Message to New Students from the Dean

It is my pleasure to welcome you to the Faculty of Medicine at the University of New South Wales. My colleagues from the Faculty and I are delighted that you have chosen to begin your professional career with us and we congratulate you upon gaining entry to the undergraduate medical course.

You are joining a University community which has depth and breadth in academic enterprise and social opportunity. The University of New South Wales is a robust institution with traditions of educational and investigative excellence coupled with the vitality of an energetic faculty and administration. I encourage you to explore fully the opportunities available to you as you enter our scholarly community. You are joining us at a time of unprecedented change in higher education and health care delivery. Despite considerable turmoil in the financing of both tertiary education and health care delivery throughout the world, the need for excellence in clinical education, biomedical research and teaching remains a clarion call for institutions of higher learning throughout the globe - a call to prevail in their quest to succeed in preparing the next generation of medical professionals. At the University of New South Wales, we look forward to working with you during your time with us as, together, we confront the challenges ahead and turn them into opportunities.

This Faculty takes pride in the values through which we operate:
• We build on the strong foundation laid over the decades since the founding of this Faculty.
• We strive to discover that which is true not simply what is most likely.
• We seek what is best not simply what is possible.
• We aim for durability not expediency.
• We will be worthy of the trust which society places in us to lead in education, research, clinical care and advocacy.

Your medical education will be a series of counterpoints - outward exhilaration and reflective contemplation, energy and fatigue, didactic learning and enquiry-driven self study. All these and many more experiences await you as you explore the space between the science and art of medicine. A talented faculty and dedicated administrative staff stand ready to assist you.

I bid you welcome again and look forward to the many crossings of our paths as you begin your journey with us at the University of New South Wales.

S Bruce Dowton
Dean
Faculty of Medicine
Changes to Academic Programs in 2000

From the start of 2000, the University will move to a new academic structure that will be common to all undergraduate and postgraduate programs. The new structure will lead to greater flexibility and improved educational opportunities for students.

While many programs are already structured in a way consistent with the new direction, others have been revised for 2000 to take advantage of the benefits of the new structure.

What is the New Academic Structure?

The new academic structure is based on units of credit, which replace credit points. A full-time enrolment for one year is defined as 48 units of credit. A normal full-time enrolment for one semester is 24 units of credit. (You will be regarded as full-time if you enrol in at least 18 units per semester.)

Courses (subjects) will also change to reflect the new structure. Most courses will be worth 6 units of credit. Some courses will have a higher or lower value: for example, undergraduate General Education courses will be worth 3 units of credit.

A full-time student in an undergraduate or graduate coursework program will typically enrol in four x 6 unit courses per semester.

Units of Credit

From January, 2000 the University will move to a new academic structure based on units of credit. A full-time enrolment for one year is defined as 48 units of credit (24 per semester). A course will have the same unit of credit value and generate the same load for HECS and fees irrespective of the program or stage in which it is taken. All courses will be measured in whole units of credit. The normal workload expectations are 25 - 30 hours per semester for each unit of credit, including class contact hours, preparation and time spent on all assessable work.

Terminology

Along with the change from credit points to units of credit there will be other changes in terminology from 1 January 2000. What you know as your course (Example: 3502 Bachelor of Commerce) will become your program and what you know as a subject (Example: ACCT2522) will become a course.

Further Information

For information specific to your program, including advice about enrolment, your standing and study options contact your program office.

For general information about these changes and updates to arrangements:

NewSouth Q (Kensington) - 9385 3093
Student Centre, College of Fine Arts - 9385 0684
UNSW Website - www.unsw.edu.au
NewSouth Solutions - nss.admin.unsw.edu.au/student/student_info.html
The academic year is divided into two sessions, each containing 14 weeks for teaching. Between the two sessions there is a break of approximately six weeks, which includes a one-week study period, two weeks for examinations, and three weeks recess. There is also a short recess of one week within each session. Session 1 commences on the Monday nearest 1 March.

Key to Codes
+ Conjoint appointment
* Appointment across two schools
O Adjunct appointment
This Handbook is divided into two main sections comprising undergraduate study and postgraduate study. Read the opening sections of the handbook first, and then read the information relevant to your selected course, undergraduate or postgraduate as appropriate. Detailed information on each subject can then be found under Course Descriptions, which provides full details of course content, contacts and session/prerequisite details.

Information Key

The following key provides a guide to abbreviations used in this book:

IMPORTANT: As changes may be made to information provided in this handbook, students should frequently consult the noticeboards of the schools and the official noticeboards of the University.
Some People Who Can Help You

If you require advice about enrolment, degree requirements, progression within programs or with any other general Faculty matter, contact one of the following people located in the Office of the Dean (map reference B27), Faculty of Medicine:

Undergraduate
Gordon Rees, Administrative Officer
Faculty of Medicine
Tel: (02) 9385 2459
E-mail: g.rees@unsw.edu.au

Postgraduate
Helen Cannella, Administrative Officer
Faculty of Medicine
Tel: (02) 9385 2457
E-mail: h.cannella@unsw.edu.au

Elective term/Clerkships
Christine Hewitt, Administrative Assistant
Faculty of Medicine
Tel: (02) 9385 2452.
E-mail: c.hewitt@unsw.edu.au

General Enquiries
Office of the Dean
Faculty of Medicine
Tel: (02) 9385 2454
Fax: (02) 9385 1874
E-mail: info@notes.med.unsw.edu.au.

The Faculty

The Faculty of Medicine was established when the New South Wales Government accepted a proposal of the Murray Committee of Inquiry into the Future of Australian Universities and announced in December, 1957, that a second medical school in New South Wales would be established within the re-named University of New South Wales.

The Faculty's first students enrolled in 1961 and 25 of these graduated from the six year program in 1966. A five year undergraduate curriculum was introduced in 1974. Although this was a highly successful curriculum, a number of changes in both the hospital and health systems indicated the need for the Faculty to extend the program to a six year curriculum in 1988.

The Faculty of Medicine consists of all members of the academic staff, both full time academics as well as conjoint and adjunct appointees from teaching hospitals, student representatives and other persons nominated by the Faculty. The Presiding Member is elected biennially from the professors and associate professors of the Faculty.

The Dean is the principal channel of communication between the Faculty and the University on administrative matters. The Dean and the Faculty are supported by a number of committees, listed below, some of which perform administrative tasks, while many assist in maintaining a constant review of the curriculum and the objectives of medical education.

Schools in the Faculty of Medicine are Anatomy, Community Medicine, Health Services Management, Medical Education, Obstetrics and Gynaecology, Paediatrics, Pathology, Physiology and Pharmacology, Psychiatry and the Clinical Schools in each of the Prince Henry/Prince of Wales Hospitals, St George Hospital, St Vincent's Hospital and the South Western Sydney Area Health Service. Each of these Clinical Schools contains Departments of Medicine, Surgery, and Anaesthetics, Emergency Medicine and Intensive Care. The Faculty is supported in its operations by the Centre for Immunology, National Drug and Alcohol Research, Public Health, Simpson Centre for Health Service Innovation, Thrombosis and Vascular Research as well as the Ray Williams Mass Spectrometry Facility, the Medical Illustration Unit, the National Perinatal Statistics Unit, the Rural Health Unit and the National Centre in HIV Epidemiology and Clinical Research. The Faculty is also affiliated with the Garvan Institute of Medical Research at St Vincent's Hospital, the Prince of Wales Medical Research Institute at the Prince of Wales Hospital, the Children's Cancer Research Institute at the Sydney Children's Hospital, the Victor Chang Cardiac Research Institute, and the Skin and Cancer Foundation.

Goals of the Faculty

The current major goals for the Faculty are to excel in the quality of the undergraduate teaching and the postgraduate research and teaching.

Committees of the Faculty

Faculty of Medicine
Executive Committee of Faculty
Higher Degree Committee
Medical Admissions and Re-enrolment Committee
Medical Education Committee

National Centre in HIV Epidemiology and Clinical Research Management Committee
Centre for Public Health Management Committee
Children's Cancer Research Institute Advisory Committee
National Drug and Alcohol Research Centre Board of Management
Medical Illustration Unit Advisory Committee
Rural Health Education Committee
National Perinatal Statistics Unit Management Committee
Costs in Addition to Fees

Details of fees have been provided in the Guide to Students 2000 but in Medicine there are additional costs.

Students, when embarking on their degrees, may not be aware of the incidental costs which occur from time to time during the program. The following is an estimate, based on students' experience, of the expenditure which is likely to be incurred over the full length of the program. The amounts quoted are, of course, subject to some variation.

$ approx.
Textbooks
Two coats (1 laboratory, 1 hospital)*
Stethoscope
Ophthalmoscope
Laboratory Manuals
Miscellaneous (papers, pens, kits, diagnostic equipment, laboratory manuals and aids, etc)

*One long white coat is required for use in the Schools of Anatomy and Biochemistry and one short coat for use in the hospitals.

Attendance at, and Residence in, Hospitals

From Year 2, students attend hospitals and must wear short white coats while at the hospitals.

There are times in the later years of the program when students are either required or may elect to live in the hospitals for periods ranging from one night to a term. Accommodation charges at the prevailing rate must be paid directly to the hospitals for all periods of residence.

Units of Credit

From 1996, UNSW introduced a university wide credit point system for all courses offered to both undergraduate and postgraduate students. The system means that a course will have the same unit of credit value irrespective of which faculty's program it is counting towards. Students are able to determine the value of courses taken from other faculties when planning their programs of study. The student load for a course is calculated by dividing the unit of credit value of a course by the total units of credit required for the program for that year of the program. Student load is used to determine both HECS and overseas student fees. Students who take more than the standard load for that year of a program will pay more HECS.

Old course measures have been replaced by new university units of credit (UC). Every effort has been made to ensure the accuracy of the units of credit values shown for all courses. However, if any inconsistencies between old and new point measures cause concern, students are advised to check with the Dean's Office for clarification before making course selections based on the units of credit shown in this handbook.

General Education Program

UNSW requires that all undergraduate students undertake a structured program in general education as an integral part of studies for their degree. The University believes that a general education complements the more specialised learning undertaken in a student's chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they value highly graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. As well, over many years graduates of this University have reported that they greatly valued their General Education studies, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden students' understanding of the environment in which they live and work and to enhance their skills of critical analysis.

Objectives of the General Education Program

The following objectives were approved by the Council of the University in December 1994.

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.
2. To enable students to evaluate arguments and information.
3. To empower students to challenge systematically received traditions of knowledge, beliefs and values.
4. To enable students to acquire skills and competencies, including written and spoken communication skills.
5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.
6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.
7. To provide structured opportunities for students from disparate disciplines to interact co-operatively within a learning situation.
8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist courses offered in those other areas.
9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross- and interdisciplinary connections.
10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education Requirements

The basic General Education requirements are the same for students in all single degree programs. Over the program of a degree students must:

- satisfactorily complete a minimum of 12 units of credit in General Education courses or their equivalent;
- undertake an additional fifty-six (56) hours of study which ensures that students examine the purposes and consequences of their education and experience at University, and fosters acceptance of professional and ethical action and social responsibility. This fifty-six hours of study may be distributed throughout the program, or exist as a separate course, depending on the program.

Because the objectives of General Education require students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation, all students are excluded from counting courses toward the fulfilment of the General Education requirement, which are similar in content or approach to courses required in their program.

Faculty Requirements

Each Faculty has responsibility for deciding what courses are not able to be counted towards the General Education requirement for their students. In most cases, this means that courses offered by the Faculty in which a student is enrolled, or courses which are a required part of a program even though offered by another Faculty, are not able to be counted toward the General Education requirement.

Students should consult the General Education Handbook for detailed information about what courses may and may not be taken to fulfill the General Education requirements for each program offered by the Faculty. The General Education Handbook is freely available from all Faculty Offices.
Additional information for undergraduate students who first enrolled before 1996

Transitional arrangements
It is intended that no student will be disadvantaged by the change to the new General Education Program. The old Program had specific requirements to complete four session length courses (or their equivalent) in designated categories A and B. The new General Education Program does not categorise courses in the same way.

As a result, students who enrolled prior to 1996 will be given full credit for any General Education courses completed up to the end of Session 2, 1995.

From the summer session of 1995-96, students will be required to satisfy the unfilled portion of their General Education requirement under the terms of the new Program.

The exemption of General Education requirements for some double or combined degree programs will continue to apply for students who enrolled in these exempt programs prior to 1996.

Students With Disabilities
The University of New South Wales has a policy of equal opportunity in education and seeks wherever possible to ensure maximum participation of students with disabilities.

The University offers a range of assistance: examination support; specialised equipment; educational support; parking provisions; library assistance; note taking; readers and sign interpreters.

A Resource Guide for students is available from the Equity Officer (Disabilities), the Equity & Diversity Unit, the Library and the Student Guide.

It is advisable to make contact with the Equity Officer (Disabilities) prior to, or immediately following enrolment, to discuss support requirements. The Equity Officer (Disabilities) can be contacted on 9385 4770 or at the Equity & Diversity Unit located on Level 2, East Wing, Quadrangle Building.

Each School of the Faculty of Medicine also has a contact officer for students with disabilities.

Student Equity
The University of New South Wales is committed to providing an educational environment that is free from discrimination and harassment. Both Commonwealth and State anti-discrimination law requires the University not to discriminate against students or prospective students on the following grounds: sex, race/ethnicity, age, disability, marital status, pregnancy, sexuality, HIV/AIDS. Also included are acts of vilification on the grounds of: race, HIV/AIDS and homosexuality.

Complaint/Disputes
The University has internal dispute handling procedures to deal with complaints against staff or other students. The Discrimination and Harassment Grievance Procedures are handled by the Equity & Diversity Unit. Complaints that concern academic matters are usually handled initially through the Head of School.

Advocacy and Support
Students can seek assistance with dispute resolution, either in relation to discrimination or academic matters. Assistance can be sought from various areas in the University including: Equity & Diversity Unit; Student Guild Advocacy Service; Student Counselling; Program Co-ordinators; senior academic staff; Heads of School.

Students may be confident that their interests will be protected by the University if a complaint is lodged. This means that students should not be disadvantaged or victimised because they have, in good faith, sought to assert their rights to equal opportunity in education.

Equal Opportunity in Education Policy Statement
Under the Federal Racial Discrimination Act (1975), Sex Discrimination Act (1984), Disability Discrimination Act (1992) and the New South Wales Anti-Discrimination Act (1977), the University is required not to discriminate against students or prospective students on the grounds of sex, marital status, pregnancy, race, nationality, national or ethnic origin, colour, homosexuality or disability. Under the University of New South Wales Act (1989), the University declares that it will not discriminate on the grounds of religious or political affiliations, views or beliefs.

University Commitment to Equal Opportunity in Education
As well as recognising its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards her/his maximum potential. The University further commits itself to program design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

Special Admissions Schemes
The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment. As well, the Faculty of Medicine operates a special admission scheme for students from rural and remote areas and for Aboriginal and Torres Strait Islander Students.

Rural Student Support and the Rural Student Entry Scheme
The Rural Student Support Scheme provides support in a number of areas for students from rural backgrounds. For details about the Rural Student Entry scheme, refer to the Undergraduate Study section.

Aboriginal and Torres Strait Islander Student Entry Scheme
For details, refer to the Undergraduate Study section.

Support of Disadvantaged Students
The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

The Faculty of Medicine also sponsors remedial English classes for those students disadvantaged by English communication difficulties. Details can be obtained from the Office of the Dean.

Program Content, Curriculum Design, Teaching and Assessment, and Printed Material
Schools and faculties will monitor program content (including titles), teaching methods, assessment procedures, written material (including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

Equal Opportunity Adviser Scheme
The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

Harassment Policy
The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.
Grievance Officers and Procedures

Students should attempt to resolve any grievance with the staff member(s) concerned within a reasonable time frame.

If the problem is still unresolved, students should contact staff in the Office of the Dean, who will direct them to the grievance officer nominated from the appropriate school.

Grievance procedures to be followed are detailed in the Student Guide.

Special Government Policies

The NSW Health Department and the NSW Department of Education and Training have special requirements and policies of which students of health-related and education programs should be aware. The requirements relate to:

- clinical/internship placements which must be undertaken as part of the program and
- procedures for employment after completion of the program

Health-related programs

Criminal record checks

The NSW Health Department has a policy that all students undertaking clinical placements, undergo a criminal record check prior to employment or placement in any capacity in the NSW Health System. This check will be conducted by the NSW Police Service and will be co-ordinated by the Department of Health.

Infectious diseases

Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health relating to vaccination and infection control.

An information sheet is available from your program officer and further details can be obtained from your Program Authority.

Education programs

Criminal record checks

It is a requirement that a check of police records be conducted for all teacher education students applying for an unsupervised internship placement in a New South Wales Government school.

Contact your program co-ordinator for further details.
Hospital Teaching Campuses

The Greater Murray Health Service

The Greater Murray Clinical School
The Greater Murray Clinical School is a unique concept for a Clinical School being located in a rural location. Based in Wagga Wagga, NSW, it is a Clinical School for the entire Greater Murray Area. The contribution of the local doctors, availability of the health facilities within the communities and support of the people of the Greater Murray Area, are fundamental to the success of the Clinical School.

Wagga Wagga Base Hospital
PO Box 159, Wagga Wagga NSW 2650
Telephone: (02) 6936 6666, Facsimile: (02) 6921 8243
Wagga Wagga Base Hospital is a 220 bed acute regional hospital and has specialists in most major disciplines (medicine, paediatrics, surgery, orthopaedics, anaesthesiology, obstetrics and gynaecology, ENT, ophthalmology, geriatrics, rehabilitation, psychiatry and emergency medicine). The Emergency Department has 3 staff specialists and has a major trauma role.
The Base Hospital is a significant teaching hospital boasting registrars in medical, surgical, orthopaedics, anaesthesiology, obstetrics and gynaecology, with a number of resident medical officers and medical students and is a primary allocation centre.
Located approximately midway between Sydney and Melbourne, the City of Wagga Wagga has a population of 58,000 providing an excellent country lifestyle with the social, recreational and business amenities of a major rural city.

Albury Base Hospital
PO Box 326, Albury NSW 2640
Telephone: (02) 6058 4444, Facsimile: (02) 6058 4504
Albury Base Hospital is a modern 155-bed facility providing specialist services to the Albury-Wodonga and the surrounding parts of southwestern NSW and northeastern Victoria.
The hospital is the designated regional trauma centre for the region, with a catchment population of approximately 150,000 people. Retrievals are conducted from the hospitals to outlying areas as far as Deniliquin and Corryong. In fulfilling this function, the hospital has a suitably appointed and staffed intensive care unit and emergency department, both of which are accredited for training by many of the Specialist Medical Colleges.
Albury Base Hospital has a considerable emphasis on teaching at both the undergraduate and postgraduate levels, accredited for training by many of the Specialist Medical Colleges and with the NSW Postgraduate Medical School.

South Eastern Sydney Area Health Service

Telephone (02) 9382 9898, Facsimile (02) 9382 9891
South Eastern Sydney Area Health Service was formed in 1995 with the amalgamation of the Eastern and Southern Area Health Services. The Area extends from Sydney Harbour in north through Botany Bay and Port Hacking to the Royal National Park in the south.
The Area provides a range of hospital and community health care services for some 755,000 residents. It also serves a significant daily inflow of people to the Central Business District, the University of New South Wales, local and international airports, Kings Cross and popular beaches. Many people per day transit the area.
Three principal teaching hospitals, three specialty referral hospitals and many associated teaching hospitals are located in the area. There is predominantly an aging population. Approximately 35% of residents are born overseas and 70% of those are from non-English speaking countries. It is anticipated that the population will remain relatively static, with only a projected growth by 2001. Services are being constantly reviewed to ensure that they meet the needs of the community.

Principal Teaching Hospitals

The Prince Henry / The Prince of Wales Hospitals
Barker Street, Randwick 2031
Telephone: (02) 9382 2222, Facsimile: (02) 9382 2233
The Prince Henry Hospital, located at picturesque Little Bay, was first established as the Coast Hospital in 1881 to cope with an outbreak of smallpox. In 1934 the Hospital was renamed The Prince Henry Hospital.
The Prince of Wales Hospital was founded as an annexe of Sydney Hospital in 1953, although hospital services were established on the site following the closure of the Society for Destitute Children in 1915. During the First and Second World Wars, the site served as a Military Hospital and in 1923 and 1945 was used for repatriation.
The Prince Henry and The Prince of Wales Hospitals were joined under a common management in 1962 to form the principal teaching hospitals for the Medical School of the University of NSW.
The Prince of Wales Hospital has recently undergone a period of major redevelopment to accommodate a wide range of services to the Randwick Campus, which it shares with the Sydney Children's Hospital, the Royal Hospital for Women and the Prince of Wales Private Hospital.
The Prince Henry and Prince of Wales Hospitals currently covers all specialties and subspecialties. In addition, statewide services provided include: Hyperbaric Medicine Unit, Spinal Injuries, Lethorrhapy, HIV Special Unit and the Albion Street Centre.

Sydney Children's Hospital
High Street, Randwick 2031
Telephone (02) 9382 1111, Facsimile (02) 9382 1777
This is a paediatric tertiary referral hospital serving the whole of the state, one of two such children's hospitals in New South Wales. It comprises 190 beds located at the Randwick campus. It has close links through specialist and resident staff with other teaching and associated hospitals such as the Royal Hospital for Women and Royal North Shore, Liverpool and Wollongong Hospitals. It provides a complete range of paediatric services and has strong links with adult hospitals for the Medical School of the University of NSW.

The Royal Hospital for Women
Barker Street, Randwick 2031
Telephone (02) 9382 6111, Facsimile (02) 9382 6513
The Royal Hospital for Women is the University's principal teaching hospital in obstetrics and gynaecology. The Hospital was established by the Benevolent Society of NSW in 1866 and was New South Wales' first 'lying-in' hospital. The first medical undergraduate students came to the Royal in 1888. The Hospital relocated from Paddington to Randwick in 1997 to purpose-built facilities.
There are approximately 4,000 births annually and over 6,500 gynaecological procedures. It is a specialist hospital for obstetrics and gynaecology and includes a department of neonatal paediatrics. Since its move to Randwick, the Hospital has established the Endo-gynaecological Unit and the Natural Therapies Unit, an Australian first where natural products are actively researched.
The first baby health clinic in NSW, the forerunner of today's Early Childhood Health Centres, was established here in 1906. The State's first Antenatal Clinic was also started at the Royal Hospital for Women in 1912 and this was the third such clinic in the world. In 1931 the first Archeim Zondek Pregnancy Test was performed in Australia at the Royal Hospital for Women. In 1948 the Royal established Australia's first Cancer Detection Clinic and in 1984 the first Chorionic Villus sampling was performed at the Hospital.
The Hospital's Department of Medical Imaging has an international reputation for research and development of ultrasound technique and equipment in obstetrics.

The Gynaecological Oncology Centre, the first of its kind, was established in 1989 and has world wide standing for its work on ovarian cancer and gynaecological malignancy.

The St George Hospital & Community Health Service
Gray Street, Kogarah 2217
Telephone (02) 9350 1111, Facsimile (02) 9350 3999
Established in 1894, first as a Cottage Hospital, The St George Hospital & Community Health Service is now one of Sydney's busiest principal referral hospitals.

The St George Hospital is an accredited teaching hospital of the University of New South Wales, and has been affiliated with the University since 1964.

Designated as a major Trauma Service, the hospital accepts referrals from outside its immediate area as well as serving a local district population of approximately 225,000 (of whom more than 34% were born overseas).

It has the second busiest Emergency Department in NSW, on a case-weighted basis, and is the busiest in metropolitan Sydney.

A major redevelopment program during the 1990s has provided a state-of-the-art hospital covering all general areas of medicine (excluding heart and liver transplants). The St George Hospital has built an enviable reputation with areas of expertise including Oncology, Orthopaedics and Women & Children's Health as well as research.

Bed numbers fluctuate between 510 and 550 on seasonal demand.

A 200 bed Private Hospital is located adjacent to the campus.

With nearly 2,200 employees, the fully accredited Hospital is situated on the southern Sydney railway line and is a 15 minute drive from Sydney airport.

Facilities on the hospital's campus include a child care centre and car parking.

The St Vincent's Hospital
Victoria Street, Darlinghurst 2010
Telephone (02) 9339 1111, Facsimile (02) 9332 4142

St Vincent's Hospital is a principal referral hospital and a pre-eminent teaching hospital of the University of New South Wales. It is operated in accordance with the philosophy, mission and values of the Sisters of Charity. The Hospital was founded in 1857 and moved to the present site in 1870.

Students of medicine have attended the hospital since 1891. From 1923 to 1969 the Hospital was a Clinical School for the University of Sydney. Since then it has been a Clinical School of the University of New South Wales. The Clinical School and a student hostel were built in 1964. At present the Clinical School contains teaching facilities with audio-visual equipment, common rooms, a library and a pathology museum.

St Vincent's Hospital has 330 beds and is an acute general hospital with highly developed specialist units in adult medicine and surgery and diagnostic services. The Hospital provides referral services for New South Wales and Australia and services for the local community. Specialty services at the Hospital include cardic transplantation, bone marrow transplantation, a Cancer Care Centre which provides an integrated approach to the management of malignancy and a comprehensive AIDS service and a specialist Palliative Care Institute (Sacred Heart Hospice). Sophisticated diagnostic departments which include radiology, all branches of pathology and nuclear medicine support the clinicians of the Hospital. Extensive primary and secondary services are also provided to meet the needs of the local community and these include medical, surgical, geriatric and drug and alcohol services.

Research is undertaken in the Garvan Institute of Medical Research, Professorial Departments, the Department of Clinical Pharmacology and the Anxiety Disorders Unit. There are 18 Chairs at the Hospital which include medicine, surgery, cardiology, endocrinology, immunology, psychiatry and clinical pharmacology. The visiting medical staff numbers 100, there are 80 staff specialists and 150 resident medical officers.

St Vincent's is part of the integrated campus of the Sisters of Charity which comprises St. Vincent's Private Hospital (228 beds), the Garvan Institute of Medical Research, the Victor Chang Cardiac Research Institute and St Vincent's Clinic.

Associated Teaching Hospitals

Calvary Hospital Kogarah Inc
91-111 Rocky Point Road (Corner Fitzgerald Avenue), Kogarah 2217
Telephone (02) 9587 8333, Facsimile (02) 9587 1421

Calvary Hospital Kogarah Inc is an Affiliated Health Organisation conducted by the Sisters of the Little Company of Mary. The Hospital was opened in 1966 and provides multi-disciplinary palliative care services for 80 inpatients and day-only admissions. The Hospital has a 20-bed Geriatric Rehabilitation Unit, full multi-disciplinary team and therapy gymnasium. There is a Community Palliative Care Team offering holistic, family-orientated care to people with terminal illnesses within the South Eastern Sydney Area Health Service who choose to live at home. An Outpatient Clinic is available at Calvary for these and other patients. Calvary staff offers a consultative service to nursing homes and private hospitals.

The Hospital staff is involved in teaching Palliative Care to undergraduate medical students and postgraduate nursing students. Training courses for volunteers in bereavement counseling and other aspects of palliative care are also offered.

Calvary Rehabilitation and Geriatric Service (CRAGS) specialises in helping the frail, elderly, and the disabled of the St George district. CRAGS is the Aged Care Assessment Team, and offers Dementia Support, Podiatry, Hydrotherapy, Mobility Training Clinics and Day Care services. CRAGS also administers the statewide NSW Artificial Limb Service.

The Langton Centre
Corner Nobs and South Dowling Streets
Surry Hills 2010
Telephone (02) 9332 8777, Facsimile (02) 9332 2870

The Langton Centre is a specialist agency for the treatment of addictions. The Centre provides medicated detoxification, group and individual counselling, and medical and psychological interventions for dependent drug users. The Centre operates a methadone maintenance clinic and a needle and syringe exchange program. The Centre is active in a number of clinical research projects, including the investigation of new pharmacotherapy for opioid dependence, accelerated detoxification, and the role of psychiatric morbidity in addictive disorders. The Centre provides training for medical and nursing undergraduate and graduate training.

The Langton Centre was fully refurbished in 1996 and is now linked administratively to Sydney Hospital. The Langton Centre inpatient beds are now located in Sydney Hospital, and this access to general hospital beds has provided the basis for new research projects into intensive methods of inpatient treatment for drug dependence.

Sacred Heart Hospice
170 Darlinghurst Road, Darlinghurst 2010
Telephone (02) 9361 9444, Facsimile (02) 9361 9555

The Hospice was established in 1890. It is owned and governed by the Sisters of Charity of Australia and is a public hospital. It provides a comprehensive palliative care service incorporating medical, nursing, pastoral, therapy, welfare, educational and bereavement services. These services are available to in-patients and home-care patients and extend to the support of the patients' families. Respite care is provided.

Conducted by the Hospice are formal educational programs for Hospice staff, staff from other facilities and tertiary students.

The present purpose-built Hospice was opened on 6 November 1988. It has 71 in-patient beds.
St Luke's Hospital Complex
18 Roslyn Street
Potts Point NSW 2011
Telephone (02) 9356 0200, Facsimile: (02) 9357 2334

St Luke's Hospital Complex, a not-for-profit public benevolent institution provides acute hospital, nursing home and aged care services. St Luke's (Private) Hospital is a 108 bed acute General Hospital providing comprehensive surgical, medical and rehabilitation care. Facilities include 4 operating theatres, 6 bed intensive care unit, a day surgery/procedures unit, endoscopy unit, telemetry/sleep studies unit, rehabilitation unit including hydrotherapy pool and diagnostic radiology service, including CT Scan. Services provided include Colo-rectal Surgery, Ear Nose & Throat Surgery, Gastroenterology, General Surgery, Gynaecology, Specialty Hand Surgery, Neurosurgery, Oral and Faciomaxillary Surgery, Plastic Surgery, Urology, General Medicine and Rehabilitation. Purpose built Day Rehabilitation and Injury Management Centre.

St Vincent's Private Hospital
406 Victoria Street, Darlinghurst 2010
Telephone (02) 9332 7111, Facsimile (02) 9332 7234

The first St Vincent’s Private Hospital opened in 1909 in association with the Sisters of Charity General Hospital whose origins in Darlinghurst date back to 1838. The present St Vincent’s Private Hospital was opened in 1976.

Consultants from most specialties are represented on its medical staff and the Hospital is equipped and staffed to provide tertiary referral services. The Hospital is an acute medical and surgical hospital of 230 beds with nine operating theatres including the Day Surgery Unit, an Intensive Care Unit and a Cardiac Catheter Laboratory.

The Hospital is accredited by the Australian Council on Health Care Standards. The mission of St Vincent's Private Hospital, consistent with the established at the Hospital in 1868.

St Luke’s Hospital Complex also includes the Kirkeston Road Centre in Kings Cross, the Langton Centre at Surrey Hills and the Bourke Street Drug and Alcohol Centre.

A Centre for Sexual Health, jointly administered by the University of Sydney and the University of New South Wales, was established at Sydney Hospital in 1992.

The Hospital has a medical library of full teaching hospital standard and a medical staff common room but provides no accommodation.

The campus has undergone major refurbishment including construction of a patient services block.

War Memorial Hospital Waverley
125 Birrell Street, Waverley 2024
Telephone (02) 9387 1166, Facsimile (02) 9387 7018

War Memorial Hospital, Waverley is a Third Schedule Public Hospital under the governance of the Uniting Church in Australia, NSW Synod.

Opened in 1921 as a 19-bed private hospital under the management of the then Methodist Church, by 1969 the Hospital had grown to a 140-bed Third Schedule Hospital providing general medical, surgical and obstetric services. In 1984, after rationalisation, the Hospital commenced its primary role in geriatric rehabilitation and assessment services.

The Hospital now runs a 35-bed geriatric rehabilitation and assessment unit, a 20-place geriatric rehabilitation day hospital, a 20-bed short stay residental respite unit, a day care unit which provides services for both frail and demential clients and non-English speaking background groups, a podiatry outpatient services.

War Memorial Hospital also supports an aged care assessment team as well as a number of specialist clinics and services. Other service components of the Hospital include spouse accommodation for country patients and office accommodation for the Waverley Community Team.

The South Western Sydney Area Health Service

Telephone (02) 9628 5700, Facsimile (02) 9628 5789

The South Western Sydney Area Health Service became a Principal Teaching Campus of the University of New South Wales in early 1989 and Liverpool Hospital has been upgraded and now provides district, teaching and referral services. To date the University has a presence in the fields of adolescent and mental health, medicine, surgery, obstetrics, pathology and microbiology, community paediatrics, anesthesiology and intensive care, community medicine, general practice, public health, rehabilitation, geriatrics, drug and alcohol services, epidemiology and nursing research.

The Area is responsible for the management of health services within Sydney’s south west. This is an area which combines the older urbanised local government areas of Bankstown and Liverpool, with the urban growth areas of Fairfield and Campbelltown, the residential growth areas of Camden and the mostly-rural Wollondilly and Wingecarribee.

The area is characterised by a predominantly young population and contains a number of ethnic communities. Over the next 10 years, the SWS Area is expected to grow by 115,000 people and presently has a higher than average birth rate compared with the rest of New South Wales.

The public hospitals and nursing homes managed by the South Western Sydney Area Health Service are: Bankstown-Lidcombe Hospital, Bowral, Camden, Campbelltown, Fairfield, Liverpool and Queen Victoria Memorial (Picton). There are three Third Schedule institutions, namely Carrington Centennial Nursing Home, Karitane Mothercraft Society and Braxside Hospital.

The Area Health Service remains committed to the integration of community health and hospital services in order to provide a comprehensive service to its population, which is expected to grow to more than 900,000 people by 2011.
Teaching Hospitals

Liverpool Health Service
Liverpool Hospital and Liverpool Community Health Service
Elizabeth Street, Liverpool 2170
Telephone (02) 9828 3000 Facsimile (02) 9828 6318

There has been a hospital in Liverpool since the early nineteenth century. The present hospital has 530 beds and provides services in medicine, surgery, intensive care, anaesthetics, emergency medicine, paediatrics, obstetrics and gynaecology, dermatology, psychiatry, geriatrics, rehabilitation, drug and alcohol, sexual health medicine, cancer therapy and a range of allied health disciplines. It is a major trauma centre and is developing as the tertiary referral centre for the South Western Sydney Area. A full range of pathology services is provided on site by the Area Pathology service. Specialty medical training is provided in most services, and research activities are rapidly expanding. Academic units have been established in most specialties.

There is a strong community orientation and close links with the Liverpool and Hoxton Park Community Health Services and South Western Sydney Public Health Unit. A Division of General Practice has been formed by local GPs. There are good residential and recreation facilities on the Hospital grounds and a well equipped library. There are well developed education programs for both undergraduates and postgraduates.

The Bankstown Health Service

A major redevelopment of the hospital was completed in 1997 with the opening of the Education and Clinical Buildings.

Bankstown Health Service
Bankstown-Lidcombe Hospital and Bankstown Community Health Service
Eldridge Road, Bankstown 2200
Telephone: (02) 9722 8000 Facsimile: (02) 9722 8570

The Bankstown Health Service comprises the Bankstown-Lidcombe Hospital and Community Health Service. Bankstown-Lidcombe Hospital is a 454 bed Teaching Hospital of the University of New South Wales. The Hospital provides for a catchment area of approximately 180,000 in population.

The Hospital provides a full range of medical and diagnostic services. 1996 heralded the commissioning of a new state-of-the-art hospital. Services include: subspecialties based medicine, surgery, intensive care, obstetrics and gynaecology, paediatrics, anaesthetics, emergency medicine, mental health as well as a strong emphasis on aged care (80 beds for geriatric medicine, rehabilitation, aged psychiatry). In January 1997, an Academic Chair in Aged Care and Rehabilitation was established. The Professor of Aged Care and Rehabilitation is also the Director of the Service. The Hospital also boasts a strong Gastroenterology Service. An Academic Chair in Gastroenterology will be established in recognition of the high level of community interest.

The overall objective is the integration of the hospital with community services to provide an optimal, self sufficient, fully integrated health service to the Bankstown Local Government Area.

The Bankstown Health Service is committed towards high standards of training and education amidst a relaxed and friendly atmosphere. Associated training is available in the majority of specialties for both undergraduates and postgraduates. A strong Division of General Practice is operated by local GPs and is well integrated into education programs and service provision.

The Macarthur Health Service

Campbelltown Hospital
Therry Road, Campbelltown 2560
Telephone (02) 4625 9222, Facsimile (02) 4629 1388

Macarthur Health Service is comprised of Campbelltown Hospital, Camden Hospital, Queen Victoria Memorial Home, Macarthur Community Health Service and Macarthur Mental Health Service.

Macarthur Health Service is undergoing a period of redevelopment that will include a new hospital in Camden and an increase in services and available beds at Campbelltown Hospital. At present, the Health Service has 232 hospital beds providing general medical and surgical, obstetrics and gynaecology, orthopaedic, paediatric, aged care and rehabilitation, palliative care, anaesthetic and mental health services. This includes an 8 bed intensive care/coronary care unit, a very busy 30 bed paediatric unit with a 15 bed Level 2 special care nursery. Emergency Departments operate 24 hours at each hospital, with the Campbelltown service being extremely busy.

Campbelltown Hospital is a general, paediatric, maternity and psychiatric hospital situated in the City of Campbelltown in the south-western suburbs of Sydney. This modern Hospital provides a high standard of general medical care to the surrounding population of over 200,000 with a predominance of young families. The area has one of the highest growth rates in the State and the Hospital is committed to the provision of high standard community, inpatient and emergency care as the population expands.

Camden Hospital
Menangle Road, Camden 2570
Telephone (02) 4629 1000, Facsimile (02) 4629 1016

Camden Hospital is undergoing a period of redevelopment and during this time the services that have remained include general, maternity, emergency and palliative care services. This facility provides services to the local communities of Camden and Wollondilly.

The Fairfield Health Service

Fairfield Hospital and Fairfield Community Health Service
Cnr Polding Street and Prairievale Road
Wetherill Park 2164
Telephone (02) 9615 8111, Facsimile (02) 9615 8240

Fairfield Hospital is a 200 bed facility and provides services in general medicine, general surgery, orthopaedic, urology, plastic surgery, geriatrics, rehabilitation and paediatrics. A twenty-bed detoxification unit, Corella Lodge was opened in March 1999.

The Fairfield Hospital opened in November 1988 and provides health services for the Fairfield local government area community. In addition, the Hospital has a Level II Special Care Nursery, a 24 hour Accident & Emergency Service, a 10 bed ICU and CCU and has in place a Domiciliary Midwifery Program for well mothers and babies.

The South Western Sydney Area's General Practice Unit is located at Fairfield Hospital. The Unit commenced in 1991 and is run jointly with the University of New South Wales and contains a Professor of General Practice. It provides general practice style service for patients and staff of the Hospital. It also acts as a centre of education for existing and future general practitioners in the area and liaises between the Hospital and general practice.

Fairfield Health Service has commenced a Community Paediatric Service with the appointment of a Staff Specialist Community Paediatrician. Appointments of Community Nursing Staff are being made to assist the Paediatricians to provide a comprehensive service in the area.

Comprehensive Health Services are provided from three Centres located in Mitchell Street Carramar, Levuka Street Cabramatta and in Prairiewood on the Hospital campus. Youth primary health care services for residents of Fairfield and Liverpool are provided by FLYHT based at Bonnyrigg. A comprehensive Drug Intervention Service is also operated in Cabramatta.

The relocation of the Kartiane Mothercraft Society to Mitchell Street, Fairfield (Old Fairfield Hospital site) occurred in April 1994. The 72 bed Brasside Hospital provides services in Rehabilitation, Psychogeriatrics and Palliative Care on the grounds of Fairfield Hospital.

Corrections Health Service

Long Bay Correctional Centre
Anzac Parade, Little Bay, 2036
Telephone (02) 9289 2977, Facsimile (02) 9311 3005

Corrections Health Service (CHS) is a Statutory Health Corporation constituted under the New South Wales Health Services Act 1997. CHS provides and coordinates a comprehensive range of health
services for people in custody within the NSW Correctional System. The mission of CHS is: “To improve the health of people within the New South Wales correctional system by providing quality health care to the standard available in the community”. Major clinical programs include General Practice and Primary Health Care, General Medicine / Surgery, Mental Health Programs, Drug and Alcohol Services, Population Health, Indigenous People’s Health Services, Dental, Imaging and Laboratory Services.

The Illawarra Area Health Service

Telephone (02) 4275 5111, Facsimile (02) 4276 1447

The Illawarra Area Health Service covers an area immediately to the south of the Sydney Metropolitan Area, and comprises the Local Government Areas of Wollongong, Shellharbour, Kiama and Shoalhaven. The estimated total population of the Illawarra is 327,000 which comprises 5.4% of the total New South Wales population.

The Illawarra Area Health Service is a network of integrated community and hospital services which provide both public and personal health care.

The Area Health Service has an agreement with the University of New South Wales for the Health Service to be an Associated Teaching Campus of the University.

Associated Teaching Hospitals

Wollongong and Port Kembla Hospitals

The Wollongong and Port Kembla Hospitals are significant components in the establishment and development of a major teaching Area Health Service for the Illawarra. Currently, the Wollongong and Port Kembla Hospitals are Associated Teaching Campuses of the University of New South Wales.

A newly built Clinical Services Block at the Wollongong Campus will be fully commissioned in 1998 and will provide state-of-the-art critical care including a 20 bed ICU and 8 Operating Theatres. The Wollongong and Port Kembla Hospitals provide complimentary services with all acute services located at the Wollongong Hospital. The Port Kembla Hospital comprises 52 beds for Rehabilitation and Psychiatry Services. The Wollongong Hospital with 240 beds provides a full range of tertiary services including medical imaging; maternal and paediatric services; surgical services including neurosurgery and medical services including a full range of medical subspecialties.

The Illawarra Area Health Service also provides a comprehensive psychiatry service for both inpatients and the community. General practitioners throughout the Division of General Practice also have an active role in the integration of community and hospital services and provide excellent training opportunities in general practice.

Shellharbour Hospital

The Shellharbour Hospital has 150 beds (5 of which are high dependency). The Hospital provides emergency, medical, surgical, psychiatric, obstetric and psychiatric services. The GP Training Unit is also based at this Hospital.

The Illawarra Area Health Service provides comprehensive mental health care, with psychiatric care consolidated at Shellharbour Hospital which has 34 acute inpatient beds. Lakeview House, the psychiatric rehabilitation facility for the Area, also located at Shellharbour Hospital has 20 inpatient beds and provides care for 20 day patients.

The Mid North Coast Health Service – Central Sector

Port Macquarie Base Hospital

Wrights Road, Port Macquarie 2444
Telephone (02) 6581 2000, Facsimile (02) 6580 1110

Port Macquarie Base Hospital is the first privately operated and owned hospital in Australia, built specifically to meet the requirements of a twenty year Services Agreement with the NSW Department of Health for the admission and treatment of public patients. The Agreement sets objective standards for the provision of high quality health care including specific quality standards.

This 161-bed Hospital opened its doors to the public in November 1994 and is a comprehensive referral hospital for both public and private patients of Port Macquarie and surrounding areas. Port Macquarie is one of the largest health centres of the region boasting some 45 specialist medical staff. The Hospital provides a 24-hour accident and emergency service; general surgery; orthopaedic surgery; vascular surgery; gynaecology; obstetrics; urology; ear, nose and throat surgery; renal medicine; oncology; cardiology; thoracic medicine; general medicine; paediatric and neo-natal medicine; psychiatry and emergency medicine.

Port Macquarie Base Hospital in the short time it has been opened has received several awards and commendations for its clinical excellence, and also for its excellence in service delivery and quality patient care. In addition to achieving Associated Teaching Hospital status with the University of New South Wales, University of Sydney and the University of Newcastle, the Hospital has been accredited by the Medical Association/Collages of Physicians, Surgeons, Obstetrics and Gynaecology, Orthopaedics and Psychiatry.

The Base Hospital is a significant teaching hospital boasting registrars in medical, surgical and orthopaedic, obstetrics and gynaecology with a number of medical officers and medical students.

The Southern Area Health Service

Goulburn Base Hospital

Locked Bag 15, Goulburn, 2580
Telephone (02) 4827 3111, Facsimile (02) 4827 3248

Goulburn Base Hospital is a major facility within the Southern Area Health Service and currently runs with 85 acute inpatient beds at an occupancy rate of about 85%. It provides many services for the population of the Southern Tablelands and South-Eastern region of New South Wales.

The hospital serves as a secondary referral centre for patients and clients from Crookwell and Braidwood. Referrals for the management of acute physical illness are also received from the St John of God Hospital, from Kenmore Hospital, and from the Goulburn Training Centre (Goulburn Gaol; 650 inmates). The community health service has its administrative base and a number of client services at its premises on the campus of Goulburn Base Hospital. Some community health services for the whole of South Eastern NSW are also based in Goulburn.

Clinical facilities at the Goulburn Base Hospital include general medicine, general surgery, obstetrics and gynaecology, paediatrics, coronary care/high dependency unit, and accident and emergency care. There are visiting specialists from Sydney or Canberra who do major orthopaedic procedures, implanting of prosthetic eye lenses as well as other ophthalmological work including outpatient clinics, and provide a consultant venereology service through the HIV/AIDS unit in Jennings House. These non-residential specialists attend at the hospital weekly or fortnightly.
Faculty Units, Centres and Affiliated Institutes

The Ray Williams Biomedical Mass Spectrometry Facility

The RWBMSF is one of five UNSW beachhead facilities providing research support to investigators on this campus and in affiliated teaching hospitals. The facility is equipped to world class standards and houses ten mass spectrometers which enable all types of mass spectrometry relevant to biomedical and clinical scientists. The facility researches many aspects of health and disease and attempts to help answer questions posed by researchers and clinicians through applying mass spectrometry to other intractable problems.

The Centre for Public Health

The Centre for Public Health was established in 1988 to bring together multi-disciplinary resources to conduct educational programs and undertake research in public health.

The Centre is comprised of the Schools of Community Medicine, Medical Education and Health Services Management and has strong links with other academic and service units such as the National Centre in HIV Epidemiology and Clinical Research, the National Drug and Alcohol Research Centre and the various Area Health Services affiliated with UNSW. Its affiliation with the WHO Regional Training Centre for Health Development provides an emphasis on international health development.

The Centre for Public Health at UNSW and the Department of Public Health and Community Medicine at the University of Sydney are partners in the PHERP-funded Sydney Public Health Consortium. This arrangement is designed to enhance the opportunities for study and research for students and faculty in both universities. Currently students enrolled at UNSW are permitted to undertake up to 25% of their course work at the University of Sydney.

The Centre for Thrombosis and Vascular Research

The Centre for Thrombosis and Vascular Research was formed in 1992 with the purpose of bringing together scientists and physicians based in the Prince Henry/Prince of Wales Hospitals Group, whose research and clinical practice was focused on the causation and treatment of the blockage of blood vessels. The majority of heart attacks, strokes and gangrene of the legs are brought about by blockage of the arteries supplying respectively, the heart muscle, the brain and the lower limbs. Despite real advances these processes still account for a massive cost in premature death and suffering.

Children's Cancer Institute Australia for Medical Research

The Children's Cancer Institute Australia for Medical Research is an independent institute affiliated with the Faculty of Medicine, University of New South Wales. The Institute was established in 1984 and occupies a four-storey complex at the southern end of the Sydney Children's Hospital. Our staff work in close collaboration with members of the Division of Haematology/Oncology in the Hospital. With a staff of over 50, including honours and postgraduate scholars of the University, the Institute undertakes laboratory research on malignant disease in molecular carcinogenesis, leukaemia biology and stem cell biology. The focus of the Institute involves investigation into the nature, origin, cause and treatment of childhood cancers (particularly leukaemia and neuroblastoma) making this facility the only one of its type in Australia.

Garvan Institute of Medical Research – St Vincent's Hospital

The Garvan Institute of Medical Research has a staff of 200 including 45 PhD and MD scholars. The Institute is structured into four major research programs – bone and mineral, cancer, neurobiology and metabolism – which are funded through a Centre grant from the National Health and Medical Research Council. Located on the St Vincent's Hospital Campus, the Garvan Institute focuses on the molecular basis of health and disease, integrating a range of basic laboratory based research approaches together with extensive clinical research.

Medical Illustration Unit

Located in the Edmund Blacket Building at the Prince of Wales Hospital, the Medical Illustration Unit (MIU) provides centralised photography, graphics and digital imaging services to the Faculty of Medicine and its teaching hospitals.

The Unit incorporates well-equipped facilities for clinical, scientific and general photography in the studio or location, maintains a display preparation area, and operates a high-resolution computer slide imaging service.

MIU's eight staff annually produce around 60,000 slides and prints for lectures and publications, 1,000 items of finished artwork and 300 scientific posters, thereby supporting the teaching, research and patient care commitments of the Faculty and its hospitals.

National Centre in HIV Epidemiology and Clinical Research

The National Centre in HIV Epidemiology and Clinical Research (NCHECR) is recognised worldwide as a leader in HIV/AIDS research. The NCHECR undertakes research into HIV/AIDS that focuses on an epidemiology, clinical research and clinical trials, in collaboration with other research centres, government departments, the pharmaceutical industry, community groups, health clinics and general practitioners. The priorities of the NCHECR include surveillance and monitoring of HIV infection and AIDS, epidemiological studies of transmission and disease progression, identification of social and behavioural factors affecting HIV disease and the establishment of Australia as a primary site for clinical trials of HIV therapy. As an extension of its role in HIV/AIDS, the Centre also carries out epidemiological and clinical research into other blood borne viruses, particularly hepatitis C and sexually transmitted infections. Another significant area is the NCHECR's contribution to international clinical research and provision of research expertise and training to countries of the Asia-Pacific region.

National Perinatal Statistics Unit (Australian Institute of Health and Welfare)

The National Perinatal Statistics Unit is a collaborating unit of the Australian Institute of Health and Welfare within the Faculty of Medicine of the University of New South Wales. Located on the Prince of Wales Hospital Campus, the Unit is linked with the School of Paediatrics, Sydney Children's Hospital and other groups in the Faculty. The Unit collaborates with State and Territory perinatal groups and various professional groups in developing national perinatal data systems. The Unit's objectives are to monitor and interpret national perinatal mortality and morbidity; to provide a limited perinatal epidemiology service; and to conduct epidemiological research.
The Skin and Cancer Foundation was established in 1978 and is affiliated with St. Vincent's Hospital. The Foundation has four Dermatology registrars and a research fellow as well as undergraduate students who attend the dermatology clinics. A broad range of clinics are devoted to the diagnosis and treatment of skin cancer, psoriasis, contact dermatitis, vitiligo and pigmented skin lesions. There is a large dermatopathology service. Clinical trials as well as research in occupational dermatoses and histopathology are pursued. The Foundation provides Sunscreen Testing and Irritancy Testing for new products. The Foundation is active in community education relevant to skin disease. It has also established a second clinical and teaching facility at Westmead.

The Simpson Centre for Health Service Innovation

The Simpson Centre is a NSW Government funded Research Centre with a strong history of applied research and health service innovation. The genesis of The Simpson Centre was in response to increasing pressure for practical solutions to improve acute services. This has now expanded to include research across traditional boundaries to link with community based health care delivery. The principal objectives of the Simpson Centre are to: innovate, evaluate research and develop health service systems; disseminate research results and facilitate implementation of validated service innovation. This approach also incorporates examination of cultural and psychosocial factors influencing service delivery and utilisation.

The Simpson Centre has a memorandum of understanding with the Collaboration for Cancer Outcomes Research and Evaluation (CCORE) which is also located within the Simpson Centre facility, and whose principal focus is on evaluating outcomes of cancer treatments and services.

The Biomedical Library

The Biomedical Library provides library services for staff and students from the Faculty of Medicine and the Faculty of Life Sciences. It is closely associated with the libraries of the teaching hospitals of the University and with the Curran Foundation Library at the Garvan Institute of Medical Research.

The Biomedical Library is located on levels 2, 3 and 4 of the Mathews Building Annex and is physically connected to the other Special Libraries via a link through Level 3 of the Main Library building. All Biomedical Library material has an MB or MBQ prefix. Serials are shelved on level 2 and 3, in alphabetical order by title. (Details about the Biomedical Library books, serials, multimedia and audiovisual material can be found in the Library catalogue.)

In addition, the Biomedical Library provides web access (see web address below) to a wide range of biomedical databases, full text electronic journals, and the best medical and life science web resources.

Professional staff are available at the Information Desk on Level 2 to provide reference services and to assist in the use of the catalogues, the internet, and biomedical databases. Classes are also provided which ensure students and academic staff can make best use of these information resources.

The Library provides special services for external students and remote users. Details of these services are listed on the Library's home page.

(http://www.library.unsw.edu.au/~biomed/biomed.html)
The University of New South Wales Medical Society (Medsoc)

The University of New South Wales Medical Society (Medsoc) is the representative body of the medical students of the University. Besides providing a medical bookshop, it has the primary functions of initiating and maintaining communication between students, medical educators and administrators both within the University and outside of it. Medsoc also hosts a number of educational events and social stimulation, for its members, in order to promote a pride in and a sense of belonging to the Faculty. Membership is free and automatic to all medical students.

There are a number of annual social events, including the First Year Orientation Camp, a combined harbour cruise (with medical students from Newcastle and Sydney Universities), the Medsoc Classical Night, the Medsoc Talent Quest and the Med Ball. Medsoc also hosts a number of speaker nights including the Elective Seminar Night, Viva Survivor, Women in Medicine and the Spring Symposium.

A biannual journal Idioglossia is produced by the Society to keep members informed. Medsoc is also in the process of establishing a website to further facilitate medical student interaction.

The Society maintains communication with all levels of Faculty through the President, Vice-Presidents and Year Representatives, while other Medsoc members hold positions on the Student Guild (UNSW's peak student representative body). These officers together with the Secretary, Treasurer, Casoc Representative, Bookshop Manager and AMSA Representative constitute the Medsoc Executive which is elected annually in October.

At a national level UNSW Medsoc is affiliated to AMSA (the Australian Medical Students' Association) to ensure our concerns and views are expressed at a national level. This affiliation ensures that medical students are represented at both a University and Federal level.

All students are encouraged to participate in the Society's activities and to attend the Medsoc meetings which are held on the first Wednesday of every month in the Edmund Blackett Lecture Theatre at the Prince of Wales Hospital. Enquiries should be addressed to the Secretary of the Medical Society, c/o Medsoc Bookshop, Old Morgue Building, Prince of Wales Hospital, Randwick NSW 2031.

The Medsoc Bookshop is the most important service provided by the Society to students. Textbooks, white coats and diagnostic equipment may be bought cheaply, usually between 23% and 28% off the recommended retail price! A nominal joining fee is payable. The Medsoc Bookshop is student managed to ensure we always get the best prices available. The Bookshop is located at the Barker Street entrance to the Prince of Wales Hospital. Enquiries may be made by phone on (02) 9382 2121, or by fax on (02) 9398 2343.

The Rural Health Unit

The Rural Health Unit was established in 1995 to help address the chronic shortage of doctors in rural areas. Since this time the Unit has seen a rapid growth in personnel and student activities.

The principal areas of responsibility of the Rural Health Unit are:

- To administer special entry schemes, such as the Rural Students Entry Scheme (RSES);
- To encourage and support students who are interested in pursuing a career in rural health;
- To promote rural health through various avenues, eg. the media and lobbying to the government;
- To promote rural health as a viable alternative to urban based medical practice;
- To provide a forum for communication between metropolitan and rural health professionals, eg. workshops;
- To conduct research into rural health issues; and
- To help support the UNSW Greater Murray Clinical School which will increase the opportunities for rural clinical learning.

Undergraduate Rural Health Society

The rural health club has been established within the Faculty to provide:

- undergraduate students with information about career options and encourage their choice of a career in rural Australia;
- undergraduate students with information concerning issues in the provision of health services in rural Australia; and
- practical experience of working and living in rural areas through organised weekend field trips.

The Society may be contacted through the administrator, Rural Health Unit, School of Community Medicine tel (02) 9385 3250.
Selection into the Faculty of Medicine

Entry is competitive and applications are considered and assessed on academic merit. There is no special provision for 'mature age entry' to Medicine.

There is a small intake quota for applicants who have completed or partially completed tertiary studies. Such applicants are assessed on the basis of their tertiary results in conjunction with their matriculation results. Competition is such that an outstanding level of academic achievement is required. Because of the integrated nature of the program it would be exceptional for admission to be granted to other than first year.

Applicants who have completed a Year 12 qualification for the third or subsequent time will have a 5% penalty imposed on the most recent attempt. Applicants seeking entry on the basis of a Year 12 qualification obtained after having been admitted to a tertiary institution and having recorded a result will also have a 5% penalty imposed on the Year 12 UAI or equivalent.

Overseas Students

Applicants from overseas may only compete for entry to the medical program as either fee paying students or as holders of a scholarship awarded by the Australian Government. Enquiries regarding admission of overseas students should be directed either to the Director of International Programs or the Admissions Officer, Faculty of Medicine, both at the University of New South Wales, Sydney NSW 2052, Australia. Enquiries regarding Australian Government scholarships should be directed to the local Australian Diplomatic Mission.

Prerequisite Requirements

The most suitable Higher School Certificate studies (or equivalent) for those who wish to enter the Faculty would include 2 or more units of Mathematics, English and Chemistry. (The 2 Unit Mathematics courses, Mathematics in Society and Mathematics in Practice, and the 2 Unit English course, Contemporary English, are not acceptable.) To be eligible for selection into the Faculty, students must obtain the required program prerequisite scores in the HSC (or equivalent) in Mathematics, English and Science/Chemistry courses.

The following prerequisite requirements were current at the time of publication of this Handbook.

Program prerequisites for 2000

HSC Mathematics
2U (60-100) or,
3U (1-50) or,
4U (1-100)

HSC English
2U General (80-100) or,
2U Related (65-100) or,
3U (25-50)

HSC Science
2U (Chemistry) (67-100) or,
3U (90-150) or,
4U (1-200)

Note that for entry in 2001 and beyond there will be no prerequisites. However there will be assumed knowledge. Assumed knowledge is a level of achievement at the HSC (or equivalent) considered desirable for successful study in a program or first year course.

Students who do not have the assumed level of knowledge are not prevented from enrolling, but may be placed at a considerable disadvantage.

Prospective students are advised that while it is not a requirement, they should include Physics in their high school program as knowledge of this discipline is useful in the first years of the medical program. Students who have not included Physics in their high school program are strongly advised to undertake the short 'bridging program' in Physics organised at the University of New South Wales preferably before commencing enrolment in the medical program, or at least before commencing the second year of the standard medical program. There is also an assumed knowledge of basic organic chemistry. A knowledge of Biology is also desirable.

It should be noted that it is assumed that upon enrolment students have an adequate command of English language and communication skills. Those students who feel they may lack skills in this area should consult with their lecturers or tutors, or staff of the Office of the Dean, who can arrange special English language support classes. Students who do not have adequate English language communication skills may not be permitted to progress in the program and may be required to complete satisfactorily an additional remedial English program before being deemed as having passed the year.

Admission of Aboriginal Students

The Faculty may admit suitably qualified Aboriginal and Torres Strait Islander people. A pre-Medicine Program, run from mid January for one month is part of the preparation and selection processes for indigenous students applying for medicine. Further information regarding the admission criteria may be obtained from the Aboriginal Education Program on (02) 9385 3805 or (02) 9398 2611.

Admission of Disadvantaged Students (ACCESS Scheme)

The Faculty may admit within quota, a number of students of high academic potential whose education has been disadvantaged over a two year period by circumstances beyond their control. Applicants must meet all Faculty program prerequisites. Further information may be obtained from the Access Scheme Co-ordinator at the University on (02) 9385 5434.
Rural Student Entry Scheme

The Faculty has set aside twenty places in its medicine course intake each year for students of rural origin who are able to demonstrate to the Faculty that they meet a number of selection criteria. The scheme is designed for high school, undergraduate and graduate students. Further information may be obtained from the Rural Health Unit, School of Community Medicine at the University, tel. (02) 9385 3250

Application Procedures

Applications for entry into the Faculty should be directed to the Universities Admissions Centre, Locked Bag 500, Lidcombe, NSW 2141, telephone (02) 9330 7200. The closing date for application is generally 30 September of each year but may be extended on payment of a late fee.

3801 Medicine Program
BSc(Med) MB BS

This six year program leads to the award of the degrees of Bachelor of Science (Medicine), Bachelor of Medicine, Bachelor of Surgery – BSc(Med) MB BS.

These degrees, which are in effect a single degree, may be awarded with Honours Class 1; Honours Class II, Division I; Honours Class II, Division II or at Pass level. The award of honours is determined on the basis of a student's performance throughout the six year program, and is usually obtained by using the weighted average mark for each year, calculated by weighting the courses according to units of credit.

On completion of Year 3 of the six year program, students also qualify for the degree of Bachelor of Science (Medicine). Students would not ordinarily be awarded the BSc(Med) until the completion of the requirements for the award of the MB BS. However, students who have completed the requirements for the award of the BSc(Med) and are leaving the Medicine Program 3801 (BSc(Med)MB BS), either through their own decision to withdraw or upon exclusion by the University, are eligible to be awarded the BSc(Med) degree at that stage.

Students who have achieved a high standard in their studies may undertake an additional one year program of supervised research leading to the award of the BSc (Med) Honours. For details see the program description for 3831.

Objectives of the Medicine Program

The objectives of the Medicine program are:

1. To produce a graduate with knowledge of medical and behavioural sciences sufficient to understand the scientific basis of medicine and to go forward with medicine as it develops further.
2. To provide a graduate with the flexibility of outlook and training necessary to progress to any field of endeavour in medicine or related disciplines.
3. To provide education in clinical methods and patient care in the main branches of medicine and surgery so that the graduate could undertake patient care under supervision at the level of an intern.
4. To help the graduate understand professional and ethical principles and to be at all times mindful of the individual's obligations to patients, colleagues and the community.

Supplementary Assessment

Details of assessment requirements are contained in the sections on particular years and courses in the program. The following regulations relate to supplementary assessment, which apply to all years of the Medicine program.

Course examiners may, in the time between the sitting of an assessment and the meeting of the Assessment Committee, require students to present themselves for further assessment to resolve any doubts as to a student's performance. After the Assessment Committee meets further assessment may be given to allow the Assessment Committee to resolve a doubt. In Years 3, 4 and 6 such additional assessment is usually undertaken in December and in Years 1 and 2 in the following January and February. Such further assessment may be given when students, through illness or some other acceptable circumstances, have been prevented from taking one or more of the assessments or have been disadvantaged during the assessment.

In Year 5, course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5.4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5.4.

Further assessment will not be granted when the composite mark accurately reflects failure to achieve the required standard of knowledge and understanding of the course.

Special Consideration

Students who have been prevented from taking assessments or have been disadvantaged during assessments are required to apply at the Student Centre for special consideration. Submission of details of any sickness or disadvantage must be in accordance with the University rules on special consideration as printed in the "UNSW Student Guide". Special consideration requests will normally not be considered if more than seven days have elapsed since the final examination in the affected course or courses.

Show Cause

The Faculty's Assessment Committee requires all students to show cause why they should be allowed to re-enrol if their progress will result in their taking more than one year longer than the normal length of time for their program. Such additional time can be due to failure, leave or a combination of both failure and leave.

Advice to Students on Computing Requirements

The stage has been reached where the use of information technology in education is no longer novel, but is a standard tool used widely by lecturers and students. Prospective students need to be aware that UNSW is a place where information technology will be integral to their education, and that staff can expect students to have access to and use information technology.

UNSW expects all new students to have off campus access to a standard modern computer with CD drive and internet connectivity (e.g. via a modem). The software on the computer should include:
• a word processor able to import and export RTF files
• a spreadsheet program able to import and export ASCII delimited tables
• a drawing/painting program able to import and export images in widely used formats such as GIF, JPEG, TIFF or PNG
• software able to read PDF and Postscript files (1)
• a Java 1.1 capable Web browser that supports HTML 2.0 (1)
• software to enable file transfer using the FTP protocol (1)
• networking software to enable TCP/IP connection (e.g. via a modem using PPP) (1)
• email software able to link to a popserver
• anti-virus software (1)
(1) UNSW's Division of Information Services is able to provide software of this type with students being charged only for handling and media costs.

As computers remain expensive items, UNSW will provide limited on-campus computer facilities that meet these standards for students who are unable to obtain access to off-campus access to such resources.

Student Photographs and Identification Badges
In Year 1 of this program, each student is required to be photographed during the first session. These photographs are required for School and Faculty purposes and are also used to produce identification badges, which must be worn in the hospitals.

Immunisation for Medical Students
The Faculty's policy on the immunisation of medical students is as follows:
All students should be aware of their immunity or lack of immunity to common infectious diseases which they will encounter during clinical training and later in practice. Students without a history of past illness or immunisation will be at risk of acquiring certain infections and subsequently at risk of transmitting those infections to patients.

All Students
In the absence of a reliable history of immunity, students are advised to be immunised against the following infections: rubella, measles, mumps, hepatitis B (HBV) and tuberculosis (TB). A personal history of mumps, HBV and TB or a history of past immunisation against rubella, measles, mumps and HBV are reliable in predicting immunity. It is not necessary to have pre-immunisation antibody testing performed if you are uncertain of your immunity. Skin testing (Mantoux test) for TB should be performed before immunisation for TB.

It is also advisable that students are aware of their immune status to chickenpox (varicella). A blood test for antibodies can be performed if there is not a personal history of chickenpox.

If students require any of the above immunisations, or are uncertain of their immune status, they should see their local general practitioner or, if preferred, may attend the UNSW Health Service. The UNSW Health Service is located on the ground floor of the East Wing of the Quadrangle Building.

The Office of the Dean can provide students with information on the names and locations of medically qualified staff of the Faculty with appropriate expertise in infectious diseases who have agreed to be available to offer confidential advice on these matters, but students may prefer to consult their own medical practitioner or other medical adviser.

It is strongly recommended that documentation of past illnesses, immunisation history and results of blood tests be kept for future reference. A form is available from the Office of the Dean for this purpose. It is advisable that the information on this form be verified by students' own doctors or the UNSW Health Service. Students who object to being tested or immunised should discuss their objections with their doctor.

4th, 5th and 6th Year Students
The Medical Board of NSW has recently determined that while mandatory testing for Human Immunodeficiency Virus (HIV) and HBV is not required, any medical practitioner or student has a professional responsibility to take appropriate steps to know that his/her HIV and HBV status is negative before undertaking an 'exposure-prone procedure'.

Such procedures are characterised by the potential for direct contact between the skin of the health care worker and sharp surgical instruments, needles or sharp tissues (spicules of bone or teeth) in body cavities or in poorly visualised or confined body sites (including the mouth).

Students are usually required to undertake such procedures as part of their undergraduate program. However, students who do not know their HIV/HBV status or know that they are infected must refrain from participating. Since testing is not mandatory, no reason need be given for declining nor could any reason be inferred from a declination.

Matters relating to infectious diseases are constantly under review and the Faculty policy may be amended as the policies of the NSW Health Department or Medical Board or other relevant government bodies change.

Students who are infected with any blood-borne infections (i.e. HIV, HBV or Hepatitis C) should seek advice on their future professional development. A medical practitioner infected with HIV and/or HBV who is not impaired may be able to continue to practice medicine that does not involve exposure-prone procedures.

Medical practitioners who knowingly do not take appropriate measures to reduce their risk of transmitting infections may be liable to charges of professional misconduct if they are responsible for transmitting an infection. Students and medical practitioners in this position may be vulnerable to legal action.

Program Details

Year 1
This year is conducted in two academic sessions and consists of four courses plus four General Education courses, as shown in the table below.

Assessment
Biology is taught only in Session 1 with a final assessment at the end of that session. The other three medicine courses extend over both sessions and incorporate a final assessment at the end of Session 2. Assessments in courses which extend over the whole year also take place at the end of Session 1 in those courses but do not constitute a barrier to progression to Session 2.

Students who do particularly poorly in the mid-year assessments will be interviewed by staff from the Office of the Dean and/or an appropriate member of the academic staff, before proceeding to Session 2. Such students may discontinue without failure at that time.
Rules of Progression

Students who have passed all medicine courses in Year 1 may progress to Year 2. General Education courses or their equivalent may be carried to Year 2.

Students repeating the year are required to enrol in all courses in Year 1, other than any General Education course(s) passed.

Allocation to Hospitals in Year 2

During Session 2, Year 1 students are asked to list their preferences regarding allocation to teaching hospitals. The allocation is made after the Year 1 examinations and student representatives are involved in the allocation procedure.

Year 1 Course Descriptions

For further information regarding these courses contact the course authorities.

ANAT1006
Anatomy 1
Staff Contact: Dr D Vu
UOC12 S1-HPW5 S2-HPW7

Objectives: To acquire sufficient knowledge of topographical, surface and radiological anatomy of the limbs, head, neck and back to form a basis for subsequent clinical studies; to understand how a knowledge of anatomy is applied in clinical practice; to know sufficient principles of tissue histology to be able to undertake successfully more detailed studies of histology and embryology in Year 2.

An introductory course in human anatomy, embracing the disciplines of gross anatomy (topographical anatomy) and histology. Teaching hours per week include: one 3-hour practical/tutorial class of Anatomy, with an additional 2-hour class of histology in Session 2 only, together with 1-2 hours of lectures in Session 1 and 2 hours of lectures in Session 2.

Gross anatomy of the musculoskeletal system; topographical and radiological anatomy of the upper and lower limbs, head and neck, and back; introduction to microscopy and cell science; morphological aspects of cell function; histology of basic tissues (epithelia, muscle, nerve and connective tissue).

Assessment: In addition to the end of year assessment, there is a mid-year assessment and a mid session assessment which contribute to the final assessment for the course but do not constitute barriers.

BIOC1319
Biochemistry for Medical Students
Staff Contact: A/Prof K Barrow
UOC12 HPW6 F

Objectives: To obtain sufficient understanding of chemistry and biochemistry to recognise the essentially fundamental basis of all living systems; to acquire a knowledge of chemistry and biochemistry essential for the study of physiology and pharmacology; to gain experience in laboratory skills and the use of the scientific method; to understand the structure, function and biosynthesis of the macromolecules that are indispensable to life; to gain insight into the ways in which the body uses metabolic fuels and the regulation of these metabolic processes so that growth and homeostasis are maintained; to understand the basis of practical biochemistry, including those procedures that are relevant to clinical diagnosis.

Assessment: In addition to both a mid-year and end of year examination, there is continuous assessment throughout the year.

MFAC1001
Introductory Clinical and Behavioural Studies
Staff Contacts: Ms S Beecher and Dr N Keik
UOC8 HPW4 F

Objectives: To enable students to gain a better understanding of themselves and other people as a basis for the respectful and considerate treatment of patients; to stress the importance of seeing patients as people; to develop basic interviewing skills; to heighten cultural awareness; to develop understanding of the experience of loss; to gain experience in and understanding of the group process in preparation for working in teams; to impart to students an understanding of illness in terms of a biopsychosocial model; to provide an introduction to human development through the life cycle, and health problems of people at different stages; to develop in the student an awareness of the different family, socioeconomic, and ethnic backgrounds of people in Australian society and of the relevance of these backgrounds to the physical and emotional states of patients.

Brief Description: Students attend a three hour small group tutorial each week in Sessions 1 and 2 and 21 two hour lectures spread throughout Session 1 and Session 2. In the tutorial groups, students learn interpersonal communication skills, group dynamics, self-awareness and cultural sensitivity through participatory exercises. Students take the initiative in preparing and presenting group projects.

Lecture themes include: the individual experience of health and illness in terms of a biopsychosocial model; introductory human development through the life cycle (childhood, adolescence, adulthood and old age); the particular problems of disadvantaged cultural groups (e.g. Aborigines, recent migrants) and communication theory; theory of groups; history of medical science; and alternative medicine. The lectures are supported by relevant films and by community visits, activities and discussions in the tutorial groups.

Assessment: Two major assignments, the first assessing basic interpersonal communication skills, and the second the ability to take a broad social-psychological history. Participation in tutorials and a group project is assessed. There is an examination at the end of Session 2 on the material covered in the lectures. Students must pass the examination and the communication skills assignment as well as the whole course to progress to Year 2.

PHPH1004
Biology for Medical Students
Staff Contact: Dr S Head
UOC4 HPW4 S1

Objectives: To provide an understanding of basic biological principles for the continuing study of human biology and medicine.

An introductory program consisting mainly of lectures which will be complemented by practical classes and one excursion. Topics include: basic cell biology; introductory genetics; invertebrates; parasites; ecology, evolution; comparative anatomy and physiology.

Assessment: Assessment is based on an examination at the end of Session 1 and a practical examination during the session.

Year 2

This year is conducted in two academic sessions. Teaching in the courses Anatomy 2, Medical Biochemistry and Genetics, and Physiology is integrated and aims to give students a broad knowledge and understanding of human structure and function based on scientific principles, relevant to further study in medicine. In Clinical Studies 2, students make contact with patients and the physical aspects of disease, in order that they may apply their knowledge and understanding to the clinical situation. The strand dealing with human behaviour which was studied in Year 1, is continued.

Assessment

Major assessments take place in the November/December assessment period but progressive assessments may take place throughout the year. Details of progressive assessments are provided by the appropriate course authority.

Rules of Progression

A student enrolled in the second year of the Medicine program who fails in any course of that year, other than General Education courses, shall be required to repeat all courses, provided there is no conflict with the rules for re-enrolment.

Year 2 Course Descriptions

For further information regarding these courses contact the course authorities.

ANAT2007
Anatomy 2
Staff Contact: Dr E Tancred
UOC14 HPW7 F
Prerequisite: ANAT1006

Objectives: To gain knowledge and understanding of the gross and microscopical structure of the internal organs and the brain; to be able to correlate embryonic development with the structure of normal organs and tissues and with the establishment of the anatomical relationships in the body; to correlate function and structure in the organ systems; to acquire basic understanding of the clinical relevance of the anatomical structures studied.

Instruction is organised according to the organ systems and includes the cardiovascular, respiratory, alimentary, urinary, genital, endocrine, lymphatic and nervous systems. In all instances the clinical relevance of the anatomical structures is emphasised. The course consists of four subsections, each having separate lectures and tutorials: Gross Anatomy, Histology, Embryology, and Neuroanatomy. Gross Anatomy and Histology are taught in Session 1, Neuroanatomy and Embryology are taught in Session 2. Neuroanatomy covers the basic organisation and function of the brain and spinal cord with particular reference being made to the sensory and motor systems.

Assessment: Apart from continuous assessment tests and practical examinations there are separate examination papers for Histology (S1), Embryology (S2), Gross Anatomy (S1) and Neuroanatomy (S2). At the end of Sessions 1 and 2 there are separate examinations in Histology and in Embryology respectively. Students must pass each component to pass the whole course.

PHHP2018
Medical Physiology 1
Staff Contact: A/Prof R Holland
UOC16 HPW8 F
Prerequisite: PHPH1004

Objectives: To gain knowledge and understanding of the function of the cellular elements of the body and the function of certain major body organ systems in humans; to gain experience in the use of medical instrumentation and in the measurement of variables in mammalian biological systems; to gain experience in problem-solving approaches in the study of the physiology of the normal person; to integrate knowledge of anatomy, biochemistry and physiology to provide an understanding of human structure and function.

Systematic lectures, tutorials, practicals and demonstrations deal with cells and excitable tissues, circulation, respiration, kidney and body fluids, gastro-inestinal tract and temperature regulation. Attention is paid to the principles of physics and statistics necessary to understand the functioning of cells and organ systems. Clinical material illustrates the relevance of the program to the study of medicine.

Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

MDSC2001
Clinical Studies 2
Staff Contact: Prof J Dwyer
UOC4 HPW2 F
Prerequisite: MFA1001

Objectives: To extend knowledge and understanding of normal structure and function by demonstrating the disturbances which occur in disease. These studies are closely integrated with Anatomy, Physiology and Biochemistry so that the application of basic medical science to the clinical situation can be clearly seen. Students will attend a teaching hospital for half a day each week to see patients from whom they will take histories. During this time there will be one group tutorial for the presentation and discussion of clinical histories and the demonstration of clinical signs. In these sessions, students will acquire the ability to take a clinical history from a patient with an uncomplicated medical problem, present the history, both orally and in writing, using clear unambiguous medical terminology and in a standard form.

To demonstrate how symptoms and signs can be interpreted as disorders of function and how this knowledge aids in the process of diagnosis. By the end of the year it is important that students are familiar with the basic requirements of a medical history and have seen a number of examples of disorder anatomy and physiology.

Assessment: Examination of two written clinical histories per session and examination of a student's ability to present these histories orally. In Session 2, students are required to submit a case study. There is an emphasis on communication skills. Additionally, there will be continuous assessment by tutors. Students who fail to reach a satisfactory standard will be required to undertake further assessment which may include a clinical and viva voce examination.
covered include: risk behaviours; anxiety; stigma; social class and health; the sexual response and how it changes across the life-span; and a range of biotethical topics including human and animal experimentation, euthanasia, the doctor and the state.

A handbook for the course is produced each session and may be borrowed from the Biomedical Library Closed Reserve or purchased from the School of Psychiatry.

**Assessment:** In Session 1, assessment consists of two written examinations, a tutorial assignment, a tutorial presentation and a class test. In Session 2, students are required to write a major essay on Bioethics, present a tutorial paper and sit a final written examination.

### Year 3

Year 3 is conducted in two academic sessions. The principal courses of the year are Medical Pharmacology, Medical Physiology, Microbiology for Medical Students and Pathology. Clinical Studies 3 continues the clinical program commenced in first year. Students also take the course Medical Ethics and Health Law, which builds on material presented in first year ICBS and second year Human Behaviour.

An understanding of Immunology is also required to enable students to deal with the pathogenesis of specific diseases. To facilitate this understanding, a series of introductory lectures in Immunology provide an outline of the structure and function of the immune system, covering the cells and mediators involved in the immune response. The Immunology program is integrated with the Microbiology course on the response to infectious diseases, and with the Pathology course and is presented in an interdisciplinary fashion, providing a basis for subsequent instruction in the diagnostic and therapeutic aspects of clinical immunology in the later years of the curriculum.

**Assessment**

In addition to the end of year assessment, mid-year progress assessments are programmed in some courses.

**Rules of Progression**

A student enrolled in Year 3 of the Medicine program who fails in any course of that year shall be required to repeat all courses provided that the rules for restriction upon students re-enrolling are not infringed.

**Year 3 Course Descriptions**

For further information regarding these courses contact the course authorities.

**CMED3001**

Medical Ethics and Health Law  
*Staff Contact: A/Prof P McNeill*  
UOC 4  HPW4  F  

Medical Ethics and Health Law builds on medical ethics presented in second year Human Behaviour, to give students additional preparation for ethical issues which arise in their placements in hospitals, general practice and community settings during Years 3 to 6. The course introduces students to medical practitioners' responsibilities in law including the duty of care, obligations to maintain privacy and confidentiality, and the legal basis of registration and de-registration of medical practitioners.

Principles of ethics and rules of law are considered in relation to specific issues including transplantation, predictive testing, withdrawal of treatment, and the rationing of limited health care resources. Tutorials are based on material covered in lectures and seek to expand students understanding of ethics and law through discussion, structured debates and tutorial exercises.

The overall aim of the course is that students learn to demonstrate and apply an understanding of ethics and law as a part of their commitment to social responsibility and considerate and appropriate treatment of patients (and others) in the practice of medicine.

**Assessment:** Consists of two tutorial assignments and an essay (which total 50% of the marks) and an end of session examination (contributing a further 50%).
MICR3228
Microbiology for Medical Students
Staff Contact: Dr Hazel Mitchell
UCG 8 HPW4 F

Objectives: The overall objective is for students to understand the nature of the interactions between parasites and their human hosts, and the fundamentals of human immunology. Early lectures and tutorials are concerned with the basics of the scientific discipline of immunology. In order to achieve the microbiology requirement, students will know the causative agents of common microbial diseases and how they produce their effects, comprehend host defence processes, understand the epidemiology of infectious diseases, understand the basis of prevention and treatment of microbial diseases, appreciate the role of the microbiologist in the diagnosis and management of microbial disease and where appropriate, integrate these objectives with a knowledge of pathology and immunology. Emphasis is given to the nature of the response of pathogens to various physical, chemical and antibiotic agents which can be used to interrupt their normal function. An analytical approach is taken to the means by which microorganisms exist in association with humans and their environment and how they gain access to tissues and produce disease. Attention is given to the mechanisms of host defence against microbial infection. Emphasis throughout the course is placed on diseases of body systems. Laboratory based classes emphasise the role of the laboratory in diagnosis and include the use of problem solving approaches to the study of microbial diseases.

Assessment: This is based on mid-year and end of year examinations as well as a major assignment and practical examination.

PATH3101
Pathology
Staff Contact: Prof D Wakefield
UCO10 S1-HPW6 S2-HPW4

The discipline of Pathology forms a continuous stream of teaching of the pathogenesis of disease throughout the 3rd, 4th, 5th and 6th years of the medical curriculum. In Year 3, the course PATH3101 comprises an introduction to basic disease processes (General Pathology), i.e. those fundamental processes which are common to all tissues and organs of the body. The course covers classification of disease, and deals with both congenital and acquired diseases. The program comprises lectures, tutorials, practical classes and demonstrations on responses of cells to injury, inflammation, aberrations of the blood and vascular system and specific related effects of embolism and infarction, as well as studies of normal and abnormal growth, and of healing and regenerative processes. In addition, it includes consideration of the basic processes of neoplasia and carcinogenesis, as well as an introduction to the pathobiology of such contemporary health problems as environmental toxicology. In order to integrate the teaching of pathology with clinical studies, each fundamental process will be exemplified by references to examples of diseases of organ systems (Systemic Pathology) of practical importance.

Assessment: Proficiency in the course, sufficient to proceed to Year 4, will be assessed by mid-year and end of year examinations which will comprise 30% and 70% respectively of the total mark in Pathology. Both assessments will comprise theory and practical components. Progress self-assessments with automated feedback will be made available on the World Wide Web.

PHPH3014
Medical Physiology 2
Staff Contact: Dr B Nail
UCO 8 HPW4 F 
Prerequisite: PHPH2018

Objectives: To extend knowledge of normal physiology to areas not covered in Medical Physiology I, particularly blood, the nervous and endocrine systems and reproduction; problem solving approaches are emphasised and students are encouraged to integrate their knowledge of anatomy, biochemistry and physiology to provide an understanding of normal human structure and function.

Those principles of biophysics necessary for an understanding of the course are discussed. In addition, the course places emphasis on applied physiology, including the physiology of exercise. Some clinical physiology is included where basic physiological principles are applied to the understanding of selected clinical disorders.

Teaching involves systematic lectures, tutorials, problem based learning exercises, practical classes and demonstrations.

Assessment: Examinations are held both mid-year and at the end of the year and cover both lecture and practical content.

PHPH3055
Medical Pharmacology
Staff Contact: Dr V Kapoor
UCO10 HPW4 F

Objectives: To understand the mechanism of drug action with special reference to drugs of clinical importance; to be aware of the principles of drug interaction. Medical pharmacology is the science of drugs or chemicals used to prevent, diagnose and heal disease, as well as the role of chemicals in the environment that cause disease. The medical pharmacology course is concerned with basic principles of drug action, including the pharmacodynamics, pharmacokinetics and toxicology of drugs of clinical importance.

Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

Year 4

Year 4 of the program is primarily based in the teaching hospitals and comprises 6 terms totalling 41 weeks. Of these weeks, 36 will be spent in the hospital and 5 will be spent on campus. For the majority of the year, students will work as part of a health-care delivery team. The students' responsibilities as part of that team will be increased gradually as new skills are acquired. The philosophy inherent in education by attachment to a hospital team is important. Learning 'on the job' exposes students to real clinical situations incorporating both the medical and social implications of disease and allows the continued development of counselling skills. Thus, students will learn that hospital care should be linked to continuing care in the community, and that there is much emphasis in modern medicine on rehabilitation to maximise patients' chances of resuming their normal role in society. Reading about pathological processes, combined with team discussion of problem patients, provides the ideal environment for the retention of new knowledge.

The teaching of Community Medicine is integrated with clinical studies in the teaching hospitals and is a part of the campus teaching program.

The Pathology course comprises a component of didactic teaching within the framework of the common campus program and a major hospital-based component taught through a tutorial program. The course of Clinical Pharmacology (Therapeutics) is introduced during the common campus program and reinforced during discussions of patient management as part of student attachments to clinical units.

At the commencement of fourth year, each student will receive a syllabus containing details of the integrated program for Clinical Studies, Pathology, Clinical Pharmacology and Community Medicine.

Rules of Progression

Students will be required to pass each of four separate segments of the assessment, namely: a pass in the Community Medicine continuous assessment, a pass in the Pathology viva and project report (as a combined mark), a pass in a Short Case clinical examination, and a pass in the combined written papers.

Students who have not completed the General Education components of the Medicine program and who otherwise are eligible to progress to Year 5 are not allowed to progress until they have satisfied such requirements.
Year 4 Course Description

MDSG4001
Integrated Clinical and Community Studies
Staff Contact: Prof J Dwyer
UOC 46 F
Prerequisite: MDSG3001, PATH3101, PHPH3055

Objectives: By the end of Year 4, students will be expected to have mastered the skills in communication, history taking, and physical examination. Students will be able to generate a list of the patient's problems which includes the physical, emotional and psychosocial aspects of the case. For each problem, students will develop a plan for problem resolution. Students will learn much about management and drug treatment during Year 4 but only the principles of management and introductory aspects of therapeutics will be assessed at the end of Year 4. As Year 4 attachments will not be systematically developed in any one hospital, the approach to a patient's problems and their resolutions, is to be emphasised. This is an important consideration because, as subdiscipline exposure in Year 4 cannot be uniform for all students, it is important that students are distributed to fully utilise the hospital's patients and ensure that they have sufficient contact with patients.

Students will be expected to have mastered the skills which include the following:

- Ability to generate a list of the patient's problems including physical, emotional and psychosocial aspects.
- Ability to develop a plan for problem resolution.
- Knowledge of management and drug treatment.
- Understanding of the principles of management and introductory aspects of therapeutics.

Furthermore, students will be expected to have acquired the following skills:

- Ophthalmoscope; simple suture and knot-tying; application of a plaster; changing of a surgical dressing; passage of a proctoscope; passage of a naso-gastric tube; spirometry; establishment and maintenance of an intravenous line; venesection; rectal examination; urinalysis; urinary catheterisation.

- Observation of various procedures such as those performed in Pathology, as well as by reference to their own ward cases, by consultation with staff of the various departments in Pathology, as well as by reference to their recommended textbooks and specialised text or journal articles.

Each student will be expected to attend a minimum number of autopsy demonstrations during the year. Additional exposure to Pathology will be attained by student attendance at Grand Rounds and Clinico-Pathological Conferences.

Campus Weeks: To minimise interruptions to a student's role while attached to a clinical team, most structured teaching will be carried out during campus weeks. All students will attend the University campus for five weeks throughout the year, during which lectures in Medicine, Surgery, Clinical Pharmacology, Pathology, and Community Medicine will be provided.

Community Medicine teaching will utilise the knowledge and experience gained during clinical attachments to elucidate basic principles of epidemiology, public health, and continuing care. The Pathology lectures and demonstrations will concentrate on the pathogenesis of complex disease processes which cannot be effectively covered in a tutorial format. An excursion to the NSW State Government Forensic Laboratory and Coronial Courts is a compulsory activity.

Where possible, days will be arranged so that a particular course is approached in a multi-disciplinary way. A series of correlation clinics, held during campus weeks, will further emphasise the interdisciplinary approach to understanding a course.

Assessment: A multiple choice examination and a short answer paper will be given at the end of the year and will examine knowledge of Medicine, Surgery, Community Medicine, Clinical Pharmacology and Pathology discussed during the campus program and from the directed reading section in the syllabus. Assessment of Community Medicine will also involve continuous assessment by assignments through the year and the student's participation and contribution to group work. Assessment of Pathology will also involve the submission of a project report and a viva examination.

In addition to the written papers, a clinical short case examination will be held. Assessment will be based on the approach to clinical examination, eliciting of abnormal signs and the interpretation of their significance.

For students to be eligible to sit for the examinations to be held at the end of Year 4, they must have performed satisfactorily on each of their six clinical attachments, developed the required procedural and clinical skills (satisfactory performance in these areas must be certified in a student logbook) and successfully completed the continuous assessment requirements in Community Medicine. Tutors will be involved in continually assessing a student's progress. Those students who fail to reach a satisfactory standard may be procluded from sitting the end of year examinations, or be required to undertake additional clinical and viva voce assessment.

Year 5

Year 5 is comprised of four terms, each of nine weeks. In Terms 5:1 to 5:4 students rotate through blocks of teaching in obstetrics and gynaecology, paediatrics, psychiatry, geriatrics, general practice and subspecialties, rather than studying the courses concurrently. For this purpose students are allocated to a particular group (A, B, C, or D) and will follow the program of that group for the year.

The courses studied in Year 5 are:

- MFACT5001 Geriatrics/General Practice/Subspecialties
- OBST5001 Obstetrics and Gynaecology
- PAEDS5101 Paediatrics
- PSCY5001 Psychiatry

Sequence of Blocks

Group A:
- Term 5:1 (9 weeks) Geriatrics/General Practice/Subspecialties
- Term 5:2 (9 weeks) Paediatrics
- Term 5:3 (9 weeks) Psychiatry
- Term 5:4 (9 weeks) Obstetrics and Gynaecology
Group B:
Term 5:1 (9 weeks) Paediatrics
Term 5:2 (9 weeks) Psychiatry
Term 5:3 (9 weeks) Obstetrics and Gynaecology
Term 5:4 (9 weeks) Geriatrics/General Practice/Subspecialties

Group C:
Term 5:1 (9 weeks) Psychiatry
Term 5:2 (9 weeks) Obstetrics and Gynaecology
Term 5:3 (9 weeks) Geriatrics/General Practice/Subspecialties
Term 5:4 (9 weeks) Paediatrics

Group D:
Term 5:1 (9 weeks) Obstetrics and Gynaecology
Term 5:2 (9 weeks) Geriatrics/General Practice/Subspecialties
Term 5:3 (9 weeks) Paediatrics
Term 5:4 (9 weeks) Psychiatry

Assessment and Rules of Progression
The work of each rotating block is assessed during or towards the end of the block. Students will be required to pass in all four term examinations before progressing to Year 5. Course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5:4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5:4. A student who fails two terms or more will be required to repeat all Year 5 courses.

Preparation for Year 6 Elective Term
Arrangements for Elective attachments in Year 6 must be made by the students. Students should commence these arrangements in Year 4, especially those wishing to undertake attachments overseas. See course description for MFAC6001 under entry for Year 6.

Year 5 Course Descriptions
MFAC5001
Geriatrics/General Practice/Subspecialties
Staff Contact: Prof M. Harris and Dr J. Frith
UOC12
Prerequisite: MDSG4001
This nine week term will start with an introductory week of tutorials in Geriatrics, Ophthalmology, Dermatology, Otorhinolaryngology and General Practice. The remainder of the term will consist of four two week teaching blocks in specialty outpatient clinics, geriatrics, rural general practice and urban general practice.

Geriatrics
Objectives: To gain an understanding of diagnosis and assessment in geriatric medicine; to address the management of certain specific disorders in the elderly such as dementia, falls, incontinence, stroke, mobility disorders, dying and terminal care; to gain information on appropriate drug therapy; to gain insight into the roles of workers involved in caring for the elderly including physiotherapists, occupational therapists, speech therapists, community nurses and nurses in nursing homes; to become familiar with the broad spectrum of geriatric services including the day hospital, the acute hospital, the rehabilitation centre, the nursing home, community nursing and hospice care; to stimulate thought concerning future directions for an ageing Australia.

The course consists of tutorials and practical experience in a range of health care facilities.

Assessment: Students are assessed on a viva voce, written assessments and log book completion.

General Practice
By the end of the course the students should have acquired:

1. An understanding of the knowledge, attitudes and skills required by a competent general practitioner.
2. Skills in communicating with patients especially in history taking and explaining.
4. Knowledge of the principles of management in general practice.
5. An understanding of rural general practice.

During the teaching sessions on campus, at Fairfield Hospital and during the attachments, students are introduced to: a frame of reference for general practice and the GP consultation; a problem solving approach including the ability to cope with uncertainty; responsiveness to the total patient and the patient's life; knowledge of community health resources; self assessment of communication and self directed learning; knowledge of rural practice and issues in rural health.

The teaching will consist of introductory tutorials, a two week attachment in urban general practice, a day general practice skills workshop at Fairfield Hospital and a two week attachment in rural general practice.

Assessment: Students will complete two assignments for the Fairfield tutorial at the end of their first (city) GP attachment, a written assignment on a rural health issue during their second (rural) GP attachment, and a final role play consultation viva assessment.

Subspecialties
Ophthalmology
Objectives: To learn the basic skills of assessment of eye disease and visual impairment. To expose students to the common diseases and conditions of the eye and visual system, and to management of the common conditions of the eye.

The teaching will be organised in skills sessions in the clinical assessment of the eye and use of the ophthalmoscope and other eye instruments. There will also be tutorial classes. Students will also attend specialist clinics.

Otorhinolaryngology
Objectives: To learn the basic skills of the assessment of diseases and conditions affecting the ears, nose and throat. To expose the student to the common diseases of the ear and upper respiratory system and the management of these conditions.

The teaching will be organised in tutorial classes. Students will also attend specialist clinics.

Dermatology
Objectives: To learn the clinical symptoms and signs of the major conditions affecting the skin. To learn the diagnosis of common skin diseases and conditions and their management.

The teaching will be organised in tutorial classes. Arrangements will be made for students to attend specialist dermatology clinics.

Assessment: Students will be assessed through completion of a log attendance at subspecialty clinics and final written objective structured clinical examination.

OBST5001
Obstetrics and Gynaecology
Staff Contact: Prof M Bennett
UOC12
Prerequisite: MDSG4001
Objectives: To be able to take a history and perform a physical examination relevant to the female reproductive system; to recognise common disorders of the female reproductive system; to manage common medical gynaecological disorders likely to be encountered in primary care practice; to provide antenatal and postnatal care for normal women and to recognise deviations from normal; to be able to provide emergency care when indicated and to know the indications for referral.

A program of lectures in core courses, clinical, physiological and pathological conferences and simulated patient management problem exercises. Students are taught in small tutorial groups. Supervised clinical experience is gained in outpatient clinics, inpatient services and the labour wards of The Royal Hospital for Women, St George, Bankstown, and Liverpool hospitals. Neonatal
paediatric experience is integrated with the teaching of Obstetrics and Gynaecology. Full details are described in a booklet published by the School.

Assessment: Continuing evaluation of clinical work, a multiple choice examination and an objective, structured clinical examination in the last week of term.

**PAEDS101**

**Paediatrics**

*Staff Contact: Prof R Henry*

*UOC:12*

**Prerequisites:** MDSG4001

**Objectives:** To understand the physical, intellectual, and emotional development of children; to recognise important interactions between the child, the family and the community; to take a reliable medical history from children and parents/guardians; to perform a reliable physical examination; to communicate with children and parents/guardians; to recognise acutely ill children and initiate management; to recognise and initiate management of common paediatric disorders; to recognise the role of preventative care in child health; to recognise the roles of allied health care professionals.

General Paediatrics and Paediatric Surgery are taught at the Sydney Children's Hospital (5 weeks) and Associated Hospitals including rural rotations (4 weeks). Clinical clerking and practical involvement in care of inpatients are emphasised. Seminars and lectures on core material, case conferences, and instruction in clinical skills are provided. Students are expected to spend one night in four and one or two weekends per term in residence. Neonatal medicine is integrated with teaching of obstetrics and gynaecology.

**Assessment:** Progressive assessment from clinical supervisors through the term, multiple choice, objective structured clinical assessments and clinical examinations in the last week of term.

**PSCY5001**

**Psychiatry**

*Staff Contact: Prof G Parker*

*UOC:12*

**Prerequisites:** MDSG4001

**Objectives:** To be aware of the key symptoms, signs and syndromes of psychiatric disorder; to be able to take a history and conduct a mental state examination; to have acquired those skills necessary for a doctor in general or non-psychiatric specialised practice to decide appropriate management strategies; to be aware of, and have some experience in basic counselling skills; to be able to assess a patient's personality, psychological adjustment, coping repertoires, social function; to appreciate the importance of psychological factors in the diagnosis and treatment of illness; to be trained in interpersonal skills appropriate to clinical practice in any area of medicine; to be aware of the appropriate sections of the Mental Health Act and Guardianship Board legislation; to have received basic knowledge in special areas of development disability, forensic psychiatry, child psychiatry, transcultural psychiatry and psychogeriatrics; to be competent in prescribing psychotropic medications; and to be able to use simple behavioural techniques such as relaxation training.

Formal teaching seminars are held in the mornings and afternoons Monday to Friday in week 1 and mornings and afternoons Monday and Friday weeks 2-8. The remaining days are spent at Prince of Wales, St George, St Vincent's, Sutherland, Bankstown, Liverpool and Campbelltown Hospitals, where small group tutorials, case conferences and video analyses are carried out with academic and clinical staff, and clinical experience is obtained. Attachments to liaison psychiatry teams are organised so that students receive the appropriate teaching of skills related to general hospital patients. Visits to appropriate community facilities and to the Forensic Psychiatry Unit at Long Bay Gaol are organised.

**Assessment:** A video examination is held mid-term to assess interviewing skills. A written examination is conducted on the first day of the last week of term, and viva voce examinations are carried out on the Tuesday and Wednesday of the same week. A liaison psychiatry report and two clinical case histories are also part of the assessment.

---

**Year 6**

The first term in Year 6 is an Elective term (Mfac6001) of 8 weeks. The remaining five terms totaling 33 weeks are devoted to the course Integrated Clinical Studies 6 (MDSG6001) of which 30 weeks is based in the Teaching Hospitals and 3 weeks will be spent on campus.

**Year 6 Course Descriptions**

**MDSG6001**

**Integrated Clinical Studies 6**

*Staff Contact: Prof J Dwyer*

*UOC:44*

**Prerequisites:** MFA5001, OBST5001, PAEDS101, PSCY5001

**Objectives:** To build on the student's experiences in Years 4 and 5 of the program. To ensure that during clinical attachments in Year 6 students are capable of accepting additional responsibility within clinical teams. To ensure a smooth transition from medical student to Intern. To integrate knowledge and skills gained in the previous three years, so that the student's assessment, documentation and management of clinical problems is sufficiently mature and rounded to warrant graduation and provisional registration. To have students leave medical school committed to the importance of continued medical education.

Year 6 of the new curriculum is fully integrated with the fourth year of the program. The year is organised as follows.

After the completion of Year 5, students complete an elective term. Time for this program is provided through the first weeks of Year 6. Students must report to the University in late February to commence the formal work associated with the Clinical Studies program for Year 6.

The next week of the year will involve a campus program similar to those presented in Year 4. Following that week, two further campus weeks will be held during the year. The lecture, tutorial and correlation clinic programs build on knowledge of the disease processes gained in Year 4 and a special emphasis is placed on management, therapeutics and practical information needed for students who will soon commence work as interns.

Individual Principal Teaching Hospitals may strengthen the structured learning experience by providing additional lectures. However the time available for such additional programs will be strictly limited so that students are not diverted from their principal work on the wards.

Five 6-week attachments complete the year. For one of the six week terms, students will be attached to an emergency room and an intensive care unit at a Principal Teaching Hospital, or a selected rural hospital, where appropriate arrangements have been made for supervision. The remaining terms assigned to students will complement terms completed in Year 4. One medical and one surgical attachment will be provided at the students' Principal Hospital and a further term will be provided at a rural hospital.

Students may request a specific program during the flexible fifth term of Year 6, providing their progress has been satisfactory.

As in Year 4, clinical attachments provide an opportunity for learning on the job and the steady increase in the responsibility for patient management will be given to students as their experience and proven performance suggests that this is appropriate. On the wards, a significant emphasis will be placed on mastering procedural skills, therapeutics and such practical matters as interaction with ancillary medical staff and discharge planning.

**Assessment:** For students to be eligible to sit the final examinations they must have performed satisfactorily in each of the Year 6 clinical attachments, developing satisfactory procedural and clinical skills. At the end of Year 6, students will be assessed by means of a focused clinical case examination with emphasis on management and therapeutics, a free ranging viva voce examination and a Multiple Choice Examination involving questions related to medicine, surgery, community medicine and clinical pharmacology, based on the material presented during the campus week lectures in Year 6 and from the directed reading section of the syllabus. All three components of this examination must be passed.
MFAC6001
Final Year Elective Term
Staff Contact: Ms C Hewitt
UOC4
Prerequisites: MFAC5001, OBST5001, PAED5101, PSCY5001

Objectives: These include one or more of the following: to further develop knowledge and skills in Medicine and/or Surgery; to acquire preliminary training for a career in a specialty of medicine; to experience a different pattern of health care delivery from that practised in Australia; to obtain experience which may influence subsequent career orientation; to correct deficiencies perceived by students in their undergraduate program; to obtain a short introduction to research methods and philosophy.

The elective term may include work in one of the following areas: in any school or department within the Faculty of Medicine; in a hospital or medical institution either in Australia or in another country; with a medical practitioner either in Australia or in another country.

Students are encouraged to consider commencing their elective term early by extending it over the period from the end of Year 5 to the end of the third week in February of the subsequent year.

Students should make individual arrangements for electives and are advised that some overseas governments, health authorities and/or hospitals require very early applications, accompanied by certification that the applicant is an enrolled medical student of the University who is eligible to undertake the specified term. When making the arrangements, students should specifically request that an appropriate person is willing to act as a supervisor. The supervisor is asked to submit a report to the Office of the Dean by the end of the term.

Students who gain more than one acceptance for the elective term must communicate their refusals as soon as possible.

Students are encouraged to consult the files containing past student Elective reports, available in the School of Community Medicine. Students are also encouraged to discuss their Elective proposal(s) with a member of staff, perhaps their Clinical Associate Dean.

Assessment: Each student is required to produce a report which describes the nature of the work done during the Elective Term. This should be approximately 1000 words in length. The reports from the student and the supervisor must be submitted to the Office of the Dean no later than the last day of the Elective Term. The reports are forwarded to the relevant Clinical Associate Dean for a decision as to whether the student has completed a satisfactory Term, and thence to the Assessment Committee. It is the student's responsibility to ensure that both reports (including the supervisor's report) are received by the due date and in time for consideration by the Assessment Committee.

In general, students undertaking Elective Terms approved by the Dean are covered in respect of medico/legal claims made or actions instituted against them under the University's public liability and professional indemnity policy. However, this cover excludes claims made or actions instituted within the United States of America or Canada or territories under the jurisdiction of the courts of those countries. Students undertaking Elective Terms in the USA or Canada are therefore advised to ensure that they will be covered under the liability policies of the institutions at which they will be working, or that they arrange their own personal cover before commencing the Term. Students should also be aware that the University does not insure them against personal injury or illness. There is a limited cover provided by an insurance policy taken out by the Student Guild which covers program related activities within Australia only. Enquiries about this policy should be made directly to the Student Guild.
Program Details

The Science/Medicine program is an alternative program of study, whereby, over a seven-year program, a student may complete the degree of Bachelor of Science, with the Bachelor degrees of Medicine and Surgery. Students in the program may undertake courses offered at Advanced level and may undertake an additional research year (Honours) in Anatomy, Physiology or Biochemistry, leading to the award of a BSc Advanced degree.

The Science/Medicine program is intended for those students with special interest and aptitude in science, who wish to obtain a firm grounding in basic sciences. A limited number of places are available in this program and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Office of the Dean as soon as possible after receiving their offer of a place in the Faculty. Selection of students for the Science/Medicine program is made approximately two weeks before commencement of Session 1. The students undertake a three-year program of study approved by the Presiding Member of the Faculty's BSc MB BS Committee leading to the award of the degree of BSc, and on completion, enter Year 3 of the normal Medicine program. The student is offered a choice of a number of programs, leading to a major or double major in one or two of the courses Anatomy, Biochemistry and Physiology.

Students who have completed the combined Science/Medicine degree program are eligible for the award of honours in the MB BS degree program, based on weighted performance in courses (excluding the honours year) throughout the combined program.

The award of honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the program in accordance with the rules applying to the Medicine program 3801, together with an aggregate mark based on the Science component of the program.

Courses

Details of all courses are given in the Science Handbook. Details of courses taught by Schools in the Faculty of Medicine are also published in the Course Descriptions section later in this book.

ANAT Anatomy
BIOC Biochemistry and Molecular Genetics
BIOS Biological Science

Total 48

Year 3

In Year 3, students are required to complete 48 units of credit. Students should undertake a major in Anatomy, Physiology or Biochemistry, or a double major in two of these disciplines. A major may be completed by taking at least 18 units of credit in one discipline area and fulfilling other program requirements specified for that major. Students who do not undertake a Biochemistry major must complete BIOC2261 (Human Biochemistry). Students in the combined Science and Medicine program are not able to enrol in courses in Pharmacology, Pathology or Immunology.

Year 4

Students usually join Year 3 of the Medicine program. However, students may apply to take Honours in the discipline of their major before proceeding to the Medicine program. The Honours program is a one-year research project in the school of their major. Details are given in the Science Handbook. Enquiries should be directed to the head of the appropriate school.
**Combined Arts and Medicine Program**

**BA BSc(Med) MB BS**

The Arts/Medicine program is an alternative program of study, in which, over a seven year program a student may complete the degree of Bachelor of Arts, with the degrees Bachelor of Science(Medicine), Bachelor of Medicine and Bachelor of Surgery. The Arts/Medicine program is intended for those students who wish to continue their interest and studies in the Arts during their medical studies.

A limited number of places are available in this program and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Office of the Dean as soon as possible after receiving their offer of a place in the Medicine program. Selection of students for the Arts/Medicine program is made approximately two weeks before commencement of Session 1.

Over a period of seven years, students will be required to fulfil the requirements of the BSc(Med) MB BS degree program as well as 60 units of credit in courses offered by the Schools/Departments/Programs within the Faculty of Arts (including an approved major sequence).

In Year 1, students will complete the Year 1 Medicine program plus the Level 1 courses of their Arts major sequence. In Years 2 and 3 they will complete the program for the Year 2 of the Medicine program and the remaining courses for their Arts component, before progressing to Year 3 of the Medicine program in their fourth year of enrolment.

Students who have completed the combined Arts/Medicine degree program are eligible for the award of honours in the BSc(Med) MB BS degree program, based on weighted performance in courses (excluding those courses not in the normal Medicine program) throughout the combined program.

The award of honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the program in accordance with the rules applying to the Medicine program 3801.

---

**Program Details**

Students are required to undertake all BSc(Med) MB BS courses plus 60 units of credit from the Faculty of Arts (including a major sequence) during Years 1 to 3. A major sequence equals 36 units of credit (usually 12 at Level 1 and 24 at upper level). Details of all Faculty of Arts courses are given in the Arts Handbook.

**Year 1**

Students are required to complete all Medicine (program 3801) Year 1 courses plus all Level 1 courses of their Arts major sequence (with the exception of 6 units of General Education).

- ANAT1006 Anatomy 1
- BIOC1319 Biochemistry for Medical Students
- MFAC1001 Introductory Clinical & Behavioural Studies
- PHPH1004 Biology for Medical Students

**Level 1 Arts major sequence**

**Year 2**

Medicine Year 2 courses are to be spread over Years 2 and 3 to allow for the completion of upper level courses of their Arts major sequence, plus additional courses to complete the BA component. The Medicine courses BIOC2329 Medical Biochemistry and Genetics and PHPH2018 Medical Physiology 1 must be taken in Year 2 of the BA BSc(Med) MB BS program.

- BIOC2329 Medical Biochemistry and Genetics
- PHPH2018 Medical Physiology 1

**Upper level Arts Major sequence plus additional Arts courses**

**Year 3**

The Medicine courses ANAT2007 Anatomy 2, MDSG2001 Clinical Studies 2 and PSCY2101 Human Behaviour must be taken in Year 3 plus upper level Arts courses to complete the Arts major sequence and any other Arts courses to complete the required units of credit (ie. 60).

- ANAT2007 Anatomy
- MDSG2001 Clinical Studies 2
- PSCY2101 Human Behaviour

**Upper level Arts major sequence plus additional Arts courses**

**Year 4**

Students join Year 3 of the Medicine program.
Intern Placement and Registration

Each medical graduate seeking registration as a medical practitioner in New South Wales must complete a period as an intern in a hospital or institution approved by the New South Wales Medical Board. Before taking up an intern appointment, a graduate must obtain a certificate of conditional registration from the Medical Board.

Intern placement is the responsibility of the Postgraduate Medical Council of the New South Wales Department of Health. Information concerning intern placement and conditional registration is issued to each student by the Office of the Dean during the final year. Information may also be obtained from:

**Internship:** The Postgraduate Medical Council, Gladesville Hospital Campus, Victoria Road, Gladesville NSW 2111, Telephone: 9817 0551.

**Registration:** The Registrar, Medical Board of New South Wales, Gladesville Hospital Campus, of Punt Road, Gladesville, Telephone 9879 6799.

**Deferment of Internship**

1. **Deferment of internship for up to two years.**

   This may be granted by the Medical Board on the recommendation of the graduate's medical school. Normally this will be granted on medical grounds only, but in exceptional circumstances may be granted on other personal or compassionate grounds (eg. temporary transfer overseas with spouse, childbearing, need to care for close relative, etc.).

   Normally deferment will be for one year only, and only in exceptional circumstances will it be granted on the recommendation of the medical school for two years. The medical school will take undergraduate performance into account in determining the length of deferment, and if it wishes may require the applicant to undertake some form of revision and/or assessment before the internship is allowed to commence.

2. **Deferment of internship for more than two years.**

   If a graduate does not take up an internship within two years of graduation the Board will require evidence that the applicant has undertaken an appropriate period of revision and has been assessed as meeting the standards of current graduating students by an accredited Australian medical school. Normally this will be undertaken in the medical school where the student's undergraduate program was completed, but in exceptional circumstances (eg. family transfer to another state) it could be undertaken at another school.

   The medical school will provide the Board with details of the revised program and assessment.

   In the case of a long deferral, i.e. over 5 years, without significant contact with medicine, the graduate might be required to reattend on a full time basis one or more years of the program and undertake normal undergraduate assessments.

   In the case of a shorter deferral or where there has been significant contact with medicine, a special program of student attachments and assessments might be appropriate.

**Ranking Students for the Award of Honours**

Students are ranked on the basis of their performance throughout the undergraduate program. An overall program mark is calculated for each student using the following procedure:

1. A weighted average mark for each year of the program is determined. This year mark is obtained by weighting each of the courses in the year, according to the units of credit. The course weights for each of the years of the program are shown in Table 1.

2. The overall program mark is determined by applying the year weightings listed in Table 2 to the weighted year marks.

3. If a student were required to sit for a supplementary assessment (other than for medical reasons or other exceptional circumstances) the course mark used is that awarded for the original assessment.

4. If a student were required to repeat a year (other than for medical reasons or other exceptional circumstances) the weighted year mark used is that obtained at the first attempt.

5. In the calculation of the average weighted program mark for BSc MBBS students, the aggregate mark for the Science component is calculated as a weighted aggregate of all courses counted towards the Science degree, except General Education courses. The course weights are as follows:

   - Level I courses weighted by a factor equal to 0.0625 per course, except General Mathematics, Fundamental of Physics and Life Science Physics (0.05 per course) and Higher Chemistry and Higher Mathematics (0.07 per course).
   - Level II courses weighted by 0.1875 per course.
   - Level III courses weighted by 0.25 per course.
   - Level II/III courses to be counted as Level II or Level III according to whether the student passed the course in Second or Third Year.

   **Level IV courses (Honours) not counted.**

   The three years of BSc component of the BSc MB BS program are treated as equivalent to the first two years of the MB BS program and therefore have a total year weight of 6 relative to the MB BS year weightings.

   There is a limit set of 50 for the best possible score in the first year of the BSc component to put all students, whether or not they undertake Higher Mathematics or Physics, on the same footing. Only the best 144 units of credit in the BSc component are considered in calculating the ranked score.

6. Honours calculation for students undertaking the BA BSc(Med) MB BS program is the same as for the BSc(Med) MB BS program, i.e. the courses in the BA component are not counted.

7. Provision is made for students admitted with advanced standing and/or exemptions in certain courses not to be penalised in the calculation of rankings.

**Award of Honours**

1. The Faculty Year 6 Assessment Committee considers the ranked list of students and their marks and decides the cut-off marks for the award of honours at the various levels.

2. Neither the percentage of the students obtaining honours at the various levels nor the cut-off marks are predetermined, and the Committee makes its own assessment of the level of academic attainment indicated by the overall program mark.

3. As a guide, the distribution of the awards of honours in 1998 was:

   **Class I Honours**
   Program Mark: 71.5%-76.6%
   Number of Awards: 19
   Percent of graduands: 12.0%
Class II Div. I  
Program Mark: 68.6%–71.4%  
Number of Awards: 18  
Percent of graduands: 11.4%

Class II Div. II  
Program Mark: 66.4%–68.5%  
Number of Awards: 22  
Percent of graduands: 13.9%

This is a one year research program offered to students in the six year Medicine program who have achieved a high standard in their studies. Those who complete the research program in conjunction with the six year curriculum, will be eligible for the award of the degree BSc(Med)Hons.

In general the aims of the year, normally spent in supervised research, are to enable the student to acquire an appreciation of the value of observation and experimentation in the development of medical science, and to learn how to determine the ‘current state of knowledge’ in a defined field. This year enables the student to gain experience in the written and spoken presentation of scientific information.

Information concerning this program option is issued to medical students in midyear. A list of available research projects may be obtained from the Office of the Dean or the Clinical Schools.

Rules for the Award of the Bachelor of Science (Medicine) Degree with Honours – BSc(Med)Hons

For candidates in the Programs 3801 and 3840

1. (a) Undergraduates who have successfully completed at least the first three years of the six year Medicine program 3801 or at least the first four years of the seven year Arts/Medicine program 3840 may enrol for the degree of BSc(Med)Hons in one of the following courses: Anatomy, Biochemistry, Microbiology, Pathology, Pharmacology, Physiology, Psychology or in any other course approved by the BSc(Med)Hons Committee provided that the candidate’s performance in the area subject has been of a high standard.

(b) A student may register as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of the School concerned and the BSc(Med)Hons Committee.

2. (a) Medical graduates may enrol for the degree of BSc(Med)Hons in any course approved by the BSc(Med)Hons Committee provided that their performance in the subject area has been of a high standard.

(b) A graduate may be registered as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of School concerned and the BSc(Med)Hons Committee.

3. The program for each candidate shall be designed to introduce the student to research in the appropriate discipline and shall consist of such formal and special work and any examinations prescribed by the Head of School concerned and approved by the BSc(Med)Hons Committee.

Assessment Guidelines

1. Schools make assessments on the advice of the supervisor and at least two assessors. Where the student performs his or her work in a clinical school, but is registered in a pre-clinical discipline, at least one of the assessors could be chosen from a relevant pre- or para-clinical school.

2. A thesis is compulsory and forms a major part of the assessment. The thesis must be typed and suitable for subsequent binding if required. The typescript length of the thesis is normally no more than 20,000 words.

3. It is desirable that candidates take part in the activities of the school by participation in seminars, by presentation of essays and other prescribed activities.

4. Candidates are normally required to give an oral presentation during the year and this may be taken into account in the assessment.

5. The degree of BSc(Med)Hons may be awarded in the following grades: Honours Class I; Honours Class II, Division I; Honours Class II, Division II or no award made.

Program Requirements

This program in health and sports science offers a comprehensive education in the area of health and sports science. Four years of full-time study, or the part time equivalent part-time study leads to the award of a Bachelor of Science (in Health and Sports Science) with an Honours program available for students who perform with merit. Part-time students will undertake a reduced program subject to the session availability of courses. Only in exceptional circumstances will full-time students be allowed to enrol in a reduced program for a year, requiring the permission of the Head of School of Physiology and Pharmacology. A total of 192 units of credit must be successfully completed for the award of this degree.

Program Objectives

The program is designed upon the strengths of the Faculty of Medicine in which it is uniquely placed as a sports science degree in Australia. Graduates may expect to find employment in sports medicine clinics, rehabilitation clinics and hospitals; Commonwealth, State and Local Government departments; sports academies and institutes, professional organisations, sporting associations, universities, corporate health; gymnasiums and fitness centres, and private practice. In addition it is expected that graduates become members of the professional body: Australian Association of Exercise and Sports Science.
Stage 1 introduces students to the core science that will serve as a solid foundation for the following years. Subjects in this include chemistry, mathematics, statistics, biology and psychology. A series of seminars will run throughout this year and will expose students to the industries that offer employment for graduates. Stage 2 of the program begins to focus on human anatomy, physiology and biochemistry biomechanics, sport psychology and nutrition while building on the scientific principle acquired in Stage 1. The Third Stage of this multi-disciplinary program moves the student towards a holistic understanding of health and exercise as it offers increasing complexity of course material: exercise and cardio-respiratory physiology, endocrinology, musculoskeletal physiology, functional anatomy, biomechanics, health psychology, and motor control & function. Stage four continues to develop multi-disciplinary expertise through use of specialised courses. Extensive coordinated and structured industry experience is a key component of this final year. Students choose from a selection of courses in their fourth year to aid their graduate employment strategies. Understanding of scientific method is a key component of this course. A major project in final semester will feature as an expression of this understanding through research. General education is a requirement of all undergraduate courses at this university and may be taken in stages 2, 3 and 4.

Notes on Stage 4

Core: Students must complete courses in Pharmacology and Drugs in Sport. Students must complete PHPH4502 or PHPH3151 in session 1 and PHPH4506 or PHPH4507 in session 2.

Electives: Students must choose from the available electives, so as to provide a total of 48 Units of Credit in Stage 4.

Units of Credit:
Stage 1, 48; Stage 2, 48; Stage 3, 48; Stage 4, 48.
Total Units of Credit for the Program = 192
Full-time program load equivalence (EFTSU) = 1.

School of Health Services Management

Undergraduate Study Program Outlines

Bachelor of Health Administration

Note: No new enrolments since 1992

The Bachelor of Health Administration degree program is essentially multidisciplinary, with courses chosen to impart relevant knowledge, attitudes and skills in a number of areas. There is, however, a compulsory core stream of management courses. All students enrol in the same compulsory courses in the first two-thirds of the program; thereafter electives are available to develop in some depth areas of special interest. A degree program at Honours Level is also available, the main objectives of which are to assist the student in achieving a deeper understanding of a course or topic germane to the field of health administration, and competence in research and writing skills. Conditions for the award of the degree at Honours Level are listed below.

Candidates may be granted exemptions from a number of courses if they have completed previous postmatriculation qualifications, e.g. nursing, radiography. Exemptions will be considered once the student has been accepted into the program, not before.

Conditions for the Award of the Degree of Bachelor of Health Administration

1. The degree of Bachelor of Health Administration may be awarded as a Pass degree or as an Honours degree. Three classes of Honours are awarded: Class 1, Class 2 in two divisions and Class 3.
1. A candidate for the degree of the Bachelor of Health Administration (Pass or Honours) shall:

(1) comply with the requirements for admission;
(2) follow the prescribed program of study in the School of Health Services Management and satisfy the examiners in the necessary courses.

3. A student who is in the later stages of the program as an external student shall in each year attend the residential school conducted by the School of Health Services Management in the middle of the academic year.

4. Students who are enrolled internally but who are permitted to undertake an additional course on an external enrolment basis will be required to attend lectures at a residential school in the course.

5. (1) A student enrolled in the external or part-time internal program shall not normally be permitted to enrol in more than four courses (inclusive of general education courses) in any one year.

(2) A student enrolled in the full-time program shall not normally be permitted to enrol in more than eight courses (inclusive of general education courses) in any one year.

(3) Permission from the Head of School must be obtained for any departure from the sequence of courses set out under the full-time and part-time (external) program patterns above.

Honours Degree

6. A student who has completed the second year of the full-time program, or the corresponding stage of the external program, normally with grades of Credit or better in all courses, may make a written application to the Head of School of Health Services Management to enrol in the Honours courses of the third year. These courses are: HEAL0340 Management of Health Services (Honours) and HEAL3130 Research and Evaluation Methods (Honours).

7. A student who then achieves a high level of academic performance in the third year Honours courses is normally admitted to the final year of the Honours degree program. External students who have demonstrated outstanding achievement throughout the Pass program may be permitted to enrol in the final year of the Honours program even though they are unable to attend on a full-time internal basis during the final year.

8. The content of the Honours year courses, HEAL8900 Thesis, HEAL8910 Advanced Studies in Health Administration A, and HEAL8920 Advanced Studies in Health Administration B, should be planned in collaboration with the student's thesis supervisor.

9. Normally, full-time internal students are expected to complete the Honours year requirements in one academic year, terminating with the submission of the thesis. External students are required to complete at least one month of full-time attendance at the University during the two years of Honours enrolment in order to complete satisfactorily Honours program requirements. The timing of University attendance is arranged with the student's thesis supervisor.

General Education Program

10. The University requires that undergraduate students undertake a structural program in General Education as an integral part of their degree.

Certain courses in the BHA program are not necessarily offered every year. Students should check with the School to ascertain which courses are to be offered in a particular year.

**Notes:**

(i) Students who wish to transfer from full-time to part-time studies after acceptance must seek approval from the program coordinator.

(ii) Students in full-time employment should not seek to undertake full-time studies in the BHA degree program.

Certain courses in the BHA program are not necessarily offered every year. Students should check with the School to ascertain which courses are to be offered in a particular year.

**Elective Courses**

Electives are to be chosen by the student in consultation with the Head of the School of Health Services Management, from the courses offered by the School of Health Services Management and such other schools or institutions as are deemed appropriate. The approval of the relevant Head of School is required to undertake a course offered by another school or institution.

The electives have been specifically chosen to provide an opportunity for students to develop in some depth their particular vocational interests, e.g., three planning electives may be taken.

The following courses have been approved as electives in the School of Health Services Management; not all courses are necessarily available each year:

Non-Award Students

Non-Award students enrolled on an external basis in courses of the Bachelor of Health Administration degree program are required to meet all the conditions for the completion of each course, including attendance at lectures in the course at a residential school.
Summary of Compulsory Undergraduate Courses

The following Course Descriptions appear earlier in this handbook under Program Details, and are presented by course number and title, together with the year in which each course is to be taken in the Medicine program.

ANAT1006  Anatomy 1  Year 1
ANAT2007  Anatomy 2  Year 2
BIOC1319  Biochemistry for Medical Students  Year 1
BIOC2329  Medical Biochemistry and Genetics  Year 2
CMED3001  Medical Ethics and Health Law  Year 3
MDSG2001  Clinical Studies 2  Year 2
MDSG3001  Clinical Studies 3  Year 3
MDSG4001  Integrated Clinical and Community Studies  Year 4
MDSG6001  Integrated Clinical Studies 6  Year 6
MFAC1001  Introductory Clinical and Behavioural Studies  Year 1
MFAC5001  Geriatrics/General Practice/Subspecialties  Year 5

ANAT2200  Basic Histology  Year 3
ANAT2211  Introductory Anatomy  Year 2
ANAT2215  Introductory Functional Anatomy  Year 2

ANAT2300  Vertebrate Development A  Year 5

Course Descriptions

Anatomy

Servicing Courses only: taught within programs offered by other faculties.

ANAT2111  Introductory Anatomy  Year 1
ANAT2151  Introductory Functional Anatomy  Year 2
ANAT2200  Basic Histology  Year 3
ANAT2210  Systems Histology  Year 3
ANAT2300  Vertebrate Development A  Year 5

This course will cover the morphological and molecular mechanisms of segmentation and patterning responsible for organising the vertebrate body plan in the embryo. Topics will include the molecular, genetic and cellular approaches to the study of human embryology, using four main vertebrate systems: frog, fish, chick and mouse.
This course will provide an introduction to the fundamental principles of vertebrate anatomy and the use of transgenic approaches to examine the common principles and differences that underlie normal and abnormal development of vertebrates: specifically, the roles of cell differentiation, proliferation and migration, target recognition, interaction in the nervous system, axonal polarity, cell adhesion, cell fate, and signalling in development. Emerging technologies, such as genomic analysis and the use of transgenic and dysfunctional mouse mutants in research, will be covered.

**ANAT2511 Fundamentals of Anatomy**

*Staff Contact: Dr E Tancred*

UOC6 HPW6 WKS14 S2

Prerequisite: ANAT2111

This course will provide an introduction to the fundamental principles of human structure. It includes an introduction to the histology of basic tissues; an overview of the functional anatomy of the major body systems; human development, growth and aging; human evolution; body imaging.

**ANAT3121 Visceral Anatomy**

*Staff Contact: A/Prof K Ashwell*

UOC6 HPW6 WKS14 S2

Prerequisite: ANAT2111

Detailed study of the visceral system, including autonomic nervous system, head and neck regions and the cardiovascular, respiratory, gastrointestinal and genitourinary systems. Tutorials include clinical cases and surface and radiological anatomy.

**ANAT3131 Functional Anatomy 1**

*Staff Contact: Prof D Tracey*

UOC6 HPW6 WKS14 S1

Prerequisite/s: ANAT2111

Functional anatomy of the musculoskeletal system in the head, neck and upper limb, includes biomechanics of connective tissue; in particular bone, cartilage and tendon. Tutorials involve study of prospected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the upper limb.

**ANAT3141 Functional Anatomy 2**

*Staff Contact: Prof D Tracey*

UOC6 HPW6 WKS14 S2

Prerequisite/s: ANAT3131

Functional anatomy of the musculoskeletal system in the trunk and lower limb. Includes functional aspects of muscle and a discussion of the mechanics and energetics of walking and running. Tutorials involve study of prospected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the lower limb.

**ANAT3231 Cell Biology**

*Staff Contact: Dr M Hill*

UOC6 HPW4 WKS14 S1 or S2

Prerequisite/s: ANAT2200, ANAT2210, BIOC2101 or BIOC2201 or BIOC2181 or BIOC2291 or PHPH2112

To develop an understanding of the anatomy and biology of the cell. Cell biology combines traditional anatomical methods with recent cell and molecular biology techniques. Key concepts will include developmental differentiation of the cell, its polarity, motility, cytoskeleton, signal transduction mechanisms and outcomes. An introduction to concepts of cell and extracellular matrix interactions will also be covered. Session in which course will run to be determined.

**ANAT3411 Neuroanatomy**

*Staff Contact: Dr E Tancred*

UOC6 HPW6 WKS14 S1

Prerequisite/s: ANAT2200, ANAT2211

Provides an overview of the anatomical organisation of the central nervous system. Topics covered include: cytoarchitecture of brain and spinal cord; functional anatomy of sensory and motor systems and higher cerebral functions such as language and emotions; blood supply of the central nervous system; cerebrospinal fluid and meninges.

**ANAT3421 Neuroscience Research Seminars**

*Staff Contact: A/Prof P Walsh*

UOC6 HPW6 WKS14 S2

Prerequisite/s: ANAT3411

Focuses on selected areas of contemporary neuroscience research interest. Includes: brain development and axon guidance, peripheral nerve regeneration, spinal cord injury, pain pathways, visual system function, cortical plasticity, brain imaging, mechanisms of learning and memory, motor systems and the neuropathology in degenerative disorders. The subject is organised in seminar format with discussion of original research papers. It is ideal for students considering doing Honours as it provides a background to current research problems and the opportunity to undertake a small project.
To develop an understanding of the anatomy and biology of the cell. Cell biology combines traditional anatomical methods with recent cell and molecular biology techniques. Key concepts will include developmental differentiation of the cell, its polarity, motility, cytoskeleton, signal transduction mechanisms and outcomes. An introduction to concepts of cell and extracellular matrix interactions will also be covered. The advanced course ANAT3631 will include an assessable research affiliation program, incorporating discussion and evaluation of a research project, and submission of a research report based on literature within the subject area. Session in which course will run to be determined.

ANAT4508
Anatomy 4
Staff Contact: AProf K Ashwell
UOC48 WKS28 S1S2
Prerequisite/s: Completion of the first three years of any Science program with a major in Anatomy (see Science Handbook)
An honours program consisting of the preparation of an undergraduate thesis and participation in School seminars.

Biochemistry

BIOC2101
Principles of Biochemistry (Advanced)
Staff Contact: Dr L McFarlane, A/Prof M Edwards
UOC6 HPW6 WKS14 S1
Prerequisite/s: BIOS1101 and BIOS1201, CHEM1101 and CHEM1201
Notes: Excluded BIOC3191, BIOC2181, CHEM2929. Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.
Introduces modern biochemistry, covers fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics covered include: the nature and function of enzymes; the metabolic working of cells, tissues and organs; the interrelationships between the pathways of carbohydrate, lipid and amino acid metabolism; the role of enzymes and hormones in catalysis and metabolic regulation; the energy-trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures.

BIOC2201
Principles of Molecular Biology (Advanced)
Staff Contact: A/Prof T Stewart, Dr A Bagnara, Mr H Shoory
UOC6 HPW6 WKS14 S2
Prerequisite/s: BIOS1101 and BIOS1201, CHEM1101 and CHEM1201
Notes: Excluded BIOC2291. Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.
Provides an introduction to modern molecular biology and covers the molecular mechanisms of gene expression and the fundamental aspects of recombinant DNA technology. The major topics covered include: The structure and function of DNA and RNA. The replication and transcription of DNA. Translation of the genetic code into an amino acid sequence during protein synthesis. Regulation of gene expression. Manipulation of DNA including fragmentation by restriction enzymes, cloning of DNA fragments into vectors, hybridization analysis and principles of DNA sequencing. Protein structure and function, protein engineering and site-directed mutagenesis. Amplification of DNA by the polymerase chain reaction (PCR). Practical work to complement the lectures.

BIOC3111
Molecular Biology of Proteins
Staff Contact: Dr G King
UOC6 HPW6 WKS14 S1
Prerequisite/s: BIOC2101 and BIOC2201, CHEM2021 or CHEM2041
Modern aspects of the structure function relationships of proteins including discussion of the latest techniques of protein characterisation. Topics include: separation and analytical procedures; determination of amino acid sequence data; the nature of protein and protein ligand interactions including aspects of substrate binding, enzyme kinetics and enzyme mechanisms; the molecular architecture of proteins from the standpoint of the relationships among primary, secondary, tertiary and quaternary structures; aspects of protein engineering. Practical work illustrates and complements the lectures and provides experience with modern techniques of protein molecular biology.

BIOC3121
Molecular Biology of Nucleic Acids
Staff Contact: Dr L Lutze-Mann
UOC6 HPW6 WKS14 S1
Prerequisite/s: BIOC2101 and BIOC2201, CHEM2021 or CHEM2041
Detailed analysis of gene structure and function including: structure and properties of polynucleotides such as DNA and RNA; structure of chromatin; mechanisms and regulation of gene replication, transcription and translation; recombinant DNA technology, nucleic acid sequencing, DNA-DNA and DNA-RNA hybridisation as important tools of modern molecular biology; protein production using recombinant DNA systems. Practical work illustrates and complements the lectures and provides experience with contemporary biochemical techniques.

BIOC3261
Human Biochemistry
Staff Contact: Dr A Bagnara
UOC6 HPW6 WKS14 S2
Prerequisite/s: BIOC2101 and BIOC2201
Covers the aspects of metabolism that are of particular relevance to the human. The major topics covered will be selected from: Nutrition, exercise, neurochemistry, xenobiotics, nucleotide and one-carbon metabolism, genetic diseases and molecular aspects of parasitology. The role of triglyceride, cholesterol and lipoprotein metabolism in human health, and other selected areas of human nutrition. Specialised aspects of endocrinology and neurochemistry including prostaglandins, leukotrienes, enkephalins and endorphins. The interrelation of purines, pyrimidines, folate and cobalamin metabolism in humans. Xenobiotics: the metabolism of foreign compounds by humans. Biochemical aspects of genetic disease including the use of recombinant DNA techniques for prenatal diagnosis and carrier detection. Molecular studies of malaria and other parasites of the human. Practical work to amplify the lectures.

BIOC3271
Molecular Cell Biology
Staff Contact: Dr L Lutze-Mann
UOC6 HPW6 WKS14 S2
Prerequisite/s: BIOC2101 and BIOC2201
Cell biology from a molecular viewpoint. Biochemical aspects of cellular organisation and how they are integrated and controlled. The arrangement of the component molecules of organelles, their function in integrated cellular metabolism and the molecular interactions between the cells of multicellular organisms. The biochemistry of the cytoskeleton, carriers and intracellular transport systems. The regulation of cellular processes at the molecular endocrine level. Growth and differentiation. Aspects of cancer metabolism, the biochemistry of cell to cell communication and the structure and function of the extracellular matrix. Practical work amplifies the lectures.

BIOC3281
Recombinant DNA Techniques and Eukaryotic Molecular Biology
Staff Contact: A/Prof T Stewart
UOC6 HPW6 WKS14 S2
Prerequisite/s: BIOC3121
The organisation of the genomes of higher organisms derived mainly from the application of recombinant DNA technology and related techniques. Methods used for the isolation, identification and characterisation of eukaryotic genomes in terms of the organisation
of single copy and repeated sequences and of coding and non-coding sequences and of several gene clusters, eg the alpha and beta globin gene cluster. Mechanisms known to operate in the control of eukaryotic gene expression, both at the DNA level and at the level of RNA processing. Review of several specialised genetic systems in plants and animals such as mitochondria, chloroplasts and RNA and DNA tumour viruses. Practical work provides training in the use of sterile techniques and in working with polynucleotides under nuclease-free conditions, using basic techniques such as hybridisation and DNA sequencing.

Biological Science

BIOS1101
Evolutionary and Functional Biology
Staff Contact: A/Prof P Adam
UOC6 HPW5 S2

The course examines the evolutionary history of life on earth and the relationship between environment, adaptation and function. Animal and plant physiology are covered with an emphasis on adaptation to Australian environmental conditions.

BIOS1201
Molecules, Cells and Genes
Staff Contact: A/Prof P Adam
UOC6 HPW5 WKS14 S1
Prerequisite/s: HSC Exam Score Required: 2 unit Science (Physics) 53-100, or 2 unit Science (Chemistry)
Note/s: Practical and tutorial seat assignments must be obtained at the Biology Enrolment Centre on the day of enrolment. The course guide is available for purchase during enrolment week. Students must consult it for details of the course and assessments.

The course is concerned with the basic characteristics of life. The chemistry of life is covered with emphasis on the ways in which living things construct and break down macromolecules. The way in which the genetic code controls these processes depends to a great extent on the structure and function of cell components, and cell biology is a major component of the course. The final topic is genetics - the way in which the genetic code is inherited and the ways in which it can be modified.

BIOS2031
Biology of Invertebrates
Staff Contact: Dr I Suthers
UOC6 HPW5 WKS14 S1
Prerequisite/s: BIOS1101 and BIOS1201
Note/s: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective. There is a compulsory field camp during mid session break. A comparative study of morphology, taxonomy, functional biology and evolutionary relationships of invertebrates. Emphasis on major phyla and marine forms. Practical work includes anatomy of living and preserved specimens (including dissections). Personal expenses will be incurred.

BIOS2061
Vertebrate Zoology
Staff Contact: Dr M Augee
UOC6 HPW5 WKS14 S1
Prerequisite/s: BIOS1101 and BIOS1201
Note/s: Practical class allocations must be obtained during re-enrolment week from room G21, Biological Science Building. Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

Comparative study of the Chordata, with particular reference to the vertebrates, including morphology, systematics, evolution and natural history, with reference to selected aspects of physiology and reproduction. Practical work to supplement lectures.

Health Services Management

HEAL0310
Management of Work
Staff Contact: Dr Anna Wheian
UOC6
Note/s: Not offered in 2000

Identifies the range of social, economic, political, industrial and technological factors which may influence the organisation of both work and workers in a variety of settings. Analyses the interrelationships between the forms of work organisation which are used in different health care settings and the experiences and responses of workers located in these settings. Develops analytical abilities and practical skills and interpersonal skills.

HEAL0320
Management of Organisations
Staff Contact: Dr Pieter Degeling
UOC6
Prerequisite: HEAL0310
Note/s: Not offered in 2000

Emphasis on analytical skills. Develops the student's understanding of organisation theory and its application to management. Theories covered include systems, contingency, administrative, action and
resource dependency, the pluralist perspective. Level of analysis is at organisational level rather than microperspectvise of HEAL0310.

HEAL0330
Management of Health Services
Staff Contact: Prof James Lawson
UOC6
Prerequisites: HEAL0310, HEAL0320
Notes: Not offered in 2000
Analyses values, structures, management approaches and relationships within component organisations and programs of the Australian health services and related areas. Areas of study: comprehensive service provision, detailed analysis of individual organisations, departments or programs; roles of the manager; professional development; concepts of microstructure and social analysis. Students are required to use these and other tools in the analysis of practical situations.

HEAL0340
Management of Health Services (Honours)
Staff Contact: Prof James Lawson
UOC6
Prerequisites: HEAL0310, HEAL0320
Notes: Not offered in 2000.
Includes and extends the theoretical and practical studies in HEAL0340. Students produce a literature review of a significant aspect of health and hospital services management analysing major conceptual issues and their development.

HEAL1110
Health Care Systems
Staff Contact: Mr Ian Forbes
UOC6
Notes: Not offered in 2000
The system of organisations, institutions, services and financial arrangements which constitute the Australian health care system. Constitutional, legal and economic environment in which the system operates. Main characteristics of public and private hospitals, nursing homes and other institutions. Community health and other noninstitutional services. The financing of health services. The health workforce, with emphasis on the medical and nursing components. Comparisons of the Australian health care system with those of other countries.

HEAL120
Public Health and Epidemiology
Staff Contact: Prof James Lawson
UOC6
Notes: Not offered in 2000
Definitions of health and disease; basic epidemiological concepts; medical terminology; body systems, classification of disease; disease causation. Protection and promotion of health with emphasis on contemporary risk factors; diagnosis; treatment practices. Evaluation of health and health care; health status indicators; preventive and therapeutic trends; research strategies.

HEAL3010
Political Science
Staff Contact: Dr Pieter Degeling
UOC6
Notes: Not offered in 2000
The study of politics, with special reference to Australian political institutions and administrative practices. Topics include: concepts and theories of politics; Australian political institutions and the party system; the Constitution and intergovernmental financial and legal relations; public administration with special reference to the Commonwealth and New South Wales public services.

HEAL3020
Social Policy and Administration
Staff Contact: Dr Pieter Degeling
UOC6
Notes: Not offered in 2000
The scope and principles of social policy and administration; values and value analysis; models and theories of social policy; problems in policy formulation, implementation, administration and evaluation; contemporary Australian social policy; health insurance, poverty, social security; systems of income guarantee, national compensation and national superannuation.

HEAL3030
Research and Evaluation Methods
Staff Contact: Dr Mary-Louise McLaws
UOC6
Prerequisites: HEAL0400, HEAL7110
Notes: Not offered in 2000
The need for and special problems of health services research and evaluation; the nature of scientific knowledge; identifying appropriate research areas; statements of objectives and formulation of hypotheses; experimental and quasiexperimental designs; nonexperimental models; sample selection; means of acquiring data; introduction to analysis of data; methods of presenting findings; research and decision making policy issues.

HEAL3040
Management Skills
Staff Contact: Mr Ian Forbes
UOC6
Notes: Not offered in 2000
An opportunity for students to extend their theoretical knowledge and to develop practical skills in communication, including consulting, negotiating and bargaining, conflict management, interviewing, conducting meetings, giving instructions and making requests, writing reports, submissions and memos, public speaking and dealing with the media.

HEAL3060
Administration of Nursing Services
Staff Contact: Dr Anna Whelan
UOC6
Notes: Not offered in 2000
Content is organised in terms of the material suggested by the standards for the Nursing Division of Hospitals compiled by Australian Nursing Association. Major focus are the goals, structures, processes and control mechanisms common to nursing services departments.

HEAL3070
Special Topic in Health Administration
Staff Contact: Mr Kevin Forde
UOC6
Notes: Not offered in 2000
An occasional elective dealing with some aspect of health administration, selected according to current demand and availability of local and visiting lecturers.

HEAL3080
Epidemiology for Health Administrators
Staff Contact: Dr Mary-Louise McLaws
UOC6
Notes: Not offered in 2000
The general purposes and content of epidemiological studies. Concepts and strategies of epidemiology. Sources, collection, collation and analysis of epidemiological data. The application of epidemiological methodology and information in the planning, operation and evaluation of health services.

HEAL3090
Long Term Care Administration
Staff Contact: Prof James Lawson
UOC6
Notes: Not offered in 2000
Introduction to the more important theories, concepts and practical tools which are applicable to the evaluation, administration and planning of long term care institutions and nonresidential agencies and programs. Topics include: patient assessment and rehabilitation; psychiatric care; social factors; financial and economic aspects; quality measurement and control.
Topics include: the employment relationship; the legislative and institutional context; current issues in industrial relations in health services; discrimination and work; EEO; participation of women in the health workforce; recruitment and selection policies and processes; employee training and development; personnel appraisal/performance review; disciplinary actions, appeal procedures, termination of employment, redundancy; occupational health and safety; new management techniques such as Total Quality Management (TQM).

Computing Techniques for Health Service Management  
Staff Contact: Dr Deborah Black  
UOC6  
Prerequisite: HEAL7110  
Note: Not offered in 2000  
Programming and principles of operation of commercial software, including database management systems, word processors and spreadsheets. Application of software to, and development of, programming skills for health service management.

Industrial Relations: A Health Sector View  
Staff Contact: Dr Anna Whelan  
UOC6  
Note/s: Not offered in 2000  
The role of the health administrator, the employing authority, the unions and the industrial tribunal will be examined within the context of the Australian health care system.

Research and Evaluation Methods (Honours)  
Staff Contact: Dr Mary-Louise McIaws  
UOC6  
Prerequisites: HEAL5400, HEAL7110  
Note: Not offered in 2000  
An extension of topics in HEAL3030 stressing the choice of constructive research problems, critical evaluation of the literature and formulation of a research protocol as background to the formal presentation of a thesis in Year 4.

Current Issues in Nursing  
Staff Contact: Dr Anna Whelan  
UOC6  
Note/s: Not offered in 2000  
Controversial aspects of the nursing profession of particular interest to nursing and health administrators. Current topics include: nursing education, unionism vs professionalism, political action in nursing, factors affecting the nurse's participation in the workforce.

Health Planning 1  
Staff Contact: Mr Ian Forbes  
UOC6  
Note/s: Not offered in 2000  
Planning concepts, principles and approaches. Processes and procedures of planning. Sources of planning information. Health service planning at the national, regional and local levels. Facilities planning, building and evaluation.

Health Planning 2A  
Staff Contact: Mr Ian Forbes  
UOC6  
Prerequisite: HEAL4210  
Note: Not offered in 2000  
Building design processes and procedures; health facility design and construction; location, layout, space allocation, traffic systems, supply and disposal systems, energy conservation. Construction and contract management, commissioning and equipping, maintenance and renovation; cost control and site supervision; briefing and evaluation techniques.
An introductory course with a financial and quantitative emphasis, having special reference to the application of measurement techniques to health services data. Elementary statistics for health services management with an introduction to the use of computing in health care. Information systems relevant to hospital management. Introduction to concepts of accounting, costs and budgeting.

HEAL5410
Accounting and Financial Management 1
Staff Contact: Mr Kevin Forde
UOC6
Prerequisite: HEAL5400
Note/s: Not offered in 2000
Introduction to accounting with particular reference to hospitals and health services institutions: basic accounting concepts; doctrines and conventions of accounting, analysis and interpretation of accounting data; Governmental budgeting and accounting systems; introduction to the theory and practice of hospital fund accounting; Federal State financial relations and their implications.

HEAL5420
Accounting and Financial Management 2
Staff Contact: Mr Kevin Forde
UOC6
Prerequisites: HEAL5400, HEAL5410
Note: Not offered in 2000

HEAL5510
Health Economics 1
Staff Contact: Mr Kevin Forde
UOC6
Prerequisite: HEAL5400
Note/s: Not offered in 2000
An introduction to economic analysis as applied to the conditions and problems confronting Australia, with special reference to the economic aspects of health and medical care. Topics include: the economic approach; demand for and supply of medical services; the impact of insurance on the health care market; the efficient production and distribution of health services; the operation of the price system; the theory of costs and production; monetary and fiscal policy.

HEAL5520
Health Economics 2
Staff Contact: Mr Kevin Forde
UOC6
Prerequisites: HEAL5400, HEAL5510
Note: Not offered in 2000
An introduction to economic analysis as applied to the conditions and problems confronting Australia, with special reference to the economic aspects of health and medical care. Topics include: the economic approach; demand for and supply of medical services; the impact of insurance on the health care market; the efficient production and distribution of health services; the operation of the price system; the theory of costs and production; monetary and fiscal policy.

HEAL6110
Quantitative Methods and Statistics 1
Staff Contact: Dr Deborah Black
UOC6
Prerequisite: HEAL5400
Note/s: Not offered in 2000
Quantitative and statistical methods pertaining to the administration, planning and management of health services.

HEAL7120
Quantitative Methods and Statistics 2
Staff Contact: Dr Deborah Black
UOC 8 SS L4
Prerequisite: HEAL7110
Note: Not offered in 2000
More advanced examination of quantitative and statistical methods.

Mathematics

MATH1011
General Mathematics 1B
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S1 or S2
Prerequisite/s: HSC mark range required: 2 unit Mathematics (60-100) or 2 and 3 unit Mathematics (1-150) or 3
Note/s: Excluded MATH1031, MATH1131, MATH1141, ECON1202, ECON2291.
Functions (and their inverses), limits, asymptotes, continuity; differentiation and applications; integration, the definite integral and applications; inverse trigonometric functions; the logarithmic and exponential functions and applications; sequences and series; mathematical induction; the binomial theorem and applications; introduction to probability theory; introduction to 3-dimensional geometry; introduction to linear algebra.

MATH1021
General Mathematics 1C
Staff Contact: School of Mathematics First Year Office
UOC6 HPW9 WKS14 S2 or SS
Prerequisite/s: MATH1011 or MATH1131 or MATH1141
Note/s: Excluded MATH1031, MATH1231, MATH1241, ECON1202, ECON2291.
Techniques for integration, improper integrals; Taylor's theorem; first order differential equations and applications; introduction to multivariable calculus; conics; finite sets; probability; vectors, matrices and linear equations.

MATH1031
Mathematics for Life Sciences
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S1
Prerequisite/s: As for MATH1011
Note/s: Excluded MATH1011, MATH1021, MATH1131, MATH1141, MATH1231, MATH1241, ECON1202, ECON2291.

MATH1041
Statistics for Life and Social Sciences
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S2
Prerequisite/s: As for MATH1011
Note/s: Excluded MATH2819, MATH2870, MATH2889, ECON1203, ECON2292.
Probability, random variables, independence. Discrete distributions, Poisson and binomial distributions. Data analysis, Descriptive statistics. Sampling, Continuous distributions, the normal distribution.
MEDICINE

MATH1081
Discrete Mathematics
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S1 or S2
Prerequisite/s: As for MATH1131
Corequisite/s: MATH1131 or MATH1141
Note/s: Excluded MATH1090.

Role of proof in mathematics, logical reasoning and implication, different types of proofs. Sets, algebra of sets, operations on sets. Mathematical logic, truth tables, syntax, induction. Graphs and directed graphs, basic graph algorithms. Counting, combinatorial identities, binomial and multinomial theorems. Binary operations and their properties, groups and semigroups, ordered structures. Identities, binomial and multinomial theorems. Binary operations and their properties, groups and semigroups, ordered structures.

MATH1131
Mathematics 1A
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S1 or S2
Prerequisite/s: HSC mark range required: 2 unit Mathematics (90-100), or 2 and 3 unit Mathematics (100-150)
Note/s: Excluded MATH1011, MATH1031, MATH1141, ECON1202, ECON2291.

Complex numbers, vectors and vector geometry, linear equations, matrices and matrix algebra, determinants. Functions, limits, continuity and differentiability, integration, polar coordinates, logarithms and exponentials, hyperbolic functions, functions of several variables. Introduction to computing and the Maple symbolic algebra package.

MATH1141
Higher Mathematics 1A
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S1 or S2
Prerequisite/s: HSC mark range required: 2 and 3 unit Mathematics (145-150) or 3 and 4 unit Mathematics
Note/s: Excluded MATH1011, MATH1031, MATH1131, ECON1202, ECON2291.

As for MATH1131 but in greater depth.

MATH1231
Mathematics 1B
Staff Contact: School of Mathematics First Year Office
UOC6 HPW9 WKS14 S1 or S2
Prerequisite/s: MATH1131 or MATH1141
Note/s: Excluded MATH1021, MATH1031, MATH1241, ECON1202, ECON2291.

MATH1241
Higher Mathematics 1B
Staff Contact: School of Mathematics First Year Office
UOC6 HPW6 WKS14 S2
Prerequisite/s: MATH1131 or MATH1141, each with a mark of at least 65
Note/s: Excluded MATH1021, MATH1031, MATH1231, ECON1202, ECON2291.

As for MATH1231 but in greater depth.

Pathology

Servicing Course only: taught within a course offered by another faculty.

PATH3202
Mechanisms of Human Disease
Staff Contact: Professor C Geczy
UOC12 HPW(TBA) WKS28 S1S2
Prerequisite/s: Enrolment in the Advanced Science Program. Advantage in having previous understanding of anatomy (ANAT2211, ANAT2111), physiology (PHPH2112), biochemistry (BIOC1201, BIOC2372), immunology or equivalent.

Lectures, tutorials, practical classes and research/casebook projects aimed at increasing understanding of the molecular basis of disease with particular emphasis on classification of disease processes, clinical outcomes and disease prevention. Comparisons between normal and abnormal cell/tissue and organ function will be made. Includes processes of cell and tissue degeneration, acute and chronic inflammation, infection, thrombosis, infarction, embolism and ischaemia. Particular examples include diseases of practical importance such as pneumonia, tuberculosis, arthritis, lung and myocardial infarction. Skin wounds and fractures will be used to illustrate healing and regeneration. Aberrations of cell growth introduces neoplasia and carcinogenesis with examples of common tumours. The impact of modern biology understanding disease mechanisms will be demonstrated in practical classes and projects which complement the lectures.

Physiology and Pharmacology

PHPH2101
Physiology 1A
Staff Contact: Dr G Simonetta
UOC6 HPW6 S1
Prerequisite/s: BIOS1101 and BIOS1201; CHEM1011 and CHEM1021 or CHEM1031 and CHEM1041; MATH1031 and MATH1041 or MATH1131 and MATH1231 or MATH1141 and MATH1241 or MATH1011 and MATH1021 or MATH1241 and MATH1021.
Corequisite/s: BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291
Note/s: Students intending to major in Physiology and/or Pharmacology should note Level III Physiology prerequisites. Prerequisites may be waived at the discretion of the Head of School.

Introduces fundamental physiological principles, from basic cellular function in terms of chemical and physical principles to the operation and interaction of body systems. The areas of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience. The unit includes a substantial series of practical classes and experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.
Membrane and Cellular Physiology

Membrane and Cellular Physiology (Adv)
Staff Contact: Prof P Barry
UC6 HPW6 S1
Prerequisite/s: PHPH2101 and PHPH2201, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291

The properties of cell membranes and the role of channels and transporters in permeation and transport of ions, solutes and water across membranes, in the generation of electrical signals in nerve and muscle cells, in synaptic transmission and in second messenger pathways and their part in cellular function. Includes understanding modern techniques, such as patch clamping, used to study the properties of individual ionic channels and site-directed mutagenesis and other molecular biological techniques, used to investigate the relationship between the molecular structure of appropriate proteins and physiological function. Includes the properties of water channels and epithelial transport, the mechanisms underlying muscle contraction and disease states resulting from such things as genetic defects in ion channels. It should provide a foundation for understanding higher physiological systems.

The advanced subject will include an assessable research affiliation program. In the regular subject (PHPH3121) some of the material will be given and examined at a more general and less advanced level.

Neurophysiology

Neurophysiology (Adv)
Staff Contact: Prof M Rowe
UC6 HPW6 S1
Prerequisite/s: PHPH2101 and PHPH2201, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291

Brain mechanisms in sensation and perception are analyzed in detail for vision, hearing and touch, and for the position sense arising from muscles, joints and the vestibular apparatus. The sensorimotor mechanisms responsible for the control of fine movement and postural regulation are also studied at different levels of the nervous system, from the sensory and motor nerves within muscles through to the highest levels of cerebral cortical function. Segments are also included on the neural control of cardiorespiratory function; transmitters and neuromodulators; neural mechanisms in certain higher functions, eg language and memory; nervous system plasticity; computer applications in neuroscience. Experimental work introduces the student to electrophysiological and other neuroscience research techniques, and in seminar-discussion groups to a critical evaluation of neuroscience research literature.

The Neurophysiology (Advanced) course will involve an assessable research affiliation program based upon discussion and evaluation of a research project, and submission of a research report.

Introductory Pharmacology and Toxicology

Introductory Pharmacology and Toxicology (Adv)
Staff Contact: AProf M Murray
UC6 HPW6 S1
Prerequisite/s: PHPH2101 and PHPH2201, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291

Includes a study of the fundamentals of drug action, such as dose-response methods, receptor binding, drug absorption, distribution and metabolism. Further material on drug analysis and adverse effects of drugs will be presented. Segments dealing with aspects of chemical toxicity and the requirements of government agencies for the registration and evaluation of toxic chemicals will be covered. The practicals will cover basic pharmacological methods.

Advanced Science students will be affiliated with a research group within the School involving attendance at group meetings, seminars and the presentation of a report based on literature within the subject area.

Clinical and Experimental Pharmacology

Clinical and Experimental Pharmacology (Adv)
Staff Contact: AProf M Murray
UC6 HPW6 S2
Prerequisite/s: PHPH2101 and PHPH2201, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291

The subject deals with the pharmacology of drug classes, with emphasis on mode of drug action. Effects of drugs on the major organs, including the cardiovascular system, kidney, endocrine systems, and the central nervous system, will be covered. Students will be introduced to recent innovations in drug development and emerging therapeutic strategies based on advances in understanding cellular physiology and drug action. The practicals will cover basic pharmacological methods from both clinical and experimental standpoints.

Advanced Science groups will be affiliated with a research group within the School involving attendance at group meetings, seminars and the presentation of a report based on literature within the subject area.
The Honours Year provides an Introduction to research. Students endocrinology, reproduction and/or development. The results
there are three major components to this subject, which consists
(Adv.)
Testing in exercise physiology. Extensive practical components
on the function and control of the cardiovascular system; gas
an advanced course which emphasises the influence of exercise
of lectures, practical classes, tutorial and case studies. The first
component of the course is a study of neuroendocrinology, molecular
and of the endocrinology of exercise and disease. The second component of the subject deals with female
and male reproductive physiology. The third component of the subject
details the physiology of pregnancy, and that of the fetus and the

Advanced Science students will do a project which has planning
(wks. 1, 2, 4), execution (wks. 6, 7, 8, 9) and presentation (wks. 14).

Endocrine, Reproductive and Developmental Physiology

Endocrine, Reproductive and Developmental Physiology (Adv.)
Staff Contact: A/Prof. G. Perry
UC06 HPW6 S2
Prerequisite/s: PHPH2101 and PHPH2201 and either BIOC2101
and BIOC2201, or BIO2372 or BIOC2181 and B10C2291

There are three major components to this subject, which consists
of lectures, practical classes, tutorial and case studies. The first
component of the course is a study of neuroendocrinology, molecular
and systematic endocrinology, and of the endocrinology of exercise
and disease. The second component of the subject deals with female
and male reproductive physiology. The third component of the subject
details the physiology of pregnancy, and that of the fetus and the

In the Advanced Science course students will be required to
develop and investigate a research topic related to
endocrinology, reproduction and/or development. The results
of their research will be submitted in the form of a grant
proposal, for evaluation by their peers and assessors.

Endocrine, Reproductive and Developmental Physiology

Endocrine, Reproductive and Developmental Physiology (Adv.)
Staff Contact: A/Prof. E. Lumbers
UC06 HPW6 S2
Prerequisite/s: PHPH2101 and PHPH2201 and either BIOC2101
and BIOC2201, or BIO2372 or BIOC2181 and B10C2291

Note/s: Completion of program 7300 including 7 level III units, 4
of which must be Physiology.

The Honours Year provides an introduction to research. Students
undertake a research project with supervision which is written up
as a thesis and presented as a seminar. Students are also required
to participate in departmental seminars, and to submit an essay.

Pharmacology 4 Honours -- Full Time
Staff Contact: A/Prof J. Morley
UC048
Note/s: Completion of program 7301 including 7 level III units.

The Honours Year provides an introduction to research. Students
undertake a research project with supervision which is written up
as a thesis and presented as a seminar. Students are also required
to participate in departmental seminars, and to submit an essay.

Psychiatry

Servicing Course only: taught within programs offered by other faculties.

Human Behaviour (Science)
Staff Contact: Dr P. Ward
UOC6 HPW3 WK528 S1S2

Note/s: Restricted to combined degree course 3821.

Objectives: To provide students with key concepts in the five main
topic areas and demonstrate the practical application of these
concepts in medical practice. The five main topic areas are: research
methods in behavioural sciences, psychology in relation to medicine,
sociology in relation to medicine, bioethics and human sexuality.
Students are thus encouraged to develop an understanding of
human behaviour as the result of the complex interaction of a number
of factors so that they are more likely to appreciate and respect
their patients and colleagues as persons. Taught in both sessions.

Didactic material and some case material is presented in lectures
and the tutorial program is structured to consolidate this information,
frequently using discussion of specific case examples. Emphasis
is placed on developing skills in clear professional communication,
with feedback on written assignments, tutorial presentations,
and encouragement to use visual aids in presentations. Specific topics
covered include: risk behaviours; anxiety; stigma; social class and
health; the sexual response and how it changes across the lifespan;
and a range of bioethical topics including human and animal
experimentation, euthanasia, the doctor and the state. A handbook
for the course is produced each session and may be borrowed from
the Biomedical Library Closed Reserve or purchased from the
School of Psychiatry.

Assessment: In Session 1, assessment consists of two written
evaluations, a tutorial assignment, and a tutorial presentation. In
Session 2, students are required to write a major essay on Bioethics,
present a tutorial paper and sit a final written examination.
Postgraduate Programs

At the postgraduate level, study may be undertaken for the award of the following:

**Doctorates**
- Doctor of Medicine (MD)
- Doctor of Philosophy (PhD)

**Masters**
- Master of Clinical Education (MClinEd)
- Master of Community Health (MCH)
- Master of Medical Science in Drug Development (MMedSc)
- Master of Health Administration (MHA)
- Master of Health Planning and Management (MHPM)*
- Master of Health Professions Education (MHPED)
- Master of Medicine (MMed)
- Master of Psychological Medicine (MPM)
- Master of Public Health (MPH)
- Master of Science (MSc)
- Master of Surgery (MS)
- Master of Clinical Education (MClinEd)
- Master of Community Health (MCH)
- Master of Medical Science in Drug Development (MMedSc)
- Master of Health Administration (MHA)
- Master of Health Planning and Management (MHPM)*
- Master of Health Professions Education (MHPED)
- Master of Medicine (MMed)
- Master of Psychological Medicine (MPM)
- Master of Public Health (MPH)
- Master of Science (MSc)
- Master of Surgery (MS)

**Graduate Diplomas**
- Graduate Diploma in Clinical Education (GradDipClinEd)
- Graduate Diploma in Community Paediatrics (GradDipCommPaed)
- Graduate Diploma in Drug Development (GradDipDD)
- Graduate Diploma in Geriatric Medicine (GradDipGerlMed)
- Graduate Diploma in Paediatrics (GradDipPaed)
- Graduate Diploma in Public Health (GradDipPH)
- Graduate Diploma in Sports Medicine (GradDipSpMed)

**Graduate Certificates**
- Graduate Certificate in Clinical Education (GradCertClinEd)
- Graduate Certificate in Drug Development (GradCertDD)
- Graduate Certificate in Geriatric Medicine (GradCertGerlMed)
- Graduate Certificate in Health Services Management (GradCertHSM)
- Graduate Certificate in Public Health (GradCertPH)
- Graduate Certificate in Sports Medicine (GradCertSpMed)

Full details of the conditions of the award of these degrees are shown in this handbook under Conditions for the Award of Higher Degrees.

- Change in program title is subject to approval

Admission to Coursework Programs – Masters, Graduate Diploma, Graduate Certificate

For detailed information about individual programs, please refer to the section on Conditions for the Award of Degrees.

a) For Masters by coursework and graduate diplomas requiring a medical degree (MMed, MSpMed, MPM, Graduate Diplomas in Sports Medicine, Geriatric Medicine, Paediatrics), a candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine AND shall have had at least one year's full-time experience in the practice of medicine. Additional prerequisites may be specified by the program authority.

b) For other Masters by coursework and graduate diploma programs, a candidate for the degree shall have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine OR shall have been awarded an appropriate degree of Bachelor of three full-time years' duration (or the part-time equivalent) and have had at least three years' relevant experience. Additional prerequisites may be specified by the program authority.

c) For graduate certificates requiring a medical degree (Sports Medicine and Geriatric Medicine), a candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University
of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine. Additional prerequisites may be specified by the program authority.

d) For other graduate certificate programs, a candidate for the degree shall have been awarded an appropriate degree of Bachelor of three full-time years' duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine. Additional prerequisites may be specified by the program authority.

Postgraduate Enrolment Procedures

All students enrolling in postgraduate programs should obtain a copy of the free booklet *Re-enrolling 2000* available from the School Offices and the Admissions Office. This booklet provides detailed information on enrolment procedures and fees, enrolment in miscellaneous courses, locations and hours of cashiers and late enrolment details. Students interested in undertaking a postgraduate program should consult the appropriate Head of School or the Postgraduate Administrative Officer, Office of the Dean.

Advice to Graduate Students on Computing Requirements

UNSW expects all new students to have off campus access to a standard modern computer with CD drive and internet connectivity (e.g. via a modem). The software on the computer should include:

- A word processor able to import and export RTF files
- A spreadsheet program able to import and export ASCII delimited tables
- A drawing/painting program able to import and export images in widely used formats such as GIF, JPEG, TIFF or PNG
- Software able to read PDF and Postscript files
- A Java 1.1 capable Web browser that supports HTML 2.0
- Software to enable file transfer using the FTP protocol
- Networking software to enable TCP/IP connection (e.g. via a modem using PPP)
- Email software able to link to a popserver
- Anti-virus software

As computers remain expensive items, UNSW will provide limited on-campus computer facilities that meet these standards for students who are unable to obtain access to off-campus access to such resources.

1UNSW's Division of Information Services is able to provide software of this type with students being charged only for handling and media costs.
Program Outlines

 Faculty Research Degrees

Doctor of Medicine
MD
This degree is a research program requiring a candidate to make an original and meritorious contribution to some branch of medicine. The program may be completed by:
- thesis with supervision,
- thesis without supervision, or
- published work.

Doctor of Philosophy
PhD
This is a degree requiring an original and significant contribution to knowledge in an approved area.

Master of Science
MSc
This is the main Masters level research program for postgraduate students in the Faculty of Medicine. Candidates must demonstrate ability to undertake research by the submission of a thesis embodying the results of an original investigation. The program may be undertaken either with or without supervision.

Master of Surgery
MS
The degree of Master of Surgery may be awarded to a candidate who has made an original contribution to knowledge in some field related to surgery. Generally, candidates must have at least three years' experience of surgical training and there should be a lapse of five years before the thesis is submitted from the date of the award of the undergraduate medical degree.

Other research degrees are offered by Schools of the Faculty.

School of Community Medicine

The School offers programs of study leading to the award of the following degrees:
- Master of Community Health by research or by formal coursework
- Graduate Certificate in Geriatric Medicine
- Graduate Diploma in Geriatric Medicine
- Masters of Medicine (Geriatrics) by Research
- Masters of Medicine (Geriatrics) by Coursework

2855
Master of Community Health by Research

MCH
This program is designed for health personnel engaged in various areas of community health services and professions who wish to develop their research skills by undertaking studies leading to the award of the degree of Master of Community Health, either as full-time or part-time internal students, or as students external to the University. External candidates are required to spend a minimum of 14 weeks in the School during the program.

An original investigation under the direction of a supervisor for a minimum period of three academic sessions in the case of a full-time candidate, or a minimum of four academic sessions in the case of a part-time or external candidate is required.

Appropriate areas for research include prevention and health promotion; primary health care; health of particular population groups; occupational and environmental health; epidemiology; health of the elderly; disability and rehabilitation; alcohol, smoking and drug dependence; health services and evaluation; community mental health; community genetics; or a field approved by the Head of the School.

The candidate is required to submit a thesis embodying the results of the original investigation.

9020
Master of Community Health by Course Work*

MCH
The program is designed to further the competence and skills of health personnel in primary care and community health services. It will better equip personnel for both professional practice and research, emphasising primary care and its relationship to institutional services.

Applicants are required to have completed a minimum of a four year degree or have a three year degree and at least three years' relevant experience in a health related field

Course Structure

The MCH program is offered in full-time, part-time and external modes. The program is divided into three components for a total of 60 units of credit. These components are:

<table>
<thead>
<tr>
<th>Component</th>
<th>Units of Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core courses</td>
<td>12 units</td>

Elective Courses

There are over 30 courses offered. In addition students may undertake electives offered by other schools and academic units within the University of New South Wales, as well as courses offered
in the Department of Public Health and Community Medicine at the University of Sydney. Students may elect to undertake independent studies in an area of special interest which is not offered in the formal program.

Students are required to satisfactorily complete the following courses:

<table>

| and one only of the following: |
| CMED9543    | Organisation and Delivery of Services          |     |
|             | for Older People                                | 6   |
| CMED9544    | Gerontology                                     | 6   |
| CMED9540    | Pharmacology                                    | 6   |
| CMED9541    | Rehabilitation                                  | 6   |
| CMED9542    | Healthy Ageing                                  | 6   |
| Total       |                                                 | 24  |

These courses may be offered in the first and/or second semester depending on demand. Assessment will be undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the course, candidates must also be successful in a clinical exam (oral) which is held in Sydney.

Candidates awarded the Graduate Certificate in Geriatric Medicine are eligible to undertake further study for the Graduate Diploma in Geriatric Medicine or the Master of Medicine (Geriatrics) by coursework.

| 5506 Graduate Diploma in Geriatric Medicine |

| GradDipGeriMed |

Prerequisite: MB BS (or equivalent) and 1 year of clinical experience.

The Graduate Diploma in Geriatric Medicine is designed for medical practitioners who wish to upgrade their skills and knowledge in the area of aged care medicine. The program is offered by means of a distance education package. In order to undertake the program, candidates require a computer with the following specifications: 486 DX or Macintosh LC75 (minimum); 8 MB RAM (minimum); sound card and speakers; CD-ROM; modem (fast); Internet access and web browser. Basic computer skills are assumed. Upon enrolment, candidates are invited to attend a one day seminar (non-compulsory) held in association with the biomedical librarians, UNSW. During this seminar, candidates will learn the necessary skills to use the Internet effectively, and to access a number of medical data bases, on-line medical journals and document delivery systems.

The bulk of the coursework is supplied to candidates, by mail, in printed form. Some course material and activities for assessment will be accessed via the Internet, CD-ROM or through teleconferencing. Each 6 unit of credit course provides candidates with the equivalent of 3 hours of lecture material weekly for a 14 week semester.

Students are required to satisfactorily complete the following courses:

<table>

</tbody>
</table>

These courses may be offered in the first and/or second semester depending on demand. Assessment will be undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the...
coursework, candidates must also be successful in a clinical exam (oral) which is held in Sydney.

Candidates awarded the Graduate Diploma in Geriatric Medicine are eligible to undertake further study for the Master of Medicine (Geriatrics) by coursework.

2815 Master of Medicine (Geriatrics) by Research

MMed (Geriatrics)

The Master of Medicine (Geriatrics) program by research is available to candidates who have:

1. completed an undergraduate medical degree from UNSW or a qualification considered equivalent by the Faculty of Medicine Higher Degree Committee, and
2. at least three years' relevant clinical experience.

The program is available on a full-time, part-time or external basis. Students may elect to complete their thesis either with or without supervision. However, candidates who wish to enrol without supervision must have completed an undergraduate medical degree from UNSW.

9025 Master of Medicine (Geriatrics) by Coursework

MMed

The Master of Medicine (Geriatrics) program is designed for medical practitioners who wish to upgrade their skills and knowledge in the area of aged care medicine and who have at least one year of clinical experience. Candidates require basic computer skills. The program is offered by means of a distance education package. In order to undertake the program, candidates require a computer with the following specifications: 486 DX or Macintosh LC75 (minimum); 8 MB RAM (minimum); sound card and speakers; CD-ROM; modern (fast); Internet access and web browser. Basic computer skills are assumed. Upon enrolment, candidates are invited to attend a one-day seminar (non-compulsory) held in association with the biomedical librarian, UNSW. During this seminar, students will learn the necessary skills to use the Internet effectively, and to access a number of medical databases, on-line medical journals and document delivery systems.

The Master of Medicine (Geriatrics) degree requires completion of one year full-time coursework, plus a major project and supervised clinical experience. The degree may be undertaken on a part-time basis.

Coursework: The bulk of the coursework is supplied to candidates by mail, in printed form. Some program material and activities for assessment will be accessed via the Internet, CD-ROM or through teleconferencing. Each six unit of credit course provides candidates with the equivalent of 3 hours of lecture material weekly for a 14 week semester.

Students are required to satisfactorily complete the following coursework courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>UOC</th>

<td>Major Research Project</td>
<td>16</td>
</tr>
<tr>
<td></td>
<td><strong>Total</strong></td>
<td><strong>72</strong></td>
</tr>
</tbody>
</table>

These courses may be offered in first and/or second semester depending on demand. Assessment is undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the coursework, students must also be successful in a clinical exam (oral) which is held in Sydney.

140 hours of supervised clinical work is to be carried out at geriatric units approved by the School of Community Medicine, UNSW. These placements will be arranged in association with the candidates. Overseas candidates are required to undertake their clinical attachments in Sydney. Candidates must maintain a logbook documenting clinical cases seen, and this logbook forms the basis of the assessment of clinical experience.

Candidates are required to submit a major project on an approved topic.

School of Health Services Management

Some People Who Can Help You

Administrative Officer
Deirdre Kennedy (Room 227, Samuels Building)
Telephone: + 61 (2) 9385 2597
Facsimile: + 61 (2) 9385 1036
Email: d.kennedy@unsw.edu.au

The School of Hospital Administration was founded in 1956 with a grant from the WK Kellogg Foundation to provide training in hospital administration. In 1969 the name was changed to School of Health Administration, and in 1989 to School of Health Services Management (its present name), in accordance with its broader objectives in teaching and research. It serves the needs of hospitals and health services throughout Australia but qualified overseas candidates are also admitted.

The School of Health Services Management currently offers both undergraduate and graduate programs. The Bachelor of Health Administration (BHA) is being discontinued and no new students have been admitted into the BHA since 1992. The BHA qualification will no longer be offered or conferred after the current group of students have completed their studies. The School will focus exclusively on postgraduate programs.

The School also offers three formal programs in health services management leading to the awards of the degree of Master of Health Planning, Master of Health Administration, and the Graduate Certificate in Health Services Management. These programs may be undertaken by coursework on a full-time, part-time or external basis. In addition, the degrees of Master of Health Administration, and Doctor of Philosophy may be taken following periods of full-time or part-time research in hospital and health service management.

2960 Master of Health Administration by Research

Master of Health Administration

MHA

Facilities are available in the School for students to undertake research studies leading to the degree of Master of Health Administration, as either full-time internal students, part-time internal students, or part-time students external to the University. Students are required to have a suitable first degree and are normally expected to have a minimum of three years' experience in their proposed field of study within the health or hospital services.

Enquiries should be directed to the Research Studies Co-ordinator, Dr Mary-Louise McLaws, Tel 9385 2591, e-mail: m.mclaws@unsw.edu.au.
Master of Health Administration

MHA

The degree program has been designed to provide students with the essential knowledge required for senior managerial and planning work in the health services. The objective of the program is to develop graduates who are: 1. competent general and financial managers, 2. competent planners, 3. knowledgeable about public health (the health status of the Australian and other communities) and the structure, organisation and financing of health care systems, 4. knowledgeable about society, law and ethics, 5. competent in quantitative skills.

The degree is awarded on the successful completion of the program outlined below. The program may be taken on a full-time or part-time basis, internal basis or external basis (including compulsory residential schools) or on a distributed basis (mixture of full-time, part-time and external). External studies are not generally offered to students resident in the Sydney region. Applications based on difficulty of travel will be considered.

The normal time for completion of the full-time program is three academic sessions. However, students may be allowed to complete the degree in two academic sessions provided they have a four year undergraduate degree (or equivalent) and in excess of three years experience in the health field. The maximum time for completion of the program is eight academic sessions.

The normal time for completion of the program for part-time internal and external students is six academic sessions (three calendar years). Students must successfully complete 12 courses or the equivalent to a total of 60 units of credit.

Applicants are required to have completed a minimum three year degree and to have a minimum of three years' postgraduate experience preferably in a health-related field.

Those students who are inexperienced (i.e., less than three years) particularly in the health service area, are required to undertake a planned program of field experience (HEAL9531 Fieldwork in Health Service Organisation) in addition to the 12 courses.

Electives are chosen by the student in consultation with the Head of the School of Health Services Management (or nominee) from graduate courses offered within the University or by another tertiary institution. The approval of the relevant Head of School is required to undertake an elective offered outside the School of Health Services Management.

Program Structure

The program is divided into two components, for a total of 48 units of credit. These components are:

Core courses (6)  36 units of credit
Elective courses (6)  24 units of credit

In selecting electives, students can choose courses relating to their expected field of work, can choose to undertake advanced study in a particular discipline (e.g., Health Policy and Management) and/or can take electives relevant to their own interests and needs.

Core Courses

This compulsory component comprises the six core courses of 6 units of credit each. Students must successfully complete the following six courses as a requirement for graduation. Exceptions can only be granted by the Head of School on the basis of demonstrated equivalent masters level coursework previously undertaken.

8940
Master of Health Planning and Management

MHPM

The program is designed to provide students from countries with developing economies and health systems with the knowledge and skills to be competent health service planners, policy makers and managers. For students from developed health systems involved in international health, this program will enable them to focus and develop relevant planning and management knowledge from within a development framework.

The degree is awarded on the successful completion of the program outlined below. The program may be taken on a full-time or part-time basis, internal basis or external basis (including compulsory residential schools) or on a distributed basis (mixture of full-time, part-time and external). External studies are not generally offered to students resident in the Sydney region. Applications based on difficulty of travel will be considered.

The normal time for completion of the full-time program is two academic sessions. The maximum time for completion of the program is eight academic sessions. The normal time for completion of the program for part-time internal and external students is four academic sessions (two calendar years).

Students must complete 9 courses, or the equivalent, to a total of 48 units of credit.

Applicants are required to have completed an appropriate undergraduate degree or approved equivalent and to have a minimum of three years' postgraduate experience preferably in a health-related field. Those students who are inexperienced (i.e., less than three years) particularly in the health service area, are required to undertake a planned program of field experience (HEAL9531 Fieldwork in Health Service Organisation) in addition to the 9 courses.

Electives are chosen by the student in consultation with the Head of the School of Health Services Management (or nominee) from graduate courses offered within the University or by another tertiary institution. The approval of the relevant Head of School is required to undertake an elective offered outside the School of Health Services Management. Requests for exemption and substitution for previous postgraduate courses taken will be considered course to approval of the Faculty of Medicine.

Program Structure

The program is divided into two components, for a total of 48 units of credit. These components are:

Core courses (6)  36 units of credit
Elective courses (3)  12 units of credit

In selecting elective courses students can choose from a wide range of courses relating to their expected field of work; can choose to undertake advanced study in a particular discipline (e.g., Health Policy and Management) and/or can take elective courses relevant to their own interests and needs.

Core Courses

This compulsory component comprises the six core courses of 6 units of credit each. Students must successfully complete the following six courses as a requirement for graduation. Exceptions can only be granted by the Head of School on the basis of demonstrated equivalent masters level coursework previously undertaken.

**UOC**

- HEAL9371 Research and Evaluation Methods (4)
- HEAL9381 Policy Studies (4)
- HEAL9811 Sociology, Ethics and Health (4)
- MEED9010 Community Development (4)
- MEED9108 Program Evaluation and Planned Change (4)
- MEED9111 The Consultation Process (4)
- MEED9140 Project Design Monitoring in International Health (4)

**8404**

Master of Commerce – Health Informatics

**MCom**

A joint program between the School of Health Services Management and the School of Information Systems, Technology and Management in the Faculty of Commerce. This special program leads to the award of a Master of Commerce with a stream in Health Informatics.

The convergence of information and telecommunications technologies has ushered in the era of digital information management. The use of intranets, extranets and proprietary information sources has transformed the work of many professional groups. The work of practitioners in many areas has become increasingly information dependent, and the provision of timely, accurate, up-to-date and authoritative information to the desktop is now the expectation. In addition the work practices of these professional groups has become more flexible as practitioners/professionals are increasingly mobile but still require access to information and technology. Arising from this change is the development of a new kind of professional, the Information Management and Technology Specialist. This person combines knowledge of information systems and technology with knowledge of information sources and management. They have an understanding of information development and the issues of managing information systems, but more importantly they have the skills and knowledge to create, acquire, maintain and disseminate appropriate information to support operational processes of the organization.

Health Informatics is concerned with the development, dissemination and use of information in the field of health care. This stream in the Master of Commerce program is aimed at providing Information Management and Technology professionals with a program that will prepare them for work within the health care environment. Issues covered will include: problems of classification that are inherent in establishing more financially driven and output-oriented approaches to service delivery; identifying and developing systems for more evidenced based and outcomes approaches to service delivery; involving clinicians in information systems development and implementation particularly with respect to casemix applications and clinical pathways.

**Compulsory Core Subjects:**

- INF5998 Business Information Systems (6)
- ACCT5901 Accounting: A User Perspective (6)
- ECONS103 Business Economics (6)
- ECONS202 Statistics for Business (6)

In addition to the four Master of Commerce core subjects listed above, students must complete:

- INF5992 Data Management (6)
- IMGT5430 Health Sciences Information: Sources, Retrieval and Issues (6)
- HEAL9041 Health Care Systems (6)

Plus five units from:

- INF5584 Information Systems Project Management (6)
- INF5595 Information Systems Management (6)
- INF5593 Business Data Communication (6)
- INF5598 Information Systems Design (6)
- IMG5110 Information Retrieval Systems (6)
- IMG5120 Intellectual Organisation of Information and Records (6)
- IMG5550 Advanced Information Retrieval Systems (6)
- IMG5555 Informatics: Methods and Applications (6)
- ACCT5933 Issues in Public Sector Financial Administration (6)
- ACCT5988 Innovative Organisations (6)
- HEAL9301 Health Services Planning 1 (6)
- HEAL9351 Health Economics 1 (6)
- HEAL9381 Policy Studies (6)
- HEAL9391 Health Services Strategic Management and Planning (6)
- HEAL9421 Public Health and Epidemiology (6)
- HEAL9442 Health Resources Planning and Development (6)
- HEAL9711 Management of Organisation (6)
- HEAL9744 Casemix Accounting and Funding (6)

* Subject to Final Approval

**7360**

Graduate Certificate in Health Services Management

**GradCertHSM**

The Graduate Certificate provides recognition to students who are limited to study for one session or one year only. It will be awarded to a candidate who has satisfactorily completed the program of study outlined below. If students make satisfactory progress they may apply, on a competitive basis, to enter the MHA or MHP. Should students be successful in obtaining entry to the MHA or MHP program they will be expected to complete the remaining eight Masters courses successfully before they can be awarded a Masters degree or equivalent units of credit.

The Graduate Certificate is available on an internal and external basis (compulsory residential schools plus correspondence) and it may be undertaken on a part-time (two academic sessions or one year) or full-time (one academic session) basis.

**Sequence and Duration Of Program**

Candidates are required to successfully complete a minimum of four courses or the equivalent to a total of 20 units of credit. One course must normally be taken from each of the four groups of courses listed below, however, subject to the approval of Head of School or delegate, alternative programs of study may be considered.

1. **Management Studies**

   **UOC**

   - HEAL9701 Management of the Work of Health Professionals (4)
   - HEAL9711 Management of Organisations (6)
   - HEAL9741 Management of Health Services (6)
   - HEAL9391 Health Services Strategic Management and Planning (4)

2. **Health Related Studies**

   - HEAL9421 Public Health and Epidemiology (6)
   - HEAL9041 Health Care Systems (6)
   - HEAL9411 Epidemiology (6)
   - HEAL9811 Sociology, Ethics and Health (6)
   - HEAL9381 Policy Studies (4)

3. **Quantitative and Financial Studies**

   - HEAL9011 Statistics and Epidemiology (6)
   - HEAL9071 Health Care Financial Management 1 (6)
   - HEAL9351 Health Economics 1 (6)

4. **Health Service Studies**

   - HEAL9331 Health Related Law and Jurisprudence (Australia) (6)
   - HEAL9341 Health Related Law and Jurisprudence (Hong Kong) (6)
   - HEAL9301 Health Services Planning 1 (6)
Qualifications For Admission

1. Candidates will have been awarded a Bachelor's degree in an appropriate discipline from a recognised tertiary institution, and
2. Candidates will have a minimum of three years' experience in health services of a kind acceptable to the School Admission Committee.

In exceptional cases an applicant who submits evidence of such other academic and professional qualifications may be admitted.

No credits, exemptions or advanced standing are granted for the Graduate Certificate. Exceptions can only be granted by the Head of School.

Non-Award Students

Non-Award students enrolled on an external basis in courses of the MHA, MPH or MHP degree program are required to meet all the conditions for the completion of each course, including attendance at lectures in the course at a residential school.

School of Medical Education

The School offers programs of study either by research or by formal course work leading to the award of the following degrees:

Master of Clinical Education
Master of Health Professions Education by Research
Graduate Diploma in Clinical Education
Graduate Certificate in Clinical Education

2885
Master of Health Professions Education by Research

MHPEd

This program is designed for teachers and/or educational administrators in the health professions who wish to develop their research skills by undertaking studies leading to the award of the degree of Master of Health Personnel Education, either as full-time or part-time internal students or as students external to the University. The latter are required to spend a minimum of 14 weeks in the School during the program.

An original investigation under the direction of a supervisor for a minimum period of three academic sessions in the case of a full-time candidate, or a minimum of four academic sessions in the case of a part-time or external candidate is required.

The candidate is required to submit a thesis embodying the results of this original investigation.

9050
Master of Clinical Education by Distance Education

MClinEd

The program aims to provide a multidisciplinary program of study of clinical education for practicing clinicians with teaching responsibilities. The program requires clinical educators to study the knowledge, reasoning, practical activities and skills within the environment of the ward and other clinical settings, to observe and document clinical teaching and learning, and to undertake action research in its improvement.

The program also aims to foster a rational and rigorous approach to understanding clinical reasoning and decision making, and to ensure its effective learning. Three levels of attainment are proposed to accommodate the differing needs among clinical teachers.

The degree of Master of Clinical Education will be awarded after satisfactory completion of a program of advanced study of 48 units of credit and submission of a satisfactory major project based on at least one session of applied development or research in clinical education.

Courses to be offered within the distance education programs are:

5501
Graduate Diploma in Clinical Education by Distance Education

GradDipClinEd

The Graduate Diploma in Clinical Education will be awarded after satisfactory completion of advanced study of 40 units of credit together with 100 hours of clinical teaching practice.

7376
Graduate Certificate in Clinical Education by Distance Education

GradCertClinEd

The Graduate Certificate program aims to provide a multidisciplinary program of study of clinical education for practicing clinicians with teaching responsibilities. The program requires clinical educators to study the knowledge, practical activities and skills within the environment of the ward and other clinical settings, to observe and document clinical teaching and learning.

This Graduate Certificate program will be suitable for those clinical teachers who wish to upgrade their educational skills and obtain recognition for their Faculty and professional development, but who would not wish to engage in a full masters program.

The Graduate Certificate in Clinical Education will be awarded after satisfactory completion of advanced study of 20 units of credit.

Course to be offered within the distance education program are:

The Centre for Public Health

The Centre brings together the resources of the Schools of Community Medicine, Health Services Management and Medical Education. The Centre is also a partner in the Sydney Public Health Consortium with the Department of Public Health and Community Medicine at the University of Sydney, where candidates may undertake up to 50% of their course work.

The Centre offers programs of study in the area of public health either by research or by coursework leading to the awards of the following degrees: Graduate Certificate of Public Health, Graduate Diploma of Public Health and Master of Public Health, by coursework and research.

2845
Master of Public Health by Research

MPH

Students applying for admission to the MPH by research are required to have a suitable first degree and are normally expected to have considerable experience in their proposed field of study within the health or hospital services. The program can be undertaken full-time or part-time, through internal or external mode.

9045
Master of Public Health by Formal Coursework

MPH

The Master of Public Health program provides preparation for education, research and service in all aspects of public health. The program includes study in epidemiology, quantitative and qualitative research methods, health services management, health promotion, development and education in health, as well as a systematic review of topical public health issues. It is designed to address the continuing education needs of specialists in public health as well as providing a general orientation to public health issues and methods for the health professions.

Applicants are required to have completed a bachelor degree in a health-related discipline and to have at least three years' experience in a health or health-related field.

Program Structure

The MPH program is offered in full-time, part-time and external* modes. The program is divided into three components, for a total of 60 units of credit. These components are:

Core courses  20 units of credit
Elective courses  20 units of credit
Project  12 units of credit

The program articulates with the Graduate Diploma in Public Health (GradDipPH 5507) and the Graduate Certificate in Public Health (GradCertPH 7368). Credit for courses completed as part of the GradDipPH and the GradCertPH may be transferred to the Master's program.

Core Courses

Students must complete the following six courses as a foundation for further study. These core courses are prerequisites for enrolment in many of the electives.

Electives

There are over 70 electives offered in the three schools at the University of New South Wales. In addition, students may enrol in electives which are offered by other schools and academic units within the University of New South Wales, as well as courses offered in the Department of Public Health and Community Medicine at the University of Sydney. Students may elect to undertake independent studies in any of the three Schools, to learn about a particular area or course matter of special interest which is not offered in the formal program (CMED9100/1/2/4, HEAL9921/31/41, MEED9001/2/3/4). The following electives are offered in 2000:

**GradCertPH**

The Graduate Certificate in Public Health comprises the following courses:

- CMED9516 Introduction to Public Health 4
- CMED9500 Epidemiology 6
- Electives 12
- Total 22

### School of Paediatrics

#### 5507 Graduate Diploma in Paediatrics

**GradDipPaed**

The program is taken over one year on a part-time basis. Candidates attend a program of lectures and grand rounds (approximately four and one-half hours per week).

The Graduate Diploma is awarded after satisfying the examiners in written and clinical examinations at the end of the program.

It must be noted that the Graduate Diploma of Paediatrics is intended for postgraduates who have medical degrees registrable in Australia and who are able to secure a paediatric appointment, salaried or otherwise, in a teaching hospital recognised by the University of New South Wales. The School of Paediatrics takes no responsibility for making such arrangements.

Candidates who have completed 12 months experience in Clinical Paediatrics under supervisors acceptable to the University may be exempt from the clinical experience.

Students should note that if they have to repeat the year due to failure in one or more course, they must re-enrol in and satisfactorily complete all courses in order to qualify for the Graduate Diploma.

- PAED9101 General Paediatrics and Child Health 1 8
- PAED9102 General Paediatrics and Child Health 2 8
- PAED9106 Clinical and Technical Skills 1 4
- PAED9107 Clinical and Technical Skills 2 4
- PAED9108 Clinical Paediatric Experience 1 -
- PAED9109 Clinical Paediatric Experience 2 -
- Total 24

#### 5505 Graduate Diploma in Community Paediatrics

**GradDipCommPaed**

This program is designed for health professionals such as medical practitioners, nurses, psychologists, physiotherapists and social workers, who provide services to children. Candidates are required to hold a relevant bachelor's degree of three years' duration or equivalent prior to enrolment in the program. The program is aimed to equip candidates with an understanding of health needs of children in the community.
The Graduate Diploma in Community Paediatrics will be awarded after satisfactory completion of a program of advanced study of the following ten courses which totals 44 units of credit:

<table>
<thead>

</table>

This course will be run in 2000 subject to a minimum of 10 enrolments.

### School of Physiology and Pharmacology

The School offers programs of study leading to the awards of Master of, Graduate Diploma and Graduate Certificate in Sports Medicine by course work delivered by distance education, the Master of Applied Science in Biopharmaceuticals (in conjunction with the School of Biotechnology) and the Master of Medical Science in Drug Development and the Graduate Diploma and Graduate Certificate in Drug Development.

#### 9055 Master of Sports Medicine

**MSpMed**

The programs aim to equip medical practitioners with a rigorous understanding of the theory and practice of sports medicine in meeting the medical demands of people engaged in individual or team performance-related sporting activities and with the medical demands of people involved in health-related physical activities for the purposes of primary, secondary or tertiary prevention of disease processes.

The degree of Master of Sports Medicine will be awarded after the satisfactory completion of a program of advanced study of courses (including clinical activities as prescribed) which totals 60 units of credit.

- 54 units of credit will accrue from nine compulsory courses.
- 6 units of credit will accrue from the completion of a Research Project and Report.

Completion is also required of a Sports Medicine Practicum requiring attendance at two 4 day clinical training weekends. For overseas students special arrangements will be made.

Satisfactory completion of a final clinical examination is also required.

#### 8049.1000 Master of Science in Biopharmaceuticals by coursework

**MSc (Biopharmaceuticals)**

This is an interdisciplinary program designed principally for postgraduates with backgrounds in either pharmacology or biotechnology who wish to obtain advanced training in both areas in order to gain expertise necessary for the development and use of the new generation of biopharmaceuticals which have been developed by, or result from, the application of molecular biology.
It is open to postgraduates with a four year degree in a related discipline or who have, in the opinion of the Higher Degree Committee, acquired equivalent qualifications or experience. Prior study of biochemistry is required for the program.

The program consists of lectures, tutorials, practical sessions, case history studies and a supervised project. The minimum period of registration before the award of the degree is two sessions for full-time students and four sessions for part-time students.

Choice of units is dependent on the background of the student. Pharmacology Principles (PHPH5461) must be taken by students who have not completed an approved Pharmacology program, while Biotechnology Principles (BIOT7040) must be taken by students who have not completed an approved Biotechnology course program.

Course details are as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>UOC</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHPH5461</td>
<td>Pharmacology Principles</td>
<td>12</td>
</tr>
<tr>
<td>BIOT7040</td>
<td>Biotechnology Principles</td>
<td></td>
</tr>
<tr>
<td>PHPH5471</td>
<td>Advanced Pharmacology</td>
<td>12</td>
</tr>
<tr>
<td>BIOT7030</td>
<td>Advanced Biotechnology</td>
<td>12</td>
</tr>
<tr>
<td>BIOT7060</td>
<td>Biotechnology Project</td>
<td></td>
</tr>
<tr>
<td>PHPH5491</td>
<td>Pharmacology Project</td>
<td>12</td>
</tr>
</tbody>
</table>

Total: 48

Pharmacology Principles (PHPH5461) must be taken by students who have not completed an approved Pharmacology course while Biotechnology Principles (BIOT7040) must be taken by students who have not completed an approved Biotechnology course program. All students must pass Advanced Pharmacology (PHPH5471) and Advanced Biotechnology (BIOT7030).

Each individual program must be approved by the Higher Degree Committee of the Faculty of Applied Science and would comprise: (i) a major strand of related material comprising approximately 75% of the total program including a project comprising not less than 15% of the program (ii) a minor strand of broader based material comprising up to 25% of the total program.

8049.2000

Master of Science in Biopharmaceuticals by coursework

Distance Education

MSc (Biopharmaceuticals)

The CRC for Biopharmaceutical Research has developed this strongly interdisciplinary Master of Science in Biopharmaceuticals course. The course teaches the scientific basis underscoring the development of recombinant biopharmaceuticals, combined with aspects of clinical trials, regulatory considerations, patent issues, and licensing. The program content is incorporated in 8 distance education modules comprised of written text and video/audio tapes containing course material, demonstrations and self-testing exercises. Access to the Course Co-ordinators will be by phone, fax, electronic mail and teleconferencing facilities.

The Master's Program can be completed in a minimum of 2 years. The minimum time option would entail the completion of two modules per session. These are offered concurrently. A maximum time for completion has been set at 8 years.

Modules consist of printed notes containing course material, readings, assessment questions and exercises. Some modules also include audio and video taped material to access audio equipment is essential.

The Master's Program calls for the completion of 8 modules which is equivalent to 48 units of credit (exemptions may be allowed in exceptional circumstances).

There will be two tutorials per module. These will be conducted via a multiple telephone link and will be structured and interactive.

Each module will be assessed separately at module completion and a certificate awarded. The assessment of modules will be flexible and will be based on two pieces of submitted work. This may be in the form of written assignments or as a timed, faxed examination subject to university approval.

Course details are as follows:

- PHPH5501 Basic Principles of Drug Action: 6
- PHPH5511 Selected Topics in Pharmacology: 6
- PHPH5521 Techniques for Drug Development: 6
- PHPH5531 Discovery and Development of New Medicines: 6
- BIOT7070 Production of Recombinant Products: 6
- BIOT7080 Principles of Fermentation and Downstream Processing: 6
- BIOT7090 Monoclonal Antibody Technology: 6
- BIOT7070 Regulatory Considerations, Patent Issues and Licensing: 6

Total: 48

9060

Master of Medical Science in Drug Development

MMedSc

The discovery, development and marketing of medicines has become a highly organised interdisciplinary team activity. Members of such teams need to be literate in all aspects of drug development ranging from procedures for identifying lead compounds through to the full development of the product including preclinical studies, clinical trials and the legal, regulatory and ethical issues relevant to marketing and on-going vigilance of the medicine. The aim of this course is to enable people working in the field of developing and using pharmaceutical substances to obtain such expertise by providing core and elective materials in a distance-learning format. Since interchange of ideas is an essential part of any educational activity, the course will include interactive assignments with specific tutors and group discussions where students come together for tutorials, workshops and practice sessions, and generally to interchange ideas.

The educational principle governing the program's teaching approach is to streamline the provision of information and to concentrate on application. Thus, students are issued with a manual for each course. The manual contains, typically, about 200-250 pages of lecture notes plus 200-250 pages of attachments from the literature (relevant chapters from textbooks, published papers, etc., Australian and overseas government regulatory and policy documents, etc.).

The Master of Medical Science in Drug Development will be awarded to students who successfully complete the coursework identified below. The program is offered as a part-time distance learning programme and will take a minimum of three years to complete. The program is designed for persons wishing to pursue careers that relate to the development and safe use of medicines. Career opportunities exist in the pharmaceutical manufacturing industry, government and in research institutions such as universities. Health care professionals interested in developing new medicines and improving the use of existing medicines will find the course of value. The extensive range of electives enables the candidate to specialise in particular areas such as the discovery of new medicines, regulatory affairs, clinical trials, market development, medical department administration, preclinical studies, etc.

Below is a list of core and elective courses for the Master of Medical Science in Drug Development. Generally students must take all core courses and sufficient electives to give a total of 72 units of credit. The program proceeds in three stages, which correspond to Years 1 to 3 for students proceeding in the minimum time. In special cases, students may replace core courses with electives.

The structure of the Masters program is as follows:
The Graduate Diploma in Drug Development will be awarded to students who successfully complete the following course work. This program has similar format and objectives to the Graduate Diploma but is designed for those people who wish to obtain a limited competency in the areas described. The program is offered as a part-time distance learning program and will take a minimum of one year to complete.

Year 1
Session 1
*PHPH9101 Principles of Drug Action 6
*PHPH9100 Discovery and Development of New Medicines 6

Session 2
*PHPH9120 Clinical Development of New Medicine 6

Master of Psychological Medicine

MPM

The program is designed to increase the ability of experienced general practitioners to recognise mental disorders in their patients, to improve their ability to manage many such patients within their own practices, and to facilitate their ability to refer appropriately to psychiatrists or clinical psychologists for more specialised treatment. The master's degree program may be undertaken on a part time basis over four sessions, either by distance education or by attending the program at St. Vincent's campus. Candidates are required to complete the following program:

Course Descriptions

School of Community Medicine

CMED9100
**Independent Studies**
*Staff Contact: A/Prof R Richmond*
UOC4 HPW2 WKS14 S2

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing courses. They are recommended particularly for candidates who wish to explore specific community health problems within their own communities or areas.

CMED9500
**Epidemiology**
*Staff Contact: A/Prof J Kaldor*
UOC6 HPW3 WKS14 S1 or S2

This course provides students with an understanding of the role of epidemiology as the quantitative science underpinning much of public health practice. Students will learn the basic methodological tools of epidemiology, such as statistics to measure disease frequency, skills to critically review literature and interpret epidemiological studies, and their application in a variety of research and public health contexts. Skills for measuring frequency of disease and testing for evidence of association between risk factors and disease in this course will build on statistics learnt in CMED9502 Statistics for Public Health. This course will cover topics pertaining to study design, basic statistical tests and interpretation of results. Application of these topics in areas such as questionnaire design, conducting and managing studies, problems relating to research grants will be covered in CMED9513 Applied Epidemiology.

CMED9502
**Statistics for Public Health**
*Staff Contact: Dr Deborah Black*
UOC6 HPW3 WKS14 S1 or S2

Note: This is a core course for Master of Public Health Students. Provides an introduction to research methods and statistical techniques applicable to public health data. Statistical techniques will focus on data analysis of a single variable or linear relationships between two variables. In addition, students will learn to use SPSS for Windows to conduct statistical analyses on a set of data relevant to public health.

CMED9507
**Project**
*Staff Contact: A/Prof R Richmond*
UOC12 WKS14 S1 or S2

The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue; systematically collecting relevant, up-to-date information about the issue; analysing, interpreting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master's level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning project early in their program, it is normally undertaken after completion of all core and elective courses.

CMED9513
**Applied Epidemiology**
*Staff Contact: A/Prof R Richmond*
UOC4 HPW2 WKS14 S2

Prerequisite/s: CMED9500 Epidemiology

This course builds on CMED9500 Epidemiology, using practical examples of the application of epidemiology in field settings. Themes will include the development and validation of measures for epidemiological studies, the conduct of research in practice, evaluation methods and the application of study designs in the real world, ethics of research, and acute epidemiological investigation.

CMED9516
**Introduction to Public Health**
*Staff Contact: A/Prof A Bauman*
UOC4 HPW2 WKS14 S2

This course will introduce students to the discipline of public health. There will be 12 formal lectures and 2 weeks of student presentations. Topics covered include Australian health care system; population health; management of public health interventions; principles of prevention; health promotion; health protection; concepts of risk factors; socio-economic status and health; special needs groups; determinants of health status; disability and chronic illness.

CMED9517
**Advanced Biostatistics and Statistical Computing**
*Staff Contact: Dr S Lord and Dr D Black*
UOC4 HPW2 WKS14 S2

Prerequisite/s: CMED9502

Statistical design, analysis and reporting: a selection of topics from clinical trials and other controlled studies, non-experimental studies, rates and proportions, multi-way tables, analysis of covariance and repeated measures, multiple regression and other multivariate analysis, life tables and survival analysis; use of statistical software. Thorough individual instruction in the use of computers will be given in the laboratory.

CMED9518
**Case Studies in Epidemiology**
*Staff Contact: A/Prof K Kaldor and Dr M McCredie*
UOC4 HPW2 WKS14 S2

Prerequisite/s: CMED9500

Epidemiology has made a substantial contribution to public health policy and practice in a number of areas. The course will consider four areas (cancer, cardiovascular disease, hepatitis and screening for disease) and review the major epidemiological studies that have contributed to development of knowledge and in Public Health application in these areas. The emphasis of the course will be on substantive findings, and the role played by epidemiological methods.

CMED9519
**Demography**
*Staff Contact: A/Prof I Burnley*
UOC4 HPW2 WKS14 S2

Introduction to demography; sources and processing of data, principles and applications. Life tables, mortality, marriage and divorce, natality, reproduction. Marital characteristics and family groups. Migration. Distribution by area, sex, age, race; educational and economic characteristics. Population estimates and projections. Computer techniques.

CMED9539
**Psychiatry of Old Age**
*Staff Contact: Dr B Draper*
UOC6 WKS14 S2

This course deals with the major psychiatric disorders encountered in the care of older people (dementia; depression; paranoid disorders; late onset schizophrenia and mania; anxiety disorders; stress in late life). It covers the assessment and management of these disorders, as well as other relevant issues such as preventative psychiatry, psychological treatment for the elderly, family assessment and behavioural/psychiatric disturbances in the nursing home.
CMED9540
Pharmacology
Staff Contact: Prof L. Howes
UOC6 WKS14 S2
This course examines the pharmacology of ageing. Topics covered include pharmacokinetics, pharmacodynamics, adverse drug reactions, drug interactions and drug prescribing in the elderly. The major drug groups involved in geriatric medicine will also be noted.

CMED9541
Rehabilitation
Staff Contact: Dr G Bowring
UOC6 WKS14 S1 or S2
This course introduces students to the principles and practice of rehabilitation medicine, with particular reference to rehabilitation of the elderly. Topics covered include the rehabilitation of stroke and other neurological disorders including spinal cord injury, orthopaedic and musculoskeletal rehabilitation, orthotics, prosthetics, and rehabilitation in the palliative care setting. The role of the allied health professional in rehabilitation of the elderly is also considered.

CMED9542
Healthy Ageing
Staff Contact: Dr G Stathers
UOC6 WKS14 S1 or S2
This course addresses a number of health issues relevant to the practitioner in his/her day to day management of older patients. Students consider the concepts of healthy ageing and wellness, and community attitudes to ageing. The value of screening and screening tools in clinical practice is discussed. A number of clinical issues are covered such as dental and oral health, physical exercise, nutrition, sexuality, and addictions in the elderly. The importance of communication and specific communication disorders in the elderly are also examined.

CMED9543
Organisation and Delivery of Services for Older People
Staff Contact: Dr G Poulos
UOC6 WKS14 S1 or S2
A course consisting of primary medical care, hospital based provision, community health services, geriatric assessment teams, institutional care, ethical aspects of care, testamentary capacity and informed consent, guardianship board, terminal care, team concepts and team leadership, funding of care - State and Commonwealth responsibilities.

CMED9544
Gerontology
Staff Contact: Prof F. Ehrlich
UOC6 WKS14 S1 or S2
Biology of ageing - age associated changes in structure and function of major body systems, psychology of ageing, psychological theory and cognition in later life, sociology of health and illness in the elderly, politics of ageing.

CMED9546
Major Research Project
Staff Contact: Prof F Ehrlich
UOC6 WKS14 S1 or S2
Candidates are required to complete a project on an approved topic. Candidates will be assisted in the planning and preparation of the project by a preparatory course covering aspects of study design, research methods and critical appraisal of scientific papers. Satisfactory completion of this preparatory course is a prerequisite of undertaking the project, but candidates with prior experience in research may be exempted from the preparatory course.

CMED9547
Clinical Experience
Staff Contact: Prof D. Chan
UOC6 WKS14 S1 or S2
Candidates must complete 140 hours of supervised clinical experience at geriatric units approved by the School of Community Medicine, UNSW.

CMED9548
Clinical Geriatrics 1
Staff Contact: Dr R. Clark
UOC6 WKS14 S1 or S2
Presentation of disease - specific features of presentation in old age; nonspecific syndromes: eg: immobility, falls. System disorders: eg haematological, renal. Also special senses: hearing, vision.

CMED9549
Clinical Geriatrics 2
Staff Contact: Dr P. Gonski
UOC6 WKS14 S1 or S2
Presentation of disease - specific features of presentation in old age; nonspecific syndromes: eg: incontinence, confusional states. System disorders: eg cardiac, respiratory, neuroloical, vascular, metabolic; bones, endocrine.

CMED9550
Clinical Examination
Staff Contact: Prof F. Ehrlich
This is a clinical exam (oral), which is held in Sydney at the conclusion of the coursework component of the Graduate Certificate, the Graduate Diploma or the Master of Medicine Degree.

CMED9600
Disability
Staff Contact: Dr H Dickson
UOC4 HPW2 WKS14 S1 or S2
Epidemiology of disabling physical and mental conditions; the nature of disability and handicap (including developmental disability); perceptions of handicap; disabled persons consumer movement and organisation; sociology of disability; social inequality and disability; rehabilitation; community and specialist rehabilitation services; relevant legislation, government services, special needs of disabled persons health accommodation and the physical environment; transport, work, income support, legal rights and public policy.

CMED9602
Health and Illness Behaviour
Staff Contact: Mr P Trebilco
UOC4 HPW2 WKS14 S1
Consideration and evaluation of policy implementation in mental health promotion; application of socio-economic factors in mental illness and mental health assessments; theoretical considerations in the design of mental health promotion programs; analysis of the sources of health information, and consideration of the various models of information transmission.

CMED9603
Communication and Writing In Health
Staff Contact: Prof P Baume and Ms S Beecher
UOC4 HPW2 WKS14 S1
Writing and preparation for the media; preparation of material for health education and promotion, including audiovisual material; preparation of scientific papers, reports and theses; practical skills in planning and writing articles: logical organisation, clear and concise scientific prose; presentation of data and overall layout.

CMED9604
Alcohol and Other Drug Issues
Staff Contact: A/Prof R Richmond
UOC4 HPW2 WKS14 S1 or S2
Alcohol and Other Drug Issues is a wide ranging course that takes a public health approach. It has relevance for population health related to drug use, health management of people who are drug users and abusers, drug policy, and raises important controversial issues. Use of alcohol and other drugs is a major issue in determining the health of individuals and populations in developed and developing countries. The four components of this course are: the size of the drug problem; model of dependence; harm reduction; and relapse prevention. This course is a distance learning course offered in flexible delivery mode. At the end of this course students will understand the patterns of drug use and health effects; and will have
learnt about issues of drug dependence. Students will learn about the range of public health approaches available to minimise problems related to substance abuse such as harm reduction strategies. Students will develop skills in brief interventions to use with excessive drinkers and will appreciate the issues associated with relapse. This course provides students with important knowledge and skills that will enable them to plan effective alcohol and drug services.

CMED9605 Health in Developing Countries

**Staff Contact:** Dr J Hirshman

UOC4 HPW2 WKS14 S1 or S2

Economic, demographic and epidemiological aspects; communicable diseases, for example, diarrhoea and parasitism, chronic diseases including mental health in the Third World context; maternal and child health; family planning; nutrition, and food and nutrition policy; breast feeding promotion; immunisation; water supply and environmental sanitation; organisation of health services; primary health care; health personnel training; health education; pharmaceutical problems; role of international and non-governmental agencies; self-reliance.

CMED9606 Women and Health

**Staff Contact:** Dr S Irvine

UOC4 HPW2 WKS14 S1

Current issues relevant to the health of women, both consumer and provider perspectives. Common health risks facing women. Special needs in health and health care for particular populations of women. Traditional role of women as health carers, and the impact this has on health and health services. Short lectures, group discussions and student presentations. Assessment is a combination of marks given in written tutorial papers, end of session essay and group facilitation and class participation.

CMED9607 Researching Women's Health

**Staff Contact:** Dr S Irvine

UOC4 HPW2 WKS14 S2

Examines the socio-cultural aspects of women's health. Emphasis will be on reading and critically examining recent social, behavioural science, public health and primary care literature. Case studies will be used to look at determinants of women's health, woman and health care systems, promoting women's health, and woman and disability.

CMED9608 Rural Health Studies 1

**Staff Contact:** Prof M Harris

UOC4 WKS14 S1 or S2

Notes: External course, 4 tele-conferences, one 2-day workshop mid-term.

Examine roles, needs, and particular health and welfare issues of rural general practitioner services; explore methods for professional development of rural GPs; study public health issues of particular relevance to rural general practice; study data collection and analysis to help identify rural health problems, their management and prevention; plan and evaluate the promotion of health, and prevention of disease through individual and community health education programs in rural communities.

CMED9610 Food and Nutrition Policy Studies

**Staff Contact:** Ms L Bloomfield and Ms P Craig

UOC4 HPW2 WKS14 S2

The relationship between population, health and the food and nutrition system, i.e. the production, distribution and consumption of food. Discussion of development of intersectoral policies and strategies addressing specific segments of the food and nutrition system to improve the health of vulnerable populations in developed and developing countries. Students will work through a case study and demonstrate their understanding by preparing, presenting and defending a proposed food policy for a specified population or community group.

CMED9611 Health of the Elderly

**Staff Contact:** Prof P Ehrlich

UOC4 HPW2 WKS14 S1

Demography of ageing; epidemiology of health, illness and disability in an ageing population; aged persons perspectives; gerontology - biological, sociological and psychological perspectives; problems and special needs of an ageing population; health maintenance; health policy for an ageing population; health services; institutional care; community and domiciliary services; non-government organisations; poverty; community attitudes; accommodation; income support; social and ethical issues.

CMED9612 Environmental Health

**Staff Contact:** Dr J Frith

UOC4 HPW2 WKS14 S2

Prerequisite/s: CMED9502

To introduce the principles of epidemiology, particularly in reference to environmental risk factors of disease and in reference to such principles as incidence and prevalence, aetiology and risk factors, epidemics and endemics, and primary, secondary and tertiary prevention of disease. In particular, it deals with environment and disease, radiation, chemical, hazards, air and water pollution, biological hazards, urban environment, ecology, ecosystems and interdependence and how these factors affect health, public health issues related to sustainable development.

CMED9615 Delivery of Health Services in the Community

**Staff Contact:** Prof M Harris

UOC4 HPW2 WKS14 S1

The course provides an overview of primary care in Australia and the application of the PHC approach to Australia and other developed countries. Topics to be covered include: primary care and PHC in Australia; primary medical care and family practice; primary nursing care and generalist community nursing; integration of Community Health Services; healthy cities; self help groups and self care; health promotion; surveillance/monitoring in primary care; advocacy/community development; indigenous health; community participation.

CMED9617 Community Paediatrics

**Staff Contact:** Dr B Blick

UOC4 HPW2 WKS14 S2

A broad view of Community Paediatric Services in contemporary Australia, how this paediatrics is practiced and the rationale behind these practices. Explores the practical and theoretical background behind the development of Community Paediatrics, as well as the principles that underpin its practice. Examines some key aspects of that practice.

CMED9618 Public Health Law and Ethics

**Staff Contact:** A/Prof P McNeill

UOC4 HPW2 WKS14 S1 or S2

This course deals with the role of law and ethics in resolving issues in public health. An overview will be presented of the Australian legal system, principles of law and legal approaches to resolving conflicts; law relevant to health professionals including their duty of care, requirements for registration, and obligations in privacy and confidentiality; legal responsibilities and obligations of public accountability; ethical principles and a model for ethical decision-making.

CMED9619 Evaluation of Primary Health Care Services

**Staff Contact:** Ms J McDonald

UOC4 WKS14 S1S2

Students will attend a three day educational program which will cover the principles of evaluation assessment and accreditation. They will work through, in detail, both the content and process for undertaking a Community Health Accreditation Standards Review. This program is highly interactive and includes role plays and case studies. After completion of the three day educational program
students will be required to attend a two day review of a Community Health Service, after the review they will work with a team of two other reviewers to prepare a report. This report and assessment by the other reviewers will be the course of the candidates evaluation for the course.

CMED9620
Project Management and Evaluation in Rural Areas
Staff Contact: Prof M Harris
UOC4 WKS14 S2
Notes: External Course, 4 tele-conferences and one 2 day workshop pre-term

Basic concepts of health project management and evaluation as they apply to rural communities; recognising trends in rural communities which affect the health of individuals and the community; understanding barriers to the adoption of preventive action; understanding how effective health programs and disease prevention strategies are selected, implemented and assessed. This course is particularly relevant to community health and general practice projects.

CMED9621
HIV/AIDS: Challenging and Changing Health Care Systems
Staff Contact: Dr G Dore
UOC4 HPW2 WKS14 S2

This course provides an introduction to biological, clinical and epidemiological aspects of HIV infection, and considers the impact of HIV/AIDS on a number of areas of the health care system and society, both now and in the future. The course is taught by internationally recognised experts in the field, and will have a particular focus on HIV/AIDS in Australia and the Asia/Pacific region.

CMED9626
Inequalities and Health
Staff Contact: Ms E Harris
UOC4 HPW2 WKS14 S2

The course aims to provide practical skills in analysing inequalities and evaluating interventions designed to address them. These are critical skills in the Health Outcomes approach. The course comprises three 1 day workshops with teleconferences after each workshop. For further information contact Dr E. Comino, Ph: 9385 2522.

CMED9627
Audit and Quality Assurance in Primary Care
Staff Contact: Prof M Harris, Dr J Frith
UOC4 WKS14 S1 or S2

This course aims to provide theory and practice in quality assurance and audit in General Practice. In the course students will develop knowledge and skills in quality assurance and audit principles and methods and in applying these to their own clinical practice by conducting audits of their practice over one year. The course will include distance education materials and manuals, teleconferences, one weekend workshop, audit manuals and material.

CMED9630
Developing Health Services for Indigenous Australians
Staff Contact: Dr S Irvine
UOC4 HPW2 WKS14 S1

This course will help students understand by Indigenous Australians one weekend workshop, audit manuals and material. In the course students will develop knowledge and skills in quality assurance and audit principles and methods and in applying these to their own clinical practice by conducting audits of their practice over one year. The course will include distance education materials and manuals, teleconferences, one weekend workshop, audit manuals and material.

CMED9631
Project in Aboriginal Health
Staff Contact: Dr S. Irvine
UOC4 HPW2 WKS14 S2

Students in this course will participate in small groups in a project organised in conjunction with an Aboriginal community or health provider. Experiential learning techniques will cover both process elements of project implementation and content elements specific to the health problem addressed. The project will be designed within a framework of cultural safety and self determination.

CMED9632
Project Design and Monitoring in Effective Health Care
Staff Contact: Dr D Black, Dr S Irvine and Prof P Baume
UOC4 HPW2 WKS14 S1 or S2

This course will allow students who have undertaken courses in measurement, decision making, planning and evaluation to apply these skills in a real project in a clinical environment. Students will work in small groups and each student in the group will be responsible for one component of the project. Working in a team will be an important part of the project. This course will be conducted in association with a health care provider or funding agency.

CMED9633
International Tobacco Control
Staff Contact: A/Prof Robyn Richmond
UOC4 HPW2 WKS14 S1 or S2

The worldwide toll of death and disability related to tobacco use is enormous. In this course we examine programs in countries that have made efforts to limit availability of tobacco and reduce its use, and the effectiveness of those efforts. This course examines the issue of tobacco control: what does it involve; how best can it be achieve; and how can it be evaluated. This course takes an international focus. Tobacco control initiatives are illustrated with examples from a wide range of countries, and the focus is specifically on how these approaches can be evaluated. Different approaches work best in different places, and this course explores how a tobacco control approach/strategy works in a particular country. This course includes how to evaluate an international tobacco control program. It is a valuable course for those concerned with how to prevent the damage that results from tobacco use, how to develop a tobacco control program and activities, and how to evaluate the effectiveness of such activities. This course is useful for doctors, nurses and other health practitioners, public health specialists, policy-makers and others in the public and private sectors of developed and developing countries. At the end of this course, students will understand the patterns of tobacco use and health effects of smoking, and will have learnt about nicotine dependence. Students will learn about the range of public health approaches available to reduce tobacco prevalence including the range of harm reduction strategies. Students will develop skills of brief interventions to use with smokers and will appreciate the issues associated with relapse. This course provides students with important knowledge and skills that will enable them to plan and evaluate an effective tobacco control program.

School of Health Services Management

HEAL9011
Statistics and Epidemiology
Staff Contact: Dr Mary-Louise McLaws
UOC6 HPW3 WKS14 S1

Collection, collation and analysis of data and the interpretation of statistical information for the purposes of health services management. The use of computers for these purposes. Measurement of disease rates and interpretation and identification of health status. These statistical methods and measures will assist in planning, operation and evaluation of interventions in health service management.

HEAL9021
Health Services Statistics
Staff Contact: To be advised
UOC4 HPW2 WKS14 S1 or S2
Prerequisites: HEAL9011 or equivalent
Notes: Not offered in 2000.

The application of statistical methods to health planning and administration problems and other problems of direct relevance to the health care field.
HEAL9031
Ethics of Resource Allocation
Staff Contact: Ms Helen Lapsley
UOC4 HPW2 WKS14
Prerequisite/s: HEAL9351 and HEAL9811, or equivalents
Note/s: Not offered in 2000.
Management of scarce resources in relation to concepts of equity and justice. An examination of the ways in which choices are made, and the organisational structures which determine how, by whom and for whom resource allocation decisions are made within the healthcare system. A review of the most significant ethical issues. Case studies which demonstrate value judgements, ethical and economic conflicts and the determination of priorities.

HEAL9041
Health Care Systems
Staff Contact: Dr Stephanie Short
UOC6 HPW3 WKS14 S1
The first part of the course focuses on the concepts and theoretical perspectives that will enable students to understand the complex relations between health, health care and society. Notions of physical, psychological and social health both at the individual and society-wide level are analysed. Close attention is paid to the health care system in Australia, as a basis for the closer analysis of particular health-care issues such as the organisation and financing of health care, the health workforce, health care legislation and health care services for disadvantaged groups. The course then examines current reforms in health policy making, delivery and financing, before future possibilities for the development of health and health care in Australia and elsewhere are analysed.

HEAL9071
Health Care Financial Management I
Staff Contact: Mr Kevin Forde
UOC6 HPW3 WKS14 S2
Introduction to double entry accounting including the underlying conventions and doctrines to provide a working knowledge of both accrual and cash based accounting systems, utilisation of accounting records for the presentation and interpretation of profit and loss accounts, balance sheets and fund statements. Introductory financial statement analysis, budgeting, analysis of budgets and costing products and services. An introduction to contract law and the legal obligations of financial managers.

HEAL9081
Health Care Financial Management 2
Staff Contact: Mr Kevin Forde
UOC4 HPW2 WKS14 S2
Prerequisite/s: HEAL9071 or equivalent
An investigation of hospital fund accounting to provide a level of operational competance. Exposure to budgeting techniques and evaluation procedures; cost analysis and control; investment evaluation and discounted cash flow techniques; accounting for investment; cost allocation procedures. An overview of the course of accounting numbers; political and financial pressures placed upon reporting and report formats. Alternative valuation techniques.

HEAL9111
Quality Assurance
Staff Contact: Ms Helen Lapsley
UOC4 HPW2 WKS14 S2
An overview of quality assurance within the health care system, and of the development of quality assurance programs. A review of the roles and methodology of peer review, clinical review, screening criteria for risk management, patient satisfaction and accreditation. Techniques relating to the implementation of quality assurance programs. Integration of quality assurance concepts into the roles and functional responsibilities of health service managers.

HEAL9121
Measurement of Quality of Life, Health Status and Patient Satisfaction
Staff Contact: Dr Rod O'Connor
UOC4 HPW2 WKS14 S1
This course outlines the nature and use of Quality of Life, functional health status and patient satisfaction measures, and their increasing role in the evaluation of health programs. It presents the origins and nature of the most common generic instruments (eg SF36, QWB, SIP), selected disease-specific instruments and a patient satisfaction instrument and psychometric notions of validity, reliability and scaling. It presents a method for developing and evaluating such measures. Common generic and disease-specific instruments are introduced and reviewed.

HEAL9301
Health Services Planning 1
Staff Contact: Mr Ian Forbes
UOC4 HPW2 WKS14 S1 or S2
Examination of the major concepts used in planning health services systems within a context of resources allocation, at a community, regional and national level. Techniques used in data collection, analysis and modelling for health planning. Analysis of environments external to health service organisations of a societal, political and health status nature. Assessment of organisations within service areas. Management skills appropriate for policy making, program evaluation and health services resource distribution.

HEAL9331
Health Related Law and Jurisprudence (Australia)
Staff Contact: Mr Philip Bates
UOC4 HPW2 WKS14 S1
Prerequisite/s: HEAL9041
This course will explore contemporary applied issues in law and related ethical matters of particular relevance to health service management, planning and delivery. The course matter will vary depending, in part, on the backgrounds and interests of enrolled students and the course coordinator's research areas.

HEAL9341
Health Related Law and Jurisprudence (Hong Kong)
Staff Contact: Mr Philip Bates
UOC4 HPW2 WKS14 S1
Prerequisite/s: HEAL9041
The course will explore contemporary applied issues in law and related ethical matters of particular relevance to health service management, planning and delivery in Hong Kong. The course matter will vary depending, in part, on the backgrounds and interests of enrolled students and the course coordinator's research areas.

HEAL9351
Health Economics 1
Staff Contact: Ms Helen Lapsley
UOC6 HPW3 WKS14 S2
Economic analysis as applied to resource allocation, planning and evaluation in health services. Topics: basic concepts and methods of economic analysis, economics of the public and private sector, decision making, supply and demand, pricing and nonpricing methods of allocation, welfare analysis, ethics of resource allocation, economic planning of health services, cost benefit evaluation, cost effectiveness analysis, economics of hospitals and economic impact of health insurance.

HEAL9361
Physical Planning and Design
Staff Contact: Mr Ian Forbes
UOC4 HPW2 WKS14 S1 or S2
Planning processes applied to physical and environmental design. Regional, urban and local planning issues. Building design and building project management. Cost planning, network analysis and commissioning. Briefing, design and evaluation methods. Ergonomics and environmental psychology. Applications to health and welfare facilities. Administrative, medical and nursing policy implications.

HEAL9371
Research and Evaluation Methods
Staff Contact: Dr Mary-Louise McIaws
UOC4 HPW2 WKS14 S2
Skills in research design, evaluation methods and literature review will be developed using applied learning methods. Skills will be developed in the formulation of a research question, questionnaire
or evaluation methodology. Students will choose an area or areas of interest to develop during the session, and the development of this research will be presented for weekly peer review. Peer review is aimed at providing students with a critique and a forum for students to learn, to appraise a variety of research problems.

HEAL9381
Policy Studies
Staff Contact: Dr Pieter Degeling
UC04 HPW2 WKS14 S2
Prerequisite/s: HEAL9301, HEAL9711
Corequisite/s: HEAL9351

Contemporary health policy issues including the politics of health care; principles of policy formation and analysis. Past topics have included: health care technology; occupational health and safety; government control of private medical practice; hospital cost containment; the impact of Medicare; Commonwealth/State financial relationships; quality assurance and utilization review; the regionalised administration of health services; health policy issues in developing countries.

HEAL9391
Health Services Strategic Management and Planning
Staff Contact: Mr Jeffrey Braithwaite
UC04 HPW2 WKS14 S1

What is strategic planning? What does it mean to manage strategically? How do health service organisations (or, more accurately, the people with in them) express their strategic intent? How can you plan for the future when the environment is so complex and change so rapid? We investigate strategy in the health services by examining the ideas, tools and techniques of the strategist. Topics discussed include strategic planning, strategic behaviour, marketing, leadership and the learning organisation.

HEAL9411
Epidemiology
Staff Contact: Dr Mary-Louise McLaws
UC04 HPW2 WKS14 S5

Skills for critical appraisal of medical literature and of clinical and service outcome indicators will be developed. Knowledge of epidemiologic methodology will be applied during critical appraisal of medical, scientific and nursing literature with the aim of assisting students to evaluate published findings and in decision making of clinical practice, policy and planning. Clinical and service outcome indicators will be developed and appraised.

HEAL9421
Public Health and Epidemiology
Staff Contact: Prof James Lawson
UC06 HPW2 WKS14 S1

Distribution patterns and determinants of disease and disability with particular reference to diseases of major Australian concern. Preventive, treatment and rehabilitation strategies. The uses of epidemiology in the planning, operation and evaluation of health services.

HEAL9422
Population Health, Epidemiology and Statistics
Staff Contact: Prof James Lawson
UC06 HPW3 WKS14 S1

Population health is primarily concerned with the health status of populations and communities as distinct from clinical health or medicine which is primarily concerned with the health of individuals and families. The objectives for this course include: to provide an examination of the determinants and causes of disease and injury in populations and communities; the collection and bio-statistical analysis of data to create information about disease and injury patterns in populations and communities (the epidemiological approach); and the use of information about disease and injury in populations and communities in order to manage, plan and provide hospitals, health services and prevention strategies.

HEAL9431
Interpersonal Communication in Organisations
Staff Contact: Dr Rick Iedema
UC04 HPW2 WKS14 S1

A theoretical and practical course which aims to increase students understanding of, and capacity to deal with, communication problems in organisations. Teaches students to improve their own communication skills by a series of communications exercises, role plays, simulations and games. Students are able to chart their progress with a checklist developed for the course.

HEAL9441
Healthcare Economics and Financial Management
Staff Contact: Mr Kevin Ford
UC04 HPW2 WKS14

The economics of resource allocation in both the public and private health care systems. The impact of private health insurance and "user pays" on the efficiency and equity of healthcare markets. An introduction to double entry accounting to provide a working knowledge of cash and accrual accounting, plus an analysis of balance sheets, income statements and cash flow statements. How to apply budgeting, costing and capital budgeting to a healthcare environment.

HEAL9442
Health Resources Planning and Development
Staff Contact: Mr Ian Forbes
UC06 HPW3 WKS14 S2

Analysis as applied to resource allocation, planning and evaluation in health services. Topics cover the basic concepts in planning using methods of systems analysis, examining issues of resource development in the public and private sector, decision making, resource supply and demand, welfare analysis and issues of resource allocation. Included is the planning and procurement of health resources including facilities, workforce and service programs in the light of cost benefit and cost effectiveness analysis.

HEAL9451
Workforce Planning
Staff Contact: To be advised
UC04 HPW2 WKS14

Prerequisite/s: HEAL9301 and HEAL9351, or equivalents

Notes: Not offered in 2000

Systems approach to workforce planning in the health services. Task analysis as a workforce planning technique; career mobility; supply of health personnel, projection of supply, wastage rates; approaches to measurement of demand for health personnel and projection of demand; changing productivity in the health sector. Workforce planning at the institutional level; demographic and mathematical models. Analysis of recent studies of the Australian health workforce.

HEAL9461
Management and Evaluation of Health Information Systems
Staff Contact: To be advised
UC04 HPW2 WKS14 S2

The course focuses on the key areas of health information systems design, information architecture building and information systems management. The core curriculum integrates fundamental management concepts and the utilisation of information technology in health care. The course provides an overview of the current clinical services, patient administration and financial systems within health institutions, and provides tools for cost effective analysis and evaluation of health outcomes.

HEAL9471
Comparative Health Care Systems
Staff Contact: Mr Ian Forbes
UC06 HPW3 WKS14 S1

Examination of the structure and function of health care systems with special reference to constitutional, legal, economic, social and political environments within which health care systems operate; characteristics of institutional and non-institutional care; expenditure, funding arrangements and systems of health insurance and the health workforce; current policy issues affecting the health system in the country are reviewed.
Operations Research for Health Planning and Administration

Staff Contact: To be advised

UOC4 HPW2 WKS14 S1 or S2

Prerequisite/s: HEAL.9011 or equivalent

Notes: Not offered in 2000

Operations research methodology and techniques as applied to health services. Model building and systems approach. Typical operations research problems such as competition, queuing, inventory, allocation, search and scheduling problems as they appear in a health service environment.

Organisational Analysis in Health Services

Staff Contact: A/Prof. Pieter Degeling

UOC4 HPW2 WKS14 S1 or S2

Notes: Not offered in 2000

Students conduct an analysis of one health organisation according to a specific organisational theory perspective (e.g. systems, contingency, administrative, action). The level of analysis is at the organisational level, and students are instructed in measurement, data collection and analysis of organisational attributes. This exercise forms a backdrop to discussions of key organisational issues relating to centralisation, complexity, uncertainty, and resource dependency etc.

Computing Techniques for Health Services Management

Staff Contact: Dr Tom Benjamin

UOC4 HPW2 WKS14 S1 or S2

Introduction to, and practice of, transferable skills for the utilisation of personal computers in the workplace. The nature of tasks performed in computing. The nature of computing systems, databases, and communication links. Use of software packages for clinical and managerial data acquisition, analysis, and report preparation. Use of the Internet for teleworking, compiling, and transmitting information. Conducted at laboratory terminals during residential schools, with students obliged to make their own arrangements for access to computers during term.

Special Topic in Health Administration or Planning

Staff Contact: Mr Kevin Forde

UOC4 S1 or S2

An occasional elective dealing with some aspect of health administration or planning, selected according to current demand and availability of local and visiting lecturers.

Computer Skills for Postgraduate Students

Staff Contact: Dr. Thomas Benjamin

UOC3 HPW1 WKS14 S1 or S2

This course will further develop skills of research students in using computers for data acquisition, data analysis, communication and publication of results. Emphasis will be on learning in different operating system environments to obtain and convert data into multiple formats to make use of specialised software capabilities. Graphics, database and other skills essential for communication on the World Wide Web will also be developed.

Fieldwork in Health Service Organisation

Staff Contact: To be advised

UOC4

Supervised placement in health service organisation. Emphasis on students acquiring knowledge of organisation and departmental functioning, daytoday problems faced by health service managers.

Current Issues in Nursing

Staff Contact: Dr Anna Whelan

UOC4 HPW2 WKS14 S2

Controversial issues involving the nursing profession are critically examined. Topics addressed include: minimal educational preparation, mandatory continuing education, nontraditional education, unionism vs professionalism, political action in the health arena, government involvement, clinical specialisation, cost effectiveness, consumer rights, factors affecting nurses participation in the workforce, ethics in practice.

Management of Work of Health Professionals

Staff Contact: Dr Anna Whelan

UOC4 HPW2 WKS14 S2

Identifies the range of social, economic, political, industrial and technological factors which may influence the organisation of both work and workers. Develops knowledge and skills in critically evaluating and implementing techniques and methods which have been recommended for organising work and managing responses of workers. Topics addressed include: assessing and improving worker performance, motivating professionals, workplace conflict, designing work, introducing technology, managerial aspects of employment law, and management techniques such as Total Quality Management (TQM).

Management of Organisation

Staff Contact: A/Prof. Pieter Degeling

UOC6 HPW3 WKS14 S1

Examines current theories of organisation and management, and evaluates their applicability to management work in health care settings. Examines the relationship between theory and practice in managing organisations; fosters an appreciation of the dynamics of managerial behaviour and extends understanding of what is entailed in accomplishing organisational change and in constituting management control.

Industrial Relations in the Health Services

Staff Contact: Dr Anna Whelan

UOC4 HPW2 WKS14 S1 or S2

Prerequisite/s: HEAL9701 or equivalent

Notes: Not offered in 2000

This course is designed to extend the health service manager's knowledge of employer-employee relations in the health services workplace in Australia. The course builds on theoretical frameworks introduced in Management of Work. It examines the framework of industrial relations in Australia, including development of the arbitral model, state intervention, labor law, trade unions, professional associations, and employer associations. It explores the development of personnel management in Australia including an assessment of current Human Resource Management, the diffusion of different management concepts in Australia including the new managerialism, and contemporary issues such as the flexibility thesis, quality improvement and enterprise bargaining.

Management of Health Services

Staff Contact: Mr Jeffrey Braithwaite

UOC4 HPW2 WKS14 S1

In this course we look at ways to improve how individuals manage. We explore contemporary management issues and challenges facing those who are responsible, now or in the future, for the managerial performance of health service organisation. We attempt in this course to bridge the theory - practice divide. A key concern is to examine various management tools, techniques and ideas and assess their usefulness. Specific topics examined include: some psychological aspects of management; organisational; communication; continuous improvement; and the management of change. Part of the course is devoted to providing insights into students own managerial style. A major theme is to develop the ability to generate improved solutions to managerial problems by utilising a reframing approach.

Introduction to Casemix

Staff Contact: Dr M. Tessa Ho

UOC4 HPW2 WKS14 S1

Diagnosis related groups (DRGs) and other casemix systems including their history, principles of construction and recent
modifications including the Australian National DRGs (AN-DRGs). Problems in the use and interpretation of DRG data: the varying clinical and resource homogeneity of individual DRGs and the presence of outliers. Effects of errors in the coded medical record abstract data on DRG assignment; limitations imposed by the disease and procedure classification systems currently used. Future developments in the design of casemix systems.

HEAL9744  
Casemix Accounting and Funding  
Staff Contact: To be advised  
UOC4 HPW2 WKS14 S2  
Prerequisite/s: HEAL9743  
Corequisite/s: HEAL9743  

HEAL9746  
Casemix and Contracting for Health Care  
Staff Contact: Prof D Hindle  
UOC4 HPW2 WKS14 S1 or S2  
Prerequisite/s: To be advised  
Corequisite/s: To be advised  
Public and private funders are moving towards more sophisticated descriptions of services in formal contracts with health care providers. Particular attention is being given to the use of casemix classifications when defining these services. This course discusses and then illustrates the key components of casemix-based contracting. They include optional approaches to the process of categorisation itself, such as time-based and episode-based classifications, episodes of care and episode management units, and iso-resource and iso-utility classes. Attention is paid to the measurement of costs and utilities, and to audits of such matters as clinical codes, quality of care, and outcomes. The role of clinical pathways is considered in detail. The ideas are explored through a case study, in which students function as members of either a purchaser or a provider hospital during two annual rounds of negotiation. The outcomes of negotiation are then evaluated by use of anmodel which predicts costs and revenues, and associated variables including admission rates and lengths of stay. Assessment is through two assignments, in which students are expected to provide advice on operations to both the insurer and the provider.

HEAL9747  
Clinical Work Process Control  
Staff Contact: Prof Don Hindle  
UOC6 S1  
This course examines the application of work process control structure methods in the organisation and management of clinical work. It examines how clinical pathways may provide methods for improving the evidentiary basis of clinical work and for improving the quality and technical efficiency of service delivery. The course is structured as a case study of a health service which provides hospital and community services to a sector of the capital city, and is funded for the most part according to a budget-share casemix formula. Students adopt the roles of senior managers and are expected to provide advice on key decisions to the chief executive and the clinical service directors.

HEAL9748  
Clinical Governance  
Staff Contact: A/Prof Pieter Degeling  
UOC6 S1  
This course develops an appreciation of the way that the role of clinicians in health care delivery is being affected by changes in the social, legal, economic, organisational, informational and ploitical contexts of health service organisation. At its completion, students will understand the principles of clinical governance and of the range of issues and problems that it is meant to address. The course requires students to appraise different approaches to improving clinical effectiveness, quality, service integration and the use of externalvalue for money consideration in service design and delivery. Students carry out an extended case study and a range of problem-based exercises. This will provide students with an opportunity to examine what their changed role implies for their personal skills development. They are provided also with opportunities to analyse and address issues arising from efforts to extend clinical accountability.

HEAL9751  
Introduction to Management and Policy for Public Health  
Staff Contact: Mr. Jeffrey Braithwaite  
UOC4 HPW2 WKS14 S1  
Note: This is a core course for Master of Public Health students. Provides students with an understanding of the broad range of factors that can affect public health policy development and implementation and which can influence how public health services are organised and managed. The course extends students understanding of different approaches to developing and implementing public health policy and to organising and managing a unit within a public health service.

HEAL9761  
Mental Health Services Management  
Staff Contact: Dr Tom Benjamin  
UOC4 HPW2 WKS14 S1 or S2  
A multidisciplinary course intended to apply competencies gained in organisation theory, sociology, finance, and economics courses to the special requirements of the mental health field. The major assignment will emulate an external consultant's report of a mental health facility within its community context. Strategies for change will be discussed in the light of evidence from case histories and students assignments.

HEAL9771  
Casemix for Clinician Managers  
Staff Contact: A/Prof Pieter Degeling  
UOC4 HPW2 WKS14 S1 or S2  
This course examines how casemix information, methods and applications can be used to address organisation change issues that are likely to arise in constituting clinical units as learning organisations. The course is structured to develop practical skills in using casemix information and methods in engendering organisational learning with respect to: strategic planning and management; budgeting and financial control; service planning; clinical audit; utilisation review; quality assurance; clinical guideline development and implementation; the development of an outcomes focus in service planning and delivery; and, in planning and implementing streams care.

HEAL9811  
Sociology, Ethics and Health  
Staff Contact: Dr Stephanie Short  
UOC4 HPW2 WKS14 S1  
The first part of this course focuses on the classical sociological tradition most closely associated with the work of the founding parents of sociology: Marx, Weber and Durkheim. In this first part, particular attention is paid to the social origins of ethics and the cultural construction of morality. The course then follows the development of health sociology through the examination of issues such a socio-economic inequality and health, the social construction of health knowledge, consumer participation in health care and the new public health.

HEAL9821  
Health and Society  
Staff Contact: Dr Stephanie Short  
UOC4 HPW2 WKS14  
Prerequisite/s: HEAL9811 or equivalent  
Note/s: Not offered in 2000
This course provides students with the opportunity to enhance their understanding of social research methodology and to learn about the social research process by undertaking a social research project.

HEAL9921 Project

UOC4 WKS14

HEAL9971 Dissertation
Staff Contact: Dr Mary-Louise McLaws
UOC24 S1 or S2

HEAL9972 Part-time Dissertation
Staff Contact: Dr Mary-Louise McLaws
UOC12 S1 or S2

HEAL9974 Project
Staff Contact: Mr Alan Hodgkinson
UOC12

The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue; systematically collecting relevant, up-to-date information about the issue; analysing, interrupting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master's level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning early in their program, it is normally undertaken after completion of all core and elective courses.

School of Medical Education

MEED9001 Independent Study
Staff Contact: Mr A Hodgkinson
UOC4 S1 or S2

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing courses. They are recommended particularly for candidates who wish to explore solutions to specific educational problems within their own institutions or disciplines.

MEED9002 Independent Study
Staff Contact: Mr A Hodgkinson
UOC4 S1 or S2

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing courses. They are recommended particularly for candidates who wish to explore solutions to specific educational problems within their own institutions or disciplines.

MEED9003 Influencing Health Beliefs and Health Behaviours
Staff Contact: Ms F Trade
UOC4 HPW2 WKS14 S1 or S2

Consideration of behaviour change theories. Description of the processes whereby values and beliefs determine the way individuals behave; the effects of acute and chronic illness, or risk of illness on beliefs and behaviours related to health. Current interventions models which seek to influence these beliefs and behaviours.

MEED9012 Health Promotion
Staff Contact: Dr J Ritchie
UOC4 HPW2 WKS14 S1 or S2

Explores the meaning of health promotion and its role in the field of public health, and provides a forum for discussion on preventive approaches in health care. Students study a variety of approaches to promoting health and consider the benefits and disadvantages of each of these within an integrated framework.

MEED9019 Research Project A
Staff Contact: Dependent on the course chosen
UOC4 WKS14

The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue; systematically collecting relevant, up-to-date information about the issue; analysing, interrupting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master's level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning early in their program, it is normally undertaken after completion of all core and elective courses.

MEED9013 Health Services Development and Implementation
Staff Contact: Prof A Rotem
UOC6 HPW3 WKS14 S1 or S2

This course addresses the development of health services within a context of management and health services delivery through involvement of human resources. The focus is on development and team participation, the examination of organisational culture and learning within the organisation, leadership, change management and communication. The complexities of cross cultural communication in health services in different international settings is explored. Community and institutional settings for service delivery are explored.

MEED9014 Educational Process in Small Groups
Staff Contact: Mr A Hodgkinson
UOC4 HPW2 S1 or S2

How people operate as members and leaders of groups; conditions underlying effective group work in educational planning, teaching and learning, and the provision of health care; basic concepts of group structure. Stress on experiential learning, observation of group process, improving skills in facilitating group learning and designing appropriate learning activities.

MEED9015 Program Evaluation and Planned Change
Staff Contact: Prof A Rotem
UOC4 HPW2 WKS14 S1 or S2

This course is offered with the expectation that participants will assume an increasingly important role in the planning, conduct and evaluation of educational and/or public health programs. The role of
evaluation in development and innovation is explored with due attention to organisational and political sensitivities and constraints. The role of the evaluator in clarifying the need for evaluation, and in determining the questions that should be addressed, and the methods of obtaining and interpreting information, is considered in some detail.

MEED9110 Workshop in Culture, Subculture and Communication
Staff Contact: Dr R Pigott
UOC4 HPW2 WKS14 S1 or S2
Introduction to the complexities of communicating across cultural and subcultural barriers in a world now increasingly composed of multicultural societies; and to the emerging role of intercultural communication skills in promoting health, preventing and treating disease, and managing health systems. The course embraces theoretical and experiential learning and is designed to offer students an intellectual and intuitive feeling for the course that will have immediate practical use.

MEED9111 The Consultation Process
Staff Contact: Prof A Rotem
UOC4 HPW2 WKS14 S1 or S2
Prerequisite/s: Recommended MEED9134 or equivalent
Notes: Offered as series of Workshops
The course is designed to introduce concepts and practical approaches used by consultants in the development of organisations, programs, teams and individuals. The course will focus on the internal process of change as well as on third party interventions.

MEED9113 Evaluation of Instructors
Staff Contact: Ms L Bloomfield
UOC4 HPW2 S2
This seminar pertains to concepts, research and development in the evaluation of instructors. Emphasis on the methods by which evaluative feedback could be provided and used for the purpose of improvement of instruction. It is expected that candidates would acquire skills in the design and use of evaluation instruments which are effective in improving instruction.

MEED9120 Qualitative Research Methods
Staff Contact: Dr J Ritchie
UOC4 HPW2 WKS14 S1 or S2
Prerequisite/s: MEED9012, CMED9500
This course focuses on issues and methods in qualitative research in health promotion and public health. It is offered to those wishing to undertake their major projects using qualitative methods.

MEED9122 Primary Health Care - Programs, policies and perspectives
Staff Contact: Dr V Nossar
UOC4 HPW2 WKS14 S1
The concept of primary health care and its emergence as the priority health care approach in developing countries. Emphasis on the training implications of primary health care programs together with different definitions of the concept including the role of primary health care in social and economic development, and its relationship to existing health care systems.

MEED9124 Clinical Teaching
Staff Contact: Dr P Harris
UOC2 HPW1 WKS7 S1 or S2
Notes: 7 weeks or workshop
Drawing upon real life clinical practice and observing teaching sessions of their own, their peers and others, participants have the opportunity to explore the nature of clinical teaching and learning in selected programs, and to identify ways of improving teaching skills and maximising students learning. Research in clinical teaching and it relation both to educational theory and to current practice.

MEED9125 Planning, Conducting and Evaluating Educational Workshops
Staff Contact: Dr P Youngblood
UOC4 HPW2 S1 or S2
In an attempt to develop their skills in all aspects of conducting workshops, participants are guided to formulate a plan for a workshop for their colleagues in an important educational area, with opportunity to practise various techniques for enhancing active participation, and subsequently to conduct the workshop, evaluate its process and outcomes, and report on it.

MEED9129 Primary Health Care: Issues In Implementation
Staff Contact: Dr V Nossar
UOC4 HPW2 WKS14 S2
Prerequisite/s: MEED9122 or evidence of substantial prior experience in primary health care work
This course guides participants through a detailed analysis of both the theory and the practice of implementing Primary Health Care programs. Problems and issues encountered in implementation are examined and practical solutions explored. The course is designed for health professionals who have had some prior exposure to the concepts and practice of Primary Health Care, and draws upon relevant case studies for the analysis.

MEED9130 Information Technology In Medical Education
Staff Contact: Ms S di Corpo
UOC4 HPW2 WKS14 S1 or S2
Notes: Course to approval of Academic Board
This course aims to provide an introduction to the use of information technology in higher education focusing on basic training of health care workers and continuing education so as to assist participants to make informed decisions about whether, and how to use information technology for educational purposes. Particular emphasis will be placed on: computer-mediated learning, knowledge-based systems, multimedia and the Internet.

MEED9131 Formulating Academic Proposals and Projects
Staff Contact: Mr A Hodgkinson
UOC4 HPW2 WKS14 S1 or S2
Notes: Weekly classes or Workshop
This course aims to explore concepts and develop skills related to formulating academic projects and proposals. Emphasis will be given to identifying research or development needs, developing conceptual and data critical analysis skills, undertaking literature analysis, planning project aims, identifying practical administrative and ethical limits, and writing skills.

MEED9133 Learning, Teaching and Assessment
Staff Contact: Ms Leah Bloomfield
UOC6 S1
Notes: Workshop
Current views about the conditions which support learning and the requirements these imply for teaching. Focuses on adult learning in various settings: in tertiary institutions, the workplace and the community.

MEED9135 Planning, Implementing and Evaluating Educational Programs
Staff Contact: Dr P Youngblood
UOC6 S2
Notes: Workshop
Students will learn to use an educational planning model to design, implement and evaluate educational programs. Emphasis will be on educational planning at the macro level. Students will identify and analyse an educational problem, within the context of the larger institution, then design and develop program components. In addition, students will plan implementation and evaluation strategies appropriate to the organisational context. Using case studies,
students will learn to apply the model in a range of educational settings, including formal courses in medical and nursing schools, as well as continuing professional development programs for practising health professionals.

MEED9140
Project Design and Monitoring In International Health
Staff Contact: Profd A Rotem
UOC4 WKS14 S2
Prerequisite/s: MEED9502 (or equivalent), CMED9500 (or equivalent) and HEAL9751 (or equivalent)
Note/s: External Course
The planning of international health projects is a multi-phased process that must be performed well if sustainable high quality improvements in health care are to be achieved. This course is designed to equip professionals contributing to international health with the competencies necessary to develop a practical comprehensive project plan, in line with current international practice. Course topics will cover all the major steps necessary to produce this plan. As they work through these steps, using a real developing world situation, candidates will carry out each of the analyses necessary at each stage and develop their own plan.

MEED9143
Major Project
Staff Contact: Mr A Hodgkinson
UOC20 S1 or S2
Prerequisite/s: MEED9012, CMED9500, CMED9516, HEAL9751, CMED9502
Provides an opportunity for the candidate to apply coursework learning through focusing on an area of health personnel education relevant to the candidate’s professional interests and development and to the furthering of health personnel education.

MEED9144
Project
Staff Contact: Mr A Hodgkinson
UOC12 S1 or S2
Prerequisite/s: MEED9012, CMED9503, CMED9509, CMED9516, HEAL9751, CMED9502
The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue; systematically collecting relevant, up-to-date information about the issue; analysing, interrupting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master’s level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning project early in their program, it is normally undertaken after completion of all core and elective courses.

MEED9302
Learning in Small Groups
Staff Contact: Ms S Tookey
UOC4 S1 or S2
Note/s: External Course/Workshop. Can also be undertaken part-time over a whole year
The course covers the processes of learning in small groups, group formation and changing roles and relationships within groups, diagnosis and management of problems and conflict within the group, effectiveness in handling tasks and making effective decisions, team building, support, leadership of working groups, innovation by groups, assessment of group performance. Assignments include study of the development of the group, and the emergence of effective leadership.

MEED9303
Clinical Practice as a Discipline
Staff Contact: Mr P Godwin
UOC4 S1 or S2
Note/s: External Course
This course explores the nature of professional expertise within clinical practice as a skilled discipline within the streams of general and specialist practice and within nursing and the therapies. Course matter includes the varieties of working knowledge (applied knowledge, strategic knowledge, intuitive knowledge, local, situational knowledge, predictive and decision making knowledge, people management knowledge and judgment), of skills in managing logical processes and skills in managing people and procedures. The course also analyses the profession’s philosophy, the professional’s tasks, roles and responsibilities, and the perspectives and expectations within the health system and community. Assignments are expected to contribute to the understanding and development of the discipline in each health profession.

MEED9304
Learning Clinical Reasoning
Staff Contact: Mr P Godwin
UOC6 S1 or S2
Note/s: External Course. Can also be undertaken part-time over a whole year
The medical stream covers teaching of the steps in the clinical process, inductive and deductive strategies, data collection and its flaws, the reliability of clinical evidence, intuition and clinical memory, investigation and sufficiency of evidence, strength of clinical and investigational evidence, interpretation and misinterpretation, logical processes in clinical inference and plausibility of diagnosis, and the utility of expert systems and computer-aided diagnosis. For the nursing stream the course diverges to cover the reasoning called upon within different clinical units. Assignments include the study of clinical reasoning in the candidate’s setting.

MEED9306
Clinical Supervision
Staff Contact: Dr P Harris
UOC4 S2
Note/s: External Course
This course deals with the processes of teaching motor skills, the stages of moving from novice to expert, the development of judgment, varying aptitude, scaffolding of supervision of practice, and self-assessment of habitual performance. The course also deals with the observation and monitoring of daily activities, of supervised practice, of the range of roles and relationships of mentors to their trainees, of effective methods of feedback, and of learning a range of skilled behaviours in instructing, supervising, guiding and counselling. Assignments include study of the development of a procedural skill and skilled performance within the candidate’s setting.

MEED9307
Exploring Clinical Ethics
Staff Contact: Dr C Berglund
UOC4 S1
Note/s: External Course
This course guides the learner through the major ethical principles affecting clinical choices using a large array of contemporary clinical issues. The course is based on posing questions and the search for answers. Ethicists differ in the way they search for answers. Not all believe that there is one truth to find. Many believe that the truth depends on the context, or situation, or on the relative importance of opposing values. This course attempts to hear many voices not only from ethicists and clinicians but from law, religion, administration and lay media. Ethicists themselves range across a spectrum from duty based deontologists to it depends ... (situationists). The course aims to bring out that range. Assignments utilise consultations to explore ethical principles and their implications in the clinical setting.

MEED9308
Learning Clinical Decision Making
Staff Contact: Mr P Godwin
UOC4 S1 or S2
Note/s: External Course. Can also be undertaken part-time over a whole year
The medical stream deals with quantitative and qualitative aspects of decision making, management options, ambiguity and sufficiency...
of evidence at the test-treatment threshold, identification of possible outcomes, calculation of probabilities and utilities for each outcome, structuring with decision analysis, elicitation of patients preferences, configuration of trade-offs and sensitivity analysis, influences operating in the context and in the personal psychology of doctor and patient, defensibility of decisions, and judgment in making choices under uncertainty. The nursing stream diverges at many points to cover the particular decisions required of the clinical nurse. Assignments include the analysis of a number of decision processes in the candidate's setting.

MEED9309 Assessing Clinical Performance
Staff Contact: Dr P Harris
UOC4 S1 or S2
Notes: External Course
This course covers the purposes, location, criteria, methods, timing, frequency, scoring methods and formats, and training of examiners to achieve consistency. The course includes development of assessments undertaken by self, peers, other health workers and patients. The course also addresses issues of judgment of others, and of innovation in developing accurate estimates of practical ability. Assignments include the study of performance assessment, and development of approaches to formative assessment.

MEED9312 Research Into Clinical Education
Staff Contact: Dr C Berglund
UOC6 S2
Notes: External Course
This course takes participants through many of the planning stages of research. The final project is to write a grant application for a research project in clinical education. This process involves the consideration of research questions, research paradigms, measures and interpretation. The social context of research is covered, as is the process of dissemination of research findings.

MEED9313 Planning Education Programs
Staff Contact: Dr P Harris
UOC4 S1
Notes: External Course
This course deals with the planning, implementation and evaluation of postgraduate and continuing educational programs, including educational workshops, beginning with identification and clarification of needs, helping adult learners with self-diagnosis of defects, designing instruction and choosing methods of presentation, linking new scientific ideas with the clinical working knowledge and strategies of practitioners, evaluating the effectiveness of programs, and undertaking research into continuing education. Assignments include the planning of an education program appropriate to the candidate's area.

MEED9314 The Ward (or Office) as a Social and Learning Environment
Staff Contact: Dr A Smith
UOC4 S1
Notes: External Course
This course uses the clinical setting of the ward, or the office, or the clinic as the unit of study of the formal and informal communication and management processes, professional role definition and socialisation into sub-cultural belief patterns, sharing of decision making, expectations and stresses, coping strategies and stress management, analysis of social pathology, relation between task and maintenance functions and the resolution of conflict, staff job satisfaction and turnover, and effectiveness for learning. Assignments include a report on the candidate's working environment.

MEED9315 Clinical Teaching
Staff Contact: Dr P Harris
UOC6 S1 or S2
Notes: External Course. Can also be undertaken part-time over a whole year.

The course includes the planning and conduct of clinical teaching programs, preparation of the learners including assessment of the learner's readiness, learning of manual skills on simulated patients, management of the learning environment, briefing before patient encounter, demonstration of skills, perceptual skills in data collection, debriefing and reflection on the clinical encounter, explication of the clinical experience, in terms of available theory, translation of professional knowledge into working knowledge, and forward planning of reading and further practice. The course also deals with the micro-skills of listening, questioning, probing and challenging, demonstrating, and involving the patient and other staff. Assignments include the study of the candidate's clinical teaching and the study and practice of clinical micro-skills.

MEED9316 Learning Consulting Skills
Staff Contact: Dr P Harris
UOC6 S2
Notes: External Course/Workshop
The medical stream deals with the identification and learning of consulting skills in communicating with patients, families and colleagues, in clarifying illness problems, in acquiring accurate information, interpreting evidence and diagnosing disease, in handling ambiguity and uncertainty, in referral to others and in negotiating trade-offs among management options. Differences between generalist and specialist tasks and contexts will be explored. Consulting skills in the nursing stream parallel these, with differing responsibilities in assessment and patient care. Assignments include study of communication and management skills in the candidate's setting.

MEED9317 Clinicians as Managers
Staff Contact: Mr P Godwin
UOC4 S1
Notes: External Course/Workshop
This course focuses on the role of clinicians in the management of health and education programs. It aims to encourage review of organisational and management issues which influence the performance of clinical units. The material includes identification of the functions of management, the typical challenges faced by clinicians as managers, their contribution to leadership and team development, their role in planning, evaluation and their management of change. The assignments in this course will require a step-by-step review of the way activities and programs are managed and strategies to improve the effectiveness and efficiency of the organisational unit under study. Participants will be required to reflect on their performance as managers in tasks such as setting goals, organising, delegating, supervising and supporting staff development.

MEED9351 Independent Study
Staff Contact: Dr P Harris
UOC2 S1 or S2
Candidates may contract to undertake an Independent Study on a particular field of interest or clinical educational research. The number of credit points may range from five to twenty, according to the size of the Independent study. These courses are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.

MEED9352 Independent Study
Staff Contact: Dr P Harris
UOC4 S1 or S2
Notes: Can also be undertaken part-time over a whole year
Candidates may contract to undertake an Independent Study on a particular field of interest or clinical educational research. The number of credit points may range from five to twenty, according to the size of the independent study. These courses are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.
MEED9353
Independent Study
Staff Contact: Dr P Harris
UOC6 S1 or S2
Notes: Can also be undertaken part-time over a whole year
Candidates may contract to undertake an Independent Study on a particular field of interest or clinical educational research. The number of credit points may range from five to twenty, according to the size of the independent study. *These courses are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.

The number of credit points may range from five to twenty, according to the size of the independent study. *These courses are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.

Elective Studies
Elective studies may be taken, after approval, in other schools of the University, or in other universities, if the studies contribute to the aims of the program.

Supervision
Before enrolment, the Head of School of Medical Education shall be satisfied that adequate supervision and facilities are available.

School of Paediatrics

PAED8102
Psychosocial Development
Staff Contact: Prof S Einfeld
UOC4 HPW2 WKS14 S1 or S2
Theories of Freud, Erikson and Piaget, normal and abnormal family processes, behavioural and developmental issues, childhood behaviour problems and management, adolescent behaviour problems and management.

PAED8103
Child Health Services
Staff Contact: Dr E Murphy
UOC4 HPW2 WKS14 S1 or S2
The child care delivery system, parent education, screening programmes, immunisations, accidents and poisoning, dental care, care of physically and mentally disabled children.

PAED8104
The Effect of Social Adversity in Childhood
Staff Contact: Dr V Nossar and Dr G Alperstein
UOC4 HPW2 WKS14 S1 or S2
Family structure and dynamics, poverty, single parent, drug addicted parents, housing and sanitation, homeless children, teenage parents, migrant families, Aboriginal health, working mothers and childcare.

PAED8105
The Child and the Law
Staff Contact: Dr K Moran
UOC4 HPW2 WKS14 S1 or S2
Adoption, child custody, child physical and sexual abuse, children's rights, the United Nations charter for children, child welfare, laws designed for special needs of children, juvenile delinquency.

PAED8201
Physical Growth and Development I A
Staff Contact: Professor R Henry
UOC4 HPW2 WKS14 S1 or S2
Foetal growth and development. Physical growth from birth to adolescence. Neurodevelopment. Assessment of growth and development.

PAED8202
Physical Growth and Development I B
Staff Contact: Professor R Henry
UOC4 HPW2 WKS14 S2

PAED8203
Infant Feeding And Nutrition I
Staff Contact: Dr P McVeigh
UOC4 HPW2 WKS14 S1 or S2

PAED8204
Infant Feeding And Nutrition II
Staff Contact: Dr P McVeigh
UOC4 HPW2 WKS14 S1 or S2

PAED9101
General Paediatrics and Child Health 1
Staff Contact: Dr S Russell
UOC6 WKS14 S1 or S2
Growth and development. Systemic diseases in childhood. Prevention and early detection. Community services available for the care of children with various disorders. Emphasis is placed on the understanding of principles especially physiological principles. Prenatal development and prenatal experiences, which affect the growing foetus and infant. Necessary professional supervised experience is obtained by clinical attachment to appropriate hospitals. Candidates are given increasing professional responsibility. There are lectures, seminars, discussion groups and demonstrations on manikins. Family dynamics and family interactions in the causation of developmental, behavioural and emotional problems in children. Students without adequate clinical experience have a clinical attachment in paediatric psychiatry during the first two years of training. There are lectures, seminars, case conferences and assignments.

PAED9102
General Paediatrics and Child Health 2
Staff Contact: Dr S Russell
UOC8 WKS14 S1 or S2

PHPH5413/PHPH5513/PHPH5513

Sports Injuries 1

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

Sports Injuries 1 describes dermatomes and myotomes and the implications for sports injuries. The anatomy of the shoulder, elbow, wrist and hand is described which provides the basis for describing sporting injuries to the shoulder, elbow, wrist and hand. The anatomy of the head and neck is described in order to deal with sporting injuries to the head, neck, eye, ear, nose and face. The anatomy of the trunk is described in order to deal with sports injuries to the chest, abdomen, back. Finally, on-field management of sports injuries is described.

PHPH5414/PHPH5514

Sports Science

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

The biochemistry is described for intermediary metabolism and specifically aerobic and anaerobic metabolism in muscle and the hormonal control. Energy expenditure is considered in the resting and exercising person. Muscle physiology deals with the contractile process and features of tensile force in relation to the different fibre types. The motor unit is described as are the sensory inputs to the central nervous system and its control of motor function. Biomechanical principles include a consideration of course, objective and predictive analysis. Gastrointestinal physiology surveys the motility and digestive and absorptive activities of the gut.

PHPH5416/PHPH5516

Sports Nutrition/Sports Pharmacology

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

The course examines food composition labels and dietary intakes of various sections of the community both sedentary and active. Nutrients are dealt with such as protein, carbohydrate, fats, dietary fibre, fluid intake, minerals and vitamins. The recommended dietary intakes are compared with actual intakes of various groups. Nutrition for special groups of physically active people is considered such as children, adolescents, pregnant and lactating women, the elderly, different ethnic groups. Energy balance is considered in relation to weight control. Nutrition in performance-related activities is discussed in relation to requirements for metabolic fuels, dietary components, mineral and trace elements, fluid, aminoacid and vitamin supplements, training diet. Nutrition in health-related activities is discussed in reference to primary, secondary and tertiary prevention of problems in obesity, coronary heart disease, diabetes, eating disorders. Basic pharmacology will be outlined and factors affecting pharmokinetics in relation to routes of administration, plasma levels, volumes of distribution, calaisobolism and elimination. The effect of exercise on drugs invivo are discussed such as the altered absorption rates with reduced mucosal blood flow and enhanced exercising muscle and skin blood flows; also, the effects of thermal regulation. The interactions of medically prescribed drugs on the physically active person will be discussed systematically regarding cardiovascular drugs, anti-diabetic drugs, respiratory drugs, anti-inflammatory drugs (NSAIDs, corticosteroids), gastrointestinal drugs, psychotropics, antibiotics. Banned drugs or agents used to enhance performance are dealt with such as stimulants, narcotics, anabolic steroids, beta blockers, diuretics, hormones (human growth hormone, erythropoietin); blood doping, alkal agents. These will be discussed in relation to competitive activities and in relation to screening procedure. Identification procedures. Drug education and prevention of drug abuse are discussed.

PHPH5417/PHPH5517

Sports Psychology/Clinical Biomechanics

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

The psychological effects of exercise are described in relation to stress management, management of depression, sleep disorders, concepts of self-esteem and self-efficacy, effect on mental acuity and day-time fatigue, the contribution to the control of addictive behaviour. The use of psychological procedures will be discussed in regard to motivation and compliance for courses undertaking health-related activities as well as for athletes involved in performance-related activities. The psychological aspects of injury will be dealt with in considering the psychological problems encountered by the injured recreationally active person and also by the athlete. Behavioural problems are discussed such as exercise-addiction and body weight problems. In regard to stress, there will be discussion of the mental state and the functioning of the immune system and the inter-relations between stress exercise and the components of the immune system. This will be discussed in relation to the incidence of infection in the competitive athlete. Clinical biomechanics applies basic aspects of biomechanics to joint movements encountered in a wide variety of sporting activities to elucidate the problems that can arise from inappropriate repetitive movements resulting in micro- and macro-trauma.

PHPH5423/PHPH5523/PHPH5623

Sports Injuries 2

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

Sports Injuries 2 deals with normal soft tissues and injuries to these in relation to muscles, tendons, ligaments and cartilage. Bone structure and function are described to understand injuries to bone. Anatomy of the pelvis, hip and thigh precedes consideration of injuries and their management in the groin, hip and thigh. Functional anatomy of the knee lays the basis for understanding acute and chronic injuries to the knee. Anatomy of the leg, ankle and foot is considered in relation to injuries to these regions.

PHPH5424

Research Methods

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

Biostatistics deals with basic statistical functions including graphical presentation and interpretation of data. Epidemiological principles deal with defining a population and how to sample it and elicit data and describes epidemiological variables and attributes. The student is introduced to the key components of a research study in sports medicine including the assessment of the relevance of a measurement technique to a given research question. The student develops an approved research project.

PHPH5426/PHPH5526

Applied Sports Medicine

Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2

Notes: A compulsory course for MSPMed

This course brings together the strands dealt with in preceding courses on sports injuries and medical applications of exercise. Weekly topics include: the prevention of injury, including the screening of athletes pre-season; imaging in sports medicine, considering the use of X-Rays, CT and MRI, ultrasound, nuclear medicine; principles of rehabilitation in relation to types of stretching and strengthening, physical methods of soft tissue treatment, manipulation and mobilisation, proprioceptive re-training, taping; the use of non-steroidal anti-inflammatory drugs and corticosteroid injections; the management of rheumatological conditions in relation to physical activity; medical coverage of fun runs and other community events; the role of the team physician; legal and ethical aspects of sports medicine.
PHPH5433/PHPH5532/PHPH5653
Medical Applications of Exercise I
Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2
Notes: A compulsory course MSPMed.
Medical Applications of Exercise I surveys the physiology of the cardiovascular system in its control and reflex responses as well as the electrophysiology of the heart and the ECG. The effects of exercise on the cardiovascular system are discussed. Investigations of cardiovascular functions are illustrated, including stress testing. Primary, secondary and tertiary use of exercise in cardiac rehabilitation are considered. Cardiovascular aspects of special groups are described, in pregnant women, in hypertensive and diabetic patients.

PHPH5433/PHPH5543/PHPH5643
Medical Applications of Exercise II
Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2
Notes: A compulsory course MSPMed.
Temperature regulation is considered as a basis for understanding hyperthermia in the athlete. Physiological and medical considerations are described in relation to the female athlete and in relation to children. Respiratory physiology and respiratory medicine provide the basis for understanding exercise-induced asthma, diving and altitude problems for the athlete.

PHPH5445
Research Project and Report
Staff Contact: Dr D Garlick
UOC6 WKS14 S1 or S2
Notes: A compulsory course for MSPMed.
The Project will be planned and approved in undertaking the course Research Methods. The Project, conducted over six months part-time, will involve research into an area of sports medicine at a clinical or basic level which contributes new knowledge to the field. The Project is to be presented as a scientific Report of about 8-10 000 words.

PHPH5471
Advanced Pharmacology
Staff Contact: Dr M Fryer
UOC12 WKS14 S1 or S2
Prerequisites: PHPH3152, PHPH5451
This course is an advanced coverage of pharmacological topics including receptor binding, pharmacokinetics, drug assays, drug development, toxicology, autacoids and ion channels. The lecture material is supplemented by computerised analysis of data derived from experiments on receptor binding, dose response relationships and pharmacokinetics. Considerable emphasis is placed on the many aspects of drug development.

PHPH5481
Advanced Pharmacology - Project
Staff Contact: Dr M Fryer
UOC12 WKS14 S1 or S2
A laboratory or industry based project in the area of drug development.

PHPH5491
Advanced Pharmacology - Project
Staff Contact: Dr L Wakelin
UOC12 WKS14 S1 or S2
A small laboratory or industry based project or an extensive literature review or extensive data analysis in the area of drug development.

PHPH5501
Basic Principles of Drug Actions - Module 1
Staff Contact: UOC6 WKS14 S1 or S2
This module covers general principles of pharmaco-dynamics and pharmaco-kinetics. Pharmaco-dynamics (what the drug does to the body) considers drug-receptor interactions, the basis of dose-response curves, reversible and irreversible antagonists, partial agonists and related topics. Events following the drug-receptor interaction, which include stimulation of second messenger systems and the pharmacology of ion channels, are described. The principles governing pharmacokinetics (what the body does to the drug) and their clinical importance are discussed in some detail. There are several simple graphical and problem solving exercises to be completed to aid your understanding of this material.
the body are vital areas of drug development, and indeed determination of molecular structure, and quantitation of drugs in this module extends the concepts raised and discussed in the Basic

Anatomy of the pelvis, hip and thigh precedes consideration of injuries to these regions.

Sports injuries 1 describes dermatomes and myotomes in relation to muscles, tendons, ligaments and cartilage. Bone structure and function are described to understand injuries to bones. Anatomy of the pelvis, hip and thigh precedes consideration of injuries and their management in the groin, hip and thigh. Functional anatomy of the knee lays the basis for understanding acute and chronic injuries to the knee. Anatomy of the leg, ankle and foot is considered in relation to injuries to these regions.
PHPH5823  
**Sports Injuries 2**  
*Staff Contact:* Dr D Garlick  
*UOC6 WKS14 S1 or S2*  
**Note/s:** A compulsory course for GradCertSpMed  
Sports Injuries 2 deals with normal soft tissues and injuries to these in relation to muscles, tendons, ligaments and cartilage. Bone structure and function are described to understand injuries to bone. Anatomy of the pelvis, hip and thigh precedes consideration of injuries and their management in the groin, hip and thigh. Functional anatomy of the knee lays the basis for understanding acute and chronic injuries to the knee. Anatomy of the leg, ankle and foot is considered in relation to injuries to these regions.

PHPH5833  
**Medical Applications of Exercise 1**  
*Staff Contact:* Dr D Garlick  
*UOC6 WKS14 S1 or S2*  
**Note/s:** A compulsory course for GradCertSpMed  
Medical Applications of Exercise 1 surveys the physiology of the cardiovascular system in its control and reflex responses as well as the electrophysiology of the heart and the ECG. The effects of exercise on the cardiovascular system are discussed. Investigations of cardiovascular functions are illustrated, including stress testing. Primary, secondary and tertiary use of exercise in cardiac rehabilitation are considered. Cardiovascular aspects of special groups are described, in pregnant women, in hypertensive and diabetic patients.

PHPH5843  
**Medical Applications of Exercise 2**  
*Staff Contact:* Dr D Garlick  
*UOC6 WKS14 S1 or S2*  
**Note/s:** A compulsory course for GradCertSpMed  
Temperature regulation is considered as a basis for understanding hyperthermia in the athlete. Physiological and medical considerations are described in relation to the female athlete and in relation to children. Respiratory physiology and respiratory medicine provide the basis for understanding exercise-induced asthma, diving and altitude problems for the athlete.

PHPH9100  
**Discovery and Pre-clinical Development of New Medicines**  
*Staff Contact:* Prof R Day  
*UOC6 WKS14 S1 or S2*  
**Note/s:** The course is compulsory for programmes 7370, 5504, and 9060.  
This course provides a general overview of the development of new medicines. It includes the following topics. History and philosophy of development of new medicines. Process of discovery: screening/molecular modelling resulting in identification of lead compounds. High throughput screening, combinatorial chemistry. Refinement of lead compounds, biological testing in laboratory animals, tissues or tissue components. Choice of chemical entity for further development and identification of back-up compounds. Preclinical studies of selected compound: the value and limitations of animal models in predicting clinical efficacy and potential adverse effects; mechanism of action, screening for total biological effects, toxicology. Factors involved in choosing compounds of clinical development: scientific merit, medical utility, uniqueness, commercial value, compatibility with company strategies, facilities available for development. Selection of back-up compound. Project management: identification of commercial/medical objectives, pre-clinical issues, clinical development strategies. Company strategies: decision path analyses, resources, timelines.

PHPH9101  
**Principles of Drug Action**  
*Staff Contact:* Prof R Day  
*UOC6 WKS14 S1 or S2*  
**Note/s:** The course is compulsory for programmes 7370, 5504, and 9060.  
This course provides a general overview of pharmacodynamics and pharmacokinetics including the following topics. The dose-response relationship as a function of pharmacokinetic and pharmacodynamic properties. Qualitative discussion of factors involved in determining pharmacokinetic properties: routes of administration, formulation, absorption, distribution, elimination (metabolism and excretion). Qualitative investigation of pharmacokinetics variables (bioavailability, volume of distribution, clearance, half-lives, etc.). The use of pharmacokinetic variables in dosage optimization. Qualitative discussion of pharmacodynamic mechanisms: specific and non-specific mechanisms. Receptors and signal transduction. Agonists, partial agonists and antagonists. Quantitative investigation of drug-receptor interactions. The influence of non-drug factors (disease states, age, genetics, etc.) on pharmacokinetic and pharmacodynamic parameters, and hence on the dose-response relationship. A major feature of this course is the emphasis placed on instruction in using on-line library resources. These skills are used in all subsequent courses.

PHPH9102  
**Pharmaceutical Development of New Medicines**  
*Staff Contact:* Prof R Day  
*UOC6 WKS14 S1 or S2*  
**Note/s:** The course is compulsory for programmes 7370, 5504, and 9060.  
This course begins with an introduction to Pharmaceutics, which is the science of preparing and evaluating dose forms for the administration of medicines. Topics to be covered include the manufacture of new compounds, the choice of formulations and pharmaceutical labelling. The influence of pharmacokinetics and pharmacodynamics on product development. Methods of testing for bioequivalence, stability, impurity and incompatibility. Formulation for toxicology and the quality control. Preparation of materials for clinical trials including distribution and disposal of remaining stock. Long-term stability studies. Principles of labelling for clinical use. Problems associated with scaling pilot syntheses and production fabrication to large-scale production.

PHPH9104  
**Legal and Regulatory Development of New Medicines**  
*Staff Contact:* Prof R Day  
*UOC6 WKS14 S1 or S2*  
**Note/s:** The course is compulsory for programmes 7370, 5504, and 9060.  
This course provides a general overview of the ethical issues and laws relevant to the development and marketing of medicines. It includes the following topics. State and Commonwealth Constitutional powers. Common law, statutory law, accountability, natural justice. Laws relating to the development and sale of medicines; patents, intellectual property, trade practices. Ethical issues in drug development and marketing. Preparation and submission of marketing applications, approval and appeal processes. Principles of Good Clinical Research Practice (GCRP). The ethical review process, consent procedures in biomedical research. The philosophy of regulation of drug use: input of industry, Government, consumer. The regulatory principles governing the affairs of developmental drugs in human courses and the practical consequences of these on the design and conduct of clinical investigations. The organization of the regulatory processes in Australia: The Therapeutic Goods Administration and advisory bodies (ADEC, ADRAC, etc.) The Pharmaceutical Benefits Advisory Committee. Submissions regarding cost effectiveness. Preparation and submission of an application for approval to test or marker a drug and the relevant appeal process. Integration of regulatory affairs into the pre- and post-marketing planning and review of product development strategies. Input from international bodies and national agencies.

PHPH9107  
**Therapeutics and the Molecular Basis of Disease I**  
*Staff Contact:* Prof R Day  
*UOC6 WKS14 S1 or S2*  
**Note/s:** The course is elective for programmes 5504, and 9060.  
This course provides a basis for understanding the mechanisms involved in the disordering physiology that underlies common disease states. The object is to provide an understanding of those disorders that are amenable to correction or amelioration with drug therapy. It thus provides a rationale for drug design and utilization.
The course consists of five main sections. Section 1 is a review of relevant features of general biology with emphasis on (a) modern systems of taxonomy (natural products are still a major source of lead compounds for developing new therapeutic agents) and (b) biochemistry with emphasis on those aspects relevant to molecular biology and biochemical pharmacology (the other two main areas involved in new drug development). Section 2 deals with cellular injury and death and covers causes of cell injury, general mechanisms of cell injury (necrosis, apoptosis, stress proteins and cell injury, subcellular alterations in cell injury, including cellular accumulations, pathologic calcification, hyaline change cellular aging. Section 3 covers cellular growth and differentiation including control of cell growth, extracellular matrix and cell-matrix interactions, and cellular adaptations of growth and differentiation. Section 4 deals with inflammation and repair and covers acute inflammation, chemical mediators of inflammation, chronic inflammation, morphologic pattern in acute and chronic inflammation, systemic effects of inflammation, wound healing. Section 5 covers oedema, hyperaemia and congestion, haemorrhage, haemostasis and thrombosis, embolism and shock.

**PHPH9108**

**The Therapeutic Basis of Drug Use and Development 1**

*Staff Contact: Prof R Day*

*UOC6 WKS14 S1 or S2*

*Note/s: The course is elective for programmes 5504, and 9060; courses PHPH9107 and PHPH9116 are prerequisites.*

This course aims to provide an understanding of the medical problems and treatments that need to be understood in developing new therapeutic agents and optimizing their use. Emphasis will be on highlighting the strengths and weaknesses of present therapies and identification of current research aimed at developing new therapeutic agents. The course begins with a review of drug safety including mechanism of adverse drug reactions and drug interactions, together with the influence of age, race and disease states on the tendency to develop adverse responses to medication. The course provides and integrated description of relevant pharmacology, pathophysiology, disease states: (a) infectious diseases: bacterial, fungal, viral and parasitic infections; (b) immunological disorders: immune deficiency, hypersensitivity, transplantation; (c) haemotology: anaemias, haemorrhagic disorders, disorders of white blood cells, leukaemias, lymphomas; (d) cardiovascular disorders: cardiac arrhythmia, ischaemic heart disease, heart failure, hypertension, vascular disorders; (e) respiratory tract disorders: upper respiratory tract disorders, asthma, chronic obstructive pulmonary disease, acute bronchitis, bronchiectasis, cystic fibrosis, pneumonia; (f) renal tract disorders: renal failure, disorders of renal tubule function, obstructive uropathies, myoneurogenic disorders, incontinence, neoplasms: (g) gastrointestinal disorders: oesophageal disorders, gastritis, peptic ulcer, diarrhoea and constipation, gastroenteritis, malabsorption syndromes, chronic inflammatory of the bowel, gastrointestinal neoplasms; (h) hepatic and biliary disorders: jaundice, ascites, fibrosis, cirrhosis, hepatitis, neoplasms.

**PHPH9109**

**The Therapeutic Basis of Drug Use and Development 2**

*Staff Contact: Prof R Day*

*UOC6 WKS14 S1 or S2*

*Note/s: The course is elective for programmes 5504, and 9060; courses PHPH9107 and PHPH9118 are prerequisites.*

The objectives of this course are the same as describe for course PHPH9108. The course will provide and integrated description of relevant physiology, pathophysiology, disease state manifestations and clinical pharmacology with respect to the following disease: (a) nutritional and metabolic disorders: nutrition, nutritional deficiencies, obesity, water/electrolyte/acid-base metabolism; (b) endocrine disorders: disorders of the pituitary, thyroid, adrenal glands; disorders of carbohydrate metabolism; (c) gynaecological disorders: common problems, amenorrhoea and abnormal bleeding, endometriosis, breast disorders, neoplasms; (d) neurologic disorders: seizure disorders, sleep disorders, cerebrovascular disease, CNS infection and neoplasms, demyelinating diseases, disorders of movement, spinal cord disorders peripheral nervous system disorders; (e) psychiatric disorders: personality disorders, drug dependence, neuroses, mood disorders, schizophrenic disorders, delusional disorders; (f) musculoskeletal and connective tissue disorders: rheumatoid arthritis and other diffuse connective tissue disease, arthritis associated with spondylitis, osteoarthritis, infections and neoplasms of the bones, crystal-induced conditions, bone and cartilage disorders, nonaccicular rheumatism; (g) ophthalmological disorders: disorders of the eyelids, conjunctiva, and cornea, cataract, uveal tract disorders, retinal disorders, glaucoma, disorders of the optic nerve; (h) dermatological disorders: dermatitis, scaling disorders, disorders of the hair follicles and sebaceous glands, skin infections - bacterial, viral, parasitic, fungal, drug eruptions and similar inflammatory disorders of skin, disorders of cornification, tumours.

**PHPH9111**

**Pharmaceutical Formulation 2**

*Staff Contact: Prof R Day*

*UOC6 WKS14 S1 or S2*

This course consists of coursework only and will extend the principles covered in Pharmaceutical Formulation and will include the following topics: (a) the formulation and in vitro assessment of oral controlled-release products; (b) the formulation and in vitro assessment of novel dosage forms such as transdermal therapeutic systems and osmotic pumps; (c) principles of accelerated stability testing of conventional dosage forms including the techniques for using data from accelerated stability tests for prediction of shelf life; (d) the pharmaceutics of multiphase formulations such as microemulsions and liposomes; (e) selected topics in bioavailability including statistical design and analysis of bioavailability studies and the design and interpretation of studies designed to assess the bioavailability of controlled-release products; (f) the preparation of biotechnology products by recombinant techniques, their physical and chemical properties, including stability and compatibility, and approaches to their formulation (an alternative to this last topic will be provided for students taking the Biopharmaceuticals electives).

**PHPH9112**

**Advanced Pharmacokinetics**

*Staff Contact: Prof R Day*

*UOC6 WKS14 S1 or S2*

This course greatly extends the introduction to pharmacokinetics given in the core module Principles of Drug Action, with particular emphasis being given to new aspects of pharmacokinetics. Topics to be covered include (a) rigorous discussion of accumulation kinetics; (b) computerised methods of fitting theoretical equations to the time course of plasma concentrations in individual patients; (c) population kinetics - this is an important aspect of modern pharmacokinetics in which limited data from individual patients can be used to obtain pharmacokinetic parameters; and (d) analysis of the time course of drug effect - pharmacodynamic/pharmacokinetic analysis provides and understanding of the factors controlling the time course of drug effect and is used widely in modern pharmacokinetic research.

**PHPH9113**

**Advanced Regulatory Affairs**

*Staff Contact: Prof R Day*

*UOC6 WKS14 S1 or S2*

This course will extend the core course Law, Ethics and the Regulation of the Development and Use of Medicines, for example, by providing a comprehensive examination of the role of the international regulatory agencies such as those of the European Union and the United States and their influence on the Australian regulatory processes examined. Other aspects of the regulatory process mentioned briefly in the core course, such as issues relating to pharmaceutical chemistry, will be considered in more detail. However, the major emphasis of the course will be on case study and critical appraisal. Students will review registration dossiers, write evaluation reports and prepare Pre-ADEC responses. The focus of this work will be the optimisation of the regulatory process. Students will also participate in a mock Australian Drug Evaluation Committee (ADEC) meeting to gain an understanding of that Committee's procedures and decision-making processes. It is envisaged that some students may choose to undertake projects that would require some time to be spent at the Therapeutic Goods Administration.
As limits are placed on health care budgets, from the national to the individual level, the relative value of competing uses of scarce resources is becoming a significant part of decision making. The real cost of any health care budgetary decision is not the dollars spent but the loss of benefits that would have been obtained by using the money in different ways. This realisation has led to the application of economic evaluation to the health care choices in an attempt to maximise the value obtained from limited health-care budgets. Economists have developed a number of techniques and concepts which, although not providing the answer, can assist the decision maker in identifying, setting out and analysing the many factors that influence such difficult but necessary choices. Pharmacoeconomics is a subdiscipline of health care economics and is concerned with the methods used by economists in the evaluation of choices in the allocation of pharmaceuticals. This course consists of two parts: (a) Basic Concepts and (b) Applications and Decision. Part (a) covers methodological issues, cost-of-illness studies, types of economic analysis which are relevant to drugs, calculation of economic cost, decision analysis, examples of published analyses, and economic analysis in developing countries. Part (b) covers budgetary constraints, managing future budgets, use of economic analysis in policy making, policy developments, Australian policies, The Australian Guidelines, and the need for an evidence-based approach.

**PHPH9116 Advanced Clinical Trials Management**

**Staff Contact:** Prof R Day

**UC06** WKS14 S1 or S2

**Prerequisite/s:** PHPH9100

The focus of the advanced module will be the practical application of the underlying principles encountered in the core course on clinical trials management. Students will prepare a complete data package for the research ethics committee (REC) for a study submitted as part of the clinical trials notification (CTN) scheme as the major focus and assessment task for this module. The trial will be multi-centred and early phase, that is Phase II to III. There will be potential serious toxicities and a data safety monitoring committee will need to be established. Students will develop the clinical trials protocol, the draft patient consent form, and case report form (CRF). The application package will be assessed by a mock REC and the student will be asked to respond to questions and criticisms raised by the REC.

**PHPH9117 Pharmaceutical Manufacturing and Quality Control**

**Staff Contact:** Prof R Day

**UC06** WKS14 S1 or S2

**Prerequisite/s:** PHPH9100, PHPH9102, PHPH9103

An understanding of manufacturing in the pharmaceutical industry will be provided by describing the way in which raw materials are processed into particular dose forms. Using examples of enteral, parenteral and topical products, sampling of raw materials and their subsequent characterisation, followed by the common manufacturing operations and stability and bioavailability will be explored. For example, how particle size or shape or crystal polymorphism can effect mixing of powders and the flow of the powders into the tablet machine as well as dissolution behaviour will be reviewed. Since the aim of manufacturing is to produce a product of a high quality, the principles involved in good manufacturing practice and good laboratory practice and optimizing processes will be studied. This will be both qualitative and quantitative in nature (latter includes statistical methods for process optimization). The relevant national and international codes and guidelines and their relationships to each other and the ongoing process of harmonizing standards will be introduced.

**PHPH9118 Therapeutics and the Molecular Basis of Disease 2**

**Staff Contact:** Prof R Day

**UC06** WKS14 SS

**Note/s:** The course is elective for programmes 5504, and 9060

This course is a continuation of the material covered in PHPH9107 and, like the previous course, aims to provide a basis for understanding the mechanisms involved in disordered physiology that underlies common disease states. The objective is to provide an understanding of those disorders that are amenable to correction or amelioration with drug therapy, it thus provides a rationale for drug design and utilization. The course consists of four main sections: immunology and diseases of immunity; infection, genetic disorders; and neoplasia. Immunology and diseases of immunity includes a review of normal immune system mechanisms (cells of the immune system, cytokines, histocompatibility antigens, and hypersensitivity reactions); mechanisms of autoimmune diseases, immunologic deficiency syndromes, other actual or suspected immune system diseases (e.g. amyloidosis). Infection includes a brief introduction to microbiology, general principles of microbial pathogenesis, discussion of selected human infectious diseases. Genetic disorders includes a brief section on the new genetics, mutation, mendelian disorders, disorders with multifactorial inheritance, normal karyotype cytogenetic disorders, single-gene disorders with nonclassic inheritance, molecular diagnosis. Neoplasia includes definitions and nomenclature, characteristics of benign and malignant neoplasms, epidermology, molecular basis of cancer, biology of tumour growth, carcinogenic agents and their cellular interactions, host defence mechanisms, clinical features of tumours. Aspect of molecular biology relevant to the preceding topics (e.g. gene therapy) will be discussed.

**PHPH9119 Best Practice in Educational Visiting**

**Staff Contact:** Prof R Day

**UC06** WKS14 S1 or S2

As strong communication skills are fundamental to the practice of educational visiting, the first focus of the course is to establish and maintain a good relationship with the doctor in the educational visiting situation. The workshop has been designed to: 1. provide the student with the fundamental knowledge needed to perform the task of the educational visitor; and, 2. guide the student through personal experiences of educational visiting in a supportive setting in order to develop the interpersonal skills necessary for the role.

**PHPH9120 Clinical Development of New Medicines**

**Staff Contact:** Prof R Day

**UC06** WKS14 S1 or S2

**Note/s:** The course is compulsory for program 7370, 5504, and 9060

This course provides an introduction to clinical epidemiology, statistics, clinical trial management and data management. A brief introduction to the principles of clinical epidemiology is provided as a basis for measurement of drug effects on humans, including sources of error, types of research studies, and study design. Introduction to statistics including methods for descriptive statistics, normal distributions and methods for expressing probability distribution parameter including t, chi-square and F. Inferential statistics covers application of distribution parameters to decision making, hypothesis testing, choosing and inferential test, comparison of two means, the two sample t test, analysis of variance, chi-square test, correlation, non-parametric tests and calculation of confidence intervals. Clinical trials management reviews the roles and responsibilities of the trial sponsor (company), its employees, the investigator, the clinical trials facility and its staff, the research ethics committee, the contract research organization (CRO) and finally the participants in a clinical trial. Sponsor-related issues include: choice of CTN or CTX scheme, preparation of the data package, protocol, indemnity release, patient information sheets, budget monitoring responsibilities, investigators meetings. Research Ethics Committee responsibilities include: review of data package, quality of informed consent materials, and monitoring responsibilities. Investigator issues collection and recruiting, collection of adverse events data, and methodology for gaining
consent. CRO responsibilities include, overall trial management, choosing a site, auditing. A common theme will be implementation of guidelines for Good Clinical Research Practice. Method and regulations regarding the collection and treatment of data are discussed.

**PHPH9121 Post-marketing Development**  
*Staff Contact: Prof R Day*  
UOC6 WKS14 S1 or S2  
**Notes:** This course is a compulsory program 5504 9060

This course deals with two of the main areas of the post-marketing activities of pharmaceutical companies, namely pharmacovigilance and medical information services. The section on pharmacovigilance involves the study of methods of detecting possible adverse drug reactions (ADRs), including prospective and retrospective studies, intensive surveillance and spontaneous reporting. It also involves the study of methods of determining risk and causality, estimation of cost benefit considerations, procedures for investigating ADR reports made to a company, legal issues, and the transmission of all of this information to regulatory bodies and, where appropriate, inclusion in the drug's approved Production Information. The section on company Medical Information Services deals with the procedures for the provision of information by pharmaceutical companies for internal use (e.g. in drug development) and for external use (e.g. for prescribers and consumers). The course considers four main areas:  
(a) maintenance of information databases;  
(b) preparation of information materials (e.g. prescribing information for doctors, pharmacists and patients);  
(c) development of critical appraisal skills;  
and (d) consideration and application of ethical, legal and regulatory issues including Commonwealth and State law, industry codes of practice, Trade Practices Commission Issues, product liability issues, and issues relating to product promotion.

**School of Psychiatry**

**PSCY9106 Psychological Medicine 1**  
*Staff Contact: Prof G Andrews*  
UOC12 WKS14 S1  

The diagnosis, classification and epidemiology of mental disorders; the doctor as therapist; the tenets of good diagnostic interviewing and good clinical care; the evaluation of treatment; the use of micro counselling and structured problem solving techniques. Case discussions to illustrate these therapy techniques.

**PSCY9107 Psychological Medicine 2**  
*Staff Contact: Prof G Andrews*  
UOC12 WKS14 S2

The recognition and treatment of manic and depressive disorders and of the anxiety disorders. The use of pharmacological and cognitive behavioural techniques in these disorders. Crisis resolution in such disorders. Case discussions, including the presentation of material from patients currently in treatment, to illustrate these techniques.

**PSCY9208 Psychological Medicine 3**  
*Staff Contact: Prof G Andrews*  
UOC8 WKS14 S1

The recognition and management of cognitive impairment, dementia, and other organic syndromes. The recognition of schizophrenia and personality disorders. Crisis resolution and good clinical care for such patients. Case discussions, including the presentation of material from patients currently in treatment, to illustrate such care.

**PSCY9209 Psychological Medicine 4**  
*Staff Contact: Prof G Andrews*  
UOC8 WKS14 S2

Recognition and management of problems arising within marriage and the family. Recognition and management of disorders of children, adolescents, and the elderly presenting in general practice. Case discussions, including the presentation of material from patients currently in treatment, to illustrate the techniques.

**PSCY9211 Project Report A**  
*Staff Contact: Prof G Andrews*  
UOC4 WKS14 S1

Either an account of patients treated, integrating literature, therapy and evaluation of outcome, or a research project related to psychiatry in general practice.

**PSCY9212 Project Report B**  
*Staff Contact: Prof G Andrews*  
UOC4 WKS14 S2

Either an account of patients treated, integrating literature, therapy and evaluation of outcome, or a research project related to psychiatry in general practice.
Conditions for the Award of Degrees

First Degrees

Rules, regulations and conditions for the award of first degrees are set out in the appropriate Faculty Handbooks. For the list of undergraduate programs and degrees offered see Table of Programs by Faculty (Undergraduate Study) in the Calendar.

Higher Degrees

For the list of postgraduate degrees by research and course work, arranged in faculty order, see UNSW Programs (by faculty) in the Calendar. The conditions for the award of postgraduate degrees, diplomas and certificates appear in the relevant Faculty Handbook.

Doctor of Medicine (MD) by published work

1. The degree of Doctor of Medicine by published work may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualification

2. A candidate for the degree shall:
   (1) hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales of at least five years standing; or
   (2) hold the degrees of Bachelor of Medicine and Bachelor of Surgery or a qualification considered equivalent from a university other than the University of New South Wales with at least five years' standing and have been associated with the University of New South Wales or one of its teaching hospitals for a period of at least four years.

Enrolment and Progression

3. A candidate for the degree on the basis of published work shall lodge with the Registrar an application together with:
   (1) four copies (if possible) of the published work;
   (2) any additional work, published or unpublished, that a candidate may wish to submit in support of the application;
   (3) a declaration indicating those sections of the work, if any, that have been submitted previously for a university degree or other similar award.

4. Every candidate in submitting published work and such unpublished work as is deemed appropriate shall submit a short discourse describing the research activities embodied in the submission. The discourse shall make clear the extent of the originality of the work and the candidate's part in any collaborative effort including hypothesis generation, design and execution of experiments, supervision of others doing experiments, analysis of results, and contribution to meetings of the research team.

Examination

5. There shall normally be three examiners of the work, appointed by the Committee, at least two of whom shall be external to the University.

6. Before the work referred to in 3. (1), (2) above is submitted to the examiners the head of the appropriate school shall certify that it is prima facie worthy of examination.
7. At the conclusion of the examination each examiner shall submit a concise report to the Committee on the merits of the published work and a recommendation as to whether the degree should be awarded. The examiners may require the candidate to answer orally or in writing any questions concerning the work.

Fees
8. A candidate shall be required to pay such fees as may be determined from time to time by the Council.

In these rules, the term ‘published work’ shall mean printed as a book or in a periodical or as a pamphlet readily available to the public. The purpose of requiring publication is to ensure that the work submitted has been available for criticism. The examiners may disregard any of the work submitted if, in their opinion, it has not been available for criticism.

Doctor of Medicine (MD) by thesis

1. The degree of Doctor of Medicine by thesis may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualifications
2. (1) A candidate for the degree shall:
   (a) hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales at a level acceptable to the Committee; or
   (b) hold the degrees of Bachelor of Medicine and Bachelor of Surgery or a qualification considered equivalent from a university other than the University of New South Wales at a level acceptable to the Committee; or
   (c) in exceptional cases, submit such evidence of academic and professional attainments in support of the candidature as may be approved by the Committee.

   (2) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such examination or carry out such work as the Committee may prescribe, before permitting enrolment.

   (3) A candidate enrolled under 2. (1)(a) or (b) above shall not submit a thesis for the degree until the lapse of five years from the date of the award of the degrees mentioned therein.

   (4) A candidate enrolled under 2. (1)(c) above shall not submit a thesis for the degree until such period of time has elapsed since enrolment as the Committee shall decide at the time of approving enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree by thesis shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

   (2) In every case, before permitting a candidate to enrol, the Committee shall be satisfied that adequate supervision and facilities are available.

   (3) An approved applicant shall be enrolled in one of the following categories:

   (a) full-time candidature: a candidate who is fully engaged in advanced study and research at the University or at one of its teaching hospitals;

   (b) part-time candidature: a candidate whose occupation leaves the candidate substantially free to pursue a program of advanced study and research at the University or at one of its teaching hospitals;

   (c) external candidature: a candidate who is engaged in advanced study and research away from the University or one of its teaching hospitals.

   (4) A candidate shall be required to undertake an original investigation on a topic approved by the Committee. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

   (5) The work shall be carried out under the direction of a supervisor appointed by the Committee from the full-time academic members of the University staff.

   (6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

   (7) No candidate shall be awarded the degree until the lapse of six academic sessions in the case of a full-time candidate or eight academic sessions in the case of a part-time or external candidate from the date of enrolment.

   In the case of a candidate who has been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery with honours or who has had previous research experience the Committee may approve remission of up to two sessions for a full-time candidate and four sessions for a part-time or external candidate.

   (8) A full-time candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. A part-time or external candidate shall present for examination not later than twelve academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.
Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) If a candidate for the degree is not a graduate of the University of New South Wales the greater proportion of the work described must have been carried out in the University or in one of its teaching hospitals, save that in special cases the Committee may permit a candidate to conduct the work at other places where special facilities not possessed by the University may be available or where the subject of the research is uniquely located but only if the candidate spends such period of time within the University, and under such supervision, as may be determined by the Committee.

3(3) A candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(4) The thesis shall comply with the following requirements.

(a) it must be an original and meritorious contribution to knowledge of the subject;

(b) it must be written in English and reach a satisfactory standard of expression and presentation;

(c) It must consist of the candidate's own account of the research; in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(5) A candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work otherwise previously published, whether or not it is related to the thesis.

(6) The thesis shall contain a certificate signed by the candidate indicating specifically the extent to which the work embodied in the thesis is directly attributable to the candidate's own research and the extent to which the thesis has benefited from collaboration with persons other than the supervisor.

(7) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(8) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis, in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that;

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) if the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee it may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Doctor of Medicine (MD) by thesis without supervision

1. The degree of Doctor of Medicine by thesis without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualifications

2. A candidate for the degree shall hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales with at least five years standing at a level acceptable to the Committee.

Enrolment and Progression

3. An application to enrol as a candidate for the degree by thesis without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interest, at an
early stage seek the advice of the appropriate school with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) A candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) it must be an original and meritorious contribution to knowledge of the subject;

(b) it must be written in English and reach a satisfactory standard of expression and presentation;

(c) it must consist of the candidate's own account of the research; in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied with the candidate's part in the joint research.

(4) A candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work otherwise previously published, whether or not related to the thesis.

(5) The thesis shall contain a certificate signed by the candidate indicating specifically the extent to which the work embodied in the thesis is directly attributable to the candidate's own research and the extent to which the thesis has benefited from the collaboration with other persons.

(6) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses. The candidate may also submit any work previously published whether or not such work is related to the thesis.

(7) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis, in whole or in part, in photostat or microfilm or other copying medium.

Examination

5.(1) There shall normally be three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) Before the thesis is submitted to the examiners the head of the school in which the candidate is enrolled shall certify that it is prima facie worthy of examination.

(3) After examining the thesis each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee it may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree.

Fees

6. A candidate shall be required to pay such fees as may be determined from time to time by the Council.

Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty or board (henceforth referred to as the Committee) to a candidate who has made an original and significant contribution to knowledge.

Qualifications

2.(1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment as a candidate for the degree.
Enrolment

3.(1) An application to enrol as a candidate for the degree shall be lodged with the Registrar at least one month prior to the date at which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled either as a full-time or a part-time student.

(4) A full-time candidate will present the thesis for examination no earlier than three years and no later than five years from the date of enrolment and a part-time candidate will present the thesis for examination no earlier than four years and no later than six years from the date of enrolment, except with the approval of the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor and where possible a co-supervisor who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a co-supervisor at that institution.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5.(1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) It must be an original and significant contribution to knowledge of the subject;

(b) The greater proportion of the work described must have been completed subsequent to enrolment for the degree;

(c) It must be written in English except that a candidate in the Faculty of Arts and Social Sciences may be required by the Committee to write a thesis in an appropriate foreign language;

(d) It must reach a satisfactory standard of expression and presentation;

(e) It must consist of an account of the candidate’s own research but in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6.(1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that one of the following:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of school.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the higher degree Committee, the thesis would merit the award of the degree.
(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further work recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further work, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate be permitted to resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

*School* if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Master of Clinical Education (MClinEd)

1. The degree of Master of Clinical Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:
   (a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) be actively engaged in clinical education.

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment and eight sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessments will be based on assignments undertaken during and at the end of each course. All assignments must be passed.

(2) The degree of Master of Clinical Education will be awarded after satisfactory completion of a program of advanced study which achieves 48 units of credit and submission of a satisfactory Major Project report based on at least one semester of applied development or research in clinical education.

Fees

5. A candidate shall pay fees as may be determined from time to time by the Council.
Master of Community Health (MCH) by Research

1. The degree of Master of Community Health by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall:
   (a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, or
   (b) have been awarded an appropriate degree of Bachelor of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
   (2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.
   (2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Community Medicine and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.
   (3) The candidate shall be enrolled as either a full-time or part-time student.
   (4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.
   (5) The candidate may undertake the research as an internal student, i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.
   (6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.
   (7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a co-supervisor at that institution.
   (8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.
   (9) A full-time candidate for the degree shall present for examination not later than four academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.
   (i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.
   (ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.
(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination
6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:
(a) The thesis merits the award of the degree.
(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.
(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.
(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.
(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.
(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.
(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees
7. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Community Health (MCH) by Formal Course Work
1. The degree of Master of Community Health by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the degree shall:
(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), or
(b) have been awarded an appropriate degree of Bachelor of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3.(1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Medical Science in Drug Development (MMedSc)

1. The degree of Master of Medical Science in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed the prescribed program of advanced study for the award.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee; or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Definitions

The Committee is the Higher Degree Committee of the Faculty of Medicine.

A Relevant Degree is a degree in the biological sciences or cognate professional disciplines. Graduates in non-relevant disciplines may be admitted if they have had significant direct or indirect involvement with the pharmaceutical industry and the development of pharmaceutical products. In some cases, applicants may be required to undertake a course of reading in relevant subject areas before commencing the course.

Candidature

2. (1) A candidate for the degree of Master of Medical Science in Drug Development:

(a) Shall have been awarded a relevant degree of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(b) Students not qualified to enrol in the Master's program but who are qualified to enrol in the Diploma, may, at the successful completion of the Diploma program and at the discretion of the Committee, convert their candidature to that of Master.

(c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least three calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the award shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) The minimum and maximum periods of part-time candidature shall be 6 and 10 academic sessions.

(5) Articulation: a candidate holding the award of Graduate Diploma in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Medical Science in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of an additional 36 units of credit. Re-entry will not be permitted until at least two sessions have elapsed since
completion of the prior course. The minimum time in which a student could complete the requirements for both the Graduate Diploma and the Master's award would be nine sessions as compared with six sessions for those who proceeded directly to the Master's degree.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Administration (MHA) by Research

1. The degree of Master of Health Administration by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications
2. (1) A candidate for the degree shall:
(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee; or
(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and
(ii) have had at least three years experience in the health services of a kind acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.
(2) In every case, before permitting a candidate to enrol, the Head of the School of Health Administration (hereinafter referred to as the head of the school) shall be satisfied that adequate supervision and facilities are available.
(3) An approved candidate shall be enrolled in one of the following categories:
(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external – not in regular attendance at the University and using research facilities external to the University.
(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.
(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.
(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.
(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.
(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis
4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation or design.
(2) The candidate shall give in writing two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Administration (MHA) by Formal Course Work

1. The degree of Master of Health Administration by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

(4) There is normally an experience requirement of three years experience in the health field. Those students who are inexperienced (i.e. less than three years) in the health service field are required to undertake a planned program of field experience in addition to the twelve subjects.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar by 30 November of the year before the year in which enrolment is to begin. Late applications may be considered by the School's Selection Committee.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time or external candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time or external candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

Master of Health Professions Education (MHPEd) by Research

1. The degree of Master of Health Professions Education by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall:
   (a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and
   (b) have had the equivalent of at least two years full-time teaching and/or administrative experience of a kind acceptable to the Committee.

   (2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

   (2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Medical Education and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

   (3) The candidate shall be enrolled as either a full-time or part-time student.

   (4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

   (5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

   (6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

   (7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a co-supervisor at that institution.

   (8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

   (9) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.
(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners’ reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Planning (MHP)

1. The degree of Master of Health Planning by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) (i) have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee; or

(b) (i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) either have undertaken appropriate postgraduate or professional studies at a level acceptable to the Committee or have had at least three years experience in the health services of a kind acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar by 30 November of the year before the year in which enrolment is to begin. Late applications may be considered by the School’s Selection Committee.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time or external candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time or external candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Medicine (MMed) by Research with Supervision

1. The degree of Master of Medicine by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine.

(2) A candidate shall have had at least 3 years full-time experience in the practice of medicine and be currently so engaged.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the Head of the School of Community Medicine shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external not in regular attendance at the University and using research facilities external to the University

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the Head of the School of Community Medicine or his/her delegate and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time candidate.
(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis
4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.
(2) The candidate shall give, in writing, two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.
(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.
(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination
5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:
   (a) the candidate be awarded the degree without further examination; or
   (b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the Head of the School; or
   (c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or
   (d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or
   (e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.
(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re-present the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.
(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees
6. A candidate shall pay such fees as may be determined from time to time by the Council.
   (a) the candidate be awarded the degree without further examination; or
   (b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the Head of the School; or
   (c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or
   (d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or
   (e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.
(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re-present the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.
(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate may be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.
Master of Medicine (MMed) by Research Without Supervision

1. The degree of Master of Medicine by research without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales with at least three years relevant standing or other equivalent qualifications.

Enrolment and Progression

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interests, seek at an early stage the advice of the Head of School or his/her delegate with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.
   (2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
   (3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.
   (4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
   (5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
   (6) It shall be understood that the University retain the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointment by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
   (2) Before the thesis is submitted to the examiners the Head of the School of Community Medicine shall certify that it is prima facie worthy of examination.
   (3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

Master of Medicine (MMed) by Formal Course Work

1. The degree of Master of Medicine by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
   (2) A candidate shall have had at least one year's full-time experience in the practice of medicine. In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be six full-time candidate and twelve academic sessions for a part-time candidate. In special cases a variation to these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Psychological Medicine (MPM)

1. The degree of Master of Psychological Medicine by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).

(2) A candidate shall have had at least three years full time experience in the practice of medicine and be currently so engaged.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of four academic sessions. The maximum period of candidature shall be eight academic sessions. In special cases a variation to these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Public Health (MPH) by Research

1. The degree of Master of Public Health by Research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualifications considered equivalent from another university or tertiary institution at a level acceptable to the Committee and

(ii) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such examination or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Medical Education and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.

(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student is at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with honours or who has had previous research experience the Committees may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation or design.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.
(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.
(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.
(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.
(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Public Health (MPH) by Formal Course Work

1. The degree of Master of Public Health by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:
(a) have been awarded the degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee), or
(b) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar on or before a date to be fixed by the Committee, that date being at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or six sessions in the case of a part-time candidate. The maximum period of candidature shall be six academic sessions from the date of enrolment for a full-time candidate and ten sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of Science (MSc)

1. The degree of Master of Science by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.

(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the head of the school in which the candidate intends to enrol shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:
(a) the candidate be awarded the degree without further examination; or  
(b) the candidate be awarded the degree without further examination subject to minor corrections as listed  
being made to the satisfaction of the head of the school*, or  
(c) the candidate be awarded the degree subject to a further examination on questions posed in the report,  
performance in this further examination being to the satisfaction of the Committee; or  
(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a  
 further period of study and/or research; or  
(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.  

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction  
of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further  
oral, practical or written examination within a period specified by it but not exceeding eighteen months.  

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or  
practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that  
the candidate be not awarded the degree the Committee shall determine whether or not the candidate may  
resubmit the thesis after a further period of study and/or research.

Fees  
6. A candidate shall pay such fees as may be determined from time to time by the Council.

* 'School' if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and  
includes a department where that department is not within a school, or schools or departments where the research is being  
undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an  
interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such  
teaching unit.

Master of Science (MSc) without supervision

1. The degree of Master of Science without supervision may be awarded by the Council on the recommendation  
of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a  
candidate who of has demonstrated ability to undertake research by the submission of a thesis embodying the  
results of an original investigation.

Qualifications  
2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of  
New South Wales with at least three years relevant standing in the case of Honours graduates and four years  
relevant standing in the case of Pass graduates, and at a level acceptable to the Committee.

Enrolment and Progression  
3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed  
form which shall be lodged with the Registrar not less than six months before the intended date of submission  
of the thesis. A graduate who intends to apply in this way should in his or her own interest, seek at an early  
stage the advice of the appropriate head of school with regard to the adequacy of the subject matter and its  
presentation for the degree. A synopsis of the work should be available.

Thesis  
4. (1) A candidate shall submit a thesis embodying the results of the investigation.  
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.  
(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly  
with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's  
part in the joint research.  
(4) The candidate may also submit any work previously published whether or not such work is related to the  
thesis.  
(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University  
for the preparation and submission of theses for higher degrees.  
(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and  
is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the  
University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination  
5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of  
whom shall be external to the University unless the Committee is satisfied that this is not practicable.  
(2) Before the thesis is submitted to the examiners the head of the school* in which the candidate is enrolled  
shall certify that it is prima facie worthy of examination.  
(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the  
thesis and shall recommend to the Committee that:
Master of Sports Medicine (MSpMed)

1. The degree of Master of Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:
(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered its equivalent from another university as considered acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
(b) normally be registered as a medical practitioner in the country (or state thereof) of residence, but in exceptional cases, enrolment may be granted to applicants who are provisionally registered.

3. (1) An application to enrol as a candidate for the degree shall:

3. (2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

3. (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

3. (4) No candidate shall be awarded the degree as a part-time candidate until the lapse of five academic sessions from the date of enrolment. The maximum period of part-time candidature shall be nine academic sessions. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each course and the satisfactory completion of the Practicum based on oral and practical demonstration of clinical skills.

4. (2) The degree of Master of Sports Medicine will be awarded after satisfactory completion of a program of advanced study which has achieved 60 units of credit with satisfactory completion of clinical examination and the satisfactory completion of a Major Project report based on at least one semester of research or clinical studies in relation to sports medicine.

Fees

5. A candidate shall pay fees as may be determined from time to time by the Council of the University.
Master of Surgery (MS)

1. The degree of Master of Surgery by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original contribution to knowledge in some field related to surgery.

Qualifications

2. (1) A candidate for the degree shall have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

(4) A candidate enrolled under (1) above shall not submit a thesis for the degree until the lapse of five years from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

(5) A candidate enrolled under (2) above shall not submit a thesis for the degree until such period of time has elapsed since enrolment as the Committee shall decide at the time of approving enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time candidature: a candidate who is fully engaged in advanced study and research at the University or at one of its teaching hospitals;

(b) part-time candidature: a candidate whose occupation leaves the candidate substantially free to pursue a program of advanced study and research at the University or at one of its teaching hospitals;

(c) external candidature: a candidate who is engaged in advanced study and research away from the University or one of its teaching hospitals.

(4) A candidate shall undertake, or have undertaken prior to enrolment for the degree, a broad postgraduate training in the principles and practice of surgery over a period of at least three full-time years of a kind acceptable to the Committee.

(5) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(6) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(7) Either the original work embodied in the thesis or the broad postgraduate training in the principles and practice of surgery shall have been undertaken at the University or at one of its teaching hospitals.

(8) No candidate shall be awarded the degree until the lapse of four academic sessions from the date of enrolment in the case of a full-time candidate or six academic sessions in the case of a part-time or external candidate. In the case of a candidate who has had previous research experience the Committee may approve remission of up to two sessions for a full-time candidate and three sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.
Thesis
5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.
(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat, or microfilm or other copying medium.

Examination
6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.
(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:
   (a) The thesis merits the award of the degree.
   (b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.
   (c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.
   (d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.
   (e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.
(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.
(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees
7. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Clinical Education (GradDipClinEd)

1. The Graduate Diploma in Clinical Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the diploma shall:
   (a) have been awarded the degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) be actively engaged in clinical education.
(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed. The Graduate Diploma in Clinical Education will be awarded after satisfactory completion of a program of advanced study which achieves 40 units of credit.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination
Assessments will be based on assignments undertaken during and at the end of each subject. All assignments must be passed.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

Graduate Diploma in Community Paediatrics (GradDipCommPaed)

1. The Graduate Diploma in Community Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the Graduate Diploma shall:
   (a) have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree of the Faculty of Medicine (hereafter referred to as the Committee) and
   (b) be professionally engaged in looking after the health of children.

   (2) An applicant who submits evidence of such academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree or graduate diploma.

   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the graduate diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the course.

   (2) A candidate for the graduate diploma shall be required to undertake such formal courses and pass such assessment as prescribed.

   (3) The progress of the candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

   (4) No candidate shall be awarded the graduate diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination
4. (1) Assessment is based on satisfactory completion of written examination questions during and at the end of each course and the satisfactory completion of assignments.

   (2) The Graduate Diploma in Community Paediatrics will be awarded after satisfactory completion of a program of 44 units of credit.

Fees
5. A candidate shall pay such fees as may be determined from time to time by the Council of the University.
Graduate Diploma in Drug Development (GradDipDD)

1. The Graduate Diploma in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. A candidate for the Graduate Diploma:
   (a) Shall have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
   (b) In exceptional cases, an applicant who submits evidence of such other academic and/or professional qualifications as may be approved by the Committee and who has had at least two years experience working in the pharmaceutical manufacturing industry in areas relating to scientific and technical aspects of that industry may be permitted to enrol for the Graduate Certificate, and, if the level of proficiency shown in these studies is deemed satisfactory by the Committee, that the candidate may convert his or her candidature to that of the Diploma.
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (a) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (b) A candidate for the award shall be required to undertake such formal courses and pass such assessment as prescribed.
   (c) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.
   (d) The minimum and maximum periods of part-time candidature shall be:
      (i) for the Diploma: 4 and 8 academic sessions, respectively
   (e) Students not qualified to enrol in the Master's program but who are qualified to enrol for the Diploma, may at the successful completion of the Diploma program and at the discretion of the Committee, convert their candidature to that of Master.
   (f) Articulation: a candidate holding the award of Graduate Diploma in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Medical Science in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of additional units of course material.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Geriatric Medicine (GradDipGeriMed)

1. The Graduate Diploma in Geriatric Medicine may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. A candidate for the Diploma shall:
   (1) Have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (2) Have had at least one year of full-time clinical experience in the practice of medicine at the time of enrolment.
In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Diploma.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) The normal duration of the course is two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. In special circumstances a variation of these times may be approved by the Head of School.

Fees

4. A candidate shall pay fees as may be determined from time to time by the Council.

Graduate Diploma in Paediatrics (GradDipPaed)

1. The Graduate Diploma in Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:
(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
(b) have had at least one year’s hospital experience subsequent to graduation of a kind acceptable to the Committee.

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the course (which is in January each year).

(2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment. In special cases an extension of time may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Public Health (GradDipPH)

1. A Graduate Diploma in Public Health may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Graduate Diploma shall:

(2) have been awarded an appropriate degree of Bachelor in a health related discipline from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) AND at least three years experience in a health or health-related field, or

(3) In exceptional cases, an applicant who submits evidence of such other academic and professional attainment as may be approved by the Committee may be permitted to enrol for the Graduate Diploma;

(4) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitted enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which the enrolment is to begin.

(2) A candidate for the diploma shall be required to undertake the courses, and pass any assessment, required.

(3) The progress of a candidate shall be reviewed by the end of each session by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment. The maximum candidature shall be seven sessions from the date of enrolment.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Sports Medicine (GradDipSpMed)

1. The Graduate Diploma in Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered its equivalent from another university as considered acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(b) normally be registered as a medical practitioner in the country (or state thereof) of residence, but in exceptional cases, enrolment may be granted to applicants who are provisionally registered.

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma as a part-time candidate until the lapse of four academic sessions from the date of enrolment. The maximum period of part-time candidature shall be eight academic sessions. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each course and the satisfactory completion of the Practicum based on oral and practical demonstration of clinical skills.

(2) The Graduate Diploma in Sports Medicine will be awarded after satisfactory completion of a program of advanced study which has achieved 48 units of credit with satisfactory completion of clinical examination.

5. Articulation: a candidate holding the Graduate Certificate in Sports Medicine from the University of New South Wales who, after a lapse at least three years, wishes to enrol for the degree of Graduate Diploma or Master of Sports Medicine may, at the discretion of the Course Supervisor in regard to further assessment related to recent developments in the field, be awarded the degree after the successful completion of the additional subjects required for the course.

Fees

6. A candidate shall pay fees as may be determined from time to time by the Council of the University.
Graduate Certificate in Drug Development (GradCertDD)

1. The Graduate Certificate in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. A candidate for the Graduate Certificate:
   (a) Shall have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
   (b) In exceptional cases, an applicant who submits evidence of such other academic and/or professional qualifications as may be approved by the Committee and who has had at least two years experience working in the pharmaceutical manufacturing industry in areas relating to scientific and technical aspects of that industry may be permitted to enrol for the Graduate Certificate, and, if the level of proficiency shown in these studies is deemed satisfactory by the Committee, that the candidate may convert his or her candidature to that of the Diploma.
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (a) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (b) A candidate for the award shall be required to undertake such formal courses and pass such assessment as prescribed.
   (c) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.
   (d) The minimum and maximum periods of part-time candidature shall be:
      (i) for the Graduate Certificate: 2 and 4 academic sessions.
   (e) Articulation: a candidate holding the award of Graduate Certificate in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Graduate Diploma in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of additional units of course material.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate in Geriatric Medicine (GradCertGeriMed)

1. The Graduate Certificate in Geriatric Medicine may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Certificate shall:
   (a) Have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) Have had at least one year of full-time clinical experience in the practice of medicine at the time of enrolment.
   In exceptional circumstances an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Certificate.
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the Certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the Certificate shall be required to undertake such formal courses and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) The normal duration of the course is one academic session from the date of enrolment in the case of a full-time candidate or two sessions in the case of a part-time candidate. In special circumstances a variation in these times may be approved by the Head of School.

Fees

4. A candidate shall pay fees as may be determined from time to time by the Council.

Graduate Certificate in Health Services Management (GradCertHSM)

1. A certificate may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the certificate shall:
   (a) have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
   (b) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.
   (2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the certificate.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the certificate shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the certificate shall be required to undertake such formal courses and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the certificate until the lapse of one academic session from the date of enrolment. The maximum period of candidature shall be four academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate in Public Health (GradCertDipPH)

1. A Graduate Certificate in Public Health may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Graduate Certificate shall:
   (a) have been awarded an appropriate degree of Bachelor in a health related discipline from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) AND at least three years experience in a health or health-related field, or
   (b) In exceptional cases, an applicant who submits evidence of such other academic and professional attainment as may be approved by the Committee may be permitted to enrol for the Graduate Certificate;
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which the enrolment is to begin.

(2) A candidate for the certificate shall be required to undertake the courses, and pass any assessment, required.

(3) The progress of a candidate shall be reviewed by the end of each session by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of one academic session from the date of enrolment in the case of a candidate for the certificate. The maximum candidature shall be four sessions from the date of enrolment for the certificate.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate in Sports Medicine (GradDipSpMed)

1. The Graduate Certificate in Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the Certificate shall

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered to be equivalent from another university as considered by the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(b) normally be registered as a medical practitioner in the country (or state thereof) of residence but in exceptional circumstances enrolment may be granted to applicants who are provisionally registered

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the Graduate Certificate shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) A candidate for the Graduate Certificate shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the Graduate Certificate as a part-time candidate until the lapse of two academic sessions. The maximum period for a part-time candidate shall be four academic sessions. In special cases an extension of time may be granted by the Committee.

(5) Articulation: a candidate holding the Graduate Certificate of Sports Medicine from the University of New South Wales who, after the lapse of at least three years, wishes to enrol for the degree of Graduate Diploma or Master of Sports Medicine may, at the discretion of the Course Supervisor in regard to further assessment related to recent developments in the field, be awarded the degree after the successful completion of the additional courses required for the program.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each subject and the satisfactory completion of clinical training in sports medicine.

(2) The Graduate Certificate in Sports Medicine will be awarded after the satisfactory completion of a program of advanced study which has achieved 24 units of credit with satisfactory completion of clinical requirements.

Fees

5. A candidate shall pay fees as may be prescribed from time to time by the Council.
The scholarships listed below are available to students whose courses are listed in this book. Each Faculty Handbook contains in its scholarships section the scholarships available for study in that Faculty. Travel scholarships are shown separately. Applicants should note that the scholarships and their conditions are subject to review and the closing dates for awards may vary from year to year.

Scholarship information is regularly included in the University publication ‘Focus’ and updated on the UNSW Web site: http://www.infonet.unsw.edu.au/academic/scholarships/htoc.htm.

Students investigating study opportunities overseas should also consult “Study Abroad” which is published by UNESCO. The British Council (02 9326 2365) may be of assistance for information about study in Britain. The Australian-American Education Foundation (02 6247 9331) or the U.S. Consulate General Educational Advising Centre (02 9373 9230) can provide information about study in America. Information may also be obtained from the embassy or consulate of the country in which the study is proposed and from the proposed overseas institution. Details of overseas awards and exchanges administered by the Department of Education, Training and Youth Affairs (DETYA) can be obtained from the Awards and Exchanges Section, DEETYA, PO Box 826, Woden, ACT 2606.

KEY

L Students with Australian Citizenship or Permanent Resident status can apply.
I International students can apply.

Postgraduate scholarships for research or coursework are identified with the following codes:

R Available for study by research (normally Masters by Research or PhD).
C Available for study by coursework (normally Masters by Coursework or Graduate Diploma).

The scholarship information is normally provided in the following format:

• Amount
• Duration
• Conditions

Unless otherwise stated, application forms are available from the Scholarships and Student Loans Unit, c/o New South W (Lower Ground Floor, Chancellery). Applications normally become available four to six weeks before the closing date.
Undergraduate Scholarships

Following are details of scholarships available to undergraduate students at UNSW. The scholarships are listed according to the year of study for which the scholarship is available (i.e., scholarships for first year students; scholarships for second or later year students; scholarships for Honours year students) or whether they are available to undertake travel, and then also by Faculty and course (e.g., scholarships in Science and Technology or Engineering). If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

Scholarships for students entering the first year of an undergraduate course

General

The Alumni Association Scholarships (L/L)
• Up to $1,500 pa
• 1 year renewable subject to satisfactory progress
The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of UNSW. Applications close early January.

The AUSIMM Education Endowment Fund (L)
• $2,500-$5,000 pa
• 1 year may be renewable subject to satisfactory progress
The scholarships are open to full-time undergraduate students enrolled in a course leading to the award of a Geoscience, Mining Engineering or Minerals Engineering (Minerals Processing or Extractive Metallurgy) degree related to the interests of the mineral industry. Further information is available from The Australian Institute of Mining and Metallurgy (AUSIMM), PO Box 660, Carlton South VIC 3053, Tel (03) 9662 3166.

The Australian Development Scholarships (ADS) (L)
• Tuition fees, medical cover, airfare and a stipend
• Duration of the course
This award is for international students from selected countries only. Information and applications can only be obtained from Australian Diplomatic Posts or Australian Education Centres in the home country. Applications normally close at least 12 months before the year of study.

The Australian Vietnam Veterans Trust Education Assistance Scheme (L)
• $3,500 pa
• Duration of the course subject to satisfactory progress
The scholarship is available to the children of Vietnam veterans who are aged under 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelor's course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 1240, Tel (02) 9281 7077, Email: vvt@accsoft.com.au. Applications close 31 October.

The Girls Realm Guild Scholarships (L)
• Up to $1,500 pa
• 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
The scholarships are available to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Ian Somervaille Scholarships (L/L)
• Up to $3,000
• 1 year
The scholarships are available to immediate family members (i.e., children, parents, brothers, sisters, spouses, de facto partners) of UNSW staff members. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit.
aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The John Niland Scholarships (L)
- $5,000
- 1 year
The scholarship assists rural students to undertake study at UNSW. Applicants will be students who complete the HSC (or its counterpart matriculation requirement) in the top five percent of their state-wide cohort, having been enrolled at a country high school in Australia. Selection will be based on academic merit, potential to contribute to the wider life of the University and consideration of social and/or economic circumstances which might otherwise hinder successful transition to UNSW. Applications close 30 October.

The Kensington Colleges Scholarships
Further information concerning the awards below is available from The Kensington Colleges, Tel (02) 9315 0000, Fax (02) 9315 0011, Email kenscolleges@unsw.edu.au, Web: http://www.kenscolleges.unsw.edu.au.

The Mathews Scholarship
The scholarship provides $1,500 credit towards accommodation costs and is awarded to a resident at the commencement of the second year of an undergraduate degree. Candidates will be assessed on their academic performance in the first year of their course.

The Access Scholarship
The scholarship provides up to half the accommodation fee for a limited number of first year ACCESS scheme students experiencing long term financial hardship. Nominations are forwarded by the UNSW ACCESS office.

The Malcolm Chaikin Scholarship (L)
- $15,000 pa
- Renewable for the duration of the course subject to satisfactory progress
The scholarship is available to students entering the first year of a Bachelor of Science or Engineering in the Faculties of Life Sciences, Science and Technology, or Engineering. Selection will take into account academic merit and interview performance. Applications close 31 October.

The Matthew James Reid Scholarship (L)
- $1,000
- one year only
The Scholarships are to be awarded to encourage students from interstate to undertake study in an undergraduate degree at UNSW. The Scholarship is available to a student who completed the HSC (or its equivalent) in the previous year. Applicants must normally be resident interstate. Selection will be based on academic merit, demonstrated ability, leadership qualities, and potential to contribute to the wider life of the University and community. Consideration may also be given to circumstances which might otherwise hinder successful transition to UNSW. Applicants will be required to submit a statement detailing their reasons for undertaking the course of study. Applications close 31 January.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
- $16,135 - $23,997 pa (depending on qualifications)
- Up to 3 years
Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience. Consideration will be given to prior knowledge and experience of Aboriginal culture and health. Applications close early August.

The New College Access Scholarship
The scholarship provides up to half of the accommodation fee for a first year ACCESS scheme student selected by the College. Nominations are forwarded by the UNSW ACCESS office. For further information contact New College, Tel (02) 9381 1999, Fax (02) 9381 1919, Email: admissions@newcollege.unsw.edu.au.

The New South Scholarships (L)
- $6,000
- 1 year
The scholarships are available to students commencing the first year of undergraduate study at UNSW in any discipline. Scholarships will be available only to those students who achieved a perfect score in the NSW HSC in the year prior to commencing study. No application form is required.

The Ngunnagan Club Scholarship (L)
- Up to $2,000
- 1 year
The scholarship is available to students enrolled at an Australian country high school who complete the HSC (or its counterpart matriculation requirement) in the top five per cent of their state cohort. Applicants should complete an official application form by 31 October in the year prior to their intended enrolment at UNSW. Final performance in the HSC (or its counterpart matriculation) examination should be reported to the Scholarships and Student Loans Unit once known.

Robert Riley Scholarships (L)
- $5,000
The Scholarships are awarded to promote the pursuit of justice and human rights for Aboriginal Australians through education. Applications will normally close on 30 November of the year preceding the first year of study at UNSW. The scholarships will normally be awarded at the time students are enrolling at UNSW for the first time. Should awards become available later in the year a second selection may be undertaken with a closing date of 30 September of the first year of study at UNSW.

The Harvard Travel Scholarships (L)

• $15,000 contribution towards fees, travel and living expenses
• One-off payment

The scholarship will be awarded by the Vice-Chancellor on the basis of recommendations from the Deans of the Faculties. Candidates must have completed at least 2 years full-time (or the part-time equivalent) of an undergraduate course at the UNSW and have an impressive academic record. Award of the scholarship is subject to the recipient gaining entry to the Harvard-Radcliffe Visiting Undergraduate Program. Applications close mid-November for travel in the following year.

The International Exchange Travel Scholarships (L)

• Up to $1,500
• 1 year

The scholarships were established to encourage UNSW students to participate in the University's formal international exchange programs. Students must be undergraduates embarking on a period of study overseas which will count toward their UNSW degree. Awards will be granted on the basis of academic merit. Further information is available from the International Student Centre, Tel (02) 9385 5333.

Italian Government Scholarships (L)

• 1 million Italian lira per month
• 2-24 months

Scholarships are open to Australian citizens to undertake research and language studies in Italy. Applicants must be aged under 35 years. Further information is available from the Italian Embassy, 12 Grey St, Deakin ACT 2600, Tel (02) 6273 3333, Fax (02) 6273 4223. Applications close early March.

Japan Airlines Scholarships (L)

• Air travel, insurance, tuition, accommodation, textbooks and a daily allowance

The Scholarships are available for undergraduate students to participate in a summer session of Japanese language and cross-cultural studies, home stays in Tokyo and participation at a symposium featuring regional experts. A knowledge of Japanese is not necessary. Further information and applications are available from Level 14, 201 Sussex Street, Sydney NSW 2000, Tel (02) 9272 1151. Applications normally close mid-April.

The Japanese Government (Monbusho) Scholarships (L)

Scholarships are available to Australian Citizens for study in Japan for postgraduate research or five years of undergraduate study. Applicants must be willing to study the Japanese language and receive instruction in Japanese. Further information and applications are available from Monbusho Scholarships, Embassy of Japan, 112 Empire Circuit, Yarralumla ACT 2600, Tel (02) 6272 7268, Fax (02) 6273 1848. Applications close early July.

Learn Arabic in Cairo Scholarship (L,L)

• Course fees, AUD$70 per month living allowance
• 8 months

Scholarships are available to undertake the Arabic as a Foreign Language course in Cairo. Applications are available from the Embassy of the Republic of Egypt, 1 Darwin Avenue, Yarralumla ACT 2600, Tel (02) 6273 4437, Fax (02) 6273 4279. Applications close 1 July.

The Malcolm Chaikin Overseas Exchange Scholarship (L)

• $4,000
• 1 year

A scholarship is available for a third or later year student in a Science or Engineering degree program in the Faculty of Life Sciences, Science and Technology or Engineering. Applicants must have applied for the Malcolm Chaikin Scholarship for 1998 or later, and be undertaking an official overseas exchange program. It is expected that the first scholarship will be awarded for travel in 2000. Applications close 30 September.

The Mitsui Education Foundation Scholarship (L)

A three week scholarship to Japan is available to a young Australian national to help promote goodwill between the two countries. Candidates should be full-time undergraduate students in their first degree course who have not previously been to Japan. The successful student will travel to Japan during November and December. Further information regarding applications and participating institutions is available from info@mitsui.com.au. Application forms close mid-July.
The NSW Travelling Art Scholarship (L)

- $25,000

The scholarship is available to an emerging visual artist to undertake a course of study or training overseas for one or two years. Guidelines and applications are available from the NSW Ministry for the Arts, GPO Box 5341, Sydney 2001, Tel (02) 9228 5533. Applications normally close in July.

Queen's Trust Grants (L)

- Up to $15,000

The Queen's Trust provides grants to Australian Citizens aged 18–28 years, for the pursuit of excellence in their chosen fields. Projects are supported for the advancement of Australian youth, development of community leadership and/or other skills which will be of benefit to Australia. Information and applications may be obtained from the Queen's Trust, Tel 1800 033 625. Applications close late April.

The R.C. Sutton/Jardine Matheson Scholarship (L)

- Up to $1,000

The scholarship is to provide financial assistance to undergraduate students to undertake a period of study/research in the R.C. Sutton/Jardine Matheson offices in Asia. Applicants must be full-time students undertaking study in law, commerce, or economics. Applicants must normally be intending to undertake their final year of study and to complete the travel prior to completion of the final year. Applications are also open to students undertaking an official exchange program with a university in Asia. Further information and application forms are available from the International Student Centre. Applications normally close 31 July in the year prior to the final year of study.

The Rotary Foundation Ambassadorial Scholarships (I,L)

The Rotary Foundation offers scholarships to study or train in another country where Rotary clubs are located. Applicants must have completed at least two years of a university or college course, or have completed high school and have been employed for at least two years. Applicants must also be Citizens of a country in which there is a Rotary club. Information regarding scholarship availability, closing dates and applications should be obtained from the applicant's local Rotary club.

The Russian Scholarships (L)

- Payment of an allowance and medical cover

Scholarships are available to Australian citizens to undertake undergraduate or postgraduate study in journalism, law, economics, international relations or medicine in Russia. Applications normally close in May.

The Ship for World Youth Program (L)

- Economy airfare, accommodation, local trips and meals

Awarded every second year

The objective of this program is to promote understanding and mutual friendship between the youth of Japan and other parts of the world and to foster the spirit of international cooperation. The successful applicants will visit Japan to participate in the program for the period January to March. Students should be aged from 20 to 29, able to participate in the whole program, be in good physical and mental condition, able to speak English and Japanese, have an interest in and an understanding of Japan, and be engaged in youth activities. The next round of scholarships will be available in 2001. Applications close early July 2000.

The Sir Charles Mackerras / Australia-Britain Society Music Scholarship (L)

- 8,000 pounds sterling

The scholarship is open to outstanding young conductors, composers and repetiteurs, aged between 21 and 30 who are likely to be influential leaders in the field of music, to undertake study in the United Kingdom or the Czech republic for at least six months. Applicants must be Australian Citizens or Permanent Residents. Application forms are available from the British Council, PO Box 86, Edgecliff NSW 2027, Tel (02) 9328 2022, Fax (02) 9327 4868, Email bccydney@sprint.com. Applications close early November.

The STA Travel Grant (I,L)

- Up to $3,000

Applications must be undertaking study leading to a degree or diploma of the University and be members of the University Union. The grant is awarded on the basis of significant contribution to the community life of the University involving a leadership role in student affairs and the University Union and the relevance and merit of the proposed travel to the student's academic program or University Union activities. Applications close mid-April.

The Swedish Institute Guest Scholarships (I, L)

- SEK 7,100 per month living allowance

- 9 months (1 academic year)

The scholarships are open to students and researchers who wish to travel to Sweden for study or research which cannot equally well be pursued in countries other than Sweden. Applicants must establish contact with a Swedish University willing to accept the applicant for the proposed studies. Initial requests for application forms must be made in writing, and should include the applicant's name and address, nationality, educational background, work experience, knowledge of any languages, statement of the purpose of the study or research in Sweden, and a copy of a letter of invitation from a Swedish University Department. Applications are available from the Swedish Institute, Department for Exchanges in Education and Research, Box 7434, SE-103 91, Stockholm, Sweden. Email: grantinfo@si.se. Web: http://www.si.se. Requests for application forms must reach the Swedish Institute before 1 December.

Swiss Government Scholarships (L)

- Tuition fees, living allowance, medical insurance and assistance with airfares

- 1 academic year

One scholarship is available for art/music and two for other disciplines, to undertake postgraduate study or attend an art school/conservatory in Switzerland. Applicants will be required to pass a language test in German or French. Applicants must be aged under 35. Applications close 30 November.

The Turkish Government Language & Culture and Higher Education Scholarships (I,L)

Scholarships are available to high school graduates to undertake study at a Turkish University. Students may be required to undertake a one year Turkish language course before commencement of the degree. The scholarships pay a monthly allowance for the duration of the course. Scholarships are also available to university graduates who would like to attend Turkish Language and Culture Summer Courses conducted by the Turkish Studies Centre. Further information is available from the Embassy of the Republic of Turkey, 60 Mugga Way, Red Hill ACT 2603. Applications close 30 May for Language and Culture Scholarships, and 15 July for Higher Education Scholarships.
Yokoyama Scholarship Awards (L)

Assistance may be available for undergraduate and postgraduate study at a Japanese University.

Information is available from Mr Masao Iwashita, Secretary-General, Yokoyama Scholarship Foundation, 6F Shiozaki Building, 2-7-1 Hirakawacho, Chiyoda-Ku, Tokyo 102 Japan, Tel (813) 3238 2913, Fax (813) 5275 1677.

Vacation Scholarships

Some Schools offer scholarships for the long vacation period from December to February each year. Students should contact the relevant School office for information.

General

• Up to $900
• 6 to 8 weeks

The scholarships are open to undergraduate students who have completed at least one year of full-time study in Medicine or a course related to Biological Science. The proposed research project must be related to the kidney and the urinary tract, and carried out at a university department during the summer vacation period. Applications are available from the Medical Director's Office, Australian Kidney Foundation, GPO Box 9993, Adelaide SA 5001, Tel (08) 8267 4555, Fax (08) 8267 4450, Email: m.romeo@unsw.edu.au. Applications close 15 September.

ANU Summer Research Scholarships (L,L)

• $130 per week, plus full board and travel
• 8-12 weeks

Scholarships are offered to undergraduate students for short research projects in Physics, Chemistry, Astronomy, Biological Sciences, Computer Sciences, Engineering, Medical Sciences, Earth Sciences, Pacific and Asian Studies, Social Sciences and Environmental Sciences, at the Institute of Advanced Studies, ANU. Further information and applications are available from Anna Weidemann, Summer Research Scholarship Program, The Australian National University, Canberra ACT 0200, Tel (02) 6249 3785, Fax (02) 6249 5995, Email: schlsec@rsc.anu.edu.au. Applications close late August.

Cooperative Research Centre for Food Industry Innovation Vacation Scholarships (L,L)

• Up to $2000
• 8 to 12 weeks between November and March

The scholarships are open to final year undergraduate students enrolled in courses in one or more of the following disciplines: biochemistry, biotechnology, bioprocess engineering, chemistry, food science, food technology, immunology, microbiology, or molecular biology. Research projects must be related to one of the research programs of the CRC. Application Kits are available from September, and further information is available from Ms M Romeo, Education Officer, CRC for Food Industry Innovation, c/- Department of Biotechnology, UNSW, Sydney NSW 2052, Tel (02) 9385 1298, Fax (02) 9385 1015, Email: m.romeo@unsw.edu.au. Applications close early October.

The CSIRO Division of Marine Research Vacation Scholarships (L,L)

• Up to $450 per week plus travel expenses
• 8 weeks between December and February

Applicants must be full-time undergraduate students who have completed not less than three years of their course. Research projects will be undertaken with the CSIRO Division of Marine Research at either Hobart, Cleveland or Marmion. Applications close early September.

The CSIRO Vacation Scholarships (L,L)

• $420 per week
• 8 to 12 weeks between December and February

The scholarships are open to postgraduate and undergraduate students who have completed no less than three years of a full-time course in Physics, Mathematics, Computer Science, Electrical Engineering, or a closely allied subject. Research projects are carried out under the individual supervision of a research engineer or scientist. Applications are available on the web at http://www.atnf.csiro.au/educate/summer_vacation.html. Applications close early August.

The Dried Fruits Research and Development Council (DFRDC) Studentships (L,L)

• Up to $3,000 for Studentships, up to $1,000 for Student Awards

The Studentships assist students to undertake research projects during the summer vacation period. Further information and applications are available from the Executive Officer, Dried Fruits Research and Development Council, Box 1142, Mildura Vic 3502, Tel (050) 221515, Fax (050) 233321. Applications close 15 October.

The Heart Foundation Vacation Scholarships

Scholarships are available during the long vacation period for research projects related to cardiovascular function and disease. Applicants should normally have completed at least two years of

Faculty Travel

Faculty of Medicine

John Hirshman International Health Scholarship (L,L)

• Up to $1,000

The scholarship provides assistance to a final year student undertaking MFAC 6001 Elective Term, to travel to a developing county for international health experience. Application forms and further information are available from the School of Community Medicine, Tel (02) 9386 2520.
an appropriate degree course in the biological sciences. Preference will be given to applicants who have had little or no laboratory experience. Applications close early September.

Medical School Vacation Scholarship Scheme - John Flynn Scholarships

- $2,500 pa to cover travel, accommodation, mentor's honorarium, host practice costs, student stipend
- Two weeks per year for up to four years

Scholarships are available to undergraduate medical students to take up vacation placements in rural and remote communities, country towns or regional centres. Placements may be with a general practitioner, rural hospital, rural/remote Aboriginal Medical Service, or a combination of these. Further information may be obtained by telephoning 1800 801 454.

The Novo Nordisk Student Research Scholarship (L)

- $1,000 to $1,500
- 6 to 9 weeks over the vacation period

The scholarship is available for diabetes-related research at the Department of Endocrinology, Prince of Wales Hospital and is open to students enrolled at any tertiary institution in Australia. Preference will, however, be given to students enrolled in an undergraduate degree in Science or Medicine at UNSW. Selection will be based on interest in research in diabetes mellitus and academic performance. Further information is available from Associate Professor Bernie Tuch, Prince of Wales Hospital, Tel (02) 9382 4814. Applications close 31 October.

The National Multiple Sclerosis Society of Australia Summer Vacation Scholarships (L)

- $200 per week
- 6 to 8 weeks between November and March

The scholarships are open to undergraduate students completing three or four years of a full-time course leading to an honours degree in medicine, science, or the biological or health sciences. Research projects must be relevant to multiple sclerosis and carried out at a university department during the summer vacation period. Applications close mid-August.
Postgraduate Scholarships

Following are details of scholarships available to postgraduate students at UNSW. The scholarships are listed by Faculty and course (eg scholarships in Science and Technology or Engineering) or whether they are available to undertake travel. If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

General Scholarships

Main programs of assistance for postgraduate study

The Australian Postgraduate Awards (APA) (L,R)
- $16,135 pa (1999 rate). Other allowances may also be paid.
- Up to 2 years for a Masters by Research, 3 years for a PhD degree. PhD students may apply for up to 6 months extension in certain circumstances
Applicants must have graduated, or be proposing to graduate in the current academic year, with Honours 1 or equivalent. Students with Permanent Resident status should normally have lived in Australia continuously for 12 months. Applications close 29 October.

The Australian Development Scholarship (ADS) (I)
- Tuition fees, medical cover, airfare and a stipend.
- Duration of the course
This award is for international students from selected countries only. Information and applications can only be obtained from Australian Diplomatic Posts or Australian Education Centres in the home country. Applications normally close at least 12 months before the year of study.

The International Postgraduate Research Scholarships (IPRS) (I,R)
- Tuition fees and medical cover only
- 2 years for a Masters by Research, 3 years for a PhD degree
Eligibility is confined to postgraduate research students who are Citizens of countries other than Australia or New Zealand. Applications close 30 September.

Other General Scholarships

Indigenous Researchers Development Scheme (L,R)
- At least $3,000
- Up to 3 years
The Scholarships are awarded to support research projects by Aboriginal and Torres Strait Islander researchers in the biological, mathematical, physical, chemical, engineering, earth and applied sciences and the humanities and social sciences, which are likely to lead to a significant conceptual advance in understanding of a subject or lead to the solution of an important practical problem. Further information and applications are available from the Research Office, UNSW, Tel (02) 9385 1074 or the Research Office Web site: http://www.ro.unsw.edu.au. Applications close mid-June.
The Australian Coral Reef Society (ACRS) Inc Student Grants (I,L,R,C)
- $1,000 (plus $1,500 Walker prize for the best proposal)
The grant is open to students who are enrolled at an Australian University in a PhD or MSc involving research on coral reefs. Recipients must be a member of, or willing to join the ACRS. Applications normally close late November.

Australian Food Industry Science Centre (AFISC) Scholarships (I,L,R)
- $25,000 pa plus allowances
- Up to 2 years for a Masters by Research, 3 years for a PhD
It is expected that applicants will be of Honours 1 or high 2A standard or equivalent. Graduates from non-food technology disciplines, such as engineering, mathematics and physics, are also encouraged to apply. Further information and applications are available from AFISC Private Bag 16, Sneydes Road, Werribee VIC 3030, Tel(03) 9742 0111. Applications close early November.

The Australian Federation of University Women (I,L,R,C)
Each year the Federation offers to its members a number of awards for study in Australia and overseas. Details of awards are included in a booklet available from the Australian Federation of University Women Inc, 215 Clarence Street, Sydney NSW 2000, Tel (02) 9299 9888.

The Australian Institute of Nuclear Science and Engineering (AINSE) Postgraduate Research Awards (I,L,R)
- $7,500 supplement to an APA or equivalent scholarship and $5,500 pa for facility costs plus allowances
- Up to 3 years
The Institute offers awards for postgraduate students whose research projects are associated with nuclear science or its applications. Applicants must be eligible for an APA or equivalent scholarship after having completed a Bachelor of Engineering or Bachelor of Science with Honours. At least one month per year must be spent at the Institute at Lucas Heights, NSW. Applications close early December.

The Australian Kidney Foundation Grants and Scholarships (I,L,R)
The AKF supports research into the causes, prevention and treatment of disorders of the kidneys and urinary tract. Programs include Medical Research Seeding Grants, Medical Research Equipment Grants, Biomedical Research Scholarships and Summer Vacation Scholarships. Applications are available from the Medical Director's Office, Australian Kidney Foundation, GPO Box 9993, Adelaide SA 5001, Tel (08) 8267 4555, Fax (08) 8267 4450, Email: taylor@terra.net.au. Applications close 30 June.

The Australian and New Zealand Council for the Care of Animals in Research and Teaching (ANZCCART) Student Award (I,L,R,C)
- $1,000 for attendance at the annual conference
Applicants can be postgraduate students from any discipline. The award provides assistance for a student to attend the annual conference. Applications are available from ANZCCART, PO Box 19, Glen Osmond, SA, 5064, Tel (08) 303 7325. Applications close in July.

The Australian Pain Relief Association and Australian Pain Society PhD Scholarship (L,R)
- $16,750 pa plus allowances
- Up to 3 years subject to satisfactory progress
Applicants must hold an Honours 1 degree and be proposing to undertake a PhD in the mechanism, diagnosis, treatment or epidemiological features of acute or chronic (including cancer) pain. Further information and applications are available from the Australian Pain Society Secretariat, PO Box 629, Willoughby NSW 2068, Tel (02) 9439 6744. The award is offered bi-annually. Applications close early November.

The Australian Society for Microbiology (L,R,C)
- $100 - $10,000
The Australian Society for Microbiology (ASM) provides prizes and awards, for study, research and projects related to Microbiology. More information can be obtained from the ASM National Office, Unit 23/20 Commercial Rd, Melbourne VIC 3004, Tel (03) 9867 8699, Fax (03) 9867 8699.

The Australian Spinal Research Foundation Postgraduate Research Awards (I,L,R)
- Equivalent to Australian Postgraduate Award (see APA entry under General)
- Up to 2 years for a Masters by Research or 3 years for a PhD degree
Applicants must be undertaking a Masters by Research or PhD in an area designed to contribute to an understanding of the anatomical and physiological mechanisms underlying chiropractic care or the clinical efficiency of chiropractic care and management procedures. Information and applications are available from the Australian Spinal Research Foundation, PO Box 1047, Springwood QLD 4127, Tel (07) 3808 4098, Fax (07) 3808 8108, Email: t.flack@qut.edu.au. Applications close mid-October.

The Captain Reg Saunders Scholarship (L,R,C)
- $3,000
- Up to 4 years
Applicants must be Aboriginals or Torres Strait Islanders eligible to commence a university degree in the area of psychology, nursing, applied science, social work or education. Further information and applications are available from the Aboriginal Education Program, UNSW, Tel (02) 9385 3805.

The Community Health and Anti-Tuberculosis Association - The Harry Windsor Biomedical and Medical Research Scholarship (L,R)
- $23,997 pa (Medical postgraduates), $16,135 (Biomedical Science graduates) plus allowances
- Up to 3 years
Applicants must be proposing to undertake full-time postgraduate medical research in the areas of tuberculosis, respiratory disease (particularly community aspects) or the health of disadvantaged people. Only original application forms will be accepted and are available from The Executive Officer, Community Health and Anti-Tuberculosis Association, PO Box 200, Rose Bay, NSW 2029, Fax (02) 9371 9768. Applications close 1 August.

The Cooperative Research Centre for Eye Research and Technology (CRCERT) Postgraduate Research Scholarship (I,L,R)
- $15,321 - $19,827 pa (depending on the type of research)
- 3 years
The scholarship is available for full-time PhD studies in subjects such as optometry, microbiology, biochemistry, optics, materials
The Clean Air Society of Australia and New Zealand Inc Postgraduate Research Award (L,R,C)
- $5,000 pa
- 1 year, with a possible 1 year extension
The scholarship is open to students enrolled in a Masters degree program with a significant research component connected with air quality. Applications close early February.

The CSIRO Division of Fisheries Supplementary PhD Awards (L,R)
- $10,000 pa
- Up to 3 years
This scholarship is a supplement to any primary scholarship (eg APA) for PhD study in marine sciences, environmental studies, zoology, botany, broadly-based life sciences, economics and mathematics. Applications close early March.

The Dairy Research and Development Corporation (DRDC) Postgraduate Scholarships and Study Awards (L,R)
Awards to undertake full-time postgraduate research degrees are available in a wide range of disciplines including dairy manufacturing, farm research, economics and marketing, and agricultural extension. New and experienced applicants are welcome to apply. Guidelines and applications are available from the Scholarships and Student Loans Unit or DRDC, Level 3, 64 William Street, Melbourne VIC 3000, Tel (03) 9602 5300. Applications close 31 October.

The Forest and Wood Products Research and Development Corporation (FWPRDC) Scholarships (L,R)
- Up to $25,000 pa
- Up to 3 years
The scholarships are open to students undertaking a postgraduate research degree at an Australian University. Selection is based on academic merit and the relevance of the project to FWPRDC Programs. Further information and applications are available from the Executive Director, FWPRDC, PO Box 157, Bond University Old 4229, Fax (07) 5578 7911. Applications close 31 October.

The Garnett Passe and Rodney Williams Memorial Foundation Research Scholarships in Otolaryngology (L,R)
- $15,364 pa for science graduates, $22,850 pa for medical graduates, plus allowances
- 3 years
The scholarships are available to medical or science graduates for research in Otolaryngology or in related fields of biomedical science. Applicants must be enrolled in a postgraduate degree in Australia or New Zealand. Information and applications are available from the Garnett Passe and Rodney Williams Memorial Foundation, Pelham House, 165 Bouverie St, Carlton VIC 3053, Tel (03) 9349 2622, Fax (03) 9349 2615. Applications normally close in August.

The Gerontology Foundation Grant-In-Aid (L,R,C)
- Up to $5,000 for a specific research project
Grants-In-Aid are awarded to students who have not had their work published in a refereed journal and who have not won any research grants in open competition. The grant supports a proposed scientific investigation topic specified by the Foundation. Information and applications are available from The Executive Officer, Gerontology Foundation of Australia Inc, PO Box 199, Annandale NSW 2038. Applications normally close late July.

The Gowrie Scholarship Trust Fund (L,R)
- $4,000 pa
- 2 years
Applicants must be members of the Forces or children (or grandchildren or lineal descendants) of members of the Forces who were on active service during the 1939-45 War. Tenable at tertiary institutions in Australia and overseas. Applications close early October.

The Grains Research and Development Corporation (GRDC) Junior Research Fellowship (L,R)
- $21,000 pa plus up to $3,000 to the supporting institution, some conference/workshop attendance allowances
- Up to 3 years
Applicants must be undertaking full-time PhD studies in fields of high priority to the grains industry. Applications close mid-October.

The Great Barrier Reef Marine Park Authority Research Support (L,R)
- $1,000
Applicants must be undertaking a full-time Masters or PhD research project that could contribute to planning and managing the Great Barrier Reef Marine Park and to the Reef's ecologically sustainable development. Applications and further information may be obtained from the Executive Officer, Great Barrier Reef Marine Park Authority, PO Box 1379, Townsville QLD 4810. Applications close mid December.

The Harold G. Conde Memorial Fellowship (L,R,C)
- $5,000 pa subject to the availability of funds
- Up to 3 years
Applicants should be honours graduates. The Fellowship is a supplementary award to be held in conjunction with another scholarship and is for postgraduate study or research in a field related to the electricity industry. Applications close early April.

The Julian Small Foundation Annual Research Grant (L,R)
- Up to $5,000
Applications are open to postgraduate and undergraduate students undertaking research and involved in the study of law, or industrial relations. Selection will be based on a research proposal which outlines how the research will advance thinking and practice in the area of employment law and industrial relations in Australia. Applications close mid-August.

The June Opie Fellowship (L,R,C)
- NZD$12,000
- 1 year
The award is administered by the University of Auckland and is available to Citizens and Permanent Residents of Australia, Canada and New Zealand, and is designed as an incentive for students of high academic achievement who have a severe disability. It is primarily intended for those who plan to undertake postgraduate study with a view to preparing themselves for a role in the professions, in politics or more particularly in university teaching and research and who have disability issues as a continuing interest. Applications close with the University of Auckland in late October.
Land and Water Resources Research and Development Corporation (LWRRDC) Postgraduate Research Scholarships (L,R)
- $20,000 pa plus $5,000 for operating expenses
- 2 years for Masters, 3 years for a PhD degree

General Research Scholarships are available for research that will lead to better management, sustainable use and conservation of land, water and vegetation resources in Australia. Irrigation Research Scholarships are specifically available for research that will lead to better management, sustainable use and conservation of natural resources in Australia. Applications are available from the Scholarships and Student Loans Unit or LWRRDC, GPO Box 2182, Canberra ACT 2601, Tel (02) 62573379. Applications close early October.

The Lionel Murphy Postgraduate Scholarship (L,R,C)
- $15,000 pa for study in Australia, up to $30,000 for study overseas
- 1 year

Applications must be intending to undertake a postgraduate degree in Law, Science, Legal Studies or other appropriate discipline. Preference will be given to applicants who propose to study the law and legal system in a social context, science/law or international law. - Airfare, living allowance, tuition fees
- 3 to 6 months
The scholarship is tenable for postgraduate research in the United Kingdom. Candidates should be undertaking a postgraduate qualification in a science-based discipline, preferably in the practical application of special chemicals. Applications are available from the Secretary, Sir Robert Menzies Centre for Australian Studies, University of London, 28 Russell Square, London, WC1B 5DS, UK, Tel +44 171 580 5876, Fax +44 171 580 9627, Email: mcintyre@sas.ac.uk. Applications close early November.

Learn Arabic in Cairo Scholarship (L,R,C)
- Course fees, AU$70 per month living allowance
- 8 months
Scholarships are available to undertake the Arabic as a Foreign Language course in Cairo. Applications are available from the Embassy of the Republic of Egypt, 1 Darwin Avenue, Yarralumla ACT 2600, Tel (02) 6273 4437, Fax (02) 6273 4279. Applications close 1 July.
The Lionel Murphy Postgraduate Scholarship (L,R,C)

- $15,000 pa for study in Australia, up to $30,000 for study overseas
- 1 year

Applicants must be intending to undertake a postgraduate degree in Law, Science, Legal Studies or other appropriate discipline. Preference will be given to applicants who are proposing studying the law and legal system in a social context, science/law or international law. Information and application forms are available from the Lionel Murphy Foundation, GPO Box 4545, Sydney NSW 2001, Tel (02) 9223 5151, Fax (02) 9223 5267. Applications close mid-September.

The Lloyd's Register of Shipping Chevening Scholarship (L,R,C)

- Tuition fees, maintenance allowance, airfare
- 1 year

Two scholarships are available to graduates with proven academic merit and leadership potential, to pursue a postgraduate course at a British University. One scholarship is for a one-year MSc course in Marine Engineering/Naval Architecture, and the other is for a one-year MSc course in Environmental Sciences. Applicants must hold, or expect to complete before October, an Honours 1 or 2/1 degree. Application forms are available from the British Council, PO Box 86, Edgecliff NSW 2027, Tel (02) 9326 2022, Fax (02) 9327 4868. Applications close late October.

The Meat Research Corporation (MRC) Studentships and Junior Research Fellowships (L,R,C)

- $15,888 pa for study in a Masters or Diploma, $20,000 for a PhD in Australia or US$17,500 for study overseas, plus airfares, insurance and allowances
- 2 years for Studentships (Masters or Diploma), 3 years for Junior Research Fellowships (PhD)

Applicants should be proposing to undertake research in disciplines relevant to the Australian meat and livestock industry. Applications normally close late September.

The Menzies Scholarships (L,R,C)

The Menzies Scholarships are intended to provide funds for Australian Citizens (aged 21 to 45) who wish to travel to Britain to undertake a course of research and to write a paper on a subject of concern and importance to the relationship between the Australian and British communities. Tertiary qualifications are preferred but the awards are not restricted to graduates or students. Information and applications are available from the Australia-Britain Society, PO Box 5341, Sydney NSW 2000, Tel (02) 223 5244. Applications normally close October.

Nanyang Technological University Singapore Research Scholarships (L,R)

- Tuition fees plus S$1,400-S$1,500 per month allowance
- 2 years for a Masters, 3 years for a PhD degree

Research scholarships are available to graduates with good Honours degrees to undertake postgraduate study. Information and application forms are available from The Registrar, Nanyang Technological University. Email: gleong@ntu.edu.sg, Fax: +65 7911604.

The Oxford Nuffield Medical Fellowship (L,R)

- Between 27,525 and 31,945 pounds sterling pa (subject to tax), plus travel expenses
- 2 years with a possible one year extension

The awards are available for research in a clinical medicine or medical science department of the University of Oxford. The appointee is required to return to Australia for at least 3 years to perform work similar to that carried out in the United Kingdom during the tenure of the Nuffield fellowship. Further information is available from Australian Academy of Science, GPO Box 783, Canberra City ACT 2601, Tel (02) 6247 5777, Fax (02) 6237 4620. Applications close mid-March.

Overseas Research Students Awards Scheme (United Kingdom) (L,R)

- Difference in tuition fees for a 'home' and an 'overseas' student

The ORS Scheme provides partial remission of tuition fees to overseas students of outstanding merit and research potential. The awards are open to graduates who will be commencing full-time research studies at a participating institution in the United Kingdom, and who will be liable to pay tuition fees at the overseas student rate. Information and applications must be obtained directly from the Registrar or Secretary of the institution students are applying to in the United Kingdom. Applications normally close in April in the year of tenure.

Queen's Trust Grants (L)

- Up to $15,000

The Queen's Trust provides grants to Australian Citizens aged 18-28 years, for the pursuit of excellence in their chosen fields. Support is provided for projects studying the advancement of Australian youth, development of community leadership and/or other skills which will be of benefit to Australia. Information and applications may be obtained from the Queen's Trust, Tel 1800 033 625. Applications close in late April.

The Rhodes Scholarship (L,R,C)

- Tuition fees, assistance with travel expenses, up to $17,500 allowance
- 2 years, with a possible one year extension

The scholarship is tenable for postgraduate study at Oxford University. Applicants must be aged between 19 and 25 and have an honours degree or equivalent. Selection for the scholarship will be based on academic and personal achievements and community spirit. Further information is available on the Rhodes home page http://www.usyd.edu.au/su/rhodes. Applications close 1 September.

The Robert Gordon Menzies Scholarship to Harvard (L,R,C)

- Up to $25,000 towards tuition fees, living expenses or travel costs (students who enrol in the Harvard Business School may be eligible for an additional $12,000)
- 1 year

The scholarships are tenable at one of the Harvard University graduate schools. Applicants must be an Honours graduate of an Australian university who intend to return to Australia after studies at Harvard or to represent Australia overseas. Applicants must be eligible for, and have applied for admission to a degree program in a graduate school of Harvard University. The scholarships are awarded on the basis of academic excellence and personal qualities such as leadership and public duty. Applications and additional information may be obtained from the Administrative Officer, Council and Board Secretariat, ANU, Canberra ACT 0200. Fax (02) 6279 8524, Email: cabs.admin@anu.edu.au, Website: http://www.anu.edu.au/cabs/scholarships. Applications close at the end of December.
The Swedish Institute before 1 December.

Web site: http://www.si.se

Applications close early November.

The Yoshiyama Scholarship Foundation, 6F Shiozaki Building, 2-7-1 Hirakawacho, Chiyoda-Ku, Tokyo 102 Japan, Tel (813) 3238 2913, Fax (813) 5275 1677.

POSTGRADUATE SCHOLARSHIPS 157
Prizes

The following information summarises prizes awarded by the University. Prizes are grouped by level as follows: Undergraduate, common Undergraduate/Postgraduate, Postgraduate. Within these groups prizes are listed under the faculty, school or department in which they are awarded. Prizes which are not specific to any school are listed under General. Law prizes are awarded only for students enrolled in the LLB or Jurisprudence programs. Information regarding the establishment of new prizes may be obtained from the Student Information and Systems Office.

Prize information is normally provided in the following format:

- Prize value
- Conditions

Undergraduate Prizes

The University Of New South Wales
General Category for Prizes

The Heinz Harant Challenge Prize
- $1000 (bi-annual prize)
  For an original piece of assessable work submitted in the course of completing a General Education course

- $400 and a bronze medal
  For leadership in student affairs combined with marked academic proficiency by a graduand

The UNSW Human Rights Essay Prize
- $400
  For the best research essay on a Human Rights topic by a student enrolled at the University of New South Wales proceeding to a Bachelor degree

Faculty of Medicine

The Australian and New Zealand College of Anaesthetists Prize
- $500
  For the best performance by a final year student in the anaesthesia module of the clinical curriculum in the Bachelor of Medicine Bachelor of Surgery degree program

The Australian College of Occupational Medicine Prize
- $200
  For the best essay/topic in the field of Occupational Health and Safety, Occupational Disease and Injury or Occupational Medicine

The Combined Teaching Hospitals Senior Staff Prize
- $500
  For the best performance in the clinical years of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Foundation Year Graduates Medal
- A Silver medal
  For leadership and fellowship as a medical undergraduate by a student who has completed the final year of the medical program

The Graduation Prize in Surgery
- $100
  For the best performance in the surgery components of MDSG4001 Integrated Clinical and Community Studies and MDSG6001
Integrated Clinical Studies 6 in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Royal Australian College of Ophthalmologists Prize
- $250 and a medal
For the best essay in an ophthalmological course in Year 5 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or Year 6 of program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Wallace Wurth Prize
- $200
For the best overall performance in a graduating year in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The W G Tellesson Memorial Prize
- $150
For the best performance in MDSG3001 Clinical Studies in Year 3 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or Year 4 of program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Anatomy

The Dami Atapattu Prize
- $100
For the best performance in Year 1 Anatomy (ANAT1006) in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Jane Skillen Prize in Anatomy
- $250
For the highest average mark in any three Year 3 Anatomy courses by a graduand in the Bachelor of Science degree program with a major in Anatomy

The Maurice (Toby) Arnold Prize
- $100
For the highest mark in Anatomy (including all sub-disciplines) in Year 2 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Paxinos & Watson Prize
- $200
For the best performance in ANAT3411 Neuroanatomy 1 in the Bachelor of Science degree program

The Prize in Practical Anatomy
- $200
For the best performance in Practical Anatomy (including Radiological Anatomy) in Year 2 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Winifred Dickes Rost Prize
- $100
For outstanding merit in Anatomy in the final year of the Bachelor of Science degree program

Schools of Anatomy, Physiology and Pharmacology and Psychology

The Istvan Tork Prize in Neuroscience
- $100
For the best performance by a Year 4 Honours student who completed a thesis in the field of Neuroscience in the Schools of Psychology or Anatomy or Physiology and Pharmacology

School of Community Medicine

The 2/5 Australian General Hospital Association Prize
- $200 and a plaque
For the best performance in Community Medicine in Year 5 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, or Year 6 of program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Australian Medical Association Prize for General Practice
- $300
For the best report based on the period of attachment in general practice

The Department of Health, Rural General Practice Prize
- $500
For the best essay written in the area of rural general practice by a Year 5 student in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or a Year 6 student in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Georgouras Prize in Dermatology
- $100
For the best performance in a special written examination in MFAC5001 Geriatrics/General Practice/Subspecialties specialising...
in Dermatology in Year 5 of the Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery program

The NSW Department of Health Prize
• $500
For the best performance in the Community Medicine component of MDSG4001 Integrated Clinical and Community Studies in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The United Medical Protection Prize in Health Law and Ethics
• $500
For the best performance in the ethics section of PSYC2101 Human Behaviour (40%) and CMED3001 Medical Ethics and Health Law (60%)

School of Obstetrics and Gynaecology

The Gordon Lowe Memorial Prize
• $150
For the best performance in OBST5001 Obstetrics and Gynaecology in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Royal Hospital for Women Senior Medical Staff Prize
• $100
For the best performance in OBST5001 Obstetrics and Gynaecology at the Royal Hospital for Women in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Pathology

The G R Cameron Memorial Prize
• $200
For the highest aggregate mark in the Pathology component of PATH3101 Pathology in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Hampson Sugerman Prize for Experimental Pathology
• $1000
For the most proficient research work done in Basic or Applied Pathology in program 3831 Bachelor of Science (Medicine) Honours

The Hampson Sugerman Prize in Clinical Pathology
• $1000
For the best performance in a combination of PATH3101 Pathology and MDSG4001 Integrated Clinical and Community Studies by a student in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Physiology and Pharmacology

The D I McCloskey Prize for Physiology/Pharmacology Honours
• $100
For the best performance in PHPH4218 Physiology 4 Honours or PHPH4258 Pharmacology Honours in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery in the Faculty of Medicine or program 3970 Bachelor of Science in the Board of Studies in Science and Mathematics

The D N Wade Prize for Medical Pharmacology
• $100
For the best performance in PHPH3055 Medical Pharmacology in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery
The Doerenkamp-Zbinden Prize in Pharmacology

- $100
For the highest aggregate in PHPH3152 Pharmacology in the Bachelor of Science degree program

The F C Courtice Prize

- $100
For the best performance in PHPH2018 Medical Physiology 1 in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The W E Glover Prize For Physiology

- $100
For the best performance in PHPH3014 Medical Physiology 2 in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Psychiatry

The David Jeremy Keen Memorial Prize

- $50
For the best performance in PSCY2101 Human Behaviour in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or in PSCY2201 Human Behaviour in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

The John Kerridge Memorial Prize

- $100
For the best performance in Psychiatry in the final year of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The F C Courtice Prize

- $100
For the best overall performance in Level III Physiology in a Bachelor degree program

The School of Physiology and Pharmacology Staff Prize For Medical Biology

- $100
For the best performance in PHPH1004 Biology for Medical Students in Year 1 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The School of Physiology and Pharmacology Staff Prize for Physiology 1 or Principles of Physiology

- $100
For the best performance in PHPH2112 Physiology 1 or PHPH2122 Principles of Physiology in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery
Postgraduate Prizes

School of Community Medicine

The John Hirshman International Health Prize
• $200
For the best performance in CMED9605 Health in Developing Countries in the Master of Community Health or Master of Public Health degree program

The John Hirshman Prize in Community Health
• $200
For the best overall performance in the Master of Community Health degree program

The Australian College of Health Service Executives Prize
• $200
For the best combined performance in the two core Management courses in the Master of Health Administration degree program

The Hunt and Hunt Health Law I Prize
• $200
For the best performance in HEAL9331 Health Related Law and Jurisprudence by an internal or external student studying in Australia, in the Master of Health Planning, Master of Health Administration or Master of Public Health degree program

School of Health Services Management

The 2/5 Australian General Hospital Association Prize
• $200 and a plaque
For the best overall performance in the Master of Health Administration or Master of Health Planning degree program

The 2/5 Australian General Hospital Association Prize in Health Services Management (Nursing)
• $200 and a plaque
For general proficiency throughout the Master of Health Administration or Master of Health Planning degree program by a trained nurse registered in Australia

School of Obstetrics and Gynaecology

The Pharmacia & Upjohn Prize in Obstetrics and Gynaecology
• $125
For the best performance in the Obstetrics and Gynaecology term by a student at Liverpool Hospital
The University of New South Wales • Kensington Campus
