Descriptions of Subjects and Reading Lists .... 81
INTRODUCTION

The Board of Vocational Studies was established for the purpose of supervising the teaching and examination of subjects which are primarily concerned with vocational training and which do not lend themselves to incorporation in the existing Faculty structure. Membership of the original Board was restricted, but as responsibilities increased with the expanded number of courses offered, it was decided, in 1970, to reconstitute the Board. The Board of Vocational Studies now functions on lines very similar to those of the normal university faculty, and the Board is responsible for all courses in the Schools of Education, Health Administration, Librarianship, Social Work, and the Department of Industrial Arts.

Students should note that since 1971 they have had three elected representatives on the Board of Vocational Studies. Student representation on faculties and boards is a recent innovation in this University, and members of the Board of Vocational Studies are aware of the contribution which student members can make to the activities of the Board.

This handbook provides information concerning the requirements for admission, enrolment and re-enrolment, conditions for the award of degrees, course structures, subject descriptions and the textbook requirements. It is important that students become well acquainted with the information presented here, and if there is any difficulty they should consult the University's Admissions Office (Ground Floor, Chancellery) or their School Office.

A. H. WILLIS
PRO-VICE-CHANCELLOR

1973

Session 1:  March 5 to May 12
            May Recess: May 13 to May 20
            May 21 to June 16
            Midyear Recess: June 17 to July 22

Session 2:  July 23 to August 11
            August Recess: August 12 to August 26
            August 27 to November 10

JANUARY
Tuesday, 30 to Sat., 10 Feb.  Deferred examinations

FEBRUARY
Monday, 19  Enrolment Week commences for new students and students repeating first year
Monday, 26  Enrolment Week commences for students re-enrolling (second and later years)

THE ACADEMIC YEAR

The academic year is divided into two sessions, each containing 14 weeks for teaching. There is a recess of five weeks between the two sessions. In addition there are short recesses within the sessions—one week within Session 1 and two weeks within Session 2.

The first session commences on the first Monday of March.
BOARD OF VOCATIONAL STUDIES

Pro-Vice-Chancellor: Professor A. H. Willis
Chairman: Professor R. J. Lawrence

SCHOOL OF EDUCATION

Professor of Education and Head of School

O. C. McMichael, MSc N.S.W., ASTC

Senior Instructors
H. E. Larsen, DipDesign (Copenhagen)
B. N. Loftus, GradDip N.S.W.

Professional Officer
Janice M. Waddell, BA Melb.

School of Librarianship

Professor of Librarianship and Head of School
Wilma Radford, BA MEd Syd., BS Col., FLAA

Lecturers
Carmel Maguire, BA Qld., ALAA
J. R. Nelson, MA Syd., ALAA
W. B. Rayward, BA Syd., DipLib N.S.W., MS Ill.
Mrs. Margaret Trask, BA N.E., MLib N.S.W., ALAA

Tutor
Jennifer Affleck, BA Syd., DipLib N.S.W., ALAA

School of Social Work

Professor of Social Work and Head of School

Senior Lecturers
G. Audrey Rennison, MA Camb., CertSocSci & Admin. L.S.E.
Lecturers
Mrs. Claire Bundey, BA N.S.W., DipSocStud Syd.
C. M. R. Cornwell, BA BSocStud Qld.

Tutors
M. D. Horsburgh, BA DipSocW Syd.
GENERAL INFORMATION

ADMISSIONS OFFICE

The Admissions Office which is located in the Chancellery on the upper campus provides intending students (both local and overseas) with information regarding courses, admission requirements, scholarships and enrolment. Office hours are from 9.00 a.m. to 1.00 p.m. and 2.00 p.m. to 5.00 p.m. Monday to Friday and an evening service is provided during the enrolment period.

Applications for special admission, admission with advanced standing and from persons relying for admission on overseas qualifications should be lodged with the Admissions Office. The Office also receives applications from students who wish to transfer from one course to another, resume their studies after an absence of twelve months or more, or seek any concession in relation to a course in which they are enrolled. It is essential that the closing dates for lodgment of applications are adhered to, and, for further details the sections on “Rules Relating to Students” and “Enrolment Procedure for Undergraduate Courses” should be consulted.

Applications for admission to undergraduate courses from students who do not satisfy the requirements for admission (see section on “Requirements for Admission”), from students seeking admission with advanced standing, and from students who have had a record of failure at another university, are referred by the Admissions Office to the Admissions Committee of the Professorial Board.

Students seeking to register as higher degree candidates should discuss their proposals initially with the Head of the School in which they wish to register. An application is then lodged on a standard form and the Admissions Office, after obtaining a recommendation from the Head of the School, refers the application to the appropriate Faculty or Board of Studies Higher Degree Committee.

Details of the procedure to be followed by students seeking entry to first year courses at the University may be obtained from the Admissions Office or the Metropolitan Universities Admissions Centre.

Persons seeking entry to first year courses in one or more of the three Universities in the Sydney Metropolitan Area (Macquarie University, The University of New South Wales and the
University of Sydney) are required to lodge a single application form with the Metropolitan Universities Admissions Centre, Third Floor, 13-15 Wentworth Avenue (near Museum Station), Sydney (P.O. Box 7049 G.P.O. Sydney, 2001). On the application form provision is made for applicants to indicate preferences for courses available in any one of the three Universities. Students are notified individually of the result of their applications and provided with information regarding the procedures to be followed in order to accept the offer of a place at this University and complete their enrolment at the Enrolment Bureau, Unisearch House, 221 Anzac Parade, Kensington.

Bachelor of Social Work—Since personal qualities are of particular significance in the practice of social work, it has been found useful for intending students to be interviewed by a member of staff in the School of Social Work at some stage prior to enrolment.

Matriculation requirements are the same as for the Faculty of Arts.

REQUIREMENTS FOR ADMISSION

A person who seeks to become a candidate for any degree of Bachelor of the University must first have qualified for matriculation and have satisfied the requirements for admission to the particular Faculty, course or subject chosen.

In addition to complying with these conditions candidates must be selected before being permitted to enrol in a course. In 1972 it will be necessary for the University to limit the number of students enrolling in all undergraduate courses.

A candidate who has satisfied the conditions for matriculation and for admission to a course of study shall be classed as a "matriculated student" of the University, after enrolment.

A person who has satisfactorily met the conditions for admission may be provided with a statement to that effect on the payment of the prescribed fee.
SECTION A

GENERAL MATRICULATION AND ADMISSION REQUIREMENTS

1. A candidate may qualify for matriculation by attaining in recognised matriculation subjects at one New South Wales Higher School Certificate Examination or at one University of Sydney Matriculation Examination a level of performance determined by the Professorial Board from time to time.

2. The level of performance required to qualify for matriculation shall be
   (a) passes in at least five recognised matriculation subjects, one of which shall be English and three of which shall be at Level 2 or higher;

   and

   (b) the attainment of an aggregate of marks, as specified by the Professorial Board, in not more than five recognised matriculation subjects, such marks being co-ordinated in a manner approved by the Board.

3. The following subjects, and such other subjects as may be approved by the Professorial Board from time to time, shall be recognised matriculation subjects:

   English  Greek  Chinese
   Mathematics  Latin  Japanese
   Science  French  Hebrew
   Agriculture  German  Dutch
   Modern History  Italian  Art
   Ancient History  Bahasa Indonesia  Music
   Geography  Spanish  Industrial Arts
   Economics  Russian

4. A candidate who has qualified to matriculate in accordance with the provisions of Clauses 1, 2 and 3 may be admitted to a particular Faculty, Course or Subject provided that:
   (a) his qualification includes a pass at the level indicated in the subject or subjects specified in Schedule A as Faculty, Course or Subject Pre-Requisites;

   or

   (b) the requirements regarding these particular Faculty, Course or Subject Pre-Requisites, as specified in Schedule A, have been met at a separate Higher School Certificate or University of Sydney Matriculation Examination.
5. Notwithstanding any of the provisions of Clauses 1 to 4, the Professorial Board may grant matriculation status to any candidate at the Higher School Certificate or University of Sydney Matriculation Examination who has reached an acceptable standard and may admit him to any Faculty, Course or Subject.

NOTE
1. For the purposes of Clause 2 (a), Mathematics and Science BOTH PASSED at First Level or Second Level Full Course shall together count as three subjects.
2. For the purposes of Clause 2 (b), Mathematics and Science TAKEN either singly or together at First Level or Second Level Full Course shall each count as one and one half subjects.

</table>
ENROLMENT PROCEDURE

Before enrolling in any of the courses supervised by the Board of Vocational Studies, intending students should contact the School or Department concerned.

UNDERGRADUATE COURSES

FIRST ENROLMENTS:

(a) New South Wales residents already qualified for admission and persons who are applying for enrolment on the basis of qualifications gained or about to be gained outside New South Wales must lodge an application for enrolment with the Metropolitan Universities Admissions Centre, 13-15 Wentworth Avenue, Sydney (P.O. Box 7049 G.P.O., Sydney) by 29th October, 1971.

(b) New South Wales residents qualifying for admission by the 1971 New South Wales Higher School Certificate Examination or the 1972 Sydney University Matriculation Examination and those who have attended a University in New South Wales in 1971 must apply for enrolment to the Metropolitan Universities Admissions Centre, 13-15 Wentworth Avenue, Sydney (P.O. Box 7049 G.P.O., Sydney) by 21st January, 1972.

Completion of Enrolment

Students whose applications for enrolment are accepted will be required to complete their enrolment at a specified appointment time before the start of Session 1. Fees must be paid on the day of the appointment. However, in special circumstances and provided class places are still available students may be allowed to complete their enrolment after the prescribed week subject to the payment of a late fee.

Failure in First Year

First year students who failed more than half their programme at the 1971 Annual Examinations and who were not granted any deferred examinations will NOT follow the above procedure. They are required to ‘show cause’ why they should be allowed to continue in the course, and should await instructions in writing from the Registrar as to the procedure.
LATER YEAR ENROLMENTS

Bachelor of Science (Education)

Students will be re-enrolled in Unisearch House as follows:
Year II  Wednesday, 1st March, 1972
10.00 a.m. to 12.30 p.m.
Years III and IV  Tuesday, 29th February, 1972
10.00 a.m. to 12.30 p.m.

Industrial Arts Course

Students in the B.Sc. or B.Sc.(Tech.) degree course in Industrial Arts should attend Hut 1, Western Grounds Area for re-enrolment as follows:
All re-enrolling students  Tuesday, 29th February,
10.00 a.m. to 12 noon
2.00 p.m. to 7.00 p.m.

Social Work Course (B.S.W.)

Students in the Bachelor of Social Work degree course should attend for re-enrolment at the Seminar Room, Hut 34, Western Grounds Area, in accordance with the following timetable:

Year II
Students with surnames “A” to “K”  Tuesday, 29th February,
9.30 a.m. to 12.30 p.m.
Students with surnames “L” to “Z”  Tuesday, 29th February,
2.00 p.m. to 5.00 p.m.

Year III
Students with surnames “A” to “K”  Wednesday, 1st March,
9.30 a.m. to 12.30 p.m.
Students with surnames “L” to “Z”  Wednesday, 1st March,
2.00 p.m. to 5.00 p.m.

Year IV
Students with surnames “A” to “J”  Thursday, 2nd March,
9.30 a.m. to 12.30 p.m.
Students with surnames “K” to “Z”  Thursday, 2nd March,
2.00 p.m. to 5.00 p.m.

Part-time Students (all stages)  Thursday, 2nd March,
2.00 p.m. to 5.00 p.m.

New or Transfer Students with advanced standing and Miscellaneous Students  Friday, 3rd March,
9.30 a.m. to 12.30 p.m.
2.00 p.m. to 5.00 p.m.
Students who fail to attend personally will be required to attend one of the late enrolment sessions.

In exceptional cases—illness or absence interstate or overseas—students may seek written permission from the enrolling officer of the School of Social Work to attend a late enrolment session without penalty, provided such permission is granted before the specified re-enrolment session.

LATE ENROLMENTS

In the case of students enrolling late in the Bachelor of Social Work Course, the enrolment session will be from 5.00 p.m. to 6.00 p.m. on Wednesdays, 8th and 15th March, 1972 in the Waiting Room of Hut 34, School of Social Work, Western Grounds Area.

POSTGRADUATE COURSES

Diploma in Education
Rooms G37 and 253
Chancellery Extension
Monday, 28th February
“A” to “L” 10.00 a.m. to 12.30 p.m.
“M” to “Z” 2.00 p.m. to 4.30 p.m.

Master of Education
Room 253
Chancellery Extension
Friday, 3rd March
2.00 p.m. to 5.00 p.m.

Master of Health Administration and Graduate Diploma in Health Administration
Room G36, The Chancellery
Friday, 3rd March,

Graduate Diploma in Industrial Design
Students wishing to enrol in the Graduate Diploma Course in Industrial Design are required to apply for admission on the appropriate form to the Registrar at least two full calendar months before the commencement of the course.

They will then be notified by letter whether they are eligible to enrol and will be required to complete their enrolment at Hut 1, Western Grounds Area on Friday, 3rd March, 2.00 p.m. to 5.00 p.m. and 6.00 p.m. to 8.00 p.m.

Master of Social Work
Students wishing to register as a candidate for the degree of Master of Social Work should lodge the prescribed application
form with the Registrar at least one full calendar month before commencement of the course.

Preliminary enquiries regarding registration should be made before 1st December of the year prior to registration.

**Graduate Diploma Course in Librarianship**

Students continuing the Graduate Diploma course in Librarianship are required to attend the **Office, School of Librarianship (Hut J)**, for re-enrolment on one of the following sessions:

- **Wednesday, 1st March**
  - 9.30 a.m. to 12 noon
  - 2.00 p.m. to 7.00 p.m.

- **Thursday, 2nd March**
  - 9.30 a.m. to 12 noon
  - 2.00 p.m. to 4.00 p.m.

**ENROLMENT IN MISCELLANEOUS SUBJECTS**

Students may be accepted for enrolment in miscellaneous subjects provided the University considers that the subject/s will be of benefit to the student and there is accommodation available. Only in exceptional circumstances will subjects taken in this way count towards a degree or diploma.

Students seeking to enrol in miscellaneous subjects should obtain a letter of approval from the Head of the appropriate School or his representative permitting them to enrol in the subject concerned. The letter should be given to the enrolling officer at the time of enrolment. *Where a student is under exclusion he may not be enrolled in miscellaneous subjects unless given approval by the Professorial Board.*

**UNIVERSITY UNION CARD**

All students other than miscellaneous students are issued with a University Union membership card. *This card must be carried during attendance at the University and shown on request.*

The number appearing on the front of the card above the student’s name is the student registration number used in the University’s records. *This number should be quoted in all correspondence.*

The card must be presented when borrowing from the University libraries, when applying for Travel Concessions and when notifying a change of address. It must also be presented when
paying fees on re-enrolment each year when it will be made valid for the year and returned. Failure to present the card could result in some inconvenience in completing re-enrolment.

A student who loses a Union Card must notify the University Union as soon as possible.

New students will be issued with University Union cards at the University Union Enquiry Desk as soon as practicable after payment of fees. In the meantime, fees receipt form should be carried during attendance at the University and shown on request. A period of at least three weeks should be allowed to elapse after payment of fees before making application for the card. Cards will not be posted under any circumstances.
FEES

UNDERGRADUATE FEES

Basis for Fee Assessment

Where course fees are assessed on the basis of session hours of attendance, the hours for each subject for the purposes of fee assessment shall be those prescribed in the Calendar. The granting of an exemption from portion of the requirements of a subject in which a student is enrolled does not carry with it any exemption from the payment of fees.

(a) Degree Courses in Industrial Arts and Bachelor of Science (Education) course.

For the purpose of fee determination assessment is on a session basis.

A full-time course fee will be charged for any session where more than 15 hours’ per week instruction, etc., is involved.

(i) Full-time Course Fee (more than 15 hours’ attendance per week)—$231 per session.

(ii) Part-time Course Fee—over 6 hours’ and up to 15 hours’ attendance per week—$115.50 per session.

(iii) Part-time Course Fee—6 hours’ or less attendance per week—$57.50 per session.

(iv) Course Continuation Fee—A fee per annum of $33 (no session payment) is payable by:

Category (a) students who have once been enrolled for a thesis and have only that requirement outstanding, or

Category (b) students given special permission to take annual examinations without attendance at the University. (Students in this category are not required to pay the subscriptions to the University Union, the Students’ Union, the Sports Association and the Library fee.)

(b) Social Work Degree — Old Course

(i) Pass—$115 per annum per subject or $57.50 per session per subject.

(ii) Honours—an additional $39 per annum per subject in which honours is taken in student’s second and third years and $154 per subject per annum in the fourth year.
Social Work Degree — New Course

(i) Full-time Course Fee—$462 per annum or $231 per session for Years I, II and III; $346 per annum or $173 per session for Year IV; $39 for honours.

(ii) Part-time Course Fee—$289 per annum or $144.50 per session for Stages I, II, III and IV; $231 per annum or $115.50 per session for Stage V; $348 per annum or $174 per session for Stage VI; $39 for honours.

(iii) For students undertaking less than a complete full-time year or a complete part-time stage, fees will be assessed on a proportionate basis.

(c) Degree in Health Administration

The fees for this course are assessed under the following schedule according to the hours shown for the subject irrespective of whether the course is taken as an internal or external student. An external student in this course is exempt from the Student Activities Fees.

For the purpose of fee determination assessment is on a session basis.

A full-time course fee will be charged for any session where more than 11 hours’ per week instruction, etc., are involved.

(i) Full-time Course Fee (more than 11 hours’ attendance per week)—$192.50 per session.

(ii) Part-time Course Fee—over 4 hours’ and up to 11 hours’ attendance per week—$115.50 per session.

(iii) Part-time Course Fee—4 hours’ or less attendance per week—$57.50 per session.

(iv) Course Continuation Fee—A fee per annum of $33 (no session payment) is payable by:

Category (a) students who have once been enrolled for a thesis and have only that requirement outstanding, or

Category (b) students given special permission to take annual examinations without attendance at the University. (Students in this category are not required to pay the subscriptions to the University Union, the Students’ Union, the Sports Association and the Library fee.)

(d) Miscellaneous Subjects

(i) Undergraduate subjects taken as “miscellaneous subjects” (i.e. not for a degree) or to qualify for registration as a candidate for a higher degree are assessed according to paragraph (a) above.
(ii) Students given approval to enrol in a miscellaneous subject or subjects in addition to being enrolled in a course are assessed according to the total hours of attendance as if the additional subject formed part of the course.

**POSTGRADUATE FEES**

**Basis of Fee Assessment**

Where course fees are assessed on the basis of session hours of attendance, the hours for each subject for purposes of fee assessment shall be those prescribed in the Calendar. The granting of an exemption from portion of the requirements of a subject in which a student is enrolled does not carry with it any exemption from the payment of fees.

**Master of Health Administration**

(i) Registration Fees ........................................ $7
(ii) Graduation Fee ........................................... $9
(iii) Course Fee—calculated on the basis of a session's attendance at the rate of $12.50 per hour per week. Thus the fee for a programme requiring an attendance of 24 hours per week for the session is $24 \times 12.50 = $300 per session.
(iv) Thesis or Project Fee—$49 (an additional fee of $33* is payable by students who have completed their final examinations for the degree but have not completed the thesis or project for which they have been previously enrolled).
(v) Thesis or Project Resubmission Fee‡ .................. $33

**Master of Education**

Fees are payable from the commencement date of a candidate's registration and remain payable until the candidate's thesis is presented to the Examinations Branch.

**Thesis plus Formal Courses in Two Subjects.**

(i) Registration Fee ........................................ $7
(ii) Course Fee—per subject .................................. $49
(iii) Internal Full-time Student Annual Thesis Fee† $98
(iv) Internal Part-time Student Annual Thesis Fee† $49

* Students paying this fee who are not in attendance at the University are not required to pay the Student Activities Fees or the Library Fee.
‡ Candidates paying this fee are not required to pay the Student Activities Fees or the Library Fee.
† The Annual Thesis Fee is payable in any year in which a candidate is formally enrolled in the thesis.
(v) External Student Annual Thesis Fee*† $33
(vi) Final Examination (including Graduation Fee) $49
(vii) Thesis Resubmission Fee‡ $33

Project plus Formal Courses in Four Subjects.

(i) Registration Fee $7
(ii) Course Fee—per subject $49
(iii) Project Fee—Internal Student (at the time of first enrolment in the project) $33
(iv) Project Fee—Internal Student (for each† subsequent enrolment in the project) $33
(v) Project Fee—External Student—per annum $33
(vi) Graduation Fee $9
(vii) Project Resubmission Fee‡ $33

RESEARCH DEGREES

Master of Health Administration, Librarianship, Science*, Social Work

Fees are payable from the commencement date of a candidate’s registration and remain payable until the candidate’s thesis is presented to the Examinations Branch.

(i) Qualifying Examination $16
(ii) Registration Fee $7
(iii) Internal full-time student annual fee $98
Internal full-time student session fee $49
(iv) Internal part-time student annual fee $49
Internal part-time student session fee $24.50
(v) External student annual fee† $33
(vi) Final Examination $49
(vii) Thesis Resubmission Fee† $49

DIPLOMAS

Graduate Diploma Course (Health Administration, Industrial Design and Librarianship)

(i) Registration Fee $7
(ii) Award of Diploma Fee $9

† Candidates paying this fee are not required to pay the Student Activities Fees or the Library Fee.
* Candidates registered under the conditions governing the award of this degree without supervision will pay the following fees. Registration fee $7, Examination of thesis $98. They are not required to pay the Student Activities Fees or the Library Fee.
† Students in this category are not required to pay the Student Activities Fees or the Library Fee.
(iii) Course Fee—calculated on the basis of a session's attendance at the rate of $12.50 per hour per week. Thus the fee for a programme requiring an attendance of 24 hours per week for the session is $300 per session.

(iv) Thesis or Project Fee—$49 (an additional fee of $33† is payable by students who have completed their final examinations for the diploma but have not completed the thesis or project for which they have been previously enrolled. This fee of $33 also applies to students taking the course for the Graduate Diploma in Librarianship who have not completed assignments).

(v) Thesis or Project Resubmission Fee† ... $33

Diploma in Education

(i) Registration Fee ... $7
(ii) Award of Diploma Fee ... $9
(iii) Full-time Course Fee—$462 per annum or $231 per session.
(iv) Part-time Course Fee—$231 per annum or $115.50 per session.
(v) Fees for repeat subjects—calculated on the basis of a session's attendance at the rate of $12.50 per hour per week. Thus the fee for a programme requiring an attendance of 3 hours per week for the session is $37.50 per session.

OTHER FEES

In addition to the course fees set out above, all registered students will be required to pay:

- Matriculation Fee—payable at the beginning of first year $9
- Library Fee—annual fee $16
- University Union*—entrance fee $20
- Student Activities Fees
  - University Union*—annual subscription $30
  - Sports Association*—annual subscription $4
  - Students' Union*—annual subscription $6
  - Miscellaneous—annual fee $17

* Life members of these bodies are exempt from the appropriate fee/s.
† Students in this category are not required to pay the Student Activities Fees or the Library Fee.
Graduation or Diploma Fee—$9 payable at the completion of the course.

Depending on the course being taken, students may also be required to pay:

- Applied Psychology Kit Hiring Charge—$2 per kit. Additional payment for breakages and losses in excess of $1 may be required.
- Biochemistry Kit Hiring Charge—$4 per kit. Additional payment for breakages and losses in excess of $1 may be required.
- Chemistry Kit Hiring Charge—$4 per kit. Additional payment for breakages and losses in excess of $1 may be required.
- Excursion Fee—$2 per subject (plant morphology, plant taxonomy, environmental botany).

SPECIAL EXAMINATION FEES

- Deferred examination—$7 for each subject.
- Examinations conducted under special circumstances—$9 for each subject.
- Review of examination results—$9 for each subject.

LATE FEES

Session 1—First Enrolments

- Fees paid in the late enrolment period and before commencement of Session 1 .................. $8
- Fees paid during the 1st and 2nd weeks of Session 1 .................. $16
- Fees paid after the commencement of the 3rd week of Session 1 with the express approval of the Registrar and Head of the School concerned .................. $33

Session 1—Re-Enrolments

- Failure to attend enrolment centre during enrolment week .................. $8
- Fees paid after the commencement of the 3rd week of session to 31st March .................. $16
- Fees paid after 31st March where accepted with the express approval of the Registrar .................. $33

Session 2—All Enrolments

- Fees paid in 3rd and 4th weeks of Session 2 .................. $16
- Fees paid thereafter .................. $33
- Late lodgment of corrected enrolment details forms (late applications will be accepted for three weeks only after the prescribed dates) .................. $7
WITHDRAWAL FROM COURSE

Students withdrawing from a course are required to notify the Registrar in writing. Fees for the course accrue until a written notification is received.

Where notice of withdrawal from a course is received by the Registrar before the first day of Session 1, a refund of all fees paid other than the matriculation fee will be made.

Where a student terminates for acceptable reasons a course of study before half a session has elapsed, one half of the session's course fees may be refunded. Where a student terminates a course of study after half a session has elapsed, no refund may be made in respect of that session's fees.

The Library fee is an annual fee and is not refundable where notice of withdrawal is given after the commencement of Session 1.

On notice of withdrawal a partial refund of the University Union Entrance Fee is made on the following basis: any person who has paid the entrance fee in any year and who withdraws from membership of the University Union after the commencement of Session 1 in the same year, or who does not renew his membership in the immediately succeeding year may on written application to the Warden receive a refund of half the entrance fee paid.

On notice of withdrawal, a partial refund of the Student Activities Fees is made on the following basis:

- University Union—$7.50 in respect of each half session.
- University of New South Wales Students' Union—where notice is given prior to the end of the fifth week of Session 1, $3; thereafter no refund.
- University of New South Wales Sports Association—where notice is given prior to 30th April, a full refund is made; thereafter no refund.
- Miscellaneous—where notice is given prior to 30th April, $8.50; thereafter no refund.

PAYMENT OF FEES

Completion of Enrolment

All students are required to attend the appropriate enrolment centre during the prescribed enrolment period* for authorization of course programme. Failure to do so will incur a late fee of $8.

First Year students (including students repeating First Year) must complete enrolment (including fee payment) before they are

* The enrolment periods for Sydney students are prescribed annually in the leaflets "Enrolment Procedure for New Students" and "Enrolment Procedure for Students Re-enrolling".
issued with class timetables or permitted to attend classes. A First Year student who has been offered a place in a course to which entry is restricted and fails to complete enrolment (including fee payment) at the appointed time may lose the place allocated.

Fees should be paid during the prescribed enrolment period but will be accepted during the first two weeks of Session 1. (For late fees see above.) No student is regarded as having completed an enrolment until fees have been paid. Fees will not be accepted (i.e. enrolment cannot be completed) from new students after the end of the second week of Session 1 (i.e. 17th March, 1972), and after 31st March from students who are re-enrolling, except with the express approval of the Registrar, which will be given in exceptional circumstances only.

Payment of Fees by Session

Students who are unable to pay their fees by the year may pay by the Session, in which case they are required to pay the first session’s course fees and other fees for the year, within the first two weeks of Session 1. Students paying under this arrangement will receive accounts from the University for Session 2 fees. These fees must be paid within the first two weeks of Session 2.

Assisted Students

Scholarship holders or Sponsored Students who have not received an enrolment voucher or appropriate letter of authority from their sponsor at the time when they are enrolling should complete their enrolment paying their own fees. A refund of fees will be made when the enrolment voucher or letter of authority is subsequently lodged with the Cashier.

Extension of Time

Any student who is unable to pay fees by the due date may apply in writing to the Registrar for an extension of time. Such application must give year or stage, whether full-time or part-time, and the course in which the applicant wishes to enrol, state clearly and fully the reasons why payment cannot be made and the extension sought, and must be lodged before the date on which a late fee becomes payable. Normally the maximum extension of time for the payment of fees is until 31st March for fees due in Session 1 and for one month from the date on which a late fee becomes payable in Session 2.

Where an extension of time is granted to a First Year student in Session 1, such student is not permitted to attend classes until fees are paid, and if seeking to enrol in a restricted Faculty may risk losing the place allocated.
Failure to Pay Fees

Any student who is indebted to the University and who fails to make a satisfactory settlement of his indebtedness upon receipt of due notice ceases to be entitled to membership and privileges of the University. Such a student is not permitted to register for a further term, to attend classes or examinations, or to be granted any official credentials.

No student is eligible to attend the annual examinations in any subject where any portion of his course fees for the year is outstanding after the end of the fourth week of Session 2 (18th August, 1972).

In very special cases the Registrar may grant exemption from the disqualification referred to in the two preceding paragraphs upon receipt of a written statement setting out all relevant circumstances.
RULES RELATING TO STUDENTS

GENERAL CONDUCT

Acceptance as a member of the University implies an undertaking on the part of the student to observe the regulations, by-laws and other requirements of the University, in accordance with the declaration signed at the time of the enrolment.

In addition, students are expected to conduct themselves at all times in a seemly fashion: Smoking is not permitted during lectures, in examination rooms or in the University Library. Gambling is also forbidden.

Members of the academic staff of the University, senior administrative officers, and other persons authorized for the purpose, have authority, and it is their duty, to check and report on disorderly or improper conduct or any breach of regulations occurring in the University.

ATTENDANCE AT CLASSES

Students are expected to be regular and punctual in attendance at all classes in the course or subject in which they are enrolled. All applications for exemption from attendance at lectures or practical classes must be made in writing to the Registrar.

In the case of illness or of absence for some other unavoidable cause a student may be excused by the Registrar from non-attendance at classes for a period of not more than one month, or on the recommendation of the Dean of the appropriate Faculty for any longer period.

Applications to the Registrar for exemption from re-attendance at classes, either for lectures or practical work, may only be granted on the recommendation of the Head of the appropriate School. The granting of an exemption from attendance does not carry with it exemption from payment of fees.

Application forms for exemption from lectures are available at the Admissions Office and should be lodged there (with a medical certificate where applicable). If session examinations have been missed this fact should be noted in the application.

Where a student has failed a subject at the annual examinations in any year and re-enrols in the same course in the following year, he must include in his programme of studies for that year the subject in which he has failed. This requirement will not be applicable
if the subject is not offered the following year; is not a compulsory component of a particular course; or if there is some other cause, which is acceptable to the Professorial Board, for not immediately repeating the failed subject.

Where a student has attended less than eighty per cent of the possible classes, he may be refused permission to sit for the examination in that subject.

**INDEBTEDNESS TO THE UNIVERSITY**

Any student who is indebted to the University and who fails to make a satisfactory settlement of his indebtedness upon receipt of due notice ceases to be entitled to membership and privileges of the University. Such a student is not permitted to register for a further session, to attend classes or examinations, or to be granted any official credentials.

In very special cases the Registrar may grant exemption from the disqualification referred to in the preceding paragraph upon receipt of a written statement setting out all relevant circumstances.

**CHANGES IN COURSE PROGRAMMES**

Students seeking approval to substitute one subject for another, add one or more subjects to their programme or discontinue part of their programme must make application to the Head of the School responsible for the course on a form available from School offices.

Any addition or substitution of subjects after 31st March will be accepted only with the express approval of the Registrar on the recommendation of the appropriate Head of School, and will be given in exceptional circumstances only.

In the case of students wishing to terminate their enrolment the application must be lodged at the Examinations and Student Records Section. The Registrar will inform students of the decision. Approval of withdrawal from subjects is not automatic, each application being determined after considering the circumstances advanced as justifying withdrawal.

It is emphasized that:

1. withdrawal from a subject, tuition in which extends over the academic year, at any time after the May recess;  
2. withdrawal from a subject, tuition in which extends over only one session, at any time after one month from the commencement of the subject; or
3. failure to sit for the examinations in any subject in which the student has enrolled, shall be regarded as failure to satisfy the examiners in the subject, unless written approval to withdraw without failure has been obtained from the Registrar.

RESTRICTION UPON STUDENTS RE-ENROLLING IN UNIVERSITY COURSES

The University Council has adopted the following rules governing re-enrolment with the object of requiring students with a record of failure to show cause why they should be allowed to re-enrol and retain valuable class places. These rules apply retrospectively from 1st January, 1971, and the attention of students is drawn to them.

(1) (i) A student shall show cause why he should be allowed to repeat a subject in which he has failed more than once. (Failure in a deferred examination as well as in the annual examination counts, for the purpose of this regulation, as one failure.) Where such subject is prescribed as a part of the student's course he shall be required to show cause why he should be allowed to continue the course.

Notwithstanding the provisions of Clause 1 (i)—

(ii) A student enrolled in the first year or first stage of any course, other than the medical course, who has failed in more than half the programme in which he is enrolled for that year or stage shall be required to show cause why he should be allowed to continue in the course.

(iii) A student enrolled in the first year of the Medical course who has failed in more than one subject of that year shall be required to show cause why he should be allowed to continue in the Medical course.

(iv) The provisions of sections (ii) and (iii) of this rule shall be deemed to apply to any student on transfer from another course or institution whose programme of studies in the first year of enrolment immediately following transfer is comprised of subjects so chosen that half or more of such subjects are listed in the University Calendar as first year subjects.
(2) Notwithstanding the provisions of Clause (1), a student shall be required to show cause why he should be allowed to continue a course which he will not be able to complete in the time set down in the following schedule.

<table>
<thead>
<tr>
<th>Number of years in course</th>
<th>Total time allowed from first enrolment to completion (Years)</th>

</tr>
</tbody>
</table>

(3) No full-time student shall, without showing cause, be permitted to continue a course unless all subjects of the first year of his course are completed by the end of his second year of attendance. No student in the Faculty of Arts shall (without showing cause, be permitted to continue a course) unless he completes four subjects by the end of his second year of attendance. No full-time student in the Bachelor of Social Work course shall without showing cause be permitted to continue with the course unless he completes the equivalent of four full subjects by the end of his second year of attendance.

No part-time student shall, without showing cause, be permitted to continue a course unless all subjects of the first two stages of his course are completed by the end of his fourth year of attendance and all subjects of the third and fourth stages of his course by the end of his seventh year of attendance.

No student in the Faculty of Medicine shall, without showing cause, be permitted to continue with the medical course unless he completes the second year of the course by the end of his third year of attendance, and the third year of the course by the end of his fourth year of attendance.

(4) A student who has a record of failure in a course at another University shall be required to show cause why he should be admitted to this University. A student admitted to a course at this University following a record of failure at another University shall be
required to show cause, notwithstanding any other provisions in these rules, why he should be permitted to continue in that course if he is unsuccessful in the annual examinations in his first year of attendance at this University.

(5) Any student excluded under any of the Clauses (1)-(3) may apply for readmission after two academic years and such application shall be considered in the light of any evidence submitted by him.

(6) A student wishing "to show cause" under these provisions shall do so in writing to the Registrar. Any such application shall be considered by a committee, hereinafter referred to as the Re-enrolment Committee, appointed by the Professorial Board, which shall determine whether the cause shown is adequate to justify his being permitted to continue his course or re-enrol, as the case may be.

(7) The Vice-Chancellor may on the recommendation of the Re-enrolment Committee exclude from attendance in a course or courses any student who has been excluded from attendance in any other course under the rules governing re-enrolment and whose record at the University demonstrates, in the opinion of the Re-enrolment Committee and the Vice-Chancellor, the student's lack of fitness to pursue the course nominated.

(8) A student who has failed, under the provisions of Clause (6) of these rules, to show cause acceptable to the Re-enrolment Committee why he should be permitted to continue in his course, and who has subsequently been permitted to re-enrol in that course or to transfer to another course, shall also be required to show cause, notwithstanding any other provision in these rules, why he should be permitted to continue in that course if he is unsuccessful in the annual examinations immediately following the first year of resumption or transfer of enrolment as the case may be.

(9) Any student who is excluded from attendance in any course or subject under the provisions of these rules may appeal to an Appeal Committee constituted by Council for this purpose. The decision of the Appeal Committee shall be final.

(10) The notification to any student of a decision by the Re-enrolment Committee to exclude the student from
attendance in any course or subject shall indicate that the student may appeal against the decision to an Appeal Committee. In lodging such appeal the student shall ensure that a complete statement is furnished of all grounds on which the appeal is based and shall indicate whether or not the student wishes to appear in person before the Appeal Committee.

In considering an appeal the Appeal Committee, on the basis of the student's academic record and the stated grounds of appeal, shall decide:

(i) whether there are grounds which justify the Committee seeing the student in person, or

(ii) whether there is sufficient information available to the Committee to allow decision without seeing the student in person

and so proceed to determine the application accordingly.

RE-ADMISSION AFTER EXCLUSION

Applications for re-admission must be made on the standard form and lodged with the Registrar not later than 30th June of the year prior to that for which re-admission is sought. An application should include evidence of appropriate study in the subjects (or equivalents) on account of which the applicant was excluded. In addition, evidence that circumstances which were deemed to operate against satisfactory performance at the time of exclusion are no longer operative or are reduced in intensity should be furnished. An applicant may be required to take the annual examinations in the relevant subjects as qualifying examinations in which case re-admission does not imply exemption from the subject.

Late applications cannot be considered where, in the opinion of the University, insufficient time will be available for the student to prepare himself for any qualifying examinations which may be required.

It should be noted that a person under exclusion may not be enrolled in miscellaneous subjects unless he has received the approval of the Admissions Committee of the Professorial Board.

Persons who intend applying for re-admission to the University at a future date may seek advice as to ways in which they may enhance their prospects of qualifying for re-admission. Enquiries should be made on a form obtainable from the Examinations Branch, and lodged with the Registrar.
ANNUAL EXAMINATIONS

Most annual examinations take place in November-December although some are held in the mid-year recess. Timetables showing time and place at which individual examinations will be held are posted on the central notice boards in the Bio-Medical Building, Central Lecture Theatre Block, Chancellery, Dalton Building, Main Building and Western Grounds Area. Misreading of the timetable is not an acceptable excuse for failure to attend an examination. Examination results are posted to the term addresses of students. No results will be given by telephone.

All students will receive an enrolment details form by 30th August. It is not necessary to return this form, unless any information recorded there is incorrect. Amended forms must be returned to the Examinations Branch by 15th September. Amendments notified after the closing date will not be accepted unless exceptional circumstances exist and approval is obtained from the Registrar. Where a late amendment is accepted, a late fee of $7.00 will be payable. Amended forms returned to the Registrar will be acknowledged in writing within fourteen days.
STUDENT SERVICES

THE LIBRARY

The University Library is located on the Upper Campus adjacent to the Chancellery, the Commerce Building and the Arts Building.

The Library’s undergraduate collection covers the teaching and research interests of the faculty, and students are expected to read widely and critically from this collection.

It is recommended that students attend the Introduction to the Library which is held at advertised times during Orientation Week and the first week of term.

The Introduction uses audio-visual aids to describe the physical layout of the undergraduate library and the services available to readers.

Copies of the booklet Guide to the Library are available on request.

Students who are interested in a subject approach to information may attend a course which outlines methods of searching for information in libraries. This course runs for eight hours over a period of one week.

Individual assistance for readers with specific library problems is provided by the Reader Assistance Unit which is located in the foyer. Students are welcome to ask for help.

Staff and students must use a machine readable identification card to borrow from the main University Library. For students a current union card is acceptable. Staff must apply to the Library for a library card.

THE UNIVERSITY UNION

The University Union is a common meeting ground for all students. Eating and general recreational facilities are available, as well as a shop for stationery and other student requisites, branches of several banks, a pharmacy, a branch of David Jones, and hairdressing facilities. Membership is compulsory for all registered students.
The Kensington Colleges
Accommodation for students is provided within the group of The Kensington Colleges which comprise Basser College, Goldstein College and Philip Baxter College. The group houses 450 men and women students, as well as staff members. Tutors in residence provide tutorial assistance in a wide range of subjects.

Board and residence fees, which are payable on a session basis, amount to $308 per session. Intending students should apply in writing to the Master, Box 24, Post Office, Kensington, N.S.W., 2033, from whom further information is available.

International House
International House accommodates over 100 students of whom half are Australian; the remaining half is made up of students from some 18 different countries. First-year students who have come to the University straight from school are not eligible for residence because preference is given to mature undergraduates and postgraduate students. Fees are $23.50 per week.

Students should apply as soon as possible if they wish to reside at International House at a later date. They should write to the Warden, International House, P.O. Box 1, Kensington, N.S.W., 2033, for information.

New College
This Church of England College is the first of the independent Colleges on the Campus of the University. There are no religious tests, and accommodation is available for 210 men in single study-bedrooms. Fees are $24 per week.

Enquiries should be addressed to the Master, New College, Anzac Parade, Kensington, N.S.W., 2033.

Warrane College
This College, an affiliated Roman Catholic residential college, was completed in 1970, and provides accommodation for 200 students and fourteen resident tutors.

Basic fees are $23 per week for board and residence, payable on a session basis, and a registration fee of $20. Intending students should write to The Master, Warrane College, Box 123, P.O. Kensington, N.S.W. 2033.

OTHER ACCOMMODATION
Students requiring other than Residential College accommodation may make application to the Student Amenities Service where
current lists are kept of accommodation available at recognised boarding houses, private homes, and in serviced and unserviced apartments.

STUDENT COUNSELLING AND RESEARCH UNIT

The Student Counselling and Research Unit offers a free, confidential counselling service to help students, individually or in groups, to deal with problems, and to make plans and decisions associated with their personal, academic, and vocational progress.

Interviews, and group programmes, are available between 9 a.m. and 8 p.m. each week-day. Appointments may be made at the Unit, which is located at the foot of Basser Steps, or by ringing 663-0351, extensions 2600-2605 between 9 a.m. and 5 p.m.

STUDENT AMENITIES UNIT

This Service is closely associated with the Sports Association and also handles applications for student concession fares and provides a service for students requiring other than College accommodation.

STUDENT EMPLOYMENT UNIT

Assistance is offered in finding full-time employment for evening students, and permanent employment after graduation. The Service is located in the Chancellery, just near the main entrance.

STUDENT HEALTH UNIT

A student health and first aid centre, staffed by a qualified medical practitioner and a nursing sister, is provided by the University. Students are encouraged to attend the centre for advice on all matters pertaining to their health.

CHAPLAINCY SERVICE

This Service is provided for the benefit of students and staff by five Christian Churches (Anglican, Roman Catholic, Methodist, Churches of Christ and Seventh Day Adventist) and by the Jewish congregation. Chaplains are in attendance at the University at regular times. A Chapel is also available for use by all denominations.

FINANCIAL ASSISTANCE TO STUDENTS

The Students’ Union and the University have co-operated to provide assistance to students who are in financial difficulties which are considered likely to prejudice their progress with their studies.
Three forms of assistance are available. In the first, the University considers, in certain circumstances, deferment of the payment of fees; this scheme is not intended to replace the established procedure for granting deferment for short periods but rather to supplement it by making deferment over longer periods possible. Secondly, students in need may receive a cash loan not exceeding $300 from the Student Loan Fund established from contributions made by the Students' Union and the University.

Thirdly, a Students' Union donation has made possible urgent cash loans not exceeding $100 for a period of one month.

In all cases assistance is limited to students with reasonable academic records and whose financial circumstances warrant loans. Students granted assistance of either kind are required to give an undertaking to repay the loan under the conditions agreed upon.

Applications are made personally to the Deputy Registrar (Student Services).

UNIVERSITY CO-OPERATIVE BOOKSHOP LTD.

Membership is open to all students, on payment of a fee of $5, refundable when membership is terminated. Members receive an annual rebate on purchases of books.
STUDENT ACTIVITIES

Appropriate Faculty Associations are open to students in the various courses. Full details are available in other Faculty handbooks, the following list merely indicating the range.

The Commerce Society; The Arts Faculty Society; Dramsoc; The Historical Society; The Politics Club; The French Society; Socratic Society; The Julian Society.

Social Work Students' Association

The Association's primary function is that of a communication channel operating not only among the students themselves but also between students and staff of the School. Opportunities for students to meet informally abound in the many functions held during the year. These include parties, lectures by professional social workers to give the student an insight into social work practice in many areas, and meetings where specific grievances may be aired or certain aspects of the course discussed.

Students become members of the Association automatically on admission to the School of Social Work, and elect an executive committee at an Annual General Meeting held during Session 1 each year. It is through this executive committee that formal liaison with the School's staff can be maintained.

A regular newsletter, "Catalyst", is produced to inform students of current events or planned activities, and to provide a forum for discussion among students.

Representatives of the Association attend meetings of the Australian Association of Social Workers (N.S.W. Branch) and the Council of Social Services of N.S.W., while contact with student bodies in other universities is maintained through the Federation of Australian Social Work Students Association. Further details may be obtained from the Social Work students notice board and the Enquiries Office of the School of Social Work.

Industrial Arts Society

The Industrial Arts Society aims at providing opportunities for students to meet staff and fellow students through both social functions and educational activities such as films, lectures, seminars and visits. It is hoped that through these activities students will arrive at a better understanding of the purpose of their studies and become aware of the opportunities available in the field of Industrial Arts.
Membership is open to all students of the Department of Industrial Arts including postgraduate students. The Annual General Meeting is held in March. Further details regarding membership and activities may be obtained by contacting the Secretary of the Society, C/- Department of Industrial Arts, Western Grounds Area.
SCHOLARSHIPS

Commonwealth University Scholarships

There are three types: OPEN ENTRANCE SCHOLARSHIPS, which are awarded on the results of the Higher School Certificate Examination to students who are under thirty years of age on 1st January of the year in which they begin their course and who, with their parents, are permanent residents of Australia; LATER YEAR SCHOLARSHIPS, which are available to students who have completed at least one year of full-time or two years of a part-time course without failure (age and residential qualifications are the same as for Open Entrance); and MATURE AGE SCHOLARSHIPS, which are available to students who are over thirty on 1st January of the year for which the scholarship is desired, and who have been residents of Australia for at least two years immediately preceding the award of the scholarship. Benefits include payment of all tuition fees and other compulsory fees and living allowances (these latter being subject to a means test). The closing date for applications is 30th September in the year immediately preceding that for which the scholarship is desired. Full particulars and application forms may be obtained from the Officer-in-Charge, Sydney Branch Office, Department of Education and Science, La Salle Building, 70 Castlereagh Street, Sydney, N.S.W., 2000 (Telephone 2-0323).

University Scholarships

The University annually awards up to fifteen scholarships tenable in degree courses to students who have matriculated at the Higher School Certificate Examination; ten scholarships to students who have completed certificate courses (Department of Technical Education); ten scholarships to students who have completed Trade Courses (Department of Technical Education); and ten scholarships to part-time students who have taken the Diploma Entrance course of the Department of Technical Education. The scholarships are tenable in any faculty and exempt the holder from payment of course fees during the currency of the scholarship. Scholarships will be awarded in order of merit on the Higher School Certificate Examination results. Continued tenure of the scholarships requires satisfactory progress. They may be held only by persons who do not hold another award, who are eligible to enrol in the course selected, and whose parents are permanent
residents of Australia. Applications must be lodged with the Registrar within seven days of publication of the award of Commonwealth University Scholarships.

Cadetships and Traineeships

The Commonwealth Public Service offers cadetships each year in a wide variety of fields. British subjects, with Australian citizenship, under the age of 28 years, or 33 years in the case of a cadet social worker, are eligible to apply. Details of vacancies at any one time may be obtained from the University's Student Employment Officer or the Inquiry Officer, Commonwealth Public Service Inspector's Office, Commonwealth Centre, Chifley Square (Cnr. Phillip and Hunter Streets). (Telephone 259-3969).

The New South Wales Public Service offers cadetships and traineeships from time to time for various departments. Enquiries should be made to the New South Wales Public Service Board, 19 O'Connell Street, Sydney. (Telephone 2-0355). Applications will close in October, and early application to the Board is advisable.

The Hospitals Commission of New South Wales, Red Cross and other bodies also from time to time offer scholarships for social work students in later years.

Scholarships in Industrial Arts (B.Sc. Degree)

Two scholarships, valued at $100 per annum, are offered each year by the Institute of Industrial Engineers to students entering the full-time course in Industrial Arts leading to the B.Sc. degree. The scholarships are tenable for four years, and may not be held concurrently with any award except one providing solely for the payment of compulsory University fees.

Teachers' College Scholarships

Scholarships are awarded in open competition in respect of the aggregate of the five best subjects presented at the Higher School Certificate Examination provided that the candidate has a pass in English at any level.

Applicants must have reached the age of sixteen years, and, in general, should not have passed the age of thirty-five years on the date at which training is commenced.

Applications must be made on the form provided. Full-time school pupils may obtain these forms from the principal of the school or college at the end of second term. Other applications may be made by contacting: Officer-in-Charge, Teacher Training Division, N.S.W. Department of Education, Blackfriars Street, Chippendale, N.S.W., 2008 (Telephone: 211 4566).
Applications for scholarships should be made by September 30. Late applications will be considered although no attempt is made to reserve places for late applicants.

Graduates and undergraduates are reminded that later year scholarships are made available from time to time.

Further advice regarding applications for Teachers College Scholarships may be had by contacting the School of Education.

**Graduate Diploma in Industrial Design Scholarships**

Several Scholarships are available for students who wish to enrol in the postgraduate course in Industrial Design leading to the award of a Graduate Diploma. Applicants should have a University degree or a professional level qualification from a Technical College, or such other qualification as may be approved by the University. Past and present employment experience in industrial design is desirable. The value of each scholarship is $400 per annum.

**Scholarships in Health Administration**

A number of scholarships and cadetships up to the value of $2,800 plus fees and allowances are available to students enrolling in courses offered by the School of Health Administration. Details are available from the Head of the School.
The School of Education offers a four-year Bachelor of Science (Education) degree course; a one year full-time course for graduates leading to the Diploma in Education; and also a course leading to the degree of Master of Education.

THE BACHELOR OF SCIENCE (EDUCATION) DEGREE COURSE

The first year of a four-year Bachelor of Science (Education) degree course BSc(Ed), commenced in 1969. The course is designed primarily for the preparation of teachers of science in secondary schools.

One feature of the course is the breadth of study over a range of science subjects. The course also provides depth by requiring that at least one of the science subjects be taken to a minimum of three stages. Another feature is the study of education subjects along with science subjects in the third and fourth years. Two stages of History and Philosophy of Science are included in the course structure to give an understanding of science as a method of inquiry and of its relationship to society.

Students must complete at least one stage of physics, chemistry, mathematics, geology and biological sciences, and in the first year must undertake a programme in chemistry, physics and mathematics and either biology or geology. Stage I subjects have the same content as for the first year science course. Stage II, III and IV science subjects consist of units of science subjects or units designed to meet the special needs of teachers or a combination of these.

Honours

The BSc (Ed) may be awarded with honours. The grade of honours is determined by the quality of work performed throughout the course which includes the fourth year honours research seminar and thesis. The classes and divisions of honours are: Class 1, Class 2 (Division 1), Class 2 (Division 2).

Applications for admission to the honours programme should be made in writing to the Head of School on the completion of third year.
**Progression**

Progression in the Bachelor of Science (Education) Course is permitted by subject. However:

1. Course programmes will continue to be stated and timetabled by year and it cannot be guaranteed that non-standard programmes can be completed in the minimum number of years. A non-standard programme is one which involves enrolment in subjects or units from more than one year or comprises subjects which do not normally constitute a particular year’s course work.

2. Students must satisfy the rules governing re-enrolment; in particular, these require all subjects of the first year to be completed by the end of two years of full-time (or four years of part-time) study.

3. Before enrolling in any subject a student must have satisfied the relevant prerequisite and co-requisite requirements unless permission to vary this has been granted by the Head of the appropriate School.

4. Only in exceptional circumstances will a student be permitted to enrol for more than twenty-four hours of course work per week.

5. Notwithstanding the above, before a student can enrol in any non-standard programme, such programme must meet with the approval of the Head of School of Education.

*Higher Physics I covers the same syllabus as Physics I but at a higher level. Students intending to proceed to further studies of Physics in later years of the course should take 1.011 or 1.001. Students taking Physics IC, which is a terminating course, would only be able to proceed to further studies of Physics if their performance in 1.041 was above average.

†Students taking 10.021 Mathematics IT will not be allowed to proceed beyond First Year Physics.
YEAR 2
Stage II of major subject ................................................. 6
Two Science subjects selected from 17.001, 25.111

*BIOLOGY:

Stages two and three may be selected from the units:

- 41.101A Chemistry of Biologically Important Molecules
- 43.101A Genetics and Biometry
- 43.101B Plant Morphology A or
- 43.101C Plant Physiology
- 45.101B Invertebrate Zoology or
- 45.101C Vertebrate Zoology

One selected from units listed under Stage IV.

Stage IV may be selected from the units:

- 41.101B Metabolism
- 43.101B Plant Morphology A or
- 43.101C Plant Physiology
- 43.102E Environmental Botany
- 44.101A Introduction to Microbiology
- 45.101B Invertebrate Zoology or
- 45.101C Vertebrate Zoology
- 45.101D Field Ecology
- 45.102A Marine Ecology
- 45.102B Animal Behaviour
- 45.102E Invertebrate Behaviour
- 45.201A Insect Structure and Classification
- 73.011A Principles of Physiology

Selection of units is subject to agreement with the Heads of Schools concerned and in making the selection candidates must observe pre-requisites and co-requisites.

**DIPLOMA IN EDUCATION**

Since 1966 a course leading to the award of the Diploma in Education (Dip.Ed.), has been available to graduates from this University or other approved universities. The Diploma is designed to give professional training in education to postgraduate students. It is a one year full-time course, but it is also possible for this course to be taken over two years on a part-time basis. The course is directed, but not exclusively, towards the preparation of teachers for secondary schools. It includes lectures, seminars, tutorials, individual assignments and group exercises, demonstrations of teaching methods and practice teaching.

Seven weeks' supervised teaching practice in schools. Where possible, an additional two weeks unsupervised teaching practice will be arranged before the commencement of the academic year.

**MASTER OF EDUCATION**

The Master of Education course is designed for educationists who wish to study Education at an advanced level. The conditions for the award of the Master of Education degree are set out below. Educational fields from which students will be required to select subjects for study include the following:
Conditions for the Award of Degree of Master of Education

1. An application to register as a candidate for the degree of Master of Education shall be made on the prescribed form which shall be lodged with the Registrar at least one full calendar month before the first session of the year for which the candidate desires to be registered.

2. An applicant for registration shall—
   (i) hold a degree of the University of New South Wales or other approved university,
   (ii) hold the Diploma in Education of the University of New South Wales or other approved university, or possess qualifications accepted by the Board of Vocational Studies (hereinafter referred to as "the Board") as equivalent, and
   (iii) have had at least one year's practical experience in some branch of education acceptable to the Faculty.

3. In special circumstances a person may be permitted to register as a candidate for the degree if he submits evidence of such academic and professional attainments as may be approved by the Board of Vocational Studies on the recommendation of its Higher Degree Committee.

4. Notwithstanding any other provisions of these conditions the Board may require an applicant to demonstrate his fitness for registration by carrying out such work and passing such examinations as the Board may determine.

5. In every case, before permitting an applicant to register as a candidate, the Board shall be satisfied that adequate supervision and facilities are available.
6. An approved applicant shall register in one of the following categories:
   (i) student in full-time attendance at the University;
   (ii) student in part-time attendance at the University;
   (iii) student working externally to the University;
   and shall pay such fees as may be determined from time to time by the Council.

7. Every candidate for the degree shall be required to carry out a programme of advanced study, to take such examinations and to perform such other work as may be prescribed by the Board.

8. The programme of advanced study shall include either:
   (i) the submission of a thesis embodying the results of an original investigation and the study of, and examination in, two fields of education, or
   (ii) the study of, and examination in, four fields of education and the submission of a report on a topic approved by the Board.

9. Students taking the course on a full-time basis will normally be required to complete it within two years and those taking it part-time or working externally within four years. Extensions beyond these periods must be approved by the Board.

10. (i) The investigation provided in paragraph 8 (i) shall be conducted under a supervisor appointed by the Board or under such conditions as the Board may determine.
    (ii) For each candidate who submits a thesis as provided in paragraph 8 (i) there shall be at least two examiners appointed by the Professorial Board on the recommendation of the Board of Vocational Studies, one of whom shall, if possible, be an external examiner.
    (iii) The report on the project provided in paragraph 8 (ii) shall be examined by two examiners.

11. Every candidate who submits a thesis as provided in paragraph 8 (i) shall submit three copies of the thesis in a form which complies with the requirements of the University for the preparation and submission of higher degree theses. The candidate may submit also for examination any work he has published, whether or not such work is related to the thesis.

12. It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part in photostat or microfilm or other copying medium.
The School of Health Administration, which was founded in 1956 with a grant from the W. K. Kellogg Foundation, offers both undergraduate and graduate programmes. The undergraduate course may be taken on a part-time basis and leads to the award of Bachelor of Health Administration. The School also offers one formal course in Health Administration leading to the award of a Graduate Diploma and another to the degree of Master of Health Administration. In addition, the Master's degree and the degree of Doctor of Philosophy may be taken following periods of full-time or part-time research in hospital and health service administration for which the School offers excellent facilities.

BACHELOR OF HEALTH ADMINISTRATION

Conditions for the Award of the Degree of Bachelor of Health Administration

1. A candidate for the degree of Bachelor of Health Administration shall:—
   (a) comply with the requirements for admission;
   (b) follow the prescribed course of study in the School of Health Administration and satisfy the examiners in the necessary subjects.

2. A student who is following the prescribed course of study as a part-time (external) student shall in each year attend the residential school conducted by the School of Health Administration.

3. A full-time student shall be required to complete the first year of the course in not more than two years. A part-time student shall be required to complete the first two stages of his course in not more than four years. Re-enrolment thereafter will be governed by the general regulations of the Professorial Board.

4. A student may be granted advanced standing by the Professorial Board on the recommendation of the Board of Vocational Studies. A student coming from another institution must follow an approved course of study in this University for at least two years if a full-time student or at least four years if a part-time student.

GRADUATE DIPLOMA IN HEALTH ADMINISTRATION

The School of Health Administration offers a course in Health Administration leading to the award of a Graduate Diploma.

The course provides an educational programme for persons employed in the health services who hold a degree, or equivalent qualification, and who wish to qualify for or extend their knowledge of administrative practice.

The Diploma is awarded on the successful completion of the following programme. The course may be taken by one year of full-time study or over two years on a part-time basis.

MASTER OF HEALTH ADMINISTRATION

The conditions for the award of the degree of Master of Health Administration, together with an outline of the formal course are set out overleaf.
In the formal course the students' theoretical instruction is integrated with in-service experience and practical work-training in accordance with the view that administration is a practical art in which theory and practice are complementary and equally essential to the administrator's development.

* This subject is offered by the Graduate School of Business as part of the requirements for the Master of Business Administration degree.
Conditions for the Award of the Degree of Master of Health Administration

1. An application to register as a candidate for the degree of Master of Health Administration shall be made on the prescribed form which shall be lodged with the Registrar by the thirty-first of August of the year preceding that year in which the candidate desires to commence the course.

2. (i) An applicant for registration for the degree shall have been admitted to an appropriate degree in the University of New South Wales or other approved university.

(ii) In special circumstances a person may be permitted to register as a candidate for the degree if he submits evidence of such academic and professional attainments as may be approved by the Board of Vocational Studies (hereinafter referred to as "the Board") on the recommendation of its Higher Degree Committee.

3. Notwithstanding any other provisions of these conditions, the Board may require an applicant to demonstrate fitness for registration by carrying out such work and sitting for such examinations as the Board may determine.

4. In every case, before permitting an applicant to register as a candidate, the Board shall be satisfied that adequate supervision and facilities are available.

5. An approved applicant shall pay such fees as may be determined from time to time by the Council.†

6. Every candidate for the degree shall be required:

(i) To carry out a programme of advanced study; to take such examinations and to perform such other work as may be prescribed by the Board.

The programme of advanced study shall include:—

(a) attendance at the University in a prescribed course of formal work;

(b) attachments to hospitals and other organisations for in-service experience;

(c) the preparation and submission of a report on a project demonstrating originality.

The attachments referred to in paragraph 6(i)(b) and the investigation referred to in paragraph 6(i)(c) shall be under the direction of supervisors appointed by the Board or under such conditions as the Board may determine.

† For details of fees, see earlier under "Fees".
A candidate who has already had adequate and satisfactory in-service experience may, with the approval of the Board, be exempt from the attachments referred to in paragraph 6(i)(b);

OR

(ii) To carry out a programme of advanced study and take such examinations and perform such other work as may be prescribed by the Board. The programme shall include the preparation and submission of a thesis embodying the results of an original investigation or design. The candidate may submit also for examination any work he has published, whether or not such work is related to this thesis.

7. An approved applicant shall register in one of the following categories:

(i) student in full-time attendance at the University;
(ii) student in part-time attendance at the University;
(iii) student working externally to the University.

8. The report referred to in paragraph 6(i)(c) shall be on a topic approved by the Board on the recommendation of the Head of the School before the end of the third term of Year I. Unless permission to the contrary has been granted, a candidate shall be required to submit his report not earlier than four sessions, and not later than six sessions, from the date of registration.

9. Candidates for the award under the conditions contained in paragraph 6(ii) shall not be considered for the award of the degree until the lapse of four complete sessions from the date from which the registration becomes effective, save that in the case of full-time candidate who has obtained the degree of Bachelor with Honours or who has had previous research experience, this period may with the approval of the Board be reduced by not more than two sessions.

10. Every candidate for the degree shall be required to submit three copies of the report or thesis as the case may be. The thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.*

11. It shall be understood that the University retains the three copies of the report or thesis submitted for examination, and is free to allow the report or thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act,

* See Section “C” of the University Calendar.
1968, the University may issue the report or thesis in whole or in part, in photostat or microfilm or other copying medium.

12. For each candidate's report or thesis there shall be at least two examiners, appointed by the Professorial Board on the recommendation of the Board of Vocational Studies, one of whom shall if possible be an external examiner.

13. The award of the degree taken in accordance with paragraph 6 (i) shall depend upon:

   (i) the candidate's performance in his in-service attachments;
   
   (ii) the candidate's performance in the examinations;
   
   (iii) the quality of the candidate's report.
DEPARTMENT OF INDUSTRIAL ARTS

The Department of Industrial Arts offers a B.Sc.* degree available through full-time study and a B.Sc. (Tech.)* degree through part-time study in the general field of Industrial Arts. The subjects required to qualify for the degree are set out elsewhere in this Handbook. At the postgraduate level, the Department offers a course in Industrial Design leading to the award of a Graduate Diploma.

The Subject Matter of Industrial Arts

Through the ages, man has used his intellect, imagination and skill to create useful things. The term "industrial arts" has come to be used to describe these activities.

Man-made objects form a large part of the human environment — shelter, furniture, fabrics, vessels, tools, machines, vehicles and labour-saving devices of many kinds. Although these objects are designed and made primarily for some practical purpose, each individually makes some contribution to the total quality of the environment. Well-designed, well-made things of the practical kind may be considered "works of art"; thus the best products, whether handmade or factory produced are evidence of the industrial arts.

Before the growth of modern industrial society, it was possible to identify the industrial arts with certain skilled occupations, for example, gold and silversmithing, weaving, metalworking, woodworking and pottery. Industrial methods and mass production have changed the forms of intellect, imagination and skill required for the creation of useful objects. Products are now seldom the result of the activity of single individuals, rather they reflect the skills of many people applied through the industrial organisation. The study basic in Industrial Arts is the relationship between man and his material environment. The important elements in this study are man himself, the materials of his environment, the objects he produces and the processes he uses for production.

Such studies can be concerned as much with the useful objects of antiquity as with those of contemporary industrial civilisation. Thus the research activities of the Department of Industrial Arts range from an investigation into the traditional technologies

* These courses have been revised.
of the ancient cultures to an analysis of the problems of industrial design in contemporary technological society.

The Industrial Arts Courses

The courses offered by the Department of Industrial Arts are intended to provide a broad understanding of the man-product relationship, with studies in depth of the most relevant areas of knowledge drawn from natural science, technology, social science and other fields. Of central importance is the subject Industrial Arts. The core study in this subject is Tectonic Design. Tectonics is the science and/or art of making things that are both useful and beautiful. Tectonic design is the process whereby materials, functional requirements, appearance, mechanical factors, cost etc. are related and integrated into products which satisfy human needs. The design strand is supported by parallel studies in graphics, materials, education. Graphics — the “visual language” of design — includes a variety of methods of drawing as well as other methods of visual representation, communication and analysis. The other subjects provide specialised information which is needed for the study and teaching of design, in particular, and of industrial arts generally.

Also included are Engineering I and elective studies in the sciences and general studies.

The Industrial Arts courses cover the major subject areas included in both the secondary and senior secondary school curricula. After completion of the degree, graduates will be eligible to become certificated by the Department of Education as four-year trained teachers.

The undergraduate degree also provides a sound basic education for people intending to seek employment in the design field. A Graduate Diploma course in Industrial Design is available for those wishing to become professional Industrial Designers in either the product design or graphic (communication) design field.

In general, the Industrial Arts courses provide a broad education which embraces the sciences, technological studies, the humanities, social sciences, and the arts. Education of this type is becoming increasingly important for employment in semi-technical fields such as technical sales, engineering administration, work study, technical writing and information services.

As part of the requirements for the degree of B.Sc. (Tech.) which is taken part-time, students will normally be asked to complete an approved programme of experience over a period of not less than three years, concurrently with attendance in the course. These conditions apply to all B.Sc. (Tech.) degree courses offered by the University of New South Wales.
INDUSTRIAL ARTS—FULL-TIME COURSE

Bachelor of Science

A four year course of full-time study leading to the degree of Bachelor of Science (pass or honours).

### Industrial Arts—Part-Time Course

**Bachelor of Science (Technology)**

A course of six years part-time study leading to the degree of Bachelor of Science (Technology). This course is being revised. Students should contact the Head of the Department of Industrial Arts for details.

### Industrial Design Graduate Course

(Graduate Diploma)

The Department of Industrial Arts offers a postgraduate course in Industrial Design leading to the award of a Graduate Diploma. The course provides a broad education in industrial design for those students who hold first degrees. Although it is expected that students will, in general, come from the professions of engineering and architecture, the course has been so structured that graduates with the necessary talents and interests from other disciplines are provided for. According to demand, the course may be available on a full-time basis over one year or on a part-time basis over two years.

---

* The new syllabus does not apply to students enrolled in Year 4 in 1972. Please consult 1971 Calendar for course outline.

† Students are required to undertake such additional field work and clinical studies, averaging 2 hours per week, as may be prescribed by the Head of the School of Applied Psychology.

The School of Librarianship offers postgraduate training leading to the Diploma in Librarianship (Dip.Lib.), and the degree of Master of Librarianship (M.Lib.).

**DIPLOMA IN LIBRARIANSHIP**

The course for the Diploma in Librarianship is designed to provide university graduates with a basic education in librarianship and some opportunity to specialize. Candidates must hold a degree, other than in Librarianship, from this University or other approved university. The University is unable, at this stage, to provide facilities for all eligible applicants, and admission is, therefore, competitive.

The course is a one-year full-time programme, but at present may also be completed in more than one year of part-time attendance. In 1971 a revised programme was introduced and is known as the 1971 Course.

**The 1970 Course**

Details of the 1970 Course, which is being progressively discontinued, are given in the 1970 Calendar. Students registered for the diploma prior to 1971 will be able to satisfy requirements by completing 1970 Course subjects still being offered, or appropriate 1971 Course subjects approved by the Board of Vocational Studies. 1970 Course students must undertake the maximum number of compulsory subjects possible within their programme.

**The 1971 Course**

Students registering from 1971 onwards will undertake this course. It is made up of five compulsory subjects, four optional subjects and an assignment on an approved topic. The selection of optional subjects must be approved by the Head of the School of Librarianship, and must include two from Group I and two from Group II (55.369 Archives counts as two subjects).

MASTER OF LIBRARIANSHIP (MLib) (BY RESEARCH)

Conditions

1. The degree of Master of Librarianship (by research) may be awarded by the Council on the recommendation of the Professorial Board to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

2. Qualifications
   (i) An applicant for registration for the degree shall—
       (a) have been admitted to an appropriate degree in the University of New South Wales or other approved University at a level approved by the Higher Degree Committee of the Board of Vocational Studies (hereinafter referred to as the Committee) and
       (b) hold the Diploma in Librarianship of the University of New South Wales or possess a qualification accepted by the Committee as equivalent.
   (ii) In exceptional cases an applicant may be permitted to register as a candidate for the degree if he submits evidence of such academic and professional attainments as may be approved by the Committee.
   (iii) Notwithstanding any other provisions of these conditions the Committee may require an applicant to demonstrate fitness for registration by carrying out such work and sitting for such examinations as the Committee may determine.
   (iv) In every case before permitting an applicant to register as a candidate the Committee shall be satisfied that adequate supervision and facilities are available.

3. Registration
   (i) An application to register as a candidate shall be made on the prescribed form which shall be lodged with the Registrar at least six (6) weeks before the commencement of the session in which the candidate desires to commence registration.
   (ii) An applicant shall enrol in one of the following categories—
       —student in full-time attendance at the University;
       —student in part-time attendance at the University;
       —student working externally to the University.
In all cases the proposed course of study shall be submitted to the Head of the School of Librarianship for approval.

(iii) A candidate shall be required to undertake an original investigation on a topic approved by the Committee. A candidate may also be required to perform other work as may be prescribed by the Committee. The Committee shall determine the maximum period of registration.

(iv) The progress of a candidate shall be reviewed annually by the Committee on the recommendation of the Head of the School of Librarianship and as a result of such review the Committee may terminate the candidature.

(v) No candidate shall be considered for the award of the degree until the lapse of three complete sessions in the case of a full-time candidate or four complete sessions in the case of a part-time or external candidate from the date from which registration becomes effective.

(vi) Notwithstanding clause 3 (v) above, the Committee may approve remission of up to one session for a full-time candidate or two sessions for a part-time or external candidate.

4. Thesis

(i) A candidate for the degree shall be required to submit three copies of a thesis embodying the results of the original investigation referred to in 3 (iii) above. The thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(ii) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968 the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

5. Examination

(i) A candidate shall give in writing two months' notice of his intention to submit his thesis and such notice shall be accompanied by the appropriate fee.

(ii) For each candidate there shall be at least two examiners appointed by the Committee, one of whom shall be an external examiner.
(iii) A candidate may be required to attend for an oral or written examination.

(iv) Consequent upon consideration of the examiners’ reports the Committee shall recommend to the Professorial Board whether the candidate may be admitted to the degree.

6. Fees
An approved candidate shall pay such fees as may be determined from time to time by the Council.

MASTER OF LIBRARIANSHIP (MLib) (BY FORMAL COURSE WORK)

Conditions

1. The degree of Master of Librarianship (by formal course work) may be awarded by the Council on the recommendation of the Professorial Board to a candidate who has satisfactorily completed a programme of advanced study comprising formal course work and including the submission of a report on a project approved by the Higher Degree Committee of the Board of Vocational Studies (hereinafter referred to as the Committee).

2. Qualifications
   (i) An applicant for registration for the degree shall—
       (a) have been admitted to an appropriate degree in the University of New South Wales or other approved University at a level approved by the Committee, and
       (b) hold the Diploma in Librarianship of the University of New South Wales or possess a qualification accepted by the Committee as equivalent.
   (ii) In exceptional cases an applicant may be permitted to register as a candidate for the degree if he submits evidence of such academic and professional attainments as may be approved by the Committee.
   (iii) Notwithstanding any other provisions of these conditions the Committee may require an applicant to demonstrate fitness for registration by carrying out such work and sitting for such examinations as the Committee may determine.
3. **Registration**

(i) An application to register as a candidate shall be made on the prescribed form which shall be lodged with the Registrar at least six (6) weeks before the commencement of the session in which the candidate desires to commence registration.

(ii) A candidate for the degree shall be required to undertake such course of formal study, pass such examinations and submit a report on a project, as prescribed by the Committee.

(iii) No candidate shall be considered for the award of the degree until the lapse of two sessions in the case of a full-time candidate or four sessions in the case of a part-time candidate from the date from which registration becomes effective. The Committee may approve remission of up to two sessions for a part-time candidate.

(iv) The progress of a candidate shall be reviewed annually by the Committee on the recommendation of the Head of the School of Librarianship and as a result of such review the Committee may terminate the candidature.

4. **Project**

(i) A report on a project approved by the Committee may be submitted at the completion of the formal section of the course, but in any case shall be submitted not later than one year after the completion of such course.

(ii) The format of the report shall accord with the instructions of the Head of School and shall comply with the requirements of the Committee for the submission of project reports.

(iii) (a) The report shall be examined by two examiners appointed by the Committee.

(b) A candidate may be required to attend for an oral or written examination.

5. ** Recommendation for Admission to Degree**

Consequent upon consideration of the examiners' reports and the candidate's other results in the prescribed course of study, the Committee shall recommend to the Professorial Board whether the candidate may be admitted to the degree.

6. **Fees**

An approved candidate shall pay such fees as may be determined from time to time by the Council.
MASTER OF LIBRARIANSHIP COURSES

As the University's facilities are limited, admission may be competitive. Not all subjects will necessarily be available each year.

Master of Librarianship (by research)

In addition to the thesis requirement, each candidate will complete the following two subjects to be taken in one year:

<table>
<thead>

Master of Librarianship (by formal course work)

Advanced training in librarianship by formal course work is designed to provide education in broad areas of specialization beyond the basic professional level. The present programme of study provides a course for those who will specialize in the application of principles to the organization and management of libraries and library departments.

Each candidate will complete the programme of study which may be taken on a full-time basis in one year and on a part-time basis over two years.

In addition to the formal course work, each candidate will be required to submit a report on a project (55.901G) involving individual study and investigation.

There may be occasional field excursions at times to be arranged.

The School of Social Work offers a course leading to the degree of Bachelor of Social Work. A primarily research postgraduate degree of Master of Social Work is also available.

BACHELOR OF SOCIAL WORK (B.S.W.)

This undergraduate course may be taken full-time over four years or part-time over six years. It is designed to prepare students for the professional practice of social work.

The social work profession is primarily focused on problems in man's social relationships — in his interaction with other human beings and with man-made structures. The profession is concerned with the patterns, directions, quality, and outcomes of man's social relationships. It seeks to enhance social functioning by directing its attention both to the capacity of individuals, groups, organizations and communities for effective interaction, and to the contribution of socially-provided resources to social functioning.

Through their professional education, social work practitioners share common knowledge, values and skills. To become a professional person, the social work student needs to be as well informed about broad social welfare problems, policies and provision, and individual, group and sociocultural determinants of behaviour, as he is skilful in the use of social work methods. Members of the profession are particularly concerned that all people are treated with understanding and respect, especially those who are experiencing difficulties in their social living.

The objective of the course is to lay the ground-work for a variety of professional social work tasks. It is concerned with general approaches to problem-solving on a basis of scientific knowledge, professionally accepted values, and skills in interpersonal relations. While each student learns about all the main social work methods—social casework, social group work, community work, administration, and research—special care is taken to ensure that he acquires initial professional competence in at least one. In the later stages of the course the student concentrates upon the professional method of his choice.
The School provides opportunities, both in its regular subjects and in occasional special courses, for experienced social workers to keep abreast of educational developments in their specialized field, or method of work, or in some other field or method in which they have new responsibilities.

Field Education

A fundamental aspect of the course is supervised learning in the field, and this is in fact a basic requirement for the professional recognition of the degree. In the field instruction subjects—Social Work Practice IB, Social Work Practice IIB, and Social Work Practice IIIB—a student is under the supervision of a field instructor of the School, usually in a social work agency, while he learns to apply the principles of professional practice in an actual practice setting. From half-way through second year or the third stage of the part-time course, a total of 178 seven-hour days are taken up in this way. About half of these days are scheduled during academic recess periods. A student's four field work placements will be in more than one type of social work setting. Some of the settings used are: medical, psychiatric, family and child welfare, services to the aged, and corrective services. Non-government agencies and agencies at all levels of government are included in the programme.

Admission to the Course

Students should note that lack of facilities has caused restriction on entry to the course. Part-time students admitted are expected to have time available beyond that required by formal class attendance. Both the full-time and part-time courses are day courses.

Progression

Except with the permission of the Head of School, a student may not proceed to the next year of the full-time course, or the next stage of the part-time course, until he has fulfilled all the requirements of the previous year or stage.

Honours

An Honours degree is awarded for superior performance throughout the course, with greater weight being given to later years. There are three classes of Honours—First, Second (Division 1), and Second (Division 2).

MASTER OF SOCIAL WORK

Conditions for the Award of the Degree of Master of Social Work:

1. An application to register as a candidate for the degree of Master of Social Work shall be made on the prescribed form which shall be lodged with the Registrar at least one full calendar month before commencement of the course.*

2. An applicant for registration shall—
   (i) hold the degree of Bachelor of Social Work at an honours standard in the University of New South Wales, or its equivalent from another approved University, or
   (ii) (a) hold a pass degree in social work of this, or other approved University, or equivalent qualifications accepted by the Board of Vocational Studies, and
   (b) have had at least one year's professional experience acceptable to the Board of Vocational Studies, and
   (c) have successfully completed qualifying work and an examination as approved by the Board of Vocational Studies.

3. In special circumstances a person may be permitted to register as a candidate for the degree if he submits evidence of such academic and professional attainments as may be approved by the Board of Vocational Studies on the recommendation of its Higher Degree Committee.

4. In every case, before permitting an applicant to register as a candidate, the Board shall be satisfied that adequate supervision and facilities are available.

5. An approved applicant shall pay such fees as may be determined from time to time by the Council.

6. Every candidate for the degree shall be required:—
   (i) To carry out a programme of advanced study extending over one academic year;
   (ii) To prepare and submit a thesis embodying the results of an original investigation.

7. An approved applicant shall register in one of the following categories:—
   (i) Student in full-time attendance at the University.
   (ii) Student in part-time attendance at the University.

8. The thesis referred to in paragraph 6 (ii) shall be on a topic approved by the Board of Vocational Studies on the recommendation of the Head of School.

*Preliminary enquiries regarding registration should be made before December 1 of the year prior to registration.
9. Unless permission to the contrary has been granted a full-time candidate shall be required to submit his thesis not earlier than three sessions, and not later than four sessions, from the date of registration; a part-time candidate, not earlier than four sessions, and not later than six sessions, from the date of registration.

10. Every candidate for the degree shall be required to submit three copies of the thesis. This shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

11. It shall be understood that the University retains the three copies of the thesis submitted for examination, and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

12. For each candidate there shall be at least two examiners appointed by the Professorial Board on the recommendation of the Board of Vocational Studies, one of whom shall, if possible, be an external examiner.

13. The award of the degree shall depend upon:
   (i) the candidate's performance in the prescribed programme of advanced study; and
   (ii) the quality of the candidate's thesis.

ADDITIONAL INFORMATION AND ENQUIRIES

Further information may be obtained from the Head of the School of Social Work at Western Grounds Area (Northern End opposite High Street). Telephone 663-0351, extensions 2105 or 2106.
DESCRIPTION OF SUBJECTS

This handbook lists only textbooks. Students should apply to the Head of School for lists of reference books. For General Studies booklists and descriptions of subjects please consult General Studies handbook which is available free of charge.

SCHOOL OF PHYSICS

1.001 Physics I

TEXTBOOKS

Bueche, F. Introduction to Physics for Scientists and Engineers. McGraw-Hill.

Russell, G. J., Dunn, I., and Higinbotham, J. Laboratory Notes for Physics I. N.S.W.U.P.

Russell, G. J., Dunn, I. & Higinbotham, J. *Laboratory Notes for Physics I*. N.S.W.U.P.

**1.102 Physics**

Consists of—

1.112A Electromagnetism and 1.112B Modern Physics

**1.112A Electromagnetism**

Electrostatics in vacuum and in dielectrics. Magnetostatics in vacuum and in dielectrics. Magnetostatics in vacuum and in magnetic materials. Maxwell's equations and simple applications.

**TEXTBOOK**

Whitmer, R. M. *Electromagnetics*. 2nd ed. Prentice-Hall.
PREREQUISITES
1.001 Physics I; 10.001 Mathematics I.

CO-REQUISITES
10.211A Mathematical Methods.

1.112B Modern Physics

Special theory of relativity, Lorentz transformation, relativistic mass, momentum and energy; quantum theory, photoelectric effect, Compton effect; wave-particle duality, Schrödinger wave equation, infinitely deep square well, H atom; spectra, magnetic moment, exclusion principle; Rutherford scattering, nuclear properties, mass spectograph, binding energy, radioactivity, alpha, beta, and gamma radiation, nuclear reactions.

TEXTBOOK

CO-REQUISITES
10.211A Mathematical Methods.

1.103 Physics

Consists of—
1.112C Waves in Continuous Media and Thermodynamics.
1.113A Wave Mechanics and Spectroscopy.
1.113D Astrophysics and Nuclear Physics.
1.113Z Techniques and Design of Experimental Physics.

(An alternative level III Physics unit may be substituted for 1.113A or 1.113D with the approval of the Head of the School. 1.112C, 1.113A and 1.113D are ordinary B.Sc. units; 1.113Z is a special unit.)

1.112C Waves in Continuous Media and Thermodynamics.

TEXTBOOKS
Sears, F. W. Thermodynamics, the Kinetic Theory of Gases and Statistical Mechanics. Addison-Wesley.

1.113A Wave Mechanics and Spectroscopy

Concepts; harmonic oscillator; uncertainty principle; the free particle; barriers, the hydrogen atom, many electron atoms, removal of degeneracy; spectroscopy; molecules; periodic potentials; band structure; perturbations.
TEXTBOOK

PREREQUISITES

1.113D *Astrophysics and Nuclear Physics*
- The observational environment, optical astronomy, radio astronomy, X-ray astronomy, stellar evolution, radio sources, the sun. Detecting instruments and accelerators for nuclear particles, radioactive processes, nuclear reactions, angular distributions, mesons, baryons, excited nuclear states.

TEXTBOOKS
No prescribed textbooks.

PREREQUISITES
1.112B Modern Physics.
1.113A Wave Mechanics and Spectroscopy.
- Students enrolling in 1.103 Physics may take this unit as a corequisite for 1.113A Wave Mechanics and Spectroscopy.

1.113Z *Techniques and Design for Experimental Physics*
- Individual investigation, to develop essential practical skills such as electronic assembly and glass-blowing. Individual or small group projects to solve associated practical and theoretical problems. This unit is a preparation for experimental research and is especially aimed to equip prospective physics teachers to devise experiments and design equipment.

TEXTBOOKS
No prescribed textbooks.

1.104 Physics
Consists of—
- The unit 1.143D Conceptual Framework of Physics and 1.113C Statistical Mechanics and Solid State. (An alternative third level physics unit may be substituted for 1.113C with the approval of the Head of the School of Physics.)

1.113C *Statistical Mechanics and Solid State*
- Thermodynamic potentials, ensembles and partition functions, lattice vibrations, the grand canonical ensemble, Pauli exclusion principle, Bose-Einstein and Fermi-Dirac distributions.
- Structure of crystals, imperfections, specific heat. Band theory of solids, semiconductors.

TEXTBOOKS

PREREQUISITES
1.112B Modern Physics.
1.112C Waves in Continuous Media and Thermodynamics.
1.113A Wave Mechanics and Spectroscopy.
1.143D Conceptual Framework of Physics

Physics and Metaphysics: The place of speculation in theory formation. Space and Time: Systems of coordinates, the nature and arrow of time, parity, micro causality. Fundamental Physical Phenomena: The fundamental phenomena on which physical theories have been based; electrical, gravitational, inertial nuclear and entropy/probability. Field Theory: In particular e.m. and gravitational field theory. Mathematical formalization of physical phenomena, action at a distance, field propagation, field energy, connection to relativity. Relativity: The fundamental postulates, simultaneity, limiting speeds, connection with field theory, mass and energy. Relationship between Micro- and Macro-Cosmos: Divisibility of matter (molecules, atoms, nuclei, nucleon), matter and anti matter, statistical nature of the behaviour of large aggregates or systems, the concept of entropy, the second law of thermodynamics. The place of determinism in physics. Matter and Energy: Conservation laws, inertial mass, equivalence principle, field energy, spatial delimitation of material particles. Theory of Quantum Processes: Granularity effects, uncertainty principle, effects of measurements, virtual processes. Determinism vs. indeterminism in physics, application to nuclear phenomena.

TEXTBOOKS
No prescribed textbooks.

SCHOOL OF CHEMISTRY

2.001 Chemistry I

Classification of matter and theories of the structure of matter. Atomic structure, the periodic table and chemical behaviour. Chemical bonds and molecular structure. Equilibrium and change in chemical systems. The structure, nomenclature and properties of organic compounds. Reactions of organic compounds.

TEXTBOOKS

2.102 Chemistry II (B.Sc. (Ed.))

Comprises Units 2.002A (Physical Chemistry) and 2.002B (Organic Chemistry) from the Science Course.
2.002A  (Physical Chemistry)
Quantum mechanics; molecular energy and thermodynamics; chemical application of thermodynamics; surface and colloid chemistry.

TEXTBOOKS
Shaw, D. J. Introduction to Colloid and Surface Chemistry. 2nd ed. Butterworths, 1970.

PREREQUISITES
2.001 Chemistry I.
10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.
1.001 Physics I or 1.011 Higher Physics I or 1.041 Physics IC.
This unit consists of 6 hours per week for one session.

2.002B  (Organic Chemistry)
Aromatic and introductory heterocyclic chemistry; organometallic compounds; substitution and elimination reactions at saturated carbon atoms; carbanions; dienes.

TEXTBOOKS
2. One of the following:

PREREQUISITES
2.001 Chemistry I.
10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.
This unit consists of 6 hours per week for one session.

2.103  Chemistry III (B.Sc. (Ed.))
Comprises units 2.002C (Inorganic Chemistry) and 2.003A (Physical Chemistry) and 2.003D (Analytical Chemistry) from the Science Course.
2.002C  (Inorganic Chemistry)

Chemistry of non-metals; chemistry of typical metals; transition metals, lanthanides and actinides; introduction to nuclear chemistry. Quantitative inorganic analysis.

TEXTBOOKS

PREREQUISITES
2.001 Chemistry I
10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.

2.003A  (Physical Chemistry)

Physico-chemical aspects of spectroscopy—quantum mechanical approach; electronic and vibrational spectra; nuclear magnetic resonance and electron spin resonance spectroscopy; mass spectrometry. Chemical kinetics—transition state theory; theories of unimolecular reactions; chemistry of excited species.

TEXTBOOKS

PREREQUISITES
2.002A Physical Chemistry.
This unit consists of 6 hours per week for one session.

2.003D  (Analytical Chemistry)

Ionic equilibria in solution; advanced qualitative analysis; advanced electrochemical analysis; advanced spectrophotometry; separations and pre-concentrations.

TEXTBOOKS

**PREREQUISITES**

2.002A Physical Chemistry.
This unit consists of 6 hours per week for one session.

### 2.104 Chemistry IV (B.Sc.Ed.)

Comprises units 2.003B Organic Chemistry and 2.003C Inorganic Chemistry.

#### 2.003B (Organic Chemistry)

Stereochemistry of acyclic systems. *Alicyclic chemistry*: the synthesis and properties of monocyclic systems, conformational aspects of cyclohexane and related systems, rearrangement reactions and the chemistry of fused and bridged polycyclic compounds.

*Heterocyclic chemistry*: the chemistry of pyridine, quinoline, isoquinoline, and benzopyran and its derivatives. The chemistry of pyrrole, furan, and thiophene and their benzo derivatives. The chemistry of pyrimidine, imidazole, and pyrazole.

**TEXTBOOKS**

OR

*One of the following:

**PREREQUISITES**

2.002B Organic Chemistry.
This unit consists of 6 hours per week for one session.

### 2.003C (Inorganic Chemistry)

Molecular structure determination, with particular reference to complex salts, optical activity, crystal structure, systematic chemistry of the lanthanides and transition elements, further chemistry of nitrogen, sulphur and the halogens.

**TEXTBOOKS**

**PREREQUISITES**

2.002C Inorganic Chemistry.
4.911 Materials Science

The atomic structure of metals. The grain structure of metals; origin; modification. Structure of alloys—theory. Structure, properties and heat treatment of commercially important alloys based on aluminium, copper and iron in particular. Corrosion. Control of structure and properties, commercial alloys, materials selection.

4.951 Materials Technology

The structure, properties and technology of wood.

SCHOOL OF MECHANICAL AND INDUSTRIAL ENGINEERING

5.001 Engineering I

A. Introduction to Engineering

(ii) Computers—Introduction and Concepts: Introduction to computers to follow the computer work in Mathematics I. To develop: (a) familiarity with algorithms; (b) the use of procedure oriented languages; and (c) an introduction to computing equipment.

Systems—Introduction and Concepts: Concepts and introduction to systems. To give students an appreciation of some of the concepts used in engineering, to relate the concepts to phenomena within their experience, and to illustrate them by case histories and engineering examples. Quantities. Concepts. Components. Systems.

(iii) Introduction to Engineering Design: Engineering method, problem identification, creative thinking, mathematical modelling, materials and processes, computer aided design, communication of ideas, the place of engineering in society.

C. Engineering Drawing: Fundamental concepts of descriptive geometry, including reference systems, representation of point, line and plane; fundamental problems of position and of measurement. Application of descriptive geometry to certain problems arising in engineering practice. Special emphasis on ability to visualize problems and processes involved in their solution.
Instruction in the correct use of drawing instruments and the application of drawing standards. Measurements and dimensioning. Orthographic and isometric projections.

TEXTBOOKS

Harrisberger, L. *Engineersmanship*. Wadsworth. or
Krick, E. V. *Introduction to Engineering and Engineering Design*. Wiley.
Meriam, J. L. *Statics*. Wiley.
Robertson, R. G. *Descriptive Geometry*. Pitman.

SCHOOL OF MATHEMATICS

10.001 Mathematics I

Calculus, analysis, analytic geometry, linear algebra, an introduction to abstract algebra, elementary computing.

TEXTBOOKS

Blatt, J. M. *Introduction to Fortran IV Programming*. Prentice-Hall.

10.011 Higher Mathematics I

Calculus, analytic geometry, linear algebra, an introduction to abstract algebra, elementary computing.

TEXTBOOKS

Blatt, J. M. *Introduction to Fortran IV Programming*. Prentice-Hall.
Kelly, G. M. *Algebra*. N.S.W.U.P.
Spivak, M. *Calculus*. Benjamin.

10.021 Mathematics IT

Calculus, analysis, analytic geometry, algebra, probability theory, elementary computing.

TEXTBOOKS

Blatt, J. M. *Introduction to Fortran IV Programming*. Prentice-Hall.

*Notes on Sets, Probability, Matrices and Vectors*. N.S.W.U.P.
Information about Textbook for Calculus to be available from the School of Mathematics.

10.911 Mathematics II*

This subject is available only to Arts, B.Sc.(ed.), Commerce and Engineering students and consists of 10.111A, 10.111B and 10.211A.

*Students will be asked to enrol in the component units separately.
10.111A Pure Mathematics II—Algebra

TEXTBOOKS

10.111B Pure Mathematics II—Analysis

TEXTBOOKS
Purcell, E. J. *Calculus with Analytic Geometry*. Appleton-Century-Croft.

10.211A Applied Mathematics II—Mathematical Methods

TEXTBOOKS
Bowman, F. *Introduction to Bessel Functions*. Dover.

SCHOOL OF APPLIED PSYCHOLOGY

12.001 Psychology I

An introduction to the content and methods of psychology as a behavioural science, with special emphasis on (a) the biological and social bases of behaviour, (b) learning, and (c) individual differences.

The course includes training in methods of psychological enquiry, and the use of elementary statistical procedures.

TEXTBOOKS
Part A—Theory

AND
(Recommended as an additional textbook for intending Honours students.)

Part B—Practical

12.012 Psychology II

Research Methods and either (a) the development and structure of personality, or (b) experimental and theoretical problems in learning, plus two topics selected from the following: Physiological Psychology, Human Information Processing, Abnormal Psychology, Social Psychology, Developmental Psychology and Psychometrics.

TEXTBOOKS
Students should consult Head of School for details.
12.013 Psychology III
Research Methods and selected areas are studied at an advanced level. Candidates should select their areas of special study from the following list in consultation with the School of Applied Psychology: Physiological Psychology, Human Information Processing, Abnormal Psychology, Social Psychology, Developmental Psychology, Psychometrics, Psychological Issues, Behavioural Control and Modification, and Psychological Techniques.

Part A—Research Methods III

TEXTBOOKS
Students should consult Head of School for details.

SCHOOL OF ACCOUNTANCY

14.001 Introduction to Accounting
An introduction for non-commerce students to the nature, purpose and conceptual foundation of accounting. Information systems including accounting applications. Analysis and use of accounting reports. Relevance of accounting to managerial and technological functions including planning, decision-making and control.

PRELIMINARY READING

TEXTBOOK

14.023 Accounting for Health Administration
Introduction to the fund theory of accounting. The recording of hospital transactions in the various funds and the preparation, analysis and interpretation of historical accounting reports. Internal control, budgeting and cost analysis in the hospital context.

PRELIMINARY READING

TEXTBOOKS
SCHOOL OF ECONOMICS

15.901 Economics (Health Administration)

An introductory examination of the working of a modern economic system, with some reference to Australian economic institutions and conditions.

The main topics are: consumer demand, cost analysis, market equilibrium, money and banking, pricing of factors of production, investment decisions, international trade, social accounting, social welfare, population trends and policy; and Australian economic institutions, including trade unions, arbitration system, the Tariff Board, the Reserve Bank.

TEXTBOOKS

SCHOOL OF HEALTH ADMINISTRATION

16.001 Management I

Introduction to the theory of administration and management; concepts such as responsibility, authority, supervision, organization, delegation and control; decision-making, aids to decision-making; nature and place of communication in management.

TEXTBOOKS

16.002 Management II

The management uses of operations research; an introduction to principles of computing and data processing; management considerations in data processing—systems analysis, feasibility studies, implementation; the use of O. and M. techniques by management. The management audit and clinical audit.

TEXTBOOKS

16.003 Management III

Extends the principles introduced in Management I and Management II; the distinctions between management and administration, operations and policies; examines policy making, departmental organization and methods of integration; relates the hospital as an organization to administrative bodies exercising restraints on its functions.
16.101 Comparative Health Administration

A comparative study of American, Australian and English health care and hospital systems in relation to: the roles of central, state and local governments and private enterprise, in the provision of care; sources and means of financing health care; hospital ownership, control and operation; personnel and staffing; current problems.

TEXTBOOKS

16.201 Law I

Introduction to the Australian legal system; the formal sources of law, the judicial process; the nature of federalism, the division of legislative power between the Commonwealth and the States; the relationship between Commonwealth and State laws; principles of the law of contract, the sale of goods; agency, insurance, bailments and negotiable instruments; the disposition of property by will, the concept of the trust.

TEXTBOOKS

16.202 Law II

General principles of the law of torts; for example, principles governing liability for negligence, including vicarious liability for the acts and defaults of servants, independent contractors and others; nuisance, trespass to the person, occupier's liability, liability for breach of statutory duty and employer's liability; available defences; a general survey of Commonwealth and State industrial law; other legislation of particular significance to hospital administration.

TEXTBOOKS
16.301 Public Administration IA

The development of the Commonwealth and States' systems of government; distribution of powers between the Commonwealth and States; functions of departments and ministers and statutory bodies such as commissions; responsibilities of the Public Service; staffing structure of the Public Service; its methods of recruitment and training; some reference to systems of public administration in other countries.

TEXTBOOKS

16.302 Public Administration IB

A systematic review of the development and present status of selected social policy issues in Australia presented in their social, political and historic context; attitudes to government and personal responsibility in selected fields, e.g. financing health care, welfare provision, social services, provision of medical services; roles of central and local governments; the private sector in health care; comparative material from U.S.A. and Europe.

TEXTBOOKS

16.401 Hospital Planning IA

Factors influencing the provision, nature and use of community health service institutional facilities; methods of determining demand, use and content; the planning process and the role of planning team members; building design and construction; environmental control systems; contract administration; commissioning and evaluation.

TEXTBOOKS

16.402 Hospital Planning IB

Planning and design for particular functions; interrelationships between clinical departments; nursing units in general; obstetric, paediatric, geriatric and psychiatric care facilities; outpatients and casualty departments; diagnostic and treatment departments; administrative and training accommodation; supply and disposal facilities including laundry, catering and sterile supply.
16.501 Community Health Planning

The expression of social policy in the organization, administration and integration of the following services with those of the hospital: environmental health services; provision for maternal and child care; rehabilitation services; mental health and geriatric services; non-institutional health care and facilities.

TEXTBOOK

16.601 The Hospital as a Social System

The hospital as a social system; goals and values of the hospital; groups within the system; their goals and values; interaction between such groups; relation of foregoing to nature and quality of patient care; interaction between groups within the hospital and groups outside; patients’ attitudes to the hospital and to health care; social, ethnic and regional differences in such attitudes; informal patterns of health care in relation to the hospital.

TEXTBOOKS

16.681 Human Relations in Administration

The content and methods of psychology and determinants of behaviour. Some contemporary theories of social behaviour will be examined and social organization analysed. Findings in the field of group dynamics, with emphasis on leadership behaviour, will also form part of the subject-matter and there will be further studies in communication.

TEXTBOOKS

16.701 Statistics

Sources of statistical data; errors and pitfalls in the use of statistics. Measures of central tendency, dispersion and skewness. Elementary treatment of probability. Introduction to statistical inference; estimation and

**TEXTBOOKS**

**16.901G Health Services Statistics I**

Statistical methods and theory: frequency distributions and their description; an introduction to probability; principles of sampling; estimation and hypothesis testing; statistical decision theory; normal, Poisson and binomial distributions; linear regression; index numbers; time series analysis.

**16.902G Health Services Statistics II**

The application of statistical methods to problems of management and problems of direct relevance to the health care field. Introduction to operations research (inventory theory, queuing theory, linear programming, PERT AND CPM); applications of O.R. to hospital management problems; vital statistics and demography (measures of fertility and mortality, construction and use of life tables); hospital and health statistics; PAS/MAP and other hospital information systems.

**16.903G Health Services Organization**

Relate the material presented in Behavioural Science I and Organization Theory I to the hospital and health care environment. Identification of formal and informal structures within the hospital and health services, and analysis of decision-making roles in these services.

**16.904G Australian Health Care System**

The historical, demographic and epidemiological background to the provision of health care in Australia. The role of the Commonwealth, the States, and other instrumentalities in providing health and hospital services. Financial and economic aspects of the provision of health care. Problems currently besetting the Australian health care system.

**16.905G Health Services Accounting**

This course commences with an examination of basic theory and concept in relation to health service accounting. Particular attention is given to the interrelationship between statistics and accounting; the nature and use of cost data; budget preparation; co-ordination and integration of budgets; accounting for planning and control; cost finding procedures.
16.906G Hospital Organization and Management I

Analysis of the organizational structure of the hospital and its major components in terms of functions, systems, goals, values, professionalism, co-ordination and innovation. The interaction between management and the physical structure. The planning process and the project team, building siting and design, contract administration, cost planning, environmental design, commissioning and evaluation.

16.907G Hospital Organization and Management II

Further detailed analysis of the subsystems of the hospital in terms of operation, staffing, design and communication. Planning and design for particular clinical and non-clinical functions and departments.

16.908G Behavioural Science (Health Administration)

This course is concerned with the social impact of illness upon families and communities; with attitudes towards birth, birth control, health, sickness, healing and death; the relation of culturally determined attitudes to the provision and utilization of health services; relationships between medical, para-medical, and non-medical workers in the health field; problems of health education and deviant social behaviour; the behaviour of the patient.

16.909G Community Health Planning

Factors determining planning, provision and integration of community health care: environmental health services, provision for the aged, the physically handicapped and the mentally handicapped; occupational hygiene programmes; maternal and child health clinics; school medical and dental services; preventive and screening services; health centres; health education; ancillary services.

16.910G Comparative Hospitals and Health Services Administration

Systems of hospital and health services in the United Kingdom, the United States of America and other countries; their sources of finance and the media through which it is disbursed; the authority and responsibilities of administrative bodies concerned; the planning of their services; methods of staffing; demographic and other measures of performance; comparisons with the Australian system.

16.911G Health Services Administration I

The essential elements of administration and the tools of management are examined and related to the particular problems of health service administration. Planning organization; staffing; direction; control; decision-making and communication.

16.912G Health Services Administration II

Administrative roles and relationships of the medical, nursing and other health service personnel, departmental organization, systems analysis, data processing and information systems.
16.913G Health Care Facilities A

The Australian Health Scheme; the role of the Commonwealth, States and other instrumentalities in providing health and hospital services; authority and responsibility of the administrative bodies; legislation; sources and distribution of finance; planning of services; staffing; integration of services.

16.914G Health Care Facilities B

Comparative study of health services in various advanced and developing countries; major differences in policy and administration examined in relation to medical, social, political and economic patterns.

16.915G Health Care Facilities C

The organization and function of non-institutional health care facilities are examined. These facilities include environmental health services; domiciliary health and welfare services; provisions for the aged, physically and mentally handicapped; preventive and screening services; programmes of occupational hygiene; maternal and child welfare clinics; school medical and dental services; health education; ancillary services. The integration of services is discussed.

16.916G Health Care Facilities D

Institutional provision of health care; factors generating content of institutional provision; principles of planning and design as applied to general, special and teaching hospitals and to facilities for community health care and welfare; roles of members of the planning team and methods of communication and co-ordination; the planning process from briefing through planning proposals and construction to contract administration, commissioning, modification and evaluation. Planning and design for particular clinical, administrative and supply functions. Environmental factors in design and operation of buildings.

16.917G Personnel Practice (Health Administration)

Personnel practice—topics include recruitment and selection policies and methods; training; performance evaluation; work measurement; wage and salary administration; authority and discipline; service and benefit schemes; interviewing, counselling; safety.

16.918G Health Services Law

Following an examination of the sources and processes of law, students proceed to a consideration of the law relating to public health, hospitals and hospital authorities, welfare services, mental health and medical practice.
BIOLOGICAL SCIENCES

17.001 General and Human Biology

TEXTBOOKS

REQUIREMENTS FOR PRACTICAL WORK
A list of equipment required for practical work will be posted on the notice board in the ground floor of the Biological Sciences Building. Students must purchase this material before the first practical class.

DEPARTMENT OF INDUSTRIAL ARTS

21.011 Industrial Arts I

The nature of rigorous and structural design. The elements of creative design—design as aesthetic order—its relationship to perception theory and measurement of aesthetic judgment—the notion of value and value keys in design. The theory and nature of colour perception. A brief treatment of the historical background of industrial organization in society—the nature of work and some important psychological, sociological and economic factors in man-machine relationships. Basic industrial work situations and an analysis of the methods used to classify and describe them. Man-machine relationships as a problem in design—human qualities in opposition to and in co-operation with machines—an introduction to the problems associated with the transfer of information, energy and matter between man and machine.

Laboratory and Studio—The execution of prescribed projects in various media illustrative of the principles of design. The study and practice of the principal techniques used in work measurement.

TEXTBOOKS

21.012 Industrial Arts II

The principles of three-dimensional design and design analysis. Introduction to product design—visual fundamentals and visual presentation in two and three dimensions—functional and psychological aspects of product
design. The theories of work factor systems, basic motion-time study, motion-time analysis, and methods-time measurement with particular reference to their human significance.

**Laboratory and Studio**—The execution of three-dimensional projects in various media. Projects in product design. Experimental work and directed observation involving the various methods of work analysis.

**TEXTBOOKS**

Leach, B. *A Potter’s Notebook*. Faber, 1955.

---

### 21.013 Industrial Arts III

The creative process and the factors influencing it—detailed study of and solutions to the problems associated with product design. The philosophy of comprehensive design and its relationship to work—an integrative overview of the attitudes and viewpoints of the designer and the techniques of analysis, synthesis and evaluation currently used. Industrial organization theory—the principal theories of industrial organization from the eighteenth century to the present day. The nature of management and its various functions and methods or organization in western industrial society.

**Laboratory and Studio**—The execution of advanced problems in product design in various media—analysis and criticism. Field work in industry involving the analysis and evaluation of methods of industrial organization.

**TEXTBOOKS**

---

### 21.111 Education I

Two strands: (a) Fundamental theories of education. (b) A social history of education from the nineteenth century.

The theory of education will be concerned with questions relating to the fundamental purposes of education with implications of certain distinctive and influential ideas; the development of these concepts will be traced by reference to the contributions of certain outstanding educational thinkers from Plato to the twentieth century. These ideas will be related to the function of education in an age of crisis. Topics covered will include classical idealism and Christian thought—Renaissance humanism—sense realism and the ideal of universal education—the disciplinary view of education—the rise of naturalism—the psychological trend—the scientific emphasis—contemporary theories of education (conservative theories, supernatralist theories, progressive theories, education and the planned society, the ideal of individual development).

The social history of education from the nineteenth century to the present day will be centred on the development of education in Great Britain and the significance of this for the growth of educational ideas and systems in Australia and America.
21.112 Education II

Two strands: (a) Theories of the curriculum and curriculum development. (b) The sociology of education.

Theories of the curriculum will follow on from the fundamental theories of education discussed in Education I. The elements of this section of the course will include theories of the curriculum, the approach to curriculum construction, criteria for subject-matter selection, patterns of curriculum organizations, research and the curriculum.

The sociology of education—the nature of the field—theoretical orientation (ideological theory, role theory, basic sociological models)—the school as a social system (societal function—roles of teachers—social class and teaching—the pupil population—some general problems of teachers in society)—the family (structure, parent-child relationships—parental roles and behaviours—general stimulation of the Australian home)—the peer group—cultural objects.

TEXTBOOKS

21.201 Freehand Drawing

Teaches the student to see and draw objects as they are, to perceive the structure of natural forms, and to appreciate the causes behind their formation. The practical work in various media, pencil, pen, brush and charcoal, is intended also to develop the ability to express ideas in a visual way. This can later form a basis for the execution of projects in industrial design.

Subjects include: drawing of single objects and groups of objects, figure drawing, drawing from memory, and quick sketching; depiction by line and by light and shade; the principles of free perspective drawing.

TEXTBOOKS

21.211 Drawing and Design

Advanced problems in engineering or architectural drawing and design. Assignments to be carried out in the studio, but tutorials will be given where necessary.

TEXTBOOK
21.801, 21.802, 21.803 Educational Practice
Undertaken in an approved institution.

21.501G Industrial Design

This area of the course is drawn from the existing body of knowledge concerning industrial design. In particular, it will emphasise design principles and the main functions, skills and responsibilities of the designer for industry. The subject matter will be communicated through lectures, tutorials and practical assignments, the aims of which will be to give the students a broad view of design in an industrial society, an aesthetic conviction and sensibility and the skills and methods required for the practice of industrial design.

- Historical, social and aesthetic bases of industrial design.
- Design Methodology.
- Design Principles.
- Signs, Symbols and Communication.
- Ergonomics
- Professional, Commercial and Industrial Practice.
- Design Media.

TEXTBOOKS

21.511G Design Projects

Throughout the course the students will be involved in a continuous series of design exercises and projects, graduated in scale and difficulty and with varying emphasis on particular aspects of design technology.

These projects form the central part of the course. The subjects chosen will relate to the current lecture or case study programmes, so that theory and practice can be integrated. Design projects provide an experience in which technology, design method, aesthetics and social need are synthesized and in which interrelationship must be sought and inconsistencies resolved. The student is brought to face problems involving judgment, choice and decision, some of which can be based on objective, analytical study, whilst others will be more subjective, intuitive and emotive.

The projects will be supervised by the academic staff of the Department with assistance from an appropriate practising designer and, when necessary, academic staff from other sections of the University. Tutorials as well as discussions with individual students will arise from the projects, especially during the design development phase. Opportunity will be given for the student to act as a member of a design team.

At the commencement of each design project the students will be briefed in detail as to the intention, and object of the exercise; this brief will also include basic information, controlling factors, a time schedule and requirements for presentation.
21.501G INDUSTRIAL DESIGN and 21.511G DESIGN PROJECTS

TEXTBOOKS

21.521G Seminar

In general, seminars will be devoted to design theory and philosophy and to the presentation by students of papers on design problems. Seminars will be closely integrated with the other sections of the course work. From time to time, such matters as general design problems, current issues in design, unusual design problems and addresses by visiting designers, will also constitute the topics of seminars.

21.531G Creative Art Elective

SCHOOL OF APPLIED GEOLOGY

25.111 Geoscience I

Petrology—Field occurrence, lithological characteristics and structural relationships of igneous, sedimentary and metamorphic rocks. Introduction to coal, oil and ore deposits.

*Stratigraphy and Palaeontology*—Basic principles of stratigraphy; introductory palaeontology. The geological time scale. The geological history of the Australian continent and more specifically that of New South Wales in introductory outline.

Practical Work—Preparation and interpretation of geological maps and sections. Map reading and use of simple geological instruments. Study of simple crystal forms and symmetry. Identification and description of common minerals and rocks in hand specimen. Recognition and description of examples of important fossil groups. Supplemented by three field tutorials, attendance at which is compulsory.

TEXTBOOKS

Holmes, A. *Principles of Physical Geology*. N.A.P. or
25.502 Geology II (B.Sc. (Ed.) Course)

Practical Work—Crystal forms and the stereographic projection; description and recognition of common minerals in hand specimen.

Invertebrate Palaeontology—Principles of palaeontology and its relationship with the other branches of geology. Systematic description and detailed morphological study of the invertebrate phyla and their subdivisions.

Practical Work—Detailed diagnostic and morphological description of common fossils with reference to their stratigraphic distribution.

Lithology—Principles of classification of rocks; a detailed study of igneous, sedimentary and metamorphic rocks in hand specimen.

TEXTBOOKS

Stratigraphy

Descriptive Mineralogy
Phillips, F. C. An Introduction to Crystallography. Longmans.

Invertebrate Palaeontology
or

25.503 Geology III (BSc. (Ed.) Course)

Petrology—Theoretical principles on the formation of igneous, sedimentary and metamorphic rocks. Magma types and trends of differentiation. Sedimentary rocks and their environment of deposition as revealed by composition, texture and structure. Metamorphic zones. Tutorial classes will illustrate the discussed principles with the aid of a projection microscope.

Geophysics—The earth, its shape, structure and composition. Seismology, gravity, geodesy, geomagnetism and palaeomagnetism.

Oceanography—The oceanic water-masses and their dynamic, physical and chemical properties. Submarine topography and geology, recent sedimentation and sediments of organic origin. Economic oceanography.

Coal Geology—The geology of coal fields; the mineralogy and petrology of coals. The environment of formation and origin of coal.
Structural Geology—The interdependence of geotectonics, tectonics and structural geology. Force, stress and strain within the geological environment. Primary structures; an introduction to secondary structures.

Vertebrate Palaeontology—The rise of the vertebrates and the early amphibians; the reptiles. The flying reptiles and the birds. The early primates and the advent of man.

TEXTBOOKS
Students should consult the School of Applied Geology for details of textbooks for this subject.

25.504 Geology IV (B.Sc.(Ed.) Course)

Economic Geology—Principles and theories of ore deposition. Magmatic, metasomatic, hydrothermal, epithermal and alluvial deposits.

Photogeology—Elements of photogrammetry and photointerpretation. Photogeological mapping. Selected air photographs illustrating geological features will be examined with the aid of stereoscopes and photogeological maps will be produced.

Seminars—Seminar discussion on selected topics from various branches of geology.

TEXTBOOKS
For details contact Head of School.

GRADUATE SCHOOL OF BUSINESS

33.501G Organization and Management Theory

Reviews and examines the structure of organization; the theory on which the structure is based; organization planning; communication within the organization; information systems; the process of decision making. Management is viewed in the light of growth of ideas on the nature of management; the principles of management; the role of the manager and his part in the administrative process.

TEXTBOOKS

33.502G Behavioural Science

A general introduction to the behavioural sciences including: the biological bases of human behaviour; the significance of socio-cultural influences; learning, motivational and emotional processes; measurement of human abilities; perceptual processes; theories of personality development; attitudes; group dynamics; human behaviour in organizations; leadership; selection and training procedures; communication.

TEXTBOOKS

SCHOOL OF BIOCHEMISTRY

41.101A Chemistry of Biologically Important Molecules

The chemical properties of amino acids, peptides and proteins, carbohydrates, nucleic acids and lipids, and porphyrins, and the biological roles of these compounds. The nature and function of enzymes. Practical work to illustrate the lecture course.

TEXTBOOKS

PREREQUISITES
17.001 General and Human Biology.
2.001 Chemistry I.

CO-REQUISITES
41.101B Metabolism.
This unit is offered in Session 1.
41.101B Metabolism
The intermediary metabolism of carbohydrates, lipids and nitrogenous compounds. The molecular mechanism of gene expression and protein synthesis. Practical work to illustrate the lecture course.

TEXTBOOKS
As for 41.101A.

PREREQUISITES
17.001 General and Human Biology.
2.001 Chemistry I.

CO-REQUISITES
41.101A Chemistry of Biologically Important Molecules.
This unit is offered in Session 1.

SCHOOL OF BOTANY

43.101A Genetics and Biometry
Analysis of the mitotic cycle; replication of DNA and its organization in the chromosomes, linkage, non-meiotic recombination; mutation, structural changes, polyploidy, aneuploidy; population genetics; cytoplasmic inheritance; episomes; gene structure and function. An introduction to statistical methods and their application to biological data, including an introduction to analysis of variance and experimental design.

TEXTBOOKS

PREREQUISITES
17.001 General and Human Biology.
This unit is offered jointly by the Schools of Botany and Zoology during Session 1.

43.101B Plant Evolution and Ecology
A study of the evolution of vegetative form and structure of vascular plants; an examination of their organization into terrestrial communities; identification, evolution and distribution of elements of the Australian flora. Field excursions are an integral part of the course.

TEXTBOOKS
PREREQUISITES
17.001 General and Human Biology.
This unit is offered in Session 2. In addition, students will be required to attend excursions as arranged during the course.

43.101C Plant Physiology
Photosynthesis and selected aspects of plant metabolism. Translocation and uptake of inorganic ions; the physiology of growth and development in plants; plant growth hormones and herbicides.

TEXTBOOKS

PREREQUISITES
17.001 General and Human Biology.
2.001 Chemistry I or
1.001 Physics I* or
1.041 Physics IC*
This unit is offered in Session 2.
* In some circumstances this unit may be taken as a co-requisite.

43.102E Environmental Botany
The soil and atmospheric environment in which terrestrial plants exist. Behaviour and response of the flowering plant to its environment, both in nature and agriculture.

PREREQUISITES
17.001 General and Human Biology.
1.001 Physics I or
1.041 Physics IC.
This unit is offered in Session 1.

SCHOOL OF MICROBIOLOGY

44.101 Introductory Microbiology
The general nature, occurrence and importance of micro-organisms. A systematic review of the major groups of micro-organisms: the eucaryotic protista (micro-algae, protozoa and fungi); procaryotic protista (blue-green algae, "higher" bacteria, typical unicellular bacteria and small bacteria-like forms); plant, animal and bacterial viruses. Microbial physiology and genetics. The relationship between micro-organisms and their environment; ecological considerations. Interactions between micro-organisms and higher organisms.
TEXTBOOKS
[Brock is the first choice if no more microbiology is to be taken.]

PREREQUISITES
17.001 General and Human Biology.

SCHOOL OF ZOOLOGY

45.101A  Genetics and Biometry
See under 43.101A.

45.101B  Invertebrate Zoology
A comparative study of the major invertebrate phyla with emphasis on morphology, systematics and phylogeny. Practical work to illustrate the lecture course.
Obligatory field camp.

TEXTBOOK

PREREQUISITES
1.001 Physics I or 1.011 Higher Physics I or 1.041 Physics IC.
2.001 Chemistry I.
10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.
17.001 General and Human Biology.
This unit is offered in Session 2.

45.101C  Vertebrate Zoology
A comparative study of the Chordata. Morphology, systematics, evolution, natural history, with reference to selected aspects of physiology and reproduction. Practical work to supplement the lecture course. Field excursions as arranged. Obligatory field camp.

TEXTBOOKS

PREREQUISITES
As for 45.101B above.
This unit is offered in Session 2.
45.101D  Field Ecology

A lecture series on the basic principles of ecology followed by an examination and evaluation of the field methods used to measure the environment and the distribution and abundance of organisms.

TEXTBOOK

PREREQUISITES
43/45.101A Genetics and Biometry.

CO-REQUISITES
45.101B Invertebrate Zoology.
or
45.101C Vertebrate Zoology.

This unit is offered as a lecture series (two per week) in Session 2 plus a two week camp in November/December at the University's Smith's Lake Field Station.

45.102A  Marine Ecology

A study of the metabolic, regulatory and reproductive activities of marine organisms with particular reference to the physical, chemical and biological environment in which they occur. Both field and laboratory practical work are included.

TEXTBOOK

PREREQUISITES
As for 45.101B above.

This unit is offered in Session 1, and consists of 2 hours' lecture and 4 hours' laboratory time per week.

45.102B  Animal Behaviour

An introduction to ethology, the biological study of behaviour. Physiological, ecological, developmental and evolutionary aspects of behaviour are examined as important elements of the study of causal factors underlying behaviour. Both field and laboratory work are included.

TEXTBOOK

PREREQUISITES
1.001 Physics I or 1.011 Higher Physics I or 1.041 Physics IC.
2.001 Chemistry I.
10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.
17.001 General and Human Biology.
43.101A/45.101A  Genetics and Biometry

This unit is offered in Session 2, and consists of 2 hours' lecture and 4 hours' laboratory time per week.

45.102E  Invertebrate Behaviour

Phylogenetic examination of behaviour in relation to the increasing complexity of invertebrates, with emphasis on orientation and movement; feeding, defensive, reproductive, social and rhythmic behaviour. These studies involve both the exogenous and endogenous contributions to invertebrate behaviour.

TEXTBOOK

PREREQUISITES
1.001 Physics I or 1.011 Higher Physics I or 1.041 Physics IC.
2.001 Chemistry I.
10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.
17.001 General and Human Biology.

This unit is offered in Session 1 and consists of 2 hours' lecture and 4 hours' laboratory time per week.

TEXTBOOK

45.201A  Insect Structure and Classification

A comparative study of the internal anatomy and external morphology of insects. Classification and bionomics of major groups and families. A collection of insects is to be made. Practical work to include dissections, a study of mouthparts, wing venations, segmentation, etc. Field excursions as arranged.

TEXTBOOK

PREREQUISITES
45.101B Invertebrates.
43.101A/45.101A Genetics and Biometry.

This unit is offered in Session 1, and consists of 2 hours' lecture and 4 hours' laboratory time per week.
SCHOOL OF SOCIOLOGY

53.121 Sociology IT

For students taking only one year of sociology. The course deals with basic issues of theory and method in the discipline. It will endeavour to impart an understanding of the sociological perspective, the methods used by sociologists to collect information, and to introduce students to the major areas of sociological research. Any student who decides, after completing this course, that he wishes to do further work in sociology, must obtain the permission of the Head of the School of Sociology and will be required to do extra work before permission is granted.

TEXTBOOKS

SCHOOL OF LIBRARIANSHIP

55.112 Libraries and Information

The role of the library in the total communication system of society, as an agency for the preservation, dissemination and development of knowledge and information. The history of libraries and their involvement in social and technological change. The provision, functions and services of various types of library with particular reference to the Australian environment. The role of the librarian in the library and in the information process; the library profession. Librarianship in relation to information science.

55.114 Communication and Record

The communication process. The development of various kinds of record to serve communication and to preserve knowledge. The development of printing and the book, and of other forms of record. The effects of recent technical innovations in transmitting and recording information. Reproduction in relation to the diffusion of knowledge and to libraries. The mass media and their role in communication. The inter-relationships of the printed word, reading and the mass media.

55.122 Library Materials Selection and Organization

The selection and acquisition of library materials in all physical forms. The book trade and other sources of supply. The cataloguing, classification, indexing and circulation of materials in relation to the needs of users. The role of mechanization and automation.
TEXTBOOKS

55.123 Reference Service and Materials

(a) Information sources, especially reference books, and their uses in library processes and reader services. Using publications to provide information at various levels in different library situations. (b) The bibliography as a record of publication in the mass and as a guide to individual items. National, trade and subject bibliography. Indexes and abstracts. (c) Reference books not limited to a particular subject; publication methods, coverage, organization of content, studied in relation to purpose and use. (d) The principles and methods of reference work. Its place in the total information network and in library service. Question analysis, search strategy and presentation of results to the user. The relationship of traditional reference methods to the design of mechanized information retrieval systems.

TEXTBOOK

55.124 Library Administration

The principles of administration and their application to libraries. Setting library objectives and measuring library achievement. Tools and methods of administration. The management of library staff and library finance. Administrative implications in the provision of library services and the adoption of techniques including electronic data processing. The authority relationships of libraries; the library in the political process.

TEXTBOOK

55.231 Subject Bibliography: The Humanities

55.232 Subject Bibliography: The Social Sciences

55.233 Subject Bibliography: Pure and Applied Sciences

55.238 Subject Bibliography: Government Publications

The structure of the literature, with special reference to the information and research needs of users. Publications embodying original work, criticism, exposition, popularisation. The major reference works in the field. Important collections in libraries, and other sources of publications and information. Problems of availability of resources.
55.232 Subject Bibliography: The Social Sciences

TEXTBOOK

55.238 Subject Bibliography: Government Publications

TEXTBOOK

55.239 School Curricular Materials

Evaluation and selection of book and non-book materials for use by staff and students in the school learning programme, based on a study of subject syllabi. The compilation of subject bibliographies to support the learning and teaching processes. Methods of relating and presenting materials.

55.362 Mechanized Systems for Libraries

Systems analysis and design for libraries. The application of electronic data processing techniques to the control of library systems for acquisitions, serials processing, circulation control and for the production of library catalogues.

Computers and allied hardware. Basic concepts of programming with emphasis on the type of programming problems encountered in library automation and document organization. Programming languages and their suitability for the solution of library problems.

Principles and methods of information indexing, storage and retrieval for machine systems. Automatic indexing.

The state of automation in libraries and the impact on libraries of mechanized information systems such as MARC, MEDLARS, Chemical Abstracts Service, and of experiments in on-line systems such as Project INTEX.

TEXTBOOKS

55.369 Archives

Archives history, definition, institutional relations, and uses in public administration, the law and historical studies. Archives legislation, administration, organization, preservation, services. Management of current records, especially in relation to archival preservation.

55.371 Children's Literature

A survey of printed materials for children and young adults in relation to their needs, interests and abilities. Criteria for evaluation and selection for library collections. Use of materials in reading guidance with children and young adults.
55.373 Public Libraries

The purpose of the public library in the community examined through (a) a comparative study of public library services with emphasis on special programmes of service to adults, young adults and children; (b) surveys and plans for the introduction of library service to specific regions.

55.378 University and College Libraries

Trends and developments in tertiary education in relation to the purposes and functions of university and college libraries.

The library's response to the university environment and to the library user through its resources and services.

55.381 Special Libraries

The nature of special libraries and the environments in which they operate. The evolution of the special library. The relationships of the special library to its parent organization, to its users and to other sources of information. The functions of the special library and their translation into appropriate services. Systems and techniques relevant to special libraries including mechanized information systems. Staffing, siting, planning special libraries. Measurement of special library effectiveness.

55.387 School Libraries

A comparative study of the development of the role of the library in the school in relation to educational thought and practice.

Provision, administration and organization of school library resources and services on national, state and local levels for staff and students.

TEXTBOOKS

MASTER OF LIBRARIANSHIP

55.801G Library and Information Services Management A

Legislative and financial aspects of library provision. Libraries in the political process. Authority relationships and the nature of the library as a bureaucracy.

Siting and planning of libraries. Patterns of administrative organization in libraries. Position classification and personnel administration. The management of library finances.
55.803G Library and Information Services Management B

The assessment of information needs of various groups and the design of appropriate services. The integration of libraries in information networks. Applications of operations research and computer technology in library management and in the dissemination of information by other agencies. Evaluation of libraries and other information services.

55.805G Issues in Librarianship

Contemporary issues in librarianship, including the provision of libraries and information by governments and by private enterprise; automation, information, science and libraries; cataloguing, classification and bibliographical control; problems of publication growth and library size; libraries in the social environment.

55.807G Research Methods in Librarianship

The nature, potentialities and limitations of research methods. The evaluation of a number of research programmes in librarianship and information science.

SCHOOL OF EDUCATION

58.011 Australian Education

The examination of the features of Australian Education with reference to procedures in some selected countries and with special attention to social factors which influence education in Australia.

TEXTBOOK

58.012 Educational Practice

Classroom organization and practice: individual and group techniques; management; teaching aids (including radio and television). Measurement in education. Curriculum construction and modification. School organization.

TEXTBOOKS

58.013 Educational Psychology

Learning in the classroom. Variables such as growth and development, motivation, personality and group behaviour related to the learning process.
TEXTBOOKS
Bartoshuk, A. K. Motivation.
Lundin, R. W. Personality.
Smith, C. Child Development.
Suedfeld, P. Social Processes.

58.015 Philosophy and Theory of Education

58.016 Seminars

A study of educational issues by means of individually prepared student papers and a variety of small-group discussion techniques including panels, forums and debates.

Method Subjects

58.021 Commerce Method*
58.022 English Method*
58.023 French Method*

TEXTBOOK

58.024 Geography/Social Studies Method*

TEXTBOOK

58.025 German Method*

58.026 Guidance Method*

58.027 History Method*

*A list of books required is available from the Head, School of Education.
58.028  Library Method*
58.029  Mathematics Method*
58.030/1  Science Method (Double Teaching Subject)*
58.030/2  Science Method (Single Teaching Subject)*

58.031  Spanish Method*
58.032  Slow Learner Method

The Slow Learner Method course is designed to prepare secondary teachers of “Activity” classes. These classes are for slow learners with a variety of problems such as mental or scholastic retardation (or a combination of the two). Student teachers taking this course will be prepared as class teachers in English (with special attention to reading), Mathematics and Social Studies, and in addition will study the method of teaching one particular subject (such as History or English) through the full range of secondary school forms. They will have complete promotion possibilities open to them in the secondary school, and will in no way be professionally limited by undertaking work with “Activity” classes in the early stages of their careers.

The Slow Learner Method course has the support of the Department of Education which will be approached to second a part-time lecturer in the subject to the School of Education.

58.040  Selected Activities

Classes will also be arranged in some other areas relevant to teacher preparation as for example, Health Education and Physical Education and in subjects in which students have a particular interest such as Comparative Education, Philosophy in Education, Experimental Education, Educational Statistics, Society and Education. The subjects offered will be determined by the interest of students and the availability of staff and facilities.

58.050  Supervised Teaching Practice

Seven weeks’ supervised teaching practice in schools. Where possible, an additional two weeks unsupervised teaching practice will be arranged before the commencement of the academic year.

58.401  Education IA

* A list of books required is available from the Head, School of Education.
58.402 Education IIA

58.501 Education I

TEXTBOOKS

PREREQUISITES
1.001 Physics I or 1.011 Higher Physics I or 1.041 Physics IC.
2.001 Chemistry I.
17.001 General and Human Biology.
25.111 Geoscience I.

58.502 Education II

TEXTBOOKS
58.201G Comparative Education

Important educational problems in a number of countries, with special reference to South East Asia. The school and the school child, the professional preparation of teachers, technical education, tertiary education, the school and society. Topics treated in Comparative Education will be related to the Australian educational scene.

58.202G Educational Planning and Administration

General principles of administration applied to the organization and administration of education. The factors underlying the administration of the Australian educational systems, both government and independent. Particular problems of Australian education—e.g. centralization of administration, the comprehensive secondary school, the organization of education for atypical pupils, the role of the school inspector, the relationship between the state and independent school systems. The planning of educational programmes in developing countries with which Australia is associated. The economics of educational planning.

58.203G Educational Psychology

In this treatment of some psychological principles relating to education particular attention will be given to the contribution of educational psychology to classroom teaching, and to problems of learning theory and a selection of learning theorists, developmental theory, motivation and sociological problems for educators.

58.204G Educational Theory in the Twentieth Century

The views and influence of individual thinkers: Dewey, Kilpatrick, Childs, Buber, Berdiaev, Sartre, Russell, A. S. Neill, Homer Lane, Nunn, Riesman, Fromm, Frankl, Maritain, Hutchins, Mannheim, Makarenko. Recent educational theories relating to the curriculum, such as those of Bruner and Schwab. An introduction to modern social theory in relation to education.

58.205G Experimental Education

The methodologies of educational research including statistical procedures and the design of surveys and experiments. The assessment of significant research projects and experiments both in Australia and overseas. Measurement and evaluation in education.

58.206G History of Education

(i) History of Western Education. (ii) History of Australian Education. In each part there will be both a study of movements and cultures as well as of distinguished thinkers. Part (i) will provide a background for understanding (ii) Australian education will trace the growth of national education, the relationship between denominational and national systems, the impact of various acts and the work and influence of men such as Wilkins, Parkes, Rusden and Board.
58.207G Philosophy in Education
Relationship between philosophy and philosophy of education; aims of education; traditional theories such as idealism, pragmatism, existentialism; the relationship between belief and practice, or theory and practice; the notion of education as "practical discourse"; conceptual studies of instruction, indoctrination, critical thinking, creativity etc.; ethical questions such as moral responsibility and character, and the philosophy of punishment; psychological and social aspects of freedom, such as authority and student power, education for aggression or co-operation.

58.208G Child Growth and Development
Selected theories of child development, the development and differentiation of cognitive functioning, motivational and personality variables, problems and methods of research. Factors which modify and support human development will be considered with reference to their educational implications.

58.209G Advanced Statistical Method in Education
The application of probability theory and statistical method to problems of measurement and evaluation in education. Discussion of sampling techniques, the use of linear regression and analysis of variance in experimental designs, and the application of other statistical models to the understanding of educative processes. Particular areas of application are mental testing, educational achievement, and learning.

58.210G Science Education
A survey of recent research in science education; discussion of recent thinking about aims, theories of cognitive growth and principles of curriculum development; an examination of new science curricula in Australia and overseas in the light of the information thus gained.

58.211G Sociology of Education
The methodology of social research including subject matter content of sociology of education, scientific method, and research procedures; the relation between education and society with particular attention given to stratification, social change, equality and inequality of educational opportunity, school systems and minority groups; group structures and dynamics, role theory and reference group theory applied to parent, teacher, and student groups.

SCHOOL OF HISTORY AND PHILOSOPHY OF SCIENCE

62.001 History and Philosophy of Science I
An account of the origins and development of science up to and including the work of Newton. The course will deal mainly with the development of the physical sciences which lead to the establishment of Newton's Physics and the mechanistic world view.
Some of the main topics of the course are: Ptolemy's synthesis of ancient mathematical astronomy, the Copernican theory, Kepler's discovery
of the laws of planetary motion, Harvey's discovery of the circulation of the blood, Galileo's work in dynamics and his astronomical observations, Christian Huyghens and the wave theory of light, and Isaac Newton's work in mechanics and optics.

The course will include the screening of a number of films on the History of Science.

TEXTBOOKS

62.002 History and Philosophy of Science II

Each student taking the course will be required to take part (A) and either part (B) or part (C) as set out below:

(A) The Social History of Science

28 lectures, being an introduction to the study of the scientific enterprise in its social and cultural context. The course will deal with topics such as: the emergence of the scientific movement in Britain and Western Europe, the relations between the State and the community of science, the nature and functions of scientific societies and academies; the influence of technology on science and of science on technology; science and the State in the twentieth century with special reference to specific problems in the U.S.A., Britain, Soviet Union, Germany and the developing nations.

TEXTBOOK

(B) The Principles of the Philosophy of Science

A general introduction to the philosophy of science. Following a preliminary examination of the nature of some of the common forms of argument employed in natural science and mathematics, several of the more central problems of the philosophy of science will be discussed, such as—the structure of scientific theories; the nature of scientific explanation and prediction; the status of scientific laws; confirmation and falsification; the function of models and analogies; the status of theoretical entities; paradigms; and the dynamics of scientific development and change. Historical case studies will be used to illustrate the philosophical issues.

TEXTBOOKS
Hempel, C. G. *Philosophy of Natural Science*. Prentice-Hall.
Kuhn, T. S. *The Structure of Scientific Revolutions*. 2nd ed. Chicago U.P.

(C) Topics in the Histories of the Physical Sciences

The establishment of the atomic theory and the origins of field theory. The evolution of the atomic theory is traced from the time of Dalton to that of Mendeleef, with a careful examination of the steps leading to the determination of atomic weights, the writing of chemical formulae, the establishment of the valencies of the elements, and the construction of the periodic table. Throughout, the complex interrelationship between experiment and theory is emphasised.
In describing the historical development of the concept of field, particular attention is given to the experimental and theoretical contributions of Faraday, to Maxwell's mathematical treatment of the structure of the field, and to the subsequent detection of electromagnetic waves by Hertz. The status of the field concept in modern physics is also considered briefly.

A case-history approach is adopted towards both topics.

TEXTBOOKS

SCHOOL OF SOCIAL WORK

63.001 Australian Social Organization

After an examination of the demographic characteristics of Australia, a number of major organizational areas of Australian society are studied, for example, its organization with respect to industry and commerce, government, the law, religion, and the institutions of social welfare.

The subject calls for extensive reading, associated with regular classroom exercises.

TEXTBOOKS

*Commonwealth Legislation*

*New South Wales State Legislation*
Adoption of Children Act, 1965-1966 and as amended.
Mental Health Act, 1958-1965 and as amended.

63.412 Social Philosophy and Policy

Social policy and administration as a developing subject area overseas and in Australia. The relevance of philosophy.

The analysis of social norms and the underlying values which regulate behaviours in the modern welfare state:
(a) The diverse forms of norms, rules or behavioural prescriptions which exist in this kind of society, and methods of classifying these.

(b) The language and logic of rules.

(c) Societal values and ideologies (social, political, religious), and their relationship to behavioural prescriptions.

(d) The various principles and modes of justification used to support behavioural prescriptions—key social concepts like justice, rights, obligation, equality, democracy, legality, morality.

(e) The need for and limits of rationality.

(f) The values of social welfare.

(g) The values of the social work profession. Professional ethics.

As an exercise in social philosophy and policy analysis, students examine in seminars policy issues under current public discussion in the press, radio, television and parliament.

**TEXTBOOKS**

### 63.421 Social Welfare Systems I

The major historical determinants of the pattern of development of social welfare systems in Australia: overseas and local influences.

**TEXTBOOKS**

### 63.422 Social Welfare Systems II

**Organizational Analysis of Social Welfare Systems:**

The relevance of organization theory for understanding social welfare systems. Five concepts of organizational level—international, national, community, agency, and professional. Dimensions of the system—goals, the objectives, clients and potential clients, the use and availability of resources (personnel, fiscal and technological), auspice or sponsorship, location, external and internal influences, stability and change, the politics of the system. Policy issues inherent in the range of alternatives within and between dimensions.

**Social Welfare Sub-Systems:**

A comparative study of the main social welfare sub-systems in an urban industrial society, with particular reference to Australia. Categories of sub-system—defined by a common social goal—income security, health, housing, education, civil and political rights. Each sub-system is studied in
terms of its major organizational dimensions, as outlined above, and an attempt is made to evaluate the efficiency and effectiveness of each sub-system.

TEXTBOOKS

63.423 Social Welfare Systems III

**Social Welfare Sub-Systems:**

A comparative study of the main social welfare sub-systems in an urban industrial society, with particular reference to Australia. Categories of sub-system: Defined by population category—age groups, physical disability, mental disability, sex, ethnicity, war service, religion, socio-legal deviance, geographic location, occupation, economic status.

Each sub-system is studied in terms of its major organizational dimensions. Its efficiency and effectiveness.

**Social Welfare Planning:**

Different bases of planning and co-ordination:

(a) The relationship between different levels of social organization; functional divisions on the one level of social organization and other linkage questions.

(b) Definition of a social problem as a basis for organization.

Students undertake a project on a selected social problem, studying its definition, incidence, theories of causation, and policies and provision to cope with it.

(c) The role of the social worker and the social work profession in social welfare planning.

The objective in this subject is to develop sound professional judgement in relation to social welfare problems, policies and provision, not to teach social policy practice roles as such.

TEXTBOOKS

63.511 Human Behaviour I

The processes of "normal" growth and development, using a multi-disciplinary approach. The maturational phases of the life cycle, beginning with the prenatal period, proceeding to birth, new-born, infancy, pre-school, childhood, adolescence, young adulthood, middle years, old age. The various frames of reference—biological, psychological, and sociological—used to define and interpret the phases. The interaction of physical, intellectual, emotional, spiritual, and social influences and attributes in a human being.
Individual "careers"—varying conceptions of effective social functioning and well-being. Particular attention is given to the influence of social structures (e.g. families, groups, organizations, communities, and societies) and social processes on the behaviour of individuals; and also on the behaviour of groups and communities. The nature and changing character of these structures in interaction with individuals, groups and communities. The potential for change in the social functioning of individuals, groups and communities. Classroom learning is reinforced by observation of behaviour, under simulated and actual life conditions.

TEXTBOOKS

63.512 Human Behaviour II

An interdisciplinary approach to the development of deviant behaviour at various age stages, in individuals, groups and communities—biological, psychological, and social deviance. Concepts of disease and pathology; of social problems—definition, incidence, etiology. Differences and similarities. Classroom learning is reinforced by observation of behaviour, under simulated and actual life conditions.

TEXTBOOKS

63.611A Social Work Practice IA

The analysis of various forms of interpersonal communication with particular emphasis on its behavioural effects; the principles and techniques of interviewing. Emphasis is placed on experiential learning—through role-playing and skill-practice exercises, video-tapes and tape-recordings, students learn preliminary skills in interpersonal helping.
An introduction to social casework—its historical and present level of development, the nature of basic social casework theory.

A brief introduction to the social work methods of social group work, community work, and social welfare administration. Relationships between the major social work methods.

TEXTBOOKS

63.611B Social Work Practice IB

Under the supervision of a field instructor of the School, usually in a fairly structured social work agency, a student begins to learn to apply the principles of professional practice. The emphasis is on work with a range of clients and of social problems, rather than on depth of experience. The prime purpose is to begin to acquire, in an actual practice setting, skills and responsibility in interpersonal relations.

The duration of this first field placement is 42 working days (294 hours).

63.612A Social Work Practice IIA

One stream deals in turn with further learning in social casework, social group work, community work, and social welfare administration.

A parallel stream considers: The professions in modern industrial societies. The professionalization of social work. The organization of the social work profession in Australia, the U.S.A. and Britain, and internationally—its educational institutions, employing agencies, and professional associations. The size, characteristics, location, objectives, and values of the profession. Current challenges and growing points of the profession.

In Session 2, workshops are held on research methodology as related to problems in social work practice.

TEXTBOOKS
63.612B Social Work Practice IIB

Part 1—Usually as a member of a student unit located in a social work agency and supervised by a field instructor of the School, the student has learning experiences which help him to acquire skills in the casework method. Stress is placed on gaining self-awareness, understanding of conscious use of self in interpersonal relationships, and skills in problem definition and interpersonal helping. In the course of this placement the student gains understanding and responsibility in job management.

The duration of this second field work placement is 45 days (315 hours).

Part 2—The emphasis in this third supervised field placement is upon field evaluation of aspects of service, using a theoretical basis gained from classroom teaching. For instance, students may devise means to evaluate their own interpersonal practice or the agency's method of delivery of service to clients or the effectiveness of a particular form of social work or social welfare intervention.

The duration of this placement is 40 days (280 hours).

63.613A Social Work Practice IIIA

Divided into two major concurrent sections. The first section, taken by all students, deals with social welfare administration, followed by a study of social work practice delineated by field, such as the health field, family and child welfare, corrective services.

The second section, which uses a variety of educational methods, concentrates upon gaining professional competence in one of the following social work methods—social casework, social group work, community work, or social welfare administration. The last two of these elective methods can only be taken with the permission of the lecturer concerned.

TEXTBOOKS

Social Casework Elective
Social Group Work Elective

**Community Work Elective**

**Social Welfare Administration Elective**

**63.613B Social Work Practice III**

Usually as a member of a student unit located in a social work agency and supervised by a field instructor of the School, the student has further learning experiences in the social work method on which he has elected to concentrate in Social Work Practice IIIA.

The duration of this fourth and final placement is 51 days (357 hours).

**SCHOOL OF PHYSIOLOGY**

**73.011A Principles of Physiology**

An introductory course in physiology. It considers in some detail the basic problems of homeostasis encountered in man and animals. Function is considered at cellular and systemic levels, and examples are drawn from mammalian and invertebrate species.

**TEXTBOOK**

**PREREQUISITES**

17.001 General and Human Biology.

10.001 Mathematics I or 10.011 Higher Mathematics I or 10.021 Mathematics IT.

2.001 Chemistry I.

This is a two-unit course that will continue for 6 hours each week throughout the year.
