Faculty of Medicine

HANDBOOK

1998
Subjects, courses and any arrangements for courses including staff allocated as stated in this Handbook are an expression of intent only. The University reserves the right to discontinue or vary arrangements at any time without notice. Information has been brought up to date as at 1 November 1997, but may be amended without notice by the University Council.

CREDIT POINTS – IMPORTANT NOTE

From 1996, UNSW introduced a university wide credit point system for all subjects offered to both undergraduate and postgraduate students. The system means that a subject will have the same credit point value irrespective of which faculty’s course it is counting towards. Students are able to determine the value of subjects taken from other faculties when planning their programs of study. The student load for a subject is calculated by dividing the credit point value of a subject by the total credit points required for the program for that year of the course. Student load is used to determine both HECS and overseas student fees. Students who take more than the standard load for that year of a course will pay more HECS.

Old subject measures have been replaced by new university credit points. Every effort has been made to ensure the accuracy of the credit point values shown for all subjects. However, if any inconsistencies between old and new credit point measures cause concern, students are advised to check with their faculty office for clarification before making 1998 subject selections based on the credit points shown in this handbook.

It is my pleasure to welcome you to the Faculty of Medicine at the University of New South Wales. My colleagues from the Faculty and I are delighted that you have chosen to begin your professional career with us and we congratulate you upon gaining entry to the undergraduate medical course.

You are joining a University community which has depth and breadth in academic enterprise and social opportunity. The University of New South Wales is a robust institution with traditions of educational and investigative excellence coupled with the vitality of an energetic faculty and administration. I encourage you to explore fully the opportunities available to you as you enter our scholarly community. You are joining us at a time of unprecedented change in higher education and health care delivery. Despite considerable turmoil in the financing of both tertiary education and health care delivery throughout the world, the need for excellence in clinical education, biomedical research and teaching remains a clarion call for institutions of higher learning throughout the globe - a call to prevail in their quest to succeed in preparing the next generation of medical professionals. At the University of New South Wales, we look forward to working with you during your time with us as, together, we confront the challenges ahead and turn them into opportunities.

Your arrival in the Faculty of Medicine coincides with a transition for the Faculty and students alike. After more than a decade of strong leadership by Professor Walter E Glover, the Faculty will chart its course with a new Administration. In a sense, we begin our journey together. As your new Dean, my message to Faculty and students (new and old) is the same:

• We will build on the strong foundation laid over the decades since the founding of this Faculty.
• We will strive to discover that which is true not simply what is most likely.
• We will seek what is best not simply what is possible.
• We will aim for durability not expediency.
• We will be worthy of the trust which society places in us to lead in education, research, clinical care and advocacy.

Your medical education will be a series of counterpoints – outward exhilaration and reflective contemplation, energy and fatigue, didactic learning and enquiry-driven self study. All these and many more experiences await you as you explore the space between the science and art of medicine. A talented faculty and dedicated administrative staff stand ready to assist you.

I bid you welcome again and look forward to the many crossings of our paths as we begin our journey together at the University of New South Wales.

S Bruce Dowton
Dean
Faculty of Medicine
Calendar of Dates

The academic year is divided into two sessions, each containing 14 weeks for teaching. Between the two sessions there is a break of approximately six weeks, which includes a one-week study period, two weeks for examinations, and three weeks recess. There is also a short recess of one week within each session.

Session 1 commences on the Monday nearest 1 March.

Faculties other than Medicine, AGSM and University College, ADFA

Key to Codes
+ Conjoint appointment
* Appointment across two schools
O Adjunct appointment
This Handbook is divided into two main sections comprising undergraduate study and postgraduate study. Read the opening sections of the handbook first, and then read the information relevant to your selected course, undergraduate or postgraduate as appropriate. Detailed information on each subject can then be found under Subject Descriptions, which provides full details of subject content, contacts and session/prerequisite details.

**Information Key**

The following key provides a guide to abbreviations used in this book:

<table>
<thead>
<tr>
<th>Abbreviation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CP</td>
<td>credit points</td>
</tr>
<tr>
<td>F</td>
<td>full year (Session 1 plus Session 2)</td>

**IMPORTANT:** As changes may be made to information provided in this handbook, students should frequently consult the noticeboards of the schools and the official noticeboards of the University.
Some People Who Can Help You

If you require advice about enrolment, degree requirements, progression within courses or any other general Faculty matter contact one of the following people, located in the Faculty of Medicine Administration Building (map reference B27):

Undergraduate – Gordon Rees, Administrative Officer, Faculty of Medicine, telephone (02) 9385 2459.
Postgraduate – Helen Cannella, Administrative Officer, Faculty of Medicine, telephone (02) 9385 2457
Elective term/Clerkships – Moya Pedemont, Administrative Assistant, Faculty of Medicine, telephone (02) 9385 2452.
Jeffrey Warnock, Executive Officer, Faculty of Medicine, telephone (02) 9385 2450.
Faculty of Medicine Administration: fax (02) 9385 1289.

The Faculty

The Faculty of Medicine was established when the New South Wales Government accepted a proposal of the Murray Committee of Inquiry into the Future of Australian Universities and announced in December, 1957, that a second medical school in New South Wales would be established within the re-named University of New South Wales.

The Faculty’s first students enrolled in 1961 and 25 of these graduated from the six year course in 1966. A five year undergraduate curriculum was introduced in 1974. Although this was a highly successful curriculum, a number of changes in both the hospital and health systems indicated the need for the Faculty to extend the course to a six year curriculum in 1988.

The Faculty of Medicine consists of all members of the academic staff, both full time academics as well as conjoint appointees from teaching hospitals, student representatives and other persons nominated by the Faculty. The Presiding Member is elected biennially from the Professors and Associate Professors of the Faculty.

The Dean is the principal channel of communication between the Faculty and the University on administrative matters. The Dean and the Faculty are supported by a number of committees, listed below, some of which perform administrative tasks, while many assist in maintaining a constant review of the curriculum and the objectives of medical education.

Schools in the Faculty of Medicine are Anatomy, Community Medicine, Health Services Management, Medical Education, Obstetrics and Gynaecology, Paediatrics, Pathology, Physiology and Pharmacology, Psychiatry and the Clinical Schools in each of the Prince Henry/Prince of Wales Hospitals, St George Hospital, St Vincent’s Hospital and the South Western Sydney Area Health Service. Each of these Clinical Schools contains Departments of Medicine, Surgery, and Anaesthetics, Emergency Medicine and Intensive Care. The Faculty is supported in its operations by the Centres for Immunology, National Drug and Alcohol Research, Public Health, Thrombosis and Vascular Research as well as a Mass Spectrometry Unit, a Medical Illustration Unit, a National Perinatal Statistics Unit, a Rural Health Unit, the National Centre in HIV Epidemiology and Clinical Research, and a joint Sydney University and UNSW Sexual Health Unit. The Faculty is also affiliated with the Garvan Institute of Medical Research at St Vincent’s Hospital, the Prince of Wales Medical Research Institute at the Prince of Wales Hospital, the Children’s Cancer Research Institute at the Sydney Children’s Hospital, the Victor Chang Cardiac Research Institute, and the Skin and Cancer Foundation.

Goals of the Faculty

The current major goals for the Faculty over the next few years are to achieve continuous improvement in the quality of the undergraduate course and in the quantity and quality of postgraduate research and teaching.
Committee Structure

Faculty of Medicine
Executive Committee of Faculty
Higher Degree Committee
Admissions and Re-enrolment Committee
Curriculum Committee and its various Sub-Committees
BSc MBBS Course Committee
BA BSc(Med)MBBS Course Committee

Children's Cancer Research Institute Advisory Committee
National Drug and Alcohol Research Centre Board of Management
Medical Illustration Unit Advisory Committee
Australian Postgraduate Awards Committee
Rural Health Education Committee
General Education Committee
Computing Committee
National Perinatal Statistics Unit Management Committee

Costs in Addition to Fees

Details of fees have been provided in the Guide to Students 1998 but in Medicine there are additional costs.

Students, when embarking on their degrees, may not be aware of the incidental costs which occur from time to time during the course. The following is an estimate, based on students' experience, of the expenditure which is likely to be incurred over the full length of the course. The amounts quoted are, of course, subject to some variation.

$ approx.

Textbooks 1500
Two coats (1 laboratory, 1 hospital)* 60
Stethoscope 80-300
Ophthalmoscope 180-250
Laboratory Manuals 150
Miscellaneous (papers, pens, kits, diagnostic equipment, laboratory manuals and aids, etc) 300

*One long white coat is required for use in the Schools of Anatomy and Biochemistry and one short coat for use in the hospitals.

Attendance at, and Residence in, Hospitals

From Year 2, students attend hospitals and must wear short white coats while at the hospitals.

There are times in the later years of the course when students are either required or may elect to live in the hospitals for periods ranging from one night to a term. Accommodation charges at the prevailing rate must be paid directly to the hospitals for all periods of residence.

General Education Program

UNSW requires that all undergraduate students undertake a structured program in general education as an integral part of studies for their degree. The University believes that a General Education complements the more specialised learning undertaken in a student's chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they value highly graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. As well, over many years graduates of this University have reported that they greatly valued their General Education studies, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden students' understanding of the environment in which they live and work and to enhance their skills of critical analysis.

Objectives of the General Education Program

The following objectives were approved by the Council of the University in December 1994.

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.

2. To enable students to evaluate arguments and information.

3. To empower students to challenge systematically received traditions of knowledge, beliefs and values.

4. To enable students to acquire skills and competencies, including written and spoken communication skills.

5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.

6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.
7. To provide structured opportunities for students from disparate disciplines to interact co-operatively within a learning situation.

8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist subjects offered in those other areas.

9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross- and interdisciplinary connections.

10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education Requirements

The basic General Education requirements are the same for students in all single degree courses. Over the course of a degree program students must:

- satisfactorily complete a minimum of 30 credit points of study in General Education subjects or their equivalent;

- undertake an additional fifty-six (56) hours of study which ensures that students examine the purposes and consequences of their education and experience at university, and fosters acceptance of professional and ethical action and social responsibility. This fifty-six hours of study may be distributed throughout the course, or exist as a separate subject, depending on the course.

Because the objectives of General Education require students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation, all students are excluded from counting subjects toward the fulfilment of the General Education requirement, which are similar in content or approach to subjects required in their course.

Faculty Requirements

Each Faculty has responsibility for deciding what subjects are not able to be counted towards the General Education requirement for their students. In most cases, this means that subjects offered by the Faculty in which a student is enrolled, or subjects which are a required part of a course even though offered by another Faculty, are not able to be counted toward the General Education requirement.

Students should consult the General Education Handbook for detailed information about what subjects may and may not be taken to fulfill the General Education requirements for each course offered by the Faculty. The General Education Handbook is freely available from all Faculty Offices.

Additional information for undergraduate students who first enrolled before 1996

Transitional arrangements

It is intended that no student will be disadvantaged by the change to the new General Education Program. The old Program had specific requirements to complete four session length subjects (or their equivalent) in designated categories A and B. The new General Education Program does not categorise subjects in the same way.

As a result, students who enrolled prior to 1996 will be given full credit for any General Education subjects completed up to the end of Session 2, 1995. From the summer session of 1995-96, students will be required to satisfy the unfilled portion of their General Education requirement under the terms of the new Program.

The exemption of General Education requirements for some double or combined degree programs will continue to apply for students who enrolled in these exempt courses prior to 1996.

Students With Disabilities

The University of New South Wales has a policy of equal opportunity in education and seeks wherever possible to ensure maximum participation of students with disabilities.

The University offers a range of assistance: examination support; specialised equipment; educational support; parking provisions; library assistance; note taking; readers and sign interpreters.

A Resource Guide for students is available from the Equity Officer (Disabilities), the Equity & Diversity Unit, the Library and the Student Guide.

It is advisable to make contact with the Equity Officer (Disabilities) prior to, or immediately following enrolment, to discuss your support requirements. The Equity Officer (Disabilities) can be contacted on 9385 4770 or at the Equity & Diversity Unit located on Level 2, East Wing, Quadrangle Building.

Each School of the Faculty of Medicine also has a contact officer for students with disabilities.

Student Equity

The University of New South Wales is committed to providing an educational environment that is free from discrimination and harassment. Both Commonwealth and State anti-discrimination law requires the University not to discriminate against students or prospective students on the following grounds: sex, race/ethnicity, age, disability, marital status, pregnancy, sexuality, HIV/AIDS. Also included are acts of vilification on the grounds of: race, HIV/AIDS and homosexuality.
Complaint/Disputes
The University has internal dispute handling procedures to deal with complaints against staff or other students. The Discrimination and Harassment Grievance Procedures are handled by the Equity & Diversity Unit. Complaints that concern academic matters are usually handled through the Head of School.

Advocacy and Support
Students can seek assistance getting disputes resolved, either in relation to discrimination or academic matters. Assistance can be sought from various areas in the University including: Equity & Diversity Unit; Student Guild Advocacy Service; Student Counselling; Course Coordinators; Senior Academic Staff; Heads of School.

Students may be confident that their interests will be protected by the University if a complaint is lodged. This means that students should not be disadvantaged or victimised because they have, in good faith, sought to assert their rights to equal opportunity in education.

Equal Opportunity in Education Policy Statement

Under the Federal Racial Discrimination Act (1975), Sex Discrimination Act (1984), Disability Discrimination Act (1992) and the New South Wales Anti-Discrimination Act (1977), the University is required not to discriminate against students or prospective students on the grounds of sex, marital status, pregnancy, race, nationality, national or ethnic origin, colour, homosexuality or disability. Under the University of New South Wales Act (1989), the University declares that it will not discriminate on the grounds of religious or political affiliations, views or beliefs.

University Commitment to Equal Opportunity in Education
As well as recognising its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards her/his maximum potential. The University further commits itself to course design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

Special Admissions Schemes
The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment. As well, the Faculty of Medicine operates special admission schemes for refugee medical practitioners and for students from rural and remote areas.

Rural Student Entry Scheme
The Faculty may admit up to six students from rural New South Wales who meet a number of criteria relating to their education and residence. Further information may be obtained from the Rural Health Section, School of Community Medicine at the University, tel (02) 9385 3250

Support of Disadvantaged Students
The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

The Faculty of Medicine also sponsors remedial English classes for those students disadvantaged by English communication difficulties. Details can be obtained from the Faculty Office.

The Faculty of Medicine has also established a Committee of Women Academics who, as part of their brief, monitor any special problems that may arise for female medical students.

Course Content, Curriculum Design, Teaching and Assessment, and Printed Material
Schools and faculties will monitor course content (including titles), teaching methods, assessment procedures, written material (including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

Equal Opportunity Adviser Scheme
The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

Harassment Policy
The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.

Grievance Officers and Procedures
Students should attempt to resolve any grievance with the staff member(s) concerned within a reasonable time frame. If the problem is still unresolved, students should contact staff in the Faculty Administration Office, who will direct them to the grievance officer nominated from the appropriate school.

Grievance procedures to be followed are detailed in the Student Guide.
Hospital Teaching Campuses

The South Eastern Sydney Area Health Service

Telephone (02) 9382 9898, Facsimile (02) 9382 9891

The South Eastern Sydney Area Health Service was formed in 1995 with the amalgamation of the Eastern and Southern Area Health Services. The Area extends from Sydney Harbour in north through Botany Bay and Port Hacking to the Royal National Park in the south.

The Area provides a range of hospital and community health care services for some 712,000 residents. It also serves a significant daily inflow of people to the Central Business District, the University of New South Wales, the local and international airports, Kings Cross and popular beaches. Many people per day transit the area.

Three principal teaching hospitals, three specialty referral hospitals and many associated teaching hospitals are located in the area. There is predominantly an aging population. Approximately 32% of residents are born overseas and 68% of those are from non-english speaking countries. It is anticipated that the population will remain relatively static, with only 3% projected growth by 2001. Services are being constantly reviewed to ensure that they meet the needs of the community.

Principal Teaching Hospitals

Prince Henry / Prince of Wales Hospitals
High Street, Randwick 2031
Telephone: (02) 9382 2222, Facsimile: (02) 9399 6191

The Prince Henry and Prince of Wales Hospitals are managed as the one hospital, with a sharing of services across both sites.

The hospitals are currently being redeveloped and all acute services are progressively being transferred to the Prince of Wales site with Prince Henry Hospital redeveloped as a Centre for Geriatric and Rehabilitation Medicine. This should be completed in 1999.

The Group currently consists of 665 beds covering all specialties and subspecialties. In addition, Statewide services provided include: Hyperbaric Unit, Spinal Injuries, Lithotripsy, HIV Special Unit and Albion Street Centre.

The hospital shares its Randwick campus with the Sydney Children’s Hospital and the Royal Hospital for Women. A 185 bed private hospital will also be opening on the site in 1998.

Sydney Children’s Hospital
High Street, Randwick 2031
Telephone (02) 9382 1111, Facsimile (02) 9382 1777

This is a paediatric tertiary referral hospital serving the whole of the state, one of two such children’s hospitals in New South Wales. It comprises 190 available beds located at the Randwick campus. There are also beds at the Prince Henry Hospital. It has close links through specialist and resident staff with other teaching and associated hospitals such as the Royal Hospital for Women and Royal North Shore, Liverpool and Wollongong Hospitals. It provides a complete range of paediatric services and has strong links with complimentary adult services at Prince Henry and Prince of Wales Hospitals. There are also strong links with community based child health services and local private practitioners.

There is a care-by-parent unit providing accommodation for parents and siblings with a Ronald McDonald House providing additional care-by-parent accommodation.

The Royal Hospital for Women
Barket Street, Randwick 2031
Telephone (02) 9382 6111, Facsimile (02) 9382 6513

The Royal Hospital for Women is the University’s principal teaching hospital in obstetrics and gynaecology. The Hospital was established by the Benevolent Society of NSW in 1866 and was Australia’s first ‘lying-in’ hospital. The first medical undergraduate students came to the Royal in 1888. The Hospital relocated from Paddington to Randwick in 1997 to purpose built facilities.

The Hospital is an incorporated facility of the South Eastern Sydney Area Health Service with 175 beds. There are approximately 4,000 births annually and over 6,500 gynaecological procedures. It is a specialist hospital for obstetrics and gynaecology and includes a department of neonatal paediatrics. The visiting medical staff numbers 51 and the resident medical staff 28.

The first baby health clinic in NSW, the forerunner of today’s Early Childhood Health Centres, was established in 1906. The State’s first Antenatal Clinic was also started at the Royal Hospital for Women in 1912 and this was the third such clinic in the world. In 1931 the first Archeim Zondeck Pregnancy Test was performed in Australia at the Royal Hospital for Women. In 1948 the Royal established Australia’s first Cancer Detection Clinic and in 1984 the first Chorionic Villus sampling was performed at the Hospital.

The Hospital’s Department of Medical Imaging has an international reputation for research and development of ultrasound technique and equipment in obstetrics. The Gynaecological Oncology Centre, the first of its kind, was established in 1989 and has world wide standing for its work on ovarian cancer and gynaecological malignancy.

The St George Hospital
Gray Street, Kogarah 2217
Telephone (02) 9350 1111, Facsimile (02) 9350 3999

The St.George Hospital was founded in 1894. It has subsequently developed from a District Hospital into a Teaching Hospital, initially with the University of Sydney in 1963 and then as a Principal Teaching Hospital with the University of New South Wales from January 1967.

The Hospital has recently undergone major redevelopment. Current bed capacity is 616. A 200 bed Private Hospital is
There are 17 Chairs at the Hospital which include medicine, of Charity which comprises St. Vincent's Private Hospital surgery, cardiology, endocrinology, immunology, psychiatry (228 beds), Sacred Heart Hospice (100 beds), the Garvan St. Vincent's is part of the integrated campus of the Sisters medical officers.

There are 80 staff specialists and 150 resident Clinical Pharmacology and the Anxiety Disorders Unit. The St Vincent's Hospital has 360 beds and is an acute research institute and St. Vincent's Clinic. The St Vincent's Hospital is the principal referral hospital and a pre-eminent teaching hospital of the University of New South Wales. It is operated in accordance with the philosophy, mission and values of the Sisters of Charity. The Hospital was founded in 1857 and moved to the present site in 1870.

Students of medicine have attended the hospital since 1891 and from 1923 to 1969 the Hospital was a Clinical School for the University of Sydney. Since then it has been a Clinical School of the University of New South Wales. The Clinical School and a student hostel were built in 1964. At present the Clinical School contains teaching facilities with audiovisual equipment, common rooms, a library and a pathology museum.

The St Vincent's Hospital has 360 beds and is an acute general hospital with highly developed specialist units in adult medicine and surgery and diagnostic services. The Hospital provides referral services for New South Wales and Australia and services for the local community. Specialty services at the Hospital include cardiac transplantation, bone marrow transplantation, a Cancer Care Centre which provides an integrated approach to the management of malignancy and a comprehensive AIDS service. Sophisticated diagnostic departments which include radiology, all branches of pathology and nuclear medicine support the clinicians of the Hospital. Extensive primary and secondary services are also provided to meet the needs of the local community and these include medical, surgical, geriatric and drug and alcohol services.

Research is undertaken in the Garvan Institute of Medical Research, Professorial Departments, the Department of Clinical Pharmacology and the Anxiety Disorders Unit. There are 17 Chairs at the Hospital which include medicine, surgery, cardiology, endocrinology, immunology, psychiatry and clinical pharmacology. The visiting medical staff numbers 100; there are 80 staff specialists and 150 resident medical officers.

St. Vincent's is part of the integrated campus of the Sisters of Charity which comprises St. Vincent's Private Hospital (228 beds), Sacred Heart Hospice (100 beds), the Garvan Institute of Medical Research, the Victor Chang Cardiac Research Institute and St. Vincent's Clinic.

**Associated Teaching Hospitals**

**Calvary Hospital Kogarah Inc**
91-101 Rocky Point Road (Cnr Fitzgerald Avenue), Kogarah 2217
Telephone (02) 9587 8333, Facsimile (02) 9587 1421

Calvary Hospital Kogarah Inc is a Third Schedule Public Hospital conducted by the Sisters of the Little Company of Mary. The Hospital was opened in 1966 and provides multidisciplinary palliative care services for 80 inpatients and day-only admissions. The Hospital has a 20-bed Geriatric Rehabilitation Unit, full multidisciplinary team and therapy gymnasium. There is a Community Palliative Care Team offering holistic, family-oriented care to people with terminal illnesses within the South Eastern Sydney Area Health Service who choose to live at home. An Outpatient Pain Clinic is available at Calvary for these and other patients. Calvary staff offers a consultative service to nursing homes and private hospitals.

The Hospital staff is involved in teaching Palliative Care to undergraduate medical students and postgraduate nursing students. Training courses for volunteers in bereavement counselling and other aspects of palliative care are also offered.

Calvary Hospital is the provider of Community Rehabilitation and Geriatric Services (CRAGS) and specialises in helping the frail, elderly, and the disabled of the St George district. CRAGS is the Aged Care Assessment Team, and offers Dementia Support, Podiatry, Hydrotherapy, Mobility Training Clinics and Day Care services.

**The Langton Centre**
cnr Nobs and South Dowling Streets
Surry Hills 2010
Telephone (02) 9332 8777, Facsimile (02) 9332 28700

The Langton Centre is a specialist agency for the treatment of addictions. The Centre provides medicated detoxification, group and individual counselling, and medical and psychological interventions for dependent drug users. The Centre operates a methadone maintenance clinic and a needle and syringe exchange program. The Centre is active in a number of clinical research projects, including the investigation of new pharmacotherapy for opioid dependence, accelerated detoxification, and the role of psychiatric morbidity in addictive disorders. The Centre provides training for medical and nursing undergraduates, and registrar training.

The Langton Centre was fully refurbished in 1996 and is now linked administratively to St George Hospital. The Langton Centre inpatient beds are now located in Sydney Hospital, and this access to general hospital beds has provided the basis for new research projects into intensive methods of inpatient treatment for drug dependence.
Sacred Heart Hospice
170 Darlinghurst Road, Darlinghurst 2010
Telephone (02) 9361 9444, Facsimile (02) 9361 9555
The Hospice was established in 1890. It is owned and
governed by the Sisters of Charity of Australia and is a
public hospital. It provides a comprehensive palliative care
service incorporating medical, nursing, pastoral, therapy,
wellfare, educational and bereavement services. These
services are available to in-patients and home-care patients
and extend to the support of the patients' families. Respite
care is provided.

Conducted by the Hospice are formal educational programs
for Hospice staff, staff from other facilities and tertiary
students.

The present purpose-built Hospice was opened on 6
November 1988. It has 100 in-patient beds and four day-
hospital beds.

The Scottish Hospital
2 Cooper Street, Paddington 2021
Telephone (02) 9361 1111, Facsimile (02) 93601949
The Scottish Hospital is a 60 bed acute care private hospital
situated in Paddington. The Hospital specialises in ENT
surgery, plastic surgery, orthopaedic surgery, gynaecology
surgery and rehabilitation medicine.

Facilities include three state-of-the-art operating theatres
and a 5-bed intensive care unit. A modern IVF Unit is in
existence as well as a modern 6-bed Day Surgery Unit.

St Lukes Complex
18 Roslyn Street
Potts Point NSW 2011
Telephone (02) 9356 0200, Facsimile: (02) 9357 2334
St Luke's Hospital Complex, a not-for-profit public
benevolent institution provides acute hospital, nursing
home and aged care services. St Luke's (Private) Hospital
is a 99 bed acute General Hospital providing comp-
rehensive surgical, medical and rehabilitation care. Facilities
include 4 operating theatres, 6 bed intensive care unit, a
day surgery/procedures unit, endoscopy unit, telemetry/
sleep studies unit, rehabilitation unit including hydrotherapy
pool and diagnostic radiology service, including CT Scan.

Services provided include Colo-rectal Surgery, Ear Nose &
Throat Surgery, Gastroenterology, General Surgery,
Gynaecology, Specialty Hand Surgery, Neurosurgery,
Ophthalmology, Oral and Faciomaxillary Surgery, Plastic
Surgery, Urology, General Medicine and Rehabilitation.

St Vincent's Private Hospital
406 Victoria Street, Darlinghurst 2010
Telephone (02) 9332 7111, Facsimile (02) 9332 7234
The first St Vincent's Private Hospital opened in 1909 in
association with the Sisters of Charity General Hospital
whose origins in Darlinghurst date back to 1838. The
present St Vincent's Private Hospital was opened in 1976.

Consultants from most specialties are represented on its
medical staff and the Hospital is equipped and staffed to
provide tertiary referral services. The Hospital is an acute
medical and surgical hospital of 230 beds with nine
operating theatres including the Day Surgery Unit and an
Intensive Care Unit.

The Hospital is accredited by the Australian Council on
Health Care Standards.

The mission of St Vincent's Private Hospital, consistent
with the values and health care philosophy of the Sisters
of Charity, is to preserve a Catholic identity in health care
and to provide excellent holistic services through value
based team work, commitment, skill and technology.

Sutherland Hospital Caringbah
Kingsway, Caringbah 2229
Telephone (02) 9540 7111, Facsimile (02) 9540 7197
The Sutherland Hospital Caringbah, founded in 1955, is
an Associated Teaching Hospital of the University of New
South Wales. It is a general medical, surgical and obstetric
hospital, with various subspecialties. There are also
psychiatric and rehabilitation, oncology and day surgery
units, a 22 bed paediatric ward, and a busy emergency
department.

The Hospital has 342 beds. There is also a well equipped
library.

Based in the rapidly expanding south eastern suburbs, the
Hospital serves an approximate population of 200,000.

The Hospital is staffed by 75 visiting medical staff, 14 staff
specialists and 49 resident medical staff.

Sydney Hospital and Sydney Eye Hospital
Macquarie Street, Sydney 2000
Telephone (02) 9382 7111, Facsimile (02) 9382 7320
Sydney Hospital, the first hospital in Australia, was
established at Dawes Point shortly after the arrival of the
First Fleet in 1788. It was transferred to the Sydney Hospital
site in Macquarie Street in 1811 when Governor Macquarie
built the 'Rum' Hospital. The first Nurses Training School in
the Florence Nightingale tradition was established at the
Hospital in 1868.

Sydney Hospital and Sydney Eye Hospital has 113 beds
and a 24 hour Accident and Emergency Service. It provides
inpatient and outpatient services in general medicine,
general surgery, orthopaedics, ENT, hand surgery, and
ophthalmology. There are 70 visiting medical staff, 4 staff
specialists and 45 resident medical officers.

Located on the Sydney Hospital site is the Sydney Sexual
Health Centre and the Occupational Health and Safety
Centre. The Hospital Complex also includes the Kirketon
Road Centre in Kings Cross, the Langton Centre at Surrey
Hills and the Bourke Street Drug and Alcohol Centre.

A Centre for Sexual Health, jointly administered by the
University of Sydney and the University of New South
Wales, was established at Sydney Hospital in 1992.

The Hospital has a medical library of full teaching hospital
standard and a medical staff common room but provides
no accommodation. The campus has undergone major
refurbishment including construction of a patient services
block.
War Memorial Hospital Waverley
125 Birrell Street, Waverley 2024
Telephone (02) 9387 1166, Facsimile (02) 93877018

War Memorial Hospital, Waverley is a Third Schedule Public Hospital under the governance of the Uniting Church in Australia, NSW Synod.

Opened in 1921 as a 19-bed private hospital under the management of the then Methodist Church, by 1969 the Hospital had grown to a 140-bed Third Schedule Hospital providing general medical, surgical and obstetric services. In 1984, after rationalisation, the Hospital commenced its primary role in geriatric rehabilitation and assessment services.

The Hospital now runs a 35-bed geriatric rehabilitation and assessment unit, a 20-place geriatric rehabilitation day hospital, a 20-bed short stay residential respite unit, a day care unit which provides services for both frail and demential clients and non-English speaking background groups, a podiatry outpatient services.

War Memorial Hospital also supports an aged care assessment team as well as a number of specialist clinics and service. Other service components of the Hospital include spouse accommodation for country patients and office accommodation for the Waverley Community Team.

Bankstown-Lidcombe Hospital, Bowral, Camden, Campbelltown, Fairfield, Liverpool and Queen Victoria Memorial (Picton). There are two Third Schedule institutions, namely Carrington Centennial Nursing Home and Karitane Mothercraft Society.

The Area Health Service remains committed to the integration of community health and hospital services in order to provide a comprehensive service to its population, which is expected to grow to more than 900,000 people by 2011.

Teaching Hospitals

Liverpool Health Service
Liverpool Hospital and Liverpool Community Health Service
Elizabeth Street, Liverpool 2170
Telephone (02) 9828 3000 Facsimile (02) 9828 6318

There has been a hospital in Liverpool since the early nineteenth century. The present hospital has 500 beds and provides services in medicine, surgery, intensive care, anaesthetics, emergency medicine, paediatrics, obstetrics and gynaecology, dermatology, psychiatry, geriatrics, rehabilitation, drug and alcohol, sexual health medicine and a range of allied health disciplines. It is a major trauma centre and is developing as the tertiary referral centre for the South Western Sydney Area.

A full range of pathology services is provided on site by the Area Pathology service. Specialty medical training is provided in most services, and research activities are rapidly expanding. Academic units have been established in most specialties.

There is a strong community orientation and close links with the Liverpool and Hoxton Park Community Health Services and South Western Sydney Public Health Unit. A Division of General Practice has been formed by local GPs.

There are good residential and recreation facilities on the Hospital grounds and a well equipped library. There are well developed education programs for both undergraduates and postgraduates.

A major redevelopment is under way and the Hospital will eventually have 690 beds.

Bankstown-Lidcombe Health Service
Bankstown-Lidcombe Hospital and Bankstown Community Health Service
Eldridge Road, Bankstown 2200
Telephone: (02) 9722 8000 Facsimile: (02) 9722 8570

The Bankstown Health Service comprises the Bankstown-Lidcombe Hospital and Community Health Service. Bankstown-Lidcombe Hospital is a 454 bed Teaching Hospital of the University of New South Wales. The Hospital provides for a catchment area of approximately 180,000 in population.

The Hospital provides a full range of medical and diagnostic services. 1996 heralded the commissioning of a new state-of-the-art hospital. Services include: subspecialties based medicine, surgery, intensive care, obstetrics and
gynaecology, paediatrics, anaesthetics, emergency medicine, mental health as well as a strong emphasis on aged care (80 beds for geriatric medicine, rehabilitation, aged psychiatry). In January 1997, an Academic Chair in Aged Care and Rehabilitation was established. The Professor of Aged Care and Rehabilitation is also the Director of the Service. The Hospital also boasts a strong Gastroenterology Service. An Academic Chair in Gastroenterology will be established in recognition of the high level of this Service. A full range of imaging and clinical measurement modalities is provided. Substantial teaching facilities exist in the new hospital.

The overall objective is the integration of the hospital with community services to provide an optimal, self sufficient, fully integrated health service to the Bankstown Local Government Area.

The Bankstown Health Service is committed towards high standards of training and education amidst a relaxed and friendly atmosphere. Accredited training is available in the majority of specialties for both undergraduates and postgraduates. A strong Division of General Practice is operated by local GPs and is well integrated into education programs and service provision.

The Campbelltown Health Service
Campbelltown Hospital and Campbelltown Community Health Service
Therry Road, Campbelltown 2560
Telephone (046) 25 9222, Facsimile (046) 29 1338

Campbelltown Hospital is a general, paediatric, maternity and psychiatric hospital situated in the City of Campbelltown in the south western suburbs of Sydney. This modern Hospital provides a high standard of general medical care to the surrounding population of over 200,000 with a predominance of young families. The area has one of the highest growth rates in the State and the Hospital is committed to the continued provision of high standard community, inpatient and emergency care as the population expands. The Hospital recently became the first public hospital in Australia to be awarded the prestigious ISO 9002 certification.

Campbelltown Hospital has 210 beds providing general medical and surgical, obstetrics and gynaecology, orthopaedic, paediatric, anaesthetic and mental health services. This includes an 8 bed intensive care/coronary care unit, a very busy 30 bed paediatric unit with a 15 bed Level II special care nursery. A very busy emergency department operates 24 hours per day and is staffed by a Specialist Director and Career Medical Officers. Day procedure facilities are provided by a very active free standing Day Surgery Unit. The Unit has two operating theatres and one procedure room and currently performs approximately 5600 procedures a year.

Medical students from UNSW rotate through the hospital for their obstetric, paediatric and psychiatry terms and Department of Emergency Medicine/Critical Care.

Campbelltown also offers a 20 bed inpatient psychiatric facility in a recently expanded on-site facility (Waratah House). As part of the Campbelltown Health Service, the Hospital is involved in the co-ordination and development of community health services in Campbelltown.

Plans are underway to expand the hospital to 350 beds by 2001.

The Fairfield Health Service
Fairfield Hospital and Fairfield Community Health Service
Cnr Folding Street and Prairievale Road
Wetherill Park 2164
Telephone (02) 9616 8111, Facsimile (02) 9616 8240

Fairfield Hospital is a 190 bed facility and provides services in general medicine, general surgery, maternity and paediatrics. Located on the Fairfield Hospital Campus are also the following Area services: General Practice Unit, Interpreter Service, Ethnic Obstetric Liaison Service.

The Fairfield Hospital opened in November 1988 and provides health services for the Fairfield local government area community. In addition, the Hospital has a Level II Special Care Nursery, a 24 hour Accident & Emergency Service, a 10 bed ICU and CCU and has in place a Domiciliary Midwifery Program for well mothers and babies.

The South Western Sydney Area’s General Practice Unit is located at Fairfield Hospital. The Unit commenced in 1991 and is run jointly with the University of New South Wales and contains a Professor of General Practice. It provides general practice style service for patients and staff of the Hospital. It also acts as a centre of education for existing and future general practitioners in the area and liaises between the Hospital and general practice.

Fairfield Health Service has commenced a Community Paediatric Service with the appointment of a Staff Specialist Community Paediatrician. Appointments of Community Nursing Staff are being made to assist the Paediatricians to provide a comprehensive service in the Area.

Comprehensive Health Services are provided from three Centres located in Mitchell Street Carramar, Levuka Street Cabramatta and in Prairiewood on the Hospital campus. Youth primary health care services for residents of Fairfield and Liverpool are provided by FLYHT based at Bonnyrigg.

The relocation of the Karitane Mothercraft Society to Mitchell Street, Fairfield (Old Fairfield Hospital site) occurred in April 1994. Construction of the 72 bed Braeside Hospital providing services in Rehabilitation, Psychogeriatrics and Palliative Care on the grounds of Fairfield Hospital was completed in 1996.

Corrections Health Service
Long Bay Correctional Centre
Anzac Parade, Little Bay, 2036
Telephone (02) 9289 2977, Facsimile (02) 9311 3005

The Service provides or arranges all health services for inmates. It was the first non-indigenous Health Service in Australia commencing with the First Fleet. It has a 120 bed hospital at Long Bay. 90 beds are psychiatric, of which
30 are the State's Maximum Security Unit for Forensic Psychiatry patients. Its acute admission ward has 600 admissions a year, 75% being persons with emotional responses to situational factors. The Service also conducts busy general practice, general surgery, physician, ophthalmic, dermatology, psychiatric, ENT and orthopaedic clinics. It has a large methadone maintenance program and many public health issues are being addressed.

The Illawarra Area Health Service

Telephone (042) 755 111, Facsimile (042) 761 447

The Illawarra Area Health Service covers an area immediately to the south of the Sydney Metropolitan Area, and comprises the Local Government Areas of Wollongong, Shellharbour, Kiama and Shoalhaven. The estimated total population of the Illawarra is 327,000 which comprises 5.4% of the total New South Wales population.

The Illawarra Area Health Service is a network of integrated community and hospital services which provide both public and personal health care.

The Area Health Service has an agreement with the University of New South Wales for the Health Service to be an Associated Teaching Campus of the University.

Associated Teaching Hospitals

Wollongong and Port Kembla Hospitals

The Wollongong and Port Kembla Hospitals are significant components in the establishment and development of a major teaching Area Health Service for the Illawarra. Currently, the Wollongong and Port Kembla Hospitals are Associated Teaching Campuses of the University of New South Wales.

A newly built Clinical Services Block at the Wollongong Campus will be fully commissioned in 1998 and will provide state-of-the-art critical care including a 20 bed ICU and 8 Operating Theatres. The Wollongong and Port Kembla Hospitals provide complimentary services with all acute services located at the Wollongong Hospital. The Port Kembla Hospital comprises 52 beds for Rehabilitation and Psychiatry Services. The Wollongong Hospital with 240 beds provides a full range of tertiary services including medical imaging; maternal and paediatric services; surgical services including neurosurgery and medical services including a full range of medical subspecialties.

The Illawarra Area Health Service also provides a comprehensive psychiatry service for both inpatients and the community. General practitioners throughout the Division of General Practice also have an active role in the integration of community and hospital services and provide excellent training opportunities in general practice.

Shellharbour Hospital

The Shellharbour Hospital has 150 beds (5 of which are high dependency). The Hospital provides emergency, medical, surgical, psychiatric, obstetric and psychiatric services. The GP Training Unit is also based at this Hospital.

The Illawarra Area Health Service provides comprehensive mental health care, with psychiatric care consolidated at Shellharbour Hospital which has 34 acute inpatient beds. Lakeview House, the psychiatric rehabilitation facility for the Area, also located at Shellharbour Hospital has 20 inpatient beds and provides care for 20 day patients.

The Mid North Coast Health Service – Central Sector

Port Macquarie Base Hospital

Wrights Road, Port Macquarie 2444
Telephone (065) 81 2000, Facsimile (065) 80 1110

Port Macquarie Base Hospital is the first privately operated and owned hospital in Australia, built specifically to meet the requirements of a twenty year Services Agreement with the NSW Department of Health for the admission and treatment of public patients. The Agreement sets objective standards for the provision of high quality health care including specific quality standards.

This 161-bed Hospital opened its doors to the public in November 1994 and is a comprehensive referral hospital for both public and private patients of Port Macquarie and surrounding areas. Port Macquarie is one of the largest health centres of the region boasting some 45 specialist medical staff. The Hospital provides a 24-hour accident and emergency service; general surgery; orthopaedic surgery; vascular surgery; gynaecology; obstetrics; urology; ear, nose and throat surgery; renal medicine; oncology; cardiology; thoracic medicine; general medicine; paediatric and neo-natal medicine; psychiatry and emergency medicine.

Port Macquarie Base Hospital in the short time it has been opened has received several awards and commendations for its clinical excellence, and also for its excellence in service delivery and quality patient care. In addition to achieving Associated Teaching Hospital status with the University of New South Wales, University of Sydney and the University of Newcastle, the Hospital has been accredited by the Medical Association/Colleges of Physicians, Surgeons, Obstetrics and Gynaecology, Orthopaedics and Psychiatry.

The Base Hospital is a significant teaching hospital boasting registrars in medical, surgical and orthopaedic, obstetrics and gynaecology with a number of medical officers and medical students.
The Greater Murray Health Service

Wagga Wagga Base Hospital
PO Box 159, Wagga Wagga NSW 2650
Telephone (069) 386 666 Facsimile (069) 218 243

Associated Teaching Hospital

Wagga Wagga Base Hospital is a 220-bed acute regional hospital and has specialists in most major disciplines (medicine, paediatrics, surgery, orthopaedics, anaesthetics, O&G, ENT, ophthalmology, geriatrics, rehabilitation, psychiatry and emergency medicine). The Emergency Department has 3 staff specialists and has a major trauma role.

The Base Hospital is a significant teaching hospital boasting registrars in medical, surgical, orthopaedics, anaesthetics, obstetrics and gynaecology with a number of resident medical officers and medical students and is a primary allocation centre.

Located midway between Sydney and Melbourne, the City of Wagga Wagg has a population of 57,000 and provides an excellent country lifestyle and all the social recreational and business amenities of a major rural city.

Faculty Units, Centres and Affiliated Institutes

Biomedical Mass Spectrometry Unit

The Biomedical Mass Spectrometry Unit (BMSU) is one of five UNSW beachhead facilities providing research support to investigators on this campus and in the affiliated teaching hospitals. The BMSU is equipped to world standards and is expert in the characterisation and quantitation of trace amounts of material in biological tissues and fluids. The staff of the BMSU are active in several research areas including: studies of the mechanisms of ageing, oxidative damage, phaeochromocytoma diagnosis, and the role of neurotoxins in neurodegenerative disease.

The Centre for Thrombosis and Vascular Research

The Centre for Thrombosis and Vascular Research was formed in 1992 with the purpose of bringing together scientists and physicians based in the Prince Henry/Prince of Wales Hospitals Group, whose research and clinical practice was focused on the causation and treatment of the blockage of blood vessels. The majority of heart attacks, strokes and gangrene of the legs are brought about by blockage of the arteries supplying respectively, the heart muscle, the brain and the lower limbs. Despite real advances these processes still account for a massive cost in premature death and suffering.

Children's Cancer Research Institute - Sydney Children's Hospital

The Children's Cancer Research Institute has a staff of 30 full time scientists (including postgraduate students, technical and support staff) undertaking laboratory research on malignant disease in children. The Institute was established in 1984 and occupies a four storey laboratory complex at the southern end of the Sydney Children's Hospital. The staff of the Institute work in close collaboration with members of the Department of Paediatric Haematology/Oncology in the Hospital. Research work is organised in four programs: cellular pharmacology, experimental diagnostics and therapeutics, molecular carcinogenesis and bone marrow transplantation. The focus of the Institute involves investigation into the nature, origin, cause and treatment of childhood cancers (particularly leukaemia and neuroblastoma) making this facility the only one of its type in Australia.

The Centre is comprised of the Schools of Community Medicine, Medical Education and Health Services Management and has strong links with other academic and service units such as the National Centre in HIV Epidemiology and Clinical Research, the National Drug and Alcohol Research Centre and the various Area Health Services affiliated with UNSW. Its affiliation with the WHO Regional Training Centre for Health Development provides an emphasis on international health development.

The Centre for Public Health at UNSW and the Department of Public Health and Community Medicine at the University of Sydney are partners in the PHERP-funded Sydney Public Health Consortium. This arrangement is designed to enhance the opportunities for study and research for students and faculty in both universities. Currently students enrolled at UNSW are permitted to undertake up to 25% of their course work at the University of Sydney.
Garvan Institute of Medical Research – St Vincent’s Hospital

The Garvan Institute of Medical Research has a staff of 200 including 45 PhD and MD scholars. The Institute is structured into four major research programs – bone and mineral, cancer, neurobiology and metabolism – which are funded through a Centre grant from the National Health and Medical Research Council. Located on the St Vincent’s Hospital Campus, the Garvan Institute focuses on the molecular basis of health and disease, integrating a range of basic laboratory based research approaches together with extensive clinical research.

Medical Illustration Unit

Located in the Edmund Blacket Building at the Prince of Wales Hospital, the Medical Illustration Unit (MIU) provides centralised photography, graphics and digital imaging services to the Faculty of Medicine and its teaching hospitals.

The Unit incorporates well-equipped facilities for clinical, scientific and general photography in the studio or location, maintains a display preparation area, and operates a high-resolution computer slide imaging service.

MIU’s eight staff annually produce around 60,000 slides and prints for lectures and publications, 1,000 items of finished artwork and 300 scientific posters, thereby supporting the teaching, research and patient care commitments of the Faculty and its hospitals.

National Centre in HIV Epidemiology and Clinical Research

The Centre was established in 1986 to provide national leadership in epidemiological and clinical research, surveillance and clinical trials related to HIV and AIDS. The Epidemiology Unit is the cornerstone of a national surveillance system monitoring the spread of HIV in Australia, while the Clinical Trials Unit coordinates research on new therapies. The Centre also carries out research on the transmission and natural history of HIV infection. As an extension of its role in HIV, the Centre has increased its involvement in the surveillance of other infectious diseases transmitted by the same routes as HIV, such as sexually transmitted diseases and Hepatitis B and C. Another significant area of expansion for the Centre has been the provision of research expertise and training to support countries of the Asia-Pacific region in the fight against HIV.

National Perinatal Statistics Unit (Australian Institute of Health and Welfare)

The National Perinatal Statistics Unit is a collaborating unit of the Australian Institute of Health and Welfare within the Faculty of Medicine of the University of New South Wales. Located on the Prince of Wales Hospital Campus, the Unit is linked with the School of Paediatrics and other groups in the Faculty. The Unit collaborates with State and Territory perinatal groups and various professional groups in developing national perinatal data systems. The Unit’s objectives are to monitor and interpret national perinatal mortality and morbidity, to provide a limited perinatal epidemiology service; and to conduct epidemiological research.

National Drug and Alcohol Research Centre – Prince of Wales Hospital

The National Drug and Alcohol Research Centre was established as a Centre of Excellence at the University of New South Wales in May, 1986. It is funded by the Commonwealth Government as part of the National Campaign Against Drug Abuse.

In line with the mission of the National Drug Strategy, the overall mission of NDARC is to contribute towards the minimisation of the harmful consequences of drug use in Australia by increasing, through research and related activities, the effectiveness of the Australian treatment response to drug-related problems.

With a five year strategic plan in place, NDARC will continue to make a major contribution to the minimisation of drug-related harm in Australia.

Prince of Wales Medical Research Institute – Prince of Wales Hospital

The Prince of Wales Medical Research Institute is an independent institute affiliated with the University. Since its opening in 1993, it has grown to become the largest aggregate of research nationally on the functions and disorders of the brain and nervous system. It has a staff of over 60, including 6 at professor or associate professor level, and attracts almost $3m p.a. in peer-reviewed funding. Major lines of research include human sensation, balance and movement; autonomic nervous system; neuropathology; and clinical neurophysiology.
Skin and Cancer Foundation

The Skin and Cancer Foundation was established in 1978 and is affiliated with St. Vincent's Hospital. The Foundation has four Dermatology registrars and a research fellow as well as undergraduate students who attend the dermatology clinics. A broad range of clinics are devoted to the diagnosis and treatment of skin cancer, psoriasis, contact dermatitis, vitiligo and pigmented skin lesions. There is a large dermatopathology service. Clinical trials as well as research in occupational dermatoses and histopathology are pursued. The Foundation provides Sunscreen Testing and Irritancy Testing for new products. The Foundation is active in community education relevant to skin disease. It has also established a second clinical and teaching facility at Westmead.

Victor Chang Cardiac Research Institute

The VCCRI was established in 1994 to honour the vision and memory of the late Dr Victor Chang. It is a member of the St Vincent's Hospital Campus, and affiliated with the University of New South Wales. It aims to conduct the highest quality fundamental research into cardiovascular diseases, with a major emphasis on the prevention, diagnosis and treatment of heart muscle diseases. It currently has active research programs in molecular cardiology relating to the mechanisms of cardiac hypertrophy and signal transduction; the genetics of cardiovascular diseases; cardiac arrhythmias and mechanics; transplantation biology; vascular bioengineering, and the pathophysiology of cardiac ischaemia and coronary restenosis.

World Health Organization Regional Training Centre For Health Development

The World Health Organization Regional Training Centre for Health Development within the School of Medical Education is constituted through a formal tripartite agreement between the World Health Organization, the Australian government and the University of New South Wales. The primary emphasis of the Centre's work is on developing and strengthening the capacity of healthcare institutions to provide improved health services particularly primary health care services in developing countries. It aims to cultivate educational leadership for health promotion and development, to improve teaching and educational planning, to promote staff development and in-service training to contribute to workforce planning to improve management of human resources in health and to foster community orientated healthcare and improve community based education programs in the health professions.

The Centre and the School contribute to the promotion of national and international health through the educational development of the health professions. Activities include postgraduate academic programs at masters and doctoral levels, short courses and special training programs, workshops and seminars both at the school and in the field in health professions education, clinical education and public health as well as publication of learning resources and materials.

The Centre supports the development of educational institutions, centres and programs through long term twinning arrangements. These approaches include training of faculty, support in development of programs and resource materials, placement of fellows and exchange of staff to enable collaborative research and development.

Computing at UNSW

The Division of Information Services (DIS) encompasses information technology and the University Library at UNSW. All students are given an e-mail address and a modem access service is available. A help desk is available on 9385 1333.

Specific University information which is frequently updated is available on the World Wide Web (WWW) in the UNSW home page at http://www.unsw.edu.au which has an index to its contents which includes URLs http://www.acsu.unsw.edu.au and http://www.comms.unsw.edu.au and http://www.misu.unsw.edu.au and http://www.med.unsw.edu.au. This information may be accessed from any computer laboratory with access to the World Wide Web.

The information provided on the WWW includes more details about DIS information technology units and gives information about the Medical Faculty.

The Biomedical Library

The Biomedical Library provides library services for staff and students from the Faculty of Medicine and the Faculty of Life Sciences. It is closely associated with the libraries of the teaching hospitals of the University and with the Curran Foundation Library at the Garvan Institute of Medical Research.

The Biomedical Library is located on levels 2, 3 and 4 of the Mathews Building Annex and is physically connected to the other Special Libraries via a link through Level 3 of the Main Library building.

All Biomedical Library material has an MB or MBQ prefix. Serials are shelved on level 2 and 3, in alphabetical order by title. (Details about the Biomedical Library books, serials, multimedia and audiovisual material can be found in the Library catalogue.)
In addition, the Biomedical Library provides web access (see web address below) to a wide range of biomedical databases, full text electronic journals, and the best medical and life science web resources.

Professional staff are available at the Information Desk on Level 2 to provide reference services and to assist in the use of the catalogues, the internet, and biomedical databases. Classes are also provided which ensure students and academic staff can make best use of these information resources.

The Library provides special services for external students and remote users. Details of these services are listed on the Library’s home page.

(http://www.library.unsw.edu.au/~biomed/biomed.html)

The University of New South Wales Medical Society (Medsoc)

The University of New South Wales Medical Society (Medsoc) is the representative body of the medical students of the University. Besides providing a medical bookshop, its primary functions are to provide hospital and campus amenities, educational events and social stimulation for its members in order to promote a pride in and a sense of belonging to the Faculty. It also has the functions of initiating and maintaining communication between medical students, medical educators and administrators both within the University and outside. Membership is free and automatic to all medical students.

There are a number of annual social events, including the Year 1 welcome weekend, harbour cruises, women’s night, hospital parties, the ‘Med Ball’, the Medsoc Talent Quest and the Anzac Day sports day.

A newsletter Idioglossia and an annual magazine are produced, to which students and staff are encouraged to submit written articles.

The Society maintains communication with all levels of Faculty through the President, Vice-Presidents and Year representatives, while other Medsoc supported students hold positions in University government. These officers together with the Secretary, Treasurer, Shop Managers and other representatives, constitute the Society Council which is elected annually in October.

All students are encouraged to participate in the Society’s activities and to attend the Medsoc meetings which are held in the Student Common Room, Blacket Building, Prince of Wales Hospital. Enquiries should be addressed to the Secretary of the Medical Society, c/- Medsoc Bookshop, Old Morgue Building, Prince of Wales Hospital.

The Medsoc Shop is an important service provided by the Society. Textbooks, white coats and diagnostic instruments may be bought cheaply, usually around 20% below retail prices. A Medsoc shop joining fee is payable. The Medsoc Bookshop is located in the Old Morgue Building, Barker Street Entrance, Prince of Wales Hospital.

Undergraduate Rural Health Society

A rural health club has been established within the Faculty to provide:

• undergraduate students with information about career options and encourage their choice of a career in rural Australia;

• undergraduate students with information concerning issues in the provision of health services in rural Australia; and

• practical experience of working and living in rural areas through organised weekend field trips.

The Society may be contacted through the administrator, Rural Health Section, School of Community Medicine.
Selection into the Faculty of Medicine

Entry is competitive and applications are considered and assessed on academic merit. There is no special provision for 'mature age entry' to Medicine.

There is a small intake quota for applicants who have completed or partially completed tertiary studies. Such applicants are assessed on the basis of their tertiary results in conjunction with their matriculation results. Competition is such that an outstanding level of academic achievement is required. Because of the integrated nature of the course it would be exceptional for admission to be granted to other than first year.

Applicants who have completed a Year 12 qualification for the third or subsequent time will have a 5% penalty imposed on the most recent attempt. Applicants seeking entry on the basis of a Year 12 qualification obtained after having been admitted to a tertiary institution and having recorded a result will also have a 5% penalty imposed on the Year 12 TER or equivalent.

Overseas Students

Applicants from overseas may only compete for entry to the medical course as either fee paying students or as holders of a scholarship awarded by the Australian Government. Enquiries regarding admission of overseas students should be directed either to the Director of International Programs or the Executive Officer, Faculty of Medicine, both at the University of New South Wales, Sydney NSW 2052, Australia. Enquiries regarding Australian Government scholarships should be directed to the local Australian Diplomatic Mission.

Prerequisite Requirements

The most suitable Higher School Certificate studies (or equivalent) for those who wish to enter the Faculty would include 2 or more units of Mathematics, English and Chemistry. (The 2 Unit Mathematics subject, Mathematics in Society, and the 2 Unit English subject, Contemporary English, are not acceptable.) To be eligible for selection into the Faculty, students must obtain the required course prerequisite scores in the HSC (or equivalent) in Mathematics, English and Science/Chemistry subjects.

The following prerequisite requirements were current at the time of publication of this Handbook.

Course prerequisites for 1998

HSC Mathematics
2U (60-100) or,
3U (1-50) or,
4U (1-100)

HSC English
2U General (80-100) or,
2U Related (65-100) or,
3U (25-50)

HSC Science
2U (Chemistry) (67-100) or,
3U (90-150) or,
4U (1-200)

Prospective students are advised that while it is not a requirement, they should include Physics, as well as Chemistry, in their high school program as knowledge of these disciplines is useful in the first years of the medical course. Students who have not included Physics in their high school program are strongly advised to undertake the short 'bridging course' in Physics organised by the School of Physics at the University preferably before commencing enrolment in the medical course, or at least before commencing the second year of the normal medical course. There is also an assumed knowledge of basic organic chemistry. A knowledge of Biology is also desirable.

It should be noted that it is assumed that upon enrolment students have an adequate command of English language and communication skills. Those students who feel they may lack skills in this area should consult with their lecturers or tutors, or staff of the Faculty Office, who can arrange special English language support classes. Students who do not have adequate English language communication skills may not be permitted to progress in the course and may be required to complete satisfactorily an additional remedial English program before being deemed as having passed the year.
Admission of Aboriginal Students

The Faculty may admit suitably qualified Aboriginal and Torres Strait Islander people outside any quota restrictions. Further information regarding the admission criteria may be obtained from the Aboriginal Education Program on (02) 9385 3805 or (02) 9398 2611.

Admission of Refugee Medical Practitioners

A special scheme exists for the admission of refugee medical practitioners into Year 4 only of the Medicine undergraduate course. For further information regarding this scheme, contact the Faculty of Medicine Office on 9385 2457.

Application Procedures

Applications should be directed to the Universities Admissions Centre, Locked Bag 500, Lidcombe, NSW 2141, telephone (02) 9330 7200. The closing date for application is generally 30 September of each year or up to the end of October on payment of a late fee.

3801 Medicine Course
BSc(Med) MB BS

This six year course leads to the award of the degrees of Bachelor of Science (Medicine), Bachelor of Medicine, Bachelor of Surgery – BSc (Med) MB BS.

These degrees, which are in effect a single degree, may be awarded with Honours Class 1; Honours Class II, Division I; Honours Class II, Division II or at Pass level. The award of honours is determined on the basis of a student's performance throughout the six year course, is usually obtained by using the weighted average mark for each year which is obtained by weighting the subjects according to hours of teaching.

On completion of Year 3 of the six year course, students also qualify for the degree of Bachelor of Science (Medicine). Students would not ordinarily be awarded the BSc(Med) until the completion of the requirements for the award of the MB BS. However, students who have completed requirements for the award of the BSc(Med) and are leaving the Medicine Course 3801 (BSc(Med)MB BS), either through their own decision to withdraw or upon exclusion by the University, are eligible to be awarded the BSc(Med) degree at that stage.

Students who have achieved a high standard in their studies may undertake an additional one year program of supervised research leading to the award of the BSc (Med) Honours. For details see the course description for 3831.

Objectives of the Medicine Course

The objectives of the Medicine course are:
1. To produce a graduate with a knowledge of medical and behavioural sciences sufficient to understand the scientific basis of medicine and to go forward with medicine as it develops further.
2. To provide a graduate with the flexibility of outlook and training necessary to progress to any field of endeavour in medicine or related disciplines.
3. To provide education in clinical methods and patient care in the main branches of medicine and surgery so that the graduate could undertake patient care under supervision at the level of an intern.
4. To help the graduate understand professional and ethical principles and to be at all times mindful of the individual's obligations to patients, colleagues and the community.

Supplementary Assessment

Details of assessment requirements are contained in the sections on particular years and subjects in the course. The following regulations relate to supplementary assessment which apply to all years of the Medicine course.

Subject examiners may, in the time between the sitting of an assessment and the meeting of the Assessment Committee, require students to present themselves for further assessment to resolve any doubts as to a student's
performance. After the Assessment Committee meets further assessment may be given to allow the Assessment Committee to resolve a doubt. In Years 3, 4 and 6 such additional assessment is usually undertaken in December and in Years 1 and 2 in the following January and February. Such further assessment may be given when students, through illness or some other acceptable circumstances, have been prevented from taking one or more of the assessments or have been disadvantaged during the assessment.

In Year 5, subject examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee (normally Thursday of the term recess), require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5:4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5:4.

Further assessment will not be granted when the composite mark accurately reflects failure to achieve the required standard of knowledge and understanding of the subject.

Show Cause

The Faculty's Assessment Committee requires all students to show cause why they should be allowed to re-enrol if their progress will result in their taking more than one year longer than the maximum length of time for their course. Such additional time can be due to failure, leave or a combination of both failure and leave.

Advice to Students on Computing Requirements

Students are advised that satisfactory completion of the undergraduate medical courses (3801, 3821 or 3840) can be achieved without the requirement to purchase a personal computer.

Student Photographs and Identification Badges

In Year 1 of this course, each student is required to be photographed during the first session. These photographs are required for School and Faculty purposes and are also used to produce identification badges which must be worn in the hospitals.

Immunisation for Medical Students

The Faculty's policy on the immunisation of medical students is as follows:

All students should be aware of their immunity or lack of immunity to common infectious diseases which they will encounter during clinical training and later in practice. Students without a history of past illness or immunisation will be at risk of acquiring certain infections and subsequently at risk of transmitting those infections to patients.

All Students

In the absence of a reliable history of immunity, students are advised to be immunised against the following infections: rubella, measles, mumps, hepatitis B (HBV) and tuberculosis. A personal history of mumps, HBV and TB or a history of past immunisation against rubella, measles, mumps and HBV are reliable in predicting immunity. It is not necessary to have pre-immunisation antibody testing performed if you are uncertain of your immunity. Skin testing (Mantoux test) for TB should be performed before immunisation for TB.

It is also advisable that students are aware of their immune status to chickenpox (varicella). A blood test for antibodies can be performed if there is not a personal history of chickenpox.

If students require any of the above immunisations, or are uncertain of their immune status, they should see their local general practitioner or, if preferred, may attend the UNSW Health Service. The UNSW Health Service is located on the ground floor of the East Wing of the Quadrangle Building.

The Faculty can provide students with information on the names and locations of medically qualified staff of the Faculty with appropriate expertise in infectious diseases who have agreed to be available to offer confidential advice on these matters, but students may prefer to consult their own medical practitioner or other medical adviser.

It is strongly recommended that documentation of past illnesses, immunisation history and results of blood test be kept for future reference. A form is available from the Faculty Office for this purpose. It is advisable that the information on this form be verified by students' own doctors or the UNSW Health Service. Students who object to being tested or immunised should discuss their objections with their doctor.

4th, 5th and 6th Year Students

The Medical Board of NSW has recently determined that while mandatory testing for HIV and HBV is not required, any medical practitioner or student has a professional responsibility to take appropriate steps to know that his/her HIV and HBV status is negative before undertaking an 'exposure-prone procedure'.

Such procedures are characterised by the potential for direct contact between the skin of the health care worker and sharp surgical instruments, needles or sharp tissues (spicules of bone or teeth) in body cavities or in poorly visualised or confined body sites (including the mouth).

Students are usually required to undertake such procedures as part of their undergraduate course. However, students who do not know their HIV/HBV status or know that they are infected must refrain from participating. Since testing is not mandatory, no reason need be given for
declining nor could any reason be inferred from a declination.

Matters relating to infectious diseases are constantly under review and the Faculty policy may be amended as the policies of the NSW Health Department or Medical Board or other relevant government bodies change.

Students who are infected with any blood-borne infections (ie. HIV, HBV or Hepatitis C) should seek advice on their future professional development. A medical practitioner infected with HIV and/or HBV who is not impaired may be able to continue to practise medicine that does not involve exposure-prone procedures.

Medical practitioners who knowingly do not take appropriate measures to reduce their risk of transmitting infections may be liable to charges of professional misconduct if they are responsible for transmitting an infection. Students and medical practitioners in this position may be vulnerable to legal action.

Course Details

Year 1

This year is conducted in two academic sessions and consists of four subjects plus four General Education electives, as shown in the table below.

Assessment

Biology is taught only in Session 1 with a final assessment at the end of that session. The other three subjects extend over both sessions and incorporate a final assessment at the end of Session 2. Assessments also take place at the end of Session 1 but do not constitute a barrier to progression to Session 2.

Students who do particularly poorly in the mid-year assessments will be interviewed by Faculty staff and/or an appropriate member of the academic staff, before proceeding to Session 2. Such students may discontinue without failure at that time.

Rules of Progression

Students who have passed all subjects in Year 1 may progress to Year 2. General Education subjects or their equivalent may be carried to Year 2.

Students repeating the year are required to enrol in all subjects in Year 1, other than any General Education subject(s) passed.

Allocation to Hospitals in Year 2

During Session 2, Year 1 students are asked to list their preferences regarding allocation to teaching hospitals. The allocation is made after the Year 1 examinations and student representatives are involved in the allocation procedure.

Year 1 Subject Descriptions

For further information regarding these subjects contact the subject authorities.

ANAT1006
Anatomy 1
Staff Contact: Dr D Vu
CP30 S1 HPW5 S2 HPW7

Objectives: To acquire sufficient knowledge of topographical, surface and radiological anatomy of the limbs, head, neck and back to form a basis for subsequent clinical studies; to understand how a knowledge of anatomy is applied in clinical practice; to know sufficient principles of tissue histology to be able to undertake successfully more detailed studies of histology and embryology in Year 2.

An introductory subject in human anatomy, embracing the disciplines of gross anatomy (topographical anatomy) and histology. Teaching hours per week include: one 3-hour practical/tutorial class of Anatomy, with an additional 2-hour class of histology in Session 2 only, together with 1-2 hours of lectures in Session 1 and 2 hours of lectures in Session 2.

Gross anatomy of the musculoskeletal system; topographical and radiological anatomy of the upper and lower limbs, head and neck, and back; introduction to microscopy and cell science; morphological aspects of cell function; histology of basic tissues (epithelia, muscle, nerve and connective tissue).

Assessment: In addition to the end of year assessment, there is a mid-year assessment and two mid session assessments which contribute to the final assessment for the subject but do not constitute barriers.
BIOC1319
Biochemistry for Medical Students
Staff Contact: A/Prof K Barrow
CP30 F HPW 6

Objectives: To obtain sufficient understanding of chemistry and biochemistry to recognise the essentially molecular basis of all living systems; to acquire a knowledge of chemistry and biochemistry essential for the study of physiology and pharmacology; to gain experience in laboratory skills and the use of the scientific method; to understand the structure, function and biosynthesis of the macromolecules that are indispensable to life; to gain insight into the ways in which the body uses metabolic fuels and the regulation of these metabolic processes so that growth and homeostasis are maintained; to understand the basis of practical biochemistry, including those procedures that are relevant to clinical diagnosis.

Assessment: In addition to both a mid-year and end of year examination, there is continuous assessment throughout the year.

MFA1001
Introductory Clinical and Behavioural Studies
Staff Contacts: Ms S Beecher and Dr N Kelk
CP20 S1 HPW3 S2 HPW5

Objectives: To enable students to gain a better understanding of themselves and other people as a basis for the respectful and considerate treatment of patients; to stress the importance of seeing patients as people; to develop basic interviewing skills; to heighten cultural awareness; to develop understanding of the experience of loss; to gain experience in and understanding of the group process in preparation for working in teams; to impart to students an understanding of illness in terms of a biopsychosocial model; to provide an introduction to human development through the life cycle, and health problems of people at different stages; to develop in the student an awareness of the different family, socioeconomic, and ethnic backgrounds of people in Australian society and of the relevance of these backgrounds to the physical and emotional states of patients.

Brief Description: Students attend a three hour small group tutorial each week in Sessions 1 and 2 and a two hour lecture/demonstration in Session 2. In the tutorial groups, students learn interpersonal communication skills, group dynamics, self awareness and cultural sensitivity through participatory exercises. Students take the initiative in preparing and presenting group projects. Session 2 lecture themes include: the individual experience of health and illness in terms of a biopsychosocial model; an introductory human development through the life cycle (childhood, adolescence, adulthood and old age); the particular problems of disadvantaged cultural groups (e.g. Aborigines, recent migrants). The lectures are supported by relevant films and by community visits, activities and discussions in the tutorial groups.

Assessment: Two major assignments, the first assessing interpersonal communication skills, and the second the ability to take a broad social-psychological history. Participation in tutorials and a group project is assessed. There is an examination at the end of Session 2 on the material covered in the lectures. Students must pass the examination and the communication skills assignment as well as the overall subject to progress to Year 2.

PHPH1004
Biology for Medical Students
Staff Contact: Dr S Head
CP10 S1 HPW4

Objectives: To provide an understanding of basic biological principles for the continuing study of human biology and medicine.

An introductory course consisting mainly of lectures which will be complemented by practical classes and excursions. Topics include: basic cell biology; introductory genetics; invertebrates; parasites; ecology, evolution; comparative anatomy and physiology.

Assessment: Assessment is based on an examination at the end of Session 1 and continuous assessment during the session.

Year 2

This year is conducted in two academic sessions. Teaching in the subjects Anatomy 2, Medical Biochemistry and Genetics, and Physiology is integrated and aims to give students a broad knowledge and understanding of human structure and function based on scientific principles, relevant to further study in medicine. In Clinical Studies 2, students make contact with patients and the physical aspects of disease, in order that they may apply their knowledge and understanding to the clinical situation. The strand dealing with human behaviour which was studied in Year 1, is continued.

Total  24.5  24.5
Assessment

Major assessments take place in the November/December assessment period but progressive assessments may take place throughout the year. Details of progressive assessments are provided by the appropriate subject authority.

Rules of Progression

A student enrolled in the second year of the Medicine course who fails in any subject of that year, other than General Education subjects, shall be required to repeat the year, provided there is no conflict with the rules for re-enrolment.

Year 2 Subject Descriptions

For further information regarding these subjects contact the subject authorities.

ANAT2007
Anatomy 2
Staff Contact: Dr E Tancred
CP35 F HPW7

Objectives: To gain knowledge and understanding of the gross and microscopical structure of the internal organs and the brain; to be able to correlate embryonic development with the structure of normal organs and tissues and with the establishment of the anatomical relationships in the body; to correlate function and structure in the organ systems; to acquire basic understanding of the clinical relevance of the anatomical structures studied.

Instruction is organised according to the organ systems and includes the cardiovascular, respiratory, alimentary, urinary, genital, endocrine, lymphatic and nervous systems. In all instances the clinical relevance of the anatomical structures is emphasised. The subject consists of four subsections, each having separate lectures and tutorials: Gross Anatomy, Histology, Embryology, and Neuroanatomy. Gross Anatomy and Histology are taught in Session 1, Neuroanatomy and Embryology are taught in Session 2. Neuroanatomy covers the basic organisation and function of the brain and spinal cord with particular reference being made to the sensory and motor systems.

Assessment: Apart from continuous assessment tests and practical examinations there are separate examination papers for Histology (S1), Embryology (S2), Gross Anatomy (S1) and Neuroanatomy (S2). At the end of Sessions 1 and 2 there are separate examinations in Histology and in Embryology respectively. Students must pass each component to pass the whole subject.

BIOC2329
Medical Biochemistry and Genetics
Staff Contact: A/Prof P Schofield
CP20 F HPW4.5
Prerequisite: BIOC1319

Objectives: To acquire knowledge of biochemical aspects of the functions and control mechanisms of the major body systems in humans; to understand the regulation of the adaptive responses of body function to different forms of stress; to understand those biochemical processes which are of particular relevance to clinical practice and a study of pharmacology; to gain experience in problem-solving approaches to the biochemical aspects of normal and disease states; to introduce students to those aspects of modern molecular biology relevant to humans; to provide a basis for the study of human genetics.

Lectures, audio-visual and clinical demonstrations deal with endocrine systems, lipid metabolism, connective tissue, neurochemistry; purine, pyrimidine and nucleic acid metabolism, recombinant DNA procedures, gene probes, pedigree analysis, inborn errors of metabolism, X- and Y-linked inheritance, human cytogenetics. Clinical material illustrates the principles being studied and underlines the relevance of the subject to the study of medicine.

Assessment: Examinations are held mid-year and end of year, and include the contents of both lectures and audiovisuels.

MDSG2001
Clinical Studies 2
Staff Contact: Prof J Dwyer
CP10 F HPW2

Objectives: To extend knowledge and understanding of normal structure and function by demonstrating the disturbances which occur in disease. These studies are closely integrated with Anatomy, Physiology and Biochemistry so that the application of basic medical science to the clinical situation can be clearly seen. Students will attend a teaching hospital for half a day each week to see patients from whom they will take histories. During this time there will be one group tutorial for the presentation and discussion of clinical histories and the demonstration of clinical signs. In these sessions, students will acquire the ability to take a clinical history from a patient with an uncomplicated medical problem, present the history, both orally and in writing, using clear unambiguous medical terminology and in a standard form.

To demonstrate how symptoms and signs can be interpreted as disorders of function and how this knowledge aids in the process of diagnosis. By the end of the year it is important that students are familiar with the basic requirements of a medical history and have seen a number of examples of disordered anatomy and physiology.

Assessment: Examination of two written clinical histories per session and examination of a student's ability to present these histories orally. In Session 2, students are required to submit a case study. There is an emphasis on communication skills. Additionally, there will be continuous assessment by tutors. Students who fail to reach a satisfactory standard will be required to undertake further assessment which may include a clinical and viva voce examination.
PHPH2018
Medical Physiology 1
Staff Contact: Dr K Gibson
CP40 F HPW8

Objectives: To gain knowledge and understanding of the function of the cellular elements of the body and the function of certain major body organ systems in humans: to gain experience in the use of medical instrumentation and in the measurement of variables in mammalian biological systems; to gain experience in problem-solving approaches in the study of the physiology of the normal person; to integrate knowledge of anatomy, biochemistry and physiology to provide an understanding of human structure and function.

Systematic lectures, tutorials, practicals and demonstrations deal with cells and excitable tissues, circulation, respiration, kidney and body fluids, gastrointestinal tract and temperature regulation. Attention is paid to the principles of physics and statistics necessary to understand the functioning of cells and organ systems. Clinical material illustrates the relevance of the course to the study of medicine.

Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

PSCY2101
Human Behaviour
Staff Contact: Dr P Ward
CP15 F HPW3

Objectives: To provide students with key concepts in the five main topic areas and demonstrate the practical application of these concepts in medical practice. The five main topic areas are: research methods in behavioural sciences, psychology in relation to medicine, sociology in relation to medicine, bioethics, and human sexuality. Students are encouraged to develop an understanding of human behaviour as the result of complex interactions between multiple factors, so that they are better able to appreciate and respect their patients and colleagues as persons. Taught over both sessions. Didactic material and some case material is presented in lectures and the tutorial program is structured to consolidate this information. Emphasis is placed on developing skills in clear professional communication, with feedback on written assignments and tutorial presentations. Specific topics covered include: risk behaviours; anxiety; stigma; social class and health; the sexual response and how it changes across the life-span; and a range of bioethical topics including human and animal experimentation, euthanasia, the doctor and the state.

A handbook for the subject is produced each session and may be borrowed from the Biomedical Library Closed Reserve or purchased from the School of Psychiatry.

Assessment: In Session 1, assessment consists of two written examinations, a tutorial assignment, and a tutorial presentation. In Session 2, students are required to write a major essay on Bioethics, present a tutorial paper and sit a final written examination.

---

Year 3

Year 3 is conducted in two academic sessions. The principal subjects of the year are Medical Pharmacology, Medical Physiology, Microbiology for Medical Students and Pathology. Clinical Studies 3 continues the clinical program commenced in first year. Students also take the subject Medical Ethics and Health Law, which builds on material presented in first year ICBS and second year Human Behaviour.

An understanding of Immunology is also required to enable students to deal with the pathogenesis of specific diseases. To facilitate this understanding, a series of introductory lectures in Immunology provide an outline of the structure and function of the immune system, covering the cells and mediators involved in the immune response. The Immunology program is integrated with the Microbiology subject on the response to infectious diseases, and with the Pathology subject and is presented in an interdisciplinary fashion, providing a basis for subsequent instruction in the diagnostic and therapeutic aspects of clinical immunology in the later years of the curriculum.

*Staff Contact: A/Prof P McNeill*  
CP10 S2 HPW1.5

Medical Ethics and Health Law builds on medical ethics presented in first year Introductory Clinical and Behavioural Studies and second year Human Behaviour, to give students additional preparation for ethical issues which arise in their placements in hospitals, general practice and community settings during Years 3 to 6. The subject introduces students to medical practitioners’ responsibilities in law including the duty of care, obligations to maintain privacy and confidentiality, and the legal basis of registration and de-registration of medical practitioners.

Principles of ethics and rules of law are considered in relation to specific issues including transplantation, predictive testing, withdrawal of treatment, and the rationing of limited health care resources. Tutorials are based on material covered in lectures and seek to expand students understanding of ethics and law through discussion, structured debates and tutorial exercises.

The overall aim of the subject is that students learn to demonstrate and apply an understanding of ethics and law as a part of their commitment to social responsibility and considerate and appropriate treatment of patients (and others) in the practice of medicine.

*Assessment:* Consists of two tutorial assignments and an essay (which total 50% of the marks) and an end of session examination (contributing a further 50%).

**MDSG3001**  
**Clinical Studies 3**  
*Staff Contact: Prof J Dwyer*  
CP20 F HPW4

*Objectives:* To acquire and practice the skills of history taking and physical examination in order to elicit the features of common diseases. Interpretation of the mechanisms of production of the presenting signs and symptoms requires the integration of clinical skills with basic sciences, a concept introduced in Year 2.

Clinical Studies in Year 3 builds on the experience obtained in Year 2 and introduces the student to clinically relevant pathophysiology, with particular emphasis on the mechanisms associated with the development of symptoms and physical signs which indicate disease. The components of the subject are:

1. Lectures in medicine and surgery which introduce the student to the more common diseases and clinical problems, with emphasis on material relevant to history taking and to physical examination. The teaching builds on and compliments related discussions in physiology, pathology, pharmacology and microbiology. Where possible, the information supplied in Clinical Studies 3 is integrated with related material being presented by the other disciplines.

2. Students spend two afternoons a week at a teaching hospital for one surgical and one medical tutorial. Tutors will be building on the communication skills learnt in the first and second years of the course. By the end of third year, students must be able to obtain a full history from patients in a disciplined and prescribed manner and present that history both orally and in writing. In addition, students must complete at least one full history per week in their own time to master these essential skills and these histories will be marked by tutors.

Physical examination skills will be taught during the third year. Students are expected to master the routine associated with conducting an examination of the major body systems and be able to recognise and understand the significance of those major signs which indicate the presence of pathophysiology. Surgical and medical tutors will confer regularly to discuss the progress of their students and to identify particular problems, especially those associated with communication skills.

*Assessment:* Continuous assessment of clinical skills is carried out by surgical and medical tutors. Particular emphasis will be placed on communication skills. Students whose attendance and/or progress is deemed unsatisfactory may be precluded from participating in the end of year examinations, or be required to undertake additional clinical and vive voce assessment.

The end of year examinations will include a multiple choice question paper (MCQ), an integrated exam (including material from Anatomy, Biochemistry, Microbiology, Pathology, Physiology, and Pharmacology as well as Clinical Studies), objective structured clinical examination (OSCE) and an assessment of communication skills. Students will be required to pass each of these four components of the end of year examination.

**MICR322B**  
**Microbiology for Medical Students**  
*Staff Contact: A/Prof S Hazell*  
CP20 F HPW4

*Objectives:* The overall objective is for students to understand the nature of the interactions between parasites and their human hosts, and the fundamentals of human immunology. Early lectures and tutorials are concerned with the basics of the scientific discipline of immunology. In order to achieve the microbiology requirement, students will know the causative agents of common microbial diseases and how they produce their effects, comprehend host defence processes, understand the epidemiology of infectious diseases, understand the basis of prevention and treatment of microbial diseases, appreciate the role of the microbiologist in the diagnosis and management of microbial disease and where appropriate, integrate these objectives with a knowledge of pathology and immunology.

Emphasis is given to the nature of the response of pathogens to various physical, chemical and antibiotic agents which can be used to interrupt their normal function. An analytical approach is taken to the means by which microorganisms exist in association with humans and their environment and how they gain access to tissues and produce disease. Attention is given to the mechanisms of host defence against microbial infection. Emphasis throughout the subject is placed on diseases of body systems. Laboratory based classes emphasise the role of
Teaching involves systematic lectures, tutorials, practical classes and demonstrations.

Assessment: This is based on mid-year and final examination as well as a major assignment and practical examination.

PATH3101
Pathology
Staff Contact: Prof D Wakefield
CP25 S1 HPW6 S2 HPW4

The discipline of Pathology forms a continuous stream of teaching of the pathogenesis of disease throughout the 3rd, 4th, 5th and 6th years of the medical curriculum. In Year 3, the subject PATH3101 comprises an introduction to the basic disease processes (General Pathology), ie. those fundamental processes which are common to all tissues and organs of the body. The subject covers classification of disease, and deals with both congenital and acquired diseases. The program comprises lectures, tutorials, practical classes and demonstrations on responses of cells to injury, inflammation, aberrations of the blood and vascular system and specific related effects of embolism and infarction, as well as studies of normal and abnormal growth, and of healing and regenerative processes. In addition, it includes consideration of the basic processes of neoplasia and carcinogenesis, as well as an introduction to the pathobiology of such contemporary health problems as environmental toxicology. In order to integrate the teaching of pathology with clinical studies, each fundamental process will be exemplified by references to examples of diseases of organ systems (Systemic Pathology) of practical importance.

Assessment: Proficiency in the subject, sufficient to proceed to Year 4, will be assessed by mid-year and final examinations which will comprise 30% and 70% respectively of the total mark in Pathology. Both assessments will comprise theory and practical components. Progress self-assessments with automated feedback will be made available on the World Wide Web.

Assessment: Examinations are held both mid-year and at the end of the year and cover both lecture and practical content.

PHPH3055
Medical Pharmacology
Staff Contact: Dr V Kapoor
CP25 F HPW4

Objectives: To understand the mechanism of drug action with special reference to drugs of clinical importance; to be aware of the principles of drug interaction. Medical pharmacology is the science of drugs or chemicals used to prevent, diagnose and heal disease, as well as the role of chemicals in the environment that cause disease. The medical pharmacology subject is concerned with basic principles of drug action, including the pharmacodynamics, pharmacokinetics and toxicology of drugs of clinical importance.

Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

Year 4

Year 4 of the course is primarily based in the teaching hospitals and comprises 6 terms totalling 41 weeks. Of these weeks, 36 will be spent in the hospital and 5 will be spent on campus. For the majority of the year, students will work as part of a health-care delivery team. The students' responsibilities as part of that team will be increased gradually as new skills are acquired. The philosophy inherent in education by attachment to a hospital team is important. Learning 'on the job' exposes students to real clinical situations incorporating both the medical and social implications of disease and allows the continued development of counselling skills. Thus, students will learn that hospital care should be linked to continuing care in the community, and that there is much emphasis in modern medicine on rehabilitation to maximise patients' chances of resuming their normal role in society. Reading about pathological processes, combined with team discussion of problem patients, provides the ideal environment for the retention of new knowledge.

The teaching of Community Medicine is integrated with clinical studies in the teaching hospitals and is a part of the campus teaching program.

The Pathology subject comprises a component of didactic teaching within the framework of the common campus program and a major hospital-based component taught through a tutorial program.

The subject of Clinical Pharmacology (Therapeutics) is introduced during the common campus program and reinforced during discussions of patient management as part of student attachments to clinical units.

At the commencement of fourth year, each student will receive a syllabus containing details of the integrated program for Clinical Studies, Pathology, Clinical Pharmacology and Community Medicine.
**Rules of Progression**

Students will be required to pass each of four separate segments of the assessment, namely: a pass in the Community Medicine continuous assessment, a pass in the Pathology viva, a pass in a Short Case clinical examination, and a pass in the combined written papers.

Students who have not completed the General Education components of the Medicine course and who otherwise are eligible to progress to Year 5 are not allowed to progress until they have satisfied such requirements.

**Year 4 Subject Description**

**MDSG4001**  
Integrated Clinical and Community Studies  
*Staff Contact: Prof J Dwyer*  
CP120 F  

**Objectives:** By the end of Year 4, students will be expected to have mastered the skills in communication, history taking, and physical examination. Students will be able to generate a list of the patient's problems which includes the physical, emotional and psychosocial aspects of the case. For each problem, students will develop a plan for problem resolution. Students will learn much about management and drug treatment during Year 4 but only the principles of management and introductory aspects of therapeutics will be assessed at the end of Year 4. As Year 4 attachments will not be repeated in Year 6, students must make the most of their opportunity to learn the management and therapeutic principles which they see in practice during their attachments.

Students will be expected to interpret symptoms and signs in terms of disorders of structure and function; to understand the pathological basis of symptoms and signs; to know what special investigations are appropriate for the investigation of a problem and how to interpret the results; and to understand the social and preventative aspects of disease. The major component of the Year 4 program is the clinical attachments. Students will be assigned to a specific hospital team for a term. There will be six terms and all students will spend one of these at Liverpool Hospital. The Liverpool program will focus on general medicine and surgery and will include Community Medicine and Pathology. Program details may vary slightly at each of the main teaching hospitals responsible for the implementation of this program. Each hospital has a Clinical School Committee and a Board of Medical Studies, the latter including student membership, to oversee the hospital's programs.

While students will necessarily be assigned to subspecialty units (e.g. cardiology, neurology, etc.), the attachment is not designed primarily to teach the student the details of that discipline, but rather, the approach to a patient's problems and their resolutions, is to be emphasised. This is an important consideration because, as subdiscipline exposure in Year 4 cannot be uniform for all students, it is important that students are distributed to fully utilise the hospital's patients and ensure that they have sufficient contact with patients.

Structured teaching during clinical weeks will be limited. There will be regular sessions each week which will feature a discussion, with a member of the Faculty, of the problems of patients on the student's ward. Pathology tutorials will be held each week, and one medical and one surgical lecture may be provided. The following skills are to be acquired during Year 4 or 6 of the course and the acquisition of such skills will be noted in the student's logbook after an appropriate examination: sterile technique; operating theatre procedures; cardiopulmonary resuscitation; intramuscular injection; use of ophthalmoscope; simple suture and knot-tying; application of a plaster; changing of a surgical dressing; passage of a proctoscope; passage of a naso-gastric tube; spirometry; establishment and maintenance of an intravenous line; venesection; rectal examination; urinalysis; urinary catheterisation.

Community Medicine will be taught primarily during the common campus weeks and will include case studies, lectures and tutorials on changing patterns of disease, prevention, epidemiology, nutrition and a range of other community health problems. Case studies based on clinical cases from students' hospital attachments will be used to explore core issues in Community Medicine. This will demonstrate the application of Community Medicine principles covered in lectures and tutorials and will also reinforce links with other teaching in Year 4. At Liverpool Hospital, Community Medicine teaching will make use of the special relationship of this Hospital to the community it serves.

Systematic Pathology will be taught at all hospitals throughout the year and will be integrated with clinical teaching. The program includes one tutorial per week based on prepared clinical protocols (case presentations) which will explore the pathogenesis of those systematic diseases which were not covered in the context of Year 3 teaching in Pathology, or which require greater depth of coverage. Students will be required to prepare and expand on the topics listed, by reference to their own ward cases, by consultation with staff of the various departments in Pathology, as well as by reference to their recommended textbooks and specialised text or journal articles. Each student will be expected to attend a minimum number of autopsy demonstrations during the year. Additional exposure to Pathology will be attained by student attendance at Grand Rounds and Clinico-Pathological Conferences.

Campus Weeks: To minimise interruptions to a student's role while attached to a clinical team, most structured teaching will be carried out during campus weeks. All students will attend the University campus for five weeks throughout the year, during which lectures in Medicine, Surgery, Clinical Pharmacology, Pathology, and Community Medicine will be provided.

Community Medicine teaching will utilise the knowledge and experience gained during clinical attachments to elucidate basic principles of epidemiology, public health, and continuing care. The Pathology lectures and demonstrations will concentrate on the pathogenesis of complex disease processes which cannot be effectively covered in a tutorial format. An excursion to the NSW State

---

*Staff Contact: Prof J Dwyer*  
CP120 F  

**Objectives:** By the end of Year 4, students will be expected to have mastered the skills in communication, history taking, and physical examination. Students will be able to generate a list of the patient's problems which includes the physical, emotional and psychosocial aspects of the case. For each problem, students will develop a plan for problem resolution. Students will learn much about management and drug treatment during Year 4 but only the principles of management and introductory aspects of therapeutics will be assessed at the end of Year 4. As Year 4 attachments will not be repeated in Year 6, students must make the most of their opportunity to learn the management and therapeutic principles which they see in practice during their attachments.

Students will be expected to interpret symptoms and signs in terms of disorders of structure and function; to understand the pathological basis of symptoms and signs; to know what special investigations are appropriate for the investigation of a problem and how to interpret the results; and to understand the social and preventative aspects of disease. The major component of the Year 4 program is the clinical attachments. Students will be assigned to a specific hospital team for a term. There will be six terms and all students will spend one of these at Liverpool Hospital. The Liverpool program will focus on general medicine and surgery and will include Community Medicine and Pathology. Program details may vary slightly at each of the main teaching hospitals responsible for the implementation of this program. Each hospital has a Clinical School Committee and a Board of Medical Studies, the latter including student membership, to oversee the hospital's programs.

While students will necessarily be assigned to subspecialty units (e.g. cardiology, neurology, etc.), the attachment is not designed primarily to teach the student the details of that discipline, but rather, the approach to a patient's problems and their resolutions, is to be emphasised. This is an important consideration because, as subdiscipline exposure in Year 4 cannot be uniform for all students, it is important that students are distributed to fully utilise the hospital's patients and ensure that they have sufficient contact with patients.

Structured teaching during clinical weeks will be limited. There will be regular sessions each week which will feature a discussion, with a member of the Faculty, of the problems of patients on the student's ward. Pathology tutorials will be held each week, and one medical and one surgical lecture may be provided. The following skills are to be acquired during Year 4 or 6 of the course and the acquisition of such skills will be noted in the student's logbook after an appropriate examination: sterile technique; operating theatre procedures; cardiopulmonary resuscitation; intramuscular injection; use of ophthalmoscope; simple suture and knot-tying; application of a plaster; changing of a surgical dressing; passage of a proctoscope; passage of a naso-gastric tube; spirometry; establishment and maintenance of an intravenous line; venesection; rectal examination; urinalysis; urinary catheterisation.

Community Medicine will be taught primarily during the common campus weeks and will include case studies, lectures and tutorials on changing patterns of disease, prevention, epidemiology, nutrition and a range of other community health problems. Case studies based on clinical cases from students' hospital attachments will be used to explore core issues in Community Medicine. This will demonstrate the application of Community Medicine principles covered in lectures and tutorials and will also reinforce links with other teaching in Year 4. At Liverpool Hospital, Community Medicine teaching will make use of the special relationship of this Hospital to the community it serves.

Systematic Pathology will be taught at all hospitals throughout the year and will be integrated with clinical teaching. The program includes one tutorial per week based on prepared clinical protocols (case presentations) which will explore the pathogenesis of those systematic diseases which were not covered in the context of Year 3 teaching in Pathology, or which require greater depth of coverage. Students will be required to prepare and expand on the topics listed, by reference to their own ward cases, by consultation with staff of the various departments in Pathology, as well as by reference to their recommended textbooks and specialised text or journal articles. Each student will be expected to attend a minimum number of autopsy demonstrations during the year. Additional exposure to Pathology will be attained by student attendance at Grand Rounds and Clinico-Pathological Conferences.

Campus Weeks: To minimise interruptions to a student's role while attached to a clinical team, most structured teaching will be carried out during campus weeks. All students will attend the University campus for five weeks throughout the year, during which lectures in Medicine, Surgery, Clinical Pharmacology, Pathology, and Community Medicine will be provided.

Community Medicine teaching will utilise the knowledge and experience gained during clinical attachments to elucidate basic principles of epidemiology, public health, and continuing care. The Pathology lectures and demonstrations will concentrate on the pathogenesis of complex disease processes which cannot be effectively covered in a tutorial format. An excursion to the NSW State
Government Forensic Laboratory and Coronal Courts is a compulsory activity.

Where possible, days will be arranged so that a particular subject is approached in a multi-disciplinary way. A series of correlation clinics, held during campus weeks, will further emphasise the interdisciplinary approach to understanding a subject.

Assessment: A multiple choice examination and a short answer paper will be given at the end of the year and will examine knowledge of Medicine, Surgery, Community Medicine, Clinical Pharmacology and Pathology discussed during the campus program and from the directed reading section in the syllabus. Assessment of Community Medicine will also involve continuous assessment by assignments throughout the year and the student's participation and contribution to group work. Assessment of Pathology will also involve the submission of a project report.

In addition to the written papers, a clinical short case examination will be held. Assessment will be on the approach to clinical examination, eliciting of abnormal signs and the interpretation of their significance.

For students to be eligible to sit for the examinations to be held at the end of Year 4, they must have performed satisfactorily on each of their six clinical attachments, developed the required procedural and clinical skills (satisfactory performance in these areas must be certified in a student logbook) and successfully completed the continuous assessment requirements in Community Medicine. Tutors will be involved in continually assessing a student's progress. Those students who fail to reach a satisfactory standard may be precluded from sitting the end of year examinations, or be required to undertake additional clinical and viva voce assessment.

Year 5

Year 5 is comprised of four terms, each of nine weeks. In Terms 5:1 to 5:4 students rotate through blocks of teaching in obstetrics and gynaecology, paediatrics, psychiatry, geriatrics, general practice and subspecialties, rather than studying the subjects concurrently. For this purpose students are allocated to a particular group (A, B, C, or D) and will follow the program of that group for the year.

The subjects studied in Year 5 are:

- MFAC5001 Geriatrics/General Practice/Subspecialties
- OBST5001 Obstetrics and Gynaecology
- PAED5101 Paediatrics
- PSCY5001 Psychiatry

Sequence of Blocks

Group A:
Term 5:1 (9 weeks) Geriatrics/General Practice/Subspecialties
Term 5:2 (9 weeks) Paediatrics

Group B:
Term 5:1 (9 weeks) Paediatrics
Term 5:2 (9 weeks) Psychiatry
Term 5:3 (9 weeks) Obstetrics and Gynaecology
Term 5:4 (9 weeks) Geriatrics/General Practice/Subspecialties

Group C:
Term 5:1 (9 weeks) Psychiatry
Term 5:2 (9 weeks) Obstetrics and Gynaecology
Term 5:3 (9 weeks) Geriatrics/General Practice/Subspecialties
Term 5:4 (9 weeks) Paediatrics

Group D:
Term 5:1 (9 weeks) Obstetrics and Gynaecology
Term 5:2 (9 weeks) Geriatrics/General Practice/Subspecialties
Term 5:3 (9 weeks) Paediatrics
Term 5:4 (9 weeks) Psychiatry

Assessment and Rules of Progression

The work of each rotating block is assessed during or towards the end of the block. Students will be required to pass in all four term examinations before progressing to Year 6. Subject examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee (normally Thursday of the term recess), require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5:4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5:4. A student who fails two terms or more will be required to repeat Year 5 in full.

Preparation for Year 6 Elective Term

Arrangements for Elective attachments in Year 6 must be made by the students. Students should commence these arrangements early in Year 5, especially those wishing to undertake attachments overseas. See subject description for MFAC6001 under entry for Year 6.

Year 5 Subject Descriptions

MFAC5001 Geriatrics/General Practice/Subspecialties

Staff Contact: Prof M. Harris and Dr J. Frith
CP30

This nine week term will start with an introductory week of tutorials in Geriatrics, Ophthalmology, Dermatology, Otorhinolaryngology and General Practice. The remainder of the term will consist of four two week teaching blocks in
specialty outpatient clinics, geriatrics, rural general practice and urban general practice.

Geriatrics
Objectives: To gain an understanding of diagnosis and assessment in geriatric medicine; to address the management of certain specific disorders in the elderly such as dementia, falls, incontinence, stroke, mobility disorders, dying and terminal care; to gain information on appropriate drug therapy; to gain insight into the roles of workers involved in caring for the elderly including physiotherapists, occupational therapists, speech therapists, community nurses and nurses in nursing homes; to become familiar with the broad spectrum of geriatric services including the day hospital, the acute hospital, the rehabilitation centre, the nursing home, community nursing and hospice care; to stimulate thought concerning future directions for an ageing Australia.

The subject consists of tutorials and practical experience in a range of health care facilities.

Assessment: Students are assessed on a viva voce, written assessments and log book completion.

General Practice
By the end of the subject the students should have acquired:
1. An understanding of the knowledge, attitudes and skills required by a competent general practitioner.
2. Skills in communicating with patients especially in history taking and explaining.
4. Knowledge of the principles of management in general practice.
5. An understanding of rural general practice.

During the teaching sessions on campus, at Fairfield Hospital and during the attachments, students are introduced to: a frame of reference for general practice and the GP consultation; a problem solving approach including the ability to cope with uncertainty; responsiveness to the total patient and the patient’s life; knowledge of community health resources; self assessment of communication and self directed learning; knowledge of rural practice and issues in rural health.

The teaching will consist of introductory tutorials, a two week attachment in urban general practice, a day general practice skills workshop at Fairfield Hospital and a two week attachment in rural general practice.

Assessment: Students will complete an assignment during each of the attachments, a viva voce assessment and a written assignment.

Subspecialties
Ophthalmology
Objectives: To learn the basic skills of assessment of eye disease and visual impairment. To expose students to the common diseases and conditions of the eye and visual system, and to management of the common conditions of the eye.

The teaching will be organised in skill transfer sessions in the clinical assessment of the eye and use of the ophthalmoscope and other eye instruments. There will also be tutorial classes. Students will also attend specialist clinics.

Otorhinolaryngology
Objectives: To learn the basic skills of the assessment of diseases and conditions affecting the ears, nose and throat. To expose the student to the common diseases of the ear and upper respiratory system and the management of these conditions.

The teaching will be organised in tutorial classes. Students will also attend specialist clinics.

Dermatology
Objectives: To learn the clinical symptoms and signs of the major conditions affecting the skin. To learn the diagnosis of common skin diseases and conditions and their management.

The teaching will be organised in tutorial classes. Arrangements will be made for students to attend special dermatology clinics.

Assessment: Students will be assessed through completion of a log attendance at subspecialty clinics and final written objective structured clinical examination.

OBST5001
Obstetrics and Gynaecology
Staff Contact: Prof M Bennett

Objectives: To be able to take a history and perform a physical examination relevant to the female reproductive system; to recognise common disorders of the female reproductive system; to manage common medical gynaecological disorders likely to be encountered in primary care practice; to provide antenatal and postnatal care for normal women and to recognise deviations from normal; to be able to provide emergency care when indicated and to know the indications for referral.

A program of lectures in core subjects, clinical, physiological and pathological conferences and simulated patient management problem exercises. Students are taught in small tutorial groups. Supervised clinical experience is gained in outpatient clinics, inpatient services and the labour wards of The Royal Hospital for Women, St George, Bankstown, and Liverpool hospitals. Neonatal paediatric experience is integrated with the teaching of Obstetrics and Gynaecology. Full details are described in a booklet published by the School.

Assessment: Continuing evaluation of clinical work, a written examination and an objective, structured clinical examination in the last week of term.
PAED5101
Paediatrics
Staff Contact: Prof H Bode
CP30
Objectives: To understand the physical, intellectual, and emotional development of children; to recognise important interactions between the child, the family and the community; to take a reliable medical history from children and parents/guardians; to perform a reliable physical examination; to communicate with children and parents/guardians; to recognise acutely ill children and initiate management; to recognise and initiate management of common paediatric disorders; to recognise the role of preventative care in child health; to recognise the roles of allied health care professionals.

General Paediatrics and Paediatric Surgery are taught at the Sydney Children's Hospital (5 weeks) and Associated Hospitals (4 weeks). Clinical clerking and practical involvement in care of inpatients are emphasised. Seminars and lectures on core material, case conferences, and instruction in clinical skills are provided. Students are expected to spend one night in four and one or two weekends per term in residence. Neonatal medicine is integrated with teaching of obstetrics and gynaecology.

Assessment: Progressive assessment from clinical supervisors through the term, and multiple choice and clinical examinations in the last week of term.

PSCY5001
Psychiatry
Staff Contact: Prof G Parker
CP30
Objectives: To be aware of the key symptoms, signs and syndromes of psychiatric disorder; to be able to take a history and conduct a mental state examination; to have acquired those skills necessary for a doctor in general or non-psychiatric specialised practice to decide appropriate management strategies; to be aware of, and have some experience in basic counselling skills; to be able to assess a patient's personality, psychological adjustment, coping repertoires, social function; to appreciate the importance of psychological factors in the diagnosis and treatment of illness; to be trained in interpersonal skills appropriate to clinical practice in any area of medicine; to be aware of the appropriate sections of the Mental Health Act and Guardianship Board legislation; to have received basic knowledge in special areas of development disability, forensic psychiatry, child psychiatry, transcultural psychiatry and psychogeriatrics; to be competent in prescribing psychotropic medications; and to be able to use simple behavioural techniques such as relaxation training.

Formal teaching seminars are held in the mornings and afternoons Monday to Friday in week 1 and mornings and afternoons Monday and Friday weeks 2 to 8. The remaining days are spent at Prince Henry, Prince of Wales, St George, St Vincent's, Sutherland, Bankstown and Liverpool Hospitals, where small group tutorials, case conferences and video analyses are carried out with academic and clinical staff, and clinical experience is obtained. Attachments to liaison psychiatry teams are organised so that students receive the appropriate teaching of skills related to general hospital patients. Visits to appropriate community facilities and to the Forensic Psychiatry Unit at Long Bay Gaol are organised.

Assessment: A video examination is held in the fifth week to assess interviewing skills. A written examination is conducted on the first day of the last week of term, and viva voce examinations are carried out on the Tuesday and Wednesday of the same week. A liaison psychiatry report and two clinical case histories are also part of the assessment.

Year 6

The first term in Year 6 is an Elective term (MFAC6001) of 8 weeks. The remaining five terms totalling 33 weeks are devoted to the subject Integrated Clinical Studies 6 (MDSG6001) which is primarily based in the Teaching Hospitals.

Year 6 Subject Descriptions

MDSG6001
Integrated Clinical Studies 6
Staff Contact: Prof J Dwyer
CP110
Objectives: To build on the student's experiences in Years 4 and 5 of the course. To ensure that during clinical attachments in Year 6 students are capable of accepting additional responsibility within clinical teams. To ensure a smooth transition from medical student to Intern. To integrate knowledge and skills gained in the previous three years, so that the student's assessment, documentation and management of clinical problems is sufficiently mature and rounded to warrant graduation and provisional registration. To have students leave medical school committed to the importance of continued medical education.

Year 6 of the new curriculum is fully integrated with the fourth year of the program. The year is organised as follows.

After the completion of Year 5, students complete an elective term. Time for this program is provided through the first weeks of Year 6. Students must report to the University in late February to commence the formal work associated with the Clinical Studies program for Year 6.

The next week of the year will involve a campus program similar to those presented in Year 4. Following that week, two further campus weeks will be held during the year. The lecture, tutorial and correlation clinic programs build on knowledge of the disease processes gained in Year 4 and a special emphasis is placed on management, therapeutics and practical information needed for students who will soon commence work as Interns.
Individual Principal Teaching Hospitals may strengthen the structured learning experience by providing additional lectures. However the time available for such additional programs will be strictly limited so that students are not diverted from their principal work on the wards.

Five 6-week attachments complete the year. For one of the six week terms, students will be attached to an emergency room and an intensive care unit at a Principal Teaching Hospital, or a selected rural hospital, where appropriate arrangements have been made for supervision. The remaining terms assigned to students will complement terms completed in Year 4. One medical and one surgical attachment will be provided at the students' Principal Hospital and a further term will be provided at a rural hospital.

Students may request a specific program during the flexible fifth term of Year 6, providing their progress has been satisfactory.

As in Year 4, clinical attachments provide an opportunity for learning on the job and the steady increase in the responsibility for patient management will be given to students as their experience and proven performance suggests that this is appropriate. On the wards, a significant emphasis will be placed on mastering procedural skills, therapeutics and such practical matters as interaction with ancillary medical staff and discharge planning.

Assessment: For students to be eligible to sit the final examination they must have performed satisfactorily in each of the Year 6 clinical attachments, developing satisfactory procedural and clinical skills. At the end of Year 6, students will be assessed by means of a focused clinical case examination with emphasis on management and therapeutics, a free ranging vive voce examination and a Multiple Choice Examination involving questions related to medicine, surgery, community medicine and clinical pharmacology, based on the material presented during the campus week lectures in Year 6. All parts of this examination must be passed for graduation.

Students are encouraged to consider commencing their elective term early by extending it over the period from the end of Year 5 to the end of the third week in February of the subsequent year.

Students should make individual arrangements for electives and are advised that some overseas governments, health authorities and/or hospitals require very early applications, accompanied by certification that the applicant is an enrolled medical student of the University who is eligible to undertake the specified term. When making the arrangements, students should specifically request that an appropriate person is willing to act as a supervisor. The supervisor is asked to submit a report to the Faculty Office by the end of the term.

Students who gain more than one acceptance for the elective term must communicate their refusals as soon as possible.

Students are encouraged to consult the files containing past student Elective reports, available in the School of Community Medicine. Students are also encouraged to discuss their Elective proposal(s) with a member of staff, perhaps their Clinical Associate Dean.

Assessment: Each student is required to produce a report which describes the nature of the work done during the Elective Term. This should be approximately 1000 words in length. The reports from the student and the supervisor must be submitted to the Faculty Office no later than the last day of the Elective Term. The reports are forwarded to the relevant Clinical Associate Dean for a decision as to whether the student has completed a satisfactory Term, and thence to the Assessment Committee. It is the student's responsibility to ensure that both reports (including the supervisor's report) are received by the due date and in time for consideration by the Assessment Committee. In general, students undertaking Elective Terms approved by the Dean are covered in respect of medico/legal claims made or actions instituted against them under the University's public liability and professional indemnity policy. However, this cover excludes claims made or actions instituted within the United States of America or Canada or territories under the jurisdiction of the courts of those countries. Students undertaking Elective Terms in the USA or Canada are therefore advised to ensure that they will be covered under the liability policies of the institutions at which they will be working, or that they arrange their own personal cover before commencing the Term. Students should also be aware that the University does not insure them against personal injury or illness. There is a limited cover provided by an insurance policy taken out by the Student Guild which covers course related activities within Australia only. Enquiries about this policy should be made directly to the Student Guild.

MFAC6001
Final Year Elective Term
Staff Contact: Prof WE Glover
CP10

Objectives: These include one or more of the following: to further develop knowledge and skills in Medicine and/or Surgery; to acquire preliminary training for a career in a specialty of medicine; to experience a different pattern of health care delivery from that practised in Australia; to obtain experience which may influence subsequent career orientation; to correct deficiencies perceived by students in their undergraduate program; to obtain a short introduction to research methods and philosophy.

The elective term may include work in one of the following areas: in any school or department within the Faculty of Medicine; in a hospital or medical institution either in Australia or in another country; with a medical practitioner either in Australia or in another country.
3821
Combined Science and Medicine Course BSc MB BS

The Science/Medicine course is an alternative course of study, whereby, over a seven-year program, a student may complete the degree of Bachelor of Science, with the Bachelor of Medicine and Surgery. The Science/Medicine course is intended for those students with special interest and aptitude in science, who wish to obtain a firm grounding in basic sciences. A limited number of places are available in this course and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Faculty Office as soon as possible after receiving their offer of a place in the Faculty. Selection of students for the Science/Medicine course is made approximately two weeks before commencement of Session 1. The students undertake a three-year course of study approved by the Presiding Member of the Faculty's BSc MB BS Committee leading to the award of the degree of BSc, and on completion, enter Year 3 of the normal Medicine course. The student is offered a choice of a number of programs, leading to a major or double major in one or two of the subjects Anatomy, Biochemistry and Physiology. After the three years, students may apply to do honours in the subject of their major, before entering the medical program.

Students who have completed the combined Science/Medicine degree course are eligible for the award of honours in the MB BS degree course, based on weighted performance in subjects (excluding the BSc degree at honours level) throughout the combined course.

Course Details

The Science course is divided up into subjects each of which is assigned credit points. For the Science degree, a minimum of 345 credit points in approved science subjects and 30 General Education credit points are required. Students usually take 135 credit points in Year 1 and 120 credit points in each of Years 2 and 3.

Subjects

Details of all subjects are given in the Science Handbook. Details of subjects taught by Schools in the Faculty of Medicine are also published in the Subject Descriptions section later in this book.

ANAT  Anatomy
BIOC  Biochemistry and Molecular Genetics
BIOS  Biological Science
CHEM  Chemistry
MATH  Mathematics
PHPH  Physiology and Pharmacology
PHYS  Physics
PSCY  Psychiatry

Year 1

All students take each of Biology, Chemistry, Mathematics and Physics. There is a choice of level in Mathematics and Physics.

Year 1  CP
BIOS1101  Evolutionary and Functional Biology  15
BIOS1201  Molecules, Cells and Genes  15
CHEM1101  Chemistry 1A  15
CHEM1201  Chemistry 1B  15
MATH1011  General Mathematics 1B  15 or
MATH1131  Mathematics 1A  15 or
MATH1141  Higher Mathematics 1A  15
MATH1021  General Mathematics 1C  15 or
MATH1231  Mathematics 1B  15 or
MATH1241  Higher Mathematics 1B  15
PHYS1002  Physics 1  30 or
PHYS1022  Physics 1 (For Health and Life Scientists)  30
Two General Education subjects  15

Year 2

All students must take subjects in Anatomy, Biochemistry and Physiology. In addition, students may take one or two electives. Some Year 3 programs require students to take a specified subject in place of an elective. Human Behaviour must be taken in either Year 2 or Year 3.

Year 2

ANAT2111  Introductory Anatomy  15
ANAT2211  Histology  15
BIOC2101  Principles of Biochemistry  15
BIOC2201  Principles of Molecular Biology  15
PHPH2112  Physiology 1  30
Elective(s)*
PSCY2201  Human Behaviour (Science)**  15
Two General Education subjects  15

* In choosing Year 2 elective subjects, students should take into consideration prerequisites for their major. Students not majoring in Anatomy should take either ANAT3121 Visceral Anatomy or ANAT3311 Mammalian Embryology in Year 2. Students majoring in Biochemistry must take either CHEM2021 Organic Chemistry or CHEM2041 Chemical and Spectroscopic Analysis or obtain exemption from Level 2 Chemistry prerequisites from the Head of School of Biochemistry and Molecular Genetics. Students completing an Anatomy double major or an Anatomy and Physiology double major may be permitted to take BIOC3261 Human Biochemistry in Session 2 of Year 2, subject to satisfactory results in BIOC2101 Principles of Biochemistry as determined by the Head of School of Biochemistry and Molecular Genetics.

** PSCY2201 Human Behaviour may be taken in Year 2 or Year 3.
Year 3

The program must include at least one Level 2 Anatomy subject and BIOC3261 Human Biochemistry. Under some circumstances one of the Anatomy subjects or BIOC3261 Human Biochemistry may be taken in Year 2. PSCY2201 Human Behaviour must be taken in Year 3 if not taken in Year 2. Students are not permitted to enrol in either PHPH3152 Pharmacology or PATH3201 Basic and Applied Pathology as Pharmacology and Pathology are studied in Year 3 of the Medicine course. Students who complete the four Level 3 Physiology subjects MAY be given an exemption from the Year 3 Medicine subject PHPH3014 Medical Physiology 2. Students must complete an Anatomy, Biochemistry or Physiology major. This requires students to take Level 3 subjects totalling at least 75 credit points. The possible majors are listed below.

**Physiology Double Major**

Not available

*This subject must be taken in Year 3 if not taken in Year 2

Year 4

Students usually join Year 3 of the Medicine course. However, students may apply to take honours in the subject of their major before proceeding to the Medicine course. The honours program is a one-year research project in the school of their major. Details are given in the Science Handbook. Enquiries should be directed to the head of the appropriate school.

Honours may also be awarded at the time of graduation with the degrees of MB BS, on the basis of a student's performance throughout the combined course (excepting any special studies for honours in Science). The award of honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the course in accordance with the rules applying to the Medicine course 3801, together with an aggregate mark based on the Science component of the course.
Combined Arts and Medicine Course
BA BSc(Med) MB BS

The Arts/Medicine course is an alternative course of study, in which, over a seven year program a student may complete the degree of Bachelor of Arts, with the degrees Bachelor of Science (Medicine), Bachelor of Medicine and Bachelor of Surgery. The Arts/Medicine course is intended for those students who wish to continue their interest and studies in the Arts during their medical studies.

A limited number of places are available in this course and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Faculty Office as soon as possible after receiving their offer of a place in the Medicine course. Selection of students for the Arts/Medicine course is made approximately two weeks before commencement of Session 1.

Over a period of seven years, students will be required to fulfill the requirements of the BSc(Med) MB BS degree course (with the exception of 15 credit points of General Education in Year 1) as well as a minimum of 120 credit points in subjects offered by the Schools/Departments/Programs within the Faculty of Arts (including an approved major sequence).

In Year 1, students will complete the Year 1 Medicine program plus the Level 1 subject(s) of their Arts major sequence. In Years 2 and 3 they will complete the program for the Year 2 of the Medicine course and the remaining subjects for their Arts component, before progressing to Year 3 of the Medicine program in their fourth year of enrolment.

Students who have completed the combined Arts/Medicine degree course are eligible for the award of honours in the BSc(Med) MB BS degree course, based on weighted performance in subjects throughout the combined course.

Course Details

Students are required to undertake all BSc(Med) MB BS subjects (with the exception of 15 credit points of General Education) plus a minimum of 120 credit points in Arts (including a major sequence) during Years 1 to 3. A major sequence equals 90 credit points (usually 30 at Level 1 and 60 at upper level). Details of all Arts subjects are given in the Arts Handbook.

Year 1

Students are required to complete all Medicine (course 3801) Year 1 subjects plus all Level 1 subjects of their Arts major sequence (with the exception of 15 credit points of General Education).

Year 2

Medicine Year 2 subjects are to be spread over Years 2 and 3 to allow for the completion of upper level subjects of their Arts major sequence, plus additional subjects to complete the BA component. The Medicine subjects BI0C2329 Medical Biochemistry and Genetics and ANAT2007 Anatomy 2 must be taken in Year 2 of the BA BSc(Med) MB BS course. The subject PSCY2101 Human Behaviour may be taken in either Year 2 or Year 3 of the program.

Year 3

The Medicine subjects PHPH2018 Medical Physiology 1 and MDSG2001 Clinical Studies 2 must be taken in Year 3 plus upper level Arts subjects to complete the Arts major sequence and any other Arts subjects to complete the required number of credit points (ie. 120).

Year 4

Students join Year 3 of the Medicine course. Honours may be awarded at the time of graduation with the degrees of BSc(Med) MB BS, on the basis of a student's performance throughout the combined course. The award of honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the course in accordance with the rules applying to the Medicine course 3801.
Intern Placement and Ranking of Students

Intern Placement and Registration

Each medical graduate seeking registration as a medical practitioner in New South Wales must complete a period as an intern in a hospital or institution approved by the New South Wales Medical Board. Before taking up an internship, a graduate must obtain a certificate of conditional registration from the Medical Board.

Intern placement is the responsibility of the Postgraduate Medical Council of the New South Wales Department of Health. Information concerning intern placement and conditional registration is issued to each student by the Faculty Office during the final year. Information may also be obtained from:

Internship: The Postgraduate Medical Council, Macquarie Hospital Campus, Cox's Road, North Ryde, 2113, Telephone: 9878 5355.
Registration: The Registrar, Medical Board of New South Wales, Gladesville Hospital Grounds, off Punt Road, Gladesville, Telephone 9879 6799.

Deferment of Internship

1. Deferment of internship for up to two years.

This may be granted by the Medical Board on the recommendation of the graduate's medical school. Normally this will be granted on medical grounds only, but in exceptional circumstances may be granted on other personal or compassionate grounds (e.g. temporary transfer overseas with spouse, childbearing, need to care for close relative, etc.). Normally deferment will be for one year only, and only in exceptional circumstances will it be granted on the recommendation of the medical school for two years. The medical school will take undergraduate performance into account in determining the length of deferment, and if it wishes may require the applicant to undertake some form of revision and/or assessment before the internship is allowed to commence.

2. Deferment of internship for more than two years.

If a graduate does not take up an internship within two years of graduation the Board will require evidence that the applicant has undertaken an appropriate period of revision and has been assessed as meeting the standards of current graduating students by an accredited Australian medical school. Normally this will be undertaken in the medical school where the student's undergraduate course was completed, but in exceptional circumstances (e.g. family transfer to another state) it could be undertaken at another school. The medical school will provide the Board with details of the revised program and assessment.

In the case of a long deferral, i.e. over 5 years, without significant contact with medicine, the graduate might be required to reattend on a full time basis one or more years of the course and undertake normal undergraduate assessments.

In the case of a shorter deferral or where there has been significant contact with medicine, a special program of student attachments and assessments might be appropriate.

Ranking Students for the Award of Honours and Intern Placement

Students are ranked on the basis of their performance throughout the undergraduate course. An overall course mark is calculated for each student using the following procedure:

1. A weighted average mark for each year of the course is determined. This year mark is obtained by weighting each of the subjects in the year, mainly according to the hours of teaching. The subject weights for each of the years of the course are shown in Table 1.

2. The overall course mark is determined by applying the year weightings listed in Table 2 to the weighted year marks.

3. If a student were required to sit for a supplementary assessment (other than for medical reasons or other exceptional circumstances) the subject mark used is that awarded for the original assessment.

4. If a student were required to repeat a year (other than for medical reasons or other exceptional circumstances) the weighted year mark used is that obtained at the first attempt.

5. In the calculation of the average weighted course mark for BSc MBBS students, the aggregate mark for the Science component is calculated as a weighted aggregate of all subjects counted towards the Science degree, except General Education subjects. The subject weights are as follows:

Level I subjects weighted by a factor equal to 0.0625 per subject, except General Mathematics and Physics 1 (for Health and Life Scientists) (0.05 per subject) and Higher Mathematics (0.07 per subject).

Level II subjects weighted by 0.1875 per subject.

Level III subjects weighted by 0.25 per subject.

Level II/III subjects to be counted as Level II or Level III according to whether the student passed the subject in Second or Third Year.

Level IV subjects (Honours) not counted.
The three years of BSc component of the BSc MB BS course are treated as equivalent to the first two years of the MB BS course and therefore have a total year weight of 6 relative to the MB BS year weightings.

There is a limit set of 50 for the best possible score in the first year of the BSc component to put all students, whether or not they undertake Higher Mathematics or Physics, on the same footing. Only the best 24 units in the BSc component are considered in calculating the ranked score.

6. Honours calculation for students undertaking the BA BSc(Med) MB BS course is the same as for the BSc(Med) MB BS course, i.e. the subjects in the BA component are not counted.

7. Provision is made for students admitted with advanced standing and/or exemptions in certain subjects not to be penalised in the calculation of rankings.

---

**Award of Honours**

1. The Faculty Year 6 Assessment Committee considers the ranked list of students and their marks and decides the cut-off marks for the award of honours at the various levels.

2. Neither the percentage of the students obtaining honours at the various levels nor the cut-off marks are predetermined, and the Committee makes its own assessment of the level of academic attainment indicated by the overall course mark.

3. As a guide, the distribution of the awards of honours in 1996 was:

**Class I Honours**
Course Mark: 70.6%
Number of Awards: 22
Percent of graduands: 12.0%

**Class II Div. I**
Course Mark: 68.2%–69.9%
Number of Awards: 24
Percent of graduands: 13.0%

**Class II Div. II**
Course Mark: 66.1%–68.0%
Number of Awards: 29
Percent of graduands: 15.8%

---

**Intern Placement**

The ranked list of graduands is merged with the ranked lists of Sydney University and Newcastle University medical graduands.

The Postgraduate Medical Council of the New South Wales Department of Health uses that combined list to allocate graduands to their highest available preference.

Bachelor of Science (Medicine) Honours
BSc (Med) Hons

This is a one year research program offered to students in the six year Medicine course who have achieved a high standard in their studies. Those who complete the research program in conjunction with the six year curriculum, will be eligible for the award of the degree BSc(Med)Hons.

In general the aims of the year, normally spent in supervised research, are to enable the student to acquire an appreciation of the value of observation and experimentation in the development of medical science, and to learn how to determine the 'current state of knowledge' in a defined field. This year enables the student to gain experience in the written and spoken presentation of scientific information.

Information concerning this course option is issued to medical students in midyear. A list of available research projects may be obtained from the Faculty Office or the Clinical Schools.

Rules for the Award of the Bachelor of Science (Medicine) Degree with Honours – BSc(Med)Hons

For candidates in the Courses 3801 and 3840

1. (a) Undergraduates who have successfully completed at least the first three years of the six year Medicine course 3801 or at least the first four years of the seven year Arts/Medicine course 3840 may enrol for the degree of BSc(Med)Hons in one of the following subjects: Anatomy, Biochemistry, Microbiology, Pathology, Pharmacology, Physiology, Psychology or in any other subject approved by the BSc(Med)Hons Committee provided that the candidate's performance in the subject area has been of a high standard.

(b) A student may register as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of the School concerned and the BSc(Med)Hons Committee.

2. (a) Medical graduates may enrol for the degree of BSc(Med)Hons in any subject approved by the BSc(Med)Hons Committee provided that their performance in the subject area has been of a high standard.

(b) A graduate may be registered as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of School concerned and the BSc(Med)Hons Committee.

3. The program for each candidate shall be designed to introduce the student to research in the appropriate discipline and shall consist of such formal and special work and any examinations prescribed by the Head of School concerned and approved by the BSc(Med)Hons Committee.

Assessment Guidelines

1. Schools make assessments on the advice of the supervisor and at least two assessors. Where the student performs his or her work in a clinical school, but is registered in a pre-clinical discipline, at least one of the assessors could be chosen from a relevant pre- or para-clinical school.

2. A thesis is compulsory and forms a major part of the assessment. The thesis must be typed and suitable for subsequent binding if required. The typescript length of the thesis is normally no more than 20,000 words.

3. It is desirable that candidates take part in the activities of the school by participation in seminars, by presentation of essays and other prescribed activities.

4. Candidates are normally required to give an oral presentation during the year and this may be taken into account in the assessment.

5. The degree of BSc(Med)Hons may be awarded in the following grades: Honours Class I; Honours Class II, Division I; Honours Class II, Division II or no award made.
School of Health Services Management

Some People Who Can Help You

Administrative Officer
Michelle Williams (Room 227, Samuels Building)
Telephone: + 61 (2) 385 2597
Facsimile: + 61 (2) 385 1036
Email: Michelle.Williams@unsw.edu.au

The School of Hospital Administration was founded in 1956 with a grant from the WK Kellogg Foundation to provide training in hospital administration. In 1969 the name was changed to School of Health Administration, and in 1989 to School of Health Services Management (its present name), in accordance with its broader objectives in teaching and research. It serves the needs of hospitals and health services throughout Australia but qualified overseas candidates are also admitted.

The School of Health Services Management currently offers both undergraduate and graduate programs. The Bachelor of Health Administration (BHA) is being discontinued and no new students have been admitted into the BHA since 1992. The BHA qualification will no longer be offered or conferred after the current group of students have completed their studies. The School will focus exclusively on postgraduate programs.

The School also offers three formal courses in health services management leading to the awards of the degree of Master of Health Planning, Master of Health Administration, and the Graduate Certificate in Health Services Management. These courses may be undertaken by coursework on a full-time, part-time or external basis. In addition, the degrees of Master of Health Administration, and Doctor of Philosophy may be taken following periods of full-time or part-time research in hospital and health service management.

Undergraduate Study Course Outlines

Bachelor of Health Administration

Note: No new enrolments since 1992

The Bachelor of Health Administration degree course is essentially multidisciplinary, with subjects chosen to impart relevant knowledge, attitudes and skills in a number of areas. There is, however, a compulsory core stream of management subjects. All students enrol in the same compulsory subjects in the first two-thirds of the course; thereafter electives are available to develop in some depth areas of special interest. A degree course at Honours Level is also available, the main objectives of which are to assist the student in achieving a deeper understanding of a subject or topic germane to the field of health administration, and competence in research and writing skills. Conditions for the award of the degree at Honours Level are listed below.

Candidates may be granted exemptions from a number of subjects if they have completed previous postmatriculation qualifications, e.g. nursing, radiography. Exemptions will be considered once the student has been accepted into the course, not before.

Conditions for the Award of the Degree of Bachelor of Health Administration

1. The degree of Bachelor of Health Administration may be awarded as a Pass degree or as an Honours degree. Three classes of Honours are awarded: Class 1, Class 2 in two divisions and Class 3.
2. A candidate for the degree of the Bachelor of Health Administration (Pass or Honours) shall:
   (1) comply with the requirements for admission;
   (2) follow the prescribed course of study in the School of Health Services Management and satisfy the examiners in the necessary subjects.
3. A student who is in the later stages of the course as an external student shall in each year attend the residential school conducted by the School of Health Services Management in the middle of the academic year.
4. Students who are enrolled internally but who are permitted to undertake an additional subject on an external enrolment basis will be required to attend lectures at a residential school in the subject.
5. (1) A student enrolled in the external or part-time internal course shall not normally be permitted to enrol in more than four subjects (inclusive of general education subjects) in any one year.
   (2) A student enrolled in the full-time course shall not normally be permitted to enrol in more than eight subjects (inclusive of general education subjects) in any one year.
   (3) Permission from the Head of School must be obtained for any departure from the sequence of subjects set out under the full-time and part-time (external) course patterns above.

Honours Degree

6. A student who has completed the second year of the full-time course, or the corresponding stage of the external course, normally with grades of Credit or better in all subjects, may make a written application to the Head of School of Health Services Management to enrol in the Honours subjects of the third year. These subjects are:
HEAL0340 Management of Health Services (Honours) and HEAL3130 Research and Evaluation Methods (Honours).

7. A student who then achieves a high level of academic performance in the third year Honours subjects is normally admitted to the final year of the Honours degree course. External students who have demonstrated outstanding achievement throughout the Pass course may be permitted to enrol in the final year of the Honours course even though they are unable to attend on a full-time internal basis during the final year.

8. The content of the Honours year subjects, HEAL8900 Thesis, HEAL8910 Advanced Studies in Health Administration A, and HEAL8920 Advanced Studies in Health Administration B, should be planned in collaboration with the student's thesis supervisor.

9. Normally, full-time internal students are expected to complete the Honours year requirements in one academic year, terminating with the submission of the thesis. External students are required to complete at least one month of full-time attendance at the University during the two years of Honours enrolment in order to complete satisfactorily Honours course requirements. The timing of University attendance is arranged with the student's thesis supervisor.

General Education Program

10. The University requires that undergraduate students undertake a structural program in General Education as an integral part of their degree.

Certain subjects in the BHA course are not necessarily offered every year. Students should check with the School to ascertain which subjects are to be offered in a particular year.

Notes:
(i) Students who wish to transfer from full-time to part-time studies after acceptance must seek approval from the course coordinator.
(ii) Students in full-time employment should not seek to undertake full-time studies in the BHA degree course.

(ii) Students in full-time employment should not seek to undertake full-time studies in the BHA degree course.

Elective Subjects

Electives are to be chosen by the student in consultation with the Head of the School of Health Services Management, from the subjects offered by the School of Health Services Management and such other schools or institutions as are deemed appropriate. The approval of the relevant Head of School is required to undertake a subject offered by another school or institution.

The electives have been specifically chosen to provide an opportunity for students to develop in some depth their particular vocational interests, eg three planning electives may be taken.

The following subjects have been approved as electives in the School of Health Services Management; not all subjects are necessarily available each year:

HEAL3010  Political Science  15
HEAL3020  Social Policy Administration  15
HEAL3030  Research and Evaluation Methods  15
HEAL3040  Management Skills  15
HEAL3060  Administration of Nursing Services  15
HEAL3070  Special Topic in Health Administration  15
HEAL3080  Epidemiology for Health Administrators  15
HEAL3090  Long Term Care Administration  15
HEAL3100  Human Resource Management  15
HEAL3110  Computer Techniques for Health Service Management  15
HEAL3120  Industrial Relations  15
HEAL3160  Current Issues in Nursing  15
HEAL4220  Health Planning 2A  15
HEAL4230  Health Planning 2B  15
HEAL4240  Health Planning 2C  15
HEAL5220  Law 2  15
HEAL5420  Accounting and Financial Management  2  15
HEAL5520  Health Economics 2  15
HEAL6120  Sociology, Ethics and Health 2  15
HEAL7120  Quantitative Methods and Statistics 2  15

Non-Award Students

Non-Award students enrolled on an external basis in subjects of the Bachelor of Health Administration degree course are required to meet all the conditions for the completion of each subject, including attendance at lectures in the subject at a residential school.
Subject Descriptions

Summary of Compulsory Undergraduate Subjects

The following Subject Descriptions appear earlier in this handbook under Course Details, and are presented by subject number and title, together with the year in which each subject is to be taken in the Medicine course.

ANAT1006
Anatomy 1
Year 1

ANAT2007
Anatomy 2
Year 2

BIOC1319
Biochemistry for Medical Students
Year 1

BIOC2329
Medical Biochemistry and Genetics
Year 2

CMED3001
Medical Ethics and Health Law
Year 3

MDSG2001
Clinical Studies 2
Year 2

MDSG3001
Clinical Studies 3
Year 3

MDSG4001
Integrated Clinical and Community Studies
Year 4

MDSG6002
Integrated Clinical Studies 6
Year 6

MFAC1001
Introductory Clinical and Behavioural Studies
Year 1

MFAC5001
Geriatrics/General Practice/Subspecialties
Year 5

MFAC6001
Final Year Elective Term
Year 6

OBST5001
Obstetrics and Gynaecology
Year 5

PAED5101
Paediatrics
Year 5

PATH3101
Pathology
Year 3

PHPH1004
Biology for Medical Students
Year 1

PHPH2018
Medical Physiology 1
Year 2

PHPH3014
Medical Physiology 2
Year 3

PHPH3055
Medical Pharmacology
Year 3

PSCY2101
Human Behaviour
Year 2

PSCY5001
Psychiatry
Year 5

Anatomy

Servicing Subjects only: taught within courses offered by other faculties.

ANAT2111
Introductory Anatomy
Staff Contact: Dr P Pandey
CP15 F HPW6
Prerequisites: BIOS1101, BIOS1201
Introduction to gross anatomy, based on a study of prospected specimens. Musculoskeletal, cardiovascular, respiratory, gastrointestinal, genitourinary and nervous systems. General topographical and surface anatomy.

ANAT2211
Histology 1
Staff Contact: A/Prof P Waite
CP15 F HPW3
Prerequisites: BIOS1101, BIOS1201
Corequisite: ANAT2111
Theory and practical aspects of modern histological techniques. Basic histology, including the morphological and functional properties of epithelial, connective, muscle and nervous tissues. Systematic histology, including a histological examination of the major systems of the body; cardiovascular, respiratory, lymphatic, integumentary, digestive, endocrine, urinary, reproductive and nervous (including eye and ear) systems. Emphasis on the ability to interpret histological sections and selected electron micrographs of mammalian tissues and organs and to relate morphology to tissue and organ function.

ANAT3121
Visceral Anatomy
Staff Contact: Dr K Ashwell
CP15 S2 HPW6
Prerequisite: ANAT2111
A detailed study of the visceral system, including autonomic nervous system, head and neck regions and the cardiovascular, respiratory, gastrointestinal and genitourinary systems. In addition, tutorials include clinical cases and surface and radiological anatomy.

ANAT3131
Functional Anatomy 1
Staff Contact: Prof D Tracey
CP15 S1 HPW6
Prerequisite: ANAT2111
Functional anatomy of the musculoskeletal system in the head, neck and upper limb, includes biomechanics of connective tissue; in particular bone, cartilage and tendon. Tutorials involve study of prospected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the upper limb.
ANAT3141
Functional Anatomy 2
Staff Contact: Prof D Tracey
CP 15 S2 HPW6
Prerequisite: ANAT3131

Functional anatomy of the musculoskeletal system in the trunk and lower limb. Includes functional aspects of muscle and a discussion of the mechanics and energetics of walking and running. Tutorials involve study of prosected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the lower limb.

ANAT3231
Cell Biology
Staff Contact: Dr M Hill
CP15 S1F HPW4
Prerequisite: BIOS1101, BIOS1201, BIOC2101 or BIOC2201 or BIOC2181 or BIOC2291 or PHPH2112

To develop an understanding of the anatomy and biology of the cell. Cell biology combines traditional anatomical methods with recent cell and molecular biology techniques. Key concepts will include developmental differentiation of the cell, its polarity, motility, cytoskeleton, signal transduction mechanisms and outcomes. An introduction to concepts of cell and extracellular matrix interactions will also be covered.

ANAT3311
Mammalian Embryology
Staff Contact: Dr M Hill
CP15 F HPW3
Corequisites: ANAT2211, ANAT2111

ANAT3411
Neuroanatomy 1
Staff Contact: Dr E Tancred
CP15 S1 HPW6
Prerequisites: ANAT2211, ANAT2111

Provides overview of functional organisation of central nervous system. Topics covered include: nerve cells and glial cells; cytoarchitecture of brain and spinal cord. Functional anatomy of sensory and motor processing, and higher cerebral functions such as language and emotions. Blood supply of the central nervous system, cerebrospinal fluid and membranous coverings. Comparative anatomy of the brain.

ANAT3421
Research Topics in Neuroscience
Staff Contact: A/Prof P Waite
CP15 S2 HPW3
Prerequisite: ANAT3411

Focuses on selected areas of contemporary neuroscience research interest. Includes: brain development and axon guidance, peripheral nerve regeneration, spinal cord injury, pain pathways, visual system function, cortical plasticity, brain imaging, mechanisms of learning and memory, motor systems and the neuropathology in degenerative disorders. The subject is organised in seminar format with discussion of original research papers. It is ideal for students considering doing Honours as it provides a background to current research problems and the opportunity to undertake a small project.

ANAT4000
Anatomy 4
Staff Contact: Dr M Hill
CP120 F
Prerequisite: Completion of the first three years of any Science program with a major in Anatomy (see Table 3 of Science Handbook)

An honours program consisting of the preparation of an undergraduate thesis and participation in School seminars.

---

Biochemistry

BIOC2101
Principles of Biochemistry
Staff Contact: Dr I McFarlane, A/Prof M Edwards
CP15 S1 HPW6
Prerequisites: BIOS1011 and BIOS1201, CHEM1101 and CHEM1201 or CHEM1002

Notes: Excluded BIOC1319, BIOC2312, BIOC2372, CHEM2929, BIOC2181

Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.

An introduction to modern biochemistry covering fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics to be covered will include: the nature and function of enzymes; the metabolic working of cells, tissues and organs; the interrelationships between the pathways of carbohydrate, lipid and amino acid metabolism; the vital role of enzymes and hormones in catalysis and metabolic regulation; the energy-trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures and to introduce the principles of biochemical analysis.
BIOC2201
Principles of Molecular Biology
Staff Contact: A/Prof T Stewart, Mr H Shoory
CP15 S1 HPW6
Prerequisites: BIOC2101
Notes: Excluded BIOC2312, BIOC2372, BIOC2291
Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.
This subject provides an introduction to modern molecular biology and covers the molecular mechanisms of gene expression and the fundamental aspects of recombinant DNA technology. The major topics to be covered include: the structure and function of DNA and RNA; the replication and transcription of DNA; translation of the genetic code into an amino acid sequence during protein synthesis; regulation of gene expression; manipulation of DNA including fragmentation by restriction enzymes, cloning of DNA fragments into vectors, hybridization analysis and principles of DNA sequencing; protein structure and function, protein engineering and site-directed mutagenesis; amplification of DNA by the polymerase chain reaction (PCR). Practical work to complement the lectures.

BIOC3111
Molecular Biology of Proteins
Staff Contact: Dr G King
CP15 S1 HPW 6
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201
Modern aspects of the structure-function relationships of proteins including discussion of the latest techniques of protein characterisation. Topics include: separation and analytical procedures; determination of amino acid sequence data; the nature of protein-protein and protein-ligand interactions including aspects of substrate binding, enzyme kinetics and enzyme mechanisms; the molecular architecture of proteins from the standpoint of the relationships among primary, secondary, tertiary and quaternary structures; aspects of protein engineering. Practical work illustrates and complements the lectures and provides experience with modern techniques of protein molecular biology.

BIOC3121
Molecular Biology of Nucleic Acids
Staff Contact: Dr A Bagnara
CP15 S1 HPW 6
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201
Detailed analysis of gene structure and function including: structure and properties of polynucleotides such as DNA and RNA; structure of chromatin; mechanisms and regulation of gene replication, transcription and translation; recombinant DNA technology, nucleic acid sequencing, DNA-DNA and DNA-RNA hybridisation as important tools of modern molecular biology; protein production using recombinant DNA systems. Practical work illustrates and complements the lectures and provides experience with contemporary biochemical techniques.

BIOC3261
Human Biochemistry
Staff Contact: A/Prof P Schofield
CP15 S2 HPW6
Prerequisite: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201
This unit covers aspects of metabolism that are of particular relevance to the human. The major topics to be covered will be selected from: nutrition, exercise, neurochemistry, xenobiotics, nucleotide and one-carbon metabolism, genetic diseases and molecular aspects of parasitology. The role of triglyceride, cholesterol and lipoprotein metabolism in human health, and other selected areas of human nutrition. Exercise, the metabolic fuels utilized and the use of in vivo NMR to monitor changes in energy metabolism. Specialised aspects of endocrinology and neurochemistry including prostaglandins, leukotrienes, enkephalins and endorphins. The interrelation of purines, pyrimidines, folate and cobalamin metabolism in humans. Xenobiotics: the metabolism of foreign compounds by humans. Biochemical aspects of genetic disease including the use of recombinant DNA techniques for prenatal diagnosis and carrier detection. Molecular studies of malaria and other parasites of the human. Practical work to amplify the lectures.

BIOC3271
Molecular Cell Biology
Staff Contact: A/Prof M Edwards
CP15 S2 HPW6
Prerequisite: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201
Cell biology from a molecular viewpoint. Biochemical aspects of cellular organisation and how they are integrated and controlled. The arrangement of the component molecules of organelles, their function in integrated cellular metabolism and the molecular interactions between the cells of multicellular organisms. The biochemistry of the cytoskeleton, carriers and intracellular transport systems. The regulation of cellular processes at the molecular endocrine level. Growth and differentiation. Aspects of cancer metabolism, the biochemistry of cell to cell communication and the structure and function of the extracellular matrix. Complementary to BIOS3141 Ultrastructure and Function of Cells and students with a special interest in cell biology are encouraged to take both subjects. Practical work amplifies the lectures.

BIOC3281
Recombinant DNA Techniques and Eukaryotic Molecular Biology
Staff Contact: A/Prof T Stewart
CP15 S2 HPW6
Prerequisite: BIOC3121
The organisation of the genomes of higher organisms derived mainly from the application of recombinant DNA technology and related techniques. Methods used for the isolation, identification and characterisation of eukaryotic genomes in terms of the organisation of single-copy and repeated sequences and of coding and non-coding
sequences and of several gene clusters, eg the alpha and beta globin gene cluster. Mechanisms known to operate in the control of eukaryotic gene expression, both at the DNA level and at the level of RNA processing. Review of several specialised genetic systems in plants and animals such as mitochondria, chloroplasts and RNA and DNA tumour viruses. Practical work provides training in the use of sterile techniques and in working with polynucleotides under nuclease-free conditions, using basic techniques such as hybridisation and DNA sequencing.

The subject examines the evolutionary history of life on earth and the relationship between environment, adaptation and function. Animal and plant physiology are covered with an emphasis on adaptation to Australian environmental conditions.

**BIOS2031**
**Biology of Invertebrates**
*Staff Contact: A/Prof P Greenaway*
CP15 S2 HPW6
*Prerequisites*: BIOS1011 or BIOS1101 and BIOS1021 or BIOS1201

A comparative study of morphology, taxonomy, functional biology and evolutionary relationships of invertebrates. Emphasis on major phyla and marine forms. Practical work includes anatomy of living and preserved specimens (including dissections) and a compulsory field camp. Personal expenses will be incurred.

**BIOS2061**
**Vertebrate Zoology**
*Staff Contact: Dr M Augee*
CP15 S1 HPW6
*Prerequisites*: BIOS1011 and BIOS1101 and BIOS1021 or BIOS1201

*Notes*: Practical class applications must be obtained during re-enrolment week from Room G21, Biological Science Building. For further details, see Faculty timetable.

Comparative study of the Chordata, with particular reference to the vertebrates, including morphology, systematics, evolution and natural history, with reference to selected aspects of physiology and reproduction. Practical work to supplement lectures. The course includes projects or field excursions. Field excursions may involve personal expenses.

---

**Chemistry**

**CHEM1101**
**Chemistry 1A**
*Staff Contact: Dr P Chia*
CP15 S1 or S2 HPW6
*Prerequisites*: HSC exam mark range required: 2 unit Mathematics 60-100, or 3 unit Mathematics 1-50, or 4 unit Mathematics 1-100 and 2 unit Chemistry 65-100, or 3 unit Science 90-150, or 4 unit Science 1-200 or 2 unit Physics 75-100, or CHEM1401 65 or higher.

*Note*: Students who have not undertaken chemistry or physics at HSC level should take CHEM1401 before proceeding to CHEM1101. However, no more than 30 credit points of chemistry at Level 1 may be counted towards a Science degree.

CHEM1201
Chemistry 1B
Staff Contact: Dr P Chia
CP15 S2 or Summer Session HPW6
Prerequisite: CHEM1101
Note: Students who require CHEM1101 and CHEM1201 but have not undertaken chemistry at HSC level should take CHEM1401 before proceeding to CHEM1101. However, no more than two level 1 chemistry units may be counted towards a degree.

CHEM2021
Organic Chemistry
Staff Contact: Dr R Read
CP15 S2 HPW6
Prerequisites: CHEM1101 and CHEM1201 or CHEM1002
Applications of spectroscopy in structure elucidation. Reactive intermediates, addition and rearrangement reactions, carbonyl group chemistry. Chemistry of aromatic compounds.

CHEM2041
Chemical and Spectroscopic Analysis
Staff Contact: Dr R Read
CP15 S1 HPW6
Prerequisites: CHEM1101 and CHEM1201 or CHEM1002, MATH1201 or MATH1231 or MATH1241.
Principles and applications of chemical and analytical spectroscopy. Statistical treatment of data. Titrimetric and potentiometric analysis. Separation techniques.

HEAL0320
Management of Organisations
Staff Contact: Dr Pieter Degeling
CP15 S1 L4
Prerequisite: HEAL0310
Emphasis on analytical skills. Develops the student's understanding of organisation theory and its application to management. Theories covered include systems, contingency, administrative, action and resource dependency, the pluralist perspective. Level of analysis is at organisational level rather than microperspective of HEAL0310.

HEAL0330
Management of Health Services
Staff Contact: Prof James Lawson
CP15 S1 L4
Prerequisites: HEAL0310, HEAL0320
Analyses values, structures, management approaches and relationships within component organisations and programs of the Australian health services and related areas. Areas of study: comprehensive service provision, detailed analysis of individual organisations, departments or programs; roles of the manager; professional development; concepts of microstructure and social analysis. Students are required to use these and other tools in the analysis of practical situations.

HEAL0340
Management of Health Services (Honours)
Staff Contact: Prof James Lawson
CP15 S1 L4
Prerequisites: HEAL0310, HEAL0320
Note: Not offered in 1998.
Includes and extends the theoretical and practical studies in HEAL0340. Students produce a literature review of a significant aspect of health and hospital services management analysing major conceptual issues and their development.

HEAL1110
Health Care Systems
Staff Contact: Mr Ian Forbes
CP15 S1 L4
The system of organisations, institutions, services and financial arrangements which constitute the Australian health care system. Constitutional, legal and economic environment in which the system operates. Main characteristics of public and private hospitals, nursing homes and other institutions. Community health and other noninstitutional services. The financing of health services. The health work force, with emphasis on the medical and nursing components. Comparisons of the Australian health care system with those of other countries.
HEAL1120
Public Health and Epidemiology
Staff Contact: Prof James Lawson
CP15 S2 L4
Definitions of health and disease; basic epidemiological concepts; medical terminology; body systems, classification of disease; disease causation. Protection and promotion of health with emphasis on contemporary risk factors; diagnosis; treatment practices. Evaluation of health and health care; health status indicators; preventive and therapeutic trends; research strategies.

HEAL3010
Political Science
Staff Contact: Dr Pieter Degeling
CP15 SS L4
Note: Not offered in 1998
The study of politics, with special reference to Australian political institutions and administrative practices. Topics include: concepts and theories of politics; Australian political institutions and the party system; the Constitution and intergovernmental financial and legal relations; public administration with special reference to the Commonwealth and New South Wales public services.

HEAL3020
Social Policy and Administration
Staff Contact: Dr Pieter Degeling
CP15 SS L4
Note: Not offered in 1998
The scope and principles of social policy and administration; values and value analysis; models and theories of social policy; problems in policy formulation, implementation, administration and evaluation; contemporary Australian social policy, health insurance, poverty, social security; systems of income guarantee, national compensation and national superannuation.

HEAL3030
Research and Evaluation Methods
Staff Contact: Dr Mary-Louise McLaws
CP15 SS L4
Prerequisites: HEAL5400, HEAL7110
The need for and special problems of health services research and evaluation; the nature of 'scientific' knowledge; identifying appropriate research areas; statements of objectives and formulation of hypotheses; experimental and quasiexperimental designs; non experimental models; sample selection; means of acquiring data; introduction to analysis of data; methods of presenting findings; research and decision making policy issues.

HEAL3040
Management Skills
Staff Contact: Mr Ian Forbes
CP15 SS L4
Note: Not offered in 1998.
An opportunity for students to extend their theoretical knowledge and to develop practical skills in communication, including consulting, negotiating and bargaining, conflict management, interviewing, conducting meetings, giving instructions and making requests, writing reports, submissions and memos, public speaking and dealing with the media.

HEAL3060
Administration of Nursing Services
Staff Contact: Dr Anna Whelan
CP15 SS L4
Note: Not offered in 1998.
Content is organised in terms of the material suggested by the standards for the Nursing Division of Hospitals compiled by Australian Nursing Federation. Major foci are the goals, structures, processes and control mechanisms common to nursing services departments.

HEAL3070
Special Topic in Health Administration
Staff Contact: Mr Kevin Forde
CP15 SS L4
An occasional elective dealing with some aspect of health administration, selected according to current demand and availability of local and visiting lecturers.

HEAL3080
Epidemiology for Health Administrators
Staff Contact: Dr Mary-Louise McLaws
CP15 SS L4
Note: Not offered in 1998.
The general purposes and content of epidemiological studies. Concepts and strategies of epidemiology. Sources, collection, collation and analysis of epidemiological data. The application of epidemiological methodology and information in the planning, operation and evaluation of health services.

HEAL3090
Long Term Care Administration
Staff Contact: Prof James Lawson
CP15 SS L4
Note: Not offered in 1998.
Introduction to the more important theories, concepts and practical tools which are applicable to the evaluation, administration and planning of long term care institutions and nonresidential agencies and programs. Topics include: patient assessment and rehabilitation; psychiatric care; social factors; financial and economic aspects; quality measurement and control.

HEAL3100
Human Resource Management
Staff Contact: Dr Anna Whelan
CP15 S1 L4
Prerequisite: HEAL0310
Note: Not offered in 1998.
Topics include: the employment relationship; the legislative and institutional context; current issues in industrial relations in health services; discrimination and work; EEO; participation of women in the health workforce; recruitment and selection policies and processes; employee training and development; personnel appraisal/performance review;
disciplinary actions, appeal procedures, termination of employment, redundancy; occupational health and safety; new management techniques such as Total Quality Management (TQM).

HEAL3110
Computing Techniques for Health Service Management
Staff Contact: Dr Deborah Black
CP15 SS L4
Prerequisite: HEAL7110
Note: Not offered in 1998.
Programming and principles of operation of commercial software, including database management systems, word processors and spreadsheets. Application of software to, and development of, programming skills for health service management.

HEAL3120
Industrial Relations: A Health Sector View
Staff Contact: Dr Anna Whelan
CP15 SS L4
Note: Not offered in 1998.
The role of the health administrator, the employing authority, the unions and the industrial tribunal will be examined within the context of the Australian health care system.

HEAL3130
Research and Evaluation Methods (Honours)
Staff Contact: Dr Mary-Louise McLaws
CP15 SS L4
Prerequisites: HEAL5400, HEAL7110
Note: Not offered in 1998.
An extension of topics in HEAL3030 stressing the choice of constructive research problems, critical evaluation of the literature and formulation of a research protocol as background to the formal presentation of a thesis in Year 4.

HEAL3160
Current Issues in Nursing
Staff Contact: Dr Anna Whelan
CP15 SS L4
Controversial aspects of the nursing profession of particular interest to nursing and health administrators. Current topics include: nursing education, unionism vs professionalism, political action in nursing, factors affecting the nurse's participation in the workforce.

HEAL4220
Health Planning 2A
Staff Contact: Mr Ian Forbes
CP15 SS L4
Prerequisite: HEAL4210
Note: Not offered in 1998.
Building design processes and procedures; health facility design and construction; location, layout, space allocation, traffic systems, supply and disposal systems, energy conservation. Construction and contract management, commissioning and equipping, maintenance and renovation; cost control and site supervision; briefing and evaluation techniques.

HEAL4230
Health Planning 2B
Staff Contact: Mr Ian Forbes
CP15 SS L4
Prerequisite: HEAL4210
Note: Not offered in 1998.
Environmental psychology and perception; anthropometrics, physiology of comfort and work performance; accident prevention, safety and security; building performance measurement, design in use surveys. Design for particular groups of users: aged, children, handicapped; design for clinical and supportive service functions and activities, eg inpatient care, surgery, consultation, catering, cleaning, etc.

HEAL4240
Health Planning 2C
Staff Contact: Mr Ian Forbes
CP15 SS L4
Prerequisite: HEAL4210
Note: Not offered in 1998.
Techniques and models for planning health services including elementary location theory; definition of catchment areas; measuring population characteristics and needs; formulae for allocation of resources. Prediction, forecasting and operations research techniques. Introduction to use of computers in health service planning.

HEAL5200
Law 1T
Staff Contact: Mr Philip Bates
CP15 S2 L4
Note: Not offered in 1998.
This is a compulsory terminating subject for eligible students who have previously studied Law subjects at tertiary level in other courses which did not have a health services law component. Eligible students should enrol in HEAL5200 Law 1T instead of enrolling in HEAL5210 Law 1. HEAL5200 briefly revises elementary legal concepts of the kind covered more fully in HEAL5210, and then deals with selected health law topics.
HEAL5210
Law 1
Staff Contact: Mr Philip Bates
CP15 S1 L4
General introduction to law with health service applications, designed for students who have not previously studied law subjects. Topics: how to study law; the role of law in health administration and planning; Australia’s legal origins and the role of English law; federalism and the constitutional framework; types of legal rules, the theory of precedent, and legislation; access to legal advice; aspects of the law of torts, contracts, criminal law, administrative law; the coroner; other selected health law topics.

HEAL5220
Law 2
Staff Contact: Mr Philip Bates
CP15 SS L4
Prerequisite: HEAL5210
Note: Not offered in 1998.
An elective subject. Legal areas of special vocational concern for health administration and health planning. Relationships between existing laws and law reform proposals. The precise subject matter may vary from year to year depending partly on student’s preferences and career expectations. Health law topics introduced in HEAL5210 also studied in more depth.

HEAL5400
Health Information Systems
Staff Contact: Dr Deborah Black
CP15 S1 L4
Note: Not offered in 1998.
An introductory subject with a financial and quantitative emphasis, having special reference to the application of measurement techniques to health services data. Elementary statistics for health services management with an introduction to the uses of computing in health care. Information systems relevant to hospital management. Introduction to concepts of accounting, costs and budgeting.

HEAL5410
Accounting and Financial Management 1
Staff Contact: Mr Kevin Forde
CP15 S2 L4
Prerequisite: HEAL5400
Introduction to accounting with particular reference to hospitals and health services institutions: basic accounting concepts; doctrines and conventions of accounting, analysis and interpretation of accounting data; Governmental budgeting and accounting systems; introduction to the theory and practice of hospital fund accounting; Federal State financial relations and their implications.

HEAL5420
Accounting and Financial Management 2
Staff Contact: Mr Kevin Forde
CP15 SS L4
Prerequisites: HEAL5400, HEAL5410
Note: Not offered in 1998.

HEAL5510
Health Economics 1
Staff Contact: Mr Kevin Forde
CP15 S2 L4
Prerequisite: HEAL5400
An introduction to economic analysis as applied to the conditions and problems confronting Australia, with special reference to the economic aspects of health and medical care. Topics include: the economic approach; demand for and supply of medical services; the impact of insurance on the health care market; the efficient production and distribution of health services; the operation of the price system; the theory of costs and production; monetary and fiscal policy.

HEAL5520
Health Economics 2
Staff Contact: Mr Kevin Forde
CP15 SS L4
Prerequisites: HEAL5400, HEAL5510
Note: Not offered in 1998.
Advanced topics in health economics, covering both macro and micro issues. Analysis of Australian health expenditure; hospital economics; health insurance.

HEAL6110
Sociology, Ethics and Health 1
Staff Contact: Dr Stephanie Short
CP15 S2 L4
This subject introduces students to the social factors which shape the patterning of health and illness, and the delivery of health care services. Topics include: colonization and Aboriginal health; gender, patriarchy and health; bioethics and medical research; madness and medicine.

HEAL6120
Sociology Ethics and Health 2
Staff Contact: Dr Stephanie Short
CP15 SS L4
Prerequisite: HEAL6110
Note: Not offered in 1998.
Extension of HEAL6110. In this subject health sociology issues are analysed with increasing theoretical and methodological rigour.
HEAL7110
Quantitative Methods and Statistics 1
Staff Contact: Dr Deborah Black
CP15 S1 L4
Prerequisite: HEAL5400
Quantitative and statistical methods pertaining to the administration, planning and management of health services.

HEAL7120
Quantitative Methods and Statistics 2
Staff Contact: Dr Deborah Black
CP15 SS L4
Prerequisite: HEAL7110
Note: Not offered in 1998.
More advanced examination of quantitative and statistical methods.

Mathematics

MATH1011
General Mathematics 1B
Staff Contact: School of Mathematics First Year Office
CP15 S1 or S2 HPW6
Prerequisites: HSC mark range required: 2 unit Mathematics (60-100) or 2 and 3 unit Mathematics (1-150) or 3 and 4 unit Mathematics (1-200). (2 unit Mathematics in this instance refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject. It does not refer to the subjects Mathematics in Society or Mathematics in Practice.
These numbers may vary from year to year.)
Notes: Excluded MATH1032, MATH1042, MATH1131, MATH1141, ECON1202, ECON2200, ECON2201, ECON2202, ECON2290, ECON2291.
Complex numbers, vectors and vector geometry, linear equations, matrices and matrix algebra, determinants. Functions, limits, continuity and differentiability, integration, polar coordinates, logarithms and exponentials, hyperbolic functions, functions of several variables. Introduction to computing and the Maple symbolic algebra package.

MATH1231
Mathematics 1B
Staff Contact: School of Mathematics First Year Office
CP15 S2 HPW6 or Summer Session HPW9
Prerequisite: MATH11131 or MATH1141
Notes: Excluded MATH1021, MATH1032, MATH1042, MATH1241, ECON1202, ECON2200, ECON2201, ECON2202, ECON2290, ECON2291.

MATH1131
Mathematics 1A
Staff Contact: School of Mathematics First Year Office
CP15 S1 or S2 HPW6
Prerequisites: HSC mark range required: 2 unit Mathematics (90-100), or 2 and 3 unit Mathematics (100-150) or 3 and 4 unit Mathematics (100-200) or MATH1011 (these ranges may vary from year to year). 2 unit Mathematics in this instance refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject. It does not refer to the subjects Mathematics in Society or Mathematics in Practice.
Notes/ Excluded MATH1011, MATH1032, MATH1042, MATH1141, ECON1202, ECON2200, ECON2201, ECON2202, ECON2290, ECON2291.
As for MATH1231 but in greater depth.

MATH1141
Higher Mathematics 1A
Staff Contact: School of Mathematics First Year Office
CP15 S1 HPW6
Prerequisites: HSC mark range required: 2 and 3 unit Mathematics (145-150) or 3 and 4 unit Mathematics (186-200) (these numbers may vary from year to year).
Notes/ Excluded MATH1011, MATH1032, MATH1042, MATH1131, ECON1202, ECON2200, ECON2201, ECON2202, ECON2290, ECON2291.
As for MATH1131 but in greater depth.

MATH1241
Higher Mathematics 1B
Staff Contact: School of Mathematics First Year Office
CP15 S2 HPW6
Prerequisite: MATH11131 or MATH1141, each with a mark of at least 70.
Notes: Excluded MATH1021, MATH1032, MATH1042, MATH1231, ECON1202, ECON2200, ECON2201, ECON2202, ECON2290, ECON2291.
As for MATH1231 but in greater depth.
Medicine

Servicing Subject only: taught within a course offered by another faculty.

MDCN8001
Principles of Medicine for Optometry Students
Staff Contact: A/Prof L Simons (St Vincent's Hospital)
CP5 F HPW1
Note/s: Students normally take the subject in Year 4 of course 3950. Restricted to course 3950.

An overview of historical, epidemiological, pathophysiological, diagnostic, therapeutic and public health aspects of disease in man and the various clinical categories of practice.

Pathology

Servicing Subject only: taught within a course offered by another faculty.

PATH3201
Mechanisms of Human Disease
Staff Contact: Professor C Geczy
CP15 F HPW3
Prerequisites: Enrolment in the Advanced Science Program. Advantage in having previous understanding of anatomy (ANAT2211, ANAT2111), physiology (PHPH2112), biochemistry (BIOS1201, BIOC2372), immunology or equivalent.

Lectures, tutorials, practical classes and research/casebook projects aimed at increasing understanding of the molecular basis of disease with particular emphasis on classification of disease processes, clinical outcomes and disease prevention. Comparisons between normal and abnormal cell/tissue and organ function will be made. Includes processes of cell and tissue degeneration, acute and chronic inflammation, infection, thrombosis, infarction, embolism and ischaemia. Particular examples include diseases of practical importance such as pneumonia, tuberculosis, arthritis, lung and myocardial infarction. Skin wounds and fractures will be used to illustrate healing and regeneration. Aberrations of cell growth introduces neoplasia and carcinogenesis with examples of common tumours. The impact of modern biologen understanding disease mechanisms will be demonstrated in practical classes and projects which complement the lectures.

Physiology and Pharmacology

Servicing Subject only: taught within courses offered by other faculties.

PHPH2112
Physiology 1
Staff Contact: Dr J Morley
CP30 F HPW6
Prerequisites: BIOS1101, BIOS1201; CHEM1101 and CHEM1201; MATH1131 or MATH1141 or MATH1011; MATH1231 or MATH1241 or MATH1021.
Corequisites: Either BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291
Note/s: 1. Students who take BIOC2181 and BIOC2291 are advised that a credit level is normally required for progression to Level III Physiology subjects. Pass level students may be enrolled at the discretion of the Head of School.

2. Student numbers in Physiology 1 are subject to a quota, and entry to the subject will be allocated on academic merit.

Introduces fundamental physiological principles, dealing first with basic cellular function in terms of chemical and physical principles, and, with the operation of the various specialised systems in the body, for example, the cardiovascular system; the respiratory system; the gastrointestinal system; the endocrine system; the nervous system. Includes a substantial series of practical class experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.

PHPH2122
Principles of Physiology (Optometry)
Staff Contact: Dr J Morley
CP30 F HPW6
Note/s: Restricted to course 3950.

Covers the same general areas of physiology as Physiology 1. Principles of Physiology is taken only by students in the BOptom degree course.

PHPH3121
Membrane and Cellular Physiology
Staff Contact: Prof P Barry
CP15 S1 HPW6
Prerequisites: PHPH2112, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291
Note: Students who take BIOC2181 and BIOC2291 are advised that a credit level is normally required for progression to Level III Physiology subjects. Pass level students may be enrolled at the discretion of the Head of School.

The properties of cell membranes, generation of potentials, permeation of ions, solutes and water across membranes, single channel measurements, unstirred layer effects, generation of electrical signals in nerve and muscle cells produced by ion movements, and transmission of information between cells and the mechanisms underlying
The neural mechanisms in sensation and the control of critical examination of appropriate research papers.

**PHPH3131**  
Neurophysiology  
*Staff Contact: Prof M Rowe*  
CP15 S1 HPW6  
*Prerequisites: PHPH2112, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291*  
*Note: Students who take BIOC2181 and BIOC2291 are advised that a credit level is normally required for progression to Level III Physiology subjects. Pass level students may be enrolled at the discretion of the Head of School.*

The neural mechanisms in sensation and the control of posture and movement. Includes segments on neural control of cardiorespiratory function; transmitters and neuromodulators; neural mechanisms in certain higher functions, eg language and memory; nervous system plasticity; computer applications in neuroscience. Experimental work introduces the student to electrophysiological and other neuroscience research techniques.

**PHPH3152**  
Pharmacology  
*Staff Contact: A/Prof G Graham*  
CP30 F HPW6  
*Prerequisites: PHPH2112, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291*  
*Note: Students who take BIOC2181 and BIOC2291 are advised that a credit level is normally required for progression to Level III Physiology subjects. Pass level students may be enrolled at the discretion of the Head of School.*

Includes a study of the absorption, distribution and metabolism of drugs, plus a study of the pharmacology of the autonomic nervous system, the cardiovascular system, the central nervous system, the kidney, the endocrine system and also a study of pharmacokinetics. Practical work complements the lecture program by demonstrating a variety of basic pharmacological techniques.

**PHPH3211**  
Cardio-respiratory and Exercise Physiology  
*Staff Contact: A/Prof M Perry*  
CP15 S2 HPW6  
*Prerequisites: PHPH2112 and either BIOC2101 and BIOC2201, or BIOC2372 or BIOC2181 and BIOC2291*  
*Note: Students who take BIOC2181 and BIOC2291 are advised that a credit level is normally required for progression to Level III Physiology subjects. Pass level students may be enrolled at the discretion of the Head of School.*

An advanced course which emphasises function and control of the cardiovascular system; gas exchange in the lung and blood gas carriage in the respiratory system and work capacity, preventive medicine and laboratory testing in exercise physiology. Extensive practical components involve mammalian preparations and human subjects.

**PHPH3221**  
Endocrine, Reproductive and Developmental Physiology  
*Staff Contact: Dr L Ulman*  
CP15 S2 HPW6  
*Prerequisites: PHPH2112 and either BIOC2101 and BIOC2201, or BIOC2372 or BIOC2181 and BIOC2291*  
*Note: Students who take BIOC2181 and BIOC2291 are advised that a credit level is normally required for progression to Level III Physiology subjects. Pass level students may be enrolled at the discretion of the Head of School.*

There are three major components to this subject, which consists of lectures, practical classes, tutorial and case studies. The first component of the course is a study of neuroendocrinology, molecular and systematic endocrinology, and of the endocrinology of exercise and disease. The second component of the subject deals with female and male reproductive physiology. The third component of the subject details the physiology of pregnancy, and that of the fetus and the newborn.

**PHPH4218**  
Physiology 4 Honours – Full Time  
*Staff Contact: Dr B Nail*  
CP120

**PHPH4224**  
Physiology 4 Honours – Part Time  
*Staff Contact: Dr B Nail*  
CP60  
*Note/s: Completion of program 7300 including 7 level III units, 4 of which must be Physiology.*

The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a thesis and presented as a seminar. Students are also required to participate in a General Education program which consists of a core program of seminars, an essay and participation in discussion groups.

**PHPH4258**  
Pharmacology 4 Honours – Full Time  
*Staff Contact: Dr B Nail*  
CP120

**PHPH4264**  
Pharmacology 4 Honours – Part Time  
*Staff Contact: Dr B Nail*  
CP60  
*Note/s: Completion of program 7301 including 7 Level III units.*

The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a thesis and presented as a seminar. Students are also required to participate in a General Education program which consists of a core program of seminars, an essay and participation in discussion groups.
Physics

**PHYS1002**  
**Physics 1**  
*Staff Contact: First Year Director*  
CP30 F HPW6  

*Prerequisites:* HSC mark range required: 2 unit Mathematics 90-100, or 3 unit Mathematics 1-50, or 4 unit Mathematics 1-100 or (for PHYS1002 only) MATH1011, and 2 unit Science (Physics) 65 -100, or 2 unit Science (Chemistry) 75 -100, or 3 unit Science 100 -150, or 4 unit Science 1-50 or PHYS1022 (2 unit Mathematics in this instance refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject, and does not refer to the subjects Mathematics in Society or Mathematics in Practice).  

*Corequisite:* One of MATH1011 or MATH1131 or MATH1141 and one of MATH1021 or MATH1231 or MATH1241  

Motion of particles under the influence of mechanical, electrical, magnetic and gravitational forces. Force, inertial mass, energy, momentum, charge, potential, fields. Conservation principles applied to problems involving charge, energy and momentum. Application of Kirchoff’s laws to AC and DC circuits. Uniform circular motion, Kepler's laws and rotational mechanics. Properties of matter: solids, liquids, gases. Application of wave theories to optical and acoustical phenomena such as interference, diffraction and polarisation.

**PHYS1022**  
**Physics 1 (For Health and Life Scientists)**  
*Staff Contact: First Year Director*  
CP30 F HPW6  

*Corequisites:* One of MATH1011 or MATH1131 or MATH1141 and one of MATH1021 or MATH1231 or MATH1241  

Principally for students majoring in the life and health sciences disciplines. Topics at an introductory level.  

The methods of physics, describing motion, the dynamics of a particle, conservation of energy, kinetic theory of gases, properties of liquids, vibrations and waves, electricity and conduction in solids, ions and ionic conduction, magnetism and electromagnetic induction, alternating current, atomic nature of matter, X-rays, the nucleus and radio-activity, geometrical optics, optical instruments, wave optics, microscopes and their uses.

---

Psychiatry

Servicing Subject only: taught within courses offered by other faculties.

**PSCY2201**  
**Human Behaviour**  
*Staff Contact: Dr P Ward*  
CP15 F HPW3  

*Note:* Restricted to combined degree course 3821.

*Objectives:* To provide students with key concepts in the five main topic areas and demonstrate the practical application of these concepts in medical practice. The five main topic areas are: research methods in behavioural sciences, psychology in relation to medicine, sociology in relation to medicine, bioethics and human sexuality. Students are thus encouraged to develop an understanding of human behaviour as the result of the complex interaction of a number of factors so that they are more likely to appreciate and respect their patients and colleagues as persons. Taught in both sessions. Didactic material and some case material is presented in lectures and the tutorial program is structured to consolidate this information, frequently using discussion of specific case examples. Emphasis is placed on developing skills in clear professional communication, with feedback on written assignments, tutorial presentations, and encouragement to use visual aids in presentations. Specific topics covered include: risk behaviours; anxiety; stigma; social class and health; the sexual response and how it changes across the lifespan; and a range of bioethical topics including human and animal experimentation, euthanasia, the doctor and the state.

A handbook for the course is produced each session and may be borrowed from the Biomedical Library Closed Reserve or purchased from the School of Psychiatry.

*Assessment:* In Session 1, assessment consists of two written examinations, a tutorial assignment, and a tutorial presentation. In Session 2, students are required to write a major essay on Bioethics, present a tutorial paper and sit a final written examination.
Graduate Enrolment Procedures

All students enrolling in postgraduate courses should obtain a copy of the free booklet *Re-enrolling 1998* available from the School Offices and the Admissions Office. This booklet provides detailed information on enrolment procedures and fees, enrolment in miscellaneous subjects, locations and hours of cashiers and late enrolment details. Students interested in undertaking a postgraduate course should consult the appropriate Head of School or the Postgraduate Section (through the Admissions Office in The Chancellery).

Graduate Courses

At the postgraduate level, study may be undertaken for the award of the following degrees:

**Doctorates**
- Doctor of Medicine (MD)
- Doctor of Philosophy (PhD)

**Masters**
- Master of Clinical Education (MClinEd)
- Master of Community Health (MCH)
- Master of Community Paediatrics (MCommPaed)
- Master of Drug Development (MDD)
- Master of Health Professions Education (MHPEd)
- Master of Medicine (MMed)
- Master of Psychological Medicine (MPM)
- Master of Public Health (MPH)
- Master of Science (MSc)
- Master of Sports Medicine (MSpMed)
- Master of Surgery (MS)

**Graduate Diplomas**
- Graduate Diploma in Clinical Education (GradDipClinEd)
- Graduate Diploma in Community Paediatrics (GradDipCommPaed)
- Graduate Diploma in Drug Development (GradDipDD)
- Graduate Diploma in Geriatric Medicine (GradDipGeriMed)
- Graduate Diploma in Health Professions Education (GradDipHPEd)
- Graduate Diploma in Paediatrics (GradDipPaed)
- Graduate Diploma in Public Health (GradDipPH)
- Graduate Diploma in Sports Medicine (GradDipSpMed)

**Graduate Certificates**
- Graduate Certificate in Drug Development (GradCertDD)
- Graduate Certificate in Geriatric Medicine (GradCertGeriMed)
- Graduate Certificate in Health Professions Education (GradCertHPEd)
- Graduate Certificate in Health Services Management (GradCert)
- Graduate Certificate in Public Health (GradPHCert)

Full details of the conditions of the award of these degrees are shown in this handbook under Conditions for the Award of Higher Degrees.

Advice to Graduate Students on Computing Requirements

Students are advised that satisfactory completion of postgraduate programs does not require enrolled students to purchase a personal computer.
Course Outlines

Faculty Research Degrees

Doctor of Medicine
Doctor of Philosophy
Master of Science
Master of Surgery

Doctor of Medicine
MD

This degree is a research program requiring a candidate to make an original and meritorious contribution to some branch of medicine. The course may be completed by:

- thesis with supervision
- thesis without supervision
- published work

Doctor of Philosophy
PhD

This is a degree requiring an original and significant contribution to knowledge in an approved area.

Master of Science
MSc

This is the main Masters level research course for postgraduate students in the Faculty of Medicine. Candidates must demonstrate ability to undertake research by the submission of a thesis embodying the results of an original investigation. The course may be undertaken either with or without supervision.

Master of Surgery
MS

The degree of Master of Surgery may be awarded to a candidate who has made an original contribution to knowledge in some field related to surgery. Generally, candidates must have at least five years experience.

St Vincent’s Clinical School

9060
Master of Drug Development

MDD

The discovery, development and marketing of medicines has become a highly organised interdisciplinary team activity. Members of such teams need to be literate in all aspects of drug development ranging from procedures for identifying lead compounds through to the full development of the product including preclinical studies, clinical trials and the legal, regulatory and ethical issues relevant to marketing and on-going vigilance of the medicine. The aim of this course is to enable people working in the field of developing and using pharmaceutical substances to obtain such expertise by providing core and elective materials in a distance-learning format. Since interchange of ideas is an essential part of any educational activity, the course will include interactive assignments with specific tutors and group discussions where students come together for tutorials, workshops and practice sessions, and generally to interchange ideas.

The educational principle governing the course’s teaching approach is to streamline the provision of information and to concentrate on application. Thus, students are issued with a manual for each subject. The manual contains, typically, about 200-250 pages of lecture notes plus 200-250 pages of attachments from the literature (relevant chapters from textbooks, published papers, etc., Australian and overseas government regulatory and policy documents, etc.).

The Master of Drug Development will be awarded to students who successfully complete the coursework identified below. The course is offered as a part-time distance learning programme and will take a minimum of three years to complete. The course is designed for persons wishing to pursue careers that relate to the development and safe use of medicines. Career opportunities exist in the pharmaceutical manufacturing industry, government and in research institutions such as universities. Health care professionals interested in developing new medicines and improving the use of existing medicines will find the course of value. The extensive range of electives enables the candidate to specialise in particular areas such as the discovery of new medicines, regulatory affairs, clinical trials, market development, medical department administration, preclinical studies, etc.
Below is a list of core and elective modules for Master of Drug Development (MDD) (Course Code: 9060). Generally students must take all core subjects and sufficient electives to give a total of 180 credit points (CP) [i.e. 1440 postgraduate assessable hours (PAH)]. The course proceeds in three stages (I, II and III) which correspond to Years 1 to 3 for students proceeding in the minimum time. In special cases, students may replace core subjects with electives. Up to 240 PAH of elective material may be replaced with coursework-integrated or stand-alone projects. The minimum requirement for formal coursework is 1200 PAH where this is accompanied by 240 PAH of project work.

Graduate Diploma in Drug Development

GradDipDD

The Graduate Diploma in Drug Development will be awarded to students who successfully complete the following course. The course is offered as a part-time distance learning program and will take a minimum of two years to complete. The course is designed for persons wishing to pursue careers that relate to the development and safe use of medicines. Career opportunities exist in the pharmaceutical manufacturing industry, government and in research institutions such as universities. Health care professionals interested in developing new medicines and improving the use of existing medicines will find the course of value. The extensive range of electives enables the candidate to specialise in particular areas such as the discovery of new medicines; regulatory affairs; clinical trials; market development; medical department administration; preclinical studies, etc.

To fulfil the course requirements, students must satisfactorily complete all of the core subjects as well as electives totalling 15 credit points.

Notes:

1. The availability of elective modules may be subject to a minimum number of enrolments.
2. Students are advised to select electives that make an integrated theme according to their individual interests (e.g. regulatory affairs; clinical trials; market development; medical department administration; preclinical studies, etc).
3. Electives may also be chosen from the list offered in the Master of Applied Science in Biopharmaceuticals.

Graduate Certificate in Drug Development

GradCertDD
The Graduate Certificate in Drug Development will be awarded to students who successfully complete the following course work. This course has similar format and objectives to the Graduate Diploma but is designed for those people who wish to obtain a limited competency in the areas described. The course is offered as a part-time distance learning program and will take a minimum of one year to complete.

CP
MDCN9100 Discovery and Development of New Medicines 15
MDCN9101 Principles of Drug Action 15
MDCN9104 Law, Ethics and the Regulation of the Development and Use of Medicines 15
MDCN9103 Clinical Trials and Data Analysis 15

School of Community Medicine
The School offers programs of study leading to the award of the following degrees:

- Master of Community Health by research or by formal coursework
- Graduate Certificate in Geriatric Medicine
- Graduate Diploma in Geriatric Medicine
- Masters of Medicine (Geriatrics) by Research
- Masters of Medicine (Geriatrics) by Coursework

2855
Master of Community Health By Research

MCH
This course is designed for health personnel engaged in various areas of community health services and professions who wish to develop their research skills by undertaking studies leading to the award of the degree of Master of Community Health, either as full-time or part-time internal students, or as students external to the University. External candidates are required to spend a minimum of 14 weeks in the School during the course.

An original investigation under the direction of a supervisor for a minimum period of three academic sessions in the case of a full-time candidate, or a minimum of four academic sessions in the case of a part-time or external candidate is required.

Appropriate areas for research include prevention and health promotion; primary health care; health of particular population groups; occupational and environmental health; epidemiology; health of the elderly; disability and rehabilitation; alcohol, smoking and drug dependence; health services and evaluation; community mental health; community genetics; or a field approved by the Head of the School.

The candidate is required to submit a thesis embodying the results of the original investigation.

9020
Master of Community Health By Course Work

MCH
The course is designed to further the competence and skills of health personnel in problem-solving and practice in community health and health services, and to enhance practical skills and provide experience in epidemiological and preventive techniques, health education and promotion. A major emphasis in the course is on student activity, both individually and in small groups.

The Masters degree course requires either one year of full-time course work plus a six-month research project or two years of part-time course work plus a six-month major project. Students are required to undertake course work subjects to a total of 120 credit points (five credit points are equivalent to one class contact hour per week). These must include all three subjects in Group A and at least one of the subjects in Group B. The major project is equivalent to 60 credit points.

The research project, CMED9506 Major Project, may be undertaken in the following areas: prevention and health promotion; primary health care; health of particular population groups; occupational and environmental health; epidemiology; health of the elderly; disability and rehabilitation; alcohol, smoking and drug dependence; health services and evaluation; community mental health; or in a field approved by the head of the school.

The bulk of the coursework is supplied to candidates, by mail, in printer form. Some course material and activities for assessment will be accessed via the Internet, CD-ROM or through teleconferencing. Each 15 credit point subject provides candidates with the equivalent of 3 hours of lecture material weekly for a 14 week semester.

Students are required to satisfactorily complete the following coursework subjects:

- CMED9538 Clinical Geriatrics 30
- CMED9539 Psychogeriatrics 15

and one only of the following:

- CMED9530 Organisation and Delivery of Health Services 15
- CMED9531 Gerontology 15
- CMED9540 Pharmacology 15
- CMED9541 Rehabilitation 15
- CMED9542 Healthy Ageing 15

These subjects may be offered in the first and/or second semester depending on demand. Assessment will be undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the coursework, candidates must also be successful in a clinical exam (oral) which is held in Sydney.

Candidates awarded the Graduate Certificate in Geriatric Medicine are eligible to undertake further study for the Graduate Diploma in Geriatric Medicine or the Master of Medicine (Geriatrics) by coursework.

---

**Graduate Certificate in Geriatric Medicine**

**GradCertGeriMed**

*Prerequisites:* MB BS (or equivalent) and 1 year of clinical experience. Candidates require basic computer skills.

The Graduate Certificate in Geriatric Medicine is designed for medical practitioners who wish to upgrade their skills and knowledge in the area of aged care medicine. The program is offered by means of a distance education package. In order to undertake the course, candidates require a computer with the following specifications: 486 DX or Macintosh LC75 (minimum); 8 MB RAM (minimum); sound card and speakers; CD-ROM; modem (fast); Internet access and web browser. Basic computer skills are assumed. Upon enrolment, candidates are invited to attend a one day seminar (non-compulsory) held in association with the biomedical librarians, UNSW. During this seminar, candidates will learn the necessary skills to use the Internet effectively, and to access a number of medical data bases, on-line medical journals and document delivery systems.

Master of Medicine (Geriatrics) by Research

MMed (Geriatrics)

The Master of Medicine (Geriatrics) course by research is designed for medical practitioners who wish to upgrade their skills and knowledge in the area of aged care medicine and who have at least one year of clinical experience. Candidates require basic computer skills. The course is offered by means of a distance education package. In order to undertake the course, candidates require a computer with the following specifications: 486 DX or Macintosh LC75 (minimum); 8 MB RAM (minimum); sound card and speakers; CD-ROM; modem (fast); Internet access and web browse. Basic computer skills are assumed. Upon enrolment, candidates are invited to attend a one day seminar (non-compulsory) held in association with the biomedical librarian, UNSW. During this seminar, students will learn the necessary skills to use the Internet effectively, and to access a number of medical databases, on-line medical journals and document delivery systems.

The Master of Medicine (Geriatrics) degree requires completion of one year full-time coursework, plus a major project and supervised clinical experience. The degree may be undertaken on a part-time basis.

Coursework: The bulk of the coursework is supplied to candidates by mail, in printed form. Some course material and activities for assessment will be accessed via the Internet, CD-ROM or through teleconferencing. Each 15 credit point subject provides candidates with the equivalent of 3 hours of lecture material weekly for a 14 week semester.

Students are required to satisfactorily complete the following coursework subjects:

These subjects may be offered in first and/or second semester depending on demand. Assessment is undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the coursework, students must also be successful in a clinical exam (oral) which is held in Sydney.

CMED9536  Clinical Experience  20

140 hours of supervised clinical work to be carried out at geriatric units approved by the School of Community Medicine, UNSW. These placements will be arranged in association with the candidates. Overseas candidates are
required to undertake their clinical attachments in Sydney. Candidates must maintain a logbook documenting clinical cases seen, and this logbook forms the basis of the assessment of clinical experience.

CMED9535 Major Research Project 40
Candidates are required to submit a major project on an approved topic.

School of Health Services Management

Master of Health Administration MHA
Facilities are available in the School for students to undertake research studies leading to the degree of Master of Health Administration, as either full-time internal students, part-time internal students, or part-time students external to the University. Students are required to have a suitable first degree and are normally expected to have a minimum of three years experience in their proposed field of study within the health or hospital services. Enquiries should be directed to the Research Studies Coordinator, Dr Stephanie Short.

Master of Health Administration (by Research) 2960

Master of Health Administration (by Formal Course Work) 8900

Course Structure
The course is divided into two components, for a total of 150 credit points. These components are:

- Core subjects (6) 90 credit points
- Elective subjects (6) 60 credit points

In selecting elective subjects: students can choose subjects relating to their expected field of work; can choose to undertake advanced study in a particular discipline (eg Health Policy and Management); and/or can take elective subjects relevant to their own interests and needs.

Core Subjects
This compulsory component comprises the six core subjects of 15 credit points each. Students must complete the following six subjects as a requirement for graduation. Exceptions can only be granted by the Head of School on the basis of demonstrated equivalent masters level coursework previously undertaken.

- HEAL9011 Statistics & Epidemiology
- HEAL9041 Health Care Systems
- HEAL9071 Health Care Financial Management
- HEAL9351 Health Economics
- HEAL9421 Public Health and Epidemiology
- HEAL9711 Management of Organisation
Master of Health Planning

Those students who are inexperienced (ie less than three years) in the health service area are required to undertake a planned program of field experience (HEAL9531 Fieldwork in Health Service Organisation) in addition to the 12 subjects.

Electives are chosen by the student in consultation with the Head of the School of Health Services Management (or nominee) from graduate subjects offered within the University or by another tertiary institution. The approval of the relevant Head of School is required to undertake an elective offered outside the School of Health Services Management.

Elective

Elective

Elective

Graduate Certificate In Health Services Management

**GradCert**

The Graduate Certificate provides recognition to students who are limited to study for one session or one year only. It will be awarded to a candidate who has satisfactorily completed the program of study outlined below. If students make satisfactory progress they may apply, on a competitive basis, to enter the MHA or MHP. Should students be successful in obtaining entry to the MHA or MHP program they will be expected to complete the remaining eight Masters subjects successfully before they can be awarded a Masters degree. In this case students will not be awarded the certificate, that is you cannot be
awarded both the Graduate Certificate in Health Services Management and an MHP or MHA degree.

The Graduate Certificate is available on an internal and external basis (compulsory residential schools plus correspondence) and it may be undertaken on a part-time (two academic sessions or one year) or full-time (one academic session) basis.

**Sequence and Duration Of Course**

Candidates are required to satisfactorily complete four subjects. One subject must normally be taken from each of the four groups of subjects listed below, however, subject to the approval of Head of School or delegate, alternative programs of study may be considered.

1. **Management Studies**
   - HEAL9701 Management of the Work of Health Professionals *(Session 2)* 15 CP
   - HEAL9711 Management of Organisation *(Session 1)* 15 CP
   - HEAL9741 Management of Health Services *(either Session 1 or)* 15 CP
   - HEAL9391 Health Services Strategic Management and Planning 15 CP

2. **Health Related Studies**
   - HEAL9421 Public Health and Epidemiology *(Session 1)* 15 CP
   - HEAL9041 Health Care Systems *(Session 1)* 15 CP
   - HEAL9411 Advanced Epidemiology *(Session 1)* 15 CP
   - HEAL9811 Sociology, Ethics and Health *(Session 2)* 15 CP
   - HEAL9381 Policy Studies *(Session 2)* 15 CP

3. **Quantitative and Financial Studies**
   - HEAL9011 Statistics and Epidemiology *(Session 1)* 15 CP
   - HEAL9071 Health Care Financial Management *(Session 2)* 15 CP
   - HEAL9351 Health Economics *(Session 2)* 15 CP

4. **Health Service Studies**
   - HEAL9331 Health Related Law and Ethics (Australia) *(Session 1)* 15 CP
   - HEAL9301 Health Services Planning *(Session 2)* 15 CP
   - HEAL9371 Research and Evaluation Methods *(subject to successful completion of HEAL9411 or its equivalent)* *(Session 2)* 10 CP
   - HEAL9111 Quality Assurance for Health Administrators *(either Session 1 or 2)* 15 CP

**Qualifications For Admission**

1. Candidates will have been awarded a Bachelor’s degree in an appropriate discipline from a recognised tertiary institution, and
2. Candidates will have a minimum of three years experience in health services of a kind acceptable to the School Admission Committee.

In exceptional cases an applicant who submits evidence of such other academic and professional qualifications may be admitted.

No credits, exemptions or advanced standing will be granted for the Graduate Certificate.

**Non-Award Students**

Non-Award students enrolled on an external basis in subjects of the MHA, MPH or MHP degree course are required to meet all the conditions for the completion of each subject, including attendance at lectures in the subject at a residential school.

**School of Medical Education**

The School offers programs of study either by research or by formal course work leading to the award of the following degrees:

- Master of Clinical Education
- Master of Health Professions Education by Research or Coursework
- Graduate Diploma in Clinical Education
- Graduate Diploma in Health Professions Education
- Graduate Certificate in Health Professions Education

**2885 Master of Health Professions Education by Research**

**MHPed**

This course is designed for teachers and/or educational administrators in the health professions who wish to develop their research skills by undertaking studies leading to the award of the degree of Master of Health Personnel Education, either as full-time or part-time internal students or as students external to the University. The latter are required to spend a minimum of 14 weeks in the School during the course.

An original investigation under the direction of a supervisor for a minimum period of three academic sessions in the case of a full-time candidate, or a minimum of four academic sessions in the case of a part-time or external candidate is required.

The candidate is required to submit a thesis embodying the results of this original investigation.
9000
Master of Health Professions Education by Course Work

MHPEd

The course is designed to cultivate abilities required to plan, implement and evaluate programs in educational institutions, to undertake health workforce planning, and to lead community development and program management. Admission to the Master of Health Professions Education requires a Bachelors degree of at least three years duration (or equivalent) and a minimum of two years experience in teaching and/or administration.

The Masters degree course requires either one year of full-time course work plus a six-month field project or two years of part-time course work plus a six-month field project. Students are required to undertake the four nominated subjects listed below, plus additional academic electives and/or independent studies to give a total of 130 credit points. Five credit points are equivalent to one class contact hour per week.

The course is offered by flexible delivery to facilitate off-campus study. Students who wish to study off-campus undertake independent learning activities together with periodic on-campus workshops and seminars. Intensive supervision and tutorial support are offered to students who wish to attend full time on-campus.

Academic Electives

Electives are designed to enable candidates to pursue their own interests or specialties by taking subjects, normally at a postgraduate level, at the University of New South Wales. They are chosen by the student in consultation with the Head of School. Elective subjects offered by the School of Medical Education are listed below. Electives may also be chosen from postgraduate subjects offered by other schools of the University, in which case the approval of the Head of the School must be obtained.

Candidates are required, in addition to formal course work, to complete a six-month field project and report. The project is planned during the period of formal course work and carried out in the student's home institution. It should focus on an area of health personnel education relevant to the candidate's professional interests and development and to the furthering of health personnel education.
GradDipHPEd

Admission to the Graduate Diploma in Health Personnel Education requires a Bachelor's degree of at least three years duration (or equivalent) and a minimum of two years experience in teaching and/or administration. Students are required to undertake the four core subjects listed for the MHPEd, plus additional academic electives and/or independent studies to give a total of 100 credit points.

GradCertHPEd

Admission to the Graduate Certificate in Health Professions Education requires a Bachelor's degree of at least three years duration (or equivalent) and relevant experience in teaching and/or administration. Students are required to take at least one of the foundation subjects in the Graduate Diploma of Health Professions Education course plus additional foundation subjects and/or electives to a total of 60 credit points.

The Centre for Public Health

The Centre brings together the resources of the Schools of Community Medicine, Health Services Management and Medical Education. The Centre is also a partner in the Sydney Public Health Consortium with the Department of Public Health and Community Medicine at the University of Sydney, where candidates may undertake up to 50% of their course work.

The Centre offers programs of study in Public Health either by research or by coursework leading to the awards of the following degrees: Graduate Certificate of Public Health, Graduate Diploma of Public Health and Master of Public Health.
**2845**  
**Master of Public Health by Research**

**MPH**

Students applying for admission to the MPH by research are required to have a suitable first degree and are normally expected to have considerable experience in their proposed field of study within the health or hospital services. It can be undertaken full-time or part-time; through internal or external mode.

---

**9045**  
**Master of Public Health by Course Work**

**MPH**

The Master of Public Health course provides preparation for education, research and service in all aspects of public health. The course includes study in epidemiology, quantitative and qualitative research methods, health services management, health promotion, development and education in health, as well as a systematic review of topical public health issues. It is designed to address the continuing education needs of specialists in public health as well as providing a general orientation to public health issues and methods for the health professions.

Applicants are required to have completed a bachelor degree in a health-related discipline and to have at least three years experience in a health or health-related field.

**Course Structure**

The MPH course is offered in a full-time (minimum three academic sessions), part-time and external* modes.

The course is divided into three components, for a total of 180 credit points. These components are:

Core subjects 70 credit points  
Elective subjects 60 credit points  
Major project 50 credit points

In selecting elective subjects; students can choose among areas of concentration related to their expected field of work (e.g. Health Promotion); can choose to undertake advanced study in a particular discipline (e.g. Health Policy and Management); and/or can take elective subjects relevant to their own interests and needs.

**Core Subjects**

Students must complete the following five subjects as a foundation for further study. These core subjects are prerequisites for enrolment in many of the electives.

- CMED9500 Epidemiology  (15 CP)
- CMED9516 Introduction to Public Health  (10 CP)
- MEED9012 Health Promotion  (10 CP)
- HEAL9061 Statistics for Public Health  (15 CP)
- HEAL9751 Introduction to Management and Policy for Public Health  (10 CP)

In addition, the core subject MEED9131 Formulating Academic Proposals and Projects (10CP) must be undertaken as preparation for the major project.

**Elective Subjects**

There are over 70 elective subjects offered in the three schools at the University of New South Wales. In addition, students may enrol in electives which are offered by other schools and academic units within the University of New South Wales, as well as subjects offered in the Department of Public Health and Community Medicine at the University of Sydney. Students may elect to undertake independent studies in any of the three Schools, to learn about a particular area or subject matter of special interest which is not offered in the formal program (CMED9100/1/2/4, HEAL9921/31/41, MEED9001/2/3/4).

The following elective subjects are offered in 1998:

**Major Project**

The major project comprises in-depth study of a contemporary public health issue. Students are expected to demonstrate their ability to apply knowledge and skills gained in the course. It is normally undertaken in the third full-time (or part-time equivalent) session, that is, after completion of all core and elective subjects. Provisional topics for the (CMED9506, HEAL9973 AND MEED9142 ) major project will be determined in consultation with an academic adviser early in the course, and refined in MEED9131 Formulating Academic Proposals and Projects.

---

5507

**Graduate Diploma in Public Health**

**GradDipPH**

The Graduate Diploma in Public Health comprises nine subjects from the Master of Public Health program, including the core subjects Introduction to Public Health (CMED9516), Epidemiology (CMED9500), Statistics (HEAL9061), Health Promotion (MEED9012) and Management of Public Health (HEAL9751), and four electives, to total 100 credit points.

---

7368

**Graduate Certificate in Public Health**

**GradCertPH**

The Graduate Certificate in Public Health comprises five subjects from the Master of Public Health program, and must include Introduction to Public Health (CMED9516), Epidemiology (CMED9500) and three other subjects (either core or electives) to total 55 credit points.
School of Paediatrics

5500
Graduate Diploma in Paediatrics

GradDipPaed
The course is taken over 1 year on a part-time basis. Candidates attend a course of lectures and grand rounds (approximately 1 hour per week).

The Graduate Diploma is awarded after satisfying the examiners in written and clinical examinations at the end of the course.

It must be noted that the Graduate Diploma of Paediatrics is intended for postgraduates who have degrees registrable in Australia and who are able to secure a paediatric appointment, salaried or otherwise, in a teaching hospital recognised by the University of New South Wales. The School of Paediatrics takes no responsibility for making such arrangements.

Candidates who have completed 12 months experience in Clinical Paediatrics under supervisors acceptable to the University may be exempt from the clinical experience.

CP
PAED9100 General Paediatrics and Child Health 48
PAED9104 Clinical and Technical Skills 12
PAED9105 Clinical Paediatric Experience 1 2

Students should note that if they have to repeat the year due to failure in one or more subjects, they must re-enrol in and satisfactorily complete all subjects in order to qualify for the Graduate Diploma.

5505
Graduate Diploma in Community Paediatrics

GradDipCommPaed

This course is designed for health professionals such as medical practitioners, nurses, psychologists, physiotherapists, social workers, who provide services to children. Candidates are required to hold a relevant bachelor's degree of three year's duration or equivalent prior to enrolment in the course. The course is aimed to equip candidates with an understanding of health needs of children in the community.

The Graduate Diploma in Community Paediatrics will be awarded after satisfactory completion of a programme of advanced study of the following 8 subjects which totals 110 credit points:

9015
Master of Community Paediatrics

MCommPaed

The degree of Master of Community Paediatrics will be awarded after satisfactory completion of a programme of advanced study of subjects which totals 230 credit points of which 110 credit points will be from the 8 major subjects prescribed for the Graduate Diploma in Community Paediatrics together with a major project report based on six months of research or clinical case studies in community paediatrics, electives to the value of 20 credit points taught in the Faculty of Medicine and an advanced study in growth and development. The project is planned during the period of formal coursework.

PAED8109 Physical Growth and Development II 20

Total 120

School of Physiology and Pharmacology

The School offers programs of study leading to the awards of the degrees of Master or Graduate Diploma of Sports Medicine (in association with IPACE-Unisearch; Schools of Anatomy and of Community Medicine, Faculty of Medicine; School of Sport and Leisure Studies, Faculty of Professional Studies) by formal part-time course work delivered by distance education and the Master of Applied Science in Biopharmaceuticals (in conjunction with the School of Biotechnology, Faculty of Applied Science).
9055
Master of Sports Medicine
MSpMed

5503
Graduate Diploma in Sports Medicine
GradDlpSpMed

The courses aim to equip medical practitioners with a rigorous understanding of the theory and practice of sports medicine in meeting the medical demands of people engaged in individual or team performance-related sporting activities and with the medical demands of people involved in health-related physical activities for the purposes of primary, secondary or tertiary prevention of disease processes.

The degree of Master of Sports Medicine will be awarded after the satisfactory completion of a program of advanced study of subjects (including clinical activities as prescribed) which totals 150 credit points.

135 credit points will accrue from nine compulsory subjects.

15 credit points will accrue from the completion of a Major Project and Report.

Completion is also required of a Sports Medicine Practicum consisting of a total of twelve days of approved, supervised clinical training and activities.

Satisfactory completion of a final clinical examination is also required.

The Graduate Diploma of Sports Medicine will be awarded after the satisfactory completion of a program of advanced study of subjects (including clinical activities as prescribed) which total 120 credit points from eight compulsory subjects (15 credit points each).

Other requirements will be the completion of a total of twelve days of approved, supervised clinical training and activities and the satisfactory completion of a final clinical examination.

Further Activities
Sports Medicine Practicum

8043
Master of Applied Science in Biopharmaceuticals
MAppSc in Biopharmaceuticals

This is an interdisciplinary program designed principally for postgraduates with backgrounds in either pharmacology or biotechnology who wish to obtain advanced training in both areas in order to gain expertise necessary for the development and use of the new generation of biopharmaceuticals which have been developed by, or result from, the application of molecular biology.

It is open to postgraduates with a four year degree in a related discipline or who have, in the opinion of the Higher Degree Committee, acquired equivalent qualifications or experience. Prior study of biochemistry is required for the course.

The course consists of lectures, tutorials, practical sessions, case history studies and a supervised project. The minimum period of registration before the award of the degree is two sessions for full-time students and four sessions for part-time students. In 1996 the course will also be offered for part-time study by distance education.

An acceptable course would be a program of subjects involving a minimum of 18 hours per week for two sessions for full-time students or a minimum of 9 hours per week for four sessions for part-time students. Choice of units is dependent on the background of the student. Pharmacology Principles (PHPH5461) must be taken by students who have not completed an approved Pharmacology course, while Biotechnology Principles (BIOT7040) must be taken by students who have not completed an approved Biotechnology course program.
All students must pass Advanced Pharmacology (PHPH5471) and Advanced Biotechnology (BIOT7030). Course details are as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>

**Total** 144

**Elective Components**

If a minor project is selected, additional elective subject(s) may be selected from those offered by the Department of Biotechnology or the School of Physiology and Pharmacology, or from those offered by other Schools in the University subject to approval.

Each individual course must be approved by the Higher Degree Committee of the Faculty of Applied Science and would comprise: (i) a major strand of related material comprising approximately 75% of the total program including a project comprising not less than 15% of the program (ii) a minor strand of broader based material comprising up to 25% of the total program.

---

**School of Psychiatry**

**9031 Master of Psychological Medicine**

**MPM**

The course is designed to increase the ability of experienced general practitioners to recognise mental disorders in their patients, to improve their ability to manage many such patients within their own practices, and to facilitate their ability to refer appropriately to psychiatrists or clinical psychologists for more specialised treatment.

The masters degree program may be undertaken on a part time basis over four sessions, either by distance education or by attending the program at St.Vincent's campus. Candidates are required to complete the following program.

Subject Descriptions

School of Anatomy

Servicing Subject only: taught within a course offered by another faculty.

ANAT6151
Introductory Functional Anatomy
Staff Contact: Dr E Tancred

An overview of basic human anatomy and physiology with an emphasis on structures and systems which are most vulnerable to chemical and physical trauma under industrial conditions, such as the eye, ear and skin. Other systems studied include the musculo-skeletal system, central and peripheral nervous systems, circulatory, respiratory, gastrointestinal, endocrine and urogenital systems.

St Vincent’s Hospital Clinical School

MDCN9100
Discovery and Development of New Medicines 1
Staff Contact: Prof R Day
CP15 S1

Development of new medicines: history and philosophy of development of new medicines. Process of discovery: screening/molecular modelling resulting in identification of lead compounds. Refinement of lead compounds, biological testing in laboratory animals, tissues or tissue components. Choice of chemical entity for further development and identification of back-up compounds. Preclinical studies of selected compound: the value and limitations of animal models in predicting clinical efficacy and potential adverse effects: mechanism of action, screening for total biological effects, toxicology. Factors involved in choosing compounds for clinical development: scientific merit, medical utility, uniqueness, commercial value, compatibility with company strategies, facilities available for development. Selection of back-up compound. Project management: identification of commercial/medical objectives, preclinical issues, clinical development strategies. Company strategies: decision path analyses, resources, time-lines. Clinical trial program: phases 1, 2, 3 and 4. Clinical research plan: time-lines, study designs, dose-ranging, choice of test populations, indications, trial locations, data treatment, Go/No Go criteria.

MDCN9101
Principles of Drug Action
Staff Contact: Prof R Day
CP15 S1

This subject provides a general overview of pharmacodynamics and pharmacokinetics including the following topics. The dose-response relationship as a function of pharmacokinetics and pharmacodynamic properties. Qualitative discussion of the factors involved in determining pharmacokinetic properties: routes of administration, formulation, absorption, distribution, elimination (metabolism and excretion). Quantitative investigation of pharmacokinetic variables (bioavailability, volume of distribution, clearance, half-lives, etc). The use of pharmacokinetic variables in dosage optimisation. Qualitative discussion of pharmacodynamic mechanisms: specific and non-specific mechanisms. Receptors and signal transduction. Agonists, partial agonists and antagonists. Quantitative investigation of drug-receptor interactions. The influence of non-drug factors (disease states, age, genetics, etc) on pharmacokinetic and pharmacodynamic parameters, and hence on the dose-response relationship.

MDCN9102
Pharmaceutical Formulation 1
Staff Contact: Prof R Day
CP15 S2

MDCN9103
Clinical Trials and Data Analysis
Staff Contact: Prof R Day
CP15 S2

MDCN9104
Law, Ethics and the Regulation of the Development and Use of Medicines
*Staff Contact: Prof R Day*
CP15 S2
This subject provides a general overview of the ethical issues and laws relevant to the development and marketing of medicines. It includes the following topics. State and Commonwealth Constitutional powers. Common Law, statutory law, accountability, natural justice. Laws relating to the development and sale of medicines; patients, intellectual property, trade practices. Ethical issues in drug development and marketing. Preparation and submission of marketing applications, approval and appeal processes. Principles of Good Clinical Research Practice (GCRP). The ethical review process, consent procedures in biomedical research. The philosophy of regulation of drug use: input of industry, Government, consumer. The regulatory principles regarding the use of developmental drugs in human subjects and the practical consequences of these on the design and conduct of clinical investigations. The organisation of the regulatory processes in Australia: The Therapeutic Goods Administration and advisory bodies (ADEC, ADRAC etc). The Pharmaceutical Benefits Advisory Committee. Submissions regarding cost-effectiveness. Preparation and submission of an application for approval to test or market a drug and the relevant appeal processes. Integration of regulatory affairs into the pre- and post-marketing planning and review of product development strategies. Input from international bodies and national agencies.

MDCN9105
Pharmacovigilance
*Staff Contact: Prof R Day*
CP15 S2

MDCN9106
Pharmaceutical Information Services
*Staff Contact: Prof R Day*
CP7.5 S1
This subject deals with the provision of information by pharmaceutical companies about their products both for internal use (e.g. in drug development) and for external use (e.g. for prescriber and consumer). Topics covered include the following. Development of prescribing information for doctors, pharmacists and patients: (a) during the drug development phase; (b) in the marketing phase. Development of patient educational material. The regulatory basis for the Australian Approved Product Information (PI) and the Australian Consumer Product Information (CPI) and their relationship to similar documents in other countries. Preparation, review and revision of these documents: regulations, codes of practice, Trade Practices Commission, product liability issues. Relevance of general law to product information. Promotional policy and procedures. Development of a promotional campaign: roles of the medical and marketing departments. Company approved procedures. Support needed for claims. The use of samples. The impact of State and Commonwealth Laws and industry codes. The role of the company representative: background and training, interaction with medical department staff, APMA Code of Conduct. Educational meetings and the ethics of product promotion through sponsorship activities: conferences, symposia, publications, overseas travel, research support.

MDCN9107
General Pathophysiology
*Staff Contact: Prof R Day*
CP7.5 S2
This subject consists of coursework only and aims to provide a basis for understanding the mechanisms involved in the disordered physiology that underlies common disease states. The object is to provide an understanding of the disordered physiological processes that are amenable to correction or amelioration with drug therapy. It thus provides a rationale for drug design and utilisation. Topics to be covered include: (a) cell injury and adaptation: causes of injury, pathogenic mechanisms, cellular changes, cellular adaptations; (b) inflammation: acute and chronic, morphological changes, role of lymphatic system, clinical manifestations, tissue repair; (c) fluid and haemodynamic derangements: oedema, congestion, haemorrhage, thrombosis, embolism, infarction, shock; (d) disorders of immunity: biology of the immune system, histocompatibility antigens, cytokines, immunological mechanisms of tissue injury, autoimmune diseases, immunodeficiency diseases; (e) genetic diseases: overview of genetics, polygenic disorders, Mendelian disorders, cytogenetic disorders; (f) neoplasia: characteristics of benign and malignant neoplasms, epidemiology, grading and staging, attributes of transformed cells, carcinogenic agents and their mechanism of action, unifying theories of carcinogenesis, tumour immunology; (g) infection: biology of infectious disease, major manifestations of infection, classification of the major infectious diseases, anti-infective drugs.
The Therapeutic Basis of Drug Use and Development 1
Staff Contact: Prof R Day
CP7.5 S2

This subject consists of coursework only and aims to provide an understanding of the medical problems and treatments that need to be understood in developing new therapeutic agents and optimising their use. Emphasis will be on highlighting the strengths and weaknesses of present therapies and identification of current research aimed at developing new therapeutic agents. Disorders resulting from adverse drug reactions will be identified. General Pathophysiology is a prerequisite for this subject. The subject will provide an integrated description of relevant physiology, pathophysiology, disease state manifestations and clinical pharmacology with respect to the following disease states: (a) infectious disease: bacterial, fungal, viral and parasitic infections; (b) immunological disorders: immunodeficiency diseases, hypersensitivity, transplantation; (c) haematology: anaemias, haemorrhagic disorders, disorders of white blood cells, leukaemias, lymphomas; (d) cardiovascular disorders: cardiac arrhythmia, ischaemic heart disease, heart failure, hypertension, vascular disorders; (e) respiratory tract disorders: upper respiratory tract disorders, asthma, chronic obstructive pulmonary disease, acute bronchitis, bronchiectasis, cystic fibrosis, pneumonia.

The Therapeutic Basis of Drug Use and Development 2
Staff Contact: Prof R Day
CP7.5 S2

This subject consists of coursework only and aims to provide an understanding of the medical problems and treatments that need to be understood in developing new therapeutic agents and optimising their use. Emphasis will be on highlighting the strengths and weaknesses of present therapies and identification of current research aimed at developing new therapeutic agents. Disorders resulting from adverse drug reactions will be identified. General Pathophysiology is a prerequisite for this subject. The subject will provide an integrated description of relevant physiology, pathophysiology, disease state manifestations and clinical pharmacology with respect to the following disease states: (a) gastrointestinal disorders: oesophageal disorders, gastritis, peptic ulcer, diarrhoea and constipation, gastroenteritis, malabsorption syndromes, chronic inflammation of the bowel, gastrointestinal neoplasms; (b) hepatic and biliary disorders: jaundice, ascites, fibrosis, cirrhosis, hepatitis, neoplasms; (c) nutritional and metabolic disorders: nutrition, nutritional deficiencies, obesity, water/electrolyte/acid-base metabolism; (d) endocrine disorders: disorders of the pituitary, thyroid, adrenal glands; disorders of carbohydrate metabolism; (e) renal tract disorders: renal failure, disorders of renal tubule function, obstructive uropathies, myoneuromogenic disorders, incontinence, neoplasms; (f) gynaecological disorders: common problems, amenorrhoea and abnormal bleeding, endometriosis, breast disorders, neoplasms.

The Therapeutic Basis of Drug Use and Development 3
Staff Contact: Prof R Day
CP7.5 S2

This subject consists of coursework only and aims to provide an understanding of the medical problems and treatments that need to be understood in developing new therapeutic agents and optimising their use. Emphasis will be on highlighting the strengths and weaknesses of present therapies and identification of current research aimed at developing new therapeutic agents. Disorders resulting from adverse drug reactions will be identified. General Pathophysiology is a prerequisite for this subject. The subject will provide an integrated description of relevant physiology, pathophysiology, disease state manifestations and clinical pharmacology with respect to the following disease states: (a) neurologic disorders: seizure disorders, sleep disorders, cerebrovascular disease, CNS infection and neoplasms, demyelinating diseases, disorders of movement, spinal cord disorders, peripheral nervous system disorders; (b) psychiatric disorders: personality disorders, drug dependence, neuroses, mood disorders, schizophrenic disorders, delusional disorders; (c) musculoskeletal and connective tissue disorders: rheumatoid arthritis and other diffuse connective tissue disease, arthritis associated with spondylitis, osteoarthritis, infections and neoplasms of the bones, crystal-induced conditions, bone and cartilage disorders, nonarticular rheumatism; (d) ophthalmological disorders: disorders of the eyelids, conjunctiva, and cornea; cataract, uveal tract disorders, retinal disorders, glaucoma, disorders of the optic nerve; (e) dermatological disorders: dermatitis, scaling disorders, disorders of the hair follicles and sebaceous glands, skin infections — bacterial, viral, parasitic, fungal, drug eruptions and similar inflammatory disorders of the skin, disorders of cornification, tumours.

Pharmaceutical Formulation 2
Staff Contact: Prof R Day
CP15 S2

This subject consists of coursework only and will extend the principles covered in Pharmaceutical Formulation and will include the following topics: (a) the formulation and in vitro assessment of oral controlled-release products; (b) the formulation and in vitro assessment of novel dosage forms such as transdermal therapeutic systems and osmotic pumps; (c) principles of accelerated stability testing of conventional dosage forms including the techniques for using data from accelerated stability tests for prediction of shelf life; (d) the pharmaceutics of multiphase formulations such as microemulsions and liposomes; (e) selected topics in bioavailability including statistical design and analysis of bioavailability studies and the design and interpretation of studies designed to assess the bioavailability of controlled-release products; (f) the preparation of biotechnology products by recombinant techniques, their physical and chemical properties, including stability and compatibility, and approaches to their formulation (an alternative to this last topic will be provided for students taking the Biopharmaceuticals electives).
MDCN9112
Advanced Pharmacokinetics
Staff Contact: Prof R Day
CP15 S2
This subject greatly extends the introduction to pharmacokinetics given in the core module Principles of Drug Action, with particular emphasis being given to new aspects of pharmacokinetics. Topics to be covered include (a) rigorous discussion of accumulation kinetics; (b) computerised methods of fitting theoretical equations to the time course of plasma concentrations in individual patients; (c) population kinetics—this is an important aspect of modern pharmacokinetics in which limited data from individual patients can be used to obtain pharmacokinetic parameters; and (d) analysis of the time course of drug effect—pharmacodynamic/pharmacokinetic analysis provides an understanding of the factors controlling the time course of drug effect and is used widely in modern pharmacokinetic research.

MDCN9113
Advanced Regulatory Affairs
Staff Contact: Prof R Day
CP15 S2
This subject will extend the core subject Law, Ethics and the Regulation of the Development and Use of Medicines, for example, by providing a comprehensive examination of the role of the international regulatory agencies such as those of the European Union and the United States and their influence on the Australian regulatory processes examined. Other aspects of the regulatory process mentioned briefly in the core subject, such as issues relating to pharmaceutical chemistry, will be considered in more detail. However, the major emphasis of the subject will be on case study and critical appraisal. Students will review registration dossiers, write evaluation reports and prepare Pre-ADEC responses. The focus of this work will be the optimisation of the regulatory process. Students will also participate in a mock Australian Drug Evaluation Committee (ADEC) meeting to gain an understanding of that Committee’s procedures and decision-marking processes. It is envisaged that some students may choose to undertake projects that would require some time to be spent at the Therapeutic Goods Administration.

MDCN9114
Pharmacoeconomics
Staff Contact: Prof R Day
CP15 S2
As limits are placed on health care budgets, from the national to the individual level, the relative value of competing uses of scarce resources is becoming a significant part of decision making. The real cost of any health care budgetary decision is not the dollars spent but the loss of benefits that would have been obtained by using the money in different ways. This realisation has led to the application of economic evaluation to the health care choices in an attempt to maximise the value obtained from limited health-care budgets. Economists have developed a number of techniques and concepts which, although not providing ‘the answer’, can assist the decision maker in identifying, setting out and analysing the many factors that influence such difficult but necessary choices. Pharmacoeconomics is a subdiscipline of health care economics and is concerned with the methods used by economists in the evaluation of choices in the allocation of pharmaceuticals. This subject consists of two parts: (a) Basic Concepts and (b) Applications and Decision. Part (a) covers methodological issues, cost-of-illness studies, types of economic analysis which are relevant to drugs, calculation of economic cost, decision analysis, examples of published analyses, and economic analysis in developing countries. Part (b) covers budgetary constraints, managing future budgets, use of economic analysis in policy making, policy developments, Australian policies, The Australian Guidelines, and the need for an evidence-based approach.

MDCN9115
Clinical Trials Management
Staff Contact: Prof R Day
CP7.5 S1
Prerequisites: MDCN9011, MDCN9103
The object of this module is to review and understand the responsibilities of the Sponsor and its employee’s, the Investigator, the Clinical Trials facility and its staff, the Research Ethics Committee, the Contract Research Organisation and finally the participants in a clinical trial. Issues relevant to each of the partners will be covered. These include: for the Sponsor; CTN or CTX scheme, preparation of the data package (covering letter to research ethics committee, investigators brochure, protocol, indemnity release, patient information sheets, and detailed budgeting) monitoring responsibilities, investigators meetings; for the Research Ethics Committee, review of the initial data package, review of quality of informed consent and monitoring responsibilities; for the Investigatros, recruitment, education, involvement in protocol development, role in data collection and recruiting, collection of adverse events data, and methodology for gaining consent; for the CRO, overall trial management, choosing a site, and auditing a trial. A common theme will be implementation of guidelines for Good Clinical Research Practice. Students will review data packages for research ethics committees. Assessable activities will include a critical appraisal of a range of data packages for presentation to the ethics committee, presentation of an investigator’s start up meeting, and a simulated trial monitoring experience. An assignment focusing on monitoring clinical trials from a Sponsor’s point of view will be undertaken. Experiential activities undertaken might include attendance at an investigator’s meeting, a protocol development meeting, and a research ethics committee meeting.

MDCN9116
Advanced Clinical Trials Management
Staff Contact: Prof R Day
CP15 S2, S2
Prerequisites: MDCN9100, MDCN9103, MDCN9115
The focus of the advanced module will be the practical application of the underlying principles encountered in the core course on clinical trials management. Students will prepare a complete data package for the research ethics
committee (REC) for a study submitted as part of the clinical trials notification (CTN) scheme as the major focus and assessment task for this module. The trial will be multi-centred and early phase, that is Phase II to III. There will be potential serious toxicities and a data safety monitoring committee will need to be established. Students will develop the clinical trials protocol, the draft patient consent form, and case report form (CRF). The application package will be assessed by a mock REC and the student will be asked to respond to questions and criticisms raised by the REC.

MDCN9117 Pharmaceutical Manufacturing and Quality Control
Staff Contact: Prof R Day
CP15 S1, S2
Prerequisites: MDCN9100, MDCN9102, MDCN9103

An understanding of manufacturing in the pharmaceutical industry will be provided by describing the way in which raw materials are processed into particular dose forms. Using examples of enteral, parenteral and topical products, sampling of raw materials and their subsequent characterisation, followed by the common manufacturing operations and stability and bioavailability will be explored. For example, how particle size or shape or crystal polymorphism can effect mixing of powders and the flow of the powders into the tablet machine as well as dissolution behaviour will be reviewed. Since the aim of manufacturing is to produce a product of a high quality, the principles involved in good manufacturing practice and good laboratory practice and optimizing processes will be studied. This will be both qualitative and quantitative in nature (latter includes statistical methods for process optimization). The relevant national and international codes and guidelines and their relationships to each other and the ongoing process of harmonizing standards will be introduced.

School of Community Medicine

CMED9100 Independent Studies
Staff Contact: A/Prof R Richmond
CP10

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing subjects. They are recommended particularly for candidates who wish to explore specific community health problems within their own communities or areas.

*CMED9500 Epidemiology
Staff Contact: A/Prof J Kaldor
CP15 S1 HPW3

This subject provides students with an understanding of the role of epidemiology as the quantitative science underpinning much of public health practice. Students will learn the basic methodological tools of epidemiology, such as statistics to measure disease frequency, skills to critically review literature and interpret epidemiological studies, and their application in a variety of research and public health contexts. Skills for measuring frequency of disease and testing for evidence of association between risk factors and disease in this subject will build on statistics learnt in HEAL9061 Statistics for Public Health.

This subject will cover topics pertaining to study design, basic statistical tests and interpretation of results. Application of these topics in areas such as questionnaire design, conducting and managing studies, problems relating to research grants will be covered in CMED9513 Applied Epidemiology.

CMED9506 Major Project
Staff Contact: MCH – A/Prof R Richmond; MPH – Mr A Hodgkinson
CP50 S1, S2 or S3

The major project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to identify and define a significant issue; systematically collect relevant, up-to-date information about the issue; analyse, interpret and discuss the information; draw conclusions, make recommendations; and write a report in a manner consistent with academic standards at Masters level. It is normally undertaken in the third full-time (or part-time equivalent) session, after completion of all core and elective subjects.

CMED9513 Applied Epidemiology
Staff Contact: A/Prof R Richmond
CP10 S2 HPW2
Prerequisite: CMED9500 Epidemiology

This subject builds on CMED9500 Epidemiology, using practical examples of the application of epidemiology in field settings. Themes will include the development and validation of measures for epidemiological studies, the conduct of research in practice, evaluation methods and the application of study designs in the real world, ethics of research, and acute epidemiological investigation.

*CMED9516 Introduction to Public Health
Staff Contact: A/Prof A Bauman
CP10 S1 HPW2

This subject will introduce students to the discipline of public health. There will be 12 formal lectures and 2 weeks of student presentations. Topics covered include Australian health care system; population health; management of public health interventions; principles of prevention; health promotion; health protection; concepts of risk factors; socio-economic status and health; special needs groups; determinants of health status; disability and chronic illness.
CMED9517
Advanced Biostatistics and Statistical Computing
Staff Contact: Dr S Lord
CP10 S2 HPW2
Prerequisite: HEAL9061
Statistical design, analysis and reporting: a selection of topics from clinical trials and other controlled studies, non-experimental studies, rates and proportions, multi-way tables, analysis of covariance and repeated measures, multiple regression and other multivariate analysis, life tables and survival analysis; use of statistical software. Thorough individual instruction in the use of computers will be given in the laboratory.

CMED9518
Case Studies in Epidemiology
Staff Contact: A/Prof K Kador and Dr M McCredie
CP10 S2 HPW2
Prerequisite: CMED9500
Epidemiology has made a substantial contribution to public health policy and practice in a number of areas.
The subject will consider four areas (cancer, cardiovascular disease, hepatitis and screening for disease) and review the major epidemiological studies that have contributed to development of knowledge and in Public Health application in these areas. The emphasis of the subject will be on substantive findings, and the role played by epidemiological methods.

CMED9519
Demography
Staff Contact: A/Prof I Burnley
CP10 S2 HPW2
Introduction to demography; sources and processing of data, principles and applications. Life tables, mortality, marriage and divorce, natality, reproductivity. Martial characteristics and family groups. Migration. Distribution by area, sex, age, race; educational and economic characteristics. Population estimates and projections. Computer techniques.

CMED9530
Organisation and Delivery of Health Services
Staff Contact: Dr C Poulos
CP15 S1, S2 HPW2
A subject consisting of primary medical care, hospital based provision, community health services, geriatric assessment teams, institutional care, ethical aspects of care, testamentary capacity and 'informed' consent, guardianship board, terminal care, team concepts and team leadership, funding of care – State and Commonwealth responsibilities.

CMED9531
Gerontology
Staff Contact: Dr R Salgado
CP15 S1, S2 HPW2
Biology of ageing – age associated changes in structure and function of major body systems, psychology of ageing, psychological theory and cognition in later life, sociology of health and illness in the elderly, politics of ageing.

CMED9535
Major Research Project
Staff Contact: Prof F Ehrlich
CP40 S1, S2 or S3
Candidates are required to complete a project on an approved topic. Candidates will be assisted in the planning and preparation of the project by a preparatory course covering aspects of study design, research methods and critical appraisal of scientific papers. Satisfactory completion of this preparatory course is a prerequisite of undertaking the project, but candidates with prior experience in research may be exempted from the preparatory course.

CMED9536
Clinical Experience
Staff Contact: Prof F Ehrlich
CP20 S1, S2 or S3
Candidates must complete 140 hours of supervised clinical experience at geriatric units approved by the School of Community Medicine, UNSW.

CMED9538
Clinical Geriatrics
Staff Contact: Prof F Ehrlich
CP30 S3 HPW2

CMED9539
Psychogeriatrics
Staff Contact: Dr B Draper and Prof F Ehrlich
CP15 S1, S2
This subject deals with the major psychiatric disorders encountered in the care of older people (dementia; depression; paranoid disorders; late onset schizophrenia and mania; anxiety disorders; stress in late life). It covers the assessment and management of these disorders, as well as other relevant issues such as preventative psychiatry, psychological treatment for the elderly, family assessment and behavioural/psychiatric disturbances in the nursing home.

CMED9540
Pharmacology
Staff Contact: Prof L Howes and Prof F Ehrlich
CP 15 S1, S2
This subject examines the pharmacology of ageing. Topics covered include pharmacokinetics, pharmacodynamics, adverse drug reactions, drug interactions and drug prescribing in the elderly. The major drug groups involved in geriatric medicine will also be noted.
This subject introduces students to the principles and practice of rehabilitation medicine, with particular reference to rehabilitation of the elderly. Topics covered include the rehabilitation of stroke and other neurological disorders including spinal cord injury, orthopaedic and musculoskeletal rehabilitation, orthotics, prosthetics, and rehabilitation in the palliative care setting. The role of the allied health professional in rehabilitation of the elderly is also considered.

This subject addresses a number of health issues relevant to the practitioner in his/her day to day management of older patients. Students consider the concepts of healthy ageing and wellness, and community attitudes to ageing. The value of screening and screening tools in clinical practice is discussed. A number of clinical issues are covered such as dental and oral health, physical exercise, nutrition, sexuality, and addictions in the elderly. The importance of communication and specific communication disorders in the elderly are also examined.

Epidemiology of disabling physical and mental conditions; the nature of disability and handicap (including developmental disability); perceptions of handicap; disabled persons' consumer movement and organisation; sociology of disability; social inequality and disability; rehabilitation; community and specialist rehabilitation services; relevant legislation, government services, special needs of disabled persons health accommodation and the physical environment, transport, work, income support, legal rights and public policy.

Self-care, personal health action and help-seeking behaviour; attitudes and beliefs about health and illness; media influences and sources of health advice; the media and public health; coping with illness, stress, anxiety, loss or bereavement; the sick role; expectations of health care; counselling techniques; doctor-patient communication; psychological, social and ethnic factors influencing health behaviour; health education and promotion; community mental health; rehabilitation; concepts and strategies.

Writing and preparation for the media; preparation of material for health education and promotion, including audiovisual material; preparation of scientific papers, reports and theses; practical skills in planning and writing articles: logical organisation, clear and concise scientific prose; presentation of data and overall layout.

Concepts of drug dependence, including pharmacological aspects; management of these problems in primary care; rehabilitation programs, smoking cessation; weight control; social and psychological factors and their impact on the family; drug problems and their impact on the community; public health aspects; media; specific intervention techniques for users of tobacco, alcohol and other drug use.

Economic, demographic and epidemiological aspects; communicable diseases, for example, diarrhoea and parasitism, chronic diseases including mental health in the Third World context; maternal and child health; family planning; nutrition, and food and nutrition policy; breast feeding promotion; immunisation; water supply and environmental sanitation; organisation of health services; primary health care; health personnel training; health education; pharmaceutical problems; role of international and non-governmental agencies; self-reliance.

Current issues relevant to the health of women, both consumer and provider perspectives. Common health risks facing women. Special needs in health and health care for particular populations of women. Traditional role of women as health carers, and the impact this has on health and health services. Short lectures, group discussions and student presentations. Assessment is a combination of marks given in written tutorial papers, end of session essay and group facilitation and class participation.

Examines the socio-cultural aspects of women's health. Emphasis will be on reading and critically examining recent social, behavioural science, public health and primary care.
literature. Case studies will be used to look at determinants of women’s health, woman and health care systems, promoting women’s health, and woman and disability.

*CMED9608
Rural Health Studies 1
Staff Contact: Prof M Harris
CP10 S1 S2 HPW2
Note/s: External course, 4 tele-conferences, one 2-day workshop mid-term.

Examine roles, needs, and particular health and welfare issues of rural general practitioner services; explore methods for professional development of rural GPs; study public health issues of particular relevance to rural general practice; study data collection and analysis to help identify rural health problems, their management and prevention; plan and evaluate the promotion of health, and prevention of disease through individual and community health education programs in rural communities.

CMED9610
Food and Nutrition Policy Studies
Staff Contact: Ms L Bloomfield and Ms P Craig
CP10 S1 S2 HPW2
The relationship between population, health and the food and nutrition system, i.e. the production, distribution and consumption of food. Discussion of development of intersectorial policies and strategies addressing specific segments of the food and nutrition system to improve the health of vulnerable populations in developed and developing countries. Students will work through a case study and demonstrate their understanding by preparing, presenting and defending a proposed food policy for a specified population or community group.

CMED9611
Health of the Elderly
Staff Contact: Dr R Salgado
CP10 S1 HPW2
Demography of ageing; epidemiology of health, illness and disability in an ageing population; ‘aged persons’ perspectives; gerontology – biological, sociological and psychological perspectives; problems and special needs of an ageing population; health maintenance; health policy for an ageing population; health services; institutional care; community and domiciliary services; non-government organisations; poverty; community attitudes; accommodation; income support; social and ethical issues.

*CMED9612
Environmental Health
Staff Contact: Dr J Frith
CP10 S2 HPW2 – External mode also available
Prerequisites: HEAL9061
To introduce the principles of epidemiology, particularly in reference to environmental risk factors of disease and in reference to such principles as incidence and prevalence, aetiology and risk factors, epidemics and endemics, and primary, secondary and tertiary prevention of disease. In particular, it deals with environment and disease, radiation, chemical, hazards, air and water pollution, biological hazards, urban environment, ecology, ecosystems and interdependence and how these factors affect health, public health issues related to sustainable development.

CMED9613
Health and Public Policy
Staff Contact: Prof P Baume and Dr S Irvine
CP10 S1 HPW2
The subject deals with ‘health’ debate over time, elements of health policy, health outcomes and international comparisons. Health in the Federal System, systematic development of health outcomes, stakeholders, program cycle, work of a Minister for Health, discussion of means and ends, Cabinet Government and health policy, concepts and strategies.

CMED9615
Primary Health Care
Staff Contact: Dr D Pond
CP10 S1 HPW2
The subject provides an overview of primary care in Australia and the application of the PHC approach to Australia and other developed countries. Topics to be covered include: primary care and PHC in Australia; primary medical care and family practice; primary nursing care and generalist community nursing; integration of Community Health Services; healthy cities; self help groups and self care; health promotion; surveillance/monitoring in primary care; advocacy/community development; aboriginal health; community participation.

CMED9617
Community Paediatrics
Staff Contact: Dr V Nossar
CP10 S2 HPW2
A broad view of Community Paediatric Services in contemporary Australia, how this paediatrics is practiced and the rationale behind these practices. Explores the practical and theoretical background behind the development of Community Paediatrics, as well as the principles that underpin its practice. Examines some key aspects of that practice.

CMED9618
Public Health Law and Ethics
Staff Contact: A/Prof P McNeill
CP10 S1 HPW2
This subject deals with the role of law and ethics in resolving issues in public health. An overview will be presented of the Australian legal system, principles of law and legal approaches to resolving conflicts; law relevant to health professionals including their duty of care, requirements for registration, and obligations in privacy and confidentiality; legal responsibilities and obligations of public accountability; ethical principles and a model for ethical decision-making.
The third objective is to develop an understanding of the formative and summative evaluation will be described. The uses of mass media for public health advocacy purposes. Second objective is to increase understanding of and development, design and evaluation of mass media health-communication. The first objective is to understand the impact of HIV/AIDS on a number of areas of the health care system and society, both now and in the future. The course is taught by internationally recognised experts in the field, and will have a particular focus on HIV/AIDS in Australia and the Asia/Pacific region. The subject introduces the concepts and theories of mass media health-related campaigns in public health. The principles of formative and summative evaluation will be described. The second objective is to increase understanding of and develop skills in media message development and analysis. The third objective is to develop an understanding of the uses of mass media for public health advocacy purposes.
CMED9631
Project in Aboriginal Health
Staff Contact: Dr S. Irvine
CP10 S2
Students in this subject will participate in small groups in a project organised in conjunction with an Aboriginal community or health provider. Experiential learning techniques will cover both process elements of project implementation and content elements specific to the health problem addressed. The project will be designed within a framework of cultural safety and self determination.

CMED9632
Project in Monitoring Effective Health Care
Staff Contact: Prof P Baume, Dr D Black and Dr S Irvine
CP10 S2
This subject will allow students who have undertaken subjects in measurement, decision making, planning and evaluation to apply these skills in a real project in a clinical environment. Students will work in small groups and each student in the group will be responsible for one component of the project. Working in a team will be an important part of the project. This subject will be conducted in association with a health care provider or funding agency.

School of Health Services Management

HEAL3091
Long Term Care Administration
Staff Contact: To be advised
CP15 SS L2
Note: Not offered in 1998
Introduction to the more important theories, concepts and practical tools which are applicable to the evaluation, administration and planning of long term care institutions and nonresidential agencies and programs.

HEAL9011
Statistics and Epidemiology
Staff Contact: Dr Deborah Black
CP15 S1 L2
Collection, collation and analysis of data and the interpretation of statistical information for the purposes of health services management. The use of computers for these purposes. Measurement of disease rates and interpretation and identification of health status. These statistical methods and measures will assist in planning, operation and evaluation of interventions in health service management.

HEAL9021
Health Services Statistics
Staff Contact: Dr Deborah Black
CP15 SS L2
Prerequisite: HEAL9011 or equivalent
Note: Not offered in 1998
The application of statistical methods to health planning and administration problems and other problems of direct relevance to the health care field.

HEAL9031
Ethics of Resource Allocation
Staff Contact: Ms Helen Lapsley
CP15 SS L2
Prerequisites: HEAL9351 and HEAL9811, or equivalents
Note: Not offered in 1998
Management of scarce resources in relation to concepts of equity and justice. An examination of the ways in which choices are made, and the organisational structures which determine how, by whom and for whom resource allocation decisions are made within the health care system. A review of the most significant ethical issues. Case studies which demonstrate value judgements, ethical and economic conflicts and the determination of priorities.

HEAL9041
Health Care Systems
Staff Contact: Ms Helen Lapsley (External), Mr Ian Forbes (Internal)
CP15 S1, S2 L2
Examination of the structure and function of health care systems with special reference to the Australian health care system: constitutional, economic and political environments within which health care systems operate; characteristics of institutional and noninstitutional care; expenditure, funding arrangements and systems of health insurance and the health workforce; current policy issues are reviewed.

HEAL9051
Health Services Accounting
Staff Contact: Mr Kevin Forde
CP15 SS L2
Note: Not offered in 1998
Basic accounting theory with particular reference to hospitals and health service institutions; cash and accrual accounting systems, hospital fund accounting in theory and practice; formulation and use of operational and capital budgeting; the nature and use of cost data; accounting for planning and control, cost analysis and reporting formats.

HEAL9061
Statistics for Public Health
Staff Contact: Dr Deborah Black
CP15 S1 L3
Provides an introduction to research methods and statistical techniques applicable to public health data. Statistical techniques will focus on data analysis of a single variable or linear relationships between two variables. In addition, students will learn to use SPSS for Windows to conduct statistical analyses on a set of data relevant to public health.
HEAL9071
Health Care Financial Management I
Staff Contact: Mr Kevin Forde
CP15 S2 L2
Introduction to double entry accounting including the underlying conventions and doctrines to provide a working knowledge of both accrual and cash based accounting systems, utilisation of accounting records for the presentation and interpretation of profit and loss accounts, balance sheets and fund statements. Introductory financial statement analysis, budgeting, analysis of budgets and costing products and services. An introduction to contract law and the legal obligations of financial managers.

HEAL9081
Health Care Financial Management 2
Staff Contact: Mr Kevin Forde
CP15 S2 L2
Prerequisite: HEAL9071 or equivalent
Note: Not offered in 1998.
An investigation of hospital fund accounting to provide a level of operational competence. Exposure to budgeting techniques and evaluation procedures; cost analysis and control; investment evaluation and discounted cash flow techniques; accounting for investment; cost allocation procedures. An overview of the ‘subjectivity’ of accounting numbers; political and financial pressures placed upon reporting and report formats. Alternative valuation techniques.

HEAL9111
Quality Assurance for Health Administrators
Staff Contact: Ms Helen Lapsley
CP15 S1 L2
Prerequisite: HEAL9041 or equivalent
An overview of quality assurance within the health care system, and of the development of quality assurance programs. A review of the roles and methodology of peer review, clinical review, screening criteria for risk management, patient satisfaction and accreditation. Techniques relating to the implementation of quality assurance programs. Integration of quality assurance concepts into the roles and functional responsibilities of health service managers.

HEAL9301
Health Services Planning I
Staff Contact: Mr Ian Forbes
CP15 SS L2
Examination of the major concepts used in planning health services systems within a context of resources allocation, at a community, regional and national level. Techniques used in data collection, analysis and modelling for health planning. Analysis of environments external to health service organisations of a societal, political and health status nature. Assessment of organisations within service areas. Management skills appropriate for policy making, program evaluation and health services resource distribution.

HEAL9311
Introduction to Organisation Behaviour
Staff Contact: Dr Anna Whelan
CP15 SS L2
Note/s: Not offered in 1998
Aims to encourage students to develop a greater understanding and analysis of behaviour in health organisations. Microlevel theories are covered from various organisational perspectives: psychology, sociology, political science, and anthropology. Topics include: values and attitudes; motivation, communication, leadership and power; group dynamics and conflict; organisational culture and decisionmaking.

HEAL9331
Health Related Law and Ethics (Australia)
Staff Contact: Mr Phillip Bates
CP10 SS
This subject will explore contemporary applied issues in law and related ethical matters of particular relevance to health services management, planning and delivery. The subject matter will vary depending, in part, on the backgrounds and interests of enrolled students and the subject coordinator’s research programmes.

HEAL9341
Health Related Law and Ethics (Hong Kong)
Staff Contact: Mr Philip Bates
CP10 SS
The subject will explore contemporary applied issues in law and related ethical matters of particular relevance to health service management, planning and delivery in Hong Kong. The subject matter will vary depending, in part, on the backgrounds and interests of enrolled students and the subject coordinator’s research programmes.

HEAL9351
Health Economics
Staff Contact: Ms Helen Lapsley
CP15 S2 L2
Economic analysis as applied to resource allocation, planning and evaluation in health services. Topics: basic concepts and methods of economic analysis, economics of the public and private sector, decision making, supply and demand, pricing and nonpricing methods of allocation, welfare analysis, ethics of resource allocation, economic planning of health services, cost benefit evaluation, cost effectiveness analysis, economics of hospitals and economic impact of health insurance.

HEAL9361
Physical Planning and Design
Staff Contact: Mr Ian Forbes
CP15 SS L2
Note: Not offered in 1998.
Planning processes applied to physical and environmental design. Regional, urban and local planning issues. Building design and building project management. Cost planning,
network analysis and commissioning. Briefing, design and evaluation methods. Ergonomics and environmental psychology. Applications to health and welfare facilities. Administrative, medical and nursing policy implications.

**HEAL9371**  
*Research and Evaluation Methods*  
*Staff Contact: Dr Mary-Louise McLaws*  
*CP10 S2*

Skills in research design, evaluation methods and literature review will be developed using applied learning methods. Skills will be developed in the formulation of a research question, questionnaire or evaluation methodology. Students will choose an area or areas of interest to develop during the session and the development of this research will be presented for weekly peer review. Peer review is aimed at providing students with a critique and a forum for students to learn, to appraise a variety of research problems.

**HEAL9381**  
*Policy Studies*  
*Staff Contact: Dr Pieter Degeling*  
*CP15 S2 L2*

Prerequisites: HEAL9041, HEAL9711  
Corequisite: HEAL9351

Contemporary health policy issues including the politics of health care; principles of policy formation and analysis. Past topics have included: health care technology; occupational health and safety; government control of private medical practice; hospital cost containment; the impact of Medicare; Commonwealth/State financial relationships; quality assurance and utilization review; the regionalised administration of health services; health policy issues in developing countries.

**HEAL9391**  
*Health Services Strategic Management and Planning*  
*Staff Contact: Mr Jeffrey Braithwaite*  
*CP15 S2 L2*

What is strategic planning? What does it mean to manage strategically? How do health service organisations (or, more accurately, the people with in them) express their strategic intent? How can you plan for the future when the environment is so complex and change so rapid? We investigate strategy in the health services by examining the ideas, tools and techniques of the strategist. Topics discussed include strategic planning, strategic behaviour, marketing, leadership and the learning organisation.

**HEAL9401**  
*Medical Care Organisation*  
*Staff Contact: To be advised*  
*CP15 SS L2*

Prerequisite: HEAL9311 or equivalent  
Note: Not offered in 1998

Specific aspects of the organisation of medical care. Topics include: the administration and review of clinical work, participation of medical staff in planning and development of facilities and services, the integration of the function of health care personnel in both the administration and delivery of services, and accreditation of hospitals and other health service institutions.

**HEAL9411**  
*Advanced Epidemiology*  
*Staff Contact: Dr Mary-Louise McLaws*  
*CP10 S1*

Skills for critical appraisal of medical literature and of clinical and service outcome indicators will be developed. Knowledge of epidemiologic methodology will be applied during critical appraisal of medical, scientific and nursing literature with the aim of assisting students to evaluate published findings and in decision making of clinical practice, policy and planning. Clinical and service outcome indicators will be developed and appraised.

**HEAL9421**  
*Public Health and Epidemiology*  
*Staff Contact: Prof James Lawson*  
*CP15 S1 L2*

Distribution patterns and determinants of disease and disability with particular reference to diseases of major Australian concern. Preventive, treatment and rehabilitation strategies. The uses of epidemiology in the planning, operation and evaluation of health services.

**HEAL9431**  
*Interpersonal Communication in Organisations*  
*Staff Contact: To be advised*  
*CP15 SS L2*

Note: Not offered in 1998

A theoretical and practical subject which aims to increase students’ understanding of, and capacity to deal with, communication problems in organisations. Teaches students to improve their own communication skills by a series of communications exercises, role plays, simulations and games. Students are able to chart their progress with a checklist developed for the course.

**HEAL9441**  
*Health Economics 2*  
*Staff Contact: Ms Helen Lapsley*  
*CP15 SS L2*

Prerequisite: HEAL9351 or equivalent  
Note: Not offered in 1998

Builds on Health Economics 1 with greater emphasis on planning. Topics include: demand and utilization analysis and prediction, cost benefit analysis and project evaluation, costs and models of health delivery units, optimum size and location, inflation control, regional planning models and rationalisation, financing systems and incentives for efficiency, alternative economics and political economy of health services.
HEAL9451
Workforce Planning
Staff Contact: to be advised
CP15 SS L2
Prerequisites: HEAL9301 and HEAL9351, or equivalents
Note: Not offered in 1998
Systems approach to workforce planning in the health services. Task analysis as a workforce planning technique; career mobility; supply of health personnel, projection of supply, wastage rates; approaches to measurement of demand for health personnel and projection of demand; changing productivity in the health sector. Workforce planning at the institutional level; demographic and mathematical models. Analysis of recent studies of the Australian health workforce.

HEAL9461
Management Information Systems
Staff Contact: Ms Deborah Black
CP15 S1 (HK only), S2 L2
Note: Not offered in 1998
Introduction to information systems. Use of information systems in the health system. Positive patient identification, clinical decisionmaking systems, pathology and investigatory services systems. Administrative systems including payroll, personnel and maintenance systems. Computerization of medical records and use of computers in quality assurance programs. Total health and hospital information systems. Regional community health information systems.

HEAL9471
Comparative Health Care Systems
Staff Contact: Ms Helen Lapsley
CP15 SS L2
Prerequisite: HEAL9041 or equivalent
Note: Not offered in 1998
A comparative study of personal, public and hospital health services in US, USSR, Britain and selected Asian, European and developing countries. The course discusses the respective roles of government and private enterprise, health workforce, organisational structures, financing, regionalisation and legislation.

HEAL9481
Operations Research for Health Planning and Administration
Staff Contact: Dr Deborah Black
CP15 SS L2
Prerequisite: HEAL9011 or equivalent
Note: Not offered in 1998
Operations research methodology and techniques as applied to health services. Model building and systems approach. Typical operations research problems such as competition, queuing, inventory, allocation, search and scheduling problems as they appear in a health services environment.

HEAL9491
Organisational Analysis in Health Services
Staff Contact: Dr Pieter Degeling
CP15 SS L2
Prerequisite: HEAL9311 or equivalent
Note: Not offered in 1998
Students conduct an analysis of one health organisation according to a specific organisational theory perspective (e.g., systems, contingency, administrative, action). The level of analysis is at the organisational level, and students are instructed in measurement, data collection and analysis of organisational attributes. This exercise forms a backdrop to discussions of key organisational issues relating to centralisation, complexity, uncertainty, and resource dependency etc.

HEAL9501
Computing Techniques for Health Services Management
Staff Contact: Dr Deborah Black
CP10 S1
Prerequisite: HEAL9011 or equivalent
Note: Not offered in 1998
Introduction to, and practice of, transferable skills for the utilisation of personal computers in the workplace. The nature of tasks performed in computing. The nature of computing systems, databases, and communication links. Use of software packages for clinical and managerial data acquisition, analysis, and report preparation. Use of the Internet for teleworking, compiling, and transmitting information. Conducted at laboratory terminals during residential schools, with students obliged to make their own arrangements for access to computers during term.

HEAL9511
Special Topic in Health Administration or Planning
Staff Contact: Dr Kevin Forde
CP15 SS L2
An occasional elective dealing with some aspect of health administration or planning, selected according to current demand and availability of local and visiting lecturers.

HEAL9531
Fieldwork in Health Service Organisation
Staff Contact: To be advised
CP15 SS L2
Supervised placement in health service organisation. Emphasis on students acquiring knowledge of organisation and departmental functioning, daytoday problems faced by health service managers.

HEAL9611
Nursing Theory
Staff Contact: To be advised
CP15 SS L2
Note: Not offered in 1998
Analysis of extant nursing theories for the purpose of synthesising coherent statements of philosophy of nursing services.
HEAL9621
Nursing Administration
Staff Contact: To be advised
CP15 SS L2
Note: Not offered in 1998.
The relationship and interdependence of the structural and control aspects of nursing management is explored. Topics include staffing, patient classification systems, assignment patterns, quality assurance, performance appraisal. Discussion of issues associated with a range of topics; practical application of skills.

HEAL9631
The Nurse Executive Role
Staff Contact: To be advised
CP15 SS L2
Note: Not offered in 1998.
The interdependent and collaborative aspects of health executive roles with particular emphasis on the nurse executive role. Concepts examined include: responsibility, authority, accountability. Professional development aspects, such as networking and mentoring, are integrated throughout the subject.

HEAL9641
Nursing Research
Staff Contact: To be advised
CP15 SS L2
Prerequisites: HEAL9011, HEAL9371 or equivalents
Note: Not offered in 1998.
Topics include: critical analysis of research studies, writing a research protocol, the nursing administrator's role in developing strategies for utilizing research in practice.

HEAL9651
Historical Trends in Nursing
Staff Contact: To be advised
CP15 SS
Note: Not offered in 1998.
The view of 'history as progress' in nursing is examined to enable the student to understand the past as a guide to present and future action. Theoretical positions originating from different perspectives are studied in an attempt to challenge the conventional broadbrush approach to nursing history. Topics include: the influence of the Women's Movement and changing ideologies of nursing; comparative analyses of trends overseas.

HEAL9661
Current Issues in Nursing
Staff Contact: Dr Anna Whelan
CP15 SS
Note: Not offered in 1998.
Controversial issues involving the nursing profession are critically examined. Topics addressed include: minimal educational preparation, mandatory continuing education, nontraditional education, unionism vs professionalism, political action in the health arena, government involvement, clinical specialisation, cost effectiveness, consumer's rights, factors affecting nurses participation in the workforce, ethics in practice.

HEAL9671
Politics, Policies and Power in Nursing
Staff Contact: To be advised
CP15 SS
Note: Not offered in 1998.
The concept of power is examined as it relates to the nursing profession's increasing involvement in health policymaking and politics. The impact of professional nursing organisations and representative nursing groups on government decisionmaking bodies in Australia is discussed. Strategies which promote the political acumen among nurses at various organisational levels are examined.

HEAL9701
Management of Work of Health Professionals
Staff Contact: Dr Anna Whelan
CP10 S2
Identifies the range of social, economic, political, industrial and technological factors which may influence the organisation of both work and workers. Develops knowledge and skills in critically evaluating and implementing techniques and methods which have been recommended for organising work and managing responses of workers. Topics addressed include: assessing and improving worker performance, motivating professionals, workplace conflict, designing work, introducing technology, managerial aspects of employment law, and management techniques such as Total Quality Management (TQM).

HEAL9711
Management of Organisation
Staff Contact: Dr Pieter Degeling
CP15 S1
Examines current theories of organisation and management, and evaluates their applicability to management work in health care settings. Examines the relationship between theory and practice in managing organisations; fosters an appreciation of the dynamics of managerial behaviour and extends understanding of what is entailed in accomplishing organisational change and in constituting management control.

HEAL9731
Industrial Relations in the Health Services
Staff Contact: Dr Anna Whelan
CP15 SS
Prerequisite: HEAL9701 or equivalent
Note: Not offered in 1998.
This subject is designed to extend the health service manager's knowledge of employer - employee relations in the health services workplace in Australia. The subject builds on theoretical frameworks introduced in Management of Work. It examines the framework of industrial relations in Australia, including development of the arbitral model, state intervention, labour law, trade unions, professional associations, and employer associations. It explores the development of personnel management in Australia including an assessment of current Human Resource Management, the diffusion of different management
HEAL9741
Management of Health Services
Staff Contact: Mr Jeffrey Braithwaite
CP15 S1
The management of health service agencies within prevailing patterns of social policy, with specific attention to function and objectives; alternative models of structure and organisation; accountability, responsibility, evaluation, quality assurance and accreditation. Enhancement of skills in monitoring change in social policy and the health environment; development of requisite managerial and clinical roles and relationships; management dynamics. Exploration of professional paradigms, rolemodelling and valuecritical analysis in the health service context.

HEAL9743
Introduction to Casemix
Staff Contact: Prof George Palmer
CP15 S2
Diagnosis related groups (DRGs) and other casemix systems including their history, principles of construction and recent modifications including the Australian National DRGs (AN-DRGs). Problems in the use and interpretation of DRG data: the varying clinical and resource homogeneity of individual DRGs and the presence of outliers. Effects of errors in the coded medical record abstract data on DRG assignment; limitations imposed by the disease and procedure classification systems currently used. Future developments in the design of casemix systems.

HEAL9744
Casemix Accounting and Funding
Staff Contact: Prof George Palmer
CP15 S2

HEAL9746
Casemix and Contracting for Health Care
Staff Contact: Prof D Hindle
CP10 S1, S2
Public and private funders are moving towards more sophisticated descriptions of services in formal contracts with health care providers. Particular attention is being given to the use of casemix classifications when defining those services.

This subject discusses and then illustrates the key components of casemix-based contracting. They include optional approaches to the process of categorisation itself, such as time-based and episode-based classifications, episodes of care and episode management units, and iso-resource and iso-utility classes. Attention is paid to the measurement of costs and utilities, and to audits of such matters as clinical codes, quality of care, and outcomes. The role of clinical pathways is considered in detail.

The ideas are explored through a case study, in which students function as members of either a purchaser or a provider hospital during two annual rounds of negotiation. The outcomes of negotiation are then evaluated by use of a model which predicts costs and revenues, and associated variables including admission rates and lengths of stay. Assessment is through two assignments, in which students are expected to provide advice on operations to both the insurer and the provider.

HEAL9751
Introduction to Management and Policy for Public Health
Staff Contact: Prof James Lawson
CP10 S1
Note: This is a core subject for Master of Public Health students.

Provides students with an understanding of the broad range of factors that can affect public health policy development and implementation and which can influence how public health services are organised and managed. The subject extends students understanding of different approaches to developing and implementing public health policy and to organising and managing a unit within a public health service.

HEAL9761
Mental Health Services Management
Staff Contact: Dr Tom Benjamin
CP15 SS
A multidisciplinary subject intended to apply competencies gained in organisation theory, sociology, finance, and economics subjects to the special requirements of the mental health field. The major assignment will emulate an external consultant's report of a mental health facility within its community context. Strategies for change will be discussed in the light of evidence from case histories and students' assignments.

HEAL9771
Casemix for Clinician Managers
Staff Contact: A/Prof Pieter Degeling
CP15 S1
This subject examines how casemix information, methods and applications can be used to address organisation change issues that are likely to arise in constituting clinical units as learning organisations. The subject is structured to develop practical skills in using casemix information and methods in engendering organisational learning with respect to: strategic planning and management; budgeting and financial control; service planning; clinical audit; utilisation review; quality assurance; clinical guideline development and implementation; the development of an outcomes focus in service planning and delivery; and, in planning and implementing streams care.
HEAL9811
Sociology, Ethics and Health
Staff Contact: Dr Stephanie Short
CP15 S2
This subject introduces students to the social factors which shape the patterning of health and illness, and the delivery of health care services. Topics include racism and migrant health, colonization and Aboriginal health; gender and health; bioethics, medical research; medical dominance; the body in medical discourse; madness and psychiatry.

HEAL9821
Health and Society
Staff Contact: Dr Stephanie Short
CP15 SS
Prerequisite: HEAL9811 or equivalent
Notes: Not offered in 1998
This subject provides students with the opportunity to enhance their understanding of social research methodology and to learn about the social research process by undertaking a social research project.

HEAL9921
Project
Staff Contact: Dependent on the subject chosen
CP15 SS

HEAL9931
Research Project A
Staff Contact: Dependent on the subject chosen
CP15 F

HEAL9941
Research Project B
Staff Contact: Dependent on the subject chosen
CP15 S1 or S2

HEAL9951
Research Project C
Staff Contact: Dependent on the subject chosen
CP15 F

HEAL9961
Major Project (MPH)
Staff Contact: Dr A. Hodgkinson
CP50 S1, S2 or S3
The major project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to identify and define a significant issue; systematically collect relevant, up-to-date information about the issue; analyse, interpret and discuss the information; draw conclusions, make recommendations; and write a report in a manner consistent with academic standards at Masters level. It is normally undertaken in the third full-time (or part-time equivalent) session, after completion of all core and elective subjects.

School of Medical Education

MEED9001
Independent Studies
Staff Contact: MHPEd – Ms L Bloomfield; MPH – Mr A Hodgkinson
CP5
Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing subjects. They are recommended particularly for candidates who wish to explore solutions to specific educational problems within their own institutions or disciplines.

MEED9010
Community Development
Staff Contact: Ms J Ritchie
CP10 S1 HPW2
Overview of determinants of community processes and activities. Health of individuals viewed in relation to concepts from the following disciplines: ecology, anthropology, sociology, psychology, economics, political science, etc. Principles behind community development and participation and the assessment of community health needs.

MEED9012
Health Promotion
Staff Contact: Ms J Ritchie
CP10 S1 S2 HPW2
Explores the meaning of health promotion and its role in the field of public health, and provides a forum for discussion on preventive approaches in health care. Students study a variety of approaches to promoting health and consider the benefits and disadvantages of each of these within an integrated framework.

MEED9013
Influencing Health Beliefs and Health Behaviours
Staff Contact: Ms J Ritchie
CP10 S2 HPW2
Consideration of behaviour change theories. Description of the processes whereby values and beliefs determine the way individuals behave; the effects of acute and chronic illness, or risk of illness on beliefs and behaviours related to health. Current interventions models which seek to influence these beliefs and behaviours.

MEED9014
Communication and Educational Skills for Community Health Workers
Staff Contact: Ms J Ritchie
CP10 S2 HPW2
Emphasis on the specific communication and education skills required by health professionals working in community settings. Application of small group teaching and experiential learning approaches including interactive...
experiences, simulations, role plays, problem-solving exercises and opportunistic teaching methods.

**MEED9102**
**Educational Process in Small Groups**  
*Staff Contact: Mr A Hodgkinson*  
CP10 S1 HPW2

How people operate as members and leaders of groups; conditions underlying effective group work in educational planning, teaching and learning, and the provision of health care; basic concepts of group structure. Stress on experiential learning, observation of group process, improving skills in facilitating group learning and designing appropriate learning activities.

**MEED9103**
**Instructional Design**  
*Staff Contact: Dr P Youngblood*  
CP10 S1 HPW2

Application of the skills and knowledge gained in MEED9133 to the design of instruction for various learning environments in the health field. Students learn to analyse a teaching problem, identify and classify learning outcomes, write learning objectives, select appropriate instructional and assessment strategies, and evaluate the effectiveness of instruction. Classes are organised as a series of workshops addressing the steps in the design process, including analysis, design, development and evaluation.

**MEED9106**
**Teaching Skills**  
*Staff Contact: Ms L Bloomfield*  
CP10 S1 HPW2

The practical aspects of teaching methods. Problems experienced by candidates in their own situations. Certain theories and principles of learning as they apply to the various teaching methods studied. Emphasis is on microteaching (reinforcement, questioning, explaining).

**MEED9107**
**Assessment of Students**  
*Staff Contact: A/Prof R Bandaranayake*  
CP10 S2 HPW2

The process, scope and purpose of educational evaluation. The place of student assessment within the curriculum and the concept of measurement and its requisites, leading to a review of the different types of assessment commonly used by participants to assess student learning in all its domains. The practical aspects of the designing, administration and scoring of such assessments, and attempts to identify ways of improving such procedures. The assessment of clinical performance on prescribed tasks, on tasks involving judgement, and in clinical practice involving priorities, management and responsibility. The utilisation of test scores and other assessment data in educational decisionmaking.

**MEED9108**
**Program Evaluation and Planned Change**  
*Staff Contact: Prof A Rotem*  
CP10 S2 HPW2

This subject is offered with the expectation that participants will assume an increasingly important role in the planning, conduct and evaluation of educational and/or public health programs. The role of evaluation in development and innovation is explored with due attention to organisational and political sensitivities and constraints. The role of the evaluator in clarifying the need for evaluation, and in determining the questions that should be addressed, and the methods of obtaining and interpreting information, is considered in some detail.

**MEED9110**
**Workshop in Culture, Subculture and Communication**  
*Staff Contact: Dr R Pigott*  
CP10 S1 HPW2

Introduction to the complexities of communicating across cultural and subcultural barriers in a world now increasingly composed on multicultural societies; and to the emerging role of intercultural communication skills in promoting health, preventing and treating disease, and managing health systems. The subject embraces theoretical and experiential learning and is designed to offer students an intellectual and intuitive feeling for the subject that will have immediate practical use.

**MEED9111**
**The Consultation Process**  
*Staff Contact: Prof A Rotem*  
CP10 S2 HPW2

*Recommended Prerequisite: MEED9134 or equivalent*  
*Corequisites: MEED9108, MEED9113, MEED9112*

The subject is designed to introduce concepts and practical approaches used by consultants in the development of organisations, programs, teams and individuals. The subject will focus on the internal process of change as well as on ‘third party’ interventions.

**MEED9112**
**Management of Human Resources in Health**  
*Staff Contact: Mr A Hodgkinson*  
CP10 S2 HPW2

*Recommended Prerequisite: MEED9134 or equivalent*  
*Recommended Corequisite: MEED9108*

The subject is designed to introduce concepts and practices pertaining to the management of human resources. Particular attention will be given to the integration of human and other resources in management and planning. The influence of social values and beliefs on the way that human resources are managed will also be considered.
MEED9113  
**Evaluation of Instructors**  
*Staff Contact: Ms L Bloomfield*  
CP10 S2 HPW2  
This seminar pertains to concepts, research and development in the evaluation of instructors. Emphasis on the methods by which evaluative feedback could be provided and used for the purpose of improvement of instruction. It is expected that candidates would acquire skills in the design and use of evaluation instruments which are effective in improving instruction.

MEED9115  
**Educational Selection**  
*Staff Contact: Dr C Berglund*  
CP5 S2 HPW1  
Considerable interest is expressed by the health professions in the process of selecting students. Complaints are often directed to such shortcomings as the lack of willingness of postgraduates to work in rural areas, the inclination of students to seek 'spoon feeding', the inability of students to relate to patients, the poor science background of students etc. This elective examines the extent to which solutions to these problems can realistically be expected from improved selection.

MEED9120  
**Qualitative Research Methods in Health Promotion**  
*Staff Contact: Ms J Ritchie*  
CP10 S1 HPW2  
*Prerequisites: MEED9012, CI\/MED9500*  
This subject focuses on issues and methods in qualitative research in health promotion and public health. It is offered to those wishing to undertake their major projects using qualitative methods.

MEED9121  
**Large Group Teaching**  
*Staff Contact: A/Prof R Bandaranayake*  
CP10 S2 HPW2  
The process of explaining considered central to large group teaching; analysis of this process, dealing with the qualities and components of effective explaining. The types of lectures ranging from didactic to inductive, and the various ways in which lectures are structured, leading to an examination of the relationship between lecturing and learning. Strategies for improvement of lectures, and alternatives to lectures.

MEED9122  
**Primary Health Care**  
*Staff Contact: Dr V Nossar*  
CP10 S1 HPW2  
The concept of primary health care and its emergence as the priority health care approach in developing countries. Emphasis on the training implications of primary health care programs together with different definitions of the concept including the role of primary health care in social and economic development, and its relationship to existing health care systems.

MEED9123  
**Production of Audio-Visual Materials**  
*Staff Contact: Ms L Bloomfield*  
CP10 S2 HPW2  
The use of audio visual materials and equipment; production of software (charts, transparencies, slides, film, videotape and audiotape); principles guiding the selection of teaching aids for self-paced learning, teaching in small groups and large group presentation. A major requirement for assessment is the selection and preparation of instructional media appropriate to a specific teaching situation in the participant's base institution.

MEED9124  
**Clinical Teaching**  
*Staff Contact: Dr P Harris*  
CP5 S1 HPW1  
Drawing upon real life clinical practice and observing teaching sessions of their own, their peers and others, participants have the opportunity to explore the nature of clinical teaching and learning in selected programs, and to identify ways of improving teaching skills and maximising students' learning. Research in clinical teaching and it relation both to educational theory and to current practice.

MEED9125  
**Planning, Conducting and Evaluating Educational Workshops**  
*Staff Contact: A/Prof R Bandaranayake*  
CP10 S1 HPW2  
In an attempt to develop their skills in all aspects of conducting workshops, participants are guided to formulate a plan for a workshop for their colleagues in an important educational area, with opportunity to practise various techniques for enhancing active participation, and subsequently to conduct the workshop, evaluate its process and outcomes, and report on it.

MEED9126  
**Self Directed Learning and Self Instruction**  
*Staff Contact: Ms L Bloomfield*  
CP10 S2 HPW2  
Options which are available for the teacher to assist students to develop skills in self education. Requires students to undertake self directed study and to negotiate a learning contract with the instructor. Topics may include: adapting instruction to individual differences, principles and practices of self instruction, applying self directed learning in traditional courses, and contexts for informal learning such as continuing education, in-service training and distance education.
MEED9127
Research in Education for the Health Professions 1
Staff Contact: Dr M Stiernborg
CP10 S1 HPW2

Enables participants to become aware of 'ways of knowing', in general, and of the scientific method in particular. Different methods of educational research examined in depth so that the method(s) most appropriate to given research problems can be selected. Participants develop skills in evaluating research papers exemplifying the different methods.

MEED9128
Research in Education for the Health Professions 2
Staff Contact: Dr M Stiernborg
CP10 S2 HPW2
Prerequisite: MEED9127 or equivalent

 Raises awareness of current research interests in education for each of the health professions from which participants come and of the problems encountered in conducting an educational research project. Participants are expected to plan, conduct and report a pilot project in education.

MEED9129
Primary Health Care: Issues in Implementation
Staff Contact: Dr V Nossar
CP10 S2 HPW2
Prerequisite: MEED9122 or evidence of substantial prior experience in primary health care work

This subject guides participants through a detailed analysis of both the theory and the practice of implementing Primary Health Care programs. Problems and issues encountered in implementation are examined and practical solutions explored. The course is designed for health professionals who have had some prior exposure to the concepts and practice of Primary Health Care, and draws upon relevant case studies for the analysis.

MEED9130
Information Technology in Medical Education
Staff Contact: Dr M Stiernborg
CP10 S2 HPW2
Notes: Subject to approval of Academic Board.

This subject aims to provide an introduction to the use of information technology in higher education focusing on basic training of health care workers and continuing education so as to assist participants to make informed decisions about whether, when and how to use information technology for educational purposes. Particular emphasis will be placed on: computer-mediated learning, knowledge-based systems, multimedia and the Internet.

MEED9131
Formulating Academic Proposals and Projects
Staff Contact: Dr Catherine Berglund
CP10 S1, 21

This subject aims to explore concepts and develop skills related to formulating academic projects and proposals. Emphasis will be given to identifying research or development needs, developing conceptual and data critical analysis skills, undertaking literature analysis, planning project aims, identifying practical administrative and ethical limits, and writing skills.

MEED9132
Academic and Professional Inquiry
Staff Contact: Dr Magnus Stiernborg and Dr Catherine Berglund
CP15 S1, S2

The foundation knowledge which is essential in developing inquiry skills. Research and analysis underpin the work of any teacher, manager or evaluator. This subject introduces key concepts and exercises, so that students can learn from published research and can start to formulate their own inquiries.

MEED9133
Learning, Teaching and Assessment
Staff Contact: Ms Leah Bloomfield
CP15 S1

Current views about the conditions which support learning and the requirements these imply for teaching. Focuses on adult learning in various settings: in tertiary institutions, the workplace and the community.

MEED9134
Developing Learning Organisations
Staff Contact: Mr A Hodgkinson
CP15 S1

Effective organisations for learning provide an environment which is conducive to learning through supportive conditions, appropriate resources and effective coordination and leadership. They are also characterised by their ability to adapt their programs and realign their resources in response to changes and opportunities in their external milieu. This subject enables students to identify the attributes of an effective organisation for learning, and determine how their home organisation can provide an optimal setting for the provision of teaching and learning.

MEED9135
Planning, Implementing and Evaluating Educational Programs
Staff Contact: Ms L Bloomfield
CP15 S1

Introduces approaches to curriculum planning; curriculum trends in the health professions, the factors influencing curriculum change, the methods for bringing about change and evaluating the process and impact of change. Critically examines case studies from institutions for training health professions.
MEED9140
Project Design and Monitoring in International Health
Staff Contact: Prof A Rotem
CP10 S2 6HPW
Prerequisites: HEAL9061 (or equivalent), CMED9500 (or equivalent) and HEAL9751 (or equivalent)

The planning of international health projects is a multi-phased process that must be performed well if sustainable high quality improvements in health care are to be achieved. This subject is designed to equip professionals contributing to international health with the competencies necessary to develop a practical comprehensive project plan, in line with current international practice. Subject topics will cover all the major steps necessary to produce this plan. As they work through these steps, using a real developing world situation, candidates will carry out each of the analyses necessary at each stage and develop their own plan.

Objectives: This subject should equip the student with the skills to:

- perform an analysis of the stakeholders in a health development project and incorporate this analysis into project planning;
- integrate the elements of a multi-sectoral situational analysis of a real health problem to define the problem;
- produce project objectives to deal with this problem and feasible outputs and activities to achieve these objectives;
- design several alternate strategies to meet these outputs;
- apply risk matrix analysis to select the most cost-effective practical sustainable strategy from several alternatives to meet project outputs;
- design comprehensive activity, resource and cost schedules towards achieving the outputs of an objective oriented project plan (Logframe), in relation to their area of technical specialisation;
- design a practical monitoring system that will clearly demonstrate the quality of the outputs and activities completed in relationship to project activities;
- prepare, present and defend a Logframe plan and critique other similar plans in relationship to their area of health expertise.

MEED9143
Major Project
Staff Contact: MHPed – Ms L Bloomfield; MPH – Mr A Hodgkinson
CP60 S1, S2 or S3

Provides an opportunity for the candidate to apply coursework learning through focusing on an area of health personnel education relevant to the candidate’s professional interests and development and to the furthering of health personnel education.

*MEED9302
Learning in Small Groups
Staff Contact: Dr P Harris
C10 S1, S2 or S3

The subject covers the processes of learning in small groups, group formation and changing roles and relationships within groups, diagnosis and management of problems and conflict within the group, effectiveness in handling tasks and making effective decisions, team building, support, leadership of working groups, innovation by groups, assessment of group performance. Assignments include study of the development of the group, and the emergence of effective leadership.

*MEED9303
Clinical Practice as a Discipline
Staff Contact: Dr P Harris
CP10 S1, S2 or S3

This subject explores the nature of professional expertise within clinical practice as a skilled discipline within the streams of general and specialist practice and within nursing and the therapies. Subject matter includes the varieties of working knowledge (applied knowledge, strategic knowledge, intuitive knowledge, local, situational knowledge, predictive and decision making knowledge, people management knowledge and judgment), of skills in managing logical processes and skills in managing people and procedures. The subject also analyses the profession’s philosophy, the professional’s tasks, roles and responsibilities, and the perspectives and expectations within the health system and community. Assignments are expected to contribute to the understanding and development of the discipline in each health profession.

*MEED9304
Learning Clinical Reasoning
Staff Contact: Mr P Godwin
CP15 S1, S2 or S3

The medical stream covers teaching of the steps in the clinical process, inductive and deductive strategies, data collection and its flaws, the reliability of clinical evidence, intuition and clinical memory, investigation and sufficiency of evidence, strength of clinical and investigational evidence, interpretation and misinterpretation, logical processes in clinical inference and plausibility of diagnosis, and the utility of expert systems and computer-aided diagnosis. For the nursing stream the course diverges to cover the reasoning called upon within different clinical units. Assignments include the study of clinical reasoning in the candidate’s setting.

*MEED9306
Clinical Supervision
Staff Contact: Dr P Harris
CP10 S1, S2 or S3

This subject deals with the processes of teaching motor skills, the stages of moving from novice to expert, the development of judgment, varying aptitude, scaffolding of supervision of practice, and self assessment of habitual performance. The subject also deals with the observation and monitoring of daily activities, of supervised practice,
of the range of roles and relationships of mentors to their trainees, of effective methods of feedback, and of learning a range of skilled behaviours in instructing, supervising, guiding and counselling. Assignments include study of the development of a procedural skill and skilled performance within the candidate’s setting.

*MEED9307
Exploring Clinical Ethics
Staff Contact: Dr C Berglund
CP10 S1, S2 or S3
This subject guides the learner through the major ethical principles affecting clinical choices using a large array of contemporary clinical issues. The subject is based on posing questions and the search for answers.

Ethicists differ in the way they search for answers. Not all believe that there is one truth to find. Many believe that the ‘truth’ depends on the context, or situation, or on the relative importance of opposing values. This subject attempts to hear ‘many voices’ not only from ethicists and clinicians but from law, religion, administration and lay media. Ethicists themselves range across a spectrum from ‘You should ...’ (duty based deontologists) to ‘It depends ...’ (situationists). The subject aims to bring out that range. Assignments utilise consultations to explore ethical principles and their implications in the clinical setting.

*MEED9308
Learning Clinical Decision Making
Staff Contact: Mr P Godwin
CP10 S1, S2 or S3
The medical stream deals with quantitative and qualitative aspects of decision making, management options, ambiguity and sufficiency of evidence at the test-treatment threshold, identification of possible outcomes, calculation of probabilities and utilities for each outcome, structuring with decision analysis, elicitation of patients’ preferences, configuration of trade-offs and sensitivity analysis, influences operating in the context and in the personal psychology of doctor and patient, defensibility of decisions, and judgment in making choices under uncertainty. The nursing stream diverges at many points to cover the particular decisions required of the clinical nurse. Assignments include the analysis of a number of decision processes in the candidate’s setting.

*MEED9309
Assessing Clinical Performance
Staff Contact: Dr M Harris
CP10 S1, S2 or S3
This subject covers the purposes, location, criteria, methods, timing, frequency, scoring methods and formats, and training of examiners to achieve consistency. The subject includes development of assessments undertaken by self, peers, other health workers and patients. The subject also addresses issues of judgment of others, and of innovation in developing accurate estimates of practical ability. Assignments include the study of performance assessment, and development of approaches to formative assessment.

*MEED9311
Patient and Family Education
Staff Contact: Ms J Ritchie
CP10 S1, S2 or S3
This subject deals with understanding the health and illness beliefs of patients, their family and their culture, and the factors supporting continuation of particular health behaviours. The subject studies coping strategies and mobilisation of the patient’s and family’s adaptive resources in rehabilitation of social function, the methods and skills needed for persuasion to comply with a treatment regimen and to cease self-destructive behaviours. Assignments include evaluation of attempts to improve patient compliance and informed family support for the patient.

*MEED9312
Research into Clinical Education
Staff Contact: Dr C Berglund
CP15 S1, S2 or S3
This subject takes participants through many of the planning stages of research. The final project is to write a grant application for a research project in clinical education. This process involves the consideration of research questions, research paradigms, measures and interpretation. The social context of research is covered, as is the process of dissemination of research findings.

*MEED9313
Planning Education Programs
Staff Contact: Mr P Godwin
CP10 S1, S2 or S3
This subject deals with the planning, implementation and evaluation of postgraduate and continuing educational programs, including educational workshops, beginning with identification and clarification of needs, helping adult learners with self-diagnosis of defects, designing instruction and choosing methods of presentation, linking new scientific ideas with the clinical working knowledge and strategies of practitioners, evaluating the effectiveness of programs, and undertaking research into continuing education. Assignments include the planning of an education program appropriate to the candidate’s area.

*MEED9314
The Ward (or Office) as a Social and Learning Environment
Staff Contact: Dr C Berglund
CP10 S1, S2 or S3
This subject uses the clinical setting of the ward, or the office, or the clinic as the unit of study of the formal and informal communication and management processes, professional role definition and socialisation into sub-cultural belief patterns, sharing of decision making, expectations and stresses, coping strategies and stress management, analysis of social pathology, relation between task and maintenance functions and the resolution of conflict, staff job satisfaction and turnover, and effectiveness for learning. Assignments include a report on the candidate’s working environment.
*MEED9315
Clinical Teaching
Staff Contact: Dr P Harris
CP15 S1, S2 or S3
The subject includes the planning and conduct of clinical teaching programs, preparation of the learners including assessment of the learner's readiness, learning of manual skills on simulated patients, management of the learning environment, briefing before patient encounter, demonstration of skills, perceptual skills in data collection, debriefing and reflection on the clinical encounter, explication of the clinical experience, in terms of available theory, translation of professional knowledge into working knowledge, and forward planning of reading and further practice. The subject also deals with the micro-skills of listening, questioning, probing and challenging, demonstrating, and involving the patient and other staff. Assignments include the study of the candidate's clinical teaching and the study and practice of clinical micro-skills.

*MEED9316
Learning Consulting Skills
Staff Contact: Dr P Harris
CP15 S1, S2 or S3
The medical stream deals with the identification and learning of consulting skills in communicating with patients, families and colleagues, in clarifying illness problems, in acquiring accurate information, interpreting evidence and diagnosing disease, in handling ambiguity and uncertainty, in referral to others and in negotiating trade-offs among management options. Differences between generalist and specialist tasks and contexts will be explored. Consulting skills in the nursing stream parallel these, but with differing responsibilities in assessment and patient care. Assignments include study of communication and management skills in the candidate's setting.

*MEED9317
Clinicians as Managers
Staff Contact: Mr P Godwin
CP10 S1, S2 or S3
This subject focuses on the role of clinicians in the management of health and education programs. It aims to encourage review of organisational and management issues which influence the performance of clinical units. The material includes identification of the functions of management, the typical challenges faced by clinicians as managers, their contribution to leadership and team development, their role in planning, evaluation and their management of change. The assignments in this subject will require a step-by-step review of the way activities and programs are managed and strategies to improve the effectiveness and efficiency of the organisational unit under study. Participants will be required to reflect on their performance as managers in tasks such as setting goals, organising, delegating, supervising and supporting staff development.

*MEED9351
Independent Study
Staff Contact: Dr P Harris
CP5 S1, S2 or S3
Candidates may contract to undertake an Independent Study on a particular field of interest or clinical educational research. The number of credit points may range from five to twenty, according to the size of the independent study.

*MEED9352
Independent Study
Staff Contact: Dr P Harris
CP10 S1, S2 or S3

*MEED9353
Independent Study
Staff Contact: Dr P Harris
CP15 S1, S2 or S3

*MEED9354
Independent Study
Staff Contact: Dr P Harris
CP20 S1, S2 or S3

These subjects are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.

Elective Studies
Elective studies may be taken, after approval, in other schools of the University, or in other universities, if the studies contribute to the aims of the program.

Supervision
Before enrolment, the Head of School of Medical Education shall be satisfied that adequate supervision and facilities are available.

School of Paediatrics

PAED8101
Physical Growth and Development I
Staff Contact: Prof H Bode
CP20 S3 HPW2
Physical growth from birth to adolescence. Neuro-development. Assessment of growth and development, deviation from normal growth and development of their management.

PAED8102
Psychosocial Development
Staff Contact: Prof S Einfeid
CP10 S1 S2 HPW2
Theories of Freud, Erikson and Piaget, normal and abnormal family processes, behavioural and developmental
issues, childhood behaviour problems and management, adolescent behaviour problems and management.

**PAED8103**  
**Child Health Services**  
*Staff Contact: Dr E Murphy*  
**CP10 S1 S2 HPW2**  
The child care delivery system, parent education, screening programmes, immunisations, accidents and poisoning, dental care, care of physically and mentally disabled children.

**PAED8104**  
**The Effect of Social Adversity in Childhood**  
*Staff Contact: Dr V Nossar and Dr G Alperstein*  
**CP10 S1 S2 HPW2**  
Family structure and dynamics, poverty, single parent, drug addicted parents, housing and sanitation, homeless children, teenage parents, migrant families, Aboriginal health, working mothers and childcare.

**PAED8105**  
**The Child and the Law**  
*Staff Contact: Dr K Moran*  
**CP10 S1 S2 HPW2**  
Adoption, child custody, child physical and sexual abuse, children's rights, the United Nations charter for children, child welfare, laws designed for special needs of children, juvenile delinquency.

**PAED8106**  
**Infant Feeding and Nutrition**  
*Staff Contact: Dr P McVeagh*  
**CP20 S3 HPW2**  
Lactation, breast feeding, nutritional requirements, feeding of infants and children, nutritional disorders in children, childhood origin of adult diseases.

**PAED8108**  
**Major Project**  
**CP30 S3**  
The research project may be undertaken in any area pertaining to child health.

**PAED8109**  
**Physical Growth and Development II**  
*Staff Contact: Dr C Cunningham and Prof H Bode*  
**CP20 S3 HPW2**  
An extension of topics covered in PAED8101 Physical Growth and Development I

**PAED9100**  
**General Paediatrics and Child Health**  
*Staff Contact: Dr S Russell*  
**CP48**  

Emphasis is placed on the understanding of principles, especially physiological principles.

Prenatal development and prenatal and perinatal experiences, which affect the growing foetus and infant. Necessary professional supervision is obtained by clinical attachment to appropriate hospitals. Candidates are given increasing professional responsibility. There are lectures, seminars, discussion groups and demonstrations on manikins.

Family dynamics and family interactions in the causation of developmental, behavioural and emotional problems in children. Students without adequate clinical experience have a clinical attachment in paediatric psychiatry during the first two years of training. There are lectures, seminars, case conferences and assignments.

**PAED9104**  
**Clinical and Technical Skills**  
*Staff Contact: Dr S Russell*  
**CP12**
Taking of medical histories, physical examination and technical procedures. Supervised professional attachments provide opportunities for learning these skills. Candidates obtain experience in diagnostic thinking and planning management. Some of the teaching is on an individual basis and some in groups.

**PAED9105**  
**Clinical Paediatric Experience 1**  
*Staff Contact: Dr S Russell*  
Candidates are required to gain twelve months clinical experience in an approved children's hospital rotating through various specialties including neo-natal. (Exemptions may be granted if supported by appropriate references.)

---

**School of Physiology and Pharmacology**

**PHPH5413/PHPH5513**  
**Sports Injuries I**  
*Staff Contact: Dr D Garlick*  
**CP15**

**Note/s:** A compulsory subject.

Principles and procedures are described for the initial evaluation and management of injuries on the sporting field.

General principles of anatomy are applied to tissues in general and bone and muscle in particular. Pathophysiological processes are described in relation to connective tissue, ligaments and tendons, muscle.

The anatomy of the upper limb is described systematically. The history, diagnosis and management are discussed in relation to injuries to the shoulder, arm, elbow, forearm, wrist and hand.
strength testing in diagnoses, management and rehabilitation from acute and chronic sporting injuries. The use of isometric and isotonic exercise is discussed in relation to injuries to the head (including ears, eyes, nose and face), neck, spine, chest and abdomen.

Systematic anatomy is described for the pelvis and lower limb. The history, diagnosis and management are discussed in relation to injuries to the pelvis, thigh, knee, leg, ankle and foot.

Medical Applications of Exercise I

The anatomy of the cardiovascular system is described. Cardiovascular responses are discussed in relation to strength exercise, anaerobic exercise and aerobic exercise in the sedentary and fit male adult and female adult, in the young and old person, in the pregnant woman. The use of aerobic exercise is considered applied to the prevention and management of cardiovascular disease and to associated risk factors. Stress testing and other cardiovascular investigations and indications for, and responses to, these tests are considered. The results of these investigations will be used for developing clinical skills as will case studies.

Medical Applications of Exercise II

The anatomy of the respiratory system is described. Respiratory physiology deals with ventilation and flow-volume nerves in different age groups and in healthy and non-healthy subjects. The pathophysiology of exercise-induced asthma is described and its prevention and management. The role of exercise is dealt with in relation to acute and chronic asthma in athletes and in relation to the management of chronic obstructive lung disease.

The use of isometric and isotonic exercise is discussed in relation to musculoskeletal medicine such as the use of strength testing in diagnoses, management and rehabilitation from acute and chronic sporting injuries. Information is discussed on the use of rhythmic exercise in the management of chronic musculoskeletal problems.

Medical Applications of Exercise II

The anatomy of the respiratory system is described. Respiratory physiology deals with ventilation and flow-volume nerves in different age groups and in healthy and non-healthy subjects. The pathophysiology of exercise-induced asthma is described and its prevention and management. The role of exercise is dealt with in relation to acute and chronic asthma in athletes and in relation to the management of chronic obstructive lung disease.

The use of isometric and isotonic exercise is discussed in relation to musculoskeletal medicine such as the use of strength testing in diagnoses, management and rehabilitation from acute and chronic sporting injuries. Information is discussed on the use of rhythmic exercise in the management of chronic musculoskeletal problems.

Medical Applications of Exercise II

The anatomy of the respiratory system is described. Respiratory physiology deals with ventilation and flow-volume nerves in different age groups and in healthy and non-healthy subjects. The pathophysiology of exercise-induced asthma is described and its prevention and management. The role of exercise is dealt with in relation to acute and chronic asthma in athletes and in relation to the management of chronic obstructive lung disease.

The use of isometric and isotonic exercise is discussed in relation to musculoskeletal medicine such as the use of strength testing in diagnoses, management and rehabilitation from acute and chronic sporting injuries. Information is discussed on the use of rhythmic exercise in the management of chronic musculoskeletal problems.
The subject examines food composition labels and dietary intakes of various sections of the community both sedentary and active. Nutrients are dealt with such as protein, carbohydrate, fats, dietary fibre, fluid intake, minerals and vitamins. The recommended dietary intakes are compared with actual intakes of various groups. Nutrition for special groups of physically active people is considered such as children, adolescents, pregnant and lactating women, the elderly, different ethnic groups. Energy balance is considered in relation to weight control.

Nutrition in performance-related activities is discussed in relation to requirements for metabolic fuels, dietary components, mineral and trace elements, fluid, aminoacid and vitamin supplements, training diet. Nutrition in health-related activities is discussed in reference to primary, secondary and tertiary prevention of problems in obesity, coronary heart disease, diabetes, eating disorders.

Basic pharmacology will be outlined and factors affecting pharmacokinetics in relation to routes of administration, plasma levels, volumes of distribution, calabolism and elimination. The effect of exercise on drugs invivo are discussed such as the altered absorption rates with reduced mucosal blood flow and enhanced exercising muscle and skin blood flows; also, the effects of thermal regulation. The interactions of medically prescribed drugs on the physiologically active person will be discussed systematically regarding cardiovascular drugs, anti-diabetic drugs, respiratory drugs, anti-inflammatory drugs (NSAIDs, corticosteroids), gastrointestinal drugs, psychotropics, antibiotics.

Banned drugs or agents used to enhance performance are dealt with such as stimulants, narcotics, anabolic steroids, beta blockers, diuretics, hormones (human growth hormone, erythropoielin); blood doping, alkali agents. Those will be discussed in relation to competitive activities and in relation to screening procedure. Identification procedures. Drug education and prevention of drug abuse are discussed.

The psychological effects of exercise are described in relation to stress management, management of depression, sleep disorders, concepts of self-esteem and self-efficacy, effect on mental acuity and day-time fatigue, the contribution to the control of addictive behaviour. The use of psychological procedures will be discussed in regard to motivation and compliance for subjects undertaking health-related activities as well as for athletes involved in performance-related activities.

The psychological aspects of injury will be dealt with in considering the psychological problems encountered by the injured recreationally active person and also by the athlete. Behavioural problems are discussed such as exercise-addiction and body weight problems.

In regard to stress, there will be discussion of the mental state and the functioning of the immune system and the inter-relations between stress exercise and the components of the immune system. This will be discussed in relation to the incidence of infection in the competitive athlete.

Clinical biomechanics applies basic aspects of biomechanics to joint movements encountered in a wide variety of sporting activities to elucidate the problems that can arise from inappropriate repetitive movements resulting in micro- and macro-trauma.

**PHPH5445**
Major Project and Report
CP15
Staff Contact: Dr D Garlick
Note/s: A compulsory subject for MSpMed.

The Project will be planned and approved in undertaking the subject Research Methods. The Project, conducted over six months part-time, will involve research into an area of sports medicine at a clinical or basic level which contributes new knowledge to the field. The Project is to be presented as a scientific Report of about 8-10 000 words.

**PHPH5461**
Principles of Pharmacology
Staff Contact: Dr M Fryer
CP32 S1

This subject introduces the principles of pharmacology and also covers the systematic pharmacology of selected drug groups. It is designed for students with a background in biotechnology but with little or no knowledge of pharmacology. The subject covers topics such as dose response relationships, drug absorption, metabolism and elimination, autonomic pharmacology, autacoids, pharmacokinetics and toxicology.

**PHPH5471**
Advanced Pharmacology
Staff Contact: Dr M Fryer
CP24 S2
Prerequisites: PHPH3152, PHPH5461

This subject is an advanced coverage of pharmacological topics including receptor binding, pharmacokinetics, drug assays, drug development, toxicology, autacoids and ion
channels. The lecture material is supplemented by computerised analysis of data derived from experiments on receptor binding, dose response relationships and pharmacokinetics. Considerable emphasis is placed on the many aspects of drug development.

PHPH5481
Advanced Pharmacology – Project Major
Staff Contact: Dr M Fryer
CP64
A laboratory or industry based project in the area of drug development.

PHPH5491
Advanced Pharmacology – Project Minor
Staff Contact: Dr M Fryer
CP32
A small laboratory or industry based project or an extensive literature review or extensive data analysis in the area of drug development.

School of Psychiatry

PSCY9106
Psychological Medicine 1
Staff Contact: Prof G Andrews
CP25 S1
The diagnosis, classification and epidemiology of mental disorders; the doctor as therapist; the tenets of good diagnostic interviewing and good clinical care; the evaluation of treatment; the use of micro counselling and structured problem solving techniques. Case discussions to illustrate these therapy techniques.

PSCY9107
Psychological Medicine 2
Staff Contact: Prof G Andrews
CP25 S2
The recognition and treatment of manic and depressive disorders and of the anxiety disorders. The use of pharmacological and cognitive behavioural techniques in these disorders. Crisis resolution in such disorders. Case discussions, including the presentation of material from patients currently in treatment, to illustrate these techniques.

PSCY9208
Psychological Medicine 3
Staff Contact: Prof G Andrews
CP25 S1
The recognition and management of cognitive impairment, dementia, and other organic syndromes. The recognition of schizophrenia and personality disorders. Crisis resolution and good clinical care for such patients. Case discussions, including the presentation of material from patients currently in treatment, to illustrate such care.

PSCY9209
Psychological Medicine 4
Staff Contact: Prof G Andrews
CP25 S2
Recognition and management of problems arising within marriage and the family. Recognition and management of disorders of children, adolescents, and the elderly presenting in general practice. Case discussions, including the presentation of material from patients currently in treatment, to illustrate the techniques.

PSCY9210
Project Report
Staff Contact: Prof G Andrews
CP25 F
Either an account of patients treated, integrating literature, therapy and evaluation of outcome, or a research project related to psychiatry in general practice.
First Degrees

Rules, regulations and conditions for the award of first degrees are set out in the appropriate Faculty Handbooks.

For the list of undergraduate courses and degrees offered see Table of Courses by Faculty (Undergraduate Study) in the Calendar.

The following is the list of higher degrees, graduate diplomas and graduate certificates of the University, together with the publication in which the conditions for the award appear.

Higher Degrees

For the list of graduate degrees by research and course work, arranged in faculty order, see UNSW Courses (by faculty) in the Calendar.

*Faculty of Science and Technology
†Faculty of Life Sciences
**Yet to be approved by the University Council

Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty or board (hereinafter referred to as the Committee) to a candidate who has made an original and significant contribution to knowledge.

Qualifications

2.(1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment as a candidate for the degree.
Enrolment

3. (1) An application to enrol as a candidate for the degree shall be lodged with the Registrar at least one month prior to the date at which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School* and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled either as a full-time or a part-time student.

(4) A full-time candidate will present the thesis for examination no earlier than three years and no later than five years from the date of enrolment and a part-time candidate will present the thesis for examination no earlier than four years and no later than six years from the date of enrolment, except with the approval of the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor and where possible a cosupervisor who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) it must be an original and significant contribution to knowledge of the subject;

(b) the greater proportion of the work described must have been completed subsequent to enrolment for the degree;

*School* if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.
(c) it must be written in English except that a candidate in the Faculty of Arts and Social Sciences may be required by the Committee to write a thesis in an appropriate foreign language;

(d) it must reach a satisfactory standard of expression and presentation;

(e) it must consist of an account of the candidate's own research but in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6.(1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that one of the following:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of school.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the higher degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further work recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further work, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate be permitted to resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.
Doctor of Medicine (MD) by published work

1. The degree of Doctor of Medicine by published work may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualification

2. A candidate for the degree shall:
   (1) hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales of at least five years standing; or
   (2) hold the degrees of Bachelor of Medicine and Bachelor of Surgery or a qualification considered equivalent from a university other than the University of New South Wales with at least five years' standing and have been associated with the University of New South Wales or one of its teaching hospitals for a period of at least four years.

Enrolment and Progression

3. A candidate for the degree on the basis of published work shall lodge with the Registrar an application together with:
   (1) four copies (if possible) of the published work;
   (2) any additional work, published or unpublished, that a candidate may wish to submit in support of the application;
   (3) a declaration indicating those sections of the work, if any, that have been submitted previously for a university degree or other similar award.

4. Every candidate in submitting published work and such unpublished work as is deemed appropriate shall submit a short discourse describing the research activities embodied in the submission. The discourse shall make clear the extent of the originality of the work and the candidate's part in any collaborative effort.

Examination

5. There shall normally be three examiners of the work, appointed by the Committee, at least two of whom shall be external to the University.

6. Before the work referred to in 3. (1), (2) above is submitted to the examiners the head of the appropriate school* shall certify that it is prima facie worthy of examination.

7. At the conclusion of the examination each examiner shall submit a concise report to the Committee on the merits of the published work and a recommendation as to whether the degree should be awarded. The examiners may require the candidate to answer orally or in writing any questions concerning the work.

Fees

8. A candidate shall be required to pay such fees as may be determined from time to time by the Council.

*In these rules, the term 'published work' shall mean printed as a book or in a periodical or as a pamphlet readily available to the public. The purpose of requiring publication is to ensure that the work submitted has been available for criticism. The examiners may disregard any of the work submitted if, in their opinion, it has not been available for criticism.

**School' if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.
Doctor of Medicine (MD) by thesis

1. The degree of Doctor of Medicine by thesis may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualifications

2. (1) A candidate for the degree shall:

(a) hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales at a level acceptable to the Committee; or

(b) hold the degrees of Bachelor of Medicine and Bachelor of Surgery or a qualification considered equivalent from a university other than the University of New South Wales at a level acceptable to the Committee; or

(c) in exceptional cases, submit such evidence of academic and professional attainments in support of the candidature as may be approved by the Committee.

(2) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such examination or carry out such work as the Committee may prescribe, before permitting enrolment.

(3) A candidate enrolled under 2. (1)(a) or (b) above shall not submit a thesis for the degree until the lapse of five years from the date of the award of the degrees mentioned therein.

(4) A candidate enrolled under 2. (1)(c) above shall not submit a thesis for the degree until such period of time has elapsed since enrolment as the Committee shall decide at the time of approving enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree by thesis shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the Committee shall be satisfied that adequate supervision and facilities are available.

(3) An approved applicant shall be enrolled in one of the following categories:

(a) full-time candidature: a candidate who is fully engaged in advanced study and research at the University or at one of its teaching hospitals;

(b) part-time candidature: a candidate whose occupation leaves the candidate substantially free to pursue a program of advanced study and research at the University or at one of its teaching hospitals;

(c) external candidature: a candidate who is engaged in advanced study and research away from the University or one of its teaching hospitals.

(4) A candidate shall be required to undertake an original investigation on a topic approved by the Committee. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed by the Committee from the full-time academic members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be awarded the degree until the lapse of six academic sessions in the case of a full-time candidate or eight academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery with honours or who has had
previous research experience the Committee may approve remission of up to two sessions for a full-time candidate and four sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. A part-time or external candidate shall present for examination not later than twelve academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) If a candidate for the degree is not a graduate of the University of New South Wales the greater proportion of the work described must have been carried out in the University or in one of its teaching hospitals, save that in special cases the Committee may permit a candidate to conduct the work at other places where special facilities not possessed by the University may be available or where the subject of the research is uniquely located but only if the candidate spends such period of time within the University, and under such supervision, as may be determined by the Committee.

3(3) A candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(4) The thesis shall comply with the following requirements.

(a) it must be an original and meritorious contribution to knowledge of the subject;

(b) it must be written in English and reach a satisfactory standard of expression and presentation;

(c) it must consist of the candidate's own account of the research; in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(5) A candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work otherwise previously published, whether or not it is related to the thesis.

(6) The thesis shall contain a certificate signed by the candidate indicating specifically the extent to which the work embodied in the thesis is directly attributable to the candidate's own research and the extent to which the thesis has benefitted from collaboration with persons other than the supervisor.

(7) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(8) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis, in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that;

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of school*; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or
(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee it may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Doctor of Medicine (MD) by thesis without supervision

1. The degree of Doctor of Medicine by thesis without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualifications

2. A candidate for the degree shall hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales with at least five years standing at a level acceptable to the Committee.

Enrolment and Progression

3. An application to enrol as a candidate for the degree by thesis without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interest, at an early stage seek the advice of the appropriate school with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) A candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) it must be an original and meritorious contribution to knowledge of the subject;

(b) it must be written in English and reach a satisfactory standard of expression and presentation;

(c) it must consist of the candidate's own account of the research; in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied with the candidate's part in the joint research.

(4) A candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work otherwise previously published, whether or not related to the thesis.

(5) The thesis shall contain a certificate signed by the candidate indicating specifically the extent to which the work embodied in the thesis is directly attributable to the candidate's own research and the extent to which the thesis has benefited from the collaboration with other persons.
(6) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses. The candidate may also submit any work previously published whether or not such work is related to the thesis.

(7) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis, in whole or in part, in photostat or microfilm or other copying medium.

Examination

5.(1) There shall normally be three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) Before the thesis is submitted to the examiners the head of the school* in which the candidate is enrolled shall certify that it is prima facie worthy of examination.

(3) After examining the thesis each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee it may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree.

Fees

6. A candidate shall be required to pay such fees as may be determined from time to time by the Council.

* ‘School’ if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Master of Clinical Education (MClinEd)

1. The degree of Master of Clinical Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher
Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
(b) be actively engaged in clinical education.
(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment and eight sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination
4. (1) Assessments will be based on assignments undertaken during and at the end of each subject. All assignments must be passed.
(2) The degree of Master of Clinical Education will be awarded after satisfactory completion of a program of advanced study which achieves 24 credit points and submission of a satisfactory Major Project report based on at least one semester of applied development or research in clinical education.

Fees
5. A candidate shall pay fees as may be determined from time to time by the Council of the University.

Master of Community Health (MCH) by Research
1. The degree of Master of Community Health by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications
2. (1) A candidate for the degree shall:
(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, or
(b) have been awarded an appropriate degree of Bachelor of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification
considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Community Medicine and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student, i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than four academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.
(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of Community Health (MCH) by Formal Course Work

1. The degree of Master of Community Health by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), or

(b) have been awarded an appropriate degree of Bachelor of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

Master of Community Paediatrics (MCommPaed)

1. The degree of Master of Community Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) and
(b) be professionally engaged in looking after the health of children.
(2) An applicant who submits evidence of such academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least four calendar months before the commencement of the course.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of the candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of four academic sessions from the date of enrolment in the case of a full-time candidate or eight sessions in the case of a part-time candidate. The maximum period of candidature shall be six academic sessions from the date of enrolment for a full-time candidate and ten sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination
4. (1) Assessment is based on satisfactory completion of written examination questions during and at the end of each subject and the satisfactory completion of assignments.
(2) The degree of Master of Community Paediatrics will be awarded after satisfactory completion of a program of 170 credit points including a major project.

Fees
5. A candidate shall pay such fees as may be determined from time to time by the Council of the University.

**Master of Drug Development (MDD)**

1. The degree of Master of Drug Development may be awarded by the Council to a candidate who has satisfactorily completed the prescribed programme of advanced study for the award.

Qualifications

Definitions
The Committee is the Higher Degree Committee of the Faculty of Medicine.
A Relevant Degree is a degree in the biological sciences or cognate professional disciplines. Graduates in non-relevant disciplines may be admitted if they have had significant direct or indirect involvement with the pharmaceutical industry and the development of pharmaceutical products. In some cases, applicants may be required to undertake a course of reading in relevant subject areas before commencing the course.

Candidature
2. (1) A candidate for the Degree of Master of Drug Development:
(a) Shall have been awarded a relevant degree of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(b) Students not qualified to enrol in the Master's programme but who are qualified to enrol in the Diploma, may, at the successful completion of the Diploma programme and at the discretion of the Committee, convert their candidature to that of Master.

(c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment And Progression

3. (1) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least three calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the award shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) The minimum and maximum periods of part-time candidature shall be 6 and 10 academic sessions.

(5) Articulation: a candidate holding the award of Graduate Diploma in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of an additional 720 PAH of study (90 Credit Points). Re-entry will not be permitted until at least two sessions have elapsed since completion of the prior course. The minimum time in which a student could complete the requirements for both the Graduate Diploma and the Master's award would be nine sessions as compared with six sessions for those who proceeded directly to the Master's degree.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

**Yet to be approved by Council**

Master of Health Administration (MHA) by Research

1. The degree of Master of Health Administration by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee; or
(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the Head of the School of Health Administration (hereinafter referred to as the head of the school) shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time attendance at the University;

(b) part-time attendance at the University;

(c) external – not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation or design.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.
(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners’ reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Administration (MHA) by Formal Course Work

1. The degree of Master of Health Administration by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

(4) There is normally an experience requirement of three years experience in the health field. Those students who are inexperienced (ie less than three years) in the health service field are required to undertake a planned program of field experience in addition to the twelve subjects.

**Enrolment and Progression**

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar by 30 November of the year before the year in which enrolment is to begin. Late applications may be considered by the School’s Selection Committee.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time or external candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time or external candidate. In special cases an extension of these times may be granted by the Committee.

**Fees**

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

**Master of Health Professions Education (MHPEd) by Research**

1. The degree of Master of Health Personnel Education by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

**Qualifications**

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(b) have had the equivalent of at least two years full-time teaching and/or administrative experience of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Medical Education and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student ie at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Professions Education (MHPed) by Formal Course Work

1. The degree of Master of Health Personnel Education by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another
university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), or

(b) have been awarded an appropriate degree of Bachelor of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or five sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Planning (MHP)

1. The degree of Master of Health Planning by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a)(i) have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee; or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) either have undertaken appropriate postgraduate or professional studies at a level acceptable to the Committee or have had at least three years experience in the health services of a kind acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar by 30 November of the year before the year in which enrolment is to begin. Late applications may be considered by the School’s Selection Committee.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time or external candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time or external candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Medicine (MMed) by Research with Supervision

1. The degree of Master of Medicine by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine.

(2) A candidate shall have had at least 3 years full-time experience in the practice of medicine and be currently so engaged.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the Head of the School of Community Medicine shall be satisfied that adequate supervision and facilities are available.
(3) An approved candidate shall be enrolled in one of the following categories:
(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the Head of the School of Community Medicine or his/her delegate and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give, in writing, two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:
(a) the candidate be awarded the degree without further examination; or
(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the Head of the School; or
(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re-present the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the Head of the School; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re-present the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Master of Medicine (MMed) by Research Without Supervision

1. The degree of Master of Medicine by research without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales with at least three years relevant standing or other equivalent qualifications.
Enrolment and Progression

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interests, seek at an early stage the advice of the Head of School or his/her delegate with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.
(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
(6) It shall be understood that the University retain the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointment by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) Before the thesis is submitted to the examiners the Head of the School of Community Medicine shall certify that it is prima facie worthy of examination.
(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

Master of Medicine (MMed) by Formal Course Work*

1. The degree of Master of Medicine by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
(2) A candidate shall have had at least one year's full-time experience in the practice of medicine.

In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe before permitting enrolment.

Enrolment and Progression

3.(1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be six full-time candidate and twelve academic sessions for a part-time candidate. In special cases a variation to these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

*For details regarding the Master of Medicine by Research, please contact the Faculty Administration Office.

Master of Psychological Medicine (MPM)

1. The degree of Master of Psychological Medicine by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2.(1) A candidate for the degree shall have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
(2) A candidate shall have had at least three years full time experience in the practice of medicine and be currently so engaged.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe before permitting enrolment.

Enrolment and Progression

3.(1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of four academic sessions. The maximum period of candidature shall be eight academic sessions. In special cases a variation to these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

**Master of Public Health (MPH) by Research**

1. The degree of Master of Public Health by Research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualifications considered equivalent from another university or tertiary institution at a level acceptable to the Committee and

(ii) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such examination or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Medical Education and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.
(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student, i.e., at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with honours or who has had previous research experience the Committees may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation or design.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.
Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.
(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.
(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.
(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.
(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Public Health (MPH) by Formal Course Work

1. The degree of Master of Public Health by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded the degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee), or
(b) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar on or before a date to be fixed by the Committee, that date being at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or six sessions in the case of a part-time candidate. The maximum period of candidature shall be six academic sessions from the date of enrolment for a full-time candidate and ten sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

Master of Science (MSc)

1. The degree of Master of Science by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.

(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the head of the school in which the candidate intends to enrol shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time attendance at the University;

(b) part-time attendance at the University;

(c) external not in regular attendance at the University and using research facilities external to the University.
(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school* in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

**Thesis**

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

**Examination**

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the
same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

* 'School' if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Master of Science (MSc) without supervision

1. The degree of Master of Science without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who of has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales with at least three years relevant standing in the case of Honours graduates and four years relevant standing in the case of Pass graduates, and at a level acceptable to the Committee.

Enrolment and Progression

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should in his or her own interest, seek at an early stage the advice of the appropriate head of school with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.
Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) Before the thesis is submitted to the examiners the head of the school* in which the candidate is enrolled shall certify that it is prima facie worthy of examination.

(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or

* 'School' if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Sports Medicine (MSpMed)

1. The degree of Master of Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered its equivalent from another university as considered acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(b) normally be registered as a medical practitioner in the country (or state thereof) of residence, but in exceptional cases, enrolment may be granted to applicants who are provisionally registered.
(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree as a part-time candidate until the lapse of five academic sessions from the date of enrolment. The maximum period of part-time candidature shall be nine academic sessions. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each subject and the satisfactory completion of the Practicum based on oral and practical demonstration of clinical skills.

(2) The degree of Master of Sports Medicine will be awarded after satisfactory completion of a program of advanced study which has achieved 24 credit points with satisfactory completion of clinical examination and the achievement of six credit points from the satisfactory completion of a Major Project report based on at least one semester of research or clinical studies in relation to sports medicine.

Fees

5. A candidate shall pay fees as may be determined from time to time by the Council of the University.

Master of Surgery (MS)

1. The degree of Master of Surgery by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original contribution to knowledge in some field related to surgery.

Qualifications

2. (1) A candidate for the degree shall have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
(4) A candidate enrolled under (1) above shall not submit a thesis for the degree until the lapse of five years from the date of the award of the degrees mentioned therein.

(5) A candidate enrolled under (2) above shall not submit a thesis for the degree until such period of time has elapsed since enrolment as the Committee shall decide at the time of approving enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School* and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time candidature: a candidate who is fully engaged in advanced study and research at the University or at one of its teaching hospitals;

(b) part-time candidature: a candidate whose occupation leaves the candidate substantially free to pursue a program of advanced study and research at the University or at one of its teaching hospitals;

(c) external candidature: a candidate who is engaged in advanced study and research away from the University or one of its teaching hospitals.

(4) A candidate shall undertake, or have undertaken prior to enrolment for the degree, a broad postgraduate training in the principles and practice of surgery over a period of at least three full-time years of a kind acceptable to the Committee.

(5) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(6) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a co-supervisor at that institution.

(7) Either the original work embodied in the thesis or the broad postgraduate training in the principles and practice of surgery shall have been undertaken at the University or at one of its teaching hospitals.

(8) No candidate shall be awarded the degree until the lapse of four academic sessions from the date of enrolment in the case of a full-time candidate or six academic sessions in the case of a part-time or external candidate. In the case of a candidate who has had previous research experience the Committee may approve remission of up to two sessions for a full-time candidate and three sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

* 'School' if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.
(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.
Graduate Diploma in Clinical Education (GradDipClinEd)

1. The Graduate Diploma in Clinical Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:
   (a) have been awarded the degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) be actively engaged in clinical education.
   (2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed. The Graduate Diploma in Clinical Education will be awarded after satisfactory completion of a program of advanced study which achieves 20 credit points and submission of a satisfactory Major Project report based on at least one semester of applied development of research in clinical education.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination

Assessments will be based on assignments undertaken during and at the end of each subject. All assignments must be passed.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Graduate Diploma in Community Paediatrics (GradDipCommPaed)

1. The graduate diploma in Community Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the Graduate Diploma shall:
   (a) have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree of the Faculty of Medicine (hereafter referred to as the Committee) and
   (b) be professionally engaged in looking after the health of children.

(2) An applicant who submits evidence of such academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree or graduate diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the graduate diploma shall be made on the prescribed form which shall be lodged with the Registrar at least four calendar months before the commencement of the course.

(2) A candidate for the graduate diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of the candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the graduate diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on satisfactory completion of written examination questions during and at the end of each subject and the satisfactory completion of assignments.

(2) The Graduate Diploma in Community Paediatrics will be awarded after satisfactory completion of a program of 110 credit units.

Fees

5. A candidate shall pay such fees as may be determined from time to time by the Council of the University.
Graduate Diploma in Drug Development (GradDipDD)

1. The Graduate Diploma in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. A candidate for the Graduate Diploma:
   (a) Shall have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
   (b) In exceptional cases, an applicant who submits evidence of such other academic and/or professional qualifications as may be approved by the Committee and who has had at least two years experience working in the pharmaceutical manufacturing industry in areas relating to scientific and technical aspects of that industry may be permitted to enrol for the Graduate Certificate, and, if the level of proficiency shown in these studies is deemed satisfactory by the Committee, that the candidate may convert his or her candidature to that of the Diploma.
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (a) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (b) A candidate for the award shall be required to undertake such formal subjects and pass such assessment as prescribed.
   (c) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.
   (d) The minimum and maximum periods of part-time candidature shall be:
      (i) for the Diploma: 4 and 8 academic sessions, respectively
   (e) Students not qualified to enrol in the Master’s program but who are qualified to enrol for the Diploma, may at the successful completion of the Diploma program and at the discretion of the Committee, convert their candidature to that of Master.
   (f) Articulation: a candidate holding the award of Graduate Diploma in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of 16 additional units of course material.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Graduate Diploma in Geriatric Medicine (GradDipGeriMed)*

1. The Graduate Diploma in Geriatric Medicine may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. A candidate for the Diploma shall:

   (1) Have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

   (2) Have had at least one year of full-time clinical experience in the practice of medicine at the time of enrolment.

In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Diploma.

   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which enrolment is to begin.

   (2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.

   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

   (4) The normal duration of the course is two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. In special circumstances a variation of these times may be approved by the Head of School.

Fees

4. A candidate shall pay fees as may be determined from time to time by the Council.

   *Yet to be approved by the University Council

Graduate Diploma in Health Professions Education (GradDipHPEd)

1. The Graduate Diploma in Health Professions Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:

   have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), or
have been awarded an appropriate degree of Bachelor of at least four full-time years' duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Paediatrics (GradDipPaed)

1. The Graduate Diploma in Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(b) have had at least one year's hospital experience subsequent to graduation of a kind acceptable to the Committee.

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the course (which is in January each year).

(2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment. In special cases an extension of time may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Public Health (GradDipPH)

1. A Graduate Diploma in Public Health may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Graduate Diploma shall:

(2) have been awarded an appropriate degree of Bachelor in a health related discipline from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) AND at least three years experience in a health or health-related field, or

(3) In exceptional cases, an applicant who submits evidence of such other academic and professional attainment as may be approved by the Committee may be permitted to enrol for the Graduate Diploma;

(4) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitted enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which the enrolment is to begin.

(2) A candidate for the diploma shall be required to undertake the subjects, and pass any assessment, required.

(3) The progress of a candidate shall be reviewed by the end of each session by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment. The maximum candidature shall be seven sessions from the date of enrolment.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Graduate Diploma of Sports Medicine (GradDipSpMed)

1. The Graduate Diploma in Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:
   (a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered its equivalent from another university as considered acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) normally be registered as a medical practitioner in the country (or state thereof) of residence, but in exceptional cases, enrolment may be granted to applicants who are provisionally registered.
   (2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the diploma as a part-time candidate until the lapse of four academic sessions from the date of enrolment. The maximum period of part-time candidature shall be eight academic sessions. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each subject and the satisfactory completion of the Practicum based on oral and practical demonstration of clinical skills.
   (2) The Graduate Diploma of Sports Medicine will be awarded after satisfactory completion of a program of advanced study which has achieved 24 credit points with satisfactory completion of clinical examination.

Fees

5. A candidate shall pay fees as may be determined from time to time by the Council of the University.
Graduate Certificate in Drug Development (GradCertDD)*

1. The Graduate Certificate in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. A candidate for the Graduate Certificate:

(a) Shall have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(b) In exceptional cases, an applicant who submits evidence of such other academic and/or professional qualifications as may be approved by the Committee and who has had at least two years experience working in the pharmaceutical manufacturing industry in areas relating to scientific and technical aspects of that industry may be permitted to enrol for the Graduate Certificate, and, if the level of proficiency shown in these studies is deemed satisfactory by the Committee, that the candidate may convert his or her candidature to that of the Diploma.

(c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (a) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(b) A candidate for the award shall be required to undertake such formal subjects and pass such assessment as prescribed.

(c) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(d) The minimum and maximum periods of part-time candidature shall be:

(i) for the Graduate Certificate: 2 and 4 academic sessions.

(e) Articulation: a candidate holding the award of Graduate Certificate in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Graduate Diploma in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of additional units of course material.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

*Yet to be approved by the University Council
Graduate Certificate in Geriatric Medicine (GradCertGeriMed)*

1. The Graduate Certificate in Geriatric Medicine may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Certificate shall:
   (a) Have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) Have had at least one year of full-time clinical experience in the practice of medicine at the time of enrolment.

   In exceptional circumstances an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Certificate.

   (c) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the Certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which enrolment is to begin.

   (2) A candidate for the Certificate shall be required to undertake such formal subjects and pass such assessment as prescribed.

   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

   (4) The normal duration of the course is one academic session from the date of enrolment in the case of a full-time candidate or two sessions in the case of a part-time candidate. In special circumstances a variation in these times may be approved by the Head of School.

Fees

4. A candidate shall pay fees as may be determined from time to time by the Council.

*Yet to be approved by the University Council
Graduate Certificate in Health Services Management (GradCertHSM)

1. A certificate may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the certificate shall:
   (a) have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
   (b) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.
   (2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the certificate.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the certificate shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the certificate shall be required to undertake such formal subjects and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the certificate until the lapse of one academic session from the date of enrolment. The maximum period of candidature shall be four academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate in Health Professions Education (GradCertHPed)*

1. The Graduate Certificate in Health Professions Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the Certificate shall:
   have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), or
have been awarded an appropriate degree of Bachelor or at least four full-time years' duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Certificate.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the Certificate shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the Certificate shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the Certificate until the lapse of one academic session from the date of enrolment in the case of a full-time candidate or two academic sessions in the case of a part-time candidate. The maximum period of candidature shall be two academic sessions from the date of enrolment for a full-time candidate and four academic sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

*Yet to be approved by the University Council*

---

Graduate Certificate in Public Health (GradDipPH)*

1. A Graduate Certificate in Public Health may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Graduate Certificate shall:

(a) have been awarded an appropriate degree of Bachelor in a health related discipline from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) AND at least three years experience in a health or health-related field, or

(b) In exceptional cases, an applicant who submits evidence of such other academic and professional attainment as may be approved by the Committee may be permitted to enrol for the Graduate Certificate;

(c) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitted enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which the enrolment is to begin.

(2) A candidate for the certificate shall be required to undertake the subjects, and pass any assessment, required.

(3) The progress of a candidate shall be reviewed by the end of each session by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of one academic session from the date of enrolment in the case of a candidate for the certificate. The maximum candidature shall be four sessions from the date of enrolment for the certificate.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

*Yet to be approved by the University Council*
The scholarships listed below are available to students whose courses are listed in this book. Each Faculty Handbook contains in its scholarships section the scholarships available for study in that Faculty. Travel scholarships are shown separately. Applicants should note that the scholarships and their conditions are subject to review and the closing dates for awards may vary from year to year.

Scholarship information is regularly included in the University publication ‘Uniken/Focus’ and updated on the UNSW Web site http://www.unsw.edu.au/information.

Students investigating study opportunities overseas should also consult Study Abroad which is published by UNESCO and is available in the University library. The British Council (02 9326 2365) may be of assistance for information about study in Britain. The Australian–American Education Foundation (02 6247 9331) or the U.S. Consulate General Educational Advising Centre (02 9373 9230) can provide information about study in America. Information may also be obtained from the embassy or consulate of the country in which the study is proposed and from the proposed overseas institution. Details of overseas awards and exchanges administered by the Department of Employment, Education, Training and Youth Affairs (DEETYA) can be obtained from the Awards and Exchanges Section, DEETYA, PO Box 826, Woden, ACT 2606.

KEY

L Students with Australian Citizenship or Permanent Resident status can apply.
I International students can apply.

Postgraduate scholarships for research or coursework are identified with the following codes:

R Available for study by research (normally Masters by Research or PhD).
C Available for study by coursework (normally Masters by Coursework or Graduate Diploma).

The scholarship information is normally provided in the following format:

- Amount
- Duration
- Conditions

Unless otherwise stated, application forms are available from the Scholarships and Student Loans Unit, c/- the Student Centre (Lower Ground Floor, Chancellery). Applications normally become available four to six weeks before the closing date.
Undergraduate Scholarships

Following are details of scholarships available to undergraduate students at UNSW. The scholarships are listed according to the year of study for which the scholarship is available (i.e. scholarships for first year students; scholarships for second or later year students; scholarships for Honours year students) or whether they are available to undertake travel, and then also by Faculty and course (e.g. scholarships in Science or Engineering). If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

Scholarships for students entering the first year of an undergraduate course

General First Year

The Alumni Association Scholarships (I,L)
- Up to $1,500 pa
- 1 year, renewable subject to satisfactory progress
The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of the University of New South Wales. Applications close early January.

The Australian Development Co-operation Scholarship (ADCOS) (I)
- Tuition fees. Some students may be eligible for airfares and a stipend.
- Determined by normal course duration
This award is for international students from selected countries only. Information and application forms can only be obtained from the Australian Education Centre or Diplomatic Post in the home country. The award conditions and entitlements vary depending on the home country. The closing date is normally early in the year before the year of study.

The Australian Vietnam Veterans Trust Education Assistance Scheme (L)
- $3,500 pa
- Duration of the course
Applicants must be children of a Vietnam veteran and under the age of 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 2000. Tel (02) 9281 7077. Applications close 31 October.

The Ben Lexcen Sports Scholarships (I,L)
- $2,000 pa
- 1 year with possibility of renewal
The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants should have an outstanding ability in a particular sport and are expected to be an active member of a UNSW Sports Club. Applications close late January.

The Co-Op Program (L)
- $10,400 pa and between 9 and 20 months industry training
- The duration of the course subject to satisfactory progress
The scholarships are offered by industry groups through the University for most disciplines in Applied Science, Commerce and Economics and Engineering. Scholars are selected by interview with emphasis placed on achievements in community and extra-curricular activities as well as communication and leadership skills. A minimum TER of around 90 is expected. The Co-Op application form is available from school Careers Advisers or the Co-op Office on (02) 9385 5116. Applications close September 30 with interviews held at the end of November and beginning of December.

The Girls Realm Guild Scholarships (L)
- Up to $1,500 pa
- 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
The scholarships are available to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.
The Ian Somervaille Scholarships (L,L)
- Up to $3,000
- 1 year
The scholarships are available to immediate family members (i.e. children, parents, brothers or sisters) of UNSW staff members or their married or de facto partners. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit, aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The John Niland Scholarships (L)
- $5,000
- 1 year
The scholarship provides assistance to enhance the opportunity of students from country high schools in Australia to enrol in an undergraduate program of study at UNSW. Applicants will be students who complete the HSC (or its counterpart matriculation requirement) in the top five percent of their state-wide cohort, having been enrolled at a country high school in Australia. Selection will be based on academic merit, potential to contribute to the wider life of the University and consideration of social and/or economic circumstances which might otherwise hinder successful transition to UNSW. Applications close 30 October.

The Malcolm Chaikin Scholarship (L)
- $15,000 pa
- Renewable for the duration of the course subject to satisfactory progress
The scholarship is available to students entering the first year of a Bachelor of Science or Engineering in the Faculties of Life Sciences, Science and Technology, or Engineering. Selection will take into account academic merit and interview performance. Applications close early January.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
- $15,637–$23,257 pa (depending on qualifications)
- Up to 3 years
Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience with particular weight given to prior knowledge and experience of Aboriginal culture and health. Applications close late July.

The New South Scholarships (L)
- $5,000 pa
- Up to 3 years subject to satisfactory progress
The scholarships are available to students commencing the first year of undergraduate study at UNSW. The Scholarships will be awarded taking into account academic achievement, including potential for study in a discipline of the University. No application form is required. As all students who attempt the HSC (or equivalent) will be automatically considered for the scholarship, no application is needed. The award is extremely competitive and it is expected that the successful applicant(s) will be in the top 2% of candidates.

The Ngunnagan Club Scholarship (L)
- Up to $2,000
- 1 year
The scholarship is available to students enrolled at an Australian country high school who complete the HSC (or its counterpart matriculation requirement) in the top five per cent of their state cohort. Applicants should complete an official application form by 31 October in the year prior to their intended enrolment at UNSW. Final performance in the HSC (or its counterpart matriculation) examination should be reported to the Scholarships and Student Loans Unit once known.

UNSW-HECS Equity Awards (L)
- HECS liability
- Duration of the course, subject to satisfactory progress
In 1997, the scholarships were offered for full-time undergraduate study to applicants who achieved a TER of at least 90 in the HSC (or equivalent), and were in receipt of ABSTUDY or full AUSTUDY, and expected to be in receipt of these benefits while studying at UNSW. Applications from such students in 1997 closed in early December 1996. UNSW Access Scheme applicants were automatically considered. The conditions for the 1998 awards have not yet been determined. More information should be available in November 1997.

The Vice-Chancellor's Equity Scholarships (L)
- $1,500 pa
- 1 year
In 1997, over 40 scholarships were awarded for financially disadvantaged students commencing full-time undergraduate study. Applicants must have applied, and be deemed eligible, for the UNSW Access Scheme, with financial disadvantage as one of the grounds for eligibility. Selection was also based on academic merit. The conditions for the 1998 awards have not yet been determined. More information should be available in November 1997.
The WS and LB Robinson Scholarship (L)
- Up to $6,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must have completed their schooling in Broken Hill or have parents who reside in Broken Hill. Applicants should be undertaking a course related to the mining industry, for example courses in mining engineering, geology, electrical and mechanical engineering, metallurgical process engineering, chemical engineering or science. A letter of application should be sent to Pasminco Mining, PO Box 460, Broken Hill, NSW 2880. Applications close 30 September each year.

Scholarships for students in their second or later year of study

General Second Year or Later

The Alumni Association Scholarships (L,L)
- Up to $1,500 pa
- 1 year, renewable subject to satisfactory progress
The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of the University of New South Wales. Applications close early January.

The Australian Vietnam Veterans Trust Education Assistance Scheme (L)
- $3,500 pa
- Duration of the course
Applicants must be children of a Vietnam veteran and under the age of 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 2000. Tel (02) 9281 7077. Applications close 31 October.

The Ben Lexcen Sports Scholarships (L,L)
- $2,000 pa
- 1 year with possibility of renewal
The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants should have an outstanding ability in a particular sport and are expected to be an active member of a UNSW Sports Club. Applications close late January.

The Girls Realm Guild Scholarship (L)
- Up to $1,500 pa
- 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
The scholarships are available only to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Dried Fruits Research and Development Council (DFRDC) Studentships and Student Awards (L,L)
- Up to $3,000 for Studentships, up to $1,000 for Student Awards
The Studentships assist students to undertake research projects in the final year studies of a Bachelors degree (applications close April 15), or to undertake a research project during the summer vacation (applications close October 15). The Student Awards are provided for excellence in student research projects related to the dried fruit industry. Further information and applications are available from the Executive Officer, Dried Fruits Research and Development Council, Box 1142, Mildura VIC 3502. Tel (050) 221515, Fax (050) 233321.

The Esso Australia Ltd Geosciences Scholarship (L,L)
- Up to $3,000
- 1 year
The scholarship is for a full-time student seeking to undertake study in the final year (Stage 4) of a Bachelor of Science degree in Applied Geology or an equivalent Honours year, majoring in geology or geophysics. The successful applicant is expected to have an interest in
petroleum related studies ie sedimentology, biostratigraphy, seismic/magnetic/gravity geophysical studies, basin studies, palynology or palaeontology. Selection is based on academic merit, the benefit the student will gain by being awarded the scholarship and can include consideration of financial need. Applications close 30 November.

The Ian Somervaille Scholarships (L,L)
- Up to $3,000
- 1 year
The scholarships are available to immediate family members (i.e. children, parents, brothers or sisters) of UNSW staff members or their married or de facto partners. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit, aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
- $15,637–$23,257 pa (depending on qualifications)
- Up to 3 years
Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience with particular weight given to prior knowledge and experience of Aboriginal culture and health. Applications close late July.

The Nicholas Catchlove Scholarship in Flying (L)
- $10,000 pa
- 1 year
The scholarship will be awarded to provide a final year student with the opportunity to undertake further flying training to prepare for a career in the aviation industry. Applicants must be proposing to undertake the final year of an appropriate course and hold a Commercial Pilot's Licence. Selection will be based on academic merit, reasons for undertaking the course, financial need, commitment to flying and to the course, demonstrated ability and leadership qualities, and interview performance. Applications close October.

The NSW Farmers Association EL O’Brien Scholarship (L)
- Up to $2,000 pa
- 1 year
The NSW Farmers Association is offering a scholarship for a student entering Year 4 of the Wool and Pastoral Sciences course. Applicants must be members, or children of members of the Association. Applications close early March.

The NSW Ministry for the Arts Scholarships (L,R,C)
- $5,000–$25,000 (depending on the award)
The NSW Government offers a number of scholarships and awards to writers, artists and scholars living in NSW. Further information is available from the New South Wales Ministry for the Arts, GPO Box 5341, Sydney NSW 2000. Tel (02) 9228 3533, Fax (02) 9228 4722.

The RGC Scholarship in Economic Geology (L)
- $5,000
- 1 year
The scholarship is available to a student entering Stage 4 of the Applied Geology course or an Honours year in geology in the Science course, undertaking a field project relevant to economic geology. Letters of application and requests for information should be directed to RGC, Gold Fields House, 1 Alfred St, Sydney NSW 2000. Applications close 31 January.

The Sam Cracknell Memorial Scholarships (L,L)
- Up to $1,500 pa
- 1 year
Applicants should have already completed at least 2 years of a degree or diploma course and be enrolled in a full-time course during the year of application. Selection is based on academic merit, participation in sport both directly and administratively and financial need. Applications close 31 March.

The Spruson and Ferguson (Patent Attorneys) Scholarship for Innovation (L)
- At least $1,000
- 1 year
The scholarship is available to students undertaking the final year of an undergraduate course in any school of the Faculty of Science and Technology or the Faculty of Engineering. Selection will be based on academic merit and the innovative nature of the proposed final year project. Applicants are required to submit an application and a 200 word outline of their proposed research topic. Applications close 7 March.

The Telstra Education Fellowships (L)
- $7,500
- 1 year
Applicants must be entering the final year of study in the disciplines of computer, electrical or electronic engineering,
computer science or human factors. Students may also have the opportunity to undertake up to 12 weeks non-compulsory vacation employment. Further information is available from the Fellowship Applications Officer, Telstra Research Laboratories, Box 249, Rosebank MDC, Clayton Victoria 3169. Email: c.zaman@trl.telstra.com.au. Applications normally close at the end of July.

The WS and LB Robinson Scholarship (L)
- Up to $6,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress

Honours Year Scholarships

General Honours Year

The Alumni Association Scholarships (I, L)
- Up to $1,500 pa
- 1 year, renewable subject to satisfactory progress

Sutton/ Jardine Matheson. Applications normally close 31 July in the year prior to the final year of study.

The Rotary Foundation Ambassadorial Scholarships (L)

The Rotary Foundation offers scholarships to study or train in another country where Rotary clubs are located. Applicants must have completed at least two years of a university or college course, or have completed high school and have been employed for at least two years. Applicants must also be citizens of a country in which there is a Rotary club. Information regarding scholarship availability, closing dates and applications should be obtained from the applicant’s local Rotary club.

The Sir Charles Mackerras/Australia–Britain Society Music Scholarship (L)

- 8,000 pounds sterling

The scholarship is open to outstanding young conductors, composers and repetiteurs, aged between 21 and 30 who are likely to be influential leaders in the field of music, to undertake study in the United Kingdom or the Czech republic for at least six months. Applicants must be Australian Citizens or Permanent Residents. Application forms are available from the British Council, PO Box 88, Edgecliff NSW 2027. Tel (02) 9326 2022, Fax (02) 9327 4868, Email: bcsydney@sprint.com.au. Applications close early November.
The STA Travel Grant (I,L)
- Up to $1,500 (in 1998) and up to $3,000 from 1999
Application forms and further Information are available from the School of Community Medicine. Tel (02) 9385 2520.

The Swedish Institute Guest Scholarships (I, L)
- SEK 7,000 per month living allowance
- 9 months (1 academic year)
The scholarships are open to students and researchers who wish to travel to Sweden for study or research which cannot equally well be pursued in countries other than Sweden. Applicants must establish contact with a Swedish University willing to accept the applicant for the proposed studies. Initial requests for application forms must be made in writing, and should include name and address, nationality, educational background, work experience, knowledge of any languages, statement of the purpose of the study or research in Sweden, and a copy of a letter of invitation from a Swedish University Department. Applications are available from the Swedish Institute, Department for Educational and Research Exchange, PO Box 7434, S–103 91, Stockholm, Sweden. Email: grantinfo@si.se. Requests for application forms must reach the Swedish Institute before 1 December.

The Swiss Confederation Scholarships (L)
A scholarship may be available from The Swiss Confederation for art studies (for example, painting, graphic design, sculpture, music) for one academic year. The scholarship will be awarded on the basis of academic merit and the possibilities for study in Switzerland. Applicants must have been born after 1 January 1962. The scholarship can only be allocated after the candidate has been accepted by a Swiss art school or conservatory. Applicants will be required to pass a language test in German or French. Applications close 1 December.

The Yokohama Scholarship Awards (L)
- JPY 120,000 per month undergraduate, JPY 150,000 per month for postgraduate students, tuition fees, airfare plus allowances
- Up to 4 years (undergraduate), 1 year for Japanese language study, 2 years Masters, 3 years PhD
Applications must be Australian Citizens who have submitted their application to, or been accepted by a Japanese university and be able to communicate in Japanese (or be willing to undertake intensive study of the Japanese language). All disciplines are eligible except for subjects in medicine, veterinary science and dentistry. The scholarship will be granted subject to the applicant's final acceptance by the chosen Japanese university. Original application forms only will be accepted and are available from the Scholarships and Student Loans Unit or from the Yokahama Scholarship Foundation. Tel (07) 5588 0880, Fax (07) 5588 0842. Applications close with the Foundation in early October.

Faculty Travel

Faculty of Medicine

John Hirshman International Health Scholarship (I,L)
- Up to $1,000
The scholarship is to provide assistance to a final year student undertaking MFAC 6001 Elective Term, to travel to a developing country for international health experience. Application forms and further information are available from the School of Community Medicine. Tel (02) 9385 2520.
Vacation Scholarships

Some Schools may offer scholarships for the long vacation period from December to February each year. Students should contact the relevant School office for information.

General Vacation

The Australian Kidney Foundation Vacation Scholarships (L,L)
- Up to $800
- 6–8 weeks
The scholarships are open to undergraduate students currently in Medicine or other courses related to Biological Science, who will have completed at least one year of full-time study. Research projects undertaken must be related to the kidney and the urinary tract, and carried out at university departments during the summer vacation period. Applications close early September.

The CSIRO Division of Marine Research Vacation Scholarships (L,L)
- Up to $450 per week plus travel expenses
- 8 weeks between December and February
Applicants must be full-time undergraduate students who have completed not less than three years of their course. Research projects will be undertaken with the CSIRO Division of Marine Research at either Hobart, Cleveland or Marmion. Applications close early September.

The Dried Fruits Research and Development Council (DFRDC) Studentships (L,L)
- Up to $3,000 for Studentships, up to $1,000 for Student Awards
The Studentships assist students to undertake research projects during the summer vacation. Further information and applications are available from the Executive Officer, Dried Fruits Research and Development Council, Box 1142, Mildura VIC 3502. Tel (050) 221515, Fax (050) 233321. Applications close 15 October.

The Heart Foundation Vacation Scholarships
Scholarships are available for tenure during the long vacation period for research projects related to cardiovascular function and disease. Applicants should normally have completed at least two years of an appropriate degree course in the biological sciences. Preference will be given to applicants who have had little or no laboratory experience. Application guidelines become available from the Scholarships and Student Loans Unit in late July. Applications close early September.

The National Multiple Sclerosis Society of Australia Summer Vacation Scholarships (L,R)
- $200 per week
- 6–8 weeks between November and March
The scholarships are open to undergraduates students who will have completed three years of an Honours degree in medicine, science, biological or health sciences. Research projects undertaken must be relevant to multiple sclerosis and carried out at university departments during the summer vacation period. Applications close mid-August.

The Novo Nordisk Student Research Scholarship (L,L)
- Between $1,000 and $1,500
- 6–9 weeks over the vacation period
Scholarships are available for diabetes-related research, at the Department of Endocrinology, Prince of Wales Hospital. The scholarship is open to students enrolled at any tertiary institution in Australia, however preference will be given to students enrolled in an undergraduate degree in Science or Medicine at UNSW. Selection will be based on interest in research into diabetes mellitus and academic performance. Further information is available from A/Professor Bernie Tuch, Prince of Wales Hospital, Tel (02) 9382 4814. Applications close 31 October.
Postgraduate Scholarships

Following are details of scholarships available to postgraduate students at UNSW. The scholarships are listed by Faculty and course (e.g. scholarships in Science or Engineering) or whether they are available to undertake travel. If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

For further information contact:
The Scholarships and Student Loans Unit
The University of New South Wales
Sydney 2052 Australia
Tel (02) 9385 3100/3101/1462
Fax (02) 9385 3732
Email: scholarships@unsw.edu.au

General

Main programs of assistance for postgraduate study

The Australian Postgraduate Awards (APA) (I,R)
- $15,888 pa (1998 rate). Other allowances may also be paid.
- Up to 2 years for a Masters, 3 years for a PhD degree. PhD students may apply for up to 6 months extension in certain circumstances

Applicants must have graduated, or be proposing to graduate in the current academic year, with Honours 1 or equivalent. The scholarships are available to undertake a Masters by Research or PhD. Grants may be awarded for new or existing research projects in any discipline concerned with the causes, diagnosis, prevention or treatment of intellectual disability and allied conditions. Applications can be obtained from the Hon. Secretary, Apex Foundation for Research into Intellectual Disability Limited, PO Box 311, Mount Evelyn VIC 3796. Applications close late July.
The Arthritis Foundation of Australia
Rheumatology Research & Professional Education Awards (L,R)

- $15,000–$22,000 pa
- 1 year with a possible 2 year extension

Scholarships are available to support research projects into arthritis, osteoporosis and other musculoskeletal disorders. Applicants must be enrolled in studies leading to a Masters by Research or PhD. Further information and applications are available from The Arthritis Foundation of Australia, GPO Box 121, Sydney NSW 2001. Tel (02) 92212456, Fax (02) 92322538. Applications close early June.

The Asthma Foundation of New South Wales Research Scholarships (l,L,R)

- To be determined
- 1–3 years

The scholarships are available for research into areas related to asthma including the basic medical services and clinical or psychological investigations. Further information is available from The Asthma Foundation of NSW, Suite 1 “Garden Mews”, 82–86 Pacific Highway, St Leonards NSW 2065. Applications close early August.

The Australian Brewers Foundation Alcohol Related Medical Research Postgraduate Scholarships (l,L,R)

- Similar to the NHMRC (see NHMRC entry)
- 1 year

Similar to the NHMRC. The scholarships are available to support research into the medical, social and public health aspects of moderate, hazardous or harmful alcohol consumption. Information and application are available from ABF – Medical Research Advisory Committee. Tel (02) 955 26688, Fax (02) 9552 1369. Applications close mid-September.

The Australian Coral Reef Society (ACRS) Inc Student Grants (l,L,R,C)

- $1,000 (plus $1,500 Walker prize for the best proposal)

The grant is open to students at any Australian University who are enrolled in a PhD or MSc involving research on coral reefs. Recipients must be a member of, or be willing to join the ACRS. Applications normally close late November.

The Australian Federation of University Women (I,L,R,C)

Each year the Federation offers to its members a number of awards for study in Australia and overseas. Details of awards are included in a booklet available from the Australian Federation of University Women Inc, 8th Floor, Dymocks Building, 428 George Street, Sydney NSW 2000. Tel (02) 9232 5629.

The Australian Institute of Nuclear Science and Engineering (AINSE) Postgraduate Research Awards (I,L,R)

- $7,500 supplement to an APA or equivalent scholarship and $5,500 pa for facility costs plus allowances
- Up to 3 years

The Institute offers awards for postgraduate students whose research projects are associated with nuclear science or its applications. Applicants must be in receipt of an APA or equivalent scholarship and have completed (or expect to complete) a Bachelor of Engineering or Bachelor of Science with Honours. At least one month per year must be spent at the Institute at Lucas Heights, NSW. Applications close early December.

The Australian Kidney Foundation Medical Research Scholarship (l,L,R)

- Similar to the National Health and Medical Research Council research scholarships (see NHMRC entries under General)
- Up to 3 years

The scholarships are available to medical graduates proposing to undertake an MD or PhD with a research area related to the kidney and urinary tract. Information is available from Aust Kidney Foundation, GPO Box 9993, Deakin ACT 2600. Tel (02) 6282 2913, Fax (02) 6285 2060. Applications close 1 September.

The Australian and New Zealand Council for the Care of Animals in Research and Teaching (ANZCCART) Student Award (I,L,R,C)

- $1000 for attendance at the annual conference

Applicants can be postgraduate students from any discipline. The award provides assistance for a student to attend the annual conference. Applications are available from ANZCCART, PO Box 19, Glen Osmond, SA, 5064. Tel (08) 303 7325. Applications close July.

The Australian Pain Relief Association and Australian Pain Society PhD Scholarship (L,R)

- $16,750 pa plus allowances
- Up to 3 years subject to satisfactory progress

Applicants must hold an Honours 1 degree and be proposing to undertake a PhD in the mechanism, diagnosis, treatment or epidemiological features of acute or chronic (including cancer) pain. Further information and applications are available from the Australian Pain Society Secretariat, PO Box 629, Willoughby NSW 2068. Tel (02) 9439 6744. The award is offered bi-annually. Applications close early November.
The Australian Society for Microbiology (ASM) provides prizes and awards ranging from $100 to $10,000, for study, research and projects related to Microbiology. More information can be obtained from the ASM National Office, Unit 23/20 Commercial Rd, Melbourne VIC 3004. Tel (03) 9867 8699, Fax (03) 9867 8699.

The Australian Spinal Research Foundation Postgraduate Research Awards (L,R)
- Equivalent to Australian Postgraduate Award (see APA entry under General)
- Up to 2 years for a Masters by Research or 3 years for a PhD degree

Applicants must be undertaking a Masters by Research or PhD in an area designed to contribute to an understanding of the anatomical and physiological mechanisms underlying chiropractic care or the clinical efficiency of chiropractic care and management procedures. Information and applications are available from Aust. Spinal Research Foundation, PO Box 1047, Springwood Qld 4127. Tel (07) 3808 4098, Fax (07) 3808 8109, Email: t.flack@qut.edu.au. Applications close mid October.

The Community Health and Anti-Tuberculosis Association – The Harry Windsor Biomedical and Medical Research Scholarship (L,R)
- $23,257 pa (Medical postgraduates), $15,637–$20,180 pa (Biomedical Science postgraduates) plus allowances
- Up to 3 years

Applicants must be proposing to undertake full-time postgraduate medical research in the areas of tuberculosis, respiratory disease (particularly community aspects) or the health of disadvantaged people. Only original application forms will be accepted and are available from The Executive Officer, Community Health and Anti-Tuberculosis Association, PO Box 84, Darlinghurst, NSW 2010. Fax (02) 9360 5520. Applications close 15 August.

The Cooperative Research Centre for Eye Research and Technology (CRCERT) Postgraduate Research Scholarship (L,R)
- $15,321–$19,827 pa (depending on the type of research)
- 3 years

The scholarship is available for full-time PhD studies in subjects such as optometry, microbiology, biochemistry, optics, materials science, polymer chemistry and immunology. For information about application procedures applicants should initially contact Dr Mark Wilcox, CRCERT, University of New South Wales, Sydney 2052. Tel (02) 9385 0222.

The Clean Air Society of Australia and New Zealand Inc Postgraduate Research Award (L,R,C)
- $5,000 pa
- 1 year, with a possible 1 year extension

The scholarship is open to students enrolled in a Masters degree program with a significant research component connected with air quality. Applications close early February.

The CSIRO Division of Fisheries Supplementary PhD Awards (L,R)
- $10,000 pa
- Up to 3 years

This scholarship is a supplement to any primary scholarship (e.g. APA) for PhD study in marine studies, environmental studies, zoology, broadly-based life sciences, economics and mathematics. Applications close early March.

The Dairy Research and Development Corporation (DRDC) Postgraduate Education Program (L,R)
- Awards to undertake full-time postgraduate research degrees are available in a wide range of disciplines including dairy manufacturing, farm research, economics and marketing, and agricultural extension. New and experienced applicants are welcome to apply. Guidelines and applications are available from the Scholarships and Student Loans Unit or DRDC, PO Box 8000, Glen Iris VIC 3146. Tel (03) 9889 0577. Applications close 31 October.

The Forest and Wood Products Research and Development Corporation (FWPRDC) Scholarships (L,R)
- Up to $25,000 pa
- Up to 3 years

The scholarships are open to students undertaking a postgraduate research degree at an Australian University. Selection is based on academic merit and the relevance of the project to FWPRDC Programs. Further information and applications are available from the Executive Director, FWPRDC, PO Box 157, Bond University Qld 4229. Fax (07) 5578 7911. Applications close early October.

The Garnett Passe and Rodney Williams Memorial Foundation Research Scholarships in Otolaryngology (L,R)
- $15,364 pa for science graduates, $22,850 pa for medical graduates, plus allowances
- 3 years

The scholarships are available to medical or science graduates for research in Otolaryngology or in related fields.
of biomedical science. Applicants must be enrolled in a postgraduate degree in Australia or New Zealand. Information and applications are available from the Garnett Passe and Rodney Williams Memorial Foundation, Pelham House, 165 Bouverie St, Carlton VIC 3053. Tel (03) 9349 2622, Fax (03) 9349 2615. Applications normally close in August.

**The Gerontology Foundation Grant-In-Aid (I,L,R,C)**
- Up to $5,000 for a specific research project
A Grant-In-Aid is awarded to students who have not had their work published in a refereed journal and who have not won any research grants in open competition. The grant supports a proposed scientific investigation topic specified by the Foundation. Information and applications are available from The Executive Officer, Gerontology Foundation of Australia Inc, PO Box 199, Annandale NSW 2038. Applications normally close in late July.

**The Gowrie Scholarship Trust Fund (L,R,C)**
- $4,000 pa
- 2 years
Applicants must be members of the Forces or children (or grandchildren or lineal descendants) of members of the Forces who were on active service during the 1939–45 War. Tenable at tertiary institutions in Australia and overseas. Applications close early October.

**The Grains Research and Development Corporation (GRDC) Junior Research Fellowship (L,R)**
- $21,000 pa plus up to $3,000 to the supporting institution, some conference/workshop attendance allowances
- Up to 3 years
Applicants must be undertaking full-time PhD studies in fields of high priority to the grains industry. Applications close mid-October.

**The Great Barrier Reef Marine Park Authority Research Support (I,L,R)**
- $1,500
Applicants must be undertaking a full-time PhD research project that could contribute to the planning and managing work undertaken by the Great Barrier Reef Marine Park Authority. Applications and further information may be obtained from the Executive Officer, Great Barrier Reef Marine Park Authority, PO Box 1379, Townsville QLD 4810, Tel (077) 818811. Applications close mid-December.

**The Harold G Conde Memorial Fellowship (L,R,C)**
- $5,000 pa subject to the availability of funds
- Up to 3 years
Applicants should be honours graduates. The Fellowship is a supplementary award to be held in conjunction with another scholarship and is for postgraduate study or research in a field related to the electricity industry. Applications close early April.

**The Julian Small Foundation Annual Research Grant (I,L,R)**
- Up to $5,000
Applications are open to postgraduate students involved in the study of law, or industrial relations. Selection will be based on a research proposal which outlines how the research will advance the thinking and practice in the area of employment law and industrial relations in Australia. Applications close mid-August.

**The June Opie Fellowship (I,L,R,C)**
- NZD$10,000
- 1 year
The award is administered by the University of Auckland and is available to citizens and permanent residents of Australia, Canada and New Zealand, and is designed as an incentive for students of high academic achievement who have a severe disability. It is primarily intended for those who plan to undertake postgraduate study with a view to preparing themselves for a role in the professions, in politics or more particularly in university teaching and research and who have disability issues as a continuing interest. Applications close with the University of Auckland early October.

**Land and Water Resources Research and Development Corporation (LWRRDC) Postgraduate Research Scholarships (I,L,R)**
- $20,000 pa plus $5,000 for operating expenses
- 2 years for Masters, 3 years for a PhD degree
General Research Scholarships are available for research that will lead to better management, sustainable use and conservation of land, water and vegetation resources in Australia. Irrigation Research Scholarships are specifically for research that will lead to better management, sustainable use and conservation of natural resources within the irrigation industries. Applications are available from the Scholarships and Student Loans Unit or LWRRDC, GPO Box 2182, Canberra ACT 2601. Tel (02) 62573379. Applications close early October.
The Lionel Murphy Postgraduate Scholarship (L,R,C)
- $15,000 pa for study in Australia, up to $30,000 for study overseas
- 1 year
Applicants must be intending to undertake a postgraduate degree in Law, Science, Legal Studies or other appropriate discipline. Preference will be given to applicants who propose to study the law and legal system in a social context, science/law or international law. Information and application forms are available from the Lionel Murphy Foundation, GPO Box 4545, Sydney NSW 2001. Tel (02) 9223 5151, Fax (02) 9223 5267. Applications close mid-September.

The Meat Research Corporation (MRC) Studentships and Junior Research Fellowships (L,R,C)
- $14,961 pa for study in a Masters or Diploma, $20,000 for a PhD in Australia or US$17,500 for study overseas, plus airfares, insurance and allowances
- 2 years for Studentships (Masters or Diploma), 3 years for Junior Research Fellowships (PhD)
Applicants should be proposing to undertake research and training in 'off-farm' disciplines of practical value to the Australian beef, sheep meat, goat meat and buffalo industries. Applications normally close mid-August.

The Menzies Research Scholarship in Allied Health Sciences (L,R)
- Up to $24,000 pa
- 2 years
The scholarship is awarded to stimulate research in the non-medical allied health disciplines. Applicants should be full-time students, who have completed the first stage of a PhD program. Applications are available from The Menzies Foundation, 210 Clarendon St, East Melbourne VIC 3002, Fax (03) 9417 7049. Applications close late June.

The Minerals Council of Australia Student Research Award (I,L,R)
- $500 plus travel and accommodation for the Environmental Workshop
The award is open to scholars who have completed or are undertaking postgraduate studies, and is aimed at encouraging excellence in student research and communication in the field of environmental management related to mining. The award will be judged on a paper written for and presented at the Minerals Council of Australia’s Environmental Workshop. Nominations close early May.

The National Drug Strategy (NDS) Postgraduate Research Scholarship (I,L,R)
- $23,204 pa
- 1 year, with a possible 2 year extension
Scholarships are available to students undertaking PhD studies and aim to develop expertise in researching and evaluating non-biomedical approaches to the prevention and treatment of drug misuse. Selection is based on academic merit, work experience and the potential of the project. Applications close mid-July.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
- $15,637–$23,257 pa (depending on qualifications)
- Up to 3 years
Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience with particular weight given to prior knowledge and experience of Aboriginal culture and health. Applications close late July.

The National Health and Medical Research Council (NHMRC) Dora Lush Biomedical Postgraduate Scholarships (L,R)
- $15,637 pa, $20,180 for HIV/AIDS research, $17,637 for special initiative scholars, plus allowances
- Up to 3 years
Applicants must have completed a Science degree with Honours, or equivalent, at the time of submission of the application. Current APA holders or students enrolled in the final year of an Honours degree at the time of application are not eligible. Applications close late July.

The National Health and Medical Research Council (NHMRC) Medical and Dental Postgraduate Scholarships (L,R)
- $23,257 pa plus allowances
- Up to 3 years
The scholarships are open to medical and dental graduates to undertake full-time research. Applications are particularly encouraged for research in the following special initiative areas: Aboriginal health and disease, prostate cancer, alcohol and substance abuse, nursing and allied health services, dementia, schizophrenia, injury and HIV/AIDS. Applications close late July.
The National Health and Medical Research Council (NHMRC) Public Health Postgraduate Scholarships (L,R)
- $23,257 pa (medical/dental graduates), $15,637 pa (other graduates), $20,180 pa for HIV/AIDS research, plus allowances
- Up to 3 years

The scholarships are open to medical/dental or health related graduates to obtain training in public health research. Applications are particularly encouraged for research in the following special initiative areas: Aboriginal health and disease, prostate cancer, alcohol and substance abuse, nursing and allied health services, dementia, schizophrenia, injury and HIV/AIDS. Applications close late July.

The National Heart Foundation of Australia Postgraduate Medical and Science Research Scholarships (L,R)
- $17,637 pa (science), $23,257 pa (medical) plus $1,200 departmental allowance
- Up to 3 years subject to satisfactory progress

Scholarships are available to science or medical graduates for research in cardiovascular function, disease or related problems. Applicants must usually reside in Australia. Further information and applications are available from the Medical Director, National Heart Foundation, PO Box 2, Woden ACT 2606. Medical Applications close May and Science applications close October.

The National Tertiary Education Union (NTEU) Scholarship for the Study of Industrial Relations and Unionism in Australian Tertiary Education (I,L,R)
- $5,000 pa
- Up to 3 years

Applicants must have made or intend to make an application for candidacy for a Masters by Research or PhD in a topic which covers some aspect of industrial relations, policy issues and/or unionism related to Australian tertiary education. Further information is available from NTEU, PO Box 1323, South Melbourne VIC 3205. Tel (03) 9254 1910. Applications close early November.

The National Multiple Sclerosis Society of Australia Postgraduate Research Scholarships (L,R)
- Same as NHMRC scholarship stipends for medical and biomedical graduates
- Up to 2 years

Scholarships are available to medical graduates (or to appropriately qualified science graduates or health professionals) enrolled in a postgraduate research degree. Applications close mid-July.

The NSW Ministry for the Arts Scholarships (L)
- $5,000–$25,000 (depending on the award)

The NSW Government offers a number of scholarships and awards to writers, artists and scholars living in NSW. Further information is available from the New South Wales Ministry for the Arts, GPO Box 5341, Sydney NSW 2000. Tel (02) 9228 3533, Fax (02) 9228 4722.

The Postgraduate Equity Scholarships (L,C)
- Substitution of HECS for tuition fees
- One session, renewable if eligibility criteria are satisfied

Postgraduate students enrolled in full-fee courses may be allowed to pay HECS rather than course fees. Students granted the concession are also required to pay Student Activity Fees. Students who have previously completed a postgraduate course at the same level are not eligible. Applications for Session One close 15 January and 15 July for Session Two.

Financial Need HECS Substitution Scholarships
Applicants must be in receipt of a full allowance from the Department of Social Security (DSS), Department of Veteran Affairs, or AUSTUDY. Students granted the assistance must re-apply each session.

HECS Substitution for Scholarships for Women
A limited number of scholarships will also be provided to women enrolling in a postgraduate course after a period of absence from study and/or employment who are seeking to extend their professional experience in order to re-enter the workforce. Preference will be given to women enrolling in courses which have a low female enrolment. Selection will take into account the applicant's academic merit, her personal statement, including details of a well-planned future career path, and referee's support. The scholarship is tenable for the duration of the course.
The Re-Entry Scholarship for Women (l,L,R,C)
- $15,888 pa (equivalent to the Australian Postgraduate Award)
- 1 year
Applicants must be women who have been out of full-time paid professional employment for a period of time and who wish to take up or resume a full-time research or coursework program of postgraduate study. Priority will be given to applicants wishing to update their research skills or to those who wish to gain further experience in order to return to employment in industry, business or education. Applicants must be able to demonstrate a well-planned career path. A letter of application and curriculum vitae should be forwarded to the Scholarships and Student Loans Unit, UNSW. Applications close 31 October.

The River Basin Management Society Ernest Jackson Memorial Research Grants (l,L,R)
- Up to $2,000
The scholarship assists PhD and Masters students undertaking research in the field of river basin management. Further information is available from RBMS, PO Box 113, Forest Hill VIC 3131. Tel (03) 9816 6896. Applications usually close May and November.

The Ronald Henderson Postgraduate Scholarships (L,R)
- $5,000 pa as a supplement to an APA
- Up to 2 years for Masters by Research, 3 years for a PhD

Scholarships are available for a Master's degree or postgraduate research at Tokyo Metropolitan University, or Tokyo Metropolitan Institute of Technology. Applicants must be aged under 35 years, be Australian citizens from New South Wales, and be graduates of a university in NSW.

University College London Scholarships

The University College London offers various scholarships to students from overseas, who hold an offer of admission to a full-time programme of study at UCL. Applicants must be self-financing and liable to pay tuition fees at the rate for overseas students. Information and applications are available from the International Office, University College London, Gower St, London WC1E 6BT, UK. Tel +44 171 380 7708, Fax: +44 171 380 7380, Email: international@ucl.ac.uk.

Yokahama Scholarship Awards (L,R,C)

- JPY 120,000 per month undergraduate, JPY 150,000 per month for postgraduate students, tuition fees, airfare plus allowances
- Up to 4 years (undergraduate), 1 year for Japanese language study, 2 years for Masters, 3 years for PhD
Applicants must be Australian citizens who have submitted their application to, or been accepted by a Japanese university and be able to communicate in Japanese (or be willing to undertake intensive study of the Japanese language). All disciplines are eligible except Medicine, Veterinary Science and Dentistry. Scholarships will be granted subject to the applicant's final acceptance by the chosen Japanese University. Original application forms only will be accepted and are available from the Yokahama Scholarship Foundation. Tel (07) 5588 0880, Fax (07) 5588 0842. Applications close with the Foundation in early October.
The following information summarises prizes awarded by the University. Prizes are grouped by level as follows: Undergraduate, common Undergraduate/Postgraduate, Postgraduate. Within these groups prizes are listed under the faculty, school or department in which they are awarded. Prizes which are not specific to any school are listed under General. Law prizes are awarded only for students enrolled in the LLB or Jurisprudence courses.

Information regarding the establishment of new prizes may be obtained from the Student Information and Systems Office.

Prize information is normally provided in the following format:
- Prize value
- Conditions

### Undergraduate Prizes

- $300
  For the best report based on the period of attachment in general practice

**The Combined Teaching Hospitals Senior Staff Prize**
- $500
  For the best performance in the clinical years of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine
The Foundation Year Graduates Medal
- A silver medal
For leadership and fellowship as a medical undergraduate by a student who has completed the final year of the medical course

The Graduation Prize in Surgery
- $100
For the best performance in the surgery components of MDSG4001 Integrated Clinical and Community Studies and MDSG6001 Integrated Clinical Studies 6 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Prince of Wales Hospital Ladies Auxiliary Prize
- $500
For the best performance in Years 1 and 2 of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or in the undergraduate medicine component of first, second and third years of course 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Royal Australian College of Ophthalmologists Prize
- $250 and a medal
For the best essay in an ophthalmological subject by a student in fifth year of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or the sixth year of course 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Wallace Wurth Prize
- $200
For the best overall performance in any graduating year by a student enrolled in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Anatomy

The Dami Atapattu Prize
- $100
For the best performance in Year 1 Anatomy (subject ANAT1006) by a student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Jane Skillen Prize in Anatomy
- $250
For the highest average mark in any three third year Anatomy units by a graduand in the Bachelor of Science degree course with a major in Anatomy

The Maurice (Toby) Arnold Prize
- $100
For the highest mark in Anatomy (including all sub-disciplines of Anatomy) in Year 2 of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Paxinos & Watson Prize
- $200
For the best performance in ANAT341 Neuroanatomy 1 by a student proceeding to the degree of Bachelor of Science

The Prize in Practical Anatomy
- $200
For the best performance in Practical Anatomy (including Radiological Anatomy) by a student in Year 2 of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine
Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Winifred Dickes Rost Prize
• $100
For outstanding merit in Anatomy in the final year of the Bachelor of Science degree course

The Richard Kelman Prize
• $100
For excellence in the Occupational Health component of MDSG4001 Integrated Clinical and Community Studies by a student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The United Medical Defence Prize in Health Law and Ethics
• $500
For the best performance in the ethics section of PSYC2101 Human Behaviour (40%) and CMED3001 Medical Ethics and Health Law (60%)

School of Community Medicine

The 2/5 Australian General Hospital Association Prize
• $200
For the best performance in Community Medicine by a Year 5 student in course 3801 (Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery), or Year 6 student in 3821 (Bachelor of Science Bachelor of Medicine Bachelor of Surgery) or 3840 (Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery)

The Department of Health, Rural General Practice Prize
• $500
For the best essay written in the topic area of rural general practice by a Year 5 student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or a Year 6 student in course 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Health Services Management

The Australian College of Health Service Executive Prize
• $200
For the best combined performance in the two core Management subjects in the Master of Health Administration degree course

School of Obstetrics and Gynaecology

The Gordon Lowe Memorial Prize
• $150
For the best performance in OBST5001 Obstetrics and Gynaecology in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The NSW Department of Health Prize
• $500
For the best performance in the Community Medicine component of MDSG4001 Integrated Clinical and Community Studies in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Obstetrics and Gynaecology

The Royal Hospital for Women Senior Medical Staff Prize
• $100
For the best performance in OBST5001 Obstetrics and Gynaecology by a student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery
School of Paediatrics

The Karitane Mothercraft Society Prize
• $150
For the best essay written in the topic area of "Mother/child relationships relevant to health care" by a student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3841 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Paediatrics Staff Prize
• $200
For an outstanding performance in Paediatrics by a student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Richard Johnson Memorial Prize in Paediatrics
• $500
For the best performance in the clinical component of PAED5101 Paediatrics in 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Pathology

The GR Cameron Memorial Prize
• $50
For the highest aggregate mark in the Pathology component of PATH3101 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Macquarie Prize in Diagnostic Pathology
• $500 and a medal
For the best performance in the Diagnostic Pathology component of PATH3101 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

School of Physiology and Pharmacology

The DI McCloskey Prize for Physiology/Pharmacology Honours
• $100
For the best performance in PHPH4218 Physiology 4 Honours or PHPH4258 Pharmacology Honours in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery in the Faculty of Medicine or course 3970 Bachelor of Science) in the Board of Studies in Science and Mathematics

The DN Wade Prize For Medical Pharmacology
• $100
For the best performance in PHPH3055 Medical Pharmacology by a student in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Doerenkamp–Zbinden Prize in Pharmacology
• $100
For the highest aggregate in PHPH3152 Pharmacology in the Bachelor of Science degree course
The FC Courtice Prize

- $100
For the best performance in PHPH2018 Medical Physiology
1 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The FC Courtice Prize

- $100
For the best overall performance in Level III Physiology in a Bachelor degree course

The School of Physiology and Pharmacology Staff Prize for Medical Biology

- $100
For the best performance in PHPH1004 Biology for Medical Students in year 1 of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The School of Physiology and Pharmacology Staff Prize for Physiology 1 or Principles of Physiology

- $100
For the best performance in PHPH2112 Physiology 1 or PHPH2122 Principles of Physiology in course 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

The WE Glover Prize for Physiology

- $100
For the best performance in PHPH3014 Medical Physiology 2 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Psychiatry

The David Jeremy Keen Memorial Prize

- $50
For the best performance in PSCY2101 Human Behaviour in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or in PSCY2201 Human Behaviour in course 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

The John Kerridge Memorial Prize

- $100
For the best performance in Psychiatry in the final year of course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery
Undergraduate and Postgraduate Prizes

Faculty of Medicine

The Drug and Alcohol Foundation Prize
- $250
For the best essay or article on alcoholism and/or drug abuse

Postgraduate Prizes

School of Community Medicine

The John Hirshman International Health Prize
- Annual interest from investment account
For the best performance in CMED9605 Health in Developing Countries by a student proceeding to the degree of Master of Community Health or Master of Public Health

The John Hirshman Prize in Community Health
- Annual interest from investment account
For the best overall performance in the Master of Community Health degree course

School of Health Services Management

The 2/5 Australian General Hospital Association Prize
- $200
For the best overall performance in the Master of Health Administration or Master of Health Planning degree course

The 2/5 Australian General Hospital Association Prize in Health Services Management (Nursing)
- $200
General proficiency throughout the Master of Health Administration or Master of Health Planning degree courses by a trained nurse registered in Australia

School of Obstetrics and Gynaecology

The Pharmacia & Upjohn Prize in Obstetrics and Gynaecology
- $125
For the best performance in the Obstetrics and Gynaecology term by a student at Liverpool Hospital

School of Paediatrics

The Margaret Dance Memorial Award
- $500
For the best performance in paediatric studies by a student who undertakes elective study in Paediatrics within the teaching hospitals of the University
