Message to New Students from the Dean

It is my pleasure to welcome you to the Faculty of Medicine at the University of New South Wales. My colleagues from the Faculty and I are delighted that you have chosen to begin your professional career with us and we congratulate you upon gaining entry to the undergraduate medical course.

You are joining a University community which has depth and breadth in academic enterprise and social opportunity. The University of New South Wales is a robust institution with traditions of educational and investigative excellence coupled with the vitality of an energetic faculty and administration. I encourage you to explore fully the opportunities available to you as you enter our scholarly community. You are joining us at a time of unprecedented change in higher education and health care delivery. Despite considerable turmoil in the financing of both tertiary education and health care delivery throughout the world, the need for excellence in clinical education, biomedical research and teaching remains a clarion call for institutions of higher learning throughout the globe - a call to prevail in their quest to succeed in preparing the next generation of medical professionals. At the University of New South Wales, we look forward to working with you during your time with us as, together, we confront the challenges ahead and turn them into opportunities.

This Faculty takes pride in the values through which we operate:

- We build on the strong foundation laid over the decades since the founding of this Faculty.
- We strive to discover that which is true not simply what is most likely.
- We seek what is best not simply what is possible.
- We aim for durability not expediency.
- We will be worthy of the trust which society places in us to lead in education, research, clinical care and advocacy.

Your medical education will be a series of counterpoints - outward exhaltation and reflective contemplation, energy and fatigue, didactic learning and enquiry-driven self study. All these and many more experiences await you as you explore the space between the science and art of medicine. A talented faculty and dedicated administrative staff stand ready to assist you.

The Faculty also provides a diverse array of opportunities for science students as well as postgraduate students. Postgraduate programs are offered by both coursework and research. There are many excellent opportunities in these areas throughout the Faculty.

I bid you welcome again and look forward to the many crossings of our paths as you begin your journey with us at the University of New South Wales.

S Bruce Dowton
Dean
Faculty of Medicine
Units of Credit

Please note that all courses are measured in whole units of credit. The normal workload expectations are 25 - 30 hours per semester for each unit of credit, including class contact hours, preparation and time spent on all assessable work. A full time enrolment for one year is defined as 48 units of credit (24 per semester). A course has the same unit of credit value and generates the same load for HECS and fees irrespective of the program or stage in which it is taken.
The academic year is divided into two sessions, each containing 14 weeks for teaching. Between the two sessions there is a break of approximately six weeks, which includes a one-week study period, two weeks for examinations, and three weeks recess. There is also a short recess of one week within each session. Session 1 commences on the Monday nearest 1 March.

The Faculty of Medicine is undergoing some reorganisation in late 2000. At the time of going to press the Council is reviewing recommendations from the Faculty Board that several Schools amalgamate. Details will be published on the Faculty WWW site and in subsequent editions of the Handbook.
This Handbook is divided into two main sections comprising undergraduate study and postgraduate study. Read the opening sections of the handbook first, and then read the information relevant to your selected course, undergraduate or postgraduate as appropriate. Detailed information on each subject can then be found under Course Descriptions, which provides full details of course content, contacts and session/prerequisite details.

Information Key

The following key provides a guide to abbreviations used in this book:

<table>
<thead>
<tr>
<th>Abbreviation</th>

IMPORTANT: As changes may be made to information provided in this handbook, students should frequently consult the noticeboards of the schools and the official noticeboards of the University.
Some People Who Can Help You

If you require advice about enrolment, degree requirements, progression within programs or with any other general Faculty matter, contact one of the following people located in the Office of the Dean (map reference B27), Faculty of Medicine:

**Undergraduate**
Gordon Rees,
Administrative Officer
Faculty of Medicine
Tel: (02) 9385 2459
E-mail: g.rees@unsw.edu.au

**Postgraduate & General Enquiries**
Office of the Dean
Faculty of Medicine
Tel: (02) 9385 2454
Fax: (02) 9385 1874
E-mail: info@notes.med.unsw.edu.au.

**Elective term/Clerkships**
Christine Hewitt
Administrative Assistant
Faculty of Medicine
Tel: (02) 9385 2452.
E-mail: c.hewitt@unsw.edu.au

**Faculty Information**

Schools in the Faculty of Medicine are Anatomy, Community Medicine, Health Services Management, Medical Education, Obstetrics and Gynaecology, Paediatrics, Pathology, Physiology and Pharmacology, Psychiatry and the Clinical Schools at Greater Murray, the Prince Henry/Prince of Wales Hospitals, St George Hospital, St Vincent's Hospital and the South Western Sydney Area Health Service. Each of these Clinical Schools contains Departments of Medicine, Surgery, and Anaesthetics, Emergency Medicine and Intensive Care. The Faculty is supported in its operations by the Centres for Immunology, National Drug and Alcohol Research, Public Health, Simpson Centre for Health Service Innovation, Thrombosis and Vascular Research as well as the Ray Williams Mass Spectrometry Facility, the Medical Illustration Unit, the National Perinatal Statistics Unit, the Rural Health Unit and the National Centre in HIV Epidemiology and Clinical Research. The Faculty is also affiliated with the Garvan Institute of Medical Research at St Vincent’s Hospital, the Prince of Wales Medical Research Institute at the Prince of Wales Hospital, the Children’s Cancer Research Institute at the Sydney Children’s Hospital, the Victor Chang Cardiac Research Institute, and the Skin and Cancer Foundation.

**Goals of the Faculty**

The current major goals for the Faculty are to excel in the quality of the undergraduate teaching and the postgraduate research and teaching.

**Committees of the Faculty**

Costs in Addition to Fees

Details of fees have been provided in the Guide to Students 2000 but in Medicine there are additional costs.

Students, when embarking on their degrees, may not be aware of the incidental costs which occur from time to time during the program. The following is an estimate, based on students’ experience, of the expenditure which is likely to be incurred over the full length of the program. The amounts quoted are, of course, subject to some variation.

<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Textbooks</td>
<td>$1500</td>
</tr>
<tr>
<td>Two coats (1 laboratory, 1 hospital)*</td>
<td>$60</td>
</tr>
<tr>
<td>Stethoscope</td>
<td>$80-300</td>

<td>$150</td>
</tr>
<tr>
<td>Miscellaneous (papers, pens, kits, diagnostic equipment and aids, etc)</td>
<td>$300</td>
</tr>
</tbody>
</table>

*One long white coat is required for use in the Schools of Anatomy and Biochemistry and one short coat for use in the hospitals.

Attendance at, and Residence in, Hospitals

From Year 2, students attend hospitals and must wear short white coats while at the hospitals.

There are times in the later years of the program when students are either required or may elect to live in the hospitals for periods ranging from one night to a term. Accommodation charges at the prevailing rate must be paid directly to the hospitals for all periods of residence.

Units of Credit

From 1996, UNSW introduced a university wide credit point system for all courses offered to both undergraduate and postgraduate students. The system means that a course will have the same unit of credit value irrespective of which faculty’s program it is counting towards. Students are able to determine the value of courses taken from other faculties when planning their programs of study. The student load for a course is calculated by dividing the unit of credit value of a course by the total units of credit required for the program for that year of the program. Student load is used to determine both HECS and overseas student fees. Students who take more than the standard load for that year of a program will pay more HECS.

Old course measures have been replaced by new university units of credit (UOC). Every effort has been made to ensure the accuracy of the units of credit values shown for all courses. However, if any inconsistencies between old and new point measures cause concern, students are advised to check with the Dean’s Office for clarification before making course selections based on the units of credit shown in this handbook.

General Education Program

UNSW requires that all undergraduate students undertake a structured program in general education as an integral part of studies for their degree. The University believes that a general education complements the more specialised learning undertaken in a student’s chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they value highly graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. As well, over many years graduates of this University have reported that they greatly valued their General Education studies, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden students’ understanding of the environment in which they live and work and to enhance their skills of critical analysis.

Objectives of the General Education Program

The following objectives were approved by the Council of the University in December 1994.

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.
2. To enable students to evaluate arguments and information.
3. To empower students to challenge systematically received traditions of knowledge, beliefs and values.
4. To enable students to acquire skills and competencies, including written and spoken communication skills.
5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.
6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.
7. To provide structured opportunities for students from disparate disciplines to interact co-operatively within a learning situation.
8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist courses offered in those other areas.
9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross- and interdisciplinary connections.
10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.

General Education Requirements

The basic General Education requirements are the same for students in all single degree programs. Over the program of a degree students must:

- satisfactorily complete a minimum of 12 units of credit of study in General Education courses or their equivalent;
- undertake an additional fifty-six (56) hours of study which ensures that students examine the purposes and consequences of their education and experience at university, and fosters acceptance of professional and ethical action and social responsibility. This fifty-six hours of study may be distributed throughout the program, or exist as a separate course, depending on the program.

Because the objectives of General Education require students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation, **all students are excluded from counting courses toward the fulfillment of the General Education requirement**, which are similar in content or approach to courses required in their program.
Faculty Requirements

Each Faculty has responsibility for deciding what courses are not able to be counted towards the General Education requirement for their students. In most cases, this means that courses offered by the Faculty in which a student is enrolled, or courses which are a required part of a program even though offered by another Faculty, are not able to be counted toward the General Education requirement.

Students should consult the General Education Handbook for detailed information about what courses may and may not be taken to fulfill the General Education requirements for each program offered by the Faculty. The General Education Handbook is freely available from all Faculty Offices.

Additional information for undergraduate students who first enrolled before 1996

Transitional arrangements
It is intended that no student will be disadvantaged by the change to the new General Education Program. The old Program had specific requirements to complete four session length courses (or their equivalent) in designated categories A and B. The new General Education Program does not categorise courses in the same way.

As a result, students who enrolled prior to 1996 will be given full credit for any General Education courses completed up to the end of Session 2, 1995.

From the summer session of 1995-96, students will be required to satisfy the unfilled portion of their General Education requirement under the terms of the new Program.

The exemption of General Education requirements for some double or combined degree programs will continue to apply for students who enrolled in these exempt programs prior to 1996.

Students With Disabilities

The University of New South Wales has a policy of equal opportunity in education and seeks wherever possible to ensure maximum participation of students with disabilities.

The University offers a range of assistance: examination support; specialised equipment; educational support; parking provisions; library assistance; note taking; readers and sign interpreters.

A Resource Guide for students is available from the Equity Officer (Disabilities), the Equity & Diversity Unit, the Library and the Student Guide.

It is advisable to make contact with the Equity Officer (Disabilities) prior to, or immediately following enrolment, to discuss support requirements. The Equity Officer (Disabilities) can be contacted on 9385 4770 or at the Equity & Diversity Unit located on Level 2, East Wing, Quadrangle Building.

Each School of the Faculty of Medicine also has a contact officer for students with disabilities.

Student Equity

The University of New South Wales is committed to providing an educational environment that is free from discrimination and harassment. Both Commonwealth and State anti-discrimination law requires the University not to discriminate against students or prospective students on the following grounds: sex, race/ethnicity, age, disability, marital status, pregnancy, sexuality, HIV/AIDS. Also included are acts of vilification on the grounds of: race, HIV/AIDS and homosexuality.

Complaint/Disputes
The University has internal dispute handling procedures to deal with complaints against staff or other students. The Discrimination and Harassment Grievance Procedures are handled by the Equity & Diversity Unit. Complaints that concern academic matters are usually handled initially through the Head of School.

Advocacy and Support
Students can seek assistance with dispute resolution, either in relation to discrimination or academic matters. Assistance can be sought from various areas in the University including: Equity & Diversity Unit; Student Guild Advocacy Service; Student Counselling; Program Co-ordinators; senior academic staff; Heads of School.

Students may be confident that their interests will be protected by the University if a complaint is lodged. This means that students should not be disadvantaged or victimised because they have, in good faith, sought to assert their rights to equal opportunity in education.

Equal Opportunity in Education Policy Statement

Under the Federal Racial Discrimination Act (1975), Sex Discrimination Act (1984), Disability Discrimination Act (1992) and the New South Wales Anti-Discrimination Act (1977), the University is required not to discriminate against students or prospective students on the grounds of sex, marital status, pregnancy, race, nationality, national or ethnic origin, colour, homosexuality or disability. Under the University of New South Wales Act (1989), the University declares that it will not discriminate on the grounds of religious or political affiliations, views or beliefs.

University Commitment to Equal Opportunity in Education
As well as recognising its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards his/his maximum potential. The University further commits itself to program design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

Special Admissions Schemes
The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment. As well, the Faculty of Medicine operates a special admission scheme for students from rural and remote areas and for Aboriginal and Torres Strait Islander Students.

Rural Student Support and the Rural Student Entry Scheme
The Rural Student Support Scheme provides support in a number of areas for students from rural backgrounds. For details about the Rural Student Entry scheme, refer to the Undergraduate Study section.

Aboriginal and Torres Strait Islander Student Entry Scheme
For details, refer to the Undergraduate Study section.

Support of Disadvantaged Students
The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

The Faculty of Medicine also sponsors remedial English classes for those students disadvantaged by English communication difficulties. Details can be obtained from the Office of the Dean.

Program Content, Curriculum Design, Teaching and Assessment, and Printed Material
Schools and faculties will monitor program content (including titles), teaching methods, assessment procedures, written material
(including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

Equal Opportunity Adviser Scheme
The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

Harassment Policy
The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.

Grievance Officers and Procedures
Students should attempt to resolve any grievance with the staff member(s) concerned within a reasonable time frame.

If the problem is still unresolved, students should contact staff in the Office of the Dean, who will direct them to the grievance officer nominated from the appropriate school.

Grievance procedures to be followed are detailed in the Student Guide.

Special Government Policies
The NSW Health Department and the NSW Department of Education and Training have special requirements and policies of which students of health-related and education programs should be aware. The requirements relate to:

- clinical/internship placements which must be undertaken as part of the program and
- procedures for employment after completion of the program

Health-related programs

Criminal record checks
The NSW Health Department has a policy that all students undertaking clinical placements, undergo a criminal record check prior to employment or placement in any capacity in the NSW Health System. This check will be conducted by the NSW Police Service and will be co-ordinated by the Department of Health.

Infectious diseases
Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health relating to vaccination and infection control.

An information sheet is available from your program officer and further details can be obtained from your Program Authority.

Education programs

Criminal record checks
It is a requirement that a check of police records be conducted for all teacher education students applying for an unsupervised internship placement in a New South Wales Government school. Contact your program co-ordinator for further details.
Hospital Teaching Campuses

The Greater Murray Area Health Service

Wagga Wagga Base Hospital
PO Box 159, Wagga Wagga NSW 2650
Telephone: (02) 6938 6666, Facsimile: (02) 6921 8243

Wagga Wagga Base Hospital is a 220 bed acute regional hospital and has specialists in most major disciplines (medicine, paediatrics, surgery, orthopaedics, anaesthetics, obstetrics and gynaecology, ENT, ophthalmology, geriatrics rehabilitation, psychiatry and emergency medicine). The Emergency Department has 3 staff specialists and has a major trauma role.

The Base Hospital is a significant teaching hospital boasting registrars in medical, surgical, orthopaedics, anaesthetics, obstetrics and gynaecology, with a number of resident medical officers and medical students and is a primary allocation centre.

Located approximately midway between Sydney and Melbourne, the City of Wagga Wagga has a population of 58,000 providing an excellent country lifestyle with the social, recreational and business amenities of a major rural city.

Albury Base Hospital
PO Box 326, Albury NSW 2640
Telephone: (02) 6058 4444, Facsimile: (02) 6058 4504

Albury Base Hospital is a modern 155-bed facility providing specialist services to the Albury-Wodonga and the surrounding parts of southwestern NSW and northeastern Victoria.

The hospital is the designated regional trauma centre for the region, with a catchment population of approximately 150,000 people. Retrievals are conducted from the hospitals to outlying areas as far as Deniliquin and Corryong. In fulfilling this function, the hospital has a suitably appointed and staffed intensive care unit and emergency department, both of which are accredited for training by many of the Specialist Medical Colleges.

Albury Base Hospital has a considerable emphasis on teaching at both the undergraduate and postgraduate levels, accredited for training by many of the Specialist Medical Colleges and with the NSW Postgraduate Medical School.

Griffith Base Hospital
PO Box 1013, Griffith NSW 2690
Telephone: (02) 6962 8333 Facsimile: (02) 6964 1587

Griffith Base Hospital is a 92-bed facility providing general hospital services, located in the Murrumbidgee Irrigation Area of South West NSW. The Base Hospital provides a comprehensive range of clinical services to the population of Griffith and surrounding areas. This public facility is strongly supported by a dedicated team of experienced staff, general practitioners and visiting consultants.

South East Health - South Eastern Sydney Area Health Service

Telephone (02) 9947 9898, Facsimile (02) 9947 9891

South Eastern Sydney Area Health Service was formed in 1996 with the amalgamation of the Eastern and Southern Area Health Services. The Area extends from Sydney Harbour in the north through Botany Bay and Port Hacking to the Royal National Park in the south.

The Area provides a range of hospital and community health care services for some 763,000 residents. It also serves a significant daily inflow of people to the Central Business District, the University of New South Wales, local and international airports, Kings Cross and popular beaches. Many people per day transit the area.

Three principal teaching hospitals, three specialty referral hospitals and a number of associated teaching hospitals are located in the area. There is predominantly an aging population. Approximately 32% of residents are born overseas and 67% of those are from non-English speaking countries. It is anticipated that the population will remain relatively static, with a 1.2% projected growth by 2001 (Figures from NSW Health Department, June 1998). Services are being constantly reviewed to ensure that they meet the needs of the community.

The Prince Henry / The Prince of Wales Hospitals

Barker Street, Randwick 2031
Telephone: (02) 9382 2222, Facsimile: (02) 9382 2233

The Prince Henry Hospital, located at picturesque Little Bay, was first established as the Coast Hospital in 1881 to cope with an outbreak of smallpox. In 1934 the Hospital was renamed The Prince Henry Hospital.

The Prince of Wales Hospital was founded as an annexe of Sydney Hospital in 1953, although hospital services were established on the site following the closure of the Society for Destitute Children in 1915. During the First and Second World Wars, the site served as a Military Hospital and in 1923 and 1945 was used for repatriation.

The Prince Henry and The Prince of Wales Hospitals were joined under a common management in 1962 to form the principal teaching hospitals for the Medical School of the University of NSW.

The Prince of Wales Hospital has recently undergone a period of major redevelopment to enable all acute services to be accommodated on the Randwick Campus, which it shares with the Sydney Children's Hospital, the Royal Hospital for Women and the Prince of Wales Private Hospital.

The Prince Henry and Prince of Wales Hospitals currently cover all specialties and sub-specialties. In addition, statewide services provided include: Hyperbaric Medicine Unit, Spinal Injuries, Lithotripsy, HIV Special Unit and the Albion Street Centre.

Sydney Children's Hospital
High Street, Randwick 2031
Telephone (02) 9382 1111, Facsimile (02) 9382 1777

This is a paediatric tertiary referral hospital serving the whole of the state, one of two such children's hospitals in New South Wales and is located at the Randwick campus. It has close links through specialist and resident staff with other teaching and associated hospitals such as the Royal Hospital for Women and Royal North Shore, Liverpool and Wollongong Hospitals. It provides a complete range of paediatric services and has strong links with complimentary adult services at Prince Henry and Prince of Wales Hospitals. There are also strong links with community based child health services and local private practitioners.

There is a care by parent unit providing accommodation for parents and siblings with a Ronald McDonald House providing additional care-by-parent accommodation.

The Royal Hospital for Women
Barker Street, Randwick 2031
Telephone (02) 9382 6111, Facsimile (02) 9382 6513

The Royal Hospital for Women is the University's principal teaching hospital in obstetrics and gynaecology. The Hospital was established by the Benevolent Society of NSW in 1866 and was New South Wales' first 'lying-in' hospital. The first medical undergraduate students came to the Royal in 1888. The Hospital relocated from Paddington to Randwick in 1997 to purpose-built facilities.

There are approximately 4,000 births annually and over 6,500 gynaecological procedures. It is a specialist hospital for obstetrics and gynaecology and includes a department of neonatal paediatrics, since its move to Randwick, the Hospital has established the Department of Endo-Gynaecology and the Natural Therapies Unit, an Australian first where natural products are actively researched.

The Prince Henry Hospital, located at picturesque Little Bay, was first established as the Coast Hospital in 1881 to cope with an outbreak of smallpox. In 1934 the Hospital was renamed The Prince Henry Hospital.

The Prince of Wales Hospital was founded as an annexe of Sydney Hospital in 1953, although hospital services were established on the site following the closure of the Society for Destitute Children in 1915. During the First and Second World Wars, the site served as a Military Hospital and in 1923 and 1945 was used for repatriation.

The Prince Henry and The Prince of Wales Hospitals were joined under a common management in 1962 to form the principal teaching hospitals for the Medical School of the University of NSW.

The Prince of Wales Hospital has recently undergone a period of major redevelopment to enable all acute services to be accommodated on the Randwick Campus, which it shares with the Sydney Children's Hospital, the Royal Hospital for Women and the Prince of Wales Private Hospital.

The Prince Henry and Prince of Wales Hospitals currently cover all specialties and sub-specialties. In addition, statewide services provided include: Hyperbaric Medicine Unit, Spinal Injuries, Lithotripsy, HIV Special Unit and the Albion Street Centre.

Sydney Children's Hospital
High Street, Randwick 2031
Telephone (02) 9382 1111, Facsimile (02) 9382 1777

This is a paediatric tertiary referral hospital serving the whole of the state, one of two such children's hospitals in New South Wales and is located at the Randwick campus. The Royal Hospital for Women
Barker Street, Randwick 2031
Telephone (02) 9382 6111, Facsimile (02) 9382 6513

The Royal Hospital for Women is the University's principal teaching hospital in obstetrics and gynaecology. The Hospital was established by the Benevolent Society of NSW in 1866 and was New South Wales' first 'lying-in' hospital. The first medical undergraduate students came to the Royal in 1888. The Hospital relocated from Paddington to Randwick in 1997 to purpose-built facilities.

There are approximately 4,000 births annually and over 6,500 gynaecological procedures. It is a specialist hospital for obstetrics and gynaecology and includes a department of neonatal paediatrics, since its move to Randwick, the Hospital has established the Department of Endo-Gynaecology and the Natural Therapies Unit, an Australian first where natural products are actively researched.
In 2000, Mothersafe, a statewide medications in pregnancy and lactation service, was established. The first baby health clinic in NSW, the forerunner of today’s Early Childhood Health Centres, was established here in 1906. The State’s first Antenatal Clinic was also started at the Royal Hospital for Women in 1912 and this was the third such clinic in the world. In 1931 the first Archeim Zondeck Pregnancy Test was performed in Australia at the Royal Hospital for Women. In 1948 the Royal established Australia’s first Cancer Detection Clinic and in 1984 the first Chorionic Villus sampling was performed at the Hospital. The Hospital’s Department of Medical Imaging has an international reputation for research and development of ultrasound technique and equipment in obstetrics.

The Gynaecological Oncology Centre, the first of its kind, was established in 1969 and has worldwide standing for its work on ovarian cancer and gynaecological malignancy.

**The St George Hospital & Community Health Service**

Gray Street, Kogarah 2217

Telephone (02) 9350 1111, Facsimile (02) 9350 3999

Established in 1894, first as a Cottage Hospital, The St George Hospital & Community Health Service is now one of Sydney’s busiest principal referral hospitals.

The St George Hospital is an accredited teaching hospital of the University of New South Wales, and has been affiliated with the University since 1964.

Designated as a major Trauma Service, the hospital accepts referrals from outside its immediate area as well as serving a local district population of approximately 225,000 (of whom more than 25% were born overseas).

It has the second busiest Emergency Department in NSW, on a case-weighted basis, and is the busiest in metropolitan Sydney.

A major redevelopment program during the 1990s has provided a state-of-the-art hospital covering all general areas of medicine (excluding heart and liver transplants). The St George Hospital has built an enviable reputation with areas of expertise including Oncology, Orthopaedics and Women & Children’s Health as well as research.

A Private Hospital is located adjacent to the campus.

With nearly 2,200 employees, the fully accredited Hospital is situated on the southern Sydney railway line and is a 15 minute drive from Sydney airport.

Facilities on the hospital’s campus include a childcare centre and car parking.

**The St Vincent’s Hospital**

Victoria Street, Darlinghurst 2010

Telephone (02) 8382 1111, Facsimile (02) 8382 4142

St Vincent’s Hospital is a principal referral hospital and a pre-eminent teaching hospital of the University of New South Wales. It is operated in accordance with the philosophy, mission and values of the Sisters of Charity. The Hospital was founded in 1857 and moved to the present site in 1870.

Students of medicine have attended the hospital since 1891. From 1923 to 1969 the Hospital was a Clinical School for the University of Sydney. Since then it has been a Clinical School of the University of New South Wales. The Clinical School and a student hostel were built in 1964. At present the Clinical School contains teaching facilities with audio-visual equipment, common rooms, a library and a pathology museum.

St Vincent’s Hospital is an acute general hospital with highly developed specialist units in adult medicine and surgery and diagnostic services. The Hospital provides referral services for New South Wales and Australia and services for the local community. Specialty services at the Hospital include cardiac transplantation, bone marrow transplantation, a Cancer Care Centre which provides an integrated approach to the management of malignancy and a comprehensive AIDS service and a specialist Palliative Care Institute (Sacred Heart Hospice). Sophisticated diagnostic departments, which include radiology, all branches of pathology and nuclear medicine support the clinicians of the Hospital. Extensive primary and secondary services are also provided to meet the needs of the local community and these include medical, surgical, geriatric and drug and alcohol services.

Research is undertaken in the Garvan Institute of Medical Research, Professorial Departments, the Department of Clinical Pharmacology and the Anxiety Disorders Unit. There are 18 Chairs at the Hospital, which include medicine, surgery, cardiology, endocrinology, immunology, psychiatry and clinical pharmacology. The visiting medical staff numbers 100; there are 80 staff specialists and 130 resident medical officers.

St. Vincent’s is part of the integrated campus of the Sisters of Charity which comprises St Vincent’s Private Hospital, the Garvan Institute of Medical Research, the Victor Chang Cardiac Research Institute and St Vincent’s and the Centre for Immunology.

**Calvary Hospital Kogarah Inc**

91-111 Rocky Point Road (Corner Fitzgerald Avenue) Kogarah 2217

PO Box 261 Kogarah 1485

Telephone (02) 9587 8333, Facsimile (02) 9587 1421

Calvary Hospital Kogarah Inc is an Affiliated Health Organisation conducted by the Sisters of the Little Company of Mary. The Hospital was opened in 1966 and provides multi-disciplinary palliative care services for 80 inpatients and day-only admissions. The Hospital has a 20-bed Geriatric Rehabilitation Unit, full multi-disciplinary team and therapy gymnasium. There is a Community Palliative Care Team offering holistic, family-oriented care to people with terminal illnesses within the South Eastern Sydney Area Health Service who choose to live at home. An Outpatient Pain Clinic is available at Calvary for these and other patients. Calvary staff offers a consultative service to nursing homes and private hospitals.

The Hospital staff is involved in teaching Palliative Care to undergraduate medical students and postgraduate nursing students. Training courses for volunteers in bereavement counseling and other aspects of palliative care are also offered.

Calvary Rehabilitation and Geriatric Service (CRAGS) specialises in helping the frail, elderly, and the disabled of the St George district. CRAGS is the Aged Care Assessment Team, and offers Dementia Support, Podiatry, Hydrotherapy, Mobility Training Clinics and Day Care services. CRAGS also administers the statewide NSW Artificial Limb Service.

**The Langton Centre**

Corner Nobbs and South Dowling Streets

Surry Hills 2010

Telephone (02) 9332 8777, Facsimile (02) 9332 28700

The Langton Centre is a specialist agency for the treatment of addictions. The Centre provides medicated detoxification, group and individual counselling, and medical and psychological interventions for dependent drug users. The Centre operates a methadone maintenance clinic and a needle and syringe exchange program. The Centre is active in a number of clinical research projects, including the investigation of new pharmacotherapy for opioid dependence, accelerated detoxification, and the role of psychiatric morbidity in addictive disorders. The Centre provides training for medical and nursing undergraduates, and registrar training.

The Langton Centre was fully refurbished in 1996 and is now linked administratively to Sydney Hospital. The Langton Centre inpatient beds are now located in Sydney Hospital and this access to general hospital beds has provided the basis for new research projects into intensive methods of inpatient treatment for drug dependence.

**Sacred Heart Hospice**

170 Darlington Road, Darlington 2010

Telephone (02) 8382 9444, Facsimile (02) 8382 9555

The original Hospice was established in 1890. It is owned and governed by the Sisters of Charity of Australia and is a public hospital. In 1998 the Sisters of Charity integrated the Hospice with St Vincent’s Hospital. In April 2000, a fast stream rehabilitation service was established and the service then became known as the Sacred Heart Palliative Care and Rehabilitation Service.

The palliative care service provides a comprehensive service which incorporates medical, nursing, pastoral, therapy, welfare, educational and bereavement. These services are available to in-patients and
home-care patients and extend to the support of the patients’ families. Respite care is also provided.

The Rehabilitation service offers a comprehensive multi-disciplinary approach to orthopaedics and neurological rehabilitation. The Palliative Care conducts formal educational programs for staff, staff from other facilities and tertiary students.

St Luke's Hospital Complex
18 Roslyn Street
Potts Point NSW 2011
Telephone (02) 9356 0200, Facsimile: (02) 9357 2334

St Luke's Hospital Complex, a not-for-profit public benevolent institution provides acute hospital, nursing home and aged care services. St.Luke's (Private) Hospital is a 108 bed acute General Hospital providing comprehensive surgical, medical and rehabilitation care. Facilities include 4 operating theatres, 6 bed intensive care unit, a day surgery/procedures unit, endoscopy unit, telemetry/sleep studies unit, rehabilitation unit including hydrotherapy pool and diagnostic radiology service, including CT Scan. Services provided include Colorectal Surgery, Ear Nose & Throat Surgery, Gastroenterology, General Surgery, Gynaecology, Specialty Hand Surgery, Neurosurgery, Oral and Faciomaxillary Surgery, Plastic Surgery, Urology, General Medicine and Rehabilitation. Purpose built Day rehabilitation and Injury Management Centre.

St Vincent's Private Hospital
406 Victoria Street, Darlinghurst 2010
Telephone (02) 8382 7111, Facsimile (02) 8382 7334

The first St Vincent's Private Hospital opened in 1909 in association with the Sisters of Charity General Hospital whose origins in Darlinghurst date back to 1838. The present St Vincent's Private Hospital was opened in 1976.

Consultants from most specialties are represented on its medical staff and the Hospital is equipped and staffed to provide tertiary referral services. The Hospital is an acute medical and surgical hospital of 230 beds with nine operating theatres including the Day Surgery Unit, an Intensive Care Unit and a Cardiac Catheter Laboratory.

The Hospital is accredited by the Australian Council on Health Care Standards.

The mission of St Vincent's Private Hospital, consistent with the values and health care philosophy of the Sisters of Charity, is to preserve a Catholic identity in health care and to provide excellent holistic services through value based team work, commitment, skill and technology.

Sutherland Hospital Caringbah
Kingsway, Caringbah 2229
Telephone (02) 9540 7111, Facsimile (02) 9540 7197

The Sutherland Hospital was founded in 1958, is an Associated Teaching Hospital of the University of New South Wales. It is a general medical, surgical and obstetric hospital, with various subspecialties. There are also pediatric and rehabilitation, oncology and day surgery units, a paediatric ward, and a busy emergency department.

Based in the rapidly expanding south eastern suburbs, the Hospital serves an approximate population of 200,000.

The Hospital is staffed by 65 visiting medical staff, 14 staff specialists and 60 resident medical staff. There is also a well-equipped library.

Sydney Hospital and Sydney Eye Hospital
Macquarie Street, Sydney 2000
Telephone (02) 9382 7111, Facsimile (02) 9382 7320

Sydney Hospital, the first hospital in Australia, was established at Dawes Point shortly after the arrival of the First Fleet in 1788. It was transferred to the Sydney Hospital site in Macquarie Street in 1811 when Governor Macquarie built the ‘Rum’ Hospital. The first Nurses Training School in the Florence Nightingale tradition was established at the Hospital in 1868.

Sydney Hospital and Sydney Eye Hospital has a 24 hour Accident and Emergency Service. It provides inpatient and outpatient services in general medicine, general surgery, orthopaedics, ENT, hand surgery, and ophthalmology (including the Lions Eye Bank and Save Sight Institute), Sydney Artificial Eyes, Sydney Sexual Health Centre, Kirketon Road Centre in Kings Cross and the Langton Centre in Surry Hills.

The Sexual Health Centre, established at Sydney Hospital in 1992, is jointly administered by the University of Sydney and the University of New South Wales.

There are 118 visiting medical staff, nine staff specialists and 45 resident medical officers.

The Hospital has a medical library of full teaching hospital standard and a medical staff common room but does not provide staff with accommodation. The campus has undergone major refurbishment with the patients services block being opened in 1996.

War Memorial Hospital Waverley
125 Birrell Street, Waverley 2024
Telephone (02) 9369 0100, Facsimile (02) 9387 7018

War Memorial Hospital, Waverley is a Third Schedule Public Hospital under the governance of the Uniting Church in Australia, NSW Synod.

Opened in 1921 as a 19-bed private hospital under the management of the then Methodist Church, by 1969 the Hospital had grown to a 140-bed Third Schedule Hospital providing general medical, surgical and obstetric services. In 1964, after a review, the Hospital commenced its primary role in geriatric rehabilitation and assessment services.

The Hospital now runs a geriatric rehabilitation and assessment unit, a rehabilitation outpatients service, a short stay residential respite unit, a day care unit which provides services for both frail and dementia clients and non-English speaking background groups and a podiatry outpatients service. A hydrotherapy pool supports the inpatient rehabilitation services.

War Memorial Hospital also supports an aged care assessment team as well as a number of specialist clinics and services. Other service components of the Hospital include spouse accommodation for country patients and office accommodation for the Waverley Community Team.

The South Western Sydney Area Health Service
Telephone (02) 9828 5700, Facsimile (02) 9828 5769

The South Western Sydney Area Health Service became a Principal Teaching Campus of the University of New South Wales in early 1989 and Liverpool Hospital has been upgraded and now provides comprehensive teaching and referral services.

To date the University has a presence in the fields of adolescent and mental health, medicine, surgery, obstetrics, pathology and microbiology, community paediatrics, anaesthetics and intensive care, community medicine, general practice, public health, health promotion, rehabilitation, geriatrics, drug and alcohol services, epidemiology and nursing research.

The Area is responsible for the management of health services within Sydney’s south west. This is an area which combines the older urbanised local government areas of Bankstown and Liverpool with the urban growth areas of Fairfield and Campbelltown, the residential growth areas of Camden and the mostly-rural Wollondilly and Wingecarribee.

The area is characterised by a predominantly young population and contains a number of ethnic communities. Over the next 10 years, the SWS Area is expected to grow by 115,000 people and presently has a higher than average birth rate compared with the rest of New South Wales.

The public hospitals and nursing homes managed by the South Western Sydney Area Health Service are: Bankstown-Lidcombe Hospital, Bowral, Camden, Campbelltown, Fairfield, Liverpool and Queen Victoria Memorial (Picton). There are three Third Schedule institutions, namely Carrington Centennial Nursing Home, Karitane Mothercraft Society and Braeside Hospital.

The Area Health Service remains committed to the integration of community health and hospital services in order to provide a
comprehensive service to its population, which is expected to grow to more than 900,000 people by 2011.

**Liverpool Health Service**

Liverpool Hospital and Liverpool Community Health Service

Elizabeth Street, Liverpool 2170

Telephone (02) 9828 3000 Facsimile (02) 9828 6318

There has been a hospital in Liverpool since the early nineteenth century. The present hospital has 530 beds and provides services in medicine, surgery, intensive care, anaesthetics, emergency medicine, paediatrics, obstetrics and gynaecology, dermatology, psychiatry, geriatrics, rehabilitation, drug and alcohol, sexual health medicine, cancer therapy and a range of allied health disciplines. It is a major trauma centre and is tertiary referral centre for the South Western Sydney Area. A full range of pathology services is provided on site by the Area Pathology service. Speciality medical training is provided in most specialties, and research activities are rapidly expanding. Academic units have been established in most specialties.

There is a strong community orientation and close links with the Liverpool and Hoxton Park Community Health Services and South Western Sydney Public Health Unit. A Division of General Practice has been formed by local GPs. There are good residential and recreation facilities on the Hospital grounds and a well equipped library. There are well developed education programs for both undergraduates and postgraduates.

A major redevelopment of the hospital was completed in 1997 with the opening of the Education and Clinical Buildings.

**Bankstown Health Service**

Bankstown-Lidcombe Hospital and Bankstown Community Health Service

Eldridge Road, Bankstown 2200

Telephone: (02) 9722 8000 Facsimile: (02) 9722 8570

The Bankstown Health Service comprises the Bankstown-Lidcombe Hospital and Community Health Service. Bankstown-Lidcombe Hospital is a 454 bed Teaching Hospital of the University of New South Wales. The Hospital provides for a catchment area of approximately 180,000 in population.

The Hospital provides a full range of medical and diagnostic services. 1996 heralded the commissioning of a new state-of-the-art hospital. Services include: subspecialties based medicine, surgery, intensive care, obstetrics and gynaecology, paediatrics, anaesthesiology, emergency medicine, mental health as well as a strong emphasis on aged care (80 beds for geriatric medicine, rehabilitation, aged psychiatry). The Hospital boasts a strong Gastroenterology Service. An Academic Chair in Medicine has been established in recognition of the high level of this Service. A full range of imaging and clinical measurement modalities is provided. Substantial teaching facilities exist in the new hospital.

The overall objective is the integration of the hospital with community services to provide an optimal, self sufficient, fully integrated health service to the Bankstown Local Government Area.

The Bankstown Health Service is committed towards high standards of training and education amidst a relaxed and friendly atmosphere. Accredited training is available in the majority of specialties for both undergraduates and postgraduates. A strong Division of General Practice is operated by local GPs and is well integrated into education programs and service provision.

**The Macarthur Health Service**

Campbelltown Hospital

Therry Road, Campbelltown 2560

Telephone (02) 4625 9222 Facsimile (02) 4629 1338

Macarthur Health Service is comprised of Campbelltown Hospital, Camden Hospital, Queen Victoria Memorial Home, Macarthur Community Health Service and Macarthur Mental Health Service. Macarthur Health Service is undergoing a period of redevelopment that will include a new hospital in Camden and an increase in services and available beds at Campbelltown Hospital. At present, the Health Service has 232 hospital beds providing general medical and surgical, obstetrics and gynaecology, orthopaedic, paediatric, aged care and rehabilitation, palliative care, anaesthetic and mental health services. This includes an 8 bed intensive care/coronary care unit, a very busy 30 bed paediatric unit with a 15 bed Level 2 special care nursery. Emergency Departments operate 24 hours at each hospital, with the Campbelltown service being extremely busy.

Campbelltown Hospital is a general, paediatric, maternity and psychiatric hospital situated in the City of Campbelltown in the south-western suburbs of Sydney. This modern Hospital provides a high standard of general medical care to the surrounding population of over 200,000 with a predominance of young families. The area has one of the highest growth rates in the State and the Hospital is committed to the provision of high standard community, inpatient and emergency care as the population expands.

**Camden Hospital**

Menangle Road, Camden 2570

Telephone (02) 4629 1000, Facsimile (02) 4629 1016

Camden Hospital is undergoing a period of redevelopment. During this time the services that are continuing include general, maternity, emergency and palliative care services. This facility provides services to the local communities of Camden and Wollondilly.

**The Fairfield Health Service**

Fairfield Hospital and Fairfield Community Health Service

Cnr Folding Street and Prairiewale Road

Wetherill Park 2164

Telephone (02) 9616 8111, Facsimile (02) 9616 8240

Fairfield Hospital is a 200 bed facility and provides services in general medicine, general surgery, orthopaedics, urology, plastic surgery, maternity and paediatrics. A twenty-bed detoxification unit, Corella Lodge was opened in March 1999.

The Fairfield Hospital opened in November 1988 and provides health services for the Fairfield local government area community. In addition, the Hospital has a Level II Special Care Nursery, a 24 hour Accident & Emergency Service, a 10 bed ICU and CCU and has in place a Domiciliary Midwifery Program for well mothers and babies.

The South Western Sydney Area's General Practice Unit is located at Fairfield Hospital. The Unit commenced in 1991 and is run jointly with the University of New South Wales. There is a Professor of General Practice. It provides general practice style service for patients and staff of the Hospital. It also acts as a centre of education for existing and future general practitioners in the area and liaises between the Hospital and general practice.

Fairfield Health Service has commenced a Community Paediatric Service with the appointment of a Staff Specialist Community Paediatrician. Appointments of Community Nursing Staff are being made to assist the Paediatricians to provide a comprehensive service in the Area.

Comprehensive Health Services are provided from three Centres located in Mitchell Street Carramar, Levuka Street Cabramatta and in Prairiewood on the Hospital campus. Youth primary health care services for residents of Fairfield and Liverpool are provided by FLYHT. A comprehensive Drug Intervention Service is also operated in Cabramatta.

The relocation of the Karrlane Mothercraft Society to Mitchell Street, Fairfield (Old Fairfield Hospital site) occurred in April 1994. The 72 bed Braeside Hospital provides services in Rehabilitation, Psychogeriatrics and Palliative Care on the grounds of Fairfield Hospital.
Corrections Health Service

Long Bay Correctional Centre
Anzac Parade, Little Bay, 2036
Telephone (02) 9289 2977, Facsimile (02) 9311 3005

Corrections Health Service (CHS) is a Statutory Health Corporation constituted under the New South Wales Health Services Act 1997. CHS provides and coordinates a comprehensive range of health services for people in custody within the NSW Correctional System. The mission of CHS is: "To improve the health of people within the New South Wales correctional system by providing quality health care to the standard available in the community". Major clinical programs include General Practice and Primary Health Care, General Medicine / Surgery, Mental Health Programs, Drug and Alcohol Services, Population Health, Indigenous People's Health Services, Dental, Imaging and Laboratory Services.

The Illawarra Area Health Service

Telephone (02) 4275 5111, Facsimile (02) 4276 1447

The Illawarra Area Health Service covers an area immediately to the south of the Sydney Metropolitan Area, and comprises the Local Government Areas of Wollongong, Shellharbour, Kiama and Shoalhaven. The estimated total population of the Illawarra is 327,000, which comprises 5.4% of the total New South Wales population.

The Illawarra Area Health Service is a network of integrated community and hospital services which provide both public and personal health care.

The Area Health Service has an agreement with the University of New South Wales for the Health Service to be an Associated Teaching Campus of the University.

Associated Teaching Hospitals

Wollongong and Port Kembla Hospitals

The Wollongong and Port Kembla Hospitals are significant components in the establishment and development of a major teaching Area Health Service for the Illawarra. Currently, the Wollongong and Port Kembla Hospitals are Associated Teaching Campuses of the University of New South Wales.

A newly built Clinical Services Block at the Wollongong Campus will be fully commissioned in 1998 and will provide state-of-the-art critical care including a 20 bed ICU and 8 Operating Theatres. The Wollongong and Port Kembla Hospitals provide complimentary services with all acute services located at the Wollongong Hospital. The Port Kembla Hospital comprises 52 beds for Rehabilitation and Psychiatry Services. The Wollongong Hospital with 240 beds provides a full range of tertiary services including medical imaging; maternal and paediatric services; surgical services including neurosurgery and medical services including a full range of medical subspecialties.

The Illawarra Area Health Service also provides a comprehensive psychiatry service for both inpatients and the community. General practitioners throughout the Division of General Practice also have an active role in the integration of community and hospital services and provide excellent training opportunities in general practice.

Shellharbour Hospital

The Shellharbour Hospital has 150 beds (5 of which are high dependency). The Hospital provides emergency, medical, surgical, psychiatric, obstetric and psychiatric services. The GP Training Unit is also based at this Hospital.

The Illawarra Area Health Service provides comprehensive mental health care, with psychiatric care consolidated at Shellharbour Hospital which has 34 acute inpatient beds. Lakeview House, the psychiatric rehabilitation facility for the Area, also located at Shellharbour Hospital has 20 inpatient beds and provides care for 20 day patients.

The Mid North Coast Area Health Service – Central Sector

Port Macquarie Base Hospital
Wrights Road, Port Macquarie 2444
Telephone (02) 6581 2000, Facsimile (02) 6580 1110

Port Macquarie Base Hospital was the first privately operated and owned hospital in Australia, built specifically to meet the requirements of a twenty year Services Agreement with the NSW Department of Health for the admission and treatment of public patients. The Agreement sets objective standards for the provision of high quality health care including specific quality standards. This 161-bed Hospital opened its doors to the public in November 1994 and is a comprehensive referral hospital for both public and private patients of Port Macquarie and surrounding areas. Port Macquarie is one of the largest health centres of the region boasting some 56 specialist medical staff. The Hospital provides a 24-hour accident and emergency service; general surgery; orthopaedic surgery; vascular surgery; gynaecology; obstetrics; urology; ear, nose and throat surgery; renal medicine; oncology; cardiology; thoracic medicine; general medicine; paediatric and neo-natal medicine; psychiatry and emergency medicine.

Port Macquarie Base Hospital in the short time it has been opened has received several awards and commendations for its clinical excellence, and also for its excellence in service delivery and quality patient care. In addition to achieving Associated Teaching Hospital status with the University of New South Wales, University of Sydney and the University of Newcastle, the Hospital has been accredited by the Medical Association/COLleges of Physicians, Surgeons, Obstetrics and Gynaecology, Orthopaedics and Psychiatry.

The Base Hospital is a significant teaching hospital boasting registrars in medical, surgical and orthopaedic, psychiatry obstetrics and gynaecology with a number of medical officers and medical students.

The Southern Area Health Service

Goulburn Base Hospital
Locked Bag 15, Goulburn, 2580
Telephone (02) 4827 3111, Facsimile (02) 4827 3248

Goulburn Base Hospital is a major facility within the Southern Area Health Service and currently runs with 101 acute inpatient beds at an occupancy rate of about 85%. It provides many services for the population of the Southern Tablelands and South-Eastern region of New South Wales.

The hospital serves as a secondary referral centre for patients and clients from Crookwell and Braidwood. Referrals for the management of acute physical illness are also received from the St John of God Hospital, from Kenmore Hospital and from the Goulburn Training Centre (Goulburn Gaol 650 inmates). The community health service has its administrative base and a number of client services at its premises on the campus of Goulburn Base Hospital. Some community health services for the whole of South-Eastern NSW are also based in Goulburn, and there is an acute Psychiatric Unit on campus.

Clinical facilities at the Goulburn Base Hospital include general medicine, general surgery, obstetrics and gynaecology, paediatrics, coronary care/high dependency unit, and accident and emergency care. There are visiting specialists from Sydney or Canberra who do major orthopaedic procedures, implanting of prosthetic eye lenses as well as other ophthalmological work including outpatient clinics, and provide a consultant venereology service through the HIV/AIDS unit in Jennings House. These non-residential specialists attend at the hospital weekly or fortnightly.
Faculty Units, Centres and Affiliated Institutes

The Ray Williams Biomedical Mass Spectrometry Facility

The Ray Williams Biomedical Mass Spectrometry Facility (RWBMSF) is a UNSW beach-head facility providing research support to investigators on this campus and affiliated teaching hospitals. The RWBMSF is a major facility for molecular characterisation for the faculties of Medicine and Life Sciences, UNSW. The facility is equipped to world class standards enabling all types of mass spectrometry to help answer questions posed by researchers and clinicians to otherwise intractable problems. The RWBMSF was evaluated as a major research facility following a recent survey commissioned by the Commonwealth Department of Industry, Science and Resources. The RWBMSF is both a research and research-support facility engaged in several areas of study. The RWBMSF has developed several approaches to monitoring damage, repair and the cellular changes associated with aging and inflammatory disease and these are applied to a diverse array of research projects.

The Centre for Health Informatics

The Centre for Health Informatics (CHI) is a collaborative venture of the Faculty of Medicine and the School of Electrical Engineering and Telecommunications. CHI focuses on four core research themes: Evidence-based Decision Support, Clinical Communications, Evaluation and Home Telecare:

• Evidence-based Decision Support examines methods and technologies for providing clinicians with up-to-date information on-line.
• Clinical Communications seeks to understand how information is disseminated, and how communication, and communication pathways, may be improved.
• The Informatics Evaluation Group (IEG) offers evaluation services for information and communication technology projects in health.
• Home Telecare develops ways to monitor patients in their home, with information passed to their primary care giver.

The Centre for Public Health

The Centre for Public Health was established in 1986 to bring together multi-disciplinary resources to conduct educational programs and undertake research in public health. The Centre is comprised of the Schools of Community Medicine, Medical Education and Health Services Management and has strong links with other academic and service units such as the National Centre in HIV Epidemiology and Clinical Research, the National Drug and Alcohol Research Centre and the various Area Health Services affiliated with UNSW. Its affiliation with the WHO Regional Training Centre for Health Development provides an emphasis on international health development.

The Centre for Public Health at UNSW and the Department of Public Health and Community Medicine at the University of Sydney are partners in the PHERP-funded Sydney Public Health Consortium. This arrangement is designed to enhance the opportunities for study and research for students and faculty in both universities. Currently students enrolled at UNSW are permitted to undertake up to 25% of their course work at the University of Sydney.

The Centre for Thrombosis and Vascular Research

The Centre for Thrombosis and Vascular Research was formed in 1992 with the purpose of bringing together scientists and physicians based in the Prince Henry/Prince of Wales Hospitals Group, whose research and clinical practice was focused on the causation and treatment of the blockage of blood vessels. The majority of heart attacks, strokes and gangrene of the legs are brought about by blockage of the arteries supplying respectively, the heart muscle, the brain and the lower limbs. Despite real advances these processes still account for a massive cost in premature death and suffering.

Children’s Cancer Institute Australia for Medical Research

Children’s Cancer Institute Australia for Medical Research is an independent institute affiliated with the Faculty of Medicine, University of New South Wales. The Institute was established in 1984 and occupies a four-storey complex at the southern end of the Sydney Children’s Hospital. Our staff work in close collaboration with members of the Division of Haematology/Oncology in the Hospital. With a staff of over 50, including Honours and postgraduate scholars of the University, the Institute undertakes laboratory research on malignant disease in children. Research work is organised into five programs: experimental therapeutics, molecular diagnostics, molecular carcinogenesis, leukaemia biology and stem cell biology. The focus of the Institute involves investigation into the nature, origin, cause and treatment of childhood cancers (particularly leukaemia and neuroblastoma) making this facility the only one of its type in Australia.

Garvan Institute of Medical Research – St Vincent’s Hospital

The Garvan Institute of Medical Research has a staff of 200 including 45 PhD and MD scholars. The Institute is structured into six major research programs – arthritis and asthma, bone and mineral, cancer, neurobiology, metabolism and diabetes and pituitary disorders – which are funded through a Centre grant from the National Health and Medical Research Council. Located on the St Vincent’s Hospital Campus, the Garvan Institute focuses on the molecular basis of health and disease, integrating a range of basic laboratory based research approaches together with extensive clinical research.

Medical Illustration Unit

Located in the Edmund Blacket Building at the Prince of Wales Hospital, the Medical Illustration Unit (MIU) provides centralised photography, graphics and digital imaging services to the Faculty of Medicine and its teaching hospitals. The Unit incorporates well-equipped facilities for clinical, scientific and general photography in the studio or location, operates a high-resolution computer slide imaging service and a large-format printing facility for scientific posters. MIU’s eight staff annually produce around 60,000 slides, prints and digitised images for lectures and publications, 1,000 items of finished artwork and 300 scientific posters, thereby supporting the teaching, research and patient care commitments of the Faculty and its hospitals.
National Centre in HIV Epidemiology and Clinical Research

The National Centre in HIV Epidemiology and Clinical Research (NCHERC) is recognised worldwide as a leader in HIV/AIDS research. The NCHERC undertakes research into HIV/AIDS that focuses on epidemiology, clinical research and clinical trials, in collaboration with other research centres, government departments, the pharmaceutical industry, community groups, health clinics and general practitioners. The priorities of the NCHERC include surveillance and monitoring of HIV infection and AIDS, epidemiological studies of transmission and disease progression, identification of social and behavioural factors affecting HIV disease and the establishment of Australia as a primary site for clinical trials of HIV therapy. As an extension of its role in HIV/AIDS, the Centre also carries out epidemiological and clinical research into other blood borne viruses, particularly hepatitis C and sexually transmitted infections. Another significant area is the NCHERC’s contribution to international clinical research and provision of research expertise and training to countries of the Asia-Pacific region.

National Perinatal Statistics Unit (Australian Institute of Health and Welfare)

The National Perinatal Statistics Unit is a collaborating unit of the Australian Institute of Health and Welfare within the Faculty of Medicine of the University of New South Wales. Located on the Prince of Wales Hospital Campus, the Unit is linked with the School of Paediatrics and the Sydney Children’s Hospital and other groups in the Faculty. The Unit collaborates with State and Territory perinatal groups and various professional groups in developing national perinatal data systems. The Unit’s objectives are to monitor and interpret national perinatal mortality and morbidity; to provide a limited perinatal epidemiology service; and to conduct epidemiological research.

National Drug and Alcohol Research Centre

The National Drug and Alcohol Research Centre (NDARC) was established as a Centre of Excellence at the University of New South Wales in May, 1986. It is funded by the Commonwealth Department of Health and Aged Care.

The overall mission of NDARC is to undertake research and related activities that contribute to a more effective and efficient Australian treatment response to alcohol and other drug-related problems.

It undertakes this work in collaboration with the Schools of Community Medicine and Psychology in the University, with collaborating centres in other States and Territories, and through international collaboration.

Prince of Wales Medical Research Institute

The Prince of Wales Medical Research Institute is an independent institute affiliated with the University. Since its opening in 1993, it has grown to become the largest aggregate of research nationally on the functions and disorders of the brain and nervous system. It has a staff of 80, including six at professor or associate professor level, and attracts almost $3m p.a. in peer-reviewed funding. Major lines of research include human sensation, balance and movement: autonomic nervous system; neuro-pathology; and clinical neurophysiology, nerve and spinal cord injury, pain.

The Simpson Centre for Health Service Innovation

The Simpson Centre is a NSW Government funded Research Centre with a strong history of applied research and health service innovation. The genesis of The Simpson Centre was in response to increasing pressure for practical solutions to improve acute services. This has now expanded to include research across traditional boundaries to link with community based health care delivery. The principal objectives of the Simpson Centre are to: innovate, evaluate research and develop health service systems; disseminate research results and facilitate implementation of validated service innovation. This approach also incorporates examination of cultural and psychosocial factors influencing service delivery and utilisation.

Skin and Cancer Foundation

The Skin and Cancer Foundation was established in 1978 and is affiliated with St. Vincent’s Hospital. The Foundation has four Dermatology registrars and a research fellow as well as undergraduate students who attend the dermatology clinics. A broad range of clinics are devoted to the diagnosis and treatment of skin cancer, psoriasis, contact dermatitis, vitiligo and pigmented skin lesions. There is a large dermatopathology service. Clinical trials, as well as research in occupational dermatoses and histopathology are pursued. The Foundation provides Sunscreen Testing and Irrancy Testing for new products.

The Foundation is active in community education relevant to skin disease. It has also established a second clinical and teaching facility at Westmead.

Victor Chang Cardiac Research Institute

The VCCRI was established in 1994 to honour the vision and memory of the late Dr Victor Chang. It is a member of the St Vincent’s Hospital Campus, affiliated with the University of New South Wales, and accredited by the National Health and Medical Research Council. It aims to conduct the highest quality fundamental research into cardiovascular diseases, with a major emphasis on the prevention, diagnosis and treatment of heart muscle diseases. It currently has active research programs in molecular cardiology relating to the mechanisms of cardiac hypertrophy and signal transduction; the genetics of cardiovascular diseases; cardiac arrhythmias and mechanics; transplantation biology; vascular bioengineering, and the pathophysiology of cardiac ischaemia and coronary restenosis.

Computing at UNSW

The Division of Information Services manages Information Technology at the University level and also runs the University Library at UNSW. All students and staff are given an e-mail address and off campus Internet access is available via a UNSW modem pool at an hourly rate. The Medicine Computing Support Unit manages computing services for the Faculty of Medicine. A Helpdesk service is available for staff on Tel 9385 1333, and all queries should be initially directed to this number or emailed to helpdesk@unsw.edu.au. Students should seek support from the DIS-Connect desk on 9385 1777.

More information about all aspects of Information Technology at UNSW can be found at the following Web sites:
Faculty of Medicine http://www.med.unsw.edu.au
UNSW http://www.unsw.edu.au
DIS-Connect desk http://www.disconnect.unsw.edu.au
Division of Information Services http://www.dis.unsw.edu.au
The Biomedical Library

The Biomedical Library provides library services for staff and students from the Faculty of Medicine and the Faculty of Life Sciences. It is closely associated with the libraries of the teaching hospitals of the University and with the Curran Foundation Library at the Garvan Institute of Medical Research. The Biomedical Library is located on levels 2, 3 and 4 of the Matthews Building Annex and is physically connected to the other Special Libraries via a link through Level 3 of the Main Library building.

All Biomedical Library material has a MB or MBQ prefix. Serials are shelved on level 3 and 4, in alphabetical order by title. Details about the Biomedical Library books, serials, multimedia and audiovisual material can be found in the Library catalogue.

In addition, the Biomedical Library provides access to a wide range of biomedical databases, full text electronic journals, and the best medical and life science web resources.

Two computer laboratories (a Pentium Lab and an Imac Lab) are available for the use of students from the Faculty of Life Sciences and the Faculty of Medicine (swipecard access needs to be arranged - ask at the Biomedical Library for more details). The labs provide access to the Internet, Word, Excel and to teaching programs provided by academic staff.

Professional staff are available at the Information Desk on Level 2 to provide reference services and to assist in the use of the catalogues, the Internet, and biomedical databases. Classes are also provided which ensure students and academic staff can make best use of these information resources.

The Library provides special services for external students and remote users. Details of these services are listed on the Library's home page.

(http://www.library.unsw.edu.au/~biomed/biomed.html)

The Biomedical Library homepage facilities easy access from the desktop for staff and students, both on campus and off campus, to databases, electronic fulltext journals (click on electronic resources), and subject guides, developed to assist teaching and learning (click on subject links).

The University of New South Wales Medical Society (Medsoc)

The University of New South Wales Medical Society (Medsoc) is the representative body of the medical students of the University. Besides providing a medical bookshop, it has the primary functions of initiating and maintaining communication between students, medical educators and administrators both within the University and outside of it. Medsoc also hosts a number of educational events and social events for its members, in order to promote a pride in and a sense of belonging to the Faculty. Membership is free and automatic to all medical students.

Medsoc offers a panorama of social events, including the First Year Orientation Camp, a combined Harbour cruise (with medical students from Newcastle and Sydney Universities), regular BBQ's on the medical lawn, the Medsoc Classical Quest, the Medsoc Talent Quest, Trivia Quiz and the Medicine Ball (held at Luna Park in 2000). Last year Medsoc had an International Students' Dinner for international students as well as a huge Carnival on the Medical Lawn with Patch Adams as guest of honor.

Medsoc offers a number of speaker and educational nights including the Elective Seminar Night, Viva Survivor, Women in Medicine and the annual Spring Symposium. Last year Medsoc initiated the Student Support Programme which has among its features the development of a mentoring programme and a set of student skills workshops for first year students.

A biannual journal Iiidioglossia is produced by the Society to keep members informed. Hopefully by the time you read this Medsoc will also have an up and running website to further facilitate medical student interaction.

The Society maintains communication with all levels of Faculty through the President, Vice-Presidents and Year Representatives, while other Medsoc members hold positions on the Student Guild (UNSW's peak student representative body). These officers together with the Secretary, Treasurer, Casco Representative, Bookshop Manager and AMSA Representative constitute the Medsoc Executive which is elected annually in October. Active Medsoc members work in close liaison with the Medical Faculty through various boards and committees, on projects of significance to medical students.

At a national level UNSW Medsoc is affiliated to AMSA (the Australian Medical Students' Association) to ensure our concerns and views are expressed at a national level. This affiliation ensures that medical students are represented at both a University and Federal level. Medsoc takes a direct interest in medico-political issues and constantly updates its members on developments affecting medical students and doctors.

All students are encouraged to participate in the Society's activities and to attend the Medsoc meetings which are held on the first Wednesday of every month in the Edmund Blackett Lecture Theatre at the Prince of Wales Hospital. Enquiries should be addressed to the Secretary of the Medical Society, c/- Medsoc Bookshop, Old Morgue Building, Prince of Wales Hospital, Randwick NSW 2031. Free food and drinks are provided at all Medsoc meetings.

The Medsoc Bookshop is the most important service provided by the Society to students. Textbooks, white coats and diagnostic equipment may be bought cheaply, usually between 23% and 28% off the recommended retail price. A nominal joining fee is payable.

The Medsoc Bookshop is student managed to ensure we always get the best prices available. The Bookshop is located at the Barker Street entrance to the Prince of Wales Hospital. Enquiries may be made by phone on (02) 9382 2121, or by fax on (02) 9396 2343.

The Rural Health Unit

The Rural Health Unit was established in 1995 to help address the chronic shortage of doctors in rural areas. Since this time the Unit has seen a rapid growth in personnel and student activities.

The principal areas of responsibility of the Rural Health Unit are:

- Administration of special entry schemes, such as the Rural Students Entry Scheme (RSES);
- Promoting Medicine to rural students;
- Supporting rural students in Medicine;
- Encouragement and support students who are interested in pursuing a career in rural health;
- Promoting rural health through various avenues, eg. the media and lobbying to the government;
- Promoting rural health as a viable alternative to urban based medical practice;
- Providing a forum for communication between metropolitan and rural health professionals, eg. workshops;
- Conducting research into rural health issues; and
- Supporting the UNSW Greater Murray Clinical School which will increase the opportunities for rural clinical learning.

The Rural Health Unit is a service provided by the University to students. Textbooks, white coats and diagnostic equipment may be bought cheaply, usually between 23% and 28% off the recommended retail price. A nominal joining fee is payable.

The Medsoc Bookshop is student managed to ensure we always get the best prices available. The Bookshop is located at the Barker Street entrance to the Prince of Wales Hospital. Enquiries may be made by phone on (02) 9382 2121, or by fax on (02) 9396 2343.

The University of New South Wales Medical Society (Medsoc)

The University of New South Wales Medical Society (Medsoc) is the representative body of the medical students of the University. Besides providing a medical bookshop, it has the primary functions of initiating and maintaining communication between students, medical educators and administrators both within the University and outside of it. Medsoc also hosts a number of educational events and social events for its members, in order to promote a pride in and a sense of belonging to the Faculty. Membership is free and automatic to all medical students.

Medsoc offers a panorama of social events, including the First Year Orientation Camp, a combined Harbour cruise (with medical students from Newcastle and Sydney Universities), regular BBQ's on the medical lawn, the Medsoc Classical Quest, the Medsoc Talent Quest, Trivia Quiz and the Medicine Ball (held at Luna Park in 2000). Last year Medsoc had an International Students' Dinner for international students as well as a huge Carnival on the Medical Lawn with Patch Adams as guest of honor.

Medsoc also hosts a number of speaker and educational nights including the Elective Seminar Night, Viva Survivor, Women in Medicine and the annual Spring Symposium. Last year Medsoc initiated the Student Support Programme which has among its features the development of a mentoring programme and a set of student skills workshops for first year students.

A biannual journal Iiidioglossia is produced by the Society to keep members informed. Hopefully by the time you read this Medsoc will also have an up and running website to further facilitate medical student interaction.

The Society maintains communication with all levels of Faculty through the President, Vice-Presidents and Year Representatives, while other Medsoc members hold positions on the Student Guild (UNSW's peak student representative body). These officers together with the Secretary, Treasurer, Casco Representative, Bookshop Manager and AMSA Representative constitute the Medsoc Executive which is elected annually in October. Active Medsoc members work in close liaison with the Medical Faculty through various boards and committees, on projects of significance to medical students.

At a national level UNSW Medsoc is affiliated to AMSA (the Australian Medical Students' Association) to ensure our concerns and views are expressed at a national level. This affiliation ensures that medical students are represented at both a University and Federal level. Medsoc takes a direct interest in medico-political issues and constantly updates its members on developments affecting medical students and doctors.

All students are encouraged to participate in the Society's activities and to attend the Medsoc meetings which are held on the first Wednesday of every month in the Edmund Blackett Lecture Theatre at the Prince of Wales Hospital. Enquiries should be addressed to the Secretary of the Medical Society, c/- Medsoc Bookshop, Old Morgue Building, Prince of Wales Hospital, Randwick NSW 2031. Free food and drinks are provided at all Medsoc meetings.

The Medsoc Bookshop is the most important service provided by the Society to students. The Medsoc Bookshop is student managed to ensure we always get the best prices available. The Bookshop is located at the Barker Street entrance to the Prince of Wales Hospital. Enquiries may be made by phone on (02) 9382 2121, or by fax on (02) 9396 2343.
Indigenous Health Section

This is supervised by the Rural Health Unit and the activities are broadly:
- Promotion of Medicine to Indigenous students;
- Administer the Indigenous students Pre-Medicine Program, a preparation to the medical course;
- Student selection;
- Student support;
- Curriculum Development;
- Development of partnerships with Indigenous communities.

Undergraduate Rural Health Society

The rural health club has been established within the Faculty to provide:
- undergraduate students with information about career options and encourage their choice of a career in rural Australia;
- undergraduate students with information concerning issues in the provision of health services in rural Australia; and
- practical experience of working and living in rural areas through organised weekend field trips.

The Society may be contacted through the administrator, Rural Health Unit, School of Community Medicine tel (02) 9385 3250.
Selection into the Faculty of Medicine

Entry is competitive and applications are considered and assessed on academic merit. There is no special provision for 'mature age entry' to Medicine.

There is a small intake quota for applicants who have completed or partially completed tertiary studies. Such applicants are assessed on the basis of their tertiary results in conjunction with their matriculation results. Competition is such that an outstanding level of academic achievement is required. Because of the integrated nature of the program it would be exceptional for admission to be granted to other than first year.

Applicants who have completed a Year 12 qualification for the third or subsequent time will have a 5% penalty imposed on the most recent attempt. Applicants seeking entry on the basis of a Year 12 qualification obtained after having been admitted to a tertiary institution and having recorded a result will also have a 5% penalty imposed on the Year 12 UAI or equivalent.

Overseas Students

Applicants from overseas may only compete for entry to the medical program as either fee paying students or as holders of a scholarship awarded by the Australian Government. Enquiries regarding admission of overseas students should be directed either to the Director of International Programs or the Admissions Officer, Faculty of Medicine, both at the University of New South Wales, Sydney NSW 2052, Australia. Enquiries regarding Australian Government scholarships should be directed to the local Australian Diplomatic Mission.

Assumed Knowledge

For entry in 2001 and beyond there are no prerequisites. However there is assumed knowledge. Assumed knowledge is a level of achievement at the HSC (or equivalent) considered desirable for successful study in a program or first year course. Students who do not have the assumed level of knowledge are not prevented from enrolling, but may be placed at a considerable disadvantage.

Prospective students are advised that while it is not a requirement, they should include Physics in their high school program as knowledge of this discipline is useful in the first years of the medical program. Students who have not included Physics in their high school program are strongly advised to undertake the short 'bridging program' in Physics organised at the University of New South Wales preferably before commencing enrolment in the medical program, or at least before commencing the second year of the standard medical program. There is also an assumed knowledge of basic organic chemistry. A knowledge of biology is also desirable.

It should be noted that it is assumed that upon enrolment students have an adequate command of English language and communication skills. Those students who feel they may lack skills in this area should consult with their lecturers or tutors, or staff of the Office of the Dean, who can arrange special English language support classes. Students who do not have adequate English language communication skills may not be permitted to progress in the program and may be required to complete satisfactorily an additional remedial English program before being deemed as having passed the year.

Admission of Indigenous Students

The Faculty may admit suitably qualified Aboriginal and Torres Strait Islander people. A pre Medicine Program, run from mid January for one month is part of the preparation and selection processes for Indigenous students applying for medicine. Further information regarding the admission criteria may be obtained from the Aboriginal Education Program on (02) 9385 3805 or (02) 9398 2611.

Admission of Disadvantaged Students (ACCESS Scheme)

The Faculty may admit, within quota, a number of students of high academic potential whose education has been disadvantaged over a two year period by circumstances beyond their control. Further information may be obtained from the Access Scheme Co-ordinator at the University on (02) 9385 5434.

Rural Student Entry Scheme

The Faculty has set aside thirty places in its medicine program intake each year for students of rural origin who are able to demonstrate to the Faculty that they meet a number of selection criteria. The scheme is designed for high school, undergraduate and graduate students. Further information may be obtained from the Rural Health Unit, School of Community Medicine at the University, tel. (02) 9385 3250

Application Procedures

Applications for entry into the Faculty by all local students and those overseas students who are completing an Australian Higher School Certificate in 2000 should be directed to the Universities Admissions Centre, Locked Bag 500, Lidcombe, NSW 2141, telephone (02) 9330 7200. The closing date for application is generally 30 September of each year but may be extended on payment of a late fee. Overseas students who are not completing an Australian Higher School Certificate in 2000 should apply through the Admissions Office, University of New South Wales, UNSW Sydney, NSW 2052, telephone (02) 9385 3156 by 15 December 2000.
This six year program leads to the award of the degrees of Bachelor of Science (Medicine), Bachelor of Medicine, Bachelor of Surgery – BSc (Med) MB BS.

These degrees, which are in effect a single degree, may be awarded with Honours Class 1; Honours Class II, Division I; Honours Class II, Division II or at Pass level. The award of honours is determined on the basis of a student's performance throughout the six year program, and is usually obtained by using the weighted average mark for each year, calculated by weighting the courses according to units of credit.

On completion of Year 3 of the six year program, students also qualify for the degree of Bachelor of Science (Medicine). Students would not ordinarily be awarded the BSc(Med) until the completion of the requirements for the award of the MB BS. However, students who have completed the requirements for the award of the BSc(Med) and are leaving the Medicine Program 3801 (BSc(Med)MB BS), whether through their own decision to withdraw or upon exclusion by the University, are eligible to be awarded the BSc(Med) degree at that stage.

Students who have achieved a high standard in their studies may undertake an additional one year program of supervised research leading to the award of the BSc (Med) Honours. For details see the program description for 3831.

Objectives of the Medicine Program

The objectives of the Medicine program are:

1. To produce a graduate with knowledge of medical and behavioural sciences sufficient to understand the scientific basis of medicine and to go forward with medicine as it develops further.
2. To provide a graduate with the flexibility of outlook and training necessary to progress to any field of endeavour in medicine or related disciplines.
3. To provide education in clinical methods and patient care in the main branches of medicine and surgery so that the graduate could undertake patient care under supervision at the level of an intern.
4. To help the graduate understand professional and ethical principles and to be at all times mindful of the individual's obligations to patients, colleagues and the community.

Supplementary Assessment

Details of assessment requirements are contained in the sections on particular years and courses in the program. The following regulations relate to supplementary assessment, which apply to all years of the Medicine program.

Course examiners may, in the time between the sitting of an assessment and the meeting of the Assessment Committee, require students to present themselves for further assessment to resolve any doubts as to a student's performance. After the Assessment Committee meets further assessment may be given to allow the Assessment Committee to resolve a doubt. In Years 3, 4 and 5 such additional assessment is usually undertaken in December and in Years 1 and 2 in the following January and February. Such further assessment may be given when students, through illness or some other acceptable circumstances, have been prevented from taking one or more of the assessments or have been disadvantaged during the assessment.

In Year 5, course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5.4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5.4.

Further assessment may not be granted when the composite mark accurately reflects failure to achieve the required standard of knowledge and understanding of the course.

Special Consideration

Students who have been prevented from taking assessments or have been disadvantaged during assessments are required to apply at the Student Centre for special consideration. Submissions of details of any sickness or disadvantage must be in accordance with the University rules on special consideration as printed in the 'UNSW Student Guide'. Special consideration requests will normally not be considered if more than seven days have elapsed since the final examination in the affected course or courses.

Show Cause

The Faculty's Assessment Committee requires all students to show cause why they should be allowed to re-enrol if, as a result of failures, their progress will result in their taking more than one year longer than the normal length of time for their program.

Advice to Students on Computing Requirements

The stage has been reached where the use of information technology in education is no longer novel, but is a standard tool used widely by lecturers and students. Prospective students need to be aware that UNSW is a place where information technology will be integral to their education, and that staff can expect students to have access to and use information technology.

UNSW expects all new students to have offcampus access to a standard modern computer with CD drive and Internet connectivity (e.g. via a modem). The software on the computer should include:

- a word processor able to import and export RTF files
- a spreadsheet program able to import and export ASCII delimited tables
- a drawing/painting program able to import and export images in widely used formats such as GIF, JPEG, TIFF or PNG
- software able to read PDF and Postscript files (1)
- a Java 1.1 capable Web browser that supports HTML 2.0 (1)
- software to enable file transfer using the FTP protocol (1)
- networking software to enable TCP/IP connection (e.g. via a modem using PPP) (1)
- email software able to link to a popserver
- anti-virus software (1)

(1) UNSW’s Division of Information Services is able to provide software of this type with students being charged only for handling and media costs.

As computers remain expensive items, UNSW will provide limited off-campus computer facilities that meet these standards for students who are unable to obtain access to off-campus access to such resources.

Student Photographs and Identification Badges

In Year 1 of this program, each student is required to be photographed during the first session. These photographs are required for School and Faculty purposes and are also used to produce identification badges, which must be worn in the hospitals.
Immunisation for Medical Students

The Faculty's policy on the immunisation of medical students is as follows:

All students should be aware of their immunity or lack of immunity to common infectious diseases which they will encounter during clinical training and later in practice. Students without a history of past illness or immunisation will be at risk of acquiring certain infections and subsequently at risk of transmitting those infections to patients.

All Students
In the absence of a reliable history of immunity, students are advised to be immunised against the following infections: rubella, measles, mumps, hepatitis B (HBV) and tuberculosis (TB). A personal history of mumps, HBV and TB or a history of past immunisation against rubella, measles, mumps and HBV is reliable in predicting immunity. It is not necessary to have pre-immunisation antibody testing performed if you are uncertain of your immunity. Skin testing (Mantoux test) for TB should be performed before immunisation for TB.

It is also advisable that students are aware of their immune status to chickenpox (varicella). A blood test for antibodies can be performed if there is not a personal history of chickenpox.

If students require any of the above immunisations, or are uncertain of their immune status, they should see their local general practitioner or, if preferred, may attend the UNSW Health Service. The UNSW Health Service is located on the ground floor of the East Wing of the Quadrangle Building.

The Office of the Dean can provide students with information on the names and locations of medically qualified staff of the Faculty with appropriate expertise in infectious diseases who have agreed to be available to offer confidential advice on these matters, but students may prefer to consult their own medical practitioner or other medical adviser.

It is strongly recommended that documentation of past illnesses, immunisation history and results of blood test be kept for future reference. A form is available from the Office of the Dean for this purpose. It is advisable that the information on this form be verified by students' own doctors or the UNSW Health Service. Students who object to being tested or immunised should discuss their objections with their doctor.

4th, 5th and 6th Year Students
The Medical Board of NSW has recently determined that while mandatory testing for Human Immunodeficiency Virus (HIV) and HBV is not required, any medical practitioner or student has a professional responsibility to take appropriate steps to know that his/her HIV and HBV status is negative before undertaking an "exposure-prone procedure".

Such procedures are characterised by the potential for direct contact between the skin of the health care worker and sharp surgical instruments, needles or sharp tissues (spicules of bone or teeth) in body cavities or in poorly visualised or confined body sites (including the mouth). Students are usually required to undertake such procedures as part of their undergraduate program. However, students who do not know their HIV/HBV status or know that they are infected must refrain from participating. Since testing is not mandatory, no reason need be given for declining nor could any reason be inferred from a declination.

Matters relating to infectious diseases are constantly under review and the Faculty policy may be amended as the policies of the NSW Health Department or Medical Board or other relevant government bodies change.

Students who are infected with any blood-borne infections (i.e. HIV, HBV or Hepatitis C) should seek advice on their future professional development. A medical practitioner infected with HIV and/or HBV who is not impaired may be able to continue to practice medicine that does not involve exposure-prone procedures.

Medical practitioners who knowingly do not take appropriate measures to reduce their risk of transmitting infections may be liable to charges of professional misconduct if they are responsible for transmitting an infection. Students and medical practitioners in this position may be vulnerable to legal action.

Program Details

Year 1
This year is conducted in two academic sessions and consists of four courses plus four General Education courses, as shown in the table below.

Assessment

Biology is taught only in Session 1 with a final assessment at the end of that session. The other three medicine courses extend over both sessions and incorporate a final assessment at the end of Session 2. Assessments in courses which extend over the whole year also take place at the end of Session 1 in those courses but do not constitute a barrier to progression to Session 2.

Students who do particularly poorly in the mid-year assessments will be interviewed by staff from the Office of the Dean and/or an appropriate member of the academic staff, at the beginning of Session 2. Such students may discontinue without failure at that time.

Rules of Progression

Students who pass all courses in Year 1 are eligible to progress to Year 2. Students who do not pass a course are required to repeat the whole course. They are not required to repeat any course in which they have attained a pass. Where students fail 16 Units of Credit or less, they are permitted to undertake a course from Year 2 if they have met the prerequisites for that course, and that there are no timetable clashes.

Failure in General Education courses or their equivalent will not prevent a student from progressing to Year 2.

Allocation to Hospitals in Year 2

During Session 2, Year 1 students are asked to list their preferences regarding allocation to teaching hospitals. The allocation is made after the Year 1 examinations and student representatives are involved in the allocation procedure.

Year 1 Course Descriptions

For further information regarding these courses contact the course authorities.

ANAT1006 Anatomy 1
Staff Contact: Dr Dzung Vu
UOC12 HPW6 S1 S2

Objectives: To acquire sufficient knowledge of topographical, surface and radiological anatomy of the limbs, head, neck and back to form a basis for subsequent clinical studies; to understand how a knowledge of anatomy is applied in clinical practice; to know sufficient principles of tissue histology to be able to undertake
successfully more detailed studies of histology and embryology in Year 2. An introductory course in human anatomy, embracing the disciplines of gross anatomy (topographical anatomy), histology and embryology. Teaching hours per week include: one 3-hour practical/tutorial class of Anatomy, with an additional 2-hour class of histology and embryology in Session 2 only, together with 1-2 hours of lectures in Session 1 and 2 hours of lectures in Session 2. Gross anatomy of the musculoskeletal system; topographical and radiological anatomy of the upper and lower limbs, head and neck, and back; introduction to microscopy and cell science; morphological aspects of cell function; histology of basic tissues (epithelia, muscle, nerve and connective tissue); early human development in utero.

Assessment: In addition to the end of year assessment, there is a mid-year assessment and a mid session assessment which contribute to the final assessment for the course but do not constitute barriers.

**BIOC1319**

**Biochemistry for Medical Students**
Staff Contact: Associate Professor Kevin Barrow

**UOC12** HPW6 S1 S2

**Objectives:** To obtain sufficient understanding of chemistry and biochemistry to recognise the essential molecular basis of all living systems; to acquire a knowledge of chemistry and biochemistry essential for the study of physiology and pharmacology; to gain experience in laboratory skills and the use of the scientific method; to understand the structure, function and biosynthesis of the macromolecules that are indispensable to life; to gain insight into the ways in which the body uses metabolic fuels and the regulation of these metabolic processes so that growth and homeostasis are maintained; to understand the basis of practical biochemistry, including those procedures that are relevant to clinical diagnosis.

**Assessment:** In addition to both a mid-year and end of year examination, there is continuous assessment throughout the year.

**MFA1001**

**Introductory Clinical and Behavioural Studies**
Staff Contact: Dr Norman Kelk and Ms Sue Beecher

**UOC6** HPW4 S1 S2

**Objectives:** To enable students to gain a better understanding of themselves and other people as a basis for the respectful and considerate treatment of patients; to stress the importance of seeing patients as people; to develop basic interviewing skills; to heighten cultural awareness; to develop understanding of the experience of loss; to gain experience in and understanding of the group process in preparation for working in teams; to impart to students an understanding of illness in terms of a biopsychosocial model; to provide an introduction to human development through the life cycle, and health problems of people at different stages; to develop in the student an awareness of the different family, socioeconomic, and ethnic backgrounds of people in Australian society and of the relevance of these backgrounds to the physical and emotional states of patients.

**Brief Description:** Students attend a three hour small group tutorial each week in Sessions 1 and 2 and 21 two hour lectures spread throughout Session 1 and Session 2. In the tutorial groups, students learn interpersonal communication skills, group dynamics, self awareness and cultural sensitivity through participatory exercises. Students take the initiative in preparing and presenting group projects. Lecture themes include: the individual experience of health and illness in terms of a biopsychosocial model; introductory human development through the life cycle (childhood, adolescence, adulthood and old age); the particular problems of disadvantaged cultural groups (e.g. Aborigines, recent migrants) and communication theory; theory of groups; history of medical science; and alternative medicine. The lectures are supported by relevant films and by community visits, activities and discussions in the tutorial groups.

**Assessment:** Two major assignments, the first assessing basic interpersonal communication skills, and the second the ability to take a broad social-psychological history. Participation in tutorials and a group project is assessed. There is an examination at the end of Session 2 on the material covered in the lectures. Students must pass the examination and the communication skills assignment as well as the whole subject to progress to Year 2.

**PHPH1004**

**Biology for Medical Students**
Staff Contact: Dr Stewart Head

**UOC4** HPW4 S1

**Objectives:** To provide an understanding of basic biological principles for the continuing study of human biology and medicine. An introductory course consisting mainly of lectures which will be complemented by practical classes and excursions. Topics include: basic cell biology; introductory genetics; invertebrates; parasites; ecology, evolution; comparative anatomy and physiology.

**Assessment:** Assessment is based on a practical examination during the session and a theory examination during the session and a theory examination at the end of Session 1.

**Year 2**

This year is conducted in two academic sessions. Teaching in the courses Anatomy 2, Medical Biochemistry and Genetics, and Physiology is integrated and aims to give students a broad knowledge and understanding of human structure and function based on scientific principles, relevant to further study in medicine. In Clinical Studies 2, students make contact with patients and the physical aspects of disease, in order that they may apply their knowledge and understanding to the clinical situation. The strand dealing with human behaviour which was studied in Year 1, is continued.

**Assessment**

Major assessments take place in the November/December assessment period but progressive assessments may take place throughout the year. Details of progressive assessments are provided by the appropriate course authority.

**Rules of Progression**

Students who pass all courses in Year 2 are eligible to progress to Year 3. Students who do not pass a course are required to repeat the whole course. They are not required to repeat any course in which they have attained a pass. The exception is that they are required to repeat Clinical Studies 2 while they are repeating a Year 2 course or courses, regardless of whether or not they have passed Clinical Studies 2. Where students fail 16 Units of Credit or less, they are permitted to undertake a course from Year 3 if they have met the prerequisites for that course, and that there are no timetable clashes.
Year 2 Course Descriptions
For further information regarding these courses contact the course authorities.

ANAT2007 Anatomy 2
Staff Contact: Dr Elizabeth Tancred
UOC14 HPW7 S1 S2
Prerequisites: ANAT1006, PHPH1004
Objectives: To gain knowledge and understanding of the gross and microscopical structure of the internal organs and the brain; to be able to correlate embryonic development with the structure of normal organs and tissues and with the establishment of the anatomical relationships in the body; to correlate function and structure in the organ systems; to acquire basic understanding of the clinical relevance of the anatomical structures studied. Instruction is organised according to the organ systems and includes the cardiovascular, respiratory, alimentary, urinary, genital, endocrine, lymphatic and nervous systems. In all instances the clinical relevance of the anatomical structures is emphasised. The course consists of three subsections, each having separate lectures and tutorials: Gross Anatomy, Histology and Embryology, and Neuroanatomy. Gross Anatomy is taught in Session 1, Neuroanatomy is taught in Session 2 and Histology and Embryology are taught in both Sessions 1 and 2. Neuroanatomy covers the basic organisation and function of the brain and spinal cord with particular reference being made to the sensory and motor systems.
Assessment: Apart from continuous assessment tests and practical examinations there are separate examination papers for Histology and Embryology (S1 and S2). Gross Anatomy (S1) and Neuroanatomy (S2). Students must pass each component to pass the whole course.

BIOC2329 Medical Biochemistry and Genetics
Staff Contact: Dr Vincent Murray
UOC8 HPW4.5 S1 S2
Prerequisites: BIOC1319, PHPH1004
Objectives: To acquire knowledge of biochemical aspects of the functions and control mechanisms of the major body systems in humans; to understand the regulation of the adaptive responses of body function to different forms of stress; to understand these biochemical processes which are of particular relevance to clinical practice and a study of pharmacology; to gain experience in problem-solving approaches to the biochemical aspects of normal and disease states; to introduce students to those aspects of modern molecular biology relevant to humans; to provide a basis for the study of human genetics.

Lectures, audio-visual and clinical demonstrations deal with endocrine systems, lipid metabolism, connective tissue, neurochemistry; purine, pyrimidine and nucleic acid metabolism, recombinant DNA procedures, gene probes, pedigree analysis, inborn errors of metabolism, X- and Y-linked inheritance, human cytogenetics. Clinical material illustrates the principles being studied and underscores the relevance of the course to the study of medicine.
Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

MDSG2001 Clinical Studies 2
Staff Contact: Professor John Dwyer
UOC4 HPW2 S1 S2
Prerequisites: MFAC1001, ANAT1006, BIOC1319, PHPH1004
Objectives: To extend knowledge and understanding of normal structure and function by demonstrating the disturbances which occur in disease. These studies are closely integrated with Anatomy, Physiology and Biochemistry so that the application of basic medical science to the clinical situation can be clearly seen. Students will attend a teaching hospital for half a day each week to see patients from whom they will take histories. During this time there will be one group tutorial for the presentation and discussion of clinical histories and the demonstration of clinical signs. In these sessions, students will acquire the ability to take a clinical history from a patient with an uncomplicated medical problem, present the history, both orally and in writing, using clear unambiguous medical terminology and in a standard form. To demonstrate how symptoms and signs can be interpreted as disorders of function and how this knowledge aids in the process of diagnosis. By the end of the year it is important that students are familiar with the basic requirements of a medical history and have seen a number of examples of disordered anatomy and physiology.
Assessment: Examination of two written clinical histories per session and examination of a student's ability to present these histories orally. In Session 2, students are required to submit a case study. There is an emphasis on communication skills. Additionally, there will be continuous assessment by tutors. Students who fail to reach a satisfactory standard will be required to undertake further assessment which may include a clinical and vivere examination.

PHPH2018 Medical Physiology 1
Staff Contact: Dr Richard Vickery
UOC16 HPW8 S1 S2
Prerequisites: PHPH1004, BIOC1319
Objectives: To gain knowledge and understanding of the function of the cellular elements of the body and the function of certain major body organ systems in humans: to gain experience in the use of medical instrumentation and in the measurement of variables in mammalian biological systems; to gain experience in problem-solving approaches in the study of the physiology of the normal person; to integrate knowledge of anatomy, biochemistry and physiology to provide an understanding of human structure and function. Systematic lectures, tutorials, practicals and demonstrations deal with cells and excitable tissues, circulation, respiration, kidney and body fluids, gastro-intestinal tract and temperature regulation. Attention is paid to the principles of physics and statistics necessary to understand the functioning of cells and organ systems. Clinical material illustrates the relevance of the course to the study of medicine.
Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

PSCY2101 Human Behaviour
Staff Contact: Dr Ute Vollmer-Conna
UOC6 HPW3 S1 S2
Prerequisites: MFAC1001
Objectives: To provide students with key concepts in the five main topic areas and demonstrate the practical application of these concepts in medical practice. The five main topic areas are: research methods in behavioural sciences, psychology in relation to medicine, sociocultural factors in medicine, bioethics, and human sexuality. Students are encouraged to develop an understanding of human behaviour as the result of complex interactions between multiple factors, so that they are better able to appreciate and respect their patients and colleagues as persons. Taught over both sessions.

Didactic material and some case material is presented in lectures and the tutorial program is structured to consolidate this information. Emphasis is placed on developing skills in clear professional communication, with feedback on written assignments and tutorial presentations. Tutorial exercises encourage the development of supportive and co-operative working relationships among students and provide an introduction to interviewing skills. Specific topics covered include: risk behaviours; anxiety; stigma; social class and health; the sexual response and how it changes across the lifespan; and a range of bioethical topics including human and animal experimentation, euthanasia, the doctor and the state. A handbook for the course is produced each session and may be borrowed from the Biomedical Library Closed Reserve or purchased from the School of Psychiatry.
Assessment: In Session 1, assessment consists of two written examinations, a tutorial presentation and a class test. In Session 2, students are required to write a major essay on Bioethics, present a tutorial paper and sit a final written examination.
Year 3

Year 3 is conducted in two academic sessions. The principal campus-based courses of the year are Medical Pharmacology, Medical Physiology, Microbiology for Medical Students and Pathology. Clinical Studies 3 continues the clinical program commenced in first year. Students also take the course Medical Ethics and Health Law, which builds on material presented in first year ICBS and second year Human Behaviour. An understanding of Immunology is also required to enable students to deal with the pathogenesis of specific diseases. To facilitate this understanding, a series of introductory lectures in Immunology provide an outline of the structure and function of the immune system, covering the cells and mediators involved in the immune response. The Immunology program is integrated with the Microbiology course on the response to infectious diseases, and with the Pathology course and is presented in an interdisciplinary fashion, providing a basis for subsequent instruction in the diagnostic and therapeutic aspects of clinical immunology in the later years of the curriculum.

Assessment
In addition to the end of year assessment, mid-year progress assessments are programmed in some courses.

Rules of Progression
Students who pass all courses in Year 3 are eligible to progress to Year 4. Students who do not pass a course are required to repeat the whole course. They are not required to repeat any course in which they have attained a pass. The exception is that they are required to repeat Clinical Studies 3 while they are repeating a Year 3 course or courses, regardless of whether or not they have passed Clinical Studies 3.

Year 3 Course Descriptions
For further information regarding these courses contact the course authorities.

CMED3001 Medical Ethics and Health Law
Staff Contact: Associate Professor Paul McNeill
Prerequisites: ANAT2007, BIOC2329, PHPH2018, PSCY2101
Medical Ethics and Health Law builds on medical ethics presented particularly in second year Human Behaviour, to give students additional preparation for ethical issues which arise in their placements in hospitals, general practice and community settings during Years 3 to 6. The subject introduces students to medical practitioners' responsibilities in law including the duty of care, obligations to maintain privacy and confidentiality, and the legal basis of registration and de-registration of medical practitioners. Principles of ethics and rules of law are considered in relation to specific issues including cloning and genetic engineering, withdrawal of treatment, and the funding of health care. Tutorials are based on material covered in lectures and seek to expand students understanding of ethics and law through discussion, structured debates and tutorial exercises. The overall aim of the subject is that students learn to demonstrate and apply an understanding of ethics and law as a part of their commitment to social responsibility and considerate and appropriate treatment of patients (and others) in the practice of medicine.
Assessment: Consists of two tutorial assignments and an essay (which total 50% of the marks) and an end of session examination (contributing a further 50%).

MDSG3001 Clinical Studies 3
Staff Contact: Professor John Dwyer
Prerequisites: ANAT2007, BIOC2329, PHPH2018, PSCY2101
Objectives: To acquire and practice the skills of history taking and physical examination in order to elicit the features of common diseases. Interpretation of the mechanisms of production of the presenting signs and symptoms requires the integration of clinical skills with basic sciences, a concept introduced in Year 2. Clinical Studies in Year 3 builds on the experience obtained in Year 2 and introduces the student to clinically relevant pathophysiology, with particular emphasis on the mechanisms associated with the development of symptoms and physical signs which indicate disease. The components of the course are: 1. Lectures in medicine and surgery which introduce the student to the more common diseases and clinical problems, with emphasis on material relevant to history taking and to physical examination. The teaching builds on and complements related discussions in physiology, pathology, pharmacology and microbiology. Where possible, the information supplied in Clinical Studies 3 is integrated with related material being presented by the other disciplines. 2. Students spend two afternoons a week at a teaching hospital for one surgical and one medical tutorial. Tutors will be building on the communication skills learnt in the first and second years of the program. By the end of third year, students must be able to obtain a full history from patients in a disciplined and prescribed manner and present that history both orally and in writing. In addition, students must complete at least one full history per week in their own time to master these essential skills and these histories will be marked by tutors. Physical examination skills will be taught during the third year. Students are expected to master the routine associated with conducting an examination of the major body systems and be able to recognise and understand the significance of those major signs which indicate the presence of pathophysiology. Surgical and medical tutors will confer regularly to discuss the progress of their students and to identify particular problems, especially those associated with communication skills. Assessment: Continuous assessment of clinical skills is carried out by surgical and medical tutors. Particular emphasis will be placed on communication skills. Students whose attendance and/or progress is deemed unsatisfactory may be precluded from participating in the end of year examinations, or be required to undertake additional clinical and vivre voce assessment. The end of year examinations will include a multiple choice question paper (MCQ), objective structured clinical examination (OSCE) and an assessment of communication skills. Students will be required to pass each of these three components of the end of year examination.

MICR3228 Microbiology for Medical Students
Prerequisites: ANAT2007, BIOC2329
Solely for students enrolled in the Faculty of Medicine.
Objectives: The overall objective is for students to understand the nature of the interactions between parasites and their human hosts, and the fundamentals of human immunology. Early lectures and tutorials are concerned with the basics of the scientific discipline of immunology. In order to achieve the microbiology requirement, students will know the causative agents of common microbial diseases and how they produce their effects, comprehend host defence processes, understand the epidemiology of infectious diseases, understand the basis of prevention and treatment of microbial diseases, appreciate the role of the microbiologist in the diagnosis and management of microbial disease and where appropriate, integrate these objectives with a knowledge of pathology and immunology. Emphasis is given to the nature of the response
of pathogens to various physical, chemical and antibiotic agents which can be used to interrupt their normal function. An analytical approach is taken to the means by which microorganisms exist in association with humans and their environment and how they gain access to tissues and produce disease. Attention is given to the mechanisms of host defence against microbial infection. Emphasis throughout the course is placed on diseases of body systems. Laboratory based classes emphasise the role of the laboratory in diagnosis and include the use of problem solving approaches to the study of microbial diseases.

Assessment: This is based on mid-year and end of year examinations as well as a major assignment and practical examination.

PATH3101 Pathology
Staff Contact: Professor Denis Wakefield
UOC10 HPW5 S1 S2
Prerequisite/s: ANAT2007, BIOC2329, PHPH2018

The discipline of Pathology forms a continuous stream of teaching of the pathogenesis of disease throughout the 3rd, 4th, 5th and 6th years of the medical curriculum. In Year 3, the course PATH3101 comprises an introduction to basic disease processes (General Pathology), ie. those fundamental processes which are common to all tissues and organs of the body. The course covers classification of disease, and deals with both congenital and acquired diseases. The program comprises lectures, tutorials, practical classes and demonstrations on responses of cells to injury, inflammation, aberrations of the blood and vascular system and specific related effects of embolism and infarction, as well as studies of normal and abnormal growth, and of healing and regenerative processes. In addition, it includes consideration of the basic processes of neoplasia and carcinogenesis, as well as an introduction to the pathobiology of some contemporary health problems as environmental toxicology. In order to integrate the teaching of pathology with clinical studies, each fundamental process will be exemplified by references to examples of diseases of organ systems (Systemic Pathology) of practical importance. Assessment: Proficiency in the course, sufficient to proceed to Year 4, will be assessed by mid-year and end of year examinations which will comprise 30% and 70% respectively of the total mark in Pathology. Both assessments will comprise theory and practical components. Progress self-assessments with automated feedback will be made available on the World Wide Web.

PHPH3014 Medical Physiology 2
Staff Contact: Dr Romualda Knihinicki
UOC8 HPW4 S1 S2
Prerequisite/s: PHPH2018, ANAT2007, BIOC2329

Objectives: To extend knowledge of normal physiology to areas not covered in Medical Physiology 1, particularly blood, the nervous and endocrine systems and reproduction; problem solving approaches are emphasised and students are encouraged to integrate their knowledge of anatomy, biochemistry and physiology to provide an understanding of normal human structure and function. Those principles of biophysics necessary for an understanding of the subject are discussed. In addition, the subject places emphasis on applied physiology, including the physiology of exercise. Some clinical physiology is included where basic physiological principles are applied to the understanding of selected clinical disorders. Teaching involves systematic lectures, tutorials, practical classes and demonstrations. Assessment: Examinations are held both mid-year and at the end of the year and cover both lecture and practical content.

PHPH3055 Medical Pharmacology
Staff Contact: Dr Kapoor
UOC10 HPW4 S1 S2

Objectives: To understand the mechanism of drug action with special reference to drugs of clinical importance; to be aware of the principles of drug interaction. Medical pharmacology is the science of drugs or chemicals used to prevent, diagnose and heal disease, as well as the role of chemicals in the environment that cause disease. The medical pharmacology subject is concerned with basic principles of drug action, including the pharmacodynamics, pharmacokinetics and toxicology of drugs of clinical importance. Assessment: Examinations are held mid-year and at the end of the year and include both lecture and practical content.

Year 4

Year 4 of the program is primarily based in the teaching hospitals and comprises 6 terms totalling 41 weeks. Of these weeks, 36 will be spent in hospitals and 5 will be spent on campus. For their time in hospitals, students will work as part of a health-care delivery team. The students' responsibilities as part of that team will be increased gradually as new skills are acquired. The philosophy inherent in education by attachment to a hospital team is important. Learning 'on the job' exposes students to real clinical situations incorporating both the medical and social implications of disease and allows the continued development of counselling skills. Thus, students will learn that hospital care should be linked to continuing care in the community, and that there is much emphasis in modern medicine on rehabilitation to maximise patients' chances of resuming their normal role in society. Reading about pathological processes, combined with team discussion of problem patients, provides the ideal environment for the retention of new knowledge. The teaching of Community Medicine is integrated with clinical studies in the teaching hospitals and is a part of the campus teaching program.

The Pathology course comprises a component of didactic teaching within the framework of the common campus program and a major hospital-based component taught through a tutorial program. The course of Clinical Pharmacology (Therapeutics) is introduced during the common campus program and reinforced during discussions of patient management as part of student attachments to clinical units.

At the commencement of fourth year, each student will receive a syllabus containing details of the integrated program for Clinical Studies, Pathology, Clinical Pharmacology and Community Medicine.

Rules of Progression

Students will be required to pass each of four separate segments of the assessment, namely: a pass in the Community Medicine continuous assessment, a pass in the Pathology viva and project report (as a combined mark), a pass in a Short Case clinical examination, and a pass in the combined written papers. Students who have not completed the General Education components of the Medicine program and who otherwise are eligible to progress to Year 5 are not allowed to progress until they have satisfied such requirements.

Year 4 Course Description

MDSG4001 Integrated Clinical and Community Studies
Staff Contact: Professor John Dywer
UOC48 S1 S2
Prerequisite/s: MDSG3001, PATH3101, PHPH3055, CMED3001, MCR4328, PHPH3014

Objectives: By the end of Year 4, students will be expected to have mastered the skills in communication, history taking, and physical examination. Students will be able to generate a list of the patient's problems which includes the physical, emotional and psychosocial aspects of the case. For each problem, students will develop a plan for problem resolution. Students will learn much about management and drug treatment during Year 4 but only the principles of management and introductory aspects of therapeutics will be assessed at the end of Year 4. As Year 4 attachments will not be repeated in Year 6, students must make the most of their opportunity to learn the management and therapeutic principles which they see in practice during their attachments. Students will be expected to interpret symptoms and signs in terms of disorders of structure and function; to understand the pathological basis of symptoms.
There will be six terms and all students will spend one of these at Liverpool Hospital. The Liverpool program will focus on general medicine and surgery and will include Community Medicine and Pathology. Program details may vary slightly at each of the main teaching hospitals responsible for the implementation of this program. Each hospital has a Clinical School Committee and a Board of Medical Studies, the latter including student membership, to oversee the hospital's programs. While students will necessarily be assigned to subspecialty units (e.g. cardiology, neurology, etc.), the attachment is not designed primarily to teach the student the details of that discipline, but rather, the approach to a patient's problems and their resolutions, is to be emphasised. This is an important consideration because, as subspecialty exposure in Year 4 cannot be uniform for all students, it is important that students are distributed to fully utilise the hospital's patients and ensure that they have sufficient contact with patients. Structured teaching during clinical weeks will be limited. There will be regular sessions each week which will feature a discussion, with a member of the Faculty, of the problems of patients on the student's ward. Pathology tutorials will be on a weekly basis and one medical lecture may be provided. The following skills are to be acquired during Year 4 or 6 of the course and the acquisition of such skills will be noted in the student's logbook after an appropriate examination: sterile technique; operating theatre procedures; cardiopulmonary resuscitation; intramuscular injection; use of ophthalmoscope; simple suture and knot-tying; application of a plaster; changing of a surgical dressing; passage of a proctoscope; passage of a naso-gastric tube; spirometry; establishment and maintenance of an intravenous line; venepuncture; rectal examination; urinalysis; urinary catheterisation. Community Medicine will be taught primarily during the common campus weeks and will include case studies, lectures and tutorials on changing patterns of disease, prevention, epidemiology, nutrition and a range of other community health problems. Case studies based on clinical cases from students' hospital attachments will be used to explore core issues in Community Medicine. This will demonstrate the application of Community Medicine principles covered in lectures and tutorials and will also reinforce links with other teaching in Year 4. At Liverpool Hospital, Community Medicine teaching will make use of the special relationship of this Hospital to the community it serves. Systematic Pathology will be taught at all hospitals throughout the year and will be integrated with clinical teaching. The program includes one tutorial per week based on prepared clinical protocols (case presentations) which will explore the orthopaedic systematics of diseases which were not covered in the context of Year 3 teaching in Pathology, or which require greater depth of coverage. Students will be required to prepare and expand on the topics listed, by reference to their own ward cases, by consultation with staff of the various departments in Pathology, as well as by reference to their recommended textbooks and specialised text or journal articles. Each student will be expected to attend a minimum number of autopsy demonstrations during the year. Additional exposure to Pathology will be attained by student attendance at Grand Rounds and Clinico-Pathological Conferences. Campus Weeks: To minimise interruptions to a student's role while attached to a clinical team, most structured teaching will be carried out during campus weeks. All students will attend the University campus for five weeks throughout the year, during which lectures in Medicine, Surgery, Clinical Pharmacology, Pathology, and Community Medicine will be provided. Community Medicine teaching will utilise the knowledge and experience gained during clinical attachments to elucidate basic principles of epidemiology, public health, and continuing care. The Pathology lectures and demonstrations will concentrate on the pathogenesis of complex disease processes which cannot be effectively covered in a tutorial format. An excursion to the NSW State Government Forensic Laboratory and Coronial Courts is a compulsory activity. Where possible, days will be arranged so that a particular subject is approached in a multi-disciplinary way. A series of correlation clinics held during campus weeks, will further emphasise the interdisciplinary approach to understanding a subject. Assessment: A multiple choice examination and a short answer paper will be given at the end of the year and will examine knowledge of Medicine, Surgery, Community Medicine, Clinical Pharmacology and Pathology discussed during the campus program and from the directed reading section in the syllabus. Assessment of Community Medicine will also involve continuous assessment by assignments through the year and the student's participation and contribution to group work. Assessment of Pathology will also involve the submission of a project report and a viva examination. In addition to the written papers, a clinical short case examination will be held. Assessment will be based on the approach to clinical examination, eliciting of abnormal signs and the interpretation of their significance. For students to be eligible to sit for the examinations to be held at the end of Year 4, they must have performed satisfactorily on each of their six clinical attachments, developed the required procedural and clinical skills (satisfactory performance in these areas must be certified in a student logbook) and successfully completed the continuous assessment requirements in Community Medicine. Tutors will be involved in continually assessing a student's progress. Those students who fail to reach a satisfactory standard may be precluded from sitting the end of year examinations, or be required to undertake additional clinical and viva voce assessment.

Year 5

Year 5 is comprised of four terms, each of nine weeks. In Terms 5:1 to 5:4 students rotate through blocks of teaching in obstetrics and gynaecology, paediatrics, psychiatry, geriatrics, general practice and subspecialties, rather than studying the courses concurrently. For this purpose students are allocated to a particular group (A, B, C, or D) and will follow the program of that group for the year. The courses studied in Year 5 are:

- MFA5001 Geriatrics/General Practice/Subspecialties
- OBST5001 Obstetrics and Gynaecology
- PAED5101 Paediatrics
- PSCY5001 Psychiatry

**Sequence of Blocks**

**Group A:**
- Term 5:1 (9 weeks) Paediatrics
- Term 5:2 (9 weeks) Obstetrics and Gynaecology
- Term 5:3 (9 weeks) Psychiatry
- Term 5:4 (9 weeks) Geriatrics/General Practice/Subspecialties

**Group B:**
- Term 5:1 (9 weeks) Obstetrics and Gynaecology
- Term 5:2 (9 weeks) Paediatrics
- Term 5:3 (9 weeks) Geriatrics/General Practice/Subspecialties
- Term 5:4 (9 weeks) Psychiatry

**Group C:**
- Term 5:1 (9 weeks) Psychiatry
- Term 5:2 (9 weeks) Geriatrics/General Practice/Subspecialties
- Term 5:3 (9 weeks) Paediatrics
- Term 5:4 (9 weeks) Obstetrics and Gynaecology

**Group D:**
- Term 5:1 (9 weeks) Geriatrics/General Practice/Subspecialties
- Term 5:2 (9 weeks) Psychiatry
- Term 5:3 (9 weeks) Obstetrics and Gynaecology
- Term 5:4 (9 weeks) Paediatrics

**Assessment and Rules of Progression**

The work of each rotating block is assessed during or towards the end of the block. Students will be required to pass in all four term examinations before progressing to Year 6. Course examiners may, in the time between the sitting of term assessments and the meeting of the Assessment Committee, require students to undertake further assessment. A student who fails one term may be required to repeat that term in a six week remedial period following Term 5:4. Students are warned that they may be required to undertake such additional assessment and should take this into account if making travel arrangements for the period after the end of Term 5:4. A student who fails two terms or more will be required to repeat all Year 5 courses.
Preparation for Year 6 Elective Term

Arrangements for Elective attachments in Year 6 must be made by the students. Students should commence these arrangements in Year 4, especially those wishing to undertake attachments overseas. See course description for MFAC6001 under entry for Year 6.

Year 5 Course Descriptions

**MFAC5001**
**Geriatrics/General Practice/Subspecialties**
Staff Contact: Professor Mark Harris
UOC12
Prerequisite/s: MDSG4001

This nine week term will start with an introductory week of tutorials in Geriatrics, Dermatology, Otorhinolaryngology and General Practice. The remainder of the term will consist of four two week teaching blocks in specialty outpatient clinics, geriatrics, rural general practice and urban general practice.

Geriatrics Objectives: To gain an understanding of diagnosis and assessment in geriatric medicine; to address the management of certain specific disorders in the elderly such as dementia, falls, incontinence, stroke, mobility disorders, dying and terminal care; to gain information on appropriate drug therapy; to gain insight into the roles of workers involved in caring for the elderly including physiotherapists, occupational therapists, speech therapists, community nurses and nurses in nursing homes; to become familiar with the broad spectrum of geriatric services including the day hospital, the acute hospital, the rehabilitation centre, the nursing home, community nursing and hospital care; to stimulate thought concerning future directions for an ageing Australia. The course consists of tutorials and practice experience in a range of health care facilities.

Assessment: Students are assessed on a viva voce, written assessments and log book completion.

General Practice

By the end of the course the students should have acquired:

1. An understanding of the knowledge, attitudes and skills required by a competent general practitioner.
2. Skills in communicating with patients especially in history taking and explaining.
4. Knowledge of the principles of management in general practice.
5. An understanding of rural general practice.

During the teaching sessions on campus, at Fairfield Hospital and during the attachments, students are introduced to: a frame of reference for general practice and the GP consultation; a problem solving approach including the ability to cope with uncertainty; responsiveness to the total patient and the patient's life; knowledge of community health resources; self assessment of communication and self directed learning; knowledge of rural practice and issues in rural health. The teaching will consist of introductory tutorials, a two week attachment in urban general practice, a day general practice skills workshop at Fairfield Hospital and a two week attachment in rural general practice. Assessment: Students will complete two assignments for the Fairfield tutorials at the end of their first (city) GP attachment, a written assignment on a rural health issue during their second (rural) GP attachment, and a final role play consultation viva assessment.

**Subspecialties**

**Otorhinolaryngology**

Objectives: To learn the basic skills of the assessment of diseases and conditions affecting the ears, nose and throat. To expose the student to the common diseases of the ear and upper respiratory system and the management of these conditions. The teaching will be organised in tutorial classes. Students will also attend specialist clinics.

**Dermatology**

Objectives: To learn the clinical symptoms and signs of the major conditions affecting the skin. To learn the diagnosis of common skin diseases and conditions and their management. The teaching will be organised in tutorial classes. Arrangements will be made for students to attend special dermatology clinics. Assessment: Students will be assessed through completion of a log attendance at subspeciality clinics and final written objective structured clinical examination.

**OBST5001**
**Obstetrics and Gynaecology**

Staff Contact: Professor Michael Bennett
UOC12
Prerequisite/s: MDSG4001

Objectives: To be able to take a history and perform a physical examination relevant to the female reproductive system; to recognise common disorders of the female reproductive system; to manage common medical gynaecological disorders likely to be encountered in primary care practice; to provide antenatal and postnatal care for normal women and to recognise deviations from normal; to be able to provide emergency care when indicated and to know the indications for referral. A program of lectures in core subjects, clinical, physiological and pathological conferences and simulated patient management problem exercises. Students are taught in small tutorial groups. Supervised clinical experience is gained in outpatient clinics, inpatient services and the labour wards of The Royal Hospital for Women, St George, Bankstown, and Liverpool hospitals. Neonatal paediatric experience is integrated with the teaching of Obstetrics and Gynaecology. Full details are described in a booklet published by the School. Assessment: Continuing evaluation of clinical work, a written examination and an objective, structured clinical examination in the last week of term.

**PAED5101**
**Paediatrics**

Staff Contact: Professor Richard Henry
UOC12
Prerequisite/s: MDSG4001

Objectives: To understand the physical, intellectual, and emotional development of children; to recognise important interactions between the child, the family and the community; to take a reliable medical history from children and parents/guardians; to perform a reliable physical examination; to communicate with children and parents/guardians; to recognise acutely ill children and initiate management; to recognise and initiate management of common paediatric disorders; to recognise the role of preventative care in child health; to recognise the roles of allied health care professionals. General Paediatrics and Paediatric Surgery are taught at the Sydney Children's Hospital (5 weeks) and Associated Hospitals including rural locations (4 weeks). Clinical clerking and practical involvement in care of inpatients are emphasised. Seminars and lectures on core material, case conferences; and instruction in clinical skills are provided. Students are expected to spend one night in four and one or two weekends per term in residence. Neonatal medicine is integrated with teaching of obstetrics and gynaecology. Assessment: Progressive assessment from clinical supervisors through the term, multiple choice, objective structured clinical assessments and clinical examinations in the last week of term.

**PSCY5001**
**Psychiatry**

Staff Contact: Professor Gordon Parker
UOC12
Prerequisite/s: MDSG4001

Objectives: To be aware of the key symptoms, signs and syndromes of psychiatric disorder; to be able to take a history and conduct a mental state examination; to have acquired those skills necessary for a doctor in general or non-psychiatric specialised practice to
decide appropriate management strategies; to be aware of, and have some experience in basic counselling skills; to be able to assess a patient's personality, psychological adjustment, coping repertoires, social function; to appreciate the importance of psychological factors in the diagnosis and treatment of illness; to be trained in interpersonal skills appropriate to clinical practice in any area of medicine; to be aware of the appropriate sections of the Mental Health Act and Guardianship Board legislation, to have received basic knowledge in special areas of development disability, forensic psychiatry, child psychiatry, transcultural and psychogeriatrics; to be competent in prescribing psychotropic medications; and to be able to use simple behavioural techniques such as relaxation training. Formal teaching seminars are held in the mornings and afternoons Monday to Friday in week 1, and mornings and afternoons Monday and Friday weeks 2-8. The remaining days are spent at Prince of Wales, St George, St Vincent's, Sutherland, Bankstown, Liverpool and Campbelltown Hospitals, where small group tutorials, case conferences and video analyses are carried out with academic and clinical staff, and clinical experience is obtained. Attachments to liaison psychiatry teams are organised so that students receive the appropriate teaching of skills related to general hospital patients. Visits to appropriate community facilities and to the Forensic Psychiatry Unit at Long Bay Gaol are organised. Voluntary attachments to Illawarra and to a number of rural sites (Wagga, Lismore, Port Macquarie, Armidale, Dubbo, Albury, Cofts Harbour and Taree) occur across the term. Assessment: A video examination is held mid-term to assess interviewing skills. A written examination is conducted on the first day of the last week of term, and viva voce examinations are carried out during that week. A liaison psychiatry report and two clinical case histones are also part of the assessment.

Year 6

The first term in Year 6 is an Elective term (MFAC6001) of 8 weeks. The remaining five terms totaling 33 weeks are devoted to the course Integrated Clinical Studies 6 (MDS66001) of which 30 weeks is based in the Teaching Hospitals and 3 weeks will be spent on campus.

Year 6 Course Descriptions

MDS66001
Integrated Clinical Studies 6
Staff Contact: Professor John Dwyer
UOC44 S1 S2
Prerequisite/s: MFAC5001, OBST5001, PAED5101, PSCY5001

Objectives: To build on the student's experiences in Years 4 and 5 of the course. To ensure that during clinical attachments in Year 6 students are capable of accepting additional responsibility within clinical teams. To ensure a smooth transition from medical student to intern. To integrate knowledge and skills gained in the previous three years, so that the student's assessment, documentation and management of clinical problems is sufficiently mature and rounded to warrant graduation and provisional registration. To have students leave medical school committed to the importance of continued medical education. Year 6 of the new curriculum is fully integrated with the fourth year of the program. The course is organised as follows:

Term 1: Students will be attached to the Office of the Dean for a decision as to whether the student has completed a satisfactory term, and hence to the Assessment Committee. In general, students undertaking Elective Terms approved by the Dean are covered in respect of medicolegal claims made or actions instituted against terms, students will be attached to an emergency room and an intensive care unit at a Principal Teaching Hospital, or a selected rural hospital, where appropriate arrangements have been made for supervision. The remaining terms assigned to students will complement terms completed in Year 4. One medical and one surgical attachment will be provided at the students Principal Hospital and a further term will be provided at a rural hospital.

Students may request a specific program during the flexible fifth term of Year 6, provided no other program has been satisfactory. As in Year 4, clinical attachments provide an opportunity for learning on the job and the steady increase in the responsibility for patient management will be given to students as their experience and proven performance suggests that this is appropriate. On the wards, a significant emphasis will be placed on mastering procedural skills, therapeutics and such practical matters as interaction with ancillary medical staff and discharge planning. Assessment: For students to be eligible to sit the final examinations in the Year 6 clinical attachments, developing satisfactory procedural and clinical skills. At the end of Year 6, students will be assessed by means of a focused clinical case examination with emphasis on management and therapeutics, a free ranging viva voce examination and a Multiple Choice Examination involving questions related to medicine, surgery, community medicine, clinical pharmacology, and material presented during the campus week lectures in Year 6 and from the directed reading section in the syllabus. All three components of this examination must be passed.

MFAC6001
Final Year Elective Term
Staff Contact: Ms Christine Hewitt
UOC44 S1
Prerequisite/s: MFAC5001, OBST5001, PAED5101, PSCY5001

Objectives: These include one or more of the following: to further develop knowledge and skills in Medicine and/or Surgery; to acquire preliminary training for a career in a specialty of medicine; to experience a different pattern of health care delivery from that practised in Australia; to obtain experience which may influence subsequent career orientation; to reinforce an area of study already covered in the undergraduate program; to obtain a short introduction to research methods and philosophy. The elective term may include work in one of the following areas: in any school or department within the Faculty of Medicine; in a hospital or medical institution either in Australia or in another country; with a medical practitioner either in Australia or in another country. Students are encouraged to consider commencing their elective term early by extending it over the period from the end of Year 5 to the end of the third week in February of the subsequent year. Students should make individual arrangements for electives and are advised that some overseas universities, governments, health authorities and/or hospitals require very early applications, accompanied by certification that the applicant is an enrolled medical student of the University who is eligible to undertake the specified term. When making the arrangements, students should specifically request that an appropriate person is willing to act as a supervisor. The supervisor is asked to submit a report to the Office of the Dean by the end of the term. Students who gain more than one acceptance for the elective term must consult the supervisor as soon as possible. Students are encouraged to consult the files containing past student Elective reports, available in the School of Community Medicine. Students are also encouraged to discuss their Elective proposal(s) with a member of staff, perhaps their Clinical Associate Dean. Assessment: Each student is required to produce a report which describes the nature of the work done during the Elective Term. This should be approximately 1000 words in length. The report is submitted by the end of term. Individual Principal Teaching Hospitals may strengthen the structured learning experience by providing additional lectures. However the time available for such additional programs will be strictly limited so that students are not diverted from their principal work on the wards. Five 6-week attachments complete the year. For one of the six week
them under the University's public liability and professional indemnity policy. However, the amount of this cover is reduced for claims made or actions instituted within the United States of America or Canada or territories under the jurisdiction of the courts of those countries. Students undertaking Elective Terms in the USA or Canada are therefore advised to notify the institutions at which they will be working of the amount of cover and ensure that it is sufficient. Students may need to arrange additional cover under the liability policies of the host institution, or arrange their own personal cover before commencing the Term. Students should also be aware that the University does not insure them against personal injury or illness. There is a limited cover provided by an insurance policy taken out by the Student Guild which covers program related activities within Australia only. Enquiries about this policy should be made directly to the Student Guild.
3821
Combined Science and Medicine Program
BSc MB BS

The Science/Medicine program is an alternative program of study, whereby, over a seven-year program, a student may complete the degree of Bachelor of Science, with the Bachelor degrees of Medicine and Surgery. Students in the program may undertake courses offered at Advanced level and may undertake an additional research year (Honours) in Anatomy, Physiology or Biochemistry, leading to the award of a BSc Advanced degree.

The Science/Medicine program is intended for those students with special interest and aptitude in science, who wish to obtain a firm grounding in basic sciences. A limited number of places are available in this program and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Office of the Dean as soon as possible after receiving their offer of a place in the Faculty. Selection of students for the Science/Medicine program is made approximately two weeks before commencement of Session 1. The students undertake a three-year program of study approved by the Presiding Member of the Faculty's BSc MB BS Committee leading to the award of the degree of BSc, and on completion, enter Year 3 of the normal Medicine program. The student is offered a choice of a number of programs, leading to a major or double major in one or two of the courses Anatomy, Biochemistry and Physiology.

Students who have completed the combined Science/Medicine degree program are eligible for the award of honours in the MB BS degree program, based on weighted performance in courses (excluding the honours year) throughout the combined program.

The award of honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the program in accordance with the rules applying to the Medicine program 3801, together with an aggregate mark based on the Science component of the program.

Program Details

The Science program is divided up into courses each of which is assigned units of credit. For the Science degree, a minimum of 144 units of credit in approved science courses is required. Students usually take 48 units of credit in each year.

Courses

Details of all courses are given in the Science Handbook. Details of courses taught by Schools in the Faculty of Medicine are also published in the Course Descriptions section later in this book.

Students can elect to replace the courses BSSM2220 and CHEM2000 with ANAT3121 Visceral Anatomy. Other proposed changes or additions to the program must be approved by the Program Coordinator.

Year 3

In Year 3, students are required to complete 48 units of credit. Students should undertake a major in Anatomy, Physiology or Biochemistry, or a double major in two of these disciplines. A major may be completed by taking at least 18 units of credit in one discipline area and fulfilling other program requirements specified for that major. Students who do not undertake a Biochemistry major must complete BIOC3261 (Human Biochemistry). Students in the combined Science and Medicine program are not able to enrol in courses in Pharmacology, Pathology or Immunology. The programs for majors in Anatomy, Biochemistry and Physiology are listed below.

Year 4

Students usually join Year 3 of the Medicine program. However, students may apply to take Honours in the discipline of their major before proceeding to the Medicine program. The Honours program is a one-year research project in the school of their major. Details are given in the Science Handbook. Enquiries should be directed to the head of the appropriate school.
Combined Arts and Medicine Program  
BA BSc(Med) MB BS

The Arts/Medicine program is an alternative program of study, in which, over a seven year program a student may complete the degree of Bachelor of Arts, with the degrees Bachelor of Science(Medicine), Bachelor of Medicine and Bachelor of Surgery. The Arts/Medicine program is intended for those students who wish to continue their interest and studies in the Arts during their medical studies.

A limited number of places are available in this program and these are open only to students who have been accepted for entry into the Faculty of Medicine.

Students who wish to undertake this program should contact the Office of the Dean as soon as possible after receiving their offer of a place in the Medicine program. Selection of students for the Arts/Medicine program is made approximately two weeks before commencement of Session 1.

Over a period of seven years, students will be required to fulfill the requirements of the BSc(Med) MB BS degree program as well as 60 units of credit in courses offered by the Schools/Departments/Programs within the Faculty of Arts (including an approved major sequence).

In Year 1, students will complete the Year 1 Medicine program plus the Level 1 courses of their Arts major sequence. In Years 2 and 3 they will complete the program for the Year 2 of the Medicine program and the remaining courses for their Arts component, before progressing to Year 3 of the Medicine program in their fourth year of enrolment.

Students who have completed the combined Arts/Medicine degree program are eligible for the award of honours in the BSc(Med) MB BS degree program, based on weighted performance in courses (excluding those courses not in the normal Medicine program) throughout the combined program.

The award of honours shall be determined on the basis of a weighted aggregate mark, calculated as the sum of weighted aggregate marks obtained in the medical component of the program in accordance with the rules applying to the Medicine program 3991.

Program Details

Students are required to undertake all BSc(Med) MB BS courses plus 60 units of credit from the Faculty of Arts (including a major sequence) during Years 1 to 3. A major sequence equals 36 units of credit (usually 12 at Level 1 and 24 at upper level). Details of all Faculty of Arts courses are given in the Arts Handbook.

Year 1

Students are required to complete all Medicine (program 3301) Year 1 courses(with the exception of General Education), plus all Level 1 courses of their Arts major sequence.

- ANAT1006 Anatomy 1
- BIOC1319 Biochemistry for Medical Students
- MFAC1001 Introductory Clinical & Behavioural Studies
- PHPH1004 Biology for Medical Students

Level 1 Arts major sequence

Year 2

Medicine Year 2 courses are to be spread over Years 2 and 3 to allow for the completion of upper level courses of their Arts major sequence, plus additional courses to complete the BA component. The Medicine courses BIOC2329 Medical Biochemistry and

Genetics and PHPH2018 Medical Physiology 1 must be taken in Year 2 of the BA BSc(Med) MB BS program.

BIOC2329 Medical Biochemistry and Genetics
PHPH2018 Medical Physiology 1

Upper level Arts Major sequence plus additional Arts courses

Year 3

The Medicine courses ANAT2007 Anatomy 2, MDSG2001 Clinical Studies 2 and PSCY2101 Human Behaviour must be taken in Year 3 plus upper level Arts courses to complete the Arts major sequence and any other Arts courses to complete the required units of credit (ie. 60).

- ANAT2007 Anatomy
- MDSG2001 Clinical Studies 2
- PSCY2101 Human Behaviour

Upper level Arts major sequence plus additional Arts courses

Year 4

Students join Year 3 of the Medicine program.
Intern Placement and Registration

Each medical graduate seeking registration as a medical practitioner in New South Wales must complete a period as an intern in a hospital or institution approved by the New South Wales Medical Board. Before taking up an intern appointment, a graduate must obtain a certificate of conditional registration from the Medical Board.

Intern placement is the responsibility of the Postgraduate Medical Council of the New South Wales Department of Health. Information concerning intern placement and conditional registration is issued to each student by the Office of the Dean during the final year. Information may also be obtained from:

**Internship:** The Postgraduate Medical Council, Gladesville Hospital Campus, Victoria Road, Gladesville NSW 2111, Telephone: 9817 0551.

**Registration:** The Registrar, Medical Board of New South Wales, Gladesville Hospital Campus, off Punt Road, Gladesville, Telephone 9679 6799.

Deferment of Internship

1. Deferment of internship for up to two years.

   This may be granted by the Medical Board on the recommendation of the graduate’s medical school. Normally this will be granted on medical grounds only, but in exceptional circumstances may be granted on other personal or compassionate grounds (eg. temporary transfer overseas with spouse, childbearing, need to care for close relative, etc.).

   Normally deferment will be for one year only, and only in exceptional circumstances will it be granted on the recommendation of the medical school for two years. The medical school will take undergraduate performance into account in determining the length of deferment, and if it wishes may require the applicant to undertake some form of revision and/or assessment before the internship is allowed to commence.

2. Deferment of internship for more than two years.

   If a graduate does not take up an internship within two years of graduation the Board will require evidence that the applicant has undertaken an appropriate period of revision and has been assessed as meeting the standards of current graduating students by an accredited Australian medical school. Normally this will be undertaken in the medical school where the student’s undergraduate program was completed, but in exceptional circumstances (eg. family transfer to another state) it could be undertaken at another school. The medical school will provide the Board with details of the revised program and assessment.

   In the case of a long deferral, i.e. over 5 years, without significant contact with medicine, the graduate might be required to reattend on a full time basis one or more years of the program and undertake normal undergraduate assessments.

   In the case of a shorter deferral or where there has been significant contact with medicine, a special program of student attachments and assessments might be appropriate.

Ranking Students for the Award of Honours

Students are ranked on the basis of their performance throughout the undergraduate program. An overall program mark is calculated for each student using the following procedure:

1. A weighted average mark for each year of the program is determined. This year mark is obtained by weighting each of the courses in the year, according to the units of credit. The course weights for each of the years of the program are shown in Table 1.

2. The overall program mark is determined by applying the year weightings listed in Table 2 to the weighted year marks.

3. If a student were required to sit for a supplementary assessment (other than for medical reasons or other exceptional circumstances) the course mark used is that awarded for the original assessment.

4. If a student were required to repeat a year (other than for medical reasons or other exceptional circumstances) the weighted year mark used is that obtained at the first attempt.

5. In the calculation of the average weighted program mark for BSc MB BS students, the aggregate mark for the Science component is calculated as a weighted aggregate of all courses counted towards the Science degree. The course weights are as follows:

   - Level I courses weighted by a factor equal to 0.0625 per course, except General Mathematics, Fundamental of Physics and Life Science Physics (0.05 per course) and Higher Chemistry and Higher Mathematics (0.07 per course).

   - Level II courses weighted by 0.1875 per course.

   - Level III courses weighted by 0.25 per course.

   - Level IV courses (Honours) not counted.

   The three years of BSc component of the BSc MB BS program are treated as equivalent to the first two years of the MB BS program and therefore have a total year weight of 6 relative to the MB BS year weightings.

   There is a limit set of 50 for the best possible score in the first year of the BSc component to put all students, whether or not they undertake Higher Mathematics or Physics, on the same footing. Only the best 144 units of credit in the BSc component to put all students, whether or not they undertake Higher Mathematics or Physics, on the same footing. Only the best 144 units of credit in the BSc component are considered in calculating the ranked score.

   6. Honours calculation for students undertaking the BA BSc(Med) MB BS program is the same as for the BSc(BMed) MB BS program, i.e. the courses in the BA component are not counted.

   7. Provision is made for students admitted with advanced standing and/or exemptions in certain courses not to be penalised in the calculation of rankings.

Award of Honours

1. The Faculty Year 6 Assessment Committee considers the ranked list of students and their marks and decides the cut-off marks for the award of honours at the various levels.

2. Neither the percentage of the students obtaining honours at the various levels nor the cut-off marks are predetermined, and the Committee makes its own assessment of the level of academic attainment indicated by the overall program mark.

3. As a guide, the distribution of the awards of honours in 1999 was:
Class I Honours
Program Mark: 71.1%-77.4%
Number of Awards: 20
Percent of graduands: 12.2%

Class II Div. I
Program Mark: 68.3%-71.0%
Number of Awards: 20
Percent of graduands: 12.2%

Class II Div. II
Program Mark: 67.00%-68.2%
Number of Awards: 24
Percent of graduands: 14.6%

This is a one year research program offered to students in the six year Medicine program who have achieved a high standard in their studies. Those who complete the research program in conjunction with the six year curriculum, will be eligible for the award of the degree BSc(Med)Hons.

In general the aims of the year, normally spent in supervised research, are to enable the student to acquire an appreciation of the value of observation and experimentation in the development of medical science, and to learn how to determine the 'current state of knowledge' in a defined field. This year enables the student to gain experience in the written and spoken presentation of scientific information.

Information concerning this program option is issued to medical students in midyear. A list of available research projects may be obtained from the Office of the Dean or the Clinical Schools.

Rules for the Award of the Bachelor of Science (Medicine) Degree with Honours – BSc(Med)Hons

For candidates in the Programs 3801 and 3840

1. (a) Undergraduates who have successfully completed at least the first three years of the six year Medicine program 3801 or at least the first four years of the seven year Arts/Medicine program 3840 may enrol for the degree of BSc(Med)Hons in one of the following courses: Anatomy, Biochemistry, Microbiology, Pathology, Pharmacology, Physiology, Psychology or in any other course approved by the BSc(Med)Hons Committee provided that the candidate's performance in the area subject has been of a high standard.

(b) A student may register as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of the School concerned and the BSc(Med)Hons Committee.

2. (a) Medical graduates may enrol for the degree of BSc(Med)Hons in any course approved by the BSc(Med)Hons Committee provided that their performance in the subject area has been of a high standard.

(b) A graduate may be registered as a candidate for the degree in any of the Schools of the Faculty of Medicine, the School of Biochemistry, the School of Microbiology or the School of Psychology, subject to the permission of the Head of School concerned and the BSc(Med)Hons Committee.

3. The program for each candidate shall be designed to introduce the student to research in the appropriate discipline and shall consist of such formal and special work and any examinations prescribed by the Head of School concerned and approved by the BSc(Med)Hons Committee.

Assessment Guidelines

1. Schools make assessments on the advice of the supervisor and at least two assessors. Where the student performs his or her work in a clinical school, but is registered in a pre-clinical discipline, at least one of the assessors could be chosen from a relevant pre- or para-clinical school.

2. A thesis is compulsory and forms a major part of the assessment. The thesis must be typed and suitable for subsequent binding if required. The typescript length of the thesis is normally no more than 20,000 words.

3. It is desirable that candidates take part in the activities of the school by participation in seminars, by presentation of essays and other prescribed activities.

4. Candidates are normally required to give an oral presentation during the year and this may be taken into account in the assessment.

5. The degree of BSc(Med)Hons may be awarded in the following grades: Honours Class I; Honours Class II, Division I; Honours Class II, Division II or no award made.

Program Requirements

This program in health and sports science offers a comprehensive education in the area of health and sports science. Four years of full-time study, or the part time equivalent part-time study leads to the award of a Bachelor of Science (in Health and Sports Science) with an Honours program available for students who perform with merit. Part-time students will undertake a reduced program subject to the session availability of courses. Only in exceptional circumstances will full-time students be allowed to enrol in a reduced program for a year, requiring the permission of the Head of School of Physiology and Pharmacology. A total of 192 units of credit must be successfully completed for the award of this degree.

Program Objectives

The program is designed upon the strengths of the Faculty of Medicine in which it is uniquely placed as a sports science degree in Australia. Graduates may expect to find employment in sports medicine clinics, rehabilitation clinics and hospitals; Commonwealth, State and Local Government departments, sports academies and institutes, professional organisations, sporting associations, universities, corporate health; gymnasiums and fitness centres, and private practice. In addition it is expected that graduates become members of the professional body: Australian Association of Exercise and Sports Science.
Stage 1 introduces students to the core science that will serve as a solid foundation for the following years. Subjects in this include chemistry, mathematics, statistics, biology, and psychology. A series of seminars will run throughout this year and will expose students to the industries that offer employment for graduates. Stage 2 of the program begins to focus on human anatomy, physiology and biochemistry, biomechanics, sport psychology and nutrition while building on the scientific principle acquired in Stage 1. Stage 3 of this multi-disciplinary program moves the student towards a holistic understanding of health and exercise as it offers increasing complexity of course material: exercise and cardio-respiratory physiology, endocrinology, musculoskeletal physiology, functional anatomy, biomechanics, health psychology, and motor control & function. Stage 4 continues to develop multi-disciplinary expertise through use of specialised courses. Extensive coordinated and structured industry experience is a key component of this final year. Students choose from a selection of courses in their fourth year to aid their graduate employment strategies. Students take courses in their fourth year to aid their graduate employment strategies. Understanding of scientific method is a key component of this course. A major project in final semester will feature as an expression of this understanding through research. General education is a requirement of all undergraduate courses at this university and may be taken in stages 2, 3 and 4.

### Notes on Stage 4

Core: Students must complete courses in Pharmacology and Drugs in Sport. Students must complete PHPH4502 or PHPH3151 in session 1 and PHPH4506 or PHPH4507 in session 2.

Electives: Students must choose from the available electives, so as to provide a total of 48 Units of Credit in Stage 4.

### Units of Credit

Stage 1, 48; Stage 2, 48; Stage 3, 48; Stage 4, 48.

Total Units of Credit for the Program = 192.

Full-time program load equivalence (EFTSU) = 1.
Units of Credit

From January 2000 the university will move to a new academic structure based on units of credit. A full time enrolment for one year is defined as 48 units of credit (24 per semester). A course will have the same unit of credit value and generate the same load for HECS and fees irrespective of the program or stage in which it is taken. All courses will be measured in whole units of credit. The normal workload expectations are 25 - 30 hours per semester for each unit of credit, including class contact hours, preparation and time spent on all assessable work.

Summary of Compulsory Undergraduate Courses

The following Course Descriptions appear earlier in this handbook under Program Details, and are presented by course number and title, together with the year in which each course is to be taken in the Medicine program.

ANAT1006
Anatomy 1 Year 1

ANAT2007
Anatomy 2 Year 2

BIOC1319
Biochemistry for Medical Students Year 1

BIOC2329
Medical Biochemistry and Genetics Year 2

CMED3001
Medical Ethics and Health Law Year 3

MDSG2001
Clinical Studies 2 Year 2

MDSG3001
Clinical Studies 3 Year 3

MDSG4001
Integrated Clinical and Community Studies Year 4

MDSG6001
Integrated Clinical Studies 6 Year 6

MFAC1001
Introductory Clinical and Behavioural Studies Year 1

MFAC5001
Geriatrics/General Practice/Subspecialties Year 5

MFAC6001
Final Year Elective Term Year 6

MICR3228
Microbiology for Medical Students Year 3

OBST5001
Obstetrics and Gynaecology Year 5

PAED5101
Paediatrics Year 5

PATH3101
Pathology Year 3

PHPH1004
Biology for Medical Students Year 1

PHPH2018
Medical Physiology 1 Year 2

PHPH3014
Medical Physiology 2 Year 3

PHPH3055
Medical Pharmacology Year 3

PSCY2101
Human Behaviour Year 2

PSCY5001
Psychiatry Year 5

Anatomy

Servicing Courses only: taught within programs offered by other faculties.

ANAT2111
Introductory Anatomy
Staff Contact: Dr B Freeman
UOC6 HPW6 S1
Prerequisites: BIOS1101, BIOS1201 or BIOM9010

Introduction to gross anatomy of the whole body, based on a study of prospected specimens. General topographical and systematic anatomy, musculoskeletal, cardiovascular, respiratory, gastrointestinal, genitourinary and nervous systems. This course is designed for students who wish to proceed to Level III studies, or a major, in Anatomy.

ANAT2151
Introductory Functional Anatomy
Staff Contact: Associate Professor Kenneth Ashwell
UOC3 HPW3 S1

Overview of basic human anatomy and physiology with an emphasis on structures and systems which are most vulnerable to chemical and physical trauma under industrial conditions, such as the eye, ear and skin. Other systems studied include the musculoskeletal system, central and peripheral nervous systems, circulatory, respiratory, gastrointestinal, endocrine and urogenital systems. Offered as a distance-education course, or on campus if enrolments are sufficient.

ANAT2200
Basic Histology
Staff Contact: Professor Phil Waite
UOC3 HPW3 S1
Prerequisites: BIOS1101, BIOS1201

The course provides an overview of the structure of mammalian cells and their organisation into tissues. Topics include the use of the light microscope, the preparation of tissues and the recognition of artefacts. Morphology of epithelial, connecive, muscular and nervous tissues will be compared with emphasis on the practical recognition of cell types and the correlation or structure and function.

ANAT2210
Systems Histology
Staff Contact: Professor Phil Waite
UOC3 HPW3 S2
Prerequisites: ANAT2200 or ANAT2511

The course includes the histological examination of the major body systems: cardiovascular, respiratory, lymphatic, integumentary, digestive, endocrine, urinary, reproductive and nervous systems. Emphasis is on integrating the microscopic structure of organs with their function and with abnormalities, which occur in common disease processes.
ANAT2300
Vertebrate Development A
Staff Contact: Dr Mark Hill
UOC3 HPW3 S1
Corequisite/s: ANAT2200, ANAT2111 or ANAT2511
This course will cover the morphological and molecular mechanisms of segmentation and patterning responsible for organising the vertebrate body plan in the embryo. Topics will include the molecular, genetic and cellular approaches to the study of human embryology using four main vertebrate systems: frog, fish, chick and mouse.

ANAT2310
Vertebrate Development B
Staff Contact: Dr Mark Hill
UOC3 HPW3 S2
Prerequisite/s: ANAT2300
The course will cover fetal development through to birth, including the developmental anatomy of the organ systems. The course will examine the common principles and differences that underlie normal and abnormal development of vertebrates; specifically, the roles of cell differentiation, proliferation and migration, target recognition, interaction in the nervous system, axial polarity, cell adhesion, cell fate and signalling in development. Emerging technologies, such as genomic analysis and the use of transgenic and dysfunctional mouse mutants in research, will be covered.

ANAT2511
Fundamentals of Anatomy
Staff Contact: Dr Elizabeth Tancred
UOC6 HPW6 S2
Excluded: ANAT2111, ANAT2200, ANAT2151
This course provides an introduction to the fundamental principles of human structure. It includes an introduction to the histology of basic tissues, an overview of the functional anatomy of the major body systems; human development, growth and aging; human evolution; body imaging. This course is designed for students who do not plan to major in Anatomy, but may be used as a prerequisite for ANAT3411 Neuroanatomy and, in exceptional circumstances, for ANAT3121 Visceral Anatomy.

ANAT3121
Visceral Anatomy
Staff Contact: Associate Professor Kenneth Ashwell
UOC6 HPW6 S2
Prerequisite/s: ANAT2111 (ANAT2511)
A detailed study of the visceral system, including autonomic nervous system, head and neck regions, and the cardiovascular, respiratory, gastrointestinal and genitourinary systems. Tutorials include clinical cases and surface and radiological anatomy.

ANAT3131
Functional Anatomy 1
Staff Contact: Dr Priti Pandey
UOC6 HPW6 S1
Prerequisite/s: ANAT2111
Functional anatomy of the musculoskeletal system in the head, neck and upper limb, includes biomechanics of connective tissue; in particular bone, cartilage and tendon. Tutorials involve study of prosected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the upper limb.

ANAT3141
Functional Anatomy 2
Staff Contact: Dr Dzung Vu
UOC6 HPW6 S2
Prerequisite/s: ANAT3131
Functional anatomy of the musculoskeletal system in the trunk and lower limb. Includes functional aspects of muscle and a discussion of the mechanics and energetics of walking and running. Tutorials involve study of prosected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the lower limb.

ANAT3231
Cell Biology
Staff Contact: Dr Mark Hill
UOC6 HPW4 S1 S2
Prerequisite/s: ANAT2200
To develop an understanding of the anatomy and biology of the cell. Cell biology combines traditional anatomical methods with recent cell and molecular biology techniques. Key concepts will include developmental differentiation of the cell, its polarity, motility, cytoskeleton, signal transduction mechanisms and outcomes. An introduction to concepts of cell and extracellular matrix interactions will also be covered. Session in which course will run to be determined.

ANAT3411
Neuroanatomy
Staff Contact: Dr Elizabeth Tancred
UOC6 HPW6 S1
Prerequisite/s: ANAT2200 and ANAT2111 or ANAT2511
Provides an overview of the anatomical organisation of the central nervous system. Topics covered include: cytoarchitecture of brain and spinal cord; functional anatomy of sensory and motor systems and higher cerebral functions such as language and emotions; blood supply of the central nervous system; cerebrospinal fluid and meninges.

ANAT3421
Neuroscience Research Seminars
Staff Contact: Dr P Carrive
UOC6 HPW3 S2
Prerequisite/s: ANAT3411 or PHHP3531
Focuses on selected areas of contemporary neuroscience research interest. Includes: brain development and axon guidance, peripheral nerve regeneration, spinal cord injury, pain pathways, central control of cardiovascular function, cortical plasticity, brain imaging, mechanisms of learning and memory, motor systems and the neuropathology of degenerative disorders. The course is organised in seminar format with discussion of original research papers. It is ideal for students considering doing Honours as it provides a background to current research problems and the opportunity to undertake a small project.

ANAT3531
Functional Anatomy 1 (Adv)
Staff Contact: Dr Priti Pandey
UOC6 HPW6 S1
Prerequisite/s: ANAT2111
Functional anatomy of the musculoskeletal system in the head, neck and upper limb, includes biomechanics of connective tissue; in particular bone, cartilage and tendon. Tutorials involve study of prosected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the upper limb. This course will include an assessable detailed dissection program, incorporating submission of a report based on drawings of the student's work and a review of literature within the subject area.

ANAT3541
Functional Anatomy 2 (Adv)
Staff Contact: Dr Dzung Vu
UOC6 HPW6 S2
Prerequisite/s: ANAT3531
Functional anatomy of the musculoskeletal system in the trunk and lower limb. Includes functional aspects of muscle and a discussion of the mechanics and energetics of walking and running. Tutorials involve study of prosected specimens, X-rays and surface anatomy; students will also carry out their own dissections of the lower limb. This course will include an assessable research affiliation program, incorporating discussion and evaluation of a research project, and submission of a research report based on literature within the subject area.

ANAT3631
Cell Biology (Adv)
Staff Contact: Dr Mark Hill
UOC6 HPW4 S1 S2
Prerequisite/s: ANAT2200
Biochemistry

BIOC2101
Principles of Biochemistry (Advanced)
Staff Contact: School Office
UCO6 HPW6 S1
Prerequisite/s: BIOS1101, BIOS1201, CHEM1101, CHEM1201;
Excluded: BIOC1319, BIOC2181, CHEM2929.
Introduces modern biochemistry, covers fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics covered include: the nature and function of proteins and enzymes; the metabolic working of cells, tissues and organs; the interrelationships between the pathways of carbohydrate, lipid and amino acid metabolism; the vital role of hormones in metabolic regulation; the energy-trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures and to introduce the principles of biochemical analysis.

Notes: Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective part of their program.

BIOC2181
Fundamentals of Biochemistry
Staff Contact: Dr Aldo Bagnara
UCO6 HPW6 S1
Prerequisite/s: BIOS1101, BIOS1201, CHEM1101, CHEM1201;
Excluded: BIOC1319, BIOC2101, CHEM2929.
Introduces modern biochemistry, covers fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics covered include: the nature and function of enzymes; the metabolic working of cells, tissues and organs; the interrelationships between pathways of carbohydrate, lipid and amino acid metabolism; the vital roles of enzymes and hormones in catalysis and metabolic regulation; the energy trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures and to introduce the principles of biochemical analysis. This subject covers essentially the same material as in BIOC2101 Principles of Biochemistry (Advanced), but in less detail and with more emphasis on the function of organisms and less emphasis on some of the underlying chemical mechanisms.

Notes: This course provides a comprehensive introduction to Biochemistry as an alternative to BIOC2101 for students who do not intend to proceed to Level III Biochemistry. It does not fulfill the prerequisite requirements for Level III Biochemistry but the Head of School may give approval for students with a grade of credit to enrol in Level III courses.
at the Biology Enrolment Centre on the day of enrolment. The course guide is available for purchase during enrolment week. Equipment required for practical classes is listed in the Course Guide and must be purchased before session starts. Students must consult it for details of the course and assessments. The course commences in Week 1.

BIOC2031

Biology of Invertebrates

Staff Contact: Associate Professor Greenaway

UOC6 HPW5 S2

Emphasis on major phyla and marine forms. Practical work includes anatomy of living and preserved specimens (including dissections), the pragmatic use of identification keys and how animals adapt to the environment. Personal expenses will be incurred.

Note/s: ed Knowledge: BIOS1101 and BIOS1201. Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective. There is a compulsory field camp during mid session break.

BIOC2061

Vertebrate Zoology

Staff Contact: Dr Banks

UOC6 HPW5 S1

Comparative study of the Chordata, with particular reference to the vertebrates, including morphology, systematics, evolution and natural history, with reference to selected aspects of physiology and reproduction. Practical work to supplement lectures.

Note/s: ed Knowledge: BIOS1101 and BIOS1201. Practical class allocations must be obtained during re-enrolment week from room G21, Biological Science Building. Enrolment in this course may be subject to quota restrictions. Such restrictions will only apply to students taking this course as an elective.

BSSM1110

Perspectives in Medical Science 1

Staff Contact: School Office

UOC3 HPW2 S2

In this course we examine the historical background to the advent of scientific medicine in the 19th and 20th centuries, looking particularly at the intellectual climate which made such innovations possible. This course is only available for students enrolled in program 3991 Bachelor of Medical Science and program 3821 Science/Medicine. Assessment: Essay; tutorial paper and participation; open book class test. For information regarding this course please contact the School of Science and Technology Studies.

BSSM2220

Perspectives in Medical Science 2

Staff Contact: School Office

UOC3 HPW2 S2

This course is based on a series of colloquia given by visiting specialists on topics of historical, philosophical and contemporary relevance in medical science. The course in only available for students enrolled in program 3991 Bachelor of Medical Science and program 3821 Science/Medicine. For further information regarding this course, please contact the School of Physiology and Pharmacology or the School of Anatomy.

Chemistry

CHEM1011

Fundamentals of Chemistry 1A

Staff Contact: Dr Peter Chia

UOC6 HPW6 S1 S2

CHEM1021
Fundamentals of Chemistry 1B
Staff Contact: Dr Peter Chia
UOC6 HPW6 X1 S2
Prerequisite/s: CHEM1011

CHEM1031
Higher Chemistry 1C
Staff Contact: Dr Peter Chia
UOC6 HPW6 S1
Assumed Knowledge: Equivalent to a good standard in high school chemistry (HSC 2 unit chemistry [75 - 100] or equivalent).

Food Science and Technology

FOOD3220
Nutrition
Staff Contact: Dr Arcot
UOC6 HPW6 S2
Prerequisite/s: BIOC2101 or BIOC2181
This course consists of a series of lectures and practical exercises that provide students with knowledge about the occurrence of nutrients in foods and their role in human physiology, health and disease. Structure, properties and sources of nutrients. Role of nutrients in human structure and function. Introduction to food groups, tables of food composition, food labels, dietary recommendations. Food guides. Nutrition in health and disease. Nutritional needs of vulnerable groups: infants, pregnant and lactating women, the aged. Dietary intolerance, disorders related to the affluent diet including coronary heart disease, dental caries, diabetes, hypertension and cancer. Problems of undernutrition including protein, energy, mineral and vitamin deficiencies. Physiological and nutritional aspects of dietary fibre, alcohol. Assessment of nutritional status using dietary and anthropometric techniques. Practical exercises on anthropometric techniques and measurement of nutrient intake using computer systems on an individual and group basis.

FOOD3440
Advanced Nutrition
Staff Contact: Dr Arcot
UOC6 HPW6 S1
Prerequisite/s: FOOD3220
This course consists of lecture and discussion classes that build on the basic concepts of nutrition with respect to the food supply, giving advanced treatment of the following topics. Food and nutrition policy: structure of the population. Food supplies, food consumption, nutritional epidemiology. Population dietary references. Food programs such as food fortification, supplementary feeding schemes, nutritional rehabilitation, nutritionally modified foods, nutritional regulations and standards, nutrition education, dietary and nutrition interventions (ORT, family planning, infection control, growth monitoring). Principles, practice and evaluation of applied nutrition programs. Advanced assessment methods in nutrition: nutrient bioavailability studies, nitrogen balance tests, vitamin load tests, sodium and potassium excretion, creatinine excretion, fitness assessment, biochemical assessment, design and evaluation of nutritional epidemiology studies, food intake studies.

Mathematics

MATH1011
General Mathematics 1B
Staff Contact: School Office
UOC6 HPW6 S1 S2
Excluded: MATH1031, MATH1131, MATH1141, MATH1151, ECON1202, ECON2291
Functions (and their inverses), limits, asymptotes, continuity; differentiation and applications; integration, the definite integral and applications; inverse trigonometric functions; the logarithmic and exponential functions and applications; sequences and series; mathematical induction; the binomial theorem and applications; introduction to probability theory; introduction to 3-dimensional geometry; introduction to linear algebra.
Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC 2 unit Mathematics. This refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject. Students who have taken 2 unit Mathematics in Society or Mathematics in Practice will not have achieved the level of knowledge which is assumed in this course.

MATH1021
General Mathematics 1C
Staff Contact: School Office
UOC6 HPW6 X1 S2
Prerequisite/s: MATH1011 or MATH1131 or MATH1141; Excluded: MATH1031, MATH1231, MATH1241, MATH1251, ECON1202, ECON2291.
Techniques for integration, improper integrals; Taylor's theorem; first order differential equations and applications; introduction to multivariable calculus; conics; finite sets; probability; vectors, matrices and linear equations.

MATH1031
Mathematics for Life Sciences
Staff Contact: School Office
UOC6 HPW6 S1
Excluded: MATH1011, MATH1021, MATH1131, MATH1141, MATH1151, MATH1231, MATH1241, MATH1251, ECON1202, ECON2291.
Assumed Knowledge: A level of knowledge equivalent to achieving a mark of at least 60 in HSC 2 unit Mathematics. This refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject. Students who have taken 2 unit Mathematics in Society or Mathematics in Practice will not have achieved the level of knowledge which is assumed in this course.

MATH1041
Statistics for Life and Social Sciences
Staff Contact: School Office
UOC6 HPW6 S2
Excluded: MATH2819, MATH2870, MATH2889, ECON1203, ECON2292
Complex numbers, vectors and vector geometry, linear equations, matrices and matrix algebra, determinants. Functions, limits, continuity and differentiability, integration, polar coordinates, logarithms and exponentials, hyperbolic functions, functions of several variables. Introduction to computing and the Maple symbolic algebra package.

Assumed Knowledge: HSC 3 unit Mathematics. Students will be expected to have achieved a combined mark of at least 186 in 3 unit Mathematics and 3 unit Mathematics. Excluded: MATH1011, MATH1031, MATH1141, MATH1151, ECON1202, ECON2291

As for MATH1131 but in greater depth.

Assumed Knowledge: HSC 4 unit Mathematics. Students will be expected to have achieved a combined mark of at least 100 in 2 unit and 3 unit Mathematics.

MATH1141
Higher Mathematics 1A
Staff Contact: School Office
UOC6 HPW6 S1 S2
Excluded: MATH1011, MATH1031, MATH1131, MATH1151, ECON1202, ECON2291

As for MATH1131 but in greater depth.

Assumed Knowledge: HSC 4 unit Mathematics. Students will be expected to have achieved a combined mark of at least 186 in 3 unit and 4 unit Mathematics.

MATH1231
Mathematics 1B
Staff Contact: School Office
UOC6 HPW6 X1 S2
Prerequisite/s: MATH1131 or MATH1141; Excluded: MATH1021, MATH1031, MATH1241, MATH1251, ECON1202, ECON2291.

MATH1241
Higher Mathematics 1B
Staff Contact: School Office
UOC6 HPW6 S2
Prerequisite/s: MATH1131 CR or MATH1141 CR; Excluded: MATH1021, MATH1031, MATH1231, MATH1251, ECON1202, ECON2291.

As for MATH1231 but in greater depth.

Medicine
Servicing Course only; taught within a program offered by another faculty.

MDCN8001
Principles of Medicine for Optometry Students
Staff Contact: Associate Professor Leon Simons
UOC2 HPW3 S1

An overview of historical, epidemiological, pathophysiological, diagnostic, therapeutic and public health aspects of disease in man and the various clinical categories of practice. Specific topics in eye health are also covered.

Note/s: Students normally take the course in Year 4 of course 3950. Restricted to program 3950.

Pathology

Pathology Level II
PATH2201
Processes in Disease
Staff Contact: Dr Mark Dziegielewski
UOC6 HPW4 S2
Prerequisite/s: BIOS1101, BIOS1201. Any two of ANAT2200, ANAT2111, PHPH2101 or BI0C2101/BIOC2181

Lectures, tutorials and museum study sessions aimed at increasing understanding of important disease processes. Comparisons between normal and abnormal cell, tissue and organ function will be made. Includes processes of cell and tissue degeneration, acute and chronic inflammation, regeneration and repair, infection, atherosclerosis, thrombosis, embolism and infarction. Particular examples include diseases of practical importance such as pneumonia, tuberculosis, pulmonary embolism and myocardial infarction. Aberrations of cell growth introduces neoplasia with examples of common tumours.

Pathology Level III
PATH3205
Molecular Basis of Disease A
Staff Contact: Dr Miles Davenport
UOC6 HPW4 S1
Prerequisite/s: PATH2201

Recent advances in understanding molecular mechanisms of acute and chronic inflammation, allergy, autoimmune diseases, atherosclerosis and thrombosis. Detailed discussion of mediators of these processes, including cytokines and growth factors. Systemic pathology of the cardiovascular and respiratory systems, with an emphasis on ischaemic heart disease and asthma. Laboratory classes introduce modern research and diagnostic techniques.

Note/s: Students are advised that previous and concurrent study of Anatomy, Physiology, Biochemistry or Immunology would be an advantage.

PATH3206
Molecular Basis of Disease B
Staff Contact: Dr Mark Dziegielewski
UOC6 HPW4 S2
Prerequisite/s: PATH3205

Recent advances in understanding the pathogenetic mechanisms underlying congenital disorders and neoplasia. Detailed discussion of molecular carcinogenesis, the metastatic process and techniques for diagnosing congenital diseases. Common tumours, with an emphasis on colorectal, breast, prostate and cervical carcinoma. Systemic pathology of the gastrointestinal, genitourinary and central nervous systems, including peptic ulcer disease, liver disorders, glomerulonephritis, and Alzheimer disease.

Note/s: Advantage in having undertaken previous study in ANAT3231-Cell Biology

PATH3207
Musculoskeletal Diseases
Staff Contact: Dr Mark Dziegielewski
UOC6 HPW4 S2
Prerequisite/s: PATH2201, ANAT2111 or ANAT2511

Current scientific concepts of musculoskeletal diseases including arthritis, metabolic bone disease, primary and secondary bone neoplasms and neuromuscular disease. Detailed coverage of fracture healing and its complications and of biomaterials and prosthetic devices relevant to orthopaedic applications.
Pathology Level IV
PATH0005
Pathology Honours Full-time
Staff Contact: Professor C Geczy
Enrolment requires School approval
UOC4 S1 S2
Research component of thesis: basic mechanisms of human disease processes, including inflammation, rheumatoid arthritis, asthma, uveitis, infection, bone and biomaterials, tumor biology, vascular biology, atherosclerosis and genetics. Projects can include techniques such as tissue culture and cell biology, microbiology and genetics, protein chemistry, histology and microscopy, immunology and enzymology. Projects may be undertaken within the School of Pathology or at a laboratory of an affiliated institute or hospital department associated with the School.

PATH0006
Pathology Honours Part-time
Staff Contact: Professor C Geczy
Enrolment requires School approval
UOC24 S1 S2
Research component of thesis: basic mechanisms of human disease processes, including inflammation, rheumatoid arthritis, asthma, uveitis, infection, bone and biomaterials, tumor biology, vascular biology, atherosclerosis and genetics. Projects can include techniques such as tissue culture and cell biology, microbiology and genetics, protein chemistry, histology and microscopy, immunology and enzymology. Projects may be undertaken within the School of Pathology or at a laboratory of an affiliated institute or hospital department associated with the School.

Physiology and Pharmacology

PHPH1501
Health and Physical Activity
Staff Contact: Dr David Garlick
UOC6 S2
Prerequisite/s: BIOC1201
Excluded: Restricted to students enrolled in Program 385C
The course deals with concepts of health, physical activity and fitness. The effects to physical activity are described in relation to children, the elder subject and to conditions such as obesity, diabetes and mental states. A range of fitness tests are described. An analysis of the ethical relationships between the professional, and the development of ethical processes in business, research and education will be explored.

PHPH2101
Physiology 1A
Staff Contact: Dr Joe Simonetta
UOC6 HPW6 S1
Introduces fundamental physiological principles, from basic cellular function in terms of chemical and physical principles to the operation and interaction of body systems. The area of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience. The unit includes a substantial series of practical class experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.

Note/s: Students intending to major in Physiology and/or Pharmacology should note Level III prerequisites which can be waved at the discretion of the Head of School.

PHPH2121
Principles of Physiology A
Staff Contact: Dr Joe Simonetta
UOC6 HPW6 S1
Provides an introduction to fundamental physiological principles for students in BOptom. degree course. The areas of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience, and includes a series of practical class experiments on these different areas of physiology.

Note/s: Restricted to students enrolled in BOptom degree course.

PHPH2201
Physiology 1B
Staff Contact: Dr Joe Simonetta
UOC6 HPW6 S2
Prerequisite/s: PHPH2101
The Areas of Physiology covered in this unit build on the fundamental physiological principles introduced in PHPH2101 Physiology 1A. The topics covered include reproduction, the respiratory system, the gastrointestinal system, kidney and body fluids and the endocrine system. This unit includes a substantial series of practical class experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.

Note/s: Students intending to major in Physiology and/or Pharmacology should note Level III Physiology prerequisites which can be waved at the discretion of the Head of School.

PHPH2221
Principles of Physiology B
Staff Contact: Dr Joe Simonetta
UOC6 HPW6 S2
The area of physiology covered in this unit build on the fundamental physiological principles introduced in PHPH2121 Principles of Physiology A. This unit includes a series of practical class experiments on these different areas of physiology.

Note/s: Restricted to students enrolled in BOptom degree course.

PHPH2501
Physiology for Health and Sports Science A
Staff Contact: School Office
UOC6 S1
Prerequisite/s: BIOS1201, PHPH1501, 12 units of credit of Level 1 Chemistry, MATH1031, MATH1041.
Introduces fundamental physiological principles, from basic cellular function in terms of chemical and physical principles to the operation and interaction of body systems. The areas of physiology covered in this unit are excitable tissues, the cardiovascular system, blood and neuroscience. This unit includes a substantial series of practical class experiments on these different areas of physiology.

PHPH2502
Physiology for Health and Sports Science B
Staff Contact: School Office
UOC6 S2
Prerequisite/s: PHPH2501.
The areas of physiology covered in this unit build on the fundamental physiological principles introduced in PHPH2501 (Physiology for Health and Sports Science A). The topics covered include reproduction, the respiratory system, the gastrointestinal system, kidney and body fluids and the endocrine system. Again this unit includes a substantial series of practical class experiments on these different areas of physiology.

PHPH3121
Membrane and Cellular Physiology
Staff Contact: Professor Peter Barry
UOC6 HPW6 S1
Prerequisite/s: PHPH2101
The properties of cell membranes and the role of channels and transporters in permeation and transport of ions, solutes and water across membranes, in the generation of electrical signals in nerve and muscle cells, in synaptic transmission and in second messenger pathways and their part in cellular function. Includes understanding modern techniques, such as patch clamping, used to study the properties of individual ionic channels and site-directed mutagenesis and other molecular biological techniques, used to investigate the relationship between the molecular structure of appropriate proteins and physiological function. Includes the properties of water channels and epithelial transport, the mechanisms underlying muscle contraction and disease states resulting from such things as genetic defects in ion channels. It should provide a foundation for understanding higher physiological systems.
PHPH3131
Neurophysiology
Staff Contact: Professor Mark Rowe
UOC6 HPW6 S1
Prerequisite/s: PHPH2101
Brain mechanisms in sensation and perception are analyzed in detail for vision, hearing and touch, and for the position sense arising from muscles, joints and the vestibular apparatus. The sensorimotor mechanisms responsible for the control of fine movement and postural regulation are also studied at different levels of the nervous system, from the sensory and motor nerves within muscles through to the highest levels of cerebral cortical function. Segments are also included on the neural control of cardiorespiratory function; transmitters and neuromodulators; neural mechanisms in certain higher functions, eg language and memory; nervous system plasticity; computer applications in neuroscience. Experimental work introduces the student to electrophysiological and other neuroscience research techniques, and in seminar-discussion groups to a critical evaluation of neuroscience research literature.

PHPH3151
Introductory Pharmacology and Toxicology
Staff Contact: School Office
UOC6 HPW6 S1
Prerequisite/s: PHPH2101 and PHPH2201, BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291
Includes a study of the fundamentals of drug action, such as dose-response methods, receptor binding, drug absorption, distribution and metabolism. Further material on drug analysis and adverse effects of drugs will be presented. Segments dealing with aspects of chemical toxicology and the requirements of government agencies for the registration and evaluation of toxic chemicals will be covered. The practicals will cover basic pharmacological methods.

PHPH3211
Cardiorespiratory and Exercise Physiology
Staff Contact: Associate Professor Michael Perry
UOC6 HPW6 S2
Prerequisite/s: PHPH2101, PHPH2201
An advanced course which emphasises function and control of the cardiovascular system; gas exchange in the lung and blood gas carriage in the respiratory system and work capacity, preventative medicine and laboratory testing in exercise physiology. Extensive practical components involve mammalian preparations and human subjects.

PHPH3221
Endocrine, Reproductive and Developmental Physiology
Staff Contact: Professor Eugenie Lumbers
UOC6 HPW6 S2
Prerequisite/s: PHPH2101, PHPH2201
There are three major components to this subject, which consists of lectures, practical classes, tutorial and case studies. The first component of the course is a study of neuroendocrinology, molecular and systematic endocrinology, and of the endocrinology of exercise and disease. The second component of the subject deals with female and male reproductive physiology. The third component of the subject details the physiology of pregnancy, and that of the fetus and the newborn.

PHPH3251
Clinical and Experimental Pharmacology
Staff Contact: Dr Murray
UOC6 HPW6 S2
Prerequisite/s: PHPH2101, PHPH2201, (BIOC2101 and BIOC2201) or (BIOC2181 and BIOC2291) and PHPH3151
The subject deals with the pharmacology of drug classes, with emphasis on mode of drug action. Effects of drugs on the major organs, including the cardiovascular system, kidney, endocrine systems, and the central nervous system, will be covered. Students will be introduced to recent innovations in drug development and emerging therapeutic strategies based on advances in understanding cellular physiology and drug action. The practicals will cover basic pharmacological methods from both clinical and experimental standpoints.

PHPH3302
Pharmacology for Optometrists
Staff Contact: Dr R Knihinicki
UOC3 HPW3 S1
Prerequisite/s: OPTM2301, OPTM2302, OPTM2105, OPTM2206, PHPH2121, PHPH2221
Objectives: To introduce optometry students to the mechanisms of drug action and interaction, with an emphasis on the pharmacology of the eye. Pharmacodynamics, pharmacokinetics and toxicology of drugs used in the diagnosis and treatment of eye conditions; side effects of drugs used to treat systemic disease. Legal aspects of drugs.

PHPH3501
Brain Mechanisms and Sensory-Motor Integration
Staff Contact: Professor Mark Rowe
UOC6 S2
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101
The areas of physiology covered in this unit build on the fundamental physiological principles introduced in PHPH2501 (Physiology for Health and Sports Science A). The topics covered include reproduction, the respiratory system, the gastrointestinal.

PHPH3502
Skeletal Muscle in Health and Exercise
Staff Contact: Dr S Head
UOC6 S1
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101
The structural basis for motor control is described in terms of the sensory and motor pathways and the many elements of which these are made up. The hierarchical organisation of the spinal cord, brain stem, cerebellum and cortex is illustrated and described. Some of the basic functions of the nervous system are dealt with and developmental aspects of motor control are indicated. Practical classes will include observations on the organisation of the motor cortex.

PHPH3503
Exercise and Cardio-Respiratory Systems
Staff Contact: Dr D Garlick
UOC6 S2
Prerequisite/s: PHPH2501, PHPH2502.
An advanced course which emphasises function and control of the cardiovascular system; gas exchange in the lung and blood gas carriage in the respiratory system and exercise capacity, preventative medicine and laboratory testing in exercise physiology involving human subjects.

PHPH3504
Endocrine and Exercise
Staff Contact: Professor ER Lumbers
UOC6 S2
Prerequisite/s: PHPH2501, PHPH2502, BIOC2181 or BIOC2101
The course will cover and extend the student's preliminary knowledge of endocrinology. Topics covered will include: neuroendocrine axis; leptin and obesity; the pineal gland; thyroid; adrenals and endocrine pancreas. The endocrine control of intermediary metabolism, bone and mineral metabolism and fluid and electrolyte balance will be studied. The endocrinology of reproduction, puberty and control of growth and development as well as the effects of ageing on endocrine function will be investigated. The impact of exercise and training on endocrine function will be emphasised.

PHPH3511
Cardiorespiratory and Exercise Physiology (Advanced)
Staff Contact: Associate Professor Michael Perry
UOC6 HPW6 S2
Prerequisite/s: PHPH2101, PHPH2201
An advanced course which emphasises function and control of the cardiovascular system; gas exchange in the lung and blood gas carriage in the respiratory system and work capacity, preventative medicine and laboratory testing in exercise physiology. Extensive practical components involve mammalian preparations and human subjects. Advanced Science students will do a project which has
planning (wks. 1, 2, 4), execution (wks. 6, 7, 8, 9) and presentation (wks. 14).

**PHPH3521**  
**Membrane and Cellular Physiology (Advanced)**  
**Staff Contact:** Professor Peter Barry  
**UOC6:** HPW6 S1  
**Prerequisite(s):** PHPH2101  

The properties of cell membranes and the role of channels and transporters in permeation and transport of ions, solutes and water across membranes, in the generation of electrical signals in nerve and muscle cells, in synaptic transmission and in second messenger pathways and their part in cellular function. Includes understanding modern techniques, such as patch clamping, used to study the properties of individual ionic channels and site-directed mutagenesis and other molecular biological techniques, used to investigate the relationship between the molecular structure of appropriate proteins and physiological function. Included the properties of water channels and epithelial transport, the mechanisms underlying muscle contraction and disease states resulting from such things as genetic defects in ion channels. It should provide a foundation for understanding higher physiological systems. This course will include an assessable research affiliation program.

**PHPH3531**  
**Neurophysiology (Advanced)**  
**Staff Contact:** Professor Mark Rowe  
**UOC6:** HPW6 S1  
**Prerequisite(s):** PHPH2101  

Brain mechanisms in sensation and perception are analyzed in detail for vision, hearing and touch, and for the position sense arising from muscles, joints and the vestibular apparatus. The sensorimotor mechanisms responsible for the control of fine movement and postural regulation are also studied at different levels of the nervous system, from the sensory and motor nerves within muscles through to the highest levels of cerebral cortical function. Segments are also included on the neural control of cardiorespiratory function; transmitters and neuromodulators; neural mechanisms in certain higher functions, eg language and memory; nervous system plasticity; computer applications in electrophysiological and other neuroscience research techniques, and in seminar-discussion groups to a critical evaluation of neuroscience research literature. The Neurophysiology (Advanced) course will involve an assessable research affiliation program based upon discussion and evaluation of a research project, and submission of a research report.

**PHPH3551**  
**Introductory Pharmacology and Toxicology (Advanced)**  
**Staff Contact:** Dr Murray  
**UOC6:** HPW6 S1  
**Prerequisite(s):** PHPH2101, PHPH2201, BIOC2101 and BIOC2201 or BIOC2291 and BIOC2181  

This course deals with the statistical and epidemiological bases for understanding the scientific approach and for undertaking research. The student receives training in statistical software such as SPSS and learns to use the software for tests on the various levels of measurements including correlations, regressions, t-tests and analysis of variance. The student, develops a research proposal during the course.

**用品**  
**Principles of Pharmacology**  
**Staff Contact:** Professor M Murray  
**UOC3:** S2  
**Prerequisite(s):** PHPH2501, PHPH2502, BIOC2181, BIOC2101  

This course includes a study of the fundamentals of drug action, such as dose response methods, receptor binding, drug absorption, distribution and metabolism. Further material on drug analysis and adverse effects of drugs will be presented. Segments dealing with aspects of chemical toxicology and the requirements of government agencies for the registration and evaluation of toxic chemicals will be covered. This is a lecture only course.
The student chooses, after consultation and academic advice, to submit a substantial report of the internship, together with the skills undertaken by the student. The student is required to undertake a structured internship in a relevant professional area. This is done under the supervision of an agreed professional person and, in terms of a completed log book and a substantial report, similar to Practicum A, the student undertakes an internship in a different or related professional area. The same requirements apply in this area who will verify entries in a log-book recording activities generated by undertaking practical classes dealing with drug testing.

Similar to Practicum A, the student undertakes an internship in a different or related professional area. The same requirements apply in terms of a completed log book and a substantial report.

A research proposal will have been developed in the course Introductory Research Methods (PHPH4501). In this course the student will implement the approved project in terms of reviewing the literature, applying the appropriate methods, accumulating results and processing these through the relevant statistics, discussing the results and drawing conclusions. A report is to be written in the form of a scientific paper.

This is a course in systematic pharmacology dealing with the effects of drugs on systems with particular emphasis on the drugs that enhance performance and underlying mechanisms responsible for their effects. As well students will study the impact of drug treatment on performance and the effects of exercise on drug actions and side effects. This course will be given as lecture only.

This course emphasises the importance of circadian rhythms in regard to athletes and their performance. The neurophysiology and location of rhythm generators will be reviewed and their effects on the neuro-hormonal axis discussed. The ultradian rhythms, such as the alert-drowsy cycle, will be discussed in relation to performance. Sleep physiology and its stages will be discussed in relation to hormonal changes such as diurnal changes in plasma cortisol and growth hormone. There will be discussion of jet-lag in relation to the phase changes due to rapid changes in longitude as occurs in airline travel. The effects of disordered sleep will be considered in relation to its effects on performance and related effects on arousal and attention and on hormones. Practical work will include observations in a sleep laboratory.

The course emphasises the importance of circadian rhythms in regard to athletes and their performance. The neurophysiology and location of rhythm generators will be reviewed and their effects on the neuro-hormonal axis discussed. The ultradian rhythms, such as the alert-drowsy cycle, will be discussed in relation to performance. Sleep physiology and its stages will be discussed in relation to hormonal changes such as diurnal changes in plasma cortisol and growth hormone. There will be discussion of jet-lag in relation to the phase changes due to rapid changes in longitude as occurs in airline travel. Practical work will include observations in a sleep laboratory.

Physics

PhysS1022
Physics 1 For Health and Life Scientists
Staff Contact: School Office
UOC12 HPW6 S1 S2
Corequisites: MATH1021 or MATH1032 or MATH1131

Principally for students majoring in the life and health sciences disciplines. Topics at an introductory level. The methods of physics, describing motion, the dynamics of a particle, conservation of energy, kinetic theory of gases, properties of liquids, vibrations and waves, electricity and conduction in solids, ions and ionic conduction, magnetism and electromagnetic induction, alternating current, atomic nature of matter, X-rays, the nucleus and radio-activity, geometrical optics, optical instruments, wave optics, microscopes and their uses.

Psychiatry

PSCY2201
Human Behaviour(Science)
Staff Contact: Dr Ute Vollmer-Conna
UOC6 HPW3 S1 S2

Objectives: To provide students with key concepts in the five main topic areas and demonstrate the practical application of these concepts in medical practice. The five main topic areas are: research methods in behavioural sciences, psychology in relation to medicine, sociology in relation to medicine, bioethics, and human sexuality. Students are encouraged to develop an understanding of human behaviour as the result of complex interactions between multiple factors, so that they are better able to appreciate and respect their patients and colleagues as persons. Taught over both sessions. Didactic material and some case material is presented in lectures and the tutorial program is structured to consolidate this information. Emphasis is placed on developing skills in clear professional communication, with feedback on written assignments and tutorial presentations. Tutorial exercises encourage the development of supportive and co-operative working relationships among students and provide an introduction to interviewing skills. Specific topics covered include: risk behaviours; anxiety; stigma; social class and health; the sexual response and how it changes across the life-span; and a range of bioethical topics including human and animal experimentation, euthanasia, the doctor and the state.

A handbook for the course is produced each session and may be borrowed from the Biomedical Library Closed Reserve or purchased from the School of Psychiatry.

Assessment: In Session 1, assessment consists of two written examinations, a tutorial presentation and a class test. In Session 2, students are required to write a major essay on Bioethics, present a tutorial paper and sit a final written examination.

Notes: Restricted to combined degree course 3821.
Psychology

Servicing Course only: taught within programs offered by other faculties.

PSYC1001
Psychology 1A
Staff Contact: Dr. Spehar
UOC6 HPW5 S1
Excluded: GENB4001

This course introduces the content and methods of psychology as a basic science, with emphasis on the social bases of behaviour. After an initial review of the historical foundations for the scientific study of human behaviour, several specific topics related to the social aspects of human behaviour are discussed. Specific topics covered in this course include: development, measurement of personality, theories of consciousness, and social influences on behaviour. In addition, training in the methods of psychological inquiry and basic procedures of data analysis is also provided.

PSYC1011
Psychology 1B
Staff Contact: Dr. Spehar
UOC6 HPW5 S2
Excluded: GENB4002

This course introduces the content and methods of psychology as a basic science, with emphasis on the biological bases of behaviour. Specific topics covered in this course include: perception, learning, memory, motivation, emotion, and abnormal behaviour. After describing the basic phenomena within an area, the goal will be to explore the neural bases of these behaviours. In addition, training in the methods of psychological inquiry and basic procedures of data analysis is also provided.

PSYC2126
Sports Psychology
Staff Contact: School Office
UOC6 HPW4
Prerequisite/s: PSYC1001, PSYC1011

This course focuses on intrapsychic and interpersonal processes relevant to the training and practice of sport. Theories in areas such as self-perception, self-evaluation, attentional control, attribution, social comparison, group cohesiveness, leadership, and conflict management will be described and applied to the sporting context. Physiological consequences of psychological processes, and their implications for preparation and performance will be discussed. Practical classes will include consideration of issues and methods involved in assessment of relevant personality and individual differences.

Note/s: Restricted to Program 3850 Bachelor of Science - Health and Sports Science.
Postgraduate Programs

At the postgraduate level, study may be undertaken for the award of the following:

Doctorates
Doctor of Medicine (MD)
Doctor of Philosophy (PhD)

Masters
Master of Clinical Education (MClinEd)
Master of Community Health (MCH)
Master of Medical Science in Drug Development (MMedSc)
Master of Health Administration (MHA)
Master of Health Services Management (MHSM)
Master of Health Professions Education (MHPED)
Master of Medicine (Geriatrics) (MMed)
Master of Public Health (MPH)
Master of Science (MSc)
Master of Sports Medicine (MSpMed)
Master of Surgery (MS)

Graduate Diplomas
Graduate Diploma in Clinical Education (GradDipClinEd)
Graduate Diploma in Community Paediatrics (GradDipCommPaed)
Graduate Diploma in Drug Development (GradDipDD)
Graduate Diploma in Geriatric Medicine (GradDip)
Graduate Diploma in Paediatrics (GradDipPaed)
Graduate Diploma in Public Health (GradDipPH)
Graduate Diploma in Sports Medicine (GradDipSpMed)

Graduate Certificates
Graduate Certificate in Clinical Education (GradCertClinEd)
Graduate Certificate in Drug Development (GradCertDD)
Graduate Certificate in Geriatric Medicine (GradCertGeri)
Graduate Certificate in Health Services Management (GradCertHSM)
Graduate Certificate in Public Health (GradCertPH)
Graduate Certificate in Sports Medicine (GradCertSpMed)

Full details of the conditions of the award of these degrees are shown in this handbook under Conditions for the Award of Higher Degrees.

Admission to Coursework Programs – Masters, Graduate Diploma, Graduate Certificate

For detailed information about individual programs, please refer to the section on Conditions for the Award of Degrees.

a) For Masters by coursework and graduate diplomas requiring a medical degree (MMed, MSpMed, MPM, Master of Medical Science in Sports Medicine, Geriatric Medicine, Paediatrics), a candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine AND shall have had at least one year's full-time experience in the practice of medicine. Additional prerequisites may be specified by the program authority.

b) For other Masters by coursework and graduate diploma programs, a candidate for the degree shall have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine OR shall have been awarded an appropriate degree of Bachelor of three full-time years' duration (or the part-time equivalent) and have had at least three years' relevant experience. Additional prerequisites may be specified by the program authority.

c) For graduate certificates requiring a medical degree (Sports Medicine and Geriatric Medicine), a candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at
a level acceptable to the Higher Degree Committee of the Faculty of Medicine. Additional prerequisites may be specified by the program authority.

d) For other graduate certificate programs, a candidate for the degree shall have been awarded an appropriate degree of Bachelor of three full-time years' duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine. Additional prerequisites may be specified by the program authority.

Postgraduate Enrolment Procedures

All students enrolling in postgraduate programs should obtain a copy of the free booklet *Re-enrolling 2000* available from the School Offices and the Admissions Office. This booklet provides detailed information on enrolment procedures and fees, enrolment in miscellaneous courses, locations and hours of cashiers and late enrolment details. Students interested in undertaking a postgraduate program should consult the appropriate Head of School or the Postgraduate Administrative Officer, Office of the Dean.

Advice to Graduate Students on Computing Requirements

UNSW expects all new students to have off campus access to a standard modern computer with CD drive and internet connectivity (e.g. via a modem). The software on the computer should include:

- A word processor able to import and export RTF files
- A spreadsheet program able to import and export ASCII delimited tables
- A drawing/painting program able to import and export images in widely used formats such as GIF, JPEG, TIFF or PNG
- Software able to read PDF and Postscript files
- A Java 1.1 capable Web browser that supports HTML 2.0
- Software to enable file transfer using the FTP protocol
- Networking software to enable TCP/IP connection (e.g. via a modem using PPP)
- Email software able to link to a popserver
- Anti-virus software

As computers remain expensive items, UNSW will provide limited on-campus computer facilities that meet these standards for students who are unable to obtain access to off-campus access to such resources.

1UNSW's Division of Information Services is able to provide software of this type with students being charged only for handling and media costs.
Program Outlines

Faculty Research Degrees

Doctor of Medicine
MD

This degree is a research program requiring a candidate to make an original and meritorious contribution to some branch of medicine. The program may be completed by:

- thesis with supervision,
- thesis without supervision, or
- published work.

Doctor of Philosophy
PhD

This is a degree requiring an original and significant contribution to knowledge in an approved area.

Master of Science
MSc

This is the main Masters level research program for postgraduate students in the Faculty of Medicine. Candidates must demonstrate ability to undertake research by the submission of a thesis embodying the results of an original investigation. The program may be undertaken either with or without supervision.

Master of Surgery
MS

The degree of Master of Surgery may be awarded to a candidate who has made an original contribution to knowledge in some field related to surgery. Generally, candidates must have at least three years' experience of surgical training and should be a lapse of five years before the thesis is submitted from the date of the award of the undergraduate medical degree.

Other research degrees are offered by Schools of the Faculty.

School of Community Medicine

The School offers programs of study leading to the award of the following degrees:

- Master of Community Health by Research
- Masters of Medicine in Geriatrics by Coursework
- Graduate Diploma in Geriatric Medicine
- Graduate Certificate in Geriatric Medicine

2855
Master of Community Health by Research

MCH

This program is designed for health personnel engaged in various areas of community health services and professions who wish to develop their research skills by undertaking studies leading to the award of the degree of Master of Community Health, either as full-time or part-time internal students, or as students external to the University. External candidates are required to spend a minimum of 14 weeks in the School during the program.

An original investigation under the direction of a supervisor for a minimum period of three academic sessions in the case of a full-time candidate, or a minimum of four academic sessions in the case of a part-time or external candidate is required.

Appropriate areas for research include prevention and health promotion; primary health care; health of particular population groups; occupational and environmental health; epidemiology; health of the elderly; disability and rehabilitation; alcohol, smoking and drug dependence; health services and evaluation; community mental health; community genetics; or a field approved by the Head of the School.

The candidate is required to submit a thesis embodying the results of the original investigation.

9025
Master of Medicine in Geriatrics by Coursework

MMed

The Master of Medicine (Geriatrics) program is designed for medical practitioners who wish to upgrade their skills and knowledge in the area of aged care medicine and who have at least one year of clinical experience. Candidates require basic computer skills. The program is offered by means of a distance education package. In order to undertake the program, candidates require a computer with the following specifications: 486 DX or Macintosh LC75 (minimum); 16 MB RAM (minimum); sound card and speakers; CD-ROM; modem (fast); Internet access; web browser and word processing package. Basic computer skills are assumed. Upon enrolment, candidates are invited to attend a one day seminar (non-compulsory) held in association with the biomedical librarian, UNSW. During this seminar, students will learn the necessary skills to use the Internet effectively, and to access a number of medical databases, on-line medical journals and document delivery systems.

The Master of Medicine (Geriatrics) degree requires completion of one year full-time coursework, plus a major project and supervised clinical experience. The degree may be undertaken on a part-time basis.

Coursework: The bulk of the coursework is supplied to candidates by mail, in printed form. Some courses have an accompanying CD-ROM. Students liaise with lecturers, access assessment activities and submit work via the Internet. Each six unit of credit course provides candidates with the equivalent of 3 hours of lecture material weekly for a 14 week semester.

Students are required to satisfactorily complete the following coursework courses:

<table>
<thead>
<tr>
<th>UOC</th>
<th>Course Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMED9548</td>
<td>Clinical Geriatrics 1</td>
<td>6</td>
</tr>
<tr>

<tr>
<td>CMED9550</td>
<td>Clinical Examination</td>
<td>-</td>
</tr>
<tr>
<td>CMED9539</td>
<td>Psychiatry of Old Age</td>
<td>6</td>
</tr>
</tbody>
</table>
These courses may be offered in first and/or second semester depending on demand. Assessment is undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the coursework, candidates must also be successful in a clinical exam (oral) which is held in Sydney. (CMED9550).

Candidates awarded the Graduate Diploma in Geriatric Medicine are eligible to undertake further study for the Master of Medicine (Geriatrics) by coursework.

---

7364
Graduate Certificate in Geriatric Medicine

GradCert

Prerequisites: MB BS (or equivalent) and 1 year of clinical experience. Candidates require basic computer skills.

The Graduate Certificate in Geriatric Medicine is designed for medical practitioners who wish to upgrade their skills and knowledge in the area of aged care medicine. The program is offered by means of a distance education package. In order to undertake the program, candidates require a computer with the following specifications: 486 DX or Macintosh LC75 (minimum); 16 MB RAM (minimum); sound card and speakers; CD-ROM; modem (fast); Internet access, web browser and word processing package. Basic computer skills are assumed. Upon enrolment, candidates are invited to attend a one day seminar (non-compulsory) held in association with the biomedical librarians, UNSW. During this seminar, candidates will learn the necessary skills to use the Internet effectively, and to access a number of medical data bases, on-line medical journals and document delivery systems.

The bulk of the coursework is supplied to candidates, by mail, in printed form. Some courses have an accompanying CD-ROM. Students liaise with lecturers, access assessment activities and submit work via the Internet. Each 6 units of credit course provides candidates with the equivalent of 3 hours of lecture material weekly for a 14 week semester.

These courses may be offered in the first and/or second semester depending on demand. Assessment will be undertaken through a combination of multiple choice and short answer questions, clinical case scenarios and assignments. At the conclusion of the coursework, candidates must also be successful in a clinical exam (oral) which is held in Sydney. (CMED9550).

Candidates awarded the Graduate Certificate in Geriatric Medicine are eligible to undertake further study for the Graduate Diploma in Geriatric Medicine or the Master of Medicine (Geriatrics) by coursework.
School of Health Services Management

The School offers programs of study leading to the award of the following degrees:

- Master of Health Administration by Research
- Master of Health Administration by Coursework
- Masters of Health Services Management
- Master of Commerce - Health Informatics
- Graduate Certificate in Health Services Management

Some People Who Can Help You

Business Manager
Deidre Kennedy (Room 227, Samuels Building)
Telephone: (02) 9385 2597
Facsimile: (02) 9385 1036
Email: d.kennedy@unsw.edu.au

The School of Hospital Administration was founded in 1956 with a grant from the WK Kellogg Foundation to provide training in hospital administration. In 1969 the name was changed to School of Health Administration, and in 1989 to School of Health Services Management (its present name), in accordance with its broader objectives in teaching and research. It serves the needs of hospitals and health services throughout Australia but qualified overseas candidates are also admitted.

The School also offers three formal programs in health services management leading to the awards of the degree of Master of Health Services Management, Master of Health Administration, and the Graduate Certificate in Health Services Management. These programs may be undertaken by coursework on a full-time, part-time or external basis. In addition, the degrees of Master of Health Administration, and Doctor of Philosophy may be taken following periods of full-time or part-time research in hospital and health service management.

2960
Master of Health Administration by Research

MHA

Facilities are available in the School for students to undertake research studies leading to the degree of Master of Health Administration, as either full-time internal students, part-time internal students, or part-time external to the University. Students are required to have a suitable first degree and are normally expected to have a minimum of three years' experience in their proposed field of study within the health or hospital services.

Enquiries should be directed to the Research Studies Co-ordinator, Dr Mary-Louise McLaws, Tel (02) 9385 2591, e-mail: m.mclaws@unsw.edu.au.

8900
Master of Health Administration by Formal Course Work

MHA

The degree program has been designed to provide students with the essential knowledge required for senior managerial and planning work in the health services. The objective of the program is to develop graduates who are: 1. competent general and financial managers, 2. competent planners, 3. knowledgeable about public health (the health status of the Australian and other communities) and the structure, organisation and financing of health care systems, 4. knowledgeable about society, law and ethics, 5. competent in quantitative skills.

The degree is awarded on the successful completion of the program outlined below. The program may be taken on a full-time or part-time basis, internal basis or external basis (including compulsory residential schools) or on a distributed basis (mixture of full-time, part-time and external). External studies are not generally offered to students resident in the Sydney region. Applications based on difficulty of travel will be considered.

The normal time for completion of the full-time program is three academic sessions. However, students may be allowed to complete the degree in two academic sessions provided they have a four year undergraduate degree (or equivalent) and in excess of three years experience in the health field. The maximum time for completion of the program is eight academic sessions.

The normal time for completion of the program for part-time internal and external students is six academic sessions (three calendar years). Students must successfully complete 12 courses or the equivalent to a total of 60 units of credit.

Applicants are required to have completed a minimum three year degree and to have a minimum of three years postgraduate experience preferably in a health-related field.

Those students who are inexperienced (ie less than three years) particularly in the health service area, are required to undertake a planned program of field experience (HEAL9531 Fieldwork in Health Service Organisation) in addition to the 12 courses.

Electives are chosen by the student in consultation with the Head of the School of Health Services Management (or nominee) from graduate courses offered within the University or by another tertiary institution. The approval of the relevant Head of School is required to undertake an elective offered outside the School of Health Services Management.

Program Structure

The program is divided into two components, for a total of 60 units of credit. These components are:

Core courses (6) 36 units of credit
Elective courses (6) 24 units of credit

In selecting electives, students can choose courses relating to their expected field of work, can choose to undertake advanced study in a particular discipline (eg Health Policy and Management) and/or can take electives relevant to their own interests and needs.

Core Courses

This compulsory component comprises the six core courses of 6 units of credit each. Students must successfully complete the following six courses as a requirement for graduation. Exceptions can only be granted by the Head of School on the basis of demonstrated equivalent masters level coursework previously undertaken.

8941 Master of Health Services Management

MHSM

The program is designed to provide students from countries with developing economies and health systems with the knowledge and skills to be competent health service planners, policy makers and managers. For students from developed health systems involved in international health, this program will enable them to focus and develop relevant planning and management knowledge from within a development framework.

The degree is awarded on the successful completion of the program outlined below. The program may be taken on a full-time or part-time basis, internal basis or external basis (including compulsory residential schools) or on a distributed basis (mixture of full-time, part-time and external). External studies are not generally offered to students resident in the Sydney region. Applications based on difficulty of travel will be considered.

The normal time for completion of the full-time program is two academic sessions. The maximum time for completion of the program is eight academic sessions. The normal time for completion of the program for part-time internal and external students is four academic sessions (two calendar years).

Students must complete 9 courses, or the equivalent, to a total of 48 units of credit.

Applicants are required to have completed an appropriate undergraduate degree or approved equivalent and to have a minimum of three years' postgraduate experience preferably in a health-related field. Those students who are inexperienced (ie less than three years) particularly in the health service area, are required to undertake a planned program of field experience (HEAL9531 Fieldwork in Health Service Organisation) in addition to the 9 courses.

Electives are chosen by the student in consultation with the Head of the School of Health Services Management (or nominee) from graduate courses offered within the University or by another tertiary institution. The approval of the relevant Head of School is required to undertake an elective offered outside the School of Health Services Management. Requests for exemption and substitution for previous postgraduate courses taken will be considered subject to approval of the Head of School.

Program Structure

The program is divided into two components, for a total of 48 units of credit. These components are:

Core courses (6) 36 units of credit
Elective courses (3) 12 units of credit

In selecting elective courses students can choose from a wide range of courses relating to their expected field of work; can choose to undertake advanced study in a particular discipline (eg Health Policy and Management) and/or can take elective courses relevant to their own interests and needs.

Core Courses

This compulsory component comprises the six core courses of 6 units of credit each. Students must successfully complete the following six courses as a requirement for graduation. Exceptions can only be granted by the Head of School on the basis of demonstrated equivalent masters level coursework previously undertaken.

Elective Courses

There is a large number of courses available to choose from in each academic session. These courses are provided for illustrative purposes.

8404 Master of Commerce – Health Informatics

MCom

A joint program between the School of Health Services Management and the School of Information Systems, Technology and Management in the Faculty of Commerce. This special program leads to the award of a Master of Commerce with a stream in Health Informatics.

The convergence of information and telecommunications technologies has ushered in the era of digital information management. The use of intranets, extranets and proprietary information sources has transformed the work of many professional groups. The work of practitioners in many areas has become increasingly information dependent, and the provision of timely, accurate, up-to-date and authoritative information to the desktop is now the expectation. In addition the work practices of these professional groups has become more flexible as practitioners/professionals are increasingly mobile but still require access to information and technology. Arising from this change is the development of a new kind of professional, the Information Management and Technology Specialist. This person combines knowledge of information systems and technology with knowledge of information sources and management. They have an understanding of technology developments and the issues of managing information systems, but more importantly they have the skills and knowledge to create, acquire, maintain and disseminate appropriate information to support operational processes of the organisation.

Health Informatics is concerned with the development, dissemination and use of information in the field of health care. This stream in the Master of Commerce program is aimed at providing Information Management and Technology professionals with a program that will prepare them for work within the health care environment. Issues covered will include: problems of classification that are inherent in establishing more financially driven and output-oriented approaches to service delivery; identifying and developing systems for more evidenced based and outcomes approaches to service delivery; involving clinicians in information systems development and implementation particularly with respect to casemix applications and clinical pathways.

HEAL9711  Management of Organisations  
HEAL9744  Casemix Accounting and Funding  

7360 Graduate Certificate in Health Services Management
Grad Cert HSM

The Graduate Certificate provides recognition to students who are limited to study for one session or one year only. It will be awarded to a candidate who has satisfactorily completed the program of study outlined below. If students make satisfactory progress they may apply, on a competitive basis, to enter the MHA or MHSM. Should students be successful in obtaining entry to the MHA or MHSM program they will be expected to successfully complete the remaining Masters courses required before they can be awarded a Masters degree.

The Graduate Certificate program may be taken on a full-time or part-time basis, internal or external basis (including compulsory residential schools). External Studies are not generally offered to students resident in the Sydney metropolitan region. Applications based on difficulty of travel will be considered.

Program Structure

Candidates are required to successfully complete a minimum of four courses or the equivalent to a total of 20 units of credit from the courses offered by the School of Health Services Management.

For candidates interested in particular streams the following are offered. In addition, streams currently being developed for offer to candidates in 2001 will include, Hospital Infection, Casemix, Health Law and Social Determinants of Health.

1. Clinical Governance

HEAL9091 Health Care Economics and Financial Management 4  
HEAL9747 Clinical Work Process Control 6  
HEAL9748 Clinical Governance 6  
HEAL9781 Evidence Based Clinical Management 4  

2. Strategy and Change

HEAL9931 Health Services Strategic Management and Planning 4  
HEAL9741 Management of Health Services 4  
HEAL9921 Project 4  
HEAL9108 Program Evaluation and Planned Change 4  
HEAL9111 The Consultation Process 4  

3. Health Outcomes Measurement, Improvement and Research

HEAL9121 Measurement of Quality of Life, Health Status and Patient Satisfaction 4  
HEAL9781 Evidence-based Clinical Management 4  
HEAL9974 Project 12  

Qualifications For Admission

1. Candidates will have been awarded a Bachelor's degree in an appropriate discipline from a recognised tertiary institution, and  
2. Candidates will have a minimum of three years' experience in health services of a kind acceptable to the School Admission Committee.

In exceptional cases an applicant who submits evidence of such other academic and professional qualifications may be admitted.

No credits, exemptions or advanced standing are granted for the Graduate Certificate. Exceptions can only be granted by the Head of School.

Non-Award Students

Non-Award students enrolled on an external basis in courses of the MHA, MHSM or MPH degree programs are required to meet all the conditions for the completion of each course, including attendance at lectures in the course at a residential school.

School of Medical Education

The School offers programs of study leading to the award of the following degrees:

- Master of Health Professions Education by Research  
- Master of Clinical Education by Distance Education  
- Graduate Diploma in Clinical Education by Distance Education  
- Graduate Certificate in Clinical Education by Distance Education

2885 Master of Health Professions Education by Research

MHPed

This program is designed for teachers and/or educational administrators in the health professions who wish to develop their research skills by undertaking studies leading to the award of the degree of Master of Health Personnel Education, either as full-time or part-time internal students or as students external to the University. The latter are required to spend a minimum of 14 weeks in the School during the program.

An original investigation under the direction of a supervisor for a minimum period of three academic sessions in the case of a full-time candidate, or a minimum of four academic sessions in the case of a part-time or external candidate is required.

The candidate is required to submit a thesis embodying the results of this original investigation.
9050  
Master of Clinical Education by Distance Education  
MClInEd

The program aims to provide a multidisciplinary program of study of clinical education for practicing clinicians with teaching responsibilities. The program requires clinical educators to study the knowledge, reasoning, practical activities and skills within the environment of the ward and other clinical settings, to observe and document clinical teaching and learning, and to undertake action research in its improvement.

The program also aims to foster a rational and rigorous approach to understanding clinical reasoning and decision making, and to ensure its effective learning. Three levels of attainment are proposed to accommodate the differing needs among clinical teachers.

The degree of Master of Clinical Education will be awarded after satisfactory completion of a program of advanced study of 48 units of credit and submission of a satisfactory major project based on at least one session of applied development or research in clinical education.

Courses to be offered within the distance education programs are:

The Centre for Public Health

The Centre brings together the resources of the Schools of Community Medicine, Health Services Management and Medical Education. The Centre is also a partner in the Sydney Public Health Consortium with the Department of Public Health and Community Medicine at the University of Sydney, where candidates may undertake cross institutional enrolment in courses.

The Centre offers programs of study in the area of public health leading to the awards of the following degrees:

- Master of Public Health, by Coursework and by Research
- Graduate Diploma of Public Health
- Graduate Certificate of Public Health

2845  
Master of Public Health by Research  
MPH

Students applying for admission to the MPH by research are required to have a suitable first degree and are normally expected to have considerable experience in their proposed field of study within the health or hospital services. The program can be undertaken full-time or part-time; through internal or external mode.

7376  
Graduate Certificate in Clinical Education by Distance Education  
GradCertClinEd

The Graduate Certificate program aims to provide a multidisciplinary program of study of clinical education for practicing clinicians with teaching responsibilities. The program requires clinical educators to study the knowledge, practical activities and skills within the environment of the ward and other clinical settings, to observe and document clinical teaching and learning.

This Graduated Certificate program will be suitable for those clinical teachers who wish to upgrade their educational skills and obtain recognition for their Faculty and professional development, but who would not wish to engage in a full masters program.

The Graduate Certificate in Clinical Education will be awarded after satisfactory completion of advanced study of 20 units of credit.

Master of Public Health by Coursework  
MPH

The Master of Public Health program provides preparation for education, research and service in all aspects of public health. The program includes study in epidemiology, quantitative and qualitative research methods, health services management, health promotion, development and education in health, as well as a systematic review of topical public health issues. It is designed to address the continuing education needs of specialists in public health as well as providing a general orientation to public health issues and methods for the health professions.
Applicants are required to have completed a bachelor degree in a health-related discipline and to have at least three years’ experience in a health or health-related field.

Program Structure
The MPH program is offered in full-time, part-time and external modes. The program is divided into three components, for a total of 60 units of credit. These components are:

- Core courses: 28 units of credit
- Elective courses: 20 units of credit
- Project: 12 units of credit

The program articulates with the Graduate Diploma in Public Health (GradDipPH 5507) and the Graduate Certificate in Public Health (GradCertPH 7368). Credit for courses completed as part of the GradDipPH and the GradCertPH may be transferred to the Master’s program.

Core Courses
Students must complete the following six courses as a foundation for further study. These core courses are prerequisites for enrolment in many of the electives.

- CMED96500 Epidemiology 6
- CMED96516 Introduction to Public Health 4
- MEED9012 Health Promotion 4
- CMED9502 Statistics for Public Health 6
- HEAL9751 Introduction to Management and Policy for Public Health 4
- #MEED9131 Formulating Academic Proposals and Projects 4

Electives
There are over 70 electives offered in the three schools at the University of New South Wales. In addition, students may enrol in electives which are offered by other schools and academic units within the University of New South Wales, as well as courses offered in the Department of Public Health and Community Medicine at the University of Sydney. Students may elect to undertake independent studies in any of the three Schools, to learn about a particular area of study or course matter of special interest which is not offered in the formal program. The following electives are offered in 2001:

- CMED9517 Advanced Biostatistics and Statistical Computing 4
- CMED9604 Alcohol and Other Drug Issues 4
- CMED9513 Applied Epidemiology 4
- CMED9627 Audit and Quality Assurance in Primary Care 8
- CMED9518 Case Studies in Epidemiology 4
- HEAL9748 Clinical Governance 4
- HEAL9747 Clinical Work Process Control 4
- MEED9010 Community Development 4
- MEED9111 The Consultation Process 4
- #HEAL9661 Current Issues in Nursing 4
- CMED9615 Delivery of Health Services in the Community 4
- CMED9519 Demography 4
- MEED9125 Designing Short Courses and Workshops 4
- CMED9612 Environmental Health 4
- CMED9619 Evaluation of Primary Health Services 4
- CMED9602 Health and Illness Behaviour 4
- CMED9613 Health and Public Policy 4
- HEAL9091 Health Care Economics and Financial Management 4
- HEAL9081 Health Care Financial Management 2 4
- HEAL9041 Health Care Systems 6
- HEAL9351 Health Economics 1 6
- CMED9605 Health in Developing Countries 4
- #HEAL9331 Health Related Law & Ethics (Australia) 4

- HEAL9301 Health Services Planning 1 4
- HEAL9391 Health Services Strategic Management and Planning 4
- CMED9621 HIV/AIDS Challenging and Changing Health Care Systems 4
- CMED9626 Inequalities and Health 4
- MEED9013 Influencing Health Beliefs and Health Behaviours 4
- CMED9633 International Tobacco Control 4
- HEAL9743 Introduction to Casemix 4
- MEED9133 Learning, Teaching and Assessment 6
- HEAL9741 Management of Health Services 4
- HEAL9711 Management of Organisations 6
- HEAL9701 Management of Work of Health Professionals 4
- HEAL9121 Measurement of Quality of Life, Health Status and Patient Satisfaction 4
- MEED9131 Planning Educational Programs 4
- HEAL9381 Policy Studies 4
- MEED9122 Primary Health Care: Programs, policies and perspectives 4
- MEED9129 Primary Health Care: Issues in Implementation 4
- MEED9632 Project Design and Monitoring in Effective Health Care 4
- MEED9140 Project Design and Monitoring in International Health 4
- CMED9620 Project Management and Evaluation in Rural Areas 4
- MEED9120 Qualitative Research Methods in Health Promotion 4
- HEAL9111 Quality Assurance for Health Administrators 4
- HEAL9371 Research & Evaluation Methods 4
- CMED9608 Rural Health Studies 1 4
- HEAL9811 Sociology, Ethics and Health 4
- MEED9106 Teaching Skills 4
- CMED9606 Women and Health 4

* These courses are also available in distance education mode.

Project
The project comprises in-depth study of a contemporary public health issue. Students are expected to demonstrate their ability to apply knowledge and skills gained in the program. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on a field placement. It is normally undertaken after completion of all core and elective courses. Provisional topics for the project will be determined in consultation with an academic adviser early in the program, and refined in MEED9131 Formulating Academic Proposals and Projects.

5507 Graduate Diploma in Public Health

GradDipPH
The Graduate Diploma in Public Health comprises the following courses:

- CMED9516 Introduction to Public Health 4
- CMED9502 Statistics for Public Health 6
- CMED9500 Epidemiology 6
- HEAL9751 Introduction to Management and Policy for Public Health 4
- MEED9012 Health Promotion 4

School of Paediatrics
The School offers programs of study leading to the award of the following degrees:
- Graduate Diploma in Community Paediatrics
- Graduate Diploma in Paediatrics

5505
Graduate Diploma in Community Paediatrics

GradDipCommPaed
This program is designed for health professionals such as medical practitioners, nurses, psychologists, physiotherapists and social workers, who provide services to children. Candidates are required to hold a relevant bachelor's degree of three years' duration or equivalent prior to enrolment in the program. The program is aimed to equip candidates with an understanding of health needs of children in the community.

The Graduate Diploma in Community Paediatrics will be awarded after satisfactory completion of a program of advanced study of the following ten courses which totals 44 units of credit:

This course will be run in 2001 subject to a minimum of 10 enrolments.

5500
Graduate Diploma in Paediatrics

GradDipPaed
The program is taken over one year on a part-time basis. Candidates attend a program of lectures and grand rounds (approximately four and one-half hours per week).

The Graduate Diploma is awarded after satisfying the examiners in written and clinical examinations at the end of the program.

It must be noted that the Graduate Diploma of Paediatrics is intended for postgraduates who have medical degrees registrable in Australia and who are able to secure a paediatric appointment, salaried or otherwise, in a teaching hospital recognised by the University of New South Wales. The School of Paediatrics takes no responsibility for making such arrangements.

Candidates who have completed 12 months experience in Clinical Paediatrics under supervisors acceptable to the University may be exempt from the clinical experience.

Students should note that if they have to repeat the year due to failure in one or more course, they must re-enrol in and satisfactorily complete all courses in order to qualify for the Graduate Diploma.

School of Physiology and Pharmacology
The School offers programs of study leading to the award of the following degrees:
- Master of Medical Science in Drug Development delivered by Course work delivered by Distance Education
- Master of Science in Biopharmaceuticals (in conjunction with the School of Biotechnology) by Coursework or by Distance Education
- Master of Sports Medicine by course work delivered by Course work delivered by Distance Education
- Graduate Diploma in Drug Development by Distance Education
- Graduate Diploma in Sports Medicine by Course work delivered by Distance Education
- Graduate Certificate in Drug Development by Distance Education
- Graduate Certificate in Sports Medicine by Course work delivered by Distance Education

9055
Master of Sports Medicine

MSPMed
The programs aim to equip medical practitioners with a rigorous understanding of the theory and practice of sports medicine in meeting the medical demands of people engaged in individual or team performance-related sporting activities and with the medical demands of people involved in health-related physical activities for the purposes of primary, secondary or tertiary prevention of disease processes.

The degree of Master of Sports Medicine will be awarded after the satisfactory completion of a program of advanced study of courses (including clinical activities as prescribed) which totals 60 units of credit.

54 units of credit will accrue from nine compulsory courses.
6 units of credit will accrue from the completion of a Research Project and Report.
Completion is also required of a Sports Medicine Practicum requiring attendance at two 4 day clinical training weekends. For overseas students special arrangements will be made.
Satisfactory completion of a final clinical examination is also required.

Courses for MSPMed are as follows:
The Graduate Diploma in Sports Medicine will be awarded after the satisfactory completion of a program of advanced study of courses (including clinical activities as prescribed) which total 48 units of credit from eight compulsory courses. Other requirements will be the completion of a Sports Medicine Practicum requiring attendance at two 4 day clinical training weekends (for overseas students special arrangements will be made) and satisfactory completion of a final clinical examination. Master of Science in Biopharmaceuticals by coursework

MSc (Biopharmaceuticals)

This is an interdisciplinary program designed principally for postgraduates with backgrounds in either pharmacology or biotechnology who wish to obtain advanced training in both areas in order to gain expertise necessary for the development and use of the new generation of biopharmaceuticals which have been developed by, or result from, the application of molecular biology. It is open to postgraduates with a four year degree in a related discipline or who have, in the opinion of the Higher Degree Committee, acquired equivalent qualifications or experience. Prior study of biochemistry is required for the program. The program consists of lectures, tutorials, practical sessions, case history studies and a supervised project. The minimum period of registration before the award of the degree is two sessions for full-time students and four sessions for part-time students. Choice of units is dependent on the background of the student. Pharmacology Principles (PHPH5461) must be taken by students who have not completed an approved Pharmacology program, while Biotechnology Principles (BIOT7040) must be taken by students who have not completed an approved Biotechnology course program. Course details are as follows:

Each individual program must be approved by the Higher Degree Committee of the Faculty of Applied Science and would comprise:
1. a major strand of related material comprising approximately 75% of the total program including a project comprising not less than 15% of the program
2. a minor strand of broader based material comprising up to 25% of the total program.

Master of Science in Biopharmaceuticals by coursework Distance Education

MSc (Biopharmaceuticals)

The CRC for Biopharmaceutical Research has developed this strongly interdisciplinary Master of Science in Biopharmaceuticals course. The course teaches the scientific basis underscoring the development of recombinant biopharmaceuticals, combined with aspects of clinical trials, regulatory considerations, patent issues, and licensing. The program content is incorporated in 8 distance education modules comprised of written text and video/audio tapes containing course material, demonstrations and self-testing exercises. Access to the Course Co-ordinators will be by phone, fax, electronic mail and teleconferencing facilities. The Master's Program can be completed in a minimum of 2 years. The minimum time option would entail the completion of two modules per session. These are offered concurrently. A maximum time for completion has been set at 8 years.
Modules consist of printed notes containing course material, readings, assessment questions and exercises. Some modules also include audio and video taped material so access to audio equipment is essential.

The Master's Program calls for the completion of 8 modules which is equivalent to 48 units of credit (exemptions may be allowed in exceptional circumstances).

There will be two tutorials per module. These will be conducted via a multiple telephone link and will be structured and interactive.

Each module will be assessed separately at module completion and a certificate awarded. The assessment of modules will be flexible and will be based on two pieces of submitted work. This may be in the form of written assignments or as a timed, faxed examination subject to university approval.

9060 Master of Medical Science in Drug Development by Distance Education

MMedSc

The discovery, development and marketing of medicines has become a highly organised interdisciplinary team activity. Members of such teams need to be literate in all aspects of drug development ranging from procedures for identifying lead compounds through to the full development of the product including preclinical studies, clinical trials and the legal, regulatory and ethical issues relevant to marketing and on-going vigilance of the medicine. The aim of this course is to enable people working in the field of developing and using pharmaceutical substances to obtain such expertise by providing core and elective materials in a distance-learning format. Since interchange of ideas is an essential part of any educational activity, the course will include interactive assignments with specific tutors and group discussions where students come together for tutorials, workshops and practice sessions, and generally to interchange ideas.

The educational principle governing the program's teaching approach is to streamline the provision of information and to concentrate on application. Thus, students are issued with a manual for each course. The manual contains, typically, about 200-250 pages of lecture notes plus 200-250 pages of attachments from the literature (relevant chapters from textbooks, published papers, etc., and access to audio and video taped material so access to audio equipment is essential.

The Master of Medical Science in Drug Development will be awarded to students who successfully complete the coursework identified below. The program is offered as a part-time distance learning programme and will take a minimum of three years to complete. The program is designed for persons wishing to pursue careers that relate to the development and safe use of medicines. Career opportunities exist in the pharmaceutical manufacturing industry, government and in research institutions such as universities. Health care professionals interested in developing new medicines and improving the use of existing medicines will find the course of value. The extensive range of electives enables the candidate to specialise in particular areas such as the discovery of new medicines, regulatory affairs, clinical trials, market development, medical department administration, preclinical studies, etc.

Below is a list of core and elective courses for the Master of Medical Science in Drug Development. Generally students must take all core courses and sufficient electives to give a total of 72 units of credit. The program proceeds in three stages, which correspond to Years 1 to 3 for students proceeding in the minimum time. In special cases, students may replace core courses with electives.

The structure of the Masters program is as follows:

<table>

GradDipDD

The Graduate Diploma in Drug Development will be awarded to students who successfully complete the following program. The program is offered as a part-time distance learning program and takes a minimum of two years to complete. The program is designed for persons wishing to pursue careers that relate to the development and safe use of medicines. Career opportunities exist in the pharmaceutical manufacturing industry, government and in research institutions such as universities. Health care professionals interested in developing new medicines and improving the use of existing medicines will find the program of value. The extensive range of electives enables the candidate to specialise in particular areas such as the discovery of new medicines; regulatory affairs; clinical trials; market development; medical department administration; preclinical studies, etc.

To fulfil the program requirements, students must satisfactorily complete all of the core courses as well as electives totaling 12 units of credit.

The structure of the Graduate Diploma program is as follows:

### Year 1

**Session 1**
- *PHPH9101* Principles of Drug Action 6
- *PHPH9100* Discovery and Development of Medicines 6

**Session 2**
- *PHPH9120* Clinical Development of Medicines 6
- *PHPH9104* Law, Ethics and the Regulation of Medicines 6

### Year 2

**Session 1**
- *PHPH9102* Pharmaceutical Development of Medicines 6
- *PHPH9121* Postmarketing Development of Medicines 6

**Session 2**
- Elective 6
- Elective 6

**Total** 48

GradCertDD

The Graduate Certificate in Drug Development will be awarded to students who successfully complete the following course work. This program has similar format and objectives to the Graduate Diploma but is designed for those people who wish to obtain a limited competency in the areas described. The program is offered as a part-time distance learning program and will take a minimum of one year to complete.

### Year 1

**Session 1**
- *PHPH9101* Principles of Drug Action 6
- *PHPH9100* Discovery and Development of Medicines 6

**Session 2**
- *PHPH9120* Clinical Development of Medicines 6
- *PHPH9104* Law, Ethics and the Regulation of Medicines 6

**Total** 24
Course Descriptions

School of Community Medicine

CMED9100
Independent Studies (4uc)
Staff Contact: Associate Professor Robyn Richmond
Enrolment Requires School approval
UOC4 S1 S2

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing courses. They are recommended particularly for candidates who wish to explore specific community health problems within their own communities or areas.

CMED9500
Epidemiology
Staff Contact: Professor John Kaldor
UOC6 HPW3 S1 S2

This course provides students with an understanding of the role of epidemiology as the quantitative science underpinning much of public health practice. Students will learn the basic methodological tools of epidemiology, such as statistics to measure disease frequency, skills to critically review literature and interpret epidemiological studies, and their application in a variety of research and public health contexts. Skills for measuring frequency of disease and testing for evidence of association between risk factors and disease in this course will build on statistics learnt in CMED9502

Statistics for Public Health
Staff Contact: Dr Deborah Black
UOC6 HPW3 S1 S2

This is a core course for Master of Public Health Students. Provides an introduction to research methods and statistical techniques applicable to public health data. Statistical techniques will focus on data analysis of a single variable or linear relationships between two variables. In addition, students will learn to use SPSS for Windows to conduct statistical analyses on a set of data relevant to public health.

CMED9507
Major Project
Staff Contact: Associate Professor Robyn Richmond
Enrolment Requires School approval
UOC12 X1 S1 S2 X2

The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue; systematically collecting relevant, up-to-date information about the issue; analysing, interrupting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master's level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning project early in their program, it is normally undertaken after completion of all core and elective courses.

CMED9513
Applied Epidemiology
Staff Contact: Associate Professor Robyn Richmond
UOC4 HPW2 S2
Prerequisite/s: CMED9500

This course builds on CMED9500 Epidemiology, using practical examples of the application of epidemiology in field settings. Themes will include the development and validation of measures for epidemiological studies, the conduct of research in practice, evaluation methods and the application of study designs in the real world, ethics of research, and acute epidemiological investigation.

CMED9516
Introduction to Public Health
Staff Contact: Professor J Lawson
UOC4 HPW2 S2

This course will introduce students to the discipline of public health. There will be 12 formal lectures and 2 weeks of student presentations. Topics covered include Australian health care system; population health; management of public health interventions; principles of prevention; health promotion; health protection; concepts of risk factors; socio-economic status and health; special needs groups; determinants of health status; disability and chronic illness.

CMED9517
Advanced Biostatistics and Statistical Computing
Staff Contact: Dr Deborah Black
UOC4 HPW2 S2
Prerequisite/s: CMED9502

Statistical design, analysis and reporting: a selection of topics from clinical trials and other controlled studies, non-experimental studies, rates and proportions, multi-way tables, analysis of covariance and repeated measures, multiple regression and other multivariate analysis, life tables and survival analysis; use of statistical software. Thorough individual instruction in the use of computers will be given in the laboratory.

CMED9518
Case Studies in Epidemiology
Staff Contact: Dr Andrew Grulich
UOC4 HPW2 S1 S2
Prerequisite/s: CMED9500

Epidemiology has made a substantial contribution to public health policy and practice in a number of areas. The course will consider four areas (cancer, cardiovascular disease, hepatitis and screening for disease) and review the major epidemiological studies that have contributed to development of knowledge and in Public Health application in these areas. The emphasis of the course will be on substantive findings, and the role played by epidemiological methods.

CMED9519
Demography
Staff Contact: Associate Professor Ian Burnley
UOC4 HPW2 S2

Introduction to demography; sources and processing of data, principles and applications. Life tables, mortality, marriage and divorce, natality, productivity. Marriott characteristics and family groups. Migration, Distribution by area, sex, age, race; educational and economic characteristics. Population estimates and projections. Computer techniques.
CMED9539
Psychiatry of Old Age
Staff Contact: Dr Brian Draper
UOC6  S1 S2
This course deals with the major psychiatric disorders encountered in the care of older people (dementia; depression; paranoid disorders; late onset schizophrenia and mania; anxiety disorders; stress in late life). It covers the assessment and management of these disorders, as well as other relevant issues such as preventative psychiatry, psychological treatment for the elderly, family assessment and behavioural/psychiatric disturbances in the nursing home.

CMED9540
Pharmacology
Staff Contact: Professor Laurence Howes
UOC6  S1 S2
This course examines the pharmacology of ageing. Topics covered include pharmacokinetics, pharmacodynamics, adverse drug reactions, drug interactions and drug prescribing in the elderly. The major drug groups involved in geriatric medicine will also be noted.

CMED9541
Rehabilitation
Staff Contact: Dr Gregory Bowring
UOC6  S1 S2
This course introduces students to the principles and practice of rehabilitation medicine, with particular reference to rehabilitation of the elderly. Topics covered include the rehabilitation of stroke and other neurological disorders including spinal cord injury, orthopaedic and musculoskeletal rehabilitation, orthotics, prosthetics, and rehabilitation in the palliative care setting. The role of the allied health professional in rehabilitation of the elderly is also considered.

CMED9542
Healthy Aging
Staff Contact: Dr George Stathers
UOC6  S1 S2
This course addresses a number of health issues relevant to the practitioner in his/her day to day management of older patients. Students consider the concepts of healthy ageing and wellness, and community attitudes to ageing. The value of screening and screening tools in clinical practice is discussed. A number of clinical issues are covered such as dental and oral health, physical exercise, nutrition, sexuality, and addictions in the elderly. The importance of communication and specific communication disorders in the elderly are also examined.

CMED9543
Organisation and Delivery of Services for Older People
Staff Contact: Dr Christopher Poulos
UOC6  S1 S2
A course consisting of primary medical care, hospital based provision, community health services, geriatric assessment teams, institutional care, ethical aspects of care, testamentary capacity and informed consent, guardianship board, terminal care, team concepts and team leadership, funding of care - State and Commonwealth responsibilities.

CMED9544
Gerontology
Staff Contact: Dr Roslyn Poulos
UOC6  S1 S2
Biology of ageing - age associated changes in structure and function of major body systems, psychology of ageing, psychological theory and cognition in later life, sociology of health and illness in the elderly, politics of ageing.

CMED9546
Major Research Project
Staff Contact: Dr R Poulos
UOC16  WKS14  S1 or S2
Candidates are required to complete a project on an approved topic. Candidates will be assisted in the planning and preparation of the project by a preparatory course covering aspects of study design, research methods and critical appraisal of scientific papers. Satisfactory completion of this preparatory course is a prerequisite of undertaking the project, but candidates with prior experience in research may be exempted from the preparatory course.

CMED9547
Clinical Experience
Staff Contact: Prof D. Chan
UOC6  WKS14  S1 or S2
Candidates must complete 140 hours of supervised clinical experience at geriatric units approved by the School of Community Medicine, UNSW.

CMED9548
Clinical Geriatrics 1
Staff Contact: Dr. R. Clark
UOC6  WKS14  S1 or S2
Presentation of disease - specific features of presentation in old age; nonspecific syndromes: eg: immobility, falls. System disorders: eg haematological, renal. Also special senses: hearing, vision.

CMED9549
Clinical Geriatrics 2
Staff Contact: Dr. P. Gonski
UOC6  WKS14  S1 or S2
Presentation of disease - specific features of presentation in old age; nonspecific syndromes: eg incontinence, confusional states. System disorders: eg cardiac, respiratory, neuroloical, vascular, metabolic, bone, endocrine.

CMED9550
Clinical Examination
Staff Contact: Dr G Stathers
This is a clinical exam (oral), which is held in Sydney at the conclusion of the coursework component of the Graduate Certificate, the Graduate Diploma or the Master of Medicine Degree.

CMED9602
Health and Illness Behaviour
Staff Contact: Mr P Trebico
UOC4  HPW2  WKS14  S1
Consideration and evaluation of policy implementation in mental health promotion; application of socio-economic factors in mental illness and mental health assessments; theoretical considerations in the design of mental health promotion programs; analysis of the sources of health information, and consideration of the various models of information transmission.

CMED9804
Alcohol and Other Drug Issues
Staff Contact: A/Prof R Richmond
UOC4  HPW2  WKS14  S1 or S2
Alcohol and Other Drug Issues is a wide ranging course that takes a public health approach. It has relevance for population health related to drug use, health management of people who are drug users and abusers, drug policy, and raises important controversial issues. Use of alcohol and other drugs is a major issue in determining the health of individuals and populations in developed and developing countries. The four components of this course are: the size of the drug problem; model of dependence; harm reduction; and relapse prevention. This course is a distance learning course offered in flexible delivery mode. At the end of this course students will understand the patterns of drug use and health effects; and will have learnt about issues of drug dependence. Students will learn about the range of public health approaches available to minimise problems related to substance abuse such as harm reduction strategies. Students will develop skills in brief interventions to use
with excessive drinkers and will appreciate the issues associated with relapse. This course provides students with important knowledge and skills that will enable them to plan effective alcohol and drug services.

**CMED9605**
**Health in Developing Countries**
*Staff Contact: Dr John Hirshman*
*UCO4 HPW2 S1 S2*

Economic, demographic and epidemiological aspects; communicable diseases, for example, diarrhoea and parasitism, chronic diseases including mental health in the Third World context; maternal and child health; family planning; nutrition, and food and nutrition policy; breast feeding promotion; immunisation; water supply and environmental sanitation; organisation of health services; primary health care; health personnel training; health education; pharmaceutical problems; role of international and non-governmental agencies; self-reliance.

**CMED9606**
**Women and Health**
*Staff Contact: Ms Susan Beecher*
*UCO4 HPW2 S1*

Current issues relevant to the health of women, both consumer and provider perspectives. Common health risks facing women. Special needs in health and health care for particular populations of women. Traditional role of women as health carers, and the impact this has on health and health services. Short lectures, group discussions and student presentations. Assessment is a combination of marks given in written tutorial papers, end of session essay and group facilitation and class participation.

**CMED9608**
**Rural Health Studies 1**
*Staff Contact: Dr David Sutherland*
*UCO4 HPW6 S1 S2*

Examine roles, needs, and particular health and welfare issues of rural general practitioner services; explore methods for professional development of rural GPs; study public health issues of particular relevance to rural general practice; study data collection and analysis to help identify rural health problems, their management and prevention; plan and evaluate the promotion of health, and prevention of disease through individual and community health education programs in rural communities.

**Notes:** External course, 4 tele-conferences, one 2-day workshop mid-term.

**CMED9610**
**Food and Nutrition Policy Studies**
*Staff Contact: Ms Bloomfield*
*UCO4 HPW2 S2*

The relationship between population, health and the food and nutrition system, i.e. the production, distribution and consumption of food. Discussion of development of intersectoral policies and strategies addressing specific segments of the food and nutrition system to improve the health of vulnerable populations in developed and developing countries. Students will work through a case study and demonstrate their understanding by preparing, presenting and defending a proposed food policy for a specified population or community group.

**CMED9612**
**Environmental Health**
*Staff Contact: Dr John Frith*
*UCO4 HPW2 S1 S2*

Prerequisite/s: CMED9502

To introduce the principles of epidemiology, particularly in reference to environmental risk factors of disease and in reference to such principles as incidence and prevalence, aetiology and risk factors, epideimics and endemics, and primary, secondary and tertiary prevention of disease. In particular, it deals with environment and disease, radiation, chemical, hazards, air and water pollution, biological hazards, urban environment, ecology, ecosystems and interdependence and how these factors affect health, public health issues related to sustainable development.

**CMED9615**
**Delivery of Health Services in the Community**
*Staff Contact: Professor Mark Harris*
*UCO4 HPW2 S1 S2*

The course provides an overview of primary care in Australia and the application of the PHC approach to Australia and other developed countries. Topics to be covered include: primary care and PHC in Australia; primary medical care and family practice; primary nursing care and generalist community nursing; integration of Community Health Services; healthy cities; self help groups and self care; health promotion; surveillance/monitoring in primary care; advocacy/ community development; aboriginal health; community participation.

**CMED9618**
**Public Health Law and Ethics**
*Staff Contact: Associate Professor Paul McNell*
*UCO4 HPW2 S1 S2*

This course deals with the role of law and ethics in resolving issues in public health. An overview will be presented of the Australian legal system, principles of law and legal approaches to resolving conflicts; law relevant to health professionals including their duty of care, requirements for registration, and obligations in privacy and confidentiality; legal responsibilities and obligations of public accountability; ethical principles and a model for ethical decision-making.

**CMED9619**
**Evaluation of Primary Health Care Services**
*Staff Contact: Ms J McDonald*
*UCO4 S1 S2*

Students will attend a three day educational course which will cover the principles of evaluation assessment and accreditation. They will work through, in detail, both the content and process for undertaking a Community Health Accreditation Standards Review. This program is highly interactive and includes role plays and case studies. After completion of the three day educational program students will be required to attend a two day review of a Community Health Service, after the review they will work with a team of two other reviewers to prepare a report. This report and assessment by the other reviewers will be the subject of the candidates evaluation for the course.

**CMED9620**
**Project Management and Evaluation in Rural Areas**
*Staff Contact: Dr David Sutherland*
*UCO4 S2*

Basic concepts of health project management and evaluation as they apply to rural communities; recognising trends in rural communities which affect the health of individuals and the community; understanding barriers to the adoption of preventive action; understanding how effective health programs and disease prevention strategies are selected, implemented and assessed. This course is particularly relevant to community health and general practice projects.

**Notes:** External Course, 4 tele-conferences and one 2 day workshop pre-term.

**CMED9621**
*Staff Contact: Dr Gregory Dore*
*UCO4 HPW2 S2*

This course provides an introduction to biological, clinical and epidemiological aspects of HIV infection, and considers the impact of HIV/AIDS on a number of areas of the health care system and society, both now and in the future. The course is taught by internationally recognised experts in the field, and will have a particular focus on HIV/AIDS in Australia and the Asia/Pacific region.
The course aims to provide practical skills in analysing inequalities and evaluating interventions designed to address them. These are critical skills in the Health Outcomes approach. The course comprises three 1 day workshops with teleconferences after each workshop.

This course aims to provide theory and practice in quality assurance and audit in General Practice. In the course students will develop knowledge and skills in quality assurance and audit principles and methods and in applying these to their own clinical practice by conducting audits of their practice over one year. The course will include distance education materials and manuals, teleconferences, one weekend workshop, audit manuals and material.

This course will allow students who have undertaken courses in measurement, decision making, planning and evaluation to apply these skills in a real project in a clinical environment. Students will work in small groups and each student in the group will be responsible for one component of the project. Working in a team will be an important part of the project. This course will be conducted in association with a health care provider or funding agency.

The worldwide toll of death and disability related to tobacco use is enormous. In this course we examine programs in countries that have made efforts to limit availability of tobacco and reduce its use, and the effectiveness of those efforts. This course examines the issues of tobacco control: what does it involve; how best can it be achieved; and how can it be evaluated. This course takes an international focus. Tobacco control initiatives are illustrated with examples from a wide range of countries, and the focus is specifically on how these approaches can be evaluated. Different approaches work best in different places, and this course explores how a tobacco control approach/strategy works in a particular country. This course includes how to evaluate an international tobacco control program. It is a valuable course for those concerned with how to prevent the damage that results from tobacco use, how to develop a tobacco control program and activities, and how to evaluate the effectiveness of such activities. This course is useful for doctors, nurses and other health practitioners, public health specialists, policy-makers and others in the public and private sectors of developed and developing countries. At the end of this course, students will understand the patterns of tobacco use and health effects of smoking, and will have learnt about nicotine dependence. Students will learn about the range of public health approaches available to reduce tobacco prevalence including the range of harm reduction strategies. Students will develop skills of brief interventions to use with smokers and will appreciate the issues associated with relapse. This course provides students with important knowledge and skills that will enable them to plan and evaluate an effective tobacco control program.

Collection, collation and analysis of data and the interpretation of statistical information for the purposes of health services management. The use of computers for these purposes. Measurement of disease rates and interpretation and identification of health status. These statistical methods and measures will assist in planning, operation and evaluation of interventions in health service management.

The first part of the course focuses on the concepts and theoretical perspectives that will enable students to understand the complex relations between health, health care and society. Notions of physical, psychological and social health both at the individual and society-wide level are analysed. Close attention is paid to the health care system in Australia, as a basis for the closer analysis of particular health care issues such as the organisation and financing of health care, the health workforce, health care legislation and health care services for disadvantaged groups. The course then examines current reforms in health policy making, delivery and financing, before future possibilities for the development of health and health care in Australia and elsewhere are analysed.

Introduction to double entry accounting including the underlying conventions and doctrines to provide a working knowledge of both accrual and cash based accounting systems, utilisation of accounting records for the presentation and interpretation of profit and loss accounts, balance sheets and fund statements. Introductory financial statement analysis, budgeting, analysis of budgets and costing products and services. An introduction to contract law and the legal obligations of financial managers.

An investigation of hospital fund accounting to provide a level of operational competence. Exposure to budgeting techniques and evaluation procedures; cost analysis and control; investment evaluation and discounted cash flow techniques; accounting for investment; cost allocation procedures. An overview of the courseness of accounting numbers; political and financial pressures placed upon reporting and report formats. Alternative valuation techniques.

The economics of resource allocation in both the public and private healthcare systems. The impact of private health insurance and "user pays" on the efficiency and equity of healthcare markets. An introduction to double entry accounting to provide a working knowledge of cash and accrual accounting, plus an analysis of balance sheets, income statements and cash flow statements. How to apply budgeting, costing and capital budgeting to a healthcare environment.
Techniques relating to the implementation of quality assurance are introduced and reviewed. This includes the roles and methodology of peer review, clinical review, screening and of the development of quality assurance programs. An overview of quality assurance within the health care system, such measures. Common generic and disease-specific instruments and nature of the most common generic instruments (e.g. SF36, QWB, SIP), selected disease-specific instruments and a patient satisfaction instrument and psychometric notions of validity, reliability and scaling. It presents a method for developing and evaluating such measures. Common generic and disease-specific instruments are introduced and reviewed.

HEAL9111 Quality Assurance for Health Administrators
Staff Contact: Ms Helen Lapsley
UOC4 HPW2 S2
An overview of quality assurance within the health care system, and of the development of quality assurance programs. A review of the roles and methodology of peer review, clinical review, screening criteria for risk management, patient satisfaction and accreditation. Techniques relating to the implementation of quality assurance programs. Integration of quality assurance concepts into the roles and functional responsibilities of health service managers.

HEAL9121 Measurement of Quality of Life, Health Status and Patient Satisfaction
Staff Contact: Dr Rodney O' Connor
UOC4 HPW2 S1 S2
This course outlines the nature and use of Quality of Life, functional health status and patient satisfaction measures, and their increasing role in the evaluation of health programs. It presents the origins and nature of the most common generic instruments (e.g. SF36, QWB, SIP), selected disease-specific instruments and a patient satisfaction instrument and psychometric notions of validity, reliability and scaling. It presents a method for developing and evaluating such measures. Common generic and disease specific instruments are introduced and reviewed.

HEAL9301 Health Services Planning 1
Staff Contact: Mr Ian Forbes
UOC4 HPW2 S1 S2
Examination of the major concepts used in planning health services systems within a context of resources allocation, at a community, regional and national level. Techniques used in data collection, analysis and modelling for health planning. Analysis of environments external to health service organisations of a societal, political and health status nature. Assessment of organisations within service areas. Management skills appropriate for policy making, program evaluation and health services resource distribution.

HEAL9331 Health Related Law and Ethics (Australia)
Staff Contact: Mr Philip Bates
UOC4 HPW2 S1
Prerequisite/s: HEAL9041
This course will explore contemporary applied issues in law and related ethical matters of particular relevance to health services management, planning and delivery. The course matter will vary depending, in part, on the backgrounds and interests of enrolled students and the course coordinator's research programs.

HEAL9341 Health Related Law and Ethics (Hong Kong)
Staff Contact: Mr Philip Bates
UOC4 HPW2 S1
Prerequisite/s: HEAL9041
The course will explore contemporary applied issues in law and related ethical matters of particular relevance to health service management, planning and delivery in Hong Kong. The course matter will vary depending, in part, on the backgrounds and interests of enrolled students and the course coordinator's research areas.

HEAL9351 Health Economics 1
Staff Contact: Ms Helen Lapsley
UOC6 HPW3 S2
Economic analysis as applied to resource allocation, planning and evaluation in health services. Topics: basic concepts and methods of economic analysis, economics of the public and private sector, decision making, supply and demand, pricing and nonpricing methods of allocation, welfare analysis, ethics of resource allocation, economic planning of health services, cost benefit evaluation, cost effectiveness analysis, economics of hospitals and economic impact of health insurance.

HEAL9361 Physical Planning and Design
Staff Contact: Mr Ian Forbes
UOC4 HPW2 S1 S2
Planning processes applied to physical and environmental design. Regional, urban and local planning issues. Building design and building project management. Cost planning, network analysis and commissioning. Briefing, design and evaluation methods. Ergonomics and environmental psychology. Applications to health and welfare facilities. Administrative, medical and nursing policy implications.

HEAL9371 Research and Evaluation Methods
Staff Contact: Dr M Mc Laws
UOC4 HPW2 S2
Skills in research design, evaluation methods and literature review will be developed using applied learning methods. Skills will be developed in the formulation of a research question, questionnaire or evaluation methodology. Students will choose an area or areas of interest to develop during the session and the development of this research will be presented for weekly peer review. Peer review is aimed at providing students with a critique and a forum for students to learn, to appraise a variety of research problems.

HEAL9381 Policy Studies
Staff Contact: Associate Professor Pieter Degeling
UOC4 HPW2 S2
Prerequisite/s: HEAL9041, HEAL9711; Corequisite/s: HEAL9351.
Contemporary health policy issues including the politics of health care; principles of policy formation and analysis. Past topics have included: health care technology; occupational health and safety; government control of private medical practice; hospital cost containment; the impact of Medicare; Commonwealth/State financial relationships; quality assurance and utilization review; the regionalised administration of health services; health policy issues in developing countries.

HEAL9391 Health Services Strategic Management and Planning
Staff Contact: Dr J Braithwaite
UOC4 HPW2 S1
What is strategic planning? What does it mean to manage strategically? How do health service organisations (or, more accurately, the people with in them) express their strategic intent? How can you plan for the future when the environment is so complex and change so rapid? We investigate strategy in the health services by examining the ideas, tools and techniques of the strategist. Topics discussed include strategic planning, strategic behaviour, marketing, leadership and the learning organisation.

HEAL9411 Epidemiology
Staff Contact: Dr M Mc Laws
UOC4 HPW2 S2
Skills for critical appraisal of medical literature and of clinical and service outcome indicators will be developed. Knowledge of epidemiologic methodology will be applied during critical appraisal of medical, scientific and nursing literature with the aim of assisting students to evaluate published findings and in decision making of clinical practice, policy and planning. Clinical and service outcome indicators will be developed and appraised.

HEAL9421 Public Health and Epidemiology
Staff Contact: Professor James Lawson
UOC6 HPW2 S1
Distribution patterns and determinants of disease and disability with particular reference to diseases of major Australian concern. Preventive, treatment and rehabilitation strategies. The uses of epidemiology in the planning, operation and evaluation of health services.
HEAL9422
Population Health, Epidemiology and Statistics
Staff Contact: Professor James Lawson
UOC6 HPW3 S1
Population health is primarily concerned with the health status of populations and communities as distinct from clinical health or medicine which is primarily concerned with the health of individuals and families. The objectives for this course include: to provide an examination of the determinants and causes of disease and injury in populations and communities, the collection and biostatistical analysis of data to create information about disease and injury patterns in populations and communities (the epidemiological approach); and the use of information about disease and injury in populations and communities in order to manage, plan and provide hospitals, health services and prevention strategies.

HEAL9431
Interpersonal Communication in Organizations
Staff Contact: Dr Roderick Iedema
UOC4 HPW2 S1 S2
A theoretical and practical course which aims to increase students understanding of, and capacity to deal with, communication problems in organisations. Teaches students to improve their own communication skills by a series of communications exercises, role plays, simulations and games. Students are able to chart their progress with a checklist developed for the course.

HEAL9441
Health Care Economics and Financial Management
Staff Contact: Mr Kevin Forde
UOC6 HPW2 S1
The economics of resource allocation in both the public and private healthcare systems. The impact of private health insurance and "user-pays" on the efficiency and equity of healthcare markets. An introduction to double entry accounting to provide a working knowledge of cash and accrual accounting, plus an analysis of balance sheets, income statements and cash flow statements. How to apply budgeting, costing and capital budgeting to a healthcare environment.

HEAL9442
Health Resources Planning and Development
Staff Contact: Mr Ian Forbes
UOC6 HPW3 S2
Analysis as applied to resource allocation, planning and evaluation in health services. Topics cover the basic concepts in planning using methods of systems analysis, examining issue of resource development in the public and private sector, decision making, resource supply and demand, welfare analysis and issues of resource allocation. Included is the planning and procurement of health resources including facilities, workforce and service programs in the light of cost benefit and cost effectiveness analysis.

HEAL9471
Comparative Health Care Systems
Staff Contact: Mr Ian Forbes
UOC6 HPW3 S1
Examination of the structure and function of health care systems with special reference to constitutional, legal, economic, social and political environments within which health care systems operate; characteristics of institutional and non-institutional care; expenditure, funding arrangements and systems of health insurance and the health workforce; current policy issues affecting the health system in the country are reviewed.

HEAL9501
Computing Techniques for Health Services Management
Staff Contact: School Office
UOC4 HPW2 S2
Introduction to, and practice of, transferable skills for the utilisation of personal computers in the workplace. The nature of tasks performed in computing. The nature of computing systems, databases, and communication links. Use of software packages for clinical and managerial data acquisition, analysis, and report preparation. Use of the Internet for teleworking, compiling, and transmitting information. Conducted at laboratory terminals during residential schools, with students obliged to make their own arrangements for access to computers during term.

HEAL9511
Special Topic - Health Administration or Planning
Staff Contact: School Office
UOC4 S2
An occasional elective dealing with some aspect of health administration or planning, selected according to current demand and availability of local and visiting lecturers.

HEAL9531
Fieldwork in Health Service Organisation
Staff Contact: School Office
UOC4
Supervised placement in health service organisations. Emphasis on students acquiring knowledge of organisation and departmental functioning, everyday problems faced by health service managers.

HEAL9651
Current Issues in Nursing
Staff Contact: Dr Anna Whelan
UOC4 HPW2 X1 S2
Controversial issues involving the nursing profession are critically examined. Topics addressed include: minimal educational preparation, mandatory continuing education, nontraditional education, unionism vs professionalism, political action in the health arena, government involvement, clinical specialisation, cost effectiveness, consumer's rights, factors affecting nurses participation in the workforce, ethics in practice.

HEAL9701
Management of the Work of Health Professionals
Staff Contact: Dr Anna Whelan
UOC4 HPW2 X1 S2
Identifies the range of social, economic, political and technological factors which may influence the organisation of both work and workers. Develops knowledge and skills in critically evaluating and implementing techniques and methods which have been recommended for organising work and managing responses of workers. Topics addressed include: assessing and improving worker performance, motivating professionals, workplace conflict, designing work, introducing technology, managerial aspects of employment law, and management techniques such as Total Quality Management (TQM).

HEAL9711
Management of Organisations
Staff Contact: Associate Professor Pieter Degeling
UOC6 HPW3 S1
Examines current theories of organisation and management, and evaluates their applicability to management work in health care settings. Examines the relationship between theory and practice in managing organisations; fosters an appreciation of the dynamics of managerial behaviour and extends understanding of what is entailed in accomplishing organisational change and in establishing management control.

HEAL9741
Management of Health Services
Staff Contact: Dr J Braithwaite
UOC4 HPW2 S1
In this course we look at ways to improve how individuals manage. We explore contemporary management issues and challenges facing those who are responsible, now or in the future, for the managerial performance of health service organisation. We attempt in this course to bridge the theory-practice divide. A key concern is to examine various management tools, techniques and ideas and assess their usefulness. Specific topics examined include: some psychological aspects of management; organisational communication; continuous improvement; and the management of change. Part of the course is devoted to providing insights into students' own managerial style. A major theme is to develop the ability to generate improved solutions to managerial problems by utilising a reframing approach.
This course will identify the salient features of public health initiative disease and procedure classification systems currently used. Future clinical and resource homogeneity of individual DRGs and the well as identify the circumstances and types of initiative in which is which are likely to affect their implementation and describe the developments in the design of casemix systems.

**HEAL9745 Managing Public Health Implementation**  
*Staff Contact: School Office  
UOC4 S2*

This course will identify the salient features of public health initiative which are likely to affect their implementation and describe the detailed composition of different approaches to implementation, as well as identify the circumstances and types of initiative in which is best used. It maps the interrelationship between control and evaluation in policy implementation and how the detailed composition of the methods used in the either of these ultimately affects the substantive content of what takes place in implementation. Design and develop an implementation structure which will address the issues associated with and/or arising from the substantive content of a nominated public health policy, and private appropriate mechanism of control and evaluation.

**HEAL9746 Casemix & Contracting for Health Care**  
*Staff Contact: Professor D Hindle  
UOC4 HPW2 S1 S2*

Public and private funders are moving towards more sophisticated descriptions of services in formal contracts with health care providers. Particular attention is being given to the use of casemix classifications when defining those services. This course discusses and then illustrates the key components of casemix-based contracting. They include optional approaches to the process of categorisation itself, such as time-based and episode-based classifications, episodes of care and episode management units, and iso-resource and iso-utility classes. Attention is paid to the measurement of costs and utilites, and to audits of such matters as clinical codes, quality of care, and outcomes. The role of clinical pathways is considered in detail. The ideas are explored through a case study, in which students function as members of either a purchaser or a provider hospital during two annual rounds of negotiation. The outcomes of negotiation are then evaluated by use of a model which predicts costs and revenues, and associated variables including admission rates and lengths of stay. Assessment is through two assignments, in which students are expected to provide advice on operations to both the insurer and the provider.

**HEAL9747 Clinical Work Process Control**  
*Staff Contact: Professor Don Hindle  
UOC6 S1 S2*

This course examines the application of work process control methods in the organisation and management of clinical work. It examines how clinical pathways may provide methods for improving the evidentiary basis of clinical work and for improving the quality and technical efficiency of service delivery. The course is structured as a case study of a health service which provides hospital and community services to a sector of the capital city, and is funded for the most part according to a budget-share casemix formula. Students adopt the roles of senior managers and are expected to provide advice on key decisions to the chief executive and the clinical service directors.

**HEAL9748 Clinical Governance**  
*Staff Contact: Associate Professor Pieter Degeling  
UOC6 S1 S2*

This course develops an appreciation of the way that the role of clinicians in health care delivery is being affected by changes in the social, legal, economic, organisational, informational and political contexts of health service organisation. At its completion, students will understand the principles of clinical governance and of the range of issues and problems that it is meant to address. The course requires students to appraise different approaches to improving clinical effectiveness, quality, service integration and the use of external values for money consideration in service design and delivery. Students carry out an extended case study and a range of problem-based exercises. This will provide students with an opportunity to examine what their changed role implies for their personal skills development. They are provided also with opportunities to analyse and address issues arising from efforts to extend clinical accountability.

**HEAL9751 Introduction to Management and Policy for Public Health**  
*Staff Contact: Dr J Brathwaite  
UOC4 HPW2 S1*

*Note: This is a core course for Master of Public Health students. Provides students with an understanding of the broad range of factors that can affect public health policy development and implementation and which can influence how public health services are organised and managed. The course extends students understanding of different approaches to developing and implementing public health policy and to organising and managing a unit within a public health service.*

**HEAL9771 Casemix for Clinician Managers**  
*Staff Contact: Associate Professor Pieter Degeling  
UOC4 HPW2 S1 S2*

This course examines how casemix information, methods and applications can be used to address organisation change issues that are likely to arise in constituting clinical units as learning organisations. The course is structured to develop practical skills in using casemix information and methods in engendering organisational learning with respect to: strategic planning and management; budgeting and financial control; service planning; clinical audit; utilisation review; quality assurance; clinical guideline development and implementation; the development of an outcomes focus in service planning and delivery; and, in planning and implementing streams care.

**HEAL9781 Evidence-Based Clinical Management**  
*Staff Contact: Dr Tessa Ho  
UOC4 S1 S2*

The course has two main components. The first examines the philosophical debates concerning “Evidence-based” approaches to health care and clinical management. It looks at different beliefs about the nature of knowledge (positivist, phenomenological/social construction and critical) and with the explores issues about what can be considered “evidence”. The difficulties of decision-making in a pluralistic work place and the problems that this poses for defining issues and work processes in clinical settings are also considered.

The second component focuses on the developing of practical skills in incorporating various sources and types of evidence in clinical management. Various types and sources of evidence, such as Cochrane Collaboration, hospital databases as well data resulting from the adoption of process control oriented approaches to clinical service provision, are presented and their relative merits discussed. Statistical methods directly applicable to creating visibilities about clinical process and practice will be presented and assessed. Hands-on practice with databases is included.

Students will gain knowledge and experience in searching databases; assessing literature; evaluating statistical methods and results; appraising methods of data generation, collection and evaluation; and developing a strategy for introducing a more evidence-bases approach into their daily management of clinical work.
HEAL9911
Sociology, Ethics and Health
Staff Contact: Dr Stephanie Short
UOC4  HPW2  S1

The first part of this course focuses on the classical sociological tradition most closely associated with the work of the founding parents of sociology: Marx, Weber and Durkheim. In this first part, particular attention is paid to the social origins of ethics and the cultural construction of morality. The course then follows the development of health sociology through the examination of issues such as socio-economic inequality and health, the social construction of health knowledge, consumer participation in health care and the new public health.

Staff Contact: Dr McLaws
Enrolment Requires School approval
UOC12  S1  S2

HEAL9974
Project (12 Units of Credit)
Staff Contact: Ms Joanne Callen
Enrolment Requires School approval
UOC12  S1  S2

The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue, systematically collecting relevant, up-to-date information about the issue; analysing, interpreting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master's level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning project early in their program, it is normally undertaken after completion of all core and elective courses.

School of Medical Education

MEED9001
Independent Study (2 Units of Credit)
Staff Contact: Ms Joanne Callen
Enrolment Requires School approval
UOC2  S1  S2

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing subjects. They are recommended particularly for candidates who wish to explore solutions to specific educational problems within their own institutions or disciplines.

MEED9002
Independent Study (4 Units of Credit)
Staff Contact: Ms Joanne Callen
Enrolment Requires School approval
UOC4  S1  S2

Independent studies are designed to provide opportunities for candidates to pursue interests and areas not adequately addressed in existing subjects. They are recommended particularly for candidates who wish to explore solutions to specific educational problems within their own institutions or disciplines.

MEED9010
Community Development
Staff Contact: Ms Sally Nathan
UOC4  HPW2  S1  S2

This course explores the meaning and conceptual frameworks of community development as an approach to improving the health of individuals and the broader community. The role of community development within the wider health development scene is critically examined and case studies of its various forms in practice are explored. Community development as an approach to the promotion of health is based on different principles from those in the clinical professions, and the course encourages health professionals to explore this different perspective and to consider its different skills. For those with field experience, this course will provide a strong theoretical basis and introduce some new practice tools. For those with little or no field experience, it provides a good mix of theories, models, practical examples and tools to introduce this exciting approach to improving health.

MEED9012
Health Promotion
Staff Contact: Ms Jan Ritchie
UOC4  HPW2  S1  S2

Explores the meaning of health promotion and its role in the field of public health, and provides a forum for discussion on preventive approaches in health care. Students study a variety of approaches to promoting health and consider the benefits and disadvantages of each of these within an integrated framework.

MEED9013
Influencing Health Beliefs and Health Behaviours
Staff Contact: Ms F Trede
UOC4  HPW2  S1  S2

This ungraded elective explores the complexity and theoretical perspectives of influencing health beliefs and health behaviours. Issues such as risk perception, value systems, culture, inequality, motivation and education are discussed and current intervention models for change are analysed.
MEED9015  
Health Services Development and Implementation  
Staff Contact: Professor A Rotem  
UOC4  HPW3  S1  
This course addresses institutional strengthening and capacity building in health services. The focus is on development and change. Particular attention is given to organisational culture and learning within the organisation, leadership, change management and communication. The complexities of cross cultural communication in health services in different international settings is explored.

MEED9108  
Program Evaluation and Planned Change  
Staff Contact: Professor A Rotem  
UOC4  HPW2  S1  
This course offers a framework and practical skills for the design of evaluation which is aimed to support decision making. The role of evaluation in development and innovation is explored with due attention to organisational and political sensitivities and constraints. The role of the evaluator in clarifying the need for evaluation, and in determining the questions that should be addressed, and the methods of obtaining and interpreting information, is considered in some detail.

MEED9111  
The Consultation Process  
Staff Contact: Professor A Rotem  
UOC4  HPW2  S1  
The course is designed to explore the conceptual frameworks, processes and practices used by internal and external change agents and consultants in the implementation of organisation and community wide health initiatives. The course focuses on internal processes of change as well as third party interventions. Managers and professional staff responsible for developing and implementing education and health programs are increasingly required to initiate and manage change. Change is also being driven by new technology, resource constraints and shifts in community needs. Knowledge and practical experience in the use of consultation processes is vital to ensure programs are well accepted and effectively delivered.

Notes: Offered as series of workshops.

MEED9113  
Evaluation of Instructors  
Staff Contact: Ms Bloomfield  
UOC4  HPW2  S2  
This seminar series covers current approaches to collecting, analysing and reporting information about the performance of instructors. Students are expected to recognise different purposes and approaches to evaluation and to acquire skills in designing an evaluation plan and instruments which are suitable for the range of instructional settings commonly encountered in health professions education.

MEED9120  
Qualitative Research Methods in Health Promotion  
Staff Contact: Dr Maher  
UOC4  HPW2  S1  S2  
Prerequisites: MEED9012  
Explores a range of qualitative research methods and techniques, including participant observation, in-depth interviews and focus groups and their application to public health and health promotion. The course aims to provide students with skills for documenting and understanding how people interpret health and illness and the contexts in which they occur. Recommended for students wishing to undertake their major projects using qualitative methods.

MEED9122  
Primary Health Care: Policies, Programs & Perspectives  
Staff Contact: Dr Nossar  
UOC4  HPW2  S1  
The concept of primary health care and its emergence as the priority health care approach in developing countries. Emphasis on the training implications of primary health care programs together with different definitions of the concept including the role of primary health care in social and economic development, and its relationship to existing health care systems.

MEED9125  
Designing Short Courses and Workshops  
Staff Contact: Dr Patricia Youngblood  
UOC4  HPW2  S1  
This course is designed to help participants learn to plan, conduct and evaluate short courses and workshops. It is intended for health professionals who are responsible for providing staff development, continuing education or special purpose training sessions for other health professionals, trainees or for the community. Course participants will learn to assess needs of the target audience, identify learner characteristics and abilities, identify and classify learning outcomes, write learning objectives, select appropriate teaching and assessment methods and media, and evaluate the effectiveness of the educational experience. The course will be organised around the major steps in the instructional design process, including analysis, design, development, implementation and evaluation.

MEED9129  
Primary Health Care: Issues in Implementation  
Staff Contact: Mrs Elizabeth Murphy  
UOC4  HPW2  S2  
This course guides participants through a detailed analysis of both the theory and the practice of implementing Primary Health Care programs. Problems and issues encountered in implementation are examined and practical solutions explored. The course is designed for health professionals who have had some prior exposure to the concepts and practice of Primary Health Care, and draws upon relevant case studies for the analysis.

MEED9130  
Information Technology in Medical Education  
Staff Contact: Ms Di Corpo  
UOC4  HPW2  S1  S2  
The course aims to provide an introduction to the use of information technology in higher education including the use of the Web to support teaching. The course explores whether, when and how to use information technology for educational purposes.

MEED9131  
Formulating Academic Proposals and Projects  
Staff Contact: Ms Furber  
UOC4  HPW2  S1  S2  
This course aims to explore concepts and develop skills related to formulating academic projects and proposals. Emphasis will be given to identifying research or development needs, developing conceptual and data critical analysis skills, undertaking literature analysis, planning project aims, identifying practical administrative and ethical limits, and writing skills.

Notes: Weekly classes or workshop.

MEED9133  
Learning, Teaching and Assessment  
Staff Contact: Ms Bloomfield  
UOC4  S1  
This course explores the current views about the conditions which support learning in the health professions and the requirements these imply for teaching. It focuses on adult learning in various settings commonly encountered in health professions education, ie universities, hospitals and the community.

MEED9136  
Culture, Health and Illness  
Staff Contact: Associate Professor M Eisenbruch  
UOC4  HPW2  S1  
This course is for students who want to improve their cultural competence - as health workers, academics, educators, researchers, or policy makers - in working in multicultural settings in Australia, or in developing countries. Students will learn the basic theories and methods of disciplines (including medical anthropology, transcultural psychiatry, cross-cultural psychology, and cultural aspects of international health, and health within culturally pluralistic
societies) relevant to the study of health and illness in the setting of multicultural Australia and, at the same time, in developing countries in the Asia Pacific region.

**MEED9140**  
**Project Design and Monitoring in International Health**  
Staff Contact: Dr P Freeman  
UOC4 S2  
Prerequisite/s: CMED9502, CMED9500, HEAL9751  
The planning of international health projects is a multi-phased process that must be performed well if sustainable high quality improvements in health care are to be achieved. This subject is designed to equip professionals contributing to international health with the competencies necessary to develop a practical comprehensive project plan, in line with current international practice. Course topics will cover all the major steps necessary to produce this plan.  
**Note/s:** External Course.

**MEED9144**  
**Project**  
**Staff Contact:** Ms Joanne Callen  
Enrolment Requires School approval  
UOC12 S1 S2  
The project comprises in-depth study of a contemporary public health issue or topic. Candidates are expected to demonstrate their ability to apply knowledge and skills gained in the course, through: identifying and defining a significant issue; systematically collecting relevant, up-to-date information about the issue; analysing, interrupting and discussing the information; drawing conclusions; making recommendations; and writing a report in a manner consistent with academic standards at Master's level. The project may be in the form of a small-scale research study, a case study, a program evaluation or a report on field placement. Although candidates are advised to start planning project early in their program, it is normally undertaken after completion of all core and elective courses.

**MEED9145**  
**Project - Part A**  
**Staff Contact:** Ms Joanne Callen  
Enrolment Requires School approval  
UOC6 S1 S2

**MEED9302**  
**Learning in Small Groups**  
**Staff Contact:** Ms Susan Tooley  
UOC4 S1 S2  
This course explores how people operate as members and leaders of groups and the conditions underlying effective group work in both education and the workplace. The emphasis is on experiential learning, observation of group process, improving skills in facilitating group learning and designing appropriate learning activities.  
**Note/s:** External Course/Workshop. Can also be undertaken part-time over a full year.

**MEED9303**  
**Clinical Practice as a Discipline**  
**Staff Contact:** Mr Phillip Godwin  
UOC4 S1 S2  
This course explores the nature of professional expertise within clinical practice as a skilled discipline within the streams of general and specialist practice and within nursing and the therapies. Course matter includes the varieties of working knowledge (applied knowledge, strategic knowledge, intuitive knowledge, local, situational knowledge, predictive and decision making knowledge, people management knowledge and judgment), of skills in managing logical processes and skills in managing people and procedures. The course also analyses the profession's philosophy, the professional's tasks, roles and responsibilities, and the perspectives and expectations within the health system and community. Assignments are expected to contribute to the understanding and development of the discipline in each health profession.  
**Note/s:** External Course.

**MEED9304**  
**Learning Clinical Reasoning**  
**Staff Contact:** Mr Phillip Godwin  
UOC6 S1 S2  
In this course the medical stream covers teaching of the steps in the clinical process inductive and deductive strategies, data collection and its flaws, the reliability of clinical evidence, intuition and clinical memory, investigation and sufficiency of evidence, strength of clinical and investigational evidence, interpretation and misinterpretation, logical processes in clinical inference and plausibility of diagnosis, and the utility of expert systems and computer-aided diagnosis. For the nursing stream the course diverges to cover the reasoning called upon within different clinical units. Assignments include the study of clinical reasoning in the candidate's setting.  
**Note/s:** External Course. Can also be undertaken part-time over a full year.

**MEED9306**  
**Clinical Supervision**  
**Staff Contact:** Mr Christopher Hughes  
UOC4 S1 S2  
This course aims to help students develop a reflective and critical approach to the operational and educational supervision of staff and students that is effective, and that is based on relevant theory and on ethically defensible practice. It draws on models of supervision and facilitation taken from the management, adult education and clinical supervision literatures. The assignments focus both on the educational and operational supervision of individuals working on specific tasks, and on the planning and supervision of blocks of clinical experience for individuals or groups.  
**Note/s:** External Course.

**MEED9307**  
**Exploring and Managing Ethical and Moral Dilemmas**  
**Staff Contact:** Dr Catherine Berglund  
UOC4 S1 S2  
This course guides the learner through the major ethical principles affecting clinical choices using a large array of contemporary clinical issues. The course is based on posing questions and search for answers. Ethicists differ in the way they search for answers. Not all believe that there is one truth to find. Many believe that the ‘truth’ depends on the context, or situation, or on the relative importance
of opposing values. This course attempts to hear 'many voices' not only from ethicists and clinicians but from law, religion, administration and lay media. Ethicists themselves range across a spectrum from “You should....” (duty based deontologists) to “It depends....” (situationists). The courses aims to bring out that range. Assignments rely on students' consultations and clinical education experiences to explore ethical principles and their implications in the clinical setting.

**MEED9308**

**Learning Clinical Decision Making**  
*Staff Contact: Dr Phillip Godwin*  
UOC4  S1  S2

In this course the medical stream deals with quantitative and qualitative aspects of decision making, management options, ambiguity and sufficiency of evidence at the test-treatment threshold, identification of possible outcomes, calculation of probabilities and utilities for each outcome, structuring with decision analysis, elicitation of patients' preferences, configuration of trade-offs and sensitivity analysis, influencing operations in the context and in the personal psychology of doctor and patient, defensibility of decisions, and judgement in making choices under uncertainty. The nursing stream diverges at many points to cover the particular decisions required of the clinical nurse. Assignments include the analysis of a number of decision processes in the candidate's setting.

**Note/s:** External Course. Can also be undertaken part-time over a full year.

**MEED9309**

**Assessment of Clinical Performance**  
*Staff Contact: Dr Peter Harris*  
UOC4  S1  S2

This course covers the purposes, location, criteria, methods, timing, frequency, scoring methods and formats, and training of examiners to achieve consistency. The course includes development of assessments undertaken by self, peers, other health workers and patients. The course also addresses issues of judgment of others, and of innovation in developing accurate estimates of practical ability. Assignments include the study of performance assessment, and development of approaches to formative assessment.

**Note/s:** External Course.

**MEED9312**

**Research Into Clinical Education**  
*Staff Contact: Dr Catherine Berglund*  
UOC6  S1  S2

This course introduces clinical educators to the research methods appropriate for studying complex, multifactorial, interactive, dynamic situations in which few variables can be controlled, either ethically or practically. Critical analysis as consumers of clinical research papers and the use of basic statistical concepts (parametric and non-parametric) and methods will be included. Candidates will plan a research project into clinical education as their principal assignment.

**Note/s:** External Course.

**MEED9313**

**Planning Educational Programs**  
*Staff Contact: Dr Patricia Youngblood*  
UOC4  S1  S2

This course will focus on educational planning issues at the macro level (i.e. courses and programs). Participants will use an educational planning model to identify and analyse an educational problem, design an educational program to address the problem, and plan a strategy for evaluating the success of the program. Using case studies, students will learn to apply the model in a range of educational settings, including formal courses in medical and nursing schools, as well as continuing professional development programs for practicing health professionals. This course is particularly relevant for clinicians who are responsible for planning and conducting orientation or training sessions for medical students, interns, RMO staff and vocational trainees. It is offered in external mode, with an on campus workshop at the beginning of the session.

**Note/s:** External Course.

**MEED9314**

**The Ward (or Office) as a Social and Learning Environment**  
*Staff Contact: Dr Alexandra Smith*  
UOC4  S1  S2

This course uses the clinical setting of the ward, or the office, or the clinic as the unit of study of the formal and informal communication and management processes, professional role definition and socialisation into sub-cultural belief patterns, sharing of decision making, expectations and stresses, coping strategies and stress management, analysis of social pathology, relation between task and maintenance functions and the resolution of conflict, staff job satisfaction and turnover, and effectiveness for learning. Assignments include a report on the candidate's working environment.

**Note/s:** External Course.

**MEED9315**

**Clinical Teaching**  
*Staff Contact: Dr Peter Harris*  
UOC6  S1  S2

The course includes the planning and conduct of clinical teaching programs, preparation of the learners including assessment of the learner’s readiness, briefing before patient encounter, demonstration of skills, perceptual skills in data collection, debriefing and reflection on the clinical encounter, explanation of the clinical experience, in terms of available theory, translation of professional knowledge into working knowledge, and forward planning of reading and further practice. The course also deals with the micro-skills of listening, questioning, probing and challenging, demonstrating, and involving the patient and other staff. Assignments include the study of the candidate's clinical teaching and the study and practice of clinical micro-skills.

**Note/s:** External Course. Can be undertaken part-time over a full year.

**MEED9316**

**Learning Consulting Skills**  
*Staff Contact: Dr Holmwood*  
UOC6  S2

In this course the medical stream deals with the identification and learning of consulting skills in communicating with patients, families and colleagues, in clarifying illness problems, in acquiring accurate information, interpreting evidence and diagnosing disease, in handling ambiguity and uncertainty, in referral to others and in negotiating trade-offs among management options. Differences between generalist and specialist tasks and contexts will be explored. Consulting skills in the nursing stream parallel these, but with differing responsibilities in assessment and patient care. Assignments include study in the candidates setting.

**Note/s:** External Course/Workshop.

**MEED9317**

**Clinicians as Managers**  
*Staff Contact: Mr Phillip Godwin*  
UOC4  S1

This course focuses on the role of clinicians in the management of health and education programs. It aims to encourage review of organisational and management issues which influence the performance of clinical units. The material includes identification of the functions of management, the typical challenges faced by clinicians as managers, their contribution to leadership and team development, their role in planning, evaluation and their management of change. The assignments in this course will require a step-by-step review of the way activities and programs are managed and strategies to improve the effectiveness and efficiency of the organisational unit under study. Participants will be required to reflect on their performance as managers in tasks such as setting goals, organising, delegating, supervising and supporting staff development.

**Note/s:** External Course/Workshop.
MEED9351
Independent Study (2 Units of Credit)
Staff Contact: Dr Peter Harris
Enrolment Requires School approval
UOC2  S1 S2
Candidates may contract to undertake an Independent Study on a particular field of interest or clinical educational research. The number of credit points may range from two to eight, according to the size of the independent study. *These courses are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.

MEED9352
Independent Study (4 Units of Credit)
Staff Contact: Dr Peter Harris
Enrolment Requires School approval
UOC4  S1 S2
Candidates may contract to undertake an Independent Study on a particular field of interest or clinical educational research. The number of credit points may range from two to eight, according to the size of the independent study. *These courses are part of the Master of, and Graduate Diploma in Clinical Education, and are available on a full fee paying external basis only.

MEED9360
Major Project
Staff Contact: Dr Peter Harris
Enrolment Requires School approval
UOC24  S1 S2
The final project is an important component of the MClinEd. Its purpose is to ensure that the knowledge and experience you gain from the program are transferable to seeking the solutions of clinical education in your own clinical setting. For this reason it is important that your project proposal should include information which will help you clarify and define the topic you wish to pursue and which will help you and your supervisor to proceed systematically with the exploration and planning of your project.

Note/s: External Course

Elective Studies

Elective studies may be taken, after approval, in other schools of the University, or in other universities, if the studies contribute to the aims of the program.

Supervision

Before enrolment, the Head of School of Medical Education shall be satisfied that adequate supervision and facilities are available.

School of Paediatrics

PAED8102
Psychosocial Development
Staff Contact: Associate Professor Stewart Einfeld
UOC4  HPW2  S1 S2
Theories of Freud, Erikson and Piaget, normal and abnormal family processes, behavioural and developmental issues, childhood behaviour problems and management, adolescent behaviour problems and management.

PAED8103
Child Health Services
Staff Contact: Dr E Murphy
UOC4  HPW2  S1 S2
The child care delivery system, parent education, screening programmes, immunisations, accidents and poisoning, dental care, care of physically and mentally disabled children.

PAED8104
The Effect of Social Adversity in Childhood
Staff Contact: Dr G Alperstein
UOC4  HPW2  S2
Family structure and dynamics, poverty, single parent, drug addicted parents, housing and sanitation, homeless children, teenage parents, migrant families. Aboriginal health, working mothers and childcare.

PAED8105
The Child and the Law
Staff Contact: Dr K Moran
UOC4  HPW2  S1 S2
Adoption, child custody, child physical and sexual abuse, children's rights, the United Nations charter for children, child welfare, laws designed for special needs of children, juvenile delinquency.

PAED8201
Physical Growth and Development 1A
Staff Contact: Professor Richard Henry
UOC4  HPW2  S1 S2
Foetal growth and development. Physical growth from birth to adolescence. Neurodevelopment. Assessment of growth and development.

PAED8202
Physical Growth and Development 1B
Staff Contact: Professor Richard Henry
UOC4  HPW2  S2
Prerequisites: PAED8201

PAED8203
Infant Feeding and Nutrition 1
Staff Contact: Dr P McVeagh
UOC4  HPW2  S1 S2
PAED8204
Infant Feeding and Nutrition 2

UOC4 HPW2 S1 S2
Prerequisite/s: PAED8203

PAED9101
General Paediatrics and Child Health 1
Staff Contact: Dr Susan Russell
UOC8 S1 S2
Growth and development. Systemic diseases in childhood. Prevention and early detection. Community services available for the care of children with various disorders. Emphasis is placed on the understanding of principles especially physiological principles. Prenatal development and prenatal experiences, which affect the growing foetus and infant. Necessary professional supervised experience is obtained by clinical attachment to appropriate hospitals. Candidates are given increasing professional responsibility. There are lectures, seminars, discussion groups and demonstrations on manikins. Family dynamics and family interactions in the causation of developmental, behavioural and emotional problems in children. Students without adequate clinical experience have a clinical attachment in paediatric psychiatry during the first two years of training. There are lectures, seminars, case conferences and assignments.

PAED9617
Community Paediatrics
Staff Contact: School Office
UOC4 HPW2
A broad view of Community Paediatric Services in contemporary Australia, how paediatrics is practised and the rationale behind these practices. Explores the practical and theoretical background behind the development of Community Paediatrics, as well as the principles that underpin its practice. Examines some key aspects of that practice.

School of Physiology and Pharmacology

PHPH5413
Sports Injuries 1
Staff Contact: Dr David Garlick
UOC6 S1 S2
Sports injuries 1 describes dermatomes and myotomes and the implications for sports injuries. The anatomy of the shoulder, elbow, wrist and hand is described which provides the basis for describing sporting injuries to the shoulder, elbow, wrist and hand. The anatomy of the head and neck is described in order to deal with sporting injuries to the head, neck, eye, ear, nose and face. The anatomy of the trunk is described in order to deal with sports injuries to the chest, abdomen, back. Finally, on-field management of sports injuries is described.

Note/s: A compulsory course for MSpMed

PHPH5414
Sports Science
Staff Contact: Dr David Garlick
UOC6 S1 S2
The biochemistry is described for intermediary metabolism and specifically aerobic and anaerobic metabolism in muscle and the hormonal control. Energy expenditure is considered in the resting and exercising person. Muscle physiology deals with the contractile process and features of tensile force in relation to the different fibre types. The motor unit is described as are the sensory inputs to the central nervous system and its control of motor function. Biomechanical principles include a consideration of subjective, objective and predictive analysis. Gastrointestinal physiology surveys the motility and digestive and absorptive activities of the gut.

Note/s: A compulsory course for MSpMed

PHPH5416
Sports Nutrition/Sports Pharmacology
Staff Contact: Dr David Garlick
UOC6 S1 S2
The course examines food composition labels and dietary intakes of various sections of the community both sedentary and active. Nutrients are dealt with such as protein, carbohydrate, fats, dietary fibre, fluid intake, minerals and vitamins. The recommended dietary intakes are compared with actual intakes of various groups. Nutrition for special groups of physically active people is considered such as children, adolescents, pregnant and lactating women, the elderly, different ethnic groups. Energy balance is considered in relation to weight control. Nutrition in performance-related activities is discussed in relation to requirements for metabolic fuels, dietary components, mineral and trace elements, fluid, aminoacid and vitamin supplements, training diet. Nutrition in health-related activities is discussed in reference to primary, secondary and tertiary prevention of problems in obesity, coronary heart disease, diabetes, eating disorders. Basic pharmacology will be outlined and factors affecting pharmacokinetics in relation to routes of administration, plasma levels, volumes of distribution, calabolism and elimination. The effect of exercise on drugs invivo are discussed such as the altered absorption rates with reduced mucosal blood flow and enhanced exercising muscle and skin blood flows; also, the effects of thermal regulation. The interactions of medically prescribed drugs on the physically active person will be discussed systemically regarding cardiovascular drugs, anti-diabetic drugs, respiratory drugs, anti-inflammatory drugs (NSAIDs, corticosteroids), gastrointestinal drugs, psychotropics, antibiotics. Banned drugs or agents used to enhance performance are dealt with such as stimulants, narcotics, anabolic steroids, beta blockers, diuretics, hormones (human growth hormone, erythropoetin); blood doping, alkali agents. These will be discussed in relation to competitive activities and in relation to screening procedure identification procedures. Drug education and prevention of drug abuse are discussed.

Note/s: A compulsory course for MSpMed

PHPH5417
Sports Psychology/Clinical Biomechanics
Staff Contact: Dr David Garlick
UOC6 S1 S2
The psychological effects of exercise are described in relation to stress management, management of depression, sleep disorders, concepts of self-esteem and self-efficacy, effect on mental acuity and day-time fatigue, the contribution to the control of addictive behaviour. The use of psychological procedures will be discussed in regard to motivation and compliance for subjects undertaking health-related activities as well as for athletes involved in performance-related activities. The psychological aspects of injury will be dealt with in considering the psychological problems
encountered by the injured recreationally active person and also by the athlete. Behavioural problems are discussed such as exercise-addiction and body weight problems. In regard to stress, there will be discussion of the mental state and the functioning of the immune system and the inter-relationships between stress exercise and the components of the immune system. This will be discussed in relation to the incidence of infection in the competitive athlete. Clinical biomechanics applies basic aspects of biomechanics to joint movements encountered in a wide variety of sporting activities to elucidate the problems that can arise from inappropriate repetitive movements resulting in micro- and macro-trauma.

Note/s: A compulsory course for MSpMed

PHPH5423
Sports Injuries 2
*Staff Contact: Dr David Garlick*
UOC6 S1 S2
Sports Injuries 2 deals with normal soft tissues and injuries to these in relation to muscles, tendons, ligaments and cartilage. Bone structure and function are described to understand injuries to bone. Anatomy of the pelvis, hip and thigh precedes consideration of injuries and their management in the groin, hip and thigh. Functional anatomy of the knee lays the basis for understanding acute and chronic injuries to the knee. Anatomy of the leg, ankle and foot is considered in relation to injuries to these regions.

Note/s: A compulsory course for MSpMed

PHPH5424
Research Methods
*Staff Contact: Dr David Garlick*
UOC6 S1 S2
Biostatistics deals with basic statistical functions including graphical presentation and interpretation of data. Epidemiological principles deal with defining a population and how to sample it and elicit data and describes epidemiological variables and attributes. The student is introduced to the key components of a research study in sports medicine including the assessment of the relevance of a measurement technique to a given research question. The student develops an approved research project.

Note/s: A compulsory course for MSpMed

PHPH5426
Applied Sports Medicine
*Staff Contact: Dr David Garlick*
UOC6 S1 S2
This subject brings together the strands dealt with in preceding subjects on sports injuries and medical applications of exercise. Weekly topics include: the prevention of injury, including the screening of athletes pre-season; imaging in sports medicine, considering the use of X-Rays, CT and MRI, ultrasound, nuclear medicine; principles of rehabilitation in relation to types of stretching and strengthening, physical methods of soft tissue treatment, manipulation and mobilisation, proprioceptive re-training, taping; the use of non-steroidal anti-inflammatory drugs and corticosteroid injections; the management of rheumatological conditions in relation to physical activity; medical coverage of fun runs and other community events; the role of the team physician; legal and ethical aspects of sports medicine.

Note/s: A compulsory course for MSpMed

PHPH5433
Medical Applications of Exercise 1
*Staff Contact: Dr David Garlick*
UOC6 S1 S2
Medical Applications of Exercise 1 surveys the physiology of the cardiovascular system in its control and reflex responses as well as the electrophysiology of the heart and the ECG. The effects of exercise on the cardiovascular system are discussed. Investigations of cardiovascular functions are illustrated, including stress testing. Primary, secondary and tertiary use of exercise in cardiac rehabilitation are considered. Cardiovascular aspects of special groups are described, in pregnant women, in hypertensive and diabetic patients.

Note/s: A compulsory course for MSpMed

Note/s: A compulsory course for MSpMed

PHPH5443
Medical Applications of Exercise 2
*Staff Contact: Dr David Garlick*
UOC6 HPW0 S1 S2
Temperature regulation is considered as a basis for understanding hyperthermia in the athlete. Physiological and medical considerations are described in relation to the female athlete and in relation to children. Respiratory physiology and respiratory medicine provide the basis for understanding exercise-induced asthma, diving and altitude problems for the athlete.

Note/s: A compulsory course for MSpMed

PHPH5445
Major Project and Report
*Staff Contact: Dr David Garlick*
UOC6 S1 S2
The Project will be planned and approved in undertaking the subject Research Methods. The Project, conducted over six months part-time, will involve research into an area of sports medicine at a clinical or basic level which contributes new knowledge to the field. The Project is to be presented as a scientific Report of about 8-10 000 words.

Note/s: A compulsory course for MSpMed

PHPH5461
Principles of Pharmacology
*Staff Contact: School Office*
UOC12 S1
This subject introduces the principles of pharmacology and also covers the systematic pharmacology of selected drug groups. It is designed for students with a background in biotechnology but with little or no knowledge of pharmacology. The subject covers topics such as dose response relationships, drug absorption, metabolism and elimination, autonomic pharmacology, autacoids, pharmacokinetics and toxicology.

PHPH5471
Advanced Pharmacology
*Staff Contact: Dr Larry Wakelin*
UOC12 S1
Prerequisite/s: PHPH3152, PHPH5461
This course is an advanced coverage of pharmacological topics including receptor binding, pharmacokinetics, drug assays, drug development, toxicology, autacoids and ion channels. The lecture material is supplemented by computerised analysis of data derived from experiments on receptor binding, dose response relationships and pharmacokinetics. Considerable emphasis is placed on the many aspects of drug development.

PHPH5491
Pharmacology Project
*Staff Contact: Dr Larry Wakelin*
UOC12 S1 S2
A small laboratory or industry based project or an extensive literature review or extensive data analysis in the area of drug development.

PHPH5501
Basic Principles of Drug Actions Module 1 - Distance Education M.App.Sc. in Biopharmaceuticals
*Staff Contact: Dr Larry Wakelin*
UOC6 S1 S2
This module covers general principles of pharmaco-dynamics and pharmaco-kinetics. Pharmaco-dynamics (what the drug does to the body) considers drug-receptor interactions, the basis of dose-response curves, reversible and irreversible antagonists, partial agonists and related topics. Events following the drug-receptor interaction, which include stimulation of second messenger systems and the pharmacology of ion channels, are described. The principles governing pharmaco-kinetics (what the body does to the drug) and their clinical importance are discussed in some detail. There are several simple graphical and problem solving exercises to be completed to aid your understanding of this material.
PHPH5511
Selected Topics in Pharmacology - Module 2 - Distance Education M.App.Sc. in Biopharmaceuticals
Staff Contact: Dr. Larry Wakelin
UOC6 S1 S2

For this module the topics were chosen to enable students to gain knowledge of the receptors in the human body with which drugs commonly interact to produce their main clinical effects, or their side-effects/toxicological actions. The module begins with an introduction to the autonomic nervous system, then works through autonomic receptors, receptors for histamine and serotonin, then to the newer areas of peptide receptors and cytokines, the latter areas being those for which drugs are now being developed. With this background, plus some reading material on receptors for drugs affecting the central nervous system, it is felt that students will be able to read and understand the pharmacology of most drugs in clinical use. A video which covers many autonomic drug effects on the cardiovascular system, plus questions based around this film, are included.

PHPH5513
Sports Injuries 1
Staff Contact: Dr. David Garlick
UOC6 S1 S2

Sports injuries 1 describes dermatomes and myotomes and the implications for sports injuries. The anatomy of the shoulder, elbow, wrist and hand is described which provides the basis for describing sporting injuries to the shoulder, elbow, wrist and hand. The anatomy of the head and neck is described in order to deal with sporting injuries to the head, neck, eye, ear, nose and face. The anatomy of the trunk is described in order to deal with sports injuries to the chest, abdomen, back. Finally, on-field management of sports injuries is described.

Note/s: A compulsory course for MSPMed

PHPH5521
Techniques for Drug Development - Module 3 - Distance Education M.App.Sc in Biopharmaceuticals
Staff Contact: School Office
UOC6 S1 S2

This module extends the concepts raised and discussed in the Basic Pharmacokinetics section of Module 1. More advanced pharmacokinetic problems, such as compartmentation, kinetics of effect and problems solving are included. The technique for measuring receptor binding is shown in some detail on video, with explanation of how the technique is set up, and how and why it is much used in new drug development. Also included in this module is a section on techniques used in the assay of drugs. The determination of molecular structure, and quantitation of drugs in the body are vital areas of drug development, and indeed pharmacokinetics depends upon such quantitation.

PHPH5523
Sports Injuries 2
Staff Contact: Dr. David Garlick
UOC6 S1 S2

Sports Injuries 2 deals with normal soft tissues and injuries to these in relation to muscles, tendons, ligaments and cartilage. The structure and function are described to understand injuries to bone. Anatomy of the pelvis, hip and thigh precedes consideration of injuries and their management in the groin, hip and thigh. Functional anatomy of the knee lays the basis for understanding acute and chronic injuries to the knee. Anatomy of the leg, ankle and foot is considered in relation to injuries to these regions.

PHPH9102
Pharmaceutical Development of Medicines
Staff Contact: Professor Richard Day
UOC6 S1

This course begins with an introduction to Pharmaceutics, which is the science of preparing and evaluating dose forms for the administration of medicines. Topics to be covered include the manufacture of new compounds, the choice of formulations and pharmaceutical labelling. The influence of pharmokinetics and pharmacodynamics on product development. Methods of testing for bioequivalence, stability, impurity and incompatibility. Formulation pharmodynamics on product development. Methods of testing for manufacture of new compounds, the choice of formulations and fabrication to large-scale production.

Notes: The course is compulsory for programmes 7370, 5504, and 9060.

PHPH9104
Legal and Regulatory Development of Medicines
Staff Contact: Professor Richard Day
UOC6 S2

This course provides a general overview of the ethical issues and laws relevant to the development and marketing of medicines. It includes the following topics: State and Commonwealth Constitutional powers. Common law, statutory law, accountability, natural justice. Laws relating to the development and sale of medicines; patents, intellectual property, trade practices. Ethical issues in drug development and marketing. Preparation and submission of marketing applications, approval and appeal processes. Principles of Good Clinical Research Practice (GCRP). The ethical review process, consent procedures in biomedical research. The philosophy of regulation of drug use: input of industry. Government, consumer. The regulatory principles regarding the use of developmental drugs in human subjects and the practical consequences of these on the design and conduct of clinical investigations. The organization of the regulatory processes in Australia: The Therapeutic Goods Administration and advisory bodies (ADEC, ADRA, etc.) The Pharmaceutical Benefits Advisory Committee. Submissions regarding cost effectiveness. Preparation and submission of an application for approval to test or mark a drug and the relevant appeal process. Integration of regulatory affairs into the pre- and post-marketing planning and review of product development strategies. Input from international bodies and national agencies.

Notes: The course is compulsory for programmes 7370, 5504, and 9060.

PHPH9107
Therapeutics and the Molecular Basis of Disease 1
Staff Contact: Professor Richard Day
UOC6 S1 S2

This course provides a basis for understanding the mechanisms involved in the disordering physiology that underlies common disease states. The object is to provide an understanding of those disorders that are amenable to correction or amelioration with drug therapy. It thus provides a rationale for drug design and utilization. The subject consists of five main sections. Section 1 is a review of relevant features of general biology with emphasis on (a) modern systems of taxonomy (natural products are still a major source of lead compounds for developing new therapeutic agents) and (b) biochemical emphasis on those aspects relevant to molecular biology and biochemical pharmacology (the other two main areas involved in new drug development). Section 2 deals with cellular injury and death and covers causes of cell injury, general mechanisms of cell injury an necrosis, apoptosis, stress proteins and cell injury, subcellular alterations in cell injury, intracellular accumulations, pathologic calcification, haemolysis, cellular aging. Section 3 covers cellular growth and differentiation including control of cell growth, extracellular matrix and cell-matrix interactions, and cellular adaptions of growth and differentiation. Section 4 deals with inflammation and repair and covers acute inflammation, chemical mediators of inflammation, chronic inflammation, morphologic pattern in acute and chronic inflammation, systemic effects of inflammation, wound healing. Section 5 covers oedema, hyperaemia and congestion, haemorrhage, haemostasis and thrombosis, embolism and shock.

Notes: The course is elective for programmes 5504, and 9060.

PHPH9108
Therapeutic Basis of Drug Use and Development 1
Staff Contact: Professor Richard Day
UOC6 S2
Prerequisites: PHPH9118, PHPH9107

This course aims to provide an understanding of the medical problems and treatments that need to be understood in developing new therapeutic agents and optimizing their use. Emphasis will be on highlighting the strengths and weaknesses of present therapies and identification of current research aimed at developing new therapeutic agents. The course begins with a review of drug safety including mechanism of adverse drug reactions and drug interactions, together with the influence of age, race and disease states on the tendency to develop adverse responses to medication. The course provides and integrated description of relevant physiology, pathophysiology, disease states: (a) infectious diseases: bacterial, viral, fungal, and parasitic infections: (b) immunological disorders: immunodeficiency, hypersensitivity, transplantation: (c) haematology: anaemias, haemorrhagic disorders, disorders of white blood cells, leukaemias, lymphomas; (c) cardiovascular disorders: cardiac arrhythmia, ischaemic heart disease, heart failure, hypertension, vascular disorders; (d) respiratory tract disorders: asthma, chronic obstructive pulmonary disease, acute bronchiitis, bronchitis, cystic fibrosis, pneumonia; (e) renal tract disorders: renal failure, disorders of renal tubule function, obstructive uropathies, myoneurogenic disorders, incontinence, neoplasms; (f) gastrointestinal disorders: oesophageal disorders, gastritis, peptic ulcer, diarrhoea and constipation, gastroenteritis, malabsorption syndromes, chronic inflammation of the bowel, gastrointestinal neoplasms; (h) hepatic and biliary disorders: jaundice, ascites, fibrosis, cirrhosis, hepatitis, neoplasms.

Notes: The course is elective for programmes 5504, and 9060.

PHPH9109
Therapeutic Basis of Drug Use and Development 2
Staff Contact: Professor Richard Day
UOC6 S2
Prerequisites: PHPH9118, PHPH9107

The objectives of this course are the same as describe for course PHPH 9108. The course will provide and integrated description of relevant physiology, pathophysiology, disease state manifestations and clinical pharmacology with respect to the following disease: (a) neurological and metabolic disorders: nutrition, nutritional deficiencies, obesity, water/electrolyte/acid-base metabolism; (b) endocrine disorders: disorders of the pituitary, thyroid, adrenal glands; (c) cardiovascular disorders: disorders of carbohydrate metabolism; (c) gynaecological disorders: common problems, amenorrhoea and abnormal bleeding, endometriosis, breast disorders, neoplasms; (d) neurologic disorders: seizure disorders, sleep disorders, cerebrovascular disease, CNS infection and neoplasms, demyelinating diseases, disorders of movement, spastic cord disorders peripheral nervous system disorders; (e) psychiatric disorders: personality disorders, drug dependence, neuroses, mood disorders, schizophrenic disorders, delusional disorders; (f) musculoskeletal and connective tissue disorders: rheumatoid arthritis and other diffuse connective tissue disease, arthritis associated with spondylitis, osteoarthritis, infections and neoplasms of the bones, crystal-induced conditions, bone and cartilage disorders, nonarticular rheumatism; (g) ophthalmological disorders: disorders of the eyelids, conjunctiva, and cornea, cataract, uveal tract disorders, conjunctival neoplasms, disorders of the hair, disorders of the hair follicles and sebaceous glands, skin infections - bacterial, viral, parasitic, fungal, drug eruptions and similar inflammatory disorders of skin, disorders of scarification, tumours.

Notes: The course is elective for programmes 5504, and 9060.
PHPH9111
Pharmaceutical Formulation 2
Staff Contact: Professor Richard Day
UOC6  S1
This subject consists of coursework only and will extend the principles covered in Pharmaceutical Formulation and will include the following topics: (a) the formulation and in vitro assessment of oral controlled-release products; (b) the formulation and in vitro assessment of novel dosage forms such as transdermal therapeutic systems and osmotic pumps; (c) principles of accelerated stability testing of conventional dosage forms including the techniques for using data from accelerated stability tests for prediction of shelf life; (d) the pharmaceutics of multiphase formulations such as microemulsions and liposomes; (e) selected topics in bioavailability including statistical design and analysis of bioavailability studies and the design and interpretation of studies designed to assess the bioavailability of controlled-release products; (f) the preparation of biotechnology products by recombinant techniques, their physical and chemical properties, including stability and compatibility, and approaches to their formulation (an alternative to this last topic will be provided for students taking the Biopharmaceuticals elective).

PHPH9112
Advanced Pharmacokinetics
Staff Contact: Professor Richard Day
UOC6  S2
This subject greatly extends the introduction to pharmacokinetics given in the core module Principles of Drug Action, with particular emphasis being given to new aspects of pharmacokinetics. Topics to be covered include (a) rigorous discussion of accumulation kinetics; (b) computerised methods of fitting theoretical equations to the time course of plasma concentrations in individual patients; (c) population kinetics - this is an important aspect of modern pharmacokinetics in which limited data from individual patients can be used to obtain pharmacokinetic parameters; and (d) analysis of the time course of drug effect - pharmacodynamic/pharmacokinetic analysis provides an understanding of the factors controlling the time course of drug effect and is used widely in modern pharmacokinetic research.

PHPH9113
Advanced Regulatory Affairs
Staff Contact: Professor Richard Day
UOC6  S2
This course will extend the core course PHPH9104 Legal and Regulatory Development of New Medicines, for example, by providing a comprehensive examination of the role of the international regulatory agencies such as those of the European Union and the United States and their influence on the Australian regulatory processes examined. Other aspects of the regulatory process mentioned briefly in the core subject, such as issues relating to pharmaceutical chemistry, will be considered in more detail. However, the major emphasis of the subject will be on case study and critical appraisal. Students will review registration dossiers, write evaluation reports and prepare Pre-DEC responses. The focus of this work will be the optimisation of the regulatory process. Students will also participate in a mock Australian Drug Evaluation Committee (ADEC) meeting to gain an understanding of that Committee's procedures and decision-making processes. It is envisaged that some students may choose to undertake projects that would require some time to be spent at the Therapeutic Goods Administration.

PHPH9114
Pharmacoepidemiology
Staff Contact: Professor Richard Day
UOC6  S1
As limits are placed on health care budgets, from the national to the individual level, the relative value of competing uses of scarce resources is becoming a significant part of decision making. The real cost of any health care budgetary decision is not the dollars spent but the loss of benefits that would have been obtained by using the money in different ways. This realisation has led to the application of economic evaluation to the health care choices in an attempt to maximise the value obtained from limited health care budgets. Economists have developed a number of techniques and concepts which, although not providing the answer, can assist the decision maker in identifying, setting out and analysing the many factors that influence such difficult but necessary choices. Pharmacoepidemiology is a subdiscipline of health care economics and is concerned with the methods used by economists in the evaluation of choices in the allocation of pharmaceuticals. This subject consists of two parts: (a) Basic Concepts and (b) Applications and Decision. Part (a) covers methodological issues, cost-of-illness studies, types of economic analysis which are relevant to drugs, calculation of economic cost, decision analysis, examples of published analyses, and economic analysis in developing countries. Part (b) covers budgetary constraints, managing future budgets, use of economic analysis in policy making, policy developments, Australian policies, The Australian Guidelines, and the need for an evidence-based approach.

PHPH9115
Advanced Clinical Trials Management
Staff Contact: Professor Richard Day
UOC6  S2
Prerequisite/s: PHPH9100
The focus of the advanced module will be the practical application of the underlying principles encountered in the core course on clinical trials management. Students will prepare a complete data package for the research ethics committee (REC) for a study submitted as part of the clinical trials notification (CTN) scheme as the major focus and assessment task for this module. The trial will be multi-centred and early phase, that is Phase II to III. There will be potential serious toxicities and a data safety monitoring committee will need to be established. Students will develop the clinical trials protocol, the draft patient consent form, and case report form (CRF). The application package will be assessed by a mock REC and the student will be asked to respond to questions and criticisms raised by the REC.

PHPH9116
Therapeutics and the Molecular Basis of Disease 2
Staff Contact: Professor Richard Day
UOC6  S1 S2
Prerequisite/s: PHPH9107
This course is a continuation of the material covered in PHPH9107 and, like the previous course, aims to provide a basis for understanding the mechanisms involved in disorders that underlie common disease states. The objective is to provide an understanding of those disorders that are amenable to correction or amelioration with drug therapy. It thus provides a rationale for drug design and utilization. The subject consists of four main sections: immunology and diseases of immunity; infection, genetic disorders; and neoplasia. Immunology and diseases of immunity includes a review of normal immune system mechanisms (cells of the immune system, cytokines, histocompatibility antigens, and hypersensitivity reactions); mechanisms of autoimmune diseases, immunologic deficiency syndromes, other actual or suspected immune system diseases (e.g. amyloidosis). Infection includes a brief introduction to microbiology, general principles of microbial pathogenesis, discussion of selected human infectious diseases. Genetic disorders includes a brief section on the new genetics, mutation, mendelian disorders, disorders with multifactorial inheritance, normal karyotype cytogenetic disorders, single-gene disorders with nonclassic inheritance, molecular diagnosis. Neoplasia includes definitions and nomenclature, characteristics of benign and malignant neoplasms, epidemiology, molecular basis of cancer, biology of tumour growth, carcinogenic agents and their cellular interactions, host defense mechanisms, clinical features of tumours. Aspects of molecular biology relevant to the preceding topics (e.g. gene therapy) will be discussed.

Notes: The course is elective for programmes 5504, and 9060.
As strong communication skills are fundamental to the practice of educational visiting, the first focus of the course is to establish and maintain a good relationship with the doctor in the educational visiting situation. The workshop has been designed to: 1. provide the student with the fundamental knowledge needed to perform the visiting situation. The workshop has been designed to: 1. provide educational visiting, the first focus of the course is to establish and maintain a good relationship with the doctor in the educational visiting situation. The workshop has been designed to: 1. provide the student with the fundamental knowledge needed to perform the visiting situation.

This subject provides an introduction to clinical epidemiology, statistics, clinical trial management and data management. A brief introduction to the principles of clinical epidemiology is provided as a basis for measurement of drug effects in humans, including sources of error, types of research studies, and study design. Introduction to statistics includes methods for descriptive statistics, normal distributions and methods for expressing probability distribution parameters including t, chi-square and F. Inferential statistics covers application of distribution parameters to decision making, hypothesis testing, choosing an inferential test, comparison of two means, the two-sample t-test, analysis of variance, chi-square test, correlation, non-parametric tests, and calculation of confidence intervals.

Clinical trials management reviews all stages involved in conducting a clinical trial. The stages covered include the initial project proposal; development of the protocol and other trial related documentation required to gain ethical and regulatory approval for a clinical trial; planning of all trial related materials required to commence the study; conduct of the trial during patient recruitment and treatment; data management and analysis of the data generated from the study; reporting of the data and finally close out of the trial. Responsibilities of the sponsor in trial planning, approval, investigator selection, monitoring and auditing are discussed. The International Conference on Harmonization (ICH) code of Good Clinical Practice (GCP) is emphasized throughout the module.

The object of this module is to review and understand the responsibilities of the Sponsor and its employee's, the Investigator, the Clinical Trials facility and its staff, the Research Ethics Committee, the Contract Research Organisation and finally the participants in a clinical trial. Issues relevant to each of the partners will be covered. These include: for the Sponsor; CTN or CTX scheme, preparation of the data package (covering letter to research ethics committee, investigators brochure, protocol, indemnity release, patient information sheets, and detailed budgeting) monitoring responsibilities, investigators meetings, for the Research Ethics Committee, review of the initial data package, review of quality of informed consent and monitoring responsibilities; for the Investigators, recruitment, education, involvement in protocol development, role in data collection and recruiting, collection of adverse events data, and methodology for gaining consent; for the CRO, overall trial management, choosing a site, and auditing a trial. A common theme will be implementation of guidelines for Good Clinical Research Practice. Students will review data packages for research ethics committees. Assessable activities will include a critical appraisal of a range of data packages for presentation to the ethics committee, presentation of an investigator's start up meeting, and a simulated trial monitoring experience. An assignment focusing on monitoring clinical trials from a Sponsor's point of view will be undertaken. Experiential activities undertaken might include attendance at an investigator's meeting, a protocol development meeting, and a research ethics committee meeting.
Conditions for the Award of Degrees

First Degrees

Rules, regulations and conditions for the award of first degrees are set out in the appropriate Faculty Handbooks. For the list of undergraduate programs and degrees offered see Table of Programs by Faculty (Undergraduate Study) in the Calendar.

Higher Degrees

For the list of postgraduate degrees by research and course work, arranged in faculty order, see UNSW Programs (by Faculty) in the Calendar. The conditions for the award of postgraduate degrees, diplomas and certificates appear in the relevant Faculty Handbook.

Doctor of Medicine (MD) by published work

1. The degree of Doctor of Medicine by published work may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualification

2. A candidate for the degree shall:
   (1) hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales of at least five years standing; or
   (2) hold the degrees of Bachelor of Medicine and Bachelor of Surgery or a qualification considered equivalent from a university other than the University of New South Wales with at least five years' standing and have been associated with the University of New South Wales or one of its teaching hospitals for a period of at least four years.

Enrolment and Progression

3. A candidate for the degree on the basis of published work shall lodge with the Registrar an application together with:
   (1) four copies (if possible) of the published work;
   (2) any additional work, published or unpublished, that a candidate may wish to submit in support of the application;
   (3) a declaration indicating those sections of the work, if any, that have been submitted previously for a university degree or other similar award.

4. Every candidate in submitting published work and such unpublished work as is deemed appropriate shall submit a short discourse describing the research activities embodied in the submission. The discourse shall make clear the extent of the originality of the work and the candidate's part in any collaborative effort including hypothesis generation, design and execution of experiments, supervision of others doing experiments, analysis of results, and contribution to meetings of the research team.

Examination

5. There shall normally be three examiners of the work, appointed by the Committee, at least two of whom shall be external to the University.

6. Before the work referred to in 3. (1), (2) above is submitted to the examiners the head of the appropriate school shall certify that it is prima facie worthy of examination.
7. At the conclusion of the examination each examiner shall submit a concise report to the Committee on the merits of the published work and a recommendation as to whether the degree should be awarded. The examiners may require the candidate to answer orally or in writing any questions concerning the work.

Fees

8. A candidate shall be required to pay such fees as may be determined from time to time by the Council.

In these rules, the term 'published work' shall mean printed as a book or in a periodical or as a pamphlet readily available to the public. The purpose of requiring publication is to ensure that the work submitted has been available for criticism. The examiners may disregard any of the work submitted if, in their opinion, it has not been available for criticism.

"School" if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Doctor of Medicine (MD) by thesis

1. The degree of Doctor of Medicine by thesis may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualifications

2. (1) A candidate for the degree shall:
   (a) hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales at a level acceptable to the Committee; or
   (b) hold the degrees of Bachelor of Medicine and Bachelor of Surgery or a qualification considered equivalent from a university other than the University of New South Wales at a level acceptable to the Committee; or
   (c) in exceptional cases, submit such evidence of academic and professional attainments in support of the candidature as may be approved by the Committee.

   (2) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such examination or carry out such work as the Committee may prescribe, before permitting enrolment.

   (3) A candidate enrolled under 2. (1)(a) or (b) above shall not submit a thesis for the degree until the lapse of five years from the date of the award of the degrees mentioned therein.

   (4) A candidate enrolled under 2. (1)(c) above shall not submit a thesis for the degree until such period of time has elapsed since enrolment as the Committee shall decide at the time of approving enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree by thesis shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

   (2) In every case, before permitting a candidate to enrol, the Committee shall be satisfied that adequate supervision and facilities are available.

   (3) An approved applicant shall be enrolled in one of the following categories:
   (a) full-time candidature: a candidate who is fully engaged in advanced study and research at the University or at one of its teaching hospitals;
   (b) part-time candidature: a candidate whose occupation leaves the candidate substantially free to pursue a program of advanced study and research at the University or at one of its teaching hospitals;
   (c) external candidature: a candidate who is engaged in advanced study and research away from the University or one of its teaching hospitals.

   (4) A candidate shall be required to undertake an original investigation on a topic approved by the Committee. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

   (5) The work shall be carried out under the direction of a supervisor appointed by the Committee from the full-time academic members of the University staff.

   (6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

   (7) No candidate shall be awarded the degree until the lapse of six academic sessions in the case of a full-time candidate or eight academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery with honours or who has had previous research experience the Committee may approve remission of up to two sessions for a full-time candidate and four sessions for a part-time or external candidate.

   (8) A full-time candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. A part-time or external candidate shall present for examination not later than twelve academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.
Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) If a candidate for the degree is not a graduate of the University of New South Wales the greater proportion of the work described must have been carried out in the University or in one of its teaching hospitals, save that in special cases the Committee may permit a candidate to conduct the work at other places where special facilities not possessed by the University may be available or where the subject of the research is uniquely located but only if the candidate spends such period of time within the University, and under such supervision, as may be determined by the Committee.

(3) A candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(4) The thesis shall comply with the following requirements.

(a) it must be an original and meritorious contribution to knowledge of the subject;

(b) it must be written in English and reach a satisfactory standard of expression and presentation;

(c) it must consist of the candidate's own account of the research; in special cases work done jointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(5) A candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work otherwise previously published, whether or not it is related to the thesis.

(6) The thesis shall contain a certificate signed by the candidate indicating specifically the extent to which the work embodied in the thesis is directly attributable to the candidate's own research and the extent to which the thesis has benefited from collaboration with persons other than the supervisor.

(7) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(8) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis, in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that;

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) if the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee it may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Doctor of Medicine (MD) by thesis without supervision

1. The degree of Doctor of Medicine by thesis without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original and meritorious contribution to some branch of medicine.

Qualifications

2. A candidate for the degree shall hold the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales with at least five years standing at a level acceptable to the Committee.

Enrolment and Progression

3. An application to enrol as a candidate for the degree by thesis without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interest, at an
early stage seek the advice of the appropriate school* with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) A candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) it must be an original and meritorious contribution to knowledge of the subject;

(b) it must be written in English and reach a satisfactory standard of expression and presentation;

(c) it must consist of the candidate's own account of the research; in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied with the candidate's part in the joint research.

(4) A candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work otherwise previously published, whether or not related to the thesis.

(5) The thesis shall contain a certificate signed by the candidate indicating specifically the extent to which the work embodied in the thesis is directly attributable to the candidate's own research and the extent to which the thesis has benefited from the collaboration with other persons.

(6) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses. The candidate may also submit any work previously published whether or not such work is related to the thesis.

(7) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis, in whole or in part, in photostat or microfilm or other copying medium.

Examination

5.(1) There shall normally be three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) Before the thesis is submitted to the examiners the head of the school in which the candidate is enrolled shall certify that it is prima facie worthy of examination.

(3) After examining the thesis each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee it may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree.

Fees

6. A candidate shall be required to pay such fees as may be determined from time to time by the Council.

"School" if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students, and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

---

Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty or board (hereinafter referred to as the Committee) to a candidate who has made an original and significant contribution to knowledge.

Qualifications

2.(1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment as a candidate for the degree.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be lodged with the Registrar at least one month prior to the date at which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled either as a full-time or a part-time student.

(4) A full-time candidate will present the thesis for examination no earlier than three years and no later than five years from the date of enrolment and a part-time candidate will present the thesis for examination no earlier than four years and no later than six years from the date of enrolment, except with the approval of the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor and where possible a cosupervisor who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:

(a) it must be an original and significant contribution to knowledge of the subject;

(b) the greater proportion of the work described must have been completed subsequent to enrolment for the degree;

(c) it must be written in English except that a candidate in the Faculty of Arts and Social Sciences may be required by the Committee to write a thesis in an appropriate foreign language;

(d) it must reach a satisfactory standard of expression and presentation;

(e) it must consist of an account of the candidate's own research but in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.
Examination

6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that one of the following:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of school.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the higher degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further work recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners’ reports and the results of any further work, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate be permitted to resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

"School" if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Master of Clinical Education (MClinEd)

1. The degree of Master of Clinical Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(b) be actively engaged in clinical education.

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment and eight sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.
Examination

4. (1) Assessments will be based on assignments undertaken during and at the end of each course. All assignments must be passed.

(2) The degree of Master of Clinical Education will be awarded after satisfactory completion of a program of advanced study which achieves 48 units of credit and submission of a satisfactory Major Project report based on at least one semester of applied development or research in clinical education.

Fees

5. A candidate shall pay fees as may be determined from time to time by the Council.

Master of Community Health (MCH) by Research

1. The degree of Master of Community Health by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, or

(b) have been awarded an appropriate degree of Bachelor of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Community Medicine and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student, ie at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than four academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.
Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done jointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners’ reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

---

Master of Medical Science in Drug Development (MMedSc)

1. The degree of Master of Medical Science in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed the prescribed program of advanced study for the award.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee; or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee.
112 MEDICINE

[2] In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

[3] When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Definitions

The Committee is the Higher Degree Committee of the Faculty of Medicine.

A Relevant Degree is a degree in the biological sciences or cognate professional disciplines. Graduates in non-relevant disciplines may be admitted if they have had significant direct or indirect involvement with the pharmaceutical industry and the development of pharmaceutical products. In some cases, applicants may be required to undertake a course of reading in relevant subject areas before commencing the course.

Candidature

2. (1) A candidate for the degree of Master of Medical Science in Drug Development:

(a) Shall have been awarded a relevant degree of at least four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(b) Students not qualified to enrol in the Master's program but who are qualified to enrol in the Diploma, may, at the successful completion of the Diploma program and at the discretion of the Committee, convert their candidature to that of Master.

(c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least three calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the award shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) The minimum and maximum periods of part-time candidature shall be 6 and 10 academic sessions.

(5) Articulation: a candidate holding the award of Graduate Diploma in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Medical Science in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of an additional 36 units of credit. Re-entry will not be permitted until at least two sessions have elapsed since completion of the prior course. The minimum time in which a student could complete the requirements for both the Graduate Diploma and the Master's award would be nine sessions as compared with six sessions for those who proceeded directly to the Master's degree.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

---

**Master of Health Administration (MHA) by Research**

1. The degree of Master of Health Administration by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications

2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee; or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the Head of the School of Health Administration (hereinafter referred to as the head of the school) shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:
   (a) full-time attendance at the University;
   (b) part-time attendance at the University;
   (c) external — not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation or design.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate’s own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate’s part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:
   (a) the candidate be awarded the degree without further examination; or
   (b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or
   (c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or
   (d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or
   (e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.
(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees
6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Administration (MHA) by Formal Course Work

1. The degree of Master of Health Administration by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
(4) There is normally an experience requirement of three years experience in the health field. Those students who are inexperienced (ie less than three years) in the health service field are required to undertake a planned program of field experience in addition to the twelve subjects.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin. Late applications may be considered by the School's Selection Committee.
(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time or external candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time or external candidate. In special cases an extension of these times may be granted by the Committee.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Professions Education (MHPEd) by Research

1. The degree of Master of Health Professions Education by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications
2. (1) A candidate for the degree shall:
(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and
(b) have had the equivalent of at least two years full-time teaching and/or administrative experience of a kind acceptable to the Committee.
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Medical Education and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review, the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Health Services Management (MHSN)

1. The degree of Master of Health Services Management by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:

(a)(i) have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(ii) have had at least three years experience in the health services of a kind acceptable to the Committee; or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, and

(ii) either have undertaken appropriate postgraduate or professional studies at a level acceptable to the Committee or have had at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin. Late applications may be considered by the School's Selection Committee.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time or external candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time or external candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of Medicine (MMed) by Research with Supervision

1. The degree of Master of Medicine by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine.

(2) A candidate shall have had at least 3 years full-time experience in the practice of medicine and be currently so engaged.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the Head of the School of Community Medicine shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:
   (a) full-time attendance at the University;
   (b) part-time attendance at the University;
   (c) external not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the Head of the School of Community Medicine or his/her delegate and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give, in writing, two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:
   (a) the candidate be awarded the degree without further examination; or
(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the Head of the School; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re-present the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the Head of the School; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to re-present the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

---

**Master of Medicine (MMed) by Research without supervision**

1. The degree of Master of Medicine by research without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales with at least three years relevant standing or other equivalent qualifications.

Enrolment and Progression

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interests, seek at an early stage the advice of the Head of School or his/her delegate with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retain the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.
Examination
5. (1) There shall be not fewer than two examiners of the thesis, appointment by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) Before the thesis is submitted to the examiners the Head of the School of Community Medicine shall certify that it is prima facie worthy of examination.
(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

Master of Medicine (MMed) by Formal Course Work
1. The degree of Master of Medicine by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2.(1) A candidate for the degree shall have been awarded a Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
(2) A candidate shall have had at least one year's full-time experience in the practice of medicine.
In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe before permitting enrolment.

Enrolment and Progression
3.(1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be six full-time candidate and twelve academic sessions for a part-time candidate. In special cases a variation to these times may be granted by the Committee.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Psychological Medicine (MPM)
1. The degree of Master of Psychological Medicine by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2.(1) A candidate for the degree shall have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
(2) A candidate shall have had at least three years full time experience in the practice of medicine and be currently so engaged.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe before permitting enrolment.
Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of four academic sessions. The maximum period of candidature shall be eight academic sessions. In special cases a variation to these times may be granted by the Committee.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Public Health (MPH) by Research

1. The degree of Master of Public Health by Research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation or design.

Qualifications
2. (1) A candidate for the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee, or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or qualifications considered equivalent from another university or tertiary institution at a level acceptable to the Committee and

(ii) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such examination or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School of Medical Education and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled as either a full-time or part-time student.

(4) A candidate shall be required to undertake an original investigation or design on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The candidate may undertake the research as an internal student at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a co-supervisor at that institution.

(8) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate. In the case of a candidate who has been awarded the degree of Bachelor with honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.
(9) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

**Progression**

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

**Thesis**

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation or design.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

**Examination**

6. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, consider whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

**Fees**

7. A candidate shall pay such fees as may be determined from time to time by the Council.

---

**Master of Public Health (MPH) by Formal Course Work**

1. The degree of Master of Public Health by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

**Qualifications**

2. (1) A candidate for the degree shall:

(a) have been awarded the degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee), or
(b) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar on or before a date to be fixed by the Committee, that date being at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or six sessions in the case of a part-time candidate. The maximum period of candidature shall be six academic sessions from the date of enrolment for a full-time candidate and ten sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Science (MSc)

1. The degree of Master of Science by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.

(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case, before permitting a candidate to enrol, the head of the school* in which the candidate intends to enrol shall be satisfied that adequate supervision and facilities are available.

(3) An approved candidate shall be enrolled in one of the following categories:
(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external not in regular attendance at the University and using research facilities external to the University.

(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous
research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school*, or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

* "School" if used here and elsewhere in these conditions to mean any teaching unit authorized to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Master of Science (MSc) without supervision

1. The degree of Master of Science without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales with at least three years relevant standing in the case of Honours graduates and four years relevant standing in the case of Pass graduates, and at a level acceptable to the Committee.
Enrolment and Progression

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should in his or her own interest, seek at an early stage the advice of the appropriate head of school with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.
(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.
(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.
(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.
(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.
(2) Before the thesis is submitted to the examiners the head of the school* in which the candidate is enrolled shall certify that it is prima facie worthy of examination.
(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:
   (a) the candidate be awarded the degree without further examination; or
   (b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school*; or
   (c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or
   (d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or
   (e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.
(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.
(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

* 'School' is used here and elsewhere in these conditions to mean any teaching unit authorised to enrol research students and includes a department where that department is not within a school, or schools or departments where the research is being undertaken in more than one school or department; a centre given approval by the Academic Board to enrol students; and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.

Master of Sports Medicine (MSpMed)

1. The degree of Master of Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall:
   (a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered its equivalent from another university as considered acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) normally be registered as a medical practitioner in the country (or state thereof) of residence, but in exceptional cases, enrolment may be granted to applicants who are provisionally registered.
2. An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree as a part-time candidate until the lapse of five academic sessions from the date of enrolment. The maximum period of part-time candidature shall be nine academic sessions. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each course and the satisfactory completion of the Practicum based on oral and practical demonstration of clinical skills.

(2) The degree of Master of Sports Medicine will be awarded after satisfactory completion of a program of advanced study which has achieved 60 units of credit with satisfactory completion of clinical examination and the satisfactory completion of a Major Project report based on at least one semester of research or clinical studies in relation to sports medicine.

Fees

5. A candidate shall pay fees as may be determined from time to time by the Council of the University.

---

Master of Surgery (MS)

1. The degree of Master of Surgery by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) to a candidate who has made an original contribution to knowledge in some field related to surgery.

Qualifications

2. (1) A candidate for the degree shall have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

(4) A candidate enrolled under (1) above shall not submit a thesis for the degree until the lapse of five years from the date of the award of the degrees mentioned therein.

(5) A candidate enrolled under (2) above shall not submit a thesis for the degree until such period of time has elapsed since enrolment as the Committee shall decide at the time of approving enrolment.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) An approved candidate shall be enrolled in one of the following categories:

(a) full-time candidature: a candidate who is fully engaged in advanced study and research at the University or at one of its teaching hospitals;

(b) part-time candidature: a candidate who is engaged in advanced study and research away from the University or at one of its teaching hospitals;

(c) external candidature: a candidate who is engaged in advanced study and research away from the University or at one of its teaching hospitals.
(4) A candidate shall undertake, or have undertaken prior to enrolment for the degree, a broad postgraduate training in the principles and practice of surgery over a period of at least three full-time years of a kind acceptable to the Committee.

(5) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such assessment and perform such other work as may be prescribed by the Committee.

(6) The research shall be supervised by a supervisor or supervisors who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a cosupervisor at that institution.

(7) Either the original work embodied in the thesis or the broad postgraduate training in the principles and practice of surgery shall have been undertaken at the University or at one of its teaching hospitals.

(8) No candidate shall be awarded the degree until the lapse of four academic sessions from the date of enrolment in the case of a full-time candidate or six academic sessions in the case of a part-time or external candidate. In the case of a candidate who has had previous research experience the Committee may approve remission of up to two sessions for a full-time candidate and three sessions for a part-time or external candidate.

(9) A full-time candidate for the degree shall present for examination not later than eight academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) The thesis merits the award of the degree.

(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of School.

(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the Higher Degree Committee, the thesis would merit the award of the degree.

(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to reexamination.

(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.
Fees
7. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Clinical Education (GradDipClinEd)

1. The Graduate Diploma in Clinical Education may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the diploma shall:
   (a) have been awarded the degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) be actively engaged in clinical education.
   (2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed. The Graduate Diploma in Clinical Education will be awarded after satisfactory completion of a program of advanced study which achieves 40 units of credit.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination
Assessments will be based on assignments undertaken during and at the end of each subject. All assignments must be passed.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Community Paediatrics (GradDipCommPaed)

1. The Graduate Diploma in Community Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the Graduate Diploma shall:
   (a) have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree of the Faculty of Medicine (hereinafter referred to as the Committee) and
   (b) be professionally engaged in looking after the health of children.
   (2) An applicant who submits evidence of such academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree or graduate diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the graduate diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the course.
(2) A candidate for the graduate diploma shall be required to undertake such formal courses and pass such assessment as prescribed.
(3) The progress of the candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the graduate diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on satisfactory completion of written examination questions during and at the end of each course and the satisfactory completion of assignments.
(2) The Graduate Diploma in Community Paediatrics will be awarded after satisfactory completion of a program of 44 units of credit.

Fees

5. A candidate shall pay such fees as may be determined from time to time by the Council of the University.

Graduate Diploma in Drug Development (GradDipDD)

1. The Graduate Diploma in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. A candidate for the Graduate Diploma:
   (a) Shall have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
   (b) In exceptional cases, an applicant who submits evidence of such other academic and/or professional qualifications as may be approved by the Committee and who has had at least two years experience working in the pharmaceutical manufacturing industry in areas relating to scientific and technical aspects of that industry may be permitted to enrol for the Graduate Certificate, and, if the level of proficiency shown in these studies is deemed satisfactory by the Committee, that the candidate may convert his or her candidature to that of the Diploma.
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (a) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (b) A candidate for the award shall be required to undertake such formal courses and pass such assessment as prescribed.
   (c) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.
   (d) The minimum and maximum periods of part-time candidature shall be:
      (i) for the Diploma: 4 and 8 academic sessions, respectively
      (e) Students not qualified to enrol in the Master’s program but who are qualified to enrol for the Diploma, may at the successful completion of the Diploma program and at the discretion of the Committee, convert their candidature to that of Master.
   (f) Articulation: a candidate holding the award of Graduate Diploma in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Medical Science in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of additional units of course material.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Graduate Diploma in Geriatric Medicine (GradDipGeriMed)

1. The Graduate Diploma in Geriatric Medicine may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. A candidate for the Diploma shall:
   (1) Have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (2) Have had at least one year of full-time clinical experience in the practice of medicine at the time of enrolment. In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) The normal duration of the course is two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. In special circumstances a variation of these times may be approved by the Head of School.

Fees

4. A candidate shall pay fees as may be determined from time to time by the Council.

Graduate Diploma in Paediatrics (GradDipPaed)

1. The Graduate Diploma in Paediatrics may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall:
   (a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) have had at least one year’s hospital experience subsequent to graduation of a kind acceptable to the Committee.
   (2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the course (which is in January each year).
   (2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment. In special cases an extension of time may be granted by the Committee.
Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Public Health (GradDipPH)

1. A Graduate Diploma in Public Health may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications
2. (1) A candidate for the Graduate Diploma shall:
   (2) have been awarded an appropriate degree of Bachelor in a health related discipline from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) AND at least three years experience in a health or health-related field, or
   (3) In exceptional cases, an applicant who submits evidence of such other academic and professional attainment as may be approved by the Committee may be permitted to enrol for the Graduate Diploma;
   (4) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitted enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which the enrolment is to begin.
   (2) A candidate for the diploma shall be required to undertake the courses, and pass any assessment, required.
   (3) The progress of a candidate shall be reviewed by the end of each session by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment. The maximum candidature shall be seven sessions from the date of enrolment.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma in Sports Medicine (GradDipSpMed)

1. The Graduate Diploma in Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications
2. (1) A candidate for the diploma shall:
   (a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered its equivalent from another university as considered acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) normally be registered as a medical practitioner in the country (or state thereof) of residence, but in exceptional cases, enrolment may be granted to applicants who are provisionally registered.
   (2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the diploma.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the diploma shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the diploma shall be required to undertake such formal courses and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the diploma as a part-time candidate until the lapse of four academic sessions from the date of enrolment. The maximum period of part-time candidature shall be eight academic sessions. In special cases an extension of time may be granted by the Committee.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each course and the satisfactory completion of the Practicum based on oral and practical demonstration of clinical skills.
(2) The Graduate Diploma in Sports Medicine will be awarded after satisfactory completion of a program of advanced study which has achieved 48 units of credit with satisfactory completion of clinical examination.

5. Articulation: a candidate holding the Graduate Certificate in Sports Medicine from the University of New South Wales who, after a lapse at least three years, wishes to enrol for the degree of Graduate Diploma or Master of Sports Medicine may, at the discretion of the Course Supervisor in regard to further assessment related to recent developments in the field, be awarded the degree after the successful completion of the additional subjects required for the course.

Fees

6. A candidate shall pay fees as may be determined from time to time by the Council of the University.

---

Graduate Certificate in Drug Development (GradCertDD)

1. The Graduate Certificate in Drug Development may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. A candidate for the Graduate Certificate:
(a) Shall have been awarded a relevant degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
(b) In exceptional cases, an applicant who submits evidence of such other academic and/or professional qualifications as may be approved by the Committee and who has had at least two years experience working in the pharmaceutical manufacturing industry in areas relating to scientific and technical aspects of that industry may be permitted to enrol for the Graduate Certificate, and, if the level of proficiency shown in these studies is deemed satisfactory by the Committee, that the candidate may convert his or her candidature to that of the Diploma.
(c) If the Committee is not satisfied with the qualifications submitted by an applicant, the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (a) An application to enrol as a candidate for the award shall be made on the prescribed form and lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(b) A candidate for the award shall be required to undertake such formal courses and pass such assessment as prescribed.
(c) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.
(d) The minimum and maximum periods of part-time candidature shall be:
(i) for the Graduate Certificate: 2 and 4 academic sessions.
(e) Articulation: a candidate holding the award of Graduate Certificate in Drug Development from the University of New South Wales who, at a later date, wishes to enrol for the degree of Graduate Diploma in Drug Development may, at the discretion of the Committee, be awarded the degree after the successful completion of additional units of course material.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.
Graduate Certificate in Geriatric Medicine (GradCertGeriMed)

1. The Graduate Certificate in Geriatric Medicine may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Certificate shall:
   (a) Have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and
   (b) Have had at least one year of full-time clinical experience in the practice of medicine at the time of enrolment.
   In exceptional circumstances an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Certificate.
   (c) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the Certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the Certificate shall be required to undertake such formal courses and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) The normal duration of the course is one academic session from the date of enrolment in the case of a full-time candidate or two sessions in the case of a part-time candidate. In special circumstances a variation in these times may be approved by the Head of School.

Fees

4. A candidate shall pay fees as may be determined from time to time by the Council.

Graduate Certificate in Health Services Management (GradCertHSM)

1. A certificate may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the certificate shall:
   (a) have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee).
   (b) have had the equivalent of at least three years experience in the health services of a kind acceptable to the Committee.
   (2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the certificate.
   (3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the certificate shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
   (2) A candidate for the certificate shall be required to undertake such formal courses and pass such assessment as prescribed.
   (3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
   (4) No candidate shall be awarded the certificate until the lapse of one academic session from the date of enrolment. The maximum period of candidature shall be four academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.
(5) Articulation: a candidate holding the award of Graduate Certificate in Health Services Management from the University of New South Wales who, at a later date, wishes to enrol for the degree of Master of Health Administration or Master of Health Services Management may, at the discretion of the Committee, be awarded the degree after the successful completion of additional units or equivalent units of credit required of the program.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate in Public Health (GradCertDipPH)

1. A Graduate Certificate in Public Health may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Graduate Certificate shall:

(a) have been awarded an appropriate degree of Bachelor in a health related discipline from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee) AND at least three years experience in a health or health-related field, or

(b) In exceptional cases, an applicant who submits evidence of such other academic and professional attainment as may be approved by the Committee may be permitted to enrol for the Graduate Certificate;

(c) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitted enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be at least two calendar months before the commencement of the session in which the enrolment is to begin.

(2) A candidate for the certificate shall be required to undertake the courses, and pass any assessment, required.

(3) The progress of a candidate shall be reviewed by the end of each session by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of one academic session from the date of enrolment in the case of a candidate for the certificate. The maximum candidature shall be four sessions from the date of enrolment for the certificate.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate in Sports Medicine (GradDipSpMed)

1. The Graduate Certificate in Sports Medicine may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the Certificate shall

(a) have been awarded the degrees of Bachelor of Medicine and Bachelor of Surgery from the University of New South Wales or a qualification considered to be equivalent from another university as considered by the Higher Degree Committee of the Faculty of Medicine (hereinafter referred to as the Committee), and

(b) normally be registered as a medical practitioner in the country (or state thereof) of residence but in exceptional circumstances enrolment may be granted to applicants who are provisionally registered

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment and Progression

(2) A candidate for the Graduate Certificate shall be required to undertake such formal courses and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the Graduate Certificate as a part-time candidate until the lapse of two academic sessions. The maximum period for a part-time candidate shall be four academic sessions. In special cases an extension of time may be granted by the Committee.

(5) Articulation: a candidate holding the Graduate Certificate of Sports Medicine from the University of New South Wales who, after the lapse of at least three years, wishes to enrol for the degree of Graduate Diploma or Master of Sports Medicine may, at the discretion of the Course Supervisor in regard to further assessment related to recent developments in the field, be awarded the degree after the successful completion of the additional courses required for the program.

Examination

4. (1) Assessment is based on the satisfactory completion of written examinations at the end of each subject and the satisfactory completion of clinical training in sports medicine.

(2) The Graduate Certificate in Sports Medicine will be awarded after the satisfactory completion of a program of advanced study which has achieved 24 units of credit with satisfactory completion of clinical requirements.

Fees

5. A candidate shall pay fees as may be prescribed from time to time by the Council.
The scholarships listed below are available to students whose courses are listed in this book. Each Faculty Handbook contains in its scholarships section the scholarships available for study in that Faculty. Travel scholarships are shown separately. Applicants should note that the scholarships and their conditions are subject to review and the closing dates for awards may vary from year to year.

Scholarship information is regularly included in the University publication ‘Focus’ and updated on the UNSW Web site: http://www.infonet.unsw.edu.au/academic/schopriz/httoc.htm.

Students investigating study opportunities overseas should also consult “Study Abroad” which is published by UNESCO. The British Council (02 9326 2365) may be of assistance for information about study in Britain. The Australian-American Education Foundation (02 6247 9331) or the U.S. Consulate General Educational Advising Centre (02 9373 9230) can provide information about study in America. Information may also be obtained from the embassy or consulate of the country in which the study is proposed and from the proposed overseas institution. Details of overseas awards and exchanges administered by the Department of Education, Training and Youth Affairs (DETYA) can be obtained from the Awards and Exchanges Section, DETYA, PO Box 826, Woden, ACT 2606.

KEY

L Students with Australian Citizenship or Permanent Resident status can apply.
I International students can apply.

Postgraduate scholarships for research or coursework are identified with the following codes:

R Available for study by research (normally Masters by Research or PhD).
C Available for study by coursework (normally Masters by Coursework or Graduate Diploma).

The scholarship information is normally provided in the following format:

- Amount
- Duration
- Conditions

Unless otherwise stated, application forms are available from the Scholarships, Loans and Research Students Office, c/- NewSouth Q (Student Enquiries), Lower Ground Floor, Chancellery. Applications normally become available four to six weeks before the closing date.
### Undergraduate Scholarships

Following are details of scholarships available to undergraduate students at UNSW. The scholarships are listed according to the year of study for which the scholarship is available (i.e., scholarships for first year students; scholarships for second or later year students, scholarships for Honours year students) or whether they are available to undertake travel, and then also by Faculty and course (e.g., scholarships in Science and Technology or Engineering). If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

### Scholarships for students entering the first year of an undergraduate course

#### General

**The Alumni Association Scholarships (I,L)**
- Up to $1,500 pa
- 1 year renewable subject to satisfactory progress

The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of UNSW. Selection is based on academic merit, aptitude and commitment to the course proposed, evidence of good citizenship; leadership potential; and diversity of interests. Consideration may be given in cases of hardship or disadvantage. Applications close early January.

**The AUSIMM Education Endowment Fund (L)**
- $2,500-$5,000 pa
- 1 year may be renewable subject to satisfactory progress

The scholarships are open to full-time undergraduate students enrolled in a course leading to the award of a Geoscience, Mining Engineering or Minerals Engineering (Minerals Processing or Extractive Metallurgy) degree related to the interests of the mineral industry. Further information is available from The Australian Institute of Mining and Metallurgy (AUSIMM), PO Box 660, Carlton South VIC 3053, Tel (03) 9662 3166.

**The Australian Development Scholarships (ADS) (I)**
- Tuition fees, medical cover, airfare and a stipend
- Duration of the course

This award is for international students from selected countries only. Information and applications can only be obtained from Australian Diplomatic Posts or Australian Education Centres in the home country. Applications normally close at least 12 months before the year of study.

**The Australian Vietnam Veterans Trust Education Assistance Scheme (L)**
- $3,500 pa
- Duration of the course subject to satisfactory progress

The scholarship is available to the children of Vietnam veterans who are aged under 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 1240, Tel (02) 9281 7077, Email vvt@accsoft.com.au. Applications close 31 October.

Fax (02) 9385 3732
Email scholarships@unsw.edu.au

**The Ben Lexcen Sports Scholarships (I,L)**
- $2,000 pa
- 1 year with possibility of renewal

The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants are expected to be active members of an UNSW Sports Club. Each applicant will be assessed on the basis of outstanding ability in a particular sport. Consideration may also be given to an applicant's demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, and any social and economic circumstances which might hinder a successful transition to UNSW. Applications close late January.

**The Captain Reg Saunders Scholarship (L)**
- $3,000
- Up to 4 years

Applicants must be Aboriginals or Torres Strait Islanders eligible to commence a university degree in the area of psychology, nursing, applied science, social work or education. Further information and applications are available from the Aboriginal Education Program, UNSW, Tel (02) 9385 3805.

**The UNSW Co-Op Program (L)**
- $11,150 pa, and between 9 and 20 months industry training
- Duration of the course subject to satisfactory progress

The scholarships are offered by industry sponsors through the University for some of the disciplines in the Faculties of Science and Technology, Commerce and Economics, and Engineering. Scholars are selected by interview with emphasis placed on achievements in community and extra-curricular activities as well as communication and leadership skills. A minimum UAI of 93.8 is expected. The UNSW Co-Op Program application form is available from school Careers Advisers or the Co-op Program Office on (02) 9385 5116. Applications close September 30 with interviews held at the end of November and beginning of December. Further information is available at the Co-Op program web page http://co-op.web.unsw.edu.au.

**Department of Education and Training / UNSW Rural Assistance Scheme (L)**
- $2000
- 1 year

Up to 50 Scholarships are available to help students from rural NSW in the transition to university study at UNSW. Applicants must be accepted into the first year of an undergraduate degree program and may intend to commence study in any semester of a given academic year. Applicants must have attended a State Government High School in rural NSW prior to commencing study.
Selection will be based on academic merit, leadership qualities and potential to contribute to university life. Consideration will also be given to financial need, the impact of rural isolation and other relevant family circumstances. Special consideration will be given to Aboriginal applicants. Applications must include a statement of support from your High School Principal. Applications will normally close on 31 January.

The Evan Fraser “Lexcen” Scholarship (L,L)
• $2,000 pa
• 1 year
The scholarship is available to encourage students with a disability who possess outstanding sporting abilities to undertake undergraduate study at UNSW. Where there is not a suitable candidate with a disability the scholarship may be offered to a student without a disability. Applicants must be enrolled, or proposing to enrol, in a program of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport and be active members of a UNSW sports club for the duration of the scholarship. Selection will be based on sporting ability. Consideration may also be given to demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, and any circumstances which may hinder a successful transition to UNSW. Applications will normally close 31 January.

The Girls Realm Guild Scholarships (L)
• Up to $1,500 pa
• 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
The scholarships are available to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Ian Somervaille Scholarships (L,L)
• Up to $3,000
• 1 year
The scholarships are available to immediate family members (i.e. children, parents, brothers, sisters, spouses, de facto partners) of UNSW staff members. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit, aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The John Niland Scholarships (L)
• $5,000
• 1 year
The scholarship assists rural students to undertake study at UNSW. Applicants will be complete the HSC (or its counterpart matriculation requirement) in the top five percent of their state-wide cohort, having been enrolled at a country high school in Australia. Selection will be based on academic merit, potential to contribute to the wider life of the University and consideration of social and/or economic circumstances which might otherwise hinder successful transition to UNSW. Applications close 30 October.

The Kensington Colleges Scholarships
Further information concerning the award below is available from The Kensington Colleges, Tel (02) 9315 0000, Fax (02) 9315 0011, Email kens-colleges@unsw.edu.au, Web http://www.kenscoll.unsw.edu.au.

The Access Scholarship
The scholarship provides up to half the accommodation fee for a limited number of first year ACCESS scheme students experiencing long term financial hardship. Nominations are forwarded by the UNSW ACCESS office.

The Malcolm Chaikin Scholarship (L)
• $15,000 pa
• Renewable for the duration of the course subject to satisfactory progress
The scholarship is available to students entering the first year of a Bachelor of Science or Engineering in the Faculties of Life Sciences, Science and Technology, or Engineering. Selection will take into account academic merit and interview performance. Applications close 31 October.

The Matthew James Reid Scholarship (L)
• $1,000
• one year only
The Scholarships are to be awarded to encourage students from interstate to undertake study in an undergraduate degree at UNSW. The Scholarship is available to a student who completed the HSC (or its equivalent) in the previous year. Applicants must normally be resident interstate. Selection will be based on academic merit, demonstrated ability, leadership qualities, and potential to contribute to the wider life of the University and community. Consideration may also be given to circumstances which might otherwise hinder successful transition to UNSW. Applicants will be required to submit a statement detailing their reasons for undertaking the course of study. Applications close 31 January.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
• $16,135 - $23,997 pa (depending on qualifications)
• Up to 3 years
Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience. Consideration will be given to prior knowledge and experience of Aboriginal culture and health. Applications close early August.

The New College Access Scholarship
The scholarship provides up to half of the accommodation fee for a first year ACCESS scheme student selected by the College. Nominations are forwarded by the UNSW ACCESS office. For further information contact New College, Tel (02) 9381 1999, Fax (02) 9381 1919, Email admissions@newcollege.unsw.edu.au.

The NewSouth Scholarships (L)
• $6,000
• 1 year
The scholarships are available to students commencing the first year of undergraduate study at UNSW in any discipline. Applicants must have achieved a UAI of at least 99.95 in the HSC (or equivalent) in the year prior to commencing study. Selection is also based on demonstrated ability, leadership qualities and potential to contribute to the wider life of the University. Consideration is also given to any social and/or economic circumstances which might otherwise hinder successful transition to UNSW. No application form is required.
The Ngunnagan Club Scholarship (L)

- Up to $2,000
- 1 year

The scholarship is available to students enrolled at an Australian country high school who complete the HSC (or its counterpart matriculation requirement) in the top five per cent of their state cohort. Applicants should complete an official application form by 31 October in the year prior to their intended enrolment at UNSW. Final performance in the HSC (or its counterpart matriculation) examination should be reported to the Scholarships, Loans and Research Students Office once known.

Robert Riley Scholarships (L)

- $5,000

The Scholarships are awarded to promote the pursuit of justice and human rights for Aboriginal Australians through education. Applicants must be Aboriginals or Torres Strait Islanders up to the age of 25 and proposing to pursue studies in the fields of law, human rights, or juvenile justice. Further information and applications are available from the Aboriginal Education Program, UNSW, Tel (02) 9385 3805. Applications close 1 November.

The Simon Poidevin “Lexcen” Scholarship (L,L)

- $2,000 pa
- 1 year

The Scholarships are to be awarded to encourage students with an outstanding ability in a particular sport to undertake undergraduate study at UNSW. Applicants must be enrolled in a program of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport. Scholarship recipients must be active members of the appropriate UNSW sports club for the duration of the scholarship. Selection will be based on sporting ability. Consideration may also be given to demonstrated ability and leadership qualities, potential to contribute to the wider life of the University, and circumstances which might otherwise hinder a successful transition to UNSW. Applications close 31 January.

The Smith Family Tertiary Scholarship Scheme (L,L)

- Up to $2,000 for University fees, books, laboratory/field or practical fees
- 1 year

The scheme offers scholarships to first year undergraduate students from disadvantaged families who demonstrate high academic ability and the personal commitment to succeed in tertiary studies. Applicants must be economically disadvantaged, as assessed by The Smith Family, and have demonstrated consistently high academic results. Applications are available from The Education Support Co-ordinator, The Smith Family, Locked Bag 1000, Camperdown NSW 2050, Tel (02) 9550 4422, Fax (02) 9516 4063. Applications close late July.

The St George Students’ Association Lexcen Scholarship (L)

- $2,000
- 1 year only

Two Scholarships will be awarded annually to high achieving sports persons undertaking, or proposing to undertake, study at UNSW. To be eligible, applicants must be enrolled in, or proposing to enrol in, a course of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport. It is desirable, but not essential, that an applicant’s family home is located in the St George/Sutherland Shire region. Each applicant will be assessed on the basis of outstanding ability in a particular sport. Consideration may also be given to an applicant’s demonstrated ability, leadership quality, potential to contribute to the wider life of the University, any social and economic circumstances which may affect the applicant and academic merit. Application must be made using the Ben Lexcen Scholarship application form. An interview may be required. Applications will normally close on 31 January.

The Vice-Chancellor’s Equity Scholarships (L)

- $1,500 pa
- 1 year

In 1999, a small number of scholarships were awarded for financially disadvantaged students commencing full-time undergraduate study. Consideration is normally given to academic merit and financial need. The conditions may change each year.

The W.S. and L.B. Robinson Scholarship (L)

- Up to $6,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress

Applicants must have completed their schooling in Broken Hill or have parents who reside in Broken Hill. Applicants should be undertaking a course related to the mining industry, for example courses in mining engineering, geology, electrical and mechanical engineering, metallurgical process engineering, chemical engineering or science. A letter of application should be sent to Pasminco Mining, PO Box 460, Broken Hill NSW 2880. Applications close 30 September.

UNSW Foundation Year Scholarships (L,L)

- $5,000 payable towards tuition fees
- one year

The Scholarships are available to outstanding students with the highest GPA in each of the UNSW Foundation Year streams of Commerce/Arts, Design & Communication, and Physical/Life Science. Applicants must have graduated from the UNSW Foundation Year cohort directly prior to entry into a UNSW undergraduate degree. Selection is based on academic merit and enrolment in a UNSW undergraduate program. There is no application form. Selection is based on UNSW Foundation Year results.

The UNSW Golden Jubilee Scholarships (L)

- Program fees for the minimum course duration less any advanced standing, subject to satisfactory progress
- No additional allowances are payable

The Scholarships have been established to encourage outstanding Diplomates from Singapore and Malaysia to complete an undergraduate degree at UNSW. To be eligible, applicants must be proposing to undertake an undergraduate qualification at UNSW in one of the Faculties of Arts and Social Sciences, Built Environment, Commerce and Economics, Engineering, Life Sciences, Science and Technology, or the College of Fine Arts. Successful applicants will be granted advanced standing on the basis of their studies in Singapore and Malaysia. It is expected that the successful applicants will be the most outstanding or the second highest ranked final year diplomat graduating from Engineering, Business, Biotechnology, Mass Communications, Information Technology, Science, Architecture and Built Environment (including Industrial Design). Applicants must be graduates of the following institutions and have achieved the grades or standards indicated:

- Singapore - Nanyang Polytechnic: A or Distinction Average over the duration of the course
- Singapore - Ngee Ann Polytechnic: A or Distinction Average over the duration of the course or be Merit Award Recipients
- Singapore - Temasek Polytechnic: A or Distinction Average over the duration of the course
Malaysia—students must have a GPA of 3.2 or above (or the equivalent)
Kolej Damansara Utama (KDU)
Institution of Technology Mara (ITM)
INTI College
PRIME College
Tunku Abdul Rahman College
Sepang Institute of Technology (SIT)

Applicants must submit a letter of recommendation from the Principal of the Polytechnic, or a senior member of staff nominated by the Principal, stating that they are the most outstanding final year student and that the requirements for the award of the Polytechnic medal or equivalent have been met. Applicants must be Citizens or Permanent Residents of Singapore or Malaysia. Selection will be based on academic merit. Applications will normally close on 30 November for study commencing in Session One of the following year and 30 April for study commencing in Session Two of the same year.

Faculty Scholarships

Faculty of Medicine

The Arthur and Rita Kwan Scholarship (L)
• Up to $1,000
• 1 year
The scholarship is available to students who completed the HSC (or equivalent) at a high school in NSW in the year prior to award. Applicants must be eligible to undertake the MBBS degree in the Faculty of Medicine. Selection will be based on financial need and consideration of social/economic circumstances which might otherwise hinder a successful transition to UNSW. Applications close 31 January.

The Pang Shuk Keung and Pang Ng Yee Tak Scholarship in Medicine (L,L)
• Up to $1,500
• 1 year
The scholarship is available to a full-time student entering the first year of an undergraduate degree program in the Faculty of Medicine at UNSW, who has completed the HSC (or equivalent) in the year prior to award. Selection will be based on academic merit and a statement outlining the reasons for undertaking the proposed course of study. Emphasis will be placed on financial need and social/economic circumstances which might otherwise hinder successful transition to UNSW. Applications close 31 March.

Rural Australia Medical Undergraduate Scholarships (RAMUS) (L)
The aim of RAMUS is to increase the number of students with a rural background taking up a career in Medicine. Scholarships are worth $10,000 annually and are available to rural students attending Australian medical schools. Rural medical students at each year of study are encouraged to apply. For further information, contact the National Rural Health Alliance on 1800 460 440 or visit the website at: www.ruralhealth.org.au.

Scholarships for students in their second or later year of study

General

The AITD-MMI Insurance—Mark Pompep Scholarship (L)
• $1,000
The Australian Institute of Training and Development and MMI Insurance offer an annual scholarship to a part-time student currently working in the field of Training and Development. Applicants should be completing their first accredited qualification to assist their development in this field. Applications are available from AITD NSW Division Administrator, PO Box 5452, West Chatswood NSW 2057. Tel (02) 9419 4966, Fax (02) 9419 4142, Email nswdivn@aitd.com.au. Applications close in May.

The Alumni Association Scholarships (L,L)
• Up to $1,500 pa
• 1 year renewable subject to satisfactory progress
The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of UNSW. Applications close early January.

The Australian Vietnam Veterans Trust Education Assistance Scheme (L)
• $3,500 pa
• Duration of the course subject to satisfactory progress
The scholarship is available to the children of Vietnam veterans who are aged under 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 1240, Tel (02) 8281 7077, Email vvta@acsoft.com.au. Applications close 31 October.

The Ben Lexcen Sports Scholarships (L,L)
• $2,000 pa
• 1 year with possibility of renewal
The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants are expected to be active members of a UNSW Sports Club. Each applicant will be assessed on the basis of outstanding ability in a particular sport. Consideration may also be given to an applicant’s demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, and any social and economic circumstances which might hinder a successful transition to UNSW. Applications close late January.

The Bill Pardy University Challenge Scholarship (L,L)
• $1,000
• 1 year only
The Scholarship is established to recognise Bill Pardy’s achievement in winning the 1998 University Challenge on the television program Sale of the Century, and to encourage students to participate in and contribute to the cultural life of the University. To be eligible, applicants must be enrolled in the second or later year of an undergraduate degree at UNSW. Each applicant will be assessed.
on the basis of a personal statement detailing their previous and proposed contribution to the cultural life of the University. Consideration may also be given to academic merit. Applications will normally close on 31 March.

The Evan Fraser “Lexcen” Scholarship (I,L)
- $2,000 pa
- 1 year
The scholarship is available to encourage students with a disability who possess outstanding sporting abilities to undertake undergraduate study at UNSW. Where there is not a suitable candidate with a disability the scholarship may be offered to a student without a disability. Applicants must be enrolled, or proposing to, enrol in a program of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport and be active members of a UNSW sports club for the duration of the scholarship. Selection will be based on sporting ability. Consideration may also be given to demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, and any circumstances which may hinder a successful transition to UNSW. Applications will normally close 31 January.

The Girls Realm Guild Scholarship (L)
- Up to $1,500 pa
- 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
The scholarships are available only to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Dried Fruits Research and Development Council (DFRDC) Studentships and Student Awards (I,L)
- Up to $3,000 for Studentships, up to $1,000 for Student Awards
The Studentships assist students to undertake research projects in the final year of a Bachelor's degree (applications close April 15), or to undertake a research project during the summer vacation (applications close October 15). The Student Awards are provided for excellence in student research projects related to the dried fruit industry. Further information and applications are available from the Executive Officer, Dried Fruits Research and Development Council, Box 1142, Mildura VIC 3502, Tel (03) 5022 1515, Fax (03) 5023 3321, Email dfrdc@mildura.net.au.

The Esso Australia Ltd Geosciences Scholarship (I,L)
- Up to $3,000
- 1 year
The scholarship is for a full-time student seeking to undertake study in the final year (Year 4) of a Bachelor of Science (AppGeo) or an equivalent Honours year, majoring in geology or geophysics. The successful applicant is expected to have an interest in petroleum related studies ie sedimentology, biostratigraphy, seismic/magnetic/ gravity geophysical studies, basin studies, palynology or palaeontology. Selection is based on academic merit, the benefit the student will gain by being awarded the scholarship and can include consideration of financial need. Applications close 30 November.

The Ian Somerville Scholarships (I,L)
- Up to $3,000
- 1 year
The scholarships are available to immediate family members (ie. children, parents, brothers, sisters, spouses, de facto partners) of UNSW staff members. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit, aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The Julian Small Foundation Annual Research Grant (I,L)
- Up to $5,000
Applications are open to postgraduate and undergraduate students undertaking research and involved in the study of law, or industrial relations. Selection will be based on a research proposal which outlines how the research will advance thinking and practice in the area of employment law and industrial relations in Australia. Applications close mid-August.

The Kensington Colleges Scholarships
Further information concerning the awards below may be available from The Kensington Colleges, Tel (02) 9315 0000, Fax (02) 9315 0011, Email kenco-colleges@unsw.edu.au. Web http:\www.kensocoll.unsw.edu.au.

The Fell Scholarship
The scholarship provides $650 credit for accommodation costs and is awarded to a returning resident in each College. Applicants will be assessed on their academic performance in the second or later year of their course.

The Mathews Scholarship
The scholarship provides $1,500 credit towards accommodation costs and is awarded to a resident at the commencement of the second year of an undergraduate degree. Candidates will be assessed on their academic performance in the first year of their course.

Resident Assistant Scheme
The program provides subsidised accommodation, valued at up to $1,000, for 22 academically promising residents, and an apprenticeship in the collegiate Residential Academic Staff role. All residents who have successfully completed at least one year of university study are eligible to apply.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
- $16,135 - $23,997 pa (depending on qualifications)
- Up to 3 years
Applications must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience. Consideration will be given to prior knowledge and experience of Aboriginal culture and health. Applications close late July.

The Nicholas Catchlove Scholarship in Flying (L)
- $10,000
- 1 year
The scholarship will be awarded to provide a final year student with the opportunity to undertake further flying training to prepare for a career in the aviation industry. Applicants must be proposing to undertake the final year of an appropriate course and hold a Commercial Pilot's Licence. Selection will be based on academic merit, reasons for undertaking the course, financial need, commitment to flying and to the course, demonstrated ability, leadership qualities and interview performance. Applications close in October.
The NSW Ministry for the Arts Scholarships (L, R C)

- $5,000 - $25,000 (depending on the award)

The NSW Government offers a number of scholarships and awards to writers, artists and scholars living in NSW. Further information is available from the New South Wales Ministry for the Arts, GPO Box 5341, Sydney NSW 2000, Tel (02) 9228 3533, Fax (02) 9228 4722.

The RGC Scholarship in Economic Geology (L)

- $5,000
- 1 year

The scholarship is available to a student entering Year 4 of the Applied Geology course or an Honours year in geology in the Science course and who is proposing to undertake a field project relevant to economic geology. Letters of application and requests for information should be directed to RGC, Gold Fields House, 1 Alfred St, Sydney NSW 2000. Applications close 31 January.

The Rural Allied Health Placement Grants (L)

- Up to $500

Grants are available to students undertaking rural placements, who are in the final two years of an undergraduate course in dietetics, diagnostic radiography, occupational therapy, pharmacy, physiotherapy, podiatry, social work, speech pathology, psychology (honours) or any year of a postgraduate course in dietetics or psychology (Masters). Applications are available from the NSW Health Rural Health Support Unit. Tel (02) 6640 2302, Fax (02) 6640 2499, Email rhsu@nor.com.au, Web www.nor.com.au/community/rhsu. Session One applications close 15 May. Session Two applications close in August.

The Rural Allied Health Scholarships (L)

- $5,750

Scholarships are available to students who are in the final two years of a four year undergraduate course in Aboriginal health, dietetics, diagnostic radiography, occupational therapy, pharmacy, physiotherapy, podiatry, social work, speech pathology, or the final year of psychology (honours) degree or any year of a Masters qualification in dietetics or psychology. Applications are available from the NSW Health Rural Health Support Unit. Tel (02) 6640 2302, Fax (02) 6640 2499, Email rhsu@nor.com.au, Web www.nor.com.au/community/rhsu. Applications close late September.

The Sam Cracknell Memorial Scholarships (L, LL)

- Up to $1,500
- 1 year

Applications should have already completed at least 2 years of a degree or diploma course and be enrolled in a full-time course during the year of application. Selection is based on academic merit, participation in sport both directly and administratively and financial need. Applications close 31 March.

The Simon Poidevin “Lexcen” Scholarship (L, LL)

- $2,000 pa
- 1 year

The Scholarships are to be awarded to encourage students with an outstanding ability in a particular sport to undertake undergraduate study at UNSW. Applicants must be enrolled in a program of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport. Scholarship recipients must be active members of the appropriate UNSW sports club for the duration of the scholarship. Selection will be based on sporting ability. Consideration may also be given to demonstrated ability and leadership qualities, potential to contribute to the wider life of the University, and circumstances which might otherwise hinder a successful transition to UNSW. Applications close 31 January.

The St George Students’ Association Lexcen Scholarship (L)

- $2,000
- 1 year only

Two Scholarships will be awarded annually to high achieving sports persons undertaking, or proposing to undertake, study at UNSW. To be eligible, applicants must be enrolled in, or proposing to enrol in, a course of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport and be active members of a UNSW sports club for the duration of the scholarship. It is desirable, but not essential, that an applicant’s family home is located in the St George/Sutherland Shire region. Each applicant will be assessed on the basis of outstanding ability in a particular sport. Consideration may also be given to an applicant’s demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, any social and economic circumstances which may affect the applicant and academic merit. Application must be made using the Ben Lexcen Scholarship application form. An interview may be required. Applications will normally close on 31 January.

The Spruson and Ferguson (Patent Attorneys) Scholarship for Innovation (L)

- At least $1,000
- 1 year

The scholarship is available to a student who is undertaking the final year of an undergraduate course in any school of the Faculty of Science and Technology or the Faculty of Engineering. Selection will be based on academic merit and the innovative nature of the proposed final year project. Applicants are required to submit an application and a 200 word outline of their proposed research topic. Applications close 7 March.

The Telstra Education Fellowships (L)

- $7,500
- 1 year

Applicants must be entering the final year of study in the disciplines of computer, electrical or electronic engineering, computer science or human factors. Students may also have the opportunity to undertake up to 12 weeks non-compulsory vacation employment. Further information is available from the Fellowship Applications Officer, Telstra Research Laboratories, PO Box 249, Rosebank MDC, Clayton VIC 3169. Email c.zaman@tri.telstra.com.au. Applications normally close at the end of July.

The Telstra Network Technology Group and Multimedia (NTG&M) EEO Scholarships (L)

- $10,000, plus summer vacation work and guaranteed employment
- 1 year

The scholarships are open to undergraduate students enrolled in the second last year in electrical/electronic engineering, computers systems engineering, communications or other degree related to telecommunications. Applicants must belong to one of the following EEO groups: women, people from a non-English-speaking background, Aborigines or Islanders, people with a disability. The successful candidates are expected to work for Telstra NTG&M in the summer break and for at least two years after the completion of study. Enquiries to Karen Stewart on (03) 9634 3448, Email kstewart@vcmoin.telstra.com.au. Applications close late June.

The W.S. and L.B. Scholarship (L)

- Up to $6,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress

Applicants must have completed their schooling in Broken Hill or have parents who reside in Broken Hill. Applicants should be
undertaking a course related to the mining industry, for example courses in mining engineering, geology, electrical and mechanical engineering, metallurgical process engineering, chemical engineering or science. A letter of application should be sent to Pasminco Mining, PO Box 460, Broken Hill NSW 2880. Applications close 30 September.

Faculty Scholarships

Faculty of Medicine

The Dr Senthil Vasan Rural Medical Memorial Scholarship (L)

- $1000
- 1 year

An applicant must be entering the fourth year of the MBBS course at UNSW. It is desirable, but not essential, that the student’s family home is located in a rural area. The scholarship recipient will be required to spend two weeks of the year in Casino experiencing the activities of a rural medical practice and hospital. Each applicant will be assessed on the basis of academic merit. Applicants will be required to submit a brief resume and a statement detailing their interest in rural general practice. Applications should be made on the standard of UNSW scholarship application form and will normally close on 31 January.

Rural Australia Medical Undergraduate Scholarships (RAMUS)

The aim of RAMUS is to increase the number of students with a rural background taking up a career in Medicine. Scholarships are worth $10,000 annually and are available to rural students attending Australian medical schools. Rural medical students at each year of study are encouraged to apply. For further information, contact the National Rural Health Alliance on 1800 460 440 or visit the web site at: www.ruralhealth.org.au.

The AMSA-Diners Club Rural Elective Bursary

Ten medical students throughout Australia taking a rural elective term in 5th year will be awarded up to $2000 each through this Bursary. The Bursary recognises the needs of Australian rural health by awarding grants to further the experience of medical students in rural and remote locations. A point system is used to rank the applicants. The more remote the placement and the longer the elective stay, the more points are awarded. For further information contact Kaveh Monshat on Tel: 9314 7030. Applicants can be found in the May edition of AMSA Antics.

Bush Bursaries

Approximately ten Bush Bursaries and two CWA Scholarships are offered to select medical students in NSW medical schools. The rural shire of NSW and the Rural Doctors Network has founded the Bursaries. The Riverina Country Women’s Association also supported a scholarship during 2000. It is expected there will be a similar number of Bush Bursaries and CWA Scholarships available to selected 3rd year students in 2000.

The Bursaries each worth $2,500 are offered in association with the Rural Health Training Units and the Rural Doctors Resource Network. In return for this financial assistance, the students are expected to spend three weeks on a rural community placement in country NSW during their university holidays. The placement programs arranged for the students to reflect the enjoyable aspects of rural lifestyle as well as the multidisciplinary nature of rural health practice. The sponsoring rural shires and the Rural Health Training Units at Tamworth, Dubbo, Wagga Wagga and Orange coordinates the placements. Applications for the Bush Bursary are available from the Rural Doctors Network. Tel: (02) 4929 1811 or from the RDN website: www.nswrdn.com.au.

Department of Health, Rural Medicine Elective Bursary

Two $1000 scholarships will be offered each year to Med IV students undertaking a full MFAC6001 elective term in a rural general practice in NSW. Applications should include the name and address of the general practitioner you have arranged your elective with, plus a short paragraph indicating why you chose to spend your elective in a rural general practice. Applications should be submitted by November 23 each year to Gallia Therin, School of Community Medicine, University of NSW, Sydney 2052. Tel (02) 9385 2520; email: g.therin@unsw.edu.au.

Rural Elective scholarship

Two $1,000 scholarships are available to Med VI students undertaking MFAC 6001 Elective Term. The scholarships are for students undertaking their elective in rural general practice in NSW. Applications should include the name/s and address of the general practitioner/s you have arranged your elective with, plus a short paragraph indicating why you chose to spend your elective in rural general practice. Applications should be sent to Gallia Therin, School of Community Medicine, University of NSW, SYDNEY NSW 2052. Tel: (02) 9385 2520; email: g.therin@unsw.edu.au.

The Rural Resident Medical Officer Cadetship

This scholarship is available to medical students in their final two years of study. The scholarship offers 4th year medical students up to $12,000 per year. In return, cadets undertake two years of rural practice in a rural base hospital in their Intern and RMO 1-year or their RMO1 and RMO 2 years. Such experience will provide students with the opportunity to access broad-based clinical experiences, develop closer relationships with senior colleagues and undertake vocational training through the Rural Health Training Unit. The rural hospitals available to undertake the two years service may included Wagga Wagga, Tamworth, Dubbo, Albury, Griffith, Goulburn, Bathurst and Orange. For further information on the Rural Resident Medical Officer Cadetship, contact Julie Kay at the Rural Doctors Network on (02) 4929 1811 or email on jkay@nswrndn.aust.com.

The Rural Undergraduate Placement Program

This program is based in the northern Territory. It is designed to provide educational experience for students interested in Rural and Aboriginal Health. Those accepted are eligible to have their accommodation, local flights and up to 80% of their interstate flights paid for. This program is designed for 6th Year Medical students doing electives. For further information contact the Rural Health Unit on 9385 3590.
Honours Year Scholarship

General

The Alumni Association Scholarships (I, L)
- Up to $1,500 pa
- 1 year renewable subject to satisfactory progress

The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of UNSW. Applications close early January.

Applications should be in the form of a letter which includes a curriculum-vitae and thesis plan and must be supported by a letter from the Head of School/Department. Applications should be sent to the Honorary Secretary, Apex Foundation Studentships, PO Box 311, Mt Evelyn VIC 3796. Applications close 31 May.

The Australian and New Zealand Council for the Care of Animals in Research and Teaching (ANZCCART) Student Award (I, L)
- $1,000 for attendance at the annual conference

Applicants can be Honours students from any discipline. The award provides assistance for a student to attend the annual conference. Applications are available from ANZCCART, PO Box 19 Glen Osmond SA 5064, Tel (08) 8303 7325. Applications close in July.

The Australian Vietnam Veterans Trust Education Assistance Scheme (I, L)
- $3,500 pa
- Duration of the course

The scholarship is available to the children of Vietnam veterans who are aged under 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants must be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 1240, Tel (02) 9281 7077, Email vvt@acsoft.com.au. Applications close 31 October.

The Ben Lexcen Sports Scholarships (I, L)
- $2,000 pa
- 1 year with possibility of renewal

The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants are expected to be active members of a UNSW Sports Club. Each applicant will be assessed on the basis of outstanding ability in a particular sport. Consideration may also be given to an applicant's demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, and any social and economic circumstances which might hinder a successful transition to UNSW. Applications close late January.

The CRC Reef Research Centre Support (I, L)
- $1,000

Applicants must be undertaking a full-time Honours year project that could contribute to planning and managing the Great Barrier Reef Marine Park and to the Reef's ecologically sustainable development. Applications and further information may be obtained from The Administrative Assistant, CRC Reef Research Centre, James Cook University, Townsville QLD 4811, Email crcreef@jcu.edu.au. Applications close mid December.

The Esso Australia Ltd Geosciences Scholarship (I, L)
- Up to $3,000
- 1 year

The scholarship is for a full-time student seeking to undertake study in the final year (Stage 4) of a Bachelor of Science degree in Applied Geology or an equivalent Honours year, majoring in geology or geophysics. The successful applicant is expected to have an interest in petroleum related studies ie sedimentology, biostratigraphy, seismic/magnetic/gravity geophysical studies, basin studies, palynology or palaeontology. Selection is based on academic merit, the benefit the student will gain by being awarded the scholarship and can include consideration of financial need. Applications close 30 November.

The Evan Fraser "Lexcen" Scholarship (I, L)
- $2,000 pa
- 1 year

The scholarship is available to encourage students with a disability who possess outstanding sporting abilities to undertake undergraduate study at UNSW. Where there is not a suitable candidate with a disability the scholarship may be offered to a student without a disability. Applicants must be enrolled, or proposing to, enrol in a program of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport and be active members of a UNSW sports club for the duration of the scholarship. Selection will be based on sporting ability. Consideration may also be given to demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, and any circumstances which may hinder a successful transition to UNSW. Applications will normally close 31 January.

The Girls Realm Guild Scholarships (L)
- Up to $1,500 pa
- 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need

The scholarships are available only to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Grains Research and Development Corporation (GRDC) Undergraduate Honours Scholarship (I, L)
- $6,000 (ie $5,000 to the student and $1,000 to the host School/Department)
- 1 year

Applicants must be undertaking a full-time Honours program. Study in an area of significance to the grains industry will be viewed favourably. A letter of application, including a curriculum-vitae, academic record, letter of support from the Head of School/Department and two referees' supporting statements, should be sent to GRDC Undergraduate Honours Scholarship, PO Box E6, Queen Victoria Terrace, Canberra ACT 2600, Tel (02) 6272 5528. Applications close early November.
The Ian Somervaille Scholarships (L,L)
• Up to $3,000
• 1 year
The scholarships are available to immediate family members (i.e. children, parents, brothers or sisters) of UNSW staff members or their married or de facto partners. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit, aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
• $17,071 - $25,389 pa (depending on qualifications)
• Up to 3 years
Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience. Consideration will be given to prior knowledge and experience of Aboriginal culture and health. Applications close late July.

Applications close late September.

The Sam Cracknell Memorial Scholarship (L,L)
• Up to $1,500
• 1 year
Applicants should be full-time students who have already completed at least 2 years of a degree or diploma course. Selection is based on academic merit, participation in sport both directly and administratively, and financial need. Applications close 31 March.

The Simon Poidevin “Lexcen” Scholarship (L,L)
• $2,000 pa
• 1 year
The Scholarships are to be awarded to encourage students with an outstanding ability in a particular sport to undertake undergraduate study at UNSW. Applicants must be enrolled in a program of at least two years duration at UNSW. Applicants should possess an outstanding ability in a particular sport. Scholarship recipients must be active members of the appropriate UNSW sports club for the duration of the scholarship. Selection will be based on sporting ability. Consideration may also be given to demonstrated ability and leadership qualities, potential to contribute to the wider life of the University, and circumstances which might otherwise hinder a successful transition to UNSW. Applications close 31 January.

The St George Students’ Association Lexcen Scholarship (L)
• $2,000
• 1 year only
Two Scholarships will be awarded annually to high achieving sports persons undertaking, or proposing to undertake, study at UNSW. To be eligible, applicants must be enrolled in, or proposing to enrol in, a course of at least two years duration at UNSW. Applicants should possess outstanding ability in a particular sport. It is desirable, but not essential, that an applicant’s family home is located in the St George/Sutherland Shire region. Each applicant will be assessed on the basis of outstanding ability in a particular sport. Consideration may also be given to an applicant’s demonstrated ability, leadership qualities, potential to contribute to the wider life of the University, any social and economic circumstances which may affect the applicant and academic merit. Application must be made using the Ben Lexcen Scholarship application form. An interview may be required. Applications will normally close on 31 January.
The Ukrainian Studies Foundation of Australia Endowed Scholarship (L,L)
- $1,000 in 2000, $1,500 from 2001
- 1 year only

The Scholarship is available to students undertaking, or proposing to undertake, postgraduate or honours level studies at UNSW on a Ukrainian topic/theme, or comparative Ukrainian/Australian topic/theme. Selection will be based on academic merit and the reasons for undertaking the current and/or proposed studies. Applications will normally close on January 31.

The University Honours Year Scholarships (L,L)
- $1,000
- 1 year

A number of scholarships will be awarded on the basis of academic merit for students entering an 'add-on' honours year, ie the honours year in a degree course which is normally a pass degree but which has the option of a further year of study at Honours level. Applications close 30 November.

The W.S. and L.B. Robinson Scholarship (L)
- Up to $6,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress

Applicants must have completed their schooling in Broken Hill or have parents who reside in Broken Hill. Applicants should be undertaking a course related to the mining industry, for example courses in mining engineering, geology, electrical and mechanical engineering, metallurgical process engineering, chemical engineering or science. A letter of application should be sent to Pasminco Mining, PO Box 460, Broken Hill NSW 2880. Applications close 30 September.

Faculty Scholarships

Faculty of Medicine

The Harvey Carey Memorial Trust Scholarship (L,L)
- Up to $2,200
- 1 year

Applicants must be enrolled in the BSc(Med) Honours course and undertaking research in the area of reproductive physiology. Further information may be obtained from the Faculty Administration Office, Tel (02) 9385 2457.

The Hazel Morris Scholarship in Medicine (L)
- Up to $1,000
- 1 year

Applicants must be undergraduate students intending to undertake the BSc(Med) Honours year in the Faculty of Medicine at UNSW. Selection will be based on academic merit and consideration of financial need. Applications close 30 November.

Community Medicine

The Raymond O. Sainty Honours Year Scholarship in Community Medicine
- $2,000
- 1 year

The scholarship is available to encourage students to undertake research into the impact of vitamins and nutrition on aging and improving the quality of life of the aged. Applicants must be undertaking a full-time Honours year in the School of Community Medicine. Selection will be based on academic merit, extracurricular activities and contribution to wider life of the University. Applicants will also be considered on the basis of a statement outlining their reasons for undertaking the research. Applications will normally close on 31 March.

Paediatrics

The Vida Rees Scholarship in Paediatrics (L,R)
- $1,000
- 1 year

Two Scholarships are available to students to undertake research in paediatrics in the Faculty of Medicine. Applicants must be undertaking an honours project or postgraduate research in paediatrics. Selection will be based on academic merit, demonstrated ability and leadership qualities, potential to contribute to the wider life of the University and consideration of financial need. Applications normally close on 31 October.

Travel Scholarships

General

The Arthur Andersen Study Abroad Scholarship (L)
- Up to $2,500

The scholarship provides financial assistance to undergraduate students to undertake a period of study/research in the Arthur Andersen offices in Singapore. Applicants must be full-time students undertaking study in law, commerce, or economics. Applicants must normally be intending to undertake the final year of study and to complete the travel prior to completion of the final year. Two scholarships are available to graduates with proven academic merit and leadership potential, to pursue a postgraduate course at a British University. One scholarship is for a one-year MSc course in Marine Engineering/Naval Architecture, and the other is for a one-year MSc course in Environmental Sciences. Applicants must hold, or expect to complete before October, an Honours 1 or 2/1 degree. Application forms are available from the British Council, PO Box 89, Edgecliff NSW 2027, Tel (02) 9326 2022, Fax (02) 9327 4868. Applications close late October.

The Meat Research Corporation (MRC) Studentships and Junior Research Fellowships (L,R,C)
• $15,888 pa for study in a Masters or Diploma, $20,000 for a PhD in Australia or US$17,500 for study overseas, plus airfares, insurance and allowances
• 2 years for Studentships (Masters or Diploma), 3 years for Junior Research Fellowships (PhD)
Applicants should be proposing to undertake research in disciplines relevant to the Australian meat and livestock industry. Applications normally close late September.

The Menzies Scholarships (L,R,C)
The Menzies Scholarships are intended to provide funds for Australian Citizens (aged 21 to 45) who wish to travel to Britain to undertake a course of research and to write a paper on a subject of concern and importance to the relationship between the Australian and British communities. Tertiary qualifications are preferred but the awards are not restricted to graduates or students. Information and applications are available from the Australia-Britain Society, GPO Box 551, Sydney NSW 2000, Tel (02) 9326 2022. Applications normally close October.

Nanyang Technological University Singapore Research Scholarships (L,R)
• Tuition fees plus S$1,400-S$1,500 per month allowance
• 2 years for a Masters, 3 years for a PhD degree
Research scholarships are available to graduates with good Honours degrees to undertake postgraduate study. Information and application forms are available from The Registrar, Nanyang Technological University. Email gleong@ntu.edu.sg, Fax +65 7911604.

The NSW Ministry for the Arts Scholarships (L)
• $5,000 - $25,000 (depending on the award)
The NSW Government offers a number of scholarships and awards to writers, artists and scholars living in NSW. Further information is available from The New South Wales Ministry for the Arts, GPO Box 5341, Sydney NSW 2000, Tel (02) 9228 3533, Fax (02) 9228 4722.

The Oxford Nuffield Medical Fellowship (L,R)
• Between £27,525 and £31,945 pa (subject to tax), plus travel expenses
• 2 years with a possible one year extension
The awards are available for research in a clinical medicine or medical science department of the University of Oxford. The appointee is required to return to Australia for at least 3 years to perform work similar to that carried out in the United Kingdom during the tenure of the Nuffield fellowship. Further information is available from Australian Academy of Science, GPO Box 789, Canberra City ACT 2601, Tel (02) 6247 5777, Fax (02) 6257 4262. Applications close mid-March.

Overseas Research Students Awards Scheme (United Kingdom) (L,R,C)
Difference in tuition fees for a ‘home’ and an ‘overseas’ student
The ORS Scheme provides partial remission of tuition fees to overseas students of outstanding merit and research potential. The awards are open to graduates who will be commencing full-time research studies at a participating institution in the United Kingdom, and who will be liable to pay tuition fees at the overseas student rate. Information and applications must be obtained directly from the Registrar or Secretary of the institution students are applying to in the United Kingdom. Applications normally close in April in the year of tenure.

Queen’s Trust Grants (L)
• Up to $15,000
The Queen’s Trust provides grants to Australian Citizens aged 18-28 years, for the pursuit of excellence in their chosen fields. Support is provided for projects studying the advancement of Australian youth, development of community leadership and/or other skills which will be of benefit to Australia. Information and applications may be obtained from the Queen’s Trust, Tel 1800 033 525. Applications close in late April.

The Rhodes Scholarship (L,R,C)
• Tuition fees, assistance with travel expenses, up to $17,500 allowance
• 2 years, with a possible one year extension
The scholarship is tenable for postgraduate study at Oxford University. Applicants must be aged between 19 and 25 and have an honours degree or equivalent. Selection for the scholarship will be based on academic and personal achievements and community spirit. Further information is available on the Rhodes home page http://www.usyd.edu.au/su/rhodes. Applications close 1 September.

The Robert Gordon Menzies Scholarship to Harvard (L,R,C)
• Up to $25,000 towards tuition fees, living expenses or travel costs (students who enrol in the Harvard Business School may be eligible for an additional $12,000)
• 1 year
The scholarships are tenable at one of the Harvard University graduate schools. Applicants must be an Honours graduate of an Australian university who intend to return to Australia after studies at Harvard or to represent Australia overseas. Applicants must be eligible for, and have applied for admission to a degree program in a graduate school of Harvard University. The scholarships are awarded on the basis of academic excellence and personal qualities such as leadership and public duty. Applications and additional information may be obtained from the Administrative Officer, Council and Board Secretariat, ANU, Canberra ACT 0200. Fax (02) 6279 8524, Email cabs.admin@anu.edu.au, Web http://www.anu.edu.au/ cabs/scholarships. Applications close at the end of December.
Rotary Foundation Ambassadorial Scholarships (L,L)

The Rotary Foundation offers scholarships to study or train in another country where Rotary clubs are located. Applicants must have completed at least two years of a university or college course, or have completed high school and have been employed for at least two years. Applicants must also be Citizens of a country in which there is a Rotary club. Information regarding scholarship availability, closing dates and applications should be obtained from the applicant's local Rotary club.

The Russian Scholarships (L,R,C)

Payment an allowance and medical cover

Scholarships are available to Australian citizens to undertake undergraduate or postgraduate study in journalism, law, economics, international relations or medicine in Russia. Applications normally close in May.

The Sir Charles Mackerras / Australia-Britain Society Music Scholarship (L)

£8,000

The scholarship is open to an outstanding young conductor, composer or repetiteur, aged between 21 and 30 who is likely to be an influential leader in the field of music, to undertake study in the United Kingdom or the Czech republic for at least six months. Application forms are available from the British Council, PO Box 86, Edgecliff NSW 2027, Tel (02) 9329 2022, Fax (02) 9327 4868, Email bcsydney@sprint.com. Applications close early November.

The STA Travel Scholarship (I,L,R,C)

Up to $3,000

The Scholarship is available to a student undertaking a full-time degree or diploma of the University. The Scholarship will be awarded on the basis of a significant contribution to the community life of the University, for example, involvement in the University Union, leadership in student affairs, voluntary service to the University, and the relevance and merit of the proposed travel to the student's academic program or the community life of the University. Consideration may also be given to the applicants academic achievements. Applications close 31 March.

The Swedish Institute Guest Scholarships (I,L)

SEK 7,100 per month living allowance

9 months (1 academic year)

The scholarships are open to students/researchers who wish to travel to Sweden for studies/research which cannot equally well be pursued in countries other than Sweden. Applicants must establish contact with a Swedish University willing to accept the applicant for the proposed studies. Initial requests for application forms must be made in writing, including the applicant's name and address, nationality, educational background and work experience, knowledge of any languages, statement of the purpose of study/research in Sweden, and a copy of a letter of invitation from a Swedish University. Requests for applications should be sent to the Swedish Institute, Department for Exchanges in Education and Research, Box 7434, SE-103 91, Stockholm, Sweden, Email grantinfo@si.se, Web http://www.si.se. Requests for application forms must reach the Swedish Institute before 1 December.

Swiss Government Scholarships (L,R,C)

Tuition fees, living allowance, medical insurance and assistance with airfares

1 academic year

One scholarship is available for art/music and two for other disciplines, to undertake postgraduate study or attend an art school/conservatory in Switzerland. Applicants will be required to pass a language test in German or French. Applicants must be aged under 35. Applications close early October.

The Tokyo Metropolitan Government Foreign Student Scholarship Program (L,R,C)

200,000 yen per month, tuition and travel expenses, plus allowances

Up to 2.5 years

Scholarships are available for a Masters degree or postgraduate research at Tokyo Metropolitan University, or Tokyo Metropolitan Institute of Technology. Applicants must be aged under 35 years, be Australian Citizens from New South Wales, and be graduates of a university in NSW. Applications close early April.

The Turkish Government Language & Culture and Higher Education Scholarships (I,L)

Scholarships are available to high school graduates to undertake study at a Turkish University. Students may be required to undertake a one year Turkish language course before commencement of the degree. The scholarships pay a monthly allowance for the duration of the course. Scholarships are also available to university graduates who would like to attend Turkish Language and Culture Summer Courses conducted by Turkish Studies Centre. Further information is available from the Embassy of the Republic of Turkey, 60 Mugga Way, Red Hill ACT 2603. Applications close 30 May for Language and Culture Scholarships, and 15 July for Higher Education Scholarships.

University College London Scholarships

The University College London offers various scholarships to students from overseas, who hold an offer of admission to a full-time programme of study at UCL. Applicants must be self-financing and liable to pay tuition fees at the rate for overseas students. Information and applications are available from the International Office, University College London, Gower St, London WC1E 6BT, UK, Tel +44 171 380 7708, Fax +44 171 380 7380, Email international@ucl.ac.uk.

Yokoyama Scholarship Awards (L,R,C)

Assistance may be available for undergraduate and postgraduate study at a Japanese University.

Information is available from Mr Masao Iwashita, Secretary-General, Yokoyama Scholarship Foundation, 6F Shiozaki Building, 2-7-1 Hirakawacho, Chiyoda-Ku, Tokyo 102 Japan, Tel +81 3 3238 2913, Fax +81 3 5275 1677.
The following information summarises prizes awarded by the University. Prizes are grouped by level as follows: Undergraduate, common Undergraduate/Postgraduate, Postgraduate. Within these groups prizes are listed under the faculty, school or department in which they are awarded. Prizes which are not specific to any school are listed under General. Law prizes are awarded only for students enrolled in the LLB or Jurisprudence programs. Information regarding the establishment of new prizes may be obtained from the Student Information and Systems Office.

Prize information is normally provided in the following format:
• Prize value
• Conditions

Undergraduate Prizes

The University Of New South Wales
General Category for Prizes

The Heinz Harant Challenge Prize
• $1000 (bi-annual prize)
For an original piece of assessable work submitted in the course of completing a General Education course

• $500
For the best performance by a final year student in the anaesthesia module of the clinical curriculum in the Bachelor of Medicine Bachelor of Surgery degree program

The Australian College of Occupational Medicine Prize
• $200
For the best essay/topic in the field of Occupational Health and Safety, Occupational Disease and Injury or Occupational Medicine

The Combined Teaching Hospitals Senior Staff Prize
• $500
For the best performance in the clinical years of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Foundation Year Graduates Medal
• A Silver medal
For leadership and fellowship as a medical undergraduate by a student who has completed the final year of the medical program

The Graduation Prize in Surgery
• $100
For the best performance in the surgery components of MDSG4001 Integrated Clinical and Community Studies and MDSG6001
The Prize in Practical Anatomy

- $200
For the best performance in Practical Anatomy (including Radiological Anatomy) in Year 2 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Royal Australian College of Ophthalmologists Prize

- $250 and a medal
For the best essay in an ophthalmological course in Year 5 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or Year 6 of program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Wallace Wurth Prize

- $200
For the best overall performance in a graduating year in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The W G Tellesson Memorial Prize

- $150
For the best performance in MDSG3001 Clinical Studies in Year 3 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or Year 4 of program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Istvan Tork Prize in Neuroscience

- $100
For the best performance by a Year 4 Honours student who completed a thesis in the field of Neuroscience in the Schools of Psychology or Anatomy or Physiology and Pharmacology

Schools of Anatomy, Physiology and Pharmacology and Psychology

The Trainee Prize in Neurology

- $100
For the highest average mark in any three Year 3 Neurology courses by a graduand in the Bachelor of Science degree program with a major in Neurology

School of Community Medicine

The 2/5 Australian General Hospital Association Prize

- $200 and a plaque
For the best performance in Community Medicine in Year 5 of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, or Year 6 of program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Department of Health, Rural General Practice Prize

- $500
For the best essay written in the area of rural general practice by a Year 5 student in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, or a Year 6 student in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Goodsir Prize in Dermatology

- $100
For the best performance in a special written examination in MFAC5001 Geriatrics/General Practice/Subspecialties specialising in Dermatology in Year 5 of the Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery program.

The NSW Department of Health Prize

- $500
For the best performance in the Community Medicine component of MDSG4001 Integrated Clinical and Community Studies in program
School of Paediatrics

The Margaret Dance Memorial Award

- $500
For the best performance in Paediatric studies by a student who undertakes elective study in Paediatrics within the teaching hospitals of the University

The Paediatrics Staff Prize

- $200
For an outstanding performance in Paediatrics in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Richard Johnson Memorial Prize in Paediatrics

- $500
For the best performance in the clinical component of PAED5101 Paediatrics in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Pathology

The G R Cameron Memorial Prize

- $200
For the highest aggregate mark in the Pathology component of PATH3101 Pathology in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Hampson Sugerman Macquarie Prize for Experimental Pathology

- $325
For the most proficient research work done in Basic or Applied Pathology in program 3831 Bachelor of Science (Medicine) Honours

The Hampson Sugerman Macquarie Prize in Clinical Pathology

- $325
For the best performance in a combination of PATH3101 Pathology and MDSG4001 Integrated Clinical and Community Studies by a student in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery
School of Physiology and Pharmacology

The D I McCloskey Prize for Physiology/Pharmacology Honours
• $100
For the best performance in PHPH4218 Physiology 4 Honours or PHPH4258 Pharmacology Honours in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery in the Faculty of Medicine or program 3970 Bachelor of Science in the Board of Studies in Science and Mathematics

The D N Wade Prize for Medical Pharmacology
• $100
For the best performance in PHPH3055 Medical Pharmacology in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Doerenkamp-Zbinden Prize in Pharmacology
• $100
For the highest aggregate in PHPH3152 Pharmacology in the Bachelor of Science degree program

The F C Courtice Prize
• $100
For the best performance in PHPH2112 Physiology 1 or PHPH2122 Principles of Physiology in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or in program 3801 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The School of Physiology and Pharmacology Staff Prize for Physiology 1 or Principles of Physiology
• $100
For the best performance in PHPH2112 Physiology 1 or PHPH2122 Principles of Physiology in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

School of Psychiatry

The David Jeremy Keen Memorial Prize
• $50
For the best performance in PSCY2101 Human Behaviour in program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or in program 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

The John Kerridge Memorial Prize
• $100
For the best performance in Psychiatry in the final year of program 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery
Postgraduate Prizes

School of Community Medicine

The John Hirshman International Health Prize

• $200
For the best performance in CMED9605 Health in Developing Countries in the Master of Community Health or Master of Public Health degree program

The John Hirshman Prize in Community Health

• $200
For the best overall performance in the Master of Public Health degree program

School of Health Services Management

The 2/5 Australian General Hospital Association Prize

• $200 and a plaque
For the best overall performance in the Master of Health Administration or Master of Health Services Management degree program by a student studying in Australia.

The 2/5 Australian General Hospital Association Prize in Health Services Management (Nursing)

• $200 and a plaque
For general proficiency throughout the Master of Health Administration or Master of Health Services Management degree program by a trained nurse registered in Australia.

The Australian College of Health Service Executives Prize

• $200
For the best performance in the core Management course in the Master of Health Administration degree program

The Hunt and Hunt Health Law I Prize

• $200
For the best performance in HEAL9331 Health Related Law and Ethics by an internal or external student studying in Australia, in the Master of Health Services Management, Master of Health Administration or Master of Public Health degree program

The School of Health Services Management Staff Prize for the MHA in Hong Kong

• $200
For the best overall performance in the MHA degree program undertaken from Hong Kong
