issues as multiculturalism will also be included.

COFA6035
Art and the Culture of ‘Everyday Life’
COFA6145
Honours level
Staff Contact: George Alexander
S1 or S2 HPW3 C15
This subject looks at the changing position of art in relation to the proliferation and complexity of mass culture. This includes both the aestheticization of everyday life as well as the ways in which art’s communicative role has been altered by the pervasiveness of mass media. The interdisciplinary (and sometimes counter-disciplinary) development of cultural studies provides tools for reading art strategies in the light of television, film, computer imaging, the popular press and advertising. Useful to the course are Fernand Braudel’s concept of microhistories, Mikhail Bakhtin’s philosophy of the ordinary, Michel de Certeau’s notion of productive consumption, and Jean Baudrillard’s theory of the ‘spectacle’.

COFA6040
The Philosophy of Taste
COFA6146
Honours level
Staff Contact: Graham Forsyth
S1 or S2 HPW3 C15
This subject examines the major structures and ways of thinking which have constituted and transformed the practices of criticism and evaluation of art in the modern era. The Philosophy of Taste encompasses the social, political, economic and theoretical dimensions of the present ways of understanding criticism and interpretation. It begins by examining the discourse on taste and aesthetic value that was so prominent in the 18th century, and concludes with contemporary value discourse (often under
the rubric of "postmodernism"). Theorists to be considered include Hume, Kant, Nietzsche, Marx, Adorno and Lyotard.

COFA6045
Art in History
Honours level
Staff Contact: Fay Brauer
S1 or S2 HPW3 C15
This subject provides the framework within which particular theoretical positions (examined elsewhere in the course) can be employed in the detailed examination of a period or artist or issue. The content and orientation of the subject is intended to reflect the different interests of staff, and will vary from session to session. The following are examples of subjects that might be offered:

- Modern Paintings, Modern Life: Impressionism & Parisian Society
- Culture, Psychoanalysis and Revolution: Image and Word in Surrealism
- Relativism and the Arts of Fragmentation
- Interwar Debates and the Frankfurt School
- Cultural Imperialism, Nationalism and Regionalism

The following is a description of one of these subjects:

This subject looks critically at clichéd views of Impressionism. The paintings are situated in their socio-political context and the relationships between the two are explored. Attention is drawn to Haussmann's modernization of Paris under the Second Empire and concomitant social dislocation. The increasing significance in modern urban culture of institutionalised forms of leisure - cafes, theatres, racetracks and regattas, is discussed. Both the inclusions and omissions of impressionist imagery are considered. Such issues as work and leisure, class and gender, city and country are examined in relation to works by artists including Manet, Caillebotte, Morisot, Cassatt, Degas, Monet and Renoir.

COFA6050
Philosophies of History
Honours level
Staff Contact: Pam Hansford
S1 or S2 HPW3 C15
This subject introduces the different ways of conceiving the domain, methods, functions and definition of history. Beginning with an examination of historicism, empiricism and hermeneutics, the subject proceeds to look at various formulations of history in terms of myth, narrative, archaeology and finality. Each of these topics is illuminated by a discussion of theorists including Reidel, Comte, Dilthey, Sartre, Barthes, Foucault and Baudrillard. The relevance of their writings to art values is explored.

COFA6060
Research Project
Honours level
Staff Contact: Graham Forsyth
S1 or S2 HPW6 C26
This subject provides an opportunity for students to bring the range of art knowledges acquired over the previous five sessions together into a sustained piece of research. Students can choose to research a topic concerned with either a particular artist, art writer, art historian or philosopher, an institution or particular issues during a defined historical period, such as modernity, nationalism, orientalism or gender. Students must then, in consultation with a supervisor, conduct independent archival and field research over a prolonged period of study. From this research, an 6,000 word paper must be developed, demonstrating a cohesive methodology, critical evaluation and classification of research material, valid argumentation and writing skills, together with speculation and a clear delineation of ideas.

COFA6110
The Production of Art
Honours level
Staff Contact: Alan Krell
S1 or S2 HPW2 C10
This subject is primarily concerned with the teaching of arts writing (for example 'journalese', fictional narrative, descriptive prose). The subject looks at these writings within specific cultural fields and their assumed sets of values. It also demonstrates how such categories play an active role in the shaping of meanings in art. Students also become participants in the writing, editing and design of the School of Art Theory's magazine, Artwrite.
argument’, the rhetorical promises of different genres of writing and the delineation of ideas.

**COFA6125**
**Industry Placement**
*Staff Contact: Joanna Mendelsohn*
S1 or S2 HPW2 C10

This subject is designed to place students into specific institutional frameworks for the duration of the session. Students will nominate one such institution at the beginning of the session and work for a specified period of time at the institution, which could be an art gallery, museum, art institution, journal, artist’s studio, library or Fine Art Department. The student shall carry out one project such as curating and/or mounting an exhibition of art work while at the institution, and prepare a report at the end of the session on the project. Alternatively students may produce journal material within the College, in group projects, if such a project seems suitable in particular years.

**COFA6150**
**Audiences for Art**
*Staff Contact: Alan Krell*
S1 or S2 HPW2 C10

The subject exposes students to the different types of contemporary art exhibited locally - in public galleries, dealer galleries, contemporary art spaces, artist run initiatives, community centres and ‘non-art’ spaces such as shopping malls. Designed to reflect the diversity both of art and the institutions through which it is viewed, this subject is structured around an examination of works ‘in situ’. Students are encouraged to engage with work in relation to specific contexts, to consider issues of taste and value and how these are mediated by place and modes of display.

**Honours**

**Honours Seminars**

**COFA6140**
**Specialist Studies**
*Staff Contact: Fay Brauer*
S1 HPW3 C30

Drawing upon Methodologies and Philosophies of Art History, this subject allows for intensive investigation of a period, issue or theme selected to reflect the different specialist interests of staff after consultation with potential students. Topics chosen will be used to highlight theoretical and historical positions previously raised in the course. Topics that might be offered include:

- Colonialism and Nationalism in Australian Art and Culture
- Koori and Associated Cultures
- Art and Culture of the Pacific: Image, Myth and History
- Art and Politics in France from 1789 to the Second Empire
- Theories of Cultural Crisis

The following is a description of one of these topics.

**Formations of Modernism across Continents: Paris-Paris/Paris-Sydney.**

Taking Paris/Sydney as its geographical nexus, constructions and conceptions of Modernist Centre and Periphery will provide the focus of exploration for this subject. Through an investigation of a network of interrelationships between French and Australian Governments’ cultural policies, the press, art journals and book publishers, as well as State Galleries, State funded exhibitions and Salons, dealer-galleries, art schools and artist studios, the different ways in which Modernism emerged, as a discourse and art practice, will be determined.

**COFA6141**
**Thesis**
*Staff Contact: Fay Brauer*
C55

A research thesis of 15,000 words on an approved topic. Students are expected to consult with the Head of School in February about their topics and arrange supervision with a member of staff no later than mid-March, when work on the thesis should commence. Throughout the year students are expected to work closely with their supervisors and attend occasional thesis workshops.

**COFA6142**
**Methodologies and Philosophies of Art History**
*Staff Contact: Graham Forsyth*
S1 HPW3 C25

This subject deals with problems of art historical methodology. It critically examines the different ways of conceiving the domain, functions and definitions of art history through an analysis of such early methodologies as those of Morelli, Berenson, Wolfflin, Panofsky, Schapiro, Antal and Gombrich, as well as such recent seminal texts as Baxandall’s Painting and Experience in Fifteenth Century Italy, T. J. Clark’s Social History of Art, Griselda Pollock’s ‘Feminist Interventions’ into the field of Art History, Bernard Smith’s Imaging the Pacific, Joan Kerr’s Dictionary of Australian Artists, Norman Bryson’s Vision and Painting: The Logic of the Gaze, as well as Laura Mulvey’s Visual and Other Pleasures. The interrelationship between such art methodologies and philosophy will be explored through such key philosophical figures as Hegel, Marx, Kant, Nietzsche, Heidegger, Bourdieu, Foucault, Derrida and Deleuze, to ultimately provide a diversity of tools for the construction of an Honours Thesis.
Course Rules

These rules should be read in conjunction with the Academic Rules of the University as published in the University Calendar.

Admission

Admission Requirements
Candidates who have undertaken the NSW HSC will be ranked on the basis of a score obtained by adding the scaled score of the best two units of art to the scaled aggregate.

All other applicants will be required to submit a portfolio of their recent work in the visual arts by a date and in a form specified by the College. The offer of places in the course will be made in order of merit following assessment of the portfolio, Higher School Certificate Tertiary Entrance Ranking and/or its equivalents.

Assessment

Time Limit
A full-time student must complete the prescribed course for the award of the Bachelor of Art Theory within a maximum of twelve sessions from the date of initial enrolment.

Student Progress

Student progress will be reported at the end of each session.

Attendance

Except where leave is granted:
- students must attend all classes of subjects for which they are registered; and
- where absences in excess of 3 classes occur, students may be given the grade (FL).
The Course

The Bachelor of Design is a 4 year degree with the opportunity to undertake honours study. This course will provide an education for people who wish to enter a range of different areas of the design profession, for example: design studios, advertising agencies, illustration, publications, interiors, theatre, exhibitions, festivals, display fittings and furnishings, decorative and applied design, film, television production and post-production.

In Year 1 students will be involved in a comprehensive and intensive range of 2D, 3D and 4D (or time based) experiences as well as the acquisition of historical, theoretical and technological skills and understandings. These include studying human individuals, society, the environment, and the application of computer skills to design.

In Years 2 and 3 students will extend their work on projects integrating the following: design in graphics/media, applied design and the design of environments. Historical, theoretical and technological contexts will be applied.

In Year 4 students' projects will integrate design studies and a period of work experience into a graduation project/exhibition.

This course recognises the College of Fine Arts' particular strengths, resources and requirements to provide an undergraduate course which places emphasis on an integrated approach rather than on narrow vocational specializations. These strengths are its technology and applied arts base and its relationship with industry, its subjects in visual arts, art education and art theory; and the ability to offer design from a creative and flexible base.

With the growth of specialization in this century the relationship between design and the fine arts has grown more tenuous. Design has seen itself as linked to systems of industrial production and to the growth of the economy. By contrast the present cultural development and the articulation of cultural production in the character of Australia is seen through the Arts - painting, literature, music - not through design.

As the prominent economist John Kenneth Galbraith has said: 'We must cease to suppose that science and resulting technological achievement are only the edge of industrial advance. Beyond science and engineering is the artist; willing or unwillingly, he or she is vital for industrial progress in the modern world'. Reference quoted by Donald Horne (1988) Think or Perish. (Occasional paper No. 8. The Commission for the Future.)

Design Studio Projects: Materials, Equipment and Processes
F HPW2 C60
The aim of these subjects is to introduce and demonstrate the multi-disciplinary and integrated nature of the design process. Students will be involved in a variety of projects which address the acquisition of basic design concepts and the language, materials, techniques and processes by which they are expressed. These projects will initially concentrate on mark-making and its potential as an element in 2D design. Following the development of these understandings, subsequent projects will incorporate 3D forms, spatial and temporal considerations through sequential imagery.

COFA5111
Design Seminar 1
F HPW2 C12
In this subject students will be introduced to an analytical process whereby theoretical and philosophical understandings outlined in Contextual Studies are applied to the creative solution of a design problem. Further, students will be involved in critical analysis of solutions derived in order to develop the capacity to evaluate different design approaches.

COFA5112
History, Theory and Aesthetics of Design 1
F HPW2 C12
The aim of this subject is to discuss and analyse work by different designers and artists to elucidate issues applicable to the aesthetics of design. The issues include:
- the idiosyncratic nature of certain designers’ and artists’ practices.
- basic philosophies of structures and materials as they are expressed as an element of design.
- the interrelationships of form, space, movement and time.
- simple structures, geometric forms and spaces as design elements.
- the experience of spaces and forms perceived through movement.

COFA5113
Interactive Systems Design and Responsible Management of the Environment
F HPW2 C12
The aim of this subject is to introduce and develop understandings about patterns of human habitation. The relationship between ‘nature’ and society is examined in the context of pressures on resources, both past and present, for their implications for the quality of life. Students will develop moral and ethical frameworks within which to evaluate problems and define strategies for solutions.
Further, to continue investigation of notions about interrelationships of ‘nature’, society and the urban environment, and the need for responsibility in formulating models and strategies for the future. Socio-political processes are evaluated for their adequacy to respond to human aspirations and objectives and the design of alternatives is explored.

COFA5114
Design and Human Functioning: The Body at Work
F HPW2 C12
The aim of this subject is to introduce students to basic concepts in psychological studies and their application in the design context. These concepts may include:
- the psychology of perception.
- theoretical approaches to the analysis of human behaviour as it relates to design.
- anatomy.

COFA5210
Design Studio: Graphics/Media 1
F HPW4 C22
The aim of this subject is to develop students’ perceptual awareness through observing objects, photographing and drawing them as pattern and diagram on a flat surface. Freehand and technical drawing will be explored in the development of plan, section and elevation, together with acquiring understandings of compositional possibilities in the use of black/white, positive/negative relationships and colour theory. These understandings will be applied to graphics projects resulting in finished artwork such as is used for poster design and other advertising.
Further, students will develop an ability to identify, analyse and resolve more complex design problems as well as experience coping with various tasks and challenges simultaneously. Students will undertake projects which
require them to synthesize a variety of understandings, materials and processes, extending their skills in illustration, rendering and perspective to explore the potential for graphics design. Students identify projects which arise from understandings acquired in Contextual Studies, and will experience teamwork as a means of understanding the roles of communication and organization in the design process. 2D & 3D CAD, materials and techniques in drawing or those undertaken as individual research in the Core Options will also be applied in these projects.

CCOFA5211
Design Studio: Applied 1
F HPW4 C22
Prerequisite: C0FA5110
The aim of this subject is to develop students' perceptual awareness through cutting, folding and joining flat materials to make the simple geometric solids. The process whereby flat flexible materials are transformed into structure is analysed for the inherent principles involved. These solids are then arranged in space and drawn freehand progressively employing tone, texture and colour to represent 3D form. The conceptual, material and sculptural understandings gained are used to develop designs in the decorative and applied arts.

Further, students will develop an awareness of compound forms. Projects will focus on various aspects of the fabricated environment, and students will construct models to examine the interrelationship of materials and fabrication techniques in their application to design. Students will undertake projects which require them to synthesize a variety of understandings, materials and processes, extending their skills in developing sculptural forms. Students identify projects which arise from understandings acquired in Contextual Studies, and will experience teamwork as a means of understanding the roles of communication and organization in the design process. 2D & 3D CAD, materials and techniques in sculpture or those undertaken as individual research in the Core Options will also be applied in these projects.

CCOFA5212
Design Studio: Environments 1
F HPW4 C22
Prerequisite: C0FA5110
The aim of this subject is to develop students' awareness of space, scale and movement. The principles of perspective drawing are introduced and investigated through freehand and mechanically constructed drawing. The ways in which horizontal and vertical planes define and articulate space are explored through scale drawings and models of simple spaces. Students analyse and record by video and series of freehand drawings their perception of movement through a sequence of spaces. Analysis of the conceptual and material understandings gained are then applied to integrating the aesthetic, spatial and functional aspects of connected volumes as for exhibition, theatrical or promotional events.

CCOFA5213
Design Seminar 2
F HPW2 C12
Prerequisite: C0FA5111
In this subject students will continue to be involved in an analytical process whereby theoretical and philosophical understandings generated in Contextual Studies are applied to the creative solution of a design problem. Further, students will be involved in the critical analysis of the process and solutions derived in order to develop the capacity to evaluate different design approaches and solutions. Students will be expected to articulate such evaluations.

CCOFA5214
History, Theory and Aesthetics of Design 2
F HPW2 C10
Prerequisite: C0FA5112
From general understandings gained in History, Theory and Aesthetics of Design 1, more complex notions about form, space and movement are used to develop aesthetic understandings about the constructed and 'natural' environments. Students understanding of the history of society as it relates to these is expanded to encompass considerations of the characteristics and relationships between internal and external spaces. This is undertaken through a process of tracing design issues through different periods and movements to reveal the manner in which they have been expressed.

CCOFA5215

The aim of this subject is to introduce students to theoretical areas such as sociology and to explore their application in the design context. Concepts will be presented to assist in the analysis of the behaviour of social groups and target populations and issues such as 'green design', social responsibility and the ideology of the image will be explored. Students will be actively involved in observation, analysis and speculation concerning the social factors present in all aspects of the design process.

History, Theory and Aesthetics of Design 3
F HPW2 C12
Prerequisite: COFA5214

The aim of this subject is to develop understandings about the aesthetics of 'craft' and of 'the machine'. The Bauhaus is examined as a pivotal model for the expression of these design issues, which are then traced from the mid-nineteenth century to the present. Issues of industrialisation, mass-production, standardization and of questions around high art versus popular forms will be discussed. Further, tendencies in design and aesthetics since the 1960s are investigated to reveal what have variously been termed Post Modernism, Late Modernism and High-Tech. Students will also explore issues such as Regionalism for evidence of a pluralist repertoire from which to derive alternative designer strategies, and will acquire understandings about the most recent developments in structural systems, methods, composite materials and methods of production.

**Category A Subjects**

**GENS4507**

*Mass Media and Communication*

*S1 or S2 HPW2 C5*

This stream of the subject is entitled "Popular Culture, Mass Media and 'Everyday Life'."

The power of the mass media over the last 150 years has transformed the nature of popular cultures and 'everyday life'. The mass media has assumed such a pervasive power in contemporary societies that is is able to transfigure everyday life without our awareness or control.
By exploring the transition from industrial to post-industrial society in relation to the proliferation and complexity of technologised culture such as radio, television, video and computers, this subject will question the nature of distinctions drawn between the visual arts, popular culture and the mass media. The aestheticisation of everyday life, the coercive impact of the mass media on forms of communication, the patterns of media ownership and control, together with the social and technological development of mass culture over the last 150 years - including the arrival of photography, film, television, the popular press, advertising and the possibilities of alternative media - will be examined.

GENS4521
Aboriginal Australia: A View of its Past, Present and Future
S1 or S2 HPW2 C5
This stream of the subject is entitled "Aboriginal Australia". This subject is offered in order to provide an Aboriginal perspective on Aboriginal society as it was in the past, as it is at present and its prognosis for the future. It is designed to provide an equiponderate account where previously the Aboriginal contribution was either mis-stated, misrepresented or completely ignored.

In presenting a broad overview of Aboriginal Australia from antiquity to the present day, contemporary Aboriginal issues such as land rights, political movements and relationships between Aborigines and law can be addressed from an evolutionary context, rather than from a reactive judgement based solely on the face value of the end product.

GENS4529
Ecosystems, Technology and Human Habitation
S1 or S2 HPW2 C5
This stream of the subject is entitled "Art, the Community and the Environment".

What relationship does a community bear to its natural environment? What constitutes the identities of a community and how are they articulated? How important is it for the identities of a community to be represented through art and culture? How can art and culture help convey the identities of a community and its relationship to a particular environment? If the artist is an 'outsider', how is this to be negotiated?

This subject will explore the formation of communal identities through labour, leisure, architecture, visual communication, art, language, the natural environment and the functions of everyday life. It will examine ways in which the visual arts, architecture, landscape architecture and a range of cultures from theatre to rock concerts have articulated and shaped community identity. It will also consider the politics involved in such interventions, ranging from the so-called imposition of the 'turds in the plaza', earthworks to define remote environments and their relationship to ecology, to the emergence of community arts programmes designed to integrate cultural identities with different forms of urban and rural habitation.

GENS4531
Australian Society and Culture
S1 or S2 HPW2 C5
This stream of the subject is entitled "Race, Nation and Multiculturalism in Australian Society". From first contact, through colonisation, the construction of Federation and a modern nation, post WWII mass European immigration, to modern conceptions of a multicultural Australia at home in Asia, issues of race and nation have been crucial to Australian culture and society.

In examining responses to the Aboriginal inhabitants, relations between English and Irish settlers, notions of British empire, attitudes to and fear of the Asian north, reactions to Chinese settlement, White Australia, the rise of non-British European immigration, conceptualisations of race and nation will be explored. Reactions to U.S. cultural dominance, the impact of recent Asian settlement including 'boat people' and other refugees, the emulation of Asian economic success and the official policy of multiculturalism, are also issues to be questioned in conjunction with formations of identity and Otherness.

GENS4532
Australia and the Development of the World Economy
S1 or S2 HPW2 C5
This stream of the subject is entitled "Regional and International Perspectives on Australian Culture: Australia and the World at Large".

Is Australia 'the lucky country' as Donald Horne proclaimed in the 1960s, rich in natural wealth with a stridently independent identity unburdened by colonial traditions, or is it merely a new Britannia, America's 52nd State? How does Australia's economic performance rate within the world economy and can it compete with computerized technology? When compared to the global market dominance of Japan and the U.S., is it a 'Banana Republic'? How do Australians see themselves in relation to cultures outside Australia? Conversely how do those cultures see Australians?

This subject will not only investigate the roles played by world trade, manufacturing and commerce in shaping Australian society. It will also consider the 'cultural cringe', how Australia may internalise the tyranny of distance and address its so-called provincialism problem as well as its early penal history. Australian identities in relation to others will be explored through these issues as well as ways Australians are seen to represent themselves through a range of cultures from Dame Edna to Biennales.

Category B Subjects

GENS5180
The Use of Language Images and Symbols
S1 or S2 HPW2 C5
This subject may be undertaken as one of two different streams.

Stream 1:
This stream is entitled "Culture and Communication, Disciplines and Boundaries".

Culture is not simply an homogenous thing. The sub-divisions of culture into separate disciplines and the arts has been the product of a long historical development, effecting ways in which the different arts have been perceived as related to or different from each other. At the same time, whilst the partitioning of the arts has seemed securely established by the techniques of making (metiers)
and the specific requirement of the different materials used, there exists a multitude of connections between them.

This subject will address a range of cultural disciplines, including theatre, dance, poetry, music in terms of the interrelationship between such disciplines and the so-called 'Fine Arts'. Questions of the ways in which disciplinary boundaries are constructed, the cultural status of disciplines, the nature of attempts at cross-disciplinary and inter-disciplinary interactions, the effects of new and often hybrid art forms will be examined. The reciprocal influences of such cross-cultural disciplines as the picture-poem ('pictura poesis') or the symphonic painting will be explored in conjunction with the recent development of more synthetic art forms such as installation, dance-theatre or concrete poetry - the ultimate aim of this subject being the broadening of artistic horizons and a hermeneutical understanding of the inter-dependency of all artistic disciplines within the field of Post Modern Culture.

Stream 2:
This stream is entitled "Culture, Language and Knowledge".

How do we know? How do we acquire knowledge? How is knowledge defined? This subject introduces basic concepts interrelating culture, language and knowledge and explores the relationship between perception and knowledge. What is the relationship between language, language acquisition and knowledge? What is the relationship between cultural context, language and the perception of and forms of knowledge? What is the relationship between verbal and non-verbal forms of knowledge in different cultural contexts?

These questions will be addressed in this subject through the introduction of basic concepts in philosophy, art history and anthropology.

GENS5522
Changing Conceptions of Human Nature and Well-Being
S1 or S2 HPW2 C5

This stream of the subject is entitled "The Body, Gender, Sexuality and Pleasure".

This subject introduces students to contemporary theories and philosophies which investigate and problematise the relationship between the body, gender, sexuality and pleasure.

The last 25 years has witnessed an efflorescence of investigations into and theorisation about the relationship between the body, gender, sexuality and pleasure. This theorisation has developed in relationship to feminism, deconstructive theories, structuralism, theories of representation and media developments. The contributions of each of these arenas to the relations between sexuality and pleasure will be explored through an examination of the visual arts, in relation to theoretical and philosophical texts.

GENS5523
The Pursuit of Human Rationality
S1 or S2 HPW2 C5

This stream of the subject is entitled "Art and Science: Imagination and the Pursuit of Rationalism".

Differing notions of rationality have been dominant at different stages in western history, while non-western societies have had varying conceptions of reason. One major contrast, at least in the West, has been that between scientific rationality and art. Since the late 18th century, art has been linked not to knowledge, in a public or intersubjective form, but to beauty and as the expression of an imaginative and subjective knowledge, different from, but complementary to, perception and thought.

This subject will examine the ways in which art and science have been understood as distinct or even opposed forms of activity. Ways in which the science/non-science distinction has been established, competing notions of the bases for knowledge (perception, logic, imagination, creativity), accounts of art as subjective, private and undemonstrable, notions of the imagination and art as a form of knowledge will be investigated.

GENS5524
Beliefs, Values and the Search for Meaning
S1 or S2 HPW2 C5

This subject may be undertaken as one of two different streams.

Stream 1:
This stream is entitled "Religion, Culture and Belief".

The secularisation of the world or its disenchantment (as articulated by Weber) has coincided with a dissemination of the traditional systems of beliefs that used to be able to provide people with a generalised account of the world in which they live, to give them "the big picture". As the Enlightenment dispelled the illusion of divine wisdom as a monopoly of the Christian Church, or any other similarly established dogma, one of the main characteristics of modern society which began to emerge from this time has been the pluralism and eclecticism which characterise religious life and belief systems.

It is the complex manner in which our multicultural society integrates and assimilates heteronomous fragments of religious narratives, both western and non-western, in contemporary art that will be examined in this subject.

Stream 2:
This stream is entitled "Evaluation, Taste and Judgement".

This Subject will be concerned with the history of Taste and the different methods by means of which it has been thought possible to form judgement in this century. The underlying value systems of artistic evaluation will be scrutinised on a critical basis and students will be introduced to the different and often conflicting theories (aesthetic and hermeneutical, semiological and psychoanalytical) which propound to have arrived at a clear understanding of the mechanics or the metaphysics of artistic judgement.

The overriding aim of this subject is to show how no judgement of taste can possibly be thought of as value-free. It will then examine how the evaluation of works of art inevitably entails a projection of beliefs and assumptions of meaning, which are grounded in ideology.

GENS5525
The Computer, its Impact, Significance and Uses
S1 or S2 HPW2 C5

This stream of the subject is entitled "New Technologies, New Perceptions".

New technologies, particularly computer based, have dramatically transformed the ways in which people perceive, understand and deal with their environments. Although this may be understood as simply an extension of the powers of human perception and understanding it is just
as much a transformation or mutation of these powers. From the invention of photography in the 19th century through to the increasing use of electronic image manipulation, which bypass the optical and chemical processes that physically define photography, the links between image and reality, the so-called "truth" of the image has come under increasing question. Electronic imagery, whether on computer screen, television, or hidden in film or photography, has become ubiquitous, transforming the way we experience our world. The use of electronic and computer technology by artists and future possibilities such as virtual reality will also be examined.

*COFA4900
Art, Ethics and Social Responsibility
F HPW2 C10

For this Category C subject, students would be required to participate in two seminars entailing 28 hours each session, to examine the interrelationships of art, ethics and social responsibility. In these seminars, students would be required to address the following seminal questions, in relation to the research component of their Honours year and their practices as intellectuals and professionals in society.

- Does an artist, art writer and/or theorist have obligations to communities?
- Should an artist, art writer and/or theorist position themselves in relation to a nation?
- Can a diversity of behaviour, including discriminative practices and abusive language, be justified in the name of art?
- Can censorship have a role to play in the exhibition of art and the publication of art theory?
- How are differences to be represented, theorised and negotiated, whether they be of culture, gender, sexuality, race, nation, age or income level?
- How may my practices help break down barriers of exclusion and help promote accessibility among different audiences and cultures?
- What kind of values will my practices help promote?
- Will my practices help expand and inspire understandings of art, its histories and theories and roles in societies?

Language Subjects may be substituted for two Category B Subjects under conditions prescribed by the Centre for Liberal and General Studies.

Subject to approval.

### Subjects

#### Core Subjects

**COFA8120**

Management and Organisation: Systems, Services and Survival  
*Staff Contact: Joanna Mendelsohn*

S1 or S2 HPW3 C15

This subject examines the management and administrative skills and knowledge required from individuals to take up positions as directors and managers of arts and related organisations. It covers aspects of management and organisational structures in existing institutions both large and small, public and commercial. It includes the establishment of new organisations and the planning and development of systems designed to ensure the delivery of services and the long term survival of arts organisations and institutions, their human and material resources and the ideas and ideals which drive them.

**COFA8124**

Cultural Property, Ethics and the Law  
*Staff Contact: Alan Krell*

S1 or S2 HPW3 C15

This subject examines the ethical and legal implications of the interactions generated between artists, exhibiting spaces and the viewing/purchasing public in contemporary society. It enables the development of a broader critical perspective on the cultural, legal, political and moral contexts of gallery and museum management. Issues discussed include contracts, copyright, acquisitions and disposal of works, moral rights and censorship, conflict of interest, the responsibilities of trustees.
Elective Subjects

COFA8121
Conservation and Collections Management
Staff Contact: Alan Krell
S1 or S2 HPW3 C15
This subject introduces the principles of conservation and illustrates its role as an integrated component of collections management. It examines the physical nature of works of art and the interactions with their environment. The range of responses of conservation to collections is discussed as well as conservation’s relationship with an institution’s custodial responsibilities and public programs. Conservators and registrars at selected Sydney institutions are visited in order to facilitate a comparative overview of conservation practice.

COFA8125
Exhibition and Gallery Design Development
Staff Contact: Nick Waterlow
S1 or S2 HPW3 C15
This subject considers two areas of design development. These are the theoretical and practical aspects of exhibition design and display techniques and the specific design demands of a gallery space. The ways in which the objectives of an exhibition may be identified are discussed, and all aspects related to project initiation and completion examined. These include planning and design management, budget formulation and controls, production and installation management, spatial requirements and evaluation, light and lighting.

COFA8128
The Development of Art Criticism in Australia
Staff Contact: Joanna Mendelssohn
S1 or S2 HPW3 C15
This subject examines the history of art criticism and writing about art in an Australian context and considers how these practices reflect, diagnose and affect the nature of the visual arts. There is a constant evaluation of recent art criticism from a variety of sources and a questioning of what actually constitutes criticism. At the same time, the subject goes back to the start of writing about art in Australia and looks at the practice from the beginning of European settlement to recent times in an historical context.

COFA8130
Art Galleries and Collections in Australia
Staff Contact: Alan Krell
S1 or S2 HPW3 C15
This subject balances the historical and theoretical aspects of collections (public, private and corporate) with the practical issues involved. How and why collections are formed; the aesthetic and political assumptions behind collecting policies; how well various collections serve their constituencies are some of the issues that are explored. Together with aspects of conservation, storage, documentation and access as they relate to the practical aspects of collection management. Visits are made to various public institutions including state and regional galleries and, where possible, selected private and corporate collections.

Core Options

Core options are chosen from the seminars listed in the MArt course (for subject outlines see page 70 of this handbook).
COFA8137
Festivals and Biennales
Staff Contact: Nick Waterlow
S1 or S2 HPW3 C15
This subject covers the history, conception and implementation of arts festivals and recurrent national and international exhibitions. Particular attention is paid to events in Australia such as the Biennale of Sydney, the Australian Sculpture Triennal and the Adelaide Festival (including Artists' Week). Overseas events include the history of the Biennale commencing in Venice in 1895 to Sao Paulo and Paris, as well as major expositions such as the Indian Triennial, Documenta and the Carnegie International. The history of these complex programs is discussed, in particular, the administrative skills, conceptual insights and artistic resources essential to their successful realisation.

COFA8138
Education and Public Programs
Staff Contact: Nick Waterlow
S1 or S2 HPW3 C15
This subject covers issues surrounding public programs and education in the context of art galleries, museums and related institutions. It addresses questions to do with the identification and definition of audiences, examines the needs of non-specialist communities as well as educational institutions, and takes account of the practicalities of budgeting and planning. The development of programs using volunteer guides (and their training), floor talks, lectures, seminars and conferences, is presented as a subject for practical purposes as well as critical consideration. Also included is a consideration of exhibitions for purely educational purposes.

COFA8139
Human Resources Management
Staff Contact: Lindy Bolitho
S1 or S2 HPW3 C15
This subject provides individuals working in an arts based organisation with competencies relevant to the inter-personal and inter-group skills demanded in the efficient and effective management of organisations. It aims to fulfil the needs of individuals interested in the principles of planning, organisation, communication and evaluation of personnel within an organisation and, as well, the needs of directors and supervisors who wish to develop expertise in essential personnel management aspects of their job within an appropriate theoretical framework.

COFA8140
Marketing and Promotion
Staff Contact: Joanna Mendelssohn
S1 or S2 HPW3 C15
This subject focuses on issues in marketing for those working in arts and related fields. Topics covered include methods of audience research and ways of undertaking group surveys and their implementation. How to define the unique qualities of a target institution and create a public image around this separateness are issues explored, together with detailed studies of promotional and fundraising strategies.

Internship

COFA8127
Internship
Staff Contact: Alan Krell
C5
Students undertake a project based internship consisting of a minimum of 90 hours. This may involve more than one host institution. Internships enable students to gain practical, supervised experience of gallery management, curatorial practice, public programs, art writing and all other work areas related to the course. The internship is ungraded but successful completion requires the submission of reports both by the host institution and the student. Students are also required to attend a report back session with lecturers involved in the program.

Internships have been hosted locally, interstate and overseas by the following, among others: the National Gallery of Australia, Metropolitan Museum of Art (New York), Art Gallery of New South Wales, regional and commercial galleries in New South Wales, Sotheby's Australia Pty Ltd, Australian Centre for Photography, State Library of New South Wales, Visual Arts/Craft Board of the Australia Council, Powerhouse Museum, and the Ministry for the Arts New South Wales.
