Welcome to Science at UNSW

Whether you are beginning studies as an undergraduate student, or are continuing on to postgraduate courses or research, we hope that your experience at UNSW will exceed your expectations, and that your studies in Science will provide you with an education which is second to none and the basis for a rewarding career.

Students study science for many different reasons. Some are looking to establish themselves in particular science-based industries or professions, some are looking to science to enhance or complement their studies in other areas such as law or medicine or commerce, while others study science because they have a passion for it or are fascinated by it as a tool to understand the world.

Whatever your reasons for studying science, we have subjects or programs which will meet your needs. Your program of study can have a strong vocational orientation or be quite general. It can lead to research in a particular discipline, or incorporate non-science areas in a multidisciplinary combination. Most programs are very flexible, providing a degree of specialisation and also the option to include subjects of your own choice.

The UNSW science courses have a reputation which is unsurpassed in Australia. The Science Faculties are renowned for their research, and all of our staff are committed to providing the best possible science education and to sharing their enthusiasm for their areas of interest with you.

This Handbook provides the basic information on the science courses and Faculties. However, it can only indicate the full range of possibilities which are open to you. All of the science staff are ready, willing and able to provide advice on administrative matters, and on subject, course and career options. Students are thus encouraged to approach staff to discuss any concerns they have.

We wish you every success in your studies in Science at UNSW, and hope that the time you spend with us as valued members of the UNSW community will be happy, stimulating, productive and rewarding.

C E Sutherland
Dean
Faculty of Science and Technology, and BSSM

MJ Sleigh
Dean
Faculty of Life Science
This Handbook is designed as a detailed source of information in all matters related to the Faculties of Life Science and of Science and Technology, and more generally to science at UNSW. Other information sources include the Student Guide, which is distributed at no charge to all students, and which provides information on the University as a whole, on many of the services available to students, and on some important rules and guidelines. For other details on some aspects of the University, students may need to consult the University Calendar.

Science at UNSW

The education and academic activities at UNSW are organised around the Faculties. Two of these, the Faculties of Life Science, and of Science and Technology, are focussed towards providing teaching and research in the sciences. Others, including Engineering, Medicine, Arts and Social Sciences, and Commerce and Economics, also make a major contribution to activities in the sciences.

The basic educational building blocks in the sciences are the subjects which students take. These subjects are drawn together into programs of study providing coherent development of specific disciplines, and these programs are in turn drawn together to form courses. These programs and courses are listed in the contents pages, and are described in detail in the body of this Handbook, as are the subjects which make up these programs.

Each subject is assigned a credit point or CP value, typically 7.5 or 15. This is intended to indicate the workload required of students to satisfactorily complete the subject. A good rule of thumb is that one credit point corresponds to 10-12 hours of student effort, both in and out of class.

Because science draws on so many Faculties, UNSW has created an inter-Faculty body called the Board of Studies in Science and Mathematics or BSSM to administer the majority of the undergraduate science programs. Some of the more specialised science programs, and all postgraduate programs, are administered by the Faculties themselves.

Some People Who Can Help You

Enquiries related to administrative aspects of most of the science programs should be made at the BSSM or Science Office, located in the lower ground floor of the Electrical Engineering Building (reference G18 in the map at the back of this handbook). Academic enquiries relating to these programs should be made in the relevant School.

All types of enquiries concerning the other undergraduate science programs, and all postgraduate enquiries, should also be directed to the relevant School.
The academic year is divided into two sessions, each containing 14 weeks for teaching. Between the two sessions there is a break of approximately six weeks, which includes a one-week study period, two weeks for examinations, and three weeks recess. There is also a short recess of one week within each session.

Session 1 commences on the Monday nearest 1 March.

Board of Studies in Science and Mathematics

The Board of Studies in Science and Mathematics is a coordinating body for undergraduate science courses, and its staff includes all members of the Faculty of Life Sciences and the Faculty of Science and Technology, and some members of specific schools in other faculties contributing to the Science and Mathematics Courses: Philosophy, Science and Technology Studies (Arts and Social Sciences); Accounting, Economics, Information Systems (Commerce and Economics); Electrical Engineering, Computer Science and Engineering, Chemical Engineering and Industrial Chemistry, Mechanical and Manufacturing Engineering, Geomatic Engineering (Engineering); Anatomy, Community Medicine, Physiology and Pharmacology (Medicine).

Dean

Kevin Malcolm McConkey, BA PhD Qld.

Professors of Psychology
Joseph Paul Forgas, BA Macq., DPhil DSc Oxf.
Barbara Jean Gillam, BA Syd., PhD A.N.U.
Edward James Kehoe, BA Lawrence, MA PhD Iowa
George Paxinos, BA Calif., MA PhD McG.

Associate Professors
Sally Margaret Andrews, BA PhD UNSW
Denis Kingsley Burnham, BA N.E., PhD Monash
Peter Frank Lovibond, BSc MSc(Psychol) PhD UNSW
Marcus Taft, BSc PhD Monash
John Eaton Taplin, BSc PhD Adel.
Reginald Frederick Westbrook, MA Glas., DPhil Sus.

Senior Lecturers
Austin Sorby Adams, BA Adel., MA PhD Mich.
Kevin Douglas Bird, BSc PhD UNSW
Peter Charles Birrell, BA Syd., PhD UNSW
Richard Allan Bryant, BA Syd., M ClinPsych PhD Macq.
Jacquelyn Cranney, MA Qld., PhD BrynMawr
Gail Florence Huon, BSc PhD UNSW
Skye McDonald, BSc Monash, MSc Meltb., PhD Macq.
Rick Richardson, MA PhD Kent State
Kipling David Williams, BSc Washington, MA PhD Ohio State
Ann Marina Williamson, BSc PhD LaT.

Lecturers
Paul William Bamkin Atkins, BA Macq., MCogSc UNSW, PhD Camb.
James Edward Harold Bright, BA PhD Nott.
Jane Louise Henry, BA M Psychol PhD Syd.
Melanie Gleitzman, BA PhD UNSW
Meg Rohan, BSc Toronto, DipEd Sturt CAE, MA PhD Waterloo
Karen Elizabeth Salmon, BA PhD Otago, Dip ClinPsych MSc Cant.
Sherry Kim Schneider, BA Central Coll. Iowa, MA PhD Calif.
Branka Spehar, BS MS Zagreb, MA PhD Rutgers

Associate Lecturer
Janine Ann Stennett, BA A.N.U.

Senior Administrative Officer
Trevor John Clulow, BA UNSW, MA Syd.

Administrative Assistants
Jasmin Carmen Schoengen
Vee Scott
Vera Thomson
Fu-Kiu Wong, BA CUHK
Clinical Psychologist
Richard O'Kearney, BA Qld., DipAppPsych Flinders, MPsychol Syd

Laboratory Manager
Paul Nolan

Professional Officer
Angus John Fowler, BSc UNSW

Visiting Professor
Stephen Bochner, BA Syd., MA Hawaii, PhD UNSW

Visiting Fellow
Rob Hall, BA PhD Macq.

Emeritus Professor
Sydney Harold Lovibond, BA Melb., MA PhD DipSocSc Adel., FASSA

Honorary Visiting Fellow
Keith Raymond Llewellyn, BA PhD Syd.

Centre for Biofouling and Bio-Innovation

Directors
Staffan Kjelleberg, BSc PhD Göteborg
Peter Steinberg, BSc Maryland, PhD Calif.

Postdoctoral Research Fellows
Rocky de Nys, MSc Otago, PhD James Cook
Carola Holmström, BSc Umea, PhD Göteborg
Scott Rice, MSc Nth Carolina, PhD Tennessee

Office Manager
Adam Abdool

Centre for Entomological Research and Insecticide Technology
(in association with Unisearch Limited)

Director
Christopher John Orton, BSc PhD UNSW

Honorary Visiting Fellows
Erik Shipp, BSc Syd., PhD UNSW
Mads Mourier, BAgSc Cand.Agro RVAU Copenhagen
Anthony William Sweeney, BSc MSc PhD Syd
Christopher Terence Frances Virgona, BSc UNSW
Faculty of Science and Technology

Comprises Schools of Chemistry, Geography, Geology, Materials Science and Engineering, Mathematics, Optometry, Physics, and Safety Science, the Department of Aviation, the Centre for Chemical Analysis, the Surface Analysis Facility, the Centre for Advanced Numerical Computation in Engineering and Science, the Centre for Marine and Coastal Studies, the Cornea and Contact Lens Research Unit, the Cooperative Research Centre for Eye Research and Technology, the Optics and Radiometry Laboratory, the UNESCO Centre for Membrane Science and Technology, the National Pulsed Magnet Laboratory, the Centre for Remote Sensing and Geographic Information Systems and the UNSW Groundwater Centre.

Dean
Professor Colin Eric Sutherland, BSc Cant., PhD Calif.

Associate Dean (Research)
Professor Robert Graham Clark, BSc PhD UNSW, MA Oxf.

Presiding Member
Dr Morgan Eugene Cyril Sant, BA Keele, MSc PhD Lond.

Administrative Officer
Vacant

Scientific Communications Manager
Stephen Ford, BSc UNSW

Administrative Assistant
Anita Joan Clarke

Department of Aviation

Professor and Head of Department
Jason H Middleton, BSc PhD Monash

Director of Flight Operations
Greg Clynick, BSc Macq., BTech C Sturt

Senior Lecturer
Rodger Robertson, BSc(Hons) MCom UNSW

Lecturer
Leonard Sales

Research Associate
Graham Braithwaite, BSc PhD Loughborough

Instructors
Graeme White
Anthony McFadyen
Ben Young, BAv UNSW

Aviation Services Officer
Lili Suhartono
School of Chemistry

Professor of Physical Chemistry and Head of School
Russell Francis Howe, BSc PhD DSc Cant., CChem, FRACI

Professor of Analytical Chemistry
David Brynn Hibbert, BSc PhD Lond., CChem, MRSC, FRACI

Professor of Inorganic Chemistry
Ian Gordon Dance, MSc Syd., PhD Manc., CChem, FRACI, FAA

Professor of Organic Chemistry
David St Clair Black, MSc Syd., PhD Camb., AMusA, CChem, FRACI

Professor
Robert Norman Lamb, BSc PhD Melb., PhD Camb., CChem, FRACI, MAIP

Professor and ARC Senior Research Fellow
Michael Nicholas Paddon Row BSc Lond., PhD ANU., CChem, FRSC, FRACI

Associate Professors
Roger Bishop, BSc St. And., PhD Camb., CChem, FRACI
Norman William Herbert Cheetham, BSc PhD Qld
Michael Guilhaus, BSc PhD UNSW.
Roger Wayne Read, BSc PhD Syd., DIC Lond., CChem, FRACI
Peter Thomas Southwell-Keely, BSc Syd., PhD UNSW., CChem, FRACI
Gary David Willett, BSc PhD LaT., CChem MRACI

Senior Lecturers
Martin Peter Bogaard, BSc PhD Syd
Peter See Kien Chia, MSc PhD UNSW
Stephen Boyd Colbran, BSc PhD Otago
Grainne Mary Moran, BSc PhD N.U.I., CChem, MRACI
Nagindar Kaur Singh, MSc S.Pac., PhD Nott., CChem, MRACI.

Lecturers
Douglas Neil Duffy, MSc DPhil Waik.
Gavin Leslie Edwards, BSc PhD Monash, CChem, MRACI
Ronald Stanley Haines, BSc PhD UNSW
Nicholas Kenneth Roberts, BSc PhD W.A., CChem, MRACI
Derek Richard Smith, BSc PhD Wales

Associate Lecturer
Jeffrey John Gibson, MSc PhD Syd

Director of First Year Studies
Peter See Kien Chia, MSc PhD UNSW

Executive Assistant to Head of School
Douglas Neil Duffy, MSc DPhil Waik.

Administrative Officer
Dorothy Wilmshurst, BA N.E., MEdAdmin UNSW

Technical and Business Manager
Juan Araya

Senior Project Scientist
Joseph John Brophy, BSc PhD UNSW, DipEd Monash, CChem, FRACI

Project Scientist
Naresh Kumar, MSc Punj., PhD W'gong., CChem MRACI

Professional Officers
Donald Chadwick Craig, BSc Syd., MSc UNSW
Richard James Finlayson, MSc UNSW, CChem, MRACI
Lynette June Fitzpatrick, BSc Syd., MSc Macq., GradDip Comp. UNSW
Tahany Ghazy, BSc Cairo, MSc PhD Ain Shams
John Thomas Morgan, BE(Elect) U.T.S.
Richard Szczepanski, BSc UNSW
Nguyen Than Trong, MSc UNSW

Senior Technical Officers
CompChemCert, Syd Tech
Berta Litvak, BSc UTAS, MEdAdmin UNSW
Kim Cheng Pich, BSc U Phnom Penh, MSc PhD UNSW
Hildegard Stender

Technical Officers
Murray Liljeqvist, ChemCert, Syd Tech
Thanh Vo-Ngoc, MSc Tokyo Inst of Tech
David Strizhevsky
Te Ty, ChemCert Syd Tech
Michael McMahon

Administrative Assistants
Leonie Jolly
Linda Palmer
Nilly Ravey
Mary Sharland
Margaret Violet

Mechanical Workshop

Foreperson
Paul Hallahan

Senior Laboratory Craftsperson
Mitchell Davis

Glass Workshop

Senior Technical Officer
Richard Burgess
School Store

Stores Officer
Ian Aldred

Electronics Workshop

Professional Officer
John Morgan, BE (Elect) U.T.S.

Centre for Chemical Analysis

Director
Dr G Crank

Manager
Terence Michael Flynn, BSc UNSW, CChem, MRACI

Universities’ Surface Analysis Facility

Director
Professor R N Lamb

Honorary Visiting Fellows in the School of Chemistry

David Scott Alderdice, MSc Syd., PhD Lond., CChem, FRSC
George Crank, MSc Qu., PhD Monash, CChem, FRACI, FRSC
Brian Raymond Craven, MSc PhD UNSW, ASTC
Tristan John Victor Findlay, BSc PhD St. And., CChem, FRSC, FRACI
Michael John Gallagher, MSc Qld., PhD Camb., CChem, FRACI
Robert John Goldsack, BSc PhD UNSW, CChem, MRSC, MRACI
Harold Andrew Goodwin, BSc PhD Syd., CChem, FRACI
Mervyn Allan Long, MSc PhD Auck., MNZIC, CChem, FRACI
Jaroslav Petr Matousek, IngChem CSc. T.U. Prague, PhD UNSW, CChem, FRACI
David John Phillips, BSc PhD Lond., CChem, MRACI
John David Stevens, BSc Tas., PhD N.E., CChem, MRACI

School of Geography

Associate Professor and Head of School
Ian Harry Burnley, MA Cant., PhD Well.

Professor of Geography
Barry Jardine Garner, BA Nott., MA PhD Northwestern

Associate Professors
Marilyn Dale Fox, BSc Windsor, PhD Macq.
Michael Dick Melville, BScAgr PhD Syd.
Anthony Kinnaird Milne, BA N.E., MA Syd., PhD Colorado

Senior Lecturers
Stephen James Filan, BAgEc N.E., MSc UNSW
Richard Maxwell Lucas, Bsc Bristol, PhD Bristol
Bruno Peter John Parolin, BA Monash, MS Oklahoma State, PhD Ohio State
Morgan Eugene Cyril Sant, BA Keele, MSc PhD Lond.

Lecturers
Kevin Dunn, BA Wgong.
Allan Evans, BSc MSc Alberta
Scott Mooney, BSc PhD UNSW
Jesmond Sammut, BA MSc UNSW

Associate Lecturers
David John Edwards, BSc N'cle.(N.S.W.)
Beverley Ann Scott, BA Macq.

Honorary Visiting Staff
Joan Vipond, BA Phd Macq.
Bruce Thom, BA(Hons) Syd, PhD L.S.U.,

Professional Officer
Chris Anthony Myers, BSc UNSW

Marketing Officer
Frederique Garnier-Waddell

Administrative Officer
John Andrew Braye Cragg, BBus Charles Sturt.

School of Geology

Professor and Head of School
Bastiaan Jan Hensen, MSc Ley., PhD A.N.U.

Associate Professors
Alberto Domenico Albani, DrGeolSc Florence, MSc PhD UNSW
Geoffrey Robert Taylor, MSc Birm., PhD N.E., FGS, MIMM, MAusIMM
Colin Rex Ward, BSc PhD UNSW, FAusIMM, FAIG
Senior Lecturers
Alistair Chisholm Dunlop, BSc N.E., PhD Lond., DIC, MIMM
Jerzy Jankowski, MSc PhD Wroclaw
Paul Gordon Lennox, BSc Tas., PhD Monash
Gregory Hugh McNally, BSc Syd., BA N.E., MAppSc UNSW, DIC, MIEAust
Derecke Palmer, MSc Syd.

Director of First Year Studies
David Ronald Cohen, BSc Syd., MSc Qu., PhD UNSW, FAEG, MAIG

Lecturer
Malcolm David Buck, MSc Waik., PhD Macq.

Emeritus Professors
Gerald James Spurgeon Govett, DSc Wales, PhD DIC Lond., CEng, FIMM, CPEng, FIEAust
John Roberts, BSc N.E., PhD W.A.

Honorary Adjunct Lecturer
Anton Crouch, BA BSc Syd., FAusIMM, MAIG

Administrative Assistants
Jaala Clifford
Kim Russell

Honorary Visiting Fellows
Gerrit Neef, BSc Lond., PhD Well., FGS
Peter Cyril Rickwood, BSc Lond., PhD Cape T., CChem, MRCS, MMSA
Ervin Slansky, BSc PhD RnDr Charles
Robert Trzebski, PhD (Dr.Rer.Nat.)Gottingen

Research Associate
Andreas Moeller, PhD Kiel, MDMG, MEUG, MGSA

School of Materials Science and Engineering

Professor of Ceramic Engineering
Charles Christopher Sorrell, BS Missouri, MS Penn., PhD UNSW, FIEAust, DipDT, FGAA, NICE

Associate Professors
Alan Gordon Crosby, BSc PhD UNSW
Oleg Ostrovski, DiplIng(Met) PhD DSc MISIS, Moscow, MIEAust
Aibing Yu, MSc(Eng) N.E.U.T., China, PhD Wgong.

Adjunct Associate Professor
Paul Richard Munroe, BSc PhD Birm.

Senior Lecturers
Sri Bandyopadhyay, BTech MTech I.I.T., PhD Monash, FIEAust, CPEng MRACI, MAAAS
Oleg Ostrovski, DiplIng(Met) PhD DSc MISIS, Moscow, MIEAust
Aibing Yu, MSc(Eng) N.E.U.T., China, PhD Wgong.

Lecturers
Mark John Hoffman, BE PhD Syd.
Owen Christopher Standard, BE PhD UNSW

Honorary Visiting Professor
Max Hatherly, MSc PhD UNSW, ASTC, CPEng, FTS, FIM

ARC Senior Research Fellow
Yong Zhao, BS MS PhD UTS China

Professional Officers
Jindrich Vavrinec Brancik, MSc Brno, PhD UNSW, MACS, FRSC
Alvin Siu Wah Li, MSc Leeds, PhD UNSW, CText, ATI
John Walton Sharp, BScTech UNSW
Michael David Young, BSc PhD UNSW, CText, ATI

School of Mathematics

Professor and Head of School
Garth Ian Gaudry, BSc Qld., PhD A.N.U.

Professor and Head of Department of Applied Mathematics
Colin Rogers, BA Oxf., MEd Tor., PhD DSc Nott., FIAMA, FInstP.

Professors of Applied Mathematics
Lance Maxwell Leslie, BA Melb., MSc Syd., PhD Monash
Jason Harry Falla Middleton, BSc PhD Monash
Ian Hugh Sloan, BA BSc Melb., MSc Adel., PhD Lond., FAA, FAIP, FAustMS
Associate Professor and Head of Department of Pure Mathematics
Anthony Haynes Dooley, BSc PhD A.N.U., FAustMS

Professors of Pure Mathematics
Michael George Cowling, BSc A.N.U., PhD Flin., FAA
Garth Ian Gaudry, BSc Qld., PhD A.N.U.
Colin Eric Sutherland, BSc Cant., PhD Calif.

Professor and Head of Department of Statistics
William Thomson Mulhinch Dunsmuir, FDisMath RMIT, BSc La T., PhD A.N.U.

Senior Lecturer and Director of First Year Studies
Shaun Anthony Requa Disney, BA BSc Adel., DPhil Oxf.

Executive Assistant to Head of School
Dennis William Trenerry, BSc PhD Adel.

Administrative Officer
Catrine Elizabet Larsson

Visiting Professor
Vidar Thomee, Filkand FilLik Lund, Fildr Stockholm

Computing Centre Manager
Vacant

Deputy Computing Centre Manager
Michael Jurgen Jansen, BSc BEng Syd.

---

Department of Applied Mathematics

Associate Professors
Michael Leslie Banner, BE MEngSc Syd., PhD Johns H. Vaithilingam Jayakumar, BSc Jaffna, PhD Melb.
Liqun Qi, BS Tsinghua, MS PhD Wis.

Senior Lecturers
Peter James Binnehrassett, BE W.A., PhD Lond.
Bruce Ian Henry, BSc PhD UNSW
William Dennis McKe, BSc Adel., MSc Flin., PhD Camb.
William McLean, BSc Qld., PhD A.N.U.
John Francis Falla Middleton, BSc PhD Monash

Director
Dr RI Acworth, BSc Leeds, MSc PhD Birm., FGS

Senior Lecturer
Dr J Jankowski, MSc PhD Wroc.

Lecturer
Leonard Sales
The information in this handbook is set out as follows:

1. General Information

2. Undergraduate Study
This contains:
• Courses: Science and Advanced Science
• Information on how to structure your course
• Program outlines
• Specific, Professional and Combined courses: followed by program outlines of these courses
• Subject descriptions: this section includes HSC requirements, prerequisites, corequisites, exclusions and other notes

3. Postgraduate Study
This contains:
• Courses and Programs: followed by course outlines
• Subject descriptions: this section includes prerequisites, corequisites, exclusions and other notes
• Conditions for the Award of Degrees

4. Scholarships and Prizes

Information Key
The following key provides a guide to abbreviations used in this book:

<table>
<thead>
<tr>

Faculty Information

Science courses are built from the wide range of science and technology-based subjects available across the University.

These courses are divided into two types — the general "Science and Mathematics" and "Advanced Science" courses, and a range of "Vocational Science Courses" oriented more toward professional or industry based careers. These courses, and the programs which they are composed of, are described in later sections of the handbook.

However, the information which follows in this section applies equally to both types of course.

Enrolment Procedures

New students will receive enrolment information with their offer of a place in their chosen course. All students re-enrolling in 1999 should obtain a copy of the leaflet Re-Enrolling 1999: Procedures and Fees for Science Courses. This is available from the Course Administration Office and the Admissions Office. *All quotas are assessed on the basis of applications made at the time of preliminary enrolment. Students enrolling in graduate courses should contact the Postgraduate Section.

The subject timetable for the Science and Mathematics Course and the Advanced Science Courses is available in late October/early November from the Science and Mathematics Course Office, The Undercroft, Electrical Engineering Building. All re-enrolling students should collect one of these timetables along with a preliminary enrolment form (SM99). The preliminary enrolment form is to be completed and returned to the Science and Mathematics Office by late December.

Students not lodging a completed enrolment form before the first day of Session 1 have no guarantee that a place is available in the subjects offered in that year. This is particularly important for subjects where laboratory space is limited. Students should be aware that some subjects may require a field trip which may involve personal costs to the student. Consult individual subject authorities for details.

* It should be noted that quotas apply to certain subjects and programs, as indicated in the relevant programs or subject descriptions.

Credit Points

From 1996, UNSW introduced a university wide credit point system for all subjects offered to both undergraduate and postgraduate students. The system means that a subject will have the same credit point value irrespective of which faculty's course it is counting towards.
Students are able to determine the value of subjects taken from other faculties when planning their programs of study. The student load for a subject is calculated by dividing the credit point value of a subject by the total credit points required for the program for that year of the course. Student load is used to determine both HECS and overseas student fees. Students who take more than the standard load for that year of a course will pay more HECS.

Old subject measures have been replaced by new university credit points. Every effort has been made to ensure the accuracy of the credit point values shown for all subjects. However, if any inconsistencies between old and new credit point measures cause concern, students are advised to check with their faculty office for clarification before making 1999 subject selections based on the credit points shown in this handbook.

---

**General Education Program**

UNSW requires that all undergraduate students undertake a structured program in General Education as an integral part of studies for their degree. The University believes that a general education complements the more specialised learning undertaken in a student's chosen field of study and contributes to the flexibility which graduates are increasingly required to demonstrate. Employers repeatedly point to the complex nature of the modern work environment and advise that they highly value graduates with the skills provided by a broad general education, as well as the specialised knowledge provided in more narrowly defined degree programs. As well, over many years graduates of this University have reported that they greatly valued their General Education studies, which are found to be relevant to both career and personal development.

The General Education Program at UNSW intends to broaden students' understanding of the environment in which they live and work and to enhance their skills of critical analysis.

**Objectives of the General Education Program**

The following objectives were approved by the Council of the University in December 1994,

1. To provide a learning environment in which students acquire, develop, and deploy skills of rational thought and critical analysis.
2. To enable students to evaluate arguments and information.
3. To empower students to systematically challenge received traditions of knowledge, beliefs and values.
4. To enable students to acquire skills and competencies, including written and spoken communication skills.
5. To ensure that students examine the purposes and consequences of their education and experience at University, and to foster acceptance of professional and ethical action and the social responsibility of graduates.
6. To foster among students the competence and the confidence to contribute creatively and responsibly to the development of their society.
7. To provide structured opportunities for students from disparate disciplines to co-operatively interact within a learning situation.
8. To provide opportunities for students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation through non-specialist subjects offered in those other areas.
9. To provide an environment in which students are able to experience the benefits of moving beyond the knowledge boundaries of a single discipline and explore cross- and interdisciplinary connections.
10. To provide a learning environment and teaching methodology in which students can bring the approaches of a number of disciplines to bear on a complex problem or issue.
General Education requirements

The basic General Education requirements are the same for students in all courses:

- Four (4) session length subjects carrying 7.5 credit points each or their equivalent in combinations of session length and year long subjects
- An additional fifty-six (56) hours of study which fosters acceptance of professional and ethical action and social responsibility. This fifty-six hours of study may be distributed throughout the course, or exist as a separate subject, depending on the course.

Because the objectives of General Education require students to explore discipline and paradigm bases other than those of their professional or major disciplinary specialisation, all students are excluded from counting subjects toward the fulfilment of the General Education requirement, which are similar in content or approach to subjects required in their course.

Each Faculty has responsibility for deciding what subjects are not able to be counted towards the General Education requirement for their students. In most cases, this means that subjects offered by the Faculty in which a student is enrolled, or subjects which are a required part of a course even though offered by another Faculty, are not able to be counted toward the General Education requirement. Students may also only count a maximum of 15 Credit Points (56 hours) of General Education Subjects from a single Faculty.

Students should consult the General Education Handbook for detailed information about what subjects may and may not be taken to fulfil the General Education requirements for each course offered by the Faculty. The General Education Handbook is freely available from all Faculty Offices.

Additional information for undergraduate students who first enrolled before 1996

Transitional arrangements

It is intended that no student will be disadvantaged by the change to the new General Education Program. The old Program had specific requirements to complete four session length subjects (or their equivalent) in designated categories A and B. The new General Education Program does not categorise subjects in the same way.

As a result, students who enrolled prior to 1996 will be given full credit for any General Education subjects completed up to the end of Session two 1995.

From the summer session of 1995-96, students will be required to satisfy the unfilled portion of their General Education requirement under the terms of the new Program.

The exemption of General Education requirements for some double or combined degree programs will continue to apply for students who enrolled in these exempt courses prior to 1996.

Computing at UNSW

The Department of Information Services has general responsibility for information technology at UNSW, and for the University Library. Information on both areas may be accessed through the UNSW home page http://www.unsw.edu.au and its "navigation" link, or through the pages http://www.ascu.unsw.edu.au or http://www.misu.unsw.edu.au. using Mosaic or Netscape. In particular, the campus is served by an optical fibre network which supports TCP/IP, IPX and Appletalk protocols.

Within the Faculties of Life Sciences and of Science and Technology, each of the Schools manages or has access to undergraduate computing laboratories equipped with a combination of X-terminals, PCs and MacIntoshes. These are connected through the campus-wide network, and are used extensively in undergraduate teaching and in providing e-mail access to all students.

Many of the Schools also use computing extensively in research and postgraduate education. This is provided through local and often specialised facilities, and through access to regional
and national centres. The systems accessible range from PCs to supercomputers together
with the associated peripherals and support personnel.
Further information on computing is available through each of the Schools' web pages.

Library Information

Faculty of Life Sciences Library Facilities

Although any of the university libraries may meet specific needs, the staff and students of
the Faculty of Life Sciences are served mainly by the Biomedical Library.

The Biomedical Library

The Biomedical Library provides library services for staff and students from the Faculties of
Medicine and Life Sciences, and the Schools of Health Services Management and of Safety
Science.

The Biomedical Library is located on Levels 2, 3 and 4 of the Mathews Building Annexe and
is connected to the other Special Libraries via a link through Level 3 of the Library Building.
Professional staff are available at the Information Desk on Level 2 to provide reference
services and to assist in the use of the catalogues. Instructional classes in the use of the
library and specific subject material can be arranged through the Information Desk. Serials
in the Biomedical Library are shelved in alphabetical order by title and carry the prefix MB or
MBQ. Details about Biomedical Library books, serials and audiovisual material can be found
in the Library Catalogue.

In addition, the Biomedical Library offers the following services: literature searches; on-site
and remote access to a wide range of bibliographic databases; and a document supply
service for external and remote students.

Biomedical Librarian: Jill Denholm

Faculty of Science and Technology Library Facilities

Although any of the university libraries may meet specific needs, the staff and students of the
Faculty of Science and Technology are served mainly by the Physical Sciences Library.

The Physical Sciences Library

The Physical Sciences Library, located on levels 5, 6 and 7 of the Library Building, provides
information for students and staff from the Faculties of Science and Technology, Engineering,
and the Built Environment.

During the academic year, the Library is open from 8.00 to 10.00 Monday to Thursday, 8.00
to 6.00 on Friday and 12.00 to 5.00 Saturday and Sunday. During vacations, Library hours of
opening will vary.

Staff assisted service is available after 10.00am including help with catalogue, CD-Roms,
interlibrary loans, maps and online searching. An information skills program is in place with
emphasis on developing basic information access and management skills for first years and
advanced skills for final year and postgraduate students.
The Library's catalogue and selected CD-Rom databases are available over the Campus Wide Network.

Physical Sciences Librarian: Rhonda Langford

Equal Opportunity in Education Policy Statement

Under the Federal Racial Discrimination Act (1975), Sex Discrimination Act (1984), Disability Discrimination Act (1992) and the New South Wales Anti-Discrimination Act (1977), the University is required not to discriminate against students or prospective students on the grounds of sex, marital status, pregnancy, race, nationality, national or ethnic origin, colour, homosexuality or disability. Under the University of New South Wales Act (1989), the University declares that it will not discriminate on the grounds of religious or political affiliations, views or beliefs.

University Commitment to Equal Opportunity in Education
As well as recognising its statutory obligations as listed, the University will eliminate discrimination on any other grounds which it deems to constitute disadvantage. The University is committed to providing a place to study free from harassment and discrimination, and one in which every student is encouraged to work towards her/his maximum potential. The University further commits itself to course design, curriculum content, classroom environment, assessment procedures and other aspects of campus life which will provide equality of educational opportunity to all students.

Special Admissions Schemes
The University will encourage the enrolment of students who belong to disadvantaged groups through programs such as the University Preparation Program and the ACCESS Scheme. Where members of disadvantaged groups are particularly under-represented in certain disciplines, the responsible faculties will actively encourage their enrolment.

Support of Disadvantaged Students
The University will provide support to assist the successful completion of studies by disadvantaged group members through such means as the Aboriginal Education Program, the Supportive English Program and the Learning Centre. It will work towards the provision of other resources, such as access for students with impaired mobility, assistance to students with other disabilities, the provision of a parents' room on the upper campus, and increased assistance with English language and communication.

Course Content, Curriculum Design, Teaching and Assessment, and Printed Material
Schools and faculties will monitor course content (including titles), teaching methods, assessment procedures, written material (including study guides and handbook and Calendar entries) and audiovisual material to ensure that they are not discriminatory or offensive and that they encourage and facilitate full participation in education by disadvantaged people.

Equal Opportunity Adviser Scheme
The University will continue its Equal Opportunity Adviser Scheme for students who feel that they have been harassed or who consider they have been disadvantaged in their education by practices and procedures within the University.

Harassment Policy
The University is committed to ensuring freedom from harassment for all people working or studying within the institution. It will continue to take action, including disciplinary action, to ensure that freedom from harassment is achieved.
Special Government Policies

The NSW Health Department and the NSW Department of Education and Training have special requirements and policies of which students of health-related and education courses should be aware. The requirements relate to:

- clinical/internship placements which must be undertaken as part of your course
- procedures for employment after you have completed the course

Health-related courses

Criminal record checks

The NSW Health Department has a policy that all students undertaking clinical placements, undergo a criminal record check prior to employment or placement in any capacity in the NSW Health System. This check will be conducted by the NSW Police Service and will be co-ordinated by the Department of Health.

Infectious diseases

Students required to complete clinical training in the NSW hospital system will be subject to various guidelines and procedures laid down for health workers by the NSW Department of Health relating to vaccination and infection control.

An information sheet is available from your course officer and further details can be obtained from your Course Authority.

Education courses

Criminal record checks

It is a requirement that a check of police records be conducted for all teacher education students applying for an unsupervised internship placement in a New South Wales Government school.

Contact your course co-ordinator for further details.
Overview of Courses

The main aims of the Science and Mathematics courses may be summarised as providing opportunities for students to prepare themselves for careers in research, technology, science, mathematics and education, or areas of management or public policy which involve the use of science or mathematics.

The Science and Mathematics Courses (3970; 3978; 3979) lead to the award of the degree of Bachelor of Science (BSc) at pass level on the completion of a three stage program, taking three years of full-time study.

The Advanced Science Courses (3973; 3976; 3985; 3990) lead to the award of Bachelor of Science (BSc) on the completion of a four stage program, at honours or pass level (level of award and honours is based on academic performance), taking four years of full-time study. Depending on their program of study, students in their fourth year undertake either a research honours program or a program of coursework and research.

The time specified (three or four years) is the minimum time required for completion of each course. Students may complete course requirements over a longer period of time or as part-time candidates. Students contemplating part-time study should note that with few exceptions classes are offered in the day only. This applies even at first year level and means that it is not possible to complete studies by evening classes alone.

Both the Science and Mathematics and the Advanced Science courses are controlled by the Board of Studies in Science and Mathematics (BSSM).

Admission

For admission requirements for Science and Mathematics courses see the appropriate entry in the current UAC Handbook.

Applicants for admission to Science and Mathematics courses should note that a number of new UAC entry codes have been introduced which correspond to specific courses and programs of study. UAC entry codes for Science courses are:

- **429000**  Science and Mathematics
  This is applicable to study in a wide range of science and mathematics areas in course 3970 as indicated in the programs outlined on pages 40-42.

- **429019**  Computer Science
  This is applicable specifically to a major in Computer Science in course 3978 as outlined on pages 48-49.
Course Design

Programs

A feature of the design of both the Science and Mathematics and Advanced Science courses is the requirement that all students enrol in and complete requirements for a specified program. Programs are designed to link subjects in such a way that a coherent pattern of study is achieved in a specific discipline or specialisation. Each program is identified by its own code (e.g., 1200 Psychology). A wide choice of programs, designed to meet specific aims and objectives, is available. Most programs are identified with a particular School or discipline (e.g., Anatomy, Chemistry) but some are multidisciplinary (e.g., Mathematics of Management). Some programs are only available in the Advanced Science courses. See Table 1 below for details.

Students are required to fulfil all of the requirements of their particular program as specified in the handbook in the year in which they first enrolled.

Each program has a four-digit identifying number. Programs are set out in stages—Stage 1, 2, 3 and 4 (Stage 4 is for Advanced Science programs only). While a number of programs are available in both the Science and Mathematics and Advanced Science courses, some are only available as 3 stage programs in the Science and Mathematics course and lead to the award of degree of Bachelor of Science at pass level only. See Table 1 and the program outlines (commencing on page below) for details.

Subjects

Typically, each program requires study of a number of prescribed subjects and elective subjects at specified stages or levels to ensure a sound basis in the discipline. Each subject available within courses offered by the BSSM is assigned a level, which corresponds to the defined stages for each program. There are limits on the number of Level I subjects that can be studied in a program (see Course Requirements and Rules below). Students are not normally allowed to enrol in subjects at a given level before reaching the corresponding stage of the course. Levels are:

- Level I Stage 1
- Level II Stage 2
- Level II/III Stage 2 or 3
- Level III Stage 3 (also Stage 4 in some Advanced Science programs)
- Level IV Stage 4 (or Honours year) – Advanced Science only
Course Objectives

Programs in the Science and Mathematics Course and the Advanced Science Courses have been designed to:

1. develop and sustain an interest in and knowledge of Science and Mathematics.
2. develop a working knowledge of scientific methods of investigation.
3. encourage curiosity and creative imagination and an appreciation of the role of speculation in the selection and solution of problems, the construction of hypotheses, and the design of experiments.
4. develop an appreciation of scientific criteria and a concern for objectivity and precision.
5. develop confidence and skill in formulating problems and in treating both qualitative and quantitative data.
6. develop the ability and disposition to think logically, to communicate clearly by written and oral means, and to read critically and with understanding.
7. develop the habit of seeking and recognizing relationships between phenomena, principles, theories, conceptual frameworks and problems.
8. promote understanding of the significance of science, technology, economics and social factors in modern society, and of the contributions they can make in improving material conditions.
9. provide opportunities for the development of students' motivations and social maturity, and an awareness of their capabilities in relation to a choice of career which will be fruitful to themselves and to society.

Course Assessment

Students' assessment results are submitted by subject authorities for final review by the Board of Studies in Science and Mathematics Assessment Committee at the end of each assessment period.

Students are awarded a mark in the range 0-100 in each subject they take; letter grades are also used, with marks in the range 50-64 classified as a pass (P), those in the range 65-74 a credit (CR), those in the range 75-84 a distinction (D), and those in the range 85-100 a high distinction (HD).

The Committee has the authority to exercise some latitude in determining final grades for the science subjects or their equivalent in the light of the overall performance of a student in those subjects for single session and whole year subjects.

If a student's overall performance in the science subjects or their equivalent is rated as:
good, i.e. if the average in those subjects is 55.0 or higher;
reasonable, i.e. if the average in those subjects is 50.0 or higher and less than 55.0;
poor, i.e. if the average in those subjects is less than 50.0,
then
• for a mark of 49 a PC (pass conceded) can be awarded for a reasonable or good performance;
• for a mark of 48 a PC can be awarded for a good performance and a PT (pass terminating) can be awarded for a reasonable performance;
• for a mark of 47 a PT can be awarded for a good performance.

Students with a poor performance may be awarded concessional passes only on the basis of one subject for each subject passed with the equivalent or greater Credit Point value. These can only be 49PC or 48PT.

Where results are available for one subject only in a particular session a PC may be awarded if the mark in that subject is 49, or a PT may be awarded for a mark of 48.
Course Requirements and Rules

Science and Mathematics Courses (3970; 3978; 3979)

pass course (3 years)

Program Requirement

1. Students must select and be enrolled in one of the approved programs of study – see Table 1 below for details of programs available. All programs consist of a total of 375 Credit Points, including 30 credit points of General Education, specified as combinations or sequences of Level I, II, II/III or III subjects, and include prescribed and elective subjects.

Students must complete not less than 120 nor more than 150 Credit Points of Level I subjects and a minimum of 60 Credit Points of Level III subjects. All students must complete 30 Level I Credit Points of Mathematics as specified for individual programs.

Subject Requirement

2. Students must complete subjects with a total value of 375 Credit Points plus General Education. Each subject available in Science programs has a Credit Point value (usually 15 but ranging from 7.5 to 60) based on the number of hours taught and the mode of study.

Students wishing to take subjects additional to those required for the award should be aware that the relevant subjects will attract an additional fee, payable up-front, as voluntary subjects.

Elective subjects, unless otherwise specified in the program description must be chosen from the subjects listed in the subject descriptions section in this handbook.

General Education Requirement

3. The University requires all students to complete a selection of General Education subjects. The General Education Program is an integral part of all UNSW undergraduate courses and gives students the opportunity to address some of the key questions they will face as individuals, citizens and professionals.

Students in the Science and Mathematics course must complete General Education subjects totalling 30 credit points plus an additional 56 hours of study which fosters acceptance of professional and ethical action and social responsibility. See the General Education Handbook for a description of General Education subject categories.

Prerequisites, Corequisites and Excluded Subjects

4. Where a choice of subjects is available in a program students must take care to satisfy prerequisites and corequisites. A prerequisite is a subject which must be completed prior to enrolment in the subject for which it is prescribed. A corequisite subject is one which must either be completed successfully before, or studied concurrently with, the subject for which it is prescribed. An excluded subject is one which cannot be counted towards the degree qualification together with the subject which excludes it.

Credit Transfer

5. In addition to University rules governing admission with credit for previous studies or attainments, the following provisions apply for the BSSM.

Students admitted to the Science and Mathematics course may be granted credit by the BSSM for previous studies and attainments provided that:

5.1. where students transfer from another tertiary institution, they shall not in general be granted credit in the Science and Mathematics course superior to that attained at the other institution.
5.2. Students admitted to the Science and Mathematics course who hold a completed or partly completed degree or another award, may be given credit for previous studies and attainments, but in order to qualify for the award of the BSc will be required as a minimum to complete subjects equivalent to the requirements for Stage 3 of the course.

Study Load

6. Students may not undertake a study load of more than 60 Credit Points in any session (excepting General Education). This can be exceeded only in exceptional circumstances by students with an excellent academic record and requires the permission of the Associate Dean. Students with external commitments – such as part-time employment – in excess of ten hours per week, should take fewer subjects each session. External commitments will not to be taken into consideration in relation to such matters as extensions of time for submission of written work or failure to attend examinations (which may, for some subjects, be scheduled on Saturday mornings). Students who do not make satisfactory progress may be required to show cause why they should be allowed to continue in the course or may be given a restricted program (see 7. Progression and Exclusion below).

Progression and Exclusion

7. Students whose performance is unsatisfactory in the course will be asked to show cause at the end of the academic year why they should remain in their course of study. Any student who fails a subject twice, or is deemed to be making unsatisfactory progress, will be required to show cause.

Unsatisfactory progress may include:

- failure in 50% or more of subjects attempted in an academic year;
- failing to pass subjects totalling at 60 Credit Points in one year;
- failing to complete 120 Credit Points of level I subjects in the first two years of study.

Students required to show cause will be informed by the Registrar in writing. Students who apply to show cause will be assessed in accordance with the University's procedures. Failure to show cause can result in exclusion from a subject or the course. Also see the section on progression and exclusion (Restrictions on Students Re-enrolling') in the Student Guide.

Program and Subject Quotas

8. Quotas are imposed on some programs and subjects (usually because of class size constraints related to space). Where quotas are imposed, students' eligibility to enrol will be assessed on academic merit or on the basis of the requirements of the program of study in which the student is enrolled.

Graduation and majors

9. In order to graduate, students must satisfy requirements for the award by passing all the subjects specified for their program. Students who complete requirements will be awarded the degree of Bachelor of Science at pass level with a major in the area of specialisation (usually indicated by the program name). The award will appear on the testamur as:

   Bachelor of Science in (name of program)

Transfers

10. With so many programs and courses available, and because students' interests do often change over the course of their studies, various provisions are made to allow students to transfer between courses and/or programs.

10.1. Changing program. Students must apply in writing to transfer between programs within the Science and Mathematics courses. Applications are assessed on academic performance and approval is subject to places being available in the nominated program. Applications must be lodged with submission of the pre-enrolment form to the BSSM office by the end of December in the preceding academic year.
10.2. Students who wish to proceed to Stage 4 in a given program must apply to the Admission and Re-enrolment Committee of the BSSM to transfer to Advanced Science courses. Applications are only accepted for transfer at the end of each year of study. Applicants must lodge the Internal Course Transfer form with the Student Centre by 30 November in the preceding academic year.

Transfer should not be considered automatic. Applications are assessed on academic performance and approval is subject to places being available in the nominated program of the relevant Course. Students must satisfy all prerequisites for the subjects specified in the Advanced Science program, and have completed the relevant sequence of subjects for the proposed program.

Students seeking to enrol in a Stage 4 honours program should seek the guidance of the appropriate Head of School at an early stage of study to ensure that the program being followed is best suited for the pursuit of an honours program.

Advanced Science Courses (3973; 3979; 3985; 3986; 3990)
Honours/Advanced Course (4 years)

Program Requirement

1. Students must select and be enrolled in one of the approved programs of study – see Table 1 for details of programs available. All Advanced Science programs are four stage programs consisting of a total of 390 Credit Points (including 30 credit points of General Education) to be completed in Stages 1-3, specified as combinations or sequences of Level I, II, III/IV or III subjects, and including prescribed and elective subjects. Most programs indicate a total of 375 Credit Points for Stages 1-3, since this is the requirement for course 3970. Students in Advanced Science courses must take a total of 390 Credit Points in stages 1-3. Except where otherwise indicated, the additional subject/s would normally be an elective subject/s. Students also undertake a Stage 4 sequence consisting of either:

- in designated programs, an advanced structured coursework sequence of Level IV subjects, or level IV subjects in combination with other subjects (where specified), totalling at least 120 Credit Points, and which may include a short research program;

or

- an approved honours program offered by one or more schools, consisting of a significant research program in combination with other requirements specified for individual programs.

See Table 1 below for available Advanced Science programs. Study sequences for Stage 4 are given in the section providing details of program structures.

All Advanced Science students also complete General Education as for the Science and Mathematics courses.

Students must not complete more than 120 Credit Points of Level I subjects except where specified in particular programs. Students must also complete a minimum of 60 Credit Points of Level III subjects. All students must complete 30 Level I Credit Points Mathematics as specified for individual programs.

Additional Program requirement for Course 3990 - Advanced Science Life Sciences

From 1999 students enrolling in course 3990 Advanced Science (Life Sciences), must complete, in addition to subjects specified for the approved program of study in which they are enrolled, Two 7.5 credit point subjects, Life Sciences Advanced Seminar I (LIFE1001) and Life Sciences Advanced Seminar II (LIFE2001). These subjects are generally taken in stages 1 and 2 of the course respectively. Credit points for these subjects are counted within the listed 390 credit points (including General Education) required for the completion
of the first three stages of the course. For most programs of study, this will result in a study load of 127.5 credit points in the first stage of the course. From 2000, students transferring to course 3990 in second or later years of the course may arrange to undertake these subjects simultaneously within a single year. Under exceptional circumstances, the requirement for these subjects may be waived (for example, students transferring into the course who have otherwise completed the requirements for entry to the honours year).

Students enrolled in course 3990 in 1998, or transferring into the second or later years of the course in 1999 will not be required to take the proposed subjects, but the subjects will be offered as electives to these students, subject to the availability of places. Note that the subject LIFE2001 will not be offered in 1999.

Students enrolled in course 3990 may include in their programs no more than one level III subject which involves an Advanced level laboratory project - for example BIOC3301 Biochemistry Laboratory Project Advanced, MICR3011 Microbial Physiology. This restriction is to ensure that students complete a sufficient depth and breadth of coursework within the first three stages of their course.

Subject Requirement

2. Students must complete subjects specified for their program.

Each subject available in Science programs has a Credit Point value (usually 15 but ranging from 7.5 to 60) based on the number of hours taught and the mode of study.

Students wishing to take subjects additional to those required for the award should be aware that the relevant subjects will attract an additional fee, payable up-front, as voluntary subjects.

Elective subjects, unless otherwise specified in the program description must be chosen from the subjects listed in the subject descriptions section in this handbook.

General Education Requirement

3. The University requires all students to complete a coherent sequence of General Education subjects. The General Education Program is an integral part of the Advanced Science course and gives students the opportunity to address some of the key questions they will face as individuals, citizens and professionals.

Prerequisites, Corequisites and Excluded Subjects

4. Where a choice of subjects is available in a program students must take care to satisfy prerequisites and corequisites. A prerequisite is a subject which must be completed prior to enrolment in the subject for which it is prescribed. A corequisite subject is one which must either be completed successfully before, or studied concurrently with, the subject for which it is prescribed. An excluded subject is one which cannot be counted towards the degree qualification together with the subject which excludes it.

Credit Transfer

5. In addition to University rules governing admission with credit for previous studies or attainments, the following provisions apply for the Advanced Science courses.

Students admitted to an Advanced Science course may be granted credit by the BSSM for previous studies and attainments provided that:

5.1. where students transfer from another tertiary institution, they shall not in general be granted credit in the Advanced Science course superior to that attained at the other institution.

5.2 Students admitted to the Advanced Science course who hold a completed or part completed degree or another award (including the BSc at pass level at UNSW), may be given credit for previous studies and attainments, but in order to qualify for the award of the BSc in an Advanced Science course, will be required as a minimum to complete a sequence of subjects or other requirements equivalent to the requirements for Stage 4 of the course.
Study Load

6. Students may not undertake a study load of more than 60 Credit Points per session in Stages 1 – 3 (excepting General Education). This can be exceeded only in exceptional circumstances by students with an excellent academic record and requires the permission of the Associate Dean. Students with external commitments – such as part-time employment – in excess of ten hours per week, should take fewer subjects per session. External commitments will not be taken into consideration in relation to such matters as extensions of time for submission of written work or failure to attend examinations (which may, for some subjects, be scheduled on Saturday mornings). Students who do not make satisfactory progress may be required to show cause why they should be allowed to continue in the course or may be given a restricted program (see 7. Progression and Exclusion below).

Progression and Exclusion

7. Students whose performance is unsatisfactory will be asked to show cause at the end of the academic year why they should remain in their course of study. Any student who fails a subject twice, or is deemed to be making unsatisfactory progress, will be required to show cause.

Unsatisfactory progress may include:
• failure to achieve an average of 65 or higher in subjects attempted in an academic year;
• failing to pass Subjects totalling at least 60 Credit Points in one year;
• failing to complete the requirements for stage one of the course in the first two years of study.

Students required to show cause will be informed by the Registrar in writing. Students who apply to show cause will be assessed in accordance with the University's procedures. Failure to show cause can result in exclusion from a subject, the course, or transfer to the Science and Mathematics course (3970), provided that the progression requirements in that course have been met. Also see the section on progression and exclusion ('Restrictions on Students Re-enrolling') in the Student Guide.

Accelerated Progression

8. There is provision for exceptionally talented students to take higher level subjects in Stage 1. Contact the BSSM Course office for details.

Program and Subject Quotas

9. Quotas are imposed on some programs and subjects (usually because of class size constraints related to space). Where quotas are imposed, students' eligibility to enrol will be assessed on academic merit or on the basis of the requirements of the program of study in which the student is enrolled.

Graduation and Majors

10. In order to graduate, students must satisfy requirements for the award by passing all subjects and the requirements specified for their program. Students who complete requirements will be awarded the degree of Bachelor of Science at honours or pass level with a major in the area of specialisation (usually indicated by the program name, except that for some honours candidates the name of the honours specialisation will appear).

Students who successfully complete Stage 4 of their program will be considered for the award of Honours. The following scale generally applies to Honours gradings and, depending on the structure of the program, is based either on performance in the Stage 4 program or on performance over the whole 4 stages of the course:

<table>
<thead>
<tr>
<th>Honours Class</th>
<th>Mark or weighted average</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>85 or greater</td>
</tr>
<tr>
<td>2 Division 1</td>
<td>75 to 84</td>
</tr>
<tr>
<td>2 Division 2</td>
<td>65 to 74</td>
</tr>
<tr>
<td>3 or Pass</td>
<td>below 65</td>
</tr>
</tbody>
</table>
The award will appear on the testamur as:

Bachelor of Science
(with Honours)
in (name of program or specialisation)

Transferring Programs

12. Students must apply in writing to transfer between programs within each of the Advanced Science courses. Applications are assessed on academic performance and approval is subject to places being available in the nominated program. Applications must be lodged with submission of the pre-enrolment form to the BSSM office by the end of December in the preceding academic year.

Transferring between the Advanced Science Courses

13. Applications for transfer from one Advanced Science Course to another are only accepted at the end of each year of study. Applicants must lodge the Internal Course Transfer form with the Student Centre by 30 November in the preceding academic year.

Transfer should not be considered automatic. Applications are assessed on academic performance and approval is subject to places being available in the nominated program of the Course. Students must satisfy all prerequisites for the subjects specified in the program of the particular Advanced Science course, and have completed the relevant sequence of subjects for the proposed program.

Progression to Stage 4 Honours Program

14. Progression to Stage 4 is subject to academic performance. Students seeking to enrol in a Stage 4 honours program are required to have the approval of the Head of School and normally will be required:

- to have completed the requirements for Stages 1, 2 and 3 of the specific program and to have satisfied prerequisite requirements as specified in that program. All General Education also must be completed;
- to have attained an average of 65 or higher in each stage of the program.

Students should also seek the guidance of the appropriate Head of School at an early stage of study to ensure that the program being followed is best suited to lead to the Year 4 honours program;

In addition, admission to a particular Stage 4 program is subject to appropriate research and supervision resources being available. Quotas may be imposed for entry in any year, in which case admission will be determined on academic merit.

Students who do not attain an average or 65 or higher in Stage 3 of their program are normally required to transfer to the Science and Mathematics course (3970) and take out the BSc award at pass level.

Transfers to the Science and Mathematics Course

15. Students enrolled in the Advanced Science courses (course code 3972-3; 3976; 3985; 3990) who wish to take out the BSc award at pass level and without proceeding to Stage 4 are required to transfer to the Science and Mathematics course (3970). Applications to transfer should be lodged with the BSSM Office no later than the HECS census date in the session in which the student expects to satisfy requirements. Students applying after that date may not be able to graduate in the next round of graduation ceremonies. The application should state the course 3970 Program in which the student wishes to be enrolled. Students must satisfy all requirements for the designated Science and Mathematics course (3970) program in order to qualify for the award of the BSc. Further information regarding the transfer from Advanced Science course programs to programs that are available in the Science and Mathematics course is available through the BSSM Office.
Range of Programs

The range of programs has been designed to cover a wide variety of needs in the various areas of science and mathematics. The programs are listed below in Table 1 in alphabetical order with the program number. The appropriate course code(s) for each program is indicated. Details of the programs follow in the next section.

**Note:** Entry to Anatomy and Neuroscience programs is at stage 2. Students planning to enrol in these programs should enrol for stage 1 in the Biological Sciences Holding Program (6817).

Certain of the programs listed above are appropriate for Courses 3930 (Science/Arts), 3931 (Advanced Science/Arts), 3611 (Science/Aeronautical Engineering), 3661 (Science/Industrial Engineering), 3681 (Science/Mechanical Engineering), 3701 (Science/Naval Architecture), 3725 (Science/Electrical Engineering), 3730 (Science/Civil Engineering), 3820 (Science/Medicine), 3951 (Science/Optometry), 3996 (Science/Commerce), 4075 (Science/Education), 4770 (Science/Law). Students in these courses should consult their course advisor for details.

Students interested in Life Sciences topics but unsure of which program to choose are advised to enrol in the Biological Sciences Holding Program (6817) for the First Year. Information sessions will be held to assist students in their choice of program for Year 2.
Details of Programs

ANATOMY

Anatomy is the study of the structure of the human body. The word 'anatomy' is derived from the Greek, and means 'cutting up' or 'dissection'. However, anatomy today is much more than the descriptive study of the dissected body although dissected specimens are still used for research and instruction. The subject anatomy now embraces separate but strongly related disciplines. Gross Anatomy deals with the description of form, arrangement and function of the bones, joints, muscles and internal organs, together with their blood and nerve supply. Histology deals with the microscopic structure of tissues and cells. Embryology is concerned with the normal development of the embryo and fetus from conception to birth and with the mechanisms of development and malformations. Neuroanatomy deals with the internal organisation and functions of the brain and spinal cord. In all courses in Anatomy, strong emphasis is given to the functional significance of the structures in health and in disease.

Entry to Anatomy programs is only possible at Level II or above. All students are advised to enrol initially in the Biological Sciences holding program 6817.

A major in anatomy may suitably be combined with elective subjects from Biochemistry, Physiology or Psychology. Advanced Science students who are interested in Medical Science are encouraged to consult with the Head of School regarding the possibility of transferring to the Bachelor of Medical Science degree.

7000

Anatomy

Stage 1
BIOS1101, BIOS1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 60 Credit Points

Stage 2
ANAT2111, ANAT2211
Elective subjects totalling 75 or 90 Credit Points

Recommended: Biological Science, Biochemistry, Physiology, Psychology
One 56 hour or two 28 hour General Education subjects

Stage 3
Level III Anatomy subjects totalling at least 60 Credit Points (may include PATH3202)
One 56 hour or two 28 hour General Education subjects
Further subjects to give a total of 345 Credit Points

Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
ANAT4508, or ANAT4509 and further subjects totalling 60 Credit Points (normally including ANAT4510) approved by the Head of School

BIOCHEMISTRY AND MOLECULAR GENETICS

Biochemistry and Molecular Genetics are closely-related disciplines which are concerned with understanding all life processes at the fundamental level of molecular structure, function and interaction. Historically, the diverse techniques of chemistry, physiology and genetics were used to study different aspects of biological systems, but now these diverse approaches have become more integrated, with Biochemistry and Molecular Genetics providing a knowledge base and a broad range of specialised techniques which are relevant to all biology. Because the major impact of these disciplines is largely at the molecular level, the School of Biochemistry and Molecular Genetics offers programs of study which are ideal for students whose interests are in understanding and appreciating biological processes at the molecular rather than the descriptive level. Integration of these molecular approaches at the cellular, tissue, organ and whole organism level is an increasingly important part of Biochemistry and Molecular Genetics. These disciplines also represent fundamental components of medical science and are playing an increasingly important role in many aspects of modern medicine, including an input into the Human Genome Project and the exciting prospects for gene therapy. The Biochemistry Program of Study (see Program 4100 below) provides opportunities to combine Biochemistry and Molecular Biology with other related discipline areas. The Molecular Genetics Program (see Program 4110) outlines a specialised course covering the latest advances in Molecular Biology and Genetics. Alternatively the Genetics Program (see Program 6840) may be used to integrate molecular studies with other aspects of genetics within a more broadly-based genetics course.

4100

Biochemistry

BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Recommended: Physics, Computing
BIOLOGICAL SCIENCE

Biological Science encompasses all aspects of plants and animals including their relationship to each other and to the environment. The programs leading to the award of a science degree in Biological Science include cell biology, plant and animal physiology, ecology, genetics, taxonomy, marine biology, entomology and evolutionary studies. These studies are particularly relevant in the fields of agriculture, forestry, wildlife management, conservation and related environmental sciences. Specialisations are available in both Botany and Zoology as well as Ecology (6853), Marine Science-Biological Oceanography (6832) and Environmental Science (6861).*

*Environmental Science (6861) is available only to Advanced Science students.

6817

Biological Sciences Holding Programs

Level I is identical in most programs in the Biological Sciences. Students who wish to study the biological sciences, but at Level I are unsure of the field in which they wish to specialise, are advised to enrol in this program and then transfer to the appropriate program in Level II.

1700

Biological Science

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Stage 2
BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291
BIOS2011, BIOS2021, BIOS2041, BIOS2051 and A further 30 Credit Points from BIOS2031, BIOS2061 or MICR2201
One 56 hour or two 28 hour General Education subjects

Stage 3
Subjects Totalling 75 Credit Points Chosen from BIOS3011, BIOS3021, BIOS3031, BIOS3041, BIOS3051, BIOS3061, BIOS3071, BIOS3081, BIOS3091, BIOS3101, BIOS3111, BIOS3121, BIOS3131, BIOS3151, MICR3071
Elective subjects totalling 30 Credit Points (which may be also from this list)
One 56 hour or two 28 hour General Education subjects

Stage 4 (Honours)
BIOS4018 (F/T), BIOS4014 (P/T)

BIOMEDICAL SCIENCE

Entry to this program is limited to Advanced Science students at Level II and academic merit is the sole criterion. Students planning this are advised to enrol initially in the Biological Sciences Holding Program (6817) and apply to meet the Anatomy quota at the time of pre-enrolment for Level II.

This program will not be available to new students from 1999. Any student who is interested in this program should refer to the entry for the Bachelor of Medical Science degree, later in this handbook.
Biomedical Science (Advanced Science only)

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
One of the following subjects:
PHYS1002 or PHYS1022 or COMP1001 and 1 subject totalling 15 Credit Points
or PSYC1001 AND PSYC1011
Before Stage 2 commences students should consult with Schools contributing to their proposed program about appropriate subjects and levels required for any particular honours Stage subject.

Stage 2
Students must take subjects totalling 120 Credit points, with at least 75 Credit Points from:
ANAT2111, ANAT2211, BIOC2101 and BIOC2201, or BIOC2181 and BIOC2291, BIOS2021, MICR2201 or MICR2011
One 56 hour or two 28 hour General Education subjects
Elective subjects should be preferably in subject areas such as Mathematics, Physics, Chemistry, Computing or Psychology (see comments for Stage 4).

Stage 3
After consultation with appropriate Schools about the proposed Honours Stage subject students would ordinarily choose subjects totalling 120 Credit Points (to complete a total of 360 Credit Points) from the following subject areas: Physiology and Pharmacology, Anatomy, Biochemistry, Microbiology and Immunology, Pathology, Biotechnology
One 56 hour or two 28 hour General Education subjects

Stage 4
Subject to satisfactory progress through the course (normally a credit average in subjects completed) students may proceed to the honours Stage. Before commencement of Level II students should consult an appropriate School about the subjects required for a particular honours program. Students should also note general guidelines for Advanced Science Stage 4.

*Students wishing to enroll in MICR2011 are required to attend a one day bridging course in the mid-Stage break.

BIOTECHNOLOGY

Biotechnology can be defined as the use of various biological processes to make products and perform services. The essential feature of biotechnology therefore is the use of biological processes based on living cells and biochemical macromolecules such as proteins, DNA and RNA in a rapidly-expanding range of activities of benefit to mankind. As such, biotechnology makes practical use of the recent scientific advances in areas such as molecular genetics.

The development of recombinant-DNA (r-DNA) technology has resulted in the ability to produce large quantities of any potentially useful product. Based on this technology, a new generation of biopharmaceuticals, including hormones, vaccines, anti-hypertensive and anti-inflammatory agents, are being developed which have the potential to revolutionise medicine. Microorganisms and viruses are being modified for use in controlling plant and animal diseases and pests. Diagnostic kits are being developed for use in forensic science and in product identification and quality control. In addition, genetic improvements in agriculture, plants and animals are becoming a reality, as is the control of inborn genetic disorders in humans.

Some aspects of biotechnology are traditional, having been used for centuries. The first makers of bread, cheese and fermented beverages over six thousand years ago were applying biotechnological principles in processing these goods. Without understanding the processes they were operating, they were in fact making use of catalysis mediated by microbial cells. Such processes are still in use today and scientific advances now allow for much greater control of the processes with resultant improvements in quality and economics of production. The number of such biological processes has expanded also and enzymes and/or microorganisms are used in the production of a wide range of fermented foods (such as cheese, wine, beer, soy sauce, sauerkraut, yoghurt, tofu, kefir) and in the production of flavouring, colouring and sweetening agents.

Bioprocesses are also used in the extraction of minerals from low grade ores, and modified and novel bioprocesses are being developed for the treatment of waste and degradation of recalcitrant molecules, an area of vital importance in our increasingly polluted planet.

The future for expansion in all the above areas is immense, and an ability to cope with the problems of the 21st century will be heavily dependent on these advances.

The Department of Biotechnology offers undergraduate training through the Board of Studies in Science and Mathematics (BSc Course) and in the BE Course in Bioprocess Engineering and the BSc course in Biotechnology. The BSc Course is three Stages for a Pass degree during which the student can study aspects of biotechnology in combination with another major in a relevant discipline, preferably biochemistry, microbiology or chemistry. The fourth Honours Stage of the BSc Course includes further formal training in biotechnology as well as an extensive research project. The BE Degree Course in Bioprocess Engineering is four Stages full-time and has been designed to meet the requirements for membership of the Institution of Engineers, Australia. The BSc degree course in Biotechnology is four Stages full-time. Honours gradings can be achieved in both courses.
4200
Biotechnology

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Stage 2
BIOC2101, BIOC2201
BIOS2011, BIOS2021
MICR2201
Elective subjects totalling 30 Credit Points
(Recommended: Chemistry, Microbiology)
All General Education subjects (112 hours)

Stage 3
BIOT3011, BIOT3021, BIOT3031, BIOT3061
Additional elective subjects to give a total of 345 Credit Points.

Students proposing to undertake Stage 4 (Honours) must complete Level III subjects totalling 120 Credit Points.

Stage 4 (Honours)
BIOT4073 (F/T) BIOT4083 (P/T)

BOTANY

Plant Science is concerned with all aspects of the structure and function of both green and non-green plants and the relationship of plants to their environments. The major aspects of the subject range from plant anatomy and morphology through physiology, ecology, taxonomy, palynology, phycology and mycology. The applications of these studies are particularly relevant in the fields of agriculture, horticulture, forestry, marine studies, conservation and related environmental sciences.

CHEMISTRY

The programs in Chemistry are 0200 (Chemical Science); 0205 (Chemistry, for Advanced Science only); 0210 (Medical Chemistry, for Advanced Science only) and 0225 (Geological Chemistry, for Advanced Science only). All programs provide a basic scientific education and a professional training in the chemical sciences. Fundamental, applied, environmental and industrial aspects of chemistry are included.

0200
Chemical Science

Program 0200 allows chemistry to be combined with other disciplines. The School of Chemistry recommends the following discipline areas: such as physics, geology, biochemistry, mathematics, computer science, biotechnology, physiology and pharmacology. These programs with more than one field of specialisation result in a broadly based degree in the chemical sciences. For example: a combination of chemistry and biochemistry leads to further work in areas such as toxicology and neurochemistry, a combination of Level III chemistry with mathematics or computing provides a valuable basis for the many applications of computers in chemistry; chemistry with physics or materials science allows entry into the rapidly developing fields of advanced materials.

Stage 1
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
PHYS1002 or PHYS1022
Elective subjects totalling 30 Credit Points
Stage 2*
CHEM2011, CHEM2021, CHEM2031, CHEM2041, CHEM2000
Elective subjects totalling 37.5 Credit Points (for students in course 3970) or 60 credit points (for students in course 3985)
General Education subjects (112 hours for students in course 3970 or 56 hours for students in course 3985)

Stage 3
Choose Level III Chemistry subjects totalling 60 credit points of which at least 45 are from:
CHEM3011, CHEM3021, CHEM3031, CHEM3041
Choose Elective subjects totalling 60 Credit Points
General Education subjects (56 hours for students in course 3985)

Students proposing to proceed to stage 4 (Honours) must complete stage 3 subjects totalling 120 Credit Points

Stage 4 (Honours)
CHEM4003*

*Students wishing to specialize in Chemistry with either Geology or Biotechnology may vary subjects with approval of the Board of Studies of Science and Mathematics

**CHEM4003 is available in the Advanced Science course only. Students wishing to undertake an Honours Year must transfer to the appropriate course. Consult the School of Chemistry.

0205
Chemistry (Advanced Science course 3985 only)

Program 0205 is designed for students who wish to specialise in the chemical sciences, and undertake the maximum number of chemistry subjects. It is designed to provide education and training in all contemporary fields of chemistry, and should be selected by students who wish to devote their studies at Stage III entirely to chemistry.

Stage 1
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
PHYS1002
Elective subjects totalling 30 Credit Points

Stage 2
CHEM2011, CHEM2021, CHEM2031, CHEM2041, CHEM2000
Elective subjects totalling 60 Credit points
(Recommended Biochemistry, Biotechnology, Computer Science, Geology, Mathematics, Physics, Physiology)
General Education subjects (56 hours)

Stage 3
CHEM3011, CHEM3021, CHEM3031, CHEM3041
Choose Elective Chemistry subjects totalling 60 Credit Points.
General Education subjects (56 hours)

Stage 4 (Honours)
CHEM4003

0210
Medical Chemistry (Advanced Science Course 3985 only)

This program combines a strong knowledge of synthetic and analytical chemistry and aspects of Biochemistry and Pharmacology. The program is designed to produce graduates whose background in both Chemistry and Biological areas are appropriate to the requirements of employers in Australia.

Stage 1
CHEM1101, CHEM1201
PHYS1002
MATH1011 or MATH1131 or MATH1141
MATH1231 or MATH1231 or MATH1241
BIOS1101, BIOS1201

Stage 2
CHEM2011, CHEM2021, CHEM2031, CHEM2041, CHEM2000, PHPH2112*
BIOC2101 and BIOC2201
General Education subjects (56 hours)

Stage 3
CHEM3021, CHEM3041
PHPH3152*
BIOC3111 and BIOC3281
Choose additional subjects totalling 30 credit Points (15 CP's from Chemistry and 15 CP's in Biochemistry or Physiology and Pharmacology
General Education subjects (56 hours)

Stage 4
CHEM4003 or PHPH4258/PHPH4264 or BIOC4318/4618

Joint supervision of honours projects between the School of Chemistry and the Schools of either Physiology and Pharmacology or Biochemistry are strongly encouraged.

*Student numbers in these subjects are limited. Entry to these subject will be based on academic merit.

0225
Geological Chemistry (Advanced Science Course 3985 only)

This program combines a knowledge of Chemistry, particularly Analytical Chemistry and Geochemical aspects of Applied Geology. The program produces graduates who have a broad background in both Chemistry and Geology.
Stage 1
CHEM1101, CHEM1201
PHYS1002
MATH1011 or MATH1131 or MATH1141
and MATH1021 or MATH1231 or MATH1241
GEOL1111, GEOL1211

Stage 2
CHEM2011, CHEM2021, CHEM2031, CHEM2041,
CHEM2000, GEOL2110, GEOL2131, GEOL2180,
GEOL2260, GEOL2200, GEOL2290, GEOL2220
General Education subjects (56 hours)

Stage 3
CHEM3021, CHEM3031, CHEM3041
Chemistry electives totalling 15 credit points - consult the School of Chemistry
GEOL3101, GEOL3280, plus 37.5 Credit Points of Geology subjects from GEOL3110, GEOL3201,
GEOL3241, GEOL3250
General Education subjects (56 hours)

Stage 4 (Honours)
CHEM4003 (Program 0225)
Honours research projects co-supervised by members of the School of Chemistry and Department of Applied Geology are strongly encouraged.

COMPUTER SCIENCE

Entry to this program is restricted to students who have been offered a place directly (UAC code 429019). Later year transfers are treated as internal course transfers.

Computer Science involves the study of the design, construction and uses of computer systems. It is concerned with the representation of data and data structures in computer systems and the design of algorithms for automatic manipulation of this information by programming languages and machine systems. It is very much concerned with the design and development of hardware and software tools by which computer applications may be developed, but not so much with the applications themselves. It is, however, noted that noncomputing elements (such as human interface or psychological aspects) can often dictate the level of success of computing systems. At the University of New South Wales, particular emphasis is given to comprehension of the basic principles behind computer tools, operating systems, compilers and translators, and computer hardware.

Students in other programs may take some Level I and Level II Computer Science subjects. Level III studies in Computer Science are available in several combined programs. Appropriate disciplines are Physics (Program 0161); Mathematics (programs 1060 and 1066) Psychology (program 1206 (UAC entry code 429019)); Philosophy (program 5206 (UAC entry code 429019))

0600
Computer Science

Stage 1
COMP1011**, COMP1021
MATH1131 or MATH1141
MATH1231 or MATH1241
MATH1081
Elective subjects totalling 45 Credit points*

Stage 2
COMP2011, COMP2021, COMP2041
Elective subjects totalling 75 Credit Points*
One 56 hour or two 28 hour General Education subjects

Stage 3
Level III Computer Science subjects totalling 60 Credit Points including at least 15 Credit Points from COMP3111, COMP3121, COMP3131 and at least 15 Credit Points from COMP3211, COMP3221,
COMP3231, COMP3331
Further elective subjects to make a total of 105 Credit points for the year*
One 56 hour or two 28 hour General Education subjects
Students may not include Level III Computer Science subjects totalling more than 90 Credit Points
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
COMP4914

*Up to 120 Credit Points may be from subjects that are restricted to this program or subjects from the Faculty of Arts and Social Sciences subject to approval by the relevant subject authority. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104. Japanese and Korean are also available.

** Students who do not meet the prerequisite for COMP1011 must enrol in COMP1001 in session 1 and COMP1011 in session 2. COMP1001 is not included in the Credit Points for the course.

2706
Geography and Computer Science (Course 3978 Only)

Stage 1
GEOG1601, GEOG1701
COMP1011**, COMP1021
MATH1131 or MATH1141
MATH1231 or MATH1241
MATH1081
Elective subjects totalling 15 Credit points
Stage 2
GEOG2101, GEOG2811, GEOG3041
COMP2011, COMP2021, COMP2041
Level III Computer Science subjects totalling 15 Credit Points
Elective subjects totalling 15 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
GEOG3122, GEOG3821
COMP3111, COMP3421
COMP3121 or COMP3511
Level III Geography subjects totalling 15 Credit Points
Level III Computer Science or Geography subjects totalling 15 Credit Points.
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points.

Stage 4 (Honours)
COMP4914 or GEOG4418

** Students who do not meet the prerequisite for COMP1011 must enrol in COMP1001 in session 1 and COMP1011 in session 2. COMP1001 is not included in the Credit Points for the course.

EARTH AND ENVIRONMENTAL SCIENCE

This program combines Geology and Geography giving an understanding of present geological processes and their relationships with the land surface. The effects on the natural processes of human activities, from industrial pressures to urban developments, are an integral part of the course. Community need for developments in a variety of environments and the vital role of environmental interdisciplinary safeguards have been among the main guidelines in the selection of subjects within the program.

ECOLOGY

The Ecology programs allow students to specialise in selected areas of Ecology yet provide experience in a range of related cross-disciplinary subjects, Biological Ecology (6853), Geographical Ecology (6851) and Mathematical Ecology (6852). Optional subjects allow students to match their interests and career aspirations. The selection of these subjects must be discussed with a Program adviser.

6851
Geographical Ecology

Stage 1
BIOS1101, BIOS1201
GEOG1601, GEOG1701
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Choose 1 of the strands:
1. CHEM1101, CHEM1201
2. GEOL1111, GEOL1211
3. Elective subjects totalling 30 Credit Points

Stage 2
BIOS2011, BIOS2051 and BIOS2031 or BIOS2061
BIOS2041 or GEOG2101
GEOG2711, GEOG2811
Subjects totalling at least 15 Credit Points from:
BIOC2101, BIOS2021, BIOS2031, BIOS2061, GEOG2721, GEOG2821,
MICR2201, MICR2011
One 56 hour or two 28 hour General Education subjects

2527
Earth and Environmental Science

Stage 1
CHEM1101, CHEM1201*
GEOG1601, GEOG1701
GEOL1111, GEOL1211
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
*Students who have not undertaken chemistry at HSC level should take chemistry at the introductory level (CHEM1401 and CHEM1101) in year 1, and CHEM1201 in the summer session before commencing year 2.
Stage 3
BIOS3061, BIOS3071, BIOS3111
GEOG3911, GEOG3761, GEOG3711
subjects totalling At least 15 Credit Points from:
BIOS3011, BIOS3031, BIOS3051,
BIOS3081, BIOS3091, BIOS3121, BIOS3131,
BIOS3151, GEOG3122, GEOG3721, GEOG3861, GEOG3032, MICR3071
Further elective subjects (to be discussed with Program adviser) to give a total of 345 Credit Points
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
BSSM4023 (F/T), BSSM4029 (P/T)

ENVIRONMENTAL SCIENCE

Environmental Science programs allow specialisation in a number of aspects: Biological Environments (Terrestrial, Marine, Microbial), Environmental Chemistry, Earth Environments (Geography, Geology), Environmental Mathematics (Fluid Dynamics, Statistics and Population Dynamics). All programs include 16 core subjects and electives as set out below.

Core subjects to be completed by all students in Course 3976 are:
BIOS1101, BIOS3071
CHEM1101*, CHEM1201*, CHEM3901
ECON1107
ENVS1011, ENVVS2010, ENVVS2020, ENVVS2801
GEOG1701, GEOG3911
GEOL1111 or GEOL1211
MATH1011 or MATH1131 or MATH1141
MATH1021 or MATH1231 or MATH1241
BIOS2041 or GEOL2101 or MATH2841 or MATH2301
An ENVS honours project in Stage 4

*Students who have not undertaken chemistry at HSC level should take chemistry at the introductory level (CHEM1401 and CHEM1101) in year 1, and CHEM1201 in the summer session before commencing year 2.

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
GEOG1601, GEOG1701
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021

Stage 2
BIOS2011, BIOS2041
BIOS2011, BIOS2021, BIOS2041, BIOS2051 and
BIOS2031 or BIOS2061
Subjects totalling 15 Credit Points from: BIOS2031,
BIOS2061, GEOG2811, GEOG2711, GEOG2721,
GEOG3911, MICR2011, MICR2201
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOS3061, BIOS3071, BIOS3111
GEOG3711
Further Level III subjects totalling 30 Credit Points from:
BIOS3011, BIOS3021, BIOS3031, BIOS3051,
BIOS3081, BIOS3091, BIOS3121, BIOS3131,
BIOS3151, GEOG2711, GEOG2721, GEOG3721, GEOG3861,
MICR3071
Further elective subjects (to be discussed with Program adviser) to give a total of 345 Credit Points
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
BSSM4023 (F/T), BSSM4029 (P/T)

6852
Mathematical Ecology

For details of this program please consult with School of Biological Science and the School of Mathematics.

6853
Biological Ecology

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
GEOG1601, GEOG1701
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021

Stage 2
BIOS2011, BI0C2291
BIOS2011, BIOS2021, BIOS2041, BIOS2051 and
BIOS2031 or BIOS2061
Subjects totalling 15 Credit Points from: BIOS2031,
BIOS2061, GEOG2811, GEOG2711, GEOG2721,
GEOG3911, MICR2011, MICR2201
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOS3061, BIOS3071, BIOS3111
GEOG3711
Further Level III subjects totalling 30 Credit Points from:
BIOS3011, BIOS3021, BIOS3031, BIOS3051,
BIOS3081, BIOS3091, BIOS3121, BIOS3131,
BIOS3151, GEOG2711, GEOG2721, GEOG3721, GEOG3861,
MICR3071
Further elective subjects (to be discussed with Program adviser) to give a total of 345 Credit Points
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
BSSM4023 (F/T), BSSM4029 (P/T)

6861
Biological Environments (Terrestrial)
(Advanced Science only)

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
ENVS1011
GEOG1701
MATH1011 or MATH1131 or MATH1141
MATH1021 or MATH1231 or MATH1241
BIOS2041 or GEOL2101 or MATH2841 or MATH2301
An ENVS honours project in Stage 4

Stage 2
BIOS2011, BIOS2041
ECON1107
ENVS2010, ENVS2020, ENVS2801
GEOG2711
GEOL1211 or MSCI6200
subjects totalling 15 Credit Points from:
BIOS2031, BIOS2051
BIOS2061, GEOG2811, MSCI2001, MICR2201
or other subjects approved by the program advisor
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOS3061, BIOS3071, BIOS3111
GEOG3711
Further Level III subjects totalling 30 Credit Points from:
BIOS3011, BIOS3021, BIOS3031, BIOS3051,
BIOS3081, BIOS3091, BIOS3121, BIOS3131,
BIOS3151, GEOG2711, GEOG2721, GEOG3721, GEOG3861,
MICR3071
Further elective subjects (to be discussed with Program adviser) to give a total of 345 Credit Points
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
BSSM4023 (F/T), BSSM4029 (P/T)
Stage 3
BIOS3071, BIOS3111
CHEM3901
GEOG3711, GEOG3911
BIOS3061 or GEOG3761
Further subjects for major sequence, or other subjects approved by the program advisor to complete core subjects and a total of at least 360 Credit Points.
One 56 hour or two 28 hour General Education subjects

Stage 4
ENVS4108/ENVS4109 (Full Stage honours thesis project) with permission of Program Adviser and Head of School or
ENVS4118 (Combination of an honours thesis project and course work in Biological Science approved by Program Adviser) or
BIOS4104 (Half Stage honours thesis project) and additional subjects approved by Program Adviser to make up full Stage General Education requirement

### FOOD SCIENCE AND TECHNOLOGY

Food science and technology involves the understanding of basic sciences and the application of this knowledge to foods from the point of production, through handling, processing, preservation, distribution and marketing, up to consumption and utilisation by consumers. It is concerned with food processes, food commodities, food composition and food quality (including sensory properties, safety and nutritional value).

The study of food science and technology integrates many scientific disciplines. Its bases are in chemistry, physics, biochemistry and microbiology. Its borders merge with those of agriculture, engineering, human nutrition, public health, commerce, psychology and law. Biotechnology has a role of increasing importance in food science and technology.

The food scientist and food technologist are concerned with population food supplies and requirements, community wants and needs, and equitable distribution of foods to ensure human nutritional needs are met.

New knowledge is acquired in the laboratory, the pilot plant, and the community, and then applied to the development of safe, nutritious and palatable foods, beverages and food ingredients by optimisation of processes and equipment. Foods are studied in terms of their basic constituents and structures, and the changes they undergo when subjected to handling, processing and distribution.

The food scientist and food technologist are equally concerned with the development and selection of raw materials from agricultural, horticultural, animal and marine sources.

A safe, adequate, palatable and nutritious food supply is essential to human health. The food and beverage industry is of major economic importance and in Australia is the largest sector of manufacturing industry. Internationally, food production, processing and service are among the largest and most stable industries. The challenges are to increase the availability, variety, quality and quantity of foods economically and in line with the needs of the world population. The Australian industry has a major role to play in supplying high quality foods to emerging overseas markets and there is a national and international demand for professionally trained people prepared to accept responsibility for the quality and safety of food.

The courses provide basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources and food wastes, and communication, and in areas such as dietetics after further training.

The Department of Food Science and Technology offers undergraduate training through the Board of Studies in Science and Mathematics (BSSM) and in the BSc courses in Food Science and Technology (four stages full-time 3060, six stages part-time 3070). The BSc course is three stages for a Pass degree during which students can study aspects of food science and technology in combination with other
subjects in a relevant discipline, preferably biochemistry, microbiology, biotechnology or chemistry. The fourth Honours Stage of the BSc Course includes further formal training in food science and technology as well as an extensive research project. The BSc degree course in Food Science and Technology (3060) is four Stages full-time (pass or honours).

3800
Food Science and Technology

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
PHYS1002 or PHYS1022

Stage 2
BIOC2101 or BIOC2181
BIOC2201 or BIOC2291
CHEM2801, CHEM2921
FOOD1100, FOOD1220, FOOD3220
MICR2201
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOT3041
CHEM3801
FOOD1360, FOOD1370, FOOD2320, FOOD2330
Elective subjects to give a total of 105 Credit Points (Level III)

Stage 4 (Honours)
FOOD9420
Elective subjects (30CP)

GENETICS

Genetics is covered in two programs: Program 6840 is broadly based and initially covers all aspects of Genetics. It allows students at Level III to maintain a broad range of interests including Molecular Genetics, Evolutionary and Population Genetics and Human Genetics or to concentrate on a particular field. Molecular Genetics (Program 4110) allows students to specialise in Molecular Biology and Genetics. In both programs students can also specialise in Biochemistry, Biological Science, Biotechnology or Microbiology/Immunology. Stage 4 (Honours) programs in Genetics are available in any of these schools.

6840
Genetics

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points (Recommended: COMP1001)

Stage 2
BIOC2101, BIOC2201
BIOS2011 or MICR2201
BIOS2021
MATH2841 or BIOS2041
Elective subjects totalling 30 or 45 Credit points,
(Recommended: BIOS2031, BIOS2051, BIOS2061,
CHEM2021, COMP1001)
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOC3291, BIOC3151
Subjects totalling at least 30 Credit Points from:
BIOC3121, BIOC3131, BIOC3141, BIOC3301*,
BIOC3281, BIOT3031 or MICR3021, and further
elective subjects to give a total of 345 Credit Points
(Recommended: BIOC3111, BIOS3071, BIOS3121,
BIOS3141, BIOT3011, BIOT3061, MICR3011,
MICR3041)
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours)
must complete 7 Level III subjects
* Consult Head of School

Stage 4 (Honours)
BSSM4103 (F/T), BSSM4109(P/T)

GEOGRAPHY

Geography is the scientific study of variations from place to place on the earth's surface. It provides an analytical framework for understanding and investigating many of society's pressing problems such as the use and management of scarce resources, the impact of environmental hazards on human activities, soil erosion and conservation, land use conflicts, and the spatial organisation of culture and economy.

The program 2700 includes physical and human Geography. Emphasis is on studies of the natural and built environment, as well as a grounding in basic analytical skills and techniques (e.g. statistical methods and computing, remote sensing and airphoto interpretation, geographical information systems, field and laboratory techniques) required for problem solving and application. Geography can be usefully combined with other sciences, especially Geology and Biological Science. The program
is a generalist science degree in geography. Students who express a desire to pursue a more vocationally-oriented geography degree are able to transfer into the Bachelor of Science in Applied Geography (3010) at the end of their second year. Only those students who achieve a credit average in second year will be able to transfer.

**2700**

**Geography**

**Stage 1**
Select at least two of:
GEOG1601, GEOG1701, GEOG1801
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects to make a total of 120 Credit Points for the year

**Stage 2**
GEOG2101
Geography subjects totalling 30 Credit Points
Elective subjects totalling 75 Credit Points
One 56 hour or two 28 hour General Education subjects

**Stage 3**
Level III Geography subjects totalling 60 Credit Points
Elective subjects totalling 60 Credit Points
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 120 Credit Points and must have completed GEOG2101, GEOG2013 or GEOG3611

**Stage 4 (Honours)**
GEOG4418/GEOG4414

**GEOLOGY (Including Geophysics and Geochemistry)**

Geology is the study of the nature and evolution of our planet. It is concerned with the composition and modes of formation and deformation of the igneous, sedimentary and metamorphosed rocks and concentrations of minerals that comprise the earth's crust and interior. Geology enquires into the essential controls on the development and distribution of such rocks and minerals in space and geological time. Likewise it is concerned with the nature, distribution, and evolution of life forms through time. Applied geology is concerned with the use of geological knowledge in the location and extraction of mineral and energy deposits, and in engineering and environmental tasks, activities fundamental to society. Thus geology has a diverse, professional function as well as being a scientific discipline.

Geophysics employs sophisticated instrumentation in order to construct physical earth models and Geochemistry integrates an understanding of the earth with advanced knowledge of chemistry and chemical investigation methods. Both are companion disciplines to Geology, with specialist career paths.

**Program for Professional Geology**
Most employers of professional geologists require completion of a four-stage program, including a major project component. This can be achieved either through the Applied Geology Course (Course 3000) or through program 2500 of the Science/Advanced Science Course. Specialist 4-stage programs are also available in Geophysics (2503) and Geochemistry (2504) through the Advanced Science Course.

Students wishing to enter the geological profession through program 2500 should follow the complete program in Geology as outlined, and then proceed to a Stage 4 (Honours) program. This provides a balanced combination of fundamental and Applied Geology subjects, including advanced coursework as well as an independent field project in the Stage 4 component.

**Geology as a Program Component**
Geology is a natural companion to other sciences, such as Chemistry, Physics, Botany, Zoology, Biology and Geography. Program 2500, designed for specialisation in geology, also allows students to combine geology with another science subject or with Arts, Commerce or Law. Students should select the most appropriate components from the Geology Program 2500 in consultation with the Program, Advisor in the School of Geology.

Specific programs incorporate Geology and Chemistry (Geochemistry, program 2504), Geology and Physics (Geophysics, program 2503) and Geology and Geography or Biology (Earth and Environmental Science, program 2527).

Students may transfer to the professional program (Applied Geology - 3000) in second year, providing their performance in first year has been satisfactory, with the permission of their program advisor.

**Geology in Marine Science**
See Marine Science (Earth Science Oceanography) (6833).

**2500**

**Geology**

**Stage 1**
CHEM1101, CHEM1201
GEOL1111, GEOL1211
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
and either
BIOS1101 and BIOS1201* or
GEOG1601, GEOG1701 or
PHYS1002 or PHYS1022

* Students following a combination of Applied Geology with Botany and/or Zoology at Level I must take Biology subjects, BIOS1101, BIOS1201. At Level II they should take BIOS2031, BIOS2041, BIOS2051, BIOS2061 along with at least 45 Credit Points of level II
Geology subjects. At Level III subjects totalling 45 Credit Points should be chosen from BIOS3101, BIOS3051, BIOS3071, BIOS3081, BIOS3091, BIOS3121 along with at least 60 Credit Points of level II/III or level III Geology subjects.

Stage 2
GEOL2100, GEOL2110, GEOL2120, GEOL2131, GEOL2170, GEOL2180, GEOL2200, GEOL2220, GEOL2231.
Further elective subjects totalling 22.5 credit points and chosen from: GEOL2250, GEOL2260, GEOL2290, MSC16200 or as approved by the program advisor.
One 56 hour or two 28 hour General Education subjects

Stage 3
GEOL3101, GEOL3110, GEOL3120, GEOL3131, GEOL3170, GEOL3241
Further electives totalling 45 credit points and chosen from: GEOL3201, GEOL3231, GEOL3250, GEOL3280, MSC16300
7.5 Credit Points from subjects under General Education objective 5
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 120 Credit Points

Stage 4 (Honours)
GEOL4303(F/T) or GEOL4343(P/T)

INFORMATION SYSTEMS

Entry to this program is restricted to students who have been offered a place directly (UAC code 429024). There is a strict quota on entry to later Stages of this program.

Information Systems is concerned with information systems analysis and design, data management, computer processing, edp audit, management information systems and applied expert systems within business and government organisations. There is a growing maturity in the discipline as the underlying theory and associated principles become better understood and as advanced information processing techniques emerge. In many respects the development of the knowledge base which forms the discipline parallels developments in computing technology as new opportunities become apparent for the solution of information processing problems. Hence, information systems is concerned with the way in which computer systems are used within organisations – mainly business and government. There is a high degree of complementarity between Computer Science and Information Systems. The program is intended to develop conceptual and practical skills. After an introductory first Stage, students study systems design, database, communications and commercial programming in parallel with computer science, mathematics and management accounting subjects. In the honours Stage, well qualified students may specialise in advanced information systems and data management topics.

See also Course 3971

2503
Geophysics (Advanced Science only)

Professional geophysicists work closely with geologists and, appropriately, studies of both disciplines are undertaken in the one Department. Fundamental and applied geophysics is taught to geology students in program 2500. Program 2503 is for students who intend to become professional geophysicists. Students should consult the Department of Applied Geology for program approval.

For details of this program, consult the School of Geology.

2504
Geochemistry (Advanced Science only)

This program combines a knowledge of Chemistry particularly Analytical Chemistry and geochemical aspects of Geology. The program produces graduates who have a broad background in both Chemistry and Geology, for employment in areas such as the mineral, environmental studies or geochemical research.

For details of this program please consult with the School of Geology and the School of Chemistry.

1400
Information Systems

Stage 1
ACCT1501, ACCT1511
COMP1011, COMP1021
INFS1602, INFS1603
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021

Stage 2 (Direct Stage 2 Entrants)*
ACCT1501, ACCT1511
COMP2811
INFS1602, INFS1603, INFS2603, INFS2607, INFS2609
MATH2841 or MATH2801
Elective subjects totalling 45 Credit points
One 56 hour or two 28 hour General Education subjects

* Students admitted at Level II must enrol in another science program for Stage 1. Transfer is based on academic performance at Level I. Students in this category are not required to complete ECON1101.
Stage 3**
INFS3605, INFS3606, INFS3608
Elective subjects totalling 60 Credit Points including at least one at Level III
One 56 hour or two 28 hour General Education subjects
** Stage 2 direct entry students must complete MATH2841 or MATH2801 in lieu of elective subjects totalling 15 Credit Points
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
INFS4794, INFS4886, INFS4887, INFS4893, INFS4898
Elective subjects totalling 60 credit points at level IV
The General Education requirement is covered by components of compulsory subjects in the course.

MARINE SCIENCE

Marine Science programs allow specialisations in selected areas of marine science, yet also include adequate exposure to other pertinent disciplines.

All students must select one major sequence from: Physical Oceanography (6831) or Biological Oceanography (6832) or Earth Science Oceanography (6833) or Environmental Chemistry (6834). In addition, two minor sequences from the Physical, Biological, Earth Science, and Chemical minor sequences must be taken.

6832
Marine Science (Biological Oceanography)

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1002, PHYS1601
30 Credit Points from one of the strands:
1. BIOS1101, BIOS1201
2. CHEM1101, CHEM1201
3. GEOL1111, GEOL1211
MATH1081 or a further 15 Credit Points from the above strands

Stage 2
MATH2100, MATH2120, MATH2240, MATH2301, MATH2520, MATH2200 or MATH2220
MSCI2001
PHYS2991
Continue the strand chosen in Stage 1:
1. BIOS2011 or BIOS2031 or BIOS2051 or BIOS2061 or CHEM2011 or CHEM2021 or CHEM2031 or CHEM2041
3. MSCI6200
Additional elective subjects totaling 120 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
MATH3121, MATH3201, MATH3241, MATH3261
MSCI3001
Choose an additional 30 Credit Points from:
CHEM3021, CHEM3031, CHEM3041, BIOS3081, BIOS3091, MSCI6300, MATH2160, MATH3101, MATH3150, MATH3301, PHYS2810, PHYS3829
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete 90 Credit Points of Level III subjects.

Stage 4 (Honours)
MSCI4003 F/T, MSCI4009 P/T
Subjects in waves, turbulence, ocean modelling, data analysis and geophysical fluid mechanics are offered

6831
Marine Science (Physical Oceanography)

Stage 1
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1002, PHYS1601
30 Credit Points from one of the strands:
1. BIOS1101, BIOS1201
2. CHEM1101, CHEM1201
3. GEOL1111, GEOL1211
MATH1081 or a further 15 Credit Points from the above strands

Stage 2
MATH2100, MATH2120, MATH2240, MATH2301, MATH2520, MATH2200 or MATH2220
MSCI2001
PHYS2991
Continue the strand chosen in Stage 1:
1. BIOS2011 or BIOS2031 or BIOS2051 or BIOS2061 or CHEM2011 or CHEM2021 or CHEM2031 or CHEM2041
3. MSCI6200
Additional elective subjects totaling 120 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOS3081, BIOS3091
MICR3071
Level III subjects totalling 30 Credit Points which may include the subjects corresponding to the strand chosen in Stages 1 and 2:
1. MSCI6300
2. MATH3021, MSCI3001
Elective subjects totalling 30 Credit Points
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 90 Credit Points

Stage 4 (Honours)
MSCI4003 F/T, MSCI4009 P/T
**SCIENCE**

6833  
**Marine Science (Earth Science Oceanography)**  
For details of this program, please consult with the Centre for Marine Science.

6834  
**Marine Science (Environmental Chemistry)**  
For details of this program, please consult with the Centre for Marine Science.

**MATERIAlS SCIENCE**  
From 1998 the School of Materials Science and Engineering are offering a program within Advanced Science. Some details of this program are not yet finalised.

**0400**  
**Materials Science (Advanced Science only)**

**Stage 1**  
CHEM1101, CHEM1201  
MATH1131 or MATH1141  
MATH1231 or MATH1241  
MATS1001, MATS 1011, MATS1021  
PHYS1002  
MECH0440  
TEXT1301

**Stage 2**  
CHEM2011, CHEM2828  
PHYS2030  
MATH2021  
MATS1002, MATS1142, MATS1072, MATS1082, MATS2869, MATS1112  
One 56 hour or two 28 hour General Education subjects

**Stage 3**  
PHYS3021, PHYS3310  
MATS1093, MATS2213, MATS2223, MATS2233, MATS4513, MATS4523  
Elective subjects totalling 30 Credit Points  
One 56 hour or two 28 hour General Education subjects

**Stage 4**  
MATS4444

*Stages 2 and 3 of this program are yet to be finalised further details of this program will be available in subsequent handbooks.  
**Students who enrol in this program are advised that there is no corresponding 3 year Program. Students not wishing to do the honours component must transfer to Course 3030 BSc (Tech) and complete the 3rd year component of this course. For further information contact the School of Materials Science and Engineering.

**MATHEMATICS**

The School is divided into Departments of Pure Mathematics, Applied Mathematics and Statistics. Program 1000 allows specialisation in any of these areas. Students wishing to major or undertake Honours in Statistics should consult programs 1006, 1066 and 1067.

Students in the Advanced Science Course proceed to Stage 4 (Honours) and should select some higher mathematics subjects in the earlier Stages.

Students wishing to include some computing in their program should consult programs 1061 and 1067, while those in the Advanced Science Course wishing to include Level III Computer Science subjects should consult programs 1060 and 1066.

There are two specified interdisciplinary programs run with the Faculty of Commerce: Mathematics and Finance (1010) and Mathematics of Management (6810). Mathematics is also available through the Marine Science (Physical Oceanography) program 6831, Ecology (Mathematical Ecology) program 6852 and Environmental Science (Environmental Mathematics) programs 6867, 6868, 6869 and as the Science part of double degrees with Commerce, Medicine, Law, Arts and Engineering.

Pure Mathematics is the study of the essential structures of mathematics. Work by pure mathematicians underpins most of the technological advances of this century; the subject is concerned with problems and techniques which transcend specific applications. Research, focussing on the development of existing theories or the creation of new ones, may be driven by applications or by the internal demands of the discipline. Pure Mathematics subjects provide the insights and understanding required by those using mathematics, leading to mastery of the fundamental processes of mathematical science and the capacity for innovative applications in any area.

Applied Mathematics concerns the development of mathematics and models for understanding scientific phenomena, for the solution of technical and industrial problems, and for use in the social, economic and management sciences. Courses are designed to provide basic mathematical and computational skills needed for a wide range of applications, to develop the capability to construct, analyse and interpret mathematical models, and to encourage enthusiasm for the role of the mathematician in a variety of contexts.

Statistics is the science and art of using factual material for modelling and inference. Its mathematical foundations are in the theory of probability and it deals with how to estimate and make decisions using knowledge which is uncertain or observational material which is subject to error. There is a rich interplay of ideas between the theory of statistics and fields such as engineering, medicine and biological and behavioural sciences where statistical problems constantly arise.
Pure Mathematics majors
A Mathematics program is considered to be a degree in Pure Mathematics if it includes 60 Credit Points of Pure Mathematics Level III subjects.

Furthermore:
1. Pure Mathematics subjects relevant to the mathematical aspects of Computer Science are MATH2400 and MATH2410 in Stage 2, and MATH3400, MATH3411 and MATH3430 in Stage 3.
2. Pure Mathematics subjects relevant to mathematics teaching are MATH3511, MATH3521, MATH3531, MATH3560 and MATH3570 in Stage 3, or their higher equivalents.
3. Pure Mathematics subjects relevant to the applications of mathematics in physics or engineering are MATH3531, MATH3541 and MATH3570 in Stage 3, or their higher equivalents.

Applied Mathematics majors
A Mathematics program is considered to be a degree in Applied Mathematics if it includes 60 Credit Points of Level III Applied Mathematics subjects.

Note the following recommendation:
Level II: At least two of; MATH2160, MATH2180, MATH2200, MATH2220, MATH2240, MATH2301.
Level III: At least three of: MATH3101, MATH3110, MATH3121, MATH3130, MATH3161, MATH3170, MATH3181, MATH3201, MATH3241, MATH3261, MATH3301.

In addition, the following are recommended in Stage 1
1. For students interested in physical sciences or for theoretical oceanography, meteorology or fluid dynamics: either PHYS1002 or PHYS1022.
2. For students interested in economic or management sciences: see Mathematics for Management (6810).
3. For students interested in social or biological sciences, at least 30 Credit Points from the following: BIOS1101 and BIOS1201; PSYC1001 AND PSYC1011; PHYS1002; CHEM1101 and CHEM1201.
4. Applied mathematics for computational methods or computer science: COMP1011 and COMP2811.

Statistics majors
See programs 1006, 1066 or 1067.
A major revision of the Statistics programs involving many new and altered subjects has now been implemented. Stage 2 altered from 1996 and Stage 3 from 1997. Any student who has taken Level II Statistics subjects before 1996 or Level III Statistics subjects before 1997 and wishes to take further Statistics subjects should consult the Head of Department.

Higher Subjects
Throughout the Mathematics and Statistics programs, where a subject is mentioned at the ordinary level the higher equivalent (if any) may be substituted. The higher equivalent of MATH2011 is the pair of subjects MATH2110 and MATH2610.

General Education
All students in Mathematics programs are required to complete 30 Credit Points of General Education in approved subjects outside of the Faculty of Science and Technology and, in addition, the subject MATH3010 Professional Issues and Ethics in Mathematics.

1000
Mathematics

Stage 1
MATH1131 or MATH1141
MATH1231 or MATH1241
Elective subjects totalling 90 Credit Points*

Advanced Science students must include MATH1081 in Stage 1 in place of 15 Credit Points of electives. Science students must include MATH1081 in one of Stages 1 or 2 in place of 15 Credit Points of electives. The School will advise which Stage is appropriate depending on the student’s mathematical background.

Stage 2
MATH2011 (or MATH2110 and MATH2610)
MATH2120
MATH2501, MATH2520
Further Level II or Level III Mathematics subjects totalling 15 Credit Points
Elective subjects totalling 60 Credit Points*

General Education subjects totalling 15 Credit Points

Stage 3
MATH3010
Level III Mathematics subjects totalling 60 Credit Points
Elective subjects totalling 37.5 Credit Points*

General Education subjects totalling 15 Credit Points

Advanced Science students must complete 97.5 Credit Points of Level III Mathematics subjects and elective subjects totalling 22.5 Credit Points*. In special cases other subjects may be substituted for these subjects. These students should discuss their Level III selection of subjects with the Head of the appropriate Department.

Stage 4 (Honours) (Advanced Science Only)
MATH4103 or MATH4603 or MATH4903
* Up to 120 Credit Points may be from subjects that are restricted to this program or Arts subjects from the following subject areas: Chinese, Economics, English, French, German, History, Indonesian, Modern Greek, Music, Political Science, Russian, Sociology, Spanish and Latin American Studies and Theatre and Film Studies. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104. Japanese and Korean are also available for students in Advanced Science.
1060
Mathematics with Computer Science
(Advanced Science only)

Stage 1
COMP1011, COMP2811
MATH1131 or MATH1141
MATH1231 or MATH1241
MATH1081
Elective subjects totalling 45 Credit Points*

Stage 2
MATH3010
COMP2011, COMP2041
MATH2011 (or MATH2110 and MATH2610)
MATH2501, MATH2301, MATH2400
MATH2801 or MATH2841
Level II or Level III elective subjects totalling 15 Credit Points*
(Recommended alternative strands: Applied Mathematics: MATH2120. Pure Mathematics: MATH2410.)
General Education subjects totalling 15 Credit Points

Stage 3
Level III Computer Science subjects totalling 30 Credit Points chosen from: COMP3111, COMP3121, COMP3311, COMP3411.
Subjects totalling 15 Credit Points chosen from: MATH301, MATH300, MATH340, MATH3411.
Further Level III Mathematics subjects totalling 60 Credit Points
Elective subjects totalling 15 Credit Points*
(Recommended alternative strands: Applied Mathematics: MATH3101 and at least one of MATH3161, MATH3181, MATH3201. Pure Mathematics: MATH3411, MATH3430, MATH3521.)
General Education subjects totalling 15 Credit Points
Students should discuss their Level III selection of subjects with the Head of the appropriate Department. Students proposing to proceed to MATH4003 Mathematics and Computer Science Honours must complete 45 Credit Points of Level III Computer Science subjects.

Stage 4 (Honours)
MATH4003 or MATH4103 or MATH4603
* Up to 75 Credit Points may be from subjects that are restricted to this program or Arts subjects from the following subject areas:
Chinese, Economics, English, French, German, History, Indonesian, Modern Greek, Music, Political Science, Russian, Sociology, Spanish and Latin American Studies and Theatre and Film Studies. Japanese and Korean are also available. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104.

1061
Mathematics with Computing

Stage 1
COMP1001**, COMP1011
MATH1131 or MATH1141
MATH1231 or MATH1241
Elective subjects totalling 60 Credit Points*
Advanced Science and combined degree students must include MATH1081 in Stage 1 in place of 15 Credit Points of electives. Science students must include MATH1081 in one of Stages 1 or 2 in place of 15 Credit Points of electives. The School will advise which Stage is appropriate depending on the student's mathematical background.

Stage 2
COMP2811**
MATH2011 (or MATH2110 and MATH2610)
MATH2120, MATH2301
MATH2501, MATH2520
MATH2801 or MATH2841
Elective subjects totalling 30 Credit Points*
MATH2160, MATH2180, MATH2200, MATH2400, MATH2410 are recommended
General Education subjects totalling 15 Credit Points

Stage 3
MATH3010**
MATH3301
Level II Computer Science subjects totalling 15 credit points
Further Level III Mathematics subjects totalling 45 Credit Points (MATH3101, MATH3400, MATH3411, MATH3430 are recommended)
Elective subjects totalling 22.5 Credit Points
General Education subjects totalling 15 Credit Points
Advanced Science students must complete 97.5 Credit Points of Level III Mathematics or Computer Science subjects and elective subjects totalling 22.5 Credit Points*. These students should discuss their Level III selection of subjects with the Head of the appropriate Department.

Stage 4 (Honours) (Advanced Science only)
MATH4103 or MATH4603
* Up to 60 Credit Points may be from subjects that are restricted to this program or Arts subjects from the following subject areas:
Chinese, Economics, English, French, German, History, Indonesian, Modern Greek, Music, Political Science, Russian, Sociology, Spanish and Latin American Studies and Theatre and Film Studies. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104. Japanese and Korean are also available for students in Advanced Science.
** Students in the Commerce/Science combined degree should replace COMP1001 in Stage I by COMP2811 and replace COMP2811 in Stage 2 by any other Level II Computer Science subject. In addition, they do not need to attempt MATH3010.
1006
Statistics

Stage 1
MATH1131 or MATH1141
MATH1231 or MATH1241
Elective subjects totalling 90 Credit Points*

Advanced Science students must include MATH1081 in Stage 1 in place of 15 Credit Points of electives. Science students must include MATH1081 in one of Stages 1 or 2 in place of 15 Credit Points of electives. The School will advise which Stage is appropriate depending on the student's mathematical background.

Stage 2
MATH2120
MATH2510 or MATH2011
MATH2501, MATH2520
MATH2801, MATH2810, MATH2831
Elective subjects totalling 45 Credit Points* (or 37.5 if MATH2011 taken)

General Education subjects totalling 15 Credit Points

Stage 3
MATH3010
MATH3801, MATH3840, MATH3800, MATH3810
Statistics subjects totalling 30 Credit Points chosen from: MATH3000 or MATH3001, MATH2840, MATH3820, MATH3830, MATH3850, MATH3860, MATH3870, MATH3880, MATH3890.
Elective subjects totalling 30 Credit Points*

General Education subjects totalling 15 Credit Points

Advanced Science students must complete 97.5 Credit Points of Level III Mathematics subjects including 45 Credit Points of Level III Statistics subjects and, in addition, 22.5 Credit Points of elective subjects*. These students should discuss their Level III selection of subjects with the Head of the Statistics Department.

Stage 4 (Honours) (Advanced Science only)
MATH4903

*Up to 120 Credit Points may be from subjects that are restricted to this program or Arts subjects from the following subject areas: Chinese, Economics, English, French, German, History, Indonesian, Modern Greek, Music, Political Science, Russian, Sociology, Spanish and Latin American Studies and Theatre and Film Studies. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104. Japanese and Korean are also available for students in Advanced Science.

1067
Statistics with Computing

Stage 1
COMP1001**, COMP1011
MATH1131 or MATH1141
MATH1231 or MATH1241
Elective subjects totalling 60 Credit Points*

Advanced Science and combined degree students must include MATH1081 in Stage 1 in place of 15 Credit Points of electives. Science students must include MATH1081 in one of Stages 1 or 2 in place of 15 Credit Points of electives. The School will advise which Stage is appropriate depending on the student's mathematical background.

Stage 2
COMP2811**
MATH2120
MATH2510
MATH2501, MATH2520
MATH2801, MATH2810, MATH2831, MATH2840
Elective subjects totalling 30 Credit Points* MATH2520 is recommended

General Education subjects totalling 15 Credit Points

Stage 3
MATH3010**
MATH3800, MATH3810
Further Level III Statistics subjects totalling 30 Credit Points chosen from: MATH3000 or MATH3001, MATH3801, MATH3820, MATH3830, MATH3840, MATH3850, MATH3860, MATH3870, MATH3880, MATH3890.

Level II Computer Science subjects totalling 15 Credit Points

Level III Mathematics subjects totalling 15 Credit Points

Elective subjects totalling 22.5 Credit Points

General Education subjects totalling 15 Credit Points

Advanced Science students must complete 97.5 Credit Points of Level III Mathematics subjects including 45 Credit Points of Level III Statistics subjects and, in addition, 22.5 Credit Points of elective subjects*. These students should discuss their Level III selection of subjects with the Head of the Statistics Department.

Stage 4 (Honours) (Advanced Science only)
MATH4903

*Up to 60 Credit Points may be from subjects that are restricted to this program or Arts subjects from the following subject areas: Chinese, Economics, English, French, German, History, Indonesian, Modern Greek, Music, Political Science, Russian, Sociology, Spanish and Latin American Studies and Theatre and Film Studies. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104. Japanese and Korean are also available for students in Advanced Science.

** Students in the Commerce/Science combined degree should replace COMP1001 in Stage 1 by COMP2811 and replace COMP2811 in Stage 2 by any other Level II Computer Science subject. In addition, they do not need to attempt MATH3010.
1010
Mathematics and Finance
(Advanced Science only)

PLEASE NOTE: this program is being revised for 1999. Students should contact the School of Mathematics for details

Stage 1
ACCT1501, ACCT1511
ECON1101, ECON1102
MATH1131 or MATH1141
MATH1231 or MATH1241
FINS2612
COMP1001

Stage 2
MATH3010
MATH2110, MATH2130, MATH2160
MATH2501, MATH2610
MATH2901, MATH2910, MATH2931
FINS2613, FINS2624

General Education subjects totalling 15 Credit Points

Stage 3
MATH3101, MATH3161, MATH3301
MATH3610, MATH3620, MATH3630
MATH3901, MATH3980

Finance subjects 1 and 2*

General Education subjects totalling 15 Credit Points

Stage 4
MATH4012
MATH3181
MATH5695
MATH5965, MATH5816, MATH5835

Finance subjects 3 and 4*

* Finance subjects 1, 2, 3 and 4 are the subjects
FINS3616, FINS3635
plus two subjects chosen with advice from #
FINS2622, FINS2625, FINS3630, FINS3633, FINS3634, FINS3636, FINS3774+

# not all subjects are offered in any year

Variation in Mathematics subjects may be allowed with permission of the Head of the School of Mathematics.

Skill in C/C++ programming is highly desired by year 4.

Honours in program 1010 may be awarded on the basis of a weighted average of the subjects studied over the complete program.

6810
Mathematics of Management
(Advanced Science only)

This program includes subjects given by the Schools of Accountancy and of Economics. There has been an increasing trend towards more use of mathematics, and the use of more advanced mathematics, in scientific management. This program trains mathematicians with an interest in the application of mathematics to management science. The mathematics content is that of a full Mathematics degree with Honours in either Applied or Pure Mathematics. Students completing this program with good records are eligible for entry to the Master of Commerce graduate degree program in the School of Accountancy. If appropriate subjects are selected, then this degree (MCom), which may be awarded by part-time study, qualifies the graduate for provisional membership of the Australian Society of Accountants; full membership is then granted after appropriate experience.

Stage 1
ACCT1501, ACCT1511
ECON1101, ECON1102
MATH1131 or MATH1141
MATH1231 or MATH1241

Elective subjects totalling 30 Credit Points*

Stage 2
MATH2011 (or MATH2110 and MATH2610)
MATH2120, MATH2160, MATH2180
MATH2501, MATH2520
MATH2801 or MATH2841
ACCT2522, INFS1602

Subjects totalling 15 Credit Points chosen from:
ACCT2542, INFS2603, FINS2613.

General Education subjects totalling 15 Credit Points

Stage 3
MATH3010

Subjects totalling 30 Credit Points chosen from:
MATH3101, MATH3121, MATH3161, MATH3181,
MATH3801, MATH3050, MATH3060.

Further Level III Mathematics subjects totalling 45 Credit Points

Elective subjects totalling 7.5 Credit Points*

General Education subjects totalling 15 Credit Points

Students should discuss their Level III selection of subjects with the Head of the appropriate Department.

Stage 4 (Honours)
MATH4103 or MATH4603

*Up to 37.5 Credit Points may be from subjects that are restricted to this program or Arts subjects from the following subject areas:
Chinese, Economics, English, French, German, History, Indonesian,
Modern Greek, Music, Political Science, Russian, Sociology, Spanish and Latin American Studies and Theatre and Film Studies. Japanese and Korean are also available. Upper Level Economics subjects are restricted to those in Economic History plus ECON2103, ECON2104.

MEDICAL PHYSICS

Medical Physics is the application of physics to diagnosis, treatment and prevention of human disease and disability. There is a continuing demand for professional physicists in this area as new physical techniques are rapidly translated into new medical instruments. There is an increasing demand for health physicists in industry and the public service to monitor environmental and occupational sources of radiation and other hazards.

This program gives an essential strong background in conventional physics including electronics and computing, a general background in the biological sciences and some specialised knowledge in biophysics and medical physics. Honours may be awarded. The basis is a suitably weighted performance over the last three stages of this four year advanced science degree.

0141 Medical Physics (Advanced Science only)

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1002 (or PHYS1022 at distinction level)

Stage 2
BIOC2101 and BIOC2201 or
BIOC2181 and BIOC2291
MATH2011, MATH2120
PHYS2410, PHYS2001, PHYS2021, PHYS2011,
PHYS2031
One 56 hour or two 28 hour General Education subjects

Stage 3
ANAT2111 or ANAT2120
PHPH2112
PHYS3410, PHYS3041, PHYS3060, PHYS1601
Plus elective subjects to make a total of 120 Credit points chosen from:
MATH2520, MATH2160, MATH2841, MATH3121
PATH3202, PHYS3630, PHYS3710, PHYS3720,
PHYS2601, PHYS3010 or PHYS3210*, PHYS3050*,
PHYS3760, PHYS3110, PHYS3120, PHYS3310,
PHYS3610
One 56 hour or two 28 hour General Education subjects

Stage 4
PHYS3021, PHYS3230, PHYS4411, PHYS4413,
SESC4410
Elective subjects totalling 30 Credit Points from the subjects listed for Stage 3 electives

* Students intending to undertake a higher degree in Physics would need to select PHYS3010 and PHYS3050.

MICROBIOLOGY AND IMMUNOLOGY

Microbiology is the scientific study of the smallest forms of life namely, bacteria, viruses, archaea, fungi and protozoa. These fascinating organisms impact on our lives in many ways. On the negative side, they cause disease in humans, animals and plants, they spoil our food and can destroy textiles and structural materials. However, microorganisms are also of great benefit. Indeed, microorganisms are the key participants for the turnover of nutrients and elements and are main producers of carbon and biomass. They turn the wheels on this globe and are responsible for sustainability of life. They also contribute to a better environment via recycling of organic wastes, maintenance of soil fertility and biodegradation of pollutants. Many foodstuffs, beverages, pharmaceuticals, eg. antibiotics and other industrial products, are products of microbial action. The genetic engineering of microorganisms is a fundamental aspect of molecular biology and the way of the future.

Immunology, the study of the immune system, has contributed significantly to modern medicine in areas such as blood transfusion, organ transplantation, allergic reactions and immunity to disease. In cell biology, immunology has advanced our understanding of differentiation, cell cooperation and the triggering of proliferation and differentiation by cell surface receptors.

Both Microbiology and Immunology also provide an excellent training in the scientific method and scientific communication. We aim to provide an undergraduate training that serves as a starting point for many careers within our disciplines and beyond. An energetic honours programme provides experience of scientific research and aims to further develop a wide range of skills.

4400 Microbiology

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points
Stage 2
BIOC2101, BIOC2201
BIOS2021
MICR2201, MICR2011
Elective subjects totalling 30 or 45 Credit Points*
One 56 hour or two 28 hour General Education subjects

Stage 3
MICR3021
Subjects totalling at least 45 Credit Points from:
MICR3011, MICR3031, MICR3041, MICR3051,
MICR3061, MICR3071, MICR3081
Additional elective subjects to give a total of 345 Credit Points overall
One 56 hour or two 28 hour General Education subjects

Students proposing to undertake Stage 4 (Honours) must complete Level III subjects totalling 120 Credit Points, 60 of these Credit Points must be from Microbiology and Immunology.

Stage 4 (Honours)
MICR4013 or MICR4023

*MICR3041 Biometry is recommended. Students in course 3970 intending to do Honours should only do 30 Credit Points of stage 2 electives. Other recommended elective subjects include: Biochemistry, Biotechnology, Biological Science.

MOLECULAR GENETICS

Recent advances in Molecular Biology, especially the continuing development of recombinant DNA technology, have revolutionised our understanding of the structure, function and regulation of individual genes. These advances have opened up the exciting field of Molecular Genetics, one of the most rapid growth areas in biology. This marriage of Biochemistry, Molecular Biology and Genetics provides an exciting new approach for the study of all living organisms, including the human. Biochemistry and Molecular Genetics therefore represent fundamental components of biological and medical science and they will have increasingly important roles to play in many aspects of modern medicine, genetics and evolutionary biology.

4410
Immunology (Advanced Science Only)

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Stage 2
BIOC2101, BIOC2201
MICR2201, MICR2011
Subjects totalling 30 Credit Points from: BIOS2041, BIOS2021, CHEM2021, MATH2841, PHPH2112
Elective subjects totalling 30 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
MICR3041, MICR3051
Subjects totalling at least 30 Credit Points from:
MICR3021, MICR3031, MICR3061, MICR3081
Subjects totalling at least 30 Credit Points from:
MICR3071, BIOC3111, BIOC3121, BIOC3261,
BIOC3271, BIOC3281, BIOC3291, MATH3050,
PHYS2410, CHEM3221, PHPH3121, PATH3202,
Further elective subjects totalling 30 Credit Points
One 56 hour or two 28 hour General Education subjects

Students proposing to undertake Stage 4 (Honours) must complete Level III subjects totalling 120 Credit Points, 60 of these Credit Points must be from Microbiology and Immunology.

Stage 4 (Honours)
BIOC4428 or BIOS4013 or BIOT4073 or MICR4013

Highly recommended:

Stage 4 (Honours)
BIOS4013 or MICR4023

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Stage 2
BIOC2101 and BIOC2201
BIOS2021
CHEM2021 or CHEM2041
MICR2011 and MICR2201
Elective subjects totalling 15 or 30 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
BIOC3121, BIOC3281
Subjects totalling at least 15 Credit Points from:
BIOC3111, BIOT3031 or MICR3021
Subjects totalling 15 or 30 Credit Points from:
BIOC3111, BIOC3141, BIOC3151, BIOC3291,
BIOC3301*, BIOT3011, MICR3011, MICR3041 to give a total of at least 75 Credit Points from the above subjects.
Further subjects totalling 30 or 45 Credit Points to give a final total of 345 Credit Points
*
Consult Head of School

Stage 4 (Honours)
BIOC4428 or BIOS4013 or BIOT4073 or MICR4013

Highly recommended:

BIOS4013 or MICR4023

Stage 3
BIOC3121, BIOC3281
Subjects totalling at least 15 Credit Points from:
BIOC3111, BIOT3031 or MICR3021
Subjects totalling 15 or 30 Credit Points from:
BIOC3111, BIOC3141, BIOC3151, BIOC3291,
BIOC3301*, BIOT3011, MICR3011, MICR3041 to give a total of at least 75 Credit Points from the above subjects.
Further subjects totalling 30 or 45 Credit Points to give a final total of 345 Credit Points

Highly recommended: BIOC3271, BIOT3061, MICR3051
One 56 hour or two 28 hour General Education subjects

Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 120 Credit Points

* Consult Head of School

Stage 4 (Honours)
BIOC4428 or BIOS4013 or BIOT4073 or MICR4013
NEUROSCIENCE

This program introduces students to the biological and behavioural aspects of the nervous system. The program is based around the neuroscience subjects offered by the Schools of Anatomy, Physiology and Pharmacology, and Psychology.

Entry to the Neuroscience Programs is limited to Advanced Science students at Level II and academic merit is the sole criterion. Students planning this are advised to enrol initially in the Biological Sciences Holding Program (6817) and must apply and be accepted into the Anatomy quota at the time of pre-enrolment for Level II.

Advanced Science students who are interested in Medical Science are encouraged to consult with the Head of School regarding the possibility of transferring to the Bachelor of Medical Science degree.

7312
Neuroscience A (Advanced Science only)

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
PSYC1001, PSYC1011

Stage 2
ANAT2111
BIOC2101 and BIOC2201, or
BIOC2181 and BIOC2291
PHPH2112
PSYC2001, PSYC2071 and PSYC2081
One 56 hour or two 28 hour General Education subjects

Stage 3
ANAT3411, ANAT3421
PHPH3121, PHPH3131
Level III Psychology subjects totalling 30 Credit Points **
Subjects totalling 30 Credit Points at Level II or Level III to complete 360 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 4
Subject to satisfactory progress throughout the course (normally a credit average), students may proceed to the Honours Stage. Before the commencement of Stage 2 students should consult with the appropriate Schools and the Neuroscience program coordinating committee consisting of representatives from the Schools of Anatomy, Physiology and Pharmacology, and Psychology, about the subjects required for a particular Honours program. Students should also note general guidelines for Advanced Science Stage 4.

** Select 1 subject (15 Credit Points) from Advanced Perceptual / Cognitive – PSYC3151, PSYC3161, PSYC3211, PSYC3211,

1273
Neuroscience B (Advanced Science only)

Stage 1
BIOS1101, BIOS1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
CHEM1101 and CHEM1201
and either
PHYS1002 or PHYS1022 or
COMP1001 and 1 elective subject totalling 15 Credit Points

Stage 2
ANAT2111
BIOC2101 and BIOC2201 or
BIOC2181 and BIOC2291
PHPH2112
and subjects totalling 30 Credit Points from the following:
ANAT2211, BIOS2041, BIOS2021
CHEM2011, CHEM2021, PSYC1001, PSYC1011
or Level II subjects totalling 30 Credit Points from subjects offered from the Schools of Mathematics, Physics or Computer Science and Engineering and elective subjects totalling 15 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
ANAT3411, ANAT3421
PHPH3121, PHPH3131
and further Level III subjects totalling 60 Credit Points from among those offered in the Schools of Mathematics, Physics, Chemistry, Biochemistry, Physiology and Pharmacology, Computer Science and Engineering, Anatomy (Histology II recommended), Pathology, and PSYC2071.
One 56 hour or two 28 hour General Education subjects

Stage 4
Subject to satisfactory progress throughout their course (normally a credit average), students would normally be able to proceed to the Honours Stage. However, early in their course, and certainly before commencing Stage 3, students should consult with the appropriate Schools and the Neuroscience program coordinating committee consisting of representatives from the Schools of Anatomy, Physiology and Pharmacology, and Psychology, about the subjects required for a particular Honours program. Students should also note general guidelines for Advanced Science Stage 4.
PHILOSOPHY

Philosophy is a wide ranging discipline, catering for a great diversity of interests, for instance, in science, reasoning, persons, and social issues, and encouraging critical and imaginative thought about the foundations of other subjects. Apart from providing considerable choices for students majoring in Philosophy, the diversity of Upper Level subjects makes it possible for students majoring in other disciplines to select subjects complementing their main interest.

Value of Upper Level Subjects in Philosophy

Specialisation in Philosophy

Students specialising in Philosophy must complete any two of the School's Level I subjects (30 Credit Points): PHIL1006 (Reasoning, Values and Persons), PHIL1007 (Knowledge and the Knowers), PHIL1008 (Ethics and Society), PHIL1009 (Metaphysics: The world and us), PHIL1010 (Thinking about reasonings), PHIL1011 (Minds, bodies and persons). In addition, students must complete 6 Upper Level (II/III) subjects (90 Credit Points). Of these, at least four subjects must be chosen from List A, which includes subjects in Logic, Philosophy of Mind, Philosophy of Science, and areas of History of Philosophy relevant to those subject areas. Students normally take two Level II/III subjects in Stage 2, and four Level II/III subjects in Stage 3. Subject to approval of the School, which considers the individual subjects nominated by a student and the student's overall program in Philosophy, a student may be permitted to count up to 15 Credit Points offered outside the School toward specialisation in Philosophy.

List A

PHIL2106 Logic
PHIL2107 Advanced Philosophy of Science
PHIL2108 Ways of Reasoning
PHIL2109 Metaphysics (Realisms)
PHIL2116 Scientific Method
PHIL2117 Philosophical Logic
PHIL2118 Philosophy and Biology
PHIL2206 Contemporary Philosophy of Mind
PHIL2207 Issues in the Philosophy of Psychology
PHIL2208 Epistemology (Scepticisms)
PHIL2209 Epistemology (Knowledge and Justification)
PHIL2217 Personal Identity
PHIL2218 Philosophical Foundations of Artificial Intelligence
PHIL2219 Topics in Philosophy of Language
PHIL2226 Twentieth Century Analytic Philosophy
PHIL2228 Themes in Seventeenth Century Philosophy
PHIL2229 Themes in Eighteenth Century Philosophy
PHIL2417 Relativism: Cognitive and Moral
PHIL2518 Greek Philosophy
PHIL3106 PreHonours Seminar

The remaining two subjects are to be chosen from other Upper Level Philosophy subjects.

Level II/III

Some Level II/III subjects deal with particular philosophical topics; others can be taken in sequence to give more sustained treatments of larger areas. Students may select freely among these, subject to stipulations regarding prerequisites. Students are welcome to seek advice and further information from the School.

In certain circumstances the prerequisite specified for a subject may be waived; for example, in the case of students who have already studied similar material, or who wish to take isolated subjects relevant to another discipline. Students who feel they have a case for a concession of this kind should consult the School.

Honours Entry Requirements

Students intending to proceed to an Honours degree in Philosophy must normally complete Stages 1 – 3 of Programs 5200 (Philosophy) or 5262 (Philosophy of Science) with an average of at least 70% in their Philosophy subjects, including at least one Distinction result; plus PHIL3106 (PreHonours Seminar). Subject to the approval of the School, which considers the individual subjects nominated by a student and the student's overall program in Philosophy, a student may be permitted to count up to 15 Credit Points offered outside the School toward satisfying the Honours entry requirements. Students contemplating Honours are urged to seek advice from the School early in their course.

5200

Philosophy

Stage 1

MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Any two of the following: PHIL1006, PHIL1007
PHIL1008, PHIL1009, PHIL1010, PHIL1011
Elective subjects totalling 60 Credit Points

Stage 2

Philosophy subjects totalling 30 Credit Points*
Elective subjects totalling 90 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3

Philosophy subjects totalling 60 Credit Points*
Elective subjects totalling 45 Credit points
One 56 hour or two 28 hour General Education subjects

Students proposing to proceed to Stage 4 (Honours) must complete Level II/III or Level III subjects totalling 105 Credit Points including PHIL3106.

Stage 4 (Honours)

PHIL4000

* Refer to List A above for compulsory subjects.
5206
Philosophy with Computer Science (Advanced Science only)

For details of this Program please contact the School of Philosophy and the School of Computer Science and Engineering

5262
Philosophy of Science

For details of this program please consult with School of Philosophy and the School of Science and Technology Studies.

PHYSICS

The programs offered by the School (0100, 0110, 0121, 0141, 0161 and 0176) reflect the importance of Physics in science and technology at both the fundamental and at the applied levels.

0100
Physics (Advanced Science only)

Program 0100 Physics offers great flexibility in the choice of subjects. Students may take honours in either Physics or Physics/Geology.

Stage 1
MATH1131 or MATH1141*
MATH1231 or MATH1241*
PHYS1002
Elective subjects totalling 60 Credit Points** ***

Stage 2
MATH2011, MATH2120, MATH2520*
PHYS2000, PHYS2001, PHYS2011, PHYS2021, PHYS2031
Elective subjects totalling 22.5 Credit Points****
One 56 hour or two 28 hour General Education subjects

Stage 3
PHYS3010, PHYS3021, PHYS3030, PHYS3041, PHYS3050***, PHYS3060***
Level III elective subjects totalling 60 Credit points****
One 56 hour or two 28 hour General Education subjects

Stage 4 (Honours)
Choose one of PHYS4103, BSSM4013

*Students are encouraged to select Higher Level Mathematics subjects where applicable.

0110
Physics

Program 0110 Physics offers great flexibility in the choice of subjects for students enrolled in the BSc at pass level. This program is not available to advanced science students.

Stage 1
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1002
PHYS1601 and/or COMP1001
Elective subjects to make a total of 120 Credit Points*

Stage 2
MATH2011, MATH2120
PHYS2000, PHYS2001, PHYS2011, PHYS2021, PHYS2031
Elective subjects totalling 30 Credit Points
One 56 hour or two 28 hour General Education subjects

Stage 3
PHYS3021, PHYS3041, PHYS3060, PHYS3210, PHYS3230, PHYS3630 or PHYS3610 or PHYS3050
Elective subjects totalling 45 Credit points
One 56 hour or two 28 hour General Education subjects

* CHEM1101 is recommended.

0121
Physics and Astronomy (Advanced Science only)

This program provides the basic physics essential for a career in astronomy. It will not prevent specialisation in some other field of physics if students' interests change during their studies.

There is astronomy content in each Stage of the program. There are special lectures and projects in the version of PHYS1002 for physics majors. The other astronomy subjects are PHYS2160 and PHYS3160 and a lecture subject and projects in the Honours Stage.

Stage 1
MATH1131 or MATH1141*
MATH1231 or MATH1241*
PHYS1002
Elective subjects totalling 60 Credit Points**
**Stage 2**
MATH2011, MATH2120, MATH2520*
PHYS2000, PHYS2001, PHYS2011, PHYS2021,
PHYS2031, PHYS2160
elective subjects totalling 15 Credit Points
One 56 hour or two 28 hour General Education subjects.

**Stage 3**
PHYS3010, PHYS3021, PHYS3030, PHYS3041,
PHYS3050, PHYS3060, PHYS3160
elective Level III subjects totalling 52.5 Credit Points
One 56 hour or two 28 hour General Education subject.

**Stage 4 (Honours)**
PHYS4103

* Students are encouraged to select Higher Level Mathematics subjects where available
**Appropriate Level I electives include: CHEM1101, CHEM1201, PHYS1601, COMP1001

---

**0161**

**Physics with Computer Science**

Program 0161 (Physics with Computer Science) provides a strong background in Physics together with the computing skills necessary to fully utilise computers in research and industrial laboratories.

**Stage 1**
COMP1001, COMP1011
MATH1131 or MATH1141
MATH1231 or MATH1241
PHYS1002, PHYS1601
Elective subjects totalling 15 Credit Points

**Stage 2**
COMP2811
MATH2011, MATH2120, MATH2520 or PHYS2000**
PHYS2011, PHYS2021, PHYS2031
COMP2011
subjects totalling 15 Credit Points from PHYS2601, MATH2301, COMP2021
One 56 hour or two 28 hour General Education subjects

**Stage 3**
PHYS2000***, PHYS2001, PHYS3010***, PHYS3021, PHYS3030**
further Level III Physics subjects totalling 30 Credit Points*
Level III Computer Science subjects totalling 30 Credit Points
One 56 hour or two 28 hour General Education subjects

**Stage 4 (Honours) (Advanced Science Only)**
PHYS4103

*In Advanced Science an additional 7.5 Credit Points from Level III Physics or Mathematics is required
** course 3970 take PHYS2000, AdvancedScience take MATH2520

---

**ENGINEERING PHYSICS**

This program combines a thorough knowledge of experimental physics, electronics, computing and instrumentation, optoelectronics and communications with elements of engineering practice and management. It is designed to produce graduates with skills and knowledge appropriate to the requirements of Australian industry.

An industrial project of one session's duration with an industrial sponsor of the program is included in Stage 4.

The program prepares graduates for membership of the Institution of Engineers, Australia, within two years of initial employment in an engineering field. Graduates will be accepted for membership of the Australian Institute of Physics.

Honours may be awarded. The basis is a suitably weighted performance over the last three stages.

---

**0176**

**Engineering Physics (Advanced Science Course 3985 only)**

**Stage 1**
CHEM1800
COMP1001
MANF1100
MECH0130
MATH1131, MATH1231
PHYS1002, PHYS1601, PHYS2630

**Stage 2**
ELEC2030, ELEC2011
MATH2011, MATH2120, MATH2520
MATH2841, MATH3150
PHYS2011, PHYS2021, PHYS2030, PHYS2601
One 56 hour or two 28 hour General Education subject

**Stage 3**
ELEC3004, ELEC3013, ELEC3016
PHYS2000, PHYS2001, PHYS3021, PHYS3030 or
PHYS3230, PHYS3060, PHYS3310, PHYS3610, PHYS3630, PHYS3710/3720, PHYS3760
One 56 hour or two 28 hour General Education subject

**Stage 4**
ELEC4010
PHYS3010 or PHYS3210, PHYS3041, PHYS3710/3720, PHYS4764
elective subjects totalling 15 Credit Points chosen in consultation with the School (e.g. Accounting, Economics, Engineering)
PHYSIOLOGY AND PHARMACOLOGY

Physiology, the study of the processes and mechanisms which serve and control the various functions of the body, begins at Level II with a full year core subject Physiology 1. Students majoring in Physiology (Program 7300) should note the prerequisites for Level III Physiology, normally: satisfactory completion of PHPH2112 Physiology 1 and BIOC2101 and BIOC2201, or BIOC2181 and BIOC2291. Level III Physiology subjects provide the 60 Level III Credit Points required for a degree with a single specialisation in Physiology and can be taken with allied disciplines, such as Anatomy, Biochemistry and Molecular Genetics, Biological Science, Biotechnology, Chemistry, Microbiology and Immunology, Pharmacology or Psychology, to give a degree with a double specialisation. Note should be taken of the prerequisites and corequisites for the subjects taken with Physiology and Pharmacology subjects.

Students majoring in Pharmacology (Program 7301) should note that the prerequisites for Pharmacology are normally the same as for Physiology, namely satisfactory completion of PHPH2112 Physiology 1 and either BIOC2101 and BIOC2201, or BIOC2181 and BIOC2291. Level III Pharmacology subjects provide 30 credit Points and students should note that the completion of program 7301 requires additional Level III subjects which must be chosen from the closely related subjects listed below in Physiology, Biochemistry and Molecular Genetics, Microbiology and Immunology, Chemistry, or Biotechnology. Where sufficient extra subjects are taken from these or allied subjects such as in Anatomy, Biological Science, Biotechnology or Psychology, a degree will then be taken with double specialisation. Note should also be taken of the prerequisites and corequisites for the subjects taken with Pharmacology.

Advanced Science students who are interested in Medical Science are encouraged to consult with the Head of School regarding the possibility of transferring to the Bachelor of Medical Science degree.

7300 Physiology

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Stage 2
PHPH2112
BIOC2101 and BIOC2201, or
BIOC2181 and BIOC2291
Elective subjects totalling 60 Credit Points

Stage 3
PHPH3121, PHPH3131, PHPH3211, PHPH3221
Further subjects to give a total of 345 Credit Points
(Recommended electives: Anatomy, Biological Science, Biochemistry, Chemistry, Psychology, Microbiology)

Stage 4 (Honours)
PHPH4218
The General Education requirements are met within the Honours Program through seminars, an essay and participation in discussion groups. Students should also note general guidelines for Advanced Science Stage 4.

7301 Pharmacology

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
Elective subjects totalling 30 Credit Points

Stage 2
PHPH2112
BIOC2101 and BIOC2201, or
BIOC2181 and BIOC2291
Elective subjects totalling 60 Credit Points
(Recommended electives: Anatomy, Biological Science, Chemistry, Psychology)

Stage 3
PHPH3151, PHPH3251
subjects totalling at least 30 Credit Points selected from Level III
(Recommended: Anatomy, Biochemistry, Biological Science, Microbiology and Immunology, Physiology or Pathology. Electives in Biotechnology and Chemistry may also be appropriate. Students wishing to choose electives from Biotechnology or Chemistry are advised to consult the Pharmacology staff contact)

Further subjects to give a total of 345 Credit Points
One 56 hour or two 28 hour General Education subjects

Students proposing to proceed to Stage 4 (Honours) must complete Level III subjects totalling 105 Credit Points.
Stage 4 (Honours)  
PHPH4258  
The General Education requirements are met within the Honours program through seminars, an essay and participation in discussion groups. Students should also note general guidelines for Advanced Science Stage 4.

PSYCHOLOGY  
Psychology is a discipline of both scientific research and applied practice. As a science, psychology is concerned with the study of behaviour and its underlying mental and neural processes. Topics of study include learning, memory, cognition, perception, motivation, life-span development, personality, social interactions, and abnormal psychology. Psychology has many areas of application, especially in clinical, correctional, counselling, educational and organisational settings. In addition, people with training in psychology pursue careers in academic research, health research, developmental disabilities and rehabilitation; ergonomics; occupational health and safety; personnel selection, training, and management; vocational guidance; and marketing.

English Proficiency  
A high proficiency in English is needed to pass Psychology subjects.

1200  
Psychology  
This program provides three and four years of approved training in psychology. (In order to become a member of the professional body, the Australian Psychological Society (APS), and for registration as a psychologist in New South Wales, students will first need a University bachelor degree which includes three years of approved training in psychology, plus an approved fourth year. Students must also follow this by completing an accredited 5th and 6th year academic course such as one of the Master of Psychology degrees (Clinical, Forensic or Organisational) or a combined Doctor of Philosophy/Master of Psychology degree as offered by this University. An alternative of two years of supervised experience in professional practice may be undertaken for registration as a psychologist in New South Wales.

Stage 1  
MATH1131 or MATH1141 or MATH1011  
MATH1231 or MATH1241 or MATH1021  
PSYC1001 and PSYC1011  
Elective subjects totalling 60 Credit Points*

Stage 2  
PSYC2001, PSYC 2061, PSYC2071, PSYC2081  
Elective subjects totalling 60 Credit Points*  
One 56 hour or two 28 hour General Education subjects

1206  
Psychology with Computer Science (Course 3978 Only)  
This program is for students with interests in computational modelling and artificial intelligence, on the one hand, and human information processing, cognition, and group decision making, on the other. The program should be particularly useful for those who will work in a commercial environment that requires both 'people skills' and an application oriented knowledge of computing. It would also serve as a good basis for interdisciplinary research in areas that include both Psychology and Computer Science.

Stage 1  
COMP1011 and COMP1021  
MATH1131 or MATH1141  
MATH1231 or MATH1241  
MATH1081  
PSYC1001 and PSYC1011  
Elective subjects totalling 15 Credit points

Stage 2  
COMP2011 and COMP2031  
PSYC2001, PSYC2011, PSYC2071 and PSYC2081  
Elective subjects totalling 30 Credit Points from the list below*  
One 56 hour or two 28 hour General Education subjects
**SAFETY SCIENCE**

Safety Science is the application of physical, behavioural and life sciences to the health and safety of people at work and in the community. This program provides a multidisciplinary background required for students wishing to specialise in safety science. Careers in safety science are mostly based in the workplace and the BSc in Safety Science therefore focuses on issues related to occupational health and safety. It is a requirement that all safety graduates have knowledge of: the structure and function of the body; chemical, physical and engineering principles; and a working competence in statistics. The proposed program structure attempts to provide some of this knowledge and these competencies.

This program has been designed in consultation with safety professionals and with industry with a view to training students in occupational health and safety, risk management, chemical safety, or ergonomics for both private and public sectors. Contacts in industry and commerce suggest that graduates in safety science would be keenly sought to cope with the increasing emphasis of health and safety in business activities. The program can also lead to postgraduate training in safety after suitable experience (normally at least two years work in a relevant area after graduating).
8210
Safety Science with Physics

Safety science is a multidisciplinary subject with an emphasis on identification, assessment, control and risk management of workplace hazards and risks. Safety Science with Physics concentrates on physical hazards and risks, such as noise, electromagnetism and radiation.

Stage 1
PHYS1002
MATH1131 or MATH1141, MATH1231 or MATH1241
CHEM1101 and CHEM1201, or CHEM1101, or CHEM1401
BIOS1011 and BIOS1201, or BIOS1201
PSYC1001 and PSYC1011, or PSYC1001, or PSYC1011

Where necessary, elective subjects should be chosen from other Stage 1 Programs in this course in order to satisfy requirements of a total of 120 credit points for Stage 1.

If necessary, requirements for Stage 1 can be completed in Stage 2

Stage 2
Stage 1 requirements not already completed (where relevant).

and 15 CP from PHYS3630, PHYS3710, PHYS2850, PHYS2410, PHYS2810
General education requirements (15 CP)

8230
Safety Science with Psychology

Safety science is a multidisciplinary subject with an emphasis on identification, assessment, control and risk management of workplace hazards and risks. Safety Science with Psychology concentrates on behavioural and ergonomic risks, such as work and task organisation, management systems and organisational behaviour.

Stage 1
PSYC1001 and PSYC1011
MATH1131 or MATH1141, MATH1231 or MATH1241
PHYS1002
CHEM1101 and CHEM1201, or CHEM1101, or CHEM1401
BIOS1011 and BIOS1201, or BIOS1201
PSYC2001 or equivalent statistics subject
PSYC2011, PSYC2061, PSYC2071, PSYC2081
General education requirements (15 CP)

Where necessary, elective subjects should be chosen from other Stage 1 Programs in this course in order to satisfy requirements of a total of 120 credit points for Stage 1.

If necessary, requirements for Stage 1 can be completed in Stage 2

Stage 2
Stage 1 requirements not already completed (where relevant).
SESC6610
PSYC2001 or equivalent statistics subject
ANAT6151
PSYC2011, PSYC2061, PSYC2071, PSYC2081
General education requirements (15 CP)

Where necessary, elective subjects should be chosen from other Stage 2 Programs in this course in order to satisfy requirements of a total of 135 credit points for Stage 2.

Stage 3
SESC3020, SESC3100, SESC3200, SESC3300, SESC3400, SESC3600, SESC3620, SESC3810
PSYC3121, PSYC3151, PSYC3211, PSYC3271
General education requirements (15 Cr)
Stage 4 (120 Credits)
SESC4010, SESC4030, SESC4211, SESC4410, SESC4820 or SESC4850, SESC4960
Elective subjects in Safety Science or recommended programs to a total of 120 credit points (SESC4091 preferred).
Professional, ethical and social responsibility requirements (general studies objective 5) will be taught in specific discipline based safety science subjects in Stages 2, 3 and 4.

8260
Safety Science with Life Sciences

Safety science is a multidisciplinary subject with an emphasis on identification, assessment, control and risk management of workplace hazards and risks. Safety Science with Life Sciences concentrates on biological hazards and risks, such as infectious agents, and biohazards.

Stage 1 (120 Credits)
BIOS1011 and BIOS1201
MATH1131 or MATH1141 or MATH1011, and MATH1231 or MATH1241 or MATH1021
PHYS1022
CHEM1101 and CHEM1201, or CHEM1101, or CHEM1401
PSYC1001 and PSYC1011, or PSYC1001, or PSYC1011
Where necessary, elective subjects should be chosen from other Stage 1 Programs in this course in order to satisfy requirements of a total of 120 credit points for Stage 1.
If necessary, requirements for Stage 1 can be completed in Stage 2.

Stage 2
Stage 1 requirements not already completed (where relevant).
SESC6610
ANAT6151
BIOS2041
BIOC2101, BIOC2201, BIOS2011, BIOS2021, MICR2011 or MICR2021
General education requirements (15 CP)
Where necessary, elective subjects should be chosen from other Stage 2 Programs in this course in order to satisfy requirements of a total of 135 credit points for Stage 2.

Stage 3
SESC3020, SESC3100, SESC3200, SESC3300, SESC3400, SESC3600, SESC3620, SESC3810
Subjects totalling 60 Credit Points chosen from BIOC3261, BIOC3271, BIOS3011, BIOS3021, BIOS3031, BIOS3071, BIOS3111, MICR3041, MICR3051, MICR3071, MICR3081.
General education requirements (15 CP)

8280
Safety Science with Chemistry

Safety science is a multidisciplinary subject with an emphasis on identification, assessment, control and risk management of workplace hazards and risks. Safety Science with Chemistry concentrates on chemical hazards and risks, such as dangerous, toxic and hazardous substances.

Stage 1 (120 Credits)
CHEM1101 and CHEM1201
MATH1131 or MATH1141 or MATH1011, and MATH1231 or MATH1241 or MATH1021
PHYS1002 or PHYS1022
BIOS1011 and BIOS1201, or BIOS1201
PSYC1001 and PSYC1011, or PSYC1001, or PSYC1011
Where necessary, elective subjects should be chosen from other Stage 1 Programs in this course in order to satisfy requirements of a total of 120 credit points for Stage 1.
If necessary, requirements for Stage 1 can be completed in Stage 2.

Stage 2
Stage 1 requirements not already completed (where relevant).
SESC6610
ANAT6151
MATH2841
CHEM2011, CHEM2021, CHEM2031, CHEM2041
General education requirements (15 CP)
Where necessary, elective subjects should be chosen from other Stage 2 Programs in this course in order to satisfy requirements of a total of 135 credit points for Stage 2.

Stage 3
SESC3020, SESC3100, SESC3200, SESC3300, SESC3400, SESC3600, SESC3620, SESC3810
CHEM3041, CHEM3311 and 30 Cr from CHEM3011, CHEM3021, CHEM3031, CHEM3221
General education requirements (15 CP)
Stage 4
SESC4010, SESC4030, SESC4211, SESC4410, 
SESC4820 or SESC4850, SESC4960
Elective subjects in Safety Science or recommended 
programs to a total of 120 credit points (SESC4091 
preferred).

Professional, ethical and social responsibility 
requirements (general studies objective 5) will be taught 
in specific discipline based safety science subjects in 
Stages 2, 3 and 4.

SCIENCE AND TECHNOLOGY 
STUDIES

Science and Technology Studies offers an integrated 
program combining subjects in the History and Philosophy 
of Science and Technology (HPST) and in Science, 
Technology, and Society (SCTS).

Subjects in the History and Philosophy of Science and 
Technology (HPST) examine the history of scientific and 
technological development, the nature and philosophical 
implications of the knowledge and methods involved in this 
development, and the historical dynamics of scientific and 
technological change. Subjects in Science, Technology, and 
Society (SCTS) examine the social, economic, 
environmental and political dimensions of scientific and 
technological change, especially in the twentieth century.

6200
Science and Technology Studies

Stage 1
MATH1131 or MATH1141 or MATH1011 
MATH1231 or MATH1241 or MATH1021 
Level I HPST or SCTS subjects totalling 15 Credit Points 
Elective subjects totalling 75 Credit Points (which may 
include one additional SCTS or HPST Subject)

Stage 2
HPST2106 
SCTS2107 
One additional HPST or SCTS subject totalling 15 Credit 
Points 
Elective subjects totalling 75 Credit Points 
One 56 hour or two 28 hour General Education subjects

Stage 3
HPST or SCTS subjects totalling 60 Credit Points 
Elective subjects totalling 45 Credit points 
One 56 hour or two 28 hour General Education subjects

Students intending to proceed to Stage 4 (Honours) must 
complete HPST or SCTS subjects totalling 120 Credit 
Points including 105 Level II/III Credit Points with an 
average of credit or better

Stage 4 (Honours)
SCTS4106 (full time) or 
SCTS4156 (part time)

ZOOLOGY

Animal Science is the study of the structure, function, 
classification, genetics, evolution, habits and distribution 
of animals and their relationship to each other and to the 
environment. The school has special expertise in animal 
behaviour, ecology, entomology, evolutionary studies and 
palaeontology, marine biology, neurobiology and 
physiology. The courses leading to the award of a science 
degree in Zoology are dependent on adequate background 
in biometry and biochemistry.

1745
Zoology

Stage 1
BIOS1101, BIOS1201 
CHEM1101, CHEM1201 
MATH1131 or MATH1141 or MATH1011 
MATH1231 or MATH1241 or MATH1021 
Elective subjects totalling 30 Credit Points

Stage 2
BIOC2101, BIOC2201 or BIOC2181 and BIOC2291 
BIOS2011, BIOS2021, BIOS2031, BIOS2041, 
BIOS2061 
Elective subjects totalling 15 Credit points 
One 56 hour or two 28 hour General Education subjects

Stage 3
subjects totalling 60 Credit Points from BIOS3011, 
BIOS3021, BIOS3031, BIOS3051, BIOS3071, 
BIOS3081, BIOS3091, BIOS3111, BIOS3131 
Elective subjects totalling 45 Credit points (which may 
be also from this list) 
One 56 hour or two 28 hour General Education subjects
Students proposing to proceed to Stage 4 (Honours) must 
complete Level III subjects totalling 105 Credit Points

Stage 4 (Honours)
BIOS4038 (F/T), BIOS4034 (P/T)
Specific Science degree courses

Besides the undergraduate studies in Science and Advanced Science there are other specific courses offered in the Faculty of Life Sciences and in the Faculty of Science and Technology. These are the Applied Geography Course (UAC429022), Applied Geology Course (UAC429021), Aviation Course (UAC429017), Biotechnology Course (UAC9018), Food Science and Technology Course (UAC429020), Business Information Technology Course 3971 (UAC429024), Optometry Course 3950 (UAC429025), and Combined Science/Optometry Course 3951, Psychology Full-time Degree Course 3431 (UAC429026), Textile Technology (UAC429027, 429028,429029).

There are also other degrees from Faculties other than Science which can be combined with a science degree.

Board of Studies in Science and Mathematics

2001
Flying Stream

Stage 1
AVEN1310, AVEN1910
AVIA1100, AVIA1150, AVIA1900, AVIA1002
MATH1079
PHYS1889
SESC1560

Stage 2
AVEN2910, AVEN2920, AVEN2930
AVIA2003, AVIA2100, AVIA2800
MATH2079
SESC2560
Four 28 hour General Education Subjects

Stage 3
AVIA2700, AVIA3004
Choose 52.5 CP from:
AVEN3220, AVEN3230, AVEN3410, AVEN3610, AVEN3710, MATH3270, PHYS2810, AVIA3800

A total of 345 Credit Points plus 30 Credit Points of General Education are required for the completion of the Bachelor of Aviation.

It should be noted that due to the block training nature of the program, teaching periods may not correspond to standard academic sessions.

The Aviation Course leads to the award of the degree of Bachelor of Aviation on the completion of a three year program. It is offered jointly by the Faculties of Science and Technology and Engineering. The main aim of the course is to provide an opportunity for students to prepare for a career in the aviation industry in the flying or managerial sectors. There are two distinct streams within the Bachelor of Aviation – Flying and Operations Management. Each stream consist of a core of subjects selected from the Faculties offering the program. The Flying stream additionally includes flying training to a minimum level of Commercial Pilots Licence (CPL) with additional options available dependent upon student progress and requirements. In lieu of flying training, the Operations Management stream offers a selection of subjects designed to provide students with a broad base of knowledge in the management aspects of the aviation industry.
2003
Operations Management Stream

Stage 1
AVEN1310, AVEN1910
AVIA1100, AVIA1150, AVIA1200, AVIA1300
AVIA1900
MATH1011, MATH1021
PHYS1022
SESC1560

Stage 2
AVIA2400, AVIA2700
Choose 97.5 CP from:
AVEN2220, AVEN2910, AVEN2920, AVEN2930
AVIA2100, AVIA2200, AVIA2500, MATH2079,
MATH2870, PHYS2850, IROB2721, SESC2560
Elective subjects totalling 15 Credit Points
Two 28 hour or one 56 hour General Education subject

Stage 3
AVIA3002
Choose 87.5 CP from:
AVEN3220, AVEN3230, AVEN3410, AVEN3610,
AVEN3710, AVEN3930
AVIA3400, AVIA3600, AVIA3700, AVIA3810, MATH3270

Elective subjects totalling 15 Credit Points
Two 28 hour or one 56 hour General Education subjects

3991
Medical Science Degree

Bachelor of Medical Science
BMedSc
Full time

This three-year degree program will provide the basis for a career in biomedical research and is an appropriate first degree for students planning to enter graduate medical or paramedical programs. Medical science is the area of science which underpins the practice of medicine. It incorporates study of the structure and function of the human body (anatomy and physiology) as well as the way in which our form and function is inherited (genetics) and then develops from the fertilised ovum (embryology). It deals with the chemistry of living organisms (biochemistry) with particular reference to man, as well as drugs which are used to cure human diseases (pharmacology).

Students enrolled in this program will have the opportunity to specialise in one or more of the above disciplines. They may have the opportunity to undertake a fourth year that involves a research program leading to an Honours degree.

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021
BSSM 1110
Elective subjects totalling 30 credit points offered by the following Schools: Computer Science, Physics, Science and Technology Studies, Psychology*

Stage 2
BSSM 2220
Subjects totalling at least 90 credit points from the following:
ANAT2111, ANAT2211
BIOC2181 or BIOC2101, BIOC2291 or BIOC2201,
MICR2011**, PHPH2112, BIOS2021
Elective subjects totalling up to 15 credit points from the following areas:
Biological Science, Chemistry, Computing, Mathematics, Physics, Psychology*, Science and Technology.
Two 28 hr or one 56 hr General Education subject.
Students anticipating doing 4th year in the areas of Biochemistry, Molecular Genetics or Microbiology should contact the relevant Head of School for advice.

Stage 3*
BSSM 3330
Subjects totalling 105 credit points from the following subject areas: Anatomy, Biochemistry and Molecular Genetics, Microbiology and Immunology, Pathology, Physiology and Pharmacology, Psychology* or other subjects agreed to by the Course authority.
Students must nominate a major discipline by taking at least 45 credit points in one of these subject areas**.
Two 28 hr or one 56 hr General Education subject.
Students intending to proceed to Honours (Stage 4) must take a minimum of 90 credit points from Level 3.
* Students intending to graduate after completing stage 3 must take a minimum of 60 credit points from Level 3 subjects, and may take the balance from Level 2.

Stage 4
Honours may be taken in the major discipline, subject to progress at credit level through the course. Intending Honours students should consult the Head or Honours coordinator of the appropriate School. Students who successfully complete Stage 4 of their program will be considered for the award of Honours.
* Students intending to proceed to Honours (Stage 4) in Psychology must complete PSYC1001 and PSYC1011 in Stage 1 and at least 90 credit points in Psychology subjects in Stages 2 and 3. Students should consult with the School of Psychology before entry to Stage 2 about the subjects and level of performance required for entry to Honours (Stage 4) in Psychology.
**Pathology subjects may be counted towards an Anatomy major.
***Students taking Microbiology 1 should also enrol in Introductory Genetics.
The development of recombinant-DNA (r-DNA) technology has resulted in the ability to produce large quantities of any potentially useful product. Based on this technology, a new generation of biopharmaceuticals, including hormones, vaccines, anti-hypertensive and anti-inflammatory agents, are being developed which have the potential to revolutionise medicine.

Microorganisms and viruses are being modified for use in controlling plant and animal diseases and pests. Diagnostic kits are being developed for use in forensic science and in product identification and quality control. In addition, genetic improvements in agriculture, plants and animals are becoming a reality, as is the control of inborn genetic disorders in humans.

The future for expansion in all the above areas is immense, and an ability to cope with the problems of the 21st century will be heavily dependent on these advances.

Course Outlines

The Department of Biotechnology offers undergraduate training in the BE Degree Course in Bioprocess Engineering, the BSc Degree Course in Biotechnology and in the BSc Degree Course through the Board of Studies in Science and Mathematics.

The BE Course in Bioprocess Engineering is four years full-time and has been designed to meet the requirements for membership of the Institution of Engineers, Australia. The BSc (Biotechnology) Course is four years full-time and awarded with Honours to students who have distinguished themselves in coursework and in the final year project.

The BSc Course through the BSSM is three years for a Pass degree during which the student can study aspects of biotechnology in combination with another major in a relevant discipline, preferably biochemistry, microbiology or chemistry. The fourth Honours Year of this BSc Course includes further formal training in biotechnology as well as an extensive research project.

Degree Requirements

General Education Requirement
The University requires all students to complete a coherent sequence of General Education subjects. The General Education Program is an integral part of the BSc Biotechnology course and gives students the opportunity to address some of the key questions they will face as individuals, citizens and professionals.

Students in the BSc Biotechnology course must complete General Education subjects totalling 168 hours, or 112 hours plus objective 5. General Education is designed to permit students to address questions concerning the design and responsible management of the human and planetary future.

Prerequisites and Corequisites
Where a choice of subjects is available in a program students must take care to satisfy prerequisites and corequisites. A prerequisite is a subject which must be completed prior to enrolment in the subject for which it is prescribed. A corequisite subject is one which must either be completed successfully before, or studied concurrently with, the subject for which it is prescribed.

Progression and Exclusion
Students whose performance is unsatisfactory will be asked to show cause at the end of the academic year why they should remain in their course of study. Any student who fails a subject twice, or is deemed to be making unsatisfactory progress, will be required to show cause. Unsatisfactory progress may include:

- failure to achieve an average of 65 or higher in subjects attempted in an academic year;
- failing to pass Subjects totalling at least 60 Credit Points in one year;
- failing to complete the requirements for stage one of the course in the first two years of study.

Students required to show cause will be informed by the Registrar in writing. Students who apply to show cause will be assessed in accordance with the University's procedures. Failure to show cause can result in exclusion from a subject, the course, or transfer to the Science and Mathematics course (3970), provided that the progression requirements in that course have been met. Also see the section on progression and exclusion ('Restrictions on Students Re-enrolling') in the Student Guide.

Progression to Stage 4 Honours Program
Progression to Stage 4 is subject to academic performance. Students seeking to enrol in a Stage 4 honours program are required to have the approval of the Head of School and normally will be required:

- to have completed the requirements for Stages 1, 2 and 3 of the course and to have completed all General Education subjects
- to have attained an average of 65 or higher in each stage of the program.
Students who do not attain an average or 65 or higher in Stage 3 of the course are normally required to transfer to the Science and Mathematics course (3970) and take out the BSc Biotechnology award at pass level.

3052
Biotechnology Full-time Course

Bachelor of Science
BSc

This course in Biotechnology offers a comprehensive education in all aspects of modern applied biology. It leads to the award of a Bachelor of Science Degree over four years full-time study, with Honours for students who perform with merit.

Graduates in Biotechnology will be able to find employment in industries and other organisations involved with biopharmaceutical production and food processing, as well as in agricultural and environmental biotechnology.

Year 1
BIOS1101 Evolutionary and Functional Biology
BIOS1201 Molecules, Cells and Genes
CHEM1101 Chemistry 1A and
CHEM1201 Chemistry 1B
MATH1131 Mathematics 1A or
MATH1141 Higher Mathematics 1A or
MATH1011 General Mathematics 1B
MATH1231 Mathematics 1B or
MATH1241 Higher Mathematics 1B or
MATH1021 General Mathematics 1C
plus additional level 1 subjects totalling 30 Credit Points: recommended
PHYS1002 Physics 1 or
PHYS1022 Introductory Physics 1 or
CHEN1020 Engineering 1CE

Year 2
BIOC2101 Principles of Biochemistry
BIOC2201 Principles of Molecular Biology
BIOS2011 Evolutionary and Physiological Ecology
BIOS2021 Introductory Genetics
MICR2011 Microbiology
MICR2201 Introductory Microbiology
CHEM2021 Organic Chemistry or
CHEM2849 Analytical Chemistry
plus 15 Credit Points at Level II
2 General Education Subject(s)

Year 3
BIOC3121 Molecular Biology of Nucleic Acids
BIOC3281 Recombinant-DNA Techniques and Eukaryotic Molecular Biology
BIOT3011 Biotechnology A
BIOT3061 Monoclonal Antibody and Genetic Techniques in Biotechnology
MICR3041 Immunology 1
MICR3071 Environmental Microbiology
plus an additional 2 Level III subjects to be selected from the following:
BIOC3111 Molecular Biology of Proteins
BIOC3271 Cellular Biochemistry and Control
BIOT3071 Commercial Biotechnology
MICR3051 Immunology 2
2 General Education Subject(s)

Year 4
BIOT3031 Microbial Genetics
BIOT3021 Biotechnology B
BIOT4053 Research Project
2 General Education Subject(s)

3055
Bioprocess Engineering Full-time Course

Bachelor of Engineering
BE

The first two years of the course are similar to the first two years of the Chemical Engineering degree course with the addition of basic training in Biology. The third year of the course contains basic training in Biochemistry, Microbiology as well as the Chemical Engineering subjects and an introduction to Bioprocess Engineering which will be further developed in the fourth year. The course has been designed so that graduates can find employment in the fermentation, food processing, pharmaceutical, agro-industrial and waste treatment industries.

Year 1
CHEM1101 Chemistry 1A and
CHEM1201 Chemistry 1B
CHEN1020 Engineering 1CE
MATH1131 Mathematics 1A or
MATH1141 Higher Mathematics 1A or
MATH1231 Mathematics 1B or
MATH1241 Higher Mathematics 1B or
PHYS1002 Physics 1 or
2 General Education subject/s

Year 2
BIOS1201 Molecules, Cells and Genes
CEIC2020 Computing
CHEN2010 Material and Energy Balances
CHEN2020 Flow of Fluids
CHEN2031 Heat and Mass Transfer
CHEN2040 Mass Transfer Fundamentals
CHEN2050 Chemical Engineering Laboratory 1
CHEN2070 Instrumental Analysis for Chemical Engineers
ELEC0809 Electrical Engineering 1C
INDC2040 Physical Process Chemistry
MATH2021 Mathematics 2
MATH2819 Statistics SA
2 General Education subject/s
Department of Food Science and Technology

Food science and technology involves the understanding of basic sciences and the application of this knowledge to foods from the point of production, through handling, processing, preservation, distribution and marketing, up to consumption and utilisation by consumers. It is concerned with food processes, food commodities, food composition and food quality (including sensory properties, safety and nutritional value).

The study of food science and technology integrates many scientific disciplines. Its bases are in chemistry, physics, biochemistry and microbiology. Its borders merge with those of agriculture, engineering, human nutrition, public health, commerce, psychology and law. Biotechnology has a role of increasing importance in food science and technology.

The food scientist and food technologist are concerned with population food supplies and requirements, community wants and needs, and equitable distribution of foods to ensure human nutritional needs are met.

New knowledge is acquired in the laboratory, the pilot plant, and the community, and then applied to the development of safe, nutritious and palatable foods, beverages and food ingredients by optimisation of processes and equipment. Foods are studied in terms of their basic constituents and structures, and the changes they undergo when subjected to handling, processing and distribution.

The food scientist and food technologist are equally concerned with the development and selection of raw materials from agricultural, horticultural, animal and marine sources.

A safe, adequate, palatable and nutritious food supply is essential to human health. The food and beverage industry is of major economic importance and in Australia is the largest sector of manufacturing industry. Internationally, food production, processing and service are among the largest and most stable industries. The challenges are to increase the availability, variety, quality and quantity of foods economically and in line with the needs of the world population. The Australian industry has a major role to play in supplying high quality foods to emerging overseas markets and there is a national and international demand for professionally trained people prepared to accept responsibility for the quality and safety of food.

The Department offers a four-year full-time course leading to the award of Bachelor of Science and a six-year part-time course leading to the award of the degree of Bachelor of Science (Technology). Graduates of both courses qualify for membership of the Australian Institute of Food Science and Technology, the US Institute of Food Technologists, and may qualify for membership of the Royal Australian Chemical Institute.

Graduate Diploma and Master of Science by coursework, courses in Food Science and Technology are offered for graduates in science or agriculture wishing to familiarise themselves with the principles of food science and technology.

The courses provide basic preparation for food science and technology careers in the food industry, the public sector, education, research, the food service industry, public health, management and marketing. Graduates may also find careers in health and environmental sciences, management of food resources and food wastes, and communication, and in areas such as dietetics after further training.

Course Outlines

3060
Food Science and Technology
Full-time Course

Bachelor of Science
BSc

This course is designed to provide depth and breadth in the relevant physical and biological sciences on which food science and technology is based. Students completing the Year 1 requirements are eligible for selection for admission to Year 2 of the course. It is strongly recommended that students obtain, before the completion of the course and
during recess periods, as much professionally oriented or industrial experience as possible.

**Note:** The course is currently being revised. Year 2 and Year 3 of the New Course will be introduced in 1999.

**Year 1 (New Course)**

- **BIOS1101** Evolutionary and Functional Biology
- **BIOS1201** Molecules, Cells and Genes
- **CHEM1101** Chemistry 1A
- **CHEM1201** Chemistry 1B
- **FOOD1100** Food in Society
- **MATH1141** Higher Mathematics 1A or
  - **ATH1131** Mathematics 1A or
  - **MATH 1011** General Mathematics 1B
- **PHYS1002** Physics 1 or
  - **PHYS1022** Physics 1 for Health and Life Scientists

**Year 2 (New Course)**

- **BIOC2101** Principles of Biochemistry or
  - **BIOC2181** Introduction to Biochemistry
- **BIOC2201** Principles of Molecular Biology or
  - **BIOC2291** Introduction to Molecular Biology
- **CHEM2801** Analytical And Physical Chemistry for Food Science
- **CHEM2921** Organic Chemistry for Food Science
- **FOOD1220** Professional Skills
- **FOOD3220** Nutrition
- **MICR2201** Fundamentals of Microbiology and Immunology

**General Education (total 84h)**

**Year 3 (New Course)**

- **BIOT3041** Biotechnology and Food
- **CHEM3801** Physical and Chemical Analysis of Foods
- **FOOD1360** Food Processing Principles
- **FOOD1370** Food Processing Laboratory
- **FOOD1380** Food Processing and Packaging
- **FOOD1390** Product Design and Development
- **FOOD2320** Food Microbiology
- **FOOD2330** Quality Assurance and Control
- **FOOD2340** Food Safety

**Year 4 (Old Course)**

- **SESC3310** Social Issues in Science and Technology
- **FOOD1400** Project
- **FOOD1410** Field Excursions
- **FOOD2340** Food Safety

Plus three or more of the following electives to a total of not less than 37.5 credit points.

- **FOOD1470** Postharvest Technology of Foods
- **FOOD1490** Advanced Food Chemistry
- **FOOD2480** Advanced Food Microbiology
- **FOOD2490** Analytical Microbiology
- **FOOD3440** Advanced Nutrition
- **FOOD4450** Advanced Food Processing
- **ACCT9001** Introduction to Accounting A
- **ACCT9002** Introduction to Accounting B

**BIOT3021** Biotechnology B
**BIOT3071** Commercial Biotechnology
**ECON1103** Microeconomic Principles
**ECON1104** Macroeconomic Principles
**INF51603** Business Data Management
**IROB2721** Managing People
**MARK2012** Marketing Fundamentals
**MARK2051** Consumer Behaviour
**MARK2052** Marketing Research
**MARK3091** New Product and New Service Development

or such other electives as approved by the Head of Department. Year 4 totals at least 120 credit points.

During Years 3 and 4 of the course excursions are made to various food industries. Detailed reports of some of these visits are required.

Detailed reports of the students’ activities during their periods in industry are required.

---

**3065**

**Honours in Food Science**

**Full-time Course**

**Bachelor of Science (Honours)**

**BSc (Hons)**

This course is designed to provide extensive research training in some aspects of food science and technology, at undergraduate level. The research orientation of the course, compared to the Graduate Diploma, facilitates entry into a research higher degree (MSc/PhD) upon completion of Honours at a satisfactory level.

Entry to the course requires satisfactory completion of a Bachelor degree, or equivalent, in an area considered relevant to food science and technology. Students who have completed a four-year Bachelor course, in which Honours has already been awarded, are specifically excluded.

The major component of the course is an extensive research project, conducted throughout one year of full time study. Candidates also take 15 credit points of subjects within the Department, or such other subjects as approved by the Head of Department, in each session, and complete a program of General Studies, dealing with social and ethical issues relevant to food science and technology. Honours is awarded on the basis of performance in the research project and satisfactory completion of coursework.

**Compulsory Subjects**

- **FOOD9410** Honours Research Project
- **FOODXXXX**
  - **ACCT9001** Introduction to Accounting A
  - **ACCT9002** Introduction to Accounting B
  - **ACCT9003** Introduction to Accounting B

**General Education**

*Subjects offered by the Department of Food Science and Technology or as approved by the Head of Department and dependent upon the background of the candidate. Credit points for coursework subjects may be concentrated in one session.*
3070
Food Science and Technology
Part-time Course

Bachelor of Science (Technology)
BScTech

This course is designed for students who are employed in the food processing industries. It extends over six part-time years of study, and leads to the award of the degree of Bachelor of Science (Technology). Students are required to complete an approved program of industrial training of not less than twelve months prior to the award of the degree. Industrial training should normally be undertaken concurrently with attendance in the course, but with the approval of the Head of Department may be completed after completion of the prescribed course of study.

The course covers the same subject matter as the first three years of the full-time course. For the first two years students follow a common course in which general biology is taken, and thereafter specialise in the biological sciences, which are fundamental to the study of food science and technology. The subjects of Stages 4, 5 and 6 may be available only in day-time classes, and substantial day-time release from industry may be required. Students who have completed the requirements of this course and have qualified for the award of the degree of Bachelor of Science (Technology) may proceed to the award of the degree of Bachelor of Science by attending for one full-time year and completing the subjects listed in Year 4 of the full-time course. Students desiring to proceed to the award of a BSc degree must apply to the Head of the Department not later than 31 December of the year in which the sixth stage is completed.

### Stages 1 and 2
- BIOS1101 Evolutionary and Functional Biology
- BIOS1201 Molecules, Cells and Genes
- CHEM1101 Chemistry 1A
- CHEM1201 Chemistry 1B
- FOOD1100 Food in Society
- MATH1141 Higher Mathematics 1A
- MATH1131 Mathematics 1A
- MATH1011 General Mathematics 1B
- MATH1241 Higher Mathematics 1B
- MATH1231 Mathematics 1B
- MATH1021 General Mathematics 1C
- PHYS1002 Physics 1
- PHYS1022 Physics 1 for Health and Life Scientists

**Note:** Physics and Mathematics are usually taken as Stage 1, the other subjects as Stage 2

### Stage 3 (New Course)
- BIOT201 Principles of Biochemistry
- BIOT2181 Introduction to Biochemistry
- BIOT2201 Principles of Molecular Biology
- BIOT291 Introduction to Molecular Biology

**Stage 4 (New Course)**
- FOOD1220 Professional Skills
- FOOD3220 Nutrition
- MICR2201 Fundamentals of Microbiology and Immunology

**General Education**

### Stage 5 (New Course)
- CHEM3801 Physical and Chemical Analysis of Foods
- FOOD2320 Food Microbiology
- FOOD2330 Quality Assurance and Control
- FOOD2340 Food Safety

### Stage 6 (New Course)
- BIOT3041 Biotechnology and Food
- FOOD1360 Food Processing Principles
- FOOD1370 Food Processing Laboratory
- FOOD1380 Food Production and Packaging
- FOOD1390 Product Design and Development

---

**School of Geography**

Geography is the study of spatial and temporal variations of the phenomena which make up the world of humanity. The cultural significance of geography lies in its contribution to an understanding of the total environment. The geographer’s skills also find practical application in the conservation and planned development of resources. Increasing numbers of geographers are employed as professionals in these applications. For instance, geomorphologists and biogeographers are undertaking resource inventory surveys and environmental assessment, and human geographers are engaged as urban and regional planners.

**Course outlines**

The School of Geography offers a four-year full-time course (3010). This course allows specialisations in environmental systems, urban management, resource management, or spatial information technologies.

Themes addressed in the courses include the use and management of scarce resources, the interaction between people and environment, soil conservation, vegetation management, land use conflict, place and identity, and spatial inequalities in economic and social well-being.

First year subjects involve systematic studies of the physical, human, and technological bases of geography. There is a progressive specialisation in the following years, with an emphasis on field observation, data handling, policy and management. Several units in geography include laboratory and project work.
The Geographical Society

It is hoped that students taking geography as a degree will participate in the activities organised by the Geographical Society. The Society is open to new ideas and to students who are concerned with fostering an interest in geography outside their formal studies. Informal seminars are organised on subjects of interest to geographers.

Social activities have always been an important part of the Society and they have provided more than adequate opportunities for students to get to know each other and for students and staff to improve communication.

Course 3010

Bachelor of Science
BSc
(4 years, full-time)

This is a four-year full-time course leading to the award of the degree of Bachelor of Science. The course aims to train professional geographers for entry into applied fields. This vocationally-oriented Applied Geography course provides an analytical approach to understanding and investigating some of society’s more pressing problems.

Entry to stage 4 of the Bachelor of Science in Applied Geography is dependent upon academic performance in stage 2. Unsatisfactory performance in Geography subjects will prevent progression to stage 4. Students who do not achieve a credit average in second year geography subjects will be transferred into Program 2700 (Geography) of Course 3970 (Bachelor of Science).

Stage 1
GEOG1601 Global Development, Economy & Environment
GEOG1701 Environmental Systems & Analysis
GEOG1801 Spatial Information Technologies

one of:
MATH1011 General Mathematics 1B
MATH1131 Mathematics 1A
MATH1141 Higher Mathematics 1A

and one of:
MATH1021 General Mathematics 1C
MATH1231 Mathematics 1B
MATH1241 Higher Mathematics 1B

Elective Level I subjects from other Schools (Biological Science, Built Environment, Chemistry, Computer Science, Economics, Geology, Social Science and Policy), totalling at least 45 Credit Points. See School’s Enrollment Handbook for recommended subjects, and subject advisers.

Stage 2
GEOG2001 Field Techniques
GEOG2101 Geographical Data Analysis, I

select three of:
GEOG2611 The Australian City
GEOG2621 Regions, Resources & Spatial Systems
GEOG2711 Australian Climate & Vegetation
GEOG2721 Soils & Landforms
GEOG2811 Introduction to Remote Sensing
GEOG2821 Introduction to Geographic Information Systems

Elective subjects from Geography or other Schools (Biological Science, Built Environment, Chemistry, Computer Science, Economics, Geology, Social Science and Policy) totalling at least 45 Credit Points.

Students continuing onto Year 3 in 1999 to contact School advisers in order to determine Program requirements.

General Education subject/s

Stage 3 (New Course)
GEOG3901 Australian Natural Resources

select five of:
GEOG3025 Geomorphology
GEOG3411 Special Topic
GEOG3611 Surveys & Interviewing in Geography
GEOG3621 Place and the Politics of Identity
GEOG3631 Population Geography
GEOG3671 Transport and Land Use
GEOG3711 Biogeography
GEOG3721 Pedology
GEOG3761 Environmental Change
GEOG3811 Remote Sensing Applications & Digital Image Analysis
GEOG3821 Geographic Information Systems Applications
GEOG3861 Computer Mapping
GEOG3911 Environmental Impact Assessment
GEOG3921 Coastal Resource Management

Elective subjects from Geography or other Schools (Biological Science, Built Environment, Chemistry, Computer Science, Economics, Geology, Social Science and Policy) totalling at least 30 Credit Points

See School advisers for recommended subjects.

General Education subject/s

Stage 4*
GEOG3911 Environmental Impact Assessment
GEOG4010 Field Project 4
GEOG4031 Project
GEOG4042 Practical Applications

Two of:
GEOG4052 Advanced Spatial Analysis
GEOG4062 Advanced Environmental Analysis
GEOG4320 Soil Degradation and Conservation
GEOG4911 Vegetation Management#

Or subjects from other Schools, subject to approval by the Head of School.

*The subjects offered, and course requirements, may be altered in 2000.
#May not be offered in 1999.
School of Geology

Geology is 'the science of the earth', and as such covers a broad spectrum of knowledge on the constitution and evolution of our planet. Applied Geology involves a specific interest in the use of earth science for the benefit of humanity, including, for example, the search for and evaluation of metallic ore-bodies and accumulations of fossil fuels, or the application of geological knowledge to a range of engineering and environmental problems.

The student geological society (Rock Soc) exists to provide further interaction between students and staff. The society organises a number of events during the year including field trips and an annual dinner.

Course Outlines

The Applied Geology course provides a comprehensive education in all aspects of earth science. It leads to the award of a Bachelor of Science (BSc) degree in four stages normally taken over four years full-time study, with honours for students who perform with merit throughout the course program. The fourth stage can be taken part time over two years, normally Years 4 and 5.

Students learn the fundamental principles of geology through lectures, laboratory work, projects and field tutorials. At the same time they gain the practical skill and knowledge of geological applications necessary for employment in research, industry or government.

Graduates are prepared by the course to enter any branch of the geological profession, or to undertake further studies leading to a higher degree. They are also well equipped to change their field of employment as different opportunities arise.

No previous knowledge of geology is required to enter this course but a sound background in mathematics together with at least one other science subject is essential.

Students who have not undertaken chemistry at HSC level should take chemistry at the introductory level (CHEM1401 and CHEM1101) in Year 1, and CHEM1201 in the summer session before commencing Year 2.

Reciprocal courses are offered through the Board of Studies in Science and Mathematics in Geology (double major), Geochemistry, Geophysics, Earth and Environmental Science and courses that combine a single major in Geology with Physics, Chemistry, Mathematics or Botany and Zoology. These courses are all of three years full-time duration leading to a BSc at Pass level. An optional fourth year leading to Honours is available for students achieving a good academic standing.

### School of Chemical Engineering and Industrial Chemistry

3100

**Industrial Chemistry**

**Full-time**

**Bachelor of Science (BSc)**

Industrial Chemistry is a four year professional (prescribed) science course that is concerned with the application of science and technology to the chemical industry. It is a well rounded course which prepared graduates for a challenging and flexible career path.

Industrial chemists are capable of fulfilling a multiplicity of roles – as research scientists, development chemists, technical representatives and as plant/company managers. The industrial chemistry course at the University of New South Wales is the only one of its type in Australia. It has the unique advantage of being in a school which offers both science and engineering degrees. It is the only science course whose graduates are eligible for full membership of the Australian Institute of Engineers as well as the RACI. The fourth year of the course is a compulsory honours year.

General Education Subjects
School of Information Systems

3971
Business Information Technology
Full-time

Bachelor of Science
BSc

This is an industry linked education course leading to the award of the qualification Bachelor of Science. The course draws on three core disciplinary areas: Information Systems, Accounting, and Computer Science.

The course has been designed in conjunction with the Information Systems industry to provide for the needs of Australian businesses. The course combines the normal requirements for the award of the degree with coordinated industrial experience in the sponsoring organisations. A scholarship is payable from a fund donated by the sponsoring organisations. Entry to the course is limited to students awarded a scholarship through the BIT selection Procedure.

Consideration for entry to the course may proceed only on the basis of an application directly to Co-Op program Office at the University of New South Wales and application through UAC.

Students who are academically acceptable for the 3971 course but who are not offered a scholarship should consider registering for first Stage entry into the 1400 program. If scholarships become available at the end of Stage 1, students undertaking the 1400 program may be offered transfer to the 3971 course.

An Honours option is also available within the four Stage BIT course. This option is available to students who perform well in Stages 1 and 2 and require additional courses in Stages 3 and 4; although it may also be possible to finalise the honours program within the first semester of a fifth Stage (possibly part-time).

Objectives of the Course

This four Stage course teaches Information Systems (see Program 1400 in Course 3979 for a description) and provides industrial training linked to that teaching. The three industrial training periods in the course are each of approximately six months duration, running from January of Stages 2 and 4, and July of Stage 3 of the program.

Degree Program

Stage 1
ACCT1501, ACCT1511
COMP1011, COMP1021
INFS1602, INFS1603
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021

Stage 2
ECON1101
INFS2603, INFS2607, INFS2609, INFS2691
Elective subjects totalling 15 Credit points
One 56 hour or two 28 hour General Education subjects

Stage 3
INFS3605, INFS3608, INFS3616, INFS3692
MATH2841
Elective subjects totalling 30 Credit Points
Honours students additionally take INFS3606 and a further elective subject totalling 15 Credit Points

Stage 4 (Pass Degree)
INFS3606, INFS3611, INFS4693
subjects totalling 30 Credit Points including at least 15 Credit Points at Level III
One 56 hour or two 28 hour General Education subjects

Stage 4 (Honours Degree)
INFS3611, INFS4693, INFS4794, INFS4886, INFS4887, INFS4893, INFS4898
One option must be chosen from INFS4805, INFS4810, INFS4811, INFS4812, INFS4825, INFS4848, INFS4853, INFS4857, INFS4891
Choose elective subjects totalling 15 Credit Points from Level III
One 56 hour or two 28 hour General Education subjects
(which alternatively could be taken in Stage 3).

School of Materials Science and Engineering

The field of Materials Science and Engineering offers unlimited possibilities for innovation and development. Attention is being focussed on developing and processing metals, ceramics, polymers and composites with improved properties.

The activities of the materials engineer range from materials production, including their extraction from ores and their refining, to the design, development, processing and recycling of materials for use in aerospace, transportation, electronics, energy conversion, and biomedical systems.

Advanced materials can provide a major competitive advantage in virtually every part of a country’s manufacturing industry. Because Australia is a country rich in minerals, materials science has been designated as a
priority area for research and development. Examples of recent and significant developments include the emergence of environmentally friendly and economical metal processing methods; advanced surface coatings; electrical ceramics; engineering polymers, and advanced composites.

The School of Materials Science and Engineering provides education and training for students to prepare them for a significant and important career in the materials industry. The School of Materials Science and Engineering is in a good position to provide the increased numbers of graduates necessary for development of these new initiatives in materials. It is the only school in Australia which offers professional courses in ceramic engineering, metallurgical engineering, and materials engineering as well as providing postgraduate specialisation in these fields.

The School is extremely well equipped with a wide range of advanced computing, thermal analysis, mechanical testing, X-ray, optical and electron microscopy facilities.

Ceramic Engineering and Ceramics

The ceramic industry produces an enormous volume and variety of products used in engineering applications, building construction and in our everyday life. As well as the traditional bricks, roof tiles, sheet and container glass and tableware, ceramics have been found essential as abrasives, refractories, enamels and in electrical and electronic applications and nuclear fuels. In many of these cases, ceramic articles make possible the manufacture of other products either by being a key component, such as an electronic or magnetic part, or by forming the material of construction of, for example, a blast furnace or an abrasive wheel.

Modern ceramics comprise such a varied and complex group of materials that a high level of training is required to control their manufacture with the required precision and to supervise their proper use.

Ceramic engineers are needed in increasing numbers both in Australia and overseas countries and the School offers the only degree course in Ceramic Engineering in Australasia. This course trains students in the relation between the structure and the properties of ceramic materials, the engineering and process chemistry of their manufacture and the design principles of their use.

Careers open to graduates fall into three broad categories. Some go initially into activities associated directly with production, i.e. the design and layout of plants, supervision of their construction and control of their operations. Others move into research and development in industrial laboratories or research institutions. The final group enters fields outside of Ceramic Engineering directly, where the graduate's background in materials and engineering is utilised. In all cases, graduates with organising ability frequently move into management if they have an interest in this side of the industry.

In Australia, a number of government research organisations are active in ceramic research, e.g. the Australian Nuclear Science and Technology Organisation, and the Divisions of Materials Science and Building Research of the CSIRO. Investigations with more immediate applications are carried out in industrial laboratories. Even when the basic principles of a process have been worked out in the laboratory, its successful transfer to an industrial scale requires a great deal of effort and expertise. This is an area which offers great scope for further development in Australia.

Graduates in Ceramic Engineering are eligible for membership of the Institution of Engineers, Australia, the Institute of Ceramics, Great Britain, the Royal Australian Chemical Institute and the National Institute of Ceramic Engineers, USA.

It is compulsory that, before completion of the course, students in Ceramic Engineering must obtain a minimum of twelve weeks' professionally oriented or industrial experience.

Metallurgical Engineering

The metallurgical profession has developed in importance in keeping with growth of Australian metal and mineral industries. These industries are recognised as being important to the Australian economy and there is a strong demand for professional metallurgists in all sectors of these industries, as well as in the manufacturing industry.

Graduate metallurgists have a wide choice of type of employment and location. They may work in production, technical control or development, in metal or mineral producing plants in locations such as Newcastle, Port Kembla, Broken Hill, Mt Isa, Townsville, Gladstone, Port Pirie, Whyalla, Kwinana, Kalgoorlie or Pilbara; or in manufacturing plants, including the automobile, aircraft, and construction industries located mainly in the population centres.

In the metal industry, opportunities for a career in management are excellent, since it is a tradition in this industry that management should be in the hands of technical people. If graduates are inclined towards research and development, they will find considerable scope in various government, university, and industrial research laboratories.

The undergraduate courses in metallurgical engineering and metallurgy are broadly-based on engineering and physical sciences and have been designed to prepare graduates for employment in any field of metallurgy within the metal and manufacturing industries or in research institutions.

Graduates in Metallurgical Engineering are eligible for membership of the Institution of Engineers, Australia, the Australasian Institute of Mining and Metallurgy and the Institute of Materials Engineering Australasia.

Students are required to have gained at least twelve weeks of approved industrial experience before graduation. Industrial experience is usually obtained during the long recess periods.
### Materials Engineering

Materials Engineering is a new and broad-ranging discipline which applies the principles of science and engineering to the design and development of metallic, ceramic and plastic materials and, to their manufacture into goods and their subsequent performance in service.

Materials Engineering is founded on the relationship between structure and properties, an understanding of which permits materials to be engineered to specific end use requirements. Virtually every man-made material is now the subject of study of the Materials Engineer.

Due to an increasing demand for optimised materials, graduates in Materials Engineering are presented with an outstanding range of job opportunities.

Many graduates pursue an industrial career either in the materials producing industries, the utilities, or manufacturing sector. Materials and process development and selection, supervision of manufacturing and production processes, technical trouble shooting and testing, are areas in which Materials Engineers are commonly engaged. Alternatively, graduates may pursue a research career, working in laboratories run by materials producing companies, and statutory commonwealth and state government departments. Graduates with an organising ability frequently move into management both in industry and research. Since materials engineering is a broadly-based scientific/engineering discipline, there is considerable flexibility in career selection.

Graduates in Materials Engineering are eligible for membership of the Institution of Engineers, Australia.

Students are required to have gained at least twelve weeks of professionally oriented or industrial experience in an area of industrial setting involving processing, production, characterisation, analysis, testing etc.

### Ceramic Engineering and Ceramics

A four-year full-time course in Ceramic Engineering leading to the award of the BE degree, and a six-year part-time course in Ceramics leading to the award of the BSc (Tech) degree, are offered within the School.

Metallurgical Engineering

A four-year full-time course in metallurgical engineering leading to the award of the BMetE degree (Physical Metallurgy or Process Metallurgy Major) and a six-year part-time course in metallurgy leading to the award of the BSc(Tech) degree are offered within the School.

3125
Metallurgical Engineering Full-time Course

Bachelor of Metallurgical Engineering
BMetE

Students entering the Bachelor of Metallurgical Engineering program may elect to major in either Process Metallurgy or Physical Metallurgy. Selection of these alternative study programs may be deferred until the end of the second year of full-time study.

The Process Metallurgy option is designed to produce graduates with training appropriate to the primary metallurgy industry while the Physical Metallurgy option provides a training more suited to the manufacturing industry.

Year 1 of the course consists of physics, chemistry, mathematics and engineering subjects and is essentially the same as that for a number of other engineering and science courses offered in the Faculty of Science and Technology.

Year 2 introduces Materials Science and Materials Engineering subjects supported by chemistry and mathematics and is common with Year 2 in the full-time Ceramic Engineering and Materials Engineering Courses.

Physical Metallurgy and Metallurgical Engineering are introduced in Years 3 and 4. In Year 3 the major strands are supported by other engineering subjects and in Year 4 by a thesis project, seminar and professional electives.
Students are required to have gained at least twelve weeks of approved industrial experience before graduation, and to have submitted satisfactory reports on such work. Industrial experience is usually obtained during the long recess periods at the ends of Years 2 and 3.

During the course, visits are made to various metallurgical works, and students are required to submit reports on some of these.

Students may complete the first one or two years of their degree at their local university engineering school, and then transfer with advanced standing to UNSW.

*A list of Professional Electives will be made available at the end of the Year 3 program and choices for the following year arrived at.

3130
Metallurgy – Part-time Course

Bachelor of Science (Technology)
BSc(Tech)

This course is designed for students who are employed in the metallurgical and manufacturing industries and extends over six part-time years of study. Some of the subjects of stages 3, 4, 5 and 6 may be available only in day-time classes, and one day or more of release from industry per week may be required.

The course essentially covers the same subject matter as the first three years and part of Year 4 of the full-time Metallurgical Engineering course and involves the same major strands of study in Physical Metallurgy and Metallurgical Engineering.

In the later stages of the course, there is less emphasis on primary metallurgy than in the full-time course and there is more emphasis on secondary Metallurgical Engineering which is developed to Year 4 level, while Physical Metallurgy is taken to Year 3 level.

Students are required to complete an approved program of industrial training of not less than twelve months prior to the award of the degree.

Industrial training should normally be completed concurrently with attendance in the course, but with approval of the Head of School may be completed after completion of the prescribed course of study.

Stage 1
MATH1131  Mathematics 1A or
MATH1141  Higher Mathematics 1A
MATH1231  Mathematics 1B or
MATH1241  Higher Mathematics 1B
PHYS1002  Physics 1

Stage 2
CHEM1101  Chemistry 1A
CHEM1201  Chemistry 1B
MATS1001  Introduction to Materials Industry
MATS1011  Introduction to Materials Engineering
MATS1021  Introduction to Computing
MECH0440  Engineering Statics
MECH0130  Engineering Drawing and Description Geometry

Stage 3
CHEM2818  Physical Chemistry
MATH2021  Mathematics 2
MATS1072  Physics of Materials
MATS1082  Thermodynamics of Materials 1
MATS1092  Materials and Design 1
MATH2869  Applied Statistics SC

General Education subject/s

Stage 4
MATS1002  Microstructural Analysis
MATS1032  Materials Engineering 1A
MATS1042  Crystallography and X-ray Diffraction
MATS1052  Materials Engineering 1B
MATS1062  Mechanical Properties of Materials
MATS1112  Phase Equilibrium

General Education subject/s

Stage 5
MATS1183  Non-Ferrous Physical Metallurgy
MATS1283  Ferrous Physical Metallurgy
MATS1384  Ferrous Physical Metallurgy 2
MATS2213  Diffusion
MATS2223  Phase Transformations
MATS4513  Deformation of Metals
MATS4523  Strengthening Mechanisms in Metals
MATS4533  Metal Forming
MATS4113  Fractographic Analysis and Non-Destructive Testing

General Education subject/s

Stage 6
MATS1093  Thermodynamics of Materials
MATS1213  Design for Corrosion Control
MATS1243  Management 1
MATS1464  Materials Seminar
MATS4333  Fracture Mechanics
MATS4204  Industrial Metallurgy Project

General Education subject/s
Materials Engineering

A four-year full-time course in materials engineering leading to the award of the BMatE degree is offered within the School.

3615
Materials Engineering Full-time Course

Bachelor of Materials Engineering
BMatE

Year 1
CHEM1101 Chemistry 1A
CHEM1201 Chemistry 1B

MATS1072 Physics of Materials
MATS1082 Thermodynamics of Materials 1
MATS1092 Materials and Design 1
MATS1112 Phase Equilibria
General Education subject/s

Year 3
MATS1093 Thermodynamics of Materials 2
MATS1183 Non-Ferrous Physical Metallurgy
MATS1213 Design for Corrosion Control
MATS1243 Management 1
MATS1283 Ferrous Physical Metallurgical 1
MATS2223 Diffusion
MATS2223 Phase Transformations
MATS2313 Chemistry of Ceramics
MATS3443 Polymer Science and Engineering
MATS4333 Fracture Mechanics
MATS4513 Deformation of Metals
MATS4523 Strengthening Mechanisms in Metals
MATS4533 Fractographic Analysis and Non-Destructive Testing

General Education subject/s

Year 4 (for 1999)
APSE0002 Social Issues in Science and Technology
MATS1414 Surface Treatments and Wear
MATS1244 Management 2
MATS1254 Design Project
MATS1304 Composite Materials
MATS1464 Materials Seminar
MATS2264 Sintering of Ceramics
MATS2284 Thermal Properties of Ceramics
MATS3524 Project (Materials Engineering)
MATS3564 Polymer Engineering 1
MATS3574 Polymer Engineering 2
Professional Electives*

Year 4 (for 2000 Onwards)
SESC3310 Social Issues in Science and Technology
MATS1414 Surface Treatments and Wear
MATS1224 Management 2
MATS1254 Design Project
MATS1304 Composite Materials
MATS1464 Materials Seminar
MATS3524 Project (Materials Engineering)
MATS3564 Polymer Engineering 1
MATS3574 Polymer Engineering 2
MATS1114 Modelling for Materials Engineering

* A list of Professional Electives will be made available at the end of the Year 3 program and choices for the following year arrived at.

School of Optometry

3950
Optometry Degree Course
Full-time

Bachelor of Optometry
BOptom

The School provides a four Stage full-time course in Optometry leading to the award of the degree of Bachelor of Optometry, at either the Pass or Honours level. Professional training including clinical optometry are interwoven with basic studies of visual and ocular science over the four Stages of the course. The only entry point into Optometry will be at the Stage 1 level.

The Bachelor of Optometry course has been reviewed, and the revised course will be phased in over 1999 and 2000, being offered in its entirety in 2001.
### Degree Program

#### Stage 1 (Revised Course)
- BIOS1401  Biology (Optometry)
- CHEM1809  Biological Chemistry for Optometry
- OPTM1105  Optics and the Eye I
- OPTM1201  Ocular and Visual Science I
- OPTM1202  Clinical Optometry I
- OPTM1205  Optics and the Eye II
- OPTM1207  Microbiology for Optometry
- PHYS1999  Physics for Optometry

#### Stage 2 (Revised Course)
- OPTM2106  Pathology for Optometry Students
- OPTM2107  Microbiology for Optometry Students
- OPTM2205  Measurement of Light and Colour
- OPTM2208  Diagnosis of Ocular Disease
- OPTM2301  Ocular and Visual Science II
- OPTM2302  Clinical Optometry II
- OPTM2303  Spectacle Lens and Optical Systems
- PPH2122  Principles of Physiology

One 56 hour or two 28 hour General Education subjects

### Degree Program

#### Stage 1
- BIOS1201  Molecules Cells and Genes
- CHEM1809  Biological Chemistry for Optometry Students
- MATH1051  Mathematics 1F
- OPTM1201  Ocular and Visual Science IA
- OPTM1202  Clinical Optometry I
- OPTM1203  Physical and Geometrical Optics
- OPTM1204  Dispensing
- OPTM1211  Ocular and Visual Science 1B
- PHYS1999  Physics (Optometry)

#### Stage 2

**Full Stage**
- OPTM2106  Pathology for Optometry Students
- OPTM2107  Microbiology for Optometry Students
- OPTM2205  Measurement of Light and Colour
- OPTM2208  Diagnosis of Ocular Disease
- OPTM2301  Ocular and Visual Science II
- OPTM2302  Clinical Optometry II
- OPTM2303  Spectacle Lens and Optical Systems
- MATH2819  Statistics SA
- PPH2122  Principles of Physiology
- PSYC2116  Human Development (Optometry)

#### Stage 3
- OPTM3208  Diagnosis and Management of Ocular Disease
- OPTM3301  Visual Science III
- OPTM3302  Clinical Optometry III
- OPTM3309  Ocular Science III
- PSYC3506  Psychology for Optometrical Practice

Two 56 hour or four 28 hour General Education subjects

### 3951 Combined Science / Optometry Course

#### BSc BOptom

**Conditions for the combined course leading to the award of the degrees of BSc BOptom**

1. Undergraduates* of The University of New South Wales who have satisfied the examiners in at least the first two Stages of the Optometry degree course may be admitted to the Science degree course with advanced standing for the purpose of qualifying for the award of the two degrees of BSc BOptom. Such undergraduates' performance shall have been of a high standard and their admission shall be subject to the approval of the Dean of the Faculty of Science and Technology.

2. In order to qualify for the award of the degree of BSc, students so admitted shall be required to complete the appropriate general studies subjects and no less than 60 Credit Points of either Level II or Level III and a further 60 Credit Points from other Level III subjects, in accordance with the Science and Mathematics Course regulations. The subjects submitted for the award of the Bachelor's degree under these regulations must include at least 60 Credit points from Level III subjects chosen from related disciplines in accordance with the Science Course regulations.

3. In order to qualify for the award of the degree of BOptom, students so admitted shall complete the requirements of the Optometry degree course.

*In Rule 1, the word 'undergraduates' includes graduands, i.e., persons may be admitted under these rules if they have met all requirements for a first degree which has not yet been conferred and admission under these rules shall be no bar to the subsequent award of the first degree.*
School of Psychology

3431
Psychology Degree Course
Full-time

Bachelor of Science (Psychology)
BSc(Psychol)

Psychology is a discipline of both scientific research and applied practice. As a science, psychology is concerned with the study of behaviour and its underlying mental and neural processes. Topics of study include learning, memory, cognition, perception, motivation, life-span development, personality, social interactions, and abnormal psychology. Psychology has many areas of application, especially in clinical, correctional, counselling, educational, and organisational settings. In addition, people with training in psychology pursue careers in academic research, health research, developmental disabilities and rehabilitation; ergonomics; occupational health and safety; personnel selection, training, and management; vocational guidance; and marketing.

The four-Stage full-time course leads to the degree of Bachelor of Science (Psychology). The course is designed to provide the student with (1) a sound understanding of psychological theory, research skills, and psychological techniques, (2) elective studies in areas of individual interest, and (3) supporting studies in mathematics and/or biology (a minimum of 30 Credit Points at Level I), and in arts or social sciences (a minimum of 30 Credit Points at Level I).

Registration as a Psychologist

In order to become a member of the professional body, the Australian Psychological Society (APS), and for registration as a psychologist in New South Wales, students first need a university bachelor degree which includes four years of approved training in psychology. The BSc(Psychol) course provides four years of approved training in psychology. Students must also follow this by completing an accredited 5th and 6th year academic course such as one of the Master of Psychology Degrees (clinical, Forensic, Organisational) or a combined Doctor of Philosophy / Master of Psychology Degree as offered by this University. An alternative of two years of supervised experience in professional practice may be undertaken for registration as a psychologist in New South Wales.

A full statement on the effect of changes to registration requirements for current and new undergraduate students is available from the School of Psychology.

Degree Program

Stage 1
PSYC1001 and PSYC1011
BIOS1101 and BIOS1201 or
one of MATH1131 or MATH1141 or MATH1111 and
one of MATH1231 or MATH1241 or MATH1021
Philosophy subjects or Science and Technology Studies subjects or other approved Arts and Social Sciences discipline at Level I to the value of 30 Credit Points. Choose elective subjects at Level I to the value of 30 Credit Points from Arts and Social Sciences or Science.

Stage 2
PSYC2001, PSYC2011, PSYC2061, PSYC2071, PSYC2081, PSYC2091
Level II subjects to the value of 30 Credit Points following on from one of the Level I non-psychology subjects taken (30 Credit Points) which constitutes a recognised sequence of two Stages. General Education (112 hours).

Stage 3
PSYC3001, PSYC3011, PSYC3201 and PSYC3291.
Select 1 subject from each of the following areas and 1 other Level III Psychology subject:
Advanced Perceptual / Cognitive – PSYC3151, PSYC3161, PSYC3211, PSYC3221, PSYC3231;
Advanced Biological – PSYC3051, PSYC3241, PSYC3251, PSYC3261; Advanced Social – PSYC3121, PSYC3141, PSYC3271, PSYC3281, PSYC3301.

Stage 4
PSYC4003

Prerequisites and Corequisites

Before enrolling in any subject (or equivalent units of a subject) the student shall have attended the classes and shall have satisfied the examiners in all relevant prerequisite subjects. The student should refer to the appropriate Faculty Handbook for a statement of subject prerequisites and/or corequisites.

Study Load

This is a four-stage full-time course. In any one year students must enrol in the full load specified for a particular stage. Only in exceptional circumstances will students be allowed to enrol in a reduced program for a stage, and this requires the permission of the Head of School of Psychology.

Progression and Exclusion

Students must maintain Honours level performance for progression from each of Stages 1, 2 and 3. Any student who fails to achieve an average of 65 percent or higher in psychology subjects undertaken in a stage (based on the first attempt result for each subject) will be deemed to be making unsatisfactory progress and will be required to show cause.
Students required to show cause will be informed by the Registrar in writing. Students who apply to show cause will be assessed in accordance with the University's procedures. Failure to show cause will result in exclusion from the course. Students should also see the section on progression and exclusion ('Restrictions on Students Re-enrolling') in the Student Guide.

Award of the Degree

In order to graduate students must satisfy requirements for the award by passing all subjects specified for the course.

The final grading for the degree is based on performance in all Psychology subjects excluding PSYC1001 and PSYC1011 taken over the four Stages. The degree may be awarded at either Pass level or with Honours.

School of Materials Science and Engineering

Department of Textile Technology

Head of Department
Professor MT Pailthorpe

Textile Technology is concerned with the conversion of both natural and man-made fibres into an extremely wide variety of finished products. These products range from fabrics for apparel, soft furnishings, floor coverings and industrial use to such specialised textiles as tyre cord, ropes, protective clothing, sailcloth, parachute fabrics, medical dressings, composite materials, and many others.

In Australia, the Textile Industry has developed mainly in the past seventy years and today it is one of our largest manufacturing groups. As in overseas countries, the impact of science and technology is bringing rapid changes to the Industry, and a consequence of this has been a strong demand for personnel skilled in Textile Technology, Management and Design.

The Department of Textile Technology offers courses in Textile Technology 3170, Textile Management 3175 and Textile Design and Technology 3177. These courses extend over four years full-time study and lead to the award of the degree of Bachelor of Science. For the award of Honours, students need to have distinguished themselves in formal studies, laboratory exercises, and in their final year project. The BSc Textile Technology program is accredited by the Textile Institute as fulfilling the academic requirements for its Associateship (CText ATI), so that graduates are eligible to apply for this professional qualification upon completion of the required period of relevant work experience.

Students must complete a minimum of 40 working days approved industrial training, of which at least 30 working days training must be taken at the end of Year 3.

It is important to stress that the specialised nature of the training provided within the Department of Textile Technology does not mean a restricted range of job opportunities after graduation. Career possibilities extend through the textile industry, allied industries (such as the production of textile chemicals), private consultants, government departments and authorities, teaching at secondary and tertiary levels, and pure or applied research in various organisations.

Graduates may be employed in quality control, technical management, research and development, international trade, production or general management. Within the textile industry, graduates may, for example, enter any of the following areas; the manufacture of natural and or man-made fibres, yarns, fabrics, etc; dyeing, printing and finishing of textiles, quality assurance, marketing and retailing.

Course Outlines

3170
Textile Technology Full-time Course

Bachelor of Science
BSc

Textile Chemistry, Textile Physics, Textile Engineering Options

The conversion of textile raw materials into their finished products is simply a succession of, and an interaction between, a number of chemical, physical and engineering processes. It follows, therefore, that the disciplines involved in the study of textile technology, in addition to the technological aspects, include a study in depth of one of the following: chemistry, engineering or physics.

Graduates will qualify for membership for one of the following professional bodies: the Royal Australian Chemical Institute; the Institution of Engineers, Australia; or the Australian Institute of Physics.

All students take a common first year, and they need not choose the option they desire to follow until the end of that year.

In Year 2 and Year 3 students specialise in one of three options of the course, viz. Textile Chemistry, Textile Physics or Textile Engineering. In Year 4 all students take the same subjects.
Year 1
CHEM1101  Chemistry 1A, and
CHEM1201  Chemistry 1B
MATH1131  Mathematics 1A or
MATH1141  Higher Mathematics 1A
MATH1231  Mathematics 1B or
MATH1241  Higher Mathematics 1B
PHYS1002  Physics 1 or
PHYS1022  Physics for Health and Life Scientists*
TEXT1201  Introductory Textile Technology
TEXT1301  Fibre Science 1

*For admission into the Textile Physics or Textile Engineering options, students must complete the subject PHYS1002.

Textile Chemistry

Year 2
CEIC2010  Instrumental Analysis
CHEM2021  Organic Chemistry
CHEM2819  Physical Chemistry for Food and Fibre Science

TEXT3602  Colouration Technology
General Education subject/s

Year 4 (All Options)
APSE0002  Social Issues in Science and Technology
MANF0420  Production Management or
Bachelor of Science
BSc

The production and marketing of textile products involves a number of manufacturing processes, and requires an understanding of basic management principles.

The Textile Management course provides a comprehensive knowledge of all the textile sciences and technologies. In addition the course includes studies in economics, accounting, marketing, management, and other areas of commerce.

The course is designed to meet the need for executives in the textile and allied industries. A wide choice of electives is available in the third year of the course. This allows students to either gain a broad knowledge of the various areas of commerce, or to specialise in one of the following areas: Applied Economics; Accounting and Financial Management; or Strategic Marketing Management. The BSc Textile Management program will be considered for accreditation by the Textile Institute as fulfilling the academic requirements for its Associateship (CTextATI). We expect to have this program accredited in 1998.

Year 1
CHEM1101 Chemistry 1A or
CHEM1401 Introductory Chemistry A
ECON1101 Microeconomics 1 or
ECON1103 Microeconomic Principles
ECON1102 Macroeconomics 1 or
ECON1104 Macroeconomic Principles

Textile Design and Technology Full-time Course

Bachelor of Science
BSc

The design and production of textile goods involves a number of manufacturing processes, and requires an understanding of basic design and manufacturing principles. The Textile Design and Technology course provides a comprehensive knowledge of all the textile science and technologies. In addition the course includes studies in the history of art and design, basic design, and textile design. The course is structured to meet the needs of designers in the textile and allied industries. The BSc Textile Design and Technology program is currently being considered for accreditation by the Textile Institute as fulfilling the academic requirements for its Associateship (CTextATI) when the first students complete the program in 2000. Thus we expect to have this program accredited by 2001.

Year 1
CHEM1101 Chemistry 1A or
CHEM1401 Introductory Chemistry A
COFA5113 Interactive Systems Design and Responsible Management
IDES1021 Basic Design

3220
Wool and Pastoral Sciences Full-time Course

Bachelor of Science
BSc

As a result of the UNSW2000 exercise, the Department of Wool and Animal Science was disestablished on 30 June 1997. Hence, no new enrolments will be accepted into course 3220. The WOOL subjects listed in this handbook are available only to students currently enrolled in course 3220 to allow them to complete their course. Year 4 programs for individual students have been approved by the Head of Department.
Professional and Combined degrees with Science

Board of Studies in Science and Mathematics and another Faculty

3930
Combined Science / Arts Course

BSc/BA

The double degree of BSc/BA normally requires an additional Stage of study, and enables students to complete a major sequence in a School, Department, or Program of the Faculty of Arts and Social Sciences while proceeding with their studies in Science. In each Stage of the combined degree course, students normally take subjects totalling 75 or 90 Credit Points from science and 30 or 45 Credit Points from Arts and Social Sciences.

For admission to the course, students must satisfy the entry requirements to the Board of Studies in Science and Mathematics as well as to the Faculty of Arts and Social Sciences. In addition to the requirements of the BSc program being undertaken, students must complete a minimum of 135 Credit Points in subjects offered by Schools, Departments or Programs within the Faculty of Arts and Social Sciences, including an approved major sequence of 105 Credit Points. This degree is administered by the Board of Studies in Science and Mathematics.

3935
Combined Science / Social Science Course

BSc/BSoSc

For information about this double degree please consult with the Board of Studies in Science and Mathematics and the Faculty of Arts and Social Sciences.

Pass Degree

In order to qualify for the pass degree students must:

• satisfy requirements in the education studies subjects offered in years 1, 2 and 3 and 4 as specified in the programs below.

• obtain at least 315 Credit Points including no more than 150 level I credit points, in science subjects (except in the case of the mathematics program, where elective subjects from the BA degree course may be included), in an approved four year program which consists of:

• at least a major sequence in an area corresponding to one of the teaching subjects together with suitable complementary subjects from other areas such as Biochemistry, Biology, Chemistry, Geology, Mathematics, Microbiology and Immunology, Physics and Physiology and Pharmacology.

• the year 4 subject HPST2106 the Scientific Theory.

• complete 15 Credit Points in approved General Education subjects.

Note: Students enrolled prior to 1998 should follow the program as specified in their first year of enrolment.

Approved Programs

Each student must select one of the programs of study approved for the course by the Board of Studies in Science and Mathematics.

Subject descriptions for Education Studies subjects appear in the Arts and Social Sciences Faculty handbook.

The approved programs are as follows:

0158
Physics

Stage 1
EDST1101, EDST1102
CHEM1101, CHEM1201
MATH1131 or MATH1201
MATH1231 or MATH1241
PHYS1002

Stage 2
One Education Studies elective subject†
MATH2011, MATH2520, MATH2120
PHYS2001, PHYS2011, PHYS2021, PHYS2031
Either BIOS1101 or GEOL1101
One General Education subject*
Stage 3
One Education Studies elective subject†
PHYS3010 or PHYS3210, PHYS3030 or PHYS3230,
PHYS3021, PHYS3041, PHYS3050, PHYS3060
3 Subjects from BIOS1101, BIOS1201, GEOL1101,
GEOL1201
One General Education subject*

Stage 4
HPST2106
EDST1446, EDST1447, EDST1448, EDST1449,
EDST1450
One Education Studies elective subject††

Students proposing to proceed to stage 4 (Honours) must
complete level 3 Chemistry subjects totalling 105 Credit
Points

Stage 5
CHEM4003
* Does not apply to students who commenced before 1996
† Students enrolled before 1998 are to complete two electives.
** May not apply to students who commenced before 1998.

0258
Chemistry

Stage 1
CHEM1101, CHEM1201
EDST1101, EDST1102
MATH1131 or MATH1141
MATH1231 or MATH1241
Elective subjects totalling 45 Credit Points*
One General Education subject**

Stage 2*
One Education Studies elective subject†
BIOS1101
CHEM2011, CHEM2021, CHEM2031, CHEM2041,
CHEM2000
GEOL1111
Either BIOS1201 or GEOL1211
One General Education subject*

Stage 3
One Education Studies elective subject†
60 Level III Chemistry Credit Points of which at least 45
Credit Points are from:
CHEM3011, CHEM3021, CHEM3031, CHEM3041
Choose Science Elective subjects totalling 45 Credit
Points
One General Education subject*

Stage 4
HPST2106
EDST1446, EDST1447, EDST1448, EDST1449,
EDST1450
One Education Studies elective subject††

Students proposing to proceed to stage 5 (Honours) in
Mathematics must complete 90 level III Credit Points in
Mathematics subjects, Some of which should be at the
higher level.

Stage 5
MATH4003 or MATH4103 or MATH4603 or MATH4903
* Up to 120 Credit Points may be from subjects that are restricted to
this program or Arts subjects from the following subject areas:
Chinese, Economics, English, French, German, History, Indonesian,
Modern Greek, Music, Political Science, Russian, Sociology, Spanish
and Latin American Studies and Theatre and Film Studies. Upper
Level Economics subjects are restricted to those in Economic History
plus ECON2103, ECON2104.
** Does not apply to students who commenced before 1996
† Students enrolled before 1998 are to complete two electives.
‡ May not apply to students who commenced before 1998.
1758
Biological Science

Stage 1
BIOS1101, BIOS1201
CHEM1101, CHEM1201
EDST1101, EDST1102
MATH1131 or MATH1141 or MATH1011
MATH1231 or MATH1241 or MATH1021

Stage 2
One Education Studies elective subject†
BIOS1101
CHEM1101, CHEM1201
45 Credit Points from: GEOL1200, GEOL2110,
GEOL2120, GEOL2170, GEOL2180, GEOL2200,
GEOL2220
Elective subjects totalling 15 Credit Points
One General Education subject *

Stage 3
One Education Studies elective subject†
60 Credit Points from: GEOL2231, GEOL2250,
GEOL3101, GEOL3110, GEOL3120,
GEOL3170, GEOL3241, GEOL3250, GEOL3280
Elective subjects totalling 45 Credit Points
One General Education subject *

Stage 4
HPST2106
EDST1446, EDST1447, EDST1448, EDST1449,
EDST1450
One Education Studies elective subject†
Students proposing to proceed to Stage 5 (Honours) must
complete Level III subjects totalling 105 Level III Credit
Points in Geology.

Stage 5 (Honours)
GEOL4303(F/T) or GEOL4343(P/T)
* Does not apply to students who commenced before 1996.
† Students enrolled before 1998 are to complete two electives.
‡ May not apply to students who commenced before 1998.

Honours Degree
At the conclusion of Year 3 or Year 4, whichever is
appropriate, students who have satisfied any prerequisite
conditions may be permitted to apply for admission to the
Honours Year in Education, in Mathematics, or in any of
the Science disciplines. Students who satisfy the
requirements of the Honours Year as well as those for the
award of the BSc BEd combined degree graduate with the
award BSc BEd(Hons).

Honours in a Science Discipline or Mathematics
Students wishing to proceed to the award of the degree at
Honours Level must further complete:
1. any additional requirements as prerequisites for entry
to the Honours Level program in the school concerned,
and
2. in their fourth or fifth year of study, an approved Honours
Level program in the School concerned.
Honours in Education

BSc BEd students may enrol in Honours in Education Studies in their fifth year of study if they have met the prerequisites. See under subject number EDST4000 Education Honours (Research) in the Faculty of Arts and Social Sciences Handbook.

Conditions for the award

Board of Studies in Science and Mathematics and the Faculty of Engineering

3725
Combined Science / Electrical Engineering Course

Bachelor of Engineering / Bachelor of Science
BE BSc

3730
Combined Science / Civil Engineering Course

Bachelor of Engineering / Bachelor of Science
BE BSc

For details of the Combined Science/Aeronautical Engineering, Industrial Engineering, Mechanical Engineering, Electrical Engineering, Civil Engineering and Naval Architecture Courses refer to the Faculty of Engineering Handbook.

Board of Studies in Science and Mathematics and the Faculty of Medicine

3820
Combined Science and Medicine Course

Bachelor of Science / Bachelor of Medicine and Bachelor of Surgery
BSc MB BS

For details of the Combined Science / Medicine Course refer to the Faculty of Medicine Handbook.

Board of Studies in Science and Mathematics and the Faculty of Commerce and Economics

3996
Combined Science / Commerce Course

Bachelor of Science / Bachelor of Commerce
BSc Bcom
3529
Combined Commerce / Science Course
Bachelor of Commerce / Bachelor of Science
BCom / BSc
For details of the Combined Science / Commerce Courses refer to the Faculty of Commerce and Economics Handbook.

Board of Studies in Science and Mathematics and the Faculty of Law

4770
Combined Science / Law Course

Bachelor of Science / Bachelor of Laws
BSc LLB
For details of the Combined Science / Law Course refer to the Faculty of Law Handbook
Subject Descriptions

Undergraduate Study

Descriptions of all subjects are presented in alphanumeric order within organisational units. For academic advice regarding a particular subject consult with the contact for the subject as listed. A guide to abbreviations and prefixes is included in the chapter 'Handbook Guide', appearing earlier in this book.

Note/s: Some subjects that appear in this section may be restricted to students for whom the subject comprises a compulsory part of their program. Other subjects are electives in a range of programs. Where program 1000 is mentioned any of the mathematics or statistics programs may be substituted.

Accounting

Accounting Level I

ACCT1501
Accounting and Financial Management 1A
Staff Contact: School Office
CP15 S1 or S2 L2 T2

Note/s: Restricted to programs 0600, 1000, 1006, 1400, 6810, Courses 3681, 3971, 3978 and 3979. Not available in Year 1 of programs 0600, 1000, 1006, 1400 or Course 3978. May be counted in combined degree courses 3611, 3661 and 3701 only in special circumstances. Quota restrictions apply for this subject

This is the first subject in a sequence of subjects dealing with the profession and practice of accounting and the literature associated with it. It illustrates the analysis and design of a financial accounting system which processes financial data and produces financial reports geared to the information needs of interested parties. It introduces students to the design of accounting systems based on double-entry book-keeping and incorporating other internal controls; also, to the problems of accounting for cash, debtors, inventories and property plant equipment. It also provides a critical introduction to the ideas underlying accounting practice and to issues associated with the uses and limitations of traditional financial reports. In so doing it introduces students to the practice of literature evaluation.

ACCT1511
Accounting and Financial Management 1B
Staff Contact: School Office
CP15 S1 or S2 L2 T2

Prerequisite: ACCT1501

Note/s: Restricted to programs 0600, 1000, 1006, 1400, 6810 and Courses 3971, 3978 and 3979.

The second subject in a sequence of accounting subjects and includes financial accounting topics such as an examination of the regulatory environment of financial reporting: the definition and recognition of assets, liabilities, revenues and expenses; and accounting for corporations. Aspects of managerial and investor decision making are covered including financial statement and cash flow analysis, an examination of cost/volume/profit relationships in a single product firm, and short term budgeting.

Accounting Level II

ACCT2522
Accounting and Financial Management 2A
Staff Contact: School Office
CP15 S1 L2 T2

Prerequisite: ACCT1511

Note/s: Excluded ACCT2532. Restricted to programs 0600, 1000, 1006, 1400, 6810 and Courses 3971, 3978 and 3979.

Management Accounting is directed towards the effective use of organisational resources. Organisations create value through the use of resources, and can enhance such value by focusing and reconfiguring their internal processes in various ways; that is, by changing the ways in which they conduct business and perform work. It is argued that, in world class organisations, the management of time, flexibility, quality integration, variability and interdependence is critical to sustained value generation. This course explains how management accounting supports such value generation, within changing organisational processes.
Accounting Level III

ACCT3563
Accounting and Financial Management 3A
Staff Contact: School Office
CP15 S1 or S2 L2 T2
Prerequisite: ACCT2542
Note/s: Excluded ACCT2552. Restricted to programs 0600, 1000, 1006, 1400, 6810 and Courses 3971, 3978 and 3979.
This is the final financial reporting subject following ACCT1501, ACCT1511 and ACCT2542. This examines accounting, reporting and legal problems associated with the preparation of consolidated accounts for complex structures, significant investments in joint arrangements and other inter-corporate holdings, generic trust designs, securitisation structures, cross-border forex dealings and translations. Strategic management accounting for the contemporary competitive environment. Topics include: environmental and value chain analysis, customer value and shareholder value analysis, strategic cost analysis, pricing, investment appraisal, product and customer profitability, strategic resource management and management information systems. These issues are explored through professional and disciplinary literatures and cases describing Australian and international practice.

ACCT3583
Accounting and Financial Management 3B
Staff Contact: School Office
CP15 S1 or S2 T3
Prerequisite: ACCT2522
Note/s: Excluded ACCT3593. Restricted to programs 1400, 6810 and Courses 3971 and 3979.
This intermediate financial accounting subject builds on the foundation laid in ACCT1501 and ACCT1511. It is intended for students who will be involved in the preparation or use of financial statements whether as accountants, financial executives, auditors, financial analysts or legal advisors. The effort to establish an agreed conceptual framework. The contracting cost framework for the analysis of financial reporting. Accounting for capital instruments. More advanced aspects of the definition, recognition and measurement of assets and liabilities. Lease accounting. Tax effect accounting. An introduction to consolidated accounts. Published financial reports including analysis of the current regulatory requirements. Accounting for the extractive industries, superannuation plans and employee entitlements.

Anatomy

Anatomy Level II

ANAT2111
Introductory Anatomy
Staff Contact: Dr B Freeman
CP15 S1 HPW6
Prerequisites: BIOS1101, BIOS1201
Introduction to gross anatomy, based on a study of prosected specimens. Musculoskeletal, cardiovascular, respiratory, gastrointestinal, genitourinary and nervous systems. General topographical and surface anatomy.

ANAT2151
Introductory Functional Anatomy
Staff Contact: Dr K Ashwell
CP7.5 S1 L2 T1 HPW3
Overview of basic human anatomy and physiology with an emphasis on structures and systems which are most vulnerable to chemical and physical trauma under industrial conditions, such as the eye, ear and skin. Other systems studied include the musculo-skeletal system, central and peripheral nervous systems, circulatory, respiratory, gastrointestinal, endocrine and urogenital systems.

ANAT2211
Histology 1
Staff Contact: A/Prof P Waite
CP15 F HPW3
Prerequisites: BIOS1101, BIOS1201
Corequisite: ANAT2111
Theory and practical aspects of modern histological techniques. Basic histology, including the morphological and functional properties of epithelial, connective, muscle and nervous tissues. Systematic histology, including a histological examination of the major systems of the body; cardiovascular, respiratory, lymphatic, integumentary, digestive, endocrine, urinary, reproductive and nervous (including eye and ear) systems. Emphasis on the ability to interpret histological sections and selected electron micrographs of mammalian tissues and organs and to relate morphology to tissue and organ function.

ANAT2311
Vertebrate Development
Staff Contact: A/Prof D Walsh/ Dr M Hill
CP15 F HPW3
Corequisite: ANAT2111, ANAT2211
This subject will cover the morphology and mechanisms responsible for organising the vertebrate body plan in the embryo. Topics will include the molecular, genetic and cellular approaches to studying the development of human embryology using the four main vertebrate systems: frog, fish, chick and mouse. The subject will focus on elucidating common principles and differences which underlie the development of all vertebrates throughout evolution.
Specifically the role of axial patterning, germ layers, target recognition and interaction in the nervous system; axial polarity; cell adhesion; differentiation factors in cell fate; organogenesis and signalling in development. Emerging technologies such as genomic analysis will be covered. As well as the use of dysfunctional mouse mutants in research.

Anatomy Level III

ANAT3121
Visceral Anatomy
Staff Contact: Dr K Ashwell
CP15 S2 HPW6
Prerequisite: ANAT2111

Detailed study of the visceral system, including autonomic nervous system, head and neck regions and the cardiovascular, respiratory, gastrointestinal and genitourinary systems. Tutorials include clinical cases and surface and radiological anatomy.

ANAT3131
Functional Anatomy 1
Staff Contact: Prof D Tracey
CP15 S1 HPW6
Prerequisite: ANAT2111

Functional anatomy of the musculoskeletal system in the head and neck and upper limb. Includes biomechanics of connective tissue in particular bone, cartilage and tendon. Tutorials involve study of prosected specimens, X rays and surface anatomy; students also carry out their own dissections of the upper limb.

ANAT3141
Functional Anatomy 2
Staff Contact: Prof D Tracey
CP15 S2 HPW6
Prerequisite: ANAT3131

Functional anatomy of the musculoskeletal system in the trunk and lower limb. Includes functional aspects of muscle and a discussion of the mechanics and energetics of walking and running. Tutorials involve study of prosected specimens, Xrays and surface anatomy; students also carry out their own dissections of the lower limb.

ANAT3231
Cell Biology
Staff Contact: Dr M Hill
CP15 S1 HPW4
Prerequisites: BIC2101 or BIOC2201 or BIOC2181 or BIOC2291 or PHPH2112

To develop an understanding of the anatomy and biology of the cell. Cell biology combines traditional anatomical methods with recent cell and molecular biology techniques. Key concepts will include developmental differentiation of the cell, its polarity, motility, cytoskeleton, signal transduction mechanisms and outcomes. An introduction to concepts of cell and extracellular matrix interactions will also be covered.

ANAT3411
Neuroanatomy 1
Staff Contact: Dr E Tancred and Dr S Robinson
CP15 S1 HPW6
Prerequisites: ANAT2211, ANAT2111

Nerve cells and glial cells, cytoarchitecture of brain and spinal cord. Functional anatomy of sensory and motor processing, and higher cerebral functions such as language and emotions. Blood supply of the central nervous system, cerebrospinal fluid and membranous coverings. Comparative anatomy of the brain.

ANAT3421
Research Topics in Neuroscience
Staff Contact: Dr S Robinson
CP15 S2 HPW3
Prerequisite: ANAT3411
Note/s: Entry is by approval of Head of School

Focuses on selected areas of contemporary neuroscience research interest. Includes: brain development and axon guidance, peripheral nerve regeneration, spinal cord injury, pain pathways, visual system function, cortical plasticity, brain imaging, mechanisms of learning and memory, motor systems and the neuropathology in degenerative disorders. The subject is organised in seminar format with discussion of original research papers. It is ideal for students considering doing Honours as it provides a background to current research problems and the opportunity to undertake a small project.

Anatomy Level IV

ANAT4508
Anatomy 4
Staff Contact: Dr S Robinson
CP120 F
Prerequisite: Completion of Year 3 of program 7000 or equivalent including Level III subjects totalling 90 Credit Points, at least 4 of which must be Anatomy subjects.

An honours program consisting of the preparation of a thesis proposal, an undergraduate thesis and participation in School seminars.

The General Education requirements are met within the Honours Program through seminars, essays and participation in School seminars.

ANAT4509
Anatomy 4B Honours Project
Staff Contact: Dr S Robinson
CP90 F
Prerequisite: Completion of Year 3 of Program 7000 or equivalent, including Level III subjects totalling 90 Credit Points of which at least 4 must be Anatomy subjects. Excluded: ANAT4000

An honours program consisting of a thesis proposal, a short undergraduate thesis in the form of a scientific paper, and participation in School seminars. For the award of honours, this subject must be taken in conjunction with other subjects.
totalling 60 Credit Points (normally including ANAT4510) approved by the Head of School.

ANAT4510
Basic Research Methods
Staff Contact: Dr K Ashiwell
CP15 F
Prerequisite: Acceptance into Honours year.
An introduction to basic research techniques and methods, appropriate for Honours level. Topics will include: laboratory safety, light and electron microscopy, photography, laboratory techniques and equipment, quantitative methods, stereology, analysis of data, presentation of data.

Aviation

AVIA1002
Flying Training 1
Staff Contact: Capt G Clynick
CP30 S2 HPW 2
Prerequisite: Nil
Note/s: restricted to Course 3980 Program 2001.
Excluded: AVIA1000
Practical flying training and associated ground training for stage 1. Covering practical and theory requirements for issue of PPL (Private Pilots Licence) and theory requirements for CPL (Commercial Pilots Licence), this subject encompasses flight training phases; 1,2,3,4 & 5 as detailed in UNSW Manual of Flight Training.

AVIA1100
Crew Resource Management 1
Staff Contact: Capt J Faulkner
CP 7.5 S1 HPW2
Note/s: Excluded: PROF0102
This subject deals with the effective use of all resources in the aviation decision making process with focus on the mechanism of communication within the hierarchy of the cockpit and the cabin. Evaluation of communication will focus on the impact of modern technology, changes in methods of communication, and the reduction in crew numbers.

AVIA1150
Air Traffic Control
Staff Contact: Mr J Guselli
CP7.5 S1 HPW2
Note/s: Excluded: AVIA1103
This subject is concerned with the history, development and practical application of Air Traffic Services and their relationship to the commercial and regulatory aspects of commercial aviation. The topics are focussed on both operational and administrative structures within the industry. Emphasis is placed on the role of ATS from the perspective of a service provider. Topics include ATC history, structure, legal aspects and implications. Other significant aspects include communications, safety, noise abatement and the development of future systems.

AVIA1200
Instructional Techniques 1
Staff Contact: Mr B Buckley
CP 7.5 S2 HPW2
Note/s: Excluded: PROF1002
This subject introduces students to current theory and practice in instruction and instruction design. The role of the flight instructor is examined in the light of psychological and educational theory. Practice in instructional techniques is provided in a micro-teaching centre in which video records of students are used as the basis of effective feedback. Students are introduced to instruction based on competency development and assessment.

AVIA1300
Aeronautical Knowledge
Staff Contact: Capt G Clynick
CP7.5 S2 HPW2
Excluded: PROF0203
This subject covers covers the economics of an airline and how the management of economic problems are analysed. Demand analysis and its relation with price and economic conditions covers revenue issues. Costs and supply are studied with reference to available airline costing information. The interaction of demand and supply are then studied and how airlines manage this aspect.

AVIA1900
Economics of Management
Staff Contact: Mr R Robertson
CP7.5 S2 HPW2
Excluded: PROF0203
This subject covers covers the economics of an airline and how the management of economic problems are analysed. Demand analysis and its relation with price and economic conditions covers revenue issues. Costs and supply are studied with reference to available airline costing information. The interaction of demand and supply are then studied and how airlines manage this aspect.

AVIA2003
Flying Training 2
Staff Contact: Capt G Clynick
CP45 S1 HPW
Prerequisite: AVIA1002
Note/s: Restricted to Course 3980 program 2001.
Excluded: AVIA2000
Practical flying training and associated ground training for stage 2. Covering Theory requirement for CIR (Command Instrument Rating), practical requirements for issue of CPL (Commercial Pilots Licence), theory and practical requirements for issue of a NVFR (Night Visual Rating) and a Multi Engine aircraft endorsement, this subject encompasses flight training phases; 6,7 and 8 as detailed in UNSW Manual of Flight Training.
AVIA2100
Crew Resource Management 2
Staff Contact: Capt J Faulkner
CP7.5 S2 HPW2
Prerequisites: AVIA1100
Note/s: Excluded: PROF0202
The interrelationships between Captain and crew will be used to illustrate the principle of the hierarchy of command. Effective teamwork will be developed through negotiation of the principles of communications and effective decision management. This course will build on the principles illustrated in CRM 1.

AVIA2200
Instructional Techniques 2
Staff Contact: Mr B Buckley
CP7.5 S1 HPW2
Note/s: Excluded: PROF0202
This subject provides students with models of effective Flight Instruction emphasising principles of effective communication. Aspects of adult learning theory and practices, communication, human motivation, attention, perception and memory are incorporated in students’ planning, delivery and evaluation of instruction sessions.

AVIA2400
Aviation Regulations 1
Staff Contact: Mr R Bartsch
CP7.5 S1 HPW2
Note/s: Excluded: AVIA2403
Aviation Regulations 1 introduces the Laws and regulations under which an aviation operation functions. Beginning with regulatory authority and source, this subject develops an understanding and awareness of both the direct operational aspects of regulations and the commercial considerations that they demand. The emphasis is that of routine implications of the Civil Aviation Act, Civil Aviation regulations and orders.

AVIA2500
Airline Marketing
Staff Contact: Mr R Robertson
CP7.5 S1 HPW2
This subject uses the classic approach to marketing management but is most entirely focussed on how this is achieved in the industry. The approach is of practical nature. The course studies airline market research, marketing strategy development, product development, pricing strategies and yield management, distribution and promotion strategies. The course encourages and emphasises current airline marketing behaviour as examples of the theory.

AVIA2700
Flight Safety 1
Staff Contact: Capt J Faulkner
CP7.5 S1 HPW2
Note/s: Excluded: PROF0201
Subjects covered include the use of quick access recorders for fleet performance monitoring, corporate structures for safety departments and accident/incident analysis. Safety auditing, emergency planning and in-flight security will be studied.

AVIA2800
Management of General Aviation
Staff Contact: Ms S Davis
CP7.5 S1 HPW2
This subject covers broad range of the management decisions faced by the airlines. This subject introduces the aviation environment within which the airline management functions and makes economic decisions. Revenue issues are studies with demand analysis, and an airline ability to manage price and to predict loads. The key elements of supply and cost are analysed by reference to available airline data. The final aspect studied is the combination of the demand and supply issues.

AVIA3002
Aviation Operations Management
Staff Contact: Mr R Robertson
CP30 S3 HPW
Prerequisites: AVIA1203, AVIA2400, AVIA2700, AVIA1900
Corequisites: AVEN3930, AVIA3810
Note/s: Excluded:
The subject studies most aspects of airline management. The course is practical in nature and will involve a number of visits from airline and airport managers, and a visit by the class to an airline. The course studies fleet, strategic, scheduling and route planning before moving onto aircraft maintenance, aircrew scheduling, disruption management, airport management, freight management.

AVIA3004
Advanced Flying Training
Staff Contact: Capt G Clynick
CP60 S2 HPW n/a
Prerequisites: AVIA2003
Note/s: Restricted to course 3980 program 2001. Excluded AVIA3000
Practical flying training and associated ground training for stage 3. Covering practical and requirements for issue of CIR (Command Instrument Rating), theory and practical requirements for issue of a Grade Three Instructor Rating* and Theory requirements for the issue of an ATPL (Airline Transport Pilots Licence) and final refresher flying, this subject encompasses flight training phases; 9,10,11 and 12 as detailed in UNSW Manual of Flight Training.
*In lieu of the Grade three Instructor ratings, students may select from options of; Airline entry training or advance aircraft endorsement.
AVIA3400
Aviation Regulations 2
Staff Contact: Mr R Bartsch
CP7.5 S2 HPW2
Prerequisites: AVIA2403
Note/s: Excluded: AVIA2413

Aviation Regulations 2 builds on the fundamental concepts introduced in Aviation Regulations 1. The emphasis of this subject is the legal ramification for pilots and operations managers imposed by the Civil Aviation Act and associated regulations. Specific case studies will form a large part of this subject.

AVIA3600
Simulations Applications
Staff Contact: Capt G Clynick
CP7.5 S2 HPW2
Note/s: Excluded: AVIA2603

This subject addresses the broad application of simulation to the aviation industry. While the emphasis will be on aircraft simulations, aspects of operations systems simulations will also be covered. The perspective of this subject will that of end user application, particularly from management and training of human resource basis.

AVIA3700
Flight Safety 2
Staff Contact: Capt J Faulkner
CP7.5 S2 HPW2
Prerequisites: AVIA2700
Note/s: Excluded: PROF3001

The emphasis will be on the holistic aspects of flight safety from an operations management perspective, with specific reference to technical and human factors and corporate philosophies which incorporate aspects of flight safety. The course will incorporate a small research project.

AVIA3800
Management of Regional Airlines
Staff Contact: Mr G Swanson
CP7.5 S1 HPW2

A further development to AVIA2800, this subject will provide students with the information pertinent to business and corporate operations with the regional airlines sectors of the industry. Aspects covered include requirements for low capacity airlines AOCs and current state and national requirements for such operations.

AVIA3810
Airport Management and Security
Staff Contact: Mr R Armstrong
CP7.5 S2 HPW2
Note/s: Excluded: AVIA3703

This is an industry based subject which brings the generalities of large management into the specific context of senior airport authorities. Aviation regulations and local government issues that pertain will also be covered.

Banking and Finance

Banking and Finance Level II

FINS2613
Business Finance
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Corequisites: FINS2612 or any two of ACCT1511, ECON1102 and MATH1231
Note/s: Restricted to programs 1400, 6810.

Looks at the essential aspects of financial decision making in business including: factors influencing capital expenditure decisions; alternative approaches to valuation; factors affecting the formulation of the capital structure; and influence of the capital market environment.

Banking and Finance Level II/III

FINS2612
Capital Markets and Institutions
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Corequisites: ECON1101 and MATH1231 or completion of Stage 1
Note/s: Restricted to program 1400.

Analysis of markets for financial assets including the money, bond, stock and futures markets; the structure of interest rates; flow of funds of financial institutions; the regulatory structure of markets and the interrelations among markets.

Banking and Finance Level III

FINS2624
Investments
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Prerequisite: FINS2613
Note/s: Excluded FINS2714 and FINS3615. Restricted to programs 1400 and 6810.

Introduces investment theory and practice. The first part of the subject develops the primary asset pricing models, including CAPM and APT models, examines relevant empirical tests, and applies the models to the problem of measuring portfolio performance. This is followed by a study of investment management in the social, ethical and economic context. Topics include security analysis of bonds and equities; the use of options, futures and forwards in portfolio hedging and risk management; and current issues in portfolio management including 'green' funds, passive vs active management, index funds and international diversification.
Biochemistry and Molecular Genetics

Head of School: A/Prof M Edwards
Coordinator of Undergraduate Studies: Dr A Bagnara
School Secretary: Ms G McWhinney

Registration for Laboratory Classes in Biochemistry

It is essential for all students to register for a laboratory class for each biochemistry subject. This is normally done through the pre-enrolment process by completing the appropriate registration form (Form BIOC/REG/99) during the pre-enrolment. Failure to do this may prejudice your chances of obtaining a locker for your preferred laboratory class.

Note: Some subjects that appear in this section may be restricted to students for whom the subject comprises a compulsory part of their program.

Biochemistry Level II

BIOC2101
Principles of Biochemistry (Advanced)
Staff Contact: Dr I McFarlane, A/Prof M Edwards
CP15 S1 HPW6
Prerequisites: BIOS1101 and BIOS1201, CHEM1101 and CHEM1201 or CHEM1002

Note/s: Excluded BIOC1319, BIOC2101, BIOC2312, BIOC2372, CHEM2929. Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.

Introduces modern biochemistry, covers fundamental aspects of the structure-function relationships of proteins and an overall coverage of intermediary metabolism. Major topics covered include: the nature and function of enzymes; the metabolic working of cells, tissues and organs; the interrelationships between pathways of carbohydrate, lipid and amino acid metabolism; the vital roles of enzymes and hormones in catalysis and metabolic regulation; the energy trapping mechanisms of animals and plants; interesting variations on the central metabolic pathways in various life forms. Practical work to complement the lectures and to introduce the principles of biochemical analysis.

BIOC2201
Principles of Molecular Biology (Advanced)
Staff Contact: A/Prof T Stewart, Mr H Shoory
CP15 S2 HPW6
Prerequisites: BIOS1101 and BIOS1201, CHEM1101 and CHEM1201 or CHEM1002

Note/s: Excluded BIOC2291, BIOC2312, BIOC2372. Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.

Provides an introduction to modern molecular biology and covers the molecular mechanisms of gene expression and the fundamental aspects of recombinant DNA technology. The major topics covered include: The structure and function of DNA and RNA. The replication and transcription of DNA. Translation of the genetic code into an amino acid sequence during protein synthesis. Regulation of gene expression. Manipulation of DNA including fragmentation by restriction enzymes, cloning of DNA fragments into vectors, hybridization analysis and principles of DNA sequencing. Protein structure and function, protein engineering and site-directed mutagenesis. Amplification
of DNA by the polymerase chain reaction (PCR). Practical work to complement the lectures.

BIOC2291
Fundamentals of Molecular Biology
Staff Contact: Dr G King, Mr H Shoory
CP15 S2 HPW6
Prerequisites: BIOS1101 and BIOS1201, CHEM1101 and CHEM1201 or CHEM1002
Note/s: Excluded BIOC2201, BIOC2312, BIOC2372. This subject provides a comprehensive introduction to Molecular Biology as an alternative to BIOC2201 for students who do not intend to proceed to Level III Biochemistry. It does not fulfill the prerequisite requirements for Level III Biochemistry but the Head of School may give approval for students with a grade of credit to enrol in Level III subjects.

Provides an introduction to modern molecular biology and covers the molecular mechanisms of gene expression and the fundamental aspects of recombinant DNA technology. The major topics covered include: the structure and function of DNA and RNA; the replication and transcription of DNA; translation of the genetic code into an amino acid sequence during protein synthesis; regulation of gene expression. Manipulation of DNA including: fragmentation by restriction enzymes; cloning of DNA fragments into vectors; hybridization analysis and principles of DNA sequencing. Protein structure and function. Amplification of DNA by the polymerase chain reaction (PCR). Practical work to complement the lectures.

This subject covers essentially the same material as in BIOC2201 Principles of Molecular Biology, but in less detail and with more emphasis on the general applications and less emphasis on some of the underlying mechanisms.

Biochemistry Level III

BIOC3111
Molecular Biology of Proteins
Staff Contact: Dr G King
CP15 S1 HPW6
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201, CHEM2021 or CHEM2041
Modern aspects of the structure function relationships of proteins including discussion of the latest techniques of protein characterisation. Topics include: separation and analytical procedures; determination of amino acid sequence data; the nature of protein and protein ligand interactions including aspects of substrate binding, enzyme kinetics and enzyme mechanisms; the molecular architecture of proteins from the standpoint of the relationships among primary, secondary, tertiary and quaternary structures; aspects of protein engineering. Practical work illustrates and complements the lectures and provides experience with modern techniques of protein molecular biology.

BIOC3121
Molecular Biology of Nucleic Acids
Staff Contact: Dr L Lutze-Mann
CP15 S1 HPW6
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201
Detailed analysis of gene structure and function including: structure and properties of polynucleotides such as DNA and RNA; structure of chromatin; mechanisms and regulation of gene replication, transcription and translation; recombinant DNA technology, nucleic acid sequencing, DNA-DNA and DNA-RNA hybridisation as important tools of modern molecular biology; protein production using recombinant DNA systems. Practical work illustrates and complements the lectures and provides experience with contemporary biochemical techniques.

BIOC3131
Biochemistry and Genetic Engineering of Plants
Staff Contact: Dr I McFariane
CP15 S1 HPW6
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201
The techniques of recombinant DNA technology and plant tissue culture with their application to the modification and improvement of plant productivity.

Plant organ, tissue and cell culture, organogenesis, embryo-genesis and clonal plant propagation. The long term preservation of germplasm and plant genetic resources. Products from cultures, plant cells and the technology of plant cell culture. Structure and expression of plant genes. Plant molecular biology including cloning plant genes and vectors for gene cloning. Genetic manipulation of plants to improve their natural resistance to pests, disease and environmental stress. Practical work provides training in the basic techniques of plant tissue culture with application of selected techniques to plant genetic engineering.

BIOC3141
Human Genetics
Staff Contact: Dr L Lai
CP15 S2 HPW6
Prerequisite: BIOS2021
The principles and concepts of human genetics and methods used to study the nature and extent of genetic differences; mechanisms of inheritance and gene expression, gene linkage and patterns of inheritance; principles and applications of population genetics and cytogenetics; modern molecular techniques for human gene mapping, gene localisation, disease and the prospects of gene therapy; genetic fingerprinting and current ethical issues in human genetics.
BIOC3151  
Genetics and the Analysis of Human Variation  
Staff Contact: Prof I Dawes, Dr W Sherwin  
CP15 S1 HPW6  
Prerequisites: BIOS2021  
Corequisites: BIOS2041 or MATH2841 or another Mathematics or Computing subject approved by the coordinator  

This subject aims to develop student's abilities to use molecular and traditional genetic data to solve genetic problems that arise in a variety of applications, from industry and human biology, to wildlife management. Computer simulations, and projects with Industries, will be used extensively. Natural or recombinant genes interact with one another and the environment to produce whole organisms and the variation between them. The subject will present the role of triglyceride, cholesterol and lipoprotein metabolism and the molecular interactions between these molecules. The organisation of the genomes of higher organisms will be examined, including natural selection, artificial selection, forensics and ethical issues.

BIOC3281  
Recombinant DNA Techniques and Eukaryotic Molecular Biology  
Staff Contact: Prof I Dawes  
CP15 S2 HPW6  
Prerequisite: BIOC3121  

The organisation of the genomes of higher organisms derived mainly from the application of recombinant DNA technology and related techniques. Methods used for the isolation, identification and characterisation of eukaryotic genomes in terms of the organisation of single copy and repeated sequences and of coding and non-coding sequences and of several gene clusters, eg the alpha and beta globin gene cluster. Mechanisms known to operate in the control of eukaryotic gene expression, both at the DNA level and at the level of RNA processing. Review of several specialised genetic systems in plants and animals such as mitochondria, chloroplasts and RNA and DNA tumour viruses. Practical work provides training in the use of sterile techniques and in working with polynucleotides under nuclease-free conditions, using basic techniques such as hybridisation and DNA sequencing.

BIOC3261  
Human Biochemistry  
Staff Contact: Dr A Bagnara  
CP15 S2 HPW6  
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201  

Covers the aspects of metabolism that are of particular relevance to the human. The major topics covered will be selected from: Nutrition, exercise, neurochemistry, xenobiotics, nucleotide and one-carbon metabolism, genetic diseases and molecular aspects of parasitology. The role of triglyceride, cholesterol and lipoprotein metabolism in human health, and other selected areas of human nutrition. Exercise, the metabolic fuels utilised and the use of in vivo NMR to monitor changes in energy metabolism. Specialised aspects of endocrinology and neurochemistry including prostaglandins, leukotrienes, enkephalins and endorphins. The interrelation of purines, pyrimidines, folate and cobalamin metabolism in humans. Xenobiotics: the metabolism of foreign compounds by humans. Biochemical aspects of genetic disease including the use of recombinant DNA techniques for prenatal diagnosis and carrier detection. Molecular studies of malaria and other parasites of the human. Practical work to amplify the lectures.

BIOC3271  
Molecular Cell Biology  
Staff Contact: A/Prof M Edwards  
CP15 S2 HPW6  
Prerequisites: BIOC2312 or BIOC2372 or BIOC2101 and BIOC2201  

Cell biology from a molecular viewpoint. Biochemical aspects of cellular organisation and how they are integrated and controlled. The arrangement of the component molecules of organelles, their function in integrated cellular metabolism and the molecular interactions between the cells of multicellular organisms. The biochemistry of the cytoskeleton, carriers and intracellular transport systems. The regulation of cellular processes at the molecular endocrine level. Growth and differentiation. Aspects of cancer metabolism, the biochemistry of cell to cell communication and the structure and function of the extracellular matrix. Practical work amplifies the lectures.

BIOC3291  
Genes, Genomes and Evolution  
Staff Contact: Dr A Wilton  
CP15 S2 HPW6  
Prerequisite: BIOS2021  

Current concepts and theories in genetics concentrating on Eukaryotes including humans. The generation of variation examined at the molecular level for fundamental genetic process of mutation, recombination and repair. The evolution of the genome, maintenance of variation, the effects of mutations and their relevance to disease. Ecological genetics and molecular evolution, genetics of cellular division process and developmental genetics. Practical uses of genetics including the use of transposable elements to manipulate genetic stock, transgenesis, genetics of cancer, pedigree analysis, disease gene mapping, gene therapy, cytogenetics. Unusual genetic mechanisms. Perspectives on genetics, history and future. Practical work and exercises to complement the lectures.

BIOC3301  
Biochemistry Laboratory Project (Advanced)  
Staff Contact: A/Prof M Edwards  
CP15 S3  
Prerequisites or Corequisites: This subject is restricted to Advanced Science students enrolled in programs 4100 or 4110.  
The subject involves directed reading, laboratory work and use of World Wide Web resources. Students will work...
on a research project under the supervision of a member of the academic staff. It is designed to introduce students to research methodology, and to stimulate critical and lateral thinking in the context of problem solving. Enrolment in this subject is by invitation and is based on academic performance. Interested students should contact the Head of School.

**Biochemistry Level IV**

BIOC4318/BIOC4618  
Biochemistry 4 (Honours)  
*Staff Contact: Dr V Murray*  
*CP120 F*  
*Prerequisite:* Completion of program 4100 including Level III subjects totalling 120 Credit Points 60 of which must be from Biochemistry subjects.

Advanced training in selected areas of biochemistry including a supervised research program that places emphasis on the use of specialised techniques relevant to the research area. A written thesis on the research is required.

The General Education requirements are met within the Honours Program by seminars, an essay and participation in discussion groups.

BIOC4428/BIOC4629  
Molecular Genetics 4 (Honours)  
*Staff Contact: Prof I Dawes*  
*CP120 F*  
*Prerequisite:* Completion of program 4110 including Level III subjects totalling 120 Credit Points.

Advanced training in selected areas of molecular genetics including a supervised research program that places emphasis on the use of specialised techniques relevant to the research area. A written thesis on the research is required.

The General Education requirements are met within the Honours Program by seminars, an essay and participation in discussion groups.

**Servicing Subjects**

These are subjects taught within courses offered by other faculties.

For further information regarding the following subjects see the Faculty of Medicine Handbook.

BIOC1319  
Biochemistry for Medical Students  
BIOC2329  
Medical Biochemistry and Genetics

---

**Biological Science**

**Biological Science Registration Centre**  
(for courses in Botany and Zoology)  
This will be held in Biology Lab B (Room G21, Biological Sciences Building) as follows:  
17-18 Feb 10.00-15.00  
22-25 Feb 10.00-17.00  
Students must obtain practical slots at that time for:  
BIOS2011 Evolutionary and Physiological Ecology  
BIOS2021 Introductory Genetics  
BIOS2051 Flowering Plants  
BIOS2061 Vertebrate Zoology  
BIOS3071 Conservation Biology and Biodiversity  
BIOS3111 Population and Community Ecology  
Pre-enrolment in another faculty does NOT automatically entitle you to a place in your chosen practical time. You must register at the Biological Science Registration Centre.

Students enrolling in subjects other than those listed above do not need to sign on at the Biological Science Registration Centre but need to attend the first lecture of the relevant course for practical assignments and further details. The location and timetable of lectures and practicals for all subjects in the School of Biological Science (Botany and Zoology) can be obtained from the Biological Science Registration Centre, Room G21 or from the notice boards on the fifth floor of the Biological Sciences Building

**Note:** Some subjects that appear in this section may be restricted to students for whom the subject comprises a compulsory part of their program.

**Biological Science Level I**

BIOS1101  
Evolutionary and Functional Biology  
*Staff Contact: Dr ML Augee*  
*CP15 S2 HPW6*  
**Note/s:** Excluded: BIOS1301 and BIOS1021.  
There are no prerequisites. Practical and tutorial seat assignments must be obtained at the Biological Science Student Office (Rm G27 Biological Sciences Bld) BEFORE Session 2 starts. You need to purchase the subject guide at the same time, as it contains essential details about assessment, practical work and the equipment required for practicals.

The subject examines the evolutionary history of life on earth and the relationship between environment, adaptation and function. Animal and plant physiology are covered with an emphasis on adaptation to Australian environmental conditions.
BIOS1201
Molecules, Cells and Genes
Staff Contact: Dr ML Augee
CP15 S1 HPW6
Prerequisites: HSC Exam Score Required: 2 unit Science (Physics) 53-100, or 2 unit Science (Chemistry) 53-100, or 2 unit Science (Geology) 53-100, or 2 unit Science (Biology) 53-100, or 3 unit Science 90-150, or 4 unit Science 1-50. Excluded: BIOS1011 and BIOS1301.
Note/s: Practical and tutorial seat assignments must be obtained at the Biology Enrolment Centre on the day of enrolment. The course guide is available for purchase during enrolment week. Equipment required for practical classes is listed in the Course Guide and must be purchased before session starts. Students must consult if for details of the course and assessments.

The subject is concerned with the basic characteristics of life. The chemistry of life is covered with emphasis on the way in which living things construct and break down macromolecules. The way in which the genetic code controls these processes depends to a great extent on the structure and function of cell components, and cell biology is a major component of the subject. The final topic is genetics - the way in which the genetic code is inherited and the ways in which it can be modified.

Biological Science Level II

BIOS2011
Evolutionary and Physiological Ecology
Staff Contact: Dr P Steinberg
CP15 S1 HPW6
Prerequisites: BIOS1011 and BIOS1021 or BIOS1101 and BIOS1201
Note/s: Students must enrol at the Biological Science Registration Centre, Room G21, Biological Sciences Building. For further details, see Faculty timetable.

Introduction to functional relationships between living organisms and the environments in which they live. Emphasis on interactions within and between populations, ecological energetics, ecophysiology, and the theory of evolution by natural selection. Plants, animals and microbes are covered. Also serves as an introduction to the process of scientific enquiry.

BIOS2021
Genetics
Staff Contact: Dr W Sherwin, Dr A Wilton
CP15 S2 HPW6
Prerequisites: BIOS1011 and BIOS1021 or BIOS1101 and BIOS1201
Corequisite: CHEM1201
Note/s: Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program. Students must enrol at the Biological Science Registration Centre, Room G21, Biological Sciences Building. For further details, see Faculty timetable.

BIOS2031
Biology of Invertebrates
Staff Contact: Dr I Suthers
CP15 S2 HPW6
Prerequisites: BIOS1011 and BIOS1021 or BIOS1101 and BIOS1201
Note/s: Excluded MATH2801, MATH2901, MATH2841.

BIOS2041
Biometry
Staff Contact: A/Prof R McMurtrie
CP15 S1 HPW6
Prerequisites: BIOS1011 and BIOS1021 or BIOS1101 and BIOS1201
Note/s: Excluded MATH2801, MATH2901, MATH2841.

Basic plant biology including cell structure, plant morphology and anatomy, water and sugar transport, seed structure and physiology, plant growth and development, leaf structure and function, growth and development, roots, microorganisms and nutrition, evolution of land plants and plant taxonomy. Practical work: plant anatomy and light microscopy; collection of numerical data and a statistical analysis, plant identification.
BIOS2061
Vertebrate Zoology
Staff Contact: Dr M Augee
CP15 S1 HPW6
Prerequisites: BIOS1011 and BIOS1021 or BIOS1101 and BIOS1201
Note/s: Excluded 45.301, 17.732. Practical class allocations must be obtained during re-enrolment week from room G21, Biological Science Building. Enrolment in this subject may be subject to quota restrictions. Such restrictions will only apply to students taking this subject as an elective part of their program.
Comparative study of the Chordata, with particular reference to the vertebrates, including morphology, systematics, evolution and natural history, with reference to selected aspects of physiology and reproduction. Practical work to supplement lectures.

BIOS3011
Animal Behaviour
Staff Contact: Dr D Croft
CP15 S2 HPW6
Prerequisite: BIOS2031 or BIOS2061
Theory and practice in the biological study of animal behaviour: ethology and behavioural ecology. The observation and description of behaviour along with the development, function and evolution of behaviour in an ecological context are examined as important elements in the analysis of behaviour, particularly social behaviour. Topics include foraging behaviour, communication, home range, territorial behaviour, aggression and dominance, sexual behaviour, mate choice, mating systems, play and social organisation. Examples are drawn from the Australian fauna and both field and laboratory work are included.

BIOS3021
Comparative Animal Physiology
Staff Contact: A/Prof A Beat
CP15 S1 HPW6
Prerequisite: BIOS2031 or BIOS2061
The physiology of invertebrates and vertebrates including the special features of Australian mammals. The topics examined include reproduction, hormones, nerves, blood, circulation, respiration and kidneys with emphasis on the control and integration of organ systems and body functions.

BIOS3031
Ecological Physiology
Staff Contact: Prof T Dawson, A/Prof P Greenaway
CP15 S2 HPW6
Prerequisite: BIOS2031 or BIOS2061
Physiological adaptation to habitat in animals. The problems imposed by environmental conditions on salt and water balance, excretion, gas exchange, metabolism and temperature regulation/acclimation will be considered. Underlying themes include the colonisation of land from aquatic habitats and adaption to severe habitats. Emphasis will be placed on the Australian fauna. A field trip to Western NSW is part of the course and students will incur expenses.

BIOS3051
Insect Diversity and Management
Staff Contact: Dr C Orton
CP15 S1 HPW6
Prerequisite: BIOS2031
Note/s: Not offered in 1999.
Insect diversity, classification and identification, internal and external anatomy. Insect ecology, physiology and behaviour, including pheromones. Management of urban and agricultural insect pests, insecticides and their action, resistance, advantages and disadvantages of pest control methods. Practical classes to illustrate lectures. Students must present insect collection for assessment.

BIOS3061
Plant Ecosystem Processes
Staff Contact: A/Prof R McMurtrie
CP15 S1 HPW6
Prerequisite: Any 2 Level II Science subjects

BIOS3071
Conservation Biology and Biodiversity
Staff Contact: Dr W Sherwin
CP15 S1 HPW6
Prerequisites: BIOS1011 and BIOS1021 or BIOS1101 and BIOS1201, plus any 2 Level II Biological Science subjects (the latter may be waived upon application to the subject coordinator)
Note/s: Students must enrol at the Biology Enrolment Centre, Room G21, Biological Sciences Building. For further details, see Faculty timetable.
Applications of community biology, population ecology and genetics to management of environmental problems in nature and artificial ecosystems, including Australian examples. Nature and importance of global diversity. Management and design of programs for the conservation of species and ecosystems, including reserves, off site conservation, and computer simulations. Field excursions are compulsory and will involve expense to individual students.
BIOS3081
Ocean Biology and Fisheries
Staff Contact: Dr I Suthers
CP15 S1 HPW6
Prerequisite: MSCI2001 or Level II Biological Science subjects totalling 30 Credit Points
Note/s: A compulsory field trip will be held during the mid-session break.

Marine pelagic and estuarine habitats. The practical application of theory to the ocean environment and its effect on the life of marine organisms. Emphasis on the biology of phytoplankton, zooplankton and fish, together with the study of fisheries. Includes management, marine technology, computer simulations, conservation, other marine vertebrates, aquaculture and environmental concerns. Technical skills, taxonomy and sampling design. Personal expenses will be incurred. Complements BIOS3091 Marine Botany and Ecology.

BIOS3091
Marine Botany and Ecology
Staff Contact: Prof R King
CP15 S2 HPW6
Prerequisite: MSCI2011 or Level II Biological Science subjects totalling 30 Credit Points

BIOS3111
Population and Community Ecology
Staff Contact: Prof B Fox
CP15 S2 HPW6
Prerequisites: BIOS1021 and MATH1032 or MATH1231 or MATH1042 or MATH1241 or MATH1021

Factors regulating dynamics of interacting populations, renewable resource management, ecosystem stability, cycles and chaos, simulation modelling in ecology, niche theory, competition, habitat selection, community structure, species diversity, island biogeography, ecological gradients. Succession following disturbance (fire, mining, or logging). Participation in fieldwork is essential.

BIOS3121
Plant Systematics and Development
Staff Contact: A/Prof C Quinn
CP15 S1 HPW6
Prerequisite: BIOS2051
Note/s: Not offered in 1999.

Techniques of plant systematics, including the recognition and classification of species, genera and higher order taxa. Assessment of evolutionary relationships using molecular and other data, and the use of computer models to reconstruct and test hypothetical phylogenies. Modern approaches to the exploration of plant ultrastructure and development, including the use of the electron microscope. The main emphasis is placed on seed plants.

BIOS3131
Mammalogy
Staff Contact: Prof M Archer
CP15 S2 HPW6
Prerequisite: BIOS2051

An introduction to the origin and nature of mammals, their evolutionary patterns, diversity, contemporary and historical biogeography, community structure, life history strategies compared with those from other lands, field techniques and aspects of conservation biology. Focus on endemic Australian mammals: monotremes, marsupials, bats, cetaceans, rodents, dingos and humans. Includes field excursions. Field excursions may incur personal expenses; personal expenses may be incurred.

BIOS3151
Lower Plants and Fungi
Staff Contact: Prof A Ashford
CP15 S1 HPW6
Prerequisite: BIOS2051

Examines the structural diversity and evolution of plants, with emphasis on non-seed-bearing land plants (ferns, lycopods, mosses and liverworts) and fungi. The adaptive significance of some of the characteristics features of the major groups are explored.

Biological Science Level IV

BIOS4018
Biological Science 4 (Honours) Full-time
Staff Contact: A/Prof C Quinn
CP120
Prerequisite: Completion of program 1700 including Level III subjects totalling 105 Credit Points

BIOS4014
Biological Science 4 (Honours) Part-time
Staff Contact: A/Prof C Quinn
CP60 F
Prerequisite: Completion of program 1700 including Level III subjects totalling 105 Credit Points

BIOS4028
Botany 4 (Honours) Full-time
Staff Contact: A/Prof C Quinn
CP120 F
Prerequisite: Completion of program 1743 including Level III subjects totalling 105 Credit Points, 4 of which must be Botany subjects or a closely related discipline

BIOS4024
Botany 4 (Honours) Part-time
Staff Contact: A/Prof C Quinn
CP60 F
Prerequisite: Completion of program 1743 including Level III subjects totalling 105 Credit Points, 4 of which must be Botany subjects or a closely related discipline
BIOS4034
Zoology 4 (Honours) Part-time
Staff Contact: A/Prof C Quinn
CP60 F
Prerequisite: Completion of program 1745 including Level III subjects totalling 105 Credit Points 4 of which must be Zoology subjects

BIOS4038
Zoology 4 (Honours) Full-time
Staff Contact: A/Prof C Quinn
CP120 F
Prerequisite: Completion of program 1745 including Level III subjects totalling 105 Credit Points 4 of which must be Zoology subjects

The General Education requirements are met within these Honours Programs by seminars, an essay and participation in discussion groups.

Biotechnology

Biotechnology Level III

BIOT3011
Biotechnology A
Staff Contact: Dr D Glenn
CP15 S1 L3 T3
Prerequisites: BIOC2101, BIOC2201

The basic principles involved in the operation of microbial processes on an industrial scale. Includes: the selection, maintenance and improvement of microorganisms using conventional and recombinant genetics; the influence of physical and chemical factors on the microbial environment; the control of environmental factors; the effects of operational patterns on batch and continuous flow cultivation; aeration and agitation; scaleup of microbial processes; air and media sterilisation; the harvesting, purification and standardisation of products; the principles involved in microbial processes for chemical, pharmaceutical and food production. The laboratory component includes manipulation of industrially important microorganisms, and laboratory scale fermenter operation, and may include industrial seminars. A review of current research directions in biotechnology

BIOT3021
Biotechnology B
Staff Contact: Prof P Rogers
CP15 S2 L2 T4
Prerequisite: BIOT3011

Application of principles of biotechnology to the analysis and design of microbial processes of industrial relevance (ethanol, single cell protein, fermented foods and beverages, amino acids and vitamins, microbial polysaccharides, microbial enzymes, secondary metabolites including antibiotics, products of mammalian cell culture, waste treatment processes, microbial leaching and metal recovery from low grade minerals). Emphasis on quantitative approach: mass and heat balance calculations, kinetic and thermodynamic analysis, equipment design and specification, process design, process simulation, plant location, application of optimisation techniques. The economics of microbial processes are considered and comparison made with alternative modes of production or treatment. The economics of agroindustry in Australia using microbial processes. Marketing of fermentation products, clinical trials required, legal constraints, patent rights. Technical and economic feasibility studies. A design project is included based on experimental data.

BIOT3031
Microbial Genetics
Staff Contact: Dr R Cavicchioli
CP15 S1 L2 T4
Prerequisites: BIOS2021, BIOC2101, BIOC2201 and MICR2011

Notes: Excluded MICR3021. Not offered in 1999

Suitable for students majoring in Microbiology, Biochemistry, Biotechnology and Genetics. Major topics include genetics of bacteriophage, bacteria and yeasts, mutation and repair, plasmids, gene transfer, transposable genetic elements, gene cloning (genetic engineering) and two component regulatory systems.

The practical component includes a range of contemporary microbial genetics experiments that complement lecture material. They may include experiments involving bacteria, archaea or yeast involving transposon mutagenesis, gene library construction, gene complementation using recombinant plasmids, gene expression and regulation studies, UV mutagenesis and DNA repair, restriction/mutation systems, promoter rescue experiments, and a variety of gene exchange techniques.

BIOT3041
Principles of Biotechnology
Staff Contact: Dr J Foster and Dr F Foong
CP7.5 S2 L2 T1

The subject consists of lectures augmented with case studies and selected practicals, and provides students with an overview of biotechnology relevant to the food industry. Areas to be covered include: transgenic technology as applied to microbial, plant and animal systems and their impact on food production and processing; intellectual property considerations; developments in biocatalysts (including bacterial, yeast and plant whole cell systems), novel enzymes and role of protein engineering in food biotransformations; bioreactor and bioprocess design and operation used in the production of food ingredients; biotransformations of food wastes; regulations and ethical issues with respect to the use of GMOs in food, position of genetically engineered foods in the market place; application of analytical biotechnology in the assay of ingredients and trace contaminants.
BIOT3061
Monoclonal Antibody and Genetic Techniques in Biotechnology
Staff Contact: Dr S Mahler
CP15 S2 L2 T4
Prerequisites: BIOC2101, BIOC2201
Recent breakthroughs in biotechnology have seen the development of techniques and processes widely applied in clinical, veterinary and agricultural research laboratories and in industry. Human therapeutics and diagnostics are entering an exciting era with the evolution of new methods in the production of human monoclonal antibodies and recombinant proteins, somatic cell gene therapy and the use of gene probes as markers for genetic disease. The human genome project is generating enormous amounts of nucleotide and protein sequence data, accelerating the development of a new discipline termed bioinformatics in order to manage this data. The course is designed to give a detailed insight into some of these innovative technologies including: monoclonal antibody technology including antibody production by hybridoma technology and antibody engineering techniques; production of recombinant proteins by genetic engineering methods; aspects of fermentation and downstream processing, and characterisation of recombinant products using new tools in analytical biotechnology such as mass spectrometry; the use of gene probes as markers for genetic disease; somatic cell gene therapy including stem cell and ribozyme technology; bioinformatics and the human genome project. The practical work is designed to complement the lecture material, and includes a block of "on line" bioinformatics tutorials using the WebANGIS interface.

BIOT3100
Fermentation Processes
Staff Contact: Dr F Foong/Dr J Foster
CP 5 SS T2
Note/s: Restricted to courses 3055 and 3100
Factors governing the use of microorganisms in industrial processes, including the selection, maintenance and improvement of microorganisms, the control of environmental factors, batch and continuous flow operational patterns, product recovery, process optimisation and waste disposal. Demonstrations of the operation and control of fermenter systems and of microbial process simulation.

Biotechnology Level IV

BIOT4053
Research Project
Staff Contact: Dr S Mahler
CP90 F T18
Note/s: Restricted to courses 3052
The experimental investigation of some aspects of biotechnology.

BIOT4063
Research Project
Staff Contact: Prof P Rogers/Dr C Marquis
CP30 S1 T2 S2 T10
Note/s: Restricted to courses 3055
The experimental investigation of some aspects of bioprocess engineering.

BIOT4073/BIOT4083
Biotechnology (Honours)
Staff Contact: Prof N Dunn
CP120 F
Prerequisite: Completion of Level III subjects totalling 120 Credit Points 4 of which must be Biotechnology or related discipline
Note/s: Restricted to courses 3990
Advanced formal training in selected areas of biotechnology and participation in one of the School's research projects. The General Education requirements are met within the Honours Program by seminars, an essay and participation in discussion groups.

BIOT4093
Biological Process Engineering
Staff Contact: Dr C Marquis
CP30 F L2 T4
Prerequisite: MICR2201
Note/s: Restricted to courses 3055
This course includes coursework material in bioprocess engineering principles, aspects of food engineering and modern biotechnology techniques. Also incorporated in this subject is a practical component. Bioprocess engineering principles covered include basic manufacturing practice, process validation. Marketing, licencing and business case studies.
formations, heat balances, secondary metabolic productions and structural kinetic models, sterilisation, oxygen mass transfer, mixing, instrumentation, downstream processing, legal and ethical issues related to biotechnology products. Food engineering areas covered include the application of modelling techniques to drying and heat transfer. Modern biotechnology methods covered include a variety of methods to generate and characterise production of monoclonal antibodies including hybridoma production, recombinant methods and phage display of antibodies.

Board of Studies in Science and Mathematics

Board of Studies in Science and Mathematics

Level IV

BSSM4013/BSSM4019
Geology and Physics 4 (Honours)
CP120 F
Prerequisites: Completion of Program 0100 including Level III subjects totalling 120 Credit Points
Combines Geology and Physics in Program 0100, made by arrangement with the Heads of the two Schools.

BSSM4023/BSSM4029
Ecology 4 (Honours)
Staff Contact: Prof B Fox
CP120 F
Prerequisite: Completion of Program 6851, 6852 or 6853 including Level III subjects totalling 90 Credit Points

BSSM4103/BSSM4109
Genetics 4 (Honours)
Staff Contact: Prof I Dawes
CP120 F
Prerequisite: Completion of Program 6840 including Level III subjects totalling 90 Credit Points
The General Education requirements are met by participation in the program offered by the supervisor's School.

Chemical Engineering and Industrial Chemistry

Polymer Science

POLY3010
Polymer Science
Staff Contact: Prof R Burford
CP15 S1 L2 S2 L2 Lab2
Prerequisites: CHEM2011, CHEM2021, MATH2021, MATH2819
Co or prerequisite: INDC3090
Note/s: Restricted to Combined degree course 3681.

Chemistry

Chemistry Level 1

CHEM1101
Chemistry 1A
Staff Contact: Dr P Chia
CP15 S1 or S2 HPW6
Prerequisites: HSC Exam Score Range
Required: 2 unit Mathematics 60-100, or 3 unit Mathematics 1-50, or 4 unit Mathematics 1-100 and 2 unit Chemistry 65-100 or 3 unit Science 90-150 or 4 unit Science 1-200 or 2 unit Physics 75-100, or CHEM1401 65 or higher.
Note/s: Students who have not undertaken chemistry or physics at HSC Level should take CHEM1401 before proceeding to CHEM1101. However, no more than 30 Credit Points of Chemistry at Level 1 may be counted towards a Science degree.
CHEM1201
Chemistry 1B
Staff Contact: Dr P Chia
CP15 S2 or Summer Session, HPW6
Prerequisite: CHEM1101
Note/s: Students who have not undertaken chemistry or physics at HSC Level should take CHEM1401 before proceeding to CHEM1101. However, no more than 30 Credit Points of Chemistry at Level 1 may be counted towards a Science degree.

CHEM1401
Introductory Chemistry A
Staff Contact: Dr P Chia
CP15 S1 HPW6
Prerequisites: HSC Exam Score Range Required: 2 unit Mathematics 60-100, or 3 unit Mathematics 1-50, or 4 unit Mathematics 1-100
Note/s: This subject is only for students who do not have the prerequisites for CHEM1101. Students must obtain a mark of 65 or better in CHEM1401 to enrol in CHEM1101.

Matter, elements and compounds. Stoichiometry and solution stoichiometry. Reaction classes; equilibrium; heat of reactions; calorimetry; acid/base pH calculations of strong acids and bases, pH calculation of weak acids, titrations; decomposition, precipitation; electron transfer (redox); combustion. Gases. Organic chemistry

Chemistry Level II

CHEM2000
Responsibility and ethics in Science
Staff Contact: A/Prof R Read
CP7.5 S2 HPW2
Note/s: General education objective 5 designed for chemistry and physics students

Professional and ethical action and social responsibility in science. Case studies of the progress of scientific discovery, ethics and fraud in science, science in industry, science and the military, science and the media, intellectual property and patent law.

CHEM2011
Physical Chemistry
Staff Contact: A/Prof R Read
CP15 S2 HPW6
Prerequisites: CHEM1101 and CHEM1201 or MATH1231 or MATH1241 or MATH1021

CHEM2021
Organic Chemistry
Staff Contact: Dr R Read
CP15 S2 HPW6
Prerequisite: CHEM1101 and CHEM1201

Applications of spectroscopy in structure elucidation. Reactive intermediates, addition and rearrangement reactions, carbonyl group chemistry. Chemistry of aromatic compounds.

CHEM2031
Inorganic Chemistry and Structure
Staff Contact: Dr R Read
CP15 S1 HPW6
Prerequisite: CHEM1101 and CHEM1201
Note/s: Excluded CHEM2839

CHEM2041
Chemical and Spectroscopic Analysis
Staff Contact: Dr R Read
CP15 S1 HPW6
Prerequisites: CHEM1101 and CHEM1201 or MATH1021 or MATH1231 or MATH1241
Note/s: Excluded CHEM2849

Principles and applications of chemical and analytical spectroscopy. Statistical treatment of data. Titrimetric and potentiometric analysis. Separation techniques.

CHEM2821
Biological Organic Chemistry
Staff Contact: A/Prof R Read
CP15 S1 HPW6
Prerequisite: CHEM1101 and CHEM1201
Note/s: A satisfactory performance in CHEM2821 may be accepted as a prerequisite for CHEM3021. Consult the School of Chemistry.

CHEM2839
Inorganic Chemistry
Staff Contact: A/Prof R Read
CP15 S2 HPW6
Prerequisites: CHEM1101, CHEM1201
Note/s: Excluded CHEM2031. CHEM2839 has similar content to CHEM2031 with a slight shift in emphasis in the applications of Inorganic Chemistry. The subject may be substituted for CHEM2031 with the approval of the subject authority and the course authority.

Electronic structure of atoms and molecules structure, energetics and banding in the solid state. Principles of coordination chemistry. Occurrence, preparation, properties and reactions of selected compounds of transition and main group elements.
CHEM2849
Analytical Chemistry
Staff Contact: A/Prof R Read
CP15 S2 HPW6
Prerequisites: CHEM1101, CHEM1201 and MATH1231 or MATH1241 or MATH1021
Notes: Excluded CHEM2041. CHEM2849 has similar content to CHEM2041 with a slight shift in emphasis in the applications of Analytical Chemistry. The subject may be substituted for CHEM2041 with the approval of the subject authority and the course authority.

Chemistry Level III

Notes: All subjects are available only if there is sufficient demand.

CHEM3011
Physical Chemistry
Staff Contact: Dr G Moran
CP15 S1 HPW6
Prerequisites: PHYS1002 or PHYS1022, CHEM2011, CHEM2031, CHEM2041
Elements of symmetry and group theory appropriate to molecular structure and spectroscopy. Quantum chemistry; atomic and molecular spectroscopy - principles and applications.

CHEM3021
Organic Chemistry
Staff Contact: Dr G Moran
CP15 S1 HPW6
Prerequisite: CHEM2021

CHEM3031
Inorganic Chemistry
Staff Contact: Dr G Moran
CP15 S1 HPW6
Prerequisite: CHEM2031 or CHEM2839
Descriptive chemistry and bonding, stereochemistry, magnetic and spectroscopic properties, stabilities of complexes of normal and inner transition series elements. Stabilisation of oxidation states. Aspects of the chemistry of p-block elements including the inert pair effect.

CHEM3041
Analytical Chemistry
Staff Contact: Dr G Moran
CP15 S1 HPW6
Prerequisite: CHEM2041 or CHEM2849
Instrument design, theory and operating principles for the following instrumental areas: electrochemical, atomic and molecular spectroscopy, chromatography, mass spectrometry, automated analysis.

CHEM3101
Project Laboratory in Chemistry
Staff Contact: Dr G Moran
CP15 S2 HPW6
Prerequisite: Any one of CHEM3011, CHEM3021, CHEM3031, CHEM3041
Group projects in instrumental and synthetic chemistry. Students choose two 7-week projects, one in each area.

The subject includes familiarisation with literature and database searching, project planning and risk assessment, preparation of oral and written project reports.

CHEM3201
Topics in Contemporary Chemistry A
Staff Contact: Dr G Moran
CP15 S2 HPW6
Prerequisite: Any one of CHEM3011, CHEM3021, CHEM3031, CHEM3041
An interdisciplinary subject emphasising the latest advances in chemistry. A diverse range of topics will be offered each year from which students will select four. Topics will vary depending on availability and interest.

Indicative Topics: supramolecular chemistry and molecular recognition; synthetic strategies in organic chemistry; molecular modelling and drug design; organometallic chemistry; surface chemistry and analysis; solid-state chemistry; polymer structure and characterisation; introduction to chemometrics; mass spectrometry.

CHEM3202
Topics in Contemporary Chemistry B
Staff Contact: Dr G Moran
CP15 S2 HPW6
Prerequisite: Any one of CHEM3011, CHEM3021, CHEM3031, CHEM3041
An interdisciplinary subject emphasising the latest advances in chemistry. A diverse range of topics will be offered each year from which students will select eight. Topics will vary depending on availability and interest.

Indicative Topics: supramolecular chemistry and molecular recognition; synthetic strategies in organic chemistry; molecular modelling and drug design; organometallic chemistry; surface chemistry and analysis; solid-state chemistry; polymer structure and characterisation; introduction to chemometrics; mass spectrometry.

Note re CHEM3201 and 3202 Topics in Contemporary Chemistry: A wide range of topics will be offered each year (8-12 topics depending on availability and interest). Students can select 4 topics (15CP) or 8 (30CP).
CHEM3301
Chemistry in Biological Systems
Staff Contact: Dr G Moran
CP15 S2 HPW6
Prerequisite: CHEM3021
Aspects of bioorganic, bioinorganic and bioanalytical chemistry including: Natural products chemistry, antibiotics and drugs, herbicides and pesticides. The occurrence, coordination and role of metals in biology, enzyme and immunoassays in chemical analysis, biosensors.

CHEM3311
Environmental Chemistry
Staff Contact: Dr G Moran
CP15 S2 HPW6
Prerequisites: CHEM3041
Selected topics in advanced environmental chemistry. Topics will be offered from a list including: heavy metals, detoxification mechanisms and inorganic speciation; sampling and strategies for environmental analytical chemistry; atmospheric chemistry and pollution mechanisms; case studies of organic pollutants and remediation mechanisms.

The laboratory component includes environmental project work and an introduction to regulatory requirements relevant to environmental chemistry laboratories.

CHEM3901
Environmental Toxicology
Staff Contact: Dr G Moran
CP15 S1 HPW6
Prerequisites: CHEM1002 or CHEM1101 and CHEM1201
Note/s: This course is only available in the Advanced SScience Environmental Science Program.
Classification and properties of toxic substances. Biological properties of important classes of chemical compounds. Fate of xenobiotics in the human body, including detoxification and bioactivation. Chemical transformations of pollutants in the environment; air, water and soil pollution. Analysis of environmental pollutants at trace levels.

Chemistry Level IV

CHEM4003/CHEM4004
Chemistry 4 (Honours)
Staff Contact: Dr G Edwards
CP120 F
Prerequisites: Completion of Program 0200, 0205, 0210 or 0225 including 120 Credit points at Level III of which 60 CP's must be Level III Chemistry subjects. Any variations must be approved by the School of Chemistry - eg program 0210.
Consists of selected series of lectures on advanced topics in Chemistry and a research project.
The Category C General Education requirements are met within the Honours Program by seminars, discussion and a safety training program.

Students intending to seek admission to this program should consult the School re selection of subjects in the earlier years and apply to the Head of the School for consideration for admission at the end of Stage 3 (or completion of requirements for the award of the pass degree).

Students in course 4075 program 0258 (Science/Education) and course 4770 (Science/Law) who wish to undertake an honours year should consult with the school of Chemistry regarding requirements.

Servicing Subjects
These are subjects taught within courses offered by other Faculties or Schools.

CHEM1800
Chemistry 1EP
Staff Contact: Dr P Chia
CP7.5 S1 HPW3
Prerequisites: HSC Exam Score Range Required: 2 unit Mathematics 60-100, or 3 unit Mathematics 1-50, or 4 unit Mathematics 1-100 and 2 unit Science (Physics) 57-100, or 2 unit Science (Chemistry) 60-100, or 3 unit Science 90-150, or 4 unit Science 1-50
Note/s: Restricted Course 3985 Program 0176

CHEM1806
Chemistry 1EE
Staff Contact: Dr P Chia
CP7.5 S1 HPW3
Prerequisites: HSC Exam Score Range Required: 2 unit Mathematics 60-100, or 3 unit Mathematics 1-50, or 4 unit Mathematics 1-100 and 2 unit Science (Physics) 57-100, or 2 unit Science (Chemistry) 60-100, or 3 unit Science 90-150, or 4 unit Science 1-50
Note/s: Restricted to Courses 3640, 3725 and 3727

CHEM1807
Chemistry 1ME
Staff Contact: Dr P Chia
CP10 S2 HPW4
Note/s: excluded CHEM1101, CHEM1201, CHEM1002
Restricted to Course 3610, 3663, 3680, 3685 and 3700
CHEM1808
Chemistry ICE
Staff Contact: Dr P Chia
CP12.5 HPW5
Note/s: Excluded CHEM1101, CHEM1201, CHEM1002
Restricted to course 3730, 3620, 3146 and 4775
Stoichiometry. Atomic and molecular structure and bonding.
Thermochemistry. Chemical equilibrium; ionic equilibria.
Rates of reactions. Electrochemistry and corrosion.
Colloids and clays. Applications of chemical principles to engineering.

CHEM1809
Biological Chemistry for Optometry Students
Staff Contact: Dr P Chia
CP30 F HPW6
Prerequisites: HSC Exam Score Range Required: 2 unit Mathematics 60-100, or 3 unit Mathematics 1-100 and 2 unit Chemistry or 3 unit Science 90-150, or 4 unit Science 1-200
Note/s: Restricted to course 3950

CHEM2801
Analytical and Physical Chemistry for Food Science
Staff Contact: A/Prof R Read
CP15 S2 HPW6
Prerequisites: CHEM1101, CHEM1201 and MATH1231 or MATH1241 or MATH1021

CHEM2818
Physical Chemistry for Materials Science and Engineering
Staff Contact: Prof RF Howe
CP15 S1 HPW5
Prerequisites: CHEM1101, CHEM1201, MATH1231 or MATH1241 or MATH1021
Note/s: Excluded CHEM2011

CHEM3801
Physical and Chemical Analysis of Food
Staff Contact: Dr G Moran
CP15 S1 HPW6
Prerequisites: CHEM2921 or CHEM2901 and CHEM2801 or CHEM2041 or CHEM2849

CHEM3829
Organic Chemistry
Staff Contact: Prof D Black
The spectroscopic identification of organic compounds, free radical chemistry and electroorganic processes, various aspects of the organic industrial processes such as industrial synthesis based on petrochemicals, and organometallic reactions of industrial interest. Selected topics from the dyestuff, pharmaceutical and agricultural industries.

Computer Science and Engineering

Computer Science and Engineering Level I

COMP1001
Introduction to Computing
Staff Contact: Dr G Mann
CP15 S1 or S2 L3 T3
Prerequisites: none
Introductory concepts and basic skills training for competence with personal computers. Foundational concepts of hardware and software. History of computers, leading to modern practice in data processing, sound, graphics, animation, interfaces, the use of applications, programming languages and networks including the Internet. Practical training in MS Office applications and other software tools for the IBM PC, for graphic manipulation, Web page design, word processing, database, spreadsheet and elementary Visual Basic programming. Introduction to social and ethical issues of computer crime. The discriminating use of such technologies for a better world.

COMP1011
Computing 1A
Staff Contact: Dr R Buckland
CP15 S1 or S2 L3 T3
Prerequisites: as for MATH1131
Corequisites: MATH1131 or MATH1141
Note/s: Excluded COMP1811
Defining problems. Reasoning about and solving problems using Logic, Abstraction, Specification, Algorithms and
Data Structures. Exposure to a functional programming language (Haskell) for practical experience with these concepts. Introduction to software engineering and professional ethics Lab: programming assignments.

COMP1021
Computing 1B
Staff Contact: Dr A Taylor
CP15 S1 or S2 L3 T3
Prerequisites: COMP1011
Note/s: Excluded COMP1821

Computer Science and Engineering Level II

COMP2011
Data Organisation
Staff Contact: Dr G Whale
CP15 S1 or S2 L3 T2
Prerequisite: COMP1021 or COMP1821 or COMP2811

Data types and data structures: abstractions and representations; dictionaries, priority queues and graphs; AVL trees, splay trees, B-trees, Heaps. File Structures: storage device characteristics, keys, indexes, hashing. Memory management. Lab: programming assignments including group project.

COMP2021
Digital System Structures
Staff Contact: Dr S Matheson
CP15 S1 or S2 L3 T2
Prerequisite: COMP1021 or COMP1821 or COMP2811
Note/s: Excluded ELEC2012.

Digital systems: switches and gates, boolean algebra, minimisation techniques, combinational and sequential design, timing analysis, finite state machines; analysis, design and realisation of modest digital subsystems, understanding major subsystems in a model computer. Assembly language programming: translation of higher level programming abstractions and data structures to a real computer using an assembler as a target; study of the relationships between the programming model and the hardware model of a computer; understanding of instruction execution. Lab: take-home kits; programming assignments.

COMP2041
Software Construction: Techniques and Tools
Staff Contact: Dr J Shepherd
CP15 S2 L3 T2
Prerequisites: COMP1021 or COMP2811, COMP2011

Software system decomposition and design. Overview of the software development life-cycle. Command languages.

COMP2811
Computing B
Staff Contact: Dr A Taylor
CP15 S1 or S2 L3 T3
Prerequisites: COMP1011
Note/s: Excluded COMP1821, COMP1021

Computer Science and Engineering Level III

COMP3111
Software Engineering
Staff Contact: Dr J Plaice
CP15 S2 L3 T2
Prerequisite: COMP2011
Note/s: Excluded COMP9008.

Informal specification: Data flow diagram methodology, analysis, design, testing, management and documentation of software. Formal specification: set theory, logic, schema calculus, case studies. The Z specification notation. Managing the project lifecycle. CASE tools. A major group project is undertaken.

COMP3121
Algorithms and Programming Techniques
Staff Contact: Dr J Jin
CP15 S1 L3 T2
Prerequisite: COMP2011
Note/s: Excluded COMP9101.

COMP3131
Parsing and Translation
Staff Contact: A/Prof K Robinson
CP15 S2 L3 T2
Prerequisite: COMP2011
Note/s: Excluded COMP9102.

Grammars: formal description, Chomsky hierarchy, EBNF, attributed-grammars. Top-down parsing: LL(k) grammars, construction of recursive-descent parsers. Bottom-up parsing: LR(k) grammars, construction of LR sets, LR-parser

**COMP3211**  
**Computer Architecture**  
Staff Contact: A/Prof H Elgindy  
CP15 S1 L3 T2  
Prerequisite: COMP2021  
Note/s: Excluded COMP9211  

**COMP3221**  
**Microprocessors and Embedded Systems**  
Staff Contact: Dr S Matheson  
CP15 S2 L3 T2  
Prerequisite: COMP2021  
Note/s: Excluded ELEC2041, COMP9221, ELEC3020.  

The concept of a microprocessor system, busses, address spaces, memory devices, bus timing, bus standards, the VME bus, I/O device interfacing, polling, interrupts, DMA interfaces, the 68000 processor family, the C programming language, device drivers, the device driver software environment, other microprocessors, advanced topics. Laboratory work involves interfacing to and programming MC68000-series microprocessor-based systems. Lab: experimental work involving hardware and software.

**COMP3231**  
**Operating Systems**  
Staff Contact: A/Prof G Heiser  
CP15 S1 or S2 L3 T2  
Prerequisite: COMP2011, COMP2021  
Note/s: Excluded COMP9201.  

**COMP3311**  
**Database Systems**  
Staff Contact: Dr J Shepherd  
CP15 S2 L3 T2  
Prerequisite: COMP2011  
Note/s: Excluded COMP9311.  

**COMP3331**  
**Computer Networks and Applications**  
Staff Contact: Dr J Zic  
CP15 S1 L3 T2  
Prerequisite: COMP2011  
Note/s: Excluded COMP9331, ELEC4352.  

**COMP3411**  
**Artificial Intelligence**  
Staff Contact: A/Prof C Sammut  
CP15 S1 L3 T2  
Prerequisite: COMP2011  
Note/s: Excluded COMP9414.  

**COMP3421**  
**Computer Graphics**  
Staff Contact: Dr T Lambert  
CP15 S2 L3 T2  
Prerequisite: COMP2011  
Note/s: Excluded COMP9415.  

**COMP3511**  
**Human-Computer Interaction**  
Staff Contact: School Office  
CP15 S2 L3  
Prerequisites: COMP2011  
Note/s: Excluded COMP9511.
Provides an introduction to user-system interactions, both analysis and design. The approach is cognitive, focusing on matching user goals with computer technologies. Topics: the human information processing system, models of interaction, strategies for and process of design and evaluation. Project work is emphasised.

Computer Science and Engineering Level IV

COMP4914/COMP4913
Computer Science 4
Staff Contact: Dr A Sowmya
CP120 F
Prerequisite: Completion of program 0600 including Level III subjects totalling 90 Credit Points.

The Honours year consists of advanced coursework electives and a thesis. General Education requirements are satisfied by the completion of the subject COMP9015 Issues in Computing which is taken as part of the Honours subject.

Economics

Economics Level I

ECON1101
Microeconomics 1
Staff Contact: School Office
CP15 S1 or S2 HPW3
Prerequisites: HSC minimum mark required:
Contemporary English 60, 2 unit English (General) 60, or 2 unit English 53, or 3 unit English 1
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 6810.

ECON1102
Macroeconomics 1
Staff Contact: School Office
CP15 S1 or S2 HPW3
Prerequisite: ECON1101
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 1400, 6810.

Introduction to the analysis of aggregate output, employment and economic growth and their relationship to the policy issues of unemployment, inflation and the balance of payments. Social accounting and aggregate income and expenditure analysis. Introduction to macroeconomic models of income determination; consumption and investment functions. Role of money and financial institutions; interactions between goods and money markets in equilibrium and disequilibrium situations. Analysis of recent Australian macroeconomic experience.

ECOH1301
Australia in the International Economy in the 20th Century
Staff Contact: A/Prof DMeredith
CP15 S1 HPW3
Prerequisites: HSC minimum mark required:
Contemporary English 60, 2 unit English (General) 60, or 2 unit English 53, or 3 unit English 1
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 6810.

The international economy at the end of the 19th century: trade, factor flows, and payments arrangements. Problems of the international economy between the wars. The impact of World War II and the international economy in the postwar era. Australian economic development and its relationship with the international economy; economic fluctuations; problems of the interwar period; growth of manufacturing; government policy and action; the importance of the mining industry; economic development and the distribution of income and wealth.

Economics Level II

ECON2103
Business and Government
Staff Contact: A/Prof R Conlon
CP15 S2 HPW3
Prerequisite: ECON1101 or ECON1103
Note/s: Restricted 0600, 1000, 1006, 1060,1066, 1400, 6810.

This subject examines how government affects the business environment at the microeconomic level. The case for intervention and the benefits of deregulation and privatisation are analysed, with reference to particular industries. The effects on business of government instruments—such as the Productivity Commission and the Australian Consumer and Competition Commission—are examined. Issues relating to microeconomic reform, economic rationalism, market failure and government business enterprises are explored.

ECON2104
Applied Macroeconomics
Staff Contact: A/Prof G Kingston
CP15 S1 HPW3
Prerequisite: ECON1102 or ECON1104
Note/s: Restricted 0600, 1000, 1006, 1400, 6810.

This subject examines economic growth and fluctuations and the effect this has on the business environment and the community. Explains the main macroeconomic tools and techniques used by governments and the central bank to implement fiscal, monetary and income policies. The implications for inflation, unemployment, interest rates and exchange rates, and foreign debt are discussed.
Electrical Engineering

Electrical Engineering Level I

ELEC1011
Electrical Engineering 1
Staff Contact: Dr EH Fooks, Dr R Ramer
CP15 S1 or S2 L3 T3
Corequisite: PHYS1969 or equivalent

Electrical Engineering Level II

ELEC2031
Circuits and Systems
CP15 S3 HPW3
Revision of basic circuit theory; RLC circuits; sinusoidal circuit response; mutual inductance and transformers; operational amplifiers; computer aided circuit design; state space circuit representations and time responses; homogenous and particular solutions for first and second order differential equations; computer aided analysis of signals and systems; discrete time signals and systems, sinusoids and signal norms; convolution, impulse and step responses; phasors; AC circuits (transient and steady state responses); complex power; frequency responses of circuits and systems; three-phase circuits.

ELEC2033
Electronics 1
Staff Contact: A/Prof SR Wenham
CP10 S2 L2 T2
Prerequisites: ELEC2030
Note/s: Excluded ELEC2020. Restricted to Program 0600.
Operating principles and terminal characteristics of PN diodes, solar cells, bipolar and field effect transistors. Analysis and design of low frequency single stage and multistage class A amplifiers, including choice of biasing method. Consideration is given to stability, feedback, impedance matching, gain, frequency response, output voltage swing and the various accompanying tradeoffs. The operation of differential and operational amplifiers is studied, with circuits based on the use of operational amplifiers used to study feedback and amplification.

ELEC3004
Signal Processing 1
Note/s: Restricted to program 0176.
For details see Engineering Handbook

Environmental Science

Environmental Science Level I

ENVS1011
Environmental Science 1
Staff Contact: Prof B Fox
CP15 S1 HPW6
Note/s: Restricted to the Environmental Science Programs (6861-6869).
An overview of some of the many problems encountered by Environmental Scientists: climactic change, disturbance events (such as logging, fire and mining), management and conservation of marine and terrestrial resources, water management and pollution are considered. These problems are placed in perspective with regional case studies to highlight specific issues using seminars, workshops, field excursions and group projects. Special emphasis is placed on the political aspects and values inherent in environmental issues.

Environmental Science Level II

ENVS2010
Population Analysis and Environment
Staff Contact: Prof B Fox or A/Prof I Burnley
CP7.5 S2 HPW3
Prerequisite: ENVS1011
The impact of human population growth on all aspects of resource management in the environment. Limiting resources, time lags, survivorship and the relation to their effects on demographic processes in human populations. The impact of the world population on global-scale environmental problems in terms of different cultures and developmental levels is compared to the Australian situation.
ENVS2020
The Urban Environment
Staff Contact: Prof B Fox
CP7.5 S2 HPW3
Prerequisite: ENVS1011

Consideration of the special impacts which urbanisation has on the environment and of the urban public as a component of the environment. The impacts of industrial and residential activities, conflicts between these, and government regulatory mechanisms.

ENVS2801
Aspects of Environmental Policy and Law
Staff Contact: Prof B Fox
CP15 S2 HPW4
Prerequisite: ENVS1011

This subject examines the legal issues likely to be encountered by an environmental scientist and addresses the question: Is the adversary system the most appropriate method of dealing with conflict in determining the appropriate use of resources? The difficulties encountered with the multiplicity of authorities and interactions between local government regulations, state and federal laws and international law are considered. Case studies examined at each of these levels are used to provide a brief overview of current environmental law in Australia and the World, with examples.

Environmental Science Level IV

Three types of honours projects (A, B or C) may be taken in stage 4 of the Environmental Science Course 3976. These are set out for each of the streams:

ENVS4104
Environmental Science 4 Biology B (Honours)
ENVS4204
Environmental Science 4 Marine B (Honours)
ENVS4304
Environmental Science 4 Microbiology B (Honours)
ENVS4404
Environmental Science 4 Chemistry B (Honours)
ENVS4504
Environmental Science 4 Geography B (Honours)
ENVS4604
Environmental Science 4 Geology B (Honours)
ENVS4704
Environmental Science 4 Mathematics B (Honours)

Staff Contact: Prof B Fox
CP60 81, 82, or S3
Prerequisite: Completion of 360CP (with credit average) of appropriate program (6861 to 6868), including all core requirements except for honors project.

Half year research project and thesis.

ENVS4108/(ENVS4109 if P/T)
Environmental Science 4 Biology C (Honours)
ENVS4208/(ENVS4209 if P/T)
Environmental Science 4 Marine C (Honours)
ENVS4308/(ENVS4309 if P/T)
Environmental Science 4 Microbiology C (Honours)
ENVS4408/(ENVS4409 if P/T)
Environmental Science 4 Chemistry C (Honours)
ENVS4508/(ENVS4509 if P/T)
Environmental Science 4 Geography C (Honours)
ENVS4608/(ENVS4609 if P/T)
Environmental Science 4 Geology C (Honours)

Staff Contact: Prof B Fox
CP120 F
Prerequisite: Superior performance in 360CP of appropriate program (6861 to 6868), including all core requirements except for honours project.

Combination of research project and thesis with course work approved by Program Adviser.

Food Science and Technology

FOOD1100
Food in Society
Staff Contact: Dr JE Paton
CP7.5 S2 L2

Note/s: Excluded GENA6201, GENB6001. Interactive discussion sessions held during lectures.

Introduction to principles of food production and consumption. Food in history, society, economics and politics. Development of the food industry into one of the largest industry sectors in Australia; nutritional, physiological and psychological roles of food; role of microbiology, biotechnology and technology in safe, nutritious, innovative food processing. Topical issues discussed include: food irradiation, risk or benefit?; genetic engineering and biotechnology - 'new' food sources; food additives, necessity or evil?; environmental impact of food processing; food choices and prejudices and food marketing and education - who should the consumer believe?
FOOD1220
Professional Skills
Staff Contact: Dr JM Cox
CP15 S3 L3
Prerequisite: MATH1021 or MATH1231 or MATH1241
This subject will introduce and provide practical opportunities to develop generic skills in oral and written communication required by students in their career within and beyond the University environment. Topics to be covered include: thought processes; formal presentations; academic argument/debate; writing of reports; public communication; anatomy, search and critique of scientific literature; working in teams; time and project management; experimental design. In addition, the subject provides a program of statistics relevant to experimental design and data analysis, taught by the School of Mathematics. Topics include populations, sampling, normal distribution, scientific measurement, errors and error propagation, t- and F-tests, one and two-way analyses of variance, replication, interaction, simple and multiple linear regression. These techniques will be applied in assignments and computer exercises.

FOOD1400
Project
Staff Contact: A/Prof M Wootton
CP40 F T8
Prerequisite: Completion of Year 3 subjects
Note/s: Restricted to course 3060
The student undertakes an individual project involving a literature survey, an experimental investigation, the preparation of a detailed report on a selected topic in food science and technology, and presentation of seminars on a literature review and experimental results.

FOOD1410
Field Excursions
Staff Contact: Prof KA Buckle
CP7.5 S1 T3
Prerequisite: Completion of Year 3 subjects
Note/s: Restricted to course 3060
Inspection of food processing plants, growing areas and research stations in the Sydney metropolitan area, New South Wales and interstate.

FOOD1360
Food Processing Principles
Staff Contact: Dr RH Driscoll, Prof KA Buckle
CP15 S1 L4 T2
This subject is presented as a series of lectures and some discussion groups that cover methods of preservation and processing used in the food industry. Preservation principles and technologies covered include heating, chilling, freezing, dehydration, salt, sugar, acids, chemical preservatives, ionising radiations and novel methods. Basic principles of processing covered are mass and energy balances, heat transfer, fluid flow. Methods of processing include refrigeration, evaporation, dehydration, fermentation, extrusion, chemical and physical separation, and particle size reduction. The subject is run in conjunction with a laboratory subject (FOOD1370) designed to demonstrate key principles in a practical context.

FOOD1370
Food Processing Laboratory
Staff Contact: Dr JE Paton
CP15 S1 T6
Corequisite: FOOD1360
This subject is presented as a series of laboratory, pilot plant, and tutorial classes that demonstrate in a practical context the basic principles of food preservation and food processing. It runs concurrently with FOOD1360 Food Processing Principles. Concepts covered include, use of preservatives, food freezing, dehydration, refrigeration, heat processing, heat transfer and fluid flow.

FOOD1380
Food Processing and Packaging
Staff Contact: Dr RH Driscoll, Dr JE Paton
CP15 S2 L3 T3
Prerequisites: FOOD1360 and FOOD1370
This subject is presented as an integrated lecture-laboratory program that covers production principles of a number of primary food commodities including dairy, marine and meat products, fruit and vegetables, sugars and cereal products. The laboratory component demonstrates the effect of processing on aspects of food such as functionality and quality. In addition aspects of plant design such as factory layout, hygienic design and operation, cleaning in-place and application and comparison of HACCP and HAZOP and introduction to new technologies such as high pressure processing and ohmic heating are covered.
This subject also provides fundamental principles of packaging including properties of packaging materials, selection and evaluation of packaging materials and systems.

FOOD1390
Product Design and Development
Staff Contact: A/Prof M Wootton, Dr JE Paton
CP15 S2 L3 T3
Prerequisite: CHEM2021/CHEM2921, FOOD1360, FOOD1370
Corequisite: FOOD1380
This subject provides a series of lecture and laboratory classes that cover the basic theoretical and practical concepts associated with the design and development of new food products and processes. The product development process: the need for new products, types of new products, the development team, idea generation, steps in the product development process; the role and specific tasks of market research, market research techniques, target markets, limitations of market research. Roles of advertising and supermarkets in new product success; product lifecycles, reasons for new product failure and preventative strategies. Ingredient and additive behaviour and contributions in foods: properties of the major food components in relation to food properties, storage stability and nutritional properties of foods. Impact of new technology. Sensory analysis: basic sensory
analysis techniques, expert vs consumer panels, interpretation and implementation of sensory testing data, sensory rankings from different target markets.

FOOD1470
Postharvest Technology of Foods
Staff Contact: Dr JE Paton
CP15 S1 L2 T4
Prerequisite: FOOD1350

FOOD1490
Advanced Food Chemistry
Staff Contact: A/Prof M Wootton
CP15 S2 L3 T3
Prerequisite: CHEM3801
Chemistry and analysis of food flavours. Measurement, fractionation and structural determination of proteins, starch and its derivatives, non-starch polysaccharides, dietary fibre constituents and lipids. Detection and measurement of mycotoxins. Analysis of selected vitamins. Application of advanced separation techniques to food components.

FOOD2320
Food Microbiology
Staff Contact: Prof GH Fleet
CP15 S1 L3 T3
Prerequisite: MICR2201
This is a lecture-laboratory subject that introduces the basic concepts of food microbiology, covering the ecology, biochemistry, isolation, enumeration and identification of bacteria, yeasts, fungi and viruses associated with foods and beverages. Food spoilage: specific food microorganism associations; taxonomy and biochemistry of major spoilage species; chemical and physical changes to food properties; spoilage of specific commodities. Foodborne microbial disease: foods as vectors of disease and food poisoning; statistics and epidemiology; ecology and taxonomy of foodborne pathogenic microorganisms; control and prevention by hygiene, microbiological standards and legislation. Food fermentation: microbial ecology and biochemistry of fermentations; fermentations of alcoholic beverages, bakery products, dairy products, meats, vegetables, cocoa beans, soy sauce; production of food ingredients and processing aids by fermentation. Microbiological examination of foods: sample preparation and sampling plans; sublethal injury; standard methods for determination of total plate counts, indicator organisms, foodborne pathogenic species, principal spoilage species. Microbiological quality assurance: specifications and standards; decision criteria; hazard analysis and critical control point (HACCP) concept; cleaning and sanitation.

FOOD2330
Quality Assurance and Control
Staff Contact: Dr JM Cox
CP15 S2 L4 T2
This subject aims to provide students with a knowledge base of concepts in quality assurance (QA) and quality control (QC) in the context of the food industry. What are quality, QA, QC? Organisation-wide quality management, quality costs, Total Quality Management and ISO9000-based Quality Management Systems. Tools in quality management, brainstorming and other qualitative tools, benchmarking. Production-level QA and QC, HACCP, risk analysis and management, statistical quality/process control, sampling and sampling plans, cleaning and sanitation. QA in the laboratory, accreditation, metrology, proficiency testing. Regulatory aspects of QA/QC. Auditing quality. Staff training.

FOOD2340
Food Safety
Staff Contact: Prof GH Fleet, Prof KA Buckle
CP15 S2 L4 T2
This subject presents a package of information and exercises designed to demonstrate (i) the public health risk associated with the production and consumption of foods and (ii) the strategies adopted by industry, government and consumers to manage and control these risks. Topics covered include: chemical risks — natural, additives and residues; microbiological risks — bacterial, fungal, viral, algal, parasites, prions; nutrition — diet and health; genetically modified foods — concepts and specific safety issues; management of food safety by industry — TQM, HACCP, ISO; management of food safety by government — food law, national and international regulation and issues; legal and insurance issues; consumer concerns — education, social, moral and ethical issues.

FOOD2480
Advanced Food Microbiology
Staff Contact: Prof GH Fleet
CP15 S2 L4 T2
Prerequisite: FOOD2320 or equivalent
This subject consists of a series of lectures, discussion groups and visits to local food companies that takes food microbiology from its basic concepts to advanced consideration of current issues on food spoilage, foodborne microbial disease, food and beverage fermentations and the use of microorganisms as processing aids and sources of food ingredients and additives. With a focus on commodity groups it considers industry structure, food properties and processing operations that impact on the growth, survival and biochemical activity of microorganisms as they relate to spoilage, safety and desirable fermentations. Commodities considered include dairy products, fruit and vegetables, meat products (red meats, poultry, seafoods) and alcoholic beverages. Advanced concepts of microbial taxonomy, biochemistry, physiology, detection and enumeration are covered as well as the use of microorganisms as sources of colours, flavours,
polysaccharides, vitamins, amino acids and as probiotic and biocontrol agents.

FOOD2490
Analytical Microbiology
Staff Contact: Dr JM Cox
CP15 S2 L2 T4
Prerequisite: FOOD2320 or equivalent
The aim of this subject is to provide students with an understanding of the underlying principles of and practical exposure to modern and rapid methods for microbiological analysis, with specific reference to foods. The subject begins with a history of the development of methods of analysis and criteria for the evaluation of methods. Methods considered include improved and advanced cultural methods, automated biochemical identification systems, ATP and lux bioluminescence, methods for assessing hygiene, ice nucleation, impedance technology, immunoassay, electrophoretic and chromatographic techniques for strain characterisation and identification, nucleic acid probes, PCR and 'genechip' technology.

FOOD3220
Nutrition
Staff Contact: Dr J Arcot
CP15 S2 L4 T2
Prerequisite: BIOC2101/2181
This subject consists of a series of lectures and practical exercises that provide students with knowledge about the occurrence of nutrients in foods and their role in human physiology, health and disease. Structure, properties and sources of nutrients. Role of nutrients in human structure and function. Introduction to food groups, tables of food composition, food labels, dietary recommendations. Food guides. Nutrition in health and disease. Nutritional needs of vulnerable groups: infants, pregnant and lactating women, the aged. Dietary intolerance, disorders related to the affluent diet including coronary heart disease, dental caries, diabetes, hypertension and cancer. Problems of undernutrition including protein, energy, mineral and vitamin deficiencies. Physiological and nutritional aspects of dietary fibre, alcohol. Assessment of nutritional status using dietary and anthropometric techniques. Practical exercises on anthropometric techniques and measurement of nutrient intake using computer systems on individual and group basis.

FOOD3440
Advanced Nutrition
Staff Contact: Dr J Arcot
CP15 S1 L4 T2
Prerequisite: FOOD3220 or equivalent
This subject consists of lecture and discussion classes that build on the basic concepts of nutrition with respect to the food supply, giving advanced treatment of the following topics. Food and nutrition policy: structure of the population. Food supplies, food consumption, nutritional epidemiology. Population dietary references. Food programs such as food fortification, supplementary feeding schemes, nutritional rehabilitation, nutritionally modified foods, nutritional regulations and standards, nutrition education, dietary and nutrition interventions (ORT, family planning, infection control, growth monitoring). Principles, practice and evaluation of applied nutrition programs. Advanced assessment methods in nutrition: nutrient bioavailability studies, nitrogen balance tests, vitamin load tests, sodium and potassium excretion, creatinine excretion, fitness assessment, biochemical assessment, design and evaluation of nutritional epidemiology studies, food intake studies.

FOOD4450
Advanced Food Processing
Staff Contact: Dr RH Driscoll, Prof KA Buckle
CP15 S1 L4 T2
This subject consists of lectures and discussion groups covering advanced aspects of modern food processing and preservation. This includes food bulk and thermal properties, rheological properties and models of heat transfer (analytical, graphical and numerical methods, computer packages, microwave, infrared, and radio frequency irradiation), process modelling and control, dehydration, evaporation and distillation.

FOOD9410
Honours Research Project
Staff Contact: Dr JM Cox
CP100 S3
Note/s: Restricted to course 3065
An extensive research project on some aspects of food science and technology, including preparation of a literature review, conduct of laboratory-based research, presentation of two seminars, and submission of a thesis based on the results of the research project. Candidates will undertake corequisite formal coursework as approved by the Head of Department.

FOOD9420
Food Science and Technology (Honours)
Staff Contact: Prof KA Buckle, Prof GH Fleet
CP120 F
Prerequisite: Completion of Program 3800 including Level III subjects totalling 120CP
Advanced training in selected areas of Food Science and Technology: a formal component consisting of lectures, seminars, tutorials and written assignments plus a supervised research program in a specified area of food science and technology.
Students intending to do this program should consult with the Department about selection of subjects in earlier years.
School of Geography

Geography Level I

GEOG1601
Global Development, Economy and Environment in Australia

Staff Contact: A/Prof I Burnley, Mr K. Dunn, Dr B Parolin, Dr M Sant, Ms B Scott

CP15 S1 L3 T3

Note/s: Excluded GEOG1621, GEOG1062, GEOG1064

GEOG1701
Environmental Systems and Analysis

Staff Contact: Mr D Edwards, A/Prof M Melville, Dr S Mooney

CP15 S2 L3 T3

Note/s: Excluded GEOG1721, GEOG1031, GEOG1073

An introduction to the role of environmental processes in shaping the patterns of the physical environment. The operation of global environmental systems. Emphasis on the interaction of humans with their environment and the causes of environmental crises. Topics include water resources, circulation of the atmosphere and oceans, weather and climate, the formation of the Earth, fluvial and coastal landforms, land degradation, the biosphere and ecosystems, Australian biotic patterns, human impact on natural systems. Instruction is given on methods used to analyse climatic patterns and climate change, soils and landform relationships, vegetation patterns, land degradation, and human impacts on the environment.

GEOG1801
Spatial Information Technologies

Staff Contact: Dr R Lucas

CP15 S2 L3 T3

Introduction to spatial data presentation, exploration, analysis and understanding in Geography. Mapping skills and imaging tools for the communication of information. Computer-based tools for imaging and analysing social and environmental data, principles of geographical information systems (GIS), data visualisation, remote sensing and airphoto interpretation. Introduction to Excel, ARCVIEW, and other software packages.

Geography Level II

GEOG2001
Field Techniques

Staff Contact: Mr K Dunn, Mr D Edwards

CP15 S2 L1 T3

Prerequisite: 30 Level 1 CP of Geography

Note/s: Subject only available to BSc Applied Geography (3010) students. Excluded GEOG2000, GEOG2052.

An introduction to the field techniques used in geography. Usually composed of a five day field trip in the mid-year recess. Field methods and skills in both physical and human geography. Workshops in report writing, critical analysis, and research practice.

GEOG2101
Geographical Data Analysis, I

Staff Contact: Mr S Filan, Mr D Edwards

CP15 S1 L2 T2

Prerequisite: 30 Level 1 CP of Geography

Note/s: Excluded GEOG2013

The exploration, description, understanding and presentation of data used within the sub-fields of geography. Subject matter is taught in a contextual and applied manner, with a specific focus on problem solving. Introduction to hypothesis testing and sampling in geography. Computing literacy for human and physical geographers. Includes the use of the SPSS and Excel software packages.

GEOG2611
The Australian City

Staff Contact: A/Prof I Burnley, Mr K Dunn, Ms B Scott

CP15 S1 L2 T2

Prerequisites: GEOG1601 or GEOG1621 or GEOG1062 or GEOG1064

Note/s: Excluded GEOG2092

Explanations for social and economic change in Australia's cities. Issues of planning and social policy in cities like Sydney. Outlines both traditional and contemporary perspectives on the city. A comparison of theories of urbanisation, urban-based conflict and social well-being in the city. Examines the origin of contemporary urban social theory.

GEOG2621
Regions, Resources and Spatial Systems

Staff Contact: Dr B Parolin

CP15 S2 L2 T2

Prerequisites: GEOG1601 or GEOG1621 or GEOG1062 or GEOG1064

Note/s: Excluded GEOG2061 and GEOG3192

This subject introduces students to basic concepts and theories in economic geography. These will include theories of location and regional development, spatial interaction, uneven development, and structural change. Subject will focus on economic and regional problems in Australia. Computer-based workshops will be used to develop practical skills in regional and spatial analysis.
GEOG2711
Australian Climate and Vegetation
Staff Contact: A/Prof M Fox, Dr S Mooney
CP15 S2 L2 T2
Prerequisites: GEOG1701 or GEOG1721 or GEOG1031 or GEOG1073
Note/s: Excluded GEOG2025 and GEOG3062
Characteristics of the Australian climatic region. The nature of climate change with particular emphasis on the Quaternary. The development of a distinct Australian biogeography. Patterns and processes in the distribution of Australian vegetation types. Classification, ordination and mapping of vegetation.

GEOG2721
Soils and Landforms
Staff Contact: A/Prof M Melville, Mr J Sammut
CP15 S1 L2 T2
Prerequisites: GEOG1701 or GEOG1721 or GEOG1031 or GEOG1073
Note/s: Excluded GEOG2051, GEOG3011 and GEOG3025
The physical and chemical properties of soil, and the processes and factors of soil formation. Soil classification schemes. The relationship between soils and the landforms on which they form. The evolution of landforms in fluvial, arid and coastal environments. Emphasising current processes and Quaternary history.

GEOG2811
Introduction to Remote Sensing
Staff Contact: Dr R Lucas
CP15 S1 L2 T2
Note/s: Excluded GEOG2021
Principles of remote sensing for environmental sciences. Different types of image-based remote sensing are covered with a focus on earth-resource imagery used for environmental and urban mapping. Topics include photography, photogrammetry, image interpretation, satellite-based sensors, digital imagery, thermal imaging and radar.

GEOG2821
Introduction to Geographic Information Systems
Staff Contact: Mr A Evans
CP15 S1 L2 T2
Note/s: Excluded GEOG3122, GEOG3123 and GEOG3142.
An introduction to Geographic Information Systems (GIS). Emphasis on raster-based GIS for resource mapping and case study evaluation. Topics include cartographic output and mapping, spatial statistics and various raster analysis techniques such as overlay analysis.

Geography Level III
GEOG3025
Geomorphology
Staff Contact: To Be Advised
CP15 S2 L2 T2
Prerequisites: GEOG2051 or GEOG2721
Note/s: Excluded GEOG2021
Drainage basin processes including: weathering, the production of runoff and sediment, sediment tracing, sediment budgets and denudation histories. Coastal and lake landforms, morphometrics and liminological processes. There will be an emphasis on the application of geomorphic principles to land management.

GEOG3122
Geographic Information Systems
Staff Contact: Mr S Filan
CP15 S2 L2 T2
Prerequisite: Successful completion of at least one year of program 3978.0600 Computer Science or program 3979.1400 Information Systems, or by permission from the Head of School.
Note/s: Enrolments in this subject are constrained by availability of laboratory facilities. All enrolments must be approved by the Head, School of Geography, or representative.
An introduction to geographic information systems with special reference to computer-based systems for resource evaluation. Case study evaluation, application of the MAP and other GIS software.

GEOG3311
Professional Geography
Staff Contact: A/Prof M Melville
CP15 S2 L1 T3
Prerequisite: Successful completion of a Year 2 program in Science, Arts or Social Science.
Note/s: This subject is available only to students who will be completing a pass degree with a major in Geography.
Seminars with practitioners in the fields of urban, regional and environmental studies. Project management (consultancy work, government projects, preparation of proposals, grant capture, justification of budgets). Career planning and applying for positions.

GEOG3411
Special Topic
Staff Contact: A/Prof I Burnley
CP15 F T4
Note/s: Excluded GEOG3333
Admission by permission to suitable students with good passes in at least four subjects at Upper Level. Individually supervised reading and assignments as an approved topic in Geography not otherwise offered.
GEOG3611  
Surveys and Interviewing in Geography  
Staff Contact: A/Prof I Burnley, Mr K Dunn  
CP15 S1 L2 T2  
Prerequisites: GEOG1062 or GEOG1064 or GEOG1601 or GEOG1621  
Note/s: Excluded GEOG3101  
An introduction to sample surveys and interview techniques. Construction of questionnaires and interview guides. Census data collection. The collection, assembly, analysis (NUD.IST) and presentation of qualitative data.

GEOG3621  
Place and the Politics of Identity  
Staff Contact: Mr K Dunn, Ms B Scott  
CP15 S1 L2 T2  
Prerequisites: GEOG2092 or GEOG2611 or SOCA2703 or SOCA2106  
Note/s: Excluded GEOG3166. Offered in S1 only in 1999, S2 in 2000.  
Issues of place, identity, territory and representation. Case studies cover a range of axes of difference including religion, place, gender, sexuality, nationalism and popular culture. Key theories of identity. Creative and official representations of places and of peoples. The deployment and representation of cultural difference.

GEOG3631  
Population Geography  
Staff Contact: A/Prof I Burniey, Ms B Scott  
CP15 S2 L2 T2  
Prerequisites: GEOG1062 or GEOG1064 or GEOG1601 or GEOG1621  
Note/s: Excluded GEOG3172, ENVS2010  
The geographical aspects of population change in an economic, social and environmental context. Contemporary and future trends in World population growth and population trends in Australia. Attention to fertility, mortality, migration, ageing and inequalities in well being. Reference to investigations at different scales.

GEOG3671  
Transport and Land Use  
Staff Contact: Dr B Parolin  
CP15 S1 L2 T2  
Prerequisites: GEOG2092 or GEOG2621 or GEOG2611 or PLAN1101  
Note/s: Excluded GEOG3062, GEOG3181, ENVS2020  
Introduction to the complex interactions between transport, land use, and the environment in urban areas. Special focus on the long term environmental consequences of transport decisions. Introduction to the various methods used to analyse and predict the consequences of policy changes. Australian cities as case studies.

GEOG3711  
Biogeography  
Staff Contact: Dr S Mooney, A/Prof M Fox  
CP15 S2 L2 T2  
Prerequisites: GEOG2711, or two of BIOS1101, BIOS1201, BIOS1301  
Note/s: Excluded GEOG2025  

GEOG3721  
Pedology  
Staff Contact: A/Prof M Melville  
CP15 S1 L2 T2  
Prerequisites: GEOG2721, or both BIOS1101 & BIOS1201, or both GEOL1101 & GEOL1201, or both GEOL1111 & GEOL1211  
Note/s: Excluded GEOG3011  
Soil physical and chemical properties and their interrelationships. Clay mineral structure and behaviour, soil solution chemistry, soil water movement. Soil properties in natural, rural, urban landscapes. Assessment of soil fertility, swelling, dispersibility, erodibility and aggregate stability. Laboratory analysis with emphasis on properties associated with land capability assessment.

GEOG3761  
Environmental Change  
Staff Contact: Dr S Mooney  
CP15 S2 L2 T2  
Prerequisites: Successful completion of a Year 2 Program in Applied Science, Science, or Arts and Social Sciences or equivalent as approved by the Head of School  
Note/s: Excluded GEOG3062  

GEOG3811  
Remote Sensing Applications and Digital Image Analysis  
Staff Contact: Dr R Lucas  
CP15 S2 L2 T2  
Prerequisites: GEOG2811 or GEOG2021  
Note/s: Excluded GEOG3032  
Computer-based techniques for digital image interpretation and display. Focus on earth-resource imagery used for environmental and urban mapping. Laboratory work using practical techniques used for a wide range of applications. Topics include colour imagery, image enhancement, geometric correction, mapping and classification, and spectral data processing.
GEOG3821
Geographic Information Systems Applications
Staff Contact: Dr R Lucas
CP15 S2 L2 T2
Prerequisites: GEOG2821 or GEOG3122 or GEOG3123
Notes: Excluded GEOG3142

Emphasis on vector-based GIS for resource and environmental management and urban and regional analysis. Topics include spatial data bases, data attributes, networks, spatial data analysis and modelling and data visualisation with application-orientated laboratories.

GEOG3861
Computer Mapping
Staff Contact: Mr S Filan
CP15 S1 L2 T2
Prerequisites: GEOG1801 or GEOG2811 or GEOG2822 or GEOG3123 or successful completion of a Year 2 Program in Arts and Social Science, Applied Science or Science.
Notes: Excluded GEOG3161

Introduction to theoretical and practical problems in displaying data graphically and constructing thematic maps by computer using the Maplnfo desktop mapping package. The emphasis is on developing skills in automated cartography through hands-on experience culminating in the preparation of a folio of maps of selected census data. No previous computing expertise is required.

GEOG3901
Australian Natural Resources
Staff Contact: Dr D Eldridge, Dr M Sant
CP15 S1 L2 T2
Prerequisites: GEOG1601 or GEOG1621, and either GEOG1701 or GEOG1721
Notes: Excluded GEOG3000

The problems of exploiting Australia’s biological, water and land resources. A synthesis of human and physical geography. Land degradation. Habitat loss and fragmentation. Introduction to environmental auditing, state-of-the-environment reporting, and policy changes. Field and analytical techniques applicable to resource management.

GEOG3911
Environmental Impact Assessment
Staff Contact: Mr J Sammut
CP15 S1 L2 T2
Prerequisites: 30 credit points of Level II Geography or by permission of Head of School.
Notes: Excluded GEOG3042

GEOG3921
Coastal Resource Management
Staff Contact: Mr D Edwards, Prof B Thom
CP15 S2 L2 T2
Prerequisites: GEOG3901 and GEOG2721

GEOG3931
Recreation, Tourism and Resource Management
Staff Contact: Dr M Sant
CP15 S1 L2 T2
Prerequisites: GEOG2621

Geography Level IV

GEOG4010
Field Project 4
Staff Contact: Dr M Sant
CP20 S2 T6
Notes: Subject only available to BSc Applied Geography (3010) students.

Develop skills in problem formulation and team-based field work. Preparation and presentation of professional quality reports of applied geographical analysis. Define problem, plan strategy for appropriate investigation. Conduct field studies, and report results of investigation. Field work of five days is compulsory. Students will incur some personal expenses in connection with this subject.

GEOG4031
Project
Staff Contact: Dr B Parolin
CP40 F T8
Notes: Subject only available to BSc Applied Geography (3010) students.

The deadline for submission of project reports is the end of Week 9 of Session 2.

Independent and original research project. Formulation under the direction of a supervisor; preparation of a project report.

GEOG4042
Practical Applications in Geography
Staff Contact: A/Prof M Melville
CP10 S2 T4
Notes: Subject only available to BSc Applied Geography (3010) students.

Seminars with practitioners in the fields of urban and regional analysis and environmental studies including environmental impact statements; research proposals, report writing, the roles of government agencies and consultants; and budgeting for research projects; applying for positions and personal skills development.
GEOG4052
Advanced Spatial Analysis
Staff Contact: Dr B Parolin
CP15 S1 L2 T2
Note/s: Subject only available to BSc Applied Geography (3010) students.
Selected topics in economic and physical geography chosen to illustrate developments at the frontiers of research in spatial analysis.

GEOG4062
Advanced Environmental Analysis
Staff Contact: A/Prof M Melville
CP15 S1 L2 T2
Note/s: Subject only available to BSc Applied Geography (3010) students.
Selected topics in the study of human and physical environments, chosen to illustrate contemporary frontiers of research and development in environmental studies.

GEOG4310
River Management
Staff Contact: A/Prof I Burnley
CP15 S2 L2 T2
Prerequisites: Completion of stage 3 of a four year degree program.
Note/s: Contact hours include some fieldwork which forms a compulsory part of this subject. Students will incur some personal costs for fieldwork. This subject may not be offered in 1999.

The principles of river management including total or integrated catchment management, environmental impact assessment, in-stream uses and hydrogeomorphic behaviour. Issues covered include regulated rivers, inter-basin diversion, extractive industries, urbanisation, river engineering, legislative controls and institutional responsibilities. The course develops an understanding of how and why rivers respond to human activities and ways of ameliorating negative impacts. Field work is an essential part of the subject and the Nepean River will be used as a case study of management problems.

GEOG4320
Soil Degradation and Conservation
Staff Contact: A/Prof M Melville
CP15 S2 L2 T2
Prerequisites: Completion of Stage 3 of a four-year degree program.
Note/s: Contact hour include some fieldwork which forms a compulsory part of this subject. Students will incur some personal costs for fieldwork.

Identification, assessment and analysis of the main process of soil degradation, including the role of climate, vegetation, geomorphology and pedology in controlling the processes. Discussions of appropriate management strategies for reducing degradation for reclaiming grade landscapes. Topics include: surface wash, gully erosion, wind erosion, soil acidification soil structure decline, salinisation, accumulation of toxins and desertification.

GEOG4414/GEOG4418
Honours Geography
Staff Contact: Mr S Filan
CP60/120
Prerequisites: Science students have completed program 2527, 2700 or 6851, including Level III subjects totalling 120 Credit Points and must have completed either GEOG2013 or GEOG2101. A minimum cumulative average at Credit level is required for all Upper Level subjects taken.
Note/s: Excluded GEOG4050 and GEOG4100

Students are required: 1. To undertake an original piece of work extending throughout the year and to submit a thesis based upon it. 2. To participate in seminars and fieldwork as notified by the School of Geography. Seminars include workshops on professional practice in geography and ethical issues in research.

GEOG4911
Vegetation Management
Staff Contact: A/Prof M Fox
CP15 S1 L2 T2
Prerequisites: GEOG3901 and GEOG2711
Note/s: Excluded GEOG4300.

Geology

Field tutorials are an essential part of some of these subjects, and are held during weekends and/or recesses. Dates and costs are available during the first week of the subject. Attendance is compulsory.

Applied Geology Level I

GEOL1111
Earth Systems and Dynamics
Staff Contact: Dr MD Buck
CP15 S1 L3 T3
Note/s: Excluded GEOL1101. Two days of fieldwork is a compulsory part of this subject and students will incur personal costs. Details will be provided in the first week of the subject.

GEOL1211
Earth Environments and Resources
Staff Contact: Dr DR Cohen
CP15 S2 L3 T3
Note/s: Excluded GEOL1201. Three days of fieldwork is a compulsory part of this subject and students will incur personal costs. Details will be provided during the first week of the subject.

Applied Geology Level II

GEOL2100
Field Studies: Sedimentology and Palaeoecology
Staff Contact: Dr MD Buck
CP7.5 S1 T3
Prerequisites: GEOL1111/1101 or GEOL1211/1201, GEOL2120
Note/s: Excluded GEOL2031. Geological fieldwork up to four days in total is an essential part of this subject. Students may incur personal costs.

Geological studies of present-day sediments, fossils and sedimentary rock strata in selected coastal and inland locations, with supporting on-campus tutorials, to illustrate features imparted by different depositional environments; introduction to geological data gathering and field measurement techniques applicable to sedimentary successions, and to regional integration of such data in palaeogeographic interpretations.

GEOL 2110
Mineralogy
Staff Contact: A/Prof BJ Hensen
CP7.5 S1 L2 T1
Prerequisites: GEOL1111/1101 or GEOL1211/1201
Note/s: Excluded GEOL2011, GEOL7223

Principles of optical crystallography and the use of the polarising microscope to identify minerals and rocks. Rock-forming minerals: physical properties in hand specimen and under the microscope, crystal chemistry, stability and occurrence.

GEOL2120
Sedimentary Environments and Processes
Staff Contact: Dr MD Buck
CP7.5 S1 L2 T1
Prerequisites: GEOL1111/1101 or GEOL1211/1201
Note/s: Excluded GEOL2031, GEOL7233, GEOL7321, GEOL8220

Mechanisms of sediment transport and deposition; nature and origin of depositional structures. Analysis of depositional environments including: fluvial deposits; deltaic and estuarine deposits, marine sediments including shoreline, shelf and deep sea, carbonate and reef deposits; lacustrine deposits; glacial and desert sediments; and volcaniclastic sediments. Sedimentary facies and facies successions; introduction to sequence stratigraphy. Practicals in sediment analysis, drill core studies, sedimentary strata interpretation, and stratigraphic techniques.

GEOL2131
Geomapping 1
Staff contacts Mr GH McNally, A/Prof AD Albani, Dr DR Cohen, Mr D Palmer, A/Prof GR Taylor
CP15 S1 L2 T3
Note/s: Excluded GEOL2062, GEOL8380. Fieldwork of up to 2 days is a compulsory part of this subject for which students may incur personal costs. Details are provided during the first week of the subject.

GEOL2170
Earth Structures 1
Staff Contact: Dr PG Lennox
CP7.5 S1 L2 T1
Prerequisites: GEOL1111/1101 or GEOL1211/1201
Note/s: Excluded GEOL2022

Interpretation of geological structures observed at outcrop scale within the context of the geological history of an area. Understanding brittle and some ductile structures using stereographic projection techniques, including use of computer methods. Application of the techniques in practical field situations.

GEOL 2180
Introduction to Igneous and Metamorphic Rocks
Staff Contact: A/Prof BJ Hensen
CP7.5 S1 L2 T1
Prerequisites: GEOL1111/1101 or GEOL1211/1201
Corequisite: GEOL2110
Note/s: Excluded GEOL2011, GEOL2022, GEOL8201

Occurrence, classification and origin of igneous and metamorphic rocks.

Igneous differentiation, fractional crystallisation and geochemical evolution of magmas. Magma types and their plate tectonic settings. Prograde and retrograde metamorphism. Types of metamorphic reactions. Isochemical metamorphism and hydrothermal alteration (metasomatism). Thermal and deformation histories of
metamorphic belts. Practical: Macroscopic and microscopic examination of rocks of igneous and metamorphic origin in hand specimen and thin section.

GEOL2200
Field studies: Petrology, Structure and Field mapping
Staff Contact: A/Prof BJ Hensen
CP7.5 S2 T3
Prerequisites: GEOL1111/1101 or GEOL1211/1201, GEOL2170 and GEOL2180

GEOL2220
Sedimentary Rocks and Clay Minerals
Staff Contact: A/Prof CR Ward
CP7.5 S2 L2 T1
Prerequisite: GEOL2110
Note/s: Excluded GEOL2022, GEOL7223
Sedimentary Petrology: Textures and composition of sandstones, limestones, tuffs, phosphorites, cherts, evaporites and other sedimentary rocks; chemical, physical and biological processes, before, during and after sediment deposition; microscopic and other studies of sedimentary materials. Clay Mineralogy: Crystal structure, composition and properties of the clay minerals; X-ray diffraction and other methods of clay analysis; clay-water systems, ion exchange, flocculation and dispersion; role of chemical weathering, transport and diagenesis in the formation and distribution of clay minerals; economic uses of clays and related materials.

Applied Geology Level II/III

GEOL2231
Environmental Geophysics
Staff Contact: Mr D Palmer
CP15 S2 L2 T4
Prerequisite: none
Note/s: Excluded GEOL2051, GEOL6221. Fieldwork up to 5 days is a compulsory part of this subject, and it is usually carried out on and near the UNSW campus. Students may incur personal costs. Details are provided in the first week of the subject.
An introduction to the theory of geophysical methods with an emphasis on the near surface applications to environmental and urban studies, as well as the related areas of groundwater and geotechnical investigations. The methods covered include gravity, magnetics, electrical, seismic and radar. The course content and presentation are also designed to accommodate those students with interests in environmental subjects but not necessarily with strong backgrounds in mathematics or physics.

GEOL2250
Surficial and Coastal Geology
Staff Contacts: Mr GH McNally, A/Prof AD Albani
CP7.5 S2 L2 T1
Prerequisites: GEOL1111/1101 or GEOL1211/1201, GEOL2110
Note/s: Excluded GEOL2072, GEOL6311

GEOL2260
Geomapping 2
Staff Contact: A/Prof GR Taylor, A/Prof AD Albani, Mr D Palmer, Dr DR Cohen
CP7.5 S2 L1 T2
Prerequisite: GEOL2131 or equivalent as approved by the Subject Authority.

GEOL2290
Groundwater Hydrology
Staff Contact: Dr J Jankowski
CP7.5 S2 L2 T1
Note/s: Excluded GEOL2072. Fieldwork of 1 day is a compulsory part of this subject for which students may incur personal costs. Details are provided during the first week of the session.
The hydrologic cycle; saturated and unsaturated zones; porosity and permeability; water table; flow; unconfined and confined aquifers; geological activity of groundwater; thermal springs and geysers; alteration of groundwater systems; drilling methods; well design and completion; coastal aquifers; karst and carbonate terrain; saline environments; sedimentary, fractured, multilayered and crystalline aquifers; groundwater chemistry – chemical reactions and processes; contamination and water quality; types and sources of contamination; geotechnical problems; flow system a microbial population; resources – development, exploration and management; modelling; groundwater and economic mineralisation; groundwater in Australia – principal hydrogeological divisions; environmental problems and resources.
Applied Geology Level III

GEOL3101
Ore Deposits
Staff Contact: Dr AC Dunlop
CP15 S1 L3 T2
Prerequisite: GEOL2180 or alternative as approved by Subject Authority
Geological setting, characteristics and genesis of the major categories of metallic and non-metallic ore deposits. Laboratory study of hand specimens, thin sections and polished sections from these deposit types.

GEOL3110
Igneous and Metamorphic Processes
Staff Contact: A/Prof BJ Hensen
CP7.5 S1 L2 T1
Prerequisites: GEOL2180 or GEOL2022
Note/s: Excluded GEOL2031
The genesis of silicate melts: partial melting in the crust and upper mantle of the earth. The use of major and trace elements, and radiogenic and stable isotopes, in the study of fractionation processes of magmas. The chemical evolution of the crust and upper mantle through geological time. Stability relations of mineral assemblages as a function of pressure, temperature and fluid activity. Geobarometry and thermometry. Static and dynamic metamorphism during orogenic processes. The role of fluids and deformation in metamorphic reactions. Practical: Case studies of igneous and metamorphic provinces.

GEOL3120
Stratigraphy and Palaeontology
Staff Contact: A/Prof CR Ward
CP7.5 S1 L2 T1
Prerequisites: GEOL1111/1101 or GEOL1211/1201
Note/s: Excluded GEOL3031
Classification of sedimentary basins; depositional systems; role of tectonics, sea-level and other changes in development of basin sequences; application of lithostratigraphic, biostratigraphic, chronostratigraphic and magneto-stratigraphic principles; introduction to sequence stratigraphy; provenance studies in sedimentary basins; morphology, evolution and use of key invertebrate fossil groups; geological development of Australian sedimentary basins and fold-belt sequences.

GEOL3131
Field Studies: Stratigraphy, Structure and Geological Mapping
Staff Contact: Dr AC Dunlop
CP15 S1 T6
Prerequisites: GEOL1111/1101 or GEOL1211/1201, GEOL2170 and GEOL3120
Note/s: Geological fieldwork of up to eight days duration is a compulsory part of this subject. Students may incur personal costs.

Field mapping in a selected area of mildly deformed sedimentary and volcanic rocks; practical use of geological mapping techniques; integration of stratigraphic, lithological, structural and palaeontological concepts.

GEOL3170
Earth Structures 2
Staff Contact: Dr PG Lennox
CP7.5 S1 L1 T2
Prerequisites: GEOL2170 or GEOL2022 or GEOL8121
Note/s: Excluded GEOL3082
Use of ductile and to a lesser extent brittle structures at outcrop scale to understand the geological history of simply to multiply deformed areas. Development of conceptual links between outcrop structures and terranes, blocks and tectonics.

GEOL3201
Field Studies: Ore Deposits, Structural and Metamorphic Geology
Staff Contact: Dr AC Dunlop
CP15 S2 T6
Prerequisite: GEOL3110 and GEOL3101 or alternative as approved by the Subject Authority
Note/s: Geological fieldwork of up to nine days duration is a compulsory part of this subject. Students will incur personal costs.

Geologic setting of different ore deposit types in central-west and far western New South Wales; application of geological techniques and principles to mineral exploration and mining; use of geological mapping techniques in a structurally-complex high-grade metamorphic terrane (Broken Hill Block); Quaternary processes and environmental geology in the arid zone.

GEOL3231
Exploration Geophysics
Staff Contact: Mr D Palmer
CP15 S2 L2 T4
Prerequisites: GEOL2051 or GEOL2231 or GEOL 6221
Note/s: Excluded GEOL3052; GEOL6330. Fieldwork up to 3 days is a compulsory part of this subject. Students may incur personal costs. Details are provided in the first week of the subject.

An intermediate course on geophysical methods with an emphasis on applications to mineral, petroleum and coal exploration. The subjects covered include data processing, gravity, magnetics, electrical, seismic reflection, DC electrical resistivity, induced polarisation, electromagnetics and geophysical well logging. Each method is described in terms of the fundamental principles, field techniques, processing and presentation of results and quantitative interpretation. Assignments include the use of industry standard software.

GEOL3241
Sedimentary Basin Resources
Staff Contact: A/Prof CR Ward
CP15 S2 L4 T2
Prerequisites: GEOL1111/1101 or GEOL1211/1201 or alternative as approved by Subject Authority
Note/s: Excluded GEOL3102. Fieldwork of up to 2 days is a compulsory part of this subject for which students will incur personal costs. Details are provided during the first week of the subject.
Coal Geology: Nature and properties of coal, including introduction to coal petrography; origin of coal seams and coal-bearing sequences; coalfield exploration and coal mining geology; geological factors in coal preparation and use. Petroleum Geology: Nature and properties of petroleum; petroleum generation, migration, entrapment and degradation processes; sedimentology of reservoir sequences; primary and secondary porosity; structural and stratigraphic traps, including diapirs and fractured-rock reservoirs; coal-bed methane, oil-shale and other non-conventional petroleum sources; exploration and evaluation of petroleum deposits. Basin Analysis: Data gathering from outcrop and subsurface; geological assessment of cores and cuttings; introduction to petrophysical well-logging; lithofacies and palaeocurrent analysis; palaeogeographic synthesis.

**GEOL3250**
Engineering and Environmental Geology

*Staff Contact: Mr GH McNally, Dr J Jankowski*

*CP7.5 S2 L2 T1*

*Prerequisites: GEOL111/1101 or GEOL1211/1201 or ENVS1101*

*Note/s: Excluded GEOL3072*

**GEOL3280**
Exploration and Environmental Geochemistry

*Staff Contact: Dr AC Dunlop*

*CP7.5 S2 L2 T1*

*Note/s: Excluded GEOL3092. Geological fieldwork of up to one day duration is a compulsory part of this subject. Students may incur personal costs. Distribution of metals in natural and urban environments. Primary and secondary dispersion of elements. Weathering and regolith development. Principles and techniques of vapour, water, soil, drainage sediments, rock and vegetation geochemistry as applied to mineral exploration and environmental assessments. Introduction to sampling, analytical techniques and design of exploration and environmental surveys. Principles of aqueous geochemistry and modelling. Contaminant dispersion. Case studies.*

**Applied Geology Level IV**

**GEOL4100**
Geological Communications

*Staff Contact: Mr GH McNally*

*CP7.5 S1 L1 T1*

Construction and preparation of reports, theses and scientific papers; library and database search techniques; critical reviewing of literature; citation of references; editing of report drafts and development of abstracts and conclusions; use of tables, figures and photographs; drafting and illustration techniques; verbal presentation of geological material to a large audience; computer graphics and desk-top publishing techniques; preparation of resumes; meeting procedures, minutes and chairmanship.

**GEOL4102**
Special Topics in Applied Geology

*Staff Contact: Dr PG Lennox*

*CP30 S1 L/T10*

*Note/s: Some fieldwork may be involved; students may need to meet personal costs. Instruction by lectures, tutorials and assignments in advanced aspects of geological science and its applications. Individual students will select four modules from a list prepared for each year by the Department. These modules will cover a number of specialised fields including mineral exploration, mine geology, sedimentary basin studies, geophysics, engineering and environmental geology, as well as fundamental geology topics. Some modules may be delivered at other universities through the Sydney Universities Consortium of Geology and Geophysics.*

**GEOL4130**
Interpretation of Geological Data

*Staff Contact: Dr DR Cohen*

*CP7.5 S1 L1 T1*

*Prerequisite: GEOL2131 or alternative as approved by Subject Authority*

**GEOL4140**
Project Management

*Staff Contact: Dr AC Dunlop*

*CP7.5 S1 L1 T1*

Organisation and costing of geological field programs; land tenure, exploration and mining titles, drilling programs, ore core logging; use of geological database and modelling systems; estimation of resources and reserves; liability and ethics in geological practice.

**GEOL4180**
Analysis of Natural Materials

*Staff Contact: Dr DR Cohen*

*CP7.5 S1 L1 T1*

Sampling strategies and methods in soil, rock and water analysis. Mineral separations and physical characterization. Techniques for total and selective extractions of metals and organics. Theory and practice of modern analytical methods for water, vegetation, soil, rocks and minerals,
including AAS, ICP, XRF, XRD, INAA, GC-MS and electron microprobe. Analytical quality control. Formulation and use of reference materials.

GEOL4204
Field Project
Staff Contact: Dr PG Lennox
CP60 S2 T20
Note/s: Geological fieldwork of up to six weeks duration may be required. Students may incur personal costs.
A major field and laboratory project, which may include geological mapping and interpretation of other geological data (possibly including satellite imagery, geophysical datasets, geochemical or geohydrological information). The project may involve aspects of resource development, engineering or environmental geology, regional geology and groundwater studies.

GEOL4203
Field Project (P/T)
Staff Contact: Dr PG Lennox
CP60 S2 T10 (Year 1); S2 T10 (Year 2)
Note/s: Geological fieldwork of up to six weeks duration may be required. Students may incur personal costs.
A major field and laboratory project spread over two sessions for part-time study, which may include geological mapping and interpretation of other geological data (possibly including satellite imagery, geophysical datasets, geochemical or geohydrological information). The project may involve aspects of resource development, engineering or environmental geology, regional geology and groundwater studies.

GEOL4303
Geology Honours
Staff Contact: Dr PG Lennox
CP120 F
Prerequisite: Completion of program 2500, 2503 or 2504, including Level III subjects totalling 120 Credit Points.
Note/s: An extensive field project is a compulsory part of this subject. Students will incur personal costs. Details will be provided in the first week of the subject.
Students with a single major in geology will follow the program set for Year 4 students in Course 3000 Applied Geology but over 4 sessions in a prescribed sequence. Students with a single major in geology will follow a course of advanced study which extends over 4 sessions and includes geological subjects that are approved by the Head of Department.

GEOL4333
Earth and Environmental Science Honours P/T
Staff Contact: Applied Geology Office
CP60 F
Prerequisite: Completion of Program 2527 including Level III subjects totalling 120 Credit Points.
Note/s: Extensive field work is a compulsory part of this subject and students will incur personal expenses. Details will be provided in the first week of the subject.
Students will follow a course of advanced study which extends over 4 sessions and includes geological subjects that are approved by the Head of Department.

GEOL4343
Geology Honours P/T
Staff Contact: Applied Geology Office
CP60
Prerequisite: Completion of Programs 2500 or 2503 including Level III subjects totalling 120 Credit Points.
Note/s: Extensive field work is a compulsory part of this subject and students will incur personal expenses. Details will be provided in the first week of the subject.
Students with a double major in geology will follow the program set for Year 4 students in Course 3000 Applied Geology but over 4 sessions in a prescribed sequence. Students with a single major in geology will follow a course of advanced study which extends over 4 sessions and includes geological subjects that are approved by the Head of Department.

GEOL7401
Earth Environments Honours by research
Staff Contact: A/Prof AD Albani
CP120 F
Prerequisite: Completion of three years of Program 6866 including Level III subjects totalling 90 Credit Points.
Note/s: Field work is a compulsory part of this subject and students will incur personal expenses. Details will be provided in the first week of the subject.
Students will undertake a project, that is approved by the Program advisor. It extends over 2 sessions and includes both geological subjects and a project that involves the writing of a thesis.

GEOL7402
Earth Environments Honours by research (P/T)
Staff Contact: A/Prof AD Albani
CP60 F
Prerequisite: Completion of three years of Program 6866 including Level III subjects totalling 90 Credit Points.
Note/s: Field work is a compulsory part of this subject and students will incur personal expenses. Details will be provided in the first week of the subject.
Students will undertake a project, that is approved by the Program advisor. It extends over 4 sessions and involves the writing of a thesis.
GEOL7403  
Earth Environments Honours  
Staff Contact: A/Prof AD Albani  
CP120 F  
Prerequisite: Completion of three years of Program 6866 including Level III subjects totalling 90 Credit Points.  
Note/s: Field work is a compulsory part of this subject and students will incur personal expenses. Details will be provided in the first week of the subject.  
Students will follow a course of advanced study that has to be approved by the Program advisor. It extends over 2 sessions and includes both geological subjects and a project that involves the writing of a thesis.

GEOL7404  
Earth and Environments Thesis  
Staff Contact: A/Prof AD Albani  
CP60 S1 or S2  
Prerequisite: Completion of three years of Program 6866 including Level III subjects totalling 90 Credit Points.  
Note/s: Field work is a compulsory part of this subject and students will incur personal expenses. Details will be provided in the first week of the subject.  
Subject to the approval by the Program advisor, students will undertake a project that involves the writing of a thesis.

Geology Servicing Subjects

GEOL5211  
Geology for Mining Engineers 1  
Staff Contact: Dr P.G. Lennox  
CP10 F L1 T1  
Note/s: Fieldwork of up to 1.5 days is a compulsory part of this subject. Students will incur personal costs. This is a servicing subject taught within courses offered by other schools or faculties.  

GEOL5301  
Introduction to Petroleum Geology  
Staff Contact: Dr P.G. Lennox  
CP7.5 S1 L2 T1  
Note/s: Fieldwork of up to 2 days is a compulsory part of this subject. Students will incur personal costs. This is a servicing subject taught within courses offered by other schools or faculties.  

GEOL5312  
Petroleum Geology and Geophysics  
Staff Contact: A/Prof. C.R. Ward, Dr P.G. Lennox  
CP7.5 S2 L2 T1  
Prerequisite: GEOL5211  
Note/s: This is a servicing subject taught within courses offered by other schools or faculties.  
Industrial Relations and Organisational Behaviour

IROB2721
Managing People
Staff Contact: Dr D Morgan
CP7.5 S1 HPW4
Note/s: restricted to students in course 3980 programs 2002 and 2003.

This subject focuses on managing in a rapidly changing environment. Topics include: leadership, decision-making and innovation; power, legitimacy, and the socialisation process; the structure and design of organisations, organisation and domination, the evolution of ethical awareness; intergroup conflict and conflict resolution; skills of managing – communication, negotiation, coaching and objectives setting; organisational culture and transformation.

Information Systems

Information Systems Level II

INFS1602
Computer Information Systems 1
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 1400, 6810 and Course 3971.

An understanding of the content of Information Systems, the types of Information Systems and the position of Information Systems in Society; Information Systems at an organisational level, typical commercial applications, the systems lifecycle, design concepts, data analysis and models and an introduction to data communications.

INFS1603
Business Data Management
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 1400, 6810 and Course 3971.

Provides students with the required knowledge and practical skills to model data including the use of entity/relationship models and object models. Students will be able to design simple databases in an organisational environment and understand the role of data in business and the quality assurance issues in collecting, storing and using data.

INFS2603
Systems Analysis and Design
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Prerequisites: INFS1602 and INFS1603
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 1400, 6810 and Course 3971.

This subject examines system analysis and design: requirements analysis and specification, logical and physical design of business systems; students compare design methodologies such as structures and object oriented.

INFS2607
Business Data Networks
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: INFS1602
Note/s: Excluded INFS3607 and INFS2617. Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 1400, 6810 and Course 3971.

Data communication concepts, computer networks, reference to international standards and common industry communications software packages; local/metropolitan/wide area networks; network management; telecom services and other options; data security.

INFS2609
Commercial Programming
Staff Contact: School Office
CP15 S1 L2 T1
Prerequisites: INFS1602, INFS1603
Note/s: Restricted to programs 0600, 1000, 1006, 1060, 1061, 1066, 1067, 1400, 6810, and Course 3971.

Programming in the business context with a commercial programming language. Defining problems and designing structured programs to solve problems. Use of data types, selection, iteration, functions, arrays and data structures in procedural programs. A practical introduction to commercial programming.

Information Systems Level II/III

INFS2691
Industrial Training 1
Staff Contact: School Office
CP15 S1 HPW1
Prerequisites: INFS1602, INFS1603
Note/s: Available only to BIT students. Restricted to Course 3971.

A practical treatment of the characteristics of commercial information systems. Topics include analysis of an existing information system; development of overview documentation of the system; evaluation of the interface design; consideration of the role of security and control mechanisms.
INFS3603
Executive Support Systems
Staff Contact: A. Gardiner
CP15 S1 L2 Lab 1
Prerequisites: INFS1602, INFS1603
The process of decision making and work group activity by professional and managerial people; the tools and techniques available in information technology to support these processes; the cultural and organisational issues involved in formalising support; management issues related to support.

INFS3604
Information Function Management
Staff Contact: School Office
CP15 S2 L2 Lab 1
Prerequisites: INFS2603
Introduces the strategic and operational management issues involving information systems and software. Considers both qualitative and quantitative management techniques, including practical applications of tools and concepts for software project management, as well as material on software metrics and software quality. Covers techniques for strategic planning of information systems and ensuring business contribution.

INFS3605
Software Engineering
Staff Contact: School Office
CP15 S1 L1 T2
Prerequisite: INFS2609
Note/s: Restricted to programs 0600, 1400, 6810 and Course 3971.
Students are supervised implementing an information systems project in a commercial programming language. Topics include: advanced program design and structured techniques, computer aided software engineering techniques, interface with systems software at application implementation level, the comparison of a range of programming languages, test data specification, implementation procedures.

INFS3606
Advanced Data Networks
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: INFS2607
Note/s: Excluded INFS3618

INFS3608
Advanced Database Systems
Staff Contact: School Office
CP15 S1 L2 T1
Prerequisites: INFS1602, INFS1603
Note/s: Restricted to programs 0600, 1400, 6810 and Course 3971.
Advanced data analysis and modelling techniques; database management system architectures including hierarchical, network, relational and object-oriented approaches; database reliability, security and integrity issues; data description and manipulation languages; a case involving the design and implementation of a commercial system.

INFS3611
Advanced Analysis and Design
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: INFS2603
Note/s: Restricted to programs 0600, 6810, 1400 and Course 3971. Students in Course 3971 undertake this subject in session 1.
Consists of a real-life systems development project, augmented by lectures and project team management. It provides practical experience in application of object oriented methods for the specification and design of commercial business systems. Requirements definitions, systems specifications and logical designs are developed to professional standard (using automated tools), with an emphasis on requirements engineering and user interface analysis.

INFS3616
Commercial Programming Principles
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: INFS3605
Corequisite: INFS3692
Note/s: Available only to BIT students. Restricted to Course 3971.
An advanced treatment of the practice of implementing commercial systems. Topics include: the use of library code, program design for performance, project control and reporting practice, programming standards, human machine interface, software testing, CASE tools, documentation, security and control, maintenance.

INFS3685
Electronic Commerce
Staff Contact: School Office
CP15 S2 HPW3
Prerequisite: INFS1602 and INFS1603 and approval from Head of School
This subject has been designed to help students develop specific skills relating to applications of electronic commerce as well as an understanding of essential concepts and technologies. Topics include: types of electronic commerce; Internet and World Wide Web applications; security; electronic payment systems;
applications in the banking, retail and manufacturing industries; problems relating to implementations of electronic commerce and essential concepts/technologies supporting electronic commerce.

INFS3692
Industrial Training 2
Staff Contact: School Office
CP15 S2 HPW1
Prerequisite: INFS2609 or INFS3605
Corequisite: INFS3616
Note/s: Available only to BIT students. Restricted to Course 3971.
An in-depth practical exposure to information systems development. Topics include the structure and management of the implementation teams; the roles of users and information staff in implementation; scheduling and control during implementation.

INFS4693
Industrial Training 3
Staff Contact: School Office
CP15 S1 HPW1
Corequisite: INFS3611
Note/s: Available only to BIT students. Restricted to programs Course 3971.
In depth practical work in information systems analysis and design. Topics include the structure and management of analysis and design teams; the roles of users and Information Systems staff in analysis and design; scheduling and control during analysis and design.

Information Systems Level IV

INFS4003/INFS4004
Information Systems (Honours) Thesis
Staff Contact: School Office
CP120 F
Prerequisite: Completion of program 1400 including Level III subjects totalling 90 Credit Points.

INFS4774
Information Systems Security
Staff Contact: School Office
CP15 S1 L3
Prerequisites: INFS1603, INFS2607, and admission to BCom course at honours level majoring in Information Systems plus approval of Head of School of Information Systems.
Reviews concepts, theory, methodologies and techniques discussed in IS security literature and practice. Includes: information systems security management, risk analysis and management, physical and logical security, database and telecommunications security, continuity planning, computer abuse, internet and electronic commerce, legal and social issues. Case studies will provide students with an understanding of computerised security techniques in practice.

INFS4794
Thesis (Information Systems)
Staff Contact: School Office
Note/s: Available only to Year 4 (Honours) students.

INFS4805
Information Systems Auditing
Staff Contact: School Office
CP15 S2 L3
Prerequisite: INFS1602 and admission to BCom course at honours level majoring in Information Systems plus approval of the Head of School of Information Systems
Note/s: Available only to Year 4 (Honours) students. Not offered in 1998.
Management of information systems audit and the evaluation of IT management. Analysis and review of internal controls in contemporary computer installations and applications. Use of basic and advanced information systems audit techniques and methodologies, including audit software, integrated test facility, and concurrent auditing techniques. Technology audit reviews of the audit requirements for such technologies as LANs, EDI, and expert systems. Legal and professional requirements, and computer abuse/fraud auditing. Review of future IS audit techniques, methodologies, research and social implications.

INFS4810
Advanced Data Management
Staff Contact: School Office
CP15 S1 L3
Prerequisite: Admission to BCom course at honours level majoring in Information Systems and approval of Head of School of Information Systems.
The principle and practice of data administration in a large organisation. Design, redesign and tuning of database. Distributed databases and database management systems. Reliability, security and integrity of the database.

INFS4811
Knowledge Based Information Systems
Staff Contact: School Office
CP15 S2 L3
Prerequisite: Admission to BCom course at honours level majoring in Information Systems and approval of Head of School of Information Systems.
Reviews concepts, theory, methodologies and techniques discussed in KBS literature and reviews current practice Topics include an historical perspective of AI, expert systems and knowledge based systems, KBS tools and techniques, Knowledge acquisition and representation, development methods, and evaluation, as well as considering KBS applications and the organisation. Students design and develop a knowledge based system and present their design to the class.
software engineering management and measurement of complex systems, software development maturity, project planning and management, estimation models and techniques, project scheduling, software quality, reliability, assurance, software productivity models.

INFS4825
Object Oriented Information Systems
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: INFS3605, and admission to BCom course at honours level majoring in Information Systems plus approval of Head of School of Information Systems.

Systems development methodologies based on the object-oriented approach. Techniques of analysis and design (concepts and notation). Information systems implementation using at least one specific object-oriented language; and including concepts of objects, classes, abstract data types, inheritance, polymorphism, dynamic binding and software reusability.

INFS4848
Information Systems Project Management
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: Admission to BCom course at honours level majoring in Information Systems and approval of Head of School of Information Systems.

An introduction to the central concepts and issues of project management and the practical benefits of project planning and management together with resource management. Practical sessions in project planning and the use of a computer based management tool. Additional topics include customer focus, lifecycle customization, work packages, progress monitoring, risk evaluation, quality management, vision and change control, people skills, and training.

INFS4853
Information Systems Management
Staff Contact: School Office
CP15 S2 L3
Prerequisites: Admission to BCom course at honours level majoring in Information Systems and approval of Head of School of Information Systems.

This course aims to assist students to develop their knowledge and understanding of important issues involved in the management of information systems in organisations and their ability to critically analyse these issues. Management of information systems will be considered at strategic, tactical and operational levels. Particular emphasis will be given to the management of enterprise-wide and inter-organisational systems and planning for their strategic use. Students without knowledge of and experience in management or the use of IS in organisations may wish to take the subject INFS4848.

INFS4857
Information and Decision Technology
Staff Contact: School Office
CP15 S1 L3
Prerequisite: Admission to BCom course at honours level majoring in Information Systems and approval of Head of School of Information Systems.

The role of information and models in managerial decision making and prediction. The role of information systems in decision making. Assessing the value of information systems and the contribution of information in decision making under uncertainty. The role of information in managerial prediction and forecasting. The development of computer based models to support tactical management. An understanding of the way in which people make decisions, with and without computer support.

INFS4886
Research Topics in Information Systems 1
Staff Contact: School Office
CP15 S1 L3
Prerequisite: Admission to BCom course at honours level majoring in Information Systems

The development of science. Alternative social science research methodologies-case study, normative, laboratory, field studies and field tests. The research process. Judgement in research. Statistical analysis of research data and interpretation of results. Writing the research report.

INFS4887
Research Topics in Information Systems 2
Staff Contact: School Office
CP15 S2 L3
Prerequisite: Admission to BCom course at honours level majoring in Information Systems

The objective of this subject is to enable the students of information systems research to carry out data analysis using statistical tools for empirical research. It examines both the theoretical aspects of scientific data and statistical analysis and introduces the student to a statistical data analysis package.

INFS4891
Decision Support Systems
Staff Contact: School Office
CP15 S1 L2 LAB1
Prerequisite: Admission to BCom course at honours level majoring in Information Systems and approval of Head of School of Information Systems.

Information used for decision making and the application of information technology to assist or support the decision making process. Topics include decision making models, the impact of different management styles, the use of decision tools and the development of decision support systems including issues of model management and interface design. Practical examples of decision support systems are examined as are executive information systems and computer mediated communications within an organisation.
Japanese and Korean Studies

In addition to its core language program, the School of International Business offers a range of Japanese and Korean language and non-language area studies as elective subjects to students studying in the Faculty of Arts and Social Sciences, including courses in Japanese and Korean cultural studies, business and management and technical language.

Subjects in Japanese and Korean languages are offered both for students without prior knowledge of the languages and for those with HSC or other Japanese and Korean language studies. Students enrolling in Japanese or Korean with no previous knowledge of the languages should enrol in JAPN1000 Japanese Communication 1A and JAPN1001 Japanese Communication 1B or KORE1000 Korean Communication 1A and KORE1001 Korean Communication 1B. For students with HSC or other Japanese and Korean language studies, a multipoint entry system operates and, subject to an individual placement test, students will be allocated to the most suitable subject level.

Note: For students admitted in their first year of studies to JAPN2000 or KORE2000 or higher on the grounds of ability and/or previous study, such subjects will be counted as Level I subjects in terms of degree regulations. No student will be permitted to enrol in subjects carrying more than 12 upper level credit points in any School/area of studies under this provision.

All Japanese subjects are restricted to Programs 0600, 1400, and Courses 3971, 3978, 3979 and Advanced Science students in Mathematics Programs.

JAPN1000
Japanese Communication 1A
Staff Contact: School office
CP15 S1 HPW5
Prerequisite: Nil
Introduction to modern Japanese interactive skills, ie. listening, speaking, reading, writing, rules of communication, and socio-cultural knowledge of present-day Japan and local Japanese community, essential to basic survival interaction with Japanese. Emphasis on conversational skills. Hiragana, Katakana and approximately 50 Kanji are introduced.

JAPN1001
Japanese Communication 1B
Staff Contact: School office
CP15 S2 HPW5
Prerequisite: JAPN1000
Further acquisition of interactive skills in basic Japanese, regarding everyday non-technical topics. Introduction of approximately 100 new Kanji.

JAPN2000
Japanese Communication 2A
Staff Contact: School office
CP15 S1 HPW5
Prerequisite: JAPN1001
Further development of beginner's Japanese interactive skills. Prepares students to become competent in anticipated Australia-Japan contact situations and basic survival situations in Japan. Continued emphasis on oral-aural skill acquisition. Approximately 100 new Kanji are introduced.

JAPN2001
Professional Japanese Communication
Staff Contact: School of International Business
CP15 S1 HPW3
Prerequisite: JAPN1001
Note/s: Excluded JAPN3001 or above
Students develop communicative competence in spoken and written professional Japanese at early intermediate level, relevant to a variety of business and commercial situations. The subject emphasises professional language use including both linguistic and para-linguistic politeness.

JAPN2300
Professional Japanese Communication
Staff Contact: School of International Business
CP15 S1 HPW3
Prerequisite: JAPN1001
Note/s: Excluded JAPN3001 or above
Students develop communicative competence in spoken and written professional Japanese at early intermediate level, relevant to a variety of business and commercial situations. The subject emphasises professional language use including both linguistic and para-linguistic politeness.

JAPN2500
Japanese Society, Culture and Economy
Staff Contact: School office
CP15 S1 HPW3
Prerequisite: JAPN1001
An introduction to Japanese society, history, culture, politics and economy. Topics include social stratification, the role
of women, demographic change, the education system, electoral politics, interest-group representation, Japan's economic growth, agriculture and industrial development, the role of the state, Japan's underworld Yakuza and traditional Kabuki theatre.

**JAPN2600**
**Hospitality Japanese**  
*Staff Contact: School office*  
CP15 S2 HPW3  
*Prerequisite:* JAPN2000  
*Note/s:* Excluded JAPN4000 or above

This subject aims to develop interactive competence in spoken Japanese for the hospitality industry, particularly in professional situations relating to tourism and leisure. Includes finance and banking, hotel advertising, restaurant and other work situations. Emphasises comparative cultural aspects, covering honorifics and etiquette as well as non-linguistic aspects of interaction between hospitality personnel and tourists.

**IBUS2103**
**Japanese Business**  
*Staff Contact: School office*  
CP15 S2 HPW3  
*Prerequisite:* JAPN1001 or ECON1101

Recent Japanese business and economic performance; corporate strategy; organisational change and human resource management practices; impact of culture on management style and decision making; industrial organisation and business groups; corporate finance and governance; role of small and medium scale enterprises; quality control and just-in-time production; informal structures in the Japanese firm; subcontracting and assembler-supplier relations; FDI and overseas production; Japanese multinational enterprises; human resource management transfer; government-business relations.

**JAPN3000**
**Japanese Communication 3A**  
*Staff Contact: School office*  
CP15 S1 HPW5  
*Prerequisite:* JAPN2001

Equips students with solid linguistic skills at intermediate level, with increasing emphasis on reading and writing. Introduction to a variety of local Australia-Japan contact situations and expanding practical usage of students' interactive skills. Approximately 150 new kanji are introduced.

**JAPN3001**
**Japanese Communication 3B**  
*Staff Contact: School office*  
CP15 S2 HPW5  
*Prerequisite:* JAPN3000

Further development of communicative skills and competence attained in JAPN3000. Students use Japanese in a wider context, thereby increasing vocabulary and knowledge of grammatical structures. Another 150 Kanji are introduced.

**JAPN3500**
**Business Japanese**  
*Staff Contact: School office*  
CP15 S2 HPW3  
*Prerequisite:* JAPN3000  
*Note/s:* Excluded JAPN4100 or above

Concentrates on interactive skills for business situations, including reading and writing. Introduction to technical language of accounting, finance, economics and marketing and develops skills needed in typical formal and informal business contact situations, such as business introductions and meetings, business conversation, written channels of communication and business etiquette.

**JAPN4000**
**Japanese Communication 4A**  
*Staff Contact: School office*  
CP15 S1 HPW5  
*Prerequisite:* JAPN3001

Concentrates on acquisition of late-intermediate to early-advanced interactive skills in Japanese with continued emphasis on reading and writing. Introduction to basic linguistic features of advanced level Japanese and provides opportunities to practise skills needed in typical formal and informal Australia-Japan contact situations. Approximately 150 Kanji are introduced.

**JAPN4001**
**Japanese Communication 4B**  
*Staff Contact: School office*  
CP15 S2 HPW5  
*Prerequisite:* JAPN4000

Prepares students in acquisition of well-rounded linguistic and communicative competence necessary for advanced learners. Further extension and systematic practice of interactive skills. Another 150 Kanji are introduced.

**JAPN4100**
**Japanese Communication 5A**  
*Staff Contact: School office*  
CP15 S1 HPW5  
*Prerequisite:* JAPN4001

Focuses on mid-advanced Japanese interactive skills. Increasing emphasis is placed upon further development of reading and writing abilities. Autonomous learning is encouraged and assisted in acquisition of more advanced interactive skills. Students are given opportunities to improve on competence in professional and business settings. Approximately 250 new Kanji are introduced.

**JAPN4101**
**Japanese Communication 5B**  
*Staff Contact: School office*  
CP15 S2 HPW5  
*Prerequisite:* JAPN4100

Honing of reading and writing skills attained in JAPN4100. Continued instruction in more advanced conversational and grammatical structures and useful vocabulary for the purpose of business and related areas of communication. A further 250 Kanji are introduced.
JAPN4200
Japanese Communication 6A
Staff Contact: School office
CP15 S1 HPW5
Prerequisite: JAPN4101
Concentrates on further acquisition of interactive skills required in a wider variety of Australia-Japan contact situations. Continued emphasis on autonomous learning and self-monitoring of problem areas in interactive skills. Approximately 250 new Kanji are introduced.

JAPN4201
Japanese Communication 6B
Staff Contact: School office
CP15 S2 HPW5
Prerequisite: JAPN4200
Refining of linguistic and communicative skills acquired in JAPN4200. Another 250 Kanji are introduced, i.e. the remaining JooYoo Kanji.

JAPN4300
Advanced Reading in Japanese
Staff Contact: School office
CP15 S1 HPW5
Prerequisite: JAPN4201 or permission from Head of School
Provides opportunity for advanced learners of Japanese with intensive and extensive reading in the language on the selected topic(s). Accumulation of Kanji, vocabulary and idiomatic expressions is emphasised.

JAPN4301
Advanced Reading in Japanese B
Staff Contact: School office
CP15 S2 HPW5
Prerequisite: JAPN4300 or permission from Head of School
Learners are required to continue reading on the selected topic(s) from JAPN4300, prepare a paper and give a formal oral presentation to a group of native Japanese speakers.

JAPN4400
Special Topics in Advanced Japanese
Staff Contact: School office
CP15 S2 HPW3
Prerequisite: JAPN4000
Provides students with a framework for analysing problems in the field of Japanese Studies, including a theoretical framework and types and sources of problems. Where possible, students carry out empirical data collection and are guided through the analysis of and search for possible solutions to these problems.

KORE1000
Korean Communication 1A
Staff Contact: School office
CP15 S1 HPW5
Prerequisite: Nil
Designed to provide beginners with practical language skills for effective communication. Emphasis is on use of the language in basic survival situations. Communicative methods are used to develop in students the four language skills: listening, speaking, reading and writing, within a cultural context. The Korean script, Han-gul, is taught progressively.

KORE1001
Korean Communication 1B
Staff Contact: School office
CP15 S2 HPW5
Prerequisite: KORE1000 or equivalent
Further development of communicative skills in introductory Korean, with emphasis on a variety of ‘real life’ situations. New communicative functions, vocabulary and grammatical structures are progressively added to knowledge and skills acquired in KORE1000.

KORE2000
Korean Communication 2A
Staff Contact: School office
CP15 S1 HPW5
Prerequisite: KORE1001 or equivalent
Further development of communicative skills on the groundwork covered in introductory-level Korean. Allows students to build upon their spoken and written language skills, enabling them to interact in a wider range of communicative situations.

KORE2001
Korean Communication 2B
Staff Contact: School office
CP15 S2 HPW5
Prerequisite: KORE2000 or equivalent
Consolidates and further expands on knowledge and skills developed in the previous subjects as well as laying the foundation for students who wish to proceed to a third year program. A number of selected Hanja, Sino-Korean, characters, is introduced to further enhance the students' skills to read and comprehend modern Korean mixed script.

IBUS2104
Korean Business
Staff Contact: School office
C15 S2 HPW3
Prerequisite: 90 Arts credit points or the equivalent in the Faculties of Law or Commerce and Economics
An introduction to Korean economy and business practice. Topics include Korea's economic development and growth, economic policies, government-business relations, corporate structure and enterprise groupings, Chaebol, industry system, workplace practices, decision making procedures, business negotiations and socio-cultural elements in business and management.

Korean Studies
Korean subjects are restricted to Programs 0600, 1400, and Course 3971 and Advanced Science students in Mathematics Programs.
KORE3000
Korean Communication 3A
Staff Contact: School office
C15 S1 HPW5
Prerequisite: KORE2001 or equivalent
Consolidation of students' communicative skills in both spoken and written Korean at intermediate level, with increasing emphasis on reading and writing. It introduces a wider range of communicative topics, vocabulary and grammatical structures and further expands practical usage of students' knowledge and interactive skills. Approximately 100 new Hanja are also introduced.

KORE3001
Korean Communication 3B
Staff Contact: School office
C15 S2 HPW5
Prerequisite: KORE3000 or equivalent
Further development of communicative skills attained in KORE3000 and a new orientation to specific needs in everyday business situations. It equips students with a variety of practical language skills and background information necessary not only for everyday conversation but also for Korean-Australian business situation. Includes systematic practice of communicative skills in the classroom and some field work at the 'real-life' situations in the Sydney Korean business community. Another 150 Hanja are introduced.

Business Law and Taxation

Business Law and Taxation Level I

LEGT7711
Legal Environment of Commerce
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Prerequisites: HSC minimum mark required – Contemporary English 60, or 2 unit English (General) 60 or 2 unit English 53 or 3 unit English 1
Note/s: Restricted to programs 1400, 6810 and Courses 3971 and 3979.
The entire fabric of commerce is woven from a complex legal regime, judicial and statutory, which regulates all commercial activity. This subject deals with the Australian legal system; Commonwealth/State relations; Parliament and statute law; the court and case law; the executive and administrative law; the legal process and its alternatives. This subject also introduces areas of substantive law relevant to commerce with particular reference to property law (with particular reference to intellectual property), torts law (with particular reference to negligence), contract law, criminal law, commercial entities and transactions, competition and consumer protection.

LEGT7731
Marketing and Distribution Law
Staff Contact: School Office
CP15 S1 L2 T1
Note/s: Restricted to program 1400 and Courses 3971 and 3979.
The marketing and distribution of goods and services operates within a comprehensive regulatory framework. This subject examines that framework. Topics include restrictive trade practices implications of distribution with special reference to collusive activity, exclusive dealing, resale price maintenance and abuse of market power; consumer protection and fair trading implications of sales promotion with particular reference to misleading or deceptive conduct and other unfair practices; advertising self regulation; product liability; protection of intellectual property; franchising, licensing and character merchandising.

LEGT7761
Law of Finance and Securities
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: Nil
This subject examines the legal environment of banking and relevant financial institutions with particular reference to the law regulating business transactions and structures. Topics include legal concepts underlying the Bank-Customer relationship; legal regulation of financial instruments; laws relating to various types of securities; bankruptcy and alternative arrangements; company insolvency; legal regulation of banking and financial institutions.

Business Law and Taxation Level II

LEGT7721
Business Transactions
Staff Contact: School Office
CP15 S1 or S2 L2 T1
Prerequisite: LEGT7711
Note/s: Restricted to programs 1400 and Courses 3971 and 3979.
Contract law forms the basis of all important commercial transactions and is essential to a proper understanding of more specialised areas of commercial law. This subject examines the general principles of contract law and how they are developed and expanded in relation to specialised commercial transactions including agency, contracts for the sales of goods, guarantees, bankruptcy, negotiable instruments, securities and insurance law. Relevant areas of consumer protection and competition law are also discussed. The common contractual themes in which these areas are grounded will be highlighted, along with the different requirements attaching to the rights and obligations of parties to transaction in such areas.
LEGT7771
Information Technology Law
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: LEGT7711 or INFS1602
Note/s: Restricted to program 1400 and Courses 3971 and 3979.

The laws governing information technology. The topics examined include intellectual property law – patents, copyright and confidential information; licensing; technology contracts; tortious liability; product liability; computer crimes; data protection and privacy issues; and current issues.

Business Law and Taxation Level III

LEGT7741
Business Entities
Staff Contact: School Office
CP15 S2 L2 T1
Prerequisite: LEGT7711 and LEGT7721
Note/s: Restricted to programs 1400 and Courses 3971 and 3979.

The law relating to the legal structures available for business including partnerships, joint ventures, trusts and companies. The primary focus is on the modern company and its operation under the Corporations Law. Topics include the nature of the corporate entity; establishing the company and fundraising; shares and dividends; the rights and duties of directors; the position of management; shareholders’ rights and remedies for their enforcement; insolvency and liquidation.

LEGT7751
Business Taxation
Staff Contact: School Office
CP15 S1 L3 T1
Prerequisite: LEGT7711 and LEGT7721
Note/s: Restricted to program 1400 and Courses 3971 and 3979.

The complexity and comprehensiveness of the Australian taxation system mean that tax considerations must be taken into account in most business decisions. An understanding of the structure of the Australian taxation system and of the policy factors that guide legislators is essential to professional business advisors. This subject concentrates on income taxation in Australia. Topics include: concepts of income; allowable deductions; tax accounting; taxation of partnerships, trusts and corporations; anti-avoidance provisions; tax administration; capital gains tax; and fringe benefits.

Marine Science

Note: Some subjects that appear in this section may be restricted to students for whom the subject comprises a compulsory part of their program.

Marine Science Level II

MSCI2001
Introductory Marine Science
Staff Contact: Dr P Dixon
CP15 S1 or S2 HPW4
Note/s: Fieldwork in Mid year Recess.
Ocean basins, sediments, properties of seawater, ocean circulation, coasts and coastal processes. Marine biology and ecology, primary and secondary productivity.
Personal expenses will be incurred.

MSCI2051
Coral Reefs: Environment and Ecology
Staff Contact: Dr P Dixon
Basic oceanographic processes and how these apply in the Great Barrier Reef, the characteristics of the waters of the Great Barrier Reef; the types and development of reefs, corals and reef communities, environmental damage to corals and exploitation of the reef, management by Great Barrier Reef Marine Park Authority. Laboratory classes include a study of the reef flat, its inhabitants, their distributions and interactions, the reef environment and its measurement.
Personal expenses will be incurred.

MSCI6200
Coastal Monitoring Techniques
Staff Contact: A/Prof AD Albani
CP15 S1 L1 T2
Note/s: Fieldwork of up to 4 days is a compulsory part of this subject. Students will incur personal costs.

Marine Science Level III

MSCI3001
Physical Oceanography
Staff Contact: Dr P Dixon
CP15 S2 HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Laboratory and fieldwork.
The physical properties and motions of the oceans, and their measurement, oceanographic instrumentation. The design of small and large scale ocean experiments.
Coastal Monitoring Techniques

Staff Contact: A/Prof AD Albani
CP15 S1 L1 T2

Note/s: Field work of up to 4 days is a compulsory part of this subject. Students will incur personal costs.

Coastal Environmental Assessment

Staff Contact: A/Prof AD Albani
CP15 S2 L1 T2

Note/s: Field work of up to 3 days is a compulsory part of this subject. Students will incur personal costs. Details will be provided in the first week of the subject.

The interaction of water masses, bottom sediments and benthic organisms. Sampling techniques, analytical methodology and statistical data evaluation. Environmental assessment of Australia and overseas areas. An important aspect of this course is its practical approach: from data gathering, data evaluation and environmental assessment report writing. Practical work in the course involves each student as an active member of a project team.

Mathematics Level I

Students whose course or program requires them to take Mathematics subjects in later years must take the standard first year subjects MATH1131 Mathematics 1A and MATH1231 Mathematics 1B or their higher equivalents MATH1141 Higher Mathematics 1A and MATH1241 Higher Mathematics 1B. The higher versions cover all of the material in MATH1131 and MATH1231, often at greater depth, and are intended for students who have obtained very high marks in the 3 or 4 unit Mathematics courses of the Higher School Certificate.

Students who do not intend studying Mathematics beyond Year 1 may instead take the subjects MATH1011 General Mathematics 1B and MATH1021 General Mathematics 1C. However, students who select these subjects should weigh seriously the implications of their choice because only a limited number of further Mathematics subjects are normally available. (See also the note above on grades awarded.) The single subject MATH1011 is also available to students seeking an alternate prerequisite for MATH1131 in cases where they do not meet the normal HSC prerequisites. Students should note, however, that only one of MATH1011 and MATH1131 can be counted in their degree.

The subject MATH1081 Discrete Mathematics is an additional Level I subject which is compulsory for students in Computer Science and most Mathematics programs. For students in Advanced Science Mathematics programs (except programs 1010 and 6810), it is taken in Stage 1, while for Science students it is taken in one of Stages 1 or 2 depending on the mathematical background of the student.

The subjects MATH1051 Mathematics 1F, MATH1079 Mathematics for Aviation and MATH1090 Discrete Mathematics for Electrical Engineers are restricted to students in the Optometry, Aviation and Electrical Engineering courses respectively.

Mathematics Level II

1. Many subjects in the School of Mathematics are offered at two levels. The higher level caters for students with superior mathematical ability. Where both levels are offered, the proportion of Distinction and High Distinction grades is lower in the ordinary level. The proportion is lower still in the General Mathematics subjects.

2. Students proceeding to Year 4 (Honours) in a Mathematics program in the Advanced Science Course may be required to take some of their Mathematics subjects at the higher level. However, students should not think that the higher level subjects are intended only for those in Honours programs. Any student with the ability to undertake higher subjects benefits from so doing.

3. Where a subject is mentioned at the ordinary level, the equivalent subject at the higher level (if any) may be substituted. The higher equivalent of MATH2110 is the pair of subjects MATH2110 and MATH2610.
Functions (and their inverses), limits, asymptotes, continuity; differentiation and applications; integration, the definite integral and applications; inverse trigonometric functions; the logarithmic and exponential functions and applications; sequences and series; mathematical induction; the binomial theorem and applications; introduction to probability theory; introduction to 3-dimensional geometry; introduction to linear algebra.

MATH1021
General Mathematics 1C
Staff Contact: School of Mathematics First Year Office CP15 S2 HPW6
Prerequisite: MATH1011 or MATH1131 or MATH1141
Note/s: Excluded MATH1032, MATH1042, MATH1231, MATH1241, ECON2200, ECON2201, ECON2202, ECON1202, ECON2290, ECON2291.

Techniques for integration, improper integrals; Taylor's theorem; first order differential equations and applications; introduction to multivariable calculus; conics; finite sets; probability; vectors, matrices and linear equations.

MATH1032
Mathematics 1
Note/s: No longer offered. Replaced by the two subjects MATH1131 Mathematics 1A and MATH1231 Mathematics 1B.

MATH1042
Higher Mathematics 1
Note/s: No longer offered. Replaced by the two subjects MATH1141 Higher Mathematics 1A and MATH1241 Higher Mathematics 1B.

MATH1131
Mathematics 1A
Staff Contact: School of Mathematics First Year Office CP15 S1 or S2 HPW6
Prerequisites: HSC mark range required: 2 unit Mathematics (90-100), or 2 and 3 unit Mathematics (100-150) or 3 and 4 unit Mathematics (100-200) or MATH1011 (these ranges may vary from year to year). 2 unit Mathematics in this instance refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject. It does not refer to the subjects Mathematics in Society or Mathematics in Practice.
Note/s: Excluded MATH1011, MATH1032, MATH1042, MATH1141, ECON2200, ECON2201, ECON2202, ECON1202, ECON2290, ECON2291.

As for MATH1131 but in greater depth.

MATH1231
Mathematics 1B
Staff Contact: School of Mathematics First Year Office CP15 S2 HPW6 or Summer Session HPW9
Prerequisite: MATH1131 or MATH1141
Note/s: Excluded MATH1021, MATH1032, MATH1042, MATH1241, ECON2200, ECON2201, ECON2202, ECON1202, ECON2290, ECON2291.

MATH1141
Higher Mathematics 1A
Staff Contact: School of Mathematics First Year Office CP15 S1 HPW6
Prerequisites: HSC mark range required: 2 and 3 unit Mathematics (145-150) or 3 and 4 unit Mathematics (186-200) (these numbers may vary from year to year).
Note/s: Excluded MATH1011, MATH1032, MATH1042, MATH1131, ECON2200, ECON2201, ECON2202, ECON1202, ECON2290, ECON2291.

As for MATH1131 but in greater depth.

MATH1241
Higher Mathematics 1B
Staff Contact: School of Mathematics First Year Office CP15 S2 HPW6
Prerequisite: MATH1131 or MATH1141, each with a mark of at least 65
Note/s: Excluded MATH1021, MATH1032, MATH1042, MATH1231, ECON2200, ECON2201, ECON2202, ECON1202, ECON2290, ECON2291.

As for MATH1231 but in greater depth.

MATH1061
Introductory Applied Computing
Staff Contact: School of Mathematics First Year Office CP15 HPW6
Prerequisites: As for MATH1011
Corequisite: MATH1021 or MATH1032 or MATH1131 or MATH1042 or MATH1141
Note/s: Excluded any subject offered by the School of Computer Science and Engineering. Not currently offered.

The major components of a computer, software vs hardware. The role of computers, history, range of available hardware and software, computing issues and standards. The operating systems DOS and UNIX, files and text editors, networks and communications. An overview of spreadsheets, databases, graphics and other software packages. Structured programming in the high level language C, covering a variety of data types, efficiency, language standards, and libraries of functions and subprograms. Mathematical applications from a wide variety of areas.
MATH1079
Mathematics for Aviation
Staff Contact: School of Mathematics First Year Office
CP22.5 S1 HPW6 S2(7 WKS) HPW8
Prerequisite: as for MATH1131
Note/s: Excluded MATH1011, MATH1021, MATH1032, MATH1042, MATH1131, MATH1141, MATH1231, MATH1241. Restricted to course 3980.

MATH1081
Discrete Mathematics
Staff Contact: School of Mathematics First Year Office
CP15 S1 or S2 HPW6
Prerequisites: As for MATH1131
Corequisite: MATH1032 or MATH1131 or MATH1042 or MATH1141
Note/s: Excluded MATH1090.

MATH1090
Discrete Mathematics for Electrical Engineers
Staff Contact: School of Mathematics First Year Office
CP7.5 S2 HPW3
Corequisite: MATH1032 or MATH1131 or MATH1042 or MATH1141
Note/s: Excluded MATH1081. Restricted in Science course to Combined degree course 3725.

The role of proof in mathematics, logical reasoning and implication, different types of proofs. Sets, algebra of sets, operations on sets, mathematical logic, truth tables, syntax, induction. Recursion, recursive logic, recurrence relations.

Mathematics Level II

The subjects MATH2009 Engineering Mathematics 2, MATH2019 Engineering Mathematics 2CE and MATH2031 Mathematics 2CH are servicing subjects for some Engineering courses and are not available for students in the Science course. The subject MATH2079 is only available in the Aviation Course. The subject MATH2021 is available for students in the Science course who wish to take only one Level II Mathematics subject.

MATH2011
Several Variable Calculus
Staff Contact: School Office
CP15 S1 HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2100, MATH2110, MATH2510, MATH2610.

Functions of several variables, limits and continuity, differentiability, gradients, surfaces, maxima and minima, Taylor series, Lagrange multipliers, chain rules, inverse function theorem, Jacobian derivatives, double and triple integrals, iterated integrals, Riemann sums, cylindrical and spherical coordinates, change of variables, centre of mass, curves in space, line integrals, parametrised surfaces, surface integrals, del, divergence and curl, Stokes' theorem, Green's theorem in the plane, applications to fluid dynamics and electrodynamics, orthogonal curvilinear coordinates, arc length and volume elements, gradient, divergence and curl in curvilinear coordinates.

MATH2009
Engineering Mathematics 2
Staff Contact: School Office
CP20 F HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Restricted in Science course to combined degree course 3681.

Differential equations, use of Laplace transforms, solutions by series; partial differential equations and their solution for selected physical problems, use of Fourier series; introduction to numerical methods; matrices and their application to theory of linear equations, eigenvalues and their numerical evaluation; vector algebra and solid geometry; multiple integrals; introduction to vector field theory.

MATH2019
Engineering Mathematics 2CE
Staff Contact: School Office
CP15 F HPW3
Prerequisites: MATH1032 or MATH1231 or MATH1042 or MATH1241
Notes: Excluded MATH2009. Restricted in Science Course to combined degree course 3730.

Partial differentiation and applications, vector algebra, double integrals, ordinary differential equations, introduction to vector field theory, extrema of functions of 2 variables, matrices and their applications, Laplace transforms, Fourier series, partial differential equations and their solution for selected physical problems.

MATH2021
Mathematics 2
Staff Contact: School Office
CP15 F HPW2
Prerequisite: MATH1021(CR) or MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Mathematics MATH2021 is included for students
desiring to attempt only one Level II Mathematics subject. If other Level II subjects in Pure Mathematics or Applied Mathematics are taken, MATH2021 Mathematics is not counted. Taught by the Keller Plan self-paced learning method.

Differential equations, use of Laplace transforms, solutions by series; partial differential equations and their solution for selected physical problems, use of Fourier series; multiple integrals, matrices and their application to theory of linear equations, eigenvalues; introduction to numerical methods.

MATH2031  
Mathematics 2CH  
Staff Contact: School Office  
CP20 F HPW2.5  
Prerequisite: MATH1231 or MATH1241  
Note/s: Not available to science students. Taught by the Keller Plan self-paced learning method.

Revision of integration and differential equations; partial differentiation, chain rules, grad, div, curl and the Laplacian, vector operators in polar coordinates; simple partial differential equations (wave equation, heat equation, Laplace's equation); integration in 2 and 3 dimensions, examples illustrating Green's, Stokes' and divergence theorems, integration over curved regions; Fourier series, use in solving some partial PDEs and Laplace's equation for a rectangle; Laplace transforms, use in solving ordinary and partial DEs, transforms of error functions, unit and delta functions; Taylor polynomial solution of DDEs - Legendre polynomials; Frobenius method - Bessel functions, applications including wave equation for a circular drum; matrices, applications.

MATH2079  
Mathematical Methods for Aviation  
Staff Contact: School Office  
CP15 S1 HPW4  
Prerequisite: MATH1079  
Note/s: Restricted to course 3980.

Applied Mathematics Level II

MATH2100  
Vector Calculus  
Staff Contact: School Office  
CP7.5 S2 HPW2.5  
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241  
Note/s: Excluded MATH2011, MATH2110.

Properties of vectors and vector fields; divergence, gradient, curl of a vector; line, surface, and volume integrals. Gauss' and Stokes' theorems. Curvilinear coordinates.

MATH2110  
Higher Vector Analysis  
Staff Contact: School Office  
CP7.5 S1 HPW2.5  
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241, each with a mark of at least 70  
Note/s: Excluded MATH2011, MATH2100.
As for MATH2100 but in greater depth.

MATH2120  
Mathematical Methods for Differential Equations  
Staff Contact: School Office  
CP7.5 S1 or S2 HPW2.5  
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241  
Note/s: Excluded MATH2130.
Introduction to qualitative and quantitative methods for ordinary and partial differential equations. The following topics are treated by example. Ordinary differential equations: linear with constant coefficients, first-order systems, singularities, boundary-value problems, eigenfunctions, Fourier series. Bessel's equation and Legendre's equation. Partial differential equations: characteristics, classification, wave equation, heat equation, Laplace's equation, separation of variables methods, applications of Bessel functions and Legendre polynomials.

MATH2130  
Higher Mathematical Methods for Differential Equations  
Staff Contact: School Office  
CP7.5 S2 HPW2.5  
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241, each with a mark of at least 70  
Note/s: Excluded MATH2120.
As for MATH2120 but in greater depth.

MATH2160  
Linear Programming  
Staff Contact: School Office  
CP7.5 S1 HPW2  
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241 or MATH1079  
Corequisite: MATH2501 or MATH2601.
A first course in mathematical modelling and solution techniques for linear problems. The revised simplex and dual simplex methods, theory and application of sensitivity analysis, duality theory. Networks, transportation and assignment problems. Examples, applications and computing methods are prominent features.

MATH2180  
Operations Research  
Staff Contact: School Office  
CP7.5 S2 HPW2  
Prerequisite: MATH2160  
Modelling and solution techniques for optimization problems of interest to business and industry. Topics are selected from linear programming, integer programming,
(discrete) dynamic programming, project scheduling, game theory, queueing theory, inventory theory and simulation. Software packages are used to solve realistic problems.

MATH2200
Discrete Dynamical Systems
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Corequisite: MATH2501 or MATH2601
The study of dynamical systems whose states change at discrete points in time. Difference equations, general properties. Linear systems, stability, oscillations, Z-transforms. Nonlinear systems, critical points, periodic cycles, chaotic behaviour. Applications selected from engineering, biological, social and economic contexts.

MATH2220
Continuous Dynamical Systems
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
The study of continuous dynamical systems. One-dimensional systems, kinematic waves, applications include traffic flow and waves in fluids. An introduction to the modelling of physical, biological and ecological systems, stability, oscillations and resonance.

MATH2240
Introduction to Oceanography and Meteorology
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
An introduction to mathematical models for the circulation of the atmosphere and oceans. The equations of motion are exploited so as to provide simplified models for phenomena including: waves, the effects of the Earth's rotation, the geostrophic wind, upwelling, storm surges. Feedback mechanisms are also modelled: the land/sea breeze, tornadoes, tropical cyclones. Models for large-scale phenomena including El Nino and the East Australian Current will be discussed as well as the role of the atmosphere-ocean system in climate change.

MATH2301
Mathematical Computing A
Staff Contact: School Office
CP15 S1 HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
An introduction to mathematical computing, programming and visualization using Matlab, with a focus on mathematical modelling and simulation. Introduction to Matlab, floating point arithmetic, difference equations, nonlinear equations, numerical differentiation and integration, initial value problems.

Pure Mathematics Level II

MATH2400
Finite Mathematics
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: MATH1081 Discrete Mathematics is recommended.
Positional number systems, floating-point arithmetic, rational arithmetic, congruences. Euclid's algorithm, continued fractions, Chinese remainder theorem, Fermat's theorem, applications to computer arithmetic. Polynomial arithmetic, division algorithm, factorization, interpolation, finite field. Codes, error correcting codes, public-key cryptography.

MATH2410
Automata and Algorithms
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: MATH1081 Discrete Mathematics is recommended.
Finite automata, regular languages and Kleene's theorem. Analysis of fast algorithms for matrix, integer and polynomial manipulation, sorting etc. Discrete and Fast Fourier Transform and applications.

MATH2501
Linear Algebra
Staff Contact: School Office
CP15 S1 or S2 HPW5 or F HPW2.5
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2601.

MATH2510
Real Analysis
Staff Contact: School Office
CP7.5 S1 or S2 HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2011, MATH2610.
Multiple integrals, partial differentiation. Analysis of real valued functions of one and several variables.
MATH2520
Complex Analysis
Staff Contact: School Office
CP7.5 S1 or S2 HPW2.5
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2620.
Analytic functions, Taylor and Laurent series, integrals. Cauchy's theorem, residues, evaluation of certain real integrals.

MATH2601
Higher Linear Algebra
Staff Contact: School Office
CP15 S1 HPW5
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241, each with a mark of at least 70
Note/s: Excluded MATH2501.
As for MATH2501, but in greater depth, and with additional material on unitary, self-adjoint and normal transformations.

MATH2610
Higher Real Analysis
Staff Contact: School Office
CP7.5 S1 HPW2.5
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241, each with a mark of at least 70
Note/s: Excluded MATH2011, MATH2510.
As for MATH2510 but in greater depth.

MATH2620
Higher Complex Analysis
Staff Contact: School Office
CP7.5 S2 HPW2.5
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241, each with a mark of at least 70
Note/s: Excluded MATH2520.
As for MATH2520 but in greater depth.

Statistics Level II
The subjects MATH2819, MATH2829, MATH2839, MATH2849, MATH2869, MATH2889 and MATH2899 are not available to Science students unless specified as part of a program. The subject MATH2841 Statistics SA is available for students who wish to take only one Level II Statistics subject. The subject MATH2870 Applied Statistics SS is available for students who wish to take only 7.5 CP of Level II Statistics. It cannot be followed by any Level III Statistics subjects.
Note: There was a major revision of Level II Statistics subjects in 1996 followed by a major revision of Level III Statistics subjects in 1997. Any student who has taken Level II Statistics subjects before 1996 and wishes to take further Level II or III Statistics subjects should consult the Head of Department.

MATH2801
Theory of Statistics
Staff Contact: School Office
CP15 S1 HPW4
Prerequisite: MATH1021(CR) or MATH1032 or MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2819, MATH2821, MATH2921, MATH2841, MATH2870, MATH2901, BIOS2041.
Probability, random variables, standard distributions, bivariate distributions, transformations, central limit theorem, sampling distributions, point estimation, interval estimation, hypothesis testing.

MATH2810
Computing for Statistics
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH1021(CR) or MATH1032 or MATH1231 or MATH1042 or MATH1241
Corequisite: MATH2801
Note/s: Excluded MATH2910.
Exploratory and graphical data analysis using various statistical packages; e.g. Minitab, Xlisp-stat, Splus. Visualisation of data. Dynamic graphics. Macro programming in statistical packages. Introduction to simulation of stochastic processes.

MATH2819
Statistics SA
Staff Contact: School Office
CP10 F HPW2
Prerequisite: MATH1021 or MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Not available to Science students.
Probability, random variables, independence. Binomial, Poisson and normal distributions, transformations to normality, estimation of mean and variance, confidence intervals, tests of hypotheses, contingency tables, two sample tests of location, simple and multiple linear regression, analysis of variance for simple models.

MATH2829
Statistics SU
Staff Contact: School Office
CP7.5 S1 HPW3
Prerequisite: MATH1021 or MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Not available to Science students.
Introduction to probability theory, random variables and distribution functions, sampling distributions, including those of chi-square, t and F. Estimation procedures, including confidence interval estimation with an emphasis on least squares and surveying problems, and computer based exercises.
MATH2831
Linear Models
Staff Contact: School Office
CP15 S2 HPW4
Prerequisite: MATH2801, MATH2810 (except course 3996)
Note/s: Excluded MATH2931, MATH3811, MATH3911, BIOS2041, MATH3870 (before 1997), MATH3050.

MATH2839
Statistics SM
Staff Contact: School Office
CP7.5 S1 HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2841, MATH2870, MATH2801, MATH2821, MATH2901, MATH2921. Restricted in Science course to combined degree courses 3664, 3681, 3685 and 3701.
Introduction to probability theory, with finite, discrete and continuous sample spaces. Random variables: the standard elementary distributions including the binomial, Poisson and normal distributions. Sampling distributions: with emphasis on those derived from the normal distribution: chi-square, t and F. Estimation of parameters: the methods of moments and maximum likelihood and confidence interval estimation. The standard tests of statistical hypotheses, and, where appropriate, the powers of such tests. An introduction to linear regression.

MATH2840
Sample Survey Theory
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2801
Note/s: Excluded MATH2940, MATH3820 (before 1997), MATH3920 (before 1997).

MATH2841
Statistics SS
Staff Contact: School Office
CP15 S1 HPW2
Prerequisite: MATH1021 or MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2801, MATH2821, MATH2870, MATH2901, MATH2921, MATH2819, BIOS2041. Statistics MATH2841 is included for students desiring to attempt only one Level II Statistics subject. An introduction to the theory of probability, with finite, discrete and continuous sample spaces. The standard univariate distributions: binomial, Poisson and normal, an introduction to multivariate distributions. Standard sampling distributions, including those of chi-square, t and F. Estimation by moments and maximum likelihood (including sampling variance formulae, and regression); confidence interval estimation. The standard tests of significance based on the above distributions, with a discussion of power where appropriate. An introduction to experimental design: fixed, random effect models.

MATH2849
Statistics EE
Staff Contact: School Office
CP9 S2 HPW3
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2841, MATH2870, MATH2801, MATH2901. Restricted in Science course to combined degree courses 3725 and 3726.

MATH2869
Applied Statistics SC
Staff Contact: School Office
CP5 S1 HPW2
Prerequisite: MATH1021 or MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Restricted in Science course to combined degree course 3730.
Graphical data analysis, review of probability, random variables and their properties. The normal and binomial distributions, the central limit theorem, applications to quality control. Functions of random variables and their simulation using computers. One and two sample inference methods. Experimental designs for comparing two groups. Simple and multiple linear regression. Relevant applications from fields of engineering will be investigated in computer workshops.

MATH2870
Applied Statistics SS
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH1079 or MATH1021 or MATH1231 or MATH11241
Note/s: Excluded MATH2841, MATH2801, MATH2901, BIOS2041. Statistics MATH2870 is included for students desiring to attempt only 7.5CP of Level II Statistics. If other Level II Statistics subjects are taken, MATH2870 is not counted.
Analysis of data, review of probability and random variables. The normal and binomial distributions, the central limit
theorem, applications to quality control. Functions of random variables and their simulation using computers. One and two sample inference methods. Experimental designs for comparing two groups. Simple and multiple linear regression. Relevant applications will be investigated in assignments and computing exercises.

MATH2899
Applied Statistics For Chemical Engineers
Staff Contact: School Office
CP7.5 S2 HPW3
Prerequisite: MATH1231 or MATH1241
Note/s: Not available to Science students.
Graphical data analysis. Review of probability, random variables and their properties. The normal and binomial distributions, the central limit theorem. Applications to statistical quality control. Theory of statistical inference including confidence intervals and hypothesis testing with applications to one and two sample problems based on the t- and F- test. Simple and multiple linear regression including data transformations to normality. Design and analysis of experiments, analysis of variance, introduction to factorial designs. Applications will be drawn primarily from the fields of chemical, bioprocess and petroleum engineering. Statistical computing will be based on Matlab.

MATH2889
Applied Statistics SF
Staff Contact: School Office
CP5 S1 HPW2
Prerequisite: MATH1021 or MATH1231 or MATH1241
Note/s: Restricted to courses 3060 and 3070.

MATH2901
Higher Theory of Statistics
Staff Contact: School Office
CP15 S1 HPW4
Prerequisite: MATH1032 or MATH1231 or MATH1042 or MATH1241
Note/s: Excluded MATH2819, MATH2821, MATH2921, MATH2841, MATH2870, MATH2801, BIOS2041.
As for MATH2801 but in greater depth.

MATH2910
Higher Computing for Statistics
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH1021(CR) or MATH1032 or MATH1231 or MATH1042 or MATH1241
Corequisite: MATH2901
Note/s: Excluded MATH2810.
As for MATH2810 but in greater depth.

MATH2931
Higher Linear Models
Staff Contact: School Office
CP15 S2 HPW4
Prerequisites: MATH2901, MATH2910 (except course 3996)
Note/s: Excluded MATH2831, MATH3811, MATH3911, BIOS2041, MATH3870 (before 1997), MATH3050.
As for MATH2831 but in greater depth.

MATH2940
Higher Sample Survey Theory
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2901
Note/s: Excluded MATH2840, MATH3820 (before 1997), MATH3920 (before 1997).
As for MATH2840 but in greater depth.

Mathematics Level III
Students in Mathematics programs must include MATH3010 in their program. Normally this is done in stage 3, but may be done in stage 2 with permission of the Head of School or if specified by a program.
Students in Advanced Science proceeding to Year 4 (Honours) in one of the Mathematics programs should consult with the relevant Department before making a final choice of Level III subjects.

MATH3000
Mathematics/Statistics Project
Staff Contact: School Office
CP7.5 S1 or S2 HPW2 or F HPW1
Prerequisite: At least 30 Credit Points of Level II Mathematics.
Note/s: Enrolment is subject to approval by the Head of School.
Under supervision of an academic staff member of the School of Mathematics a student will undertake a course in reading and/or research on a topic in mathematics or statistics or on applications of mathematics or statistics to other disciplines such as physical, biological or social sciences, economics, finance, computing, etc. The student is expected to write an essay summarizing the results of their project.

MATH3001
Mathematics/Statistics Project
Staff Contact: School Office
CP15 S1 or S2 HPW4 or F HPW2
Prerequisite: At least 30 Credit Points of Level II Mathematics.
Note/s: Enrolment is subject to approval by the Head of School.
Under supervision of an academic staff member of the School of Mathematics a student will undertake a course in reading and/or research on a topic in mathematics or statistics or on applications of mathematics or statistics to other disciplines such as physical, biological or social...
sciences, economics, finance, computing, etc. The student is expected to write an essay summarizing the results of their project.

**MATH3002**  
**Mathematics/Statistics Project**  
*Staff Contact: School Office*  
CP30 S1 or S2 HPW8 or F HPW4  
*Prerequisite:* At least 30 Credit Points of Level II Mathematics.  
*Note/s:* Enrolment is subject to approval by the Head of School.

Under supervision of an academic staff member of the School of Mathematics a student will undertake a course in reading and/or research on a topic in mathematics or statistics or on applications of mathematics or statistics to other disciplines such as physical, biological or social sciences, economics, finance, computing, etc. The student is expected to write an essay of approximately 12,000 words summarizing the results of their project.

**MATH3010**  
**Professional Issues and Ethics in Mathematics**  
*Staff Contact: School Office*  
CP7.5 S2 HPW2  
*Prerequisites:* Completion of stage 2 of a Mathematics program or during stage 2 with permission of the Head of School  
*Note/s:* Compulsory for students in Mathematics programs.

**MATH3021**  
**Mathematics 3**  
*Staff Contact: School Office*  
CP15 F HPW2  
*Prerequisite:* MATH2021 or approved equivalent  
*Note/s:* Excluded any other Level III subject in Pure Mathematics or Applied Mathematics except for MATH3261. Not offered in 1999.

Vector calculus; special functions; convolution theorem and applications; complex variable theory; Fourier integrals; Laplace transforms with application to ordinary and partial differential equations.

**MATH3030**  
**Mathematics 3, Part 1**  
*Staff Contact: School Office*  
CP7.5 S2 HPW2  
*Prerequisite:* MATH2021  
*Note/s:* Excluded: MATH3021. This subject is the first half of MATH3021. No mark will be returned for this subject until MATH3040 is also completed. All students will receive a grade of EC (enrolment continuing) for this subject, which will eventually be replaced by a mark when MATH3040 is completed. Not offered in 1999.

**MATH3040**  
**Mathematics 3, Part 2**  
*Staff Contact: School Office*  
CP7.5 S1 HPW2  
*Prerequisite:* MATH3030  
*Note/s:* Excluded: MATH3021. This subject is the second half of MATH3021. The student must have been enrolled in MATH3030 previously and have a grade of EC in that subject. On completion of MATH3040 a grade will be returned for both MATH3030 and MATH3040. Not offered in 1999.

**Applied Mathematics Level III**

Before attempting any Level III Applied Mathematics subject a student must have completed at least 30 Credit Points of Level II Mathematics including the prerequisites specified below.

Skill in practical numerical computing is highly recommended for students majoring in Applied Mathematics, and hence students are encouraged to take MATH2301, or an equivalent subject, if they have not already done so.

The subject MATH3141 is not available to Science students. Usually only one of the advanced subjects MATH3110, MATH3130, MATH3170 and MATH3250 are offered in one year.

**MATH3101**  
**Numerical Analysis**  
*Staff Contact: School Office*  
CP15 S1 HPW4  
*Note/s:* Excluded MATH3141. This subject includes a substantial computing component, and assumes some familiarity with Matlab.

Analysis of some common numerical methods: Approximation of functions using polynomials and splines, solution of initial value problems for ordinary differential equations, solution of linear algebraic systems via LU and other factorizations, boundary value problems.

**MATH3110**  
**Advanced Numerical Analysis**  
*Staff Contact: School Office*  
CP7.5 HPW2  
*Prerequisite:* A weighted average mark of at least 70 in 30 Credit Points of Level II Mathematics  
*Note/s:* It is highly recommended that MATH3101 be taken concurrently. Not offered every year.

Development and analysis of numerical methods for the computational solutions of mathematical problems. One or more topics selected from: Computational methods for partial differential equations including finite element methods, finite difference methods, spectral methods, multi-grid methods; computational methods for matrix problems including iterative methods and preconditioners, least squares problems and singular value decomposition; orthogonality for matrix and polynomial decomposition, algorithms for parallel computers.
MATH3121
Mathematical Methods
Staff Contact: School Office
CP15 S1 HPW4
Prerequisites: MATH2120, MATH2520
Note/s: Excluded MATH3141, MATH3150.

MATH3130
Advanced Mathematical Methods
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisites: A weighted average mark of at least 70 in MATH2120, MATH2520 and in a further 15 Credit Points of Level II Mathematics
Note/s: It is highly recommended that MATH3121 be taken concurrently. Not offered every year
Fundamental methods for solution of problems in applied mathematics, physics and engineering. One or more topics selected from: asymptotic and perturbation techniques, singularity analysis, nonlinear waves, solitons, bifurcation theory, chaotic dynamics.

MATH3141
Mathematical Methods EE
Staff Contact: School Office
CP15 S2 HPW4
Prerequisites: MATH2501 and one of MATH2100 or MATH2510 or MATH2111
Note/s: Excluded MATH2120, MATH2130, MATH3101.
Restricted in Science course to combined degree courses 3725 and 3726.

MATH3150
Transform Methods
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2520

MATH3161
Optimization Methods
Staff Contact: School Office
CP15 S1 HPW4
Prerequisites: MATH2501, and one of MATH2111 or MATH2120 or MATH2510
Development, analysis and application of methods for optimization problems. Theory of multivariable optimization; including necessary and sufficient optimality conditions, stationary points, Lagrange multipliers, Kuhn-Tucker conditions, convexity and duality. Numerical methods for one dimensional minimization, unconstrained multivariable minimization (including steepest descent, Newton, quasi-Newton and conjugate gradient methods) and constrained multi-variable minimization (including linear programming and quadratic programming).

MATH3170
Advanced Optimization
Staff Contact: School Office
CP7.5 HPW2
Prerequisites: A weighted average mark of at least 70 in MATH2120 and in a further 15 Credit Points of Level II Mathematics including MATH2011 or MATH2100 or MATH2510
Note/s: It is highly recommended that MATH3161 be taken concurrently. Not offered every year
Development, analysis and application of methods for optimization problems. One or more topics from: combinatorial optimization, network flows, complexity, convex programming, non-smooth optimization, duality, complementarity problems, minimax theory, game theory, stochastic optimization, new approaches to linear programming.

MATH3181
Optimal Control
Staff Contact: School Office
CP15 S2 HPW4
Prerequisite: MATH2011 or MATH2100 or MATH2510
An introduction to the optimal control of dynamical systems. Mathematical descriptions of dynamical systems. Stability, controllability, and observability. Optimal control. Calculus of variations. Dynamic programming. Examples and applications are selected from biological, economical and physical systems.

MATH3201
Dynamical Systems and Chaos
Staff Contact: School Office
CP15 S2 HPW4
Prerequisite: MATH2120 or MATH3540 or MATH3541
Regular and irregular behaviour of nonlinear dynamical systems. A selection from topics developing the theory of nonlinear differential and difference equations, with applications to physical, biological and ecological systems. Topics from: stability and bifurcation theory, Floquet theory,
perturbation methods, Hamiltonian dynamics, resonant oscillations, chaotic systems, Lyapunov exponents, Poincaré maps, homoclinic tangles.

MATH3241
Fluid Dynamics
Staff Contact: School Office
CP15 S1 HPW4
Prerequisites: MATH2011 or MATH2100, MATH2120
The mathematical modelling and theory of problems arising in the flow of fluids. Cartesian tensors, kinematics, mass conservation, vorticity, Navier-Stokes equation. Topics from inviscid and viscous fluid flow, gas dynamics, sound waves, water waves.

MATH3250
Advanced Fluid Dynamics
Staff Contact: School Office
CP7.5 HPW2
Prerequisites: A weighted average mark of at least 70 in MATH2011 or MATH2100, MATH2120 and total of 30 Credit Points of Level II Mathematics
Note/s: It is highly recommended that MATH3241 be taken concurrently. Not offered every year.

The mathematical modelling and theory of problems arising in the flow of fluids. One or more topics from atmosphere-ocean dynamics, climate modelling, hydrodynamic stability, turbulence, environmental fluid dynamics, computational methods.

MATH3261
Atmosphere-Ocean Dynamics
Staff Contact: School Office
CP15 S2 HPW4
Prerequisites: MATH2011 or MATH2100, MATH2120
Note/s: Excluded MATH3270
The dynamics underlying the circulation of the atmosphere and oceans are detailed using key concepts such as geostrophy, the deformation radius and the conservation of potential vorticity. The role of Rossby waves, shelf waves, turbulent boundary layers and stratification is discussed. The atmosphere-ocean system as a global heat engine for climate variability is examined using models for buoyant forcing, quasi-geostrophy and baroclinic instability.

MATH3270
Dynamical Meteorology
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisites: MATH2011 or MATH2100, MATH2120; or MATH2079
Note/s: Excluded MATH3261
The equations of dynamical meteorology, continuity, thermodynamics and their consequences, scale analysis, vorticity, turbulence, boundary layer processes, atmospheric wave motions, instability, major synoptic motions, numerical prediction, energy cycles.

MATH3301
Mathematical Computing B
Staff Contact: School Office
CP15 S2 HPW4
Prerequisites: MATH2120, MATH2301
The design and use of computer programs to solve practical mathematical problems. Introduction to Fortran90, partial differential equations, heat equation, iterative methods for linear systems, sparse matrix techniques, mathematical software libraries, code optimization and high performance computing.

Pure Mathematics Level III

Before attempting any Level III Pure Mathematics subject students must have completed at least 30 Credit Points of Level II Mathematics including the prerequisites specified below. For higher subjects the average performance in the above 30 Credit Points should be at distinction level. Subject to the approval of the Head of Department, this may be relaxed.

Students wishing to enrol in Level III Higher Pure Mathematics subjects should consult with the Pure Mathematics Department before enrolling. The subjects MATH3680, MATH3740 and MATH3780 normally are offered only in even numbered years and the subjects MATH3670, MATH3730 and MATH3770 only in odd numbered years.

Note: For each of the following pairs of subjects, although the subjects are no longer offered, students who have completed one of the subjects in the pair may be permitted to enrol in the other subject of the pair with the permission of the Head of Department: MATH3500 and MATH3510, MATH3530 and MATH3580, MATH3540 and MATH3550, MATH3640 and MATH3650. These pairs of subjects have been replaced by MATH3511, MATH3531, MATH3541, MATH3641 respectively.

MATH3400
Logic and Computability
Staff Contact: School Office
CP7.5 S1 HPW2
The propositional calculus, its completeness and consistency; Turing machines; unsolvable problems; computability and Church's thesis; Godel's incompleteness theorems.

MATH3411
Information, Codes and Ciphers
Staff Contact: School Office
CP15 S2 HPW4
Note/s: Excluded MATH3420.
Discrete communication channels: information theory, compression and error control coding, cryptography.
MATH3430
Symbolic Computing
Staff Contact: School Office
CP7.5 S2 HPW2
Note/s: MATH2400 Finite Mathematics is recommended.

Principles of, uses of and algorithms underlying symbolic computing systems. Applications in pure and applied mathematics using a variety of symbolic computing systems.

MATH3500
Group Theory
Note/s: No longer offered, see note above.

MATH3510
Geometry
Note/s: No longer offered, see note above.

MATH3511
Transformations, Groups and Geometry
Staff Contact: School Office
CP15 S2 HPW4
Note/s: Excluded MATH3710, MATH3780, MATH3500, MATH3510.

Euclidean geometry, geometry of triangles, transformations, groups, symmetries, projective geometry.

MATH3521
Algebraic Techniques in Number Theory
Staff Contact: School Office
CP15 S1 HPW4
Note/s: Excluded MATH3710, MATH3740, MATH3520.

The integers, residue class arithmetic, theorems of Lagrange, Fermat and Euler, groups of units, Chinese remainder theorem, primitive roots, Gaussian integers, division algorithm and principal ideals in \( \mathbb{Z}[i] \), quadratic residues, algebraic number fields, extensions, Eisenstein's test, ruler and compass constructions.

MATH3530
Combinatorial Topology
Note/s: No longer offered, see note above.

MATH3531
Topology and Differential Geometry
Staff Contact: School Office
CP15 S2 HPW4
Prerequisite: MATH2011 or MATH2510
Note/s: Excluded MATH3760, MATH3530, MATH3580.

Elementary combinatorial topology of surfaces, classification of surfaces, Euler characteristic, curves and surfaces in space, Gaussian curvature, Gauss theorem, Gauss-Bonnet theorem.

MATH3540
Ordinary Differential Equations
Note/s: No longer offered, see note above.

MATH3550
Partial Differential Equations
Note/s: No longer offered, see note above.

MATH3560
History of Mathematics
Staff Contact: School Office
CP7.5 S2 HPW2

Topics from the history of mathematics, with emphasis on the development of those ideas and techniques used in undergraduate courses. Students are expected to read widely and to present written material based on their readings.

MATH3570
Foundations of Calculus
Staff Contact: School Office
CP7.5 S1 HPW2
Note/s: Excluded MATH3610.

Properties of the real numbers, convergence of sequences and series, properties of continuous and differentiable functions of a real variable.

MATH3580
Differential Geometry
Note/s: No longer offered, see note above.

MATH3610
Higher Real Analysis
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2610 or MATH2011(CR) or MATH2510(CR)
Note/s: Excluded MATH3570.

The limit processes of analysis, metric spaces, uniform convergence, Arzelà-Ascoli theorem, Stone-Weierstrass theorem, Riemann integral.
MATH3620
Higher Functional Analysis
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisites: MATH3610, MATH2601 or MATH2501(CR)

MATH3630
Higher Integration and Mathematical Probability
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3610

MATH3640
Higher Ordinary Differential Equations
Note/s: No longer offered, see note above.

MATH3641
Higher Differential Equations
Staff Contact: School Office
CP15 S1 HPW4
Prerequisites: MATH2501(CR) or MATH2601, MATH2520 (CR) or MATH2620
Note/s: Excluded MATH3540, MATH3550, MATH3541, MATH3640, MATH3650.
As for MATH3541 but in greater depth.

MATH3650
Higher Partial Differential Equations
Note/s: No longer offered, see note above.

MATH3670
Higher Set Theory and Topology
Staff Contact: School Office
CP7.5 S1 HPW2
Corequisite: MATH3610
Note/s: This subject is offered in odd numbered years only.
Set theory, axiom of choice, ordinals and cardinals, topological spaces, compactness, quotient topologies.

MATH3680
Higher Complex Analysis
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2620 or MATH2520 (CR)
Note/s: MATH3610 is recommended. This subject is offered in even numbered years only.
Topics in advanced complex function theory from: conformal mappings, analytic continuation, entire and meromorphic functions, elliptic functions, asymptotic methods, integral formulae, harmonic functions, Riemann surfaces.

MATH3710
Higher Algebra I
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2601 or MATH2501(CR)
Note/s: Excluded MATH3500, MATH3511, MATH3521.
Groups, sub-groups, factor groups, matrix groups, Sylow theorems, isomorphism theorems, rings, ideals, factor rings, fields, algebraic and transcendental extensions, constructability, finite fields.

MATH3720
Higher Algebra II
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3710
Galois theory, additional group theory, representations and characters of finite groups.

MATH3730
Higher Advanced Algebra
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3710
Note/s: This subject offered in odd numbered years only.
Topics from: rings, commutative rings, factorisation theory, modules, associative and Lie algebras, Wedderburn theory, category theory.

MATH3740
Higher Number Theory
Staff Contact: School Office
CP7.5 S2 HPW2
Note/s: Excluded MATH3520, MATH3521. This subject offered in even numbered years only.
Topics from: elementary number theory, prime numbers, number theoretic functions, Dirichlet series, prime number theorem, continued fractions, Diophantine approximation, quadratic reciprocity, algebraic number theory, class number theorem.

MATH3760
Higher Topology and Differential Geometry of Surfaces
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisites: MATH2601 or MATH2501(CR), MATH2610 or MATH2011(CR) or MATH2510(CR)
Note/s: Excluded MATH3530, MATH3531, MATH3580.
Classification of surfaces: homotopy, homology, Euler characteristic. Embedded surfaces: differential geometry, Gauss-Bonnet and de Rham theorems.

MATH3770
Higher Calculus on Manifolds
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3760
Note/s: This subject offered in odd numbered years only.
Manifolds, vector fields, flows, introduction to Morse theory, differential forms, Stokes theorem, de Rham cohomology.
MATH3780
Higher Geometry
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisites: MATH2601 or MATH2501(CR), MATH3710 or MATH3500(CR)
Notes: Excluded MATH3510, MATH3511. This subject offered in even numbered years only.
Axiomatic geometry, affine geometry, Desargues theorem, projective geometry, spherical and hyperbolic geometry.

Statistics Level III
Not all level III statistics subjects are offered every year. Contact the department of statistics for details.

Note: There was a major revision of Level III Statistics subjects in 1997. Any student who has taken Level II Statistics subjects before 1996 or Level III Statistics subjects before 1997 and wishes to take Level III Statistics subjects from 1997 should consult the Head of Department.

MATH3050
Regression Analysis and Experimental Design
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2801 (from 1996) or MATH2821 or MATH2841 or approved equivalent
Notes: Excluded MATH2831, MATH2931, MATH3811, MATH3830, MATH3911, MATH3930, MATH3870 (before 1997). Not offered in 1999.

MATH3060
Applied Stochastic Processes
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2841 or MATH2801 or approved equivalent
Notes: Excluded MATH3801, MATH3901. Not offered in 1999.
An introduction to processes in discrete and continuous time Markov chains and Markov processes, branching processes, time series with moving average models.

MATH3800
Statistical Computation I
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisites: MATH2831, MATH2810
Notes: Excluded MATH3861
Use of major statistical packages e.g. SAS, Minitab, Splus, GENSTAT, Xlisp-stat. Data organisation for package use. Extending packages using subroutine libraries. Applications to multiple regression analysis. Simulation of random variables.

MATH3810
Statistical Computation 2
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisites: MATH3800
Notes: Excluded MATH3861
Principles of simulation in statistical inference. Computationally intensive statistical methods such as resampling or the bootstrap. Nonparametric curve and density estimation methods. Optimization methods in statistics. Splus and other specialist software will be used.

MATH3820
Time Series and Spatial Analysis
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3801
Notes: Excluded MATH3920 (from 1997).

MATH3830
Design and Analysis of Experiments
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisites: MATH2831 or MATH3811
Notes: Excluded MATH3050, MATH3870 (before 1997), MATH3930.

MATH3840
Statistical Inference
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2831 or MATH2821
Notes: Excluded MATH3940.
Uniformly minimum variance unbiased estimation. Cramer-Rao inequality, Lehman-Scheffe theorem. Monotone likelihood ratio distributions and uniformly most powerful unbiased tests. Generalized likelihood ratio tests, exact tests and large samples tests. Bayesian point estimation, interval estimation and hypothesis testing.
MATH3850
Nonparametric Methods
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisites: MATH2801 (from 1996) or both
MATH2821 and MATH2830
Note/s: Excluded MATH3950.

MATH3860
Nonlinear Regression Modelling
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2831
Notes: Excluded MATH3960.

MATH3870
Multivariate Analysis
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2831
Notes: Excluded MATH3970.
Multivariate normal distribution, Hotelling’s T2, Wishart distribution. Discriminant analysis, principal component analysis, canonical analysis and factor analysis. Use of SAS, Splus and Minitab statistical packages.

MATH3880
Theory of Probability
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2801
Note/s: Excluded MATH3971, MATH3980.
Probability spaces, convergence of random variables, Borel-Cantelli lemma, laws of large numbers, martingales, central limit theorem, Domains of attraction, applications to large sample statistical inference and to financial modelling.

MATH3890
Special Topics in Statistics
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2801, MATH2831
New developments in statistical science theory and methods.

MATH3901
Higher Stochastic Processes
Staff Contact: School Office
CP15 S1 HPW4.5
Prerequisites: MATH2501, MATH2011 or MATH2510, MATH2901
Note/s: Excluded MATH3801, MATH3880 (before 1997), MATH3060.
As for MATH3801 but in greater depth.

MATH3920
Higher Time Series and Spatial Analysis
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3901
Note/s: Excluded MATH3820 (from 1997).
As for MATH3820 but in greater depth.

MATH3930
Higher Design and Analysis of Experiments
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH3901
Note/s: Excluded MATH3830, MATH3870 (before 1997), MATH3050.
As for MATH3830 but in greater depth.

MATH3940
Higher Statistical Inference
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2901 (from 1996) or MATH2921
Note/s: Excluded MATH3840.
As for MATH3840 but in greater depth.

MATH3950
Higher Nonparametric Methods
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisites: MATH2901 (from 1996) or both
MATH2921 and MATH2930
Note/s: Excluded MATH3850.
As for MATH3850 but in greater depth.

MATH3960
Higher Non-linear Regression Modelling
Staff Contact: School Office
CP7.5 S1 HPW2
Prerequisite: MATH2931
Notes: Excluded MATH3860.
As for MATH3860 but in greater depth.

MATH3970
Higher Multivariate Analysis
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2931
Notes: Excluded MATH3870.
As for MATH3970 but in greater depth.
MATH3980
Higher Theory of Probability
Staff Contact: School Office
CP7.5 S2 HPW2
Prerequisite: MATH2901
Note/s: Excluded MATH3971, MATH3880.
As for MATH3880 but in greater depth.

Mathematics Level IV
To enter Level IV Mathematics students must be in the Advanced Science course and have completed the first three years of one of the programs 0600, 1000, 1006, 1010, 1060, 1061, 1066, 1067 or 6810 with an appropriate set of Level III subjects (or the equivalent in a double degree Course) and received permission from the Head of the appropriate Department.

Normally a credit average in the Level III Mathematics subjects specified in the program is required and some evidence of the ability to undertake independent study. In special cases other subjects may be substituted for the Mathematics subjects. Students should discuss their Level III selection of subjects with the Head of the appropriate Department. For Honours Pure Mathematics some higher level Mathematics subjects should normally be included at Levels II and III.

Subjects MATH4003/MATH4004, MATH4103/MATH4104, MATH4603/MATH4604 and MATH4903/MATH4904 lead to the award of an Honours degree.

Program 1010 is a four year program in which Honours may be awarded based on a weighted average of the subjects studied over the complete program.

MATH4003/MATH4004
Mathematics and Computer Science Honours
Staff Contact: School Office
CP120 F
Prerequisites: Completion of 3 years of Advanced Science programs 0600, 1060 or 1066 including 45 Credit Points of Level III Computer Science subjects and 45 Credit Points of Level III Mathematics subjects. Approval from the Head of School.
Note/s: See the preamble for Mathematics Level IV.
Undergraduate thesis in Applied Mathematics or Pure Mathematics together with advanced lectures on topics chosen half from MATH4103 or MATH4603, and half from Computer Science.

MATH4103/MATH4104
Applied Mathematics 4 (Honours)
CP120 F
Prerequisite: Completion of 3 years of any Advanced Science Mathematics program. Approval from the Head of Department.
Note/s: See the preamble for Mathematics Level IV.
Skill in practical numerical computing is highly recommended for students taking this subject. Those students who have not already taken a suitable computing subject may be required to take a short bridging course.
Undergraduate thesis together with advanced lectures on topics chosen from the following fields: advanced mathematical methods for applied mathematics, advanced optimization, numerical analysis, theory of linear and non linear dynamical systems, optimal control, operations research, functional analysis and applications, mathematics of economic models and of economic prediction, fluid mechanics, oceanography, micro hydrodynamics, and analytical and numerical solution of partial differential equations. May also include advanced lectures given by other Departments or Schools.

MATH4603/MATH4604
Pure Mathematics 4 (Honours)
CP120 F
Prerequisite: Completion of 3 years of any Advanced Science Mathematics program. Approval from the Head of Department.
Note/s: See the preamble for Mathematics Level IV.
Undergraduate thesis together with advanced lectures on topics chosen from the fields of current interest in Pure Mathematics. May also include advanced lectures given by other Departments or Schools.

MATH4903/MATH4904
Theory of Statistics 4 (Honours)
CP120 F
Prerequisite: Completion of 3 years of any Advanced Science Mathematics program including 45 Credit Points of Level III Statistics subjects. Approval from the Head of Department.
Note/s: See the preamble for Mathematics Level IV.
Undergraduate thesis together with advanced lectures on topics chosen from the following fields: mathematical basis, experimental design, response surfaces, stochastic processes, theories of inference, sequential analysis, non parametric methods, multivariate analysis, mathematical programming, information theory, discrete distributions. May also include advanced lectures given by other Departments or Schools.

MATH4012
Mathematics and Finance Thesis Project
Staff Contact: School Office
CP35 S1 HPW4 and S2 HPW5
Prerequisites: Completion of Stage 3 of program 1010.
Under the supervision of a member of the academic staff of the School of Mathematics a student will undertake a major project in mathematics and finance. The project could range from reading and/or research on theoretical aspects to financial engineering involving implementation of a practical model in C/C++. Research interaction with the finance industry is encouraged. The student will write a thesis summarising the result of their project and make a presentation of it.
Materials Science and Engineering

All subjects in Materials Science and Engineering are restricted to program 0400 and courses 3025, 3030, 3125, 3615 or to specific combined degrees.

SESC3310
Social Issues in Science and Technology
Staff Contact: Prof CC Sorrell
CP7.5 S1 HPW2

The subject covers social issues arising from future technological developments and the role that a professional applied scientist can play in influencing future directions. It will be taught by a combination of group activity, case studies and projects and seminars from visiting speakers, some of whom will be from disciplines other than Science and Technology.

MATS1001
Introduction to the Materials Industry
Staff Contact: Dr V Sahajwalla
CP5 S2 HPW2

The role of materials science and engineering in industry. Engineering materials. Information retrieval. Communication skills. Plant visits. Introductory materials science. Structure and properties of main types of engineering materials with emphasis on the ways in which properties may be controlled by controlling structure.

MATS1002
Microstructural Analysis
Staff Contact: Dr P Krauklis
CP7.5 S2 HPW3
Note/s: Restricted to Combined degree course 3681.

MATS1011
Introduction to Materials Engineering
Staff Contact: A/Prof A G Crosky
CP2.5 S1 HPW1

Metals, ceramics, polymers and composites, their structure, chemical, physical and mechanical properties, engineering applications and production with particular reference to Australian industries.

MATS1021
Introduction to Computing
Staff Contact: Dr MJ Hoffman
CP5 S2 HPW2

Introductory computing. Outline of computer architecture. Features of common computing languages; syntax, structure, variable typing, portability. Basic syntax. Common numerical techniques, function evaluation, Monte Carlo techniques; assignments involving application of these techniques. Word processing, spreadsheets and databases.

MATS1043
Heat, Fluid and Mass Flow in Materials Processing
Staff Contact: Dr V Sahajwalla
CP7.5 S1 HPW2

In-depth understanding of fundamental principles dictating transport phenomena in materials processing. Development of governing equations related to the transfer of fluid, energy and mass and their inter-dependence based upon fundamentals to analyse and solve problems encountered in current metallurgical operating environments. Application of the understanding developed to the emerging new technologies for metals processing such as direct reduction and smelting for iron-making, near net shape casting.

MATS1052
Materials Engineering 1B
Staff Contact: School Office
CP10 S2 HPW3

Heat applications of principles of steady and unsteady heat transfer in the production and application of materials. Course examples are drawn from materials engineering practice in the broadest sense. Heat flow in materials processing involving high temperature solid, liquid and gaseous phases. Thermal properties of dense and porous materials. Heat treatment, casting, sintering, corrosion, etc. Computer programs for calculating heat flow in materials.

MATS1072
Physics of Materials
Staff Contact: Dr S Bandyopadhyay
CP10 S1 HPW3
Prerequisite: PHYS1002
Note/s: Restricted to Combined degree course 3681.

Interatomic bonding in solid materials. Types of interatomic bonds, metallic, covalent, ionic. Introductory quantum mechanics in one dimension, free electron theory, effects of periodic potential, density of states curves. Effect of electron to atom ratio on conductivity and crystal structure; semiconductors; intrinsic, extrinsic. Exchange energy; ferromagnetism, antiferromagnetism. Elementary perturbation theory, covalent bond; crystal structures, properties. Ionic bond, force models, properties.

MATS1082
Thermodynamics of Materials 1
Staff Contact: A/Prof O Ostrovski
CP10 S2 HPW3

MATS1092
Materials and Design 1
Staff Contact: A/Prof A Crosky
CP7.5 S2 HPW2
An appreciation of the relationships between the properties of materials, component design, manufacturing and product performance. Materials selection as an integral part of successful design. Long-term potential for materials improvement and substitution. Plant visits to selected materials processing plants.

MATS1093
Thermodynamics of Materials 2
Staff Contact: A/Prof O Ostrovski
CP7.5 S1 HPW2
Prerequisite: MATS1082

MATS1112
Phase Equilibria
Staff Contact: School Office
CP7.5 S1 HPW2
Notes: Restricted to Combined degree course 3681.

MATS1113
Ceramic Process Principles 1
Staff Contact: Dr OC Standard
CP5 S1 HPW2

MATS1114
Modelling in Materials Engineering
Staff Contact: Dr MJ Hoffman
CP15 S1 HPW4
Prerequisites: MATH1131 or MATH1141 or MATH1231 or MATH1241 or MATH1021 or 2021 or MATH2021 or MATS1132 or MATS1162 or MATS1092
The subject introduces a range of numerical and analytical modelling techniques and then applies them to situations faced in materials science and engineering. Initially the pre-requisite knowledge is reviewed. Topics then covered are finite difference modelling, finite element modelling, dimensional analysis and surface response methodology. These techniques are then applied to stress analysis, fluid flow and heat transfer, and process modelling. A number of commercial software packages are introduced as well as designing computer programs to suit specific situations.

MATS1132
Materials Engineering 1A
Staff Contact: Dr V Sahajwalla
CP12.5
Unit 1 Fluid Flow S1 HPW3
Fluid flow in materials processing. Application of the principles of fluid flow in the production and application of ceramic and metallic materials. Examples are drawn from ceramic, materials and metallurgical engineering practices in the broadest sense.
Unit 2 Materials Process Principles S2 HPW1
Introduction to engineering calculations. Material balances. Techniques for solving problems including selection of the basis for calculations. General energy balances. Unsteady state material and energy balances. Examples are drawn from ceramic, materials and metallurgical engineering practices.

MATS1142
Crystallography and X-Ray Diffraction
Staff Contact: Dr V Sahajwalla
CP7.5 S1 HPW3

MATS1162
Mechanical Properties of Materials
Staff Contact: Dr P Krauklis
CP10 S1 HPW3

MATS1163
Chemistry of the Solid State
Staff Contact: Prof CC Sorrell
CP5 S2 HPW2
Crystal chemistry; nature of bonding in solids, silicate structures; and structure-composition relationships. Glass and glass-ceramics. Reaction with solids, grain boundary and interfacial effects, ceramic reactions, and polymorphic transformations (oxides, non-oxides, alumino-silicates).
MATS1164
Welding Science and Technology
CP7.5
Unit 1 Welding Technology
Staff Contact: A/Prof A Crosky
S1 or S2 HPW1
Fusion welding and allied processes. Capabilities, advantages and limitations.

Unit 2 Welding Metallurgy
Staff Contact: A/Prof A Crosky
S1 or S2 HPW2
Metallurgical aspects of fusion welding and allied processes. Cause of welding defects and weldability of carbon and alloy steels, stainless steels, aluminium and other common non-ferrous alloys. Assessment of welds by mechanical testing and non-destructive methods.

MATS1183
Non-Ferrous Physical Metallurgy
Staff Contact: Dr P Krauklis
CP7.5 S1 HPW2
Constitution, microstructure, processing and properties of non-ferrous alloys. Cast and wrought alloys based on aluminium, copper, magnesium, lead, tin and zinc.

MATS1213
Design for Corrosion Control
Staff Contact: Prof DJ Young
CP7.5 S1 HPW2

MATS1214
Welding and other Joining Processes
Staff Contact: A/Prof A Crosky
CP7.5 S2 HPW2
Fusion welding. Capabilities, advantages and limitations. Metallurgical aspects of fusion welding. Cause of welding defects and weldability of carbon and alloy steels, stainless steels, aluminium and other common non-ferrous alloys. Design of welded fabrications to reduce distortion and the risk of failure by fatigue, brittle fracture, etc. Soldering, brazing, adhesive bonding.

MATS1224
Materials Characterisation
Staff Contact: School Office
CP2.5 S1 HPW1
Materials characterisation by advanced techniques including secondary ion mass spectroscopy (SIMS), auger electron spectroscopy (AES), X-ray photoelectron spectroscopy (XPS) and laser Raman spectroscopy.

MATS1234
Heat Resisting Alloys
Staff Contact: Prof DJ Young
CP2.5 S1 HPW1

MATS1243
Management 1
Staff Contact: Dr P Krauklis
CP10 S2 HPW3

Operations management: systems, strategies and benefits. Quality assurance, and quality management systems. The elements of total quality management, TQM.

MATS1244
Management 2
Staff Contact: Dr P Krauklis
CP15 S1 HPW4
The major issues, research findings and management strategies relating to the human side of enterprise. Topics include management and power, leadership and innovation, managerial decision-making, stress at work, group dynamics and inter-group conflict, organisational design, goal setting and performance appraisal, approaches to personal and organisational development. Marketing and sales; marketing research, marketing strategies, customer relations, total product package. Project management: project planning and scheduling, contract planning and control, recent developments.

MATS1254
Design Project
Staff Contact: A/Prof A Crosky
CP10 S1 HPW3 S2 HPW1
This project will cover the design of a selected piece of processing equipment or an engineering component. It will involve selection and specification of materials and other relevant aspects covered within the undergraduate course.

MATS1283
Ferrous Physical Metallurgy 1
Staff Contact: Dr P Krauklis
CP10 S2 HPW3
Binary and ternary iron-carbon equilibria. Carbon steel, phase transformation, microstructures, heat treatment and mechanical properties. Modification of carbon steel characteristics by alloying elements. Alloy engineering
steels, tool and die steels, corrosion and oxidation resistant steels, high strength low-alloy steels. Microstructure and properties of grey, white, malleable, ductile and alloy cast irons.

MATS1284
Light Alloys
Staff Contact: A/Prof P Munroe
CP2.5 S2 HPW1

MATS1294
Electrical Ceramics
Staff Contact: Dr OC Standard
CP10 S1 HPW3

MATS1304
Composite Materials
Staff Contact: A/Prof A Crosky
CP7.5 S2 HPW2

MATS1323
Pyrometallurgy-2
Staff Contact: A/Prof O Ostrovski
CP10 S2 HPW4
Pre-requisites: MATS9650 Pyrometallurgical Processes
The subject includes three components: (1) selective topics in iron making (advanced blast furnace and alternative iron making), steel making (BOF process) and non-ferrous metallurgy, (2) extractive metallurgy laboratory and (3) metallurgical plant practice.

MATS1334
Pyrometallurgy-3
Staff Contact: A/Prof O Ostrovski
CP7.5 S2 HPW2
Pre-requisites: MATS9650 Pyrometallurgical Processes
The subject includes selective topics in iron making, steel making and non-ferrous metallurgy, particularly, electrometallurgy of steel, ferroalloys and aluminium; casting and solidification; and structure and properties of metallurgical melts.

MATS1384
Ferrous Physical Metallurgy 2
Staff Contact: Dr P Krauklis
CP2.5 S1 HPW1
Prerequisites: MATS1283
Developments in physical metallurgy of low-carbon sheet and structural steels, high-strength low-alloy steels, corrosion and heat resisting steels, tools and die steels, and selected other types of ferrous alloys.

MATS1414
Surface Treatments and Wear
Staff Contact: Dr P Krauklis
CP7.5 S2 HPW2

MATS1464
Materials Seminar
Staff Contact: Prof CC Sorrell
CP7.5 F HPW1
Demonstration of public speaking skills and techniques. Preparation of visual aids. Library usage. Preparation and standards of written material. Chairpersonship. Each student is required to make two oral presentations based on the honours project.

MATS 1484
Thermomechanical Processing and Advanced Ferrous Metallurgy
Staff contact: Dr P Krauklis
CP7.5 S2 HPW2
Pre-requisites: MATS1283
Unit 1 Thermomechanical Processing S2 HPW1
Unit 2 Advanced Ferrous Metallurgy S2 HPW1
Developments in physical metallurgy of low-carbon sheet and structural steels, high-strength low-alloy steels, corrosion and heat resisting steels, tool and die steels, and selected other type of ferrous alloys.

MATS1534
Design with Brittle Materials
Staff Contact: Dr MJ Hoffman
CP10 S1 HPW3
Incorporates MATS4333 Fracture Mechanics plus effects of composition, microstructure, and physical properties on the mechanical properties of ceramics, design approaches for ceramics, inspection and non-destructive testing of ceramics, and case studies.
MATS2123 Ceramic Process Principles 2  
Staff Contact: Dr OC Standard  
CP5 S2 HPW2  

MATS2133 Ceramic Raw Materials  
Staff Contact: Dr OC Standard  
CP5 S1 HPW2  
The geological origin of ceramic raw materials. The minerals, mineralogical composition, properties and uses of commercial clays. The sources, physical properties and uses of non-clay raw materials.

MATS2143 Ceramic Equipment  
Staff Contact: Dr OC Standard  
CP5 S2 HPW2  
The principles of operation, construction and fields of application of equipment used in the ceramic industry in the following areas: preparation of raw materials and auxiliary processing operations; forming, drying and firing of ceramic products.

MATS2153 Ceramic Processing Laboratory  
Staff Contact: Dr OC Standard  
CP7.5 S2 HPW3  
Laboratory program illustrating processing and engineering aspects of ceramic technology. Students are required to take part in a series of factory inspections.

MATS2183 Refractories  
Staff Contact: Prof CC Sorrell  
CP7.5 S2 HPW2  
Classification of refractories. Chemical and physical properties of refractories. Introduction to raw materials and manufacturing technology. A detailed study of chemical reactions occurring between refractories and solid, liquid and gas phases in ferrous and nonferrous metal industries. Review of phase equilibria.

MATS2203 Physico Chemical Ceramics Laboratory  
Staff Contact: Prof CC Sorrell  
CP7.5 S1 HPW3  
Laboratory program illustrating the physical and chemical properties associated with the processing and performance of ceramic materials. Students are required to take part in a series of factory inspections.

MATS2213 Diffusion  
Staff Contact: Prof DJ Young  
CP7.5 S1 HPW2  

MATS2223 Phase Transformations  
Staff Contact: School Office  
CP10 S2 HPW3  

MATS2254 Ceramic Engineering Design  
Staff Contact: Dr OC Standard  
CP5 S2 HPW2  
Engineering aspects of ceramic processing. Ceramic engineering design including design of dryers, kilns and glass tanks. Case studies. Pollution control equipment.

MATS2264 Sintering of Ceramics  
Staff Contact: Prof CC Sorrell  
CP5 S1 HPW2  

MATS2273 Chemistry of Ceramic Processes  
Staff Contact: Prof CC Sorrell  
CP5 S1 HPW2  
High-temperature reactions involving clays, silicates, oxides, and nonoxides. Processing effects of calcining, chemical reaction, and vitreous and crystalline bond formation. Chemical and physical aspects of production of whitewares, porcelain, heavy clay products, glass, cements, cermets, and advanced high-purity ceramics.

MATS2284 Thermal Properties of Ceramics  
Staff Contact: Prof CC Sorrell  
CP5 S2 HPW2  
Heat capacity, measurement of heat capacity, and factors affecting heat capacity. Thermal expansion, measurement of thermal expansion, and factors affecting thermal expansion. Thermal conductivity, thermal diffusivity,
measurement of thermal conductivity and thermal diffusivity, factors affecting thermal transport, phonon and photon conductivity, and factors affecting phonon and photon conductivity. Thermal stresses and thermal shock. Influence of structure and composition of pure materials on thermal conductivity of multiphase ceramics.

**MATS2313 Chemistry of Ceramics**  
*Staff Contact: Prof CC Sorrell*  
CP7.50 S1 HPW2

Geological origin and classification of ceramic raw materials. Composition, crystal structures, physical properties, chemical reactions, and physical aspects of production of: clay minerals and commercial clays, silicates, porcelain, whitewares, cements and plaster, advanced high purity ceramics, refractory oxides, and cermets.

**MATS2314 Glass-Based Ceramics**  
*Staff Contact: Dr OC Standard*  
CP7.50 S2 HPW2

**MATS2323 Ceramic Processing and Design 1**  
*Staff Contact: Dr OC Standard*  
CP7.5 S1 HPW2

**MATS2333 Ceramic Processing and Design 2**  
*Staff Contact: Dr OC Standard*  
CP7.5 S2 HPW2

Pre-requisites: MATS2323 Ceramic Processing and Design 1

**MATS3443 Polymer Science and Engineering**  
*Staff Contact: Dr S Bandyopadhyay*  
CP10 S2 HPW3

**MATS3524 Polymer Engineering Project**  
*Staff Contact: Dr V Sahajwalla*  
CP30 F HPW6

An experimental or technical investigation or design related to some aspects of materials engineering in the specific discipline (ceramic engineering, metallurgical engineering or materials engineering).

**MATS3544 Polymer Engineering**  
*Staff Contact: Dr S Bandyopadhyay*  
CP15 S1 HPW5

**MATS3564 Polymer Engineering 1**  
*Staff Contact: Dr S Bandyopadhyay*  
CP10 HPW3

Prerequisites: MATS3443

MATS3574  
Polymer Engineering 2  
Staff Contact: Dr S Bandyopadhyay  
CP10 HPW3  
Prerequisites: MATS3443

MATS4113  
Fractographic Analysis and Non-Destructive testing  
Staff Contact: A/Prof A Crosky  
CP12.5 S2 HPW4

Unit 1 Fractographic Analysis S2 HPW3
Classification of macroscopic and microscopic fracture mechanisms. Initiation and propagation of ductile brittle, fatigue, stress corrosion and corrosion fatigue fractures. Effect of material defects, design deficiencies and incorrect processing on the origin and cause of fracture. Analysis of various modes of fracture using fractographic techniques involving optical microscopy and scanning and transmission electron microscopy.

Unit 2 Non-Destructive Testing S2 HPW1

MATS4124  
Heat Resisting and Light Alloys  
Staff contact. A/Prof P Munroe  
CP7.5 S2 HPW2  
Co-requisites: MATS1183

Unit 1 Heat Resisting Alloys S2 HPW1

Unit 2 Light Alloys S2 HPW1

MATS4154  
Mechanical and Thermal Processing of Metals  
Staff Contact: A/Prof A Crosky  
CP2.5 S1 HPW1

MATS4204  
Industrial Metallurgy Project  
Staff Contact: School Office  
CP15 F3

An experimental investigation of some aspect of industrial metallurgy.

MATS4333  
Fracture Mechanics  
Staff Contact: Dr MJ Hoffman  
CP5 S1 HPW2

MATS4513  
Deformation of Metals  
Staff Contact: A/Prof P Munroe  
CP7.5 S1 HPW2

Atomic and molecular description of deformation. Introduction to dislocation theory and its application to mechanical properties.

MATS4523  
Strengthening Mechanisms in Metals  
Staff Contact: A/Prof P Munroe  
CP7.5 S2 HPW2

Strengthening mechanisms, creep, fracture, grain size dependence of strength. Introduction to generation of deformation and recrystallisation textures. Measurements of age-hardening, activation energy of strain ageing.

MATS4533  
Metal Forming Processes  
Staff Contact: A/Prof A Crosky  
CP7.5 S1 HPW2

MATS4543  
Fractographic Analysis  
Staff Contact: A/Prof A Crosky  
CP7.5 S2 HPW3

Classification of macroscopic and microscopic fracture mechanisms. Initiation and propagation of ductile brittle, fatigue, stress corrosion, and corrosion fatigue fractures. Effect of material defects, design deficiencies and incorrect processing on the origin and cause of fracture. Analysis of various modes of fracture using fractographic techniques involving optical microscopy and scanning and transmission electron microscopy.
MATS4553
Non-Destructive Testing
Staff Contact: A/Prof A Crosky
CP2.5 S2 HPW1

MATS4580
Electrometallurgy of Steel and Ferroalloys
Staff Contact: A/Prof O Ostrovski
CP2.5 S2 HPW1

MATS4590
Solidification and Casting
Staff Contact: Dr V Sahajwalla
CP2.5 S2 HPW1
Understanding the fundamentals of solidification (cast structure development, high temperature properties) in casting processes. Emphasis on conventional and emerging near net shape casting processes. Application of the solidification fundamentals to understand mechanisms of various quality problems encountered in these processes. Process optimisation (machine design, chemistry, temperature, heat extraction) to control casting defects.

MATS5213
Metallurgical Plant Practice
Staff Contact: Dr A Yu
CP2.5 S1 or S2 HPW1
Up to 2 days of metallurgical plant inspections and case studies equivalent to 14 tutorial hours are associated with this subject. Ferrous and non-ferrous plant practice.

MATS5253
Metallurgical Reaction Engineering
Staff Contact: A/Prof O Ostrovski
CP7.5 S1 or S2 HPW2

MATS5263
Extractive Metallurgy
Staff Contact: A/Prof O Ostrovski
CP17.5 S1 HPW3 S2 HPW4

Application of principles of aqueous thermodynamics, electrochemistry, chemical and electrochemical kinetics to hydrometallurgical processes: leaching of mineral and concentrates, solution purification, precipitation, and other separation processes, ion-exchange and liquid-liquid extraction, electrowinning and electrorefining.

MATS5314
Kinetics and Mass Transfer in Metallurgical Processes
Staff Contact: Dr A Yu
CP12.5 S1 HPW4

MATS5324
Modelling of Metallurgical Processes
Staff Contact: Dr A Yu
CP10 S2 HPW4
The mathematical and physical modelling of primary and secondary metals processing operations. Ladle metallurgy operations, entrainment of gases by molten metals, electromagnetically driven flows, dispersion of alloying additions, coalescence of inclusions, modelling metal flow and solidification, blast furnace drainage.

MATS5384
Air Pollution Control in the Metallurgical Industry
Staff Contact: Dr V Sahajwalla
CP2.5 S1 or S2 HPW1
Air pollutants from the different metallurgical industries. Technical principles and equipment to control the emission of pollutants. Examples from the primary and secondary metallurgical industries.

MATS5394
Pollution Control in Materials Processing
Staff Contact: Dr V Sahajwalla
CP7.5 S2 HPW2
Pollutants from the different materials processing routes. Technical principles and equipment to control the emission of pollutants. Examples from the metallurgical and ceramic industries.

MATS7132
Structure and Properties of Metallurgical Phases
Staff Contact: A/Prof O Ostrovski
CP2.5 S1 or S2 HPW1
The atomistic and microscopic approach to melts in process metallurgy, liquid metals and slags. Relationships between melt structure, mechanism and reaction kinetics in smelting and refining operations.
MATS9520
Engineering Materials
Staff Contact: A/Prof A Crosky
CP7.5 S1 HPW3
Microstructure and structure-property relationships of the main types of engineering materials (metals, polymers, ceramics and composites). Micromechanisms of elastic and plastic deformation. Fracture mechanisms for ductile, brittle, creep, fatigue modes of failure in service; corrosion. Metal forming by casting and wrought processes. Phase equilibria of alloys; microstructural control by thermo-mechanical processing and application to commercial engineering materials. Laboratory and tutorial work includes experiments on cast and recrystallised structures, ferrous and non-ferrous microstructures and fracture and failure analysis.

MATS9530
Materials Engineering
Staff Contact: Prof CC Sorrell
CP7.5 S1 or S2 HPW3
Prerequisite: MATS9520
Materials used in Mechanical Engineering and related fields (Manufacturing Engineering Management, Aerospace Engineering, Naval Architecture) are discussed with emphasis on the dependence of properties and performance on microstructure. Aspects of materials selection during the design of engineering components which affect the service performance in applications where failure can occur by brittle fracture, corrosion, creep or fatigue, will also be discussed.

MATS9650
Pyrometallurgical Processes
Staff Contact: A/Prof O Ostrovski
CP7.5 S1 HPW2
Principles and development of pyrometallurgical processes and a review of the unit operations, roasting, sintering, smelting and refining for the treatment of ferrous and non-ferrous minerals.

MATS9712
Materials and Techniques in Design Craft 1
Staff Contact: Prof CC Sorrell
CP10 S1 HPW3
An introduction to the science and technology of materials, emphasizing relationships between structure, composition and properties. Introduction to processing of metallic, ceramic and fibrous materials. Materials recognition and design possibilities are discussed.

MATS9722
Materials and Techniques in Design Craft 2B
Staff Contact: Prof CC Sorrell
CP7.5 S2 HPW3
Casting, working and surface finishing of metals and alloys. Soldering, brazing and welding. Joining metals to glasses, ceramics and gemstones.

MATS9732
Materials and Techniques in Design Craft 2C
Staff Contact: Prof CC Sorrell
CP7.5 S2 HPW3
Structures and properties of clays, non-clays, cements, porcelains, glazes, glasses and other ceramics. Optical properties and colours of glasses, glazes and gemstones. Forming and firing of ceramic bodies, reactions during firing. Kilns and oxidation/reduction effects.

Mechanical and Manufacturing Engineering

Mechanical and Manufacturing Engineering Level I

AVEN1310
Basic Mechanics
Staff Contact: Dr K Zarrabi
CP7.5 S1 HPW2
The subject explains the basic concepts in statics and strength of materials including Newton’s Laws, SI system of units, two-dimensional force systems, moments and couples, equilibrium in two dimensions, stress, strain, stiffness and flexibility, analysis of bars, bending stress and measurement of strain, material properties, theories of failure and composite materials.

AVEN1910
Introduction to Aircraft Engineering
Staff Contact: Mr J Page
CP7.5 S1 HPW2
An explanation of how aircraft fly and how the engineering technologies relate to the vehicle. Concepts and nomenclature relating to flight vehicles and the significance of aircraft configurations and flight systems.

MANF1100
Workshop Technology
Staff Contact: Dr P Mathew
CP7.5 S1 HPW3
Note/s: Protective equipment (eg safety glasses, safety boots etc) is required in order to comply with the Occupational Health and Safety Act. Students must already possess or purchase these items before commencing the course. The price of the items is approximately $100. Students who have done Industrial Arts for the HSC have an appropriate trade or certificate qualification, or are suitably employed, may qualify for exemption from this subject. The implementation of design and its interaction with manufacturing equipment and processes. Manufacturing capabilities and tolerancing. Approximately 30 hours of practical training which includes welding, fitting and machining.
MANF1120
Introduction to Manufacturing
Staff Contact: Dr P Mathew
CP10 S2 HPW5
Notes: Protective items (eg. safety glasses, safety boots, overalls or dustcoat, etc) are required for the practical training in order to comply with the Occupational and Safety Act. Students must possess these items before commencing this course. The cost of the items is approximately $100. Students, who have done appropriate Technology based subjects at school or have an appropriate trade or certificate qualification or are suitably employed, may seek an exemption from the practical training classes.

The relationship between product design and manufacturing processes is introduced with theoretical and practical classes. Description and elementary analysis of manufacturing processes such as forming from liquid or solid, material removal and material joining. Practical training of approximately 33 hours will involve processes such as welding, fitting and machining as well as introduction to safety in a manufacturing environment.

MECH1120
Design and the Engineering Profession
Staff Contact: Dr R A Platfoot
CP7.5 S1 HPW3
To introduce the engineering profession; to assess abilities in written expression, to develop a consciousness of the importance of written, pictorial and oral expression in engineering life and to begin to develop these skills; to begin to develop an awareness of the professional attitude. Introduction to engineering hardware and components; geometry, function, manufacture and reasons for various configurations. The design process, problem identification, search for solution concepts, nontechnical considerations in design, decision techniques, detail design and analysis.

MECH1130
Design Graphics
Staff Contact: Mr AJ Barratt
CP7.5 S2 HPW3
Corequisite: MANF1120

MECH1300
Engineering Mechanics 1
Staff Contact: A/Prof RAJ Ford
CP10 S1 or S2 L2 T2
Prerequisite: As a suitable preparation for this course, it is strongly recommended that students have taken either 2 unit HSC Science (Physics) or 3 unit HSC Science multistrand or 2 unit HSC Industrial Arts (Engineering Science) or equivalent.
Corequisites: MATH1131 or MATH1141
Notes: Excluded MECH0330.

MECH1400
Mechanics of Solids 1
Staff Contact: A/Prof R Randall
CP7.5 S1 or S2 L2 T1
Corequisites: MECH1300 or MECH0330 or MECH0440
Notes: Excluded MECH0430.

Resultants and equilibrium in three-dimensions; stress and strain; Internal forces; stresses, deformation and strain energy due to axial loading, bending and torsion; helical springs.

MECH1500
Computing 1M
Staff Contact: Dr MJ Tordon
CP7.5 S1 L2 T1
Introduction: history, applications, hardware, software, a model of a computer system, editors, operating systems. Networking and the internet. Program design and development: programming objectives, data structures, algorithms, symbolic names, translation of algorithms, steps in programming, programming style, errors and debugging. Data: data types, declarations, input output, file control. Programming constructs: arithmetic expressions, assignments, relational and logical expressions, selection. Application in sorting, word processing, graphics and plotting, simultaneous linear algebraic equations.

MECH2320
Engineering Mechanics 2
Staff Contact: Prof KP Byrne
CP10 F L1 T1
Prerequisites: MATH1231 or MATH1241, MECH1300
Notes: Excluded MECH0430, MECH2300.

Kinetics of systems of particles; steady mass flow. Plane kinematics and kinetics of rigid bodies: moment of inertia; motion relative to translating and rotating frames of reference; equations of motion; work and energy, impulse and momentum. Virtual work for static and dynamic systems. Engineering applications.

Mechanical and Manufacturing Engineering Level II

AVEN2220
Aviation Engineering Experimentation 1
Staff Contact: Mr J Page
CP7.5 S2 HPW2
Notes: Excluded AVEN2200

Exposure to the practical skills associated with aircraft maintenance conducted at the Aeroskills Center at Padstow.
TAFE. Introduction to workshop environment and practices including health and safety aspects. Development of respect for the skills of aircraft maintenance craftsmen.

AVEN2910
Aviation Technologies 1
Staff Contact: Mr Z Vulovic
CP7.5 S2 HPW2
Note/s: Excluded AVEN2210

AVEN2920
Aviation Technologies 2
Staff Contact: Dr R Casey, Mr J Page
CP7.5 S2 HPW2
Note/s: Excluded AVEN2700, AVEN2900

Aircraft propulsion - Elements of internal-combustion (piston) engine cycles, performance and operations, piston engine fuel systems, performance augmentation and engine condition monitoring, elements of propellers, basic propeller thrust equations, variable pitch propellers. Aircraft performance - Flight environment aircraft classifications, operational requirements, payload-range, economics, break even point field requirement. Accelerated and unaccelerated flight manoeuvering and gust envelope, energy height, power and wind loading.

AVEN2930
Aviation Technologies 3
Staff Contact: Dr N Ahmed, A/Prof D Kelly
CP7.5 S2 HPW2
Prerequisites: AVEN1310
Note/s: Excluded AVEN2400, AVEN2600

MECH2411
Mechanics of Solids 2A
Staff Contact: Dr HL Stark
CP7.5 S1 or S2 HPW3
Prerequisites: MATH1231 or MATH1241, PHYS1918
Corequisite: MECH1400
Note/s: Excluded MECH2401.

Revision of Statics. The variation with orientation of stress at a point in 2D Mohr's circle. The variation with orientation of stress at a point in 3D given one principal stress. The variation with orientation of strain at a point, Mohr's circle, strain gauges. The relationships between stress and strain during linear elastic deformation. The interdependence of elastic moduli. The variation with orientation of stress at a point in the general 3D case. Octahedral stresses. Strain energy stored in a linearly elastic body resulting from volume change and from distortion. Yield criteria. Fatigue, stress concentrations, Miner's rule. Material properties and testing.

MECH2412
Mechanics of Solids 2B
Staff Contact: Dr HL Stark
CP7.5 S2 HPW3
Prerequisite: MECH2411
Note/s: Excluded MECH2402.

MECH2600
Fluid Mechanics 1
Staff Contact: Prof GL Morrison
CP10 F L1 T1
Prerequisites: MATH1131 or MATH1141, PHYS1918

MECH2700
Thermodynamics 1
Staff Contact: A/Prof EM Kopalinskiy
CP10 F L1 T1
Prerequisites: MATH1131 or MATH1141, PHYS1918

Mechanical and Manufacturing Engineering
Level III

AVEN3220
Aviation Engineering Experimentation 2
Staff Contact: Dr N Ahmed
CP7.5 S1 HPW2
Note/s: Excluded AVEN3200

A selection of experiments from airframes analysis, flight mechanics, aircraft propulsion, aircraft systems and aerodynamics. Experiments will make use of the wind-tunnels, systems laboratories, engines laboratories and structural testing facilities in the Engineering Faculty.
AVEN3230
Aviation Systems and Avionics
Staff Contact: Mr Z Vulovic
CP7.5 S1 HPW2
Prerequisites: AVEN2910
Notes: Excluded AVEN3210

AVEN3410
Airframe Analysis and Maintenance
Staff Contact: A/Prof DW Kelly, Dr RA Platfoot
CP7.5 S1 HPW2
Prerequisites: AVEN2930
Notes: Excluded AVEN3400

AVEN3610
Aerodynamics, Stability and Control
Staff Contact: Dr N Ahmed, Mr J Page
CP7.5 S1 HPW2
Prerequisites: AVEN2930
Notes: Excluded AVEN3600, AVEN3900

AVEN3710
Aircraft Propulsion
Staff Contact: Dr R Casey
CP7.5 S1 HPW2
Prerequisites: AVEN2920

AVEN3930
Aircraft Evaluation
Staff Contact: Mr J Page
CP7.5 S2 HPW2
Prerequisites: AVEN2920

Evaluation of fitness for purpose, route matching, range load graphs, environmental constraints, indirect and direct and operating costs, maintenance requirements, fleet capacity, crew requirements, safety and reliability.

AVEN3610
Aerodynamics, Stability and Control
Staff Contact: Dr N Ahmed, Mr J Page
CP7.5 S1 HPW2
Prerequisites: AVEN2930
Notes: Excluded AVEN3600, AVEN3900

AVEN3410
Airframe Analysis and Maintenance
Staff Contact: A/Prof DW Kelly, Dr RA Platfoot
CP7.5 S1 HPW2
Prerequisites: AVEN2930
Notes: Excluded AVEN3400

AVEN3610
Aerodynamics, Stability and Control
Staff Contact: Dr N Ahmed, Mr J Page
CP7.5 S1 HPW2
Prerequisites: AVEN2930
Notes: Excluded AVEN3600, AVEN3900

AVEN3710
Aircraft Propulsion
Staff Contact: Dr R Casey
CP7.5 S1 HPW2
Prerequisites: AVEN2920

AVEN3930
Aircraft Evaluation
Staff Contact: Mr J Page
CP7.5 S2 HPW2
Prerequisites: AVEN2920

Evaluation of fitness for purpose, route matching, range load graphs, environmental constraints, indirect and direct and operating costs, maintenance requirements, fleet capacity, crew requirements, safety and reliability.

Medical

MDCN8001
Principles of Medicine for Optometry Students
Staff Contact: A/Prof L Simons (St Vincent's Hospital)
CP5 F HPW1
Notes: Students normally take the subject in Year 4 of course 3950. Restricted to course 3950.

An overview of historical, epidemiological, pathophysiological, diagnostic, therapeutic and public health aspects of disease in man and the various clinical categories of practice.

Microbiology and Immunology

Note: Some subjects that appear in this section may be restricted to students for whom the subject comprises a compulsory part of their program.

Microbiology and Immunology Level II Subjects

Students must enrol in practical classes for level II Microbiology and Immunology subjects. Enrol for MICR2201 practical classes at the start of session 1, enrol for MICR2011 practical class at the start of session 2. To enrol come to The Microbiology and Immunology School Office on the Friday immediately preceding week 1 of classes.

MICR2201
Fundamentals of Microbiology and Immunology
Staff Contact: Dr I Couperwhite
CP15 S1 HPW6

This subject is designed to give undergraduate and post graduate students a solid background in fundamentals of microbiology and immunology regardless of whether they have had previous experience in biological sciences or not. It should be noted that this subject is not suitable for students without a strong background in the science based disciplines. The subject introduces the student to the fascinating world of microorganisms: their ubiquity, peculiarities and the three domains of life i.e. Eubacteria, Archaea and Eucarya. Most of the subject will consider bacteria, fungi, yeasts and viruses in our every day life and how their activities impinge on our well being. Metabolism and growth, microbial death & microbial genetics will be introduced to the students. Practical aspects of microbiology will be considered such as food
intoxication, infection, spoilage and food fermentation. The immune system & the study of immunology will also be introduced in this subject. This introduction will encourage the student to question controversial areas of microbiology and immunology such as AIDS. Immunization, environmental pollution, food hygiene, food spoilage causes and prevention etc.

MICR2011
Microbiology 1
Staff Contact: Dr P March
CP15 S2 HPW6
Prerequisites: BIOS1101, BIOS1201, MICR2201
Corequisites: BIOC2201 and BIOS2021
This subject is for students majoring in microbiology and who wish to enlarge their knowledge and skills in microbiology beyond those obtained in Fundamentals of Microbiology & Immunology or equivalent subjects at other institutions.

Microbiology and Immunology Level III

MICR3011
Microbial Physiology: a Molecular Approach
Staff Contacts: Dr R Cavicchioli, Dr P March
CP15 S2 HPW6
Prerequisites: MICR2011, MICR3021
Exclusion: Maximum enrolment limited to 18 students. If oversubscribed, placements awarded according to achievements in Levels 1, 2 and 3 subjects
The goal of this course is to combine theory introduced in previous courses with an understanding of how modern research endeavours are approached. This goal will be achieved by linking lectures and laboratories to contemporary research in microbial physiology. Lectures will address molecular mechanisms involved in: determining microbial cell shape, cell division, sensing and responding to environmental signals, strategies for survival in extreme environments, and regulation of the synthesis of gene products. Students will be challenged to identify relevant research problems, to generate feasible solutions to these problems, and to carry out critical peer review.

MICR3021
Microbial Genetics
Staff Contact: Dr R Cavicchioli, Dr D Glenn
CP15 S1 HPW6
Prerequisites: BIOS2021, BIOC2201 and MICR2011
Notes: Excluded BIOT3031.
Essential for students majoring in microbiology. Major topics include genetics of bacteriophage, bacteria and yeasts, mutation and repair, plasmids, gene transfer, transposable genetic elements, gene cloning (genetic engineering) and two component regulatory systems.
The practical component includes a range of contemporary microbial genetics experiments that complement lecture material. They may include experiments involving bacteria, archaea, or yeast involving transpon mutagenesis, gene library construction, gene complementation using recombinant plasmids, gene expression and regulation studies, UV mutagenesis and DNA repair, restriction/ modification systems, promoter rescue experiments, and a variety of gene exchange techniques.

MICR3031
Eucaryotic Microbiology (UTS)
Staff Contact: A/Prof S Hazell
CP15 S2 HPW6
Prerequisite: MICR2011
Exclusion: Maximum enrolment limited to 20 students. If oversubscribed, placements awarded according to achievements in Level 1, 2 and 3 subjects
This course provides an opportunity for students interested in a broad education in medical microbiology to undertake studies in the areas of parasitology and mycology. The unit is offered by agreement with the University of Technology, Sydney, and is taught at the Gore Hill Campus of UTS. The course offers students training in the principals and practices of medical laboratory parasitology and mycology. The parasitology component covers the identification of parasitic worms, insects and protozoa. Mechanisms of disease is also covered. The mycology component examines pathogenic yeasts and fungi, their identification and mechanisms of disease. The course is supported by a comprehensive laboratory program.

MICR3041
Immunology 1
Staff Contact: Dr M Cooley
CP15 S1 HPW6
Prerequisite: BIOC2101 or BIOC2181
Basic immunology and immunological techniques. Topics include innate and adaptive immunity, development of the immune system, induction and expression of the immune response, structure and function of antibodies, antigen-antibody reactions, the major histocompatibility complex, aspects of immunology in disease.

MICR3051
Immunology 2
Staff Contact: Dr A Collins
CP15 S2 HPW6
Prerequisite: MICR3041
Advanced immunology. Major topics include antigen epitope analysis, processing and presentation, lymphocyte biology, immunogenetics of the molecules of recognition, cytokines, immune regulation, the mucosal immune system, immunity to infectious diseases, vaccine development and clinical immunology. Controversies in immunology are a major focus of this subject.
MICR3061
Viruses and Disease
Staff Contact: Dr G Grohmann, A/Prof S Hazell
CP15 S2 HPW6
Prerequisite: MICR2011
Major topics include virus structure, classification and replication strategies, epidemiology, molecular virology and laboratory diagnosis. The pathogenesis of a number of human diseases is discussed in the context of virus-host interactions, the persistence, transfer and control of virus infections in the community. Finally, a 'consultancy brief' is undertaken by students providing the opportunity to gain experience in working in consultancy teams, producing a report and a short seminar.

MICR3071
Environmental Microbiology
Staff Contact: Prof S Kjelleberg
CP15 S2 HPW6
Prerequisite: MICR2201
Highly recommended: MICR2011, BIOC2201, BIOS2021
The course consists of three major themes in basic and applied environmental microbiology: contemporary microbial ecology, water microbiology and environmental biotechnology. The main concepts include biodiversity, structures of microbial communities and microbial interactions. Specific topics in microbial ecology include biodiversity, microbial interactions and communities, biogeochemical cycling, adaption to environmental extremes, gene transfer and evolution and phylogeny. Specific topics in applied and environmental microbiology include waste water treatment and water quality, biofouling, biological control, bioremediation, and the use of smart molecules produced by microorganisms.

MICR3081
Bacteria and Disease
Staff Contact: A/Prof S Hazell
CP15 S1 HPW6
Prerequisite: MICR2011
Highly recommended: MICR3041
Note: Half of the compulsory practical component of this subject consists of seven practical classes run over three and one half days during the mid-session break. In-session time practical classes will be run only in weeks 1 and 2, and weeks 10 through 14.
Bacteria and Disease aims to develop a high level understanding of bacterial pathogenesis, disease control and prevention. We examine in depth a select number of pathogens that portray the diverse characteristics seen in different pathogenic bacterial species. In conjunction with the lecture program, contemporary medical laboratory training is given through a simulated diagnostic unit. Development of communication skills constitutes part of this subject.

Microbiology and Immunology Level IV

MICR4013/MICR4023
Microbiology 4 (Honours)
Staff Contact: Dr P March
CP120 F
Prerequisite: completion of program 4400 or 4410 including Level III subjects totalling 120 Credit Points, 60 of which must be Microbiology and Immunology subjects
Advanced training in selected areas of Microbiology and Immunology: a formal component consisting of seminars, tutorials, introductory electron microscopy and written assignments, plus a supervised research program in a specific area of microbiology or immunology.

Servicing Subject
This subject is taught within course offered the Faculty of Medicine.
For further information regarding the following subjects see the Faculty of Medicine Handbook.

MICR3228
Microbiology for Medical Students
Staff Contact: A/Prof S Hazell
Solely for students enrolled in the Faculty of Medicine.

Optometry
Optometry subjects are restricted to course 3950 and are listed in the course outline. For further information on Optometry subjects consult the School.

OPTM1105
Optics and the Eye I
Staff Contact: School Office
CP20 S1 HPW8
Objectives: Understanding of physical and geometrical optics, and the measurement of optical radiation for the purposes of ocular hazard assessment. Colour based teaching and skills and lighting design.

OPTM1201
Ocular and Visual Science I
Staff Contact: Dr G Boneham
CP10 S2 HPW4
Objectives: To give students an understanding of the anatomy of the eye (particularly the anterior eye), the adnexa and visual system, and detailed information on some aspects of vision that form the foundation of Clinical Optometry. These subjects are studies in greater depth in later years.

Brief Curriculum: Introduction to the gross anatomy of the eye, orbit and adnexa; the microscopic anatomy of the cornea, lens, uvea, eyelids and lacrimal apparatus.

OPTM1202
Clinical Optometry I
Staff Contact: Dr P Anderton
CP15 S2 HPW6

Objectives: Familiarity with basic clinical goals and techniques.

Assessment: Clinical practical assessment 20%; Final examination 80%.

OPTM1205
Optics and the Eye II
Staff Contact: Mr G Dick
CP10 S2 HPW4

Objectives: An integrated lecture and practical course on the components of ocular refraction and the limits of visual resolution.

Assessment: Tutorials (15%); 3 mid-session tests (10%); laboratory and annual written examination (75%).

OPTM1207
Microbiology for Optometry
Staff Contact: Dr P Anderton
CP5 S2 HPW2

OPTM2106
Pathology for Optometry Students
Staff Contact: Dr P Herse
CP4 S1 HPW1.5
Prerequisite: BIOS1201
Corequisite: PHPH2122

Objectives: to introduce general and systemic pathophysiology.

Topics discussed include: cell injury and adaptation, pathogenesis of cell injury, inflammation, edema, thrombosis, embolism, arteriosclerosis, neoplasia, environmental disease, diabetes, hypertension, myocardial infarction, intracranial pathology, cerebral disease

Assessment: Week 8, multiple-choice examination (25%); week 10, essay on a disease topic (10%); end of session written examination (65%).

OPTM2107
Microbiology for Optometry Students
Staff Contact: Dr P Anderton
CP4 S1 HPW1.5
Prerequisite: BIOS1201
Corequisite: OPTM2106

Objectives: An understanding of basic microbiology applied to optometric practice.

Assessment: Mid-session tests (2) 20%; Session examination 80%.

OPTM2205
Measurement of Light and Colour
Staff Contact: A/Prof SJ Dain
CP5 S2 HPW2

Objectives: Understanding of measurement of optical radiation for the purposes of ocular hazard assessment, colour based teaching and skills and lighting design.

Assessment: Open book examination.
OPTM2208
Diagnosis of Ocular Disease
Staff Contact: Dr P Herse
CP7.5 S2 HPW3
Prerequisites: OPTM2106, OPTM2107
Corequisites: OPTM2302, OPTM2301

Objectives: to introduce diagnosis and optometric management of anterior eye disease.

Lectures will be given on: the patho-physiology, diagnostic signs and symptoms, and optometric management of diseases of the lids, conjunctiva, lacrimal system, sclera, cornea, vitreous body and crystalline lens.

Assessment: Week 6 multiple choice examination (10%); week 9, slide test (10%); week 12, slide test (10%); end of session written examination (70%)

OPTM2301
Ocular and Visual Science II
Staff Contact: Dr P Anderton
CP15 S3 HPW S1 2 S 2
Prerequisites: BIOS1201, CHEM1809
Corequisite: PHPH2122

Objectives: An understanding of elements of human structure and function with specific relevance to optometric practice.

Lectures, tutorials and practical classes will present material on: Elements of the human central nervous system; Cranial and orbital structures; Structure and function of the human retina and visual pathway; Nature of eye movements and underlying structure and function; Vestibular function, posture and vision; Autonomic function and pharmacology of the eye.

Assessment: Session 1: Mid-session tests (2) and practical work 20%; Session 2: Mid session tests (2) 20%; Session examinations 80%.

OPTM2302
Clinical Optometry II
Staff Contact: Dr B Junghans
CP37.5 S3 HPW S1 8 S 2
Prerequisites: OPTM1201, OPTM1202, OPTM1204, OPTM1211
Corequisites: OPTM2301, OPTM2303

Objectives: An integrated lecture and practical course which equips the student to be professional in manner with good communication and technical skills and able to carry out a logically sequenced primary care evaluation of the health of the ocular and visual system, refractive status and binocular coordination with a view to prescribing either spectacles or contact lenses for the uncomplicated patient.

Lectures, tutorials and practical classes will deal with: Interviewing skills. Ocular health: history and symptoms, introduction to diagnostic drugs, slitlamp-biomicroscopy, tonometry, direct ophthalmoscopy, external eye examination. Ametropia: aetiology and management of refractive errors, objective and subjective refraction, cycloplegic refraction prescribing lenses, tinted spectacle lenses. Binocular vision: sensory and motor aspects of binocular vision, introduction to binocular vision anomalies.

Accommodation/convergence imbalances, aetiologies of binocular anomalies.

Assessment: Written mid-term and end of session examinations, written assignments, practical examination.

OPTM2303
Spectacle Lens and Optical Systems
Staff Contact: Mr G Dick
CP15 S3 HPW S1 2 S 2 4
Prerequisites: OPTM1201, OPTM1203

Objectives: An understanding of ophthalmic optics applied to spectacle lenses and clinical instruments.

Assessment: Tutorials (10%), 8 mid-session tests (30%) and an annual written examination (60%).

OPTM3208
Diagnosis and Management of Ocular Disease
Staff Contact: Dr P Herse
CP12.5 S3 HPW S1 3 S 2 2
Prerequisites: OPTM2106, OPTM2107, OPTM2208
Corequisites: OPTM3301, OPTM3302, OPTM3309

Objectives: Session 1: to introduce diagnosis and optometric management of posterior eye disease. Session II: to investigate the role of optometry in the rehabilitation of people with visual impairment.

In lectures and tutorial classes will cover: the pathophysiology, diagnostic signs and symptoms, and optometric management of diseases of the uvea, retina, glaucoma, optic nerve, pupils, cranial nerves, and visual pathway. Other topics discussed include diplopia and trauma. In Session 2, a series of seminars from community based speakers will focus on rehabilitation issues relevant to ocular disease.

Assessment: Session 1, week 6, multiple choice examination (10%); week 9 slide test (10%); week 12 slide test (10%); end of session written examination (60%).

Session 2, week 12; rehabilitation issues report (10%).

OPTM3301
Visual Science III
Staff Contact: Dr P Anderton
CP15 S3 HPW3
Prerequisites: OPTM2301

Objectives: An understanding of advanced issues in current visual science.

Lectures, tutorials and practicals will deal with: Glia and the development of retinal vasculature. Visual
vision. Theories of visual perception.

To stimulate students' interest in optometric subspecialities

To advance student knowledge in dispensing, refraction, care at the UNSW Optometry Clinic under supervision of

Objectives: To produce a student with professional attitude and good communications skills who has the ability to integrate scientific and clinical aspects of optometry and make well-reasoned decisions while undertaking patient care at the UNSW Optometry Clinic under supervision of a registered optometrist.

To advance student knowledge in dispensing, refraction, low vision, colour vision, ocular health assessment, binocular vision, public health, paediatric vision, contact lenses, and pharmacology.

To stimulate students' interest in optometric subspecialties such as Low Vision, Colour Vision, Binocular Vision, Public Health, Paediatric Vision care, and Contact Lenses.

Lectures, tutorials and practical classes will deal with: Refraction: practical aspects. Binocular vision: diagnosis and management of strabismus and amblyopia, aniseikonia. Contact lenses: soft and rigid contact lens design and manufacture, fitting techniques and evaluation, care and maintenance of contact lenses, complications, modifications, special applications, advanced topics. Low Vision. Paediatric Optometry: child development, behavioural optometry, perceptual dysfunction, paediatric ocular disease and low vision, contact lenses, and special needs children. Pharmacology: basic and ocular aspects. Public Health Optometry: basic principles, eye protection, vision screening, visual ergonomics. Dispensing: Practical aspects.

Clinical Assessment: binocular vision, contact lenses, gonioscopy, ophthalmoscopy, visual fields, colour vision. Examination of patient: management and treatment of ocular conditions and diseases.

In the second session, students will examine patients in the primary care optometry clinic.

Assessment: Written examinations, written assignments, practical examinations, and clinic assessment.

OPTM3309

Ocular Science III

Staff Contact: School Office

CP12.5 S3 HPW S1 3 S2 2

Prerequisite: OPTM2301

Objectives: To understand the major physiological processes governing the ocular fluids, the cornea and the lens. Physiological principals are applied to gain an understanding of the normal aging process and of common abnormalities. Students are encouraged to integrate their knowledge of general physiology, ocular anatomy and biochemistry, and pathology in this subject to appreciate the basis of selected disorders, and the mechanisms by which the disorders might be prevented or remedied.

Lectures and tutorials deal with: Physiology and biochemistry of the cornea. Physiology of the eyelids and lacrimal system. The tear film. Physiology and biochemistry of the lens and cataract. Aqueous humor and the intraocular pressure: pathophysiology and pharmacology of glaucoma. Ocular Circulation. The physiology of accommodation and presbyopia.

Assessment: During session 1 there will be 2 short tests at times to be arranged, and an end of session written examination. During session 2 there will be one short test, and an end of session written examination.

The final mark will be made up of 30% coursework marks and 70% examination marks. Session 1 marks are worth 65% of the final mark and session 2 marks are worth 35% of the total.

OPTM4302

Clinical Optometry IV

Staff Contact: Mr D Pye

CP85 S3 HPW17

Prerequisites: OPTM3301, OPTM3302, OPTM3208, OPTM3309, PSYC3506

Corequisites: OPTM4310, MDCN8001

Objectives: To further develop the understanding of optometry's role in public health and to develop clinical skills to competently examine patients in optometric practice and recommend appropriate management strategies.

Lectures and tutorials will deal with: Public Health Optometry, epidemiology, legal aspects, analysis of the work environment. Clinical experience; Diagnosis, management and treatment of ocular and visual conditions and diseases. Students will examine patients in the optometry clinic in the following areas; primary care, colour vision, low vision, children's vision, vision training, contact lenses and sports vision, as well as participating in patient review clinics.

Assessment: Is conducted on the basis of written assignments in various topic areas and assessments of clinical performance during patient contact experiences.

OPTM4310

Research Project

Staff Contact: Dr P Herse

CP20 S3 HPW4

Prerequisites: MATH2819, OPTM3301, OPTM3302, OPTM3309, OPTM3208

Objectives: This subject seeks to develop students' skills in searching the literature, critical analysis of publications, developing hypotheses, designing and running experiments, statistical data analysis and oral and written presentation of reports.
Students in groups of 2 to 4 carry out a small research project under the guidance of an academic staff member. In November each group makes a presentation to a symposium.

Assessment: Students are assessed by their project supervisor following guidelines which are made available to the students at the start of the project

OPTM4312
Optometry and the Professional Environment
Staff Contact: Mr D Pye
CP10 S3 HPW2

Objectives: To make optometry students aware of the purposes and consequences of their education, to develop an awareness of professional and ethical action in optometric practice; to ensure that the students are aware of their social responsibilities as optometrists.

Assessment: Essay format examination at the end of the year.

Pathology

Pathology Level III

PATH3202
Mechanisms of Human Disease
Staff Contact: Dr M Dziegielewski
CP 30 F HPW4
Prerequisites: BIOS1101, BIOS1201, ANAT2211, ANAT2111 or PHPH2112 or BIOC2101 and BIOC2201 or BIOC2181 and BIOC2291

Lectures, tutorials and practical classes and research/casebook projects aimed at increasing understanding of the molecular basis of disease with particular emphasis on classification of disease processes, clinical outcomes and disease prevention. Comparisons between normal and abnormal cell/tissue and organ function will be made. Includes processes of cell and tissue degeneration, acute and chronic inflammation, infection, thrombosis, infarction, embolism and ischaemia. Particular examples include diseases of practical importance such as pneumonia, tuberculosis, arthritis, pulmonary embolism and myocardial infarction. Skin wounds and fractures will be used to illustrate healing and regeneration. Aberrations of cell growth introduces neoplasia and carcinogenesis with examples of common tumours. The impact of modern biology on understanding disease mechanisms will be demonstrated in practical classes and projects which complement the lectures.

Pathology Level IV

PATH0005/PATH0006
Pathology (Honours)
Staff Contact: Prof C Geczy
CP120 F
Prerequisite: completion of program 7000 including Level III subjects totalling 90 Credit Points

Research component of thesis: basic mechanisms of human disease processes, including inflammation, rheumatoid arthritis, asthma, uveitis, infection bone and biomaterials, tumour biology, vascular biology, atherosclerosis and genetics. Projects can include techniques such as tissue culture and cell biology, microbiology and genetics, protein chemistry, histology and microscopy, immunology and enzymology. Projects may be undertaken within the School of Pathology or at a laboratory of an affiliated institute or hospital department associated with the School.

Philosophy

Philosophy

Philosophy is a wide-ranging discipline, catering for a great diversity of interests, for instance, in science, reasoning, persons, and social issues, and encouraging critical and imaginative thought about the foundations of other subjects and disciplines. Apart from providing considerable choices for students majoring in Philosophy, the diversity of Upper Level subjects makes it possible for students majoring in other disciplines to select subjects complementing their main interest.

Philosophy Level I

First Enrolment in Philosophy
There are Six Level I subjects:
Each of these has a 15 Credit Point value. They can be taken separately, and students can gain Upper Level status in Philosophy (qualify to enrol in Upper Level subjects) by passing in only one. However, students wishing to major in Philosophy must complete any two of the four.

PHIL1006
Reasoning, Values and Persons
Staff Contact: Phillip Staines, Convenor
CP15 S1 HPW3
Notes: Excluded 52.103. Not offered in 1999
A team-taught introduction to philosophical thought and issues through study of traditional and contemporary discussions of four topic areas: philosophical reasoning, ethics and political philosophy, minds, bodies and persons, logic and analysis.
This subject is an introduction to the philosophy of knowledge and of knowers, generally called epistemology. We study questions about how we can claim to know things, and what, indeed, it is to know things. What are the limits on human knowledge? How can we ever be certain of anything? What about scientific knowledge? Or religious knowledge? Are these objective or subjective? There is a lot of important philosophy in this area, and we will look at a number of the biggest issues.

PHIL1008
Ethics and Society
Staff Contact: Karen Lai, Convenor
CP15 S1 HPW3
This is political philosophy and moral philosophy at the intersection of the political with the personal. When we make decisions in important areas like euthanasia, reproductive freedom and reproductive technology, the allocations of health resources, the suppression of smoking and other drugs, censorship, the environment, penal reform and capital punishment, we must balance the rights and duties of the individual with the demands and obligations of society. In this team-taught subject, we consider current debate about the above questions in the light of philosophical theories about – what is ethics; individual morality and duties (the notion of duties to oneself and to others, the fundamental value of respect for persons); public morality and goals (judging actions, laws and policies according to their consequences); and individuals and their rights in the state (theories about rights, justice, and the limits of the state).

PHIL1009
Metaphysics: The World and Us
Staff Contact: Neil Harpley, Convenor
CP15 S1 HPW3
In subjects like science, sociology, psychology, politics and history we raise a number of important philosophical questions: Is the world the way it seems to be? Is there a real world out there, or is it all in the mind? What is the nature of this mind which tries to know the world? The mind, the person, is part of the world too - does its nature or its embodiment influence the way it knows the world or the way it knows itself? Is there such a thing as value-free knowledge of the world, or are we trapped inside our individual perspectives? This subject is an introduction to the philosophy of reality.

PHIL1010
Thinking About Reasoning
Staff Contact: TBA
CP15 S1 HPW3
Note/s: Not offered in 1999.
Thinking clearly, reasoning productively, arguing well. These are skills essential in life in general and at University in particular. Philosophy has a lot to say about these practices, and also about the whole nature of human reason. This subject involves practical work on reasoning and argumentative strategies, and an introductory investigation into what good reasoning actually is. There is a great deal of modern philosophical investigation into these matters.

PHIL1011
Minds Bodies and Persons
Staff Contact: Rosalyn Diprose
CP15 S1 HPW3
What are we, and what are we like? What is a person? Are only humans persons? Are we mind, body or both? These are among the most puzzling and compelling questions that humans can ask. This subject is an introduction to some of the many ways philosophers have approached these and related questions. Some philosophical perspectives on the subject have a moral focus, some a psychological, some a computational, some a political. We look at the works of ancient philosophers and of philosophers working today.

Value of Upper Level Subjects in Philosophy
All Upper Level subjects are 15 Credit Points.

Specialisation in Philosophy
Students specialising in Philosophy must complete any two of the School’s Level I subjects (30 Credit Points): PHIL1006 (Reasoning, Values and Persons), PHIL1007 (Knowledge and the Knower), PHIL1008 (Ethics and Society), PHIL1009 (Metaphysics: The World and Us), PHIL1010 (Thinking and Reasoning), PHIL1011 (Minds Bodies and Persons). In addition, students must complete 6 Upper Level (II/III) subjects (90 Credit Points). Of these, subjects totalling at least 60 Credit Points must be chosen from List A, which includes subjects in Logic, Philosophy of Mind, Philosophy of Science, and areas of History of Philosophy relevant to those subject areas. Students normally two Level II/III subjects in Year 2, and four Level II/III subjects in Year 3. Subject to the approval of the School, which considers the individual subjects nominated by a student and the student’s overall program in Philosophy, a student may be permitted to count subjects totalling up to 15 Credit Points offered outside the School toward specialisation in Philosophy.

List A
PHIL2106 Logic
PHIL2107 Advanced Philosophy of Science
PHIL2108 Ways of Reasoning
PHIL2116 Scientific Method
PHIL2117 Philosophical Logic
PHIL2118 Philosophy and Biology
PHIL2206 Contemporary Philosophy of Mind
PHIL2207 Issues in the Philosophy of Psychology
PHIL2217 Personal Identity
PHIL2218 Philosophical Foundations of Artificial Intelligence
PHIL2219 Topics in Philosophy of Language
PHIL2226 Twentieth Century Analytic Philosophy
PHIL2228 Themes in Seventeenth Century Philosophy
PHIL229  Themes in Eighteenth Century Philosophy
PHIL2417  Relativity: Cognitive and Moral
PHIL2518  Greek Philosophy: Issues in Ethics and Epistemology
PHIL3106  Pre Honours Seminar

The remaining 30 Credit Points are to be chosen from other Upper Level Philosophy subjects.

Level II/III

Some Upper Level subjects deal with particular philosophical topics; others can be taken in sequence to give more sustained treatments of larger areas. Students may select freely among these, subject to stipulations regarding prerequisites. They are welcome to seek advice and further information from the School.

In certain circumstances the prerequisites specified for subjects may be waived; for example, in the case of students who have already studied similar material, or who wish to take isolated subjects relevant to another discipline. Students who feel they have a case for a concession of this kind should consult the School.

Honours Entry Requirements

Students intending to proceed to the award of an Honours degree in Philosophy must normally complete years 13 of programs 5200 (Philosophy) or 5262 (Philosophy of Science) with an average of at least 70% in their Philosophy subjects, including at least one Distinction result; plus PHIL3106 (Pre-Honours Seminar). Subject to the approval of the School, which considers the individual subjects nominated by a student and the student’s overall program in Philosophy, a student may be permitted to count subjects totalling up to 15 Credit Points offered outside the School toward satisfying the Honours entry requirements. Students contemplating Honours are urged to seek advice from the School early in their course.

Philosophy Level II/III

Notes: Level II Status in Philosophy consists in being in second or later year of university study, and also having passed at least one Level I Philosophy subject. The prerequisite may be waived in certain cases by the School. Level III Status in Philosophy consists of having an overall standard of credit or higher in Philosophy subjects totalling 120 Credit Points.

PHIL2106  Logic
Staff Contact: Stephen Hetherington
CP15 S1 HPW3
Prerequisite: Any Level I subject
Note/s: Excluded 52.2030 and 52.2031, 52.220, MATH3400.

This subject is about deductive logic (in particular, propositional logic and predicate logic). Aims to construct and to understand – a precise, unambiguous, formal language. Many important parts of English are translatable into it, hence many arguments of English are translated into it too. It is a language with which we can better understand the concept of deductive proof.

PHIL2107  Advanced Philosophy of Science
Staff Contact: Michaelis Michael
CP15 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School

Explores some current issues in the philosophy of the sciences and includes discussion of the role of experiment in science; the cognitive status of theories; explanation; intertheoretical reduction; reductionism; models and metaphors; the issues of scientific realism and anti-realisms.

PHIL2108  Ways of Reasoning
Staff Contact: TBA
CP15 S1 HPW3
Prerequisite: Any level I Subject, students must be in year 2 of University study
Note/s: Excluded 52.233, 52.2010.

Material for this subject is drawn from everyday sources, such as newspapers, books and advertisements, and including television. Deals with the nature of argument, fallacies, reasoning and the role of reasoning. From studying the structure of arguments students will be able to improve their critical skills and the presentation of their own arguments.

PHIL2109  Metaphysics (Realisms)
Staff Contact: Stephen Hetherington
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy. Not offered in 1999

This subject examines several classic metaphysical questions some of which are as follows: Is there a real world? What is social reality? What is the nature of possibility? Is this the only possible world? Is there a God? Are there people? Is there free will?

PHIL2116  Scientific Method
Staff Contact: Michaelis Michael
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School
Note/s: Excluded 52.2140. Not offered in 1999

Science has a serious claim to being the major cultural force shaping our world-view. The aim of this subject is to enable us to understand better our own view about science by tracing their historical development. Examines, in some depth, the conceptions of science to be found in the writings of Aristotle, Descartes, various Positivists, and some more recent philosophers, with a view to understanding how their conceptions of science and their conceptions of which questions philosophers should ask about science differ from each other and from our own.
PHIL2117
Philosophical Logic
Staff Contact: Michaelis Michael
CP15 S2 HPW3
Prerequisite: PHIL2106 or equivalent, or contact School
Follows on from PHIL2106 Logic and is intended to introduce students to the ways various logics have been deployed within philosophy, with a view to illuminating such topics as linguistics meaning, content of thought, modalities, necessity and possibility, contrary-to-fact conditionals, laws of nature, action value, deducibility and fiction.

PHIL2118
Philosophy and Biology
Staff Contact: Michaelis Michael
CP15 S1 HPW3
Prerequisite: Upper Level Status in Philosophy or 12 credit points in History and Philosophy of Science and Technology (HPST), or BIOS1101 or BIOS1201
Note/s: Excluded HPST3012, HPST3117.
Aims to bring out some of the key theoretical and philosophical issues thrown up by modern biology. These include but are not exhausted by the nature and scientific status of evolutionary theory; the debates over classification of higher taxa; the issue of reduction of biology to more ‘basic’ sciences; and the ethical implications of biology. The subject is designed to be of interest to students of the humanities and to students of the biological sciences.

PHIL2206
Contemporary Philosophy of Mind
Staff Contact: Philip Cam
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.2002, 52.250.
An introduction to some major issues in the field. There are three topics: (1) On relating the Mental to the Physical; (2) Alternative Approaches to the Psychology of Belief and Desire; and (3) The Psychology of Experience and Consciousness.

PHIL2207
Issues in the Philosophy of Psychology
Staff Contact: Philip Cam
CP15 S2 HPW3
Prerequisite: Upper Level in Philosophy or PSYC1001 AND PSYC1011
Note/s: Excluded 52.2003, 52.251.
Philosophical issues in theoretical psychology, drawn from philosophical and psychological writings on personal identity, consciousness and self-knowledge, perceptual illusions, processing systems, psychology and brain science.

PHIL2208
Epistemology (Scepticisms)
Staff Contact: Stephen Hetherington
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
All of us acknowledge that there are things we do not know. But such humility can turn into perplexity when we encounter epistemological sceptics. A sceptic typically denies us either vast amounts of knowledge or justification of some select, but extremely everyday, sorts of apparent knowledge or justification. In short, sceptics argue for surprising denials of knowledge or justification. Examines some historically prominent sceptical ways of thinking, which attack knowledge of, or justified belief in, such areas as: the external world, the unobserved, linguistic meaning, everything.

PHIL2209
Epistemology (Knowledge and Justification)
Staff Contact: Stephen Hetherington
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Epistemology is officially the Theory of Knowledge. One of its most important questions is therefore “What is knowledge?” Answering this generally leads to another question: ‘What is justified belief?’ (For most epistemologists think knowledge is a sort of justified belief.) This subject is built around these questions. We will consider various attempts that epistemologists have made to answer them. Topics include: perception, false belief, defeated evidence, causality, reliability, cognitive responsibility, perspectives.

PHIL2215
The Struggle for Human Nature
CP15 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Not offered in 1999.
Themes about human nature often figure as fundamental, though often implicit, assumptions in views about rationality, about knowledge bases, about equality or justice, and in fields as diverse as politics, anthropology, economics and sociobiology. Explores the work that invoking the concept of human nature does in various areas of debate. Topics include: the traditional philosophical debates about innateness, recent discussions of knowledge of language, assumptions about human nature implicit in some economic theories and sociobiological accounts of human nature.

PHIL2217
Personal Identity
Staff Contact: Neil Harpley
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.2180, 52.232.
Controversy about the nature of persons and the criteria for personal identity has usually centred on the questions of whether persons are bodies or are minds and whether the criteria for their identity are physical or psychological.
Philosophers have frequently ignored the social dimensions of personhood or, at best, given it only a peripheral place in the discussion. The notion that people are socially constructed will be given due weight and an attempt made to integrate the differing approaches to what it is to be a person.

**PHIL2218**

*Philosophical Foundations of Artificial Intelligence*

*Staff Contact: Philip Staines*

*CP15 S2 HPW3*

*Prerequisite:* Upper Level status in Philosophy

*Note/s:* Excluded 52.2026.

Artificial intelligence: an examination of its assumptions, history, goals, achievements and prospects.

**PHIL2219**

*Topics in the Philosophy of Language*

*CP15 HPW3*

*Prerequisite:* Upper Level status in Philosophy

*Note/s:* Not offered in 1999.

The subject is divided into two parts. Part I focuses on the relation between words and the world. Here the central topic is theories of truth: the coherence theory, the correspondence theory, the redundancy theory, etc. An important and related topic is theories of reference. Readings include selections from Aristotle, William James, Russell, Kripke and others. Part II focuses on the relation between language and the people that use it. The central concept here is meaning. We investigate such issues as the relation between language and thought, the nature of convention, nature of communication, what sort of knowledge is involved in knowing a language. Readings include fragments from Locke, Descartes, Grice, Austin, Wittgenstein, Lewis, Quine and others.

**PHIL2226**

*Twentieth Century Analytic Philosophy*

*CP15 HPW3*

*Prerequisite:* Upper Level status in Philosophy

*Note/s:* Not offered in 1999.

As well as asking how modern Anglo-American philosophy is different from its predecessors, we also look at ways in which its ideas and concerns are continuous with those of other epochs and traditions. Readings include selections from Frege, Russell, Wittgenstein, Quine, Kripke, Putnam. Themes include: the rejection of Hegelian idealism, atomism and holism, the influence of empiricism, the revival of Platonism through philosophy of mathematics, ideas about existence and ontology, the revival of Aristotelian essentialism, the return to a sort of idealism. No prior familiarity with these writers will be assumed. Moreover, we steer clear of papers that make heavy use of formal logic.

**PHIL2228**

*Themes in Seventeenth Century Philosophy*

*Staff Contact: TBA*

*CP15 S1 HPW3*

*Prerequisite:* Upper Level status in Philosophy

This subject will study a range of topics drawn from the writings of the seventeenth century philosophers John Locke, Rene Descartes, Benedict de Spinoza and Gottfried Leibniz. Topics will be selected from the following: substance, minds and bodies, freedom, contingency, possibility and necessity, time and space.

**PHIL2229**

*Themes in Eighteenth Century Philosophy*

*Staff Contact: Genevieve Lloyd*

*CP15 S2 HPW3*

*Prerequisite:* Upper level status in Philosophy

This subject will study a range of topics drawn from the writings of the eighteenth century philosophers George Berkeley, David Hume, Gottfried Leibniz and Jean-Jacques Rousseau. Topics will be selected from the following: causality, idealism, reason and the passions, human nature and the self.

**PHIL2309**

*The Heritage of Hegel: The Concept of Experience*

*Staff Contact: TBA*

*CP15 S2 HPW3*

*Prerequisite:* Upper Level status in Philosophy

*Note/s:* Excluded 52.221, 52.3025 in 1988. Might not be offered in 1999 – contact School

Hegel is one of the towering presences in contemporary philosophy. Long recognised as an influence on European philosophy from Marx to Lacan, Derrida to Kristeva, the Hegelian philosophy of identity, difference, subjectivity and desire, is essential to anyone who wants to understand current directions in critical theory.

This subject will cover a close reading of the Phenomenology of Spirit, together with selections from Hegel’s lectures and Logic. The second half of the course looks at important readings of Hegel by Derrida, Habermas, Irigaray, etc.

**PHIL2316**

*Philosophy of Religion*

*Staff Contact: Karyn Lai*

*CP15 S1 HPW3*

*Prerequisite:* Upper Level status in Philosophy

A discussion of some main topics in the philosophy of religion (the question of God, religious language, the problem of evil, mysticism and faith) which are considered via two influential approaches: that of analytic philosophy and phenomenology/hermeneutics.

**PHIL2407**

*Contemporary European Philosophy: Vision and Transgression*

*Staff Contact: TBA*

*CP15 S1 HPW3*

*Prerequisite:* Upper Level status is Philosophy

*Note/s:* Excluded 60.014, EURO2400. Might not be offered in 1999 contact School

An introduction to the ‘philosophy’ of some influential contemporary thinkers whose relation to philosophy is contested. Readings are drawn from the work of Freud,
Kristeva, Benjamin, Breston, Lyotard, Adorno, Bataille, Derrida, Artaud, and Deleuze. Discussion focuses on ideas of rationality, civilisation, experience, and violence.

PHIL2409
Speaking through the Body: Feminism, Psychoanalysis, Literature
Staff Contact: TBA
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Might not be offered in 1999 contact School.

How natural is sex anyway? Do we act the parts of masculine and feminine or do they act us? The language of the body is symbolic; even sexual difference is nothing without its codes. Thus the search for a body that speaks takes us to culture. Explores the idea of sexual polarity or binarism and some influential criticisms or refusals of it. Topics discussed include: transvestitism and gender ambivalence; alternatives to heterosexuality; relations between femininity and language. Readings will be taken from the work of Freud, Virginia Woolf, Oscar Wilde, Rousseau, Deleuze and Guattari, Shakespeare, and contemporary feminism.

PHIL2416
Power, Knowledge and Freedom
Staff Contact: Rosalyn Diprose
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Excluded: EURO2400
Note/s: Not offered in 1999

In Nietzsche and Foucault we find a powerful critique of philosophical conceptions of knowledge, subjectivity, morality, truth, desire and power. The Nietschean project, seminal to Foucault, is continued by such maverick figures in contemporary philosophy as Bataille, Artaud and Deleuze, who imagine the relations between body, freedom and transgression in startling ways.

PHIL2417
Relativism: Cognitive and Moral
CP15 HPW3
Prerequisite: Upper Level status in Philosophy, or contact School
Note/s: Not offered in 1999.

Do people in alien cultures see the same world as we do? If knowledge is socially constructed can there be a sense in which world views clash? Is there a difference between what is subjective and what is relative? Could there be one true morality? Is there such a thing as reason or rationality? Even if there is, could such a thing be other than specific to our culture? Are there other, non-rational, ways of understanding the world? These and a host of other questions introduce the notion of relativism. Aims to clarify and examine some of the various questions and issues that arise from the issue of relativism. Topics may include: moral relativism, cognitive relativism, the absolute conception of the world, truth, conceptual schemes, and semantic relativism.

PHIL2418
Ethical Issues
Staff Contact: Karyn Lai
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Not offered in 1999

An examination of a range of current ethical issues involved in topics such as abortion, surrogacy, foetal tissue research, euthanasia, AIDS.

PHIL2419
Ethics, Differences and Embodiment
Staff Contact: Rosalyn Diprose
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy

Explores an approach to ethics originating in ancient Greek thought and developed by 20th century existential phenomenologists (such as Sartre, de Beauvoir, Merleau-Ponty and Levinas). Topics covered include how an embodied 'ethos' (re. an habitual way of life) is socially constituted; what is the basis of our social relations with others; and possible applications of these ideas to analyses of the ethics of sexual difference, cultural difference and some issues in medical ethics.

PHIL2420
Environmental Ethics
Staff Contact: Karyn Lai
CP15 S1 HPW3
Prerequisite: Upper Level status in Philosophy

This subject aims to familiarise students with both the content and the processes involved in ethical decision making in issues concerning the natural environment. It begins with an enquiry into basic concepts operative in discussions in environmental ethics such as "value", "nature", "natural" and "environmental". There is also an examination of various approaches to environmental debates including applied ethics, deep ecology, holism, and ecofeminism. Throughout this subject, students are encouraged to properly and fully consider arguments arising from different value commitments and to understand the importance of, and the procedures associated with, the justification of a particular position.

PHIL2506
Classical Political Philosophy
CP15 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.203, 52.2050, 52.240. Not offered in 1999.

Examination of the work of some central figures in the history of political philosophy, with regard to the basis of political society, its various functions, and its relation to the individuals in it. Through an investigation of works by Hobbes, Locke, Rousseau, and J.S. Mill, topics include the idea of a state of nature, theory of a social contract, the establishment of political rights and obligations, and the relation of moral and political concerns within a political society.
PHIL2508
Theories in Moral Philosophy
Staff Contact: To be advised
CP15 HPW3
Prerequisite: Upper Level status in Philosophy

Examination of three moral theories central in the history and development of moral philosophy. David Hume, Immanuel Kant, and John Stuart Mill present different kinds of moral theories, differing approaches to arriving at a moral theory, and specific theories which are markedly different from each other. Each moral theory is investigated in itself and in comparison with the other two.

PHIL2509
Philosophy of Law
Staff Contact: Stephen Cohen
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.105, 52.2150, 52.241.

Selected conceptual and normative issues in the philosophy of law, centering around the broad areas of law (e.g., its nature, validity, bindingness, and relation to morality), liberty, justice, responsibility (including strict, vicarious, and collective liability), and punishment.

PHIL2517
Philosophy and Gender
Staff Contact: Rosalyn Diprose
CP15 HPW3
Prerequisite: Upper Level status in Philosophy

Considers the nature of sexuality and ideas about the role of sexual difference in the constitution of the bodily subject. The social significance of the connection between gender and such distinctions as culture/nature, reason/passion and public/private is examined in the light of feminist critiques. Also raises questions about philosophy and feminism with respect to issues of argument, advocacy and style.

PHIL2518
Greek Philosophy
Staff Contact: Genevieve Lloyd
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.2040, 52.2220, PHIL2507.

Covers themes in Plato and Aristotle which have had a continuing influence in Western philosophy. Discussion centres on concepts of virtue and knowledge in relation to ideals of wisdom and contemplation.

PHIL2519
Introduction to Chinese Philosophy
Staff Contact: Karyn Lai
CP15 S2 HPW3
Prerequisite: Upper Level Status in Philosophy

Aims to introduce the philosophical concepts and theories of traditional China and to introduce recent Western discussion on the subject of Chinese philosophy. Deals with the major philosophical debates of ancient China and with some issues from later periods. In passing, the subject also deals with the 'Chinese worldview' and attempts to clarify popular notions like 'Confucianism', 'the Tao' or 'the philosophy of the Book of Changes'. It represents Chinese philosophy as a complex discipline which has tackled similar issues to those tackled in the West, and has developed comparable means of analysis and argument.

PHIL2520
Aspects of Chinese Thought
Staff Contact: Karyn Lai
CP15 S2 HPW3
Prerequisite: Upper Level Status - students must be in year 2 or later of University study. (students need not have Upper Level Status in Philosophy)
Note/s: Excluded PHIL2519

There are many significant concepts underlying Chinese thought which have their origin in the classical Chinese schools of thought from pre-Confucian times. This subject critically examines some of these concepts, such as the Confucian 'jen' (humanity) and 'li' (rules of property); and the Taoist 'tao' and 'wu-wei' (non-action).

PHIL2517
Aesthetics
Staff Contact: Rosalyn Diprose
CP15 HPW3
Prerequisite: Upper Level status in Philosophy
Note/s: Excluded 52.273, 52.2260. Not offered in 1999

Emphasis is placed on the visual arts, although the subject also deals with literature and film. Topics include: realism and representation; the dialectics of tradition and innovation; the idea of aesthetic experience; the sexuality of art and the observer.

Assessment: To be decided in consultation with the class.

PHIL2608
Experiencing the Spectacle: From Plato to Virtual Reality
Staff Contact: Rosalyn Diprose
CP15 S2 HPW3
Prerequisite: Upper Level status in Philosophy or Media and Communications

Explores philosophical accounts of what is involved in a person's experience of a spectacle (e.g. a painting, a piece of theatre, television or virtual reality). Some philosophers (e.g. Plato) devalue the experience as irrational and different to rational contemplation of an object of knowledge. Others (e.g. Kant) claim the experience can be objective and universal, where what I experience is (potentially) the same as everyone else. Against the common view that the person views the spectacle from a distance and remains unaltered by the experience, Nietzsche, Heidegger and Merleau-Ponty in different ways argue the spectacle is necessary for creatively opening the person and their world to other possibilities. Emphasis will be on how these thinkers understand the relation between the person and the public/private is examined in the light of feminist critiques. Also raises questions about philosophy and feminism with respect to issues of argument, advocacy and style.
spectacle with consideration of the implications of their views for understanding the impact of visually based media in our lives.

PHIL2706
Seminar A
CP15 S1 HPW3
Note/s: Might not be offered in 1999 — Consult School.
The seminar is offered occasionally to suit particular student and staff needs and interests. Admission by permission, based on a student's performance in Upper Level subjects. Topics vary and are influenced by student requests. Students are invited to approach any member of staff about the possibility of particular seminar topics.

PHIL2707
Seminar B
CP15 S2 HPW3
Note/s: Might not be offered in 1999 — Consult School.
The seminar is offered occasionally to suit particular student and staff needs and interests. Admission by permission, based on a student's performance in Upper Level subjects. Topics vary and are influenced by student requests. Students are invited to approach any member of staff about the possibility of particular seminar topics.

PHIL2708
Reading Option
CP15 S1 or S2 HPW3
Students wishing to do work in an area not covered by an existing subject or seminar may apply to the School to take a reading option. Not more than one such subject may be counted towards a degree. Approval of a program for a reading option depends on its suitability and on the availability of a member of staff to undertake supervision.

Philosophy Level III
Notes: Level III Status in Philosophy consists of having an overall standard of credit or higher in Philosophy subjects totalling at least 90 Credit Points.

PHIL3106
Pre-Honours Seminar
Staff Contact: Phillip Cam/Neil Harpley/ Rosalyn Diprose
CP15 S2 HPW3
Prerequisite: 30 credit points in Philosophy with overall standard of Credit or higher
A team-taught subject for students who are considering proceeding to Honours in Philosophy; designed to form skills in philosophical research and writing through seminar discussion of readings illustrating a range of philosophical approaches, styles and techniques.

Philosophy Level IV

PHIL4000/PHIL4050
Philosophy Honours (Research)
Staff Contact: Michaelis Michael and Rosalyn Diprose, Coordinators
CP120 F
Prerequisite: Completion of program 5200, 5262 or 5206 including Level II/III subjects totalling 105 Credit Points, including PHIL3106
The Honours Year consists of writing a research thesis under supervision and two seminar courses.

PHIL4050
Philosophy Honours (Research) P/T
Staff Contact: Michaelis Michael and Rosalyn Diprose, Coordinators
CP120 F
Prerequisite: Completion of program 5200, 5262 or 5206 including Level II/III subjects totalling 105 Credit Points, including PHIL3106

PHIL4500
Combined Philosophy Honours (Research) F/T
Staff Contact: Michaelis Michael and Rosalyn Diprose, Coordinators
CP120 F
Prerequisite: Completion of program 5200, 5262 or 5206 including Level II/III subjects totalling 105 Credit Points, including PHIL3106

PHIL4550
Combined Philosophy Honours (Research) P/T
Staff Contact: Michaelis Michael and Rosalyn Diprose, Coordinators
CP120 F
Prerequisite: Completion of program 5200, 5262 or 5206 including Level II/III subjects totalling 105 Credit Points, including PHIL3106
Students contemplating Honours are urged to seek advice from the School on their program early in their course.
The General Education requirements will be met within the Honours Program by seminars and a statement.

Physics

Physics Level I Subjects
Notes: Where mathematics subjects are specified as prerequisites or as corequisites, the higher levels of such subjects are acceptable and preferable. The total value of the combination of PHYS1022 and PHYS1002 is 45 Credit Points.
PHYS1002
Physics 1
Staff Contact: First Year Director
CP30 F HPW6
Prerequisites: HSC Exam Score Range Required; 2 unit Mathematics (90-100), or 2 and 3 unit Mathematics (100-150), or 3 and 4 unit Mathematics (100-200) or (for PHYS1002 only) MATH1011, and 2 unit Science (Physics) 65-100, or 2 unit Science (Chemistry) 75-100, or 3 unit Science 100-150, or 4 unit Science 1-50 or PHYS1022 (2 unit Mathematics in this instance refers to the 2 unit Mathematics subject which is related to the 3 unit Mathematics subject, and does not refer to the subjects Mathematics in Society or Mathematics in Practice).
Corequisite: MATH1021 or MATH1032 or MATH1131 and MATH1231.

Motion of particles under the influence of mechanical, electrical, magnetic and gravitational forces. Force, inertial mass, energy, momentum, charge, potential, fields. Conservation principles applied to problems involving charge, energy and momentum. Application of Kirchhoff’s laws to AC and DC circuits. Uniform circular motion, Kepler’s laws and rotational mechanics. Properties of matter: solids, liquids, gases. Application of wave theories to optical and acoustical phenomena such as interference, diffraction and polarisation.

Mid-year Start

Students who fail Session 1 of PHYS1002 are strongly advised to discontinue the subject and enrol in Session 2 in PHYS1011 Physics I (FT1). This subject covers the Session 1 material of PHYS1002 during Session 2. Then PHYS1021 covers the rest of the syllabus over the Summer Session.

Note: The Session 2 syllabus of PHYS1002 is not repeated in Session 1 of the next year.

PHYS1011
Physics 1 (FT1)
Staff Contact: First Year Director
CP15 S2 HPW6
Prerequisites, corequisites and syllabus: identical to PHYS1002, S1.

PHYS1021
Physics 1 (FT2)
Staff Contact: First Year Director
CP15 Summer Session HPW9
Prerequisite: PHYS1011
Syllabus identical to PHYS1002, S2

Elective Syllabus for PHYS1002, S2

Those students enrolled in a physics program in the Science Course, and who have achieved a satisfactory performance in Session 1, may elect to take the following option for Session 2. (This option is not repeated in Summer Session).

QUANTUM AND LASER PHYSICS
Waves in elastic media; sound waves; early quantum physics; the laser, operation and applications, interference, diffraction and polarisation.

AC CIRCUIT THEORY
Addition of alternating quantities; series circuits, impedance, power, resonance, parallel circuits; ideal transformer.

SOLAR SYSTEM ASTROPHYSICS
Celestial dynamics: orbits; shape and rotation of planets, planetary rings; energy generation in sun; thermal physics; planetary atmospheres.

PHYS1022
Physics 1 For Health and Life Scientists
Staff Contact: First Year Director
CP30 F HPW6
Corequisites: MATH1021 or MATH1032 or MATH1131. Principally for students majoring in the life and health sciences disciplines. Topics at an introductory level.
The methods of physics, describing motion, the dynamics of a particle, conservation of energy, kinetic theory of gases, properties of liquids, vibrations and waves, electricity and conduction in solids, ions and ionic conduction, magnetism and electromagnetic induction, alternating current, atomic nature of matter, X-rays, the nucleus and radio-activity, geometrical optics, optical instruments, wave optics, microscopes and their uses.

PHYS1601
Computer Applications in Experimental Science 1
Staff Contact: First Year Director
CP15 S1 or S2 HPW6
Corequisites: PHYS1002 or PHYS1022, MATH1032 or MATH1131.
Note/s: Excluded PHYS1611.
An introduction to the internal structure, operating and interfacing of computers. Binary and digital electronic logic; logic control devices; bus communication structures; instruction execution in a processor; machine language code and instruction sets; interfaces and interaction schemes between processor and the outside world.

PHYS1611
Laboratory Computers in Physical Science
Staff Contact: First Year Director
CP15 HPW6
Corequisites: MATH1021 or MATH1032 or MATH1131 and PHYS1002 or PHYS1022

PHYS1889
Physics 1 (Aviation)
Staff Contact: Dr M Box
CP22.5 F HPW6
Corequisites: MATH1021 or MATH1079 or MATH1131
Note/s: Restricted to course 3980.
The methods of Physics, describing motion, the dynamics of particle, conservation of energy, kinetic theory of gases,
properties of liquids, vibrations and waves, electricity and conduction in solids, ions and ionic conduction, magnetism and electro magnetic induction, alternating current.

**PHYS1999**

**Physics I (Optometry)**

*Staff Contact: First Year Director*

CP15 S1 HPW6

*Note/s:* Restricted to course 3950.

**Physics Level II Subjects**

*Notes:* Where mathematics subjects are specified as prerequisites or as corequisites, the higher levels of such subjects are acceptable and preferable. Students are also advised that other subjects may be acceptable equivalent prerequisites or corequisites to those listed, eg PHYS2949 of course 3640 may be acceptable in place of PHYS2021. Enquiry should be made to the Executive Assistant.

**PHYS2000**

**responsibility and Ethics in Science**

*Staff Contact: Prof R F Howe, Chemistry*

CP7.5 S2 HPW2

*Prerequisite: none*

*Note/s:* General Education objective 5 designed for chemistry and physics students

Professional and ethical action and social responsibility in science. Case studies of the process of scientific discovery, ethics and fraud in science, science in industry, science and the military, science and religion, science and the media, intellectual property and patent law.

**PHYS2001**

**Mechanics, and Computational Physics**

*Staff Contact: Executive Assistant*

CP15 S1 HPW4

*Prerequisites:* PHYS1002, MATH1032 or MATH1231.

*Corequisite:* MATH2011 or MATH2110

*Note/s:* Excluded PHYS2999.

Harmonic motion, systems of particles, central force problems, Lagrange’s equations, coupled oscillations, travelling waves, pulses, energy and momentum transfer, computer operating systems, introduction to FORTRAN, libraries and software packages, use of computers to solve problems in physics.

**PHYS2011**

**Electromagnetism and Thermal Physics**

*Staff Contact: Executive Assistant*

CP15 S2 HPW4

*Prerequisites:* PHYS1002, MATH1032 or MATH1231

*Corequisites:* MATH2011 or MATH2110

*Note/s:* Excluded PHYS2999.

Electric field strength and potential, Gauss’ law, Poisson’s and Laplace’s equations, capacitance, dielectrics and polarisation, magnetism, electro-magnetic induction, Maxwell’s equations, electromagnetic waves. Laws of thermodynamics, kinetic theory, microscopic processes, entropy, solid state defects, Helmholtz and Gibbs functions, Maxwell’s relations, phase diagrams, chemical and electrochemical potential.

**PHYS2021**

**Quantum Physics and Relativity**

*Staff Contact: Executive Assistant*

CP15 F HPW2

*Prerequisites:* PHYS1002, MATH1032 or MATH1231

*Note/s:* Excluded PHYS2989, PHYS2949.

**PHYS2031**

**Laboratory**

*Staff Contact: Executive Assistant*

CP15 F HPW3

*Prerequisites:* PHYS1002, MATH1032 or MATH1231

*Note/s:* Excluded PHYS2920.

Experimental investigations in a range of areas: x-ray diffraction, work function, semiconductor bandgap, Hall effect, carrier lifetimes, nuclear magnetic resonance, magnetic properties and electrostatics. Electronics bench experiments and tutorials on diodes, transistors, operational amplifiers, power supplies and digital electronics.

**PHYS2030**

**Laboratory A**

*Staff Contact: Executive Assistant*

CP7.5 S1 HPW3

*Prerequisites:* PHYS1002, MATH1032 or MATH1231

*Note/s:* Excluded PHYS2031.

Experimental investigations in a range of areas: x-ray diffraction, work function, semiconductor bandgap, Hall effect, carrier lifetimes, nuclear magnetic resonance, magnetic properties and electrostatics.

**PHYS2160**

**Astronomy**

*Staff Contact: Executive Assistant*

CP7.5 S2 HPW2

*Prerequisite:* PHYS1002

Galaxies, the distance scale, large structure of the universe, galaxy evolution, the very early universe.
PHYS2410
Introductory Biophysics
Staff Contact: Executive Assistant
CP7.5 S2 HPW2
Prerequisite: PHYS1002 or PHYS1022.

PHYS2500
Methods in Mathematical Physics
CP7.5 HPW2
Prerequisites: PHYS1002, MATH1032 or MATH1231.
Corequisites: MATH2011, MATH2120, MATH2510
Note/s: Not offered in 1999.

PHYS2601
Computer Applications in Experimental Science 2
Staff Contact: Executive Assistant
CP15 S1 HPW5
Prerequisite: PHYS1601
Technical aspects of computer hardware, peripherals and systems. Bus logic devices; simple interface design; use of a general purpose interface for communication, data collection and control. Speed and capacity limitations of conventional peripherals; techniques to improve performance beyond the computer's capabilities.

PHYS2630
Electronics
Staff Contact: Executive Assistant
CP7.5 S2 HPW3
Prerequisite: PHYS1002 or PHYS1022
Exclusions: PHYS2920, PHYS2031
Electronic bench experiments and tutorials on diodes, transistors, operational amplifiers, power supplies and digital electronics.

PHYS2810
Atmospheric Physics
Staff Contact: Executive Assistant
CP7.5 S1 HPW2
Prerequisites: PHYS1002 or PHYS1022 or PHYS1889, MATH1021 or MATH1231 or MATH1079
Note/s: Excluded PHYS2819
Atmospheric composition, thermodynamics of dry and moist air, stability, cloud physics, atmospheric electricity, radiation laws, solar and terrestrial radiation, applications, atmospheric energy transport, 1D and 3D climate models, applications.

PHYS2850
Environmental Acoustics
Staff Contact: Executive Assistant
CP7.5 S1 HPW 2.5
Prerequisites: PHYS1002 or PHYS1022 or PHYS1889
Note/s: Excluded PHYS1159.

PHYS2991
Mechanics and Thermal Physics
Staff Contact: Executive Assistant
CP15 F HPW2
Prerequisites: MATH1032 or MATH1231 or MATH1042 or MATH1241, PHYS1002
Corequisite: MATH2100
Particle mechanics, harmonic motion, central force problems, systems of particles, Lagrange's equations with applications, coupled oscillations, wave equation. Thermodynamic laws, entropy, kinetic theory, M-B distribution, microscopic processes, Maxwell's relations, chemical potential, phase diagrams, multicomponent systems, electrochemical potential, statistics of defects in solids.

Physics Level III Subjects
Note: See notes for Physics Level II subjects.

PHYS3010
Higher Quantum Mechanics
Staff Contact: Executive Assistant
CP7.5 S1 HPW2
Prerequisite: PHYS2021
Corequisite: MATH2120
Note/s: Excluded PHYS3210. Not available in courses 3970, 3400, 3930 and 4075 without a mark of 65 or greater in PHYS2021.
Fundamental principles and matrix formulation, spherically symmetric systems, angular momentum theory, perturbation theory and semiclassical radiation theory, variational methods, identical particles.

PHYS3021
Statistical Mechanics and Solid State Physics
Staff Contact: Executive Assistant
CP15 S1 HPW4
Prerequisites: MATH2120, PHYS2011, PHYS2021
Canonical distribution, paramagnetism, Einstein solid, ideal gas, equipartition, grand canonical ensemble, chemical potential, phase equilibria, Fermi and Bose statistics, Bose condensation, blackbody radiation. Crystal structure, bonding, lattice dynamics, phonons, free-electron models of metals, band theory, point defects, dislocations.

PHYS3030
Higher Electromagnetism
Staff Contact: Executive Assistant
CP7.5 S1 HPW2
Prerequisites: PHYS2011, MATH2011, MATH2120, MATH2520
Note/s: Excluded PHYS3230. Not available in courses 3970, 3400, 3930 and 4075 without a mark of 65 or greater in PHYS2011.
Electromagnetic fields; Maxwell's equations, Poynting theorem, electromagnetic potentials. Plane and spherical
waves. Reflection and transmission, fields in dispersive media, models and applications, emission of radiation from accelerated charges, covariant formulation of electromagnetism.

**PHYS3041**
**Experimental Physics A**
*Staff Contact: Executive Assistant*
CP7.5 F HPW4
*Prerequisite: PHYS2031*
Basic experimental techniques and analysis of results in the following areas: electricity, magnetism, diffraction optics including X-ray and electron diffraction, solid state physics, nuclear physics, atomic physics and spectroscopy, vacuum systems.

**PHYS3050**
**Nuclear Physics**
*Staff Contact: Executive Assistant*
CP7.5 S2 HPW2
*Prerequisite: PHYS3010 or PHYS3210 with a mark of 65 or greater*
Nuclear shell model; theory of beta decay; the deuteron, nucleon-nucleon scattering; theories of nuclear reactions, resonances; mesons and strange particles, elementary particle properties and interactions; symmetries and quark models; strong and weak interactions.

**PHYS3060**
**Advanced Optics**
*Staff Contact: Executive Assistant*
CP7.5 S2 HPW2
*Prerequisite: PHYS1002*
*Corequisite: MATH2120*
Review of geometrical optics, including ray tracing, aberrations and optical instruments: physical optics, including Fresnel and Fraunhofer diffraction, transfer functions, coherence, and auto and cross correlation: applications of optics, including fibre optics, lasers and holography.

**PHYS3110**
**Experimental Physics B1**
*Staff Contact: Executive Assistant*
CP7.5 S1 HPW4
*Prerequisite: PHYS2031*
Selected experiments and projects. Advanced experimental techniques and open ended projects in the areas covered in PHYS3041 Experimental Physics A together with projects involving electron and nuclear magnetic resonances, low temperature physics and superconductivity. Fourier optics, holography.

**PHYS3120**
**Experimental Physics B2**
*Staff Contact: Executive Assistant*
CP7.5 S2 HPW4
*Prerequisite: PHYS2031*
As for PHYS3110 Experimental Physics B1.

**PHYS3160**
**Astrophysics**
*Staff Contact: Executive Assistant*
CP7.5 S2 HPW2
*Prerequisite: PHYS2021*

**PHYS3210**
**Applied Quantum Mechanics**
*Staff Contact: Executive Assistant*
CP7.5 S1 HPW2
*Prerequisite: PHYS2021*
*Corequisite: MATH2120*
*Excluded: PHYS3010*
*Note/s: Not available to Advanced Science students in programs 0100, 0121 and 0161*
Principles of wave mechanics and its applications including harmonic oscillator, spherically symmetric systems, angular momentum, perturbation theory and semi classical radiation theory identical particles and the theory of atoms, solid state devices and quantum wells.

**PHYS3230**
**Applied Electromagnetism**
*Staff Contact: Executive Assistant*
CP7.5 S1 HPW2
*Prerequisites: PHYS2011, MATH2011, MATH2120*
*Excluded: PHYS3030*
*Note/s: Not available to Advanced Science students in programs 0100, 0121 and 0161.*
Review of Maxwell's equations in integral and differential form, boundary conditions, applications to plane electromagnetic waves in vacuum and material media, dispersion, reflection and transmission, waves in waveguides, fibres and cavities, dipoles and antenna systems.

**PHYS3310**
**Physics of Solid State Devices**
*Staff Contact: Executive Assistant*
CP7.5 S2 HPW2
*Corequisite: PHYS3021*
Review of electronic structure in semiconductors; p-n junctions; bipolar and field effect transistors including formation, characteristics and electrical breakdown. Optical devices including light emitting diodes and junction lasers. Integrated circuit structures.

**PHYS3320**
**Topics in Condensed Matter Physics**
*Staff Contact: Executive Assistant*
CP7.5 S2 HPW2
*Corequisite: PHYS3021*
*Note/s: Not offered in 1999*
PHYS3410
Biophysics
Staff Contact: Executive Assistant
CP7.5 S2 HPW2
Prerequisites: PHYS2011, PHYS2410

PHYS3510
Advanced Mechanics, Fields and Chaos
Staff Contact: Executive Assistant
CP7.5 S1 HPW2
Prerequisites: PHYS2001, MATH2011

Lagrange's equations and applications, variational principles, dissipative systems, Hamiltonian formulation, canonical transformations, Poisson brackets, Hamilton-Jacobi equation, continuous systems and fields, stability and chaos.

PHYS3550
General Relativity
Staff Contact: Executive Assistant
CP7.5 S2 HPW2
Prerequisites: PHYS2021, MATH2011

Relativistic kinematics and dynamics, tensors and tensor operations, Christoffel symbols, formulation of general relativity, curvature of space, geodesics, gravitational field equations, Schwarzschild solution, tests of the theory, astrophysical and cosmological implications.

PHYS3610
Computational Physics
Staff Contact: Executive Assistant
CP7.5 S2 HPW2
Prerequisites: PHYS2001, PHYS2021, MATH2120

Use of computers in solving and visualising physical problems, including applications of least squares techniques, quantum mechanical eigenvalues and boundary value problems (Woods Saxon potential, Poisson's equation, heat conduction) and Monte Carlo techniques.

PHYS3630
Electronics
Staff Contact: Executive Assistant
CP7.5 S1 HPW3
Prerequisite: PHYS2031

PHYS3710
Lasers and Applications
Staff Contact: Executive Assistant
CP7.5 S1 HPW2
Note/s: Offered in odd-numbered years only.

Interaction between light and matter, fundamental properties of laser amplifiers and oscillators, giant pulse generation, mode locking and Q switching, specific laser systems including gas lasers and semiconductor lasers, applications of lasers.

PHYS3720
Optoelectronics
Staff Contact: Executive Assistant
CP7.5 S1 HPW2
Note/s: Offered in even-numbered years only.

Introduction to non-linear optics, second harmonic generation, parametric amplification, phase matching, optical bistability, modulation of light, types of optical detectors including thermal detectors, photomultipliers and semiconductor detectors.

PHYS3760
Laser and Optoelectronics Laboratory
Staff Contact: Executive Assistant
CP7.5 S2 HPW4

Techniques employed in laser technology and components used in laser applications. Construction, operation and characterisation of several types of lasers. Applications of lasers such as holography, acousto-optics, fibre optics, optical spectroscopy, safety aspects of lasers.

Physics Level IV

PHYS4103/PHYS4113
Physics 4 (Honours)
Staff Contact: Dr J Webb
CP120 F
Prerequisite: Completion of program 0100 including Level III subjects totalling 105 Credit Points, or 0161 including Level III subjects totalling 90 Credit Points
Note/s: For the combined Physics/Geology honours see entry under Board of Studies in Science and Mathematics.

Honours programs consist of advanced lecture subjects and project work. Students normally undertake two separate projects during the year, in different research areas. All students take subjects in quantum mechanics, statistical mechanics and solid state physics. Additional subjects totalling 60 Credit Points are chosen from topics such as astronomy, atomic and molecular spectroscopy, condensed matter physics, experimental methods, biophysics, quantum field theory and quantum theory of solids.

Admission to the honours program is at the invitation of the Head of School and normally requires at least a credit average in Year 3.
PHYS4411
Medical Physics
Staff Contact: A/Prof J Wolfe
CP15 F HPW2
Prerequisite: PHYS2021
Radiotherapy: radiation sources, interactions of radiation with the body, radiation detection and measurement. Dosimetry and radiotherapy planning. Radioisotopes, brachytherapy.
Nuclear Medicine: Radioisotope production. Radiopharmaceuticals. Basic instrumentation. Gamma camera. SPECT and PET.

PHYS4413
Medical Physics Projects
Staff Contact: A/Prof J Wolfe
CP45 F HPW9
Note/s: Restricted to Course 3973 Medical Physics.
These projects for final year Medical Physics students will be in areas such as Radiotherapy, Nuclear Medicine, Medical Imaging or Biophysics. Generally carried out in a hospital environment under the supervision of a practising medical physicist but may be carried out in the university or elsewhere, if suitable facilities available. Students required to submit a written thesis and present a seminar describing their project work.

Servicing Subjects
These are mainly subjects taught within courses offered by other faculties.
For further information regarding the following subjects see the relevant Faculty Handbooks.

PHYS1918
Physics 1 (Mechanical Engineering)
Staff Contact: First Year Director
Note/s: Re-run in S2.

PHYS1936
Physics 1 (Textile Management)
Staff Contact: First Year Director
Note/s: Not re-run in Summer Session.
Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism: electric and magnetic fields; DC circuits; electromagnetic induction. Sound: wave properties; absorption of sound. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

PHYS1937
Physics (Industrial Design)
Staff Contact: First Year Director
Note/s: Not re-run in Summer Session.
Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism: electric and magnetic fields; DC circuits; electromagnetic induction. Sound: wave properties; absorption of sound. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

PHYS1938
Physics 1 (Building)
Staff Contact: First Year Director
Note/s: Not re-run in Summer Session.
Energy transfer: concepts of temperature and heat; calorimetry; gas laws; phase changes and humidity; heat transmission; refrigeration. Electrostatics and electromagnetism: electric and magnetic fields; DC circuits. Properties of matter: atomic bond types and their relation to elasticity, plasticity and fracture; pressure in stationary and moving fluids.

PHYS1969
Physics 1 (Electrical Engineering)
Staff Contact: First Year Director
Electrostatics, magnetostatics in vacuum, ferromagnetism, electromagnetic induction. Vectors, kinematics, particle dynamics, work and energy, the conservation of energy, conservation of linear momentum, rotational kinematics and dynamics, simple harmonic motion, gravitation. Temperature, heat and the first law of thermodynamics, kinetic theory of gases. Waves in elastic media, sound waves, interference, diffraction, grating and spectra, polarisation. Relativity, quantum physics, wave nature of matter.

Mid-Year Start
Students who fail Session 1 of PHYS1969 are strongly advised to discontinue the subject and enrol in Session 2 in PHYS1949 Physics I (EE, FT1). This subject covers the Session 1 material of PHYS1969 during Session 2. Then PHYS1959 covers the rest of the syllabus over the Summer Session.
Note: The Session 2 syllabus of PHYS1969 is not repeated in Session 1 of the next year.

PHYS1949
Physics 1 (EE, FT1)
Staff Contact: First Year Director
CP15 S2 HPW6
Prerequisites, corequisites and syllabus: identical to PHYS1969, S1
Semiconductor crystals and electrical conduction; elementary quantum theory; energy bands; band properties of semiconductor and applications, optical properties and applications, new developments, materials and techniques.

**PHYS2969**

*Physics of Measurement (Geomatic Engineering)*

*Staff Contact: Executive Assistant*

**PHYS2999**

*Mechanics and Thermal Physics (Electrical Engineering)*

*Staff Contact: Executive Assistant*

Particle mechanics, harmonic motion, central force problems, systems of particles, Lagrange's equations with applications, coupled oscillations, wave equation. Thermo-dynamic laws, entropy, kinetic theory, M-B distribution, microscopic processes, Maxwell's relations, chemical potential, phase diagrams, multicomponent systems, electrochemical potential, statistics of defects in solids.

---

**Physiology and Pharmacology**

**Physiology and Pharmacology Level II**

*Notes:* Normal prerequisites for the courses in Physiology may be waived by the Head of School for students with a good academic record.

**PHPH2112**

*Physiology 1*

*Staff Contact: Dr JW Morley*

CP30 F HPW6

*Prerequisites:* BIOS1101 and BIOS1201, CHEM1101 and CHEM1201, MATH1131 and MATH1231 or MATH1141 and MATH1241 or MATH101 and MATH1021

*Corequisites:* BIOC2101 and BIOC2201, or BIOC2181 and BIOC2291

*Notes:* Students intending to major in Physiology and/or Pharmacology should note Level III Physiology prerequisites.

Introduces fundamental physiological principles, from basic cellular function in terms of chemical and physical principles, to the operation of the various specialised systems in the body, eg, the cardiovascular system, the respiratory system, the gastrointestinal system, the endocrine system, the nervous system. Includes a substantial series of practical class experiments on these different areas of physiology. This subject is taken by students enrolled in any of the Physiology programs.
UNDERGRADUATE STUDY 199

PHPH2122
Principles of Physiology (Optometry)
Staff Contact: Dr JW Morley
CP30 F HPW6
Note/s: Restricted to course 3950.
Covers the same general areas of physiology as Physiology 1. Principles of Physiology is taken only by students enrolled in the BOptom degree course.

Physiology and Pharmacology Level III

PHPH3121
Membrane and Cellular Physiology
Staff Contact: Prof PH Barry
CP15 S1 HPW6
Prerequisites: PHPH2112 and both BIOC2101 and BIOC2201, or BIOC2181 and BIOC2291
The properties of cell membranes, generation of potentials, permeation of ions, solutes and water across membranes, single channel measurements, unstirred layer effects, generation of electrical signals in nerve and muscle cells produced by ion movements, transmission of information between cells and the mechanisms underlying muscle contraction. Stress on modern research techniques, underlying principles of molecular physiology and on a critical examination of appropriate classical papers.

PHPH3131
Neurophysiology
Staff Contact: Prof MJ Rowe
CP15 S1 HPW6
Prerequisites: As for PHPH3121
The neural mechanisms in sensation and the control of posture and movement. Includes segments on neural control of cardiorespiratory function; transmitters and neuromodulators; neural mechanisms in certain higher functions, eg language and memory; nervous system plasticity; computer applications in neuroscience. Experimental work introduces the student to electrophysiological and other neuroscience research techniques.

PHPH3151
Introductory Pharmacology and Toxicology
Staff Contact: A/Prof M Murray
CP15 S1 HPW6
Prerequisite: As for PHPH3121
Includes a study of the fundamentals of drug action, such as dose response methods, receptor binding, drug absorption, distribution and metabolism. Further material on drug analysis and adverse effects of drugs will be presented. Segments dealing with aspects of chemical toxicology and the requirements of government agencies for the registration and evaluation of toxic chemicals will be covered. The practicals will cover basic pharmacological methods.

PHPH3251
Clinical and Experimental Pharmacology
Staff Contact: A/Prof M Murray
CP15 S2 HPW6
Prerequisites: As for PHPH3121 and PHPH3151
This subject deals with the pharmacology of drug classes, with emphasis on mode of drug action. Effects of drugs on the major organ including the cardiovascular system, the central nervous system, the kidney, the endocrine system will be covered. Students will be introduced to recent innovations in drug development and emerging therapeutic strategies based on advances in understanding cellular physiology and drug action. The practicals will cover basic pharmacological methods from both clinical and experimental standpoints.

PHPH3211
Cardio-respiratory and Exercise Physiology
Staff Contact: Dr L Ulman
CP15 S2 HPW6
Prerequisites: As for PHPH3121
An advanced course which emphasises function and control of the cardiovascular system; gas exchange in the lung and blood gas carriage in the respiratory system and work capacity, preventive medicine and laboratory testing in exercise physiology. Extensive practical components involve mammalian preparations and human subjects.

PHPH3221
Endocrine, Reproductive and Developmental Physiology
Staff Contact: Dr G Simonetta
CP15 S2 HPW6
Prerequisites: As for PHPH3121
There are three major components to this subject, which consists of lectures, practical classes, tutorial and case studies. The first component of the course is a study of neuroendocrinology, molecular and systematic endocrinology, and of the endocrinology of exercise and disease. The second component of the course deals with female and male reproductive physiology. The third component of the course details the physiology of pregnancy, and that of the fetus and the newborn.

Physiology and Pharmacology Level IV

PHPH4218/PHPH4224
Physiology 4 (Honours)
Staff Contact: A/Prof MA Perry
CP120 F
Prerequisite: Completion of program 7300 including Level III subjects totalling 105 Credit Points. 60 Credit Points must be from Level III Physiology subjects.
The Honours Year provides an introduction to research. Students undertake a research project with supervision which is written up as a thesis and presented as a seminar. Students are also required to participate in a General Education program which consists of a core program of seminars, an essay and participation in discussion groups.
Psychology

Psychology Level I Subjects

PSYC1001
Psychology 1A
Staff Contact: Dr R. Richardson
CP15 S1 HPW5
Note/s: Excluded GENB4001.
This subject introduces the content and methods of psychology as a basic science, with emphasis on the social bases of behaviour. After an initial review of the historical foundations for the scientific study of human behaviour, several specific topics related to the social aspects of human behaviour are discussed. Specific topics covered in this subject include: development, measurement of personality, theories of consciousness, and social influences on behaviour. In addition, training in the methods of psychological inquiry and basic procedures of data analysis is also provided.

PSYC1011
Psychology 1B
Staff Contact: Dr R Richardson
CP15 S2 HPW5
Note/s: Excluded GENB4002.
This subject introduces the content and methods of psychology as a basic science, with emphasis on the biological bases of behaviour. Specific topics covered in this subject include: perception, learning, memory, motivation, emotion, and abnormal behaviour. After describing the basic phenomena within an area, the goal will be to explore the neural bases of these behaviours. In addition, training in the methods of psychological inquiry and basic procedures of data analysis is also provided.

PSYC2001
Research Methods 2
Staff Contact: Dr M Gleitzman
CP15 S1 HPW4
Prerequisites: PSYC1001 and PSYC1011
General introduction to the analysis of data by means of inferential statistics (z, t and chi square). Issues in the use of statistics (power, robustness). General features of research methodology. Laboratory and statistical traditions affecting design and control procedures. The implications of the use of inferential statistics for research methodology generally. Ethics of research and interpretation of data.

PSYC2011
Psychological Measurement and Assessment
Staff Contact: Dr S McDonald
CP15 S2 HPW4
Prerequisite: PSYC2001
Principles and techniques of psychological measurement. Types of tests and issues relevant to their construction, administration and interpretation in decisions about selection and classification. Professional responsibilities in use of tests in decision making.

PSYC2061
Social and Developmental Psychology
Staff Contact: Prof J Forgas
CP15 S1 HPW4
Prerequisites: PSYC1001 and PSYC1011
Two strands:
1. Social – The basic principles of research and theory in social psychology, with a special emphasis on understanding how people relate to each other. Issues such as the nature of human sociability, the perception and interpretation of social behaviour, ambiguities of interpretation of interpersonal behaviour, verbal and nonverbal communication processes, impression formation and impression management and related topics will be covered.

2. Developmental – The age at which certain abilities or dispositions develop or are learned, and the processes by which developmental changes occur. Issues such as nature and nurture, continuity vs discontinuity, nomothetic vs ideographic approaches and the methods and ethics of developmental research will be covered from various perspectives – psychodynamic, biological/ethological, environmental/learning, and cognitive – developmental.

PSYC2071
Perception and Cognition
Staff Contact: Prof B Gillam
CP15 S2 HPW4
Prerequisites: PSYC1001 and PSYC1011
Introduces the fundamental principles underlying human perception and cognition such as sensory coding, perceptual organisation, perception of spatial layout, perceptual learning, object recognition, attention, memory storage and retrieval, problem solving and decision making.
The practical program will provide an introduction to the use of psychophysical methods, experimental approaches to the study of cognitive processes, and the application of findings in society.

PSYC2081
Learning and Physiological Psychology
Staff Contact: Dr J Cranney
CP15 S1 HPW4
Prerequisites: PSYC1001 and PSYC1011

An examination of brain and behaviour relationships with emphasis on learning, memory and motivation. Topics may include habituation, sensitisation, classical/operant conditioning, basic motivations, hunger, sex aggression, neuropsychology of amnesia and normal memory.

PSYC2091
Psychology 2A
Staff Contact: A/Prof J Taplin
CP15 S2 HPW4
Prerequisites: PSYC1001 and PSYC1011
Note/s: Restricted to Course 3431.

The approach of psychology to issues arising in the management of human affairs and to the remediation of human problems. Topics include psychology as a scientific discipline, an overview of areas such as clinical psychology, neuropsychology and developmental disabilities in which psychological knowledge is applied to help individuals to change or to function optimally, and specific areas of public concern where psychology has a major contribution to make such as education, selection, training in industry, traffic and aircraft safety, and the law. The practical program will aim to teach survey research skills and will focus also on the professional and social responsibilities of psychologists.

Psychology Level III Subjects

Notes: Students may not complete more than six Level III Psychology subjects (90 Credit Points) unless PSYC3001 Research Methods 3A has been passed.

Students may not enrol in more than seven Level III Psychology subjects (105 Credit Points).

Not all Level III Psychology subjects will necessarily be offered in each year.

PSYC3001
Research Methods 3A
Staff Contact: Dr M Gleitzman
CP15 S1 HPW4
Prerequisite: PSYC2001

Analysis of variance for single factor and multifactor designs. MANOVA model analyses of repeated measures data. Simultaneous inference procedures for contrasts defined on parameters of ANOVA and MANOVA models. General principles of experimental design. Analysing experimental data with the PSY program.

PSCY3011
Research Methods 3B
Staff Contact: Dr K Bird
CP15 S2 HPW4
Prerequisite: PSYC3001

Multiple regression and its application to prediction, analysis of designed experiments and construction of structural models. Principal components analysis and factor analysis. Data analysis using SPSS.

PSYC3051
Physiological Psychology
Staff Contact: Prof G Paxinos
CP15 S2 HPW4
Prerequisites: PSYC2001 and PSYC2081

The neural control of behaviour with special emphasis on cerebral localisation of function in humans. Clinical conditions will be considered to the extent they illuminate mechanisms and theory of brain function, and the professional issues raised by different theories will be canvassed.

PSYC3121
Social Psychology
Staff Contact: Prof J Forgas
CP15 HPW4
Prerequisites: PSYC2001 and PSYC2061
Note/s: Not offered in 1999

A review of the history, principles and methods, and ethics of social psychology at an advanced level. Substantive research areas such as the nature of affiliation and attraction, interpersonal relationships, the study of beliefs, values and attitudes, persuasion and processes of attitude change, social influence processes, and group behaviour, among others, will be covered.

PSYC3141
Behaviour in Organisations
Staff Contact: Dr S Schneider
CP15 S1 HPW4
Prerequisites: PSYC2001 and PSYC2061

The application of general psychological theories and principles to contemporary management problems. It will acquaint students with research in employee motivation, satisfaction, selection, training, evaluation, and teamwork as well as other topics in industrial and organisational psychology, including the role of the professional in organisations and in dealing with other professionals.

PSYC3151
Cognition and Skill
Staff Contact: A/Prof S Andrews
CP15 S1 HPW4
Prerequisites: PSYC2001 and PSYC2071

Considers the cognitive processes underlying the development of skill in a variety of domains ranging from general skills such as reading and recognising objects to specialised skills such as solving algebra problems and air-traffic control. The differences between novice and expert performance are discussed to illustrate theories of expertise and demonstrate the contribution of individual
and environmental factors to skill acquisition. Implications for training and assessing skilled performance are considered.

**PSYC3161**

**Language and its Development**  
*Staff Contact: A/Prof M Taft*  
*CP15 HPW4*  
*Prerequisites: PSYC2001 and PSYC2071*  
*Note/s: Not offered in 1999.*

Describes the structure of language and how it is acquired and used in reading, writing, speech comprehension and speech production. All levels of language are examined: phonemes and graphemes, morphemes, words, sentences and text. Bilingualism and language dysfunction are also given consideration.

**PSYC3201**

**Psychopathology**  
*Staff Contact: Dr P Birrell*  
*CP15 S1 HPW4*  
*Prerequisites: PSYC2001 and PSYC2081*  

An introduction to the scientific analysis of behavioural and mental disorders. The major syndromes, focussing upon current models and theories of causation and the empirically-based evaluation of these aetiological models and theories will be described. Treatment of the disorders will be outlined, especially where modern treatment developments throw light on fundamental causal mechanisms. Professional and ethical aspects of various treatments will be considered.

**PSYC3211**

**Cognitive Science**  
*Staff Contact: A/Prof S Andrews*  
*CP15 HPW4*  
*Prerequisites: PSYC2001 and PSYC2071*  
*Note/s: Subject not offered in 1999.*

Considers a variety of different approaches adopted in the study of mental processes. In particular the underlying assumptions of cognitive models are highlighted and critically appraised. Includes topics such as computer models of learning and memory, artificial intelligence, consciousness, cognitive representations and the association between mind and body. The professional implications of these topics will be discussed.

**PSYC3221**

**Vision and Brain**  
*Staff Contact: Prof B Gillam*  
*CP15 S1 HPW4*  
*Prerequisites: PSYC2001 and PSYC2071*  

Seeing is an amazing achievement, taking up 40% of the visual cortex. This subject will consider how we see and how this reveals and is related to principles of brain functioning. Topics will include stereo (3-D vision), the coding of brightness and colour, perceiving motion and self-motion, brain damage and the question of specialised visual systems, visual imagery, visual attention, and vision and art.

**PSYC3231**

**Child Development: Perception and Cognition**  
*Staff Contact: A/Prof J Taplin*  
*CP15 S2 HPW4*  
*Prerequisites: PSYC2001, PSYC2061 and PSYC2071*  

The development of infants' and children's auditory and visual abilities will be considered in relation to their adaptive search for perceptual, cognitive and social invariance in their environment. Cognitive development will be considered from three different theoretical perspectives: Piagetian theory, changes in information processing capabilities, and the formation of domain-specific knowledge and beliefs from infancy to adulthood.

**PSYC3241**

**Psychobiology of Memory and Motivation**  
*Staff Contact: Dr R Richardson*  
*CP15 S2 HPW4*  
*Prerequisites: PSYC2001 and PSYC2081*  

Research and theory in memory and motivation as they underpin adaptive behaviour. Primary consideration will be given to general-purpose and specialised forms of learning. Implications for the origin and treatment of clinical disorders will be described.

**PSYC3251**

**Animal Cognition**  
*Staff Contact: A/Prof RF Westbrook*  
*CP15 HPW4*  
*Prerequisites: PSYC2001 and PSYC2081*  
*Note/s: Not offered in 1999.*

Key topics include how animals represent space, time, and number, their capacity to solve problems and to reason, to learn about relations including causal ones, and the means by which they communicate. Questions about animal intentionality and consciousness will also be dealt with, as will issues concerning interpretation of data obtained from animal research.

**PSYC3261**

**Current Topics in Behavioural Neuroscience**  
*Staff Contact: Prof EJ Keohoe*  
*CP15 HPW4*  
*Prerequisites: PSYC2001 and PSYC2081*  
*Note/s: Not offered in 1999.*

An occasional elective dealing with recent developments in behavioural neuroscience.

**PSYC3271**

**Personality and Individual Differences**  
*Staff Contact: Dr G Huon*  
*CP15 S1 HPW4*  
*Prerequisites: PSYC2011 and PSYC2061*  

The study of persons from two separate, but related perspectives. The psychology of personality involves the study of the structure and the processes involved in the organised functioning of individuals, their traits, cognitions and motives. The expression and measurement of the differences in those psychological characteristics between individuals and groups, and the theories or explanations...
that account for them, is what is involved in a psychology of individual differences.

PSYC3281
Interpersonal Behaviour
Staff Contact: Prof J Forgas
CP15 HPW4
Prerequisites: PSYC2001 and PSYC2061
Note/s: Not offered in 1999.
A critical, evaluative perspective, dealing with selected topic areas of contemporary research on social behaviour, such as the development of social understanding, emotional development, the role of affect in social behaviour, social cognition, social interaction processes, and group dynamics. The range of topics will reflect the changing emphasis in contemporary research on interpersonal behaviour.

PSYC3291
Psychology 3A
Staff Contact: Prof K McConkey
CP15 S2 HPW4
Prerequisite: PSYC2091
Note/s: Restricted to Course 3431.
A range of seminar topics aimed at assisting students to develop a position on key questions or issues in psychology as scientific discipline and how to argue that position in a logical and coherent way. There will be an emphasis on placing theoretical and scientific knowledge in a social context and on using that knowledge in professionally responsible ways.

PSYC3301
Psychology and Law
Staff Contact: Dr K Williams
CP15 S2 HPW4
Prerequisite: PSYC2001 and PSYC2061
An examination of various aspects of the judicial process from a psychological perspective in terms of their impact upon the trial participants and society. The focus will be upon contributions of social psychology, although other areas of experimental psychology will be drawn from as well. Topics will include eyewitness memory, judges instructions, lie-detection, trial tactics, reactions to insanity defenses and jury decision making.

Psychology Level IV Subjects

PSYC4003
Psychology 4 (Thesis/Course 3431)
Staff Contact: Dr P Spehar
CP120 F
Prerequisites: PSYC2001, PSYC2011, PSYC2061, PSYC2071, PSYC2081, PSYC2091 and Level III Psychology subjects totalling 120 Credit Points (consisting of PSYC3001, PSYC3011, PSYC3201, PSYC3291, 1 subject selected from PSYC3151, PSYC3161, PSYC3211, PSYC3221 and PSYC3231, 1 subject selected from PSYC3051, PSYC3241, PSYC3251 and PSYC3261, 1 subject selected from PSYC3121, PSYC3141, PSYC3271, PSYC3281 and PSYC3301 and 1 other)
Psychology 4 in the BSc(Psychol) degree course. A supervised research thesis and course work to be determined in consultation with the Head of School.

PSYC4023
Psychology 4 (Thesis) Honours
Staff Contact: Dr P Spehar
CP120 F
Prerequisites: Completion of Stages 1 – 3 of Advanced Science programs 1200 or 1206 or 7312
A supervised research thesis and course work to be determined in consultation with the Head of School.

Servicing Subjects
These are subjects taught within courses offered by other faculties.

PSYC2106
Psychology (Industrial Relations)
CP15 HPW3
Note/s: Not offered in 1999.
Problems and limitations affecting social research in industry. Critical review of American research from Hawthorne to Herzberg and of British research from Tavistock and Trist to Emery in Australia. Conflict and organic theories of organisation and related theories of motivation and morale. The use of library resources. Practice in the skills and discipline required to obtain and evaluate empirical evidence in this field. Recent developments under the heading of ‘participation’ and democracy in industry.
For further information see the Faculty of Commerce and Economics handbook.

PSYC2116
Human Development (Optometry)
Staff Contact: Dr M Rohan
CP7.5 HPW2
Note/s: Restricted to Course 3950. Not offered in 1999.
Historical background and schools of psychology; current approaches to psychology; introduction to statistics and statistical inference; human development, including introduction to issues and methods in developmental psychology, and investigation of the physical, perceptual, cognitive, and psychosocial development of the human through the life span.

PSYC3506
Psychology for Optometrical Practice
Staff Contact: Dr P Birrell
CP7.5 S2 HPW3
Prerequisite: PSYC2116
Note/s: Restricted to Course 3950.
Areas of psychology relevant to optometrical practice. Abnormal psychology: concepts of normality and
abnormality, symptoms of various mental disorder, eye movement dysfunctions, referral; psychological testing: standardisation, norms, types of test, validity, reliability, selection/diagnosis; neuropsychology; general deficits due to brain damage and those with visual implications, referral; developmental disability: diagnosis, assessment, prevalence and distribution, association with other disabilities, e.g. visual; reading difficulties: causes, assessment and treatment approaches.

PSYC3516
Psychology for Optometry
Staff Contact: Dr M Rohan
CP5 HPW2
Note/s: Restricted to Course 3950. Excluded PSYC2116 and PSYC3506. Not offered in 1999
An introduction to various aspects of psychology of relevance to optometrical practice. Includes development of psychological theories, human development, social psychology, psychopathology, perceptual learning and human neuropsychology.

Safety Science

SESC1560
Risk Management 1
Staff Contact: Prof Jean Cross
CP 7.5 S1 HPW2
This subject gives an overview of risk and the risk management process. The subject briefly considers what is risk, why people take risks and the cost of risk. It then considers the steps of the risk management process as defined by Australian standards on risk management. The steps are defining the system, risk identification, risk analysis and assessment risk control implementation and auditing. The class will apply each step of the process to case studies relevant to their degree.

SESC2560
Risk Management 2
Staff Contact: Prof Jean Cross
CP 7.5 S2 HPW2
This subject looks into safety issues in aviation, identifies problems which could lead to emergency situations then considers the planning required for different types of emergency. The subject covers writing safety and emergency procedures, emergency plans, setting up an emergency control centre, running emergency exercises and the links with state emergency planning system. General safety issues such as human factors in aviation safety and emergency planning, OHS and major hazard legislation.

SESC3310
Social Issues in Science and Technology
Staff Contact: Dr Boban Markovic
CP 7.5 S1 HPW2
This subject is an objective 5 subject which covers social issues arising from future scientific and technological developments and the role that the professional scientist can play in influencing future directions. The subject is taught by a combination of group activities, case studies, projects and seminars. This subject will cover four major topic areas, which are: professional ethics, environmental related issues, safety and liability and controls of future technology.

SESC6010
Descriptive Statistics
Staff Contact: Ms Dianne Gardner
CP 7.5 S1 L3T3 for 7 Weeks
Introduction to the theory of statistics and to statistical techniques for describing data. Topics include measures of central tendency and dispersion, probability and probability distribution, correlation and regression.

SESC6020
Inferential Statistics
Staff Contact: Ms Dianne Gardner
CP 7.5 S1 L3T3 for 7 Weeks
Introduction to the use and interpretation of statistical techniques for analysing data. Topics include sampling, inference from single samples and from two-sample cases, parametric and non-parametric tests and analysis of variance.

SESC6110
Physical Principles of Safety 1
Staff Contact: Prof Jean Cross
CP 7.5 S1 L3T3 for 7 Weeks
This subject introduces the principles of statics and dynamics as it applies to safety and ergonomic issues. Topics include materials handling, equilibrium and balance, biomechanics, friction and linear rotational motion.

SESC6120
Physical Principles of Safety 2
Staff Contact: Prof Jean Cross
CP 7.5 S1 L3T3 for 7 Weeks
This subject builds on SESC6110 and aims to give students the confidence and vocabulary to understand an engineer's report in safety issues and to understand technical standards and codes of practice. Topics include Energy and machines, collisions and impacts, behaviour of solids and fluids ventilation.

SESC6800
Fundamentals of Toxicology
Staff Contact: Assoc Prof Chris Winder
CP 7.5 S2 L3T3 for 7 Weeks
Introduction to chemical, biochemical, toxicological, and cellular principles. Introduction to environmental and occupational toxicology.
SESC6610
Work and Safety
Staff Contact: Dr Boban Markovic
CP 7.5 S1 or S2 HPW2
SESC6610 is an introductory subject to the fundamentals of safety science principles.

SESC4010
Research Methods
Staff Contact: Ms Dianne Gardner
CP 15 S3 L3T3
This subject covers issues in research methodology including research problem formulation, null and alternative hypotheses, qualitative and quantitative research designs, statistical inference and the analysis of quantitative data. Students will be expected to be able to recognise and avoid common methodological problems in research. The course will not provide a detailed coverage of statistical theory but a basic understanding of statistics is required.

SESC3020
Occupational Health and Safety Law 1
Staff Contact: Prof Adrian Brooks
CP 7.5 S2 L3T3 for 7 Weeks
This subject covers concepts of law; the judicial and court systems; common law and equity; administrative law, the common of employment, occupational health and safety and workplace relations legislation.

SESC4030
Occupational Health and Safety Law 2
Staff Contact: Prof Adrian Brooks
CP 7.5 S2 L3T3 for 7 Weeks
This subject extends concepts of law introduced in SESC9010, and covers other workplace legislation and procedures, such as arbitration of industrial disputes, workers compensation and rehabilitation legislation; cases and actin under common law and relevant workplace legislation.

SESC4091
Safety, Health and Environmental Practice
Staff Contact: Dr Boban Markovic
CP 7.5 S2 L3T3 for 14 Weeks
A workplace assessment based subject, where students are required to report on the safety, health or environmental issues following visits to a number of diverse industrial sites.

SESC3100
Physical Hazards
Staff Contact: Dr Tony Green
CP 7.5 S2 L3T3 for 7 Weeks

SESC4140
Radiation Protection
Staff Contact: Dr Ron Rosen
CP 7.5 S1 HPW2
Principles and practices of radiation protection for both ionising and non-ionising radiation. Radiation physics, detection and measurement; background radiation; biological effects of radiation; dose limits; technical controls for radioactive sources and irradiating apparatus. Codes of safe practice; radiological monitoring and personal dosimetry; storage, transport and disposal of sources; environmental impact; administrative controls; emergency procedures; control of non-ionising radiation. Practical work and site visit.

SESC3200
Hazard and Risk Assessment
Staff Contact: Prof Jean Cross
CP 7.5 S2 L3T3 for 7 Weeks
Principles of risk management and systems safety, hazard identification, risk assessment, accident models, accident reporting, auditing. Each topic will be illustrated by practical examples and case studies.

SESC4211
Risk Management
Staff Contact: Prof Jean Cross
CP 7.5 S1 L3T3 for 14 Weeks
This subject gives an overview of Risk Management following the format of the Australian Standard in Risk Management (AS4360). Tools and techniques applicable to each step of the risk management process are discussed using examples application to the class. The same risk management process is applied to manage a wide range of business issues including health and safety, the environment, finance and project management. This subject is therefore relevant as part of a wide variety of postgraduate courses and students from any postgraduate course are accepted if numbers permit. The student selects examples for exercises to suit the industry and role in which they work (or intend to work). At the end of the subject, students should be able to use risk management tools applicable to their specific interest and have an awareness of tools used in other industries and applications.

SESC3300
Effective Behaviour in Organisations
Staff Contact: Ms Dianne Gardner
CP 7.5 S1 L3T3 for 7 Weeks
This subject examines issues of human behaviour as a major system factor in occupational health and safety. Topics include attitudes and motivation, decision making, leadership and group dynamics, selection, training and communication.

SESC3400
Ergonomics 1
Staff Contact: Dr Andrew McIntosh
CP 7.5 S1 or S2 L3T3 for 7 Weeks
This subject provides an introduction to ergonomics, emphasising the principles of user centered design and human-machine-environment systems. Specific topics include definition of and justification for ergonomics, design and human error, human capabilities and limitations, introduction to anthropometry, and the reduction of musculoskeletal loading of workers.

SESC4410
Ergonomics 2
Staff Contact: Dr Andrew McIntosh
CP 7.5 S2 L3T3 for 7 Weeks
This subject follows on from SESC400 Ergonomics 1, and covers displays & controls, design of human-machine-environment systems, job design and work organisation, design of workplaces, the physical environment and an introduction to product design.

SESC3600
Introduction to Occupational Health
Staff Contact: A/Prof Chris Winder
CP 7.5 S1 L3T3 for 7 Weeks
Introduction to occupational health, including workplace hazards and risks, approaches to workplace safety, occupational health and safety legislation, management of workplace safety, the hierarchy of controls, occupational epidemiology and occupational rehabilitation.

SESC3620
Occupational Diseases and Injuries
Staff Contact: A/Prof Chris Winder
CP 7.5 S1 L3T3 for 7 Weeks
This subject deals with the ways in which work can affect the health of workers. Covers occupational diseases and injuries of skin, respiratory system, nervous system, reproductive system, the musculoskeletal system and occupational cancer.

SESC3680
Introduction to Toxicology
Staff Contact: A/Prof Chris Winder
CP 7.5 S2 L3T3 for 7 Weeks
This subject provides an introduction to toxic hazards, including chemicals and biohazards. Effects of exposure to toxic hazards. Legislation and standards for the identification and control of toxic hazards.

SESC4820
Chemical Safety and Toxicology
Staff Contact: A/Prof Chris Winder
CP 7.5 S1 L3T3 for 7 Weeks
This subject provides an outline of the toxicological, occupational hygiene and environmental aspects of chemical hazards and exposures. Metals, solvents, toxic and irritant gases, pesticides, carcinogens, hazardous wastes and dioxins are used as case studies.

SESC4850
Management of Dangerous Materials
Staff Contact: A/Prof Chris Winder
CP 7.5 S1 L3T3 for 7 Weeks
Chemicals legislation, regulatory assessment of chemicals, the dangerous goods system, the hazardous substances regulation and systems for hazardous wastes.

SESC4960
Project
Staff Contact: Program Coordinator
CP 50 S1 or S2
Stage 4 undergraduate project comprising 60 credit points (50% of Year 4 load, with the other 50% made up from Stage 4 subjects). This subject provides an introduction to the research process. Students will undertake a research project with supervision which is written up as a research project report.

Science and Technology Studies

The School of Science and Technology Studies (STS) offers subjects in two streams: History and Philosophy of Science and Technology; and Science, Technology, and Society. The subjects in the two streams are designated by two different subject codes (HPST and SCTS). However, any combination of HPST or SCTS subjects is permissible, subject to the relevant prerequisites or corequisites. Entrance to most Level II/III subjects is possible without having studied Level I HPST or SCTS subjects.

Science and Technology Studies Level I

Students undertaking subjects in Science and Technology Studies supplement class contact hours by study in the Library. Only two Level I subjects may be counted towards course 3970.

HPST1107
Cosmos and Culture: Revolutions in Science
Staff Contact: Tony Corones
CP15 S1 HPW3
Introduction to the history and philosophy of science and technology. Examines the origins of Science in antiquity and the scientific revolutions of the seventeenth and eighteenth centuries with emphasis on change in world views and cosmologies and in conceptions and practices of science.

HPST1108
Science Good, Bad, and Bogus: An Introduction to the Philosophy of Science
Staff Contact: Peter Slezak
CP15 S2 HPW3
What is science? What are its distinctive characteristics as a form of inquiry? Why are astrology, 'creationism' or parapsychology widely considered to be pseudosciences? A critical consideration such inquiries raises central
questions concerning the nature of science such as the nature of observation and evidence, theories and laws, explanation and prediction.

**SCTS1106**

**Science, Technology, and Society**  
*Staff Contact: David Miller*  
*CP15 S1 HPW3*

Examines the relations of science and technology with societies in the modern world. The status and authority of science. Can science tell us what we ought to do? Critics of science. Is technology applied science? What is the relation between technology and social change? The political uses of expertise. Experts and the rest of us. Issues of participation.

**SCTS1107**

**Understanding Environmental Controversy**  
*Staff Contact: Paul Brown/David Miller*  
*CP15 S2 HPW3*  
*Prerequisite: SCTS1106*

The nature of global and local environmental problems with particular emphasis on understanding controversies about environmental risk. What constitutes an environmental problem? Risk and risk perception. Science and environmental controversy. In the last seven weeks students will participate in group projects examining particular environmental risk controversies.

**Science and Technology Studies Level II/III**

**HPST2106**

**The Scientific Theory**  
*Staff Contact: Guy Freeland*  
*CP15 S1 HPW3*  
*Prerequisite: Completion of Level I Science subjects totalling at least 60 Credit Points*

A critical examination of the scientific theory, its origins, nature and nurture, with particular reference to selected historical examples chosen from both the physical and biological sciences. Topics include the structure of scientific revolutions; scientific explanation; relationships between theory and observation; the function of models; the principles of theory establishment and rejection.

**HPST2107**

**The ‘Darwinian Revolution’ and The Order of Nature 1790-1890**  
*Staff Contact: Nicolas Rasmussen*  
*CP15 S1 HPW3*  
*Prerequisite: As for HPST2106*

Examines the various theories of evolution from the early Romantic period of the later 19th century in cultural and political context, including the West's quest for an explanation of living creation in terms of life forces and their interaction with a changing Earth. Also looks at the major historical developments that set the stage for these scientific developments in an age of dramatic political and economic revolution.

**HPST2108**

**Introduction to the History of Medicine**  
*Staff Contact: Susan Hardy*  
*CP15 S1 HPW3*  
*Prerequisite: As for HPST2106*  
*Note/s: Excluded GENS5522, GENT0902, HPST2128.*

Development of theory and practice in Western medicine from Hippocratic times to the 20th century. 'Bedside' medicine from antiquity to the French Revolution; 'Hospital' medicine in the early 19th century; 'Laboratory' medicine in the late 19th century; 'Technological' medicine in the 20th century, with particular emphasis on the social role of modern medicine.

**HPST2109**

**Computers, Brains, and Minds: Foundations of Cognitive Science**  
*Staff Contact: Peter Slezak*  
*CP15 S2 HPW3*  
*Prerequisite: As for HPST2106*  
*Note/s: Excluded GENS5525. Not offered in 1999*

Introduction to contemporary discussions of the mind, thought, intelligence, and consciousness. Stress on the recent revolutionary developments in the computer simulation of thought or 'artificial intelligence' and linguistics. Can computers think? Is the brain a machine? Exploration of theories, methods, and philosophical issues.

**HPST2116**

**History of the Philosophy and Methodology of Science**  
*Staff Contact: Tony Corones*  
*CP15 S2 HPW3*  
*Prerequisite: As for HPST2106*  
*Note/s: Not recommended for students without some background in philosophy or HPST.*

A survey of the history of ideas about the nature and method of science, considering such issues as Aristotelianism, rationalism and empiricism, Kantianism, positivism, pragmatism, conventionalism, falsificationism, realism, and instrumentalism.

**HPST2117**

**Production, Power, and People: The Social History of Technology in the 18th and 19th Centuries**  
*Staff Contact: David Miller*  
*CP15 S2 HPW3*  
*Prerequisite: As for HPST2106*  
*Note/s: Excluded GENT0908. Not offered in 1999*

The history of technology in its social and cultural context, with special emphasis on the Industrial Revolution. Technology and its effects on human beings; the professionalisation of engineering; the spread of industrialisation and the Second Industrial Revolution. Emphasis on the social and economic effects of the interactions of technology and society.
HPST2118
Body, Mind, and Soul: The History and Philosophy of Psychology
Staff Contact: Peter Slezak
CP15 S1 HPW3
Prerequisite: As for HPST2106.
Note/s: Not offered in 1999.
The development of ideas concerning the nature of mind and its relation to the body. Topics include the immortality of the soul; division of mind and body; the dispute over innate ideas; behaviourism; psychoanalysis; experimental psychology and the 'cognitive revolution'; minds as machines and the question of whether computers can think.

HPST2119
Philosophy of the Social Sciences: Issues and Topics
Staff Contact: Peter Slezak
CP15 S1 HPW3
Prerequisite: As for HPST2106
Note/s: Not offered in 1999.
Can human behaviour be understood and explained scientifically? Are social behaviour and meaningful action to be explained by causal laws, as in the natural sciences, or are there special methods which are uniquely appropriate to human behaviour? Examines the long-standing controversy about the radically contrasting ways to understand human beings and their social existence. The course examines this debate through considering laws, explanations, causes, and theories in the natural sciences, in contrast with the empathic or intuitive understanding of the meaningfulness of human actions.

HPST2126
God, Life, the Universe & Everything: Science and the Search for Ultimate Meaning
Staff Contact: Peter Slezak
CP15 S2 HPW3
Prerequisite: As for HPST2106
‘Ultimate’ questions about God, the meaning of life and the point of it all, have traditionally been the business of religion. Can science provide an answer to these questions, or is there always a realm of understanding which is beyond scientific knowledge? This subject examines philosophical issues in epistemology, metaphysics and philosophy of science. Topics will include arguments for the existence of God and the underlying questions of evidence and explanation in science.

HPST2127
Discrediting Science? – Postmodernism and the Crisis of Legitimation
Staff Contact: Tony Corones
CP15 S1 HPW3
Prerequisite: As for HPST2106
This subject examines the perception that postmodernism discredits science. Discussion is focused on postmodernist ‘incredulity towards metanarratives’, and the way in which this provokes the crisis of legitimation. Topics and debates covered include constructivism, relativism, realism and anti-

HPST2128
Australian Medical History: A Comparative Study
Staff Contact: Susan Hardy
CP15 S2 HPW3
Prerequisite: As for HPST2106
Note/s: Excluded GENS5522, GENT9092, HPST2106, HPST3119.
Examines how the European version of medicine evolved in and was adapted to the Australian environment from 1788 to the mid-twentieth century – how the landscape, climate and social, political and economic structures affected the way medical care and medical personnel were viewed. Consideration is also given to the development of medicine on the North American continent, noting similarities and differences between the situation there and in Australia.

HPST2136
Agriculture and Civilisation in Historical Perspective
Staff Contact: Nicolas Rasmussen
CP15 S1 HPW3
Prerequisite: As for HPST2106
Examines the ways civilisations have developed an agriculture to sustain them, and how a people's way of embedding itself in the ecosystem can inform its culture. Also considers how the agriculture of Western civilisations has been transformed in the tiny span of time (evolutionarily and ecologically speaking) since the scientific revolution and the industrial revolution that followed it.

HPST2137
Life Science in the 20th Century: The Molecular Revolution
Staff Contact: Nicolas Rasmussen
CP15 S2 HPW3
Prerequisite: As for HPST2106
Explores the rise of the experimental biology disciplines, from the embryology, genetics, bacteriology and physiology of the early 20th century through to the 'Molecular Revolution' of the period around the Second World War and the new sciences it spawned – cell biology, immunology and above all molecular genetics – the science of the genetic code and the linchpin of current biotechnology.

HPST3106
The Discovery of Time
Staff Contact: Guy Freeland
CP15 S1 HPW3
Prerequisite: As for HPST2106
The history of time, from Antiquity through the Twentieth Century. Clocks and other instruments for the measurement of time; civil and religious calendars; concepts of time; philosophy and theology of time; conceptions of history and progress; the cognition of time; the age of the Earth and the antiquity of humanity. Time and the development of modern science.
HPST3108
Deity and Mother Earth
Staff Contact: David Miller
CP15 S2 HPW3
Prerequisite: As for HPST2106
Note/s: Not offered in 1999
Conceptions of deity, from earliest time to the present, in relation to changing notions of sexuality and generation, and the place of human beings in relation to their environment and the cosmos; the roles of the sexes within different cultures. The Earth Mother Goddess. The environmentalist movement; the Gaia hypothesis.

HPST3118
Reading Option in History and Philosophy of Science and Technology
Staff Contact: David Miller
CP15 S1 or S2 HPW3
Prerequisite: As for HPST2106 and permission of Head of School
Students wishing to work in an area not covered by an existing subject may apply to the School to take a reading option. Approval of a program for a reading option will depend on its suitability, and the availability of a staff member to undertake supervision.

HPST3119
Researching Medical History in Australia
Staff Contact: Susan Hardy
CP15 S2 HPW3
Prerequisite: HPST2108
Note/s: Excluded HPST2128
This research-oriented subject is intended for students who have completed HPST2108 'History of Medicine' and who wish to undertake further study in this area, with a particular focus on Australia. Background information will be provided in lectures, and students will engage in original research. Weekly seminars will address the techniques and resources available for researching the history of medicine in Australia.

HPST3126
Thinking Technology Through: Philosophies of Technology
Staff Contact: Tony Corones
CP15 S2 HPW3
Prerequisite: As for HPST2106
What is Technology? How does it shape our form of life? Can we do anything about it? What should we be doing about it? These issues are approached through the philosophy of technology. Issues considered include technology and the life-world, technological determinism, technology and values, and the relations between philosophy of technology and philosophy of science.

SCTS2106
Scientific Knowledge and Political Power
Staff Contact: George Bindon
CP15 S1 HPW3
Prerequisite: As for HPST2106
An introduction to the political dimensions of 20th century science. Topics include: growth of expenditure on science in the twentieth century; science and politics; science and economic growth; the science-technology relationship; approaches to science policy; critiques of the role of science in contemporary society.

SCTS2107
The Sociology of Science and Technology
Staff Contact: David Miller
CP15 S2 HPW3
Prerequisite: As for HPST2106
An examination of the communal nature of scientific and technological activities which will include: an historical survey of the development of scientific and engineering professions; the internal working of scientific communities; scientific communication; the reward system; fraud; disciplines and specialities in science and engineering.

SCTS2108
Information Technology, Politics and the Media
Staff Contact: John Merson
CP15 S1 HPW3
Prerequisite: As for HPST2106
Examines the global expansion of information technology and its social and economic impacts, including the role of the internet, intranet and satellite broadcasting systems. Topics include: the spread of global media services; international telemedicine; education and training accessed globally; international consumer banking and finance; and manufacturing processes controlled globally on-line. Explores the political implications of these changes, and the efforts of communities in both developed and underdeveloped countries to take advantage of this information 'superhighway' without being culturally annihilated in the process.

SCTS2109
The Challenge of the New Biotechnologies
Staff Contact: Nicolas Rasmussen
CP15 S2 HPW3
Prerequisite: As for HPST2106
Examines the new medical and agricultural technologies, stemming from the molecular biology revolution, in social context. Topics: xenotransplantation; the human genome project; new reproductive biotechnologies for humans; the genetic manipulation of food crops and animals for altered product qualities; the impact of biotechnology on agricultural sustainability.
SCTS2116
Technological Change and Economic Development
Staff Contact: George Bindon
CP15 S1 HPW3
Prerequisite: Completion of Level I science subjects totalling at least 60 Credit Points including SCTS1106; or permission of Head of School
Ideas about technological change and its relationships to economic development. Rise of the industrial estate; emergence of the 'post-modern'/post-industrial' state; Reich's 'global web'; metropolitan centres and the periphery; collapse of Soviet empire; emergence of 'Asia-Pacific rim' and implications of this for Australia.

SCTS2117
The Challenge of Managing and Measuring Science and Technology
Staff Contact: George Bindon
CP15 S2 HPW3
Prerequisite: Completion of Level I science subjects totalling at least 60 Credit Points including SCTS1106; or permission of Head of School
Note/s: Not offered in 1999.

SCTS2118
Technology, Environment, Politics
Staff Contact: Paul Brown
CP15 S1 HPW3
Prerequisite: As for HPST2106
Provides a theoretical background for understanding 'the social crisis of the environment'. Images of nature and science as key factors in the development of modernity. Positivism, nature science and the birth of social science. Progress, technocracy, totalitarianism in the twentieth century. Critical theory and the philosophical/political critique of science and technology since World War Two. Postmodernity, the lifeworld, trust and system feedbacks. Global markets and ecological impacts.

SCTS2119
Science, Technology and Everyday Life: History and Current Issues
Staff Contact: David Miller
CP15 S1 HPW3
Prerequisite: As for HPST2106
Note/s: Not offered in 1999.
Examines and analyses the place of science and technology in everyday existence in Australia, Britain and the United States over the last two hundred years as a way of addressing the 'public understanding' of science and technology. The history of infrastructural and domestic technologies (water, sewerage, heating and cooling, transport, communications). Contemporary community efforts to mobilise scientific and technical knowledge in pursuit of infrastructural, environmental and health objectives.

SCTS3106
Technology, Sustainable Development, and the Third World
Staff Contact: John Merson
CP15 S1 HPW3
Prerequisite: As for HPST2106
Sustainable development, along with the technological and social changes that are involved in achieving it, both at a national and global level. The course is divided into three parts: (1) the historical causes of the present global environmental and economic crisis; (2) possible solutions to problems of food production, environmental degradation, industrialisation, energy use, and population growth; (3) ideas for a New World Economic Order and the economic and technological changes required to bridge the ever increasing gap between rich and poor nations.

SCTS3107
Women and Science
Staff Contact: David Miller
CP15 S2 HPW3
Prerequisite: As for HPST2106
Note/s: Not offered in 1999.
A series of seminars on: the constraints and opportunities facing women scientists; an historical survey of women scientists, including some eminent Australians; the philosophical issues and implications for social policy raised by women's participation in science.

SCTS3108
Technological Development in 20th-Century Australia
Staff Contact: George Bindon
CP15 S2 HPW3
Prerequisite: As for HPST2106
Note/s: Not offered in 1999.
The historical development of technology in Australia during the 20th century, with focus on three key dimensions: linkage between scientific research, industrial development, and economic growth; technological change and its impact on Australian society; the distinctive feature of Australia's geopolitical situation.

SCTS3109
Society, Technological Hazards, and Environmental Management
Staff Contact: David Miller
CP15 S1 HPW3
Prerequisite: As for HPST2106
Note/s: Not offered in 1999.
Concerns over risks associated with technological and environmental hazards. The present anxieties over social control and the relations between ethics and politics. Institutional and global aspects of environmental management in relation to hazards such as toxic wastes, genetic engineering, ozone hole; international negotiation.
SCTS3115
The Politics of The Atmosphere
Staff Contact: Stephen Healy
CP15 S1 HPW3
Prerequisite: As for HPST2106
Examines the ozone and greenhouse issues in the broader sustainability debate and in efforts to balance industrial development and ecological sustainability. The pivotal role of Science, the centrality of technological politics, the importance of economic instruments. The local/global relationship is examined through a case study of urban air quality and transport in Sydney.

SCTS3119
Reading Option in Science and Technology Studies
Staff Contact: David Miller
CP15 S1 or S2 HPW3
Prerequisite: As for HPST2106 and permission of Head of School
Students wishing to work in an area not covered by an existing subject may apply to the School to take a reading option. Approval of a program for a reading option will depend on its suitability, and the availability of a staff member to undertake supervision.

SCTS3126
Society and Environmental Process: Botany Bay in the Sydney Region
Staff Contact: Paul Brown
CP15 S2 HPW3
Prerequisite: SCTS2118 and any two of: GEOG2611, GEOG2711, GEOG3761, GEOG3211, HPST2127, HPST2136, HPST3108, SCTS2109, SCTS3106, SCTS3109, SCTS3115
Note/s: Excluded SCTS3020.
Provides an interdisciplinary framework for the interpretation of the ways in which human environments have been socially constructed. This will be done in the particular context of Botany Bay and the Sydney Region. Emerging environmental issues at the regional, national, and global levels will be identified and examined in the light of geographic, historical, sociological, economic, political, and urban change and development. Prospects and processes for intervention will be examined. Each student will complete a research project.

Science and Technology Studies Level IV Honours Program

SCTS4106/SCTS4156
Science and Technology Studies (Honours) (FT/PT)
Staff Contact: David Miller
CP120 F
Prerequisite: Completion of program 6200 including Level II/III subjects totalling 105 Credit Points with an average grade of credit or better
In the Honours Program, candidates are required to present a thesis and to complete coursework as approved by the Head of School.

Textile Technology

TEXT1101
Science for Textiles
Staff Contact: Prof Ron Postle
CP5 S2 L1 T1
Note/s: Restricted to courses 3170, 3175 and 3177
The atomic structure of matter; x-rays; optics and optical instruments; wave theory. Properties of elements and compounds; introductory organic chemistry.

TEXT1201
Introductory Textile Technology
Staff Contact: Prof Mike Paiithorpe
CP10 S2 L3 T1
Note/s: Restricted to courses 3170, 3175 and 3177
Sampling theory and practice for textile testing. Introductory statistics for data processing. Basic techniques for the measurement of fibre properties, including transverse dimensions and length. The application of engineering principles to textile machines and processes, including mechanics of solids, statics, mechanical transmission of power.

TEXT1301
Fibre Science 1
Staff Contact: Prof Ron Postle
CP10 S1 L2 T2
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT2101
Fibre Science 2
Staff Contact: Prof Ron Postle
CP10 S2 L2 T2
Prerequisite: TEXT1101/ TEXT1301
Note/s: Restricted to courses 3170, 3175 and 3177
TEXT2201
Textile Statistics
Staff Contact: Dr John Curiskis
CP5 S2 L2
Note/s: Restricted to courses 3170, 3175 and 3177
Application of mathematical techniques to textile data processing and analysis. Probability theory, distribution functions, tests of significance. Analysis of variance, regression analysis. Introduction to computer statistical packages.

TEXT2301
Yarn Technology 1
Staff Contact: Prof Mike Pailthorpe
CP15 S1 L3 T3
Prerequisite: TEXT1201
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT2401
Fabric Technology 1
Staff Contact: Dr John Curiskis
CP15 S2 L3.5 T2.5
Prerequisite: TEXT1201
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT2501
Computing Applications
Staff Contact: Prof Mike Pailthorpe
CP10 S1 L2 T2
Note/s: Restricted to courses 3170, 3175 and 3177
Introductory computing. Online computer architecture. Features common computing languages; syntax, structure, variable typing, portability. Basic syntax. Common numerical techniques, function evaluation, Monte Carlo techniques. Word processing, spreadsheets and databases. Tutorial assignments will relate to textile computing applications.

TEXT2901
Textile Design 1
Staff Contact: Prof Mike Pailthorpe
CP20 S1 L2 T2 S2 L2 T4
Note/s: Restricted to course 3177
Introduction to textile design, history of textile design, textile design concepts as applied to fibres, yarns and fabrics. The role and utilisation of fibre properties in textile design, including microfibres, bicomponent fibres and fibre blends. Design and construction of fabric structures for specific purposes, eg apparel, domestic household, commercial, medical, industrial, architectural and geotextile fabrics. Commercial aspects in textile design including design practice, costings and marketing principles.

TEXT3101
Textile Structures 1
Staff Contact: Prof Ron Postle
CP7.5 S1 L1 T2
Prerequisite: TEXT1101/ TEXT1301
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT3301
Yarn Technology 2
Staff Contact: Prof Mike Pailthorpe
CP15 S2 L3 T3
Prerequisite: TEXT1201
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT3401
Fabric Technology 2
Staff Contact: Dr John Curiskis
CP15 S1 L3.5 T2.5
Prerequisite: TEXT1201
Note/s: Restricted to courses 3170, 3175 and 3177
TEXT3501
Finishing Technology A
Staff Contact: Prof Mike Pailthorpe
CP10 S1 L2 T2
Prerequisite: TEXT1101/TEXT1301
Note/s: Restricted to courses 3170, 3175 and 3177

Objects of finishing and typical flow diagrams for wool and cotton. The principles and technology of textile finishing processes for protein and cellulosic fabrics, including the removal of impurities and discoloration, the elimination or minimisation of deficiencies in properties, the development of specific properties. Properties of surfactant solutions, micelle formation, surfactants as emulsifiers and detergents. Practical exercises in fabric bleaching, wool milling and shrinkproofing. Analysis of hard water by titration.

TEXT3601
Colour Science
Staff Contact: Prof Mike Pailthorpe
CP7.5 S1 L2 T1
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT3602
Colouration Technology
Staff Contact: Prof Mike Pailthorpe
CP10 S2 L2 T2
Prerequisite: TEXT1101/TEXT1301
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT3801
Textile Engineering
Staff Contact: Prof Mike Pailthorpe
CP7.5 S2 L1 T1
Prerequisite: TEXT1201
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT3901
Textile Design 2
Staff Contact: Prof Mike Pailthorpe
CP10 S2 L2 T2
Prerequisite: TEXT2901

Note/s: Restricted to course 3177

Appreciation of textile products with surface design. Historical aspects of surface design. Concepts and limitations in the dyeing and printing of piece goods. Fabric design limitations for various printing methods, eg direct, reserve, discharge and transfer printing. Novel textile printing methods. Surface design by shearing and embossing. Introduction to automatic embroidery machines. Surface design using applique techniques. Commercial aspects in surface design including performance requirements, coatings and marketing principles.

TEXT4003
Project
Staff Contact: Prof Ron Postle
Corequisite: TEXT4013
CP35 F S1 T5 S2 T9
Note/s: Restricted to courses 3170, 3175 and 3177

Students are required to carry out a research project and to submit a thesis describing their investigations. It is usual for students to be allocated projects in areas related to the particular course option they are studying.

TEXT4013
Seminar
Staff Contact: Prof Mike Pailthorpe
Corequisite: TEXT4003
CP10 F T2
Note/s: Restricted to courses 3170, 3175 and 3177

Students prepare and present a seminar before an audience consisting of staff of the Department, final year students, Graduate Diploma students, and any other interested undergraduate or postgraduate students, on a subject of topical and specific interest in the field of textile science, technology or management, and subsequently submit the seminar in writing.

TEXT4101
Textile Structures 2
Staff Contact: Prof Ron Postle
CP7.5 S2 L1 T2
Prerequisite: TEXT1101/TEXT1301
Note/s: Restricted to courses 3170, 3175 and 3177

TEXT4201
Processing Laboratory*
Staff Contact: Dr John Curiskis
CP7.5 S1 T3
Notes: Restricted to courses 3170, 3175 and 3177
*Co-Op students only.
Students undertake a project involving the design, production and assessment of a textile product manufactured by their Co-Op IT3 sponsor company.

TEXT4202
Textile Quality Control
Staff Contact: Prof Mike Pailthorpe
CP5 S2 L1 T1
Prerequisite: TEXT2201
Notes: Restricted to courses 3170, 3175 and 3177

TEXT4501
Finishing Technology B
Staff Contact: Prof Mike Pailthorpe
CP10 S2 L2 T2
Prerequisite: TEXT1101/TEXT1301
Notes: Restricted to courses 3170, 3175 and 3177
Wet and dry fabric finishing. The application of special finishes including flame retardant finishes, crease resistant and antistatic finishes, etc. Fabric setting Dimensional stability and its measurement. The drying of textile materials. Recent developments in finishing technology.

TEXT4601
Field Trip
Staff Contact: Prof Mike Pailthorpe
CP7.5 S1 T3
Prerequisite: Completion of all Years 1, 2 and 3 TEXT subjects
Notes: Restricted to courses 3170, 3175 and 3177
A five day field trip, normally undertaken during Session 1, designed to give wide exposure to the natural fibre and man-made fibre processing industries in New South Wales and Victoria. Students will incur some personal expenses in connection with this subject, which is a compulsory part of the course.

TEXT4701
Textile Industry Studies
Staff Contact: Dr John Curiskis
CP7.5 S1 L T3
Notes: Restricted to courses 3170, 3175 and 3177
Econometrics of the textile and clothing industries. Models of production, import and export and consumption of textiles and clothing in Australia, and comparison with world data. Case studies in textile and clothing manufacture operations. Environmental considerations in relation to pollution from the textile industry. Waste water treatment methods.

TEXT4702
Textile Management*
Staff Contact: Dr John Curiskis
CP15 S1 T6
Notes: Restricted to courses 3170, 3175 and 3177
*Co-Op Students only
Selected readings in the Management of manufacturing systems with particular reference and examples from specific manufacturing enterprises.

TEXT4901
Textile Design 3
Staff Contact: Prof Mike Pailthorpe
CP15 S1 L3 T4
Prerequisite: TEXT3901
Notes: Restricted to course 3177
Appreciation of the role of computers in textile design. Computer Aided Design (CAD) applications in fibre blending, yarn manufacture, woven and knitted fabric manufacture, dyeing technology, printing technology, embroidery, etc. Computer Aided Manufacture (CAM) systems for various sectors of the textile industry. Commercial aspects of CAD/CAM systems including performance requirements and coatings.

Wool and Animal Science

WOOL3401
Animal Nutrition
Staff Contact: Dr Geoff Robards
CP10 S2 L3 T1
Composition and classification of foodstuffs and pastures. Digestion absorption and metabolism of carbohydrates, proteins, fats, mineral and vitamins. Digestibility of feedstuffs. Nutrient and energy balances and requirements of livestock. Feeding standards and the quantitative application of nutritional data with particular reference to Australian conditions. Supplementary and drought feeding. Consideration of disorders due to nutrition. While particular emphasis is given to nutritional requirements of sheep, those of other farm livestock are dealt with in this section.

WOOL3801
Genetics 1
Staff Contact: Dr Geoff Robards
CP10 S2 L3 T1
The nature and transmission of genetic material. Mechanisms by which genes produce their effect. The genetic structure of populations and the factors which affect it. Methods for the study of quantitative characters. Application of genetics to animal and plant improvement. Goals and breeding programmes for Australian sheep.
WOOL3901
Biostatistics 1
Staff Contact: Dr Geoff Robards
CP10 S1 L2 T2

WOOL4003
Project
Staff Contact: Dr Geoff Robards
Students are required to conduct an experimental or theoretical investigation under supervision and to submit a thesis describing the results of their investigations. Throughout the year students are required to submit progress reports to their supervisors and to present seminars. The written reports of the project shall be submitted by the last day of Session 2.

WOOL4013
Seminar
Staff Contact: Dr Geoff Robards
Seminars deal with research and or development work being undertaken or recently completed by students and staff of the Department, or other University schools or research organisations. There are also seminars on communication in wool and pastoral sciences and on problems facing rural industries.

WOOL4411
Ruminant Nutrition
Staff Contact: Dr Geoff Robards
CP10 S1 L2 T2
Utilisation of metabolisable energy: protein digestion and utilisation; digestion of complex carbohydrates; digestive upsets: bloat, acidosis, rumen stasis; techniques for measuring nutrient dynamics and body turnover rates; formulation of specialised rations for: feedlots, live sheep trade, Sharlea wool production, milk production.
Faculty of Life Sciences

Dean: Professor MJ Sleigh
The Schools of the Faculty of Life Sciences offer facilities for students to proceed to the award of a Graduate Diploma in Biochemistry and Molecular Genetics (5345), Biotechnology (5015), Food Technology (5020), Biological Science (5350), Microbiology and Immunology (5355) and Psychology (5330).

The award of a Masters degree by course work is offered in Psychology (8251 and 8253 and 8254). Course work Masters programs are also available in Biotechnology (8042), Biopharmaceuticals (8043), Food Science and Technology (8032) and Marine Science (8265).

Programs leading to degrees of Masters by research and PhD are available in all Schools of the Faculty. A combined PhD/Masters course work is offered in Psychology (1402 and 1403). Graduates are advised to contact the relevant Head of School to obtain advice on entry requirements.

Faculty of Science and Technology

Dean: Professor CE Sutherland
The Schools of the Faculty of Science and Technology offer programs leading to the Award of the degrees of Doctor of Philosophy, Master of Science and (through the School of Materials Science and Engineering) Master of Engineering.

The following formal courses leading to graduate awards are also offered:

- School of Chemistry: Graduate Diploma in Food and Drug Analysis, Master of Chemistry in Food and Drug Chemistry
- School of Geography: Graduate Diploma in Remote Sensing, Master of Applied Science in Geography
- School of Geology: Master of Applied Science in Geology (including programs in Geological Data Processing, Groundwater Studies and Engineering and Environmental Geology)
- School of Materials Science and Engineering: Graduate Diploma in Textile Technology, Master of Applied Science in Corrosion Engineering, Master of Applied Science in Engineering Materials
- School of Mathematics: Graduate Diploma in Physical Oceanography, Graduate Diploma in Statistics, Master of Mathematics, Master of Statistics
- School of Optometry: Master of Optometry
- School of Physics: Graduate Diploma in Physics, Graduate Diploma in Physics Research Techniques
• School of Safety Science: Graduate Certificate in Safety Science, Graduate Diploma in Environmental Studies, Graduate Diploma in Ergonomics, Graduate Diploma in Safety Science, Master of Applied Science in Ergonomics, Master of Applied Science in Industrial Safety, Master of Applied Science in Occupational Health and Safety, Master of Engineering Science in Industrial Safety, Master of Environmental Studies, Master of Safety Science

• Centre for Advanced Numerical Computation in Engineering and Science: Graduate Diploma in Computational Science, Master of Computational Science.

Graduates are advised to consult the Head of Department before making formal application for registration in any of the above courses.

Students completing undergraduate science degrees which include an appropriate mix of subjects may qualify for admission to higher degree programs in Faculties other than Life Sciences and Science and Technology.

**Enrolment Procedures**

All students re-enrolling in 1998 or enrolling in graduate courses should contact the Postgraduate Section for enrolment details.
Facilities are available in each of the Schools for research leading to the award of the degrees of Master of Science, Doctor of Philosophy and Graduate Diploma. The Department of Biotechnology (within the School of Applied Bioscience) offers a Graduate Diploma in Biotechnology and a Masters degree course in Biotechnology by formal study. The Department of Food Science and Technology (within the School of Applied Bioscience) offers a Graduate Diploma in Food Technology and Master of Applied Science degrees in Food Technology, Food Microbiology, Food Engineering and Food Science and Nutrition by formal study. The School of Psychology offers Master of Psychology (Clinical), Master of Psychology (Forensic), Master of Psychology (Organisational), combined PhD/Master of Psychology (Clinical), and combined PhD/Master of Psychology (Organisational) degree courses. A Master of Marine Science program is also available.

**Higher Degree Qualifying Program**

Students without a BSc Honours degree wishing to register as higher degree candidates must usually complete a qualifying program, admission to which is subject to the approval of the Faculty Higher Degree Committee.

Applicants must normally have a degree or diploma in an appropriate field of study from an approved university or institution, and in the case of a diploma, appropriate professional experience.

Undergraduates of this University may be admitted to the full-time or part-time Honours undergraduate course. Other applicants may be admitted to a full-time, part-time or external qualifying program. The duration of the qualifying program is a minimum of one year for full-time and two years for part-time or external students.

**Content of Qualifying Program**

The qualifying program consists of the whole of the usual program for the final Honours year of the undergraduate course, the following being the prescribed Level IV subjects:

- **BIOC4318** Biochemistry Honours (Full-time)
- **BIOC4618** Biochemistry Honours (Part-time)
- **BIOS4018** Biological Science Honours (Full-time)
- **BIOS4014** Biological Science Honours (Part-time)
- **BIOS4028** Botany Honours (Full-time)
- **BIOS4024** Botany Honours (Part-time)
- **BIOT4073** Biotechnology Honours (Full-time)
- **BIOT4083** Biotechnology Honours (Part-time)
- **BSSM4103** Genetics Honours (Full-time)
- **BSSM4109** Genetics Honours (Part-time)
- **MICR4013** Microbiology and Immunology Honours (Full-time)
- **MICR4023** Microbiology and Immunology Honours (Part-time)
- **PSYC4023** Psychology 4 (Thesis) Honours
- **BIOS4038** Zoology Honours (Full-time)
- **BIOS4034** Zoology Honours (Part-time)

The qualifying program is graded in the usual way, and in appropriate cases the results are expressed as a grading equivalent to Honours.
Students undertaking a qualifying program in the Department of Food Science and Technology will enrol in Course 6138 Postgraduate Qualifying in Food Science and Technology and undertake such subjects as approved by the Head of Department.

Alternative Qualifying Program

Applicants who cannot attend the University regularly for the above programs may be admitted as external qualifying students to a program similar to a standard Honours year. The following are the alternative qualifying subjects:

- BIOC6308: Biochemistry
- BIOS9917: Biological Science
- BIOS9943: Botany
- MICR6043: Microbiology
- PSYC6000: Psychology
- BIOS9945: Zoology

The results in alternative qualifying subjects are graded Pass or Fail only.

Fees

Candidates enrolled in the Alternative Qualifying Program are exempt from student service fees.

Graduate Diplomas

The Graduate Diploma is designed as a one year full-time period of study and research in all Schools except Applied Bioscience. It is intended primarily as an advanced training program for graduates from overseas universities who wish to obtain specialised training in particular areas of life sciences. The expectation is that for suitably qualified students, the course would allow entrance to a higher degree program (MSc or PhD) provided suitable supervision and facilities were available. The course is also available to graduates of Australian universities who have not done an Honours course and who wish to pursue graduate study in a discipline other than that in which they obtained their first degree.

At the successful conclusion of the course the students would be provided with a Diploma Certificate showing their Higher Degree Qualifying status by the University and a statement of their proficiency from the relevant School.

Entrance for students for whom English is the second language would be dependent on achieving an adequate standard of written and spoken English.

The academic year for the University of New South Wales consists of two sessions, commencing in late February – early March and mid-July, respectively. It is preferred that new students arrive 2-3 weeks prior to the beginning of the Session, so that they can be oriented prior to the commencement of formal teaching.

The Graduate Diplomas in Biotechnology and Food Technology are coursework programs that offer retraining for graduates of other disciplines.

Brief descriptions of the courses currently offered within the Schools of the Faculty of Life Sciences follow.

School of Applied Bioscience

Comprises the Departments of Biotechnology and Food Science and Technology.

Department of Biotechnology

5015
Biotechnology Graduate Diploma Course

Full-time or Part-time

Graduate Diploma
GradDip

Staff Contact: P Rogers

The graduate diploma course provides the opportunity for graduates with no previous tuition in biotechnology to undertake training in this discipline.

A degree in a science-based course is required for admission. If the degree course has not included a biology component, the candidate is required to undertake some basic biology training as a prerequisite or corequisite.

Under normal circumstances, students whose previous training has included a substantial component of biotechnology are not admitted to the course.
The course comprises study of undergraduate and graduate formal subjects, plus extensive laboratory training in biotechnology.

The diploma is awarded after one year's full-time study, consisting of an average of 18 hours per week, or two years part-time study, consisting of an average of 9 hours per week. The program includes the listed obligatory subjects plus sufficient of the listed elective subjects to meet the hours of study required. The electives include subjects necessary for students without previous tuition in biochemistry and or microbiology, as well as alternatives for those with previous tuition in these disciplines. The choice of electives in each individual case is subject to approval by the Head of School.

Obligatory Subjects
BIOT3011 Biotechnology A
BIOT3021 Biotechnology B
BIOT5013 Practical Biotechnology

Elective Subjects
BIOT3031 Microbial Genetics
BIOT3061 Monoclonal Antibody and Genetic Techniques in Biotechnology
BIOT8010 Graduate Seminars
BIOT7100 Biological Principles
BIOT7110 Bioengineering Principles

Other suitable electives from the Department of Food Science and Technology and/or other Schools.

Students who have previously studied compulsory subjects or their equivalent at an acceptable level may be granted an exemption by the Head of Department but the equivalent number of credit points must be completed by taking other approved subjects.

*Credit points may be concentrated in one session.

Elective subjects
The elective subjects making up the remainder of the credit points, may be selected from those offered by the School of Applied Bioscience, or from those offered by other Schools in the University subject to approval by the Head of Department. Only graduate subjects will count towards credit points.

Note: The course is currently being revised. Consult the Head of Department for approved amendments to the above program.

School of Biochemistry and Molecular Genetics

Department of Food Science and Technology

5020
Food Technology Graduate Diploma Course
Full time or Part-time

Graduate Diploma
GradDip

The Graduate Diploma course is designed to provide professional training at an advanced level for graduates in Science, Applied Science or Engineering who have not had previous training in Food Technology.

Requirements are a first degree and, in some cases, the successful completion of assignments or examinations, as directed by the Head of Department.

The course is a blend of formal lectures and laboratory work. The Graduate Diploma is awarded on the successful completion of one year of full-time study (at least 119 credit points), or two years of part-time study (at least 59.5 credit points/year). It involves the following program:

GradDip (by Research)

Graduate Diploma (by Research)
GradDip
Full-time – CP120
Part-time – CP60

Staff Contact: Dr D Lee

The course is tailored according to the background and requirements of the individual student. In most cases it would include advanced formal undergraduate training, including lectures in general and medical biochemistry, training in the use of modern biochemical techniques, eg scintillation counting, gas liquid chromatography (GLC), high performance liquid chromatography (HPLC), molecular biology, spectrophotometry, nuclear magnetic resonance (NMR) spectroscopy, and animal and plant cell culture. The student would also carry out a research project (or projects) in the laboratory of an academic member of staff and write a report on the project.

The School of Biochemistry and Molecular Genetics has a wide range of interests and can offer research projects in most areas of biochemistry. Specialised areas of research are molecular biology, marine biochemistry, parasite biochemistry and plant biochemistry.
School of Biological Science

5350
Biological Science Graduate Diploma Course
Full-time

Graduate Diploma
GradDip
Full-time – CP120
Part-time – CP60

Staff Contact: School Office

The course is designed to meet the needs and objectives of individual students building on that students’ competence and experience. It includes a formal coursework component and a research project which is carried out under the supervision of a member of the academic staff. Students receive advanced formal training to provide them with background information relevant to their research project.

The School has a wide range of interests, and training and research are offered in both plant and animal sciences. Areas of biology in which facilities and appropriate supervision are available include: ecology, taxonomy, environmental physiology, marine and fisheries biology, genetics and evolution, mycology, ultrastructure, comparative physiology, mammalian studies.

School of Microbiology and Immunology

5355
Microbiology and Immunology Graduate Diploma Course
Full-time

Graduate Diploma
GradDip
CP120

Staff Contact: School Office

The structure of the course would be decided after discussions with students, taking into account their particular background, interest and career goals. Usually students would attend one or more of the advanced third year courses in either microbial genetics, environmental microbiology, immunology, medical bacteriology or animal virology. The rest of the year would be spent carrying out a research project supervised by a member of academic staff.

The School of Microbiology and Immunology has a number of research teams working on a range of well-funded projects in microbiology, molecular biology and immunology. Specialised areas of research include microbial ecology, molecular genetics, environmental microbiology, marine microbiology; the pathogenesis of intestinal and gastroduodenal infection, T cells, cytokines, the allergic reaction.

School of Psychology

5330
Psychology Graduate Diploma Course
Full-time

Graduate Diploma
GradDip
CP120

Staff Contact: Dr J Cranney

This one-year course is adapted to suit the needs and objectives of each student, taking into account the areas of psychology in which they have already demonstrated competence. The expectation is that students who achieve an appropriate standard in the course are then admitted to a higher degree program, provided suitable supervision and facilities are available.

The course comprises formal teaching in an approved set of subjects drawn from the following areas: research methods and statistics, perception, learning, cognitive psychology, psycholinguistics, social psychology, clinical psychology, developmental psychology, personality, physiological psychology, abnormal psychology, and applied psychology. Both lectures and practical work will be given.

Students normally also carry out a research project under the supervision of a member of the academic staff of the School. Active research programs exist in most areas including abnormal and clinical psychology, behavioural neuroscience, cognitive science, cognition and perception, data analysis and psychometrics, industrial and organisational psychometrics, and social, personality and developmental psychology. Particular attention within each of these programs is paid to the interrelationship between scientific theory and the practical application of psychological knowledge.
Masters Degrees

Department of Biotechnology

Master of Science Coursework Degree Courses

The Department of Biotechnology offers three formal coursework masters courses, the Master of Science in Biotechnology 8042, the Master of Science in Biopharmaceuticals 8043.1000, and the Master of Science in Bio-pharmaceuticals by distance education 8043.2000.

CRC for Biopharmaceuticals

University Contact: Professor PP Gray

The Cooperative Research Centre for Biopharmaceutical Research was incorporated in 1992. The partners in the Centre include UNSW's Department of Biotechnology, School of Physiology and Pharmacology, and Biomedical Mass Spectrophotometry Unit; the Garvan Institute of Medical Research, St Vincent's Hospital, Sydney; the Biomolecular Research Institute and Peptech Limited.

The primary aim of the Biopharmaceutical Research CRC is to provide a coordinated research base to aid the development of the Australian biopharmaceutical industry. To achieve this goal, the Centre functions as a national centre for both the development of new internationally competitive biopharmaceutical products, and the education of researchers in the combination of biopharmaceutical research techniques and their integration with the industrial goals necessary to develop products for the world market.

The partners of the Cooperative Research Centre have all the necessary expertise for the discovery, design and development of novel biopharmaceutical products resulting from the recent rapid advances in the fields of genetic engineering and biotechnology.

The CRC provides a fertile environment for postgraduate study, as students can see the results of their research being developed into useful products.

CRC for Food Industry Innovation

Director: Professor NW Dunn

The Centre was established in 1993 and involves the Schools of Applied Bioscience, Biochemistry and Molecular Genetics and Microbiology and Immunology in the Faculty of Life Sciences, CSIRO, and three industry partners to provide a coordinated research and educational base to generate development of improved and novel natural food ingredients, principally through the use of microorganisms.

The five partners in the CRC have the combined expertise in research and commercialisation to market the first ingredients within four years. The ingredients that the Centre aims to develop include starter cultures, anti-microbial agents, antioxidants, fat substitutes, texture modifiers, colours, flavours, probiotics and biocontrol agents.

Currently there are eight research programs which focus on different areas which may generate commercial products. Research areas include molecular genetics, cellular physiology, bio-chemistry and kinetics of food approved and other potentially useful microorganisms. Microbial processes will be developed and optimised through to 100 litre pilot-scale capacity and these studies will include ingredient recovery and formulation. Expertise exists for evaluation of ingredients in food formulation and nutritional evaluation.

Undergraduate and postgraduate (formal MSc and PhD) programs provide training relevant to the total area. Research programs contribute to the generic resource of the CRC and provide students with a direct opportunity to interact with national and international food/biotechnology companies.

8042
Master of Science in Biotechnology by coursework

MSc

The course includes advanced treatments of all areas of biotechnology. It is open to graduates with a four-year degree in biotechnology or a related discipline, or who have, in the opinion of the Higher Degree Committee, acquired equivalent qualifications or experience. Intending students are referred to Conditions for the Award of Graduate Degrees set out later in this handbook.

The course consists of lectures, tutorials, practical sessions, case history studies and a supervised project.

The minimum period of registration before the award of the degree is two sessions for full-time students and four sessions for part-time students.

An acceptable course would be a program of subjects involving a minimum of 18 hours per week for two sessions full-time or a minimum of 9 hours per week for four sessions part-time. Course details are as follows:
enhanced food production and the new developments and implications of transgenic plants and animals. Both plant biotechnology and animal biotechnology for the application of enzymes in food production, the use of yeast and fungi in foods, and the principles involved in developing probiotics and functional foods. Examples are taken from the food industry where the principles of food microbiology and bioprocess engineering are both essential to an understanding of food process and product innovation.

BIOT 7220
Food Biotechnology (Applications)
Staff Contact: Professor P Rogers
CP15 S2
The subject reviews a range of applications in the food industry where food biotechnology principles are involved. These include the applications of the principles of biocontrol in food production and the extension of shelf life, the application of enzymes in food production, the use of molecular diagnostic and analytical procedures for food monitoring, new technologies in the treatment and utilization of food processing wastes, the applications of both plant biotechnology and animal biotechnology for enhanced food production and the new developments and implications of transgenic plants and animals.

BIOT 7230
Food Biotechnology (Management)
Staff Contact: Professor P Rogers
CP15 S2
The subject is designed to develop management skills related to biotechnology-based innovations in the food industry. It provides an overview and analysis of the Australian and international food industry as well as covering the principles of economic feasibility analysis for new opportunities and strategies for effective R&D, marketing and commercialization to exploit these opportunities. Intellectual property and patenting, regulatory aspects (novel foods, applications of gene technology in foods) are also covered as well as a comparative study of food standards in Australia and internationally. A series of case studies on new food biotechnology products and processes is designed to integrate the various concepts developed in the course. Each individual course would comprise:

1. A major strand of related material comprising approximately 75% of the total program, including a project comprising not less than 15% nor more than 50% of the program.
2. A minor strand of broader based material comprising up to 25% of the total program.
3. At least 60% of the non-project component must be taken in the Department of Biotechnology unless otherwise approved by the Head of School. The remainder, subject to approval and availability, may be undertaken elsewhere in the University.

BIOT 7051 Applied Genetics
0 5 20
BIOT 7061 Peptide and Protein Technology
5 0 20
BIOT 7071 Biochemical Engineering
5 0 20
BIOT 7081 Environmental Biotechnology
0 5 20
BIOT 7091 Applied Cellular Physiology
0 5 20
BIOT 7110 Bioengineering Principles
3 0 12
BIOT 7123 Biotechnology Project Minor
4 4 32
Total HPW Session 1 17
Total HPW Session 2 19
Total Credit Points 144

Elective components

Elective subjects, may be selected from those offered by the School of Applied Bioscience, or from those offered by other Schools in the University subject to approval. Additional subjects available by distance mode include:

BIOT 7210
Food Biotechnology (Principles)
Staff Contact: Professor P Rogers
CP15 S1
The subject covers the basic principles in food biotechnology including techniques of genetic manipulation of microorganisms, principles of cell culture, bioreactor design, operation and control for the food industry, the use of bacteria in the production of new and novel foods, the use of yeast and fungi in foods, and the principles involved in developing probiotics and functional foods. Examples are taken from the food industry where the principles of food microbiology and bioprocess engineering are both essential to an understanding of food process and product innovation.

BIOT 7220
Food Biotechnology (Applications)
Staff Contact: Professor P Rogers
CP15 S2
The subject reviews a range of applications in the food industry where food biotechnology principles are involved. These include the applications of the principles of biocontrol in food production and the extension of shelf life, the application of enzymes in food production, the use of molecular diagnostic and analytical procedures for food monitoring, new technologies in the treatment and utilization of food processing wastes, the applications of both plant biotechnology and animal biotechnology for enhanced food production and the new developments and implications of transgenic plants and animals.

BIOT 7230
Food Biotechnology (Management)
Staff Contact: Professor P Rogers
CP15 S2
The subject is designed to develop management skills related to biotechnology-based innovations in the food industry. It provides an overview and analysis of the Australian and international food industry as well as covering the principles of economic feasibility analysis for new opportunities and strategies for effective R&D, marketing and commercialization to exploit these opportunities. Intellectual property and patenting, regulatory aspects (novel foods, applications of gene technology in foods) are also covered as well as a comparative study of food standards in Australia and internationally. A series of case studies on new food biotechnology products and processes is designed to integrate the various concepts developed in the course. Each individual course would comprise:

8043.1000
Master of Science in Biopharmaceuticals by coursework

MSc
This is an interdisciplinary program designed for graduates with backgrounds in either pharmacology or biotechnology who wish to obtain advanced training in both areas in order to gain expertise necessary for the development and use of the new generation of biopharmaceuticals which have been developed by, or result from, the application of molecular biology. It is open to graduates with a four year degree in a related discipline or who have, in the opinion of the Higher Degree Committee, acquired equivalent qualifications or experience. Prior study of biochemistry is required for the course. The course consists of lectures, tutorials, practical sessions, case history studies and a supervised project. The minimum period of registration before the award of the degree is two sessions for full-time students and four sessions for part-time students. The course is also offered through distance education. An acceptable course would be a program of subjects involving a minimum of 18 hours per week for two sessions full-time.
or a minimum of 9 hours per week for four sessions part-time. Choice of subjects is dependent on the background of the student.

Principles of Pharmacology (PHPH5461) must be taken by students who have not completed an approved Pharmacology course, while Principles of Biotechnology (BIOT7040) must be taken by students who have not completed an approved Biotechnology course program.

All students must pass Advanced Pharmacology (PHPH5471) and Advanced Biotechnology (BIOT7030) and Biotechnology Principles (BIOT7040) and/or Pharmacology Principles (PHPH5461) whichever is applicable. Course details are as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOT7060</td>
<td>Biopharmaceuticals Project</td>

Elective Components

If a minor project is selected, additional elective subject(s) may be selected from those offered by the Department of Biotechnology or the School of Physiology and Pharmacology, or from those offered by other Schools in the University subject to approval.

Each individual course would comprise: (i) a major strand of related material comprising approximately 75% of the total program including a project comprising not less that 15% of the program (ii) a minor strand of broader based material comprising up to 25% of the total program.

---

8043.2000
Master of Science in Biopharmaceuticals by coursework

Distance Education

The CRC for Biopharmaceutical Research has developed this strongly interdisciplinary Master of Science in Biopharmaceuticals course. The course teaches the scientific basis underscoring the development of recombinant biopharmaceuticals, combined with aspects of clinical trials, regulatory considerations, patent issues, and licencing. The course content is incorporated in 8 distance education modules comprised of written text and video/audio tapes containing course material, demonstrations and self-testing exercises. Access to the Subject Co-ordinators will be by phone, fax, electronic mail and teleconferencing facilities.

The Master's Program can be completed in a minimum of 2 years. The minimum time option would entail the completion of two modules per session. These are offered concurrently. A maximum time for completion has been set at 8 years.

Modules consist of printed notes containing subject material, readings, assessment questions and exercises. Some modules also include audio and video taped material so access to audio equipment is essential.

The Master's Program calls for the completion of 8 modules coursework (exemptions may be allowed in exceptional circumstances) plus completion of a major project or two mini projects. Depending upon circumstances, projects may be industry or laboratory related or may be literature based. Completion of a minimum of 4 modules is required before projects may be commenced.

There will be two tutorials per session per module. These will be conducted via a multiple telephone link and will be structured and interactive.

Each module will be assessed separately at module completion and a certificate awarded. The assessment of modules will be flexible and will be based on two pieces of submitted work. This may be in the form of written assignments or as a timed, faxed examination.

Students' module choices are from the following:

Module 1
Basic Principles of Drug Actions

This module covers general principles of pharmacodynamics and pharmacokinetics. Pharmacodynamics (what the drug does to the body) considers drug-receptor interactions, the basis of dose-response curves, reversible and irreversible antagonists, partial agonists and related topics. Events following the drug-receptor interaction, which include stimulation of second messenger systems and the pharmacology of ion channels, are described. The principles governing pharmacokinetics (what the body does to the drug) and their clinical importance are discussed in some detail. There are several simple graphical and
problem solving exercises to be completed to aid in your understanding of this material.

Module 2
PHPH5511 Selected Topics in Pharmacology
For this module the topics were chosen to enable students to gain knowledge of the receptors in the human body with which drugs commonly interact to produce their main clinical effects, or their side-effects/toxicological actions. The module begins with an introduction to the autonomic nervous system, then works through autonomic receptors, receptors for histamine and serotonin, then to the newer areas of peptide receptors and cytokines, the latter areas being those for which drugs are now being developed. With this background, plus some reading material on receptors for drugs affecting the central nervous system, it is felt that students will be able to read and understand the pharmacology of most drugs in clinical use. A video which covers many autonomic drug effects on the cardiovascular system, plus questions based around this film, are included.

Module 3
PHPH5521 Techniques for Drug Development
This module extends the concepts raised and discussed in the Basic Pharmacokinetics section of Module 1. More advanced pharmacokinetic problems, such as compartmentation, kinetics of effects and problem solving are included. The technique of measuring receptor binding is shown in some detail on video, with explanation of how the technique is set up, and how and why it is much used in new drug development. Also included in this module is a section on techniques used in the assay of drugs. The determination of molecular structure, and quantitation of drugs in the body are vital areas of drug development, and indeed pharmacokinetics depends upon such quantitation.

Module 4
PHPH5531 Discovery and Development of New Medicines
This module gives an overview of most aspects of the development of new drugs. There is a very short historical introduction and examples of the discovery and development of drugs from natural products (plants) plus some examples of drugs developed using synthetic programs (chemical modifications). There is an example of a Natural Products program with examples of broad based screens and follow up testing in animals (Phase 0) followed by a section on the necessary toxicological testing in animals (also Phase 0) before a drug can be tested in humans. Phase 1-4 of clinical trials are then discussed, followed by the Pharmaceutical Company's and the Clinical Investigator's viewpoints of drug development. Regulatory issues and some ethical problems are briefly considered.

Module 5
BIOT7070 Production of Recombinant Products
In this module, the topics deal with some basic recombinant DNA techniques and then heterologous protein expression in prokaryotes and eukaryotes are discussed in greater details. For prokaryotes, Escherichia coli is the model species chosen and for eukaryotes, the cell systems of yeast and mammalian cells are described. The advantages and disadvantages of the various expression cell systems are outlined. The vectors used for cloning of the protein genes are also described and illustrated. Cloning of genes into the vectors, production and subsequent characterisation of the recombinant protein are also described. These examples are actual biopharmaceutical products currently produced by the biotechnology industry and students are referred to published journal papers throughout the modules.

Module 6
BIOT7080 Principles of Fermentation and Downstream Processing
The units in this module were selected to give the students a good understanding of the fundamental principles associated with biopharmaceutical manufacture. The module begins by discussing basic fermentation principles for the large-scale culture of bacterial and mammalian cells to produce recombinant protein biopharmaceuticals. This is followed by a thorough study of the main unit operations associated with product recovery, commonly referred to as downstream processes. The principles of Good Manufacturing Practice are discussed in the third unit, which is relevant to all aspects of drug manufacturing, including fermentation and product recovery operations. This unit is thus designed to put regulatory principles into the context of biopharmaceutical manufacture. The last unit covers modern methods of product characterisation, which forms a critical component of the regulatory procedure.

Module 7
BIOT7090 Monoclonal Antibody Technology
This module is made up of 4 units covering techniques for the production of monoclonal antibodies and discussing their therapeutic applications. Unit 1 is designed as an introduction to immunology, emphasising the areas of immunology relevant to antibody production. In addition the structure of antibody molecules is studied in detail. Unit 2 describes the processes in the production of hybridomas, the specialised cells which produce monoclonal antibodies. This unit includes information on immunisation protocols, methods of cell fusion and selection, and the production of human monoclonal antibodies by EBV-transformed B cells. Unit 3 is associated with the more recent developments in antibody engineering techniques. The phage display system, and genetic manipulations for the production of humanised antibodies and antibody fragments are described in details. Unit 4 covers the applications of monoclonal antibodies both for in vivo diagnostics and for therapy. Also, some of the more recent innovations such as the production of recombinant immunotoxins are described.

Module 8
BIOT7120 Regulatory Considerations, Patent Issues and Licensing
The first unit of this module looks at the code of Good Manufacturing Practice (GMP) for the production of recombinant biopharmaceuticals and the establishment of Standard Operating Procedures (SOPs) for a production
process. This is especially relevant as many of the M.App.Sc. (Biopharmaceuticals) graduates will take up positions in industry. The international biopharmaceutical industry is a vigorous, rapidly growing industry. Compared to the pharmaceutical industry it is still at a fairly early stage of development and undergoing some interesting changes. The second unit provides an understanding of the nature of the biopharmaceutical industry at this stage of its evolution. It includes the concept of licensing as an important factor in its development as well as an appreciation of the basics of licensing activity. The final unit introduces the student to the concept of intellectual property as it relates to biopharmaceuticals and provides some guidelines on its management. Intellectual property is the collection of statute and common law principles giving ownership of inventions, trade secrets, trade marks, designs and copyright in literary and artistic works to their creators. The creation and protection of intellectual property is the basis on which development and commercialisation of biopharmaceuticals is built and as such is of vital concern to the industry. This unit will provide a detailed consideration of patents and trade secrets and touch briefly on the subject of trade mark registrations, industrial design registrations and copyright. Special issues relating to patents and trade secrets in biopharmaceuticals will also be examined.

Module 9
BIOT7130 Biotechnology Mini Project 1
A small experimental or design project, or an extensive literature review and analysis of a selected topic in biotechnology.

Module 10
BIOT7140 Biotechnology Mini Project 2
A small experimental or design project, or an extensive literature review and analysis of a selected topic in biotechnology.

Modules 9 and 10
BIOT7150 Biotechnology Major Project
An experimental or technical investigation or design project in the general field of biotechnology.

Module 9
PHPH5541 Pharmacology Mini Project 1
A small laboratory or industry based project or an extensive literature review or extensive data analysis in the area of drug development.

Module 10
PHPH5551 Pharmacology Mini Project 2
A small laboratory or industry based project or an extensive literature review or extensive data analysis in the area of drug development.

Modules 9 and 10
PHPH5561 Pharmacology Major Project
A laboratory or industry based project in the area of drug development.

Department of Food Science and Technology

8032
Master of Science by Coursework Degree Courses

The MSc coursework degree courses provide for a comprehensive study of theoretical and applied aspects of the science, technology and engineering of foods. The courses are elective in nature providing an opportunity for graduates to apply their basic skills in areas relevant to these fields of Science and Technology in which the Department has developed special expertise. Intending candidates are invited to contact the Head of Department for advice and recommendation. Graduate coursework courses are available for Master of Science degree programs in the following areas:

- Food Technology Course 8032.1000
- Food Microbiology Course 8032.2000
- Food Engineering Course 8032.3000
- Food Science and Nutrition Course 8032.4000

Note: These courses are currently being revised. Consult the Head of Department for approved amendments to these programs.

Entry qualifications

A four-year Bachelor degree, honours degree or equivalent (e.g. three-year degree plus relevant employment experience) is the minimum requirement for admission to the courses.

Study programs

Students are required to complete a program of study totalling at least 126 credit points made up of compulsory subjects, a compulsory project and elective subjects. Students who have previously studied compulsory subjects or their equivalent may be granted an exemption by the Head of Department but the equivalent number of credit points must be completed by taking other approved subjects. The degree will comprise one year of full-time study (normally two sessions of at least 63 credit points each) or two years of part-time study (normally four sessions of at least 31.5 credit points each), and would comprise:

1. A major strand of related material comprising approximately 75% of the total program, including a project comprising not less than 15% nor more than 50% of the program.
2. A minor strand of broader based material comprising up to 25% of the total program.
3. Undergraduate material may be included in one or both strands but will not be included in credit points.
4. At least 60% of the non-project component must be taken in the School of Applied Bioscience unless otherwise approved by the Head of Department. The remainder, subject to approval and availability, may be undertaken elsewhere in the University. Full details of all subjects are listed under Disciplines of the University in the Calendar.

8032.1000
Food Technology

Master of Science in Food Technology by Coursework
MSc

The MSc course in Food Technology is particularly relevant to graduates in Agriculture, Science and Technology and Applied Science with principal interests in chemistry, biochemistry, microbiology, physiology, nutrition and engineering. This is a formal course consisting of core components (including a project), and an elective component that allows reasonable flexibility and a choice of subjects in food science and technology based on the candidate’s background, subject to the availability of staff and resources.

The course comprises:

Compulsory subjects
FOOD1527 Principles of Food Preservation 21
FOOD1557 Food Technology Laboratory 21
FOOD1707 Seminar 7

Compulsory project
Either
FOOD1717 Major Research Project (available only to exceptional candidates) or 63
FOOD1727 Research Project or 42
FOOD1737 Minor Project 21

* Credit points may be concentrated in one session.

Elective subjects
Elective subjects making up the remainder of the credit points may be selected from those offered by the School of Applied Bioscience, or from those offered by other Schools in the University subject to approval by the Head of Department.

The work involved in the project must be embodied in a report and submitted in accordance with the requirements of the Faculty.

Depending on the candidate’s background, enrolment in some of the above subjects may be accompanied by enrolment in related undergraduate subjects as prerequisites or corequisites. Undergraduate subjects do not count towards course credit points. A particular subject may not necessarily be conducted in any one year.

Note: This course is currently being revised. Consult the Head of Department for approved amendments to this program.

8032.2000
Food Microbiology

Master of Science in Food Microbiology by Coursework
MSc

The MSc course in Food Microbiology is a program of study designed for graduates in Food Science, Food Technology, Microbiology, Biochemistry, Biotechnology or related disciplines who have an interest in microorganisms associated with foods. The course provides advanced training in all aspects of food microbiology as well as fundamental aspects of food science and technology.

Entry qualifications
A four year Bachelor degree, honours degree or equivalent involving some basic training in microbiology and biochemistry is the minimum requirement for admission to the course.

The course comprises:

Compulsory subjects
FOOD2597 Food Microbiology Seminar 7
FOOD2517 Food Microbiology 14
FOOD2527 Microbiological Examination of Foods 21
FOOD2537 Microbiological Quality Assurance 7

Compulsory project
Either
FOOD2617 Major Research Project in Food Microbiology (available only to exceptional candidates) or 63
FOOD2607 Food Microbiology Research Project or 48
FOOD2547 Food Microbiology Project 21

Elective subjects
FOOD1517 Chemistry, Biochemistry and Physics of Foods 10.5
FOOD1527 Principles of Food Preservation 21
FOOD2507 Introductory Microbiology 10.5
FOOD2557 Microbial Spoilage of Foods 3.5
FOOD2567 Foodborne Microorganisms of Public Health Significance 7
FOOD2577 Food and Beverage Fermentations 7
FOOD2587 Microorganisms as Food Processing Aids and Ingredients 3.5

or other subjects offered by the Departments of Food Science and Technology and of Biotechnology or other Schools subject to approval by the Head of Department.

* Credit points may be concentrated in one session.

Note: This course is currently being revised. Consult the Head of Department for approved amendments to this program.
8032.3000
Food Engineering

Master of Science in Food Engineering by Coursework
MSc

The MSc course in Food Engineering is a formal course designed for graduates in Engineering or related disciplines who have an interest in the processing of biological resources for human consumption. The formal components of the course provide professional training at an advanced level in food engineering and food science. The studies in food engineering are designed to strengthen and broaden the engineering background of candidates and emphasise the use of fundamental principles in solving problems associated with food processing. Problem solving skills in engineering are developed further in a research project devoted to an area of food engineering.

Centre for Marine and Coastal Studies

Presiding Member of Management Committee:
Professor JH Middleton
Director: Dr PI Dixon

8265
Master of Marine Science Degree Course
(MMarSc)
CP120

The Master of Marine Science is a course work degree to be completed in one year of full time study. It is intended primarily as an advanced training program for graduates from overseas universities who require specialised training in marine science but do not wish to undertake a research degree.

Graduates, especially from overseas universities, who do not meet the requirements for entry to the MSc (Research) degree.

Australian Science graduates who wish to update their qualifications or obtain a qualification in an area which is different from that of their initial award.
The course is multi-disciplinary in approach and includes advanced treatments of all areas of marine science with provision for specialisation. It consists of lectures, tutorials, practical sessions, case history and a supervised project.

The Master of Marine Science degree course is available to graduates in science who have completed a four year degree. Others may be admitted if they have submitted evidence of such academic and/or professional attainment as may be approved by the appropriate Faculty on the recommendation of its Higher Degree Committee. Applicants with other qualifications may be admitted after completion of a qualifying program approved by the appropriate Faculty. The program shall be of one year duration (full-time) or two years part-time.

The program is as follows:

MSC15001 Marine Environmental Monitoring and Assessment
MSC15002 Management of Marine Resources
MSC15003 Experimental Design and Analysis
MSC15004 Oceanographic Processes
MSC15005 Topics in Marine Science
MSC15006 Graduate Seminars in Marine Science
MSC15007 Marine Science Project
MSC15008 Special topic*

* If a student has previous relevant experience in one of the courses designated, a special topic may be substituted in consultation with the course director.

School of Psychology

Head of School: Professor KM McConkey
Senior Administrative Officer: Mr T Clulow

The School offers courses leading to the award of the combined degrees of PhD/Master of Psychology (Clinical) and PhD/Master of Psychology (Organisational), and the degrees of Master of Psychology (Clinical), Master of Psychology (Forensic) and Master of Psychology (Organisational).

1402

Combined Doctor of Philosophy/Master of Psychology (Clinical) Degree Course
Full-time

Doctor of Philosophy/Master of Psychology
(Clinical)
PhD/MPsychol(Clin)

The combined Doctor of Philosophy/Master of Psychology (Clinical) degree course has an emphasis on research training in clinical fields. The combined degree program requires a minimum of four full-time years to complete, and offers advanced training in research skills that are particularly relevant to clinical areas. It is accredited as fifth and sixth years of study leading to full membership of the Australian Psychological Society and to its College of Clinical Psychologists, and registration as a psychologist in New South Wales.

The normal entrance requirements are (1) completion of an honours Class 1 degree in Psychology from the University of New South Wales or a qualification deemed equivalent, and (2) the availability of adequate supervision and research infrastructure. As the number of places is limited, entry into the combined course is competitive. Referees reports will be sought for applicants who are shortlisted and an interview may be required. Students may apply for advanced standing, credit transfer or exemption of coursework components. The minimum period of registration before the award of the degrees is eight sessions.

The combined course consists of two components which are compulsory: (1) a research project (PhD), and (2) a coursework component (MPsychol(Clin)). The research project should be original, and lead to a significant contribution to our knowledge of the nature of psychological processes, particularly in the field of clinical psychology. The course structure requires students to work on their research project during the entire candidature until submission, and the same research-related requirements as for the regular PhD course (1400) will apply for the first two years of this course. University regulations and guidelines for good practice in postgraduate research supervision will apply to this course.

Candidates will concurrently undertake a compulsory coursework component, which is set out below. The integration of the required coursework with the research program will be determined individually for each student, but at no time during the first three and a half years should the coursework load exceed one-third of the entire load. The coursework program focuses on training in the diagnosis, assessment and treatment of people with a range of psychological problems or disabilities, and the training stems from a strong theoretical and empirical background in experimental clinical psychology:

PSYC7000 Research and Evaluation Methods
PSYC7001 Psychological Assessment 1
PSYC7002 Psychological Assessment 2
PSYC7003 Graduate Colloquium
PSYC7004 Professional and Ethical Issues
PSYC7204 Child Clinical Psychology
PSYC7209 Developmental Disabilities
PSYC7210 Human Neuropsychology
PSYC7212 Experimental Clinical Psychology 1
PSYC7213 Experimental Clinical Psychology 2
PSYC7214 Experimental Clinical Psychology 3
PSYC7215 Experimental Clinical Psychology 4
PSYC7216 Professional Practice (Clinical) 1
PSYC7217 Professional Practice (Clinical) 2
PSYC7218 Professional Practice (Clinical) 3
PSYC7219 Professional Practice (Clinical) 4
PSYC7220 Psychology of Health and Illness
Combined Doctor of Philosophy/Master of Psychology (Organisational) Degree Course
Full-time

The combined Doctor of Philosophy/Master of Psychology (Organisational) degree course has an emphasis on research training in organisational fields. The combined degree program requires a minimum of four full-time years to complete, and offers advanced training in research skills that are particularly relevant to organisational areas. It is accredited as fifth and sixth years of study leading to full membership of the Australian Psychological Society and to its College of Organisational Psychologists, and registration as a psychologist in New South Wales.

The normal entrance requirements are (1) completion of an honours Class 1 degree in Psychology from the University of New South Wales or a qualification deemed equivalent, and (2) the availability of adequate supervision. As the number of places is limited, entry into the combined course is competitive. Referees reports will be sought for applicants who are shortlisted and an interview may be required. Students may apply for advanced standing, credit transfer or exemption of coursework components. The minimum period of registration before the award of the degrees is eight sessions.

The combined course consists of two components which are compulsory: (1) a research project (PhD), and (2) a coursework component (MPsychol(Org)). The research project should be original, and lead to a significant contribution to our knowledge of the nature of psychological processes, particularly in the field of organisational psychology. The course structure requires students to work on their research project during the entire candidature until submission, and the same research-related requirements as for the regular PhD course (1400) will apply for the first two years of this course. University regulations and guidelines for good practice in postgraduate research supervision will apply to this course.

Candidates will concurrently undertake a compulsory coursework component, which is set out below. The integration of the required coursework with the research program will be determined individually for each student, but at no time during the first three and a half years should the coursework load exceed one-third of the entire load. The coursework program focuses on theories, practice and research in industrial and organisational psychology and in human factors:

- PSYC7000 Research and Evaluation Methods
- PSYC7001 Psychological Assessment 1
- PSYC7002 Psychological Assessment 2
- PSYC7003 Graduate Colloquium
- PSYC7004 Professional and Ethical Issues

Master of Psychology (Clinical) Degree Course
Full-time or Part-time

This course provides graduate training for psychologists who intend to work as clinicians in hospitals, community health and other settings where they might be engaged in health promotion and the diagnosis, assessment or treatment of people with a range of psychological problems or disabilities. It is accredited as fifth and sixth years of study leading to full membership of the Australian Psychological Society and to its College of Clinical Psychologists, and registration as a psychologist in New South Wales.

The normal entrance requirement is completion of an honours Class 1 or Class 2 degree in Psychology from the University of New South Wales or a qualification considered equivalent.

Selection is based on academic qualifications for the course. As the number of places is limited, entry into the course is competitive. Referees reports will be sought for applicants who are shortlisted and an interview may be required.

Applicants who do not satisfy these entrance requirements may in exceptional circumstances be admitted, depending upon their knowledge, experience, occupation and the nature of their undergraduate training. Students applying under these provisions will usually be required to complete a qualifying program before they are admitted.

The minimum period of registration before the award of the degree is four sessions for full-time students and six sessions for part-time students. Students with advanced standing may have the minimum period reduced by up to one half of the program if a student has completed a PhD in an approved area of Psychology and one session if a student has completed part of the course work program.

The course consists of three components, all of which are compulsory: 1. course work (weekly lectures and seminars with associated written forms of assessment). 2. professional practice (completion of a minimum of 1,000 hours of supervised clinical practice within the School Clinic and in field clinical settings, weekly Clinical meetings and
The normal entrance requirement is completion of an honours Class 1 or Class 2 degree in Psychology from the University of New South Wales or a qualification considered equivalent. Selection is based on academic qualifications for the course. As the number of places is limited, entry into the course is competitive. Referees reports will be sought for applicants who are shortlisted and an interview will be required.

Applicants who do not satisfy these entrance requirements may in exceptional circumstances be admitted, depending upon their knowledge, experience, occupation and the nature of their undergraduate training. Students applying under these provisions will usually be required to complete a qualifying program before they are admitted.

The minimum period of registration before the award of the degree is four sessions for full-time students and six sessions for part-time students. Students with advanced standing may have the minimum period reduced by up to one half of the program, that is, a reduction of one session if a student has completed a PhD in an approved area of Psychology and one session if a student has completed part of the course work program.

The course consists of three components, all of which are compulsory: 1. Course work (weekly lectures and seminars with associated written forms of assessment; 2. Professional practice (completion of a minimum of 1000 hours of supervised practice in forensic settings, weekly Forensic Psychology meetings, and Skills Training Workshops); and 3. A research thesis. The three components total 300 credit points (135 in Stage 1 and 165 in Stage 2).

Stage 1
- LAWS9800 Law for Psychologists 1
- LAWS9810 Law for Psychologists 2
- PSYC7000 Research and Evaluation Methods
- PSYC7001 Psychological Assessment 1
- PSYC7002 Psychological Assessment 2
- PSYC7003 Child Clinical Psychology
- PSYC7009 Developmental Disabilities
- PSYC7210 Human Neuropsychology
- PSYC7211 Experimental Clinical Psychology 1
- PSYC7212 Experimental Clinical Psychology 2
- PSYC7213 Experimental Clinical Psychology 3
- PSYC7214 Professional Practice (Clinical) 1
- PSYC7215 Professional Practice (Clinical) 2
- PSYC7216 Professional Practice (Clinical) 3
- PSYC7217 Professional Practice (Clinical) 4
- PSYC7218 Experimental Clinical Psychology 4
- PSYC7219 Professional Practice (Clinical) 5
- PSYC7220 Psychology of Health and Illness

*Contributes approximately 25 per cent to the overall grading for the degree.

Notes: Part-time students normally are expected to take half the full-time program in any one session.

Stage 2
- LAWS9800 Law for Psychologists 1
- LAWS9810 Law for Psychologists 2
- PSYC7000 Research and Evaluation Methods
- PSYC7001 Psychological Assessment 1
- PSYC7002 Psychological Assessment 2
- PSYC7003 Child Clinical Psychology
- PSYC7009 Developmental Disabilities
- PSYC7210 Human Neuropsychology
- PSYC7211 Experimental Clinical Psychology 1
- PSYC7212 Experimental Clinical Psychology 2
- PSYC7213 Experimental Clinical Psychology 3
- PSYC7214 Professional Practice (Clinical) 1
- PSYC7215 Professional Practice (Clinical) 2
- PSYC7216 Professional Practice (Clinical) 3
- PSYC7217 Professional Practice (Clinical) 4
- PSYC7218 Experimental Clinical Psychology 4
- PSYC7219 Professional Practice (Clinical) 5
- PSYC7220 Psychology of Health and Illness

*Contributes approximately 25 per cent to the overall grading for the degree.

Notes: Part-time students normally are expected to take half the full-time program in any one session.
8254
Master of Psychology Degree Course
Full-time or Part-time
Master of Psychology (Organisational)
MPsychol(Org)

This course provides graduate training for psychologists who intend to work in industry, commerce, consulting practice, service organisations, trade unions, or the public service. The program focuses on the theories, practice, and research in industrial and organisational psychology and in human factors. It is accredited as fifth and sixth years of study leading to full membership of the Australian Psychological Society and to its College of Organisational Psychologists, and registration as a psychologist in New South Wales.

The normal entrance requirement is completion of an honours Class 1 or Class 2 degree in Psychology from the University of New South Wales or a qualification considered equivalent.

Selection is based on academic qualifications for the course. As the number of places is limited, entry into the course is competitive. Referees reports will be sought for applicants who are shortlisted and an interview may be required.

Applicants who do not satisfy these entrance requirements may in exceptional circumstances be admitted, depending upon their knowledge, experience, occupation and the nature of their undergraduate training. Students applying under these provisions will usually be required to complete a qualifying program before they are admitted.

The minimum period of registration before the award of the degree is four sessions for full-time students and six sessions for part time students. Students with advanced standing may have the minimum period reduced by up to one half of the program ie a reduction of one session if a student has completed a PhD in an approved area of Psychology and one session if a student has completed part of the course work program.

The course consists of three components, all of which are compulsory: 1. course work (weekly lectures and seminars with associated written forms of assessment), 2. professional practice (completion of a minimum of 1,000 hours of supervised organisational practice in organisational field settings, weekly Organisational meetings and Career Development Workshops), and 3. a research thesis. The three components total 300 credit points (135 in Stage 1 and 165 in Stage 2).

Stage 1
PSYC7000 Research and Evaluation Methods
PSYC7001 Psychological Assessment 1
PSYC7002 Psychological Assessment 2
PSYC7100 Psychology of Human Resources 1
PSYC7101 Psychology of Human Resources 2
PSYC7102 Psychological Principles of Training
PSYC7115 Vocational Interviewing and Counselling
PSYC7118 Professional Practice (Organisational) 1
PSYC7119 Professional Practice (Organisational) 2

Stage 2
PSYC7004 Professional and Ethical Issues
PSYC7108 Research Thesis (Organisational) *
PSYC7116 Occupational Health and Stress
PSYC7117 Advanced Topics in Organisational Psychology
PSYC7120 Professional Practice (Organisational) 3
PSYC7121 Professional Practice (Organisational) 4

*Contributes approximately 25% to the overall grading for the degree.

Notes: Part-time students normally are expected to take half the full-time program in any one session.
The Schools of the Faculty of Science and Technology offer programs leading to the Award of the degrees of Doctor of Philosophy, Master of Science and (through the School of Materials Science and Engineering) Master of Engineering.

The following formal courses and programs leading to graduate awards are also offered:

- School of Chemistry: Graduate Diploma in Food and Drug Analysis, Master of Science and Technology in Food and Drug Chemistry
- School of Geography: Graduate Diploma in Remote Sensing, Master of Science and Technology in Remote Sensing, Master of Science and Technology in Geographic Information Systems and Master of Science and Technology in Environmental Management
- School of Geology: Master of Science and Technology in Geology (including programs in Geological Data Processing, Groundwater Studies and Engineering and Environmental Geology)
- School of Materials Science and Engineering: Graduate Diploma in Textile Technology, Master of Science and Technology in Corrosion Engineering, Master of Science and Technology in Engineering Materials
- School of Mathematics: Graduate Diploma in Physical Oceanography, Graduate Diploma in Statistics, Master of Science and Technology in Mathematics, Master of Statistics
- School of Optometry: Master of Optometry
- School of Physics: Graduate Diploma in Physics, Graduate Diploma in Physics Research Techniques
- Department of Safety Science: Graduate Certificate in Safety Science, Graduate Certificate in Risk Management, Graduate Certificate in Ergonomics, Graduate Diploma in Environmental Studies, Graduate Diploma in Ergonomics, Graduate Diploma in Risk Management, Graduate Diploma in Safety Science, Master of Science and Technology in Ergonomics, Master of Science and Technology in Industrial Safety, Master of Science and Technology in Occupational Health and Safety, Master of Science and Technology in Risk Management, Master of Engineering Science in Industrial Safety, Master of Environmental Studies, Master of Safety Science
- Centre for Advanced Numerical Computation in Engineering and Science: Graduate Diploma in Computational Science, Master of Science and Technology in Computation.

Graduates are advised to consult the Head of Department before making formal application for registration in any of the above courses or programs.

For admission to registration for all degrees of Master (except Master of Statistics), candidates must have completed one of the following:

1. An approved degree of Bachelor with Honours;
2. An approved three year course leading to the award of the degree of Bachelor plus an approved qualifying program. Suitable professional and or research experience may be accepted in lieu of the qualifying program
3. An approved four year course leading to the award of the degree of Bachelor.
Applicants for registration for the degree of Master of Statistics shall have been admitted to the degree of Bachelor with major studies in the field of statistics in the University of New South Wales or other approved university.

For admission to the Graduate Diploma and Graduate Certificate candidates must have completed one of the following:

1. An approved Degree of Bachelor, or
2. Evidence of other academic and professional attainments as approved by the Higher Degree Committee of the Faculty.

The conditions governing these higher degrees are set out later in this handbook.

In many cases the Faculty offers articulated programs whereby a student who performs satisfactorily in a Graduate Certificate or Graduate Diploma may be permitted to upgrade to a Masters program in the same discipline. For further details students should consult their Director of Postgraduate Studies.
Graduate Certificates

7345.8520
Graduate Certificate in Risk Management

The Graduate Certificate provides students with the opportunity to study risk management related subjects to meet specific vocational needs or individual interests.

A student must complete, SESC9351 Risk Management, the prerequisite statistics subject and any two other 15CP subjects related to risk management. In addition students are required to satisfy any prerequisites in their program of studies including a statistics prerequisite for SESC9351. Preliminary subjects from the Masters program may not be taken as the elective subjects. Students may be proscribed from taking subjects that would duplicate prior studies.

7345.8540
Graduate Certificate in Ergonomics

The Graduate Certificate in Ergonomics is intended to provide professionals from other disciplines with an awareness of the principles of ergonomics sufficient for them to be able to identify ergonomics problems in human-technology-environment systems and to be able to recommend a user-centred, systems approach to their assessment and control. It is the first stage in a fully articulated program of Graduate Certificate, Graduate Diploma and Masters (of Science & Technology) courses in ergonomics.

Preliminary subjects
ANAT6151 Introductory Functional Anatomy 7.5
SESC6110 Physical Principles of Safety 1 7.5

Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects.

Core subjects
SESC6020 Inferential Statistics 7.5
SESC9100 Physical Hazards 7.5
SESC9200 Hazard and Risk Assessment 7.5
SESC9300 Effective Behaviour in Organisations 7.5
SESC9411 Principles of Ergonomics 7.5

Exemption but not necessarily Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects. Where necessary other, approved postgraduate subjects may be substituted.

Electives
Students are required to select up to 15 CP of elective subjects from the list of electives or core subjects presented for the MScTech (OHS) program.

No advanced standing will be granted for the Graduate Certificate. Where students have previously studied material equivalent to one of the core subjects exemption may be granted and an additional elective selected.

† Requires preliminary subject or equivalent knowledge as assumed knowledge.

7345.8560
Graduate Certificate in Safety Science

The Graduate Certificate in Safety Science is a graduate program of six months full time (or equivalent) study for students working in health and safety to become safety practitioners. It is the first stage in a fully articulated program of Graduate Certificate, Graduate Certificate and Masters (of Science and Technology) courses in safety science of occupational health and safety. The Graduate Certificate of Science and Technology in Safety Science is available in attendance and off campus study modes.

Preliminary subjects
Up to a maximum of 15 CP, depending on student background.
ANAT6151 Functional Anatomy 7.5
SESC6010 Descriptive Statistics 7.5
SESC6020 Inferential Statistics 7.5
SESC6110 Physical Principles of Safety 1 7.5
SESC6120 Physical Principles of Safety 2 7.5
SESC6800 Fundamentals of Toxicology 7.5

Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects.

Core subjects
SESC9100 Physical Hazards 7.5
SESC9200 Hazard and Risk Assessment 7.5
SESC9300 Effective Behaviour in Organisations 7.5
SESC9400 Ergonomics 1 7.5
SESC9020 Occupational Health and Safety Law 1 7.5
SESC9600 Introduction to Occupational Health 7.5
SESC9810 Introduction to Toxicology 7.5

Exemption but not necessarily Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects. Where necessary other, approved postgraduate subjects may be substituted.

Electives
Students are required to select up to 15 CP of elective subjects from the list of electives or core subjects presented for the MScTech (OHS) program.

No advanced standing will be granted for the Graduate Certificate. Where students have previously studied material equivalent to one of the core subjects exemption may be granted and an additional elective selected.

† Requires preliminary subject or equivalent knowledge as assumed knowledge.
Graduate Diplomas

School of Chemistry

5522.3001
Food and Drug Analysis Graduate Diploma
Course
Full-time or Part-time

Diploma in Food and Drug Analysis
DipFDA

Staff Contact: Associate Professor P Southwell-Keely

This Diploma will not be available in 1999.

This course is currently being restructured. Please consult with A/Prof Southwell-Keely with regard to this course.

According to demand, the course may be available on a full-time basis over one year or on a part-time basis over two years.

The course in food and drug analysis is designed to provide systematic training at an advanced level for chemists who wish to extend their acquaintance with analytical techniques, and thus is suitable for those who may wish to practice as public analysts. It is also suitable for those who wish to work in the food or pharmaceutical industry. The prime aim is to present discussions of the principles and design of analytical methods which are therefore presented on a comparative basis.

It is considered that the techniques involved in the handling of foods and drugs together with those discussed in the ancillary subjects of the course provide a firm basis of approach to many other fields of chemistry.

Intending students are referred to the conditions for the award of graduate diplomas set out elsewhere in this handbook.

Year 1*
CHEM7125 Food and Drugs 1
CHEM7115 Treatment of Analytical Data
CHEM7425 Instrumental Techniques in Food and Drug Analysis

Year 2*
CHEM7225 Food and Drugs 2
CHEM7325 Toxicology, Occupational and Public Health
MICR2201 Introductory Microbiology
or
CHEM7555 Project Work in Food and Drug Chemistry

School of Geography

5522.4003
Remote Sensing

Graduate Diploma
GradDip

The graduate diploma program in Remote Sensing is offered in both the Faculty of Science and Technology and the Faculty of Engineering. Entry into either faculty depends on the background of the applicant and the orientation of the proposed program.

Entry qualifications. Three-year degree from an approved university and or qualifications deemed appropriate by the relevant faculty.

Course requirements. Candidates are required to complete a program totalling a minimum of 90 credit points made up of 4 compulsory subjects (60 credit points) and 2 elective subjects (30 credit points). Compulsory subjects not offered in a particular year may be substituted by an approved equivalent subject.

The course will normally comprise one year of full-time study or two years part-time study.

Graduate Diploma in Statistics
GradDipStats

Staff Contact: Prof W Dunsmuir

This graduate diploma is intended for Statistics graduates wishing to further develop their knowledge and skills in Statistical science. In particular, it provides an opportunity for advanced training in topics relevant to Medical Statistics and Financial Mathematics.

Intending students are referred to the conditions for the award of graduate diplomas set out elsewhere in the handbook. Basic entry qualifications for this program are a degree in Statistics or Econometrics or a degree in Commerce with a major in Business Statistics or an approved equivalent. The program consists of eight subjects from the MStats program (excluding MATH5925 and MATH 5935). At most two subjects may be selected from those offered by other Departments or Schools within the University.

The course may be taken over one year full-time or on a part-time basis. The total number of credit points is 120, fifteen for each subject.

5530
Physical Oceanography Graduate Diploma Course
Full-time or Part-time

Graduate Diploma by Research in Physical Oceanography
GradDip

Staff Contact: Dr John Middleton

This graduate diploma is intended to train graduates in the physical sciences or engineering in the basic techniques of physical oceanography particularly in preparation for study at postgraduate level.

It is intended to develop student skills in planning and execution of oceanographic experiments, in the theory of oceanographic fluid mechanics, the applications and limitations of oceanographic equipment and of commonly used data analysis techniques.
Recent rapid developments in marine science coupled with the relative scarcity of persons able to take up support positions demonstrate the need for skilled persons who will be able to assist oceanographic research with minimum training. This program is aimed at providing such skilled graduates.

Intending students are referred to the conditions for the award of graduate diplomas set out elsewhere in this handbook. Basic entry qualifications for this program are a degree in Engineering or in Science with major studies in mathematics or physics.

The program, requiring 120 credit points for completion, consists of a major project OCEA5115 worth 60 credit points of the total accreditation for the program, the remaining 60 being comprised as indicated below.

1. Compulsory Subjects  
   OCEA5115 Experimental Project  60  
   OCEA5125 Geophysical Fluid Dynamics  15  
   OCEA5145 Applied Data Analysis  15  

2. Elective Subjects  
   GEOG9021 Image Analysis in Remote Sensing  15  
   GMAT9606 Microwave Remote Sensing  15  
   CVEN9835 Coastal Engineering 1  15  
   CVEN9836 Coastal Engineering 2  15  
   CVEN9863 Estuarine Hydraulics  15  
   GEOG9012 Remote Sensing Applications  15  
   OCEA5155 Theoretical Project  30  
   MATH5285 Ocean Modelling  15  
   or appropriate subjects within mathematics, physics or engineering chosen on the basis of individual background.

The course may be taken over one year full-time or two years part time.

School of Physics

5516  
Physics Research Techniques Graduate Diploma Course  
Full-time or Part-time  

Graduate Diploma in Physics  
GradDipPhysResTech  

Staff Contact: Associate Professor RJ Stening  
The Graduate Diploma in Physics Research Techniques offers an advanced training program for graduates who wish to obtain specialised training in research techniques in physics. The course involves two sessions full-time study or four sessions part-time study and consists of subjects at Level III/IV totalling 60 CP and a research project (50 CP). The choice of subjects is very flexible. Most subjects selected should be from the School of Physics but subjects from other Schools may be included. Students wishing to proceed to a research degree will consult with their potential supervisor on their choice of subjects.

---

School of Safety Science

5522.8720  
Graduate Diploma in Risk Management  

The Graduate Diploma of Risk Management provides a general introduction to risk management as it is applied across all disciplines. Subjects for the course are offered by the Faculties of Science and Technology, Engineering, Commerce.

Candidates are required to complete 8 Units for the degree. Students may be exempted the preliminary subject where these topics have been studied during previous studies.
Grad Dip Risk Management

Preliminary subjects
ECON5103 Business Economics 15
and either
ECON5203 Statistics for Business 15
or
SESC6010 Descriptive Statistics 7.5
and
SESC6020 Inferential Statistics 7.5

Core subjects
SESC9351 Risk Management 15
SESC9352 Risk Analysis 15
FINS5513 Security Valuation and Portfolio Selection 15
FINS5531 Risk and Insurance 15

Elective subjects
Students may select 2 elective subjects from any faculty providing they can demonstrate to the course authority the relevance of the subject to risk management. A list of possible electives is given with the description of the Master of Risk Management.

5522.8740
Graduate Diploma in Ergonomics

GradDip

The Graduate Diploma in Ergonomics is intended for students wishing to become professional ergonomists. It provides students with the competencies to identify ergonomics hazards in human-technology-environment systems, to assess their associated risks and to use a user-centred, systems approach to develop controls for the hazards. It is the second stage in a fully articulated program of Graduate Certificate, Graduate Diploma and Masters (of Science & Technology) courses in ergonomics.

Preliminary subjects

ANAT6151 Functional Anatomy 7.5
SESC6110 Physical Principles of Safety 1 7.5
Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects.

Core subjects

SESC9351 Risk Management 15
SESC9352 Risk Analysis 15
FINS5513 Security Valuation and Portfolio Selection 15
FINS5531 Risk and Insurance 15

Elective subjects
Students are required to select up to 120 CP of elective subjects from the list of electives or core subjects presented for the MScTech (OHS) program.

Elective subjects
† If students have no statistics in their background they will have to do SESC6010 - Descriptive Statistics in addition to the above load.

5522.8760
Graduate Diploma in Safety Science

The Graduate Diploma in Safety Science is a graduate program of one year full time (or equivalent) study for students with a health and safety background intending to become safety professionals. It is the second stage in a fully articulated program of Graduate Certificate, Graduate Diploma and Masters (of Science and Technology) courses in safety science of occupational health and safety. The Graduate Diploma of Science and Technology in Safety Science is available in attendance and off campus study modes.

GradDip

Preliminary subjects
Up to a maximum of 37.5 CP, depending on student background.

ANAT6151 Functional Anatomy 7.5
SESC6010 Descriptive Statistics 7.5
SESC6020 Inferential Statistics 7.5
SESC6110 Physical Principles of Safety 1 7.5
SESC6120 Physical Principles of Safety 2 7.5
SESC6800 Fundamentals of Toxicology 7.5

Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects.

Core subjects
Core subjects, totalling 60 credit points, represent the central theme of safety science and are compulsory.

SESC9010 Research Methods 7.5
SESC9100 Physical Hazards† 7.5
SESC9200 Hazard and Risk Assessment 7.5
SESC9300 Effective Behaviour in Organisations 7.5
SESC9400 Ergonomics 1 7.5
SESC9902 Occupational Health and Safety Law 1 7.5
SESC9600 Introduction to Occupational Health 7.5
SESC9810 Introduction to Toxicology 7.5

Exemption but not necessarily Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects. Where necessary other, approved postgraduate subjects may be substituted.

Elective subjects
Students are required to select up to 120 CP of elective subjects from the list of electives or core subjects presented for the MScTech (OHS) program.

Exemption but not necessarily Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects. Where necessary other approved subjects may be substituted.
Graduate Diploma in Environmental Sciences

GradDip

The Graduate Diploma in Environmental Sciences is a graduate program of one year full time (or equivalent) study for students to study the nature of environmental problems, the methodology of evaluation and environmental management.

Entry qualifications
A three year honours degree or equivalent, in a field relevant to environmental studies, or a four year degree in another field. Under exceptional circumstances, and at the discretion of the head of school, applicants with extensive experience in the environmental field, or with other professional or academic attainments, may also enrol in the Graduate Diploma program.

Course requirements
Students enrolled on the Graduate Diploma of Science and Technology in Environmental Sciences are required to complete a course totalling 90 Credits made up of compulsory Core Subjects (45 credits) and Elective Subjects (45 credits). The structure of the course allows students to pursue specialised interests through the electives, or to develop new areas of expertise. Students may upgrade to the Masters in Environmental Studies upon completion of satisfactory progress. In such cases, students will be required to complete 150 credits.

Core and elective subjects are the same as those listed under the entry for the Master of Environmental Studies (8045) coursework only option. Except in unusual circumstances, Graduate Diploma Graduate Diploma of Science and Technology in Environmental Sciences is the first stage in an articulated program of Graduate Diploma and Masters courses in Environmental Studies. The Graduate Diploma of Science and Technology in Environmental Studies is available in attendance study mode only.

To a maximum of 90 CP.

† Requires preliminary subject or equivalent knowledge as assumed knowledge.

Centre for Advanced Numerical Computation in Engineering and Science

Director: Professor CAJ Fletcher

The Centre for Advanced Numerical Computation in Engineering and Science is a joint initiative of the Faculties of Engineering and Science to provide a focus for the very active UNSW community of computational engineers and scientists exploiting state-of-the-art workstation clusters, vector and parallel supercomputers. The Centre contributes to graduate training through coursework and research programs, carries out both fundamental and applied research through developing and using computer codes, provides short courses for industry-based engineers and scientists and organises conferences and workshops on the latest computational techniques. The Centre has three areas of special emphasis: a) Industrial Computational Fluids and Heat Transfer, b) Environmental Modelling, c) Finite Element Structural Analysis.

Detailed course information is given under Computational Science.

* UNSW offers qualifications in both Computer Science and Computational Science. Computer Science provides broad training in computing, normally leading to careers in all areas of the computer industry. Computational Science provides training in computational simulation of complex scientific and engineering phenomena and lead to engineering or science based careers in industry, universities or government institutions such as CSIRO.

Graduate Diploma in Computation

Staff Contact: Dr Y Shao

The graduate diploma will provide thorough training in modern computational techniques in the discipline-specific areas: A) Environmental Modelling; B) Computational Chemistry; C) Computational Physics, through coursework.
Admission to the Graduate Diploma program requires the student to have at least a pass degree in Science, Engineering or other mathematically-based discipline. The Graduate Diploma program can be completed in one year of full-time study.

Students are required to complete, satisfactorily, 90 credit points, as follows:

I) The two core subjects (ANCE8001, MATH5315, above)

II) One generic computational subject (above)

III) Three discipline-specific subjects offered by the Centre or the Faculty of Science.

IV) Two elective subjects offered by the Centre or the Faculties of Science and Engineering.

Candidates may apply to upgrade to the Masters program after completing not less than 45 credits. Entry will be competitive and based on the student's record. Transfer of credit is based on the particular circumstances of the case. One credit equals one hour per week of classes for a 14 week session.
Masters Degrees

School of Chemistry

Head of School: Professor RF Howe
Director of Graduate Studies: A/Prof M Guilhaus
(contactable via Chemistry Academic Office)

The School of Chemistry offers a Master of Chemistry degree course in Food and Drug Chemistry which is suitable for students wishing to obtain advanced specialised knowledge in these topics. The normal entry qualification is a good Honours degree or equivalent qualification, or lesser qualification together with significant scientific experience. Other candidates may be required to undertake a qualifying programme.

8720.3001
Master of Science and Technology in Food and Drug Chemistry

This Masters Degree will not be available in 1999.

This course is currently being restructured. Please consult with A/Prof Southwell-Keely with regard to this course. The course involves an advanced study of the chemistry, stability, mode of action where applicable, and analysis of food constituents, food additives, and selected drugs. The program may be taken either full-time or part-time. In addition to formal, examinable lecture courses and laboratory instruction, the program involves a short research project supervised by a member of the academic staff. Entry into this program is excluded in the case of applicants who have completed the Graduate Diploma in Food and Drug Analysis (Course 5522.3001)

Lecture/Laboratory Courses
1. Food and Drugs 1
2. Treatment of Analytical Data
3. Instrumental Techniques in Food and Drug Analysis
4. Food and Drugs 2
5. Toxicology, Occupational and Public Health
6. Introductory Microbiology or Project Work in Food and Drug Chemistry

The lecture time for the whole course is 182 hours. An additional 350 hours is spent by students in formal laboratory work.

Research project
A short research project (approximately 100 hours) is undertaken involving analyses of multiple constituents in samples of foods or drugs.

School of Geography

Head of School: Associate Professor I Burnley
Director of Graduate Studies: Associate Professor MD Fox

A number of coursework Masters degrees and Graduate Diplomas are available through the School of Geography. In addition the School welcomes enquiries from graduates who are interested in research leading to the award of the degrees of Doctor of Philosophy 1080 or Master of Science 2040.

Graduate Program in Geographic Information Systems

8720.4001
Geographic Information Systems

Master of Science and Technology
MScTech

The Masters degree program in Geographic Information Systems is offered in both Geography and Geology within the Faculty. Entry into either discipline depends on the background of the applicant and the orientation of the proposed program.

Entry qualifications. Four-year Honours degree of appropriate standard in Geography, Geology, Geomatic Engineering, or a relevant environmental science.

Course requirements. Candidates are required to complete a course totalling a minimum of 120 credit points made up of 3 compulsory subjects, 3 elective subjects and a project. The degree will normally comprise one year of full-time study or two years of part-time study.

Compulsory Subjects
GEOG9016 Principles of Geographic Information Systems 15
GEOG9017 Advanced Geographic Information Systems 15
and either
GEOG8020* Applications and Management of GIS 15
or
GMAT9604* Land Information Systems 15
Elective subjects

COMP9311 Introduction to Data Base Systems 15
GEOG9012 Remote Sensing Applications 15
GEOG9014 Computer Mapping and Data Display 15
GEOG9018 Transportation Applications of Geographic Information Systems 15
GEOG9019 Special Topic 15
GEOG9021 Image Analysis in Remote Sensing 15
GMAT9532 Data Acquisition and Terrain Modelling 15
GMAT9600 Principles of Remote Sensing 15
GEOIL110 Geographical Information Systems in Applied Geology 15

Note: Other subjects may be substituted for those listed with permission of the Course Coordinator to suit the specific needs of individual students.

*Students wishing to include both of these subjects should take one as an elective.

Graduate Programs in Environmental Studies

8720.4003 Remote Sensing

Master of Science and Technology
MScTech

The masters degree program in Remote Sensing is offered in both the Faculty of Science and Technology and the Faculty of Engineering. Entry into either Faculty depends on the background of the applicant and the orientation of the proposed program.

Entry qualifications. Four-year degree of appropriate standard in engineering, geography, geology, geomatic engineering, or in a relevant environmental science.

Course requirements. Candidates are required to complete a course totalling 120 credit points, made up of 3 compulsory subjects, 3 electives, and a project. Compulsory subjects not offered in a particular year may be substituted by an equivalent subject, approved by the appropriate Course Coordinator. The degree will normally comprise one year of full-time study or two years of part-time study.

8045 Environmental Management

Master of Environmental Studies
MEnvStudies

This is an interdisciplinary course designed to study the nature of environmental problems and the methodology of evaluation. Emphasis is placed on the development of relevant skills in environmental analysis, management and planning. See entry under Safety Science.

8720.4002 Environmental Management

Master of Science and Technology
MScTech

The Masters degree program in environmental management provides an opportunity to focus on the management of key natural resources, particularly soils, rivers, and vegetation. Emphasis is also placed on the application of information technology for planning and decision making.

Entry qualifications. Four year degree of appropriate standard in geography, environmental science, engineering, or in a relevant science.

Course requirements. Candidates are required to complete a course of study totalling 120 credit points made up of 3 compulsory subjects (45 credit points), a project (30 credit points), and 3 elective subjects (45 credit points). Compulsory subjects not available in a particular year may be substituted by an equivalent subject, approved by the
Course Coordinator. The degree will normally comprise one year of full-time study or two years of part-time study.

Compulsory subjects  CP  
GEOG9022  Vegetation Management  15  
GEOG9023  River Management  15  
GEOG9024  Soil Degradation and Conservation**  15  
GEOG9530  Project  30  

Elective subjects*  
GEOG9011  Environmental Impact Assessment  15  
GEOG9012  Remote Sensing Applications  15  
GEOG9016  Principles of Geographic Information Systems  15  
GEOG9017  Advanced Geographic Information Systems  15  
GEOG9019  Special Topic  15  
GMAT9600  Principles of Remote Sensing  15  
SAFE9273  Environment and Law  8  

*Alternative subjects may be substituted with the permission of the Course Coordinator.  
** May not be offered in 1999.

---

School of Geology

Head of Department: Professor BJ Hensen  
Director of Graduate Studies: Dr AC Dunlop

A coursework Masters degree with several areas of specialisations is available through the School of Geology. In addition, the Department offers the research degrees of Doctor of Philosophy PhD in Applied Geology 1000 and Master of Science MSc in Applied Geology 2000.

---

8720  
Applied Geology

Master of Science and Technology  
MscTech

The Master of Science and Technology course in Geology is designed to give advanced training in developing specialisations within geology. Programs are structured specifically for candidates from industry to take on a part-time basis. Specialist programs are currently offered in the fields of Engineering Geology-Hydrogeology-Environmental Geology, Groundwater Studies and Geological Data Processing.

---

Alternative Graduate Programs

Alternative Graduate Programs in association with the School of Geology are available in the following areas:

Department of Safety Science  
8045 Environmental Studies Graduate Course (MEnvStudies)

School of Geography  
5522.4003 Graduate Diploma in Remote Sensing (GradDip)  
8720.4003 Remote Sensing Graduate Course (MScTech)

Faculty of Engineering  
5496 Graduate Diploma in Remote Sensing (GradDip)  
8641 Remote Sensing Graduate Course (MEngSc)

---

8720.1001  
Engineering Geology and Environmental Geology

This is a flexible program covering a range of geotechnical disciplines. Completion of the course requires 120 credit points of which 90 credit points are coursework subjects. The balance is made up of a research project of 30 credit points, which may be completed internally or externally. Most subjects are given in the first session, but some are available in second session, or in short course or external format. Core subjects are recommended but not compulsory. Intending students should discuss their choice of subjects with the Program Director, Mr GH McNally.

Core subjects  CP  
CVEN9788  Site Investigation  15  
CVEN9860  Investigation of Groundwater Resources  15  
GEOL9030  Geotechnical Engineering  15  
GEOL9040  Fundamentals of Geomechanics  15  
GEOL9060  Environmental Geology  15  

Project  
GEOL9444  Project or  30  

Elective subjects  
CVEN9790  Stability of Slopes  15  
GEOLO110  Geological Remote Sensing  15  
GEOLO931  Engineering Geology of Surficial Deposits  15  
GEOLO932  Soil and Rock Construction Materials  15  
GEOLO933  Terrain Evaluation  15  
GEOLO970  Engineering Geophysics  15  

Other elective subjects may be drawn from those offered by the UNSW Groundwater Centre and the School of Civil Engineering.
8720.1002
Groundwater Studies

This program is coordinated through the UNSW Groundwater Centre. Candidates are required to complete 120 credit points, made up of the twelve core subjects, elective subjects and a project. The degree may be taken internally on a full-time (normally 2 sessions) or a part-time (normally 4 sessions) basis. The course of study must be approved by the Head of Department or the Head's nominee with core subjects totalling 90 credit points.

8720.1003
Geological Data Processing

This program is intended for industry-based geologists who wish to enhance their skills in the computer processing of geological data. It is delivered as a series of separate academic subjects, each consisting of an intensive short course with additional assignment material. An industry-based project is also included in the program. The short courses are scheduled to allow the degree to be completed on a part-time basis over two years.

The program allows an emphasis to be placed on data processing in mineral exploration, exploration geochemistry, ore reserve estimation, image processing and remote sensing, exploration geophysics or fossil fuel deposits. Optional subjects are also available to provide complementary training in topics such as mine and environmental management and project evaluation.

Candidates are required to complete a course of 120 credit points including a 30 credit point project. Intending students should discuss their choice of subjects with the Program Director, Dr DR Cohen.

or such other subjects as the course authority may deem to be appropriate and equivalent.
School of Materials Science and Engineering

Head of School: Prof DJ Young
Postgraduate Coordinator: Prof CC Sorrell

The School welcomes enquiries from graduates in Science, Engineering, and Science and Technology who are interested in doing research leading to the award of the degree of:

- Doctor of Philosophy, Materials Science and Engineering (1045)
- Master of Science, Materials Science and Engineering (2055)
- Master of Engineering, Materials Science and Engineering (2175)

Programs involving formal course work and research leading to the award of Master of Science and Technology (Course 8702) in Engineering Materials (Program 5001) or in Corrosion Engineering (Program 5002) are also available.

Information about research scholarships, fellowships, and grants-in-aid is available from the Postgraduate Coordinator and graduates are advised to consult him before making a formal application for registration.

8720
Engineering Materials (Program 5001)

Master of Science and Technology
MScTech

The MScTech course in Engineering Materials provides a comprehensive study of the full range of materials. The program is designed for graduates wishing to acquire expertise in the selection, use, and design capabilities of modern materials. It is particularly appropriate to graduates in other branches of engineering and to honours graduates in science. The program consists of one year of full-time study (two sessions) or two years of part-time study (four sessions). This comprises 90 credit points of formal coursework plus 30 credit points of experimental and/or design project work. The balance between formal lecture courses and project work will be varied to suit individual students' needs.

**Compulsory subjects**

</table>

**Elective subjects**

Additional subjects are chosen from those offered by the School of Materials Science and Engineering or from those offered by other Schools in the University subject to approval by the Head of School. Full details of all subjects are listed in the University calendar and handbooks. A minimum of 30 credit points of elective subjects is required. Depending on the candidate's background, enrollment in a limited number of unmodified undergraduate subjects may be appropriate but may not exceed 15% of the non-project component.

8720
Corrosion Engineering (Program 5002)

Master of Science and Technology
MScTech

The MScTech course in Corrosion Engineering is open to graduates in Science, Engineering, and Science and Technology who wish to undertake formal studies to promote their careers in industry. The course is designed for those professionals in industry who are faced with the problem of combating corrosion. Its aim is to develop an appreciation of the fundamentals, principles of corrosion, and available methods whereby it may be overcome.

The program consists of one year of full-time study (two sessions) or two years of part-time study (four sessions). This comprises 90 credit points of formal coursework plus 30 credit points of experimental and/or design project work. The balance between formal lecture courses and project work will be varied to suit individual students' needs.

Textile Technology Graduate Diploma Course

Graduate Diploma
GradDip

The Graduate Diploma in Textile Technology course is designed to prepare graduates for careers in the textile and allied industries. It also provides formal studies for graduates who already are employed in the textile industry. The normal requirement for admission to the course is a Bachelor degree or equivalent tertiary qualification. The following program, comprising both formal lectures and laboratory work, may be taken as a one year full-time course (two sessions) or two-year part-time course (four sessions).

Candidates wishing to specialise in the theory and practice of yarn and fabric technology (engineering/physics orientation) should undertake the optional subjects TEXT5301, TEXT5302, TEXT5401, and TEXT5402. Candidates wishing to specialise in the science and technology of textile dyeing and finishing (chemistry orientation) should undertake the optional subjects TEXT5501, TEXT5502, TEXT5601, and TEXT5602.

An alternative approved by the Head of Department also may be devised.

8720.6001
Master of Mathematics Degree Course
Full-time or Part-time

Master of Science and Technology in Mathematics
MScTech in Math

The Master of Science and Technology in Mathematics degree course is intended for suitably qualified graduates in applied mathematics, pure mathematics or statistics, but others may be admitted after completing a qualifying course. The course may be completed in one year of full-time or two years of part-time study. The course may be taken as a preliminary step towards the award of a PhD in mathematics. It also provides advanced training for persons specialising in the teaching of mathematics in tertiary institutions. In addition an appropriate program may provide training for those employed or seeking employment in the area of industrial mathematics.

The program consists of seven approved lecture subjects, the duration of each being two hours per week for one session, each worth 15 Credit Points. With the approval of the Head of the School of Mathematics a student may substitute for one or more of these lecture subjects a reading subject supervised by a member of staff. Again with this approval a student may substitute for at most three of these subjects graduate subjects offered in a relevant discipline outside the School of Mathematics. Students are also required to participate in relevant departmental seminars. In addition, students are required to undertake a project supervised by a staff member. The project consists of either a critical review of the literature in a specific field of mathematics, or a short research project. The project is worth 30 Credit Points. Each candidate's proposed program of study requires the approval of the Head of the School of Mathematics.

The conditions for the award of the degree are set out elsewhere in this handbook.

8750
Master of Statistics Degree Course
Full-time or Part-time

Master of Statistics
MStats

The Master of Statistics Course covers a wide range of statistical theory and practice and provides advanced training for practising statisticians. The course may be completed in three sessions of full-time or three years of part-time study, and it is available to graduates with a pass degree in statistics or an honours degree in a related field (commonly mathematics) with supporting studies in statistics. Honours graduates in statistics may be exempted...
from up to 75 credit points. The conditions for the award of the degree are set out elsewhere in this handbook.

The academic requirement for the degree is 195 credit points. Unless otherwise noted, all subjects listed below are 15 credit points each, while subjects offered by other schools may vary in value.

Each candidate's program of study must be approved by the Head of the School.

Compulsory Subjects (offered every year)
- MATH5835 Stochastic Processes
- MATH5905 Statistical Inference
- MATH5925 Project (30 credit points)
- MATH5935 Statistical Consulting

Elective Subjects (offered every second year)
- MATH5806 Applied Regression Analysis
- MATH5815 Experimental Design 1
- MATH5816 Mathematics of Security Markets 2 (Prerequisite: MATH5965)
- MATH5825 Experimental Design 2 (Prerequisite: MATH5815)
- MATH5826 Statistical Methods in Epidemiology
- MATH5845 Time Series
- MATH5855 Multivariate Analysis 1
- MATH5865 Multivariate Analysis 2
- MATH5875 Sample Survey Design
- MATH5885 Sequential Analysis
- MATH5895 Nonparametric Methods
- MATH5915 Medical Statistics
- MATH5945 Categorical Data Analysis
- MATH5955 Statistical Quality Control
- MATH5965 Mathematics of Security Markets 1 (Prerequisite: MATH5955)
- MATH5975 Economic Quality Control Models (Prerequisite: MATH5965)
- MATH5985 Industrial Designs (Prerequisite: MATH5815)

Up to 60 credit points may be taken in graduate subjects offered by other Departments or Schools within the University, subject to the approval of the Head of School.

Conditions for admission and for the award of the degree of Master of Optometry are set out in this handbook.

8760
Master of Optometry Degree Course
Full-time or Part-time

Master of Optometry
MOptom

Four elective graduate subjects chosen from the list below
- OPTM8001 Advanced Clinical Optometry
- OPTM8002 Advanced Physiological Optics
  (Not offered in 1999)
- OPTM8003 Behavioural Optometry
- OPTM8004 Advanced Contact Lens Studies
- OPTM8005 Advanced Contact Lens Practice
  (Not offered in 1999)
- OPTM8006 Occupational Optometry
  (Not offered in 1999)
- OPTM8007 Clinical Photography
  (Not offered in 1999)
- OPTM8008 Project
- OPTM8009 Ocular Therapy
- OPTM8010 Public Health Optometry
  (Not offered in 1999)
- OPTM8011 Advanced Studies in Ocular Disease
- OPTM8012 Visual Neuroscience
  (Not offered in 1999)
- OPTM8014 Human Visual Development
  (0.5 unit subject) (Not offered in 1999)
- OPTM8020 Rehabilitation of the Partially Sighted (0.5 unit subject)

School of Safety Science

8720.8910
Master of Science and Technology in Industrial Safety

MScTech

The Masters of Science and Technology in Industrial Safety is a specialist graduate program which builds on a previous four year degree. The program is of one year full time (or equivalent) study for students with a qualification in safety and health and safety background intending to become safety professionals. The Masters of Science and Technology in Industrial Safety is available in attendance mode only.
Core subjects

SESC9010 Research Methods 7.5
SESC9020 Occupational Health and Safety Law 7.5
SESC9100 Physical Hazards 7.5
SESC9200 Hazard and Risk Assessment 7.5
SESC9300 Effective Behaviour in Organisations 7.5
SESC9400 Ergonomics 1 7.5
SESC9620 Occupational Diseases and Injuries 7.5
SESC9810 Introduction to Toxicology 7.5

Exemption but not necessarily Advanced Standing may be awarded to students who can establish that they have equivalent knowledge in these subjects. Where necessary other, approved postgraduate subjects may be substituted.

Project subjects

SESC9910 Project Methods 7.5
SESC9930 Project 30

Elective subjects

Elective subjects may be taken from any School in the Faculties of Science and Technology or Engineering, subject to the agreement of the Head of School and the Head of the School of Safety Science. This enables students to extend their specialist knowledge in their own discipline, to undertake additional general management subjects or to focus on subjects relating to occupational safety and health.

8720.8940
Master of Science and Technology in Risk Management

MScTech

The Master of Science and Technology Risk Management provides a general introduction to risk management principles as they are applied across all disciplines, then allows students to specialise in one or more areas. Subjects for the course are offered by the Faculties of Science and Technology, Engineering, Commerce and the AGSM. Students may select either a financial or a technical focus.

Candidates are required to complete 12 Units for the degree. Students may receive advanced standing in the preliminary subjects on the basis of prior studies providing they can demonstrate the prerequisite knowledge for the core subjects. Advanced standing is not given for core and elective subjects.

Preliminary Subjects

ECON 5103 Business Economics 20
SESC9300 Effective Behaviour in Organisations 7.5
SESC9020 The Legal System and Risk 7.5
and either
ECON5203 Statistics for Business 20
or
SESC6010 Descriptive statistics 7.5

and

SESC6020 Inferential statistics 7.5

Core Subjects

SESC9211 Risk Management 15
SESC9231 Risk Analysis 15
FINS5513 Security Valuation and Portfolio Selection 15
FINS5531 Risk and Insurance 15
SESC9915 Project 15

Elective Subjects

Students may select elective subjects from any faculty providing they can demonstrate to the course authority the relevance of the subject to risk management. A list of possible electives is shown below.

Note some subjects may have prerequisites or assumed knowledge

ACCT5901 Accounting a User Perspective 15
ACCT5908 Auditing 15
ACCT5917 Strategic management Systems and processes 15
ACCT5996 Management Accounting Control Systems 15
BLDG6253 Construction planning and Control 10
BLDG6255 Contracts Management and Law 10
BLDG5314 Project Quality Management 10
BLDG7406 Real Estate Investment Analysis 10
CIVL9707 Contracts Management 15
CIVL9701 Engineering Economics and Finanicial Management 15
CIVL9702 Project Planning and Control 15
CIVL9703 Quality and Quality Systems 15
CIVL9707 Contracts Management 15
CIVL9711 Management of Professional Services 15
CIVL9714 Resource Management 15
CIVL9718 Strategic Management in Engineering 15
CIVL9720 Problem solving and decision making 15
CIVL9881 Hazardous Waste Management 15
CIVL9888 Environmental Management 15
CIVL9889 Environmental Economics and Law 15
COMP9514 Advanced Decision Theory 15
ECON5124 Public Enterprise Economics and Cost Benefit Analysis 20
FINS5511 Corporate Finance 15
FINS5512 Financial Markets and Institutions 15
FINS5513 Security Valuation and Portfolio Selection 15
FINS5517 Applied Portfolio Management and Modelling 15
FINS5535 Derivatives and Risk Management Techniques 15
FINS5541 Advanced Investment and Funds Management 15
FINS5542 Applied Funds Management 15
FINS5551 International Insurance 15
SESC9320 Effective Behaviour in Organisations 7.5
SESC9330 Technology Management 7.5
SESC9221 Major Hazards Management 15

Subjects from the AGSM may also be taken by agreement.

---

**8720.8940**  
Master of Science and Technology in Ergonomics

**MScTech**

The Master of Science & Technology in Ergonomics is intended for students wishing to become professional ergonomists. It provides students with the competencies to identify ergonomics hazards in human-technology-environment systems, to assess their associated risks and to use a user-centred, systems approach to develop controls for the hazards. In addition it provides students with the competencies to plan and conduct an ergonomics research or design project in a scientific manner and to disseminate the results. It is the third stage in a fully articulated program of Graduate Certificate, Graduate Diploma and Masters (of Science & Technology) courses in ergonomics.

8045
Master of Environmental Studies

MEnvStudies

Entry qualifications

The entry qualification for the Master of Environmental Studies degree is a four year honours degree or equivalent, in a field relevant to environmental studies. Applicants may also be admitted if they have a three year degree plus another qualification at an acceptable level, or have other professional or academic attainments. In the past, the course has attracted students from a wide variety of backgrounds, including those with first degrees in geography, biological sciences, geology, ecology, civil engineering, chemistry, physics, law, health administration, agriculture, social science and archaeology.

Course requirements

Students enrolled on the Master of Environmental Studies Program are required to complete a course totalling 120 Credits, but have the choice of two options:

- coursework only;
- coursework and project.

The coursework only option is made up of compulsory Core Subjects (45 credits) and Elective Subjects (75 credits). The coursework and project option is made up of Core subjects (45 credits), Project subjects (37.5 credits) and Elective subjects (37.5 credits). The structure of the course options allows students to pursue specialised interests through the electives and the project, or to develop new areas of expertise.

Some subjects have prerequisites or assumed knowledge which are determined to be necessary for suitable progress through the subject. Students should seek advice from subject co-ordinators if they are in doubt as to whether they are qualified to take a subject.

Core subjects

Course work only option
SESC9711 Environmental Planning and Assessment 15
SESC9721 Environment and Medicine 15
SESC9731 Environment and Law 15

or

Course work and project option
SESC9711 Environmental Planning and Assessment 15
SESC9721 Environment and Medicine 15
SESC9731 Environment and Law 15
SESC9900 Project Methods 7.5
SESC9930 Project 30

Project subjects

Students undertaking the coursework and project option must undertake an investigative project of 30 credits (SESC9930). Students taking the project must also take the subject SESC9900 Project Methods. A second subject
(SESC9010 Research Methods is also highly recommended). This project is expected to be complete within one University session (that is, six months). Students will require an academic supervisor for the duration of the project. Projects normally require collection and analysis of data, leading to the preparation of a report of about 8-10,000 words. The project can be based on studies carried out at the student’s place of work, or at some other suitable location.

The objective of the Project is for the student to demonstrate skills in project design, data acquisition and analysis, critical synthesis, and presentation of findings.

Elective subjects

There is a very wide range of subjects offered by Schools across the entire University which are suitable for inclusion in the M Env Studies program.

Students may choose to take electives that:

- extend their own areas of expertise; or
- extend their knowledge and skills into new areas.

By carefully combining the choice of subjects, it is possible to create programs which are tailored to the needs of individual students.

Students may choose elective subjects from all graduate programs available in the Faculty of Science and Technology, provided that they meet or can satisfy any necessary prerequisites to enrol. These programs include: Earth Sciences, Planning and Assessment, Pollution, Ecology, Remote Sensing, Water Management, Conservation and Land Management, Urban and Social Environments and Safety Science.

Centre for Advanced Numerical Computation in Engineering and Science

8720.2001
Master of Science and Technology (Computation)

Staff Contact: Dr Y Shao

The MComputationalSc degree will provide thorough training in modern computational techniques in the discipline-specific areas: A) Environmental Modelling; B) Computational Chemistry; C) Computational Physics, through coursework and a focussed project in your major field.

Admission to the Masters program requires the equivalent of a 4-year degree in Science, Engineering or other mathematically-based discipline at a satisfactory level. Candidates must have adequate higher-level language (preferably Fortran) programming skills. The Masters program can be completed in one year of full-time study.

Students are required to complete, satisfactorily, 135 credits, as follows:

I) The two core subjects (ANCE8001, MATH5315, see Grad Dip)

II) One generic computational subject (see Grad Dip)

III) Two discipline-specific subjects offered by the Centre or the Faculties of Science and Engineering.

IV) One elective subject offered by the Centre or the Faculties of Science and Engineering.

V) 45 credit project supervised by academic members of the Centre and/or the Faculty of Science.
Postgraduate Study

Descriptions of all subjects are presented in alphanumeric order within organisational units. For academic advice regarding a particular subject consult with the contact for the subject as listed. A guide to abbreviations and prefixes is included in the chapter 'Handbook Guide', appearing earlier in this book.

Anatomy

ANAT6151
Introductory Functional Anatomy
Staff Contact: Dr K Asfiwell
CP7.5 S1 L2 T1 HPW3
Overview of basic human anatomy and physiology with an emphasis on structures and systems which are most vulnerable to chemical and physical trauma under industrial conditions, such as the eye, ear and skin. Other systems studied include the musculo-skeletal system, central and peripheral nervous systems, circulatory, respiratory, gastrointestinal, endocrine and urogenital systems.

Biochemistry

BIOC6308
Alternative Higher Degree Qualifying Program
Staff Contact: Prof I Dawes
CP120
Similar in content and standard to BIOC4318 Biochemistry Honours but designed specifically for students who cannot regularly attend the University.

BIOS3014
Ecological Studies in Arid Lands Management
Staff Contact: Dr D Croft
CP 15 S2 L2 T4
Techniques in ecological studies of animal communities. Adaptations to an arid environment, environmental and social determinants. Behaviour, diet and condition of native and feral animals. Competition between native and introduced herbivores. Strategies in the management of arid zone wildlife. Concurrent studies in relevant units in the School of Biological Science are prescribed to cover aspects of vegetation description and plant environment interactions.

BIOS9917
Alternative Higher Degree Qualifying Program
Staff Contact: A/Prof C Quinn
Full-time CP120
Part-time CP60
Similar in content and standard to BIOS4018 Biological Science Honours but designed specifically for students who cannot regularly attend the University.

BIOS9943
Alternative Higher Degree Qualifying Program
Staff Contact: A/Prof C Quinn
Full-time CP120
Part-time CP60
Similar in content and standard to BIOS4028 Botany Honours but designed specifically for students who cannot regularly attend the University.
BIOS9945
Alternative Higher Degree Qualifying Program
Staff Contact: A/Prof C Quinn
Full-time CP120
Part-time CP60
Similar in content and standard to BIOS4038 Zoology Honours but designed specifically for students who cannot regularly attend the University.

Biomedical Engineering

BIOM9012
Biomedical Statistics
Staff Contact: Dr R Odell
CP16 S2 L3 T1

Biotechnology

BIOT5013
Practical Biotechnology
Staff Contact: Prof P Rogers
CP30 F T6
Illustration, demonstration and operation of laboratory-scale and pilot-scale equipment. Visits to appropriate industries. Experimental project or critical review.

BIOT7030
Advanced Biotechnology
Staff Contact: Dr F Foong/Dr S Mahler
CP24 F HPW3
Co-requisite: PHPH5471
This course will cover the production and characterisation of biopharmaceuticals. Production involving chemical and enzymatic peptide synthesis, recombinant production in E.coli, yeast, baculovirus and mammalian cells and associated purification processes will be covered. Regulatory considerations important in the validation of fermentation and recovery processes, the purity of final product, and the design of facilities will also be covered. Patent issues relevant to such products and other aspects of licensing business considerations will be addressed, as will case studies of current production processes.

BIOT7040
Biotechnology Principles
Staff Contact: Dr S Mahler
CP32 S1 S2 S2 5
This course is designed to provide students who have not previously studied biotechnology with sufficient training in the field to complete the MSc (Biopharmaceuticals). Aspects of the application of gene cloning techniques for the production of recombinant proteins from a range of host cells, growth, product formation and recovery of microbial products, bioreactor design and operation, monoclonal antibody and gene probe technology will be covered.

BIOT7050
Biopharmaceuticals Project (Major)
Staff Contact: Dr S Mahler
CP64 F HPW 8
An experimental or technical investigation or design project in the general field of biotechnology.

BIOT7051
Applied Genetics
Staff Contact: Dr D Glenn
CP20 S2 L2 T3
Isolation of commercially useful microorganisms. Mutagenesis and the isolation of mutants of the following types: auxotrophs; catabolic mutants; feedback inhibition and repression resistance; constitutive; catabolite repression resistance; resistance to antimicrobial agents and to viruses; extended enzyme substrate specificity; altered enzyme properties; changes in promoter and attenuator activity.

BIOT7060
Biopharmaceuticals Project (Minor)
Staff Contact: Dr S Mahler
CP32 F HPW 4
A small experimental or design project, or an extensive literature review and analysis of a selected topic in biotechnology.

BIOT7061
Peptide and Protein Technology
Staff Contact: Dr F Foong
CP20 S1 L2 T3
Industrial scale production of enzymes, peptide hormones, antibodies including monoclonal antibodies, vaccines; regulation of synthesis by environmental control and genetic manipulation; recovery and down-stream processing techniques; immobilization by entrapment and binding.
Applications of proteins in medical therapy and diagnosis and as analytical tools including ELISA and affinity chromatography: applications of enzymes in the food and beverage industries.

BIOT7071
Biochemical Engineering
Staff Contact: Prof P Rogers
CP20 S1 L2 T3
Design of bioreactors; range of biocatalysts from free enzymes to immobilized cells; heat and mass transfer, scale-up, economic feasibility studies as applied to bioprocesses; design of equipment and facilities for sterile operation and to meet recDNA guidelines; downstream processing, design and operation; instrumentation and control; use of computer-linked systems; mathematical simulation.

BIOT7081
Environmental Biotechnology
Staff Contact: Dr J Foster
CP20 S2 L2 T3
Environmental Biotechnology examines the way microbes decompose chemically complex materials. Applications include the use of bacteria and fungi to detoxify wastes, converting them to usable substances. Prevention of biodeterioration of valuable materials is also an important area of study. Lectures cover biodegradation of minerals, metals, cellulosics, aromatics, hydrocarbons and wastewater treatment. Students present research reviews and conduct experimental projects.

BIOT7091
Applied Cellular Physiology
Staff Contact: Dr F Foong
CP20 S2 L2 T3
Elemental and molecular composition of cells; formulation of growth media; stoichiometry of growth processes and product formation; metabolic regulation; stringent response; mechanisms of metabolite uptake and product release; maintenance energy; thermodynamics of cellular growth and activities. Effect of mutation on cellular physiology; recombinant-DNA products. Fermentation processes: inoculum preparation, physiology of selected processes.

BIOT7110
Bioengineering Principles
Staff Contact: A/Prof P Doran
CP12 S1 L3
A subject designed to provide an introductory course for students in the MAppSc Biotech program who have not previously undertaken any bioengineering studies.

Steady state and differential balances as a basis for quantification of complex real systems. Concepts in rate processes and kinetic analysis with application to biological systems. Experimental determination of rate data. Correlation of simple lumped rate processes and simultaneous distributed processes and the concepts involved in dimensionless numbers.

Lamina and turbulent flow. The structure of homogeneous and boundary layer turbulence flow in pipes and channels. Mixing theory. Process vessel reactor models.

Fluid viscosity, Newtonian and non-Newtonian fluids, convective and molecular transport processes. Heat and mass transport, film coefficients. Film, boundary layer, penetration and surface renewal theories.

Quantification of complex systems. Empirical and mechanistic models in biological systems.

BIOT7123
Biotechnology Project Minor
Staff Contact: Prof P Rogers
CP32 F T4
A small experimental or design project, or an extensive literature review and analysis of a selected topic in biotechnology.

BIOT8010
Graduate Seminars
Staff Contact: Department Office
CP8 F T2

Chemistry

These subjects will not be available in 1999.

CHEM7115
Treatment of Analytical Data
S2 L2 T4
Errors of measurement, the treatment, interpretation and comparison of sets of measurements, associated data and problems involving analysis of variance. Topics: description of sets of measurements, tests of significance, associated data, linear regression analysis; analysis of variance; biological assays, bacteriological counts, sampling problems.

CHEM7125
Food and Drugs 1
S1 L3 T3
This unit covers the basic chemistry of food constituents and the appropriate methods of analysis of food constituents. Materials covered include monosaccharides, oligosaccharides, polysaccharides, food gums, proteins and enzymes, oils and fats, vitamins, plant pigments and food colouring matter, essential oils and food flavouring agents, preservatives and food additives.
CHEM7225
Food and Drugs 2
S2 L2 T4
This unit is concerned with the chemistry and analysis of common drugs such as antibiotics, sulphonamides, analgesics, barbiturates etc. Special techniques in drug analysis are studied, e.g. affinity chromatography, immunoassays, radioimmunoassays, ELISA, HPLC using special phases, chiral columns, ISRP columns, hypercarb columns; capillary gas chromatography, flash chromatography. Further work on the chemistry and analysis of preservatives.

CHEM7325
Toxicology, Occupational and Public Health
S1 L2 T4
Important classes of toxic materials found in the environment; treatment of pesticide residues, industrial chemicals of various types, toxic gases, mould metabolites and bacterial toxins occurring in food, carcinogenic substances, toxic metals etc. Effects of these substances on living organisms, particularly people. Practical work: pesticide residue analysis, blood and urine analysis, gas sampling and analysis, trace metal determination and experiments on the animal metabolism of toxic substances.

CHEM7425
Instrumental Techniques in Food and Drug Analysis
S2 L2 T4
Principles involved in modern instrumental techniques; detailed application and interpretation of results. UV-visible spectroscopy, Raman, IR and NIR spectroscopy; phosphorescence and fluorescence methods, mass spectroscopy, high and low resolution NMR spectroscopy. Qualitative and quantitative application of instrumental analysis to foods and drugs.

CHEM7555
Project Work in Food and Drug Chemistry
Short laboratory projects and/or literature assignments in selected topics of Food, Drug and Biological Chemistry, including laboratory synthesis of drugs, analysis of drug mixtures, stability of drugs, synthesis and characterization of food additives, analysis of natural and synthetic food flavours etc. Computerized methods of searching the chemical literature, use of computer graphics to study molecular properties.

Computational Science

ANCE8001
Computational Mathematics
Staff Contact: CANCES
CP15 S1 HPW3
Discretization, linear algebra, ODE and PDE solvers, appropriate for contemporary computational engineering and scientific applications.

ANCE8002
Supercomputing Techniques
Staff Contact: CANCES
CP15 S1 HPW3
For understanding and efficiently using vector and parallel supercomputers for contemporary computational engineering and scientific applications.

ANCE8003
Project (MComputationalSc Degree)
Staff Contact: CANCES
CP45
Case study experience to give the student practice in applying the techniques learnt in specific subjects towards solving or computationally analyzing practical problems.

ANCE8101
Data Analysis and Visualization
CP15 SS HPW3
Statistical data analysis, error assessment, spectral analysis and data filtering, recent development in data analysis techniques, data storage, organisation of technical data and data formats, graphic analysis of real data sets, graphic packages for data visualisation.

ANCE8102
Mesh Generation
Staff Contact: CANCES
CP15 SS HPW3
Algebraic and PDE grid generation techniques for structured and unstructured grids. Exposure to techniques used in commercial packages, such as PATRAN. Relationship to pre-processing. Relationship to solution accuracy and error control.

ANCE8103
Fundamental Applied Computation
Staff Contact: CANCES
CP15 SS HPW3
Basic computational skills for candidates with limited previous training, structured to provide an appropriate foundation for the core subjects. This subject is equivalent to the FACES program (self-contained computer-based learning modules for industry-based engineers and scientists).

ANCE8104
Advanced Computational Algorithms
Staff Contact: CANCES
CP15 SS HPW3
This is a specialized advanced subject to cover: i) special algorithms for vector supercomputing; ii) special algorithms for parallel supercomputing; iii) special computational algorithms taught by visitors or UNSW staff.

ANCE9105
Computational Techniques for Fluid Dynamics
Staff Contact: CANCES
CP15 SS HPW3
General and specific computational techniques for fluid flow behaviour occurring in industrial, geophysical and chemical processes etc.

ANCE8207
Advanced Computational Science
Staff Contact: CANCES
CP15 SS HPW3
Special topics taught by visitors or UNSW staff.

ANCE8208
Physics and Modelling of the Atmospheric Boundary Layer
CP15 SS HPW3
Theory of boundary layer flows; numerical modelling of turbulence and flow over complex terrain; boundary layer parameterisation; dispersion of pollutants and particulates.

Food Science and Technology

Not all subjects are necessarily offered in any one year.

FOOD1507
Introductory Food Science
Staff Contact: Prof KA Buckle
CP7 S1 L1 S2 T1
An introduction to the history of food preservation and human nutrition. Current world food patterns, organisations and trade. Food development programs, regional and international agencies and activities. Parameters of food quality; food choice and social behaviour, food and society. Students present a seminar on aspects of food science in Session 2.

FOOD1517
Chemistry, Biochemistry and Physics of Foods
Staff Contact: Prof KA Buckle
CP10.5 S1 or S2 L2 T1

FOOD1527
Principles of Food Preservation
Staff Contact: Prof KA Buckle
CP21 S1 L3 T3
Spoilage control by traditional and modern techniques. Technology of food preservation by heating, chilling and freezing, sun drying and dehydration, salt, sugar, acid, chemical preservatives, ionising radiations, modified atmospheres. Chemical and microbial stability of foods. Packaging requirements for preserved foods. An integrated program of laboratory and pilot plant exercises designed to illustrate the principles and procedures presented in the lecture course.

FOOD1537
Plant Food Products
Staff Contact: Dr JE Paton
CP7 S1 L2
Cereals: structure, composition, properties and uses of cereal grains with emphasis on wheat; processing and technology of wheat and rice. Sugars: sources, types, properties of sugars in foods; sugar milling and refining. Fruit and vegetables: nutrient composition; principles of post-harvest physiology, storage and handling. Lipids: sources and composition of fats and oils, methods of extraction and processing. Non-microbial hazards in foods: minerals, proteins, acids, goitrogenes, cyanogens, carcinogens; spices and flavours. Plant protein: sources, composition, extraction and uses in foods with emphasis on soybean. Tea, cocoa and coffee: production, composition and processing.

FOOD1547
Animal Food Products
Staff Contact: Dr JE Paton
CP10.5 S1 L3
Nature and distribution of world animal food resources. Meat: muscle structure, function, slaughter, conversion of muscle to meat; chemical, biochemical factors in postmortem glycolysis; meat microbiology; chilling, freezing, curing, processing of meat and meat-derived products; processing equipment; meat marketing systems; nutritional and sensory properties of meats. Milk and dairy products: chemical, physical properties, microbiology of milk; technology of milk-derived products including cheese, fermented products, butter, frozen, chilled and dried milk-derived foods. Marine products: nature and distribution of world fishery resources; teleostean and elasmobranch species, spoilage mechanisms, quality assessment; preservation by chilling, freezing, salting, drying, smoking, marinating and fermentation; fish meal and fish protein concentrate. Egg products: structure and composition of the avian egg; changes during storage of whole eggs; egg quality assessment; functional properties of egg components; preservation of the intact egg; pulping, freezing and drying of whole egg pulp, yolk and albumen.

FOOD1557
Food Technology Laboratory
Staff Contact: Dr JE Paton
CP21 S2 T6
Prerequisite: FOOD1527, FOOD1537, FOOD1547 or their equivalent
A program of laboratory and pilot plant exercises integrating elements of the chemical, physical, sensory and microbiological analysis of foods and the impact of processing on these factors. The program is designed to demonstrate the application of laboratory methods to food systems.

Marine Products

Food Additives and Toxicology

Functions, modes of action of food additives, consequences of use, ethical and legislative considerations. National, State and international attitudes and standards. Principles of toxicological testing, the evaluation of results.

Postharvest Physiology and Handling of Fruit and Vegetables

Biochemistry and physiology of metabolism in fresh fruit and vegetables; respiration measurements as an index of metabolism, maturation and senescence; concept of climacteric and non-climacteric produce; physiological and metabolic changes occurring during ripening. Effect of temperature on metabolism; constraints of high and low temperatures; role of humidity control and water loss in quality maintenance; use of atmosphere control to delay senescence and ripening. Physiological disorders of stored produce; microorganisms of importance to post-harvest tissue; physical and chemical methods of control; post-harvest disinfection and quarantine measures. Examination of current commercial storage and marketing operations.

Postharvest Storage of Foods

Pre-harvest considerations, post-harvest physiology and biochemistry, post-harvest factors affecting quality, methods of storage and handling, marketing strategies for selected food commodities.

Seminar

Students present material arising from literature and/or laboratory assignments and/or plant investigations in the food and related industries. Critical assessments are made of the results of research in food science and technology.

Major Research Project

A detailed investigation of a selected topic in food science and technology including submission of a project report. Available only to exceptional candidates.

Research Project

An investigation of an aspect of food science and technology and submission of a project report.

Minor Project

A study of an aspect of food science and technology and submission of a project report.

Special Topics in Food Science and Technology

An individually supervised program of investigation in specialised aspects of food science and technology not otherwise offered. Embraces a literature review, laboratory work and/or industrial liaison as may be appropriate. Available only to appropriately qualified students.
FOOD1757
Special Topics in Food Science and Technology
Staff Contact: Prof KA Buckle
CP10.5 S1 or S2 T3
An investigation similar to but shorter than that outlined in FOOD1747.

FOOD1767
Reading Assignment
Staff Contact: Prof KA Buckle
CP3.5 SS T1
A reading assignment in an area supporting candidates’ major disciplines or commodity interests. Presentation of a seminar may be required.

FOOD2507
Introductory Microbiology
Staff Contact: Prof GH Fleet
CP14 S1 L2 T2
Notes: Not offered in 1998.
This subject is designed as a prerequisite to FOOD2517 for students with very limited or no background in basic microbiology. It covers the fundamentals of microbial taxonomy, ecology, cytology and biochemistry and the basic technologies of microbial culture, isolation, enumeration and identification.

FOOD2517
Food Microbiology
Staff Contact: Prof GH Fleet
CP14 S1 L2 T2
Prerequisite: FOOD2507 or other introductory microbiology subject
A lecture and laboratory program on the ecology, biochemistry, isolation, enumeration and identification of bacteria, yeasts, fungi and viruses associated with foods and beverages. Food spoilage: specific food/microorganism associations; taxonomy and biochemistry of major spoilage species; chemical and physical changes to food properties; control of spoilage of specific commodities. Foodborne microbial disease: foods as vectors of disease and food poisoning; statistics and epidemiology; ecology and taxonomy of foodborne pathogenic microorganisms; control and prevention by hygiene, microbiological standards and legislation. Food fermentation: microbial ecology and biochemistry of fermentations; fermentation of alcoholic beverages, bakery products, dairy products, meats, vegetables, cocoa beans, soy sauce; production of food ingredients and processing aids by fermentation. Microbiological examination of foods: sample preparation and sampling plans; sub-lethal injury; standard methods for determination of total plate counts, indicator organisms, foodborne pathogenic species; principal spoilage species. Microbiological quality assurance: specifications and standards; decision criteria; hazard analysis and critical control point (HACCP) concept; cleaning and sanitation.

FOOD2527
Microbiological Examination of Foods
Staff Contact: Prof GH Fleet
CP21 S2 L2 T4
Prerequisite: FOOD2517 or equivalent

FOOD2537
Microbiological Quality Assurance
Staff Contact: Dr JM Cox
CP7 S1 L1 T1
Prerequisite: FOOD2507 or equivalent
Corequisite: FOOD2527
A theoretical and practical consideration of the management of microbiological quality assurance. HACCP. Cleaning and sanitation. Microbiological specifications and regulations. Local and international approaches to obtaining safe food. Management and quality assurance in the microbiology laboratory.

FOOD2547
Food Microbiology Project
Staff Contact: Prof GH Fleet
CP21 F T3
Prerequisite: FOOD2517
A study of an aspect of food microbiology and submission of a project report.

FOOD2557
Microbial Spoilage of Foods
Staff Contact: Dr JM Cox
CP3.5 S2 L1
Prerequisite: FOOD2517
Consideration of major microbial groups responsible for spoilage yeasts, moulds, lactic acid bacteria, acetic acid bacteria, psychrotrophs, lipolytics, proteolytics. Specific commodity groups meat, dairy and fish products, fruits, vegetables. Impact of processing technologies on food spoilage and extension of shelf-life; biochemical basis of spoilage defects, taints; predictive considerations.

FOOD2567
Foodborne Microorganisms of Public Health Significance
Staff Contact: Dr JM Cox
CP7 S2 L2
Prerequisite: FOOD2517
Corequisite: FOOD2527
An advanced treatment of the ecology, epidemiology, properties, pathogenicity, methods of analysis, economic
significance and control of pathogenic microorganisms in foods. *Salmonella*, *Shigella*, *Escherichia coli*, *Vibrio* sp., *Staphylococcus aureus*, *Bacillus* sp., *Clostridium perfringens*, *Clostridium botulinum*, *Yersinia*, *Listeria*, *Campylobacter*, *Aeromonas*, *Klebsiella*, viruses, fungi.

**FOOD2577**
**Food and Beverage Fermentations**
*Staff Contact: Prof GH Fleet*
CP7 S2 L2
*Prerequisite: FOOD2517*

A detailed treatment of the microbial ecology, biochemistry, processing technology and quality parameters of fermented foods and beverages; cheese, yogurt, novel dairy products; meat sausages; bread, biscuit/cracker doughs; soybean products, soy sauce, tempe; traditional fermented products of Asia and Africa; vegetables; cocoa beans; alcoholic beverages, beer, wine, champagne, distilled spirit.

**FOOD2587**
**Microorganisms as Food Processing Aids and Ingredients**
*Staff Contact: Prof GH Fleet*
CP3.5 S2 L1
*Prerequisite: FOOD2517*

This subject interfaces with biotechnology and considers the use of microorganisms as primary sources of processing aids and ingredients for food processing. The microbial production of vitamins, flavouring agents, amino acids, enzymes, pigments, thickening agents, fats and oils, modified proteins, organic acids. Use of microbial species as biocontrol agents to extend shelflife, as agents to improve the nutritive and therapeutic value of foods, immobilised cell and cell reactor technologies for conducting food and beverage bioconversions.

**FOOD2597**
**Food Microbiology Seminar**
*Staff Contact: Dr JM Cox*
CP7 S1 T1 S2 T1

Students present material arising from literature and/or laboratory assignments and/or plant investigations in the area of food microbiology. Critical assessments are made of the results of research in food microbiology.

**FOOD2607**
**Food Microbiology Research Project**
*Staff Contact: Prof GH Fleet*
CP42 F T6

An investigation of an aspect of food microbiology including a literature survey, experimental work and submission of a project thesis.

**FOOD2617**
**Major Research Project in Food Microbiology**
*Staff Contact: Prof GH Fleet*
CP63 F T9

A detailed investigation of a selected topic in food microbiology involving a literature survey, experimental work and submission of a project thesis. Available only to exceptional candidates.

**FOOD3507**
**Introductory Nutrition**
*Staff Contact: Dr J Arcot*
CP10.5 S1 L2 T1

Role of nutrients in human structure and function. Effects of diet on growth and body size. Food habits, beliefs and choice; dietary patterns. Assessment of nutritional status; anthropometry, dietary intake studies, use of dietary recommendations, food groups, tables of food composition.

**FOOD3517**
**Nutrition**
*Staff Contact: Dr J Arcot*
CP10.5 S2 L2 T1
*Prerequisite: FOOD3507 or equivalent*

Nutritional needs of vulnerable groups: infants, pregnant and lactating women, the aged. Dietary intolerance, disorders related to the affluent diet including coronary heart disease, dental caries, diabetes, hypertension and cancer. Problems of under-nutrition including protein, energy, mineral and vitamin deficiencies. Physiological and nutritional aspects of dietary fibre, alcohol and food intolerance. Measurement of nutrient fibre using computer systems, on individual and group basis.

**FOOD3527**
**Nutritional Evaluation of Foods**
*Staff Contact: Dr J Arcot*
CP21 S1 L2 T4
*Prerequisite: FOOD3517 or equivalent*

Principles of nutrient analysis of foods by chemical and biospecific procedures. Sampling, quality assurance of analytical results, data scrutiny and compilation. Practical exercises in nutrient analysis of foods using bench, instrumental and biospecific techniques. Literature search.

**FOOD3537**
**Public Health Nutrition**
*Staff Contact: Dr J Arcot*
CP7 S2 L2
*Prerequisite: FOOD3527 or equivalent*

Structure of the population. Food supplies, food consumption, food and nutrition policy, nutritional epidemiology. Population dietary references such as food balance sheets, nutrition monitoring and surveillance, dietary reference values. Food programs such as food fortification, supplementary feeding schemes, nutritional rehabilitation, nutritionally modified foods, nutritional regulations and standards, nutrition education, dietary and other nutrition interventions (ORT, family planning, infection control, growth monitoring). Principles and practice of applied nutrition programs. Evaluation of applied nutrition programs. Project work.

**FOOD3547**
**Nutritionally Modified Foods and Ingredients**
*Staff Contact: Dr J Arcot*
CP3.5 S2 L1
*Prerequisite: FOOD3517 or equivalent*

**FOOD3557**  
**Advanced Nutritional Science**  
*Staff Contact: Dr J Arcot*  
CP7 S2 T2  
*Prerequisite:* FOOD3527 or equivalent  
Selected advanced topics e.g. nutrient bioavailability studies, nitrogen balance tests, vitamin load tests, sodium and potassium excretions, creatinine excretions, physical activity diaries, fitness assessment, biochemical assessment, design and evaluation of nutritional epidemiology studies, food intake studies, duplicate diet analyses.

**FOOD4507**  
**Food Engineering Principles**  
*Staff Contact: Dr JL Paterson*  
CP10.5 S2 L2 T1  
*Prerequisite:* First year mathematics and physics or equivalents  
Units and dimensions; system conversions; material, energy and momentum balance; steady state and transient heat transfer; insulation; heat exchangers; solid and fluid rheology; viscosity; pumps; mixing.

**FOOD4517**  
**Unit Operations in Food Engineering**  
*Staff Contact: Dr RH Driscoll*  
CP14 S2 L2 T2  
*Prerequisite:* FOOD4507 or equivalent  
Refrigeration; freezing; chilling and thawing; evaporation; dehydration; extraction; distillation; extrusion; comminution; filtration and separation; process control; packaging.

**FOOD4537**  
**Computing in Food Science**  
*Staff Contact: Dr RH Driscoll*  
CP7 S2 L1 T1  
*Prerequisite:* An introductory statistics subject or equivalent  
Introduction to the DOS operating system and WINDOWS. The use of statistical, graphics and other program packages to solve problems in food science and technology.

**FOOD4567**  
**Food Engineering Field Work**  
*Staff Contact: Dr JL Paterson*  
CP10.5 S3 T1.5  
Inspection of food processing factories, agricultural and food research establishments and food producing areas.

**FOOD4587**  
**Advanced Food Engineering A**  
*Staff Contact: Dr RH Driscoll*  
CP14 S1 L3 T1  
*Corequisite:* FOOD4517 or equivalent  
Extrusion of food products, membrane technology, refrigeration, chilling, freezing, thawing, tempering, cold room design, process control, numerical techniques and modelling.

**FOOD4597**  
**Advanced Food Engineering B**  
*Staff Contact: Dr RH Driscoll*  
CP14 S2 L3 T1  
*Corequisite:* FOOD4517 or equivalent  
Mechanical and chemical separation, evaporation, distillation, psychrometry, drying, dryers, mass/energy balances, calculation of drying time, commercial equipment, current drying research.

**FOOD4607**  
**Packaging and Production**  
*Staff Contact: Dr JL Paterson*  
CP14 S1 L3 T1  
Chemical and physical properties of package materials; interaction between package and food; selection and evaluation of packaging materials and systems; package design criteria; printing; computers in packaging; modified atmospheres. Corrosion; scale-up; waste engineering; CIP systems; plant design.

---

**Geography**

**GEOG9011**  
**Environmental Impact Assessment**  
*Staff Contact: To be Advised*  
CP15 S1 L2 T2  
Environmental planning legislation and decision making processes in Australia with special reference to NSW. The content and structure of Environmental Impact Statements and the stages in the granting of development consent. Approaches to EIA with reference to the assessment of impacts on the natural, social and economic environments. Case studies exemplifying procedures, techniques, methods, and issues. Trends in EIA in Australia and selected other countries.
GEOG9012
Remote Sensing Applications
Staff Contact: Dr R Lucas
CP15 S1 L1 T2
The application of remotely-sensed data and information in the description, classification and assessment of earth resources and environmental conditions. Different types of remote sensing data and imagery, their attributes, acquisition and use. Relevance of remote-sensing data and imagery to a range of applications, including assessment of conditions of terrain, soils and surface materials; multi-temporal monitoring and inventory of rangelands, croplands and forests; rural and urban land use assessment; surveillance of surface water resources and sedimentation; appraisal of changes in the coastal zone. Use of remote sensing in environmental management and in environmental impact assessment.

GEOG9013
Directed Problems In Remote Sensing
Staff Contact: To Be Advised
CP15 S2 T3
A detailed investigation of a particular aspect of remote sensing technology or an area of applications relevant to candidates interests and background.

GEOG9014
Computer Mapping and Data Display
Staff Contact: Dr R Lucas
CP15 S1 L2 T2
Introduction to automated cartography and thematic mapping; theoretical and practical problems in displaying and mapping data by computer; review and application of selected computer mapping packages. Mapinfo is used for cartographic manipulation and output.

GEOG9015
Population, Health and Environment
Staff Contact: A/Prof I Burnley
CP15 S2 L2 Not offered 1998
Relationship between environmental factors and disease morbidity and mortality is examined by consideration of the epidemiological transition in different countries, and the spatial and occupational-specific variation in disease incidence in Australia. Methodology for standardising, testing for significance and data quality.

GEOG9016
Principles of Geographic Information Systems
Staff Contact: To Be Advised
CP15 S1 L1 T2
Study of selected geographic information systems; problems of data capture and display, data storage and manipulation, system design and development; cartographic displays and computer mapping. INFO is used for database management, and ARCINFO and MAP for spatial data manipulation and display.

GEOG9017
Advanced Geographical Information Systems
Staff Contact: To Be Advised
CP15 S2 L1 T2
Prerequisite: GEOG9240 or GEOG9016
Advanced topics and concepts in GIS research and development. Focus is primarily on vector-based systems. Topics include data models, structures and capture; vector editing and algorithms; errors and data accuracy. Practical exercises based on ARCINFO; INFO is used for data base management.

GEOG9018
Transportation Applications of Geographical Information Systems
Staff Contact: Dr B Parolin
CP15 S2 L1 T2
Prerequisite: GEOG9240 or GEOG9016
This subject provides an overview and hands-on experience in the design, use, and interpretation of Transport Information Systems (GIS-T's). Topics covered include transportation layers, transportation related referencing systems, data structures, network structures, urban transportation planning models, logit and other spatial models. At the end of the subject, the student will have a sound working knowledge of transportation GIS and an ability to work directly with real problems in government and private sectors.

GEOG9019
Special Topic
Staff Contact: A/Prof MD Fox
CP15 S1 or S2 T3
Selected topics may be pursued in the forum of individually supervised readings and assignments linked to studies in postgraduate programs offered through the School of Geography.

GEOG9020
Application and Management of Geographical Information Systems
Staff Contact: To Be Advised
CP15 S1 L2 T1
The process and issues involved in an organisation acquiring, implementing and managing a GIS will be considered using real examples. Applications using GIS in the management of natural resources (forest, park, soil etc), human activities at the local, national and global scale will be critically reviewed. The course will involve field visits.

GEOG9021
Image Analysis of Remote Sensing
Staff Contact: Dr R Lucas
CP15 S2 L1 T1
Techniques for extracting information from satellite imagery including image enhancement techniques, classification and feature recognition, statistical methods, and related procedures. Emphasis is on applications relating to vegetation cover and natural resource management.
Practical work will be undertaken using the ERDAS image processing software.

**GEOG9022**  
**Vegetation Management**  
*Staff Contact: A/Prof M Fox*  
CP15 S2 L2 T1  
**Note/s:** Fieldwork forms a compulsory part of this subject and students will incur personal costs.

The subject provides a background in theory and practice in vegetation management, particularly under Australian conditions. It covers the description and measurement of vegetation, vegetation dynamics, vegetation response to perturbation and human impacts, theories, and modelling of vegetation change. A third of the subject is devoted to management strategies of selected vegetation types.

**GEOG9023**  
**River Management**  
*Staff Contact: To Be Advised*  
CP15 S2 L2 T1  
**Note/s:** Fieldwork forms a compulsory part of this subject and students will incur personal costs. May not be offered in 1999.

The principles of river management including total or integrated catchment management, environmental impact assessment, in-stream uses and hydrogeomorphic behaviour. Issues covered include regulated rivers, inter-basin diversions, extractive industries, urbanisation, river engineering, legislative controls and institutional responsibilities. The course develops an understanding of how and why rivers respond to human activities and ways of ameliorating negative impacts. Field work is an essential part of the subject and the Nepean River will be used as a case study of management problems.

**GEOG9024**  
**Soil Degradation and Conservation**  
*Staff Contact: A/Prof M Melville,*  
CP15 S2 L2 T1  
**Note/s:** Fieldwork forms a compulsory part of this subject and students will incur personal costs.

Identification, assessment and analysis of the main processes of soil degradation, including the role of climate, vegetation, geomorphology and pedology in controlling the processes. Discussions of appropriate management strategies for reducing degradation and for reclaiming degraded landscapes. Topics include: surface wash, gully erosion, wind erosion, soil acidification, soil structure decline, salinisation, accumulation of toxins and desertification.

**GEOG9025**  
**Spatial Data Processing and Integration**  
*Staff Contact: To Be Advised*  
CP15 S1 L1 T2  
**Note/s:** Not offered in 1998.

Geographical information systems and remote sensing have many similarities, including geometric rectification, incorporation of reference data into the analysis of GIS and remotely sensed data, accuracy assessment, the form and structure of the data, visual analysis of spatial data and digital processing methods (Boolean overlay, decision support systems, affined transformations and expert systems). These topics will be considered and applied in the laboratory using remotely sensed and GIS data. INFO is used for database management and ARCINFO, ERDAS and MapInfo to demonstrate the practical application of the topics.

**GEOG9530**  
**Project**  
*Staff Contact: A/Prof MD Fox*  
CP30  
An investigation of a problem in environmental management, remote sensing or geographical information systems which may involve an identifiable research component. Such an investigation should be related to the research interests of particular Schools within the Faculty of Science and Technology.

**Geology**

**GEOL0004**  
**Special Program Applied Geology**  
*Staff Contact: Dr AC Dunlop, Mr GH McNally*  
CP120  
**Note/s:** For programs 8720.1001, 8720.1002 and 8720.1003.

**GEOL0005**  
**Research Thesis Applied Geology Full-time**  
*Staff Contact: Dr AC Dunlop*  
CP120  
**Note/s:** For programs 1000 and 2000.

**GEOL0006**  
**Research Thesis Applied Geology Part-time**  
*Staff Contact: Dr AC Dunlop*  
CP60  
**Note/s:** For programs 1000 and 2000

**GEOL0110**  
**Geological Remote Sensing**  
*Staff Contact: A/Prof GR Taylor*  
CP15 S1 L5 HPW3  
The physics of various remote sensing techniques; interpretation of conventional aerial photography in exploration; Infrared remote sensing techniques; side looking airborne radar; theory and applications of Landsat imagery; enhancement techniques for satellite imagery; interpretation of Landsat photographic products and application to several case history areas. Integration of remote sensing information with the overall data base as applied to exploration.
GEOL0114
Project in Geological Remote Sensing
Staff Contact: A/Prof GR Taylor/Dr DR Cohen
CP45
Note/s: Restricted to program 8720.4003.

GEOL0304
Data Processing Project 1
Staff Contact: A/Prof GR Taylor/Dr DR Cohen
CP30 SS
A minor project equivalent to 6HPW study for one session which will require the student to carry out detailed processing and analysis of a comprehensive data set for an exploration project that may relate to the student's field of employment.

GEOL0310
Image Processing of Spatial Data Sets
Staff Contact: A/Prof GR Taylor
CP15 SS L2 T2
Data sources and formats, remotely sensed, geophysical, geochemical and topographic. Image display systems; data pre-processing, image rectification, spatial filtering and enhancement techniques. Statistical analysis, classification and image display as a tool for data integration.

GEOL0320
Geostatistical Ore Reserve Estimation
Staff Contact: Dr DR Cohen
CP15
When to apply geostatistics; brief review of univariate statistics; bivariate statistics and correlation; exploratory data analysis; measures of spatial correlation: the variogram, the covariance; variogram calculation and how to obtain a good variogram; random function models and stationarity; desirable properties of estimators; estimation of variance; dispersion variance and uses; optimal weighted average estimator, ordinary kriging; recoverable reserve estimation, problems and solutions; application examples, coal, copper, gold; blasthole kriging for orewaste selection; geotechnics and the environment.

GEOL0330
Conceptual Models for Exploration Geology
Staff Contact: Dr AC Dunlop
CP15 SS L2 T2
The development and use of ore deposit models as a guide for exploration. Examples drawn from the major categories of deposit such as epithermal gold, greenstone associated gold, vein-type uranium, porphyry coppers, volcano-genic massive sulphides, carbonate and shale-hosted lead-zinc and ultramafic hosted nickel sulphides. Exploration strategies and tactics; risk analysis and prospect evaluation.

GEOL0340
Geochemical Exploration Techniques
Staff Contact: Dr DR Cohen/Dr AC Dunlop
CP15 SS L2 T2
The relationships between geology and electrical geophysical properties; basic theory of resistivity, induced polarisation and electromagnetic methods. Evaluation of applications, survey design, instrumentation, data acquisition, interpretation and productivity. Computer
methods of interpretation are emphasised by the extensive use of hands-on microcomputer tutorials. An introduction to recent advances in electrical geophysics: inversion, multi-electrode array resistivity, spectral induced polarisation, transient electromagnetics and ground probing radar.

**GEOL0390**
Data Processing for Fossil Fuel Resources  
*Staff Contact: A/Prof CR Ward*  
CP15 SS L2 T2

Sedimentary basin analysis with special emphasis on the geology of coal deposits; coal deposit evaluation, data acquisition, computer processing, analysis and display.

**GEOL9010**
Groundwater Environments  
*Staff Contact: Dr J Jankowski*  
CP15 S2 L2 T2

Physical properties of groundwater. Darcy flow; hydraulic conductivity – field and laboratory methods; storage and transmissivity; flow nets – local and regional flow systems. Drilling methods; well design and completion; well development; pumping tests and interpretation. Study of the detailed occurrence, methods of development and environmental problems associated with groundwater in aquifer systems of importance to Australia. Environments will include fractured rock systems (upland salinity); the Murray-Darling Basin; The Great Artesian Basin; Oceanic Islands and coastal aquifers and karstic aquifer systems.

**GEOL9030**
Geological Engineering  
*Staff Contact: Mr GH McNally*  
CP15 S1 L2 T2

**GEOL9031**
Engineering Geology of Surficial Materials  
*Staff Contact: Mr GH McNally*  
CP15 S2 L2 T2

Geotechnical characteristics of alluvial, colluvial, eolian, coastal and residual soils; duricrusts and deep water weathering; problem soils (expansive, dispersive, collapsing, compressible and saline); stabilisation and improvement of inferior materials; influence of Cainozoic climatic changes and geological history of regolith in Australia and adjacent areas.

**GEOL9032**
Soil and Rock Construction Materials  
*Staff Contact: Mr GH McNally*  
CP15 S2 L2 T2

Location and assessment of sand, gravel, hard rock, brick clay, building stone and limestone; specification and testing of aggregate, ballast and roadbase; concrete and asphaltic materials; blasting, crushing and benefication; environmental considerations, blast monitoring and quarry reclamation; waste and synthetic materials.

**GEOL9033**
Terrain Evaluation  
*Staff Contact: Mr GH McNally*  
CP15 S2 L2 T2

Introduction to photogeology and image interpretation, with emphasis on geotechnical applications; interpretation of geological structure, lithology and surficial deposits; terrain evaluation for engineering purposes, with Australian examples. Course content includes lectures, supervised practical work and individual assignments. Intended to complement GEOL0110 (Geological Remote Sensing), emphasising airphotos as a data source.

**GEOL9040**
Fundamentals of Geomechanics  
*Staff Contact: Mr GH McNally*  
CP15 S1 L2 T2

*Note/s:* This subject is being revised. Intending students should contact Mr G H McNally.

Engineering mechanics, limit equilibrium, equilibrium of multiple bodies, stress and strain in two and three dimensions, equations of equilibrium and compatibility. Isotropic and anisotropic elasticity, plastic and viscous yield criteria and potential surfaces. Stereographic projection methods for rock mechanics. Geomechanical properties and classification of soils and rocks. Laboratory and field testing techniques for soils and rocks. Deformability and strength properties of rocks and shear strength of rock discontinuities. Stresses about rock openings and beneath point loads. Stress measurement in rocks.

**GEOL9051**
Hydrogeochemistry  
*Staff Contact: Dr J Jankowski*  
CP15 S1 L2 T2

Chemical composition of natural and contaminated groundwaters; inorganic parameters in natural waters; methods of expressing concentration and representation of hydrochemical data; interpretation of chemical analyses, chemical types of waters; aqueous geochemistry, chemical thermodynamics, activities of ionic species, equilibrium reactions, non-equilibrium approaches, the carbonate system and pH control; chemical weathering, water-rock interactions; clay minerals and ion exchange, silicate equilibria, mass balance, oxidation and reduction, redox equilibria, redox processes and reactions. Application of physical chemistry to groundwater systems. Geochemical evolution of groundwater. Introduction to hydrochemical modelling. Introduction to isotope studies; case studies in natural and polluted environments.
Environmental isotopes; radioactive decay; stable and radioactive isotopes and their application to groundwater studies; bacteriology: basic principles of bacteriology and microbiology of polluted environments; biochemistry, advanced thermodynamics and kinetics; mass transport and mass balance studies in groundwater systems; computer methods in geochemical modelling including forward and inverse methods and geochemical modelling codes; case studies and application of computer codes in groundwater modelling; practical field measurement and use of field hydrochemical equipment; laboratory analysis and the use of the chemical laboratory equipment.

An introduction to the theory and application of geophysical methods to engineering, environmental, and groundwater studies. The methods covered include gravity, magnetic, seismic refraction, shallow seismic reflection, DC electrical resistivity, electromagnetic, transient electromagnetic, radar, and geophysical well logging. Each method is described in terms of the fundamental physical principles, data acquisition and field techniques, data-processing and presentation, quantitative interpretation, and case histories.

The physics of various remote sensing techniques; interpretation of conventional aerial photography in exploration; Infrared remote sensing techniques; sideloooking airborne radar; theory and applications of Landsat imagery; enhancement techniques for satellite imagery; interpretation of Landsat photographic products and application to several case history areas. Integration of remote sensing information with the overall database as applied to exploration. Remote sensing for hydrogeological mapping, recognition of aquifers and recharge, discharge zones, salinity mapping. Application of Landsat, TM, SPOT, RADAR and integrated information systems.

Hydro and Environmental Geology
Staff Contact: Dr J Jankowski
CP7.5 S1 L2 T1
Prerequisites: GEOL5100
Note/s: This is a servicing subject taught within courses offered by other schools or faculties.

Hydrogeochemistry: Chemical composition of natural and contaminated groundwater, inorganic parameters in groundwater, chemical types of groundwaters, chemical reactions and processes, chemical evolution and chemical classification of groundwaters, chemical equilibrium, disequilibrium, acid-base chemistry, the carbonate system and pH control, oxidation and reduction.

Groundwater Contaminant Transport
Staff Contact: Dr J Jankowski
CP7.5 S1 L2 T1
Prerequisites: GEOL9110
Note/s: This is a servicing subject taught within courses offered by other schools or faculties.

Weathering reactions and geochemical processes, ion exchange, salt sieving and brine development, dryland salinity, fresh water saline water interaction, application of stable and radioactive isotopes in groundwater studies, groundwater microbiology, corrosion and incrustation in groundwater bores, practical field and laboratory measurements, monitoring and sampling of contaminants in groundwater, sources and types of contaminants, groundwater quality and environmental standards, contaminant mass transport in groundwater chemical dispersion, chemical diffusion and retardation, Kd test, hydrogeochemical modelling, physical and empirical models, modelling of subsurface transport, trace metals in groundwater speciation and transport, restoration and clean-up.
Marine Science

MSCI5001
Marine Environmental Monitoring and Assessment
Staff Contact: Director, Centre for Marine and Coastal Studies
CP15
This unit is designed to give each student an understanding of the various techniques used in monitoring a coastal environment. Physical, chemical, biological and geological methods are applied in a field situation. Field work is involved.

MSCI5002
Management of Marine Resources
Staff Contact: Director, Centre for Marine and Coastal Studies
CP7.5
This unit covers issues concerning exploitation of renewable and non-renewable marine resources viewed from both economic and non-economic frameworks. The management of marine resources with emphasis on fisheries and minerals is the central theme of the unit.

MSCI5003
Experimental Design and Analysis
Staff Contact: Director, Centre for Marine and Coastal Studies
CP7.5
Applications of statistics to marine science data. Probability, estimation statistics and tests of hypotheses. Experimental design, ANOVA, linear and multiple regression, multivariate analysis, non-parametric methods. Emphasis is placed on the applications of computer software packages.

MSCI5004
Oceanographic Processes
Staff Contact: Director, Centre for Marine and Coastal Studies
CP15
The physical, biological and geological processes of the marine environment; the dynamics of ocean currents including surface waves, geostrophy, tides, upwelling subduction, basin scale gyres, El Nino; biological processes including primary formation of particulate matter, secondary production, biological cycles; geological processes.

MSCI5005
Topics in Marine Science
Staff Contact: Director, Centre for Marine and Coastal Studies
CP30
Students choose 4 topics (each 4 hours per week for one session) from those listed below to make up the required contact hours per week. The topics chosen must be approved by the course co-ordinator: marine biology, aquaculture, zooplankton, marine botany, fisheries, coastal ecology, marine pollution, environmental microbiology, fluid dynamics, estuarine hydraulics, dispersion processes, instrumentation, coastal engineering, remote sensing, atmosphere-ocean dynamics, marine geology, coastal environmental assessment, aquatic chemistry, computers in chemistry, spectroscopic analysis, environmental chemistry, modern developments in chemical synthesis.

MSCI5006
Graduate Seminars in Marine Science
Staff Contact: Director, Centre for Marine and Coastal Studies
CP15
A series of seminars of particular relevance to the practice of marine science. Includes both specialist topics in the disciplines that contribute to the marine sciences and detailed study and evaluation of case studies and contemporary issues in marine science.

MSCI5007
Marine Science Project
Staff Contact: Director, Centre for Marine and Coastal Studies
CP30
A study of an aspect of marine science and submission of a project report. The project may be either experimental or theoretical in approach.

MSCI5008
Special Topic
Staff Contact: Director, Centre for Marine and Coastal Studies
CP15
A special reading program and seminar course to cover perceived areas of special need. This subject is designed to meet the particular needs of individual students.

Materials Science and Engineering

MATS1092
Materials and Design 1
Staff Contact: A/Prof AG Crosby
CP5 S2 L1 T1
An appreciation of the relationships between the properties of materials, component design, manufacturing and product

MATS6005
Corrosion Project
Staff Contact: School Office
CP30 F HPW6
A substantial project on some aspect of corrosion science or technology.

MATS6203
Materials and Design 2
Unit 1 Design for Corrosion Control (Unit 1 of MATS1203)
Staff Contact: Prof DJ Young
CP5 S1 L1 T1

MATS6405
Graduate Materials Seminar
Staff Contact: Prof CC Sorrell
CP10 F HPW2
Instruction in written and oral presentation of technical and scientific material at an advanced level, which involves a presentation by the candidate of a lecture on a selected topic.

MATS6475
Materials Science and Engineering
Staff Contact: Prof CC Sorrell
CP15 F L2 T1

MATS6485
Materials Technology
Staff Contact: Prof CC Sorrell
CP15 F L1.5 T1.5

MATS6495
Corrosion Materials
Staff Contact: School Office
CP15 F L2 T1
Properties and efficient selection of materials for corrosion resistance. Applications in manufacturing, mining and process industries, in transportation equipment and in structures. Materials selection for service in particular environments.

MATS6535
Industrial Coatings for Corrosion Protection
Staff Contact: School Office
CP5 S1 L2
Special topics on heavy-duty organic, inorganic and metallic coatings used in atmospheric, marine and industrial environments.

MATS6545
Corrosion Technology
Staff Contact: School Office
CP15 F L3
Environmental fracture; corrosion in specific environments; corrosion of specific equipment types; principles of materials selection and design; surface preparation and maintenance coatings; polymeric materials and linings, inhibitors and electrochemical tests methods; cathodic protection.

MATS6555
Minor Graduate Materials Project
Staff Contact: Prof CC Sorrell
CP15 F HPW3
A small technical investigation or a design project, including a written report.

MATS6565
Major Graduate Materials Project
Staff Contact: Prof CC Sorrell
CP45 F HPW9
A substantial experimental or theoretical investigation, or design project, including a written thesis.

MATS7132
Structure and Properties of Metallurgical Phases
Unit 2 only
Staff Contact: A/Prof O Ostrovski
CP2.5 S1 or S2 L1
The atomistic and microscopic approach to melts in process metallurgy, liquid metals and slags. Relationships between melt structure, mechanism and reaction kinetics in smelting and refining operations.

MATS7134  
**Structure and Properties of Metallurgical Phases**  
*Unit 1 Structure and Properties of Solids*

**Staff Contact: School Office**  
CP7.5 S1 or S2 L1 T1

Application of defect solid state chemistry to materials preparation and reactivity. Non-stoichiometric and stoichiometric-dependent physical and chemical properties of metal compounds.

*Unit 2 Structure and Properties of Melts*

**Staff Contact: A/Prof O Ostrovski**  
S1 or S2 L1

The atomistic and microscopic approach to melts in process metallurgy, liquid metals and slags. Relationships between melt structure, mechanism and reaction kinetics in smelting and refining operations.

MATS7144  
**Powder Metallurgy**

**Staff Contact: School Office**  
CP5S1 or S2 L1 T1

MATS7244  
**Advanced Electron Optics**

**Staff Contact: School Office**  
CP5 S1 or S2 L1 T1

See School for details.

MATS7490  
**High Temperature Techniques**

**Staff Contact: School Office**  
CP2.5 S1 or S2 L1 T1

Experimental methods for the determination of thermophysical and thermochemical properties at elevated temperatures.

MATS7500  
**Mathematical Plasticity**

**Staff Contact: School Office**  
CP2.5 S1 or S2 L1 T1

Mathematical approaches to macroscopic plastic deformation; slip line field analysis, upper and lower bound techniques, finite element techniques. Application to estimation of loads and stresses developed during industrial deformation processes: rolling, drawing, bending.

MATS9421  
**Materials for Mining Engineers**

**Staff Contact: Dr P Krauklis**  
CP10 S1 L2 T1 S2 L1 T1

Session 1: Microstructure, phase equilibrium and properties of steels, light alloys, ceramics, polymer and composites. Metal forming by casting and mechanical working. Elastic and plastic deformation, recrystallisation, fracture, corrosion.

MATS9520  
**Engineering Materials**

**Staff Contact: A/Prof AG Crosky**  
CP7.5 S1 L2 T1

Microstructure and structure-property relationships of the main types of engineering materials (metals, ceramics, polymers and composites). Micromechanisms of elastic and plastic deformation. Fracture mechanisms for ductile, brittle, creep and fatigue modes of failure in service; corrosion. Metal forming by casting and wrought processes. Phase equilibria of alloys; microstructural control by thermomechanical processing and application to commercial engineering materials. Laboratory and tutorial work includes experiments on cast and recrystallised structures, ferrous and non-ferrous microstructures and fracture and failure analysis.

MATS9530  
**Materials Engineering**

**Staff Contact: Prof CC Sorrell**  
CP7.5 S1 or S2 L2 T1

Materials used in Mechanical Engineering and related fields (Manufacturing Engineering Management, Aerospace Engineering, Naval Architecture) are discussed, with emphasis on the dependence of properties and performance on microstructure. Aspects of materials
selection during the design of engineering components, which affect the service performance in applications, where failure can occur by brittle fracture, corrosion, creep, or fatigue, will also be discussed.

MATS9640
Materials Science and Engineering for Electrical Engineers
Staff Contact: Dr OC Standard
CP10 S2 L3 T1
Metallic, ceramic, organic, polymeric and composite materials and their technology for electrical engineering applications. Structures and structure property relations, phase equilibria and their effect on mechanical, electrical, magnetic, thermal and chemical properties. The shaping, treating and joining of materials. Aqueous and gaseous corrosion. Metallic glasses, superconductors, fast ion conductors. The role of materials science in the development of electrical energy systems.

MATS9650
Pyrometallurgical Processes
Staff Contact: A/Prof O Ostrovski
CP5 S1 L2
Principles and development of pyrometallurgical processes and a review of the unit operations, roasting, sintering, melting and refining for the treatment of ferrous and non-ferrous minerals.

MATS9712
Materials and Techniques in Design Craft 1
Staff Contact: Prof CC Sorrell
CP10 S1 L2 T1
An introduction to the science and technology of materials, emphasizing relationships between structure, composition, and properties. Introduction to processing of metallic, ceramic, and fibrous materials. Materials recognition and design possibilities are discussed.

MATS9722
Materials and Techniques in Design Craft 2B
Staff Contact: Prof CC Sorrell
CP7.5 S2 L1.5 T1.5
Casting, working, and surface finishing of metals and alloys. Soldering, brazing, and welding. Joining metals to glasses, ceramics, and gemstones.

MATS9732
Materials and Techniques in Design Craft 2C
Staff Contact: Prof CC Sorrell
CP7.5 S2 L1.5 T1.5
Structures and properties of clays, non-clays, cements, porcelains, glazes, glasses, and other ceramics. Optical properties and colours of glasses, glazes, and gemstones. Forming and firing of ceramic bodies and reactions during firing. Kilns and oxidation/reduction effects.

Mathematics

Mathematics graduate subjects are not offered every year. Contact the School of Mathematics Office to see which subjects are offered in any particular year.

MATH5105
Numerical Analysis of Differential Equations
Staff Contact: School of Mathematics Office
CP15

MATH5110
Advanced Numerical Analysis
Staff Contact: School of Mathematics Office
CP15
Development and analysis of numerical methods for the computational solution of mathematical problems.

MATH5115
Topics in Numerical Analysis
Staff Contact: School of Mathematics Office
CP15
A selection of topics from: finite element methods, boundary element methods, approximation theory, integral equations and iterative techniques for matrix problems.

MATH5130
Advanced Mathematical Methods
Staff Contact: School of Mathematics Office
CP15
Fundamental methods for solution of problems in applied mathematics, physics and engineering.

MATH5155
Discrete Optimization
Staff Contact: School of Mathematics Office
CP15
Analysis, solution and application of optimization problems where the variables change discretely. Topics selected from: integer programming, network flows, scheduling problems, complexity theory, matroid theory, polyhedral combinations, and other areas of operations research.

MATH5165
Continuous Optimization
Staff Contact: School of Mathematics Office
CP15
Analysis, solution and application of optimization problems where the variables change continuously. Topics selected from: nonlinear programming, convex optimization,
nonsmooth analysis and optimization, variational inequalities and complementarity problems, infinite dimensional optimization, stochastic optimization, and numerical optimization.

MATH5170
Advanced Optimization
Staff Contact: School of Mathematics Office
CP15
Development, analysis and application of methods for optimization problems.

MATH5175
Topics in Optimization and Optimal Control
Staff Contact: School of Mathematics Office
CP15
Special topics in the analysis, solution and application of optimization and optimal control problems.

MATH5185
Topics in Modern Applied Mathematics A
Staff Contact: School of Mathematics Office
CP15
A selection of topics from optimization, optimal control and numerical analysis not offered in other graduate subjects.

MATH5205
Nonlinear Analysis
Staff Contact: School of Mathematics Office
CP15
The mathematical theory of nonlinear differential equations, whose behaviours may range from coherence to chaos. Major topics include soliton theory covering integrable partial differential equations and their method of solution using the inverse scattering method, asymptotic methods for nonlinear differential equations covering global techniques and singularity analysis, and functional and complex analytic methods of proving qualitative results for equations of physical interest.

MATH5215
Topics in Dynamics
Staff Contact: School of Mathematics Office
CP15
A selection of topics from: bifurcation theory, Hamiltonian systems, perturbation methods, the theory of solitons and chaotic systems.

MATH5245
Topics in Fluid Mechanics
Staff Contact: School of Mathematics Office
CP15
A selection of topics from: boundary layer theory, turbulent flows, stability theory, waves, viscous flows and computational techniques.

MATH5250
Advanced Fluid Dynamics
Staff Contact: School of Mathematics Office
CP15
The mathematical modelling and theory of problems arising in the flow of fluids.

MATH5255
Waves
Staff Contact: School of Mathematics Office
CP15
Hyperbolic waves, the first-order wave equation, Burgers equation, hyperbolic systems, gas dynamics and the wave equation. Dispersive waves, linear dispersive waves, wave patterns, linear and nonlinear theories of water waves, modulated waves including the weakly nonlinear theory, stability and wave resonances.

MATH5265
Atmosphere-Ocean Dynamics
Staff Contact: School of Mathematics Office
CP15
The dynamics of large scale atmospheric and ocean circulation. Key concepts include geostrophy, potential vorticity, available potential energy and Ekman boundary layers and transport. Quasi-geostrophic models, eddies in the atmosphere and oceans and their role in the transport of heat and momentum and energy exchange. Windforced models for ocean gyres and the atmospheric circulation forced by meridional heating (including Hadley Cells). Additional topics may include tropical circulation and El Nino, air-sea exchange, climate change and the Greenhouse effect.

MATH5275
Topics in Modern Applied Mathematics B
Staff Contact: School of Mathematics Office
CP15
A selection of topics from dynamics, fluid mechanics and oceanography not offered in other graduate subjects.

MATH5285
Ocean Modelling
Staff Contact: School of Mathematics Office
CP15
Analytical and numerical modelling of ocean dynamics, and their interpretation. The course examines aspects of modelling of oceanic circulation using analytical and numerical modeling techniques. Theoretical analyses of the primitive equations will be used to identify individual physical processes such as surface Ekman layers, stratified flow over topography and wind-forced coastal currents under idealised conditions. A general numerical ocean model will be used to illustrate these results by comparison with the idealised analytical work, and by extension to more complex cases. Theoretical and practical aspects of model implementation will be considered including numerical stability, open boundary conditions, surface and convective mixed layer algorithms, as well as interpretation in the light of observations.
MATH5295
Atmospheric Modelling
Staff Contact: School of Mathematics Office
CP15
Atmospheric dynamics and their simulation using numerical models. This course combines atmospheric dynamics and numerical modelling. It covers the following topics: derivation and interpretation of the equations governing the motion of the earth's atmosphere from the surface to just above the stratopause, the important types of wave motions supported by the governing equations, the use of scaling analysis to develop several distinct kinds of atmospheric models and the application of a range of numerical techniques to solving the equations governing these models. The last section will form the major part of the course, and will examine the various numerical algorithms in terms of accuracy, stability, consistency and efficiency. The choice of lateral boundary conditions also will be discussed in detail. During the course, computer laboratory sessions will be held and course participants will put together a working numerical model of their choice, from one of those introduced in the course. This model will be 'realistic' in the sense that it will produce 24 hour predictions of the state of the atmosphere using real (observed) data as initial and boundary conditions.

MATH5305
Computational Techniques
Staff Contact: School of Mathematics Office
CP15
Topics covered are chosen from the following: stability of timestepping schemes, iterative methods for elliptic equations, including multigrid techniques, special treatment of nonlinear terms and outflow/radiation conditions. The emphasis is on finite differences, and the course involves a computer project.

MATH5315
Topics in Mathematical Computing
Staff Contact: School of Mathematics Office
CP15
The design and implementation of accurate and efficient numerical methods, typically as programs in Fortran or C. Topics could include the use of advanced computer architectures such as vector and parallel processors.

Pure Mathematics

MATH5405
Automata and Formal Languages
Staff Contact: School of Mathematics Office
CP15
Topics from: finite automata and regular languages, pushdown automata and contextfree languages, Turing machines and phase structure languages, computational complexity, LL(k) and LR(k) grammars.

MATH5415
Information and Coding
Staff Contact: School of Mathematics Office
CP15
Topics from: error detecting and correcting codes, information and entropy, coding ergodic Markov processes, Shannon's Source Coding and Channel Coding theorems, perfect codes, Hamming codes, algebraic (B.C.H. and quadratic residue) codes, associated combinatorial structures, ciphers.

MATH5425
Fuzzy Logic and Neural Nets
Staff Contact: School of Mathematics Office
CP15
Topics from: how fuzzy logic handles imprecise and vague concepts, fuzzy control theory, artificial neural nets and their learning algorithms, approximation by neural nets, supervised and unsupervised networks.

MATH5435
Applied Algebraic Computation
Staff Contact: School of Mathematics Office
CP15
Introduction to Maple. Programming in Maple, with applications to include construction and analysis of computational algorithms. Manipulation of perturbation and Taylor series approximations to partial differential equations, manipulation of Taylor series approximations in the error analysis of discretised ordinary and partial differential equations.

MATH5505
Topics in Algebra
Staff Contact: School of Mathematics Office
CP15

MATH5515
Topics in Analysis
Staff Contact: School of Mathematics Office
CP15

MATH5525
Topics in Geometry
Staff Contact: School of Mathematics Office
CP15

MATH5535
Topics in Number Theory
Staff Contact: School of Mathematics Office
CP15

MATH5605
Operator Theory
Staff Contact: School of Mathematics Office
CP15
Topics from: invariant subspaces, integral equations and Fredholm theory, functional calculus, decomposition theorems, Hankel and Toeplitz operators, operators on Hp spaces, Ergodic theory, semigroups.
MATH5615
Banach and Operator Algebras
Staff Contact: School of Mathematics Office
CP15
Topics from: commutative Banach algebras and Gelfand theory, spectral theory of operators on Hilbert space, introduction to C* and von Neumann algebras, relationship to group representations and ergodic theory.

MATH5625
Distributions and Partial Differential Equations
Staff Contact: School of Mathematics Office
CP15

MATH5635
Dynamical Systems
Staff Contact: School of Mathematics Office
CP15
Topics from: automorphisms of measure spaces, recurrence, ergodicity, entropy, conjugacy and orbit equivalence, topological dynamics with applications to number theory, fractals and chaos.

MATH5645
Number Theory
Staff Contact: School of Mathematics Office
CP15
Topics from: elementary number theory, prime numbers, number theoretic functions, Dirichlet series, prime number theorem, continued fractions, diophantine approximation, quadratic reciprocity, algebraic number theory, class number theorem.

MATH5655
Homological Algebra
Staff Contact: School of Mathematics Office
CP15
Topics from: concept of a category, additive and abelian categories, representable functors, exact sequences, homology, derived functors, Ext and Tor, relations with algebraic topology, derived categories, homological dimension.

MATH5665
Algebraic Topology
Staff Contact: School of Mathematics Office
CP15
Topics from: functors and natural transformations, homotopy of maps, homotopy groups, covering spaces, simplicial and singular homology and cohomology, homological algebra.

MATH5675
Set Theory and Topology
Staff Contact: School of Mathematics Office
CP15
Topics from: set theory, axiom of choice, ordinals and cardinals, topological spaces, compactness, quotient topologies.

MATH5685
Complex Analysis
Staff Contact: School of Mathematics Office
CP15
Topics from: Brownian motion, Itô calculus, Malliavin calculus, Girsanov’s theorem, Clark’s theorem, the Harrison-Pliska model of option pricing.

MATH5695
Stochastic Differential Equations
Staff Contact: School of Mathematics Office
CP15
Topics from: Brownian motion, Itô calculus, Malliavin calculus, Girsanov’s theorem, Clark’s theorem, the Harrison-Pliska model of option pricing.

MATH5705
Commutative Harmonic Analysis
Staff Contact: School of Mathematics Office
CP15
Topics from: Fourier series and integrals for Tn and Rn, locally compact abelian groups, Pontrjagin duality, Plancherel Theory.

MATH5715
Non-Commutative Harmonic Analysis
Staff Contact: School of Mathematics Office
CP15
Topics from: locally compact groups, Haar measure, homogeneous spaces, convolution algebras, representations, irreducibility, induced representations, Mackey theory, compact groups, Peter Weyl theory, nilpotent groups, Kirillov theory.

MATH5725
Lie Groups and Algebras
Staff Contact: School of Mathematics Office
CP15
Topics from: revision of manifolds and linear algebra, topological groups, Haar measure, Lie groups, Lie algebras, substructures, classification of semi-simple complex Lie algebras, highest weight representations.

MATH5735
Advanced Algebra
Staff Contact: School of Mathematics Office
CP15
Topics from: rings, commutative rings, factorization theory, modules, associative and Lie algebras, Wedderburn theory, category theory.
MATH5745
Group Theory
Staff Contact: School of Mathematics Office
CP15
Topics from: abelian, nilpotent and solvable groups, further representation theory, Euclidean reflection groups, Chevalley groups, group homology and cohomology, group extensions.

MATH5755
Mathematical Foundations of Quantum Mechanics
Staff Contact: School of Mathematics Office
CP15
Topics from: origin and interpretation of Schrödinger’s equation, unbounded operators on Hilbert space, spectral theory, functional calculus and time evolution, the role of symmetry groups, irreducible and induced representations.

MATH5765
Algebraic Geometry
Staff Contact: School of Mathematics Office
CP15
Topics from: algebraic curves, cohomology, Riemann-Roch theorem, elliptic curves, Jacobians, classical projective geometry, quadrics, cubic surfaces, Grassmanians, Schubert calculus, commutative algebra, modules, homological concepts, dimension.

MATH5775
Calculus on Manifolds
Staff Contact: School of Mathematics Office
CP15
Topics from: manifolds, vector fields, flows, introduction to Morse theory, differential forms, Stokes theorem, de Rham cohomology.

MATH5785
Geometry
Staff Contact: School of Mathematics Office
CP15
Topics from: axiomatic geometry, affine geometry, Desargues theorem, projective geometry, spherical and hyperbolic geometry.

Statistics

MATH5806
Applied Regression Analysis
Staff Contact: School of Mathematics Office
CP15

MATH5815
Experimental Design 1
Staff Contact: School of Mathematics Office
CP15
Modified designs for fixed effects models. Incomplete and balanced incomplete block designs. Confounding and fractional replication. Randomization theory.

MATH5816
Mathematics of Security Markets 2
Staff Contact: School of Mathematics Office
Prerequisite: MATH5965
CP15
More advanced applications of stochastic calculus to security markets.

MATH5825
Experimental Design 2
Staff Contact: School of Mathematics Office
Prerequisite: MATH5815
CP15
Extensive treatment of random and mixed models. Combinatorial structure of designs, crossover and lattice designs, response surfaces.

MATH5826
Statistical Methods in Epidemiology
Staff Contact: School of Mathematics Office
CP15
Measures and models of disease association, relative risks and odd ratios, attributable risk, interactions, Mantel-Haenszel formulae, confounding, logistic regression, survival analysis.

MATH5835
Stochastic Processes
Staff Contact: School of Mathematics Office
Prerequisite: MATH5815
CP15

MATH5845
Time Series
Staff Contact: School of Mathematics Office
CP15

MATH5855
Multivariate Analysis 1
Staff Contact: School of Mathematics Office
CP15
Likelihood ratio tests for means, variances and structure. Discriminant, principal component, canonical and factor analysis. Computing will feature prominently.
MATH5865  
**Multivariate Analysis 2**  
*Staff Contact: School of Mathematics Office*  
CP15  
The general linear hypothesis and analysis of dispersion. Tests based on roots, distribution theory.

MATH5875  
**Sample Survey Design**  
*Staff Contact: School of Mathematics Office*  
CP15  
Simple, stratified and systematic random sampling. Estimation of proportions, ratios, and sample sizes. Multistage sampling.

MATH5885  
**Sequential Analysis**  
*Staff Contact: School of Mathematics Office*  
CP15  
The sequential probability ratio test OC and ASN functions. General theory of sequential tests. Sequential estimation.

MATH5895  
**Nonparametric Methods**  
*Staff Contact: School of Mathematics Office*  
CP15  

MATH5905  
**Statistical Inference**  
*Staff Contact: School of Mathematics Office*  
CP15  
Decision theory. General theory of estimation and hypothesis testing.

MATH5915  
**Medical Statistics**  
*Staff Contact: School of Mathematics Office*  
CP15  
Bioassay, generalised linear models, analysis of multivariate discrete data including loglinear model analysis of contingency tables, survival analysis, competing risks, hazard models for point processes.

MATH5925  
**Project**  
*Staff Contact: School of Mathematics Office*  
CP30  
A thorough study of a set of statistical papers or some workplace problem of the student's choice.

MATH5935  
**Statistical Consultancy**  
*Staff Contact: School of Mathematics Office*  
CP15  
This is a practical subject which introduces students to the general framework of statistical consulting and gives students experience in solving statistical problems arising in practice.

MATH5945  
**Categorical Data Analysis**  
*Staff Contact: School of Mathematics Office*  
CP15  

MATH5955  
**Statistical Quality Control**  
*Staff Contact: School of Mathematics Office*  
CP15  

MATH5965  
**Mathematics of Security Markets 1**  
*Staff Contact: School of Mathematics Office*  
CP15  

MATH5975  
**Economic Quality Control Models**  
*Staff Contact: School of Mathematics Office*  
CP15  
Prerequisite: MATH5955  
Economic design of acceptance sampling plans. Economic design of process control charts. Quality evaluation. Tolerance design and tolerancing. Taguchi's online quality control. Online process parameter design, process improvement methods and preventive maintenance.

MATH5985  
**Industrial Designs**  
*Staff Contact: School of Mathematics Office*  
CP15  
Prerequisite: MATH5815  

MATH5045  
**Advanced Mathematics for Electrical Engineers**  
*Staff Contact: School of Mathematics Office*  
CP15  
Boundary value problems in partial differential equations. Selected topics from complex variable analysis, integral transforms, and orthogonal functions and polynomials.
Medicine

CMED9610
Food and Nutrition Policy Studies

Staff Contact: Ms L Bloomfield
CP10 S2 External

The relationship between population, health and the food and nutrition system, i.e. the production, distribution and consumption of food. Discussion of development of intersectorial policies and strategies addressing specific segments of the food and nutrition system to improve the health of vulnerable populations in developed and developing countries. Students will work through a case study and demonstrate their understanding by preparing, presenting and defending a proposed food policy for a specified population or community group.

Microbiology and Immunology

MICR6043
Alternative Higher Degree Qualifying Program

Staff Contact: Prof A Lee
CP120

Similar in standard to MICR4013 Microbiology Honours, but designed for students who cannot regularly attend the University.

Oceanography

Administered by the School of Mathematics. Please contact Dr John Middleton.

OCEA5115
Experimental Project in Physical Oceanography
CP60

A report of an experimental project, including recording, preparation, analysis and interpretation of field or laboratory data.

OCEA5125
Geophysical Fluid Dynamics
CP15

Aspects of the physical features of the oceans. Includes ocean waves rotational and gravitational, tides, large scale wind driven ocean circulation, coastal dynamics, thermohaline circulations and mixing processes.

OCEA5145
Applied Time Series Analysis
CP15

Classification of random processes, sampling for discrete analysis, Fourier analysis, spectra, filtering. Crossspectra, estimation and hypothesis testing, confidence limits, application to experiment planning. Emphasis on computer analysis of actual data.

OCEA5155
Theoretical Project in Physical Oceanography
CP30

A theoretical project aimed at developing the prediction of oceanographical phenomena, tailored to meet individual student background but taken only by those students with a strong theoretical background.

Optometry

Initial contact for these subjects should be directly with the School of Optometry. All units are full year course.

OPTM8001
Advanced Clinical Optometry
CP30

Clinical work on selected patients with special emphasis on advanced techniques and new developments. Optometric examination procedures including: gonioscopy, slit lamp fundoscopy, binocular indirect ophthalmoscopy and scleral depression; ultrasonography; corneal topography; ocular photography; computerised visual field analysis; visual functions; low vision; optometric co-management; evaluation of binocular functions; geriatric and paediatric optometry; the clinical application of electrophysiological techniques. Assessments of new instruments, methods and treatments.

This subject is offered as either a domestic option at the University of New South Wales, or as an overseas option at the Pennsylvania College of Optometry in Philadelphia, USA. The overseas option involves a 4 week period at PCO; travel and accommodation costs are to be met by the candidate.

OPTM8002
Physiological Optics
CP30

Note/s: Subject not offered in 1999.

OPTM8003
Behavioural Optometry
CP30
An integrated subject, in which binocular vision and
pleorthoptics are studies from theoretical and clinical
viewpoints. Clinical experience is provided by selected
patients. Includes: the nature and control of eye movements
and role in maintaining the perception of a stable visual
world. Binocular and monocular subjective visual directions.
The neurophysiological substrate of binocular vision and
its phenomena. Stereopsis and its measurement.
Accommodation, convergence, and oculo-motor
imbalance. Laboratory and clinical methods of measuring
eye position and visual directions. The aetiologies,
measurements and treatment of strabismus, anomalous
correspondence, eccentric fixation amblyopia.

OPTM8004
Advanced Contact Lens Studies
CP30
Recent advances in anterior ocular physiology; ocular
biochemistry; influences on corneal hydration; recent
research on the tear film. Practice-based contact lens
research; introducing and accessing the contact lens
literature; basic experimental design and statistics; clinical
photography; presenting research. Contact lenses and
vision correction; presbyopia; orthokeratology and myopia
control; post-surgery contact lens fitting. Specially contact
lens applications; keratoconus; haptic lenses; cosmetic
contact lenses and prosthetics; contact lenses for children.
Advanced contact lens instrumentation; corneal
topographical analysis; pachometry; specialised research
instrumentation; measuring oxygen transmission and
uptake. Contact lens-related inflammation and infection;
ocular microbiology, antimicrobial agents and
chemotherapy; ocular immune mechanisms, hypersensitivity and inflammation. Revitalising rigid lenses;
understanding and optimising RGP lens design; fitting the
toric cornea; fitting the Asian eye with RGP's; RGP
parameter measurement and modification; RGP material
properties; long-term effects of RGP lens wear. Future
challenges for contact lens practice; contact lenses in Asia;
contact lens education worldwide; refractive surgery and
its impact on contact lens practice; regulations in the
contact lens industry.

OPTM8005
Advanced Contact Lens Practice
CP30
Note/s: Subject not offered in 1999.
New instrumentation for ocular evaluation and
measurement. Anterior segment photography. Clinical
comparison of contact lens and care system products.
Bifocal, toric, and extended wear lens evaluation. Design,
manufacture, verification, and modification of lenses, from
the manufacturer's perspective. Lens fitting for sports
vision, speciality cases, keratoconus, and cosmetic
applications. AIDS management in contact lens practice.
Patient instruction and management. Contact lens practice
in the health care industry. Practice management, staffing,
economics, inventory control, marketing. Application of
quality and customer service concepts to contact lens
practice.

OPTM8006
Occupational Optometry
CP30
Note/s: Subject not offered in 1999.
Visual and general ergonomics. Illuminating Engineering.
Human factors engineering. Anthropometry. Task analysis.
Physical and chemical hazards. Radiation effects and
hazard analysis. Risk engineering. Workplace design and
modification. Ocular and visual factors on specific tasks.
Visual fitness. Vision screening. Legal aspects. Issues in
common visually based activities. The subject matter will
comprise consideration of subject matter at a higher level
than in the undergraduate course in a seminar format and
include up to half the time at work sites.

OPTM8007
Clinical Photography
CP30
Note/s: Subject not offered in 1999.
Introduction to clinical photography, cameras and lens
systems, colour films, black-and-white films and filters,
apparatus and accessories. Patient preparation and
lighting. Copying, slide making, macrophotography.
Computer hardware and software available for slide
production for lecture presentation. Dark room techniques,
advantages and disadvantages of RGP lenses; fitting
the Asian eye with RGP's; RGP parameter measurement and
modification; RGP material properties; long-term effects of RGP lens wear. Future
challenges for contact lens practice; contact lenses in Asia;
contact lens education worldwide; refractive surgery and
its impact on contact lens practice; regulations in the
contact lens industry.

OPTM8008
Project
CP30
An investigation into some aspect of Optometry or Visual
Science.

OPTM8009
Ocular Therapy
CP30
Objectives: Familiarity with clinical pharmacology,
biochemistry, pharmacology. Theory and practice of the
use of ocular therapeutics in the treatment of eye disease.
Brief curriculum: Biochemistry and pharmacology of
therapeutic and diagnostic drugs. Contemporary review
of cardiovascular disease and common therapy. Clinical
Pharmacology. Pharmacoeconomics. Contemporary
review of anterior eye microbiology. Nature and treatment
of disease of the anterior and posterior eye. Treatment of
uveitis and glaucoma. Co-management, pre and post

Assessment: Clinical examination 20%, written examination 80%.

OPTM8010
Public Health Optometry
CP30
Notes: Subject not offered in 1999.

OPTM8011
Advanced Studies in Ocular Disease
CP30
Notes: Subject offered by distance education only.

Application of basic sciences and pathology to the understanding of pathophysiological mechanisms in a range of ocular diseases. Basic sciences include cell biology, biochemistry, microbiology and immunology. Basic pathology includes inflammation, infection, immune disease, neurological disease, vascular disease and differentiation anomalies. Specific disease processes studied include diabetes and diabetic eye disease; presbyopia and cataract; anterior segment disease; glaucoma; dry eye disease; refractive surgery; diseases of the optic nerve; diseases of the vitreous & retina; macula diseases.

OPTM8012
Visual Neuroscience
CP30
Notes: Subject not offered in 1999.

OPTM8014
Human Visual Development
CP30
Notes: Subject not offered in 1999.

OPTM8020
Rehabilitation of the Partially Sighted
CP15

This subject will survey issues involved in the visual rehabilitation of the partially sighted person. Topics covered include epidemiology of visual impairment, pathophysiology of the major ocular disease processes, models of adaptation to loss, assessment of visual impairment, provision of optical and non-optical visual aids, new developments in adaptive technology, professional interactions and referrals and support structures.

Physics

Not all graduate subjects are necessarily offered in any one year. Initial contact should be made with A/Prof RJ Stening.

PHYS7611
Computational Physics
Staff Contact: School Office
SS HPW3
Contents to be advised.

PHYS9583
Advanced Theoretical Physics
Staff Contact: A/Prof RJ Stening
CP7.5 S3 HPW1
Prerequisite: none

A field theory approach to condensed matter physics. Field theory and critical phenomena, exactly soluble models, low-dimensional quantum spin models. Content may vary from year to year.

PHYS9683
Advanced Astrophysics
Staff Contact: A/Prof RJ Stening
CP7.5 S3 HPW1
Prerequisite: none

Radio astronomy and interferometry; the structure of the galaxy; optical and infrared astronomy – instrumentation and data reduction; the extragalactic distance scale. Content may vary from year to year.

PHYS7159
Acoustic Theory
Sources of acoustic radiation; simple, dipole, quadrupole, plane, impulsive source, random source, aerodynamic

---

**Psychology**

**PSYC6000**

**Alternative Higher Degree Qualifying Program**

*Staff Contact: Dr J Cranney*

*CP120F*

Refer to the School of Psychology for details.

**PSYC7000**

**Research and Evaluation Methods**

*Staff Contact: Dr K Bird*

*CP15 S2 HPW2*

An examination of threats to the validity of casual inferences from randomised experiments, quasi-experiments and passive observational studies, with particular reference to field studies and program evaluations. Statistical power analysis, the analysis of data from nonequivalent control group designs, interrupted time series analysis, and structural modelling.

**PSYC7001**

**Psychological Assessment 1**

*Staff Contact: Dr S McDonald*

*CP15 S1 HPW3*

A theoretical basis, background information and practical skills in methods of assessment typically used in clinical forensic, and organisational psychology. Theory and research on interviewing, introduction to DSM IVR, assessment interviewing, assessment of intellectual functioning, test access and use and computerised testing, neuropsychological and organicity assessment, personality assessment and its use, assessment and goal attainment scaling, and ethical, legal and professional issues.

**PSYC7002**

**Psychological Assessment 2**

*Staff Contact: Dr K Bird*

*CP15 S2 HPW2*

*Prerequisite: PSYC7001*

**PSYC7003**

**Graduate Colloquium**

*Staff Contact: School Office*

*CP15 F HPW2*

Participation in the Postgraduate Student Seminar and attendance at the School Colloquium.

**PSYC7004**

**Professional and Ethical Issues**

*Staff Contact: Prof K McConkey*

*CP15 S1 HPW2*

An examination of the organisation and regulation of psychology as a profession, with particular emphasis on the ethical and legal requirements expected of a professional psychologist. Special attention given to the code of professional conduct and ethical dilemmas and issues that arise in the context of working with individuals, cultural groups, organisations, other professionals and the public at large. Topics dealing with contemporary issues explored in depth (e.g. marketing psychology, political influencing skills in large organisations, psychologists contribution to such areas as the environment, policing and law etc.).

**PSYC7100**

**Psychology of Human Resources 1**

*Staff Contact: Dr S Schneider and Dr A Williamson*

*CP15 S1 HPW2*

General framework for understanding organisational settings and how social structures and procedures affect work motivation, job satisfaction, performance and health. Emphasis placed on the particular contribution which psychologists can make to such areas as job analysis and design, selection, and performance appraisal, interpersonal and intergroup relations, the socio-technical analysis of production systems, social influence, leadership style, job enrichment, and communication patterns.

**PSYC7101**

**Psychology of Human Resources 2**

*Staff Contact: Dr S Schneider and Dr A Williamson*

*CP15 S2 HPW2*

*Prerequisite: PSYC7100*

An advanced examination of some topics covered in PSYC7100 Psychology of Human Resources 1 with a particular emphasis on the application of sound measurement and research principles to selection, job evaluation and work motivation. Special attention given to the application of social psychological principles to the work setting.

**PSYC7102**

**Psychological Principles of Training**

*Staff Contact: Dr J Bright*

*CP15 S2 HPW2*

Relevant principles from learning theory and cognitive psychology applied to training in industry and retraining for new technology. Training for adaptability and transfer; the important role of automaticity and attitudes in training. Development of work related cognitive, motor and social
skills, and the use of computerised packages. Research on the effectiveness of different methods of training.

**PSYC7108**  
Research Thesis (Organisational)  
*Staff Contact: Dr A Adams*  
*CP90 F*  
Research thesis involving an investigation into some aspect of organisational psychology.

**PSYC7115**  
Vocational Interviewing and Counselling  
*Staff Contact: Dr G Huon*  
*CP15 S2 HPW2*  
The theory and practice of vocational interviewing and counselling, and approaches to career decision making and work adjustment throughout life. The role of occupational information and psychological tests, and the impact of work, leisure, retirement and unemployment on these areas will be considered. The specific problems of minority groups in these areas will be highlighted.

**PSYC7116**  
Occupational Health and Stress  
*Staff Contact: Dr J Bright*  
*CP15 S2 HPW2*  
*Note(s): Excluded PSYC7220*  
The impact of work on the individual. Models of stress, stress transmission and health. Health and safety legislation and interventions to promote health and safety through the design of work and of the work place.

**PSYC7117**  
Advanced Topics in Organisational Psychology  
*Staff Contact: Dr A Williamson*  
*CP15 S1 HPW2*  
Advanced treatment of established and emerging areas in organisational psychology.

**PSYC7118**  
Professional Practice (Organisational) 1  
*Staff Contact: Dr J Bright*  
*CP15 S1*  
Attendance at weekly professional practice meetings and career development workshops (2 hours) and the completion of placements to a total of 250 hours.

**PSYC7119**  
Professional Practice (Organisational) 2  
*Staff Contact: Dr J Bright*  
*CP15 S2*  
*Prerequisite: PSYC7118*  
Attendance at weekly professional practice meetings and career development workshops (2 hours) and the completion of placements to a total of 250 hours.

**PSYC7120**  
Professional Practice (Organisational) 3  
*Staff Contact: Dr J Bright*  
*CP15 S1*  
*Prerequisite: PSYC7119*  
Attendance at weekly professional practice meetings and career development workshops (2 hours) and the completion of placements to a total of 250 hours.

**PSYC7121**  
Professional Practice (Organisational) 4  
*Staff Contact: Dr J Bright*  
*CP15 S2*  
*Prerequisite: PSYC7120*  
Attendance at weekly professional practice meetings and career development workshops (2 hours) and the completion of placements to a total of 250 hours.

**PSYC7204**  
Child Clinical Psychology  
*Staff Contact: Dr K Salmon*  
*CP15 S1 HPW2*  
Description, assessment and treatment of child and adolescent psychopathology. Role of constitutional and environmental factors in behavioural and emotional dysfunction. Theoretical bases of behavioural, cognitive, and family treatment approaches. Integrated cognitive behavioural management programs.

**PSYC7206**  
Research Thesis (Clinical)  
*Staff Contact: Dr R Bryant*  
*CP90 F*  
A research thesis involving an investigation into some aspect of clinical or community psychology.

**PSYC7209**  
Developmental Disabilities  
*Staff Contact: A/Prof J Taplin*  
*CP15 S2 HPW2*  
An essentially practical subject focusing on childhood disorders, such as mental retardation, infantile autism, physical and sensory handicaps, specific learning difficulties, and hyperactivity. Methods of assessment include standardised tests of child development, behavioural checklists and interviews, and observation of present behaviour. Behavioural change procedures that may be effective in the treatment and management of the behavioural problems in question.

**PSYC7210**  
Human Neuropsychology  
*Staff Contact: Dr S McDonald*  
*CP15 S2 HPW3*  
Neural bases of human behaviour, with particular emphasis on clinical applications. Issues in assessment and rehabilitation, functional analysis of each cerebral lobe, and particular disorders such as the dementias and aphasias.
PSYC7212
Experimental Clinical Psychology 1
Staff Contact: Dr J Henry
CP15 S1 HPW4
Corequisite: PSYC7213
An introduction to clinical practice and covers the major anxiety and mood disorders. Topics covered include: interviewing, diagnosis, mental state examination, case formulation, and introduction to treatments.

PSYC7213
Experimental Clinical Psychology 2
Staff Contact: A/Prof P Lovibond
CP15 S1 HPW2
Corequisite: PSYC7212
Models and research strategies for understanding psychopathology and clinical interventions. Specific disorders are analysed in detail to illustrate more general themes: the relationship between genetic and environmental factors in aetiology, the integration of laboratory and clinical evidence, and the status of biological, behavioural and cognitive models of dysfunction and treatment.

PSYC7214
Experimental Clinical Psychology 3
Staff Contact: Dr R Bryant
CP15 S2 HPW4
Prerequisites: PSYC7212 and PSYC7213
A continuation of the problem-oriented approach begun in PSYC7212 and deals with a number of common psychological problems and approaches to their treatment. Topics covered include: social skills, psychopharmacology, eating disorders, and personality disorders.

PSYC7215
Experimental Clinical Psychology 4
Staff Contact: Dr R Bryant and Dr J Henry
CP15 S1 HPW2
Prerequisite: PSYC7214
The assessment and management of a range of disorders including schizophrenia, post-traumatic stress disorders, and dissociative disorders.

PSYC7216
Professional Practice (Clinical) 1
Staff Contact: Dr R Bryant and Dr J Henry
CP15 S1
Attendance at weekly clinical meetings (1 hour) and skills training workshops (2 hours).

PSYC7217
Professional Practice (Clinical) 2
Staff Contact: Dr R Bryant
CP15 S2
Prerequisite: PSYC7216
Attendance at weekly clinical meetings (1 hour) and skills training workshops (2 hours), and supervised work with clients in the Psychology Clinic (70 hours for session).

PSYC7218
Professional Practice (Clinical) 3
Staff Contact: Dr R Bryant and Dr J Henry
CP15 S1
Prerequisite: PSYC7217
Note/s: Across PSYC7218 and PSYC7219 students must complete three field placements, one must be at least 27 days while the other two are completed in at least 36 days (800 hours total).
Attendance at weekly clinical meetings (1 hour), supervised work with clients in the Psychology Clinic (70 hours for session) and field placements.

PSYC7219
Professional Practice (Clinical) 4
Staff Contact: Dr R Bryant
CP15 S2
Prerequisite: PSYC7218
Note/s: See note under PSYC7218.
Attendance at weekly clinical meetings (1 hour), supervised work in the Psychology Clinic (70 hours for session) and field placements.

PSYC7220
Psychology of Health and Illness
Staff Contact: Dr R Bryant
CP15 S1 HPW2
Prerequisite: PSYC7214
Note/s: Excluded PSYC7116.
Applications of psychological principles, derived from human and animal research, to human health, including health promotion, risk factor reduction, and the psychological assessment and management of medical illnesses, with a special focus on chronic illnesses.

PSYC7400
An Overview of Forensic Psychology
Staff Contact: A/Prof J Taplin
CP15 S1 HPW2
Forensic psychology is the application of psychological knowledge, concepts and skills to the understanding and functioning of the legal and criminal justice system. Forensic psychology embraces psychology and the law, the psychology of police and policing, corrections, probation and parole, victim services, addiction services, family services and the full range of activities related to law enforcement, and the evaluation and treatment of offenders.

PSYC7401
Intervention in Forensic Psychology
Staff Contact: Dr K Salmon
CP15 S2 HPW2
Prerequisite: PSYC7400
Examination of intervention practices used by psychologists in forensic setting. Includes consideration of theory and practice of interviewing and counselling of forensic clients (e.g., the victims of crime, criminal
offenders, witnesses, etc.) and the preparation and drafting of forensic reports.

PSYC7402
Applications of Forensic Psychology
Staff Contact: Dr A Williamson
CP15 S1 HPW2
Prerequisite: PSYC7401

This class focusses on the relationship between work and the legal system. It includes issues relating to work and work organisation, such as equal employment opportunity, unfair dismissal, stress in the workplace, and issues relating to workers compensation such as the assessment of the effects of harmful workplace exposures on performance, the effects of work injury on work performance and the effects of the compensation system itself. It also includes issues relating to testimony for cases in coronial, compensation and other criminal courts.

PSYC7403
Experimental Psychology and Law
Staff Contact: Dr K Williams
CP15 S2 HPW2
Prerequisite: PSYC7402

Examination of contributions to the application of forensic psychology in different settings that come from theory and research in social and experimental psychology and allied fields. Topics may include eyewitness identification, jury selection, lie detection, use of hypnosis, trial advocacy tactics, individual and jury decision making, laypersons’ perceptions of insanity, judges instructions, the effects of the media, to name a few.

PSYC7404
Research Thesis (Forensic)
Staff Contact: Prof K McConkey
CP90 F

Research thesis involving an investigation into some aspect of forensic psychology.

PSYC7405
Professional Practice (Forensic) 1
Staff Contact: Dr R Bryant
CP15 S1
Note/s: Across PSYC7405, PSYC7406, PSYC7407, and PSYC7408 students must complete three field placements in different forensic settings.

This subject provides an introduction to skills training in a variety of tasks undertaken by forensic psychologists. Attendance at weekly professional meetings (1 hour) and workshops will provide practical training in a range of professional skills, including interviewing children, assessment, and expert testimony. Professional skills will be taught in one-day workshops (7 hours) and will be supervised by academic staff. Assessment will be conducted by audio and videotaped practice, case presentations, and vivas.

PSYC7406
Professional Practice (Forensic) 2
Staff Contact: Dr K Williams
CP15 S2
Prerequisite: PSYC7405
Note/s: Across PSYC7406, PSYC7407 and PSYC7408 students must complete three field placements in different forensic settings.

This subject provides advanced skills training in a variety of tasks undertaken by forensic psychologists. Attendance at weekly professional meetings (1 hour) and workshops will provide practical training in a range of professional skills, including interviewing children, assessment, and expert testimony. Professional skills will be taught in one-day workshops (7 hours) and will be supervised by academic staff. There will be a total of 250 hours of supervised external placements and career development workshops. Supervised placements will comprise a placement of at least 35 days in a forensic setting, and may be located within police, court, prison, or other related forensic settings. Assessment will be conducted by audio and videotaped practice, case presentations, and vivas.

PSYC7407
Professional Practice (Forensic) 3
Staff Contact: Dr K Salmon
CP15 S1
Prerequisite: PSYC7406
Note/s: Across PSYC7406, PSYC7407 and PSYC7408 students must complete three field placements in different forensic settings.

This subject provides supervision of professional skills via both weekly professional meetings (1 hour) and external placements in professional settings. There will be a total of 250 hours of supervised external placements and career development workshops. Supervised placements will comprise a placement of at least 35 days in a forensic setting, and may be located within police, court, prison, or other related forensic settings. Assessment will be conducted by audio and videotaped practice, case presentations, and vivas.

PSYC7408
Professional Practice (Forensic) 4
Staff Contact: Dr K Salmon
CP15 S2
Prerequisite: PSYC7407
Note/s: Across PSYC7406, PSYC7407 and PSYC7408 students must complete three field placements in different forensic settings.

This subject provides supervision of professional skills via both weekly professional meetings (1 hour) and external placements in professional settings. There will be a total of 250 hours of supervised external placements and career development workshops. Supervised placements will comprise a placement of at least 35 days in a forensic setting, and may be located within police, court, prison, or other related forensic settings. Assessment will be conducted by audio and videotaped practice, case presentations, and vivas.
LAWS9800
Law for Psychologists 1
Staff Contact: Ms P Vines
CP15 S1 HPW2
This subject will provide an introduction to certain aspects of law relevant to forensic psychologists. Topics to be covered will include an overview of the Australian legal system, a range of issues arising in the fields of criminal law and procedure, and the laws of evidence.

LAWS9810
Law for Psychologists 2
Staff Contact: A/Prof S Egger
CP15 S2 HPW2
Prerequisite: LAWS9800
This subject will consider legal issues for forensic psychologists. Topics to be covered will include relevant areas of family law, children and the law, and tort law.

Safety Science

SESC6010
Descriptive Statistics
Staff Contact: Ms Dianne Gardner
CP7.5
Introduction to the theory of statistics and to statistical techniques for describing data. Topics include measures of central tendency and dispersion, probability and probability distribution, correlation and regression.

SESC6020
Inferential Statistics
Staff Contact: Ms Dianne Gardner
CP7.5
Assumed Knowledge: ESC6010
Introduction to the use and interpretation of statistical techniques for analysing data. Topics include sampling, inference from single samples and from two-amale cases, parametric and non-parametric tests and analysis of variance.

SESC6110
Physical Principles of Safety 1
Staff Contact: Prof Jean Cross
CP7.5
This subject introduces the principles of statics and dynamics as it applies to safety and ergonomic issues. Topics include materials handling, equilibrium and balance, biomechanics, friction and linear rotational motion.

SESC6120
Physical Principles of Safety 2
Staff Contact: Prof Jean Cross
CP7.5
Assumed Knowledge: ESC6010
This subject builds on ESC6110 and aims to give students the confidence and vocabulary to understand an engineers report in safety issues and to understand technical standards and codes of practice. Topics include Energy and machines, collisions and impacts, behaviour of solids and fluids ventilation.

SESC6800
Fundamentals of Toxicology
Staff Contact: Assoc Prof Chris Winder
CP7.5
Introduction to chemical, biochemical, toxicological, and cellular principles. Introduction to environmental and occupational toxicology.

SESC9010
Research Methods
Staff Contact: Ms Dianne Gardner
CP7.5
Assumed Knowledge: ESC6010, ESC6020
This subject covers issues in research methodology including research problem formulation, null and alternative hypotheses, qualitative and quantitative research designs, statistical inference and the analysis of quantitative data. Students will be expected to be able to recognise and avoid common methodological problems in research. The course will not provide a detailed coverage of statistical theory but a basic understanding of statistics is required.

SESC9020
Occupational Health and Safety Law 1
Staff Contact: Prof Adrian Brooks
CP7.5
Assumed Knowledge: None
This subject covers concepts of law; the judicial and court systems; common law and equity; administrative law, the common of employment, occupational health and safety and workplace relations legislation.

SESC9030
Occupational Health and Safety Law 2
Staff Contact: Prof Adrian Brooks
CP7.5
This subject extends concepts of law introduced in ESC6010, and covers other workplace legislation and procedures, such as arbitration of industrial disputes, workers compensation and rehabilitation legislation, cases and actin under common law and relevant workplace legislation.

SESC9091
Safety, Health and Environmental Practice
Staff Contact: Dr Boban Markovic
CP15
Assumed Knowledge: ESC9511 or equivalent
A workplace assessment based subject, where students are required to report on the safety, health or environmental issues following visits to a number of diverse industrial sites.
SESC9100
Physical Hazards
Staff Contact: Dr Tony Green
CP7.5
Assumed Knowledge: SESC6110, SESC6120

SESC9121
Fire and Explosion
Staff Contact: Dr Tony Green
CP15
Assumed Knowledge: SESC9100

This subject introduces the students to the principles of combustion in fire and explosion processes. The first section deals with the control of industrial fires (liquids and gases). The second section deals with the control of building fires and the third section deals with explosion prevention and control.

SESC9130
Noise Management
Staff Contact: Mr Warwick Williams
CP7.5
Assumed Knowledge: SESC9100

SESC9140
Radiation Protection
Staff Contact: Dr Ronald Rosen
CP7.5
Assumed Knowledge: SESC9111

Principles and practices of radiation protection for both ionising and non-ionising radiation. Radiation physics, detection and measurement; background radiation; biological effects of radiation; dose limits; technical controls for radioactive sources and irradiating apparatus. Codes of safe practice; radiological monitoring and personal dosimetry; storage, transport and disposal of sources; environmental impact; administrative controls; emergency procedures; control of non-ionising radiation. Practical work and site visit.

SESC9150
Electrical Safety
Staff Contact: Prof Jean Cross
CP7.5
Assumed Knowledge: SESC9600

Regulations and codes of safe practice relating to electricity. Identification assessment and control of electrical hazards including electrocution, electrical fires, static electricity, electrical wiring in hazardous areas, the effect of electric and magnetic fields, safety related systems.

SESC9533
Electrical Safety
Staff Contact: Prof Jean Cross
CP15

For Engineering students only. Regulations and codes of safe practice relating to electricity. Identification assessment and control of electrical hazards including electrocution, electrical fires, static electricity, electrical wiring in hazardous areas, the effect of electric and magnetic fields, safety related systems.

SESC9160
Plant and Construction Safety
Staff Contact: Dr Kamal Kothiyal
CP7.5
Assumed Knowledge: SESC9100, SESC9200

This subject examines current issues and problems in ensuring the occupational safety and health of workers in building, construction and manufacturing industry. Topics include OH&S act, legal responsibilities, implications of changes in legislation to building and construction safety, contractual relationship with sub-contractors, plant safety regulation, risk assessment and control strategies, safeguarding of plant, systems safety management, audit reviews, hazards in building and construction work, human behaviour and occupational safety and incident investigation.

SESC9170
Traffic Safety
Staff Contact: Dr Andrew McIntosh
CP7.5

This subject aims to provide students with an introduction to nature and scope of road safety and provide an understanding of the interdisciplinary and integrated approaches required to implement improvements in roads and traffic safety. Subject areas include identification of road safety problems, strategic planning, road environment safety, ergonomics, signals, signs, lighting, road user safety, knowledge attitudes, compliance and practices, vehicle and equipment safety, road safety schooling education, road safety campaigns and program evaluation.

SESC9200
Hazard and Risk Assessment
Staff Contact: Prof Jean Cross
CP7.5

Principles of risk management and systems safety, hazard identification, risk assessment, accident models, accident reporting, auditing. Each topic will be illustrated by practical examples and case studies.
SESC9200
Hazard and Risk Assessment
Staff Contact: Prof Jean Cross
CP7.5
Principles of risk management and systems safety, hazard identification, risk assessment, accident models, accident reporting, auditing. Each topic will be illustrated by practical examples and case studies.

SESC9211
Risk Management
Staff Contact: Prof Jean Cross
CP15
This subject gives an overview of Risk Management following the format of the Australian Standard in Risk Management (AS4360). Tools and techniques applicable to each step of the risk management process are discussed using examples application to the class. The same risk management process is applied to manage a wide range of business issues including health and safety, the environment, finance and project management. This subject is therefore relevant as part of a wide variety of postgraduate courses and students from any postgraduate course are accepted if numbers permit. The student selects examples for exercises to suit the industry and role in which they work (or intend to work). At the end of the subject, students should be able to use risk management tools applicable to their specific interest and have an awareness of tools used in other industries and applications.

SESC9221
Major Hazards Management
Staff Contact: Dr Tony Green
CP15
Assumed Knowledge: SESC9100, SESC9200
This subject discusses the management of major hazardous facilities. Australian and overseas legislation is discussed, together with the preparation of safety cases, environmental impact statements and emergency planning. Analysis techniques that are required for these assessments will be discussed including how to quantify likelihood and the consequences through the use of modelling. Finally, the requirements for emergency plans are discussed.

SESC9231
Risk Analysis
Staff Contact: Prof Jean Cross
CP15
This subject introduces methods used to analyse risk in different disciplines. Techniques covered include Fault Tree analysis and quantification, Trend analysis, Monte Carlo and other computer modelling techniques, use of Risk analysis software. The methods are applied to examples which include decision making in financial, environmental and safety management. In addition students undertake a case study selecting areas of risk of their choice.

SESC9300
Effective Behaviour in Organisations
Staff Contact: Ms Dianne Gardner
CP7.5
This subject examines issues of human behaviour as a major system factor in occupational health and safety. Topics include attitudes and motivation, decision making, leadership and group dynamics, selection, training and communication.

SESC9310
Issues in Safety Management
Staff Contact: Ms Dianne Gardner
CP7.5
This subject covers a range of issues in the management of risks in industry. Topics include cost benefit analysis of safety, rehabilitation and workers’ compensation, enterprise agreements, industrial relations and stress in the workplace.

SESC9320
Effective Management
Staff Contact: Ms Dianne Gardner
CP7.5
This subject examines processes required for effective management. Topics include management systems and standards, planning, change management, measuring organisational performance, best practice and benchmarking and the management of conflict.

SESC9330
Technology Management
Staff Contact: Ms Dianne Gardner
CP7.5
This subject covers a range of issues in the management of technology. Topics include legal responsibilities of managers, industrial relations, project management, management of contracts and the management of technological change.

SESC9340
Occupational Health and Safety Management
Systems Auditing
Staff Contact: Ms Dianne Gardner
CP7.5
Assumed Knowledge: None
This subject outlines the requirements of an effective OHS management system, and how such systems may be audited.

SESC9400
Ergonomics 1
Staff Contact: Dr Andrew McIntosh
CP7.5
Assumed Knowledge: ANAT6151, SESC6010, SESC6110
This subject provides an introduction to ergonomics, emphasising the principles of user centered design and human-machine-environment systems. Specific topics include definition of and justification for ergonomics, design
and human error, human capabilities and limitations, introduction to anthropometry, and the reduction of musculoskeletal loading of workers.

SESC9410
Ergonomics 2
Staff Contact: Dr Andrew McIntosh
CP7.5
Assumed Knowledge: SESC9400
This subject follows on from SESC9400 Ergonomics 1, and covers displays & controls, design of human-machine-environment systems, job design and work organisation, design of workplaces, the physical environment and an introduction to product design.

SESC9411
Principles of Ergonomics
Staff Contact: Dr Kamal Kothiyal
CP15
Assumed Knowledge: ANAT6151, SESC6010, SESC6110
This subject will give an introduction to ergonomics, emphasising the principles of designing user-centred, human-machine-environment systems. Specific topics include definition of and justification for ergonomics, design and human error, human capabilities and limitations, introduction to anthropometry and the reduction of musculoskeletal loading of workers, displays & controls, design of human-machine-environment systems, job design and work organisation, design of workplaces, the physical environment and an introduction to product design.

SESC9421
Applied Ergonomics
Staff Contact: Mr Roger Hall
CP15
Assumed Knowledge: SESC9411 or equivalent
This subject will focus on the application of ergonomics principles to real world problems and the difficulties involved. It requires a knowledge of the principles of ergonomics and will provide in-depth knowledge and skills in ergonomics research methodology - analysing the exact nature and extent of the problem, and evaluating the outcome of solutions to the problem. Topics include ergonomics methodologies, analysis techniques, benefit-cost & practical case studies, mock trial, professional ethics, and participatory ergonomics.

SESC9431
Physical Ergonomics
Staff Contact: Dr Kamal Kothiyal
CP15
Assumed Knowledge: SESC9411 or equivalent
This subject discusses various analytical tools and techniques used by ergonomists to assess or solve practical, physical ergonomics problems. It requires a knowledge of the principles of ergonomics and will provide in-depth knowledge and skills in assessing the physical ergonomics aspects of work systems. Topics include applied anthropometry, biomechanical models, electromyography, manual handling jobs with multiple tasks and work physiology. Students will gain hands-on experience with relevant equipment and software such as Mannequin, 2D and 3D SSP Programs, Energy Expenditure Program, and the revised NIOSH 1991 equation.

SESC9441
Ergonomics and New Technology
Staff Contact: Mr Roger Hall
CP15
Assumed Knowledge: SESC9411 or equivalent
The subject will focus on the ergonomics issues related to the design and implementation of new technology. It assumes a knowledge of the principles of ergonomics and in particular it will look at cognitive aspects of human-computer interaction, human error and software design, usability and its assessment, user interface design, evaluation techniques, guidelines and standards, and the introduction of new systems into organisations.

SESC9451
Experimental Biomechanics
Staff Contact: Dr Andrew McIntosh
CP15
This subject commences with lectures on experimental methods, instrumental analysis methods. The student then undertakes a series of experiments by motion analysis, EMG, exercise tests and impact testing.

SESC9460
Biomechanics of Impact Injury
Staff Contact: Dr Andrew McIntosh
CP7.5
Assumed Knowledge: SESC6110, SESC6120
Impact injury occurs in the workplace, on the sports field, during recreation, and in traffic accidents. The subject will cover mechanisms of trauma, research methods, human tolerance to impact and methods for reducing injury. The subject will bring together biomechanics, engineering and traumatology.

SESC9511
Occupational Hygiene
Staff Contact: Mr Phillip Turner
CP15
Assumed Knowledge: SESC9100, SESC9600
This subject deals with practical considerations of recognising, evaluating and controlling workplace hazards. Topics include the role of the occupational hygienist; types of workplace hazards such as particulates, gases and vapours, chemicals, noise, radiation, temperature, biohazards); workplace assessment and monitoring; and methods for the control of hazards (such as ventilation and personal protection).
SESC9520
Ventilation
Staff Contact: Head of School
CP7.5
Assumed Knowledge: SESC9600, SESC9511
Control of airborne contaminants by movement of air. Nature of airborne contaminants: gases, vapours, fumes, mists, dusts, particulates and heat. Concepts such as capture velocity, face velocity, face velocity, flow ratio principles. Ventilation systems for contaminant control, natural, general, mechanical and local exhaust ventilation systems. Properties of fan and duct systems.

SESC9530
Personal Protective Equipment
Staff Contact: Assoc Prof Chris Winder
CP7.5
Assumed Knowledge: SESC9600
This subject provides an introduction to personal protective equipment. Protection for head, eyes, skin, respiration, feet and protection against falling. Relevant standards for personal protection. Personal protection programs.

SESC9541
Assessment of the Workplace Environment
Staff Contact: Dr Boban Markovic
CP15
Assumed Knowledge: Core subjects
This is an experimental and workplace based subject where students will be required to assess ergonomics, physical and chemical hazards encountered in the occupational environment. Students will design and carry out a number of practical measurement programs to assess and report on workplace environmental parameters. Topics include measurement and analysis of noise, lighting, vibration, ventilation, air quality, thermal environment, radiation and magnetic fields, assessment of chemical hazards, and floor slip resistance characteristics.

SESC9600
Introduction to Occupational Health
Staff Contact: Assoc Prof Chris Winder
CP7.5
Introduction to occupational health, including workplace hazards and risks, approaches to workplace safety, occupational health and safety legislation, management of workplace safety, the hierarchy of controls, occupational epidemiology and occupational rehabilitation.

SESC9620
Occupational Diseases and Injuries
Staff Contact: Assoc Prof Chris Winder
CP7.5
Assumed Knowledge: ANAT6151, SESC9600
This subject deals with the ways in which work can affect the health of workers. Covers occupational diseases and injuries of skin, respiratory system, nervous system, reproductive system, the musculoskeletal system and occupational cancer.

SESC9631
Occupational Medicine
Staff Contact: Head of School
CP15
Assumed Knowledge: SESC9600
This subject deals with the role of the occupational physician in practice and research. This includes health promotion, health screening, medical surveillance and biological monitoring.

SESC9640
Occupational Epidemiology
Staff Contact: Head of School
CP7.5
Assumed Knowledge: SESC9600
This subject deals with the role of the occupational physician in practice and research. The subject covers concepts of epidemiology, including relative risk, odds ratio, confidence limits, confounding, bias, types of epidemiological studies and their design. Interpretation of the results of epidemiology subjects. A significant feature of the subject is the study of case studies in various occupational health and safety areas.

SESC9661
Occupational Rehabilitation
Staff Contact: Dr Andrew McIntosh
CP15
Assumed Knowledge: SESC9400, SESC9620
This subject provides a scientific basis upon which to base rehabilitation. The main focus will be on examining methods in physical rehabilitation. Other issues, for example relating to case management, will be covered briefly. Concepts and practice from areas such as exercise physiology, training/conditioning, biomechanics, medicine, physiotherapy and occupational therapy will be covered in the context of the rehabilitation.

SESC9711
Environmental Planning and Assessment
Staff Contact: Dr Boban Markovic
CP15
This subject is a core element for the Graduate Diploma and Masters of Environmental Studies courses and provides the conceptual framework for understanding interactions between humans, nature, philosophy, law, politics, ethics and decision making and how this is related to environmental planning and assessment.

SESC9721
Environment and Medicine
Staff Contact: Dr John Frith
CP15
Aspects of medicine bearing upon physiological consequences of pollutants. Metabolic mechanisms; chemical interactions, synergism and antagonism; photosynthesis and phytotoxicity. Ozone depletion and greenhouse effects. Morbidity and mortality surveys. Studies of particular pollutants and environmental contaminants.
SESC9731
Environment and Law
Staff Contact: Head of School
CP15
Resources in law for the preservation of the environment. Types of legislation local government, town planning, environmental and common law; administrative infrastructure, problems and actions. The North American experience. Economic and sociological factors.

SESC9741
Environmental Management Systems
Staff Contact: Dr Boban Markovic
CP15
Assumed Knowledge: SESC9711
This subject is designed to define the central role of environment in management strategies. It describes the development of different approaches to fulfil the demands of the environment while considering not only the current legislative requirements but also customer requirements, competitive pressure and safety aspects of the firms respectively. Available as a short course.

SESC9810
Introduction to Toxicology
Staff Contact: Assoc Prof Chris Winder
CP7.5
Assumed Knowledge: SESC6800
This subject provides an introduction to toxic hazards, including chemicals and biohazards. Effects of exposure to toxic hazards. Legislation and standards for the identification and control of toxic hazards.

SESC9820
Chemical Safety and Toxicology
Staff Contact: Assoc Prof Chris Winder
CP7.5
Assumed Knowledge: SESC9810
This subject provides an outline of the toxicological, occupational hygiene and environmental aspects of chemical hazards and exposures. Metals, solvents, toxic and irritant gases, pesticides, carcinogens, hazardous wastes and dioxins are used as case studies.

SESC9850
Management of Dangerous Materials
Staff Contact: Assoc Prof Chris Winder
CP7.5
Assumed Knowledge: SESC9810
Chemicals legislation, regulatory assessment of chemicals, the dangerous goods system, the hazardous substances regulation and systems for hazardous wastes.

SESC9860
Applied Laboratory Safety
Staff Contact: Assoc Prof Chris Winder
CP15
Assumed Knowledge: SESC9600, SESC9610
Identification of hazards found in laboratories (chemicals, radioactives, biohazards, physical hazards), the ways in which they can be controlled, and development of management systems for laboratory safety.

SESC9871
Toxicological and Environmental Laboratory Science
Staff Contact: Dr Boban Markovic
CP15
Assumed Knowledge: SESC9820
A laboratory based subject which provides basic requirements of laboratory based research, especially in chemical safety and applied toxicology. The subject covers literature review, methodology, experimental design, data collection and analysis, discussion and presentation skills, through undertaking a research project.

SESC9900
Project Methods
Staff Contact: Ms Dianne Gardner
CP7.5
Assumed Knowledge: SESC9010
This subject covers the development of a research project including the research proposal, research design and data analysis and the writing of the research report. Students will be expected to be able to recognise and avoid common methodological problems in research.

SESC9905
Report
Staff Contact: Course Coordinator
CP5
A 5 credit point report on a topic relevant to the course program.

SESC9910
Report
Staff Contact: Course coordinator
CP10
A 10 credit point report on a topic relevant to the course program.

SESC9915
Special Report
Staff Contact: Course coordinator
CP15
A 15 credit point report on a topic relevant to the course program.

SESC9930
Project
Staff Contact: Dr Andrew McIntosh
CP30
Assumed Knowledge: SESC9900
A 30 credit point project relevant to the course program. Students will be required to undertake an investigatvie project with supervision and to present a satisfactory report.
SESC9945
Project
Staff Contact: Dr Andrew McIntosh
CP45
Assumed Knowledge: SESC9900
A 45 credit point project relevant to the course program. Students will be required to undertake an investigative project with supervision and to present a satisfactory report (only for students in 1.5 or 2 year masters programs).

SESC9960
Project
Staff Contact: Dr Andrew McIntosh
CP60
Assumed Knowledge: SESC9900
A 60 credit point project relevant to the course program. Students will be required to undertake an investigative project with supervision and to present a satisfactory report (only for students in 1.5 or 2 year masters programs).

Textile Technology

TEXT5001
Textile Technology Dissertation
Staff Contact: Prof Mike Pailthorpe
CP7.5 F T1.5
Students review a particular aspect of textile technology, by conducting a literature survey and conferring with experts. The review is presented orally to the staff and students of the department, and submitted in written form.

TEXT5003
Textile Technology
Staff Contact: Prof Mike Pailthorpe
CP7.5 F T1.5
Students gain an overview of textile technology by reviewing the technology relating to one or more textile products, through a series of tutorials and exercises.

TEXT5101
Fibre Science A
Staff Contact: Prof Ron Postle
CP15 S1 L4 T2

TEXT5102
Fibre Science B
Staff Contact: Prof Ron Postle
CP10 S2 L2 T2

TEXT5201
Textile Quality Control
Staff Contact: Prof Mike Pailthorpe

**TEXT5501**  
**Finishing Technology A**  
*Staff Contact: Prof Mike Pailthorpe*  
CP12.5 S1 L3 T2  
Objects of finishing and typical flow diagrams for wool and cotton. The principles and technology of textile finishing processes for protein and cellulosic fabrics, including the removal of impurities and discoloration, the elimination or minimisation of deficiencies in properties, the development of specific properties. Properties of surfactant solutions, micelle formation, surfactants as emulsifiers and detergents. Practical exercises in bleaching, wool milling and shrinkproofing. Analysis of hard water by titration.

**TEXT5502**  
**Finishing Technology B**  
*Staff Contact: Prof Mike Pailthorpe*  
CP12.5 S2 L2 T3  
Wet and dry fabric finishing. The application of special finishes including flame retardant finishes, crease resistant and antistatic finishes, etc. Fabric setting. Dimensional stability and its measurement. The drying of textile materials. Recent developments in finishing technology.

Conditions for the Award of Degrees

First Degrees

Rules, regulations and conditions for the award of first degrees are set out in the appropriate Faculty Handbooks.

For the list of undergraduate courses and degrees offered see Table of Courses by Faculty (Undergraduate Study) in the Calendar.

The following is the list of higher degrees, graduate diplomas and graduate certificates of the University, together with the publication in which the conditions for the award appear.

Higher Degrees

For the list of graduate degrees by research and course work, arranged in faculty order, see UNSW Courses (by faculty) in the Calendar.

</table>
Doctor of Philosophy (PhD)

1. The degree of Doctor of Philosophy may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty or board (hereinafter referred to as the Committee) to a candidate who has made an original and significant contribution to knowledge.
Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment as a candidate for the degree.

Enrolment

3. (1) An application to enrol as a candidate for the degree shall be lodged with the Registrar at least one month prior to the date at which enrolment is to begin.

(2) In every case before making the offer of a place the Committee shall be satisfied that initial agreement has been reached between the School* and the applicant on the topic area, supervision arrangements, provision of adequate facilities and any coursework to be prescribed and that these are in accordance with the provisions of the guidelines for promoting postgraduate study within the University.

(3) The candidate shall be enrolled either as a full-time or a part-time student.

(4) A full-time candidate will present the thesis for examination no earlier than three years and no later than five years from the date of enrolment and a part-time candidate will present the thesis for examination no earlier than four years and no later than six years from the date of enrolment, except with the approval of the Committee.

(5) The candidate may undertake the research as an internal student i.e. at a campus, teaching hospital, or other research facility with which the University is associated, or as an external student not in attendance at the University except for periods as may be prescribed by the Committee.

(6) An internal candidate will normally carry out the research on a campus or at a teaching or research facility of the University except that the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University provided that the work can be supervised in a manner satisfactory to the Committee. In such instances the Committee shall be satisfied that the location and period of time away from the University are necessary to the research program.

(7) The research shall be supervised by a supervisor and where possible a co-supervisor who are members of the academic staff of the School or under other appropriate supervision arrangements approved by the Committee. Normally an external candidate within another organisation or institution will have a co-supervisor at that institution.

Progression

4. The progress of the candidate shall be considered by the Committee following report from the School in accordance with the procedures established within the School and previously noted by the Committee.

(i) The research proposal will be reviewed as soon as feasible after enrolment. For a full-time student this will normally be during the first year of study, or immediately following a period of prescribed coursework. This review will focus on the viability of the research proposal.

(ii) Progress in the course will be reviewed within twelve months of the first review. As a result of either review the Committee may cancel enrolment or take such other action as it considers appropriate. Thereafter, the progress of the candidate will be reviewed annually.

Thesis

5. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the investigation.
(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall comply with the following requirements:
(a) it must be an original and significant contribution to knowledge of the subject;
(b) the greater proportion of the work described must have been completed subsequent to enrolment for the degree;
(c) it must be written in English except that a candidate in the Faculty of Arts and Social Sciences may be required by the Committee to write a thesis in an appropriate foreign language;
(d) it must reach a satisfactory standard of expression and presentation;
(e) it must consist of an account of the candidate's own research but in special cases work done conjointly with other persons may be accepted provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may not submit as the main content of the thesis any work or material which has previously been submitted for a university degree or other similar award but may submit any work previously published whether or not such work is related to the thesis.

(5) Four copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the four copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

6. (1) There shall be not fewer than three examiners of the thesis, appointed by the Committee, at least two of whom shall be external to the University.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that one of the following:
(a) The thesis merits the award of the degree.
(b) The thesis merits the award of the degree subject to minor corrections as listed being made to the satisfaction of the head of school.
(c) The thesis requires further work on matters detailed in my report. Should performance in this further work be to the satisfaction of the higher degree Committee, the thesis would merit the award of the degree.
(d) The thesis does not merit the award of the degree in its present form and further work as described in my report is required. The revised thesis should be subject to re-examination.
(e) The thesis does not merit the award of the degree and does not demonstrate that resubmission would be likely to achieve that merit.

(3) If the performance in the further work recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to submit the thesis for re-examination as determined by the Committee within a period determined by it but not exceeding eighteen months.

(4) After consideration of the examiners' reports and the results of any further examination of the thesis, the Committee may require the candidate to submit to written or oral examination before recommending whether or not the candidate be awarded the degree. If it is decided that the candidate be not awarded the degree, the Committee shall determine whether or not the candidate be permitted to resubmit the thesis after a further period of study and/or research.

Fees

7. A candidate shall pay such fees as may be determined from time to time by the Council.

"School" is used here and elsewhere in these conditions to mean any teaching unit authorised to enrol research students and includes a department where that department is not within a school, a centre given approval by the Academic Board to enrol students, and an interdisciplinary unit within a faculty and under the control of the Dean of the Faculty. Enrolment is permitted in more than one such teaching unit.
Master of Chemistry (MChem)

1. The degree of Master of Chemistry by formal coursework may be awarded by the Council to a candidate who has satisfactorily completed a program or advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate four year degree of Bachelor with Honours Class 2 or higher from The University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Science and Technology (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of a candidate shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of this time may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Marine Science (MMarineSc)

1. The degree of Master of Marine Science by formal coursework may be awarded by the Council to a candidate who has satisfactorily completed a program or advanced study.

Qualifications

2. The Master of Marine Science degree course is available to graduates in science who have completed a four year degree. Others may be admitted if they have submitted evidence of such academic and/or professional attainment as may be approved by the appropriate Faculty on the recommendation of its Higher Degree Committee. Applicants with other qualifications may be admitted after completion of a qualifying program approved by the appropriate Faculty. The program shall be of one year duration (full-time) or two years part-time.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) A candidate shall also be required to undertake a project on an approved topic.
(4) The project shall be supervised under appropriate arrangements approved by the Director, Centre for Marine Science.
(5) The progress of a candidate shall be reviewed at least once annually by the Centre for Marine Science and as a result of its review the Centre may cancel enrolment or take such other action as it considers appropriate.
(6) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of a candidate shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of this time may be granted by the Higher Degree Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Engineering (ME) and Master of Science (MSc)

1. The degree of Master of Engineering or Master of Science by research may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.
(3) When the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant, before being permitted to enrol, to undergo such examination or carry out such work as the Committee may prescribe.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least one calendar month before the commencement of the session in which enrolment is to begin.
(2) In every case, before permitting a candidate to enrol, the head of the school in which the candidate intends to enrol shall be satisfied that adequate supervision and facilities are available.
(3) An approved candidate shall be enrolled in one of the following categories.
(a) full-time attendance at the University;
(b) part-time attendance at the University;
(c) external not in regular attendance at the University and using research facilities external to the University.
(4) A candidate shall be required to undertake an original investigation on an approved topic. The candidate may also be required to undergo such examination and perform such other work as may be prescribed by the Committee.

(5) The work shall be carried out under the direction of a supervisor appointed from the full-time members of the University staff.

(6) The progress of a candidate shall be reviewed annually by the Committee following a report by the candidate, the supervisor and the head of the school in which the candidate is enrolled and as a result of such review the Committee may cancel enrolment or take such other action as it considers appropriate.

(7) No candidate shall be granted the degree until the lapse of three academic sessions in the case of a full-time candidate or four academic sessions in the case of a part-time or external candidate from the date of enrolment. In the case of a candidate who has been awarded the degree of Bachelor with Honours or who has had previous research experience the Committee may approve remission of up to one session for a full-time candidate and two sessions for a part-time or external candidate.

(8) A full-time candidate for the degree shall present for examination not later than six academic sessions from the date of enrolment. A part-time or external candidate for the degree shall present for examination not later than ten academic sessions from the date of enrolment. In special cases an extension of these times may be granted by the Committee.

Thesis

4. (1) On completing the program of study a candidate shall submit a thesis embodying the results of the original investigation.

(2) The candidate shall give in writing two months notice of intention to submit the thesis.

(3) The thesis shall present an account of the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of higher degree theses.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.

Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the merits of the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(3) If the performance at the further examination recommended under (2)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the
same thesis and submit to a further oral, practical or written examination within a period specified by it but not exceeding eighteen months.

(4) The Committee shall, after consideration of the examiners' reports and the reports of any oral or written or practical examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Engineering (ME), Master of Science (MSc) and Master of Surveying (MSurv) without supervision

1. The degree of Master of Engineering or Master of Science or Master of Surveying without supervision may be awarded by the Council on the recommendation of the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee) to a candidate who has demonstrated ability to undertake research by the submission of a thesis embodying the results of an original investigation.

Qualifications

2. A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales with at least three years relevant standing in the case of Honours graduates and four years relevant standing in the case of Pass graduates, and at a level acceptable to the Committee.

Enrolment

3. An application to enrol as a candidate for the degree without supervision shall be made on the prescribed form which shall be lodged with the Registrar not less than six months before the intended date of submission of the thesis. A graduate who intends to apply in this way should, in his or her own interest, seek at an early year the advice of the appropriate head of school with regard to the adequacy of the subject matter and its presentation for the degree. A synopsis of the work should be available.

Thesis

4. (1) A candidate shall submit a thesis embodying the results of the investigation.

(2) The candidate shall give in writing to the Registrar two months notice of intention to submit the thesis.

(3) The thesis shall present an account on the candidate's own research. In special cases work done conjointly with other persons may be accepted, provided the Committee is satisfied about the extent of the candidate's part in the joint research.

(4) The candidate may also submit any work previously published whether or not such work is related to the thesis.

(5) Three copies of the thesis shall be presented in a form which complies with the requirements of the University for the preparation and submission of theses for higher degrees.

(6) It shall be understood that the University retains the three copies of the thesis submitted for examination and is free to allow the thesis to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the thesis in whole or in part, in photostat or microfilm or other copying medium.
Examination

5. (1) There shall be not fewer than two examiners of the thesis, appointed by the Committee, at least one of whom shall be external to the University unless the Committee is satisfied that this is not practicable.

(2) Before the thesis is submitted to the examiners the head of the school in which the candidate is enrolled shall certify that it is prima facie worthy of examination.

(3) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the thesis and shall recommend to the Committee that:

(a) the candidate be awarded the degree without further examination; or

(b) the candidate be awarded the degree without further examination subject to minor corrections as listed being made to the satisfaction of the head of the school; or

(c) the candidate be awarded the degree subject to a further examination on questions posed in the report, performance in this further examination being to the satisfaction of the Committee; or

(d) the candidate be not awarded the degree but be permitted to resubmit the thesis in a revised form after a further period of study and/or research; or

(e) the candidate be not awarded the degree and be not permitted to resubmit the thesis.

(4) If the performance at the further examination recommended under (3)(c) above is not to the satisfaction of the Committee, the Committee may permit the candidate to represent the same thesis and submit to further examination as determined by the Committee within a period specified by it but not exceeding eighteen months.

(5) The Committee shall, after consideration of the examiners' reports and the results of any further examination, recommend whether or not the candidate may be awarded the degree. If it is decided that the candidate be not awarded the degree the Committee shall determine whether or not the candidate may resubmit the thesis after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Science and Technology (MScTech)

1. The degree of Master of Science and Technology by formal coursework may be awarded by the Council to a candidate who has satisfactorily complete a program of advanced study.

Qualifications

2. (1) A candidate of the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty (hereinafter referred to as the Committee), or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee and

(ii) have undertaken appropriate postgraduate studies of the full-time year's duration (or the part-time equivalent) at the University of New South Wales or studies considered equivalent from another university or tertiary institution at a level acceptable to the Committee.
(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects including the submission of a report on a project, and pass such assessment as prescribed. The project shall be under the supervision of an academic staff member and shall be assessed by two examiners (for a major project).

(3) The progress of a candidate shall be reviewed at least once a year by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate and four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate, eight sessions for a part-time candidate, and ten sessions for an external candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Environmental Studies (MEnvStudies)

1. The degree of Master of Environmental Studies by formal course work may be awarded by the Council to a candidate who has satisfactorily complete a program of advanced study.

Qualifications

2. (1) A candidate of the degree shall:

(a) have been awarded an appropriate degree of Bachelor of four full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Science and Technology (hereinafter referred to as the Committee), or

(b)(i) have been awarded an appropriate degree of Bachelor of three full-time years duration (or the part-time equivalent) from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Committee and

(ii) have undertaken appropriate postgraduate studies of the full-time year's duration (or the part-time equivalent) at the University of New South Wales or studies considered equivalent from another university or tertiary institution at a level acceptable to the Committee.

(2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.
Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed. The project shall be under the supervision of an academic staff member and shall be assessed by two examiners (for a major project).

(3) The progress of a candidate shall be reviewed at least once a year by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate, eight sessions for a part-time candidate, and ten sessions for an external candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Optometry (MOptom)

1. The degree of Master of Optometry or Master of Physics by formal coursework may be awarded by the Council to a candidate who has satisfactorily completed a program or advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor of four full-time year's duration (or the part-time equivalent) from The University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Science and Technology (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undertake such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a
part-time candidate. The maximum period of a candidate and eight sessions for a part-time candidate. In special cases an extension of this time may be granted by the Committee.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Psychology (Applied) (MPsychol(Applied)) and Master of Psychology (Clinical) (MPsychol(Clinical))

1. The degree of Master of Psychology (Applied) or Master of Psychology (Clinical) by formal coursework and thesis may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study. The degree shall be awarded at the Pass level or with the grade of Honours Class 1 or with the grade of Honours Class 2 (two divisions).

Qualifications
2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor with Honours in Psychology from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution, at a level acceptable to the Higher Degree Committee of the Faculty of Life Sciences (hereinafter referred to as the Committee).
(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression
3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar by 1 November of the year before the year in which enrolment is to begin.
(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.
(4) No candidate shall be awarded the degree until the lapse of four academic sessions from the date of enrolment in the case of a full-time candidate or six sessions in the case of a part-time candidate. The maximum period of candidature shall be six academic sessions from the date of enrolment for a full-time candidate and ten sessions for a part time candidate. In special cases a variation of these times may be granted by the Committee.

Fees
4. A candidate shall pay such fees as may be determined from time to time by the Council.
Master of Safety Science (MSafetySc)

1. The degree of Master of Safety Science may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Science and Technology (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodge with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed. The program of advanced study shall total a minimum of 45 credits. The number of credits allocate for each subject shall be determined by the Committee on the recommendation of the Course Director (hereinafter referred to as the head of the school).

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be six academic sessions from the date of enrolment for a full-time candidate and ten sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

48 credit point Project Report

4. (1) The program of advanced study may include a 48 credit point project on an approved topic.

(2) The work shall be carried out under the direction of a supervisor appointed from the full-time academic members of the University staff.

(3) The candidate shall give in writing to the Registrar two months notice of intention to submit a report on the project.

(4) Three copies of the project report shall be presented in a form which complies with the requirements of the University for the preparation and submission of project reports for higher degrees.

(5) It shall be understood that the University retains the three copies of the project report submitted for examination and is free to allow the project report to be consulted or borrowed. Subject to the provisions of the Copyright Act, 1968, the University may issue the project report in whole or in part, in microfilm or other copying medium.
Examination of 48 credit point Project Report

5. (1) There shall be not fewer than two examiners of the project report, appointed by the Committee.

(2) At the conclusion of the examination each examiner shall submit to the Committee a concise report on the project and shall recommend to the Committee that:

(a) the project report be noted as satisfactory; or
(b) the project report be noted as satisfactory subject to minor corrections being made to the satisfaction of the head of the school; or
(c) the project report be noted as unsatisfactory but that the candidate be permitted to resubmit it in a revised form after a further period of study and/or research; or
(d) the project report be noted as unsatisfactory and that the candidate be not permitted to resubmit it.

(3) The Committee shall, after considering the examiners' reports and the candidate's results of assessment in the prescribed formal subject, recommend whether or not the candidate may be awarded the degree. If it is decided that the project report is unsatisfactory the Committee shall determine whether or not the candidate may resubmit it after a further period of study and/or research.

Fees

6. A candidate shall pay such fees as may be determined from time to time by the Council.

Master of Science (MSc), Master of Science (MSc) without supervision

See Master of Engineering above for these degrees.

Master of Statistics (MStats)

1. The degree of Master of Statistics by formal coursework may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded a degree of Bachelor with major studies in statistics from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Science and Technology (hereinafter referred to as the Committee).

(2) In exceptional cases an applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the degree.

(3) If the Committee is not satisfied with qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the degree shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the degree shall be required to undertake such formal subjects and pass such assessment as prescribed.
(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the degree until the lapse of three academic sessions from the date of enrolment in the case of a full-time candidate or six sessions in the case of a part-time candidate. In the case of a candidate who has been awarded a degree of Bachelor with Honours in statistics the Committee may approve remissions of up to one session for a full-time candidate and two sessions for a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and eight sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Certificate

1. A Graduate Certificate may be awarded by the Council to a candidate who has satisfactorily completed an approved program of study.

Qualifications

2. (1) A candidate for the Graduate Certificate shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the Faculty of Science and Technology (hereinafter referred to as the Committee).

(2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol for the Graduate Certificate.

(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

Enrolment and Progression

3. (1) An application to enrol as a candidate for the Graduate Certificate shall be made on the prescribed form which shall be lodged with the Registrar by the advertised closing date, which shall be set at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the certificate shall be required to undertake subjects and pass any assessment prescribed.

(3) The progress of a candidate shall be reviewed by the end of two sessions by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) The normal duration of the course is one academic session from the date of enrolment in the case of a full-time student or two sessions in the case of a part-time. For an open learning or external candidate the normal duration is two sessions from the date of enrolment. In special cases a variation of these times may be approved by the head of school.

Fees

4. Candidates shall pay such fees as may be determined from time to time by Council.
Master of Technology Management MTM

1. The degree of Master of Technology Management by formal course work may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the degree shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level considered acceptable to the Course Committee. This is normally either:
   (a) a four year degree, or,
   (b) a three year degree plus either another qualification at an acceptable level, or, other academic or professional attainments (including relevant work experience).

   (2) An applicant who submits evidence of such other academic and professional qualifications as may be approved by the Committee may be permitted to enrol in the degree. If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require that the applicant undergo such assessment, or carry out such work, as the Committee may prescribe before permitting enrolment.

Enrolment and Progression

3. An application to enrol as a candidate for a degree shall be made on the prescribed form which shall be lodged with the registrar at least two calendar months before the commencement of the Session in which enrolment is to begin.

   A candidate for the degree shall be required to undertake such formal subjects and pass such assessments as prescribed.

   The progress of a candidate shall be reviewed at least once annually by the Committee and, as a result of its review, the committee may cancel enrolment or take such other action as it considers appropriate.

   No candidate shall be awarded the degree until the lapse of at least two academic sessions from the date of enrolment in the case of full time enrolment or four academic sessions in the case of part time enrolment. The maximum period of enrolment shall be 4 academic sessions for a full time candidate and 8 academic sessions for a part time candidate. In special cases variations to these times may be granted by the Committee.

Fees

4. A candidate shall pay such fees as may be determined from time to time by the Council.

Graduate Diploma (GradDip GradDipEnvironStud or DipFDA)

1. A Graduate Diploma may be awarded by the Council to a candidate who has satisfactorily completed a program of advanced study.

Qualifications

2. (1) A candidate for the diploma shall have been awarded an appropriate degree of Bachelor from the University of New South Wales or a qualification considered equivalent from another university or tertiary institution at a level acceptable to the Higher Degree Committee of the appropriate faculty (hereinafter referred to as the Committee).

   (2) An applicant who submits evidence of such other academic or professional attainments as may be approved by the Committee may be permitted to enrol for the diploma.
(3) If the Committee is not satisfied with the qualifications submitted by an applicant the Committee may require the applicant to undergo such assessment or carry out such work as the Committee may prescribe, before permitting enrolment.

**Enrolment and Progression**

3. (1) An application to enrol as a candidate for diploma shall be made on the prescribed form which shall be lodged with the Registrar at least two calendar months before the commencement of the session in which enrolment is to begin.

(2) A candidate for the diploma shall be required to undertake such formal subjects and pass such assessment as prescribed.

(3) The progress of a candidate shall be reviewed at least once annually by the Committee and as a result of its review the Committee may cancel enrolment or take such other action as it considers appropriate.

(4) No candidate shall be awarded the diploma until the lapse of two academic sessions from the date of enrolment in the case of a full-time candidate or four sessions in the case of a part-time candidate. The maximum period of candidature shall be four academic sessions from the date of enrolment for a full-time candidate and six sessions for a part-time candidate. In special cases an extension of these times may be granted by the Committee.

**Fees**

4. A candidate shall pay such fees as may be determined from time to time by the Council.
The scholarships listed below are available to students whose courses are listed in this book. Each Faculty Handbook contains in its scholarships section the scholarships available for study in that Faculty. Travel scholarships are shown separately. Applicants should note that the scholarships and their conditions are subject to review and the closing dates for awards may vary from year to year.

Scholarship information is regularly included in the University publication 'Uniken/ Focus' and updated on the UNSW Web site http://www.infonet.unsw.edu.au/academic/schopriz/httoc.htm.

Students investigating study opportunities overseas should also consult Study Abroad which is published by UNESCO. The British Council (02 9326 2365) may be of assistance for information about study in Britain. The Australian–American Education Foundation (02 6247 9331) or the U.S. Consulate General Educational Advising Centre (02 9373 9230) can provide information about study in America. Information may also be obtained from the embassy or consulate of the country in which the study is proposed and from the proposed overseas institution. Details of overseas awards and exchanges administered by the Department of Employment, Education, Training and Youth Affairs (DEETYA) can be obtained from the Awards and Exchanges Section, DEETYA, PO Box 826, Woden, ACT 2606.

KEY
L Students with Australian Citizenship or Permanent Resident status can apply.
I International students can apply.

Postgraduate scholarships for research or coursework are identified with the following codes:
R Available for study by research (normally Masters by Research or PhD).
C Available for study by coursework (normally Masters by Coursework or Graduate Diploma).

The scholarship information is normally provided in the following format:
• Amount
• Duration
• Conditions

Unless otherwise stated, application forms are available from the Scholarships and Student Loans Unit, c/- the Student Centre (Lower Ground Floor, Chancellery). Applications normally become available four to six weeks before the closing date.
Undergraduate Scholarships

Following are details of scholarships available to undergraduate students at UNSW. The scholarships are listed according to the year of study for which the scholarship is available (i.e. scholarships for first year students; scholarships for second or later year students; scholarships for Honours year students) or whether they are available to undertake travel, and then also by Faculty and course (e.g. scholarships in Science and Technology or Engineering). If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

Scholarships for students entering the first year of an undergraduate course

General First Year

The Alumni Association Scholarships (L,L)
• Up to $1,500 pa
• 1 year renewable subject to satisfactory progress
The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of UNSW. Applications close early January.

The AUSIMM Education Endowment Fund (L)
• $2,500-$5,000 pa
• 1 year may be renewable subject to satisfactory progress
The scholarships are open to full-time undergraduate students enrolled in a course leading to the award of a Geoscience, Mining Engineering or Minerals Engineering (Minerals Processing or Extractive Metallurgy) degree related to the interests of the mineral industry. Further information is available from The Australian Institute of Mining and Metallurgy (AUSIMM), PO Box 660, Carlton South VIC 3053, Tel (03) 9662 3166.

The Australian Development Scholarships (ADS) (L)
• Tuition fees, medical cover, airfare and a stipend
• Duration of the course
This award is for international students from selected countries only. Information and applications can only be obtained from Australian Diplomatic Posts or Australian Education Centres in the home country. Applications normally close at least 12 months before the year of study.

The Australian Vietnam Veterans Trust Education Assistance Scheme (L)
• $3,500 pa
• Duration of the course subject to satisfactory progress
The scholarship is available to the children of Vietnam veterans who are aged under 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 1240, Tel (02) 9281 7077, Email: vvt@accsoft.com.au. Applications close 31 October.

The Ben Lexcen Sports Scholarships (L,L)
• $2,000 pa
• 1 year with possibility of renewal
The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants should have an outstanding ability in a particular sport and are expected to be active members of a UNSW Sports Club. Applications close late January.

The Captain Reg Saunders Scholarship (L)
• $3,000
• Up to 4 years
Applicants must be Aboriginals or Torres Strait Islanders eligible to commence a university degree in the area of psychology, nursing, applied science, social work or education. Further information and applications are available from the Aboriginal Education Program, UNSW, Tel (02) 9385 3805.
The UNSW Co-Op Program (L)
- $11,150 pa, and between 9 and 20 months industry training
- Duration of the course subject to satisfactory progress

The scholarships are offered by industry sponsors through the University for some of the disciplines in the Faculties of Science and Technology, Commerce and Economics, and Engineering. Scholars are selected by interview with emphasis placed on achievements in community and extracurricular activities as well as communication and leadership skills. A minimum UAI of 93.8 is expected. The UNSW Co-Op Program application form is available from school Careers Advisers or the Co-op Program Office on (02) 9385 5116. Applications close September 30 with interviews held at the end of November and beginning of December.

The Girls Realm Guild Scholarships (L)
- Up to $1,500 pa
- 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need

The scholarships are available to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Ian Somervaille Scholarships (L,L)
- Up to $3,000
- 1 year

The scholarships are available to immediate family members (i.e. children, parents, brothers, sisters, spouses, de facto partners) of UNSW staff members. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 October.

The John Niland Scholarships (L)
- $5,000
- 1 year

The scholarship assists rural students to undertake study at UNSW. Applicants will be students who complete the HSC (or its counterpart matriculation requirement) in the top five percent of their state-wide cohort, having been enrolled at a country high school in Australia. Selection will be based on academic merit, potential to contribute to the wider life of the University and consideration of social and/or economic circumstances which might otherwise hinder successful transition to UNSW. Applications close 30 October.

The Kensington Colleges Scholarships
Further information concerning the awards below is available from The Kensington Colleges, Tel (02) 9315 0000, Fax (02) 9315 0011, Email: kenso-colleges@unsw.edu.au, Web: http://www.kensocoll.unsw.edu.au.

The Mathews Scholarship
The scholarship provides $1,500 credit towards accommodation costs and is awarded to a resident at the commencement of the second year of an undergraduate degree. Candidates will be assessed on their academic performance in the first year of their course.

The Access Scholarship
The scholarship provides up to half the accommodation fee for a limited number of first year ACCESS scheme students experiencing long term financial hardship. Nominations are forwarded by the UNSW ACCESS office.

The Malcolm Chaikin Scholarship (L)
- $15,000 pa
- Renewable for the duration of the course subject to satisfactory progress

The scholarship is available to students entering the first year of a Bachelor of Science or Engineering in the Faculties of Life Sciences, Science and Technology, or Engineering. Selection will take into account academic merit, potential to contribute to the wider life of the University and interview performance. Applications close 31 October.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)
- $15,888 - $23,630 pa (depending on qualifications)
- Up to 3 years

Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience. Consideration will be given to prior knowledge and experience of Aboriginal culture and health. Applications close early August.

The New College Access Scholarship
The scholarship provides up to half of the accommodation fee for a first year ACCESS scheme student selected by the College. Nominations are forwarded by the UNSW ACCESS office. For further information contact New College, Tel (02) 9381 1999, Fax (02) 9381 1919, Email: admissions@newcollege.unsw.edu.au.
The New South Scholarships (L)
• $6,000
• 1 year
The scholarships are available to students commencing the first year of undergraduate study at UNSW in any discipline. Scholarships will be available only to those students who achieved a perfect score in the NSW HSC in the year prior to commencing study. No application form is required.

The Vice-Chancellor’s Equity Scholarships (L)
• $1,500
• 1 year
In 1998, over 40 scholarships were awarded for financially disadvantaged students commencing full-time undergraduate study. Consideration is normally given to academic merit and financial need. The conditions may change each year.

The Ngunnagan Club Scholarship (L)
• Up to $2,000
• 1 year
The scholarship is available to students enrolled at an Australian country high school who complete the HSC (or its counterpart matriculation requirement) in the top five per cent of their state cohort. Applicants should complete an official application form by 31 October in the year prior to their intended enrolment at UNSW. Final performance in the HSC (or its counterpart matriculation) examination should be reported to the Scholarships and Student Loans Unit once known.

Robert Riley Scholarships (L)
• $5,000
The Scholarships are awarded to promote the pursuit of justice and human rights for Aboriginal Australians through education. Applicants must be Aboriginals or Torres Strait Islanders up to the age of 25 and proposing to pursue studies in the fields of law, human rights or juvenile justice. Further information and applications are available from the Aboriginal Education Program, UNSW, Tel (02) 9385 3805. Applications close 1 November.

Faculty First Year

Faculty of Life Sciences

The Faculty of Life Sciences Scholarships (L)
• Up to $3,000 pa
• 1 year renewable for the duration of the course subject to satisfactory progress
A number of scholarships are available and carry the title of Faculty Scholar. The scholarships are available to full-time students enrolling in one of the disciplines of the Faculty of Life Sciences. Applications close at the end of January.

Bioprocess Engineering

The Bioprocess Engineering Scholarship (L)
• $4,700 pa
• Up to 4 years subject to satisfactory progress
The scholarship is available to a student undertaking the first year of the Bachelor of Bioprocess Engineering degree in the Faculty of Life Sciences. The scholarship will be awarded on the basis of academic merit in the HSC and leadership potential. Applicants must have achieved a UAI over 96.95. Applications close 7 January.
Food Science and Technology

The Coca-Cola South Pacific Export Corporation Scholarship (L)
- Up to $1,800 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must not be more than 22 years of age on 1 December of the year preceding the year in which the award commences. Applicants must be eligible for admission to Year 1 of the full-time degree course in Food Science and Technology. Applications normally close at the end of January.

The George Weston Foods Scholarship (L)
- Up to $1,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must be eligible for admission to Year 1 of the full-time degree course in Food Science and Technology. Applications normally close at the end of January.

Faculty of Science and Technology

The School Scholarships (Chemistry, Mathematics and Physics)- including the John Ragnar Anderson Chemistry Scholarships (L)
- Up to $2,000 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Up to six scholarships are available to full-time students enrolled in the Schools of Chemistry, Mathematics or Physics. Application forms are available from the Faculty Office or the Scholarships and Student Loans Unit. Applications normally close mid-February.

The Science and Technology Faculty Scholarships (L)
- Up to $3,000 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Six scholarships are available and carry the title of Faculty Scholar. The scholarships are available to full-time students enrolled in one of the disciplines of the Faculty of Science and Technology. Students undertaking the combined Bachelor of Science/Bachelor of Arts course may also apply. Application forms are available from the Faculty Office or the Scholarships and Student Loans Unit. Applications normally close mid-February.

Ceramic Engineering

The Australasian Ceramic Society Scholarship (L)
- Up to $400 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must be eligible for admission to Year 1 of the full-time degree course in Ceramic Engineering. Applications normally close at the end of January.

The CSR Building Scholarship (L)
- Up to $1,000 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must be eligible for admission to Year 1 of the full-time degree course in Ceramic Engineering. A new scholarship is only offered when the current scholarship recipient completes his/her course. It is expected that a new award will be available in 1999. Applications normally close at the end of January.

The Clay Brick Association Scholarship (L)
- Up to $2,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must be eligible for admission to Year 1 of the full-time degree course in Ceramic Engineering. A new scholarship is only offered when the current scholarship recipient completes his/her course. It is expected that a new award will be available in 1999. Applications normally close at the end of January.

The Thomson Family Scholarship (L)
- Up to $1,000 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must be eligible for admission to Year 1 of the full-time degree course in Ceramic Engineering. Applications normally close at the end of January.

The Monier PGH Scholarship (L)
- Up to $1,000 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
Applicants must be eligible for admission to Year 1 of the full-time degree course in Ceramic Engineering. Applications normally close at the end of January.
Metallurgy

The CSIRO Division of Minerals Scholarship in Metallurgical Engineering (L)
- $2,500 pa
- 4 years subject to satisfactory progress
The scholarship is available to a full-time student enrolled in Year 1 of the course leading to a Bachelor of Metallurgical Engineering (Process Metallurgy) degree. Selection is based on academic merit and personal qualities. Applications close in early December.

The Sir Rupert Myers Scholarship (L,L)
- Up to $2,500 pa
- 1 year renewable for the duration of the course subject to satisfactory progress
The scholarship is available to students who are Permanent Residents of Australia or whose parents are Permanent Residents of Australia. Applicants must be eligible for admission to Year 1 of the full-time degree course in Metallurgy or Metallurgical Engineering. Applications normally close at the end of January.

Physics

The CSIRO Division of Telecommunications and Industrial Physics Scholarship (L)
- Up to $1,000 pa
- Duration of the course subject to satisfactory progress
The scholarship is available to a full-time student entering the first year of the Engineering Physics program in the Advanced Science course. The scholarship will be awarded on the recommendation of the Head of School of Physics. There is no application form.
Scholarships for students in their second or later year of study

General Second Year or Later

The AITD-MMI Insurance- Mark Pompei Scholarship (L)
- $1,000
The Australian Institute of Training and Development and MMI Insurance offer an annual scholarship to a part-time student currently working in the field of Training and Development. Applicants should be completing their first accredited qualification to assist their development in this field. Applications are available from AITD NSW Division Administrator, PO Box 5452, West Chatswood NSW 2057, Tel (02) 9419 4966, Fax (02) 9419 4142, Email nswdivn@aitd.com.au. Applications close in May.

The Alumni Association Scholarships (L,L)
- Up to $1,500 pa
- 1 year renewable subject to satisfactory progress
The scholarships are available to students enrolled in any year of a full-time undergraduate course. Candidates must be the children or grandchildren of alumni of UNSW. Applications close early January.

The Australian Vietnam Veterans Trust Education Assistance Scheme (L)
- $3,500 pa
- Duration of the course subject to satisfactory progress
The scholarship is available to the children of Vietnam veterans who are aged under 25 at the time of application. The award is subject to the same income test as AUSTUDY. Applicants can be undertaking any year of a Bachelors course. Applications and further information are available from the Australian Vietnam War Veterans Trust National Office, PO Box K978, Haymarket NSW 1240, Tel (02) 9281 7077, Email: vvt@accsof1.com.au. Applications close 31 October.

The Ben Lexcen Sports Scholarships (L,L)
- $2,000 pa
- 1 year with possibility of renewal
The scholarships are available to students who are accepted into a course of at least two years duration. Prospective applicants should have an outstanding ability in a particular sport and are expected to be active members of a UNSW Sports Club. Applications close late January.

The Girls Realm Guild Scholarship (L)
- Up to $1,500 pa
- 1 year with the prospect of renewal subject to satisfactory progress and continued demonstration of need
The scholarships are available only to female students under 35 years of age who are enrolling in any year of a full-time undergraduate course. Selection is based on academic merit and financial need. Applications close 25 March.

The Dried Fruits Research and Development Council (DFRDC) Studentships and Student Awards (L,L)
- Up to $3,000 for Studentships, up to $1,000 for Student Awards
The Studentships assist students to undertake research projects in the final year of a Bachelors degree (applications close April 15), or to undertake a research project during the summer vacation (applications close October 15). The Student Awards are provided for excellence in student research projects related to the dried fruit industry. Further information and applications are available from the Executive Officer, Dried Fruits Research and Development Council, Box 1142, Mildura VIC 3502, Tel (050) 221515, Fax (050) 233321.

The Esso Australia Ltd Geosciences Scholarship (L,L)
- Up to $3,000
- 1 year
The scholarship is for a full-time student seeking to undertake study in the final year (Year 4) of a Bachelor of Science (AppGeol) or an equivalent Honours year, majoring in geology or geophysics. The successful applicant is expected to have an interest in petroleum related studies ie sedimentology, biostratigraphy, seismic/magnetic/gravity geophysical studies, basin studies, palynology or palaeontology. Selection is based on academic merit, the benefit the student will gain by being awarded the scholarship and can include consideration of financial need. Applications close 30 November.

The Ian Somervaille Scholarships (L,L)
- Up to $3,000
- 1 year
The scholarships are available to immediate family members (ie. children, parents, brothers, sisters, spouses, de facto partners) of UNSW staff members. Applicants must be full-time students enrolling in any year of an undergraduate course leading to the degree of Bachelor at UNSW. Selection will be based on academic merit,
aptitude and commitment to the proposed course. Consideration may be given in cases of hardship or disadvantage. Applications close 31 January.

The Julian Small Foundation Annual Research Grant (L,L)
- Up to $5,000
Applications are open to postgraduate and undergraduate students undertaking research and involved in the study of law, or industrial relations. Selection will be based on a research proposal which outlines how the research will advance thinking and practice in the area of employment law and industrial relations in Australia. Applications close mid-August.

Applicants must be undertaking study leading to a degree or diploma of the University and be members of the University Union. The grant is awarded on the basis of significant contribution to the community life of the
University involving a leadership role in student affairs and the University Union and the relevance and merit of the proposed travel to the student's academic program or University Union activities. Applications close mid-April.

The Swedish Institute Guest Scholarships (I, L)
- SEK 7,100 per month living allowance
- 9 months (1 academic year)

The scholarships are open to students and researchers who wish to travel to Sweden for study or research which cannot equally well be pursued in countries other than Sweden. Applicants must establish contact with a Swedish University willing to accept the applicant for the proposed studies. Initial requests for application forms must be made in writing, and should include the applicant's name and address, nationality, educational background, work experience, knowledge of any languages, statement of the purpose of the study or research in Sweden, and a copy of a letter of invitation from a Swedish University Department. Applications are available from the Swedish Institute, Department for Exchanges in Education and Research, PO Box 7434, SE-103 91, Stockholm, Sweden. Email grantinfo@si.se. Homepage: http://www.si.se. Requests for application forms must reach the Swedish Institute before 1 December.

Swiss Government Scholarships (L)
- Tuition fees, living allowance, medical insurance and assistance with airfares

- 1 academic year

One scholarship is available for art/music and two for other disciplines, to undertake postgraduate study or attend an art school/conservatory in Switzerland. Applicants will be required to pass a language test in German or French. Applicants must be aged under 35. Applications close early October.

The Turkish Government Language & Culture and Higher Education Scholarships (I,L)

Scholarships are available to high school graduates to undertake study at a Turkish University. Students may be required to undertake a one year Turkish language course before commencement of the degree. The scholarships pay a monthly allowance for the duration of the course. Scholarships are also available to university graduates who would like to attend Turkish Language and Culture Summer Courses conducted by the Turkish Studies Centre. Further information is available from the Embassy of the Republic of Turkey, 60 Mugga Way, Red Hill ACT 2603. Applications close 30 May for Language and Culture Scholarships, and 15 July for Higher Education Scholarships.

Yokoyama Scholarship Awards (L)

Assistance may be available for undergraduate and postgraduate study at a Japanese University.

Information is available from Mr Masao Iwashita, Secretary-General, Yokoyama Scholarship Foundation, 6F Shiozaki Building, 2-7-1 Hirakawacho, Chiyoda-Ku, Tokyo 102 Japan, Tel (813) 3238 2913, Fax (813) 5275 1677.
Vacation Scholarships

Some Schools may offer scholarships for the long vacation period from December to February each year. Students should contact the relevant School office for information.

General Vacation

The Australian Kidney Foundation Summer Vacation Scholarships (I,L)
- Up to $900
- 6 to 8 weeks
The scholarships are open to undergraduate students who have completed at least one year of full-time study in Medicine or a course related to Biological Science. The proposed research project must be related to the kidney and the urinary tract, and carried out at a university department during the summer vacation period. Applications are available from the Medical Director's Office, Australian Kidney Foundation, GPO Box 9993, Adelaide SA 5001, Tel (08) 8267 4555, Fax (08) 8267 4450, Email: ttaylor@terra.net.au. Applications close 15 September.

ANU Summer Research Scholarships (I,L)
- $130 per week, plus full board and travel
- 8-12 weeks
Scholarships are offered to undergraduate students for short research projects in Physics, Chemistry, Astronomy, Biological Sciences, Computer Sciences, Engineering, Medical Sciences, Earth Sciences, Pacific and Asian Studies, Social Sciences and Environmental Sciences, at the Institute of Advanced Studies, ANU. Further information and applications are available from Anna Weidemann, Summer Research Scholarship Program, The Australian National University, Canberra ACT 0200, Tel (02) 6249 4138, Fax (02) 6249 4891, Email: School.office.rsbs@anu.edu.au. Applications close 15 September.

Cooperative Research Centre for Food Industry Innovation Vacation Scholarships (I,L)
- Up to $2000
- 8 to 12 weeks between November and March
The scholarships are open to final year undergraduate students enrolled in courses in one or more of the following disciplines: biochemistry, biotechnology, bioprocess engineering, chemistry, food science, food technology, immunology, microbiology, or molecular biology. Research projects must be related to one of the research programs of the CRC. Application Kits are available from Ms M Romeo, Education Officer, CRC for Food Industry Innovation, c/- Department of Biotechnology, UNSW, Sydney NSW 2052, Tel (02) 9385 1298, Fax (02) 9385 1015, Email m.romeo@unsw.edu.au. Applications close early October.

The CSIRO Division of Marine Research Vacation Scholarships (I,L)
- Up to $450 per week plus travel expenses
- 8 weeks between December and February
Applicants must be full-time undergraduate students who have completed not less than three years of their course. Research projects will be undertaken with the CSIRO Division of Marine Research at either Hobart, Cleveland or Marmion. Applications close early September.

The CSIRO Vacation Scholarships (I,L)
- $420 per week
- 8 to 12 weeks between December and February
The scholarships are open to postgraduate and undergraduate students who have completed no less than three years of a full-time course in Physics, Mathematics, Computer Science, Electrical Engineering, or a closely allied subject. Research projects are carried out under the individual supervision of a research engineer or scientist. Applications are available on the web at http://www.atnf.csiro.au/educate/summer_vacation.html. Applications close early August.

The Dried Fruits Research and Development Council (DFRDC) Studentships (I,L)
- Up to $3,000 for Studentships, up to $1,000 for Student Awards
The Studentships assist students to undertake research projects during the summer vacation period. Further information and applications are available from the Executive Officer, Dried Fruits Research and Development Council, Box 1142, Mildura Vic 3502, Tel (050) 221515, Fax (050) 233321. Applications close 15 October.

The Heart Foundation Vacation Scholarships
Scholarships are available during the long vacation period for research projects related to cardiovascular function and disease. Applicants should normally have completed at least two years of an appropriate degree course in the biological sciences. Preference will be given to applicants who have had little or no laboratory experience. Applications close early September.
Medical School Vacation Scholarship Scheme - John Flynn Scholarships

- $2,500 pa to cover travel, accommodation, mentor's honorarium, host practice costs, student stipend
- Two weeks per year for up to four years

Scholarships are available to undergraduate medical students to take up vacation placements in rural and remote communities, country towns or regional centres. Placements may be with a general practitioner, rural hospital, rural/remote Aboriginal Medical Service, or a combination of these. Further information may be obtained by telephoning 1800 801 454.

The National Multiple Sclerosis Society of Australia Summer Vacation Scholarships (L)

- $200 per week
- 6 to 8 weeks between November and March

The scholarships are open to undergraduate students completing three or four years of a full-time course leading to an honours degree in medicine, science, or the biological or health sciences. Research projects must be relevant to multiple sclerosis and carried out at a university department during the summer vacation period. Applications close mid-August.

The Novo Nordisk Student Research Scholarship (L)

- $1,000 to $1,500
- 6 to 9 weeks over the vacation period

The scholarship is available for diabetes-related research at the Department of Endocrinology, Prince of Wales Hospital and is open to students enrolled at any tertiary institution in Australia. Preference will, however, be given to students enrolled in an undergraduate degree in Science or Medicine at UNSW. Selection will be based on interest in research in diabetes mellitus and academic performance. Further information is available from Associate Professor Bernie Tuch, Prince of Wales Hospital, Tel (02) 9382 4814. Applications close 31 October.

Faculty Vacation

Faculty of Life Sciences

Faculty of Life Sciences Vacation Scholarships (L)

- $2,000
- 4 to 8 weeks over the summer vacation period

Applicants must be enrolled in an undergraduate course which allows the scholar to proceed to an honours program in the Faculty of Life Sciences. Selection will be based on academic merit and demonstrated interest in a research discipline of the Faculty of Life Sciences. Applications close 30 October.

Faculty of Science and Technology

Chemistry

The School of Chemistry Summer Vacation Scholarships (L)

- Up to $250 per week
- Up to 8 weeks

Summer Vacation Scholarships are available to undertake research with staff members of the School of Chemistry. Students completing their first year may receive up to $500, for 4 weeks research. Students in their second or third year may receive up to $250 per week for 8 weeks. Further information is available from Dr D.N. Duffy, Executive Assistant, School of Chemistry, UNSW, Tel (02) 9385 4693, Fax (02) 9385 6141, Email d.duffy@unsw.edu.au. Applications close in mid-October.

Mathematics

Vacation Scholarships in Mathematics (L)

- $350 per week
- At least 6 weeks

Vacation scholarships are available for research in the School of Mathematics. Applicants should be enrolled in third year of a mathematics or statistics course and be interested in further study. Scholarships may also be available for exceptional second year students. Additional information is available on the web at: http://www.maths.unsw.edu.au or by contacting Dr Brian Jefferies, School of Mathematics, UNSW, Tel (02) 9385 7086, Email b.jefferies@unsw.edu.au. Applications close in mid-October.
Physics

Vacation Scholarships in Physics (I,L)

- $250 per week
- Up to 6 weeks

Vacation scholarships are available to work with research groups in the School of Physics. Applicants should normally have completed their third year of study and be intending to continue to honours and perhaps postgraduate study in Physics. Exceptional second year students may also be considered. Further information can be obtained from Dr Michael Box, School of Physics, UNSW, Tel (02) 9385 4545, Email m.box@unsw.edu.au. Applications close in mid-October.
Postgraduate Scholarships

Following are details of scholarships available to postgraduate students at UNSW. The scholarships are listed by Faculty and course (e.g. scholarships in Science and Technology or Engineering) or whether they are available to undertake travel. If students from more than one Faculty are able to apply the scholarship is listed in the General Scholarships section.

For further information contact:

The Scholarships and Student Loans Unit

General

Main programs of assistance for postgraduate study

The Australian Postgraduate Awards (APA) (L,R)
- $15,888 pa (1998 rate). Other allowances may also be paid.
- Up to 2 years for a Masters by Research, 3 years for a PhD degree. PhD students may apply for up to 6 months extension in certain circumstances

Applicants must have graduated, or be proposing to graduate in the current academic year, with Honours 1 or equivalent. Students with Permanent Resident status should normally have lived in Australia continuously for 12 months. Applications close 31 October.

The Australian Development Scholarships (ADS) (I)
- Tuition fees, medical cover, airfare and a stipend.
- Duration of the course

This award is for international students from selected countries only. Information and applications can only be obtained from Australian Diplomatic Posts or Australian Education Centres in the home country. Applications normally close at least 12 months before the year of study.

The Overseas Postgraduate Research Scholarships (OPRS) (I,R)
- Tuition fees and medical cover only
- 2 years for a Masters by Research, 3 years for a PhD degree

Eligibility is confined to postgraduate research students who are citizens of countries other than Australia or New Zealand. Applications close 30 September.

Other General

Aboriginal and Torres Strait Islander Researchers Development Program (L,R)
- At least $3,000
- Up to 3 years

The Scholarships are awarded to support research projects by Aboriginal and Torres Strait Islander researchers in the biological, mathematical, physical, chemical, engineering, earth and applied sciences and the humanities and social sciences, which are likely to lead to a significant conceptual advance in understanding of a subject or lead to the solution of an important practical problem. Further information and applications are available from the Research Office, UNSW, Tel (02) 9385 1074 or the Research Office website: http://www.ro.unsw.edu.au. Applications close mid-June.

The Anthony Rothe Scholarship (I,L,R)
- $28,000 pa plus allowances
- Up to 3 years

Applications are open to postgraduate students proposing to undertake a PhD in a field related to the causes, prevention, treatment or cure of leukaemia and allied blood disorders. Information and applications are available from The Secretary, Anthony Rothe Memorial Trust, c/- Brigden & Partners, GPO Box 2564, Sydney NSW 2001. Applications close late August.

The Apex Foundation for Research into Intellectual Disability Research Grants (I,L,R)

Grants may be awarded for new or existing research projects in any discipline concerned with the causes, diagnosis, prevention or treatment of intellectual disability and allied conditions. Applications can be obtained from the Hon. Secretary, Apex Foundation for Research into Intellectual Disability Limited, PO Box 311, Mount Evelyn VIC 3796. Applications close late July.
The Arthritis Foundation of Australia Research & Professional Education Awards (L,R)
• $5,000 - $32,000 pa
• 1 to 3 years
Scholarships, fellowships and grants are available to support research projects into arthritis, osteoporosis and other musculoskeletal disorders. Applicants must be enrolled in studies leading to a Masters by Research or PhD. Further information and applications are available from The Arthritis Foundation of Australia, GPO Box 121, Sydney NSW 2001, Tel (02) 9552 6085, Fax (02) 9552 6078. Applications close early June.

The Asthma Foundation of New South Wales Research Scholarships (l,L,R)
• To be determined
• 1 to 3 years
The scholarships are available for research into asthma including the basic medical services or clinical and psychological investigations. Further information is available from The Asthma Foundation of NSW, Unit 1 “Garden Mews”, 82-86 Pacific Highway, St Leonards NSW 2065. Applications close in early August.

The Australian Brewers Foundation Alcohol Related Medical Research Postgraduate Scholarships (l,L,R)
• Similar to the NHMRC (see NHMRC entry)
• 1 year
Similar to the NHMRC. The scholarships are available to support research into the medical, social and public health aspects of moderate, hazardous or harmful alcohol consumption. Information and applications are available from ABF-Medical Research Advisory Committee, Tel (02) 9552 6688, Fax (02) 9552 1369. Applications close mid-September.

The Australian Coral Reef Society (ACRS) Inc Student Grants (l,L,R,C)
• $1,000 (plus $1,500 Walker prize for the best proposal)
The grant is open to students who are enrolled at an Australian University in a PhD or MSc involving research on coral reefs. Recipients must be a member of, or willing to join the ACRS. Applications normally close late November.

Australian Food Industry Science Centre (AFISC) Scholarships (l,L,R)
• $25,000 pa plus allowances
• Up to 2 years for a Masters by Research, 3 years for a PhD
It is expected that applicants will be of Honours 1 or high 2A standard or equivalent. Graduates from non-food technology disciplines, such as engineering, mathematics and physics, are also encouraged to apply. Further information and applications are available from AFISC, Private Bag 16, Sneydes Road, Werribee VIC 3030, Tel(03) 9742 0111. Applications close early November.

The Australian Federation of University Women (I,L,R,C)
Each year the Federation offers to its members a number of awards for study in Australia and overseas. Details of awards are included in a booklet available from the Australian Federation of University Women Inc, 215 Clarence Street, Sydney NSW 2000, Tel (02) 9299 9888.

The Australian Institute of Nuclear Science and Engineering (AINSE) Postgraduate Research Awards (l,L,R)
• $7,500 supplement to an APA or equivalent scholarship and $5,500 pa for facility costs plus allowances
• Up to 3 years
The Institute offers awards for postgraduate students whose research projects are associated with nuclear science or its applications. Applicants must be eligible for an APA or equivalent scholarship after having completed a Bachelor of Engineering or Bachelor of Science with Honours. At least one month per year must be spent at the Institute at Lucas Heights, NSW. Applications close early December.

The Australian Kidney Foundation Grants and Scholarships (l,L,R)
The AKF supports research into the causes, prevention and treatment of disorders of the kidneys and urinary tract. Programs include Medical Research Seeding Grants, Medical Research Equipment Grants, Biomedical Research Scholarships and Summer Vacation Scholarships. Applications are available from the Medical Director's Office, Australian Kidney Foundation, GPO Box 9993, Adelaide SA 5001, Tel (08) 8267 4555, Fax (08) 8267 4450, Email: ttaylor@terra.net.au. Applications close 30 June.

The Australian and New Zealand Council for the Care of Animals in Research and Teaching (ANZCCART) Student Award (l,L,R,C)
• $1,000 for attendance at the annual conference
Applicants can be postgraduate students from any discipline. The award provides assistance for a student to attend the annual conference. Applications are available from ANZCCART, PO Box 19, Glen Osmond, SA, 5064, Tel (08) 303 7325. Applications close in July.
The Australian Pain Relief Association and Australian Pain Society PhD Scholarship (L,R)

- $16,750 pa plus allowances
- Up to 3 years subject to satisfactory progress

Applicants must hold an Honours 1 degree and be proposing to undertake a PhD in the mechanism, diagnosis, treatment or epidemiological features of acute or chronic (including cancer) pain. Further information and applications are available from the Australian Pain Society Secretariat, PO Box 629, Willoughby NSW 2068, Tel (02) 9439 6744. The award is offered bi-annually. Applications close early November.

The Australian Society for Microbiology (L,R,C)

- $100 - $10,000

The Australian Society for Microbiology (ASM) provides prizes and awards, for study, research and projects related to Microbiology. More information can be obtained from the ASM National Office, Unit 23/20 Commercial Rd, Melbourne VIC 3004, Tel (03) 9867 8699, Fax (03) 9867 8699.

The Australian Spinal Research Foundation Postgraduate Research Awards (L,L,R)

- Equivalent to Australian Postgraduate Award (see APA entry under General)
- Up to 2 years for a Masters by Research or 3 years for a PhD degree

Applicants must be undertaking a Masters by Research or PhD in an area designed to contribute to an understanding of the anatomical and physiological mechanisms underlying chiropractic care or the clinical efficiency of chiropractic care and management procedures. Information and applications are available from the Australian Spinal Research Foundation, PO Box 1047, Springwood Qld 4127, Tel (07) 3808 4098, Fax (07) 3808 8109, Email: t.flack@qut.edu.au. Applications close mid-October.

The Captain Reg Saunders Scholarship (L,R,C)

- $3,000
- Up to 4 years

Applicants must be Aboriginals or Torres Strait Islanders eligible to commence a university degree in the area of psychology, nursing, applied science, social work or education. Further information and applications are available from the Aboriginal Education Program, UNSW, Tel (02) 9385 3805.

The Community Health and Anti-Tuberculosis Association - The Harry Windsor Biomedical and Medical Research Scholarship (L,R)

- $23,630 pa (Medical postgraduates), $15,888 (Biomedical Science graduates) plus allowances
- Up to 3 years

Applicants must be proposing to undertake full-time postgraduate medical research in the areas of tuberculosis, respiratory disease (particularly community aspects) or the health of disadvantaged people. Only original application forms will be accepted and are available from The Executive Officer, Community Health and Anti-Tuberculosis Association, PO Box 200, Rose Bay, NSW 2029, Fax (02) 9371 9768. Applications close 1 August.

The Cooperative Research Centre for Eye Research and Technology (CRCERT) Postgraduate Research Scholarship (L,L,R)

- $15,321 - $19,827 pa (depending on the type of research)
- 3 years

The scholarship is available for full-time PhD studies in subjects such as optometry, microbiology, biochemistry, optics, materials science, polymer chemistry and immunology. For information about application procedures applicants should initially contact Dr Mark Wilcox, CRCERT, University of New South Wales, Sydney 2052, Tel (02) 9385 0222.

The Clean Air Society of Australia and New Zealand Inc Postgraduate Research Award (L,L,R,C)

- $5,000 pa
- 1 year, with a possible 1 year extension

The scholarship is open to students enrolled in a Masters degree program with a significant research component connected with air quality. Applications close early February.

The CSIRO Division of Fisheries Supplementary PhD Awards (L,R)

- $10,000 pa
- Up to 3 years

This scholarship is a supplement to any primary scholarship (eg APA) for PhD study in marine studies, environmental studies, zoology, botany, broadly-based life sciences, economics and mathematics. Applications close early March.

The Dairy Research and Development Corporation (DRDC) Postgraduate Education Program (L,R)

Awards to undertake full-time postgraduate research degrees are available in a wide range of disciplines including dairy manufacturing, farm research, economics and marketing, and agricultural extension. New and experienced applicants are welcome to apply. Guidelines and applications are available from the Scholarships and Student Loans Unit or DRDC, Level 3, 84 William Street, Melbourne VIC 3000, Tel (03) 9602 5300. Applications close 31 October.
The Forest and Wood Products Research and Development Corporation (FWPRDC) Scholarships (L,R)

- Up to $25,000 pa
- Up to 3 years

The scholarships are open to students undertaking a postgraduate research degree at an Australian University. Selection is based on academic merit and the relevance of the project to FPWRDC Programs. Further information and applications are available from the Executive Director, FWPRDC, PO Box 157, Bond University Qld 4229, Fax (07) 5578 7911. Applications close early October.

The Garnett Passe and Rodney Williams Memorial Foundation Research Scholarships in Otolaryngology (L,R,C)

- $15,364 pa for science graduates, $22,850 pa for medical graduates, plus allowances
- 3 years

The scholarships are available to medical or science graduates for research in Otolaryngology or in related fields of biomedical science. Applicants must be enrolled in a postgraduate degree in Australia or New Zealand. Information and applications are available from the Garnett Passe and Rodney Williams Memorial Foundation, Pelham House, 165 Bouverie St, Carlton VIC 3053, Tel (03) 9349 2622, Fax (03) 9349 2615. Applications normally close in August.

The Gerontology Foundation Grant-In-Aid (L,R,C)

- Up to $5,000 for a specific research project

Grants-In-Aid are awarded to students who have not had their work published in a refereed journal and who have not won any research grants in open competition. The grant supports a proposed scientific investigation topic specified by the Foundation. Information and applications are available from The Executive Officer, Gerontology Foundation of Australia Inc, PO Box 199, Annandale NSW 2038. Applications normally close late July.

The Gowrie Scholarship Trust Fund (L,R)

- $4,000 pa
- 2 years

Applicants must be members of the Forces or children (or grandchildren or lineal descendants) of members of the Forces who were on active service during the 1939-45 War. Tenable at tertiary institutions in Australia and overseas. Applications close early October.

The Grains Research and Development Corporation (GRDC) Junior Research Fellowship (L,R)

- $21,000 pa plus up to $3,000 to the supporting institution, some conference/workshop attendance allowances
- Up to 3 years

Applicants must be undertaking full-time PhD studies in fields of high priority to the grains industry. Applications close mid-October.

The Great Barrier Reef Marine Park Authority Research Support (L,R)

- $1,500

Applicants must be undertaking a full-time PhD research project that could contribute to the planning and managing work undertaken by the Great Barrier Reef Marine Park Authority. Applications and further information may be obtained from the Executive Officer, Great Barrier Reef Marine Park Authority, PO Box 1379, Townsville QLD 4810, Tel (077) 818811. Applications close mid-December.

The Harold G. Conde Memorial Fellowship (L,R,C)

- $5,000 pa subject to the availability of funds
- Up to 3 years

Applicants should be honours graduates. The Fellowship is a supplementary award to be held in conjunction with another scholarship and is for postgraduate study or research in a field related to the electricity industry. Applications close early April.

The Julian Small Foundation Annual Research Grant (L,R)

- Up to $5,000

Applications are open to postgraduate and undergraduate students undertaking research and involved in the study of law, or industrial relations. Selection will be based on a research proposal which outlines how the research will advance thinking and practice in the area of employment law and industrial relations in Australia. Applications close mid-August.

The June Opie Fellowship (L,R,C)

- NZD$12,000
- 1 year

The award is administered by the University of Auckland and is available to Citizens and Permanent Residents of Australia, Canada and New Zealand, and is designed as an incentive for students of high academic achievement who have a severe disability. It is primarily intended for those who plan to undertake postgraduate study with a
view to preparing themselves for a role in the professions, in politics or more particularly in university teaching and research and who have disability issues as a continuing interest. Applications close with the University of Auckland in late October.

Land and Water Resources Research and Development Corporation (LWRRDC) Postgraduate Research Scholarships (L,R)

- $20,000 pa plus $5,000 for operating expenses
- 2 years for Masters, 3 years for a PhD degree

General Research Scholarships are available for research that will lead to better management, sustainable use and conservation of land, water and vegetation resources in Australia. Irrigation Research Scholarships are specifically for research that will lead to better management, sustainable use and conservation of natural resources in Australia. Applications are available from the Scholarships and Student Loans Unit or LWRRDC, GPO Box 2182, Canberra ACT 2601, Tel (02) 62573379. Applications close early October.

The Lionel Murphy Postgraduate Scholarship (L,R,C)

- $15,000 pa for study in Australia, up to $30,000 for study overseas
- 1 year

Applicants must be intending to undertake a postgraduate degree in Law, Science, Legal Studies or other appropriate discipline. Preference will be given to applicants who propose to study the law and legal system in a social context, science/law or international law. Information and application forms are available from the Lionel Murphy Foundation, GPO Box 4545, Sydney NSW 2001, Tel (02) 9223 5151, Fax (02) 9223 5267. Applications close mid-September.

The MBF Health Research Awards-Postgraduate Research Scholarships

- Similar to NHMRC guidelines

The scholarships are open to students undertaking an MD or PhD in the areas of preventative health care, disease/drug management, evaluation of health care delivery outcomes, health policy evaluation and public health promotion/communication. Applications are available from The Executive Assistant, Research Team, Medical Benefits Fund of Australia Ltd, 97-99 Bathurst St, Sydney NSW 2000. Tel (02) 9323 9158, Fax (02) 9323 9168. Applications close late February.

The Meat and Livestock Australia (MLA) Studentships and Junior Research Fellowships (L,R,C)

- $15,888 pa for study in a Masters or Diploma, $20,000 for a PhD in Australia or US$17,500 for study overseas, plus airfares, insurance and allowances
- 2 years for Studentships (Masters or Diploma), 3 years for Junior Research Fellowships (PhD)

Applicants should be proposing to undertake research in disciplines relevant to the meat and livestock industry. Applications normally close late September.

The Menzies Research Scholarship in Allied Health Sciences (L,R)

- Up to $24,000 pa
- 2 years

The scholarship is awarded to stimulate research in the non-medical allied health disciplines. Applicants should be full-time students, who have completed the first stage of a PhD program. Applications are available from The Menzies Foundation, 210 Clarendon St, East Melbourne VIC 3002, Fax (03) 9417 7049. Applications close late June.

The Minerals Council of Australia Student Research Award (L,R)

- $500 plus travel and accommodation for the Environmental Workshop

The award is open to scholars who have completed or are undertaking postgraduate studies, and is aimed at encouraging excellence in student research and communication in the field of environmental management in mining. The award will be judged on a paper written for and presented at the Minerals Council of Australia's Environmental Workshop. Nominations close early May.

The National Health and Medical Research Council (NHMRC) Training Scholarship for Aboriginal Health Research (L,R)

- $15,888 - $23,630 pa (depending on qualifications)
- Up to 3 years

Applicants must be undertaking an undergraduate or postgraduate degree which includes, or leads to, research relevant to Aboriginal health. Applications will be assessed in terms of previous qualifications and experience. Consideration will be given to prior knowledge and experience of Aboriginal culture and health. Applications close early August.

The National Health and Medical Research Council (NHMRC) Dora Lush Biomedical Postgraduate Scholarships (L,R)

- $15,888 pa, $20,503 for HIV/AIDS research, $17,888 for special initiative scholars, plus allowances
- Up to 3 years

Applicants must have completed a Science degree with Honours, or equivalent, at the time of submission of the application. Current APA holders or students enrolled in the final year of an Honours degree at the time of application are not eligible. Applications close early August.
The National Health and Medical Research Council (NHMRC) Medical and Dental Postgraduate Scholarships (L,R)

- $23,630 pa plus allowances
- Up to 3 years

The scholarships are open to medical and dental graduates to undertake full-time research. Applications are particularly encouraged for research in the following special initiative areas: Aboriginal health and disease, prostate cancer, alcohol and substance abuse, nursing and allied health services, dementia, schizophrenia, injury and HIV/AIDS. Applications close early August.

The National Health and Medical Research Council (NHMRC) Public Health Postgraduate Scholarships (L,R)

- $23,630 pa (medical/dental graduates), $15,888 pa (other graduates), $20,503 pa for HIV/AIDS research, $17,888 pa for special incentive scholars, plus allowances
- Up to 3 years

The scholarships are open to medical/dental or health related graduates to obtain training in public health research. Applications are particularly encouraged for research in the following special initiative areas: Aboriginal health and disease, prostate cancer, alcohol and substance abuse, nursing and allied health services, dementia, schizophrenia, injury and HIV/AIDS. Applications close early August.

The National Heart Foundation of Australia Postgraduate Medical and Science Research Scholarships (L,R)

- $17,637 pa (science), $23,257 pa (medical) plus $1,200 departmental allowance
- Up to 3 years subject to satisfactory progress

Scholarships are available to science or medical graduates for research in cardiovascular function, disease or related problems. Applicants must usually reside in Australia. Further information and applications are available from the Medical Director, National Heart Foundation, PO Box 2, Woden ACT 2606. - Tuition fees, living allowance, travel and other allowances
- Duration of course
Scholarships are available to Australian citizens for Masters or PhD study in Korea. Preference will be given to applicants with a knowledge of the Korean language. Information and applications are available from the Embassy of the Republic of Korea, 113 Empire Circuit, Yarralumla ACT 2600, Tel (02) 6273 3044, Fax (02) 6283 4839. Applications close early May.

The Lady Davis Fellowship Trust (L,R,C)
The Lady Davis Trust provides awards for study, research, or teaching at graduate, post-doctoral or professorial levels at the Hebrew University or the Technion (Israel Institute of Technology). Information is available from the Australian Friends of the Hebrew University, 36 Hawthorn Road, South Caulfield VIC 3162, Tel (03) 9272 5511. Applications normally close in November.
The Laporte Centenary Scholarship (L,R)

- Airfare, living allowance, tuition fees
- 3 to 6 months

The scholarship is tenable for postgraduate research in the United Kingdom. Candidates should be undertaking a postgraduate qualification in a science-based discipline, preferably in the practical application of special chemicals. Applications are available from the Secretary, Sir Robert Menzies Centre for Australian Studies, University of London, 28 Russell Square, London, WC1B 5DS, UK, Tel +44 171 530 5876, Fax +44 171 580 9627, Email: mcintyre@sas.ac.uk. Applications close early November.

Learn Arabic in Cairo Scholarship (I,L,R,C)

- Course fees, AU$70 per month living allowance
- 8 months

Scholarships are available to undertake the Arabic as a Foreign Language course in Cairo. Applications are available from the Embassy of the Republic of Egypt, 1 Darwin Avenue, Yarralumla ACT 2600, Tel (02) 6273 4437, Fax (02) 6273 4279. Applications close 1 July.

The Lionel Murphy Postgraduate Scholarship (L,R,C)

- $15,000 pa for study in Australia, up to $30,000 for study overseas
- 1 year

Applicants must be intending to undertake a postgraduate degree in Law, Science, Legal Studies or other appropriate discipline. Preference will be given to applicants who are proposing study of the law and legal system in a social context, science/law or international law. Information and application forms are available from the Lionel Murphy Foundation, GPO Box 4545, Sydney NSW 2001, Tel (02) 9223 5151, Fax (02) 9223 5267. Applications close 1 July.

The Lloyd’s Register of Shipping Chevening Scholarship (L,R,C)

- Tuition fees, maintenance allowance, airfare
- 1 year

Two scholarships are available to graduates with proven academic merit and leadership potential, to pursue a postgraduate course at a British University. One scholarship is for a one-year MSc course in Marine Engineering/Naval Architecture and the other is for a one-year MSc course in Environmental Sciences. Applicants must hold, or expect to complete before October, an Honours 1 or 2/1 degree. Application forms are available from the British Council, PO Box 88, Edgecliff NSW 2027, Tel (02) 9326 2022, Fax (02) 9327 4868. Applications close late October.

The Meat and Livestock Australia (MLA) Studentships and Junior Research Fellowships (L,R,C)

- $15,888 pa for study in a Masters or Diploma, $20,000 for a PhD in Australia or US$17,500 for study overseas, plus airfares, insurance and allowances
- 2 years for Studentships (Masters or Diploma), 3 years for Junior Research Fellowships (PhD)

Applications should be proposing to undertake research in disciplines relevant to the Australian meat and livestock industry. Applications normally close in September.

The Menzies Scholarships (L,R,C)

The Menzies Scholarships are intended to provide funds for Australian Citizens (aged 21 to 45) who wish to travel to Britain to undertake a course of research and to write a paper on a subject of concern and importance to the relationship between the Australian and British communities. Tertiary qualifications are preferred but the awards are not restricted to graduates or students. Information and applications are available from the Australia-Britain Society, GPO Box 551, Sydney NSW 2000, Tel (02) 223 5244. Applications normally close October.

Nanyang Technological University Singapore Research Scholarships (L,R)

- Tuition fees plus SS$1,400-$1,500 per month allowance
- 2 years for a Masters, 3 years for a PhD degree

Research scholarships are available to graduates with good Honours degrees to undertake postgraduate study. Information and application forms are available from The Registrar, Nanyang Technological University. Email: gleong@ntu.edu.sg, Fax: +65 7911604.

The NSW Ministry for the Arts Scholarships (L)

- $5,000 - $25,000 (depending on the award)

The NSW Government offers a number of scholarships and awards to writers, artists and scholars living in NSW. Further information is available from The New South Wales Ministry for the Arts, GPO Box 5341, Sydney NSW 2000, Tel (02) 9228 3533, Fax (02) 9228 4722.

The Oxford Nuffield Medical Fellowship (L,R)

- Between 27,525 and 31,945 pounds sterling pa (subject to tax), plus travel expenses
- 2 years with a possible one year extension

The awards are available for research in a clinical medicine or medical science department of the University of Oxford. The appointee is required to return to Australia for at least 3 years to perform work similar to that carried out in the United Kingdom during the tenure of the Nuffield fellowship. Further information is available from Australian Academy of Science.
Overseas Research Students Awards Scheme (United Kingdom) (L,R,C)
- Difference in tuition fees for a ‘home’ and an ‘overseas’ student
The ORS Scheme provides partial remission of tuition fees to overseas students of outstanding merit and research potential. The awards are open to graduates who will be commencing full-time research studies at a participating institution in the United Kingdom, and who will be liable to pay tuition fees at the overseas student rate. Information and applications must be obtained directly from the Registrar or Secretary of the institution students are applying to in the United Kingdom. Applications normally close in April in the year of tenure.

Queen’s Trust Grants (L)
- Up to $15,000
The Queen’s Trust provides grants to Australian Citizens aged 18-28 years, for the pursuit of excellence in their chosen fields. Support is provided for projects studying the advancement of Australian youth, development of community leadership and/or other skills which will be of benefit to Australia. Information and applications may be obtained from the Queen’s Trust, Tel 1800 033 625. Applications close in late April.

The Rhodes Scholarship (L,R,C)
- Tuition fees, assistance with travel expenses, up to $17,500 allowance
- 2 years, with a possible one year extension
The scholarship is tenable for postgraduate study at Oxford University. Applicants must be aged between 19 and 25 and have an honours degree or equivalent. Selection for the scholarship will be based on academic and personal achievements and community spirit. Further information is available on the Rhodes home page http://www.usyd.edu.au/su/rhodes. Applications close late August.

The Robert Gordon Menzies Scholarship to Harvard (L,R,C)
- Up to $25,000 towards tuition fees, living expenses or travel costs (students who enrol in the Harvard Business School may be eligible for an additional $12,000)
- 1 year
The scholarships are tenable at one of the Harvard University graduate schools. Applicants must be postgraduates of an Australian tertiary institution who intend to return to Australia after studies at Harvard or to represent Australia overseas. The scholarships are awarded on the basis of academic excellence and personal qualities such as leadership and public duty. The successful applicant will be expected, when circumstances permit, to repay the scholarship in later years. Applications and additional information may be obtained from the Chair, Board of Faculties, ANU, Canberra ACT 0200. Fax (02) 6248 5561, Email: lynne.colley@anu.edu.au. Applications close at the end of December.

Rotary Foundation Ambassadorial Scholarships (I,L)
The Rotary Foundation offers scholarships to study or train in another country where Rotary clubs are located. Applicants must have completed at least two years of a university or college course, or have completed high school and have been employed for at least two years. Applicants must also be Citizens of a country in which there is a Rotary club. Information regarding scholarship availability, closing dates and applications should be obtained from the applicant’s local Rotary club.

The Russian Scholarships (L,R,C)
- Payment an allowance and medical cover
Scholarships are available to Australian citizens to undertake undergraduate or postgraduate study in journalism, law, economics, international relations or medicine in Russia. Applications normally close in May.

The Sir Charles Mackerras / Australia-Britain Society Music Scholarship (L)
- £8,000 sterling
The scholarship is open to an outstanding young conductor, composer or repetiteur, aged between 21 and 30 who is likely to be an influential leader in the field of music, to undertake study in the United Kingdom or the Czech republic for at least six months. Application forms are available from the British Council, PO Box 88, Edgecliff NSW 2027, Tel (02) 9326 2022, Fax (02) 9327 4868, Email: bcsydney@sprint.com. Applications close early November.

The STA Travel Grant (I,L,R,C)
- Up to $3,000
Applicants must be undertaking study leading to a degree or diploma of the University and a member of the University Union. The grant is awarded on the basis of significant contribution to the community life of the University involving a leadership role in student affairs and the University Union and the relevance and merit of the proposed travel to the student’s academic program or University Union activities. Applications close mid-April.

The Swedish Institute Guest Scholarships (I,L)
- SEK 7,100 per month living allowance
- 9 months (1 academic year)
The scholarships are open to students/researchers who wish to travel to Sweden for studies/research which cannot equally well be pursued in countries other than Sweden. Applicants must establish contact with a Swedish University willing to accept the applicant for the proposed studies. Initial requests for application forms must be made in writing, including the applicant’s name and address, nationality, educational background and work experience, knowledge of any languages, statement of the purpose of study/research in Sweden, and a copy of a letter of invitation from a Swedish University Department. Requests for applications should be sent to the Swedish Institute, Department for Exchanges in Education and Research, PO Box 7434, SE-103 91, Stockholm, Sweden. Email: grantinfo@si.se. Homepage: http://www.si.se. Requests for application forms must reach the Swedish Institute before 1 December.

Swiss Government Scholarships (L,R,C)

- Tuition fees, living allowance, medical insurance and assistance with airfares
- 1 academic year

One scholarship is available for art/music and two for other disciplines, to undertake postgraduate study or attend an art school/conservatory in Switzerland. Applicants will be required to pass a language test in German or French. Applicants must be aged under 35. Applications close early October.

The Tokyo Metropolitan Government Foreign Student Scholarship Program (L,R,C)

- 200,000 yen per month, tuition and travel expenses, plus allowances
- Up to 2.5 years

Scholarships are available for a Masters degree or postgraduate research at Tokyo Metropolitan University, or Tokyo Metropolitan Institute of Technology. Applicants must be aged under 35 years, be Australian Citizens from New South Wales, and be graduates of a university in NSW. Applications close early April.

The Turkish Government Language & Culture and Higher Education Scholarships (I,L)

Scholarships are available to high school graduates to undertake study at a Turkish University. Students may be required to undertake a one year Turkish language course before commencement of the degree. The scholarships pay a monthly allowance for the duration of the course. Scholarships are also available to university graduates who would like to attend Turkish Language and Culture Summer Courses conducted by Turkish Studies Centre. Further information is available from the Embassy of the Republic of Turkey, 60 Mugga Way, Red Hill ACT 2603. Applications close 30 May for Language and Culture Scholarships, and 15 July for Higher Education Scholarships.

University College London Scholarships

The University College London offers various scholarships to students from overseas, who hold an offer of admission to a full-time programme of study at UCL. Applicants must be self-financing and liable to pay tuition fees at the rate for overseas students. Information and applications are available from the International Office, University College London, Gower St, London WC1E 6BT, UK, Tel +44 171 380 7708, Fax +44 171 380 7380, Email: international@ucl.ac.uk.

Yokoyama Scholarship Awards (L,R,C)

Assistance may be available for undergraduate and postgraduate study at a Japanese University. Information is available from Mr Masao Iwashita, Secretary-General, Yokoyama Scholarship Foundation, 6F Shiozaki Building, 2-7-1 Hirakawacho, Chiyoda-Ku, Tokyo 102 Japan, Tel (813) 3238 2913, Fax (813) 5275 1677.
Prizes

The following information summarises prizes awarded by the University. Prizes are grouped by level as follows: Undergraduate, common Undergraduate/Postgraduate, Postgraduate. Within these groups prizes are listed under the faculty, school or department in which they are awarded. Prizes which are not specific to any school are listed under General. Law prizes are awarded only for students enrolled in the LLB or Jurisprudence courses.

Information regarding the establishment of new prizes may be obtained from the Student Information and Systems Office.

Prize information is normally provided in the following format:
- Prize value
- Conditions

Undergraduate Prizes

The University Of New South Wales
(General Category for Prizes)

The Heinz Harant Challenge Prize
- $1000 (bi-annual prize)
  For an original piece of assessable work submitted in the course of completing a General Education subject

The Sydney Technical College Union Award
- $400 and a bronze medal
  For leadership in student affairs combined with marked academic proficiency by a graduand

The UNSW Human Rights Essay Prize
- $400
  For the best research essay on a Human Rights topic by a student enrolled at the University of New South Wales proceeding to a Bachelor degree

Faculty of Life Sciences

The Faculty of Life Science Prize for 1st Year Science
- $250
  For outstanding performance in Year 1 of the Science course (3930 or 3970)

The Faculty of Life Science Prize for 2nd Year Science
- $250
  For outstanding performance in Year 2 of the Science course (3930 or 3970)
The Faculty of Life Science Prize for 3rd Year Science
- $250
For outstanding performance in Year 3 of the Science course (3930 or 3970)

The Faculty of Life Science Prize for 1st Year Advanced Science
- $250
For outstanding performance in Year 1 of the Advanced Science course

Faculty of Life Science Prize for 2nd Year Advanced Science
- $250
For outstanding performance in Year 2 of the Advanced Science course

The Faculty of Life Science Prize for 3rd Year Advanced Science
- $250
For outstanding performance in Year 3 of the Advanced Science course

The Faculty of Life Sciences Prize for 4th Year Advanced Science
- $250
For outstanding performance in Year 4 of the Advanced Science course

Department of Applied Geology

The F C Loughnan Prize for First Year Geology
- $100
For the best performance in the Year 1 Geology component of the Bachelor of Science degree course

The F C Loughnan Prize in Applied Geology
- $340
For the best performance in the Year 3 Geology component of the Bachelor of Science degree course

The Lorant Eotvos Prize
- $300 and a bronze medal
For the best performance in GEOL4111 Advanced Geological Techniques in the final year of the Bachelor of Science in Applied Geology or the Bachelor of Science in Applied Geology at Honours level course

The Prospector Supplies Prize
- A Brunton Compass
For meritorious performance in the field work associated with Year 2 of courses 2500 Geology or 3000 Applied Geology

The Rio Tinto Mapping Prize in Applied Geology
- $250
For the best performance in GEOL3031 Stratigraphy and Basin Analysis - Geological Field Mapping Tutorial in the Bachelor of Science degree course

The Rio Tinto Ore Deposits Prize
- $200
For the best overall performance in a Year 3 Economic Geology subject, or in any subject or subjects which may be substituted therefore in the Bachelor of Science degree course

The Structural Geology Field Prize
- $100 and winner's name engraved on Perpetual Trophy
For the best performance in the Year 3 Structural Geology Field Tutorial in the Bachelor of Science in Applied Geology course or the Bachelor of Science course in the Board of Studies in Science and Mathematics (Geology Program)

School of Biochemistry and Molecular Genetics

The AMRAD Biotech Student Prize
- $250
For the best performance in BIOC3111 Molecular Biology of Proteins
The Australasian Association of Clinical Biochemists Prize

- $100, 1 year Associate Membership of the Association and a plaque
For the best performance in BIOC3261 Human Biochemistry in the Bachelor of Science degree course

The Beckman Instruments Prize of the Biochemical Graduates Association

- $200
For the best performance in the Year 4 Biochemistry Honours program in the Bachelor of Science degree course

The Fisher Biotec Prize

- $200
For the best performance in the examinations in level 2 Biochemistry subjects in the Bachelor of Science degree course

The Johnson & Johnson Research Pty Ltd Prize

- $200
For the best performance in BIOC3271 Molecular Cell Biology

The Life Technologies Prize

- $200
For the best performance in BIOC3281 Recombinant DNA Techniques and Molecular Biology

The Selby - Biolab Prize

- $200
For the best performance in the examinations in level 3 Biochemistry subjects in the Bachelor of Science degree course

The WJ O'Sullivan Prize

- $200
For the best performance in BIOC2329 Medical Biochemistry and Genetics

The Australasian Association of Clinical Biochemists Prize

- $100, 1 year Associate Membership of the Association and a plaque
For the best performance in BIOC3261 Human Biochemistry in the Bachelor of Science degree course

The Beckman Instruments Prize of the Biochemical Graduates Association

- $200
For the best performance in the Year 4 Biochemistry Honours program in the Bachelor of Science degree course

The Fisher Biotec Prize

- $200
For the best performance in the examinations in level 2 Biochemistry subjects in the Bachelor of Science degree course

The Johnson & Johnson Research Pty Ltd Prize

- $200
For the best performance in BIOC3271 Molecular Cell Biology

The Life Technologies Prize

- $200
For the best performance in BIOC3281 Recombinant DNA Techniques and Molecular Biology

The Selby - Biolab Prize

- $200
For the best performance in the examinations in level 3 Biochemistry subjects in the Bachelor of Science degree course

The WJ O'Sullivan Prize

- $200
For the best performance in BIOC2329 Medical Biochemistry and Genetics

The Amersham Modern Techniques Prize in Biotechnology

- $250
For the best performance in BIOT3061 Monoclonal Antibody and Genetic Techniques in Biotechnology

The Yakult Biotechnology Prize

- $250
For the best performance in Stage 4 (Honours) of the Bachelor of Science in Biotechnology degree course

School of Chemistry

The Bosworth Prize in Physical Chemistry

- $200 and a bronze medal
For the best performance in CHEM3011 Physical Chemistry in the Bachelor of Science degree course

The Inglis Hudson Bequest

- $15
For the best performance in CHEM2021 Organic Chemistry

The Jeffery Bequest

- $100
For the best performance in CHEM2021 Organic Chemistry

The June Griffith Memorial Prize

- $60
For the best performance in Level 1 Chemistry subjects in the Bachelor of Science degree course

The Merck Sharp & Dohme (Australia) Pty Limited Prize

- $150
For the best performance in Level 2 Chemistry subjects in the Board of Studies in Science and Mathematics
The Merck Sharp & Dohme (Australia) Pty Limited Prize
• $150
For the best performance in Level 3 Chemistry subjects in the Board of Studies in Science and Mathematics

The RACI Analytical Chemistry Group Prize
• $150
For the best performance in CHEM3041 Analytical Chemistry and CHEM3141 Advanced Analytical Chemistry

The School of Chemistry Honours Thesis Prize
• $200
For the best performance in the Honours Research Project (thesis and oral examination) in the Bachelor of Science degree course

The University of New South Wales Chemical Society George Wright Prize
• $100
For meritorious performance in Level 2 Chemistry subjects

The University of New South Wales Chemical Society Parke-Pope Prize
• $100
For meritorious performance in Level 3 Chemistry subjects

School of Geography
The Jack Mabbutt Medal
• A bronze medal
For the best performance in the Year 4 Project in Applied Geography in the Bachelor of Science degree course

The Jack Mabbutt Prize
• $150
For the best performance by a student in Year 3 of the Bachelor of Arts or Bachelor of Science degree course proceeding to Honours in Geography

School of Materials Science and Engineering
The ACI Glass Packaging Prize
• $200
For outstanding quality in an Honours Thesis in one of the areas of glass or glass-ceramics in the Bachelor of Engineering in Ceramic Engineering degree course

The ANSTO Prize
• $100
For the best performance in Year 4 of the Bachelor of Engineering in Ceramic Engineering degree course

Department of Food Science and Technology
The Nestlé Australia Limited Prize
• $200
For the best performance in FOOD1400 Project in the Bachelor of Science in Food Science and Technology degree course

The Wilfred B S Bishop Prize
• $75
For the best overall performance in the Bachelor of Science (Technology) degree by a student who has made a significant contribution to staff and student activities

The Australasian Ceramic Society Prize
• $100
For the highest overall course aggregate by a student completing the final year of the Bachelor of Engineering in Ceramic Engineering degree course

The Australasian Corrosion Association (NSW) Prize
• $150
For the best performance in MATS1213 Design for Corrosion Control in the Bachelor of Metallurgical Engineering degree course
The Boral Bricks Prize

- $500
For the best performance in MATS2273 Chemistry of Ceramic Processing, Unit 2, Technical and Non-Technical Ceramics in the Bachelor of Engineering in Ceramic Engineering degree course

The Capral Aluminium Limited Prize

- $200
For the best performance in MATS1284 Light Alloys

The Carpenter Advanced Ceramics Prize

- $100
For the best overall academic performance in Year 2 of the Bachelor of Engineering in Ceramic Engineering degree course

The Commercial Minerals Limited Prize

- $200
For the best performance in MATS2133 Ceramic Raw Materials in the Bachelor of Engineering in Ceramic Engineering degree course

The Fernz Minerals Prize

- $250
For the most aptitude and technique shown in the combined laboratory subjects MATS2153 Ceramic Processing Laboratory and MATS2203 Physico-Chemical Ceramics Laboratory (with each subject receiving one half of the weighting for the average) in the Bachelor of Engineering in Ceramic Engineering degree course

The Ferro Corporation (Australia) Prize

- $250
For the best performance in MATS2123 Ceramic Process Principles 2 in the Bachelor of Engineering in Ceramic Engineering degree course

The Hugh Muir Prize

- $275
For the best performance by a student in the final year seminar class, or who in the opinion of the Head of School, has contributed most to the corporate life of the School of Materials Science and Engineering

The Institute of Materials Engineering Australasia Prize

- $200 and 1 year membership of the Institute
For the best performance in MATS1022 Materials Process Principles

The Max Hatherly Prize

- $275
For the best performance in MATS1002 Microstructural Analysis

The Monier PGH Prize

- $1000
For the best performance by a graduating student in the Bachelor of Engineering in Ceramic Engineering degree course

The Sialon Ceramics Prize

- $100
For the best performance in an honours thesis that reflects an advancement in the technology and development of advanced ceramics in the Bachelor of Engineering in Ceramic Engineering degree course

The Taylor Ceramic Engineering Prize

- $150 and a Plaque
For the greatest overall amount of ingenuity shown in professional activities by a graduating student in the Bachelor of Engineering in Ceramic Engineering degree course

The Thermal Ceramics Australia Pty Limited Prize

- $200
For the best performance in MATS2254 Ceramic Engineering Design in the Bachelor of Engineering in Ceramic Engineering degree course

The Wallarah Minerals Prize

- $100
For the best performance in an honours thesis in the Bachelor of Engineering in Ceramic Engineering degree course
The Welding Technology Institute of Australia Prize

- Books worth approximately $200 and 1 year membership of the Institute

For the best performance in MATS1214 Welding and Other Joining Processes

The Western Mining Corporation Limited Prize

- $150

For the best overall performance in Year 3 full-time (or its part-time equivalent) in the Bachelor of Metallurgical Engineering or Bachelor of Science (Technology) in Metallurgy degree course

The Western Mining Corporation Limited Prize

- $150

For the best overall performance in Year 4 full-time (or its part-time equivalent) in the Bachelor of Metallurgical Engineering in Process Metallurgy or the Bachelor of Science (Technology) in Metallurgy degree course

School of Mathematics

The Applied Mathematics Prize

- $100

For excellence in Level 3 Applied Mathematics subjects in a Bachelor degree or Diploma course

The C H Peck Prize

- $200

For the best performance in Year 2 Mathematics by a student proceeding to Year 3 in the School of Mathematics

The Head of School’s Prize

- $100

For excellence in four or more Mathematics units in Year 2 in a Bachelor degree or Diploma course

The J R Holmes Prize

- $100

For the best performance in Level 3 Pure Mathematics subjects in a Bachelor degree or Diploma course

The J R Holmes Prize

- $100

For excellence in at least 4 pass-level Pure Mathematics Level 3 units, taken over no more than two consecutive years by a student in the Bachelor of Science, Bachelor of Arts or Bachelor of Education degree course

The Michael Mihailavitch Erihman Award

- $1000

For the best performance in a Mathematics Program, in examinations conducted by the School of Mathematics in any one year

The School of Mathematics Prize

- $100

For the best performance in MATH1131 Mathematics 1A or MATH1141 Higher Mathematics 1A, and MATH1231 Mathematics 1B or MATH1241 Higher Mathematics 1B in a Bachelor degree or Diploma course

The School of Mathematics Prize

- $100

For the best performance in basic Level 2 Higher Mathematics units in a Bachelor degree or Diploma course

The Statistical Society of Australia (NSW Branch) Prize

- $200

For the best performance in Theory of Statistics subjects

The Towers Perrin Fourth Year Prize

- $200

For the best performance in the Year 4 project in the Bachelor of Science at Honours level within the School of Mathematics

The Towers Perrin Third Year Prize

- $200

For the best performance in both MATH3610 Higher Pure Mathematics 3 - Real Analysis and MATH3620 Higher Pure Mathematics 3 - Functional Analysis or in MATH3181 Applied Mathematics 3 - Optimal Control Theory
School of Microbiology and Immunology

The Bio-Rad Prize in Immunology

- $250
For the best performance in MICR3051 Immunology 2

The Clinical Microbiology Update Programme Prize

- $300
For the best performance in MICR3081 Medical Bacteriology in the Bachelor of Science at Pass or Honours level

The Jackson Prize

- $500
For the best Honours student in MICR4013 Microbiology 4 (Honours)

School of Optometry

The ACBO Prize

- Textbooks or visual therapy equipment worth approximately $150
For the best overall performance throughout the Bachelor of Optometry course in Binocular and Children's Vision

The AOA Bookshop Prize

- $150 book voucher
For the best overall performance in Session 2, Year 1 of the Bachelor of Optometry course

The Australian Optometrical Association Prize

- $500
For outstanding academic performance in the Bachelor of Optometry course

The Bausch & Lomb Prize

- $200 or a pair of Ray-Ban sunglasses valued at approximately $300.00 and a plaque
For the best overall performance in Year 3 of the Bachelor of Optometry course

The BOC Ophthalmic Instruments Prize

- Colour Vision Test
For the best overall performance throughout the Bachelor of Optometry course in Colour Vision

The Designs for Vision Prize

- Products valued at approximately $250
For the best overall performance throughout the Bachelor of Optometry course in Primary Care Optometry

The ESSILOR Australia Pty Limited Prize

- $200
For the best performance in OPTM3301 Visual Science 3 and OPTM3309 Ocular Science 3

The Eycon Lens Laboratories Pty Limited Prize

- A trial fitting set of contact lenses
For the best overall performance throughout the Bachelor of Optometry course in Contact Lenses

The Head of School's Prize

- A pocket ophthalmoscope set valued at approximately $500
For outstanding overall performance in the Bachelor of Optometry course

The Hoya Lens Australia Pty Limited Prize

- $250
For the best overall performance in Ocular and Visual Science throughout the Bachelor of Optometry degree course

The Hydron Pty Limited Prize

- $250
For the best performance in OPTM4302 Clinical Optometry 4 (Year 4) in the Bachelor of Optometry degree course

The Hydron Pty Limited Prize

- $250
For the best overall performance in Year 4 of the Bachelor of Optometry degree course
The Martin Wells Pty Limited Prize
- $250
For the best performance in OPTM2208 Diagnosis of Ocular Disease and OPTM3208 Diagnosis and Management of Ocular Disease

The Optometric Vision Research Foundation Prize
- $250
For the best research project in the final year of the Bachelor of Optometry degree course

The Optometrists Association of NSW Prize
- $150
For the best overall performance in Year 2 of the Bachelor of Optometry course

The Perkins Optical Products Pty. Ltd. Prize
- $200
For the best overall performance throughout the Bachelor of Optometry course in Dispensing

The Perkins Optical Products Pty. Ltd. Prize
- $200
For the best overall performance in OPTM2303 Spectacle Lens and Optical Systems

The Protector Technologies Pty. Ltd. Prize
- $150
For the best overall performance throughout the Bachelor of Optometry course in Public Health and Occupational Optometry

The Safilo Australia Prize
- $150
For the best performance in OPTM2302 Clinical Optometry 2

The SOlA Optical Australia Pty. Ltd. Prize
- $200

The Theo Kannis Prize for Clinical Optometry
- $250
For the best overall performance in Clinical Optometry throughout the Bachelor of Optometry degree course

School of Physics

The Australian Institute of Physics Prize
- $100 and 1 year membership of the Institute
For the highest aggregate in any three units from PHYS3010 Quantum Mechanics, PHYS3050 Nuclear Physics, PHYS3021 Statistical Mechanics and Solid State Physics, PHYS3030 Electromagnetism, PHYS3060 Advanced Optics, or PHYS3041 Experimental Physics A in the Bachelor of Science degree course

The B L Turtle Memorial Astrophysics Prize
- $150
For the best performance in PHYS316G Astrophysics in the Bachelor of Science degree course

The Bob Dalglish Prize
- $100
For the best performance in a competition based on the use of microcomputers in PHYS1601 Computer Applications

The Bob Dalglish Prize
- $100
For the best performance in a project carried out within PHYS2601 Computer Applications

The Coherent Scientific Prize for Lasers, Optoelectronics & Applications
- $250
For the best performance in PHYS3710 Lasers and Applications or PHYS3720 Optoelectronics

The Gordon and Mabel Godfrey Prize in Theoretical Physics 3
- $200
For the best performance in a selection of Year 3 Theoretical Physics subjects chosen from: PHYS3510 Advanced
Mechanics, Fields and Chaos PHYS3530 Advanced Quantum Physics PHYS3550 General Relativity and PHYS3560 Relativistic Electrodynamics and Plasmas Physics

The Gordon and Mabel Godfrey Award in Theoretical Physics 4

- $200
For excellence in PHYS4503 Theoretical Physics 4 (Honours) in the Bachelor of Science degree course at honours level

The Head of School's Prize in Physics

- $50
For the best Year 4 Honours thesis in Physics in the Bachelor of Science degree course

The Nilsen Prize in Electronics

- Electronic test equipment valued at approximately $200
For excellence in PHYS3630 Electronics or PHYS3041 Experimental Physics A and PHYS3760 Laser and Optoelectronics Technology Laboratory 1

The Nucletron Prize in Experimental Physics

- $200
For the best performance in PHYS3041 Experimental Physics A in Year 3 of the Bachelor of Science degree course

The Physics Staff Prize for Physics 1

- $100
For the best performance in PHYS1002 Physics 1

The Physics Staff Prize for Physics 2

- $150
For the highest aggregate in PHYS2001 Mechanics and Computational Physics, PHYS2011 Electromagnetism and Thermal Physics, PHYS2021 Quantum Physics and Relativity and PHYS2031 Laboratory in the Bachelor of Science degree course

The Physics Staff Prize for Physics Honours

- $200
For the best performance in the Physics Honours Year in the Bachelor of Science degree course

School of Physiology and Pharmacology

The D I McCloskey Prize for Physiology/Pharmacology Honours

- $100
For the best performance in PHPH4218 Physiology 4 Honours or PHPH4258 Pharmacology Honours in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery in the Faculty of Medicine or course 3970 Bachelor of Science in the Board of Studies in Science and Mathematics

The D N Wade Prize for Medical Pharmacology

- $100
For the best performance in PHPH3055 Medical Pharmacology in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The Doerenkamp-Zbinden Prize in Pharmacology

- $100
For the highest aggregate in PHPH3152 Pharmacology in the Bachelor of Science degree course

The F C Courtice Prize

- $100
For the best performance in PHPH2018 Medical Physiology 1 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The F C Courtice Prize

- $100
For the best overall performance in Level III Physiology in a Bachelor degree course

The School of Physiology and Pharmacology Staff Prize For Medical Biology

- $100
For the best performance in PHPH1004 Biology for Medical Students in Year 1 of course 3801 Bachelor of Science
(Medicine) Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

The School of Physiology and Pharmacology Staff Prize for Physiology 1 or Principles of Physiology

- $100
For the best performance in PHPH2112 Physiology 1 or PHPH2122 Principles of Physiology in course 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery

The W E Glover Prize For Physiology

- $100
For the best performance in PHPH3014 Medical Physiology 2 in course 3801 Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery, 3821 Bachelor of Science Bachelor of Medicine Bachelor of Surgery or 3840 Bachelor of Arts Bachelor of Science (Medicine) Bachelor of Medicine Bachelor of Surgery

School of Psychology

The Australian Psychological Society Prize

- $300
For the best performance in Psychology 4 Honours

The Milon Buneta Prize

- $100
For the best performance in Year 2 of the Bachelor of Science (Psychology) degree course

The Psychology Staff Prize

- $80
For the best performance in Year 2 Psychology

School of Science and Technology Studies

The Ronayne Prize

- $150
For the best First Class Honours result in the Year 4 (Honours) program in the Bachelor of Science or Bachelor of Arts in Science and Technology Studies degree course at Honours level

Department of Textile Technology

The Charles Parsons Prize (Year 2 Textile Management)

- $500
For the best performance in Year 2 Textile subjects in the Bachelor of Science in Textile Management degree course

The Charles Parsons Prize (Year 2 Textile Technology)

- $500
For the best performance in Year 2 Textile subjects in the Bachelor of Science in Textile Technology degree course

The Charles Parsons Prize (Year 3 Textile Management)

- $500
For the best performance in Year 3 Textile subjects in the Bachelor of Science in Textile Management degree course

The Charles Parsons Prize (Year 3 Textile Technology)

- $500
For the best performance in Year 3 Textile subjects in the Bachelor of Science in Textile Technology degree course

The J B Speakman Prize

- $50
For the best undergraduate thesis in the final year of the Bachelor of Science in Textile Technology or Textile Management degree course

The R J Webster Prize

- $250
For the best performance throughout the Bachelor of Science in Textile Technology or Textile Management degree course
The Textile Institute Prize

- 2 years membership to the Institute
For the best performance in the Bachelor of Science in Textile Technology or Textile Management degree course

The National Farmers’ Federation Prize

- $150
For excellent academic attainment by a graduating student in the Bachelor of Science in Wool and Pastoral Sciences degree course

Department of Wool & Animal Science

The C R Luckock Prize

- $60
For the best performance in Meat Science in the Department of Wool and Animal Science

The P R McMahon Memorial Prize

- $100
For excellence in Wool Science in the Bachelor of Science in Wool and Pastoral Science degree course

Undergraduate and Postgraduate Prizes

Department of Applied Geology

The Laric V Hawkins Prize

- $500
For the best Field Project Report involving a substantial component of Geophysics in a postgraduate program, Year 4 of the Applied Geology course, or an equivalent Honours program in the Science or Advanced Science course
Postgraduate Prizes

Department of Food Science and Technology

The Spruson and Ferguson Patent and Trade Mark Prize

• $250
For the best performance in the Seminar presentation in the Master of Science or Doctor of Philosophy degree course in the Department of Food Science and Technology

School of Safety Science

The Blackmores Ltd Prize for In Vitro Toxicology Laboratory Science

• $250
For the best performance in Chemical Safety and Applied Toxicology (CSAT) laboratory based subject or project report on in-vitro toxicology in a postgraduate course in the School of Safety Science

School of Optometry

The Theo Kannis Prize for Advanced Clinical Optometry

• $250
For the best performance in OPTM8001 Advanced Clinical Optometry in the Master of Optometry degree course

The Ergonomics Society of Australia (NSW) Prize

• $100 and membership of the Society
For the best overall contribution to Organisational Psychology by a student in the Master of Science and Technology (Ergonomics) or the Graduate Diploma Science and Technology in Ergonomics degree course

School of Psychology

The College of Organisational Psychologists, NSW Section Prize

• $250
For the best overall contribution to Organisational Psychology by a student in the Master of Psychology (Applied) degree course

The Mitchell, Sutton & Gallagher Prize

• $200
For the best performance in PSYC7108 Research Thesis (Applied)

The MMI Insurance Prize for Introduction to Occupational Health

• $250
For the best performance in SESC9600 Introduction to Occupational Health in a postgraduate course in the School of Safety Science

The MMI Insurance Prize for Occupational Diseases and Injuries

• $250
For the best performance in SESC9620 Occupational Diseases and Injuries in a postgraduate course in the School of Safety Science

The MMI Insurance Prize for Principles of Ergonomics

• $250
For the best performance in SESC9620 Principles of Ergonomics or SESC9400 Ergonomics 1 and SESC9410 Ergonomics 2 (taken in the same calendar year) in a postgraduate course in the School of Safety Science
The National Safety Council of Australia Prize
- $100
For the best performance in SESC9100 Physical Hazards and SESC9200 Hazard and Risk Assessment (taken in the same calendar year) in a postgraduate course in the School of Safety Science

The National Safety Council of Australia Prize in Occupational Health and Safety
- $250
For the best performance by a graduating student in the Master of Science and Technology in Occupational Health and Safety degree course

The National Starch & Chemical Prize
- $200
For the best performance in SESC9850 Management of Dangerous Materials in a postgraduate course in the School of Safety Science

The Neil Adams Ergonomics Prize
- $500
For the best performance in three subjects, one of which is an Ergonomics subject, in the Ergonomics Program in the School of Safety Science

The Safety Institute of Australia (NSW Division) Bill Lessels' Memorial Prize for Graduate Diploma in Safety Science
- $200 book voucher
For the best overall performance by a graduating student in the Graduate Diploma in Safety Science degree course

The Whiteley Industries Prize
- $200
For the best performance in SESC9820 Chemical Safety and Toxicology in a postgraduate course in the School of Safety Science

The Workcover NSW Prize
- $300
For the best performance in SESC9211 Risk Management in a postgraduate course in the School of Safety Science

Department of Textile Technology

The Malcolm Chaikin Prize
- $200 and a bronze medal
For an outstanding PhD thesis in the Department of Textile Technology
The University of New South Wales • Kensington Campus
This Handbook has been specifically designed as a source of detailed reference information for first year, re-enrolling undergraduate and postgraduate students.

Separate Handbooks are published for:
- Arts and Social Sciences
- Built Environment
- College of Fine Arts
- Commerce and Economics
- Engineering
- Law
- Medicine
- Science
- Australian Graduate School of Management (AGSM)
- Australian Taxation Studies Program (ATAX)
- University College,
- Australian Defence Force Academy (ADFA)
- General Education.

For further information about the University - its organisation; staff members; description of disciplines; scholarships; prizes and so on, consult the University Calendar (Summary Volume). For further information on student matters, consult the UNSW Student Guide.
